IMPORTANT: PLEASE READ

This is not a literal translation of the moves as shown in the game. Some Fire Pro fans prefer literal accuracy to what is shown on screen while many simply don't care.

Eventually, we may release a new version of this move list, in which both the literally accurate names as well as the "American names" for certain moves (in brackets wherever it is necessary) will be included. For example, "Shoulder Throw (Back Body Drop)", in cases where a move is actually referred to by different names in Japan and America.

For now, this list should satisfy most of you.
