Fire Pro Wrestling D Edit Moves List By Kilroy and Frank James Chan

Version 1.0

Modified 03/14/2001

Special thanks to MadHat, Lukin, DAN/Crippler19, Spazz/Unibomb, and MassCarnage.

The latest version of this file can always be found at the Fire Pro Wrestling DreamWorld website: <http://www.fighting-spirit.com/fireprod>

This file contains the list of moves found in FPD's Wrestler Edit mode. All of the move names listed are the actual ones used in the game, which are generally the "Japanese names" for moves in cases where there is a difference from the name of the move known in America. Because of this, we have made an effort to include all of the American names for moves in brackets wherever necessary.

Example: "Shoulder Throw (Back Body Drop)"

The fact that we have kept as accurate to the in-game text as possible will generally benefit all of us in the long run, since it avoids any outright errors such as mis-interpreting preview animations to be a move that it really isn't. However, we fully acknowledge the efforts of all those who had contributed to the old list (listed above), as it was greatly appreciated.
