INTRODUCTION

=====

Welcome to the Shenmue slot machine FAQ. In this document you will find out all about the slot machines from Shenmue. Where they are, what you have to do and how to master them. This guide will make collecting all the mini toys much easier. Now, on with the FAQ.

=====

3.

THE GUIDE

=====

You can play on the slot machines at the slot house near the Heartbeats Bar and to the right of "Snack Linda" in Dobuita. It opens at 10:00 AM and closes at 12:00 AM. Once in their, you will see quite a number of slot machines, 16 in fact.

1-6: 1 coin bet machine

7-10: 5 coin bet machine

11-14: 10 coin bet machine

15-16: 20 coin bet machine

You can tell what number a machine is by looking under the controls of the slot machine, you can't miss it! The only reason for the numbers on each machine is to do with the Lapis Fortune Teller. If you go to her and select the right option out of the three there, she will tell you your lucky number. Play on the slot machine which has the number she gave to you. The machine she chooses will definitely give out three sevens of the same colour in a row, some time. So just keep playing until it does, trust me, it will some time. When you get three sevens you will win a prize depending on what machine you are on. I'll tell you more about that later.

When you go to a machine for the first time, you will have to deposit some of your yen. I recommend doing 1000 yen (maximum). Then the main slot machine screen will come up...

```

|_____|_____|_____|_____|
| 4th | \      / | | | |
|      | \      / | | | | - LEVER
| 2nd | --\---/--| | | | |
|      |  \ /   | | | |
| 1st | ----/----| | | |
|      |  / \   | | | |
| 3rd | --/---\--| | | |
|      | /      \ | | | |

|      |      | | | |
|_____|_____|_____|_____|
| PAY OUT | | BET | | START | |
|_____|_____|_____|_____|

```

PAY OUT - All the SEGA credits in the credit LED screen will pay out into the cash collector thing for you to pick up. This option is useless and just to make the game more realistic, if you just press B to get out of the slot machine screen it will pay out automatically. You don't even see it pay out either, it just goes straight into Ryo's SEGA credit collection.

BET - This bets an amount of money, which depends on what machine you are on (1 coin machine, it bets 1 coin each time). It takes money from your main credit value which is shown in the credit LED screen on the slot machine. You can bet 5 times, each time you do it enables a line. 1st, 2nd, 3rd, 4th and 5th are the lines, if you only bet one line (1st) then you will only be paid if you get something on that line. If, for example, you get three sevens on the 1st line you will be paid out the money due. But, if the sevens are on another line then you won't get anything if you didn't bet on it. So, to increase your chances of hitting the jackpot you should bet on all 5 lines. But you should start off only doing this on the lower coin machines, if you start betting on all 5 lines on the 20 coin machine with only 1000 credits your money will be gone fast. When you have a lot of a credits, around 8000 then you should starting betting more lines on the higher machines.

START - Simple, once you made your bets then select this option to start the machine!

LEVER - Again, another option to make the game more realistic. If for some reason you don't feel like pressing "start" then move Ryo's hand to the right of that option to come to the lever. He will pull it in true casino fashion. Great.

So that's how you play the slot machine, you will soon be addicted! Now an explanation of the SEGA credits.

In this slot house you don't gamble for money, but for SEGA credits. At first you do put some real money into the machine, it turns it into SEGA credits. The idea is to build up these credits. If your credits go back to zero, then you will have to put some more real money in.

But what do you do with these SEGA credits? Not much, you only use them to bet. However, you will win a prize if you get 10,000 or more credits then another prize when you get 50,000 or more credits.

NAME OF PRIZE	AMOUNT OF CREDITS NEEDED
Matsuyama Certificate	10,000
Mitsuka Certificate	50,000

The main good thing about the slot machines is that you can win a prize if you get three sevens in a row of the same colour. The prize you win is different depending on what type of coin machine your playing on.

NAME OF PRIZE	TYPE OF COIN MACHINE
Cherries	1 Coin
Mini Billiards	5 Coin
Mini Slot Machine	10 Coin
Mini Jukebox	20 Coin

Stupid collectable items you say? No way, these special collectable items can be traded online, on the Shenmue Passport disc. At the section "Everyone's Space" which is the bottom right option (it's also to the right of "Shenmue.com" option, just to be sure you can find it). Sadly, they are not traded with other online players but with a computer. The items listed above are traded for more collectable items! It may be worthless at the moment, but apparently we will be able to upload our Shenmue saves on Shenmue II so we can keep all the stuff we collected! So make sure you get them all. Here is the list of items you can trade for online...

Cherries:

NAME OF FIGURE	DESCRIPTION OF FIGURE
Big Philip	A big dolphin.
Big Robin	A big whale.
Chip	A pigeon, has grey head.
Little Philip	A small dolphin.
Little Robin	A small whale.
Pip	A pigeon, has black head
Pop	A white pigeon.
Rap	A black pigeon.

Mini Billiards:

NAME OF FIGURE	DESCRIPTION OF FIGURE
Pochi	A brown cat.
Philips	Big Philip and Lil' Phil
Pyonta	A white rabbit.
Kelly	A brown dog? Or cat?
John	A white cat.
Robins	Big Robin and Lil' Robin

Mini Slot Machine:

NAME OF FIGURE	DESCRIPTION OF FIGURE
Black Kitten (Kuro)	A black kitten.
Tiger Kitten (Tora)	A white-grey kitten.

Mini Juke Box:

NAME OF FIGURE	DESCRIPTION OF FIGURE
Mary	A white goat.

Are you having any difficulty getting three sevens on the slot machines?  
Then read on.

Here is a routine that I used to get all the figures listed above.

8:30AM: Woke up after a long night of Space Harrier...my head hurts...  
Save your game. Make your way to the dojo and fight Fuka-San  
(if you can), as nothing much opens until 10AM.

9:00AM: Make your way to Dobuita, check the Tomato Mart for any new  
tapes if you still need some. Run around a bit, kill some time  
until 10AM.

10:00AM: Run into the Lapis Fortune Teller place straight away! After  
selecting yes to have your fortune told (left option) some  
more options will come up. Select the one on the right, make  
sure you have subtitles on if you can't read Japanese. As you  
will need to read the number she gives out (luckily Japanese

don't use Kanji for numbers any more). Remember the number she gives you and run to the slot machines!

10:20AM: Go to the machine with the number she gave you on. Start betting! If it is a 1, 5, 10 coin machine I recommend maybe doing all five lines. If it is a 20 coin machine, maybe only do three a time. It really depends on how much money you have.

10:20AM Onwards...: Just keep on betting until you get three sevens of the same colour. When you do, the alarm thing on top of the machine will go off and the man who owns the place will come up and reward you with your prize. One important rule, have patience! You could get three sevens at 12PM, or it might not come until 6PM. But it will come some time! If you screw something up (lose all your money) reset and load up your game that you should of saved in the morning.

Time after hitting Jackpot: Go back to your house and save your game. If it is still quite early, I recommend going back to the slot house just to get some credits for tomorrow's session. If it is quite late, then go practise Space Harrier or Hang On on the SEGA Saturn in Ryo's house. I did this, because I needed to get the certificates for winning those games.

11:30PM: Go to bed and repeat the sequence again!

I have noticed some times that the Lapis Fortune Teller does not give you a lucky number. I think it might be like the clue system, you can't use it that much very often which is a pain. There's not much you can do to get around this. If Lapis didn't give me a reading then I would make sure I had saved my game in the morning, then just pick a random machine and play until it gives me three sevens in a row (if it ever does that is). If it doesn't and I haven't gained any credits I just reset and load up my save I did in the morning, then choose a different machine. If your serious about getting all the figures and 50,000 credits then I suggest you do this as well. Remember, you only have until April 15th! That's when the bad ending kicks in. I started to do the slot machines around the 10th of February, and I did it with loads of time left.

If you want to collect all the collectables from the Slot machines game, then you must get three lucky sevens 21 times! Or if your just collecting the figures online and not the cherries and mini things, then you have to do it 17 times. And you usually get one item a day, so you don't have that much time if you think about it. Just make sure you get a item every day and you will be fine.

=====  
4. FAQ  
=====

-----

(1) Q. Why did you write an FAQ on the slot machines?

A. When I first tried to do the slot machines, I had a lot of trouble collecting all the figures. So I decided to share this knowledge to help some people.

-----  
=====  
5. CREDITS
