***** How to recruit the crew members ? *****

Some of the crew members of the Delphinias have some specific ways to recruit them. First, you have to possess the super battleship Delphinias (デルフィナス) and Vayce (ヴァイス) must be the captain and chief of the group. Some members join the group automatically.
Here are the information that I will give :

- Name : Obvious, isn't it ? ;)
- Job : What does he or she do on board ?
- Location : The island where the member is.
- Condition : This the way how to recuit him or her.
- Description : A little description of the crew member.

- Effect : Advantage given when you use him or her in battleship fights.
- Crew Crew : Description of what the member do in the special attack
クルー クルー.

NDKL : To use this special Crew Attack, your gauge (upper part of the screen) must be at its maximum and Vayce has to be the captain of the Delphinas. You have then two choices : an attack with an enormous amount of damage (well, you make the moon crash on the ennemy O.Ox) and a special attack called クルー クルー in which your crew members come with fun animations. This is what I describe in the [Crew Crew] section.
