=====
Introduction [A10]
=====

Hello, Im Raphael and this is my first time making a guide, also, Im not a native english speaker so please feel free to correct any incorrect grammar and wordings, anyone who wishes to mail me or add something I may have missed can e-mail me at endore2003@yahoo.com or message me at my friendster account using the same e-mail address.

So what is Battlebots Design & Destroy? It's a game based on the series where Electritians, programmers and the like create Robots and make them battle on a robot arena, the robots in this game are mostly based on those robots that were entered in the competition.

=====
BASICS [B20]
=====

- START BUTTON - Pause
- SELECT BUTTON - N/A
- A BUTTON - Accept / Use weapon1
- B BUTTON - Cancel / Use weapon2
- L BUTTON - Player / Enemy View
- R BUTTON - Use weapon3 / Repair part (Pit mode)

- M(Movement) = Movement speed
- P(Power) = Health points
- A(Armor) = Defense
- W(Weapon) = Attack power

=====
Interface [C30]
=====

1. TOURNAMENT MODE

- Light weight
- Middle weight
- Heavy weight
- Super Heavy weight

2. BRAWL MODE

3. MULTI PLAY

4. PASSWORDS

5. OPTIONS

1. TOURNAMENT MODE - Here you can create your own bot and compete on 4 different divisions, each division has 4 different opponents:

Light weight - Backlash, Toe Crusher, Ziggo, Mouser Mecha-Catbot
Middle weight - Sunshine Lollibot, Hazard, Deadblow, Complete Control
Heavy weight - Biohazard, Tazbot, Overkill, El diablo grande
Super Heavy weight - Diesector, Minion, Jaws of death, Toro

You can unlock different divisions, maps, and bots for brawl mode by defeating the enemies here.

2. BRAWL MODE - This is simply a skirmish mode where you can select the map, division, number of players, and ofcourse, the participating bots.

You can choose between the 4 ready made bots in each division or use your own custom made bots.

3. MULTI PLAY - Link with another GBA.

4. PASSWORDS - This is similar to saving except it uses passwords to load your bots and divisions.

5. OPTIONS - Adjustables include:

~ Timelimit
~ Brightness
~ SFX
~ Music
~ Controls
~ Play Mode

=====
Tournament Guide [D40]
=====

I wouldn't give much information on tactics since this game is pretty much easy plus, you should try to enjoy the game more by experimenting and trying out your own design and tactics.

1. Light Weight Division [D41]

Firstoff, you have to create your bot, refer to [Bot guide] to see the parts you can use on the four different divisions. Note that you can use more than one weapon on a single chassis as long as it follows the weight requirment.

Once your done, you will face your first opponent.

Bot Name: Toe Crusher
Difficulty: Easy
Prize Money: \$100
Sponsorship: BATTERY

You can choose between two arenas, Battlebox and Oilrig, as the game progresses you will be able to unlock two more arenas.

Like most enemies in this game, this guy is very easy, its only strong point is its speed and has weak attack power so he shouldn't really be a problem. This fight will serve as a practice or tutorial for beginners, after the fight, you will be rewarded with \$100 and a Sponsorship for a free battery, use the money to repair all damaged parts, it wont be that expensive and repairing can really help you throughout the game, also, dont forget to check on the battery section and look for a Nicad Rechargeable pack, this would be sold at \$0, buy it and your previous battery will automatically be sold and replaced by the new one.

Your Second Opponent will be:

Bot Name: Mouser Mecha-Catbot
Difficulty: Easy
Prize Money: \$300
Sponsorship: None

Another easy fight, he may flip you a couple of times but his defense is very weak, destroying him will be a piece of cake.

I guess now you have already gotten the hang of it and your now ready to take on the tournament by your self, so i wont tell you what to do anymore, just excercise your imagination and be creative when assembling your bots. I will provide little if any support on the next 14 opponents.

Bot Name: Backlash
Difficulty: Normal
Prize Money: \$300
Sponsorship: TIRES

Bot Name: Ziggo
Difficulty: Easy
Prize Money: N/A
Sponsorship: None

He is relatively weak, although you should watch your weapon as he tends to destroy it leaving you with no other option but to use the arena against him.

After the fight, you will be awarded with a Light Wt. Div. throphy and you will move on to the Middle Weight Division.

2. Middle Weight Division [D42]

You can now use more chasses and a lot of new equipment, refer to [Bot Guide] if you need some help figuring out some of the equipment, you will also be able to use the new airplane graveyard map. Make yourself a new bot and fight your first opponent in the Middle weight Division.

Bot Name: DeadBlow
Difficulty: Normal
Prize Money: \$300

Sponsorship: WEAPON

Has decent defense and decent attack, after the battle, check the weapons area and see if the weapon is useable by your bot, if you dont see anything priced \$0, then the weapon given is only useable by another chassis.

Bot Name: Lollibot
Difficulty: Normal
Prize Money: \$500
Sponsorship: TIRES

Yep, you guessed it, another easy fight =).

Bot Name: Complete Control
Difficulty: Normal
Prize Money: \$500
Sponsorship: None

This guy has a launcher and a hammer infront so the easiest way to beat him is by attacking him on his sides and at the back.

Bot Name: Hazard
Difficulty: Normal
Prize Money: N/A
Sponsorship: CHASSIS

Watchout, His attacks comes from all directions so try not to give him an advantage and dont let him get all over you if your not using a spinner type chassis. After beating him, you get to be the Middle weight division champ so now your off to the big boys.

3. Heavy Weight Division [D43]

Im not 100% sure but once I entered the Heavy weight division, I was given a free Cylindrical Spinbot Welded Steel chassis, maybe its because I used a cylindrical spinbot in the Middle weight or something, anyway, welcome to the heavy weight division, there will be some new chasses and equipment so make another bot and go get em. The volcano map will now be unlocked so explore itif you like.

Bot Name: Overkill
Difficulty: Normal
Prize Money: \$1106
Sponsorship: BATTERY

Repair, check the new battery, and go to your next match.

Bot Name: Tazbot
Difficulty: Normal
Prize Money: \$1500
Sponsorship: None

Another enemy with spinbot like weapons, repairing shouldnt be a problem by now since the enemies give a lot of money so don't conserve your money by not repairing.

Bot Name: El Diablo Grande

Difficulty: Normal
Prize Money: \$1750
Sponsorship: None

He has a spinning spiked drum upfront and some kind of tosser or a wedge at the back, beating him wouldnt be so easy but it also wont be hard.

Bot Name: Biohazard
Difficulty: Normal
Prize Money: N/A
Sponsorship: None

This guy could be very annoying, He has a launcher so he would be flipping you over a lot, and he cannot be flipped so refrain from using tosser type weapons. You are now the heavy weight division champ! you will now be moved to the final division in the tournament which is:

4. Super Heavy Weight Division [D44]

This is the final division so make sure you make a decent bot, there would be a lot of new equipment so suit up and head to your first match.

Bot Name: Jaws of Death
Difficulty: Normal
Prize Money: \$1000
Sponsorship: None

Don't let the huge jaws get to you since this guy is a piece of cake.

Bot Name: Minion
Difficulty: Normal
Prize Money: \$2000
Sponsorship: MOTOR

He is equipped with a drill in front and a wedge at the back so try to attack him head on to avoid getting flipped.

Bot Name: Diesector
Difficulty: Hard
Prize Money: \$3000
Sponsorship: None

This guy has 3 weapons infront so avoid attacking him head on try to get around him and hammer him at the back. after the fight, get ready and face your final opponent.

Bot Name: Toro
Difficulty: Hard
Prize Money: N/A
Sponsorship: None

First off, try to use a bot with a good attack power since this guy has a very hard shell and can flip you a lot, since TKOs are hard to win, your best bet is to KO him and viola, Congratulations! you have beaten the game! *Note that you can now use your former opponents in brawl mode, you can also enter your bot's password and use it in brawl or multiplayer modes.

Each chassis can equip different parts, here I will show you what parts a specific chassis can use. Parts with (*) sign indicates that it includes some parts that are unique to that chassis or cannot be equipped by some but not necessarily all chassis. The (o) Sign signifies a chassis that has already been described on a lower division and has little changes (Those equipment that are not marked by (*) on other chassis are useable by these), only new unique equipment that can be used by these chassis if any, will be shown.

1. LIGHT WEIGHT DIVISION [E51]

A. CHASSIS: Boxybot, 8th Inch Sheet Steel
 [E511]

Tires: Urethane Wheels
 Synthetic Rubber Tire
 Soft Plastic Tire
 Soft Foam Rubber

Battery: High-Discharge Gel Cell
 Nickel Metal Hydride Pack
 Nicad Rechargeable Pack
 Sealed Lead Acid Battery

Motor: DC Gearhead Motor
 Cordless Drill Motor and Gearbox
 Large Pancake Motor
 Medium Pancake Motor

* Weapon: Concrete Drill
 Diamond Tip Drill
 Hammer
 6 IN Horizontal Saw
 * Spike Plow
 * Vertical Saw

Armor: Heat-Treated Layered Steel Plates
 Riveted Aluminum Case
 Steel Plating
 Plywood Boards

B. CHASSIS: Scoopbot, Steel Tube and Angled Wedge
 [E512]

Tires: Urethane Wheels
 Synthetic Rubber Tire
 Soft Plastic Tire
 Soft Foam Rubber

Battery: High-Discharge Gel Cell
Nickel Metal Hydride Pack
Nicad Rechargeable Pack
Sealed Lead Acid Battery

Motor: DC Gearhead Motor
Cordless Drill Motor and Gearbox
Large Pancake Motor
Medium Pancake Motor

Weapon: Concrete Drill
Diamond Tip Drill
Hammer
6 IN Horizontal Saw

Armor: Heat-Treated Layered Steel Plates
Riveted Aluminum Case
Steel Plating
Plywood Boards

c. CHASSIS: Plowbot, Chromolly Tube and Plow
[E513]

Tires: Urethane Wheels
Synthetic Rubber Tire
Soft Plastic Tire
Soft Foam Rubber

Battery: High-Discharge Gel Cell
Nickel Metal Hydride Pack
Nicad Rechargeable Pack
Sealed Lead Acid Battery

Motor: DC Gearhead Motor
Cordless Drill Motor and Gearbox
Large Pancake Motor
Medium Pancake Motor

* Weapon: Concrete Drill
Diamond Tip Drill
Hammer
6 IN Horizontal Saw
* Vertical saw

Armor: Heat-Treated Layered Steel Plates
Riveted Aluminum Case
Steel Plating
Plywood Boards

D. CHASSIS: Spinbot, Angle Iron Frame
[E514]

Tires: Urethane Wheels
Synthetic Rubber Tire

Soft Plastic Tire
Soft Foam Rubber

Battery: High-Discharge Gel Cell
Nickel Metal Hydride Pack
Nicad Rechargeable Pack
Sealed Lead Acid Battery

Motor: DC Gearhead Motor
Cordless Drill Motor and Gearbox
Large Pancake Motor
Medium Pancake Motor

* Weapon: * Mace
* Kinetic Weapon(1)
* Kinetic Weapon(2)
* Hardened Mace

Armor: Heat-Treated Layered Steel Plates
Riveted Aluminum Case
Steel Plating
Plywood Boards

E. Chassis: Tankbot, Aluminum Plate Exoskeleton
[E515]

Tires: Urethane Wheels
Synthetic Rubber Tire
Soft Plastic Tire
Soft Foam Rubber

Battery: High-Discharge Gel Cell
Nickel Metal Hydride Pack
Nicad Rechargeable Pack
Sealed Lead Acid Battery

Motor: DC Gearhead Motor
Cordless Drill Motor and Gearbox
Large Pancake Motor
Medium Pancake Motor

* Weapon: Concrete Drill
Diamond Tip Drill
Hammer
6 IN Horizontal Saw
* Spike Plow
* Vertical Saw

Armor: Heat-Treated Layered Steel Plates
Riveted Aluminum Case
Steel Plating
Plywood Boards

2. MIDDLE WEIGHT DIVISION [E52]

A. CHASSIS: Long Wedge, Riveted Steel L-Beam
[E521]

Tires: Hard Foam Rubber Tires
Solid Rubber Wheel
Lawnmower Wheels
Pneumatic Rubber Tire
Supergel Sticky Tires

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack
Sealed Lead Acid Battery
Rechargeable Nicad Pack

Motor: Medium Pancake Motor
Cordless Drill Motor and Gearbox
Winch Motor
Large Pancake Motor
Rare Earth Magnet Motor

Weapon: Concrete Drill
Hammer
6 IN Horizontal Saw
Vertical Saw

Armor: Steel Plating
Bolted Aluminum Case
Welded Titanium
Polycarbonate Sheets
Double Layered Steel Plates
Plywood Boards

B. CHASSIS: Scoopbot, Steel Tube and Angled Wedge (O)
[E522]

c. CHASSIS: Tankbot, Reinforced Steel Tube Cage (o)
[E523]

* Weapon: * Flipper

D. CHASSIS: Spinbot, Welded Chromolly Tube
[E524]

Tires: Hard Foam Rubber Tires
Solid Rubber Wheel
Lawnmower Wheels
Pneumatic Rubber Tire
Supergel Sticky Tires

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack
Sealed Lead Acid Battery
Rechargeable Nicad Pack

Motor: Medium Pancake Motor
Cordless Drill Motor and Gearbox
Winch Motor
Large Pancake Motor

Rare Earth Magnet Motor

Weapon: Mace
Kinetic Weapon
Kinetic Weapon 2

Armor: Steel Plating
Bolted Aluminum Case
Welded Titanium
Polycarbonate Sheets
Double Layered Steel Plates
Plywood Boards

E. CHASSIS: Spinbot, Machined Aluminum Frame
[E525]

Tires: Hard Foam Rubber Tires
Solid Rubber Wheel
Lawnmower Wheels
Pneumatic Rubber Tire
Supergel Sticky Tires

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack
Sealed Lead Acid Battery
Rechargeable Nicad Pack

Motor: Medium Pancake Motor
Cordless Drill Motor and Gearbox
Winch Motor
Large Pancake Motor
Rare Earth Magnet Motor

Weapon: Mace
Kinetic Weapon
Kinetic Weapon 2

Armor: Steel Plating
Bolted Aluminum Case
Welded Titanium
Polycarbonate Sheets
Double Layered Steel Plates
Plywood Boards

F. CHASSIS: Boxybot, Aluminum Plate Exoskeleton
[E526]

Tires: Hard Foam Rubber Tires
Solid Rubber Wheel
Lawnmower Wheels
Pneumatic Rubber Tire
Supergel Sticky Tires

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack
Sealed Lead Acid Battery
Rechargeable Nicad Pack

Motor: Medium Pancake Motor
Cordless Drill Motor and Gearbox

Winch Motor
Large Pancake Motor
Rare Earth Magnet Motor

* Weapon: Concrete Drill
Hammer
6 IN Horizontal Saw
* Flipper
* Spike Plow
Vertical Saw

Armor: Steel Plating
Bolted Aluminum Case
Welded Titanium
Polycarbonate Sheets
Double Layered Steel Plates
Plywood Boards

3. HEAVY WEIGHT DIVISION [E53]

A. CHASSIS: Speedster, Reinforced Cromolly Tube
[E531]

Tires: Urethane Wheels
Rubber Tires
Hard Rubber Wheels

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack
High Capacity Sealed Lead Acid
Sealed Lead Acid Battery
Rechargeable Nicad Pack
Experimental Military Battery
Gas Tank

Motor: DC Gearhead Motor
High Torque Motor Drive
Wheelchair Motor and Gearbox
Winch Motor
Gas Engine

* Weapon: * Tungsten Carbide Drill
Pneumatic Hatchet
Steel Sledgehammer
* 8IN Horizontal Kinetic Disc
Nitrogen Powered Pneumatic Axe
* Spiked Plow
* Dual Cutter Array
Metal-Cutting Chainsaw
Pneumatic Multi-Spike Array
* Hydraulic Jaws of Life
Pneumatic Launcher

Armor: Steel Plating
Welded Aluminum Case
Welded Titanium
Polycarbonate Plastic Sheets
Double Layered Steel Sheets

Wooden Reinforcement
Hard Kevlar Shell
Laminated Titanium
Heat-Treated Steel Plates

B. CHASSIS: Plowbot, Chromolly Tube and Plow (o)
[E532]

- * Wheels: * Solid Rubber Treads
- * Steel and Rubber Treads

C. CHASSIS: Spinbot, Machined Aluminum Frame (o)
[E533]

- * Weapon: * Diamond Hardened Swing Blade
- * Hammer Spinner Appendage
- * Heat-Treated Steel Mace
- * Kinetic Knife Teeth Spinner Attachment
- * Extended Kinetic Arms

D. CHASSIS: Cylindrical Spinbot, Welded Steel
[E534]

Tires: Urethane Wheels
Rubber Tires
Hard Rubber Wheels

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack
High Capacity Sealed Lead Acid
Sealed Lead Acid Battery
Rechargeable Nicad Pack
Experimental Military Battery
Gas Tank

Motor: DC Gearhead Motor
High Torque Motor Drive
Wheelchair Motor and Gearbox
Winch Motor
Gas Engine

- * Weapon: * Diamond Hardened Swing Blade
- * Hammer Spinner Appendage
- * Heat-Treated Steel Mace
- * Base Saw
- * Kinetic Knife Teeth Spinner Attachment
- * Extended Kinetic Arms

Armor: Steel Plating
Welded Aluminum Case
Welded Titanium
Polycarbonate Plastic Sheets
Double Layered Steel Sheets
Wooden Reinforcement
Hard Kevlar Shell
Laminated Titanium
Heat-Treated Steel Plates

E. CHASSIS: Custom Scoop, Machined Aluminum Plates
[E535]

* Tires: Urethane Wheels
Rubber Tires
Hard Rubber Wheels
* Solid Rubber Treads
* Steel and Rubber Treads

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack
High Capacity Sealed Lead Acid
Sealed Lead Acid Battery
Rechargeable Nicad Pack
Experimental Military Battery
Gas Tank

Motor: DC Gearhead Motor
High Torque Motor Drive
Wheelchair Motor and Gearbox
Winch Motor
Gas Engine

* Weapon: * Tungsten Carbide Drill
Pneumatic Hatchet
Steel Sledgehammer
* 8IN Horizontal Kinetic Disc
Nitrogen Powered Pneumatic Axe
* Dual Cutter Array
Metal-Cutting Chainsaw
Pneumatic Multi-Spike Array
* Hydraulic Jaws of Life
Pneumatic Launcher

Armor: Steel Plating
Welded Aluminum Case
Welded Titanium
Polycarbonate Plastic Sheets
Double Layered Steel Sheets
Wooden Reinforcement
Hard Kevlar Shell
Laminated Titanium
Heat-Treated Steel Plates

F. CHASSIS: Long Wedge, Riveted Steel L-Beam (o)
[E536]

4.SUPER HEAVY WEIGHT DIVISION [E54]

A. CHASSIS: Boxybot, Angled Steel Frame
[E541]

* Tires: Go-Kart Wheels
Hard Rubber Tires
Urethane Wheels
Super Gel Sticky Tires
Steel Hub Rubber Tires
Studded Rubber Tires
* Steel Reinforced Rubber Treads

* Rubber Treads

Tires: Go-Kart Wheels
Hard Rubber Tires
Urethane Wheels
Super Gel Sticky Tires
Steel Hub Rubber Tires
Studded Rubber Tires

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack Acid
Sealed Lead Acid Battery
Rechargeable Nicad Pack
Experimental Military Battery
Gas Tank

* Weapon: Tungsten Carbide drill
Diamond Tip Concrete Drill
Pneumatic Hatchet
20IN Horizontal Kinetic Disc
* 14IN Horizontal Diamond Saw
* 12IN Horizontal Kinetic Disc
* Pneumatic Flip Wedge
Spiked Plow
Metal-Cutting Chainsaw
Pneumatic Spike Array
* Large Hydraulic Jaws of Life
* Pneumatic Flipper Jaw
* Spinning Spiked Drum

Armor: Steel Plating
Welded Aluminum Case
Welded Titanium
Polycarbonate Plastic Sheets
Double Layered Steel Sheets
Wooden Reinforcement
Hard Kevlar Shell
Laminated Titanium
Heat-Treated Steel Exoskeleton

B. CHASSIS: Scoopbot Steel tube and Angled Wedge
[E542]

* Tires: Go-Kart Wheels
Hard Rubber Tires
Urethane Wheels
Super Gel Sticky Tires
Steel Hub Rubber Tires
Studded Rubber Tires
* Steel Reinforced Rubber Treads
* Rubber Treads

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack Acid
Sealed Lead Acid Battery
Rechargeable Nicad Pack
Experimental Military Battery
Gas Tank

Motor: DC Gearhead Motor

Power WheelChair Motor
Super Pancake Motor
Hammer Drill Motor and Gearbox
Rare Earth Magnet Motor
Gas Engine
Turbo Gas Engine

Weapon: Diamond Tip Concrete Drill
Pneumatic Hatchet
Pneumatic Spike Array

Armor: Steel Plating
Welded Aluminum Case
Welded Titanium
Polycarbonate Plastic Sheets
Double Layered Steel Sheets
Wooden Reinforcement
Hard Kevlar Shell
Laminated Titanium
Heat-Treated Steel Exoskeleton

C. CHASSIS: Custom Reinforced Wedge
[E543]

Tires: Go-Kart Wheels
Hard Rubber Tires
Urethane Wheels
Super Gel Sticky Tires
Steel Hub Rubber Tires
Studded Rubber Tires

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack Acid
Sealed Lead Acid Battery
Rechargeable Nicad Pack
Experimental Military Battery
Gas Tank

Motor: DC Gearhead Motor
Power WheelChair Motor
Super Pancake Motor
Hammer Drill Motor and Gearbox
Rare Earth Magnet Motor
Gas Engine
Turbo Gas Engine

* Weapon: Tungsten Carbide Drill
Diamond Tip Concrete Drill
20IN Horizontal Kinetic Disc
* 14IN Horizontal Diamond Saw
* 12IN Horizontal Kinetic Disc
Spiked Plow
Dual Cutter Array
Metal-Cutting Chainsaw
Pneumatic Spike Array
Large Hydraulic Jaws of Life
Spinning Spiked Drum

Armor: Steel Plating

Welded Aluminum Case
Welded Titanium
Polycarbonate Plastic Sheets
Double Layered Steel Sheets
Wooden Reinforcement
Hard Kevlar Shell
Laminated Titanium
Heat-Treated Steel Exoskeleton

D. CHASSIS: Cylindrical Spinbot, Angle Iron Frame
[E544]

Tires: Go-Kart Wheels
Hard Rubber Tires
Urethane Wheels
Super Gel Sticky Tires
Steel Hub Rubber Tires
Studded Rubber Tires

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack Acid
Rechargeable Nicad Pack
Experimental Military Battery
Gas Tank

Motor: DC Gearhead Motor
Power WheelChair Motor
Super Pancake Motor
Hammer Drill Motor and Gearbox
Rare Earth Magnet Motor
Gas Engine
Turbo Gas Engine

* Weapon: Kinetic Spinner Attachment
Heat-Treated Steel Mace
Knife Teeth Spinner Attachment
Extended Kinetic Arms
* 10IN Base Saw
* 14IN Ultra Hardened Base Saw

Armor: Steel Plating
Welded Aluminum Case
Welded Titanium
Polycarbonate Plastic Sheets
Double Layered Steel Sheets
Wooden Reinforcement
Hard Kevlar Shell
Laminated Titanium
Heat-Treated Steel Exoskeleton

E. CHASSIS: Tank Wedge, Angle Iron Frame
[E545]

* Tires: * Rubber Treads
* Steel Reinforced Rubber Treads

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack Acid
Rechargeable Nicad Pack

Experimental Military Battery
Gas Tank

Motor: DC Gearhead Motor
Power WheelChair Motor
Super Pancake Motor
Hammer Drill Motor and Gearbox
Rare Earth Magnet Motor
Gas Engine
Turbo Gas Engine

Weapon: Tungsten Carbide Drill
Diamond Tip Concrete Drill
Pneumatic Hatchet
20IN Horizontal Kinetic Disc
Pneumatic Spike Array

Armor: Steel Plating
Welded Aluminum Case
Welded Titanium
Polycarbonate Plastic Sheets
Double Layered Steel Sheets
Wooden Reinforcement
Hard Kevlar Shell
Laminated Titanium
Heat-Treated Steel Exoskeleton

F. CHASSIS: Dome Spinbot, Welded Chromolly Cage
[E546]

Tires: Go-Kart Wheels
Hard Rubber Tires
Urethane Wheels
Super Gel Sticky Tires
Steel Hub Rubber Tires
Studded Rubber Tires

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack Acid
Rechargeable Nicad Pack
Experimental Military Battery
Gas Tank

Motor: DC Gearhead Motor
Power WheelChair Motor
Super Pancake Motor
Hammer Drill Motor and Gearbox
Rare Earth Magnet Motor
Gas Engine
Turbo Gas Engine

Weapon: Kinetic Spinner Attachment
Heat-Treated Steel Mace
Knife Teeth Spinner Attachment
Extended Kinetic Arms

Armor: Steel Plating
Welded Aluminum Case
Welded Titanium
Polycarbonate Plastic Sheets

Double Layered Steel Sheets
Wooden Reinforcement
Hard Kevlar Shell
Laminated Titanium
Heat-Treated Steel Exoskeleton

G. CHASSIS: Titanium Plate Exoskeleton
[E547]

* Tires: Go-Kart Wheels
Hard Rubber Tires
Urethane Wheels
Super Gel Sticky Tires
Steel Hub Rubber Tires
Studded Rubber Tires
* Steel Reinforced Rubber Treads
* Rubber Treads

Battery: High-Discharge Dry Cell
Nickel Metal Hydride Pack Acid
Rechargeable Nicad Pack
Experimental Military Battery
Gas Tank

Motor: DC Gearhead Motor
