by PuroGeek

Updated to v1.1 on Jun 9, 2003

FINAL FIRE PROWRESTLING  
Specialty & Finisher List  
v1.1 by PuroGeek (jacquismo@hotmail.com)

---

This guide will give you each character's specialties (usually four), along with their finishing move. Now you can finish your opponents in style, just like the real wrestlers!

Note that this FAQ is based on the Japanese version, so there are some differences from the U.S. version, such as available characters and order of promotions. Move sets are the same for characters present in both, however.

-Wrestlers are listed by default order in which they appear on the list of their promotion, from top to bottom.

-Some move names have been changed to the specialty name given to them by the wrestler that performs it. Others are just due to personal preference. Please note that some names are approximations. For example, Chris Jericho does not have the Lionsault, but has been given a top-rope moonsault, which is the closest thing to his Lionsault that Spike could give without animating a new move. Other similar replacements occur for other wrestlers. If you think one of the namings is incorrect, please e-mail me.

-For some strange reason, Kane has the odd distinction of being the only character to have five specialty moves instead of the normal four.

-I'm not perfect. If you find any mistakes or additions (especially specialty names that I missed) that need to be made, or if you have any questions about something, e-mail me. Any questions about locating roms or emulators will be ignored. Thanks!
