

Lego Star Wars FAQ/Walkthrough

by merc for hire

Updated to v1.0 on Aug 21, 2015

This walkthrough was originally written for Lego Star Wars on the GBA, but the walkthrough is still applicable to the PC version of the game.

Negotiating Room

After the cutscene you will be lead to a confrence room. After an explosion goes off you will need to investigate it. Before leaving the room jump onto the desk to collect some bolts. Then shake the four chairs that around the table by pressing LEFT SHOULDER BUTTON.

After shaking all of the chairs for all of their worth approach the switch on the wall to the right of the door and press LEFT SHOULDER BUTTON to press the switch and open the door. In the next hall a small army of Battle Droids will come up the hall.

Deflect their shots by using your lightsaber by pressing B. This will knock their shots back into them and thus injuring them. Take out the first three droids and continue down the hall, while collecting bolts along the way, to the corner where another three droids lay in wait.

Destroy the three Battle Droids and go down the hallway to the right. In the room at the end of the hall are two Battle Droids and a blue bolt. As well as a Sand Person. Approach him and you can buy health for 25 bolts. Take it if you are in dire need of health by pressing A. If not return to the hall.

Now continue to go down the hall. Step on the tiles on the ground for items to drop from the ceiling. The first tile drops a yellow bolt. The second drops a force refill and the third is health. Enter the room at the end of the hall and destroy the two Battle Droids.

Approach the glowing green legos next to the wall and use Force Move to turn them into a platform. Jump onto it and then onto the ledge. Defeat the two Battle Droids up here and then use Force Move on the glowing green legos to make another platform. Jump onto it and then onto the ledge.

Destroy the single Battle Droid at the beginning of the hall and then continue down it. Destroy the four Battle Droids at the corner of the hallway. At the corner where the Battle Droids are you can step on the four tiles on the ground to open the door to the left or go down the hall to the right.

For some health go down the hall to the right and step on the tile at the end of the hall. If you are ready go through the door you opened by stepping on the four tiles. In the next room take out the three Battle Droids and then use Force Move on the pile of legos to the right.

Jump onto the newly made platform and then onto the ledge. Go down the hall and defeat the four Battle Droids, while collecting the blue and grey bolts. Continue to go down the hallway upon defeating the four Battle Droids and go past the arrow at the end of the hall to reach a new area.

Interior

In the next room collect the bolts in the left and right corners. Then proceed down the hallway. Step on the flashing tiles on the left side of the hallway in order until you reach the last one. You will gain several yellow bolts and a damage multiplier.

Take out the three Battle Droids then return to the door you came through. Along the wall there will be a hall leading off from the main hall. There will be a turret in this hall so go down the hall and destroy the turret to get

health and a Death Star Plan. the first out of five.

Now go down the hallway in the opposite direction as the door you came in through. Along the way to the left will be a ledge that you can hop onto. Keep jumping from ledge to ledge until you reach the top with three tiles and two Battle Droids and a vent door.

Destroy the two Battle Droids and then use Force Move on the vent door to open it. Now enter through the vent. In the next room are a lot of yellow bolts and destructable boxes that yield health and force refill. Collect all of these items and Battle Droids will begin to spawn.

Fight your way out to the bottom of the room and go through the door to return to the hall you were originally on. Now press the three tiles and an Invincibility pick up will drop down. Quickly run to the end of the hall and go around the corner to find a turret.

Destroy it while you are invincible. Now jump onto the ledge that is above the turret to find a Sand Person. He will sell you health for 50 bolts. Take it if you need it then drop back down onto the hallway. Continue down the hall to the right.

Next to the ledge with the Sand Person on it to the right is another ledge you can jump onto. There are two Battle Droids up here and a damage multiplier. Fall back down onto the main hallway and destroy the turret and any nearby Battle Droids.

After clearing out any nearby enemies destroy the box to get some bolts. Keep going down the hall to the right. There will be another ledge to the right of the ledge you were just on. There will be a Sand Person up here who will sell you a force refill.

Buy it for 50 bolts should you need it. If not drop into the hall and take out another turret and any nearby droids. Continue to the end of the hall and take out a Battle Droid and then hop onto the last ledge. Hop onto it and get all of the bolts.

Hop onto another ledge and destroy the droid and box. The box will drop some bolts. Go to the end of the ledge and use Force Move on the legos to construct a platform. Hop onto the platform and then to the ledge. Walk to the end of the hall to reach an arrow leading to the next area.

Launching Dock

Go up and down to break open two boxes to get some bolts. Then step onto the tiles on the door you came through to get an Invincibility pick up. Now go down the ramp to the right and fight through the army of Battle Droids. At the bottom of the ramp go down and along the corridor to find a Sand Person.

He sells health for 50 bolts. Now go up past the ramp and destroy the box for some bolts. Keep going straight up to find four tiles. Step on them to get some bolts and all of them for a damage multiplier. Break the box to the right of the tiles for some more bolts.

Go down from the tiles until you come to a light blue line on the ground leading to the right. Follow this line to the right. When you come to a Droid Transport Ship jump onto it to get some bolts. Jump to the top of the ship and then to the platform on the left.

There's a Death Star Plan on the platform. After getting it drop back down onto the blue line. Open the door on the ship using Force Move and enter into the ship. Get the health in the middle of the room and then break open both boxes in here to get some bolts.

Exit out of the ship and destroy the turret to the right. Then jump onto the next ship to the right and collect the bolts. At the very top of the ship hop onto the platform to the left for a big force refill. Now go to the door of the ship and open it with Force Move.

Inside of the ship are six boxes. Destroy all of them to reveal both bolts and Battle Droids. Destroy the droids and collect all of the bolts then exit out of the ship. From the ship go down. At the wall at the very bottom are two Grunt Battle Droids(Blue) as well as bolts.

Destroy both of them and collect the bolts then continue down the hall to the right. Destroy the three Battle Droids at the end of the hall. In the next room jump onto the ship and collect the bolt and get the Death Star Plan. If you try to open the door to the ship a question mark appears above Obi Wan's head.

Destroy the box at the bottom corner of the screen and collect the bolts. Then run along the row of tiles along the right side of the ship. Run with the light of the tiles lighting up from top to bottom. This will cause the ship's door to open so board the ship. Defeat the four Battle Droids and some bolts will drop.

The ship will begin to shake and rumble as it takes off. After the screen fades black view the Stats Screen that will show how many droids you destroyed, how many lightsaber swings you took, how many bolts you collected and how many Death Star Plans you found. You will then be awarded bolts.

Done Well you have young Jedi.

Unlocked this character for purchase in Free Play you have: Qui-Gon

(<LEVL2> - Naboo Forest)

Landing Zone

From the starting point go to the right and destroy the two Battle Droids. Break open the two crates in the starting area for some bolts. Jump onto the tree stump to get a damage multiplier. Hop onto the stump below it to get some more bolts. After passing the log Battle Droids on Hoversleds appear.

You will have to destroy the hoversled first before you can destroy the droid. Take out all four then go down and break open the barrel. From the barrel go to the right. There will be a large worm that you can open its mouth and in front of it is a large health.

Before entering the worm hop onto the log to the right and get some bolts. Then enter the worm to find an Invincibility pick up and some bolts. There will be some Battle Droids that will be equally surprised to find you in such a place. Destroy them then proceed to the back of the worm for a Death Star Plan.

Exit back out of the worm and continue to the right. In the next clearance take out the small army of Battle Droids and Battle Droids on hoversleds. With all of them defeated hop onto the log at the top of the screen to get some bolts then go past the arrow to the right.

Gungan Outskirts

You will be in a large clearing. Go to the right side of the screen and hop onto the stump to get a damage multiplier. Now go to the left side of the screen and step on all of the tiles on the ground for bolts to drop. Collect all of the bolts and continue to the top of the screen.

A scene will play as Jar Jar Binks runs into the clearing after being chased by some Battle Droids on hoversleds. Defeat all of the chasing droids. After defeating all of the droids press SELECT while standing near Jar Jar for him to join your party.

As Jar Jar you can now jump higher than before. Jump onto the platform to the right and destroy the droid and talk to the Sand Person to buy a Regenerator for 25 bolts. Now drop down and go to the left side of the screen and jump onto the ledge.

Go down and to the left while on the ledge to get a large health pick up. Then go up and step on the tile to disable a force field behind a Battle Droid Carrier Ship on the far right side of the screen as well all the force fields. Drop down and go to the right and at the small section go up.

There will be a Death Star Plan here. Return to the platform with the switch and jump onto the platform above you to get a bolt. Four more bolts will drop down. Jump to the next platform to get another bolt and several more bolts will drop down.

Jump to the platform to the right and from this one to the one at the top of the screen to get another bolt. Drop down from the platform and climb up to the top of the Battle Droid Carrier Ship and then onto the ledge. From the ledge jump onto the log on the left for some bolts.

Go to the right side of the screen and hop onto the stump to get a damage multiplier and go even further right for health. Go towards the top of the screen to spot two turrets. By pressing RIGHT SHOULDER BUTTON you can turn invisible as Qui Gon as I suggest you do.

This will allow you to sneak up behind enemies and turrets and defeat them easily. Take out both turrets along with any enemies that will come from the ships to reveal two buttons that disable the force field. Before going past the force field, go along side the right of the screen.

On this side is some health and another Death Star Plan. Now return to where the turrets once were and step on the two switches that now occupy the turrets' space. This will disable the force field at the top of the screen. Walk past the opening and into the arrow.

Hidden Lake

Destroy the crate and then, as Jar Jar, jump onto the ledge to the left and defeat the Battle Droid. In the next clearing take out any Battle Droids, then go to the top of the screen and Force Move all of the boxes. Small tubes will appear. After the last box is opened follow the path of blue bolts.

Follow them to the top of the screen and pass through the opening of where there was once a force field. In the next open area jump onto the log for health and bolts then go above the log for a Death Star Plan. Follow the path

to the bottom left.

Every few seconds a swarm of Battle Droids on hoversleds will come by. Some will ignore you if you are far away or clocked as Qui Gon. Fight your way and get the damage multiplier from the stump along the way. After the stump with the damage multiplier jump onto the log for bolts at the top of the screen.

At the right of the screen is a stump with a large force refill. Continue going down and to the left and jump on another log with bolts and health. After this log is a Destroyer Droid. These droids have shields to that reflect most weapons. Wait for the shield to go down and attack.

After defeating the Destroyer Droid collect any dropped items or take out any Battle Droids on hoversleds and then proceed to the bottom of the screen. Run past the arrow and some pictures will be shown of what happens with the Gungans.

Done Well you have young Jedi.

Unlocked this character for purchase in Free Play you have: Jar Jar

```
-----  
( <LEVL3> - Naboo City )  
-----
```

```
-----  
Streets  
-----
```

You will spot Amidala being led off by some Battle Droids. The screen will then scroll down to the location of Qui Gon. Switch to Jar Jar and jump onto the platform to the left and destroy a barrel for bolts. Then jump to the platform above it and destroy a Battle Droid.

Theres a Sand Person here who will sell you health for 50 bolts. You shouldn't need it right now after starting the level but return to this spot should you desperately need the health. Drop down from the platform and follow the lower path. You'll find bolts and droids on the way.

When you come to a dead end jump to the top of the platform to the left as Jar Jar. Then turn to the left and jump to a platform with a Death Star Plan as well as two Battle Droids guarding it. Destroy them to get the plan. Now return to the platform you were just on.

Jump to the ledge to the right and take out the three Battle Droids and then break open the barrels for some bolts. Jump onto the platform next to the barrels and then onto the street. Once on the street switch from Jar Jar to Qui Gon and take out three Battle Droids to the left.

Next go to the right and approach the windows. Use Force Move on them to get some items. From the windows go to the left and use Force Move on the switch thats on the wall. Then switch to Jar Jar and jump to the top where the switch is on to find a Death Star Plan.

Now switch back to Qui Gon and drop down. Run to the bottom left corner and use Force Move on each switch on the lifts. This will cause bolts to drop onto the top of the lifts. After using Force Move on the last one drop down and go to the top of the screen from the last lift.

Use Force Move on the grating and on the platform above it. The platform will move to the left and drop some bolts. Use Force Move on the grating below where

it lands and enter into the sewer. Destroy all of the Battle Droids and then break open the barrels. Collect all of the bolts and any pick ups then exit.

Return to the first grating and enter to find a Sand Person. Talk to him to buy a Regenerator for 25 bolts. Exit the sewer and go to the right. At the top of the screen is a door you can open with Force Move. Enter into the room for Invincibility and destroy the two Battle Droids. Exit back onto the street.

Continue to the right and open the next door with Force Move. Enter into the room to find a Sand Person who sells health for 50 bolts. Buy it if you need it then exit back to the streets. To the right of the door is a barrel. Break it open and continue to the right.

When you reach a dead end go down until you come to the first lift with a Death Star Plan on it. Jump onto it as Jar Jar and then to the top of the wall. There's an Droideka up here. Destroy it and then approach the large door and a stream of bolts will drop down.

Talk to the Sand Person for force refill at the price of 25 bolts. Drop back down and go all the way to the left. Jump onto the platform you moved to above the grating and then jump onto the wall above it as Jar Jar. While on the wall go to the right to see Amidala being led off.

Switch to Qui Gon while on the wall and fight through the Battle Droids to the right. Stop at the first platform at the top of the screen and jump to the top of it as Jar Jar for large health. Drop back down as Qui Gon and continue to the right. Jump to the top of the second platform for a Death Star Plan.

When you come to a low wall jump to the top of it as Jar Jar then switch back to Qui Gon. At the top of the wall are two Battle Droids and two Elite Battle Droids. Fight through them and then go past the arrow all the way to the right to reach the next section.

Royal Courtyard

A cutscene will play as it shows the location of Amidala. She is being guarded by two Droidekas and the whole area is swarming with them. From the starting point go along the path to the top left side of the screen. When you come to a dead end go to the right.

Use Force Move on the platform then jump from the platform to the top of the wall as Jar Jar. Destroy any Battle Droids up here and go to the right. Use Force Move, as Qui Gon, on some blocks to make a platform. Then switch to Jar Jar and jump onto it and break open the barrels.

Return to the platform you first moved and continue to the right. Talk to the Sand Person to buy a Regenerator. From the Sand Person go down and destroy a barrel. Continue towards the bottom of the screen and defeat all of the Battle Droids on the way.

At the bottom of the screen are two Droidekas destroy them both then go around the corner to the right. Stay towards the bottom of the screen and go all the way right to reach a dead end. There are a few Battle Droids here along with a Sand Person who sells force refill for 50 bolts.

Go left from the Sand Person and go through the two pillars into the next open area. At the top of the screen is a door that can be opened with Force Move. Open the door and enter into the room. There are two Battle Droids in here, destroy them both for yellow bolts to drop down.

Exit out of the room and break open the barrel to the left of the door. Now go to the right side of the area. Use Force Move on the platform at the top of the screen. Then continue all the way to the right to find Amidala. Destroy the Droidekas then press Select to switch to her.

Return to the platform that you moved earlier and jump from it to the wall. Go all the way to the left until you reach a door that causes your character to react to it. As Amidala you can shoot the blue ovals on the wall. The two on either side of the door will open it. Go through the door.

Hangar

As a side note, if you encounter any more blue ovals on walls you can shoot them as Amidala and they will drop items. You will now be in a Hangar. At the bottom right corner of the screen is a number. You must now save five pilots that are scattered through the hangar.

From the starting point you can force move the boxes on the pillars on the left side of the screen. Also hit the gas tank for some bolts. At the top of the screen is the first pilot. Use Force Move to free him from the chains. Go to the right.

In the next room go down and use Force Move on the platform at the bottom. Hop on it when it stops and then, as Jar Jar jump onto the top of the wall to reach another Death Star Plan. Drop down from the wall and go to the right to find another pilot. Free him with Force Move.

Hop onto the ship for a damage multiplier. In the middle of the room are some pillars with boxes on them that can be used with Force Move to get bolts. Also break open the barrel. Continue to the top of the room to find another pilot. Free him with Force Move and then go to the left.

Climb up each floor and go all the way towards the top of the screen. You will reach an area full of Battle Droids all surrounding one pilot. Destroy them all and save the pilot. Return to the last pilot that you saved. Once back go to the right.

Use Force Move on the platform to move it under a ledge. Then jump onto it and then the ledge as Jar Jar. On the next floor is a Destroyer Droid. Jar Jar can disable its shields with an energy ball so then switch to Qui Gon to finish it. Then jump onto the nearby ship.

Theres a Sand Person here who sells force refill for 50 bolts and theres health on the nose of the ship. Go towards the top of the screen to find some tiles and a turret. Take out the turret first and then step on the tiles from bottom to top. Some yellow bolts will drop.

Jump onto the ship for some health and at the top of the screen is another pilot. Free him from his chains with Force Move. Turn around and hop onto the ship and the level will now be complete. No cutscene will play, it will go straight to the status screen.

Done Well you have young Jedi.

Unlocked this character for purchase in Free Play you have: Amidala

(<LEVL4> - Tatooine)

Dunes

From the starting point go to the top of the screen. Along the way you will have to fight Tusken Raiders. At the top of the screen is a Sand Person who sells health for 25 bolts. You may not have enough bolts right now so go to the right and hop onto the building.

When on hte building use Force Move on the legos to turn it into a computer that will cause the nearby satelite to activate. Use Force Move on the gears that are on the building to get some bolts. Drop back onto the ground and head to the left.

Continue to go to the left, while avoiding the sand worm's mouth on the way, until you reach a huge drop. Use Force Move on the legos at the top of the screen that are next to the drop to make a computer. This will cause another nearby satellite to activate.

With both satellites activated a land speeder will appear at the level start point. Go to the right from the drop and run around the land speeder and collect the health. With all the health and any unfinished business finished hop onto the speeder and use Force Move.

Force Move will allow you to fly the speeder over the drop and to solid ground across the hole. Once parked on the other side get the two bolts and the damage multiplier. Take out any Tusken Raiders in the area and make your way to the right.

Stop when you come to a large ship where Tusken Raiders are emerging from. Use Force Move to lock the door on them so that no more Tusken Raiders will emerge. From the ship go to the left and go towards the top of the screen while avoiding the sand worm. Run past the arrow at the top of the screen.

Mos Eisley

Watch the cutscene as Darth Maul walks along the Dunes where you once were. Some people towards the top of the screen will be talking about an old man and R2D2. Go to the left to fight some Tusken Raiders. Turn left at the corner to go down another street.

At the next corner are three Tusken Raiders. Take them out and go around the corner to the left. At the top of the street will be the droid R2D2 running around in a circle. Defeat all of the nearby Tusken Raiders and you will then be able to press Select to play as R2D2.

Now go towards the bottom of the screen. There will be a large drop but you can fly as R2D2 while pressing A to fly to a platform with a switch. Step on it to open a gate and a large force refill will drop. Fly back over the hole and switch to Qui Gon.

Defeat all of the Tusken Raiders that come from the gate. In the next area destroy the two turrets at the top of the screen then fly to another platform as R2D2 to the left. Once on the platform step on the switch to open the next gate and to get another large force refill.

Fly back to the area with the turrets and go through the gate at the top of the screen. Run down the narrow passage and around the corner a small army of

Tusken Raiders will appear. Fight through them and go around the corner to the right.

Another group of Tusken Raiders will appear. Fight through them and continue down the path. If you go down the path to the right there is a barrel with some bolts. Return to the main path and go all the way to the top to find Watto. Press Select to talk to him to free Anakin.

Return to Dunes

Run towards the bottom of the screen and avoid the sand worm. Approach the ship on the right and use Force Move on the door to prevent Tusken Raiders from exiting the ship. Then use Force Move on the legos to make a platform. Use the platform to get ontop of the ship.

Theres a Sand Person up here who sells force refill for 100 bolts. There are more legos up here that you can make a platform out of but there is no one in your team right now that can jump onto the building for the Death Star Plan. Jump off of the ship and continue towards the bottom of the screen.

When you come to the large drop switch to R2D2 and fly over it with Jetpack. Once on the other side get the large force refill and continue to the bottom of the screen to find Obi Wan. Follow him to the bottom of the screen. There will be an army of Tusken Raiders on your tail.

Avoid them for the most part and continue along the line of pickups to stay strong from the Tusken Raiders. Continue towards the bottom of the screen to reach an arrow. Run past it and a cutscene will play as Darth Maul will run from Mos Eisley and get stuck at the drop.

Done Well you have young Jedi.

Unlocked this character for purchase in Free Play you have: Tusken Raider

(<LEVL5> - Naboo Forest)

Gungan Alliance

A cutscene will play as an army of Battle Droids enters the forest. Move out from the starting point to the top right portion of the screen. Upon entering into the open Battle Droids will begin to appear. Go to the top of the screen to find a Death Star Plan.

Continue towards the top right section of the screen while taking out Battle Droids. Sprint works well for this area because you will smash through enemies quickly. When you reach some turrets run right by them. The energy balls will not damage them unless you use a lot of them.

At the top of the screen run to the right. When you come to a cliff drop down into the small area below and run past the arrow pointing towards the bottom of the screen. A cutscene will play as it shows Anakin piloting one of the Naboo Fighters.

Battle Front

A counter will appear at the bottom right corner of the screen of Battle Droids and the number 30. Before jumping onto the top section at the top part of the screen run along the bottom and collect everything off of the logs and talk to the Sand Person on the stump to buy force refill for 25 bolts.

When you reach the worm's mouth a Destroyer Droid will emerge from it. Disable its shields with an energy ball and take it out. At the bottom of the screen is a turret to the right of that turret is a Death Star Plan. Run through the plan and avoid the turret.

Now go up from the turret and on the stump is a Death Star Plan and on the log is a Sand Person who sells Regenerators for 25 bolts. Then jump onto the top ledge. A cutscene will play where several groups of Battle Droids appear. Take out all of those droids.

At the bottom section of near the edge is a Sand Person who sells health for 25 bolts. And at the very top of the screen jump onto the ledge to find another Death Star Plan. With the last droid defeated another cutscene will play. It depicts Anakin destroying the space station.

Gungan Victory

A cutscene will play as Jar Jar is boxed in by Battle Droids. Just when it looks like the Gungan has uttered his last stupid phrase all of the Droids explode. You now have 35 seconds to run around the area collecting blue bolts. The scene will then switch to The Royal Palace.

(<LEVL6> - Naboo)

Royal Palace

You will be back in Naboo in the Royal Palace. As Obi Wan watch as Qui Gon chases Darth Maul through the energy shields. When you regain control of Obi Wan run through the same shields the Qui Gon and Maul just passed. Wait for the shield to go off before passing through the archway.

At the last shield a cutscene will play as Qui Gon is killed by Maul. Pass through the archway and avenge Qui Gon with the blocks of Maul. Run to Maul and begin to attack. Force Push works well when you want to preserve some health.

Be careful because Maul can also use Force Push. When you confront Maul in a Lightsaber fight there is a chance that your Lightsabers may lock. When they lock a bar will appear at the bottom right side of the screen. Keep pressing B to fill the blue bar up and you will counter and do damage.

After the fight another cutscene shows as Maul is sliced in half and falls into the pit in the center of the room. With Maul now fully defeated and disposed of, Obi Wan approaches his fallen Jedi Master and mourns over the loss of Qui Gon.

(<LVL01> - Tatooine)

Anakin Returns

An older Anakin will have a dream of his home on Tatooine and will return to investigate. You will also have Padme for this level as will. Go to the left to find a building surrounded by Tusken Raiders with a pilot on the roof of it. Take out all of the Tusken Raiders that surround the building.

The pilot will sell you health for 50 bolts after saving him, how grateful he is. Use Force Move on the gears on the building to get bolts. Drop off from the building and go to the left side of the screen until you come across a pilot surrounded by Tusken Raiders.

Defeat all of the Tusken Raiders to save the pilot. In turn he will give you a land speeder that you can use to cross the gap. Hop onto the land speeder and use Force Move to cross the gap. On the other side health will drop from the land speeder.

Hop off of it and go towards the top of the screen and use Force Move on the ship's door to open it. Enter into the ship. There are two Tusken Raiders in here along with large health and three yellow bolts. Exit out of the ship and run past the sand worm and the arrow at the top of the screen.

Mos Eisley

Run to the top of the street and fight the lone Tusken Raider on the way. Be sure to also break any barrels. At the top of the street are some Repair Droids that can be destroyed for bolts and powerups. Go around the corner to the left.

On the next street fight your way to the top through all of the Tusken Raiders while also breaking apart any barrels. The path at the bottom left side of the screen has health on it should you need it. At where the gate was during the last visit are two blue ovals that can be broken by Amidala.

You can also buy large force refill for 50 bolts. Pass through the gateway. In the next area are some more Tusken Raiders as well as barrels. On the small bridge at the bottom left side of the screen is a Sand Person who sells a Regenerator for 25 bolts.

Pass through another gateway. Follow the narrow path to the top and break the barrel. Turn the corner and continue to the right. Defeat any Tusken Raiders and break any barrels or Repair Droids. When you come to a path leading off to the bottom of the screen go along it.

There will be some health and a large force refill as well as a lot of Tusken Raiders. At the bottom of the path is a small area with a Death Star Plan and four Tusken Raiders. Defeat all of the raiders then return to the main path and follow it to the top of the screen.

Watto will be here waiting and shocked at the sight of you. Talk to him with Select to learn what had happened to Anakin's mother. Anakin and Amidala will run past Watto and to the left to try and find out where it is that Anakin's mother is.

Moisture Farm

Anakin will talk to one of the workers. A cutscene will play as it shows Tusken Raiders surrounding an irrigation device. Looks like the raiders came through and broke them. You will need to use Force Move to fix five irrigation devices.

Go to the right and fix the first device. Now go to the left and buy health from the Sand Person for 50 bolts should you need it. Continue to the right and drop into the large hole. There's another device down here so fix it then talk to the Sand Person if you want to buy a Regenerator.

Climb out of the hole and go to the left side of the screen to fix another device. While in the process a swarm of Tusken Raiders will come from the top of the screen. Now go to the top of the screen and use Force Move to cave in the holes that the Tusken Raiders came through.

With all the caves closed off go to the right side of the screen to find ship. Close the door of it with Force Move and then go towards the bottom of the screen while sticking to the right wall. Close the last cave and then go to the top left corner of the screen.

Fix the device that is here and then go diagonally towards the bottom right of the screen and use Force Move on the last device. Run down to the worker and press Select to learn more about Anakin's mother. Anakin will run off to the Tusken Raider Camp for revenge.

Tusken Raider Camp

Anakin will find his mother and rescue her. But he was too late and his mother collapses to the floor after being freed. Anakin exits the camp with Lightsaber in hand. You must now defeat 25 Tusken Raiders. Run up the hill and at the top defeat a Tusken Raider.

Enter into the house by using Force Move on the door. Inside are some bolts and a Sand Person who sells a Regenerator. Exit the house when ready. Jump onto the bone platform to the right. Jump to the second platform and defeat another raider and then use Lightsaber Throw to take out a far away raider.

Drop from the platform and head towards the top of the screen and take out every Tusken Raider on the way. At the top of the sand hill to the right is a house. Enter it to defeat two Tusken Raiders. Exit the house then and jump onto the roof for a large health.

Run towards the bottom of the screen and hop from the ledge to platform to platform to reach a Death Star Plan. Hop back to solid ground and then jump onto the roof of the house to take out another raider and to get a large force

refill. Then enter the house. There are two raiders.

Done Well you have young Jedi.

(<LVL02> -Genosis Factory)

Tunnels

From the starting point go to the right. Turn at the corner and head for the top of the screen. Fight the Geonosian along the way. Along the left side of the path will be some broken droids. Repair them with Force Move to gain some bolts.

At the second path leading to the right go down it and wait for the robotic arms to raise before running past them. In the other part of the room run towards the bottom of the screen taking out Genosians on the way. At the bottom go down the stairs to the right.

At the bottom of the stairs run towards the top of the room while avoiding the robotic arms. At the top of the screen break any nearby barrels and then go down the stairs to the right. At the bottom of the stairs are droids that can be repaired with Force Move, a barrel, and a Death Star Plan.

Run up both sets of stairs until you return to the section after the first set of robotic arms you passed by. From the stairs go to the top of the screen and go into the room that has barrels lining the walls. Break all of the barrels and collect anything that they drop.

One of the barrels conceals a Sand Person who sells regenerators for 25 bolts. Return to the main hall and go to the right. There is a line of switches on the ground that are near the top of the screen. Be careful as there are robotic arms above each switch. Wait for the arm to rise then run to the switch.

After pressing all of the switches, the force field at the end of the hall at the top of the screen will disable. Walk through the archway and enter into the next room. In here are some legos that can be used to make a platform. Use Force Move on them until they form a platform.

Hop onto the platform and then onto the next floor. Run to the right and wait until a robotic arm raises before grabbing the large health and dropping down to the floor below. You will land on a small platform with Geonosians. Defeat them and drop onto the next platform.

Drop down two steps to reach a Death Star Plan. Continue to drop down steps until you reach a solid floor. Run towards the bottom of the screen. Along the way to the left will be a broken droid you can repair with Force Move and past that is a computer.

This will disable a force field above the computer but you will not be able to reach it. Continue to the bottom of the screen, collecting the yellow bolts that are below the robotic arms. Near the bottom of the screen is a door across from a robotic arm with an arrow. Go through this door.

Welding

From the starting point go to the right. There will be two turrets and some Geonosians. You will need to take out all enemies. With the room clear there are four switches on the ground to the left of a force field on the wall to the right.

Step on all four switches to disable the force field. With the force field down pass through the arch way. On the next hall are five robotic arms to avoid. Wait in between each one for the next one to lift before moving. In the next room are two turrets and a bunch of Geonosians.

Defeat both turrets and enemies until the room is clear. Now step on the four switches that surrounded the first turret in the room. Then go towards the bottom corner of the screen and step on another tile. This will disable a force field next to it.

Now instead of going down go up the stairs at the top of the screen and go to the right to find a broken computer. Fix it with Force Move and then enter the room. Inside the next room a mob of enemies will appear. Defeat the Battle Droids, Droidekas and Geonosians then get the Death Star Plan.

Go to the right after leaving the room to find a Death Star Plan. There will also be health and a bolt outside of the room. Drop down from the Plan outside to find a Sand Person who sells regenerators for 25 bolts. Return to the archway and pass through it to find a large force refill.

There is a line of Geonosians behind the refill. Fight through them. Drop onto each step towards the bottom of the screen for bolts. At the bottom to the right is a Sand Person who sells force refill for 50 bolts. Go to the left from the Sand Person. Along this hall are robotic arms.

Avoid each arm the same way as you did for the rest of this level. In the next room are two turrets in the center of the room and some Geonosians. Take out any threats then go to the top of the room to find a Sand Person who sells health for 50 bolts.

Run the the bottom left corner of the room and drop down another set of stairs. At the bottom run down the hall to the right that is lined with robotic arms. Use the same tactic as you did with all of the other robotic arms. In the next room Obi Wan will be blocked in and a cutscene plays.

Done Well you have young Jedi.

Unlocked this character for purchase in Free Play you have: R2-D2

(<LVL03> -Genosis Factory)

Rescue Party

A cutscene will play as Anakin and Amidala are captured or wounded. It looks like R2D2 has to rescue them and Obi Wan. R2D2 doesn't have the greatest of weapons so evasion would be a better option for this level. From the starting point there are bolts in the shape of an arrow pointing to the right.

Collect all of the bolts and then use R2D2's jetpack to fly over the gap in between platforms to the right. On the next platform are two Geonosians. Drop a mine inbetween them and avoid their shots until the mine explodes. There's

another set of bolts shaped like an arrow pointing to the right.

Gather up all of the bolts and then fly to the next platform to the right. On the next platform is an Droidekas as well as another set of bolts in the shape of an arrow to the right. Grab all of the bolts then fly to the next platform to the right.

On the next platform are two Geonosians and an arrow of bolts pointing towards the top of the screen. Defeat the Geonosians and then gather up all of the bolts. Now fly towards the top of the screen to reach a platform with a droid and two bolts. Get both bolts then approach the droid.

By pressing Select the droid will give you a stronger jetpack that will last until you let go of A. Hold A to fly all the way to the top floor. At the top are two Droidekas and two Geonosians to the left. Ignore them if you are low on health and go to the right.

At the corner go to the top of the screen. Along the way will be a Geonosian. At the top of the screen is a computer. Hack it with Right Shoulder Button to rescue Anakin. Now pass in between the robotic arms to the right and press Select to switch to Anakin.

Continue to the right until you reach a dead end. Use Force Move on a broken computer. This will knock over the cansiter that Amidala is in as well as disable the force field to the left. Run past the archway of where the force field once was.

Drop down all of the steps to the bottom. Run to the bottom right corner of the big room at the bottom of the steps to find Amidala. Press Select to switch to her. Run to the left side of the room. Along the way is a turret and a few Geonosians.

Fight through them to reach the left wall. Here there is a door being guarded by two Droidekas defeat them and then break the two ovals on the left and right side of the door. With the door open run through it and past the arrow to reach the next section.

Assembly Line

Run towards the bottom of the screen down the hall fighting Geonosians on the way. At the bottom of the hall, hack the computer as R2D2 to diable to force field to the right. With it down run down drop into the next room. Run towards the bottom of the screen.

When you reach the bottom go to the left to find a Death Star Plan as well as two barrels. Destroy the barrels and run through the plan then return to where you dropped into the room from. Head towards the top of the screen. At the very top wait at the small bridge leading into a large room.

Wait for the robotic arm to lift and then enter. Break open all of the barrels and then talk to the Sand Person at the top to buy a regnerator for 25 bolts. Exit back to the hall and head towards the bottom of the screen. Go down the stairs at the end.

Now on the lower section go towards the top of the screen and turn right at the corner. Hack the computer as R2D2 to disable the force field to the right. Drop into the next hall. In the hall run towards the top of the screen and jump up each step to reach a Death Star Plan.

Drop down all of the stairs and run towards the bottom of the hall. At the bottom of the hall, a little before the corner will be a door to the left. Infront of this door is an arrow that will bring you to the next area. Run through the door to the right.

Search for Dooku

From the starting point go to the right. There will be two turrets and some Geonosians. You will need to take out all enemies. With the room clear there are four switches on the ground to the bottom left of a force field on the wall to the right.

Step on all four switches to disable the force field. With the force field down pass through the arch way. On the next hall are five robotic arms to avoid. Wait in between each one for the next one to lift before moving. In the next room are two turrets and a bunch of Geonosians.

Take out all of the enemies and then go up the stairs at the top of the screen. Along the wall at the top of the screen is a computer that can be fixed with Force Move. Fix it then go through the door to the right. In this room Geonosians will spawn every few seconds.

Theres a Death Star Plan in the center of the room as well as a bunch of barrels and a Sand Person who sells force refill in the top right corner of the room for 50 bolts. Exit the room when ready. Back in the main room continue to the right.

At the end of the platform are some bolts shaped like an arrow pointing to the bottom of the screen. Collect the bolts and then switch to R2D2. Fly over the large gap towards the bottom of the screen until you reach a platform. Once on the platform hack the computer.

Drop down from the platform and go to the force field to the left. Run from the tile to the right to left infont of the force field to disable it. Now pass through the archway. Fight through the line of Geonosians and drop down each step to the bottom.

Go to the left at the bottom. Along this hall are robotic arms. Avoid each arm the same way as you did for the rest of this level. In the next room are some Geonosians. And in the center of the room are some legos that can be moved into a moving platform.

Jump onto it when its ready and use Force Move to make it go next to a platform in the top right corner. Jump onto the platform and hack the computer as R2D2. Then drop down from the platform to the left and hack another computer. Three Droidekas will appear after hacking the computer.

Jump back onto the moving platform and then to the platform with the computer. Fly across the gap to the left onto another platform with a computer. Drop down and go to the left side of the room. Run through the Death Star Plan and then go through the archway.

Drop down all of the steps and at the bottom avoid the robotic arms to the right. In the next room are some Geonosians and theres a turret. Take out all enemies then use Force Move on the legos at the top of the screen. Hop onto the platform and then the ledge.

To the left is a Sand Person who will sell you health for 50 bolts. Buy it should you really need the health. And then go to the left where the doorway

is to find an arrow leading into the next area. Run past the arrow and into the next room.

Dooku's Chamber

Go to the right to view a cutscene. Obi Wan and Anakin will be knocked out by Dooku. Yoda will enter into the room and take on Dooku. This fight is much like Maul's. There will also be pieces of rubble falling down that you'll need to avoid.

Dooku will be able to shoot out electricity. Try to hit him with your lightsaber before he can use it. If you run low on health or need force refill be sure to break open any of the barrels that are around the room. Damage Dooku enough and a cutscene will play.

Done Well you have young Jedi.

(<LV001> -Seperatist Ship)

Docking Bay

Turn around at the starting point and step on the four tiles on the ground. After stepping on them all some bolts will drop down from the ceiling on the left side of the screen. Run towards the bottom of the screen and step on the three tiles to disable the force field.

Pass through the archway into the next room. Take out the turret and then run to the end of the hall. At the end is a line of three Battle Droids. Break past them and enter into the next room. Step on the line of tiles towards the bottom of the screen and then step on the tiles towards the top.

This will disable the force field on the right side of the screen. Run past the archway and take out the two surprised Battle Droids. After defeating them drop down the ledge to the right. In the next hall towards the top of the screen are legos.

Use Force Move on them to turn them into bikes that drop bolts. The room at the end of the hall on the left has a Death Star Plan as well as some barrels. When finished with the room continue down the hallway to the right. There will be a force field in the way.

Use Force Move on the computer on the wall to the right. This will disable the force field. Enter into the next room. It will be empty so run to the far back wall. Use Force Move on the elevator door and then enter onto the elevator. Use

Force Move on the computer on the wall to start the elevator.

While it is moving bolts will drop from the ceiling. Collect them until the elevator stops. Use Force Move on the computer again. Something is wrong with the elevator. Looks like R2D2 will have to fix it. You will now gain control of R2D2.

There will be two Battle Droids on the right side of the screen as well as some bolts and a damage multiplier. Fight or avoid the Battle Droids and go through the hallway at the bottom of the screen. In the next room hack the computer on the right side of the screen to open the nearby door.

Behind the door are six Battle Droids. Drop mines all around them and go through the hall and around the corner and head towards the top of the screen. At the top of the hall fly over the row of four tiles and into the next room. If you step on them a force field will generate.

In the next room is a Death Star Plan as well as two Battle Droids. Take out the droids and get the plan and then hack the computer. This will re-enable the elevator that Anakin is on. You will now regain control of Anakin. Collect any bolts that drop until the elevator stops again.

A cutscene will play as a Droideka will disable the force field that leads to the elevator and the camera will scroll along the hall showing Battle Droids and Droidekas along the way. When you regain control of R2D2 turn around and destroy the Battle Droid.

Next fly over the tiles and past the archway into the hall. Drop a mine in between two Droidekas and then head towards the end of the hall. Turn right at the corner and destroy another Droideka and enter into the next room. There will be a large health pickup in the doorway as well as two Battle Droids.

Grab the health and take out the droids then head towards the right side of the screen and go through the archway. Hack the computer terminal for a bolt and pickups. Drop off the ledge to the right. Go towards the bottom of the hall and go into the room on the left for a large health pickup.

Exit from the room to the right and continue down the hallway to the right. In the next room are two Destroyer Droids to the left as well as a Battle Droid. I recommend you avoid them and run to the computer at the back of the room. Hack it to open the elevator door and then enter the elevator.

Once on the elevator press Select while standing next to Anakin to play as him. Use Force Move on the switch on the wall to start the elevator. Now the elevator will be working properly. Collect any bolts that should drop from the ceiling.

Security Checkpoint

After getting off of the elevator run down the hall to the left and defeat a Battle Droid. Halfway down the hall is a Sand Person who sells health for 50 bolts. Buy the health should you need it and then continue down the hall. Turn at the corner and enter into the room.

On the left side of the room are Battle Droids and Destroyer Droids. Take them all out and then go to the right side of the room and use Force Move on the legos to make a platform. Jump from it to the ledge to find a Death Star Plan. There are also Battle Droids and a Sand Person up here.

Buy force refill from the Sand Person for 50 bolts should you need it and then jump onto the higher ledge to the left. Go to the left to find an arrow shaped from bolts. Switch to R2D2 and fly using the jetpack to the left side of the screen and land on the ledge.

On this ledge are a bunch of tiles. You will need to step on each tile to disable a force field that blocks the way towards the top of the screen. But theres a catch. You can only step on the flashing tile. After stepping on it another tile will flash so you must then stop on that one.

Step on the wrong tile and you'll have to start all over. When the force field is down drop from the ledge and head towards the top of the screen and through the archway where a force field once stood. Run towards the top of the screen and go down the hall to the left when you come to it.

There will be three Battle Droids at the start of the hall. Break past them and run to the end of the hall to find a droid. Switch to R2D2 and press Select to get a stronger jetpack. Now fly all the way up to reach a platform. Land on it and get the Death Star Plan.

From the Death Star Plan go to the left and around the corner towards the top of the screen. At the top go to the right and grab the large health pickup. Return to the main hallway down below and run to the top of the screen. Run past the arrow to the next area.

Prisoner's Chamber

From the doorway go the top and bottom of the screen to find a barrel. Then go down the stairs and collect some bolts. At the bottom of the stairs go to the left side of the screen to find a Death Star Plan. Now go to the right side of the screen and press Select to save Chancellor Palpatine.

After freeeing Palpaine Dooku will run into the room. Its up to Anakin to defeat him. Stay close and continuously hit him with your lightsaber to keep him from using Force Lightning. After defeating him use Force Move on Palpatine to free him.

Done Well you have young Jedi.

Unlocked this character for purchase in Free Play you have: Dooku

(<LV002> - Kashyyyk)

Beach

A cutscene will play as the Clone Troops are pushed back by Battle Droids. The camera will pane up to where Yoda is. You will need to find and rescue five Clone Soldiers. From the starting point go towards the bottom right corner of the screen to find the first Clone Solider.

Free him from the holding device with Force Move. After freeing the solider go to the left and then towards the bottom of the screen after reaching the end of the wall. There will be a turret and a Clone Soldier. Take out the turret and then free the Clone Soldier with Force Move.

Go towards the bottom right corner of the screen to find Chewbacca. Press

Select to switch to him. Now from Chewbacca go towards the right side of the screen to find another two Clone Soldiers and a turret. Destroy the turret and any nearby enemies.

With the area clear use Force Move to free both of the soldiers. Go to the bottom left corner of the area to find a Death Star Plan. Now make your way towards the top of the screen. Along the way you will reach a dock with the last captured Clone Solider.

Free him with Force Move and a cutscene will play as some soldiers disable a force field. Before heading towards the archway of where the force field once stood, go all the way to the left and jump onto the ship. Use Force Move to fly it towards the bottom of the screen and to a Death Star Plan.

Now go all the way to the right side of the screen. When you come to the very computer terminals that the Clone Soldiers, its a little above where you rescued the two soldiers. Pass through the archway where the force field once was and then pass the arrow to reach the next area.

Wroshyr City Gates

Follow the boardwalk towards the bottom of the screen and around the corner to the right. On the ground you should see a valve that can be moved with Force Move. Use Force Move to put it on the pipe. Continue to the right and use Force Move on the second valve to put it on the pipe.

The last valve is behind a force field. You won't be able to reach it from here so drop off from the boardwalk to the left to land at the very bottom of the area. At the very bottom go to the right. Along the way you will come to a Sand Person who sells health at 50 bolts.

Don't buy it just yet, instead continue to the right until you reach a valve on the ground. Perform Force Move on it to place it on the pipe. Continue to the right and place another valve on the pipe. Keep going to the right and place another valve on a pipe.

The last valve will open a net high above. Keep going to the right and go up the narrow passage to encounter. Two droids on a hoversleds and a Sand Person. Take out the droids and buy a Repair Droid for 100 bolts. Exit the passage and head to the left side of the screen.

Along the way buy health from the Sand Person. Continue to the right and climb up to the second ledge, the one that leads off to the left. Stay along the higher path and then jump onto the boardwalk. After getting onto the boardwalk a group of Battle Droids will walk towards you from the right.

Plow through them and continue to the right. When you come to the higher ledge jump up onto it. Continue going to the right and destroy the Droideka and the turret before the next higher platform. With the turret out of the way jump onto the next boardwalk.

Run to the top of the screen to come to an archway where the netting once was. There are two Droidekas guarding the way here. Defeat them both and pass through the archway. Climb up the ledges until you reach a boardwalk. At the top head to the left.

You can buy some force refill for 50 bolts from a Sand Person up here. Turn at the corner and run towards the bottom of the screen. At the edge of the boardwalk jump onto the ship and use Force Move to fly it to the left. Along

the flight path of the ship you will pass by some pillars.

The first pillar will have a turret on it. Ignore it and fly to the second pillar. There will be a Death Star Plan on here. Jump onto the pillar and then back to the ship. Continue to fly it towards a boardwalk. There will be two Droidekas on the path.

Continue to the left to reach a tile that will disable a force field. There is also a valve below the tile, the very valve from the beginning of the level. Use Force Move on it now to open some netting and an arrow will appear towards the top of the screen walk past it to reach the next area.

Canopy

From the starting point collect all of the bolts then cross over the bridge. While crossing the bridge there will be a Droideka. Continue to the next canopy and take out all of the Battle Droids and then go through the doorway on the canopy.

Collect all of the bolts in the canopy then go over the bridge to the right. While crossing the bridge a Destroyer Droid will roll onto the bridge. Defeat it and go through the doorway of the next canopy. You will be in a small room with a Sand Person who sells Repair Droids for 100 bolts.

There are also two canisters to destroy for items. Go through the door to the left. Once outside cross over the bridge to the right. In the next canopy drop onto the bridge towards the bottom of the screen. Run along the bridge to the right.

Halfway down the bridge a Destroyer and Battle Droid will appear. Destroy them both and continue to the end of the bridge. At the end hop onto the canopy towards the top of the screen. Collect all of the bolts on the canopy and buy the force refill from the Sand Person for 50 bolts if you need it.

Head towards the top of the canopy to find a bridge being guarded by two Droidekas. Destroy them both and go along the bridge to the left. Turn around the corner towards the top of the screen and enter into the canopy. Go through the doorway.

In the next room destroy all of the canisters and then go through the door. Destroy the Droideka and cross over the bridge to the right. There will be two Battle Droids on it and a Battle Droid using a cannon on the canopy. Run through the door of the canopy.

In the next canopy go along the bridge at the bottom of the screen. Follow the bridge to reach another canopy. There's a Droideka here and a Battle Droid as well as a Sand Person. You can buy health from him for 50 bolts. When ready go along the bridge at the bottom of the screen.

On the bridge is a Battle Droid manning a cannon and two Droidekas. Fight through them to the end of the bridge then jump onto the canopy on the right. Defeat the Droideka on the canopy then go along the bridge to the left. On the next canopy go through the door.

After the screen loads you will be on another canopy. Cross over the bridge to the right. Go to the top of the screen canopy and go through the doorway. Pass through the Death Star Plan then go through the door. Get onto the bridge on the right.

Defeat the two Battle Droids on the bridge. With both gone grab the large health pickup and continue across the bridge to the right. On the next canopy defeat any nearby Battle Droids. With the area clear go through the door and past the arrow to beat the level.

-----
```

From the starting point turn around and step on the tile for some bolts to drop down. Run towards the bottom right corner of the screen and step on the tiles towards the top of the screen along the way to get some bolts and pickups. Stop when you come to a cannon at the top of the screen.

Destroy the cannon and run by its remains towards the top of the screen and go up the ramp to the left. At the top take out the two turrets and any Battle Droids. Break open the barrels at the top of the screen for bolts and pickups. Run back down the ramp and to the main hall.

From the main hall continue towards the bottom right corner of the screen until you reach a ledge. Jump up onto it and destroy the two Droideka and then collect the blue bolts. Then keep going to the right taking out turrets and droids along the way.

When you come to a dead end jump onto the ledge at the top of the screen. While on the higher level go to the right and the camera will pan over to some turrets in front of a force field. You will need your droid to get past the force field.

The camera will switch to the droid when it doesn't respond to Obi Wan's call to show it being surrounded by Battle Droids. You have 1 minute and 30 seconds to run back to the starting point. Just drop from the higher ledge and run all the way to the left.

Avoid any enemies on the way until the Battle Droids that surround the droid will attack you. Defeat all of the Battle Droids in the time limit and then approach your droid and press Select to switch to it. Obi Wan will run off leaving you only as the droid.

Go towards the bottom left corner and go up the first corridor towards the top of the screen, the one with the ramp. Drive up the ramp and at the top go to the right and fly to the higher platform to the right. Take out the two Droideka and then break open the barrels.

With your business finished fly to the right to reach another platform. Destroy any Battle Droids and break open the barrel. There's a Death Star Plan on the higher ledge that you won't be able to reach as R2D2. Hack the computer to disable the force field in the top right corner.

As well as disabling the force field it will also take out a line of three turrets that you saw as Obi Wan and open the field behind them leading to the next area. Before leaving this platform go to the edge towards the bottom of the screen and fly off it and to the right.

Stop when you come to the platform for a large force refill. Then fly to the right again to find a Death Star Plan. Fly back to the platform with the computer and go to the top right corner where the force field once was. Fly through the archway to the next floor to the right.

On the next platform go to the bottom of the screen and take down the two Battle Droids and then grab the large health pick up. Pass by the ramp and go to the top section of the platform. There are some barrels as well as a Sand Person who sells regenerators.

When done go down the ramp you passed by earlier. At the bottom of the ramp you will be back in the room with the turrets. Press Select near Obi Wan for him to rejoin your team. If you want to get the Death Star Plan that you passed earlier you can go back for it now.

Simply go up the ramp and fly over the gap to the next platform. Then hop onto the ledge to get the Death Star Plan. Return back to the room where you reunited with Obi Wan and go to the right. Pass through the archway and run by the arrow.

Seventh Level

As soon as the level starts head towards the top of the screen and step on the two tiles below to the wall for health. Then use Force Move on the lego pieces in between the tiles. This will make a platform allowing you to get onto the next floor.

You now have the option of taking the left route or the right. For now go to the left and enter into the huge room. This room is swarming with Battle Droids. Along the way to the top of the room, break open the barrels for pickups and bolts.

At the top is a force field and below it is a floor of tiles. On the left side are some already lit tiles while on the right none are lit. Look for the already lit ones on the left and step on the unlit tile to the right of it. After all the corresponding tiles are lit the force field will be disabled.

On the other side of the force field are some Droideka and a turret. Continue to the top of the screen. At the top is a computer. Hack it and then go to the right. Break open all the barrels then drop off the ledge at the bottom of the screen.

General Grievous

Obi Wan will approach Grievous and then 6 Droideka will enter the room. Destroy them all and then the 2 Droideka at Grievous' side will attack you. Defeat them as well and then Grievous himself will attack. Grievous has no force abilities so you can attack from a distance with Force Move.

If you need health or force refill, step on the tiles that are around the edge of the room. When Grievous loses about half of his health he will use a new attack. He will sprint forward and spin four lightsabers around. Run away when he does this.

What Grievous lacks in force abilities he makes up for with speed and strength. Use your Force Move as often as possible. With him destroyed the scene will be shown as Obi Wan picks up a blaster and shoots and destroys the General

Grievous.

Done Well you have young Jedi.

Unlocked this character for purchase in Free Play you have: R4-P17

(<LV004> - Kashyyyk)

Skyreach Huts

You will start in a small empty room. Approach the door and use Force Move to open it. Proceed into the next room. In the next room is a Droideka and some bolts. Destroy the Droideka and collect the bolts. When ready open the door with Force Move and then enter into the next room.

There are four Battle Droids to deal with in this room. Destroy them all and then break open the canisters for bolts and pick ups. Open the door with Force Move then enter the next room. A Destroyer Droid will roll into the room. Defeat it and open the door and head into the next room.

Theres a Sand Person who sells health for 50 bolts. There are also 5 Repair Droids on the ground that can be activated with Force Move. Once activated they can be destroyed for bolts and pick ups. When ready open the door and head into the next room.

The next room has a force refill in the middle as well as four Battle Droids. Take them out then open the door and proceed into the next room. In the next room there are four Battle Droids and a turret. Take out all of the enemies and then grab the damage multiplier and large fore refill. Head to the next room.

Break open the four canisters in this room to get some bolts and pick ups. No enemies to worry about so use Force Move on the door and enter into the next room. Only a Death Star Plan in here. Run through it and go through the door and into the next area.

Order 66

You will now be outside, from the starting point go across the bridge at the bottom of the screen. Follow the bridge to find some Clone Soldiers in battle with Battle Droids. A transmitter will activate and say 66. The soldiers will then turn and attack Yoda.

Defeat your former allies and the Battle Droids. Drop onto the bridge on the left side of the canopy. Follow the bridge to reach another canopy. Hop onto it and defeat all the nearby soldiers and then grab the large health pick up. Cross the bridge on the left and a Destroyer Droid will roll onto it.

On the canopy go through the open doorway. In the next canopy you can buy a regenerator for 25 bolts. Then go to the right side of the canopy and cross the bridge to fight Clone Soldiers and Battle Droids. Go through the doorway of the canopy.

In the next room is a turret and some bolts. Destroy the turret first then gather the bolts. When ready go through the doorway. On the next canopy go to the bridge in the top left corner of the screen. There are three turrets and some Clone Soldiers you will need to fight through.

Once past them go down the bridge to the left and activate the Repair Droids with Force Move if you want bolts or pick ups and at the canopy at the end is a Sand Person who sells health for 50 bolts. Also break open the canisters. Return to the canopy at the end of the first bridge and go through the door.

A small army of Clone Soldiers will attack you on the next canopy from the bridge on the right side of the screen. Defeat them all and then talk to the Sand Person to buy health from him for 50 bolts. Cross the bridge and destroy the turret and soldiers. Then pass through the door on the canopy.

There will be four Battle Droids in the next room. Destroy them all and then grab the large health pick up in the middle of the room. When ready go through the next door. On the next canopy a Destroyer Droid will be waiting. Destroy it and then follow the bridge at the bottom of the screen.

When you reach the corner the path to the left will be blocked by a force field so instead go to the right. At the canopy at the end will have some switches on the ground. Step on them for a Repair Droid to appear and some bolts and pick ups to drop down.

Now go back over the bridge to find some pick ups and Clone Soldiers. Fight your way to the corner where there was a force field to find it now shut off. Walk around the canopy to break open some canisters and get some bolts. When ready go through the door.

On the next canopy cross the bridge to the right and break the canister for two Clone Soldiers to appear. Continue across the bridge to the next canopy. At the bottom of the screen is a turret. Take it out and then destroy the two turrets and talk to the Sand Person.

He will sell you a regenerator so I recommend you buy it. Drop onto the bridge at the bottom of the screen. There are two Clone Soldiers down here as well as a health pick up. Run across the bridge to the right. About halfway across there will be a Destroyer Droid.

Defeat it and continue across the bridge. At the end of the bridge jump onto the canopy. There are two turrets on the canopy, one on the left side and one on the right. Destroy them both and then step on the eight tiles for some bolts and pick ups to drop down and for a force field to be disabled.

Run along the bridge that's at the top of the screen and goes to the left. At the first corner are three Clone Soldiers and then a little past it is a turret. Fight through them and continue along the bridge. At the end of the bridge you will reach the last canopy.

From the bridge run onto the canopy. There will be two Clone Soldiers. Deal with them as you see fit. Take this time to run around the outer rim of the canopy to collect all of the health pick ups. When you are ready go through the door and past the arrow.

Wroshyr City Escape

To the left will be a Sand Person selling force refill for 50 bolts and to the right will be two Clone Soldiers. The path to the left will be blocked by a force field so you will need to disable it. Go to the right and destroy a turret.

Run along the boardwalk to the right. At the end will be another Sand Person

selling health for 50 bolts. Drop down to land in the midst of two Clone Soldiers and a turret. Destroy them then hop onto the higher ledge to the right.

Go to the right to find three Battle Droids on hoversleds. Destroy all of them and then continue to the right to find a turret. Destroy it as well and then use force move on the valve on the ground to connect it to the pipe and thus disabling the force field.

Destroy the turret at the top of the screen and then step on the three tiles to open the netting. Climb up the ledges to the top and then go to the left. Step on the four tiles to the left to disable the force field from the beginning of the area.

Drop off the board walk at the bottom of the screen. Follow the board walk all the way to the left until you come to a set of legdes. Climb up them to the top and pass through the archway. Now run to the left and past the arrow to enter the next area.

Beach Escape

You will instantly be attacked by three Clone Soldiers and there will be a Battle Droid controlling a turret at the top of the screen. Take them all out and then head for the bottom right corner of the whole area to get a large health pick up and a Death Star Plan, guarded by a Battle Droid with a turret.

From the Death Star Plan go to the right until you come to a beach. Walk along the breach towards the top of the screen and then walk onto the board walk until you come to some legos that can be moved with Force Move. Use Force Move for the first of four tiles of a force field to be enabled.

Continue towards the top of the screen while staying on the board walk. When you come a to a hut go to the right to find some more legos that can be moved. Move them with Force Move for another tile to be enabled. Now go to the right to find the third set of legos.

Walk along the top section of the wall behind the third set of legos to find the last set. Use Force Move on them to disable the force field. Now go to the right and pass through the archway. All the tiles will be lit and the force field will be disabled. Walk past the arrow.

Done Well you have young Jedi.

(<LV005> - Utapau)

Seventh Level Retrace

You will be back in the same room that you fought Greivous in. Step on all of the tiles that line the bottom and right sides of the room. This will open the door on the right. Go through it and you will be on the higher platform. Two Droideka will appear on the right so take care of them.

Follow the path to the top of the screen and go to the left at the corner. About halfway past the tiles will be a line of Battle Droids fight pass them

and go down the hall to the right at the force field. Run to the bottom of the screen and go down the hall to the left at the force field.

At the end of the hall will be three tiles with health on them. Collect all of the health and the force field blocking the way into the next room will be disabled. Enter the next room and head for the bottom of the screen. At the bottom of the screen go down the next hall to the right.

Run over the tiles and a force field will generate behind you. Continue into the next room. In the next room break open all the barrels and fight through all of the Battle Droids. Along the right wall will be a ledge. Drop down it to enter the next area.

Water Cavern

The camera will scroll over to where a transmitter is playing by some Clone Soldiers of the same message if 66 as seen on Kashyyyk. The nearby Clone Soldiers will now attack you. Fight through the soldiers and turrets. At the second turret drop off the ledge to land in a lower cavern.

Run to the lower left corner and jump from platform to platform to reach a large platform. Defeat the two Clone Soldiers and then use Force Move on the legos. This will disable to the force field to the exit of the area. Drop down from the platform and go all the way to the top of the screen.

When you come to a wall with a Death Star Plan on it jump from the small platform onto the wall to get a Death Star Plan. Run along the wall to the right and then jump from each platform to the right. When you reach the large platform run past the arrow.

Done Well you have young Jedi.

Unlocked this character for purchase in Free Play you have: Obi Wan

(<LV006> - Mustafar)

Volcanic Flats

A cutscene will play as Anakin talks with Padme and then Obi Wan appears. Anakin will knock out Padme and then run away. Obi Wan will look over her and then you will control him. Climb the platforms to the right to the top to a large section.

At the top go to the right first and take out the four Droidka and then go to the top right corner to find a Death Star Plan. Return to the spot you were at, at the top of the platform and go up the ramp at the top of the screen. Once at the top of the ramp you should see Anakin run off.

Take out the turret and follow Anakin to the left. Defeat two Droidka and then climb the ramp. Once you reach the top destroy another two Droidka and then jump over the river of lava to the right. Keep jumping over the lava and landing on solid ground.

On the large section of land will be two Droidka. Destroy them and continue to the right by jumping the lava. At the last platform with a bolt drop down to the lower level. You will need to jump over the river of lava again to reach

each platform.

On the last platform will be two Droideka. Defeat them then go down the ramps. At the bottom of the last ramp destroy another Droideka. Hop over some more □ lava to the next bit of solid ground. Destroy the two Drodiekas and then run down the ramp and past the arrow.

Unstable Foundation

The camera will show Anakin jumping from platform to platform. Don't bother to fight any enemies or collect any bolts. The platforms will begin to fall apart. After the platform with a Droideka jump to solid ground. Hop onto the higher platform to spot Anakin.

Follow him to the right and down a ramp. Grab the health and into into the large area. Anakin will be down here waiting. He is very powerful and is able to throw his lightsaber. Stay close to him and try not to get hit by his lightsaber.

When he throws it run away to avoid being hit when it comes back to Anakin. After Anakin loses about half of his health he will run off. Run to the top left corner for health and then follow him from platform to platform. At the last one will be three Clone Soldiers.

Fight through them and then go down the ramp. At the bottom jump to a small platform and then to the ground on the right. Jump to the small platform to the left to find a Death Star Plan and then return to the main path. Continue to the top of the screen to spot Anakin again.

Run up the ramp and then jump to the higher level. Jump from platform to platform again to the top right corner of the screen. At the top begins jumping to the left. Then towards the bottom of the screen. On the solid ground Anakin will appear again.

Now you will need to defeat him. Stay close and attack with your lightsaber. Knocking him into the lava with Force Move will do a ton of damage. After the last stroke is delievered Anakin will be taken from the lava by Palpantine and Anakin will become Darth Vader.

| Name               | Description                                                                                                                                           |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| Health             | This will refill your health. It appears as a small heart. It can be bought from Sand People.                                                         |
| Large Health       | Refills more health than the regular Health.                                                                                                          |
| Force Refill       | This refills your force bar. The lightsaber that appears under your health, in the top left corner, is the force bar. Can be bought from Sand People. |
| Large Force Refill | Refills the force bar more.                                                                                                                           |
| Damage Multiplier  | A blue lightsaber icon that is picked up after enemies. Increases the strength of your attacks.                                                       |
| Invincibility      | Gives you a short amount of invincibility to all attacks from enemies.                                                                                |
| Berserker Mode     | Makes you go faster and your attacks stronger.                                                                                                        |
| Speed Up           | You will move faster.                                                                                                                                 |
| Regenerator        | If you die while in battle the droid will bring you back to life and refills all of your health.                                                      |

4	Battle Front	Any Character	Go to the stump on the left side of the screen.
5	Battle Front	Jar Jar	Jump to the very top of the screen and onto a ledge.

~~~~~

Episode II

Level 1:

| Number | Location       | Character     | What To Do                                                     |
|--------|----------------|---------------|----------------------------------------------------------------|
| 1      | Anakin Returns | Jar Jar       | From the starting point climb to the top of the left building. |
| 2      | Mos Eisley     | Any Character | Go past the second gate and go off the main path to the right. |
| 3      | Mos Eisley     | Jar Jar       | Climb the building to the top next                             |

|   |                    |               |                                                                     |
|---|--------------------|---------------|---------------------------------------------------------------------|
|   |                    |               | to Plan #2.                                                         |
| 4 | Tusken Raider Camp | Any Character | When you come to a set of bone platforms jump to the far right one. |
| 5 | Tusken Raider Camp | Any Character | From the last house jump from the roof to a pillar to the right.    |

Level 2:

| Number | Location | Character     | What To Do                                                                                                                                                        |
|--------|----------|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1      | Tunnels  | Any Character | Go to the lowest spot in the area.                                                                                                                                |
| 2      | Tunnels  | Any Character | On the main path.                                                                                                                                                 |
| 3      | Tunnels  | Jedi/JarJar   | After getting the second Plan, at bottom of the stairs follow the path and at the top of the screen use Force Move on some legos then jump to the platform above. |
| 4      | Welding  | Any Jedi      | In the room after the conveyor belt go through the door at the top of the screen.                                                                                 |
| 5      | Welding  | Any Character | To the right of the door you went through for Plan #4.                                                                                                            |

Level 3:

| Number | Location         | Character     | What To Do                                                                                    |
|--------|------------------|---------------|-----------------------------------------------------------------------------------------------|
| 1      | Rescue Party     | Darth Maul    | In the first area go to the left side and use Force Move on some legos then climb to the top. |
| 2      | Assembly Line    | Any Character | After hacking the first computer as R2D2 in the next hall go left.                            |
| 3      | Assembly Line    | Any Character | After hacking the second computer as R2D2 in the next hall go right.                          |
| 4      | Search for Dooku | Any Jedi      | In the second large room go up the stairs at the top of the room and enter through the door.  |
| 5      | Search for Dooku | Any Character | It is on the left side of the third large room.                                               |

Episode III

Level 1:

| Number | Location            | Character     | What To Do                                                                                                              |
|--------|---------------------|---------------|-------------------------------------------------------------------------------------------------------------------------|
| 1      | Docking Bay         | Any Character | In the hall after the first force field, go into the room on the left.                                                  |
| 2      | Docking Bay         | Any Character | After hacking the computer to open a door into a hall at the end of the hall fly over the tiles and into the next room. |
| 3      | Security Checkpoint | Any Jedi      | In the first large room use Force Move on some legos on the left side of the room and climb onto the wall.              |
| 4      | Security Checkpoint | R2D2          | After the first force field go down the hall and turn to the left into the next hall and fly to the above floor.        |
| 5      | Prisoner's Chambers | Any Character | On the left side of the one room.                                                                                       |

Level 2:

| Number | Location           | Character     | What To Do                                                                                                |
|--------|--------------------|---------------|-----------------------------------------------------------------------------------------------------------|
| 1      | Beach              | Jar Jar       | From the starting point go down and jump to the top of a wall.                                            |
| 2      | Beach              | Any Character | On the middle left side of the area. Approach from the above.                                             |
| 3      | Beach              | Any Character | Go to the bottom left corner of the area.                                                                 |
| 4      | Wroshyr City Gates | Any Jedi      | On the main path, will be a ship you can fly with Force Move. When you pass the second pillar jump on it. |
| 5      | Canopy             | Any Character | It will be on the main path.                                                                              |

Level 3:

| Number | Location      | Character     | What To Do                                                                                     |
|--------|---------------|---------------|------------------------------------------------------------------------------------------------|
| 1      | Landing Pad   | R4-P17        | Fly from one of the top platforms to the third tower to the right at the bottom of the screen. |
| 2      | Landing Pad   | R4P17/Anyone  | On R4-P17's path there will be a plan on a high ledge.                                         |
| 3      | Seventh Level | Any Character | In the top right corner of the area behind some barrels.                                       |
| 4      | Seventh Level | Jar Jar       | After the section with the tiles,                                                              |

|  |  |  |                                |
|--|--|--|--------------------------------|
|  |  |  | jump onto the higher ledge and |
|  |  |  | enter the cave.                |

|   |               |         |                                                 |
|---|---------------|---------|-------------------------------------------------|
| 5 | Seventh Level | Jar Jar | On the same ledge from Plan #4 go to the right. |
|---|---------------|---------|-------------------------------------------------|

~~~~~

Level 4:

Number	Location	Character	What To Do
1	Skyreach Huts	Any Character	It is on the one path. You can't miss it.
2	Wroshyr City Escape	R2D2	It will be on a tower to the right of the starting point.
3	Beach Escape	Any Character	Go to the bottom left corner of the area.
4	Beach Escape	Any Character	On the middle left side of the area. Approach from the above.
5	Beach Escape	Jar Jar	From the starting point go towards the top of the screen and jump onto the wall.

~~~~~

Level 5:

| Number | Location            | Character     | What To Do                                                                                                       |
|--------|---------------------|---------------|------------------------------------------------------------------------------------------------------------------|
| 1      | SeventhLevelRetrace | Jar Jar       | Exit the starting room and on the next ledge jump to the top of a platform and enter the cave.                   |
| 2      | SeventhLevelRetrace | Any Character | In the room after the force field where you step on the tiles next to it to disable it, at the top of this room. |
| 3      | SeventhLevelRetrace | Any Jedi      | Drop into the room at the very bottom of the area.                                                               |
| 4      | Water Cavern        | Jar Jar       | From the bank on the left side of the cavern jump to the wall.                                                   |
| 5      | Water Cavern        | Any Character | Its on the way to the Area Exit. You can't miss it.                                                              |

~~~~~

Level 6:

Number	Location	Character	What To Do
1	Volcanic Flats	Any Character	Climb the ledges at the beginning of the level and make your way to the right.
2	Volcanic Flats	Any Character	Climb the ledges at the beginning

```

|         |         |         | of the level and make your way to |
|         |         |         | to the left.                      |
|-----|-----|-----|-----|
|  3     | Volcanic Flats | Jar Jar | After crossing the lava rivers and |
|         |         |         | falling off a cliff jump to the   |
|         |         |         | solid ground towards the bottom of |
|         |         |         | the screen.                       |
|-----|-----|-----|-----|
|  4     | Unstable Foundation | Any Character | Before dropping off a cliff to   |
|         |         |         | fight Anakin for the first time   |
|         |         |         | run up the ramp at the top of the |
|         |         |         | screen.                            |
|-----|-----|-----|-----|
|  5     | Unstable Foundation | Any Character | On the far right wall jump to a   |
|         |         |         | small platform to the left.       |

Version .14 - 7/27/05 - Decided to make this FAQ/Walkthrough. I'll add a Death Star Plans section next. For this version, I finished the first level and did work on the Characters, Cheats, Unlockables, and Power-Ups.

Version .18 - 7/28/05 - Finished level 2. Added a few more characters to the Characters section. Also added a few more power ups and the header for the Death Star Plan section is in place but nothing has been added just yet.

Version .21 - 8/1/05 - Messed up on the Versions as you can see. No big deal but worth mentioning. Anyways Level 3 of Episode I is complete. Added some characters to the Specials and Abilities section.

Version .4 - 8/5/05 - Finished Episode I and finished the first level of Episode II. Added Anakin to the Characters section as well as the Specials&Abilities. I also set up the format for Death Star Plans.

Version .53 - 8/8/05 - After a long weekend I finished another level.

Version .6 - 8/10/05 - Episode II is now complete.

Version .66 - 8/17/05 - Level 1 of Episode III is done. Episode I of the Death Star Plans section has been completed. Also added a cheat(10 Bolts code) thanks to Angus Goldsmith.

Version 1.0 - 8/27/05 - The entire Walkthrough is complete. As well as all other sections of this FAQ/Walkthrough. I may or may not add sections later on.

Some quick guide lines for e-mailing me:

1. Put a subject on which game you are referring to. No subject means I WILL NOT LOOK AT YOUR E-MAIL! For the subject simply put: Lego Star Wars
2. I'm typing this FAQ/WALKTHROUGH as I play the game for the first time. If I am not up to a certain point in the WALKTHROUGH section it means I am not up to that part in the game.
3. Please, Please, PLEASE! Look at the guide first before e-mailing me with a question. Most of the time your question has already been answered.

Other than these three points feel free to send me an e-mail with any tips, hints, suggestions, corrections on errors, questions, etc. to my e-mail address: (removed)
