Version 0.10 First release of FAQ

11 December 2001
Version 0.20 No added words but more explanations
Versions 0.21 Corrected an error :P

12 December 0.30 Added in Section 4.0
Added in Section 5.0
Elaborated on Tablets in Section 1.2

14 December 0.40 Added in Section 1.6 {Thanks again Terry}

1.0 INTRODUCTION

This is a highly addictive game which concentrates more on replayability than major "questing". The ability to produce monsters from phrases will have you wanting to use names of friends, families or enemies and laugh at the results :P

This FAQ covers the Regeneration aspects which is done in the SHRINE

1.1 THE SHRINE

At the outset of the game, you'll be charged with raising a monster and to help raise the popularity of the Ranch you are on. As you win your way through the Class systems, you'll unlock better breeds and get more letters to use.

1.2 TABLET

You'll be given 2 options to regenerate monsters. The TABLET allows you to use phrases to produce monsters. You will initially be able to use 4 letters, this will increase as follows

5 letters : Win D Class
6 letters : Win C Class
7 letters : Win B Class
8 letters : Win A Class

The word "letters" is inclusive of numbers and other symbols you can use.

=====

1.3 BOOK

=====

Once you have TABLET regenerated a few monsters, you'll be able to recall them from here. Also the monsters you COMBINE in the STUDIO will be recorded in your book too.

=====

1.4 MONSTER GROUPS

=====

There are 20 groups of monsters. They are Pixie, Golem, Mew, Mocchi, Dragon, Arrow Head, Suezoo, Ducken, Zuum, Tiger, Naga, Octopee, Mogi, PsiRoller, Durahan, Joker, Momo, Lesione, Zan, Antlan.

=====

1.5 MONSTER SUB-TYPES

=====

Within each MONSTER GROUP there are 22 SUB-TYPES of the monster. The last 2 of every group are SPECIAL MONSTER SUB-TYPES which generally have the best statistics for its' MONSTER GROUP.

=====

1.6 BREEDING TOTALs

=====

Under Breeding stats the number next to any monster is the number of that monster type that you have regenerated. The Total is of course the Total number of all types of monster regenerated.

=====

2.0 WORD FORMATS and TABLET REGENERATION

=====

Not all the phrases you use in MRA will produce "random" results. There are 4 groupings I have found which seem to be used. Remember words are case sensitive. This means "Pudding" is not the same as "PUDDING"

=====

2.1 FIXED WORDS

=====

The first group of phrases or words will always produce the same monster. These are "FIXED WORDS", no matter where they appear in a phrase the monster will always be the same

Example: abbit

Using abbit anywhere in a phrase will produce a Rabiroller. So this means abbit, cabbit, 12abbita will all be Rabirollers

=====

2.2 GROUP NOUNS

=====

The next set of words/phrases are ones which only affect the MONSTER GROUPS. These words can appear anywhere in a phrase, but will reflect the same MONSTER GROUP. You can use this group when trying to find a sub-type of a monster with knowledge you'll only be in that sub-group.

Example: irl

irl relates to the Pixie Group. So using irl1, irl2, irl3.... etc will produce Pixie Monster and it's subtypes

This group has a DOMINANT influence on the phrases. If they appear in a phrase, you can be almost certain that the group they represent will be

reflected in the final monster.

Just a quick note, there are some phrases which are more dominant than others this is the reason I have provided alternatives

=====
2.3 ADJECTIVES
=====

The third set of phrases affect the sub-type of monsters. While the main GROUP will change, the Sub-Type will remain constant.

Example: ock
ock belongs to the Golem Sub-Type. So using ock1, ock2, ock3 will change the MONSTER GROUP but the GOLEM SUB-TYPE will remain the same

This group of words/phrases have a PASSIVE influence. If they appear with the GROUP NOUNS, they will show the SUB-TYPE for that monster group

Again there are some adjective that are more dominant, you'll find these

=====
2.4 MIXED
=====

The fourth set of words can be used as either GROUP NOUNS or ADJECTIVES. However I've decided to leave these out.

Example: Zan, Mew
Both those phrases can be used as either a NOUN or ADJECTIVE with good results.

=====
2.5 THE REST
=====

While there is nothing random about the Generation process, the way the system is set up allows enough mystery to produce different results. The previous groups of phrases are hard coded into the game and will never change. THE REST is up to you to play around with :)

=====
2.6 THE WORD TABLE
=====

The following table will illustrate the groupings I have discussed. There are other words which can be included, for now I think the ones provided should suffice :P

WORD TABLE KEY

- ### - This is just a record number with no real significance
- GROUP NAME - Monsters belong to these groups
- GROUP NOUNS - Whenever these words are used it relates to a group
- ADJECTIVE - This can be used before or after the Nouns.

###	GROUP NAME	GROUP NOUNS	ADJECTIVE
1	Pixie	irl, exy, ady, LADY, oman, ress, GIRL	Love
2	Golem	BIG, Big	ock, tone
3	Mew	cat, Mew	Mew
4	Mocchi		PINK

5	Dragon	ragon	red, RED	
6	Arrow Head	rab, hrimp, CRAB		
7	Suezo	EYE, ook		
8	Ducken	ird, TOY		
9	Zuum	ino, saur	reen	
10	Tiger	dog	lue	
11	Naga	nake	oison	
12	Octopee	cto, OCT		
13	Mogi	ole, MOLE, COOL, rap, rill	rown	
14	PsiRoller	hino		
15	Durahan	rmor, lade, word, ARMOR, Blade	METAL	
16	Joker	emon, eath	vil, Dark, ark	
17	Momo	nut		
18	Lesione	FIN, Fin, fin	sea, Fish, Holy	
19	Zan	Zan	Zan	
20	Antlan	HERO, ero		
+---+-----+-----+-----+-----+				

=====
2.7 HOW TO USE THE TABLE
=====

Whenever you use a GROUP NOUN, you'll find that it will always reflect the same family. By adding words in front or behind the NOUNS you can change to a SUB-TYPE of that Monster Group

ADJECTIVES that are given relate to the Sub-Type of each Monster Group. Generally they can be used anywhere in the final word, but there are some exceptions. Just try them at the end of the Group Noun, if that doesn't work try putting them in front

=====
2.71 Examples
=====

Listed are some examples on how to use the table above

Examples One : When trying to find a known Sub-Type

Making a Haku [#411]

Haku is a Zan with a Durahan Sub-type

So we need the GROUP NOUN for Zan [which is Zan] and the ADJECTIVE for Durahan [which is METAL]

Now we TABLET make: ZanMETAL

In general, you want the GROUP NOUN before the ADJECTIVE. When this fails try putting the ADJECTIVE in front of the NOUN

EG ZanLove, Zantone, ZanPINK etc are all Zan Group Monsters

Examples Two : When trying to find an unknown Sub-Type

Searching for other Monster Sub-Types

By using the GROUP NOUN as a starting point, you can add words to the end of it to find different sub-types.

You'll notice I have done this in the other tables listed. When looking for the monster Vermillion, all I had to start with was the GROUP NOUN of HERO. What I did was just add numbers to the end of it until I finally found HERO95.

Rec	Num	Monster	Codes	Additional Codes [Ignore commas]

4.0 INVITATION MATCHES and TABLET REGENERATION

=====

There are 4 MONSTER GROUPS that will be unlocked only by being invited and winning against Monster opponents. All invites are done about a month before the match. Avoid doing SPECIAL training a month leading up to the Invitation or you won't get invited :P

=====

4.1 DRAGON INVITE

=====

CLASS : A CLASS Monster needed
INVITE : April 3rd Week
MATCH : May 3rd Week

=====
4.2 DURAHAN INVITE
=====

CLASS : A CLASS Monster needed
INVITE : November 2nd Week
MATCH : December 2nd Week

=====
4.3 JOKER INVITE
=====

CLASS : S CLASS Monster needed
INVITE : January 1st Week
MATCH : February 1st Week

=====
4.4 ZAN INVITE
=====

CLASS : S CLASS Monster needed
INVITE : July 3rd Week
MATCH : August 3rd Week

=====
5.0 TRAIT DESCRIPTIONS
=====

Its inevitable that I should mention some traits you will get as there will come a time where you'll want to know which you should keep. So this section includes the traits and thier ingame descriptions.

While the number of monsters in the game are fixed to 440, if you consider the number of traits each individual monster can get, you'll begin to appreciate just how complex this game is.

In My Opinion, the best traits you can hope for are Gold Gift, Iron Heart and Dusk Aura. If you get any monsterswith those then you'll have a half decent monster.

TRAIT - TRAIT DESCRIPTION

- Act. View - Makes it easier to hit high-speed opponents.
- Armor - Reduces damage, but is hard to dodge opponent attacks.
- Big Eater - Allows the monster to eat 2 items per week.
- Big Lungs - Increases the power of breathing moves.
- Cold Resis - Increases resistance against Ice.
- Coldproof - Resists Ice.
- Dark Aura - Resists Mind.
- Dusk Aura - Rarely is affected by non-physical attacks.
- Earth Know - Increases Earth power and accuracy.
- Elec Resis - Increases resistance against Lightning.
- Elec-proof - Resists Lightning.
- Eye Charm - Increases the power of charming moves.
- Fairy Know - Increases Ice, Fire, Water, Wind, Earth and Lightning powers and

- accuracy.
- Fire Know - Increases Fire power and accuracy.
 - Flex Tail - Increases power and accuracy of moves that use the tail.
 - Footwork - Dodges opponent attacks, but gets damaged easily.
 - Gold Gift - Makes it easier to raise all parameters.
 - Grace Step - Increases the power of dancing moves and makes it easier to dodge.
 - Hard Head - Increases the power of moves that use the head.
 - Hard Scale - Reduces damage, but is hard to dodge opponent attacks.
 - Hard Shell - Reduces damage, but is hard to dodge opponent attacks.
 - Hard Skin - Reduces damage, but is hard to dodge opponent attacks.
 - Heat Resis - Increases resistance against Fire.
 - Heatproof - Resists Fire.
 - Hi-Power - Makes it easier to increase the Strength parameter.
 - Hi-Resist - Mental stability makes it resistant to status changes.
 - Hi-Sense - Makes it easier to increase the Intelligence parameter.
 - Hi-Speed - Makes it easier to increase the Dodge parameter.
 - Hi-Tech - Makes it easier to increase the Hit parameter.
 - Hi-Tough - Makes it easier to increase the Life and Toughness parameters.
 - Ice Know - Increases Ice power and accuracy.
 - Iron Fist - Increases the power of moves that use the fist.
 - Iron Heart - Training hard won't tire the monster out.
 - Life Know - Increases Healing power and accuracy.
 - Light Aura - Resists Magic.
 - Loud Voice - Increases the power of loud voice moves.
 - Ltng Know - Increases Lightning power and accuracy.
 - Magc Resis - Increases resistance against Magic.
 - Magic Know - Increases Magic power and accuracy.
 - Mind Know - Increases Mind power and accuracy.
 - Rock Skin - Reduces damage, but is hard to dodge opponent attacks.
 - Sharp Bld. - Increases the power of moves using weapons.
 - Sharp Claw - Increases the power of moves using claws.
 - Sharp Fang - Increases the power of moves using fangs.
 - Sharp Horn - Increases the power of moves using horns.
 - Sniper - Increases accuracy when throwing things.
 - Soft Body - Softens damage from opponents.
 - Soft Smell - Increases the power of charming moves.
 - Spec Mods - Makes it harder to be affected by Fire, Ice, Water and Lightning
 - Sweet Vox - Increases the power of singing attacks.
 - Water Know - Increases Water power and accuracy.
 - Waterproof - Resists Water.
 - Watr Resis - Increases resistance against Water.
 - Wind Know - Increases Wind power and accuracy.
 - Wind Resis - Increases resistance against Wind.

=====

6.0 CLOSING COMMENTS

=====

Because of the number of monsters that can be regenerated, the ones listed here are just some of them. Don't ignore COMBINING monsters to get different traits.

Staying in a CLASS for about a year generally presents the opportunity for Invitational matches. The main classes these happen are in A and S CLASS

For any other game related question, don't hesitate to ask at GAMEFAQs
<http://www.gamefaqs.com/> The people there are quick to respond.

Oh and the word "Jimeous" produces an Oltana [Mogi/Antlan], a stylish monster

with Grace Step :P
