

not e-mail me about this. I will update this section when we know for sure and if/when we have a fix for it.

If you have a Gameshark SP, You need to find Codebreaker codes for it. Gameshark got bought out by a company which is using the exact same format as Codebreaker. They may look different than the stuff posted at www.cmgsgccc.com, but that is due to them using an encryption line in their master codes. Use cmgsgccc.com's master code with cmgsgccc.com's codes and it will work just fine! You should probably also get xyzman's pokemon calculator at <link now dead. A section of hosts for it will be added> That program supports all known code formats at this time. [Thanx megamanx <shinkuu_hadouken@hotmail.com> and kenobi at www.gscentral.com]

You need to have the correct master codes entered and activated first ONLY if you are playing the actual cartridge on an actual Gameboy Advance. If you have a GSA or PAR device, read the instructions which came with it. The device must be on before you boot up the game. As long as the master code is entered, you can enter any of the codes, but i would recommend you enter and use the codes one code or code group at a time. Codes may conflict with each other otherwise. Also read my notes on codes designated "type 6" as these codes must be entered and used ONLY with the master code activated and ONLY one at a time.

If you have european versions of these games and the codes aren't working correctly, it is because you need a different set of master codes. Memory-wise, the European versions and US version are identical and VBA save files (*.sav) are interchangeable between US and European games. Look for your version in the master code list below the index.

I have recieved confirmation that all codes except for the new species wild mod codes (3-line type 6), work on a real GBA. At least for the US versions. Make certain you use the correct master codes.

These codes are for use with and ONLY with either a Gameshark Advance(TM) or Pro-Action Replay(TM) device* which are designed specifically for the Gameboy Advance (TM). They will not work with your Gameshark(TM) for Gameboy(TM) or Gameboy Color(TM), or any other device INCLUDING Codebreaker(TM) and GameShark Advance SP. If you read this and ignore it, then use the wrong device with these codes, and your game gets damaged, and you e-mail me about it, all I will ask is that you do not reproduce because you may contaminate the gene pool.

Let me re-iterate about Codebreaker: These codes DO NOT work on a Codebreaker device of any kind. Codebreaker is a completely different format. It uses different code types and a different encryption method than GameShark or Pro-Action Replay.

There may be issues with older versions of GameShark Advance. The device is still being made contrary to the rumor I heard, however, you may have problems with these games if you have an older device. I recommend v1.2 or higher of the GSA Software. This refers to your Gameshark version number as well. If you have anything lower than that and you cannot upgrade to the latest version, buy a new device!

*Well it's official: Datel and gameshark are 2 different companies now with 2 different code formats. If you have a gameshark device, don't worry as long as it's up-to-date. If you have a new Pro-Action Replay device with v3 software, you're...how do I put it...SCREWED!!! AAAHAHAHAHAHA!!! >ahem!< Actually, I've

done my best to try and convert all of my codes into ARv3 format. Most of them work. Button activated codes may not. Use codes marked "PAR" if you have a v3 device such as Pro action Replay, or an old upgraded Gameshark Advance.

Another note: Most of these codes do not need to be run every time you boot up the game. If you use a code to get a certain item, enter the code, run the game, save, then turn off the game, remove the device, turn the game on again, and re-load and the item will still be there. Same with any captured pokes. In fact, leaving codes on may cause problems. It may even damage your GSA/PAR device.

A note about "type 6" codes. If a code is designated as "type 6", it means that you cannot use it with any other code other than it's self and the master code. Also, you must re-boot the game after the type 6 code is removed in order to use other codes afterwards. Do not combine "type 6" codes with any other codes besides the master code. That includes any other "type 6" code.

4-10-03:

I am no longer taking requests for the Japanese codes. I've included them here instead. If you have the Japanese version, go to "Japanese version codes" section. Use "Edit"->"find" in notepad or in your browser to find that phrase.

Please don't e-mail me about requesting codes which are already included in the FAQ.

4-05-03:

Some of the requests I get are:

Stats codes: The data for this is encrypted so it cannot be done by a single set of codes.

Southern island event: Pokemonhacker made a code set to enable this event. If it's not here, please consult LoadingNOW's FAQ which is on GameFAQs. I'm not updating PokemonHacker's FAQ because it got it's own hosting now as LoadingNOW's FAQ. You can't go to the island just because you gave yourself an eon ticket. You'll need his Codes to enable the event (that is until Nintendo gives away the secret of how to enable it)

Other move teaching codes: The only ones we know right now is the move maniac codes. The other codes from the Japanese version were type 6 and would not work on a real GBA. My Goal for this FAQ is to make real codes that everyone can use.

shiny pokemon codes: Please consult LoadingNOW's FAQ for a method to obtain any Shiny poke you want. No there will not be any other shiny wild mod unless someone discovers a better method.

Permanent stat modifier codes for your pokes: Why can't this be done? Because pokemon data is stored in a block of 20 codes which is encrypted. The encryption key is based on certain data about the trainer and the poke it's self. There is a checksum that has to be re-computed whenever you play around with this block of data. On top of all that, there is something called a MAP value which tells the data block what address controlls what stat. It is different for every individual poke and there is no way to tell what your Poke's MAP is without viewing the memory of your specific save-state in your game. This discovery lead people to develop programs called pokemon Calculators to generate legitamate sets of values for these blocks of addresses and then convert them into a set of codes for your code device. If you want one, check our thread on the forums at www.gameFAQs.com.

Please don't e-mail me about these requests. Also please don't request them at www.cmgsccc.com. It is slowing us down and getting on our nerves. If you have any ideas as to where these codes might be found, then you may post about them or e-mail me about them.

When we say that Nintendo might know that you hacked your game with our codes, we mean that if you try and enter a tournament with a sharked game, you may be disqualified for cheating. Nintendo went through alot of trouble to encrypt these games' data so they are probably smart enough to spot a cheater!

Please don't ask me questions about where to find what, or what to do after such and such a gym. I publish codes but I'm not a walking encyclopedia on the game. If you want that kind of advice, either look through the FAQs yourself, or go to the www.GameFAQs.com forums and ask there. I refuse to answer anymore questions regarding the game it's self unless it has relevance to the FAQ.

Finally, Ru/Sa is nothing like R/B/Y/G/S/C. Codes from those games cannot be ported over to Ru/Sa. The data structures are completely diferent.

Another note about e-mailing me with complaints of codes not working:

1. check to see if you can get any of my other codes to work
2. Let me know if you used an emulator or a real GBA
3. Let me know if you are playing the US version or the japanese version, even if it's partially translated.
4. Let me know how you entered the codes if you used an emulator (see tutorial below)
5. Let me know if you used the master codes if you used a real GBA and also let me know how you labeled them. Don't use M, (M), (m) or m as the name of the master code or the game will not let you active it (Thank you Tahnok from www.gameFAQs.com).
6. Let me know if the game or device did anything after you entered the codes. I've been getting alot of people finding out they were using their device incorrectly.
7. Let me know what version you have of the device. It's useful to know what Software version you are using.
8. Let me know WHAT codes you were using and how you were using them. i.e. were you using a wild pokemon modifier code and the infinite masterballs code at the same time? You shouldn't be if you read all the notes about how "Type 6" codes cannot be used in conjunction with other codes. Don't be embarassed if you did, but let me know because that info can help me fix your problem.
9. If you are requesting a code in your e-mail, you must specify all the above relevant information (game version, game language, cheat device and version).

Otherwise, I can only tell you how to find it in my FAQ if it's there.

If you are still having problems, please consult the www.Gscentral.com forums or www.gameshark.com for tech support.

A note about codebreaker codes or the pokemon calculator: For any questions regarding either Codebreaker or the calculator program, please consult the boards at www.cmgsccc.com. For the pokemon calculator specifically, e-mail Gavin at spaffoda@hotmail.com. For xyzman's calculator, consult the gameFAQs.com forums.

Why do I have to make all these restrictions? Because I recieve 20-30 e-mails a day ever since I wrote this FAQ! I have a hotmail account with limited storage! I will help trouble-shoot your devices. If multiple people ask me the same

question, I'll answer it here assuming it is relevant to the FAQ.

Type 6 codes are proving to be our only hurdle for people with real GBAs. We are trying to find alternative "normal codes" to replace them. In the mean-time,

Any help in fixing this issue is appreciated. We don't have any hardware to work

with so all testing will have to be done by you.

Type-6 refers to codes that write to the ROM instead of the RAM where your save-states and player data are stored. The ROM is the game it's self in a sense, however you can't write to a cartridge. Instead, the code looks for the area in the memory where the game is read and interpreted. Then it intercepts at the right moment and changes the interpretation.

We call it "type 6" because if you took a type 6 code and decrypted it, it would look sorta like this:

```
6aaaaaaaa vvvvvvvv
```

where

a = address

and

v = value.

Another note about type 6 codes and VBA. The effects of type 6 codes stay even after you remove the code(s). To fix this, you need to re-open the ROM file and not just reset the game. You can save after removing the code, and as long as you re-opened the ROM, the effect should be gone.

Do not activate a wild level mod code and wild species mod code at the same time. It will not work!

I've implemented a new index system because now we have 4 different code sets: English version Gameshark (GSAA), Japanese version Gameshark (GSAJ), English version Pro-Action replay (PARA), and Japanese version Pro Action Replay (PARJ). Learn to use edit->find and you can find any code or code set you're looking for in my FAQ.

A note about Pro action Replay version 3 codes. I don't have the hardware to test them on so I'm assuming these work. At this time, I have no way of fixing these new codes if they do not work. Please do not e-mail me about them until a new version of VBA is released with PAR v3 compatability. The format is fairly new so alot of work still needs to be done.

I'm not sure if the master codes I gave you for the new PAR devices work because PAR now has a new format. I just re-encrypted everything, and they all should work according to what we know of the new format, but we don't know if the new format requires a new type of master code.

When we say not to use more than one code, we are only referring to the wild mod and wild level mod codes. You cannot have 1 of both and you cannot have more than

one of each. You still have to use the proper master code (all lines directly underneath the name of the game you are using and nothing past that)

In the case of the item codes, you don't need to include those last 3 digits before

the item name. Those are for my reference when I made the codes to make sure I accounted for every possible item type value in order.

v0.1 - Written 1-02-03 - Only Ruby codes done.

v0.2 - Written 1-04-03 - Added some corrections and 2 new tutorials

v0.21 - Writtent 1-06-03 - corrected Gloom's codes

v0.22 - Written 1-08-03 - More corrections. Wobbufet, Qwilfish, Rabukasu, Skarmory, pineco, Ampharos, wooper, and a ton more!

v0.23 - Written 1-13-03 - Yet even more corrections!

v0.30 - written 1-16-03 - some stat codes, item codes, and time codes completed

v1.0 - written 1-18-03 - Pokemonhacker and Loading's FAQ added! (You have to read it to believe it!). Added index. Added more codes on top of all that!

v1.01 - written 1-19-03 - a few fixes made

v1.02 - written 1-19-03 - added explanation for full pokedex code

v1.03 - written 1-19-03 - Added quick level up code

v1.04 - Written 1-20-03 - only a few errors corrected

v1.05 - written 1-20-03 - added www.Neoseeker.com to my host list. Added illusion island code and method to pokemonhacker and loading's FAQ.

v1.06 - Written 1-21-03 - fixed illusion island codes to one code and updated method. Also added max gene codes to pokemonhacker and loading's FAQ (P&L's for short.)

v1.07 - written 1-22-03 - fixed max genes codes

v1.08 - written 1-23-03 - added Illusion island FAQ to explain how it works. addressed concerns over "codes not working on real GBA" issues. Fixed index.

v1.09 - written 1-23-03 - More fixes and formatting changes

v1.1 - written 1-24-03 - yet more fixes. Hopefully we may be able to fix everything soon!

v1.11 - written 2-06-03 - Full pokedex codes (all seen and caught) added.

v1.2 - written 2-07-03 - added trainer cards and trainer's eye codes.

v1.21 - written 2-08-03 - minor fixes

v1.22 - written 2-10-03 - more fixes

v1.23 - written 2-11-03 - added info about type 6 code effects and VBA

v1.24 - written 2-14-03 - added note regarding bug with move modifier codes

v1.25 - written 2-22-03 - added egg island codes and a VBA tutorial

v1.26 - written 2-22-03 - added Hinbasu enabler code and explanation for Latios /Latias codes

v1.27 - written 2-23-03 - added money code and all badges, pokenavi, etc... code

v1.28 - written 2-23-03 - added Coin, ash sac, and win number codes and a note about max genes codes

v1.29 - written 2-24-03 - added walk through walls code, Notes for hinbasu code, and a new host

v1.3 - written 2-25-03 - added codes for secret trainer ID and a better explanation of the walk through walls code as well as a teleport to egg island code

v1.31 - written 2-26-03 - added new host

v1.32 - written 3-05-03 - added <http://df.zapchu.com> to host list

v2.0 - written 3-18-03 - All codes for US versions done.

v2.01 - written 3-18-03 - Move list added to move codes section as well as more codes completed

v2.02 - written 3-19-03 - added experience share code

v2.03 - written 3-19-03 - added even more codes and fixed all the item codes.

v2.04 - written 3-20-03 - added some more codes including 2 porok codes and flash cave code

v2.05 - written 3-21-03 - added more codes. Fixed some codes. added Labmaster's codes for all the new species. Added some slower level gain codes to help those who can't get the code to stop.

v2.06 - written 3-22-03 - added code for over 4-billion cash to pokemonhacker's FAQ section and also added labmaster's normalization code to turn off wild poke

mod codes.

v2.07 - written 3-22-03 - added explanation for move maniac codes. I sorry for forgetting

v2.08 - written 3-25-03 - added www.animejourney.com to my hosts list. Added note for those who have incompatibility issues.

v2.081 - written 3-26-03 - added another possible code issue fix.

v2.082 - written 3-29-03 - added new host

v2.09 - written 4-04-03 - added new notes and a controll code for quick level up codes. Also added new porok (pokeblock) codes. Finally, Replaced mirrage island code with working one (thank you pokemonhacker)

v2.1 - written 4-05-03 - condensed some codes (thank you Pokemonhacker)

v2.11 - written 4-09-03 - various fixes and a new host added

v2.2 - written 4-10-03 - added back old Japanese version codes and some new notes

v2.21 - written 4-12-03 - added back labmaster's removal code with some fixes and new notes

v2.22 - written 4-15-03 - fixed a code (thank you Jacob <Domann.Duracom.net>) some new notes

v2.23 - written 4-16-03 - added more notes to make things a little clearer

v2.24 - written 4-18-03 - even more notes. When will you people learn to read before randomly hitting buttons!!! GAAAAH!!!

v2.25 - written 4-22-03 - more notes added

v2.25b - written 4-22-03 - more fixes

v2.26 - written 4-30-03 - a new host added

v2.27 - written 5-07-03 - fixed a code and am beginning the process of translating the FAQ into AR v3 format

v2.28 - written 5-18-03 - more notes and added PAR v3 format codes

v2.29 - written 5-20-03 - new index system added

v2.29a - written 5-22-03 - more notes added

v2.30 - written 6-9-03 - some corrections. fixed the list of emulator only codes (thanks sevel_gepan.hotmail.com, cloud015.hotmail.com, Shyver87.aol.com, and michaeljohn27.hotmail.com)

v2.31 - written 6-10-03 - more notes

v2.32 - written 6-11-03 - more notes

v2.32a - written 6-14-03 - added new host

v2.33 - written 6-22-03 - added more notes about quick level up codes

v2.34 - written 7-07-03 - more notes and format fixing

v2.34a - written 7-08-03 - new host added

v2.34b - written 7-17-03 - new note added

v2.34c - written 7-22-03 - figured out that European version incompatibility is due to using the wrong master code.

v2.35 - written 9-02-03 - a few corrections and a new master code section added

v2.35a - written 9-03-03 - new host added

v2.36 - written 9-19-03 - new host added as well as the Spanish and Italian version master codes

v2.36a - written 10-09-03 - new host and more notes added

v2.36b - written 11-11-03 - spammers decided to attack every e-mail listed in my FAQ. I've removed all e-mails in the host section, but I must keep them in a separate document for my own use. I replaced all instances of "@" with a "." in case the spammer was using a harvester. The damage may have already been done. I am very very sorry.

v2.36c - written 1-04-04 - added new host and a few more notes and fixes.

I. Master codes for all versions and devices that we know of

////////////////////////////////////

These are not needed if you use an emulator!

If you aren't sure what master code you should be using, please check here.

You have to enter these codes in your Action Replay / Gameshark in order to use the other codes of these FAQ. Don't use M, (M), (m) or m as the name of the master code or the game will not let you active it (Thank you Tahnok from www.gameFAQs.com).

also note that GSA or PAR device must be on before loading the game.

[Format taken from xyzman's readme file for his Pokemon calculator program]

4. Click on the "Gameshark" button. You should now see something like this:

```
|-----|  
|       |-----||  
|Descriptpion:|      ||  
|       |-----||  
|       |      |  
|       |-----||  
|       Code:|      ||  
|       |      ||  
|       |      ||  
|       |      ||  
|       |      ||  
|       |      ||  
|       |      ||  
|       |      ||  
|       |      ||  
|       |      ||  
|       |      ||  
|       |-----||  
|       |      |  
| |-----|   |-----| |  
| |   OK   |   |  Cancel  | |  
| |-----|   |-----| |  
|-----|
```

5. Type the code(s) in in the big box labeled "Code".
- If a code has a space in it, remove the space (i.e. if the code looks like this: xxxxxxxx yyyyyyyy, enter it like this: xxxxxxxxyyyyyyy)
 - All codes contain and only contain numbers 0-9 and/or letters A-F.
Do not use "0", "Q" or any other character that looks like "0" except "0"
 - Don't confuse "4" and "A" or "8" and "B"
 - If you can, Copy-Paste these codes instead of typing them out individually. This will ensure accuracy.
 - If a code has more than one line, all lines must be entered and active at the same time
6. Click OK on both menus to return to your game.
7. ???
8. Profit!

////////////////////////////////////

////////////////////////////////////

GSAII. Master codes

Let's start with some codes that work for both versions. First we'll need some master codes:

You have to enter these codes in your Action Replay / Gameshark in order to use the other codes of these FAQ. Don't use M, (M), (m) or m as the name of the master code or the game will not let you active it (Thank you Tahnok from www.gameFAQs.com).

also note that GSA or PAR device must be on before loading the game.

Pokemon Ruby Master Code :

9E6AC862 823AB7A8
46B7D9E4 A709E9E1

Pokemon Sapphire Master Code:

9E6AC862 823AB7A8
8365F8FA 817CF3E9

these are actual codes for Gameshark or Pro Action Replay*

Ugh!! If you are having trouble reading the master codes, please read this. I wrote the master codes like this for pokemon Ruby for example.

Pokemon Ruby Master Code :

9E6AC862 823AB7A8
46B7D9E4 A709E9E1

Now below is how you are supposed to read the codes as well as all codes in this FAQ

Pokemon Ruby Master Code :

9E6AC862823AB7A8
46B7D9E4A709E9E1

This is how you are supposed to read them. You have to enter and activate both lines. Please read all notes regarding any codes in the FAQ

////////////////////////////////////
GSAAIII. Universal codes

Here are some codes based on hacks from other people. I hope I did this right. If you have any problems with it, let me know via e-mail. If I Gave credit of your hacks to someone else, please provide proof that I did so. It must be dated for authenticity. If you made any of these hacks and don't want them published as GSA codes, e-mail me and I will try to accomodate your wishes.

[Original hacks by Radical dreamer at <http://www.cmgsgccc.com/forums/>]

GSAA1. Infinite HP in battle 1st pokemon (Will look like pokemon has 0 HP)
51488C4F 907B35D5

GSAA2. quick level up code (Turn off after you reach desired level or you won't leave the battle. In VBA just disable it and it should stop on it's own. Uncheck it in the cheat list and a "D" should appear to the right of it. You could also just hit "Remove" and it should shut off)

Also note that these are one-hit kill codes too. If you did the code successfully, you can test it by holding L and R durring your Attack and it should kill the oponent poke in one hit.

Enter this code first to activate and deactivate the code by pressing and holding L and R at the same time in battle. You have to press and hold the L and R keys right after you see the "x gained # exp. ponits!" message. This will help people with real GBAs. Make sure that the next code underneath it is the quick level up code, or else it won't work. In fact, group this code with the quick level up code if you choose to label and save the code. Make sure that this code is first and the quick level up code is directly next and

below it.

[Thank you pokemohacker]

You may want to remove any other pokes in your party while using these codes. A wierd glitch i found is that sometimes pokes who didn't fight will get the experience points instead and will start leveling on their own

FB089E40 B13D1214

Another note: This code will keep adding 25,443 exp so if you turn off the code, it will add that amount of experience before it shuts off completely so you will continue to gain levels until that exp gain gets finished.

A946FE8E 380AF65C

here's one for only 1,000 exp

DD855E20 B45F51E3

here's one for Only 500 exp

E425AD47 7EAE9C4D

here's one for only 100 exp

58EFC9F2 EF4CEF9E

here's one for 50 exp

917FFE9B FB4A6ABB

The growth rate will be slower the smaller the exp code you use. If you're having trouble with stopping the level gain, try using a smaller code next time.

GSAA3. infinite master balls in first slot in item pocket. note that putting masterballs in your item pocket will make them infinite as long as they aren't transfered or moved. you can even enter the code, turn it off, save, and they will still be there and still be infinite.

FA587517 C6604F09

GSAA3a. 99 rare candies in slot 2 in item pocket:

(see notes above)

A44AFB0B 6808D662

GSAA4. Item codes for 1st slot of main pocket 1st slot in main pocket 99 of item code

68E6EAC1 6AB638B4

Now we begin the long list of item codes for the first slot. If you want them in the proper pocket, Move them to your PC and then retrieve them again.

F12F5BBE	2045DEBD	15A	HM08	(Diving)

Ignore the last 3 digits. Those were used in the list I pasted the labels from. You'll need to put an item into slot 1 of your bag's main item section which you want to change or get rid of, else the code will over-write what ever is there.

Please note that no matter what you code for, it will always show up there. Key items, berries, TMs, it doesn't matter. It will always be in that slot.

*Eon ticket alone will not allow you to go to the southern island. Use pokemohacker's southern island codes in his FAQ.

GSAA6. Time codes

[Original hacks from RAMS' FAQ at www.gameFAQs.com and at www.kyogre.cjb.net]

[added thanx to omega2k and mort from www.cmgsgccc.com for english code hacks]

Time changing code. The number indicate hour. These actually work to change the tide. Just experiment until you find the right one.

Normal clock

Normal clock reset days to 0

[original hacks by baermoon at www.gameFAQs.com]

33A40C8D 59C6FF49
CF5A4A6F 36D8EB41
E127CED5 7ADC20F7

Negative clock reset days to 0

[original hacks by baermoon at www.gameFAQs.com]

AE4BF6BC 811FEC31
0DDE7238 800FEA76
65BDD59C C0D7F908

Use the day reset codes if you are having problems with clock codes.
The negative clock codes should be the ones that controll events in
the game, however I posted both in-game clock codes just in case I'm
wrong.

GSAA7. Porok codes

Porok game codes

[original hacks by Lim Soon keat]

Porok game codes

B72B6648 E96784C6(99 perfect hit)
2A3ECC63 E0E90B29(99 hit)
31F061B1 2F14FAC8(99 miss)

Enter these before trying the porok game at the contest houses, and no matter what, you will get 99 at the end for the stat and finish first.

These are for your oponents. If the whole thing is a combined effort, then these will give them 99 stats too and should help improve your results

oponent 1
58ECF96C A4BCE2D7(99 perfect hit)
0CF30799 AC0E6310(99 hit)
C95D836E 49371E87(99 miss)

oponent 2
4129D8B0 98D9ED3A(99 perfect hit)
2AC2757A 0A45E4A7(99 hit)
4040E327 1AC7F2E7(99 miss)

Note: The japanese called them poroks. The US calls them pokeblocks. I use the term "poroks" just because I'm comfortable with it.

lvl 80 porok

GSAA10. All badges, pokedex, and pokenavi codes
[Original hacks courtesy of Radical dreamer of www.cmgsccc.com]
Here's the all badges code:

FACF57F8 E652D19D Badges only.
06667212 95166111 Badges and Have pokedex
D20C31F1 82F3CA60 Badges, Pokedex, and Pokenav

*Use the one appropriate for what you have in the game. (if you already have the pokedex, use the 2nd one. If you already have the pokenav, use the 3rd one

GSAA11. Have all PC decorations (English only)
[Original hacks by Radical dreamer and Jaroma-ru at www.cmgsccc.com]

Note: some decorations may be missing. Also codes must be entered in groups and not all at once because VBA doesn't support this many codes at once.

GSAA12. 99 heart scales in second slot of item pocket (for move maniac)

E0D04616 46FFC401

GSAA13. Move maniac codes

[original hack from http://www.geocities.com/fat_parrot/rowr/RuSa.html

which is a translation of

http://www.tk2.nmt.ne.jp/~nadesico/code-gba/gba-pocketmonster_ruby-sapphire.html]

Here is how you use them:

1. Get heart scales
2. Go to fallarbor town and go into top the left-most house where you should see a fat guy.
3. Enter code for desired move

4. Make sure you have the poke you want to teach the move to with you
5. Talk to fat guy and give him a heart scale
6. Select the poke you want to teach the move to
7. Select the top-most move on the list and teach it to the poke
8. once the poke learns the new move, check and you'll see that it actually learned the move you entered the code for.

[move list translation courtesy of pokemonhacker]

GSAA14. Safari zone codes
[original hacks by Nonofyours at www.cmgsgccc.com]

Safari zone infinite steps.
When you wanna get out turn the code off and walk a few steps

Note: deactivate code while on bike or time will run out.
[Thank you GBA Master <maj.hmcltd.net>]
27E4C76C 925C042E

infinite safari balls
AAB7409C B1DAFD3F

GSAA15. Battle rate codes
[original hacks by radical dreamer at www.cmgsgccc.com]

Quick Battle start

*You know how when you get into a battle, it does that music and flashes the screen a few times before the battle starts? Well this removes the few flashes and jumps right into the fade-in part of the battle start sequence.

39FBF50A C6AFFCAA

No random battles
BE0BA801 5694A162

GSAAIV. Pokemonhacker's and Loading's FAQ

Here is the most accurate set of codes found to date. All credit for finding them goes to pokemonhacker and Loading. I've been given special permission to include their FAQ within my own FAQ from Pokemonhacker himself.

0. Version History, Copyrights & Special Notes.

1. Action Replay / Gameshark Codes.

1.0 Master Codes.

1.1 Gender & Max Genes Codes.

1.1.1 Always Male/Female Codes.

1.1.2 Always Maxed Genes Codes.

1.2 Pokémon Encounter Codes.

1.2.1 Wild Pokemon Modifier Codes.

1.2.2 Wild Pokemon's Level Modifier Codes.

1.3 Item & TH/HM Moves Codes.

1.3.1 Unlimited Items Code.

1.3.2 Make Pokémon learn any TM-HM Codes.

1.3.3 Make HM Moves erasable Code.

1.4 Miscellaneous Codes.

1.4.1 Unlock Full Pokedex Codes.

1.4.2 Mirage Island Code.

1.4.3 Southern Island Event Codes.

1.4.4 Feebas's Tiles Code.

1.4.5 All badges, Pokedex, Pokenavi... Code.

1.4.6 Money Code.

1.4.7 Walk Through Walls Code.

1.4.8 Secret Trainer ID Codes.

1.4.9 All Pokémon in Pokedex Codes.

1.4.10 All Trainer in Trainer's Eyes Codes.

1.4.11 Share Experience After Battle Codes.

1.4.12 Trainer Card's Stars Codes.

1.4.13 Trainer Card's Back Codes.

2. Thanks.

GSAA0. Version History, Copyrights & Special Notes.

V1.0 : 1st release.

V1.1 : Made some corrections, added Secret Trainer ID and All Pokemon
in Pokedex Codes.

V1.2 : Added Trainer's Eyes Codes.

V1.3 : Added Share Experience After Battle Codes.

V1.4 : Added Trainer Card's Stars and Trainer Card's Back Codes.

All trademarks and copyrights contained in this document are owned by their respective trademark and copyright holders. If you plan to use these codes in your FAQ/Website, give credits where it's due. And we do NOT authorize people to use these codes for any commercial use.

Special Note 1 : All these codes are in Action Replay / Gameshark format, and work for both Pokémon Ruby and Sapphire games. Most of these codes use a feathure that exists ONLY in the Action Replay / Gameshark. That means these codes won't likely be ported to CBA (Code Breaker Advance), unless they upgrade their device...

Special Note 2 : We put some informations about Nintendo being able to spot if you hacked the game. If you plan to Link you game to the NGC, or transfer Pokémon with the next Pokémon game, don't use codes that Nintendo can spot. Remember : cheating is bad :)

GSAA1. Action Replay / Gameshark Codes.

GSAA1.0 Master Codes.

You have to enter these codes in your Action Replay / Gameshark in order to use the other codes of these FAQ.

Pokemon Ruby Master Code :
9E6AC862 823AB7A8
46B7D9E4 A709E9E1

Pokemon Sapphire Master Code:
9E6AC862 823AB7A8
8365F8FA 817CF3E9

GSAA1.1 Gender & Max Genes Codes.

GSAA1.1.1 Always Male/Female Codes.

Enter one of these codes and you'll set the gender of the next wild Pokémon you'll see (if it has any gender or course).

Note : It can still be Shiny, but with a chance of 1/8192.

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

Always Female Pokémons Code :

B917F77E0FD658EB

Always Male Pokémons Code :

3537AAD42B010F73

GSAA1.1.2 Always Maxed Genes Codes.

Max genes for wild Pokémons:

60C7C02882820B6F

2CEFA3FD3A1F566D

871BD5C005576B47

6BE4C32E95BE05E2

20DAB881C1E06EF7

6568BC1F64A183EE

Note: You can enter any one of these 7 codes to max out one specific gene, however, we don't know which line does what yet, so experiment away!

GSAA1.2 Pokémon Encounter Codes.

GSAA1.2.1 Wild Pokémon Modifier Codes.

Once you've enter one code, you'll encounter only one kind of Pokémon, until you reload your game. Theses codes work with the wild Pokémons you encounter by walking in the grass, walking in the caves, and surfing (that means it won't work for fishing).

This codes will only make you fight "old" Pokémons. We might add new Pokémons later...

Note 1 : In case you didn't notice, the Pokémons are listed using the old Pokédex numbers.

Note 2 : Never activate two of these codes at the same time!

Note 3 : Do not activate a wild level mod code and wild species mod code at the same time. It will not work!

If you use these codes, Nintendo might know that your Pokémon has been hacked.

Remove - Use this for the game to act normally. This will fix problems with wild poke codes not turning off after being removed. Disable the wild poke code you are using and then enter and enable these codes and your random battles will go back to normal.

Thank you again labmaster!

Remove - Use this for the game to act normally.

For VBA where you used the 3-line wild poke code, use all 3 of these:

```
FF57AEB3 C8992DF9
45216134 ED3AEB49
492A7105 38EDD2D9
```

For real GBAs, where you can't use any 3-line wild mod codes, please use this code:

```
492A7105 38EDD2D9
```

And some notes from Labmaster:

Thanks to Pokemonhacker and Loading who hacked the JAP version of these codes, these are the US version codes though. They've posted the codes from 1-250 on their FAQ but they have yet to include the 'new' Pokemon codes (as they are 3 line Type 6), so that's why this is here.

Note: They're Type 6 GSA, meaning you have to reload the cartridge to nullify their effect. Actually, if you put on the 'Remove' code, that's listed at the top, the game will act normally. You can also put on a code, battle, take it off, then put on a different code. There have been no known side effects from doing this. Also, codes 251-386 WILL NOT WORK on a normal GSA. This is a common problem with Type 6 codes, and there is nothing that can be done about this at the moment.

Another Note: Like most GSA codes, you USE THESE AT YOUR OWN RISK. I WILL NOT ACCEPT ANY RESPONSIBILITY FOR CORRUPTED SAVE FILES OR ANYTHING LIKE THAT. THESE CODES ARE KNOWN TO BE VERY BUGGY. THEY'VE BEEN TESTED ON VBA WITHOUT ANY DIFFICULTY, SO THERE'S NOTHING WRONG WITH THE CODES. DO NOT EMAIL ME COMPLAINING THAT THEY DO NOT WORK ON YOUR 'REAL' GSA, YOU WILL BE IGNORED.

Here is how you use the wild modifier codes:

First remove all codes, save using the normal, In-game save feature (NOT THE F-KEYS!!!), then re-open your ROM (File->open) (NOT "Reset"), or Turn off your GBA. Then open your save state from in the game (NOT THE F-KEYS!!!)

(The one you get on a real GBA). If you have a Real GBA and Real GSA, you may have to enter the codes into the GSA before turning your game back on.

Enter only one of these 2 codes depending on which game you have (ruby or Sapphire). Each code is 2 16-digit lines so when I say 1 code, I mean both lines directly under the game you have. These are the same master codes as above. I just re-copied them for convenience.

Pokemon Ruby Master Code :

9E6AC862823AB7A8

46B7D9E4A709E9E1

Pokemon Sapphire Master Code:

9E6AC862823AB7A8

8365F8FA817CF3E9

Now enter the Scyther wild modifier code

123 - Scyther

C4C02E8BCB6C0843

now encounter a wild poke and you'll fight a scyther!

Now to remove the codes:

For a real Gameboy Advance:

Remove the code, save, turn off the GBA, turn it back on, re-load your save file.

For emulator users:

Remove all codes from the cheat list, Save with the regular in-game save feature (just like you would on a real Gameboy Advance) (NOT THE F-KEYS!!!), Re-open the ROM ("File -> Open", then choose your ROM file) and re-load your regular save game (NOT THE F-KEY SAVE STATES!!!) The same way you would on a real GBA.

Note about all the new species: These are 3-line type-6 codes so they do not work on a real GBA and GSA. They only work on emulators as far as we know. We will continue to search for a species mod which will work on real GBAs. Perhaps they may one day make a device that can handle multiple ROM-write codes, but until then, they are only usable via the emulator.

[code translations by labmaster <lab_master.email.com>]

Wild Pokemon Modifier Codes by Labmaster
lab_master.email.com

Thanks to Pokemonhacker and Loading who hacked the JAP version of these codes, these are the US version codes though, hacked by ME. Note: They're Type 6 GSA, meaning you have to reload the cartridge to nullify their effect, resetting won't help. Report any errors to the address above.

Also note that they may be labeled wrong. I'll try and correct them when errors are reported.

GSAA1.2.2 Wild Pokémon's Level Modifier Codes.

These codes change the level of the wild Pokémon you encounter.
Like the Wild Pokémon Modifier codes, they'll be "always on",
until you reload your game.

If you use theses codes, Nintendo might know that your Pokémon has been
hacked.

Level 0: F5AB342D 3CFA84F8

GSAA1.3 Item & TH/HM Moves Codes.

GSAA1.3.1 Unlimited Item Code.

When this code is one, the quantity of the items you have will never decrease.

You can also "dupe" items one by one by giving them to a Pokémon.

Note : This code works ONLY when you use items, not when you move them
(put in the computer) or sell them...

If you use this code, Nintendo might know that your game has been hacked if you get more than one unique item.

A1D75FBC CEC709E8

1.3.2 Make Pokémons Learn any TM-HM Codes.

With these codes, any Pokémon will be able to learn any TM-HM.
If you use theses codes, Nintendo might know that your Pokémon has been hacked if your Pokémon learns Moves that it can't learn normally.

For TM 01-32:
5AC15E9E 77A6E0ED

For TM 33-50 and all HMs:
15325455 AA59B848

GSAA1.3.3 Make HM Moves Erasable Code.

When this code is on you are able to "overwrite" any HM move that your Pokémon learned.

If you use this code, Nintendo will *not* know that your Pokémon has been hacked.

960CBF3C 14553BAE

GSAA1.4 Miscellanous Codes.

GSAA1.4.1 Unlock Full Pokédex Codes.

Once theses codes has been entered, the full Pokédex (counting the 386 Pokémons) is unlocked. You can save your game, and the new Pokédex will be saved.

If, for some reasons, you want to make the Pokédex come back to its original state, you can try the Disable Full Pokédex Codes.

If you use theses codes, Nintendo might know that your Pokémon has been

hacked.

Unlock Full Pokédex Codes :

E7343B1C 1E9465D8
03C39BA2 B0541E66
85DC5BF3 76315A10

A grey color in the Pokedex means the full Pokedex has been enabled. Now you just have to make a change in the pokedex option to see the old pokedex: while in the Pokedex, go in the menu of the Pokedex (press select), then choose "Shift", select "Mode", and choose "National Dex".

Disable Full Pokédex Codes :

267905C7 7608FA24
2C770C00 9DC9D688
AEA1B760 4DC4E1C2

GSAA1.4.2 Mirage Island Code.

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

With this code on, Mirage Island will always be on route 130.

61260541 1EB19C53

Mirage Island's FAQ:

Q - What is Mirage Island ?

A - An island that appears on Route 130. It is full of Wynauts.

Q - What was that long Mirage Island FAQ you had before ?

A - A big mistake... We were wrong, and we admit it. It seems that a random number is computed each day, and if this number match one of your Pokemon number, Mirage Island will appear. If the number is really random (we're looking into that), that means your chances to see Mirage Island is 65536 divided by the number of Pokemon you have. And no female/male thing involved, any Pokemon can do the trick.

Q - So, now, how do I go to Mirage Island without cheats ?

A - Just bring ALL you pokemon to the old man in the bottom right house of Pacifidlog Town, and do that each day, until he sees Mirage Island.

GSAA1.4.3 Southern Island Event Codes.

This code will enable Latios/Latias battle on the Southern Island.

0332305F 41A5F851

Plus, if you have the "Eon Ticket", you'll be able to take the boat that will bring you to the Minami no Kotou.

This code will allow you to battle Latios/Latias everytime you examine the "stone" (or egg, or whatever it is) (without this code, you'll encounter Latios/Latias only one time) :

7C4D9034 783EE1E6

The 1st code sets "on" the flag that says that the egg island event is available (that means that you can take the boat to egg island if you have the "Eon Ticket", and that Latios/Latias will appear if you examine the stone).

The 2nd code sets "off" the flag that says that you have already done the stone island event (this flag is set on when you examine the egg and encounter Latios /Latias (obvioulsy by using the 1st code I gave you). Once it has been set on, you can't go to Southern Island / encounter Latios/Latias again).

I think you must have finished the game for the 1st code to work (or at least that you must have gone far enough, so you can already take the boat to go to battle tower or other places).

----- GSAA1.4.4 Feebas's Tiles Code. -----

Feebas mistery revealed :

As some people mentionned, Feebas only appear on route 119. But he doesn't appear in 1 tile of water, but in 1 to 6 tiles (and he'll be the only Pokemon you'll find in this these tiles).

Your position when fishing does not matter, it's the tile in which you are fishing that is important (the one that you are facing).

The location of Feebas is random. When you create a new game, the game Computes some random numbers. One of these random numbers will be used as the "seed" of the hinbasu tiles (other number will be used for the Trainer ID, secret Trainer ID...). The game takes that number, and applies an algorithm to it, so it can create 6 numbers that will always be the same with this seed. And with a different seed (ie a different game), these 6 numbers will be different.

Conclusion : Feebas's tiles are random. There can be from one to six tiles.

With this Type 6 code, Feebas will appear everytime, on every tile of water of route 119...

Enjoy!

11E58406 0C731B08

GSAA1.4.5 All badges, pokedex, pokenavi... Code.

All badges, pokedex, pokenavi... Code:

BC33578D 82482A93

GSAA1.4.6 Money Code.

Lotta Money :

EF6BB9F3 A0BDF629

Alternative code for over 4 billion cash
[by mastersord]

1B3E8B0C E075B270

GSAA1.4.7 Walk Through Walls Code.

CE2CCCB2 5D8D815D

It's a Type 6 code. It allows you to walk over any obstacle like trees, houses, rocks, and to walk on water. With this code, you'll still be able to interact with the game (enter doors, talk to people, take items, etc...). The two things you can't do are :

-walk directly from ground to water (and water to ground). To do this, you need either to use the SURF move, or to walk from ground to water from an unauthorized place (like walk on a tree and from there walk on the water, or if you are on the water, walk on a rock and from there walk on the ground).

-Go out of the map limit. Each map (each route, room, etc...) is a rectangle of tiles. With this code, you'll be able to move anywhere within that rectangle, but you won't be able to cross its limit (unless you enter another map). That means, for example, if you enter a house, you won't be able to walk in the "dark". But anyway, there is nothing in that dark :)

GSAA1.4.8 Secret Trainer ID Codes.

Find out your Secret Trainer ID Codes (1).

Enter this Type 6 code, and look at your trainer card. It could be a bit messy (it might even make the game crash! If it does, you can use the 2nd set of codes), but it'll display your secret Trainer ID instead of your regular Trainer ID. After that, write down this number, and turn the code off (switch off your GBA). For now, knowing your secret Trainer ID has no useful purpose. But maybe one day some people will make proggies that'll use your secret

Trainer ID and your normal Trainer ID, and use them to compute a pokemon with all the characteristics/stats/genes... you want (and that'll obey you), find your hinbasu tiles... And, who knows, maybe more!

A5B23891 B0F9BB70

Secret Trainer ID revealed (2).

If the 1st code makes your game crash, here are 2 other Type 6 codes that will work perfectly (but require some calculation).

1st code:

33AAEAD0 C0161DD8

2nd code:

78146786 CF7E996B

Enter the 1st code, and look at your trainer card. Write down the Trainer ID numbers that are displayed.

Do the same thing with the 2nd code. Now, open windows calculator (or any tool that can make decimal-hexadecimal conversion). Enter the 1st number as decimal, and convert it to hexadecimal.

You should have 4 numbers (A-F are numbers in hexadecimal). Write down the 2 1st numbers (if you have A152, take A1). Do the same thing with the numbers you will get with the 2nd code.

Now take the 2 sets of 2 numbers you just wrote down, and enter them in windows calculator as hexadecimal numbers in the order you wrote them down (if you had A1 and B5, enter A1B5), and convert this number to decimal : you have your secret Trainer ID.

GSAA1.4.9 All Pokémon in Pokedex Codes.

By entering those codes, you'll have your Pokédex completed.

(all Pokémon Seen & caught)

We split these codes so you can enter them easily.

GSAA1.4.11 Share Experience After Battle Codes.

If you use theses codes, you won't have to switch your Pokémon
during battles to make them gain experience. Just beat your
oppoment with 1 Pokémon, and the game will think all your
Pokémon have fought the battle, and will give experience to all
of them!

3E9BD973 F2C8482E
E5CB6F7F C97AA5CC

GSAA1.4.12 Trainer Card's Stars Codes.

First, I'd like to say that I did some research, and I found that there
were only 4 Stars in the game. Not 5, 4.

There still might be a very slim chance that I missed something, and that the last star could be obtainable using the Link cable, but I seriously doubt about it...

1st Star Code :

This star is unlocked when you finish the game.

With these code, you'll have finished the game in 15 minutes.

2386CABF E4C81DF6

401BD020 2D17E69B

2nd Star Code :

This star is given to you when you beat the Battle Tower.

With this codes, you'll have beaten the Battle Tower 999 times.

37C7CCB5 96221529

3rd Star Code :

This star is given to you when you win all the contest.

These codes will do the trick.

DAFDDF4D C962B7ED

6B3371E1 294ACF7A

863A43B3 84DD0596

A0E7843B 7D709392

18EC989C 113D5A5B

4th Star Code :

This star is unlocked when you have caught 202 Pokémon in the Pokédex.

Use the codes at section 1.4.9 to fulfill this requirement.

GSAA1.4.13 Trainer Card's Back Codes.

Use these codes to fill the back of your trainer card.

Line 1 : First Hall of Fame.

2386CABF E4C81DF6

401BD020 2D17E69B

Line 2 : Link Card Battle.

6BFA2CEA 0233DE45

1EFD3AD5 3D811C24

Line 3 : Pokémon Trades.

95BD9CE8 54DAF5AC

Line 4 : Pokéblocks w/ Friends.

8926B3F7 958A0E5B

Line 5 : Contests w/ Friends.

E091AD21 46443147

Line 6 : Battle Tower.

37C7CCB5 96221529

GSAA2. Thanks.

Thanks to all the people at CMGSCCC that supported us.
(especially L3reakmanx and Mastersord)

Thanks to Mastersord for hosting our Codes FAQ in his FAQ on www.gamefaqs.com.

Big Thanks for Forgotten, and his great emulator, VBA (<http://vboy.emuhq.com>).
Without it, this FAQ won't ever exist.

And thanks to all the people who use these codes :)

Nintendo - For making the GameBoy Advance

GameShark - For making the GameShark Advance

GameFreak - For making these games and holding off hacking attempts
for at least 2 weeks after the games' release in Japan. Keep up
the good work!

-Lim Soon Keat <pip_017@hotmail.com> - Various corrections. He
found several mistakes and also for his contributions to the FAQ.
Many people wanted to fix the Porok game!

-goldenworld <goldenworld.bkk.a-net.net.th> - found bug with move
modifier codes

www.GamFAQs.com - for giving me a place to host this

-Jasmine Wayne Wayne (unapatata2@hotmail.com) - For discovering that
all species can be unlocked

-Tuxedo Jim - For publishing the first working species hacks

-Filb - For helping Tuxedo Jim

-Sax <puma7078.attbi.com> - For all his help in making these codes

v0.1 - Written 1-02-03 - Only Ruby codes done.
v0.2 - Written 1-04-03 - Added some corrections and 2 new tutorials
v0.21 - Writtent 1-06-03 - corrected Gloom's codes
v0.22 - Written 1-08-03 - More corrections. Wobbufet, Qwilfish, Rabukasu, Skarmory, pineco, Ampharos, wooper, and a ton more!
v0.23 - Written 1-13-03 - Yet even more corrections!
v0.30 - written 1-16-03 - some stat codes, item codes, and time codes completed
v1.0 - written 1-18-03 - Pokemonhacker and Loading's FAQ added! (You have to read it to believe it!). Added index. Added more codes on top of all that!
v1.01 - written 1-19-03 - a few fixes made
v1.02 - written 1-19-03 - added explanation for full pokedex code
v1.03 - written 1-19-03 - Added quick level up code
v1.04 - Written 1-20-03 - only a few errors corrected
v1.05 - written 1-20-03 - added www.Neoseeker.com to my host list. Added illusion island code and method to pokemonhacker and loading's FAQ.
v1.06 - Written 1-21-03 - fixed illusion island codes to one code and updated method. Also added max gene codes to pokemonhacker and loading's FAQ (P&L's for short.)
v1.07 - written 1-22-03 - fixed max genes codes
v1.08 - written 1-23-03 - added Illusion island FAQ to explain how it works. addressed concerns over "codes not working on real GBA" issues. Fixed index.
v1.09 - written 1-23-03 - More fixes and formatting changes
v1.1 - written 1-24-03 - yet more fixes. Hopefully we may be able to fix everything soon!
v1.11 - written 2-06-03 - Full pokedex codes (all seen and caught) added.
v1.2 - written 2-07-03 - added trainer cards and trainer's eye codes.
v1.21 - written 2-08-03 - minor fixes
v1.22 - written 2-10-03 - more fixes
v1.23 - written 2-11-03 - added info about type 6 code effects and VBA
v1.24 - written 2-14-03 - added note regarding bug with move modifier codes
v1.25 - written 2-22-03 - added egg island codes and a VBA tutorial
v1.26 - written 2-22-03 - added Hinbasu enabler code and explanation for Latios /Latias codes
v1.27 - written 2-23-03 - added money code and all badges, pokenavi, etc... code
v1.28 - written 2-23-03 - added Coin, ash sac, and win number codes and a note about max genes codes
v1.29 - written 2-24-03 - added walk through walls code, Notes for hinbasu code, and a new host
v1.3 - written 2-25-03 - added codes for secret trainer ID and a better explanation of the walk through walls code as well as a teleport to egg island code
v1.31 - written 2-26-03 - added new host
v1.32 - written 3-05-03 - added http://df.zapchu.com to host list

////////////////////////////////////
GSAJI. introduction

Welcome to yet another FAQ. Today we'll be delving into Nintendo's Upcomming (at the time) game: Pokemon Ruby/Sapphire. Specifically, we will in a sense bend the fabric of reality for Pokeworld or wherever they come from, thanx to the magic of Gameshark advance!

This FAQ is about codes for GameShark advance devices for the Japanese version of Pokemon Ruby/Sapphire.

////////////////////////////////////
GSAJa) Entering codes in VBA

see tutorial Above

////////////////////////////////////

////////////////////////////////////
GSAJII. Master codes

Let's start with some codes that work for both versions. First we'll need some master codes:

These master codes are from www.GameFAQs.com. Here they are in their original post.

[From:Xuanwumon| Posted:1/1/2003 12:47:33 PM]

Well I have the master codes for the two versions if someone wants to use codes for the actual cartridge

Sapphire:

6E93895C C2679628

03514D3E 7157DA35

Ruby:

6E93895C C2679628

02BD3075 C9E2B4CE

these are actual codes for Gameshark or Pro Action Replay

////////////////////////////////////
GSAJIII. Universal codes

Here are some codes based on hacks from other people. I hope I did this right. If you have any problems with it, let me know via e-mail. If I Gave credit of your hacks to someone else, please provide proof that I did so. It must be dated for authenticity. If you made any of these hacks and don't want them published as GSA codes, e-mail me and I will try to accomodate your wishes.

[Original hacks by Radical dreamer at <http://www.cmgsgcc.com/forums/>]

GSAJ1. Infinite HP in battle 1st pokemon (Will look like pokemon has 0 HP)

1B952C6F 9C5540E6

GSAJ2. quick level up code (Turn off after you reach desired level or you won't leave the battle)

0D30B610 BCA955EE

GSAJ3. infinite master balls in first slot in item pocket. note that putting masterballs in your item pocket will make them infinite as long as they aren't transfered or moved. you can even enter the codes, turn them off, save, and they will still be there and still be infinite.

7825363B 5C537C43

E74094BD D853E5A2

GSAJ4. Item codes for 1st slot of main pocket

1st slot in main pocket 99 of item code

E74094BD D853E5A2

Now we begin the long list of item codes for the first slot. If you want them in the proper pocket, Move them to your PC and then retrieve them again. [List of labels courtesy of

http://www.geocities.com/fat_parrot/rowr/RuSa.html which is a translation of http://www.tk2.nmt.ne.jp/~nadesico/code-gba/gba-pocketmonster_ruby-sapphire.html]

Ignore the last 3 digits. Those were used in the list I pasted the labels from. You'll need to put an item into slot 1 of your bag's main item section which you want to change or get rid of, else the code will over-write what ever is there.

Please note that no matter what you code for, it will always show up there. Key items, berries, TMs, it doesn't matter. It will always be in that slot.

*Eon ticket alone will not allow you to go to the southern island. Use pokemonhacker's southern island codes in his FAQ.

GSAJ6. Time codes

[Original hacks from RAMS' FAQ at www.gameFAQs.com and at www.kyogre.cjb.net]

Time changing code. The number indicate hour. These actually work to change the tide. Just experiment until you find the right one.

Porok game codes

0976BF61 E8066B01(99 Perfect Hit!)
A985D8C4 8376A9F1(99 Hit!)
BE57B200 AADAA6AD(99 Miss!)

Enter these before trying the porok game at the contest houses, and no matter what, you will get 99 at the end for the stat and finish first.

GSAJ8. Full pokedex (all species, seen and caught)
[Original hacks by pokemonhacker at www.cmgscce.com and from
pokemoncrystal at www.gameFAQs.com]

[Unlock codes provided by Loading and pokemonhacker]
Unlock Full Pokédex Codes :

4EC15694B93783B4
410DF50B39B4BE8C
151ACE56E4F0AE2E

For the full pokedex, grey means enabled. Now you just have to make a change in the pokedex option to see the old pokedex.

If you speak japanese, go in the menu of the pokedex (press select), then choose "Kirikae", select "Mode", and choose "Zenkoku Zukan".

If you don't speak japanese, do this:

Press select while in the pokedex, then go right, press A, go down, press A, go down, press A, go down, press A.

To have all 386 entries, enter all these codes and also unlock the full pokedex with the codes and instructions above.

GSAJIV. Pokemonhacker's and Loading's FAQ

Here is the most accurate set of codes found to date. All credit for finding them goes to pokemonhacker and Loading. I've been given special permission to include their FAQ within my own FAQ from Pokemonhacker himself.

Pokémon Ruby & Sapphire GSA Codes
Ver 1.0 01-16-2002

GSAJ0. Copyrights & Special Notes.

GSAJ1. Gameshark Codes.

GSAJ1.1 Shiny, Gender, and Max genes Codes.

- GSAJ1.1.1 Always Shiny Codes.
- GSAJ1.1.2 Always Male/Female Codes.
- GSAJ1.1.3 Always Shiny & Male/Female Codes.
- GSAJ1.1.4 Always Maxed genes Codes.

GSAJ1.2 Pokémon Encounter Codes.

- GSAJ1.2.1 Wild Pokemon Modifier Codes.
- GSAJ1.2.2 Wild Pokemon's Level Modifier Codes.

GSAJ1.3 Item & Moves Codes.

- GSAJ1.3.1 Unlimited Items Code.
- GSAJ1.3.2 Make Pokémons learn any TM-HM Codes.
- GSAJ1.3.3 Make HM Moves erasable.
- GSAJ1.3.4 TM-HM Moves modifier Codes.

GSAJ1.4 Miscellaneous Codes.

- GSAJ1.4.1 Unlock Full Pokedex Codes.
- GSAJ1.4.2 Illusion Island Codes. (type 6)
- GSAJ1.4.3 Trainer cards
- GSAJ1.4.4 Trainer's eye codes
- GSAJ1.4.5 Egg island codes
- GSAJ1.4.6 Hinbasu enabler code (type 6)
- GSAJ1.4.7 All badges, pokedex, pokenavi...
- GSAJ1.4.8 Money code
- GSAJ1.4.9 Walk through walls code

GSAJ1.5 More miscellaneous codes

- GSAJ1.5.1 Secret trainer ID (type 6)

GSAJ2. Thanks.

GSAJ0. Copyrights & Special Notes.

All trademarks and copyrights contained in this document are owned by their respective trademark and copyright holders.

Special Note 1 : All these codes are in Gameshark format, and work for both Pokémon Ruby and Sapphire games.

Special Note 2 : We put some informations about Nintendo being able to spot if you hacked the game. If you plan to Link you game to the NGC, or transfer Pokémons with the next Pokémon game, don't use codes that Nintendo can spot.

Special Note 3 : These codes work 100% on VBA, but have been untested on the real games with the GSA. You might need a Master code to use them. You can find one in Mastersord's FAQ on GameFags.

GSAJ1. Gameshark Codes.

GSAJ1.1 Shiny & Gender Codes.

NOTE : Don't mix the "Always Shiny Codes", the "Always Male/Female Codes", and the "Always Shiny & Male/Female Codes". Use only one of them at the same time.

GSAJ1.1.1 Always Shiny Codes.

Enter all these codes, and you'll encounter always shiny Pokémons, but there is a downside... It'll "lock" the gender and the traits of the Pokémons. That means you'll encounter always male Kimori, or always female Bulbasaur (it'll be different for everyone). So if you want a Male/Female Shiny Pokémon, and you can't have it using these codes, check the part 1.1.3, " Always Shiny & Male/Female Codes".

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

Always Shiny Pokémon Codes :

F5AE2C2DA9506326
02F8D8D580244211
03CE65BEAD555E3A
85E65C7ABC952305
557B46655E13D573
A5215368046B98E5

GSAJ1.1.2 Always Male/Female Codes.

Enter one of these codes and you'll set the gender of the next wild Pokémon you'll see (if it has any gender or course).

Note : It can still be Shiny, but with a chance of 1/8192.

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

Always Female Pokémons Code :

73920119C3730B41

Always Male Pokémons Code :

5BF2502185F53713

GSAJ1.1.3 Always Shiny & Male/Female Codes.

These codes are very long, so take your time while typing them.

Enter first the 11th lines "Enabler Code", then either the "Be Shiny Male" or the "Be Shiny Female" code, and you'll set the gender/shininess of the next wild Pokémon you'll encounter. Moreover, the traits should still be random.

Once the Enable Codes has been entered, you MUST enter one of the other Shiny Gender codes. After that, if you want to catch Male & Female Shiny Pokémons in the same row, you can just disable the Shiny Gender code you put on, and enter & activate the other one (but NEVER make the 2 Shiny Gender codes activated at the same time).

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

Enable Codes :

755D4009B01DEF4D
30216F18E646C6B2
C0EE79733491F594
AB72A122D1F02B97
949084264AF421EB
4E7CB5E388763025
886EBDCB0FA05AF0
A54D2B35A3FA009A
56239F4CA087466D
15991D1021E02B68
D82FD382F17E74B5

Always Shiny Female Pokémon Code :

F3824A49184EF695

Always Shiny Male Pokémon Code :

646A63A523E7E568

GSAJ1.1.4 Always Maxed Genes Codes.

Max genes for wild Pokémons:

723BDF78CB2AACC9
21A0F59C1E72DDFF
21ED62839ECFBE26
395B611924BCEA15
6114B254894B7E9E
565797C2DB3A36DA
4CB0FD31B72E77E3

Note: You can enter any one of these 7 codes to max out one specific gene,
however, we don't know which line does what yet, so experiment away!

GSAJ1.2 Pokémon Encounter Codes.

GSAJ1.2.1 Wild Pokémon Modifier Codes.

You have to enter the 1 (for "old" Pokémons) or 3 (for "new" Pokémons) line(s)
of codes to make the Wild Pokémon Modifier work. Once you've enter the codes,
you'll encounter only one kind of Pokémon, until you reload your game. Theses
codes work with the wild Pokémons you encounter by walking in the grass,
walking in the caves, and surfing (that means it won't work for fishing).

Note 1 : In case you didn't notice, the Pokémons are listed using the old
Pokédex numbers.

Note 2 : Never activate two of these codes at the same time!

If you use theses codes, Nintendo might know that your Pokémon has been
hacked.

GSAJ1.2.2 Wild Pokémon's Level Modifier Codes.

These codes change the level of the wild Pokémon you encounter.
Like the Wild Pokémon Modifier codes, they'll be "always on",
until you reload your game.

If you use theses codes, Nintendo might know that your Pokémon has been
hacked.

GSAJ1.3 Item & Moves Codes.

GSAJ1.3.1 Unlimited Item Code.

When this code is one, the quantity of the items you have will never decrease. Use this code with the "Make Pokémons learn any TM-HM Codes" and "TM-HM Moves modifier Codes", so you can make one single TM/HM to learn any move to your Pokémons.

You can also "dupe" items one by one by putting them by giving them to a Pokémon.

Note : This code works ONLY for items you use, not items you move (put in the computer), sell...

If you use this code, Nintendo might know that your game has been hacked if you get more than one unique item.

B9647FDB2C1518F9

GSAJ1.3.2 Make Pokémons learn any TM-HM Codes.

With these codes, any Pokémon will be able to learn any TM-HM.

If you use these codes, Nintendo might know that your Pokémon has been hacked if your Pokémon learns Moves that it can't learn normally.

For TM 01-32:
C56BA42637139DA6

For TM 33-50 and all HMs:
22458540FD970BAA

GSAJ1.3.3 Make HM Moves erasable Code.

When this code is on you are able to "overwrite" any HM move that your Pokémon learned.

If you use this code, Nintendo will *not* know that your Pokémon has been hacked.

A97E96E255676E7D

GSAJ1.3.4 TM-HM Moves modifier Codes.

If you use any TM-HM on a Pokémon with one set of these codes on, the Pokémon will learn the move you choose.

Note 1 : When the Pokémon is learning the move, the game tells you that you are learning the move from the TM-HM, but once the move has been learned, it'll be the one you choosed.

Note 2 : When your learn a move using these codes, the current PP of the move can be wrong. Just heal your Pokémon in any PokéCenter to make it get the right PP.

Note 3 : You can use these codes to make Pokémon learn multiple times the same move.

If you use these codes, Nintendo might know that your Pokémon has been hacked if your Pokémon learnt Moves that it can't learn normally.

GSAJ1.4 Miscellaneous Codes.

GSAJ1.4.1 Unlock Full Pokédex Codes.

Once these codes has been entered, the full Pokédex (counting the 386 Pokémons) is unlocked. You can save your game, and the new Pokédex will be saved.

If, for some reasons, you want to make the Pokédex come back to its original state (202 Pokémons), enter the Disable Full Pokédex Codes.

If you use these codes, Nintendo might know that your Pokémon has been hacked.

Unlock Full Pokédex Codes :

4EC15694B93783B4
410DF50B39B4BE8C
151ACE56E4F0AE2E

For the full pokedex, grey means enabled. Now you just have to make a change in the pokedex option to see the old pokedex.

If you speak japanese, go in the menu of the pokedex (press select),

then choose "Kirikae", select "Mode", and choose "Zenkoku Zukan".

If you don't speak japanese, do this:

Press select while in the pokedex, then go right, press A, go down,
press A, go down, press A, go down, press A.

Disable Full Pokédex Codes :

683220A2066178EF

4715BE1BA87C7DC4

DF7565F9DA1F93E6

GSAJ1.4.2 Illusion Island Codes.

Illusion Island FAQ:

by pokemonhacker

Mastersord's notes: From what I've heard, I believe the plural form of
"pokemon"
is "pokemon". For that reason, I changed all plurals of pokemon, to that form.

Q - What is Illusion Island ?

A - An island that appears on Route 130. It is full of Wynauts.

Q - How do I make it appear ?

A - The only way to make it appear is to have an "Illusion Island Friendly"
Pokémon in your party.

Q - What is an Illusion Island Friendly Pokémon ?

A - A Pokémon that makes Illusion Island appear when it's in your party :)
You can check that by either going to route 130 and see if Illusion Island
is there, or talk to the oldman that looks at the window in the bottom-right
house of Kinagi City (the town to the left of Route 130). If the old man says
a 2 lines message, you have an Illusion Island's Friendly Pokémon in your party.

Q - Can you be more precise ?

A - When a Pokémon is created by the game, it has unique random values.
A set of these random values, also known by some people as the MAP, are used
to compute the gender, the traits, the shininess, and the way the data of the
pokemon are written. To check if Illusion Island will appear, the game looks
at the MAP, and checks if its last 4 numbers (the MAP has 8 numbers, from 0 to
16 (0 to F in hexadecimal)) are set to 0. If it's true, Illusion Island will
appear.

Q - How can I tell if a Pokémon is Illusion Island Friendly ?

A - You can't tell exactly, but you can have one hint. Two of the numbers
that must be set to 0 are used to compute the Pokémon's gender. And as low
numbers give a female Pokémon, and high number give a Male Pokémon, here is
what you can tell :

-If you have a male Pokémon, and this Pokémon can be a female, it'll never be

Illusion Island Friendly, because it's gender value will always be >0.

-If you have a female Pokémon, and this Pokémon can be a male, you have one chance out of the gender breakpoint value * 256 that it'll be Illusion Island Friendly.

Q - Huh ?

A - Every Pokémon that has a gender can be male or female, and that is set by a random value that goes from 0 to 255 (00 to FF in Hex). The value from which the gender goes from female to male is called the gender breakpoint. Most of the Pokémon have a gender breakpoint of 128, that means the female gender value will have a value from 0 to 127, and male gender value will go from 128 to 255. That also means they have 50% to be male, and 50% to be female. You can tell a Pokémon's gender breakpoint value by looking at Meowth's site's Pokédex (www.pokefor.tk, then choose "Tools"), and look at the gender percentage of a Pokémon. Take the female percentage, multiply it by 256, and you'll have the Pokémon's gender breakpoint. For example, you can see from Meowth's Pokédex that Machop has a 24% (=0.24) chance to be a female. $0.24 * 256 = 61.44$. Round it down, and you'll have Machop's gender breakpoint value : 61.

By knowing this, you can tell what are your chances of a female Pokémon to be Illusion's Island Friendly by multiplying the gender breakpoint by 256.

Here are some examples :

-Genderless Pokémon (or Pokémon that have always the same gender) will have 1 chance out of 65536 ($256 * 256$) to be Illusion Island Friendly.

-50% Female/ 50% Male Pokémon will have 1 chance out of 32678 ($128 * 256$) to be Illusion Island Friendly if you catch a female.

-24% Female/ 76% Male Pokémon will have 1 chance out of 15616 ($61 * 256$) to be Illusion Island Friendly if you catch a female.

-12% Female/ 88% Male Pokémon will have 1 chance out of 7936 ($31 * 256$) to be Illusion Island Friendly if you catch a female.

This won't give you more chances to get an Illusion Island Friendly Pokémon (chances are always 1 out of 65536), but it'll save you a lot of time, because you won't have to catch every Pokémon you encounter and check if they are Illusion Island Friendly. But you'll still have to encounter "65536" Pokémon to find the good one... And remember, only female Pokémon of Pokémon that have a gender, are valuable.

Q - Do breeding, evolving, and/or time of day help in getting Illusion Island Friendly Pokémon?

A - This is not yet known, but it's doubtful.

Q - What does the "Illusion Island Friendly Pokémon" do?

A - It sets the values that are checked to see if Illusion Island will appear, to 0s. That way, the Pokémon you catch with these values will always be Illusion Island Friendly :)

Once this code has been entered, you will only encounter "Illusion Island Friendly" Pokémon. Catch ANY Pokémon in the wild, put it in your party, and go on route 130 : Illusion Island will be there.

If you loose this Pokémon (or put it in your PC), Illusion Island will be gone.
Note : chances to find a non-hacked "Illusion Island Friendly" Pokémon in the wild are *at least* 1/65536.

If you use theses codes, Nintendo might know that your game has been hacked if you keep the "Illusion Island Friendly" Pokémon.

Code to find an "Illusion Island Friendly" Pokémon:

GSAJ1.4.5 egg island codes

Use these 3 codes to get to egg island

[Original hacks from http://www.geocities.com/fat_parrot/rowr/RuSa.html]

2256EF8A 97D73776
947888CC E26B0808
9CB31DB1 50FCBA81

Use "Fly" (doesn't matter where).
Turn off the code when you arrive.

[From Pokemonhacker]

This code will enable Latios/Latias battle on the so called "Egg Island" (Minami no Kotou)

BF4F2D11 A2E9B90F

Plus, if you have the "Infinity Ticket" (Mugen no Ticket), you'll be able to take the boat that will bring you to the Minami no Kotou.

This code will allow you to battle latios/latias everytime you examine the "egg" (or stone, or whatever it is) (without this code, you'll encounter latios/latias only one time) :

BDC0BB26 F0129BD3

The 1st code sets "on" the flag that says that the egg island event is available (that means that you can take the boat to egg island if you have the infinity ticket, and that latios/latias will appear if you examine the egg).

The 2nd code sets "off" the flag that says that you have already done the egg island event (this flag is set on when you examine the egg and encounter latios/latias {obvioulsy by using the 1st code I gave you}). Once it has been set on, you can't go to egg island / encounter latios/latias again).

I think you must have finished the game for the 1st code to work (or at least that you must have gone far enough, so you can already take the boat to go to battle tower or other places).

GSAJ1.4.6 Hinbasu enabler code

Hinbasu mystery revealed :

As some people mentioned, Hinbasu only appear on route 119. But he doesn't appear in 1 tile of water, but in 1 to 6 tiles, that can only be accessible by surfing. When you fish in one of these tiles, you have 50% chance to find it. Your position when fishing does not matter, it's the tile in which you are fishing that is important (the one that you are facing).

The location of hinbasu is random. When you create a new game, the game computes a series of random numbers. One of these random numbers will be used as the "seed" of the hinbasu tiles (other number will be used for the Trainer ID, secret Trainer ID...). The game takes that number, and applies an algorithm to it, so it can create 6 numbers that will always be the same with this seed. But with a different seed (ie a different game), these 6 numbers will be different.

Conclusion : hinbasu tiles are random. There can be from one to six tiles.

With this Type 6 code, Hinbasu will appear everytime, on every tile of water of route 119...

Enjoy!

GSAJ1.4.7 All badges, pokedex, pokenavi...

All badges, pokedex, pokenavi...

116ABADD EF83A840

GSAJ1.4.8 Money code

Lotta Money

9F3B6F7D 3AEE8535

Alternative code for over 4 billion cash

[by mastersord]:

BCD4547F 0419B333

GSAJ1.4.9 Walk through walls code

159C68F4 60CC8A5A

It's a Type 6 code. It allows you to walk over any obstacle like trees, houses, rocks, and to walk on water. With this code, you'll still be able to interact with the game (enter doors, talk to people, take items, etc...). The two things you can't do are :

-walk directly from ground to water (and water to ground). To do this, you need either to use the SURF move, or to walk from ground to water from an unauthorized place (like walk on a tree and from there walk on the water, or if you are on the water, walk on a rock and from there walk on the ground).

-Go out of the map limit. Each map (each route, room, etc...) is a rectangle of tiles. With this code, you'll be able to move anywhere within that rectangle, but you won't be able to cross its limit (unless you enter another map). That means, for example, if you enter a house, you won't be able to walk in the "dark". But anyway, there is nothing in that dark :)
Have fun!"

GSAJ1.5 More miscellaneous codes

GSAJ1.5.1 Secret trainer ID

Find out your Secret Trainer ID Codes (1).

Enter this Type 6 code, and look at your trainer card. It could be a bit messy (it might even make the game crash! If it does, you can use the 2nd set of codes), but it'll display your secret Trainer ID instead of your regular Trainer ID. After that, write down this number, and turn the code off (switch off your GBA). For now, knowing your secret Trainer ID has no useful purpose. But maybe one day some people will make proggies that'll use your secret Trainer ID and your normal Trainer ID, and use them to compute a pokemon with all the characteristics/stats/genes... you want (and that'll obey you), find your hinbasu tiles... And, who knows, maybe more!

D3D7DFE3 37CD5547

Secret Trainer ID revealed (2).

If the 1st code makes your game crash, here are 2 other Type 6 codes that will work perfectly (but require some calculation).

1st code:

5CD89117 D82DA45F

2nd code:

E7A31F61 B4682567

Enter the 1st code, and look at your trainer card. Write down the Trainer ID numbers that are displayed.

Do the same thing with the 2nd code. Now, open windows calculator (or any tool that can make decimal-hexadecimal conversion). Enter the 1st number as decimal, and convert it to hexadecimal.

You should have 4 numbers (A-F are numbers in hexadecimal). Write down the 2 1st numbers (if you have A152, take A1). Do the same thing with the numbers you will get with the 2nd code.

Now take the 2 sets of 2 numbers you just wrote down, and enter them in windows calculator as hexadecimal numbers in the order you wrote them down (if you had A1 and B5, enter A1B5), and convert this number to decimal : you have your secret Trainer ID.

GSAJ2. Thanks.

Thanks to CJayC for hosting this FAQ at GameFags.

Thanks to all the people at CMGSCCC that supported us.
(especially L3reakmanx and Mastersord)

Big Thanks for Forgotten, and his great emulator, VBA (<http://vboy.emuhq.com>).
Without it, this FAQ won't ever exists.

Greets to Filb, Jasmine Wayne West and Tuxedo_Jim for their work.

////////////////////////////////////
GSAJV. Route 101 codes

These codes modify what you can encounter on route 101. They can modify the species and level range of your encounters. At the time of this writing, All testing I can do from my PC, proves that these codes work, however, there is still the chance that they won't work on your actual Gameboy Advance with the actual cartridge. You'll have to test them for your self. Try them with and without the master codes (the first ones at the top) if you have problems.

here are the master codes you need to use for the route 101 codes specifically.

Sapphire:
6E93895C C2679628
03514D3E 7157DA35

Ruby:
6E93895C C2679628
02BD3075 C9E2B4CE

For emulator users:

First, you have to enter the codes in The game shark section. You have to enter all 12. They can't have spaces. The description is unimportant and unnecessary.

You shouldn't need the master code unless you use a real GBA. All the codes should say "E" or "EF" in the list to show that they are Enabled Once entered, go to route 101 and when you enter a random battle, it should be against the pokemon you want.

You can also change the level range of the pokemon with the level range codes. Just be sure to enter all 12.

For GBA users:

Just make sure you entered all 12 codes like in a normal GameShark. All 12 must be active for the species to show up. Add another 12 for it to show up in the level range you want. Activate the master code as well on top of all that if you have problems.

If you still can't get them to work, make sure you entered them correctly. For emulator users, remove the spaces and also remember that GSA codes are written in Hexadecimal so don't use "o", "O", or "Q" in place of "0" (Zero).

They have been fully tested on VisualBoy Advance version 1.3. Make sure you have this version or higher if you are using these codes on an emulator.

You can also mix and match codes as long as the codes aren't from the same line. take the blocks you want to mix and number them from 1-12 going down the list of codes. Make sure all "ingredient" blocks are numbered the same way. Now make a block of 12 codes using codes from each of your ingredient blocks, but make sure that your new list of codes is numbered 1-12 without re-numbering any of them. Why must you do it this way? Because each individual code in the 12 code block is meant to affect 1 of 12 possible encounter options on Route 101, but a specific code will only affect it's specific corresponding slot. when you have all 12 codes entered, you can always encounter the same species which those codes correspond to. If you put 2 codes that affect the same slot in diffierent ways, in the same block, the codes will conflict with eachother and cause problems.

Say you want to find 3 different pokemon: Take the 12 codes for each species and number them each 1-12. Each block has 12 codes and you number them in the same order for each block.

Species 1

1. xxxxxxxx yyyyyyyy
2. xxxxxxxx yyyyyyyy
3. xxxxxxxx yyyyyyyy
4. xxxxxxxx yyyyyyyy
5. xxxxxxxx yyyyyyyy
6. xxxxxxxx yyyyyyyy
7. xxxxxxxx yyyyyyyy
8. xxxxxxxx yyyyyyyy
9. xxxxxxxx yyyyyyyy
10. xxxxxxxx yyyyyyyy
11. xxxxxxxx yyyyyyyy
12. xxxxxxxx yyyyyyyy

Species 2

1. aaaaaaaaa bbbbbbbb
2. aaaaaaaaa bbbbbbbb
3. aaaaaaaaa bbbbbbbb
4. aaaaaaaaa bbbbbbbb
5. aaaaaaaaa bbbbbbbb
6. aaaaaaaaa bbbbbbbb
7. aaaaaaaaa bbbbbbbb
8. aaaaaaaaa bbbbbbbb
9. aaaaaaaaa bbbbbbbb
10. aaaaaaaaa bbbbbbbb
11. aaaaaaaaa bbbbbbbb
12. aaaaaaaaa bbbbbbbb

Species 3

1. cccccccc dddddddd
2. cccccccc dddddddd
3. cccccccc dddddddd
4. cccccccc dddddddd
5. cccccccc dddddddd
6. cccccccc dddddddd
7. cccccccc dddddddd

8. cccccccc dddddddd
9. cccccccc dddddddd
10. cccccccc dddddddd
11. cccccccc dddddddd
12. cccccccc dddddddd

now you need to make sure you don't use codes with the same number in your new set of codes. Example:

Good

1. xxxxxxxx yyyyyyyy
2. xxxxxxxx yyyyyyyy
3. xxxxxxxx yyyyyyyy
4. xxxxxxxx yyyyyyyy
5. aaaaaaaaa bbbbbbbb
6. aaaaaaaaa bbbbbbbb
7. aaaaaaaaa bbbbbbbb
8. aaaaaaaaa bbbbbbbb
9. cccccccc dddddddd
10. cccccccc dddddddd
11. cccccccc dddddddd
12. cccccccc dddddddd

NO!!!

1. xxxxxxxx yyyyyyyy
2. xxxxxxxx yyyyyyyy
3. xxxxxxxx yyyyyyyy
4. xxxxxxxx yyyyyyyy
1. aaaaaaaaa bbbbbbbb
2. aaaaaaaaa bbbbbbbb
3. aaaaaaaaa bbbbbbbb
4. aaaaaaaaa bbbbbbbb
1. cccccccc dddddddd
2. cccccccc dddddddd
3. cccccccc dddddddd
4. cccccccc dddddddd

By entering your new block of codes, you should be able to catch all 3 species at route 101.

Before I go anyfurther, I would also like to thank samsonlamHK at GameFAQs. He posted the template from which these codes are based.

Right now, I only have codes for Ruby version, but i'm working on the Sapphire codes and hope to have them done soon.

For Ruby:

- 01: Bulbasaur

VI. Credits:

Nintendo - For making the GameBoy Advance

GameShark - For making the GameShark Advance

GameFreak - For making these games and holding off hacking attempts for at least 2 weeks after the games' release in Japan. Keep up the good work!

-Lim Soon Keat <pip_017.hotmail.com> - Various corrections. He found several mistakes and also for his contributions to the FAQ. Many people wanted to fix the Porok game!

-goldenworld <goldenworld.bkk.a-net.net.th> - found bug with move

modifier codes

www.GamFAQs.com - for giving me a place to host this
 -Jasmine Wayne Wayne (unapatata2.hotmail.com) - For discovering that
 all species can be unlocked
 -Tuxedo Jim - For publishing the first working species hacks
 -Filb - For helping Tuxedo Jim
 -Sax <puma7078.attbi.com> - For all his help in making thses codes
 -Xuanwumon - For finding the master codes
 -samsonlamHK - He posted the unencrypted code template used for this
 FAQ
 -RAMS <rams1801.hotmail.com> <www.kyogre.cjb.net> - For the clock
 modifier hacks.
 -pokemoncrystal <pokemon_crystal03.yahoo.com> - For the full pokedex
 hacks. Hacks also found by pokemonhacker.

www.cmgsgcc.com - For all your breakthroughs and for helping me find
 hackers who could hack as opposed to the 8 million requests for codes
 we get every day.
 -13reakmanx <13reakmanx.hotmail.com>- for creating VBA hacking templates
 -PokemonHacker - For figuring out the method the games used to store
 pokemon data, and for his incredible work in making codes.
 -Loading - Also for his work in making codes.
 -Gavin MacManus - For your incredible effort making the pokemon
 Calculator.
 -Radical Dreamer - For finding the data blocks we needed for the first
 modifiers we used.

Pokemon Sapphire Master Code:

DE00AAFD 2EBD05D0

B4564EFE 23F44BF2

these are actual codes for Gameshark or Pro Action Replay*

////////////////////////////////////

PARAIII. Universal codes

Here are some codes based on hacks from other people. I hope I did this right. If you have any problems with it, let me know via e-mail. If I Gave credit of your hacks to someone else, please provide proof that I did so. It must be dated for authenticity. If you made any of these hacks and don't want them published as GSA codes, e-mail me and I will try to accomodate your wishes.

[Original hacks by Radical dreamer at <http://www.cmgsccc.com/forums/>]

PARA1. Infinite HP in battle 1st pokemon (Will look like pokemon has 0 HP)
BDA6D188 CEAD2851

PARA2. quick level up code (Turn off after you reach desired level or you won't leave the battle. In VBA just disable it and it should stop on it's own. Uncheck it in the cheat list and a "D" should appear to the right of it. You could also just hit "Remove" and it should shut off)

Also note that these are one-hit kill codes too. If you did the code successfully, you can test it by holding L and R durring your Attack and it should kill the oponent poke in one hit.

Enter this code first to activate and deactivate the code by pressing and holding L and R at the same time in battle. You have to press and hold the L and R keys right after you see the "x gained # exp. ponits!" message. This will help people with real GBAs. Make sure that the next code underneath it is the quick level up code, or else it won't work. In fact, group this code with the quick level up code if you choose to label and save the code. Make sure that this code is first and the quick level up code is directly next and below it.

[Thank you pokemonhacker]

You may want to remove any other pokes in your party while using these codes. A wierd glitch I found is that sometimes pokes who didn't fight will get the experience points instead and will start leveling on their own

B6C5368A 08BE8FF4

Another note: This code will keep adding 25,443 exp so if you turn off the code, it will add that amount of experience before it shuts off completely so you will continue to gain levels until that exp gain gets finished.

FBA0B344 7BB8B1B0

here's one for only 1,000 exp

A5E4B9CD F84E3B47

here's one for Only 500 exp

C4E4FFC9 8A70B089

here's one for only 100 exp

5D43E3A1 EBD585B3

here's one for 50 exp

FB20D8F4 C15A7A38

The growth rate will be slower the smaller the exp code you use. If you're having trouble with stopping the level gain, try using a smaller code next time.

PARA3. infinite master balls in first slot in item pocket. note that putting masterballs in your item pocket will make them infinite as long as they aren't transferred or moved. you can even enter the code, turn it off, save, and they will still be there and still be infinite.

E9FBC985 95445949

PARA3a. 99 rare candies in slot 2 in item pocket:

(see notes above)

1D29D55E 5753740C

PARA4. Item codes for 1st slot of main pocket 1st slot in main pocket 99 of item

code

99A16A27 C4A3783C

Now we begin the long list of item codes for the first slot. If you want them in the proper pocket, Move them to your PC and then retrieve them again.

[List of labels courtesy of http://www.geocities.com/fat_parrot/rowr/RuSa.html which is a translation of http://www.tk2.nmt.ne.jp/~nadesico/code-gba/gba-pocketmonster_ruby-sapphire.html]

 AEF504CD 7F43BBB6 15A HM08 (Diving)

Ignore the last 3 digits. Those were used in the list I pasted the labels from. You'll need to put an item into slot 1 of your bag's main item section which you want to change or get rid of, else the code will over-write what ever is there.

Please note that no matter what you code for, it will always show up there. Key items, berries, TMs, it doesn't matter. It will always be in that slot.

*Eon ticket alone will not allow you to go to the southern island. Use pokemonhacker's southern island codes in his FAQ.

PARA6. Time codes

[Original hacks from RAMS' FAQ at www.gameFAQs.com and at www.kyogre.cjb.net]
[added thanx to omega2k and mort from www.cmgsccc.com for english code hacks]

Time changing code. The number indicate hour. These actually work to change the tide. Just experiment until you find the right one.

Normal clock reset days to 0

[original hacks by baermoon at www.gameFAQs.com]

90F43242 B2DDEB8F
596173D1 36154C88
8277C04D 91491DA5

Negative clock reset days to 0

[original hacks by baermoon at www.gameFAQs.com]

49B2F7C1 87DD9251
95CBEE29 307DD831
6D7864B3 38C8B0FB

Use the day reset codes if you are having problems with clock codes.
The negative clock codes should be the ones that controll events in
the game, however I posted both in-game clock codes just in case I'm
wrong.

PARA7. Porok codes

Porok game codes

[original hacks by Lim Soon keat]

Porok game codes

7914F8A8 C6E1379A(99 perfect hit)
CB58A989 7FC7A0A4(99 hit)
FA604117 A70C5E86(99 miss)

Enter these before trying the porok game at the contest houses, and
no matter what, you will get 99 at the end for the stat and finish
first.

These are for your oponents. If the whole thing is a combined effort,
then these will give them 99 stats too and should help improve your results

oponent 1

F42362A3 91D8EF73(99 perfect hit)
38B80AA4 9455E697(99 hit)
3404A44C A69C686A(99 miss)

oponent 2

43AF6253 344E3C5C(99 perfect hit)
DA5E6AE4 E9578157(99 hit)

51FE70E3 FD701EE0 (99 miss)

Note: The japanese called them poroks. The US calls them pokeblocks. I use the term "poroks" just because I'm comfortable with it.

lvl 80 porok

[Original hack by xRagnarokx at www.cmgsgccc.com]

PARA10. All badges, pokedex, and pokenavi codes
[Original hacks courtesy of Radical dreamer of www.cmgsccc.com]
Here's the all badges code:

91BABA3A D4EA5B68 Badges only.
A65FE1A3 ED512FCF Badges and Have pokedex
71C4689E 821E3C2C Badges, Pokedex, and Pokenav

*Use the one appropriate for what you have in the game. (if you already
have the pokedex, use the 2nd one. If you already have the pokenav, use
the 3rd one

11. Have all PC decorations (English only)

[Original hacks by Radical dreamer and Jaroma-ru at www.cmgsgccc.com]

Note: some decorations may be missing. Also codes must be entered in groups and not all at once because VBA doesn't support this many codes at once.

PARA12. 99 heart scales in second slot of item pocket (for move maniac)

D64E87A7 29A71641

PARA13. Move maniac codes

[original hack from http://www.geocities.com/fat_parrot/rowr/RuSa.html
which is a translation of
http://www.tk2.nmt.ne.jp/~nadesico/code-gba/gba-pocketmonster_ruby-sapphire.html]

Here is how you use them:

1. Get heart scales
2. Go to fallarbor town and go into top the left-most house where you should see a fat guy.
3. Enter code for desired move
4. Make sure you have the poke you want to teach the move to with you
5. Talk to fat guy and give him a heart scale
6. Select the poke you want to teach the move to
7. Select the top-most move on the list and teach it to the poke
8. once the poke learns the new move, check and you'll see that it actually learned the move you entered the code for.

[move list translation courtesy of pokemonhacker]

PARA14. Safari zone codes

[original hacks by Nonofyours at www.cmgsgccc.com]

Safari zone infinite steps.

When you wanna get out turn the code off and walk a few steps

Note: deactivate code while on bike or time will run out.

[Thank you GBA Master <maj.hmcltd.net>]

9C3E49EE C57762CE

infinite safari balls

3477795E 724DB6BE

PARA15. Battle rate codes

[original hacks by radical dreamer at www.cmgsgccc.com]

Quick Battle start

*You know how when you get into a battle, it does that music and flashes the screen a few times before the battle starts? Well this removes the few flashes and jumps right into the fade-in part of the battle start sequence.

19279F72 872F78B3

No random battles

3B0C8C5E 96FB832D

PARA16. Full light in dark caves code

[Original hack by Jaroma-ru at www.cmgsgccc.com]

5CE1071A34BF0362

PARA17. One hit kill codes

[Original hacks by blackice at www.cmgsgccc.com]

Note: These cause errors if used durring a trainer batttle

PARAIV. Pokemonhacker's and Loading's FAQ

Here is the most accurate set of codes found to date. All credit for finding them goes to pokemonhacker and Loading. I've been given special permission to include their FAQ within my own FAQ from Pokemonhacker himself.

Pokémon Ruby & Sapphire USA AR/GSA Codes FAQ
Ver 1.5

PARA0. Version History, Copyrights & Special Notes.

PARA1. Pro action replay codes.

PARA1.0 Master Codes.

PARA1.1 Gender & Max Genes Codes.

PARA1.1.1 Always Male/Female Codes.

PARA1.1.2 Always Maxed Genes Codes.

PARA1.2 Pokémon Encounter Codes.

PARA1.2.1 Wild Pokemon Modifier Codes.

PARA1.2.2 Wild Pokemon's Level Modifier Codes.

PARA1.3 Item & TH/HM Moves Codes.

PARA1.3.1 Unlimited Items Code.

PARA1.3.2 Make Pokémons learn any TM-HM Codes.

PARA1.3.3 Make HM Moves erasable Code.

PARA1.4 Miscellaneous Codes.

PARA1.4.1 Unlock Full Pokedex Codes.

PARA1.4.2 Mirage Island Code.

PARA1.4.3 Southern Island Event Codes.

PARA1.4.4 Feebas's Tiles Code.

PARA1.4.5 All badges, Pokedex, Pokenavi... Code.

PARA1.4.6 Money Code.

PARA1.4.7 Walk Through Walls Code.

PARA1.4.8 Secret Trainer ID Codes.

PARA1.4.9 All Pokémon in Pokedex Codes.

PARA1.4.10 All Trainer in Trainer's Eyes Codes.

PARA1.4.11 Share Experience After Battle Codes.

PARA1.4.12 Trainer Card's Stars Codes.

PARA1.4.13 Trainer Card's Back Codes.

PARA2. Thanks.

PARA0. Version History, Copyrights & Special Notes.

V1.0 : 1st release.

V1.1 : Made some corrections, added Secret Trainer ID and All Pokemon
in Pokedex Codes.

V1.2 : Added Trainer's Eyes Codes.

V1.3 : Added Share Experience After Battle Codes.

V1.4 : Added Trainer Card's Stars and Trainer Card's Back Codes.

This document is (c)2003 by Pokemonhacker and loading/pika (hen2k.gmx.de).

We worked hard to create these codes so please dont steal them!

All trademarks and copyrights contained in this document are owned by their
respective trademark and copyright holders. If you plan to use theses codes
in your FAQ/Website, give credits where it's due. And we do NOT authorize
people to use these codes for any commercial use.

Special Note 1 : All these codes are in Action Replay / Gameshark format, and
work for both Pokémon Ruby and Sapphire games. Most of these codes use a
feathure that exists ONLY in the Action Replay / Gameshark. That means
these codes won't likely be ported to CBA (Code Breaker Advance), unless
they upgrade their device...

Special Note 2 : We put some informations about Nintendo being able to spot
if you hacked the game. If you plan to Link you game to the NGC, or transfer
Pokémons with the next Pokémon game, don't use codes that Nintendo can spot.

Remember : cheating is bad :)

PARA1. Pro action replay codes.

PARA1.0 Master Codes.

You have to enter these codes in your Action Replay / Gameshark in order to use the other codes of these FAQ.

Pokemon Ruby Master Code :

DE00AAFD 2EBD05D0
530823D9 16558191

Pokemon Sapphire Master Code:

DE00AAFD 2EBD05D0
B4564EFE 23F44BF2

PARA1.1 Gender & Max Genes Codes.

PARA1.1.1 Always Male/Female Codes.

Enter one of these codes and you'll set the gender of the next wild Pokémon you'll see (if it has any gender or course).

Note : It can still be Shiny, but with a chance of 1/8192.

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

Always Female Pokémons Code :

0C3D5307ABB44D7C
78DA95DF44018CB4

Always Male Pokémons Code :

0C3D5307ABB44D7C
141BB87C83D7018F

PARA1.1.2 Always Maxed Genes Codes.

Max genes for wild Pokémons:

28330312B9E777D4
141BB87C83D7018F
BD34E89C46AC3FDD
141BB87C83D7018F
C5F9E49A1DC472F1
141BB87C83D7018F
05DF5C70440053F5
141BB87C83D7018F
0526A00AF717AC06
141BB87C83D7018F
3362EF2DD6B8C92E
141BB87C83D7018F

Note: You can enter any one of these 7 codes to max out one specific gene, however, we don't know which line does what yet, so experiment away!

PARA1.2 Pokémon Encounter Codes.

PARA1.2.1 Wild Pokémon Modifier Codes.

Once you've enter one code, you'll encounter only one kind of Pokémon, until you reload your game. Theses codes work with the wild Pokémons you encounter by walking in the grass, walking in the caves, and surfing (that means it won't work for fishing).

This codes will only make you fight "old" Pokémons. We might add new Pokémons later...

Note 1 : In case you didn't notice, the Pokémons are listed using the old Pokédex numbers.

Note 2 : Never activate two of these codes at the same time!

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

Remove - Use this for the game to act normally. This will fix problems with wild poke codes not turning off after being removed. disable the wild poke code you are using and then enter and enable these codes and your random battles will go back to normal.

Thank you again labmaster!

Remove - Use this for the game to act normally.

For VBA where you used the 3-line wild poke code, use all 3 of these:

```
10C765C2 380AE4A5
ACD2F4C3 3F11D892
FF4B5A4A 2900A093
0FAF9723 FEADBF54
39E924C4 4136A9DD
802C22DE A826FAEE
```

For real GBAs, where you can't use any 3-line wild mod codes, please use this code:

```
39E924C4 4136A9DD
802C22DE A826FAEE
```

And some notes from Labmaster:

Thanks to Pokemonhacker and Loading who hacked the JAP version of these codes, these are the US version codes though. They've posted the codes from 1-250 on their FAQ but they have yet to include the 'new' Pokemon codes (as they are 3 line Type 6), so that's why this is here.

Note: They're Type 6 GSA, meaning you have to reload the cartridge to nullify they're effect. Actually, if you put on the 'Remove' code, that's listed at the top, the game will act normally. You can also put on a code, battle, take it off, then put on a different code. There have been no known side effects from doing this. Also, codes 251-386 WILL NOT WORK on a normal GSA. This is a common problem with Type 6 codes, and there is nothing that can be done about this at the moment.

Another Note: Like most GSA codes, you USE THESE AT YOUR OWN RISK. I WILL NOT ACCEPT ANY RESPONSIBILITY FOR CORRUPTED SAVE FILES OR ANYTHING LIKE THAT. THESE CODES ARE KNOWN TO BE VERY BUGGY. THEY'VE BEEN TESTED ON VBA WITHOUT ANY DIFFICULTY, SO THERE'S NOTHING WRONG WITH THE CODES. DO NOT EMAIL ME COMPLAINING THAT THEY DO NOT WORK ON YOUR 'REAL' GSA, YOU WILL BE IGNORED.

Note about all the new species: These are 3-line type-6 codes so they do not work on a real GBA and GSA. They only work on emulators as far as we know. We will continue to search for a species mod which will work on real GBAs. Perhaps they may one day make a device that can handle multiple ROM-write codes, but until then, they are only usable via the emulator.

[code translations by labmaster <lab_master.email.com>]

Wild Pokemon Modifier Codes by Labmaster
lab_master.email.com

Thanks to Pokemonhacker and Loading who hacked the JAP version of these codes, these are the US version codes though, hacked by ME. Note: They're Type 6 GSA, meaning you have to reload the cartridge to nullify their effect, resetting won't help. Report any errors to the address above.

Also note that they may be labeled wrong. I'll try and correct them when errors are reported.

PARA1.2.2 Wild Pokémon's Level Modifier Codes.

These codes change the level of the wild Pokémon you encounter.
Like the Wild Pokémon Modifier codes, they'll be "always on",
until you reload your game.

If you use these codes, Nintendo might know that your Pokémon has been hacked.

Level 0:

BB0C2FFA D24902D2

PARA1.3 Item & TH/HM Moves Codes.

PARA1.3.1 Unlimited Item Code.

When this code is one, the quantity of the items you have will never decrease.

You can also "dupe" items one by one by giving them to a Pokémon.

Note : This code works ONLY when you use items, not when you move them
(put in the computer) or sell them...

If you use this code, Nintendo might know that your game has been hacked if
you get more than one unique item.

75602F52 85185328
A05A144C 078B0074

PARA1.3.2 Make Pokémon Learn any TM-HM Codes.

With these codes, any Pokémon will be able to learn any TM-HM.
If you use these codes, Nintendo might know that your Pokémon has been hacked
if your Pokémon learns Moves that it can't learn normally.

For TM 01-32:
4C8DB8CE 6D013B2A
AD86124F 2823D8DA

For TM 33-50 and all HMs:
4527FEBC 861F2C3C
AD86124F 2823D8DA

PARA1.3.3 Make HM Moves Erasable Code.

When this code is on you are able to "overwrite" any HM move that your Pokémon learned.

If you use this code, Nintendo will *not* know that your Pokémon has been hacked.

ADA17A5E 7BDBE3F1
F3FA719F BF1FDAED

PARA1.4 Miscellaneous Codes.

PARA1.4.1 Unlock Full Pokédex Codes.

Once these codes has been entered, the full Pokédex (counting the 386 Pokémon) is unlocked. You can save your game, and the new Pokédex will be saved.

If, for some reasons, you want to make the Pokédex come back to its original state, you can try the Disable Full Pokédex Codes.

If you use these codes, Nintendo might know that your Pokémon has been hacked.

Unlock Full Pokédex Codes :

15E831F4 2F7ED308
DA560CBD BFA58820
6319638A 36FA43D5

A grey color in the Pokedex means the full Pokedex has been enabled. Now you just have to make a change in the pokedex option to see the old pokedex: while in the Pokedex, go in the menu of the Pokedex (press select), then choose "Shift", select "Mode", and choose "National Dex".

Disable Full Pokédex Codes :

92B00E97 E0E376DE
2E555C7B 81CEDCB1
7E1B2819 69F8DDE8

PARA1.4.2 Mirage Island Code.

If you use these codes, Nintendo might know that your Pokémon has been hacked.

With this code on, Mirage Island will always be on route 130.

9684190D 465C0E8B
65DA389A 09D8882C

Mirage Island's FAQ:

Q - What is Mirage Island ?

A - An island that appears on Route 130. It is full of Wynauts.

Q - What was that long Mirage Island FAQ you had before ?

A - A big mistake... We were wrong, and we admit it. It seems that a random number is computed each day, and if this number match one of your Pokémon number, Mirage Island will appear. If the number is really random (we're looking into that), that means your chances to see Mirage Island is 65536 divided by the number of Pokémon you have. And no female/male thing involved, any Pokémon can do the trick.

Q - So, now, how do I go to Mirage Island without cheats ?

A - Just bring ALL your Pokémon to the old man in the bottom right house of Pacifidlog Town, and do that each day, until he sees Mirage Island.

PARA1.4.3 Southern Island Event Codes.

This code will enable Latios/Latias battle on the Southern Island.

70C6F3CC 16235BDF

Plus, if you have the "Eon Ticket", you'll be able to take the boat that will bring you to the Minami no Kotou.

This code will allow you to battle Latios/Latias everytime you examine the "stone" (or egg, or whatever it is) (without this code, you'll encounter Latios/Latias only one time) :

1EC46531 BC58670E

The 1st code sets "on" the flag that says that the egg island event is available (that means that you can take the boat to egg island if you have the "Eon Ticket", and that Latios/Latias will appear if you examine the stone).

The 2nd code sets "off" the flag that says that you have already done the stone island event (this flag is set on when you examine the egg and encounter Latios /Latias (obviously by using the 1st code I gave you). Once it has been set on,

you can't go to Southern Island / encounter Latios/Latias again).

I think you must have finished the game for the 1st code to work (or at least that you must have gone far enough, so you can already take the boat to go to battle tower or other places).

PARA1.4.4 Feebas's Tiles Code.

Feebas mystery revealed :

As some people mentioned, Feebas only appear on route 119. But he doesn't appear in 1 tile of water, but in 1 to 6 tiles (and he'll be the only Pokemon you'll find in this these tiles).

Your position when fishing does not matter, it's the tile in which you are fishing that is important (the one that you are facing).

The location of Feebas is random. When you create a new game, the game Computes some random numbers. One of these random numbers will be used as the "seed" of the hinbasu tiles (other number will be used for the Trainer ID, secret Trainer ID...). The game takes that number, and applies an algorithm to it, so it can create 6 numbers that will always be the same with this seed. And with a different seed (ie a different game), these 6 numbers will be different.

Conclusion : Feebas's tiles are random. There can be from one to six tiles.

With this Type 6 code, Feebas will appear everytime, on every tile of water of route 119...

Enjoy!

1DFB9212 A112FE48
AD86124F 2823D8DA

PARA1.4.5 All badges, pokedex, pokenavi... Code.

All badges, pokedex, pokenavi... Code:

A12FCE77 0C1EC556

PARA1.4.6 Money Code.

Lotta Money :

D190B41E FAE74D9E

Alternative code for over 4 billion cash
[by mastersord]

E3935DC6 AA0E5DFD

PARA1.4.7 Walk Through Walls Code.

E03B0649 5D67050C
78DA95DF 44018CB4

It's a Type 6 code. It allows you to walk over any obstacle like trees, houses, rocks, and to walk on water. With this code, you'll still be able to interact with the game (enter doors, talk to people, take items, etc...). The two things you can't do are :

-walk directly from ground to water (and water to ground). To do this, you need either to use the SURF move, or to walk from ground to water from an unauthorized place (like walk on a tree and from there walk on the water, or if you are on the water, walk on a rock and from there walk on the ground).

-Go out of the map limit. Each map (each route, room, etc...) is a rectangle of tiles. With this code, you'll be able to move anywhere within that rectangle, but you won't be able to cross its limit (unless you enter another map). That means, for example, if you enter a house, you won't be able to walk in the "dark". But anyway, there is nothing in that dark :)

PARA1.4.8 Secret Trainer ID Codes.

Find out your Secret Trainer ID Codes (1).

Enter this Type 6 code, and look at your trainer card. It could be a bit messy (it might even make the game crash! If it does, you can use the 2nd set of codes), but it'll display your secret Trainer ID instead of your regular Trainer ID. After that, write down this number, and turn the code off (switch off your GBA). For now, knowing your secret Trainer ID has no useful purpose. But maybe one day some people will make proggies that'll use your secret Trainer ID and your normal Trainer ID, and use them to compute a pokemon with all the characteristics/stats/genes... you want (and that'll obey you), find your hinbasu tiles... And, who knows, maybe more!

D20EAE69 9DD6C961
EB50DE1D 23B8A928

Secret Trainer ID revealed (2).

If the 1st code makes your game crash, here are 2 other Type 6 codes that will work perfectly (but require some calculation).

1st code:
CC8629C0 25DFAFD3
02FECFE9 4D39B39F

2nd code:
CC8629C0 25DFAFD3
FDF29BEB 6CBF0D9D

Enter the 1st code, and look at your trainer card. Write down the Trainer ID numbers that are displayed.

Do the same thing with the 2nd code. Now, open windows calculator (or any tool that can make decimal-hexadecimal conversion). Enter the 1st number as decimal, and convert it to hexadecimal.

You should have 4 numbers (A-F are numbers in hexadecimal). Write down the 2 1st numbers (if you have A152, take A1). Do the same thing with the numbers you will get with the 2nd code.

Now take the 2 sets of 2 numbers you just wrote down, and enter them in windows calculator as hexadecimal numbers in the order you wrote them down (if you had A1 and B5, enter A1B5), and convert this number to decimal : you have your secret Trainer ID.

PARA1.4.9 All Pokémon in Pokedex Codes.

By entering those codes, you'll have your Pokédex completed.
(all Pokémon Seen & caught)
We split these codes so you can enter them easily.

PARA1.4.11 Share Experience After Battle Codes.

If you use theses codes, you won't have to switch your Pokémon during battles to make them gain experience. Just beat your oppoment with 1 Pokémon, and the game will think all your Pokémon have fought the battle, and will give experience to all of them!

8843766D 09486CF9
B1283857 DB34BCE4

PARA1.4.12 Trainer Card's Stars Codes.

First, I'd like to say that I did some research, and I found that there were only 4 Stars in the game. Not 5, 4.
There still might be a very slim chance that I missed something, and that the last star could be obtanaible using the Link cable, but I seriously doubt about it...

1st Star Code :

This star is unlocked when you finish the game.
With these code, you'll have finished the game in 15 minutes.

60314334 498FA5AB
5DE95E2D B165DBD1

2nd Star Code :

This star is given to you when you beat the Battle Tower.
With this codes, you'll have beaten the Battle Tower 999 times.

26062652 7F98D9ED

3rd Star Code :

This star is given to you when you win all the contest.
These codes will do the trick.

737DA248 9535D358
52780D3C 4BB0E715
274E1CD0 4D964F4A
BB2CEDC7 216EE9BB
3B352956 C7E1EE43

4th Star Code :

This star is unlocked when you have caught 202 Pokémon in the Pokédex.
Use the codes at section 1.4.9 to fulfill this requirement.

PARA1.4.13 Trainer Card's Back Codes.

Use these codes to fill the back of your trainer card.

Line 1 : First Hall of Fame.

60314334 498FA5AB
5DE95E2D B165DBD1

Line 2 : Link Card Battle.

F10A8F98 D3C636C3
1F9A8042 3AA9F174

Line 3 : Pokémon Trades.

F0A11F61 F7B1BE4F

Line 4 : Pokéblocks w/ Friends.

C79F3BD0 003CF6C4

Line 5 : Contests w/ Friends.

1EB72A6D C41E1792

Line 6 : Battle Tower.

26062652 7F98D9ED

PARA2. Thanks.

Thanks to all the people at CMGSCCC that supported us.
(especially L3reakmanx and Mastersord)

Thanks to Mastersord for hosting our Codes FAQ in his FAQ on www.gamefaqs.com.

Big Thanks for Forgotten, and his great emulator, VBA (<http://vboy.emuhq.com>).
Without it, this FAQ won't ever exists.

And thanks to all the people who use these codes :)

modifier hacks.

-pokemoncrystal <pokemon_crystal03.yahoo.com> - For the full pokedex
hacks. Hacks also found by pokemonhacker.

-labmaster <lab_master.email.com> - translated all the new species
codes from the old FAQ. Also found a code to turn them off!

www.cmgsgccc.com - For all your breakthroughs and for helping me find
hackers who could hack as opposed to the 8 million requests for codes
we get every day.

-l3reakmanx <l3reakmanx@hotmail.com>- for creating VBA hacking templates

-PokemonHacker - For figuring out the method the games used to store
pokemon data, and for his incredible work in making codes.

-Loading - Also for his work in making codes.

-Gavin MacManus - For his incredible effort making the pokemon Calculator.

-Radical Dreamer - For finding the data blocks we needed for the first
modifiers we used.

v1.08 - written 1-23-03 - added Illusion island FAQ to explain how it works.
addressed concerns over "codes not working on real GBA" issues. Fixed index.
v1.09 - written 1-23-03 - More fixes and formatting changes
v1.1 - written 1-24-03 - yet more fixes. Hopefully we may be able to fix
everything soon!
v1.11 - written 2-06-03 - Full pokedex codes (all seen and caught) added.
v1.2 - written 2-07-03 - added trainer cards and trainer's eye codes.
v1.21 - written 2-08-03 - minor fixes
v1.22 - written 2-10-03 - more fixes
v1.23 - written 2-11-03 - added info about type 6 code effects and VBA
v1.24 - written 2-14-03 - added note regarding bug with move modifier codes
v1.25 - written 2-22-03 - added egg island codes and a VBA tutorial
v1.26 - written 2-22-03 - added Hinbasu enabler code and explanation for Latios
/Latias codes
v1.27 - written 2-23-03 - added money code and all badges, pokenavi, etc...
code
v1.28 - written 2-23-03 - added Coin, ash sac, and win number codes and a note
about max genes codes
v1.29 - written 2-24-03 - added walk through walls code, Notes for hinbasu code,
and a new host
v1.3 - written 2-25-03 - added codes for secret trainer ID and a better
explanation
of the walk through walls code as well as a teleport to egg island code
v1.31 - written 2-26-03 - added new host
v1.32 - written 3-05-03 - added <http://df.zapchu.com> to host list

//

//

PARJII. Master codes

Let's start with some codes that work for both versions. First we'll need some master codes:

These master codes are from www.GameFAQs.com. Here they are in their original post.

[From:Xuanwumon| Posted:1/1/2003 12:47:33 PM]

Well I have the master codes for the two versions if someone wants to use codes for the actual cartridge

Sapphire:

CD361343 4CF2A2BF
65C7640E 2099B840

Ruby:

CD361343 4CF2A2BF
1660CD84 4D5251F4

these are actual codes for Gameshark or Pro Action Replay

//

PARJIII. Universal codes

Here are some codes based on hacks from other people. I hope I did this right. If you have any problems with it, let me know via e-mail. If I Gave credit of your hacks to someone else, please provide proof that I did so. It must be dated for authenticity. If you made any of these hacks and don't want them published as GSA codes, e-mail me and I will try to accomodate your wishes.

[Original hacks by Radical dreamer at <http://www.cmgsgcc.com/forums/>]

PARJ1. Infinite HP in battle 1st pokemon (Will look like pokemon has 0 HP)
912B2104 4A081151

PARJ2. quick level up code (Turn off after you reach desired level or you won't leave the battle)

4C649500 034910A2

PARJ3. infinite master balls in first slot in item pocket. note that putting masterballs in your item pocket will make them infinite as long as they aren't transfered or moved. you can even enter the codes, turn them off, save, and they will still be there and still be infinite.

5464E2A3 B185BE66

80CE043C 94AEDDA5

PARJ4. Item codes for 1st slot of main pocket

1st slot in main pocket 99 of item code

80CE043C 94AEDDA5

Now we begin the long list of item codes for the first slot. If you want them in the proper pocket, Move them to your PC and then retrieve them again. [List of labels courtesy of

750BAD46 F1464639 15A HM08 (Diving)

Ignore the last 3 digits. Those were used in the list I pasted the labels from. You'll need to put an item into slot 1 of your bag's main item section which you want to change or get rid of, else the code will over-write what ever is there.

Please note that no matter what you code for, it will always show up there. Key items, berries, TMs, it doesn't matter. It will always be in that slot.

*Eon ticket alone will not allow you to go to the southern island. Use pokemonhacker's southern island codes in his FAQ.

PARJ6. Time codes

[Original hacks from RAMS' FAQ at www.gameFAQs.com and at www.kyogre.cjb.net]

Time changing code. The number indicate hour. These actually work to change the tide. Just experiment until you find the right one.

PARJ7. Porok game codes

[original hacks by Lim Soon keat]

Porok game codes

8BC9947E 08AC653C(99 Perfect Hit!)

EC6CCE64 38DBCADA(99 Hit!)

3FCD5942 5D73E73E(99 Miss!)

Enter these before trying the porok game at the contest houses, and no matter what, you will get 99 at the end for the stat and finish first.

PARJ8. Full pokedex (all species, seen and caught)

[Original hacks by pokemonhacker at www.cmgsgccc.com and from pokemoncrystal at www.gameFAQs.com]

[Unlock codes provided by Loading and pokemonhacker]

Unlock Full Pokédex Codes :

DEBC8F0E1C83A7D0

246BCE3B76B3F98D

4F2B8A27296775A1

For the full pokedex, grey means enabled. Now you just have to make a change in the pokedex option to see the old pokedex.

If you speak japanese, go in the menu of the pokedex (press select), then choose "Kirikae", select "Mode", and choose "Zenkoku Zukan".

If you don't speak japanese, do this:

Press select while in the pokedex, then go right, press A, go down, press A, go down, press A, go down, press A.

To have all 386 entries, enter all these codes and also unlock the full pokedex with the codes and instructions above.

PARJIV. Pokemonhacker's and Loading's FAQ

Here is the most accurate set of codes found to date. All credit for finding them goes to pokemonhacker and Loading. I've been given special permission to include their FAQ within my own FAQ from Pokemonhacker himself.

Pokémon Ruby & Sapphire GSA Codes
Ver 1.0 01-16-2002

PARJ0. Copyrights & Special Notes.

PARJ1. Pro action replay codes.

PARJ1.1 Shiny, Gender, and Max genes Codes.

- PARJ1.1.1 Always Shiny Codes.
- PARJ1.1.2 Always Male/Female Codes.
- PARJ1.1.3 Always Shiny & Male/Female Codes.
- PARJ1.1.4 Always Maxed genes Codes.

PARJ1.2 Pokémon Encounter Codes.

- PARJ1.2.1 Wild Pokemon Modifier Codes.
- PARJ1.2.2 Wild Pokemon's Level Modifier Codes.

PARJ1.3 Item & Moves Codes.

- PARJ1.3.1 Unlimited Items Code.
- PARJ1.3.2 Make Pokémons learn any TM-HM Codes.
- PARJ1.3.3 Make HM Moves erasable.
- PARJ1.3.4 TM-HM Moves modifier Codes.

PARJ1.4 Miscellaneous Codes.

- PARJ1.4.1 Unlock Full Pokedex Codes.
- PARJ1.4.2 Illusion Island Codes. (type 6)
- PARJ1.4.3 Trainer cards
- PARJ1.4.4 Trainer's eye codes

PARJ1.4.5 Egg island codes
PARJ1.4.6 Hinbasu enabler code (type 6)
PARJ1.4.7 All badges, pokedex, pokenavi...
PARJ1.4.8 Money code
PARJ1.4.9 Walk through walls code

PARJ1.5 More miscellaneous codes

PARJ1.5.1 Secret trainer ID (type 6)

PARJ2. Thanks.

PARJ0. Copyrights & Special Notes.

©2003 by Pokemonhacker and loading/pika (hen2k.gmx.de)
We worked hard to create these codes so please dont steal them!
All trademarks and copyrights contained in this document are owned by their
respective trademark and copyright holders.

Special Note 1 : All these codes are in Gameshark format, and work for both
Pokémon Ruby and Sapphire games.

Special Note 2 : We put some informations about Nintendo being able to spot
if you hacked the game. If you plan to Link you game to the NGC, or transfer
Pokémons with the next Pokémon game, don't use codes that Nintendo can spot.

Special Note 3 : These codes work 100% on VBA, but have been untested on the
real games with the GSA. You might need a Master code to use them. You can
find one in Mastersord's FAQ on GameFaqs.

PARJ1. Pro action replay codes.

PARJ1.1 Shiny & Gender Codes.

NOTE : Don't mix the "Always Shiny Codes", the "Always Male/Female Codes",
and the "Always Shiny & Male/Female Codes". Use only one of them at the
same time.

PARJ1.1.1 Always Shiny Codes.

Enter all these codes, and you'll encounter always shiny Pokémons, but there
is a downside... It'll "lock" the gender and the traits of the Pokémons.
That means you'll encounter always male Kimori, or always female Bulbasaur

(it'll be different for everyone).

So if you want a Male/Female Shiny Pokémon, and you can't have it using these codes, check the part 1.1.3, "Always Shiny & Male/Female Codes".

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

Always Shiny Pokémon Codes :

49A9A85D4158B07D

4ADA8F500D66D96F

PARJ1.1.2 Always Male/Female Codes.

Enter one of these codes and you'll set the gender of the next wild Pokémon you'll see (if it has any gender or course).

Note : It can still be Shiny, but with a chance of 1/8192.

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

Always Female Pokémons Code :

49A9A85D4158B07D
78DA95DF44018CB4

Always Male Pokémons Code :

49A9A85D4158B07D
141BB87C83D7018F

PARJ1.1.3 Always Shiny & Male/Female Codes.

These codes are very long, so take your time while typing them.

Enter first the 11th lines "Enabler Code", then either the "Be Shiny Male" or the "Be Shiny Female" code, and you'll set the gender/shinyness of the next wild Pokémon you'll encounter. Moreover, the traits should still be random.

Once the Enable Codes has been entered, you MUST enter one of the other Shiny Gender codes. After that, if you want to catch Male & Female Shiny Pokémons in the same row, you can just disable the Shiny Gender code you put on, and enter & activate the other one (but NEVER make the 2 Shiny Gender

codes activated at the same time).

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

Enable Codes :

49A9A85D4158B07D
DF784EDA650E4DEE
CAF134B564C5A99B
1D0C17F617CC0BA4

Always Shiny Female Pokémon Code :

0FA529719FE1ED72
DC3BD6A71DADE22B

Always Shiny Male Pokémon Code :

0FA529719FE1ED72
564C13B07C4DCC29

PARJ1.1.4 Always Maxed Genes Codes.

Max genes for wild Pokémons:

0E2A3E2BF7E9AA63
141BB87C83D7018F
B45466BF5FD9A100
141BB87C83D7018F
5F9D8DBB16FFD4A8
141BB87C83D7018F
6B5ED92FFF6189C9
25260C8D25207DAE
D5EAB0261D809FAD
141BB87C83D7018F
41FA6FBE253EF866

141BB87C83D7018F
F946A7FEACC4A7D4
141BB87C83D7018F

Note: You can enter any one of these 7 codes to max out one specific gene, however, we don't know which line does what yet, so experiment away!

PARJ1.2 Pokémon Encounter Codes.

PARJ1.2.1 Wild Pokémon Modifier Codes.

You have to enter the 1 (for "old" Pokémon) or 3 (for "new" Pokémon) line(s) of codes to make the Wild Pokémon Modifier work. Once you've enter the codes, you'll encounter only one kind of Pokémon, until you reload your game. Theses codes work with the wild Pokémons you encounter by walking in the grass, walking in the caves, and surfing (that means it won't work for fishing).

Note 1 : In case you didn't notice, the Pokémons are listed using the old Pokédex numbers.

Note 2 : Never activate two of these codes at the same time!

If you use theses codes, Nintendo might know that your Pokémon has been hacked.

PARJ1.2.2 Wild Pokémon's Level Modifier Codes.

These codes change the level of the wild Pokémon you encounter.
Like the Wild Pokémon Modifier codes, they'll be "always on",
until you reload your game.

If you use these codes, Nintendo might know that your Pokémon has been
hacked.

PARJ1.3 Item & Moves Codes.

PARJ1.3.1 Unlimited Item Code.

When this code is one, the quantity of the items you have will never decrease. Use this code with the "Make Pokémons learn any TM-HM Codes" and "TM-HM Moves modifier Codes", so you can make one single TM/HM to learn any move to your Pokémons.

You can also "dupe" items one by one by putting them by giving them to a Pokémon.

Note : This code works ONLY for items you use, not items you move (put in the computer), sell...

If you use this code, Nintendo might know that your game has been hacked if you get more than one unique item.

7389AF48186ABAA8
A05A144C078B0074

PARJ1.3.2 Make Pokémons learn any TM-HM Codes.

With these codes, any Pokémon will be able to learn any TM-HM.

If you use these codes, Nintendo might know that your Pokémon has been hacked if your Pokémon learns Moves that it can't learn normally.

For TM 01-32:
94840758AFA0BFFB
AD86124F2823D8DA

For TM 33-50 and all HMs:
319D72935DA84756
AD86124F2823D8DA

PARJ1.3.3 Make HM Moves erasable Code.

When this code is on you are able to "overwrite" any HM move that your Pokémon learned.

If you use this code, Nintendo will *not* know that your Pokémon has been hacked.

17F364789040BF07
F3FA719FBF1FDAED

PARJ1.3.4 TM-HM Moves modifier Codes.

If you use any TM-HM on a Pokémon with one set of these codes on, the Pokémon will learn the move you choose.

Note 1 : When the Pokémon is learning the move, the game tells you that you are learning the move from the TM-HM, but once the move has been learned, it'll be the one you choosed.

Note 2 : When your learn a move using these codes, the current PP of the move can be wrong. Just heal your Pokémon in any PokéCenter to make it get the right PP.

Note 3 : You can use these codes to make Pokémon learn multiple times the same move.

If you use these codes, Nintendo might know that your Pokémon has been hacked if your Pokémon learnt Moves that it can't learn normally.

PARJ1.4 Miscellaneous Codes.

PARJ1.4.1 Unlock Full Pokédex Codes.

Once these codes has been entered, the full Pokédex (counting the 386 Pokémons) is unlocked. You can save your game, and the new Pokédex will be saved.

If, for some reasons, you want to make the Pokédex come back to its original state (202 Pokémons), enter the Disable Full Pokédex Codes.

If you use these codes, Nintendo might know that your Pokémon has been hacked.

Unlock Full Pokédex Codes :

DEBC8F0E1C83A7D0
246BCE3B76B3F98D
4F2B8A27296775A1

For the full pokedex, grey means enabled. Now you just have to make a change in the pokedex option to see the old pokedex.

If you speak japanese, go in the menu of the pokedex (press select),

then choose "Kirikae", select "Mode", and choose "Zenkoku Zukan".

If you don't speak japanese, do this:

Press select while in the pokedex, then go right, press A, go down, press A, go down, press A, go down, press A.

Disable Full Pokédex Codes :

FOE50550007B38CD

CBA430E2C652AD5B

BBDD411A488E8384

PARJ1.4.2 Illusion Island Codes.

Illusion Island FAQ:

by pokemonhacker

Mastersord's notes: From what I've heard, I believe the plural form of "pokemon" is "pokemon". For that reason, I changed all plurals of pokemon, to that form.

Q - What is Illusion Island ?

A - An island that appears on Route 130. It is full of Wynauts.

Q - How do I make it appear ?

A - The only way to make it appear is to have an "Illusion Island Friendly" Pokémon in your party.

Q - What is an Illusion Island Friendly Pokémon ?

A - A Pokémon that makes Illusion Island appear when it's in your party :) You can check that by either going to route 130 and see if Illusion Island is there, or talk to the oldman that looks at the window in the bottom-right house of Kinagi City (the town to the left of Route 130). If the old man says a 2 lines message, you have an Illusion Island's Friendly Pokémon in your party.

Q - Can you be more precise ?

A - When a Pokémon is created by the game, it has unique random values. A set of these random values, also known by some people as the MAP, are used to compute the gender, the traits, the shininess, and the way the data of the pokemon are written. To check if Illusion Island will appear, the game looks at the MAP, and checks if its last 4 numbers (the MAP has 8 numbers, from 0 to 16 (0 to F in hexadecimal)) are set to 0. If it's true, Illusion Island will appear.

Q - How can I tell if a Pokémon is Illusion Island Friendly ?

A - You can't tell exactly, but you can have one hint. Two of the numbers that must be set to 0 are used to compute the Pokémon's gender. And as low numbers give a female Pokémon, and high number give a Male Pokémon, here is what you can tell :

-If you have a male Pokémon, and this Pokémon can be a female, it'll never be

Illusion Island Friendly, because it's gender value will always be >0.

-If you have a female Pokémon, and this Pokémon can be a male, you have one chance out of the gender breakpoint value * 256 that it'll be Illusion Island Friendly.

Q - Huh ?

A - Every Pokémon that has a gender can be male or female, and that is set by a random value that goes from 0 to 255 (00 to FF in Hex). The value from which the gender goes from female to male is called the gender breakpoint. Most of the Pokémon have a gender breakpoint of 128, that means the female gender value will have a value from 0 to 127, and male gender value will go from 128 to 255. That also means they have 50% to be male, and 50% to be female. You can tell a Pokémon's gender breakpoint value by looking at Meowth's site's Pokédex (www.pokefor.tk, then choose "Tools"), and look at the gender percentage of a Pokémon. Take the female percentage, multiply it by 256, and you'll have the Pokémon's gender breakpoint. For example, you can see from Meowth's Pokédex that Machop has a 24% (=0.24) chance to be a female. $0.24 * 256 = 61.44$. Round it down, and you'll have Machop's gender breakpoint value : 61.

By knowing this, you can tell what are your chances of a female Pokémon to be Illusion's Island Friendly by multiplying the gender breakpoint by 256.

Here are some examples :

-Genderless Pokémon (or Pokémon that have always the same gender) will have 1 chance out of 65536 ($256 * 256$) to be Illusion Island Friendly.

-50% Female/ 50% Male Pokémon will have 1 chance out of 32678 ($128 * 256$) to be Illusion Island Friendly if you catch a female.

-24% Female/ 76% Male Pokémon will have 1 chance out of 15616 ($61 * 256$) to be Illusion Island Friendly if you catch a female.

-12% Female/ 88% Male Pokémon will have 1 chance out of 7936 ($31 * 256$) to be Illusion Island Friendly if you catch a female.

This won't give you more chances to get an Illusion Island Friendly Pokémon (chances are always 1 out of 65536), but it'll save you a lot of time, because you won't have to catch every Pokémon you encounter and check if they are Illusion Island Friendly. But you'll still have to encounter "65536" Pokémon to find the good one... And remember, only female Pokémon of Pokémon that have a gender, are valuable.

Q - Do breeding, evolving, and/or time of day help in getting Illusion Island Friendly Pokémon?

A - This is not yet known, but it's doubtful.

Q - What does the "Illusion Island Friendly Pokémon" do?

A - It sets the values that are checked to see if Illusion Island will appear, to 0s. That way, the Pokémon you catch with these values will always be Illusion Island Friendly :)

Once this code has been entered, you will only encounter "Illusion Island Friendly" Pokémon. Catch ANY Pokémon in the wild, put it in your party, and go on route 130 : Illusion Island will be there.

If you loose this Pokémon (or put it in your PC), Illusion Island will be gone.
Note : chances to find a non-hacked "Illusion Island Friendly" Pokémon in the wild are *at least* 1/65536.

If you use theses codes, Nintendo might know that your game has been hacked if you keep the "Illusion Island Friendly" Pokémon.

Code to find an "Illusion Island Friendly" Pokémon:

PARJ1.4.5 egg island codes

Use these 3 codes to get to egg island

[Original hacks from http://www.geocities.com/fat_parrot/rowr/RuSa.html]

C4C2A76C 6DB24C6D
D5F38720 2EA003D7
5C9B5E08 1301E161

Use "Fly" (doesn't matter where).
Turn off the code when you arrive.

[From Pokemonhacker]

This code will enable Latios/Latias battle on the so called "Egg Island" (Minami no Kotou)

80B15668 275B29FA

Plus, if you have the "Infinity Ticket" (Mugen no Ticket), you'll be able to take the boat that will bring you to the Minami no Kotou.

This code will allow you to battlelatios/latias everytime you examine the "egg" (or stone, or whatever it is) (without this code, you'll encounter latios/latias only one time) :

D5942B09 E932156F

The 1st code sets "on" the flag that says that the egg island event is available (that means that you can take the boat to egg island if you have the infinity ticket, and that latios/latias will appear if you examine the egg).

The 2nd code sets "off" the flag that says that you have already done the egg island event (this flag is set on when you examine the egg and encounter latios/latias {obvioulsy by using the 1st code I gave you}). Once it has been set on, you can't go to egg island / encounter latios/latias again).

I think you must have finished the game for the 1st code to work (or at least that you must have gone far enough, so you can already take the boat to go to battle tower or other places).

PARJ1.4.6 Hinbasu enabler code

Hinbasu mystery revealed :

As some people mentionned, Hinbasu only appear on route 119. But he doesn't appear in 1 tile of water, but in 1 to 6 tiles, that can only be accessible by surfing. When you fish in one of these tiles, you have 50% chance to find it. Your position when fishing does not matter, it's the tile in which you are fishing that is important (the one that you are facing).

The location of hinbasu is random. When you create a new game, the game computes a serries of random numbers. One of these random numbers will be used as the "seed" of the hinbasu tiles (other number will be used for the Trainer ID, secret Trainer ID...). The game takes that number, and applies an algorithm to it, so it can create 6 numbers that will always be the same with this seed. But with a different seed (ie a different game), these 6 numbers will be different.

Conclusion : hinbasu tiles are random. There can be from one to six tiles.

With this Type 6 code, Hinbasu will appear everytime, on every tile of water of route 119...
Enjoy!

A7FABB21 AA61FE93
AD86124F 2823D8DA

PARJ1.4.7 All badges, pokedex, pokenavi...

All badges, pokedex, pokenavi...
FFB53CE2 982EBAFD

PARJ1.4.8 Money code

Lotta Money
E4A9801E 5FF94C2E

PARJ1.4.9 Walk through walls code

5D17BC16 16A676DC
78DA95DF 44018CB4

It's a Type 6 code. It allows you to walk over any obstacle like trees, houses, rocks, and to walk on water. With this code, you'll still be able to interact with the game (enter doors, talk to people, take items, etc...). The two things you can't do are :

- walk directly from ground to water (and water to ground). To do this, you need either to use the SURF move, or to walk from ground to water from an unauthorized place (like walk on a tree and from there walk on the water, or if you are on the water, walk on a rock and from there walk on the ground).
- Go out of the map limit. Each map (each route, room, etc...) is a rectangle of

tiles. With this code, you'll be able to move anywhere within that rectangle, but you won't be able to cross its limit (unless you enter another map). That means, for example, if you enter a house, you won't be able to walk in the "dark". But anyway, there is nothing in that dark :)
Have fun!"

PARJ1.5 More miscellaneous codes

PARJ1.5.1 Secret trainer ID

Find out your Secret Trainer ID Codes (1).

Enter this Type 6 code, and look at your trainer card. It could be a bit messy (it might even make the game crash! If it does, you can use the 2nd set of codes), but it'll display your secret Trainer ID instead of your regular Trainer ID. After that, write down this number, and turn the code off (switch off your GBA). For now, knowing your secret Trainer ID has no useful purpose. But maybe one day some people will make proggies that'll use your secret Trainer ID and your normal Trainer ID, and use them to compute a pokemon with all the characteristics/stats/genes... you want (and that'll obey you), find your hinbasu tiles... And, who knows, maybe more!

5731DA44 68F4D46E
BAC0F541 DE596E18

Secret Trainer ID revealed (2).

If the 1st code makes your game crash, here are 2 other Type 6 codes that will work perfectly (but require some calculation).

1st code:

285F8909 F907A415
02FECFE9 4D39B39F

2nd code:

285F8909 F907A415
FDF29BEB 6CBF0D9D

Enter the 1st code, and look at your trainer card. Write down the Trainer ID numbers that are displayed.

Do the same thing with the 2nd code. Now, open windows calculator (or any tool that can make decimal-hexadecimal conversion). Enter the 1st number as decimal, and convert it to hexadecimal.

You should have 4 numbers (A-F are numbers in hexadecimal). Write down the 2 1st numbers (if you have A152, take A1). Do the same thing with the numbers you will get with the 2nd code.

Now take the 2 sets of 2 numbers you just wrote down, and enter them in windows calculator as hexadecimal numbers in the order you wrote them down (if you had A1 and B5, enter A1B5), and convert this number to decimal : you have your secret Trainer ID.

PARJ2. Thanks.

Thanks to CJayC for hosting this FAQ at GameFaqs.

Thanks to all the people at CMGSCCC that supported us.
(especially L3reakmanx and Mastersord)

Big Thanks for Forgotten, and his great emulator, VBA (<http://vboy.emuhq.com>).
Without it, this FAQ won't ever exist.

Greets to Filb, Jasmine Wayne West and Tuxedo_Jim for their work.

////////////////////////////////////
PARJV. Route 101 codes

These codes modify what you can encounter on route 101. They can modify the species and level range of your encounters. At the time of this writing, All testing I can do from my PC, proves that these codes work, however, there is still the chance that they won't work on your actual Gameboy Advance with the actual cartridge. You'll have to test them for your self. Try them with and without the master codes (the first ones at the top) if you have problems.

here are the master codes you need to use for the route 101 codes specifically.

Sapphire:

CD361343 4CF2A2BF
65C7640E 2099B840

Ruby:

CD361343 4CF2A2BF
1660CD84 4D5251F4

For emulator users:

First, you have to enter the codes in The game shark section. You have to enter all 12. They can't have spaces. The description is unimportant and unnecessary.

You shouldn't need the master code unless you use a real GBA. All the codes should say "E" or "EF" in the list to show that they are Enabled Once entered, go to route 101 and when you enter a random battle, it should be against the pokemon you want.

You can also change the level range of the pokemon with the level range codes. Just be sure to enter all 12.

For GBA users:

Just make sure you entered all 12 codes like in a normal GameShark. All 12 must be active for the species to show up. Add another 12 for it to show up in the level range you want. Activate the master code as well on top of all that if you have problems.

If you still can't get them to work, make sure you entered them correctly. For emulator users, remove the spaces and also remember that GSA codes are written in Hexadecimal so don't use "o", "O", or "Q" in place of "0" (Zero).

They have been fully tested on VisualBoy Advance version 1.3. Make sure you have this version or higher if you are using these codes on an emulator.

You can also mix and match codes as long as the codes aren't from the same line. take the blocks you want to mix and number them from 1-12 going down the list of codes. Make sure all "ingredient" blocks are numbered the same way. Now make a block of 12 codes using codes from each of your ingredient blocks, but make sure that your new list of codes is numbered 1-12 without re-numbering any of them. Why must you do it this way? Because each individual code in the 12 code block is meant to affect 1 of 12 possible encounter options on Route 101, but a specific code will only affect it's specific corresponding slot. when you have all 12 codes entered, you can always encounter the same species which those codes correspond to. If you put 2 codes that affect the same slot in different ways, in the same block, the codes will conflict with eachother and cause problems.

Say you want to find 3 different pokemon: Take the 12 codes for each species and number them each 1-12. Each block has 12 codes and you number them in the same order for each block.

Species 1

1. xxxxxxxx yyyyyyyy
2. xxxxxxxx yyyyyyyy
3. xxxxxxxx yyyyyyyy
4. xxxxxxxx yyyyyyyy
5. xxxxxxxx yyyyyyyy
6. xxxxxxxx yyyyyyyy
7. xxxxxxxx yyyyyyyy
8. xxxxxxxx yyyyyyyy
9. xxxxxxxx yyyyyyyy
10. xxxxxxxx yyyyyyyy
11. xxxxxxxx yyyyyyyy
12. xxxxxxxx yyyyyyyy

Species 2

1. aaaaaaaaa bbbbbbbb
2. aaaaaaaaa bbbbbbbb
3. aaaaaaaaa bbbbbbbb
4. aaaaaaaaa bbbbbbbb
5. aaaaaaaaa bbbbbbbb
6. aaaaaaaaa bbbbbbbb
7. aaaaaaaaa bbbbbbbb
8. aaaaaaaaa bbbbbbbb
9. aaaaaaaaa bbbbbbbb
10. aaaaaaaaa bbbbbbbb
11. aaaaaaaaa bbbbbbbb
12. aaaaaaaaa bbbbbbbb

Species 3

1. cccccccc dddddddd
2. cccccccc dddddddd
3. cccccccc dddddddd
4. cccccccc dddddddd
5. cccccccc dddddddd

6. cccccccc dddddddd
7. cccccccc dddddddd
8. cccccccc dddddddd
9. cccccccc dddddddd
10. cccccccc dddddddd
11. cccccccc dddddddd
12. cccccccc dddddddd

now you need to make sure you don't use codes with the same number in your new set of codes. Example:

Good

1. xxxxxxxx yyyyyyyy
2. xxxxxxxx yyyyyyyy
3. xxxxxxxx yyyyyyyy
4. xxxxxxxx yyyyyyyy
5. aaaaaaaaa bbbbbbbb
6. aaaaaaaaa bbbbbbbb
7. aaaaaaaaa bbbbbbbb
8. aaaaaaaaa bbbbbbbb

12. cccccccc dddddddd

NO!!!

1. xxxxxxxx yyyyyyyy
2. xxxxxxxx yyyyyyyy
3. xxxxxxxx yyyyyyyy
4. xxxxxxxx yyyyyyyy
1. aaaaaaaaa bbbbbbbb
2. aaaaaaaaa bbbbbbbb
3. aaaaaaaaa bbbbbbbb
4. aaaaaaaaa bbbbbbbb
1. cccccccc dddddddd
2. cccccccc dddddddd
3. cccccccc dddddddd
4. cccccccc dddddddd

By entering your new block of codes, you should be able to catch all 3 species at route 101.

Before I go anyfurther, I would also like to thank samsonlamHK at GameFAQs. He posted the template from which these codes are based.

Right now, I only have codes for Ruby version, but i'm working on the Sapphire codes and hope to have them done soon.

For Ruby:

VI. Credits:

Nintendo - For making the GameBoy Advance

GameShark - For making the GameShark Advance

GameFreak - For making these games and holding off hacking attempts for at least 2 weeks after the games' release in Japan. Keep up the good work!

-Lim Soon Keat <pip_017.hotmail.com> - Various corrections. He found several mistakes and also for his contributions to the FAQ. Many people wanted to fix the Porok game!

-goldenworld <goldenworld.bkk.a-net.net.th> - found bug with move modifier codes

www.GamFAQs.com - for giving me a place to host this

-Jasmine Wayne Wayne (unapatata2.hotmail.com) - For discovering that all species can be unlocked

-Tuxedo Jim - For publishing the first working species hacks

-Filb - For helping Tuxedo Jim

-Sax <puma7078.attbi.com> - For all his help in making thses codes

-Xuanwumon - For finding the master codes

-samsonlamHK - He posted the unencrypted code template used for this FAQ

-RAMS <rams1801.hotmail.com> <www.kyogre.cjb.net> - For the clock modifier hacks.

-pokemoncrystal <pokemon_crystal03.yahoo.com> - For the full pokedex hacks. Hacks also found by pokemonhacker.

www.cmgsgcc.com - For all your breakthroughs and for helping me find hackers who could hack as opposed to the 8 million requests for codes we get every day.

-13reakmanx <13reakmanx.hotmail.com>- for creating VBA hacking templates

-PokemonHacker - For figuring out the method the games used to store pokemon data, and for his incredible work in making codes.

-Loading - Also for his work in making codes.
