- 1. Introduction (Intro)
- () () () () () () () () () () () () () () ()

Hi Guys!! I'm Shift Breaker, and this is my Chip Code FAQ. I bet you're wondering, why the hell is he doing this? Doesn't matter if you aren't because I'm going to give the answer anyway. Folder Building. This FAQ lists every Chip in Each Code. You may have seen FAQ's like this for MMBN3 or 4. This is where I got the idea from. Kudos to those guys. Anyway, Enough of that. TO THE GUIDE!

- 2. What Are Chips? (What?)

() () () () () () () () () () () () () () ()

Chips. This is what makes the MMBN games as they are. They are bits of data which you slot in your PET to help your Navi delete viruses. They range from Swords to Cannons, Barriers to Shields. There are 27 different codes, the Classic A-Z Codes which can only go with another of the same letter, OR the same type of chip with a different code. Then there is the * Code. This goes with ANY Chip of another code. Example:

You have a Mini Bomb B, Another in the E code and an Attack +10 *. You choose The Mini Bomb B, and the Atk+10 is Available to you. You choose the Mini Bomb B then E and the Attack +10 Can't be chosen.

Also, * Chips can be used for Program Advances, Replacing 1 Chip of it for certain P.A's. You can have a fully * Coded Life Sword 3, Since it has 3 different chips in it, but Zeta-Cannon 1 can't be used all * because it has 3 of the same Chips. Also, because it is Multi Coded, it can't have Attack + Chips attached to it.

- 3. The Chip Library (Libr)

() () () () () () () () () () () () () () ()

The Codes with brackets () around them are only available by Cheating, and

can't be yours in a normal, cheat free game.

There's a reason why Sanctuary is all in Brackets. No matter what you do, you can only get Sanctuary once in any of the letter codes. Having all of them means you cheated to get them, or just have some really stupid friends. * code is impossible without cheating.

4. The Chip List (CList)

() () () () () () () () () () () () () () () ()

Here we Go!!! Every code, and all the chips in it. Bet You're wondering why I put only * exclusive chips in the library. Doesn't matter if not, I'll say anyway. It's simple, Every Chip comes in the * Code, and can be recieved in the Chip Traders. Even Bass V3 can come out. It's happened before. :) Anyway, I use the Full names for this, just so you know.

6. Version History (Hstry)

() () () () () () () () () () () () () () () ()

Version 1.0:

Made FAQ and Sent it in. Hope it makes it!!

Version 1.1:

Added the Chip Library and fixed some spelling Errors.

Version 1.15:

Library Unfinished, but I done some of it. Got rid of E-Mail because of Spam too.

Version 1.2:

Finished Library and added stuff to the contact Section. Also, I've added a chip combos section, so you can use the Chip's special abilities. Contact me using my Free E-mails, rather than my public one. If you need to contact me, use them. I think i'm done with this for now, although I may update soon.

Version 1.21:

Added ASCII Art. Fixed Fighter Sword Command too.

7. Thanks (Thk)

() () () () () () () () () () () () () () () ()

Me, for making it
You, for reading it
nessie, Protoman V3 and Mastermind Chaud for giving me the idea to make this
FAQ. (Though they don't actually know it yet)
absolutezero111 for giving me the chip commands I need.
Everyone on the MMBN2 boards, for helping those in need. Unless they're stupid.
Capcom, for making this, The best MMBN game in the series.
And of course, GameFAQ's and Neoseeker for hosting this FAQ.
