## INTRODUCTION

~~~~~

Hey guys. I was really wondering, how short can you get to bowser. I tried and tried to find the shortest way and finally found the best solution. Now you can get to Bowser quicker. Well here we go.

If you can see this line, your browser is set:

Well here is the walkthrough to get to Bowser in 11 levels.
Please enjoy!

+-----+
| Yoshi Island 2 |
+-----+

Difficulty: Easy
Time: 400

This level is pretty simple. Continue you right jumping over all of the enemies. Get to the goal and proceed to the next level.

+-----+
| Yoshi Island 3 |
+-----+

Difficulty: Easy
Time: 300

This level is a climbing level. Start by climbing straight up. There are a whole bunch of swinging platforms. Which ever side you are on the platform will lean and swing that way. This level is pretty simple too. There are not too many enemies, just keep going over and jumping on multiple platforms.

+-----+
| Yoshi Island 4 |
+-----+

Difficulty: Easy
Time: 300

Finally, an underwater level. Well this level is not all the way underwater. It is actually mostly out of water but you can swim in the water throughout the whole level if you want. Jump from platform from platform, if you fall in the water, jump out of the water and back on the platforms watchout for the spike fish. Get to the end of this level and it is complete.

+-----+

| Iggy's Castle |

+-----+

Difficulty: Easy

Time: 400

This is the easiest castle. Just make it across and get to the end. You will then have to fight Iggy. He is simple just jump on top of him 3 times.

+-----+

| Donut Plains 1 |

+-----+

Difficulty: Easy

Time: 400

This level is pretty simple all in all. A new enemy is introduced and they are super koopas, which fly. You should see at least one in a group with a flashing cape. Jump on this guy to get a feather which you will get a cape. Now once at the end of the level, DO NOT GO THROUGH THE GOAL, instead you should see some squares that are empty. Run and fly upwards and you should go through a hole and land on a platform. Grab the key and put it in the key hole and you will get transfered to Donut Plains Secret 1.

+-----+

| Donut Plains Secret 1 |

+-----+

Difficulty: Medium

Time: 300

This level is totally underwater. Swim to the checkpoint and right after the checkpoint you should see a P switch. Do not step on this switch instead grab it and hold it. You should then see a keyhole and below it some brown blocks with a key below it. Now let go of the switch and step on it. The blocks will turn to coins and now go get the key and take it to the keyhole.

+-----+

| Donut Plains Secret House |

+-----+

Difficulty: Medium

Time: 400

This level is simple to get to the secret exit, but getting there is the hard part. There are a lot of ghosts to get by. Just jump over them and at the end climb up the vine of the flower and go through the door and prepare to fight a giant ghost named boo. You are on a lot of blocks. Grab the blocks and hit the ghost 3 times and you will be lead to star road.

+-----+

| Star Road 1 |

+-----+

Difficulty: Easy

Time: 300

This is the easiest level in the game no joke. You must spin and go through the blocks gathering coins and power ups on the way. Well stay on the right wall the whole way until you go through a little gap, which there will be a key and a key hole.

+-----+

| Star Road 2 |

+-----+

Difficulty: Medium

Time: 300

You must be pretty good at swimming because that is what the whole level is. Swim to the end where there is a pipe but swim under the pipe. Put the key in the keyhole and proceed to star road 3.

+-----+

| Star Road 3 |

+-----+

Difficulty: Easy

Time: 200

This is also pretty simple. Grab a block and toss it at the latiku above to kill him. Now jump up on this cloud but you must be quick to get up there before it disappears. Float upwards through the gap. Float till you see the "?" block. Hit it, take the key and go to the keyhole to the right and lets go on to Star Road 4.

+-----+

| Star Road 4 |

+-----+

Difficulty: Medium

Time: 300

You need to have a blue yoshi to do this trick. You need to go to platform that has two shells on it. Now eat the green shell. Under the platform. You should see a "?" block. Spit the shell at the block to open it. A key will come out and grab that key. Now walk across the blocks to the keyhole and go on to the next level.

+-----+

| Congragulations |

+-----+

Well you have now reach Bowser in 11 levels. Congragulations I must say. It pretty much ruins the fun of the game so I suggest you go back and play all the other levels because they are fun. I think the easiest doors are door 2 and door 5. They are pretty easy. Now once again Congragulations.
