## 1. Introduction

---

Allo! Welcome to the latest in my series of monopolistic in-depth FAQs for Square-Enix's Sword of Mana. Rather than being a simple cut and paste from my main FAQ, this time this guide will be more, well, in-depth. Co-authoring credit goes to Terence (whether he wants it or not ^\_^), since this guide wouldn't exist were it not for his supoib hacking and researching skills.

If you haven't guessed it yet, this FAQ deals solely with Seeds and Produce. First introduced in Legend of Mana, Fruits and Vegetables (Produce have a bit more limited role in Sword of Mana. Since Golems and Pets don't exist in Sword of Mana, gone are Produce's important functions of increasing a Pet's stats or, umm... painting your Golem a different color. Instead, Produce are used only for tempering Weapons and Armor. Thus, if you want your Weapons and Armor to be as strong as possible you'll need to spend plenty of time at the Hot House Orcard.

This guide will take you through all of the ins and outs of gathering Seeds and harvesting Produce. And if any of this seems confusing, then don't even try Legend of Mana ^\_^

~~~~~

2. Seeds and Produce for Dummies (An Introductory Guide)

Getting Started

~~~~~

In order to plant Seeds and harvest Produce, you must go to the Hot House Orchard. You'll first get access to the Hot House soon after you emerge from Batmo Cave early in the game. You're pretty much forced to buy Cactus Essence,

so don't be worried that you may miss out on it- just play the game as usual and you'll receive it eventually. Once you have Cactus Essence, approach a Pot and press A. You'll be asked if you want to build a Hot House. Say yes, and you'll enter the Hot House. Once inside, head up and go through the door on the right and you'll be in the Orchard. There are SIX locations where there are Pots for placing a Hot House:

1. Vinquette Vicinity
2. Mushboom Forest
3. Prickly Desert
4. Glass Desert (South)
5. Rocky Wilds
6. Mana Sanctuary

I will not give the exact locations because they're all easy to find. I would recommend using the one in Mushboom Forest, however, since it's right next to a Town (Wendel) and an Armory.

#### Gathering Seeds

~~~~~

Chances are you'll have Seeds before you even first enter a Hot House. There are essentially two ways to get Seeds. Chests in Dungeons/Towns may contain Seeds. However, those are in limited supply, so your best bet is to defeat Monsters in hopes that they will drop Chests that contain Seeds. For information on which Monsters drop which seeds, please refer to Chapter 3.

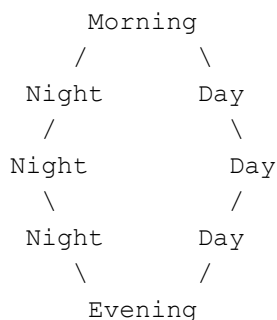

Planting Seeds

~~~~~

Once you have at least TWO Seeds, talk to Trent in the Hot House Orchard and he'll tell you to choose two seeds. The combination of Seeds that you give him, as well as the DAY on which you give him the Seeds affects the Produce that you get. To get the Day to change, you must move across "screens" until the Icon on the lower-left corresponds to what day you want.

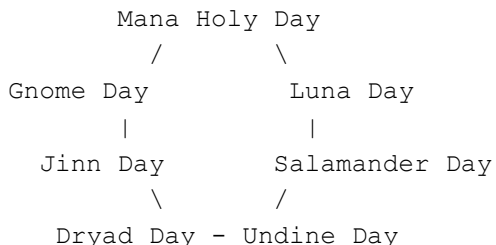

First, you must understand how time works in Sword of Mana. Each time you enter another screen (when the screen blacks out), time advances. You can tell what the time of day is by the coloring of the area. If the area looks light, then it's Day. If, on the other hand, it's dark, then it's Night. Morning (Sunrise/Dawn) looks brighter than Day, while Evening (Sunset/Dusk) gives the area an orange tint.

Time cycles (clockwise) as follows:

Each time you go through the cycle, the day changes.

The days cycle (clockwise) as follows:

There is often confusion regarding what Mana Holy Day is. Shade and Wisp do not get their own Day. Instead, one day of the week is designated a Holy Day (a Sabbath, if you will) in reverence for the Mana Goddess. The Icon for Mana Holy Day does not look like any of the Spirits. When in doubt, just remember that Mana Holy Day comes right after Gnome Day.

Again, the Day is very important in determining what Produce you receive, so make sure you understand how it works.

The results of planting different Seed combinations on different Days will be given in Chapter 4.

Note that you can give Trent a maximum of 8 pairs of Seeds at a time, which means you can get 8 Produce at a time.

#### Harvesting Produce

~~~~~

To make the Produce grow, just exit the Orchard (no need to exit the Hot House), then enter it again. Go up the ladder on the right to reach the scaffolding. You'll enter Battle Mode. Head up and "attack" the Produce to harvest it.

Using Produce

~~~~~

The main function of Produce is to increase your Weapon and Armor stats by tempering the Produce into them. Tempering is not within the scope of this FAQ however. For more information on Tempering, please see my upcoming Weapons/Armor FAQ or the Weapons/Armor Chapter in my main FAQ.

Produce does have a few other uses, however. You can give a Honey Onion and a Diceberry (plus Honey, which BeBes drop) to Clive for a Honey Elixir. Clive appears in the Topple General Store, Jadd Inn, and Lorimar Castle.

There is also a Quest in the Ishe Blacksmith, where a Dwarf will ask for some Produce. You'll get Dudbears Gold in return.

~~~~~

3. Gathering Seeds

Aside from finding them in Chests in Dungeons or Towns, the only other way to get Seeds is by finding them in Chests dropped by enemies. The following tables show which enemies drop which Seeds. For enemy locations, please refer to my upcoming Monster FAQ.

No. - Enemy Number (in Monster Album)
 Enemy Name - Monster's name
 % - Chances that a Chest dropped by the Monster will contain the Seed

~~~~~

Round

| No. | Enemy Name    | %   |
|-----|---------------|-----|
| 001 | Rabite        | 20% |

4. Seed Combinations (Produce Recipes)

The type of Produce that you get when you plant Seeds is based on the Seeds that you give Trent and the Day on which you give them. The following tables show every possible combination.

---

First Seed \

~~~~~\

+ Second Seed = Produce

First Seed - The first Seed you give to Trent.
Second Seed - The second Seed you give to Trent.
Produce - The resulting produce.

5. Produce

Vegetables

Vegetables are used to Temper Weapons only. They increase stats in the following way:

				Ele
	Pow	Dod	Hit	Pow
Lilipods				+1
Masked Potato			+1	

Spiny Carrot			+1		
Honey Onion		+1			
Cornflower				+1	+1
Dolphin Squash		+1	+1		
Cabbadillo			+1		+1
Conchurnip		+1		+1	
Needlettuce			+1	+1	
Whalamato		+1			+1
Orcaplant			~ See Note 1 ~		
Mush-in-a-Box			+1	+1	+1
Bumpkin		+1		+1	+1
Garlicrown		+1	+1		+1
Heart Mint		+1	+1	+1	
Spade Basil		+1	+1	+1	+1

Note 1:

Tempering with an Orcaplant will give you +1 in a random number of stats. Note that this does not mean it may give you +4 in a stat, but rather that it might give you +1 in only one stat, +1 in two stats, +1 in three stats, or +1 in all four stats.

Fruits

Fruits are used to Temper Armor only. They increase stats in the following way:

					Ele
		Pow	Dod	Hit	Pow
Bellgrapes					+1
Diceberry				+1	
Peach Puppy			+1		
Applesocks		+1			
Orange'opus				+1	+1
Citrisquid		+1	+1		
Springanana			+1		+1
Mangolephant		+1		+1	
Rocket Papaya			+1	+1	
Loquat-Shoes		+1			+1
Boarmelon			~ See Note 1 ~		
Pine o'Clock			+1	+1	+1
Rhinoloupe		+1		+1	+1
Kittypie		+1	+1		+1
Cherry Bombs		+1	+1	+1	
Fishy Fruit		+1	+1	+1	+1

Note 1:

Tempering with a Boarmelon will give you +1 in a random number of stats. Note that this does not mean it may give you +4 in a stat, but rather that it might give you +1 in only one stat, +1 in two stats, +1 in three stats, or +1 in all four stats.

6. Stupid Questions

---

1) Q. Are there any other ways to get Produce aside from planting Seeds?

A. Actually, yes. Citrisquids and Bumpkins are dropped by some enemies. You can also get Rhinoloupes or a Kittypie from a Quest.

2) Q. What are the changes to the Produce system from Legend of Mana?

A. No Golems and no Pets make Homer something something... Oh, wait. Since there is no Golem Creation or Pet Raising, Produce is now pretty much just used for Tempering, whereas they had little to do with Tempering in Legend of Mana.

While Sword of Mana has 16 different Vegetables and 16 different Fruits, Legend of Mana actually had 37 total Produce. The Produce missing in action are Dialaurel, Gold Clover, Mush-in-a-Box, Pear o'Heels, and Sweet Moai. The absence of the Dialaurel and Gold Clover means all four suits aren't represented (Heart Mint and Spade Basil remain). Also, while there IS a Mush-in-a-Box in Sword of Mana, it's really the Toadstoolshed. The real Mush-in-a-Box actually looked like a Mushroom Jack-in-a-Box.

Also, for some reason they decided to drop the punniness of Apricat and Squalphin, choosing instead to name them Kittypie and Dolphin Squash, respectively. The Squalphin change in particular is pretty vexing.
