I. Introduction

Hello, and welcome to my first FAQ ever! I was a little nervous about doing this but I got the confidence and started making this FAQ through example of many other FAQs I have seen. Well enough about me, lets go straight to the point. This FAQ is made for the locations of the crystals in normal or higher difficulty throughout the game. They are only for a password but what the heck. I hope you actually enjoy this FAQ.

II. Copyrights

This FAQ is Copyright 2005 3110684. Do not claim this FAQ as your own. That is violating copyright. Please do not distribute this FAQ in any other websites than the ones posted at the end of the document.

III. Version History

Version 1.0: FAQ started. Working on the locations and maybe some strategies to get some of the hard-to-get crystals.

IV. Characters

Leonardo- A calm, skillful turtle who is the unofficial leader of the turtles

and a master using his two katanas.

Raphael- A rash, but well trained turtle, he is quite strong and is prepared to save anyone in need. He uses his sais as a weapon.

Donatello-The most intelligent of the turtles, he is a mechanical wizard and uses a bo staff as a weapon.

Michelangelo-A very carefree turtle that almost always spends his time doing stuff, but when things get rough he is one tough turtle. He uses

V. Crystal Locations

Now for the locations of each characters separate crystals. They have 5 each, but they are all in the different acts. And no you will not find crystals in boss battles.

Leonardo's Crystals

Act 1 Crystals

In this act, you will have to take multiple paths to get all the crystals. In other words you will have to redo this stage two more times if you got one crystal in the first try.

Crystal 1:In the left-right-left path, fight a series of enemies. After killing them all, keep going and you should find it.

Crystal 2:In the right-left path, fight many series of enemies. After you reach the end of the path you should clearly see the crystal.

Crystal 3:In the right-right path, fight enemies until you get to a pit with a canister of life. Go near the border and enemies should come behind you. Kill them for the crystal.

Act 2 Crystals

There is only one crystal in this stage, and it is easy to get.

Crystal 1: When you see a series of 8 mouse robots, destroy them all and you will see the crystal all yours for the taking.

Act 3 Crystals

Again, one crystal in this stage, but the location is not that simple to find.

Crystal 1: In the third part of this stage, defeat two series of enemies. Do not keep going yet, instead double-jump to a path that is like in the sewers. Defeat all the enemies there and at the end of path you will see the crystal.

Raphael's Crystals

Act 1 Crystals

Three crystals in this stage, but luckily they are a piece of cake.

Crystal 1: In the first building you see, climb the left side to find a crystal. Take it.

Crystal 2: Same place only in the opposite side.

Crystal 3: Near the end you should in place with red bars. When you kill the first enemy set. Don't go down, instead climb the wall and you will find your crystal.

Act 3 Crystals

These crystals can be a little hard to get since you have to know what to do and when to do it.

Crystal 1: In the beginning of the stage stay in the top lane (don't worry about the cones) and you should a cone that has a crystal in it.

Crystal 2: Somewhat near the middle of the stage you will see a cone following a ramp. Don't touch the ramp, instead jump over it, hit the cone, and the crystal is yours.

Donatello's Crystals

Act 1 Crystals

There are only two here and they are somehow elusive.

Crystal 1: After reaching the end of the first part of the stage you should a pipe leading down through some wood. Take the pipe down and take the crystal you see.

Crystal 2: Near the end of the stage (after the sign that says Crazy Manny), you should a pipe that leads down. Take it. You will see some boxes. Do not break them. Instead get on top of them and use the high jump ability and you should get the crystal.

Act 2 Crystals

Only one, but it's kind of hard to get.

Crystal 1: When you to the part with a lot of lasers, try not get hit by them and pass through them. When you get to the top, you should see a lonely box. Run towards the wall and when you see that he is running, go towards the box and press the A button as if you were going to jump. You should spring to the box. Break the box by jumping and pressing B at the correct moment. You will see it after you break the box.

Act 3 Crystals

Arrgh! These crystals are a pain to get (especially if you are impatient). I somehow got them but it takes skill and luck to get them. Good luck getting these crystals.

Crystal 1: During early in the stage you should see a set of 8 missiles coming at you. Charge your shot COMPLETELY because I you just fire one at a time they will likely "fly" away and will miss your chance the crystal.

Crystal 2: Same thing only near the end of the stage.

Michelangelo's Crystals

Act 1 Crystals

These two crystals are elusive but I'll point out the location for them.

Crystal 1: When you get to the broken train, you will see a pillar. Double-jump to get your crystal.

Crystal 2: Near the end of the stage you will see many pits and one of them has the crystal you need. Be careful because at the bottom of the pits electricity will rush through, though.

Act 2 Crystals

The crystals here are easy but their location is not exact.

Crystal 1: During some part of the stage you will see the crystal on the top part of the pipe or tunnel. Use the B button to execute an ability that lets you get the crystal. Don't do it TOO early, though because if you do you will go down again and you will not get the crystal.

Crystal 2: Same thing only this time it is somewhere near the end of the stage.

Act 3 Crystals

One easy crystal, coming at you.

Crystal 1: When you get to a part that lava falls, keep jumping until you see the crystal to your left. Just make sure the lava doesn't get you.

This concludes this version of my FAQ. I personally hope you find it useful.

Frequently Asked Questions

None at the moment. E-Mail them to me and here they will go!

Contact Me

This is my E-Mail address:

m_orellana63@hotmail.com

Rules about E-Mailing:

1. Don't send spam.
2. Don't send hate mail because I will delete it.
3. Don't bother sending chain letters. I'll delete them all.

Other than that you can send praise mail, questions about the FAQ, and any other things not mentioned above. Oh, and by any chance don't add me to your contact list.

This FAQ will only be posted on:
