-----The Most Frequently Asked Question-----

-Why won't the cow give me milk!?-

That is because first it has to give birth. If you just bought a cow, don't think it will give you milk right away. First you have to get it pregnant, and after a long year, your cow will give birth. After it gives birth, THEN it will give milk. Once it starts giving milk, 40 days later, it will stop giving milk. So make sure you get it pregnant again and continue this process. Don't ask me this question again, EVER!

-----I.Introduction-----

Harvest Moon is a simulation game where you are a farmer. You plant crops, take care of animals, and live your life. You get many choices in this game, you get to choose your wife, your kid's career, and how you want to live your life. The main goal is to keep the farm up and running, and make some cash. You might think that's boring, but that's when the game will suck you in. This is my first Harvest Moon FAQ but my second in total, I also have a Money FAQ on this game so make sure to check that one out! Remember, this FAQ is mainly on animals. So don't

come thinking your going to find an answer on crops or trees.

-----II.Updates-----

Version 2.1 - With the release of "Another Wonderful Life" I was just wanting to fix this and some mistakes here...

Version 2.0 - I just added one thing, I put one question I get a lot in my emails, so I decided to put it put where EVERYONE can see it right away, because those emails are annoying me, and I don't like getting annoyed.....

Version 1.9 - Fifth update, I just fixed a couple of errors, added some stuff, nothing that big though.

Version 1.8 - Fourth update, I deleted that one cow secret because I figured out it doesn't work :(Sorry for the inconvenience Other than that, I expanded the 'Fish' section, added the 'Wildlife' section, though it doesn't have that much info. I know I said this would be my last update, but I think I MIGHT update it again, not sure. I also added more things to a couple of sections. I'd also like to thank everyone who emailed me about their nice comments, THANKS!!!!

Version 1.5 - Third update, I fixed some more errors, and added a couple of little things to some sections. I put up the 'Fish' section, and added some more questions to the FAQ section.

Version 1.2 - Second update, Fixed a couple of errors, I put up 'My Review' and a small walkthrough of animals, like what to do and what not to do, and what's the best number of animals to have, but that is just what I do. Also added Credits and added a bit more things for FAQ and some animals.

Version 1.0 - First update, did pretty much almost everything. Sent it to gamefaqs, and hopefully they'll accept it.....

Future Updates

I plan to add more things as I find them out. This update may be my last one, but I might update it again if I have time. I also may make another FAQ for something else, but I don't know what to do yet anyways.

-----III.Basics-----

The basic controls are (Thanks to the booklet):

- Control Stick - Move character.
- Control Pad - Scroll through menus.
- L Button - Center camera behind character;
Changes page in status screen.
- R Button - Whistle for dog & horse;
changes page in status screen.
- Z Button - See view from character's perspective.

X Button - Toggle quick-item inventory.
Y Button - Function Button/Train Dog/Item Description.
A Button - Function Button/Talk/Open/Eat.
B Button - Function Button/Cancel Function.
C Stick - Move camera left or right.
Start/Select - Access status menu/Pause menu.

How to Fish

This is how to fish! First you get the fishing rod from Van. Then you go to a river or pond or something and cast out the hook. You have to be REALLY patient in fishing as fish won't bite as fast, unless you're really lucky. I take it that you set the Rumble function on, if not, do so. While you're fishing, you have to wait for a rumble, but DO NOT press (A) yet!! You will see more of those small bites for a while, but then the line will sink down. This is when timing is perfect. I like to count 1,2,3 in a moderate speed and then I press (A) Then keep on pressing (A), I don't know if you really have to do that, but I do that. Then you will catch the fish, and it will say what you caught. And that is how you catch fish. Remember, the keys are patience, and timing.

-----IV.My Review-----

Here is my review of the game, since I am too lazy to actually put it up in the review page, I might as well just do it here while I am at it.

Graphics (8.5)

What can you say about the graphics, well, they are not the best graphics in the world right now, many think that graphics are almost everything in the game. I disagree with that, did the first Zelda have awesome graphics? No....but was it a good game, hell yeah! What I'm trying to point is that gameplay in my opinion is what really matters. Anyways, the graphics in this game are pretty good, they have good shadowing, and I like how sometimes I'm watering my plants and suddenly the shadow changes to somewhere else in the field, meaning that the game actually has sun movement. The water is just perfect, there's a reflection, and it looks so real. The rest is pretty o.k. nothing bad and nothing too awesome.

Sound (7.5)

The music is the only thing not that good in the game, sometimes I find myself so annoyed that I actually go back home and change the tune, in the middle of my chores. The new system of adding tunes is pretty good, but those without the Gameboy Advance connections, you won't get as many tunes. The sounds are also good, like how your riding your horse and you could hear the 'thumps', it also changes depending on what you're stepping on. The animals also sound very real, adding some realism to the game.

Gameplay (10.0)

Natsume completely changed by adding various new things. Most don't like the new things, like watering crops twice, only 10 days per season, no festivals, and even the chapter system. I could go on and on but I will say that I do actually like this new style because they had to come up with something original or the game will be exactly the same like the

rest. In this game you find yourself more challenged with the clock, since chores might eat up most of your time. Taking care of the animals and crops late in the game might be a hassle since you will end up with like 7 cows, 8 chickens, and like 100 crops to water. Doing this alone might take up half your day, then you have to take care of your child, or give gifts to someone. If you have any extra time, if any at all, you could go fishing. To simple things down a bit, this game can be quite annoying, or boring if you play way too much, but in the end, it will all be worth it to say that you played 120+ Hours of one game!

Replay Value (10.0)

Yeah, this is where Harvest Moon rules! You might say that doing the same thing over, and over, and over could get boring, but I never find myself bored. I try to challenge myself in the game by doing things different every day of the game. One day I will just fish after I do some chores, the next day I will spend my time digging in the archeology place, and the next day I will give gifts to EVERYONE. Try to expand your game, don't do the same thing over and over. Continuing, Harvest Moon: A Wonderful Life has over 100 hours of gaming, a lot more for those who get really involved in this game! Enough said.....

Overall (9.0)

Harvest Moon is one the best, and original games of all time. I don't think they went wrong in this game. Most other games mess everything up by doing a quick sequel. Its is a totally different story with this game, we could've probably could have had a quick sequel, if it wasn't for those delays. But thank God we did have those delays, if there werent there probably would've only been only like 4 chapters ^_^ . Anyways, if you're looking for a game to take you of all the violence and shooting, and enter a peaceful habitat, Harvest Moon is the perfect game for you!

-----V.Cows-----

Cows are the the most productive animals out of all of them, you can milk them twice (If you milk them in the morning), but you won't just get one bottle of milk, you will get multiple, and it all depends on how much the cow likes you. Or if you can tell that the amount their giving is decreasing, that means that sooner or later their 40 day limit will end. My cow started giving only 2 bottles of milk by Fall, and stopped late Winter. There are also three sizes, Size B, (the cheapest) Size A, and Size S (the best!). You can also make butter/cheese once you buy a food processing room for 30,000G! But it is VERY costly, only get it if you think you will actually get a profit. Another addition is the Milking Room (60,000G!!!!) But this will allow the cows to milk themselves!

Taking care of it

To make the cow like you more, you should buy the brush early in the game, and brush it twice a day. Hug it with the (Y) Button, and talk to it. The size and quantity will most likely depend on how the cow likes you. The cow will stay in the barn, but it will get unhappy sometimes, so leave them outside, plus, you don't even have to feed them, they will feed themselves. But if you leave them inside, you have to feed them twice with the fodder that you can get if you cut the grass. If you buy some Good Fodder, the cows will

like you so much they might even produce S Milk! You could tell when the cows really like you when all of a sudden when you talk to them you will get happy sayings. Some are about their shiny coat, or their eyes, or stuff like that. Plus they will lick you, I barely found that out because that's what barely happened to my cow. When that happens, real soon you will get S Milk without the use of Good Fodder. So rejoice! So I suggest you leave them outside, unless your feeding them Good Fodder. Another thing you can do if you leave them outside is that you can wash them if they get near the large water bucket. Use your brush and press (Y) to wash them. But by the noise they make you can't tell if they like it or not ^_^ You can move the cows in and out faster buy ringing those bells that are buy the door inside the barn, and outside the barn.

!NOTE! DO NOT sell your milker because you won't be able to get one for a while or not at all. The only way to get it back is to use cheats. Besides, why would anyone want to sell their milker for very little G?

----- Giving Birth -----

One problem with cows is that they can only produce milk for 40 days after giving birth. You might be thinking, what kind of cow is that!? Anyways, if you think buying a cow and never making it give birth will make it give milk forever, your wrong. They ONLY give milk after they give birth. There are two methods you can use for you cow to become pregnant, you can buy Miracle Potion, or buy a bull. Then, once the cow is in a late stage during pregnancy, it will be isolated from the rest of the livestock with an isolation fence thats in the tool shed. Once the calf is born, it will be seperated and will have to be fed Mama's milk. You get that milk from the mother cow, and have to feed it to the calf. After a while, the cow will produce regular milk but you still might have to feed it to the calf. Then, you will have to feed it fodder, so make sure you pay lot's of attention to the calf. The type of calf you get will depend on what you breded, It has also been proven that what gender you get is random, so if you get a male and wanted a female, just restart the game and hope to get what you want!

---- Tips ----

According to Elissa Watters, " If you buy your cows at the end of your first year, right before you skip ahead 3 years, they're all grown up and ready to impregnante really quickly." Cow1.0 and AzNcOoLbOy85 confirm this.

----- Different Types -----

There are four types of cows, Normal Cows, Brown Cows, Marble Cows, and Star Cows, they each produce different types and sizes of milk. You can even breed different types, so try experimenting to see what you get!

----- Milk Prices -----

	-B-	-A-	-S-
Star Cow	270G	405G	540G
Marble Cow	115G	175G	225G
Brown Cow	115G	175G	225G
Normal Cow	75G	115G	150G

 Butter Prices

	-B-	-A-	-S-
Star Cow	300G	300G	300G
Marble Cow	225G	225G	300G
Brown Cow	225G	300G	300G
Normal Cow	225G	225G	300G

 Cheese Prices

	-B-	-A-	-S-
Star Cow	300G	300G	300G
Marble Cow	225G	225G	300G
Brown Cow	225G	300G	300G
Normal Cow	225G	225G	300G

 Cow Prices

	Female	Male
Star Cow	7000G	6000G
Marble Cow	5000G	4000G
Brown Cow	5000G	5000G
Normal Cow	4000G	3000G

 Miracle Potion

Star Cow	5500G
Marble Cow	3500G
Brown Cow	3500G
Normal Cow	2500G

 -----VI.Sheep-----

Sheep are really the least talked about animals. In fact, most people don't really have sheep! Why you ask, well, they can only give wool once a season! Not only that, they will take some space in your barn, so that means less cows for you. But you only have to feed them once a day, compared to cows, you save more fodder. Sheep give different amount of wool, even golden wool sometimes if they like you enough. Try washing their wool also to make them happier. I suggest you try using sheep and have some. They are only 1500G so buy like two, but you don't HAVE to, it's just my opinion.

All in all, sheep are not really that a big source to you income, although they are cheap. But you get exactly what you pay for, so how can you question that?

Sheep/Wool Prices

Sheep 1500G
Wool 75G
White Wool 115G
Golden Wool 600G

-----VII.Chickens-----

Now we get to my favorite animal, the chickens! Chickens are not really a big source of income either, but they can be if you have large numbers of them. They produce an egg once a day, or maybe not, depending if they are mad or not. There are two types of chickens, hens (female) and roosters (male). You could buy one or you could get a chick, by putting a fertilized egg in the incubator. You get a fertilized egg by having a rooster and a hen, sooner or later you will end up with a fertilized egg!

----- Taking care of it

To take care of the chickens, buy some chicken feed (Costs 150G) and put it in their feed box. It will last for a while depending on how many chickens you have. You can hold them and press (Y) to hug them (Like most other animals) and make them happier. Once you put them down they will also get happy. But be warned DO NOT "Show" any of the chicks or chickens to other chicks or chickens or they will get angry, very angry. You can also leave them outside, but if you do, I must warn you, you might have a tough time finding them if you have grass that hasn't been cut. If you leave your hen in the grass, it might lay an egg in that area, so good luck finding the egg, and chicken ^_^ Make sure not to leave them outside in the rain though, or they will get very unhappy. One new thing I figured out is that once you pick up a chicken that is on an egg, it will start to get kind of mad, but I don't it really does get mad because it doesn't show that mad sign. If you drop it somewhere else, another chicken or that one chicken would go back over the egg. So hurry to get the egg before you have to keep picking up the chickens again.

I also figured something out about chicken feed. If you have 5 chickens, the chicken feed will last for 3 - 3 1/2 days. If someone has info about other number of chickens, please tell me.

----- Reproduction

Once you do have an egg in the incubator, it will take 5 days for it to hatch and 5 days (or more) for the chick to grow into a hen or rooster. I said 'or more' because sometimes it would turn into an adult maybe in the afternoon, and if you didn't feed the chick it PROBABLY means that you MIGHT have to wait another day.

-TIP- If you want a female and not a rooster, I suggest you put the egg in the incubator early in the morning, so once you wake up, the egg will hatch right away 5 days later and you will get to know what it is. If it's a rooster, restart it and try again. It is proven that what you get is random, so keep on trying!

If anybody know exactly how many days it will take for a bag of chicken feed to be done with one chicken, please tell me. I would try for myself but I already have 5 chickens!

Chicken Prices

Female(Down Signal) 900G
Male(Horizontal Signal) 900G

Egg Prices

Normal 40G
Fertilized 50G
Golden 300G

(NOTE- Chickens only lay golden eggs once in a while, they also have to be real happy, so take care of 'em) Also, If you want to sell your golden eggs for even more, sell them to Van but refuse his price and he will give 360G! You can only do that 3 times that day though.)

-----VIII.Ducks-----

Now we go on to the start of 'new' animals. I will first list the requirements for the ducks, because if you make a mistake, you won't be able to have ducks for the rest of the game.

Requirements

- Had to build a Pond for 2,500G in the First Chapter (Or early second chapter)!
- Have to have six or fewer chickens.

That's pretty much it, but make sure you have those two requirements or else! Anyway, in order to get them, one day your wife will wake up, (2nd Chapter) and will say that ducks came to the pond. You will have a choice if you want to keep them or not, obviously you should say yes, unless you mysteriously hate ducks.....Anyways, the ducks will be able to produce eggs, fertilized eggs too! If you put them in the in the incubator, you can get more ducks. But if you sell all the ducks, there is no way you could get them back, unless you cheat.

Thought I post this here, there is a question many people have been asking me, and it's, "Why won't my ducks produce eggs?" And the answer is, they do, but they don't sit over it, the chickens are the ones who sit over it. So you think they aren't laying eggs, but really they are!

Selling Prices

Duck - 500G

-----IX.Goats-----

There is not much to say about goats, they are almost exactly the same like cows, same way to take care of them, feed them, and they even only give goat milk for a year. Also you cannot get them pregnant. The bad thing is that you cannot sell them, and once they stop giving milk, you really would want them to just die, and trust me, you will since you really need lot's of room for your barn, so I suggest you

only get them if you think you will not buy any more cows for a while.
In order to get goats, you will have to buy them from Van after
Chapter 1.

Cost

Goat 4000G
Goat Milk 115G
Goat Cheese 155G
Goat Butter 150G

Katie Mcquillis says "if you bargain with Van you can get it for 2000g"
So that means if you decline his offer of 4000G you can save up to 2000G!
But it may take a couple of tries before you get that good price of
2000G!

The best way to kill a goat according to Heart4Dawgs is to just hit
the goat with a sickle a bunch of times, never feed it, leave it in
the rain, and when it's sleeping keep waking it up. I don't mean
this on real animals, I mean this for the video game, this may seem
like animal cruelty but it's just a video game. If only the saying from
Seabiscuit, "You don't throw a whole life away just because it's
banged up a little" is true, but then again your Goat will not enter
any races against cows and win ^_^

-----X.Fish-----

(I'd like to really thank Kelly Blah for the info on the fish prices and
where to find them!)

Fish are going to be one your possible big moneymakers of your farm.
If you have a bunch of trees and are making a million a season then
you would be like, "There's fish?" because you would never bother
with money again. But if you're just beginning, then fish are going
to be some moneymakers for you. I take it that you know how to fish
already, if not, then go on up to the 'Basics' section.

The best place to catch fish are in the waterfall, for some 'Big'
versions of other fish, or by the mouth of the river (When it leaves
into the ocean) for some rare Sharshark which go for 600 or 1200 for
the bigger one! But in that part you also mainly get some VERY cheap
Colombo and Snelt.

The places you could fish are: The river, The pond on Turtle Swamp, the
pond by where the elves live, and by the waterfall.

If you want to make cheap fish actually valuable to you. And no you
don't need fertilizer like everything else! But once you cook about
20 dishes (more or less, it depends) you can cook some Hors D' Ouvres
foods. With this you can cook Sashimi, and the only ingredient is....
Any fish! This Sashimi's selling price starts at 150G! So that means
you could turn a 20G fish into a valuable, and likable from some
townspeople, 150G dinner!

Fish selling prices

Arna	400G	Caught in pond or the spring
Big Arna	800G	Caught in pond or the spring
Colombo	20G	Caught in pond, spring, lower river, swamp or middle river. "Pond or Downstream fish. Easy to catch!"
Big Colombo	40G	Caught in pond, spring, lower river, swamp or middle river."Pond or downstream fish. Doesn't taste good."
Huchep	90G	Caught in waterfall."Upper river fish. Good for meuniere set."
Big Huchep	170G	Caught in waterfall."Upper river fish. Plain flavor."
Nyamame	60G	Caught in waterfall."Upper river fish. Plain flavor."
Big Nyamame	130G	Caught in waterfall."Upper river fish. Good for meuniere set."
Rainbob	80G	Caught in swamp or lower river."Downstream or spring fish."
Big Rainbob	150G	Caught in swamp or lower river."Downstream or spring fish."
Sharshark	600G	Caught in lower or middle river."Downstream fish. Very rare!"
Big Sharshark	1200G	Caught in lower or middle river."Downstream fish. Rare with a unique flavor."
Snelt	30G	Caught in pond, spring, lower or middle river, or the swamp."Downstream or spring. The smallest fish."
Big Snelt	160G	Caught in pond, spring, lower or middle river, or the swamp. Downstream or spring fish."
Yamame	500G	Caught in waterfall."Upper river or pond fish. Pretty rare!"
Big Yamame	1000G	Caught in waterfall.

If you need more help with Fish, check the Fishing FAQ at Gamefaqs!

 -----XI.Wildlife-----

Sometimes you wonder, what are those animals that you see either in Turtle Swamp, or just around while your walking. Well, those are Mother Nature's precious wildlife animals. What can you do with them you ask, NOTHING! I think the reason they were put there was because it adds a more realism to a town. I mean, a town does have wildlife animals too right? Of course, anyways, the animals you can see are:

The Turtle (It's in Turtle Swamp, too obvious right?)
 Racoon (I sometimes see this in the back of Vesta's farm or it sometimes appears in other places.

Lizard (They appear around the waterfall and other places)

That's all I have so far, if anyone has any more info, or animals, place email them to me. Thanks!

 -----XII.Pets-----

Now we reach the fun animals. I call them fun because it doesn't matter if you really try hard to take care of them or feed them. But the most important pet you will receive is the all powerful !HORSE!

A.Horse

The horse is one of my favorite animals. The horse is a life saver, it cuts down time wasted from going to one place to another. It get's better, it will also cut down the fatigue you get from walking too much. And the only thing you have to do, is take care of it like any other animal, feed it, hug it, brush it, and talk to it. But it's better if you leave it outside, unless it's not raining. It only has to eat one fodder a day if you do leave it inside. The horse is also known as very lazy as it will go to sleep so many times, and so repetitive too! Everytime I get of him while I was riding him he goes to sleep right away! If you want to wake him up and not make him mad,

If you leave the horse anywhere in town and don't want to walk over there, you can magically bring him in one second by pressing (R) TWICE! If you press it once it will just call the dog. You get the horse from Takakura, who will call you during any old day in the first chapter. You will most likely get the horse early in summer or fall. Also, don't try selling it, because you can't, and besides, why would you?

B.Dog

The dog is an animal that will do NOTHING throughout pretty much the whole game. You get to choose in the beginning of the game between a floopy-eared one and a pointy-ear one. Some things that you can do is that you can feed it, and call it. You feed it by getting any kind of food (herbs, fish, crops, etc.) and putting it in the dog bowl right by his house. That's all you could pretty much do early in the game, but I think later you could do more. But one thing that it can do, but not that important, it can scare of Daryl (the crazy scientist) and the bum who will try to steal food. I came to wonder about the dog, and came to realize, it doesn't even appear in the booklet! (Except the cover ^_^)

Another thing I found out is that you can tell how good the dog likes you when it begins to follow you. He will follow you when you get near him and will start barking. But he needs to really like you, this barely started happening in the beginning of Chapter 2. If anyone knows anything about this please tell me. Thanks!

C.Others

There are other pets you can have, like a cat. You can get a cat by becoming really good friends with Romana, the old lady who lives in the mansion. She will come to your house one day in fall (during or after chapter 2) and give you one of her cats. These are the only ones you can get!!!!!!

-----XIII.Animal Walkthrough-----

This will be a pretty quick walkthrough to give you an idea of what to do throughout the game, like what is the best number of animals to have and what kind, and what is the best thing to do. I'll just have 2 days spanning first 2 chapters here to point out what you pretty

much what you have to do. (If you want full directions for the first full day, I suggest you read one of the other FAQs, because they are more detailed and specific.)

Day 1/Chapter 1

You begin the game like you'd normally do. Name yourself, get your dog, choose which dog, and you will talk to the townsfolk. Now you get to work. You start at 6:00 AM, which is really late for me, knowing how I wake up at around 3:00 AM almost everyday. Now go to your toolshed, take out all the tools you have, once you get the upgrades you can put the weaker ones away. Plant some crops, and water them. Now go outside the barn and press the button to call the cow out. Do this if it is not raining, if it's raining leave the cow inside. If it's inside make sure you put fodder on both food bins. Its better outside since you don't have to worry about feeding it since your just beginning. Now talk to it, hug it, and milk it using the milker. You might get 3 or 2 bottles but it doesn't matter. Now do whatever you want, go explore town, collect some flowers/herbs.

Now when it's 1:00 PM its time to get back to work. Most likely Van has set up his shop if he came, if he did then go talk to him and buy the brush and fishing pole. If you collected herbs and don't want them you could go ahead and sell them. But I suggest you keep them since you might need them for the energy. Now go to Vesta's farm (Use the map!) and buy tomatoes. Spend around 500G or 300G, then go ahead and plant them/water them. If it's under 4:00 PM go and fish for a while to get the feeling of fishing or give flowers to your future wife and friends.

Now when it's 4:00 PM, go back to your farm quickly and eat a herb if you want. Now go back to your cow. It probably ate already, anyways, talk to it, hug it, and BRUSH it, all this will defenitely make your cow much happier. Then milk it again and pick up the bottles. Now go to the bin (tall, white building) and put all your milk bottles in. Then go to the face of Takakura and order a female chicken, the one with the symbol pointing down. Buy some chicken food while your at it. Now you will be left with very little money. Grab your sickle and cut a bunch of fodder, keep on cutting 'till it reaches around 7:00 PM. You will sell most of this fodder for about 10G a piece so you could get some quick bucks. So when it reaches 7:00 PM go water your crops. When you finish (About 9:00 PM) you could go to sleep if you want and wake up around 3:00 AM, or go do something else. I suggest you go to sleep though. Ta da, that was your first day done! The achievements you should PLAN for this year(You don't have to) are:

- Have at least 2 cows, one pregnant.
- Have seed maker, buying it or by befriending Daryl.
- Have the pool.
- Plant a bunch of crops every season and learn many recipes.
- Have 5 chickens (mostly female and at least one male)
- Have some spare bucks, about 5,000G-10,000G.

(NOTE- Remember, you should plan something out like that, you can play any type of way you want, but I'm just saying it's best to have it like this to make things easier later on, but the main thing is to just have fun!)

Day 1/Chapter 2

OK, you should have gotten used to the controls and the map. Now it's morning, so do all of your chores, feed the animals, take care of them, etc. Then plant your crops and get ready for a whole new season. It should be around 7 or 8:00 AM when you finish. Once you do, go do your regular activities (collect flowers and herbs, dig in the site, fish, talk to your new wife, talk to your new child, befriend someone, buy pond if you didn't to make sure you get the ducks in the summer, etc. When you finish, around 5:00 PM, go back to your farm, take care of all your animals, and water crops. Put everything in dairy bin and go to sleep if you want.

And that is pretty much it for the rest of the game, it's something like that but many things will change adding more profit and loss to your income. Make sure you get the feeling of playing Harvest Moon.

Goals for Chapter 2

- Have 8 animals in barn (I suggest you have 4 cows, 2 bulls, 1 horse, and 1 sheep. The different types of cows and bulls depends on you.)
- Have 4 hens, 1 rooster, and 3 ducks.
- Have 3 or more banana trees growing, these are the money makers!!!
- Buy Food Processing Room.
- Become a really good chef, and try to get many new tools.
- Have fun!

-----XIV.FAQ-----

Now we reach the 'Frequently Asked Questions' If you have any questions about my Animal FAQ email me at neofans1@yahoo.com Any questions not about my FAQ WILL BE deleted. I will like to all the people who take the time to ask questions, although it's impossible for me to answer all of them, I can answer some. I did get most of these questions from emails from people. Thanks for asking questions everybody?

-How many times do I feed my animals?-

It depends, you feed the cows twice a day, chickens feed themselves with the chicken feed, or they can all feed themselves if you leave them outside.

-There are two cow bins, so I fill both, twice per day?-

No, you only need to put fodder in the two spaces and then leave it like that until the next day. If you want, put one fodder in one space, and later put another one in the same day, but I recommend the first method.

-How many times can I milk my cow?-

Twice a day if you milk it once in the morning and once afternoon or nighttime. If you try to milk it straight after you just milked it, it will get really mad.

-Can I order more than one animal a day?-

No, period!

-Which are the best animals, moneywise?-

The best animals to have are the cows, they produce milk twice a day

and maybe even 3 to 4 bottles per milking. So you could end up with 6 to 8 bottles in the end of the day! Second comes chickens, goats should come next but since you can't sell them, you will pretty much almost have them forever, so that pretty much drags it down to the bottom.

-Goats, why do I hate them so much?-

Hey, you're not alone, everybody hates the goats because you cannot sell them, they're a ripoff of cows, they can't get pregnant by any way, and they are not easy to kill of, (trust me I tried) so don't get them at all! (That's my opinion though...)

-For pregnancy, what is the best thing to do, bull or miracle potion?-

It depends, if you want to experiment, try breeding different types of cows, like a normal cow and star cow, brown and star, etc. But the bad thing is that bulls will take one space of your barn, but if you don't care go ahead and buy a bull. If you don't want a bull, just buy a miracle potion. But I suggest to buy a bull, it's more fun to have more animals!

-About how long does it take a goat to die?-

Well, it depends on how hard you torture it. The best way to get rid of it is to leave it inside, not feed it, and when it rains leave it outside. Milk it when it doesn't want to, and always wake it up the hard way when it's sleeping. Sounds harsh, doesn't it?

-How many animals can I have?-

8 in the barn, which includes the horse so pretty much just 7. You can have any combination of cows, sheep, bulls, and goats. You could also have 8 (I think) in the chicken coop, you can have any combination of chicks, hens, roosters, and ducks.

-How come I didn't get my ducks!?-

That is either because of three reasons. One, you didn't have the pond. Two, you don't have room in your chicken coop, or three, you have to be more patient and wait a while. Patience.....

-How many times can I impregnate a cow?-

As many times as you want.

-How can you tell a duckling from a chick?-

It is very easy to tell them apart, all you have to is look at their beak. The duckling has a longer beak than the average chick. Not only that, the three Harvest Sprites will tell what it is in the first place! So read carefully.

-Is there a horse race festival?-

From what I have heard, no.

-Why won't the cow give me milk!?-

Because it hasn't had a baby yet, get it pregnant first!

-My horse is so lazy, he always goes to sleep, and I'm afraid that

if I wake him up he will get mad, what should I do?-

I know the horse is lazy, but the best way to wake him up is to 'Ride' him, I find that he doesn't get mad if you do that before even waking up.

-What are those turtles/lizards I see?-

You can't get them....PERIOD!!!

-Why won't my duck produce any eggs?-

I think this is because you either have to be patient with them and let them grow a bit or you may need more room. Meaning if you already have 8 chickens/ducks you have to get rid of one and keep it that way to let them grow eggs. But it is just my theory, I need to look further into this.....

-How many cows can I have pregnant at a time?-

Once one cow is pregnant, you must wait at least 10 days to have a different cow pregnant.

-I found some of your info wrong, what should I do?

Well if I do have something wrong you should email me and tell me what I did wrong. It helps a lot, trust me!

-I have a question, should I email you?-

First check all over my FAQ and if you're sure it's not there, then email me. I'm getting lots of questions with the answers already being here.

-My barn is full, what should I do?-

Well, the first thing you should consider is selling of all the animals you don't need or use anymore like bulls. Or think about killing of the all hated goats. You could also sell of some cows but if you sell cows that have parents, the parents will get mad/depressed. But it's your decision on what you want to sell. So think before you act.

-What is in that locked shed?-

Grrrr.....Never ask that question...ANYWHERE! Point is, nobody knows, so don't ask!

-What is this system of chickens laying duck eggs?-

Well, the chickens lay eggs, and because you have a female and male duck, there is a chance that that egg will become a duck or maybe a chicken, you can't really tell, so its all in luck..

-Can I steal all of your information?-

NO! Now read down.....

-----XVI.Credits-----

This is who I'd like to thank for helping me, even in some small things.

-God (For everything.....duh!)
-Natsume (For making the best game of all time!!!!!!)
-CJayC (For posting this FAQ up, yay it's my second)
-XTGEMINIMAN!!!
-Me (For writing this)
-These are the people who took the time and wrote to me about my errors.
Pegchoo, amharper1010, xander170, Raikogen90, Heart4Dawgs, FLAMEpenguin,
Katie Mcquillis, Elissa Watters, Kelly Blah. Cow1.0, and AzNcOoLbOy85

Now I end this classical by saying.....
