Contents:

- I. Introduction
- II. Version History
- III. Chauncey
- IV. Bogmire
- V. Boolousous
- VI. King Boo
- VII. Legal Info
- VIII. Credits

I. Introduction

=====

This FAQ is made to help you find and defeat the four bosses in Nintendo's amazing game called Luigi's Mansion. It covers everything related to the bosses extremely in-depth. (After all, this is an in-depth FAQ)

II. Version History

=====

This is the first version! Ya...

III. Chauncey

=====

Requirements: Just the Key

HP: 100

How to get there: After you get the key from who I think is her mother, you go across the hall to Chauncy's room. Use the Polturgust 3000 and suck on her horse. She will ask to play and start chasing you. Keep dodging her until you can suck up one of the balls behind her crib. Shoot it at her. She will whine about how mean grown-ups are and you will be transported to this area and become small.

Chauncey is a lot bigger than you and you can't just suck her up. Keep dodging

her crib attacks. Eventually, she will throw about six balls at you. When they stop moving, pick one up and throw it at her. Then, point the point the Polturgust 3000 at her and vacuum her up! You should get her in two of three tries. Congratulations! You have completed one quarter of the game!

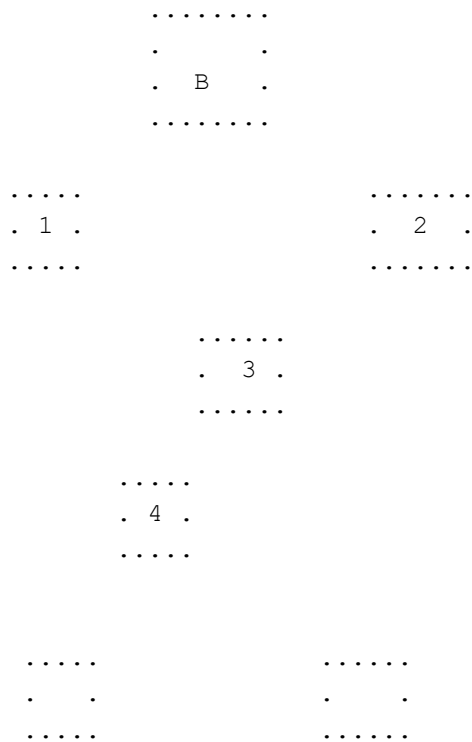

IV. Bogmire

=====

Requirements: Defeat the Dog ghost in the Boneyard

HP: 100

How to get there: After you defeat the dog ghost you can get to Bogmire, a pink ghost that is rather small. Look through the Game Boy Horror at the Dog house and press A. Get sucked into the Graveyard. Grave Stones 1, 2, and 3 have hearts (Grave stone 1 has a big heart.) Grave stone 4 will release 3 ghosts.

Defeat these skeleton ghosts as you would any regular ghost. Gravestone B has Bogmire in it. After defeating the three ghosts go there. Bogmire will appear and Luigi will get very scared. You will be transported somewhere else.

Suck up the black spirits and they will turn into black balls. If you start getting chased by a different spirit, let go! Anyways, point the black ball at Bogmire (the pink ghost) and shoot him! (Note: Bogmire will transport himself during the battle to four different sections of the arena.) After you have thrown a black ball at Bogmire, start sucking him up! You should be able to get him in two or three try's.

V. Boolousous

=====

Requirements: 20 Boos

HP: 15 Boos

How to get there: This one is pretty tough. Make sure you start the battle with 100 hearts. When you enter the Balcony go left. You will see 15 boo's in a circle. Walk up to them and press A. They will turn around and scare you. Then, they will put you in the center of there circle. Finally, you will be

transported to a place with two ice statues of unicorns on the sides.

There will be a huge boo. He is really those 15 boos you just saw put together. Suck him in and shoot him at the horn of the unicorn. Then, he will pop. There will be 15 boos. Get some ice element from the statue and shoot them at boos to freeze them and suck them up. Note that they will unfreeze and they will gather and form the big boo again. Any frozen boos will unfreeze at this point. The boo's get faster the more of them you kill. The big boo will also get smaller. After you defeat them you get 15 boos added to your collection.

VI. King Boo

Requirements: 40 Boos

HP: 500

How to get to him: Go to the Basement with 40 or more boos. Use the key you got from the painter on the door at the end of the hallway.

I recommend having all 50 boos at the start of this battle. You will get a lot of money. (It won't make him weaker though.) Be prepared for a battle 10 times harder than the one against Boolousous. Have 100 hearts or else you WILL die. Walk up to King Boo and he will talk a lot. When he is done he will transport you into a painting of Bowser. You will be back on the roof and against Bowser. King Boo is inside Bowser. You have to get him out and suck him in. Stay very far a way from him and he will use his spike attack. (Beware of the fire and suck attack. If you are too close he will do the try to suck you up or burn you with fire. If you are too far away he might jump up and try to land on top of you.) Suck in a spike and throw it at him when he has his head down. Let go if he jumps up. His head will fly off and attack you with ice. Try dodging this attack and sucking up King Boo. Do this until King Boo has less than 200 HP left. Then, he will put his head on backwards and start chasing you. Run away until he stops. Keep doing what you did before until he gets 0 HP. Enjoy the ending!

VII. Legal Info

=====

I appreciate anyone willing to help me with my FAQ.

Sasha@thegnn.com

I would like to thank:

God, My parents and friends, GameFAQs, and Nintendo.
