Question

How did you get these rosters without having to drop players to free agency and everything and having to duplicate players?

Answer

How to add players

- 1.create a team.
- 2.put any players on that team but make it only 18 players and 2 goalies.
- 3.while still picking rosters for your olympic team go to the nhl or other league you want to get the players from and put them in your created team.
- 4.then go to roster management and put those player on the team.

How to subtract players

- 1.go to roster management.
 - 2.put the players not on the team onto the created team.
- when you get lots of players like 30 on your created team remove the players you had from the duplicate on your created team.
- 3.if the created team gets full put some players on teams you dont use.
eg i dont use davos or any leauge like the del leauge so i put all the players on 1 or 2 teams.
