

Pokémon XD: Gale Of Darkness Pro Action Replay Codes

by MaverickPK

Updated on Aug 23, 2008

Pokemon XD Gale of Darkness Action Replay codes.
These are codes that I have made myself.
Codes I have not made have been credited to their
creators/finders.

This FAQ/List only to be hosted on:

Gamefaqs - www.gamefaqs.com

Update/Sep.05 2006- I have completed the Pokemon list,
now you can modify you're party all at once without
having to switch slots! :D

Update/Feb.27 2007- US slots 5-6 have been removed
and need to be redone. PAL Slot 4-6 have been added.
BETA PAL Gender codes have been added and need to be tested.

Update/Mar.2 2007- US Slot 5-6; PAL Slot 3 added. Party modifiers
re-completed. Item codes to come, PAL.

Update/Mar.22 2007- PAL Gender codes removed. Codes didn't work.

Update/Mar.22 2007- PAL Gender codes return. Found the actual
Gender values done by Ralf. PAL Item codes begin with Moon Stones
and Rare Candies. Thanks to banana for testing the PAL codes.

Update/Apr.6 2007- Right, so apparently the NTSC codes I've made
sofar need to be redone. Apparently the pointer used causes
'corruptions in innocuous places' (I personally think that
any AR code does this, not just because of a bad pointer)
I haven't had any complaints about the codes... and these
corruptions don't seem to majorly-affecting to anything.
But to make things properly, and not just making codes from
other regions of this game, I'm going to start hacking the game.
Actually hacking it, as in going into the game data, instead
of porting codes over from the japanese version.
This means a bigger chance at more diverse codes.
-Faster purification
-Natures
-Hopefully a Snag any pokemon code
-Suggested codes
But there is one problem. I need money for the tools to hack.
And I suffer from the 2 dreadful illness's...I'm canadian and broke.
My dollar doesn't exactly go too far. That means this little
project could take awhile. So there probably won't be any
new codes for a while.
(Someone suggested to me that I ask for donations, but I'm not

that desperate...yet. If you want to, fine, my PayPal email's up there, anything would help really, because I want to start hacking ASAP, and I know that there are people that want better codes. kap0688(at)(delete this)hotmail(dot)com...apparently I AM this desperate to ask for Paypal donations.)

CODE UPDATES:

PAL PC Item codes apparently only modify the 2nd slot, not the last one. I'll fix those eventually.

NTSC Codes added

Obedience Mew/Deoxys in Slot 1

Obedient Pokemon in Slot 1-6

Pokemon in slot 1 comes from (insert game)

Update/Apr.18 2007- Oi, well, I can't do much about codes, I will be fixing all US codes that used a bad pointer, I haven't figured out what corruptions occur except maybe the inability to trade some pokemon.

So I'll be fixing them with the better pointer. And I've given up trying to hack this game, for several reasons.

1. I don't have any clue how to.

2. I don't have any of the equipment.

3. I don't have money.

4. Thankfully, some other people are *sorta* trying to hack it.

So, I don't recommend using many of these codes until I fix them.

CODE UPDATES:

None.

Update/July.22 2007- I've gotten quite a few questions as to How to Use the Cheats... so i've added a FAQ section.

THIS UPDATE WASN'T ADDED TO GFAQS OR ANY OF THE HOSTED SITES

CODE UPDATES:

None.

Update/Apr.14 2008- I've added some more FAQs.

Many of the codes (if not all of them) are unchanged, sorry, but I haven't had much time to fix them (there's a lot to do). PAL users rejoice! Your codes don't NEED fixing! Huzzah. Thats alot of codes less for me to do! But alot of Items, Pokemon and etc for NA.

THIS UPDATE WASN'T ADDED TO GFAQS OR ANY OF THE HOSTED SITES

Update/Aug.23 2008- Added a few more FAQs.

DHC5-1YUV-5DUUV

YZTG-WK0T-979JD

Slot 1 Is an Obedient Mew

34PY-J5NM-CXP8Z

46MQ-F11A-ZYR90

YZTG-WK0T-979JD

This will allow Deoxys and Mew to be tradeable.

I successfully traded a Level 19 Deoxys for a Level 100 Jirachi.

FAQs [FAQS]

Q: How do I enter the cheats in the game?

A: You use a cheating device, obviously this is not in the game itself, Action Replay, look it up people.

Q: The code isn't working! Whats wrong?

A: Make sure you are entering it properly. O's and Zeros both work the same. If you are sure it's entered properly, E-mail me code and I'll see.

Q: The game freezes when I enter a battle! WTF!?

A: Turn off the codes before entering a battle, most of them are developed for immediate use. Use your code, verify that they work, save and deactivate them untill you need them again.

Q: I think using Action Replay or Gameshark codes is wrong.

Stop making them.

A: Look, you're entitled to your opinion, and you're not wrong, I don't entirely approve of it myself, but I'm not forcing anyone to use these at all, if you really want to complain, take it up with Datel or Madcatz.

Q: Can you make me a (insert code here) code?

A: Short answer, No. Long answer, Nooooooooooooooooooooooooooooo.

Longer answer, It's not exactly simple when it comes to making these codes, so stuff like a "Shiny" code, or a "Catch enemy Pokemon" code, or "Trainer Model" modifier codes can not be

done... by me, anyway.

A: This one has no question, but I've received A LOT of about it.
Do not send me an E-mail/IM, asking if you can have an updated
version of this codelist, this list is the most up to date.

Credit goes to... [THANK]

banana for testing some UK/PAL codes.

Ralf for figuring out the gender offsets/pointers/whatever.

O'Lungfish for picking out the original Bonsly Code and
Pokemon Slot 1 Modifier offset.

Whoever found out the Rare Candy in PC code. All Items in this list
were derived from that.

DougJustDoug for his EV codes, and the new pointer for the codes.

All codes made by me, unless otherwise noted.
