Where: Cipher Lab  
Moves: Shadow Blitz,Shadow Mist,Mud-Slap,Psybeam  
Item: None.

---

### Purification EEE

---

Opening the door to a Shadow Pokemon's heart is known as purification.

To purify a Shadow Pokemon first you must get the Heart Gauge to Zero

To drop the Heart Gauge do some of the following:

Use the Shadow Pokemon in battles

Use Scents on the Shadow Pokemon

Leave the Shadow Pokemon in the Purification Chamber

Call the Shadow Pokemon's name while it is Reverse Mode

Walk around with the Shadow Pokemon in your Party.

Then when you drop the heart gauge to zero do:

if the Shadow Pokemon is NOT in the Purification Chamber go to the Relic Stone in Agate Village and use its powers.

if the Shadow Pokemon IS in the Purification Chamber go to the HQ lab and step on the Purification's Circular Plate and press A then press A again to purify the Shadow Pokemon.

after the Shadow Pokemon is purified it will gain an exclusive ribbon and you can nickname it and do other things a Normal Pokemon can do.

Reverse Mode: while undergoing the purification process if you attack sometimes the Shadow Pokemon will go into Reverse Mode the side effects of Reverse mode are:

after each turn the Shadow Pokemon will be lightly damaged

if you try to use non-Shadow moves the Shadow Pokemon might disobey

to snap a Pokemon out of Reverse Mode use a Scent or call it's name in battle.

The Purificaton Chamber:

The purification chamber is a device located at the Pokemon HQ Lab that is used to purify Shadow Pokemon, to begin step on the circular plate at the Pokemon HQ Lab or go to any PC and select Purify Chamber then press A then select Edit set.

Then press Z to access your PC and Party Pokemon while on the Pokemon Storage System Screen press Z again to access your Party Pokemon, then select a Normal Pokemon and Press B and place it on a Pokeball symbol then select another Normal Pokemon and place it on a platform place up to four Normal Pokemon per set to switch sets press L or R, but for best results of Tempo (Tempo is a term for boosting the flow of a Shadow Pokemon) (Flow is a term for the Speed a Shadow Pokemon is purified) and flow select Pokemon that would be weak to the all the Pokemon in the set's Circle in other words if I had a Remoraidd on the 1st platform on the second platform it would be best to place a Rock/Ground or Rock/Water Pokemon on the bottom Platform such as Geodude or Corsola then on the next platform to the left place a

Pokemon like Moltres or Charizard then on the Northwest platform place a Pokemon like Paras,Parasect or Breloom a set like that would get maximum Tempo.

Then place a Shadow Pokemon on the Middle platform if the Shadow Pokemon for example was a Tangela press A on the Tangela and hit A on Rotate with the Imaginary set above it would be best to point the Arrow at The Corsola or the Rock/Ground Type Pokemon after the Shadow Pokemon's Heart Gauge has dropped to Zero go to the Pokemon HQ lab and step on the circular plate and press A and the Shadow Pokemon will be purified. NOTE: at least 1 regular Pokemon must be in the set or a Purification Ceremony can't be performed.

How to purify Shadow Lugia:

first Maximize the Tempo of all 9 Chambers then place Lugia in one of them then Lugia will be Purified instantly after you press A in the Hologram screen.

There is no other way.

Credits GGG  
-----

I writ this guide all by myself.

I would like to thank Nintendo for such a great game.  
-----

Version History HHH  
-----

Version 0.75

The beggining of the guide.

Version 0.80.02

Corrected some Shadow Move Descriptions,corrected most grammar mistakes also added some Shadow Pokemon data and Purification Chamber data also adds Shadow Break to the Shadow Moves List.
