You can call me Cromis, and reach me at

Please note:

NO asking for advice. I'm not trying to be rude. It's just that I stink at this game, so sending me emails asking for help is a waste of your time and mine! :P

YES please send me your thanks and accolades! It may even get me to put more tricks in!

YES corrections are welcome. Don't ask me to correct capitalization, though. I didn't even try to get it right.

YES feel free to send me uber trick combinations. I may never get there to figure them out on my own!

(2) INTRODUCTION

I was surprised that no hard-core gamer had done one of these, so I decided it was time for me to do my part for the lame gamers of the world like me who rely on FAQs instead of figuring it out for themselves! This is simply a listing of the basic moves in each character's trick book, and the control combinations that give them. Perhaps later I'll add the rest of the

ubertricks for each character. Note: to do the ubertricks in each character's trick book, you need to be on that character's "default," or favorite type of board, as listed below his/her name in the move list section.

(3) CONTROLLER KEY EXPLANATION

Most of the controls are pretty obvious. For the "+" key on the left of the control pad, I used the following symbols:

< push left on the + key
> push right on the + key
^ push up on the + key
V push down on the + key
(pretty straight-forward, eh?)

(6) HINTS AND TIPS

Just a few items I've found helpful:

A great non-uber jump to get points and boost bar - V + < L R Z + B
Use the control stick near the end of a jump to get a little extra spin.
Use the character's favorite board so that you can do their "signature uber."
