3. Introduction

Welcome to my FAQ devoted to the completing the monster list of Tales of Symphonia! The purpose of this FAQ is to compile a list of all the information available in the Monster List in the game. Why is this useful? Well, it's good for people who want to complete their monster list and it's also a good

place to look up monster info when you can't access the list in the game (like during battles).

If you want to search for a specific number monster, make sure you include "No." followed by a space before the number" (ex. No. 34)

Note: The stats of the monsters in this FAQ correspond to the stats of the monsters in normal mode.

Note: When scanning, use Raine if possible, she is the only one who can find the location stat of a monster.

If you have any questions, comments, suggestions or corrections, please send them to r_mage@hotmail.com I will try my best to answer them, but don't feel disappointed if I don't answer, I can be busy sometimes [either that or your incessant spam is driving me insane]. Please include at least the words "ToS Monster List" in the title so I don't ignore it or delete it by accident. Also make sure that you have your battle rank setting on normal when you view the monster list and provide information.
