1. Introduction
=====

I made this FAQ in my spare time to explain Ultimate Attack Spells and their effects and damage. This is also my first FAQ. I used practice mode to study the spells and find out how much damage they cause. Note that this FAQ is for the American version of the game.

Final Version- Made a few minor changes, but I feel there is nothing left to add.

3. What is an Ultimate Spell?
=====

An Ultimate spell is a Mamodo痴 strongest spell accessed by pressing the L button when your partner gauge is full. A cutscene will play and your spell will be used. You can use a shield to lower the damage caused by the spell, at the cost of all of your spell energy. If two Ultimate spells are used at the same time, both Ultimate spells will clash. Both players must continue to mash the A button. The player who presses the A button the most will have their Ultimate spell go through the opponent痴.
