This FAQ was written for Mega Bomberman for the Sega Genesis. There are two modes of play in this game. The Normal Game which consists of 6 Areas, each with numerous stages. In each Areas section I've listed the enemies and power-ups found in each respective stage. The quantity of each enemy and power-up is also listed, as well as how many hits each enemy takes to defeat. There's also a Battle Mode, which is the multi-player mode where up to 4 Bombermen can fight against each other at once. There are 10 different stages to choose from and there's a nice feature that lets you change each Bomberman's appearance. The power-ups section lists all the power-ups and what they do. And lastly there's a passwords section where I've listed the passwords for every stage.
