

putting Knuckles in there messed up the background colors, so they had to scrap the idea. So instead they came up with this game to replace it. It can be kind of hard to get a hold of the original lock-on cartridge and Sonic 1 nowadays, but this game has been released in a few Sonic collections, the most current of those is Sonic Mega Collection for Gamecube and Sonic Mega Collection + for Xbox and Playstation 2. You have to unlock this game in Mega Collection in order to play it, play Sonic 1 and Sonic 3D Blast 20 times each and this game will appear in the main menu. Remember to press the three main Genesis buttons (A B and C) or the corresponding buttons on the system you are playing it on all at once in most versions of this game on the No Way? No Way! Screen. Then on the Get Blue Spheres! Screen, start is selected, press down so you can change the code which changes the level number, and press up to view the stage number. Pressing Genesis A, B or C or one of the corresponding buttons for your system will change the color of the star on the two spheres on the screen, blue means you will play the stage as Sonic, red is Knuckles. In game pressing forward does little more than start you early and corrects you if you are going backwards, other than that you can go turn left or right and you can also jump.

Get Blue Spheres! is like the Special Stages in the games Sonic 3 and Sonic and Knuckles (to make it easier, these two games will be abbreviated S3&K for now on, like it usually is in the Sonic community at large, Get Blue Spheres is abbreviated S1&K but to avoid confusion I will not use this abbreviation but instead use GBS.) and is pretty simple. You have to grab Blue Spheres, the number indicated on the upper left hand corner of the screen, avoid Red Spheres or you lose, plus there are rings that you grab, indicated at the upper right hand corner of the screen. If you get all the rings in the level then you get a perfect. There are also white bumper spheres that will bump you off of them and send you going backwards, and yellow spheres that will spring you forward about 5 places. The tricky part is that blue spheres turn into red spheres after you touch them, but if you can surround usually a rectangle or square group of blue spheres by red spheres, then all the spheres in that group turn into rings you also need to grab to make a perfect. Also tricky is the fact the level speeds up the longer you play it, at the end you are going so fast that it can be very hard to make tricky turns and avoid those red spheres, because of this it is a lot easier to just pass the level by grabbing all blue spheres than to try to get perfects. Remember you can only make simple turns, but you should get a hang of that pretty soon.

The differences between GBS and the S3&K special stages are few. In GBS the Ring counter starts with total number of rings and counts down to zero, while in S3&K the Ring counter starts at 0 and goes up for each ring you get. In S3&K 50 Rings will get you a continue, but in GBS you receive nothing. Sonic 3 lacks Yellow Spheres, Sonic and Knuckles has them in each stage, GBS is more variable in that respect, most levels having yellow spheres but some do not. You grab a Chaos Emerald at the end of the stage always, but in S3&K it actually "counts" for more but in GBS it's just sort of an end of stage indicator. The end of the stage in S3&K takes you back to the main game, in GBS you will get a screen with either Sonic or Knuckles surrounded by emeralds, and if you didn't get a perfect you will then get the code for the next level. A Perfect in S3&K will get you 500,000 points, enough for an extra life and getting all those rings means you would have gotten a continue. In GBS a perfect will get you a screen where you can see the difficulty of the level ranging from 1-13 and a cute animation with a bunch of little things appearing on the screen for each level, and then when you get to the next screen you will find that the game has skipped you ahead 10

approach them from or how they happened to be flipped. That is one of the reasons why I included "Practice Level" codes, so you can be familiar with one section and all the ways it could be flipped in an actual level. Sorry but sections 125-127 do not have valid practice levels, so I gave a different level that has one or more section that is different from the one illustrated, I had no choice.

If you are wondering why I chose the symbols that I did, it was to make the map easier to read. If it was just all letters, which is in fact the way I originally typed it, then it would be hard to look at. I did keep B to represent Blue Sphere, they stand out pretty well. The rest is just common sense the Rings are O because O looks like a ring, X for Red Sphere cause you don't want to touch them, @ for Yellow Sphere cause it looks springy and the Yellow Spheres look springy, \* for the White Spheres with stars cause well it's a star. The lines were inspired by Koji Nishio images and show which rectangle or occasionally other shape of spheres that can turn into rings.

Hopefully in the future I will include much more specific tips and comments for each section.

- B =Blue Sphere
- O =Ring
- X =Red Sphere
- @ =Yellow Spring Sphere
- \* =White Star Bumper Sphere

Lines around blue/red spheres indicate groups that can turn into rings.

3. Questions?:

~\*~\*~\*~\*~\*~\*~\*~\*~\*~\*~\*~\*~\*~\*~\*~\*

Got Questions? I will answer them if they are not stupid. And as I noted before, I will only answer questions relating to the FAQs, do not e-mail me and try to start a personal relationship or something, I will not respond to such e-mails.
