X-Men Game Script

by DinobotMaximized   Updated to v1.0 on Nov 2, 2005

This walkthrough was originally written for X-Men on the GENESIS, but the walkthrough is still applicable to the PC version of the game.

I. Introduction ********************************************************
*************************************************************************
In this FAQ I have typed up the dialogue and story related text that appears
in X-Men for the Sega Genesis. The text is as it appears in the game except
it's not all capitals.

*************************************************************************
II. Version History ****************************************************
*************************************************************************
1.0 - November 02, 2005

*************************************************************************
III. Script ************************************************************
*************************************************************************
*******************************************
*                  Prologue                *
*******************************************
Fearing the rising tide of anti-
mutant hysteria, Professor Charles
Xavier, a mutant telepath, formed
the X-Men to confront the fear
that mutants will enslave humanity.
It is Xavier's dream that mutants
will peacefully coexist with
humanity. The X-Men stand as
humanity's only defense against
powerful mutants, such as Magneto,
who do not share their dream and
insist that the only way mutants can
survive the persecution is by
forcefully taking their rightful
place as humanity's masters.

Training under the guise of a school
for gifted youngsters, the X-Men
learn to control their abilities in
```

the danger room. The danger room
incorporated both holograms and
machinery to simulate complex,
lifelike, battle scenarios and
prepares them for the day that they
will be needed to fight against
those who threaten their dream.

```
**********************************************
*                 Opening                    *
**********************************************
```
Magneto: Sometimes...
         You have to
         crush your
         enemies where
         they live!!!

```
**********************************************
*               Savage Land                  *
**********************************************
```
Gambit: Sacre bleu! Dis must be "Prof X
        special" simulation of the savage
        land. Let's have some fun, neh?

Nightcrawler: Vas!? Hmmm... Professor Xavier must
              be using the danger room's
              holographic projectors to simulate
              the savage land.

Wolverine: Charley is tryin' to pull a fast one
           simulating the savage land without
           a warnin'. Let's see what he's got
           in store for me!

Cyclops: Professor Xavier must be testing
         me with this surprise
         simulation of the savage land.

```
*********************
```
Juggernaut: Juggernaut will crush you!

```
*********************
```
Gambit: Ma belle Zaladane,
        shall we dance?!

Nightcrawler: Zaladane! Wunderbar!

Wolverine: Darlin', you're askin for it.

Cyclops: My optic blasts will take
         care of you, Zaladane.

```
*********************
```
Gambit: She was cute, but hard to get ahold
        of. Just like I like 'em.
        Victorious, I seem to be back in the
        normal danger room.

```
Nightcrawler: Herr Professor's simulation program
              is over, huh?

Wolverine: Over so soon? Chuck's version of
           Zaladane wasn't quite good enough.

Cyclops: The Professor had a good idea
         testing my skills without warning.
         Keeps me on my toes.

**********************************************
*               Shi'ar Empire                *
**********************************************
Gambit: Mon diue! Another simulation? Shi'ar
        this time, huh? Deja vu.

Nightcrawler: Another simulation? Alright then...
              Shi'ar es mein.

Wolverine: What's up with the surprise sims?!
           The Shi'ar empire...
           I know it all too well.

Cyclops: Another practice simulation?
         The Shi'ar empire, home of the
         Professor's consort, Lilandra.

*********************

Whichever X-Man: Deathbird?!

*********************

Whichever X-Man: Lilandra?! What's going on! Is this
                 a simulation or not?

Lilandra: No, (Whichever X-Man), and I'm sorry
          that I gave you no warning of these
          events. But I needed your help
          controlling my sister Deathbird. She
          was threatening my life to overtake
          the empire. But thanks to you, she
          won't be a threat for awhile. I
          apologize, and thank you. I'll
          teleport you back to earth.

Gambit: I'm confused and dis is starting to
        really hurt! Deathbird has always
        been a problem of sorts, neh?
        But dis is not right, Why would
        Lilandra not just ask the prof to
        have me help her?
        I need to find him and
        ask him about dis.

Nightcrawler: Mein gott! This is really confusing
              and really hurting! I know Deathbird
              has been a problem before.
              But why wouldn't Lilandra just ask
```

```
                    the Professor to have me help?

Wolverine: This is screwy, and painful. I
           believe Deathbird can be a problem,
           but why would Lilandra use me like
           that when all she had to do was hit
           up ole Chuck? I'll find him and ask.

Cyclops: Lilandra and the Professor have a
         good relationship, Deathbird or no.
         She should be able to just ask
         Xavier to have me help her.
         I need to find him and ask him.

**********************************************
*          Excalibur Lighthouse            *
**********************************************
Gambit: Sacre Bleu! This is crazy. The savage
        land, Shi'ar, Lilandra...
        Now Excalibur lighthouse!
        Something it wrong.

Professor X: You're right, Gambit.

Gambit: Professor!! Contacting me by
        psychic link, what's going on?

Professor X: I'm on to something,
             but I need more time.
             You need to be especially
             careful. Your life is in danger.
*****

Nightcrawler: Not again! This is crazy. The savage
              land, Shi'ar, Lilandra...
              and now the Excalibur lighthouse...
              something it wrong.

Professor X: You're right, Nightcrawler.

Nightcrawler: Herr Professor!! Psychic link!
              What's going on?

Professor X: I'm on to something,
             but I need more time.
             You need to be especially
             careful. Your life is in danger.

*****

Wolverine: I'll have to put this on the list of
           the many mind games that have been
           played on me. Savage land, Shi'ar,
           Lilandra's babble, now Excalibur.
           Something is not clicking.

Professor X: You're right, Wolverine.

Wolverine: Hi'ya Charley! Contacting me by
           psychic link! What's going on?
```

```
Professor X: I'm on to something,
             but I need more time.
             You need to be especially
             careful. Your life is in danger.

*****

Cyclops: This is getting really old. What
         does is all mean? Savage land,
         Shi'ar, Lilandra...
         and now Excalibur's lighthouse!
         Something is really wrong.

Professor X: You're right, Cyclops.

Cyclops: Professor!! Contacting me by
          psychic link, what's going on?

Professor X: I'm on to something,
             but I need more time.
             You need to be especially
             careful. Your life is in danger.

**********************
(As Gambit)
Juggernaut: Have we met before?

(As Nightcrawler)
Juggernaut: Deja vu!

(As Wolverine)
Juggernaut: Here we go again!

(As Cyclops)
Juggernaut: I thought I took care of you!

*********************

Apocalypse: I shall see if you
            are a worthy mutant!

*********************

Gambit: Bon jour Professor, I did as
        you asked, I stayed alive.

Nightcrawler: Herr Professor, I did as
               you asked, I stayed alive.

Wolverine: Prof X! I've stayed alive.

Cyclops: Xavier! I've stayed
         alive so far.

Professor X: I physically sense you
             are O.K. It's good to know.

Whichever X-Man: What's going on?
```

```
Professor X: Our danger room computers have been
             infected by a virus, taking control
             of the holographic projectors and
             increasing the pain threshold to the
             point of serious harm. With each
             program it gets worse and worse.
             The routine simulations have been
             turned into a deadly reality.
             I need a little more time to hack at
             the code and figure out a strategy.
             Until then you must persevere.
             Good luck, (whichever X-Man).

*********************************************
*              Future Earth                 *
*********************************************
Whichever X-Man: Future Earth, after the eradication
                 of mutantkind. A sentinel infested,
                 racist landscape. Let's hope I'm
                 not the next to go!

*********************

Whichever X-Man: Ahab!

Ahab: You will make great hounds!

*********************

Whichever X-Man: This is hurting! Please tell
                 me you've found something.

Professor X: Yes, the reason you keep coming back
             to the danger room after each time
             or space simulation is that you are
             defeating the program. It then has
             to take time to adjust itself to a
             more difficult simulation. I have
             found a way to defeat it. At the end
             of the program, you must disable and
             then completely reset the computer
             that controls the danger room.
             I will try to assist you.
             But you must be the one
             that resets the computer!

*********************************************
*              The Crunch                   *
*********************************************
Whichever X-Man: The crunch! The end of time!
                 Can't stand around!
                 Better find the way to defeat
                 this program before time runs out!

*********************

System reset
Virus program suspended
```

Code key required for complete
system reactivation

Back on the non-holographic world
at Professor Xavier's school
for gifted youngster

Forge: The computer has pinpointed asteroid
       M as the signal's origin. That's
       Magneto's fortress in space."

Storm: It's going to be difficult, but to
       prevent this from happening again we
       have to get the missing codes"

Psylocke: Sometimes, you have to crush
          your enemies where the live!"

Beast: All aboard, next stop Asteroid M!

```
**********************************************
*                 Asteroid M                 *
**********************************************
```
Whichever X-Man: Now to find Magneto!

```
**********************************************
*                   Ending                   *
**********************************************
```
Professor X: Magneto!

Magneto: Curse you Charles Xavier. Curse you
         and your dream. It has blinded you.
         You call is a vision, but hope has
         clouded your lenses and obscured
         your reality. Homo sapiens and homo
         sapiens superior - mutantkind - will
         never live in harmony. They are
         scared of us, Charles. Humans are
         frightened by our powers, and when
         fear and ignorance unite, their
         reaction is always to enslave or
         destroy what they don't understand.
         You want to help them see the light
         when all they want is to extinguish
         the flame. It is because of your
         dream, your impossible dream, of
         uniting water and flame that I must
         destroy your cause!

Professor X: No, Magneto. The water and the flame
             are one, a harmony of opposition.
             The fire of the sun evaporates water
             to bring rain, which floods the
             Earth only to sprout life with the
             help of the sun's rays. My X-Men are
             the sun. Through examples and unity
             we can overcome adversity and remake
             this world from our dreams. But
             because of mutants like you,
             Magneto, the dream I reach is

```
                    tainted in the human heart.

Magneto: Then kill me now.

Professor X: I will not. Only time will tell if
             my vision is any clearer than yours.
             Nevertheless, I am forced to destroy
             your computers to eradicate your
             virus once and for all! This battle
             is over.

Magneto: But the war will always rage.

Professor X: For what we choose to believe, we
             live and die for. We strive to
             better the world we were thrown
             into. We are....

             X-MEN
