1. Introduction

~~~~~

Having recently completed a shrine for Chaos World (a shrine is basically a FAQ with images covering every last aspect of a game), I decided to compile the enemy info in a neat little Bestiary. All the info here was gathered by me and me alone. The enemy names were gathered from the ROM (using a hex editor), and edited by me (I made them look prettier); the HP was gathered in my first playthrough; the EXP, gold, and locations of the enemies were gathered in my second playthrough. Feel free to visit my shrine, it's located at <http://www.rpgclassics.com>

All the info herin was gathered and copied by me, and me alone.

Because of the amount of time that was put into this guide, please don't rip me off and use this without my permission. If you want to use this guide on your site, please e-mail me and I'll think about it. As of now this guide is to be seen only at these sites:

lup.com  
gamefaqs.com  
gamerhelp.com  
mitchfrizzell.com  
neoseeker.com  
supercheats.com

All the info herin was gathered and copied by me, and me alone. Enjoy!

2. Monster List

~~~~~

It's worth the space to point a few things out. First of all, some of the enemies' data may be wrong, as most of the math was done in my head, while listening to music. Bosses might not give you gold, because they give you an item instead. If you feel I'm missing something, or something is wrong, please e-mail me.

This list is ordered alphabetically; here's a key to help you out a little:
