

Adventures in the Magic Kingdom is not a hard game, or a long one. It's not even that great of a game. Yet when I was young, this game was really cool for me. And therefore I'm writing this guide about it now... Strange how things work.

This guide is divided into the separate areas of the park. Each section contains a location of the ride, what type of area it is (platform...), and a description of what to do there.

If you are a webmaster and wish to post this on your web page, please email me first. And if you do post this FAQ on your site, please make an attempt to keep it up to date. There is nothing worse than getting emails from people who saw an old version asking about things that are already in the newer versions. Well, maybe there are worse things, but it IS annoying!

If the ASCII art above looks like crap, make sure your font is a FIXED WIDTH font, like COURIER (or Courier New), and that your right margin goes out at least 79 spaces.

What's New in 1.61:

~~~~~

Pretty sure the answer to "how many Mickey Mouse" cartoons is 119, but it could also be 118.

0. Introduction

---

The "point" of the game is to find the Golden Key so that Mickey can get his

parade started on time, and you have been selected to find the key. Aren't you lucky. The Golden Key is locked in the Castle, and to get into the castle you need 6 silver keys which are hidden in the Magic Kingdom, 5 on rides, and the last one you need to talk around for. On the rides you can gather Stars which you can spend on various helpful items, like 1 Ups or Invicibility.

Controls:

- A - Jump, Accelerate (autopia)
- B - Push, Attack, Brake (autopia)
- START - Pause
- SELECT - Options (spend star points)

---

## 1. Pirates of the Carribbean

---

Where: Located to the SW of the Castle.

Type: Platform

Time: 180 seconds

Pirates have seized control here and kidnapped 6 tourists! Oh no! First off, the only way to hurt the Pirates is to roll a barrel on them (B), so don't touch them! When a pirate is going to throw something at you, you can duck it (DOWN) or Jump Over it (A).

Walkthrough:

- \* Go right, avoid the pirate, and go up the ladder
- \* Get the STAR and jump onto the roof
- \* Avoid this pirate, and jump onto the next roof to the right and get the STAR
- \* Climb down the ladder avoid the Pirate, and push the barrel onto the Pirate
- \* Go right, jump to the next building and get the 2 STARS
- \* Continue right to free the Hostage
- \* Go down, right and onto the boat
- \* On the boat go right, get the 2 STARS and avoid the cannon fire
- \* Go right until you get to a chasm, walk as close to the edge as you can get and jump across. Keep going until you get across all the chasms and free the hostage.
- \* Go right, get the STAR and go down the ladder
- \* Go right, avoid the scorpion, and jump the chasm (once again, getting as close to the edge as you can) to free the hostage. Careful, that dead pirate throws money around (and it hurts).
- \* Jump again to the right, go all the way right Get the Candle, and go up the ladder.
- \* Go left, and up the ladder there.
- \* Jump onto the upper left platform to get the Hostage.
- \* Jump back down 1 level, run to the right, jump across and get the Hostage.
- \* Fall off the platform (don't jump, just fall) to light the fire. This also frees the sixth hostage, who gives you a Silver Key.

---

## 2. Haunted Mansion

---

Where: W of the Castle  
Type: Platform (w/weapons)  
Time: 160 seconds

You have a weapon this time, a candle, which you will find all over the mansion. The mansion itself isn't so tricky, it's the things in the mansion that make it hard. Try to kill anything that moves, except chairs, which you ride up levels and chandeliers which you can use to cross areas. When you get to the library don't fall off, or you will die! No walkthrough this time as there are no different paths that you can take, just be careful!

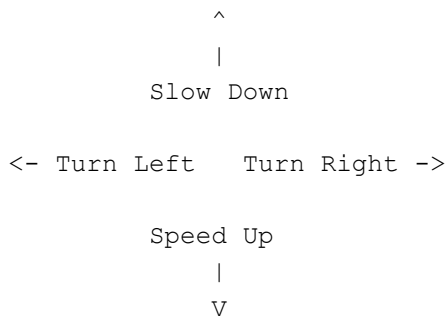

Boss: Ghost (8 hits)  
This guy is a little tricky, but luckily there are enough weapons here to supply you. Run away from him until you are about 3 lengths (how much space would 3 of you take up) away from him, then turn and fire, and continue to run. When you get close to a wall, wait for him to fly as low as he gets, then turn and jump over him. Beat him to get another Silver Key.

---

### 3. Big Thunder

---

Where: NW of the Castle  
Type: Runaway Mine Car  
Time: 70 seconds  
Special Controls:

You want to get to the SECOND station here, and there are 4 at the bottom. Which means that you will want to be on the left, but not on the far left. If you see a boulder ahead of you, gauge whether you need to slow down, or speed up to avoid it. Also try to avoid the gates, and don't use your brakes too much since you only have 70 seconds! There are too many ways to do this one, so there isn't a walkthrough here.

Note: If you have this game on emulator, this area is a little easier, simply pause the game and then use a Save State. If at any time you get killed, you can come back to that point and try it again!

Note: I have heard that the solution is sometimes random. I've always had it ask for the second gate, so cannot confirm.

---

### 4. Autopia

---

Where: E of the Castle

Type: Racer  
Time: 85 seconds

To accelerate here, press A and push and hold UP and press A again to get up to top speed. The course is tricky since you have to choose the right way to navigate, avoid obstacles, make the right jumps, and battle it out with the other cars. There is no walkthrough since it isn't that hard, but there are a few tips.

Tips:

- Always take the left path if you have 2 choices
- When you seem to have jumped off the course, you are jumping from platform to platform, so aim for the platforms!
- On the first Wooden Bridge (the left side, of course) after the platform jumping area, after the jump on the bridge, there will be an extension bridge (it appears and disappears)... pay attention and if it isn't extended use your Brakes (B).

---

## 5. Space Mountain

---

Where: SE of the Castle  
Type: Simon Says

You have to navigate your way to "Star F" here, completely by doing whatever the bottom panel tells you to do. If it says go UP then you press UP. If you see a Meteor you press A, if you see an Enemy Spaceship you press B. If it looks like it is flashing both left AND right, then do either. Also note the upper display says which star you are near. As the star counter gets closer to F it will get a little faster.

---

## 6. The Final Silver Key

---

Where: All around the Magic Kingdom  
Type: Trivia Game

This one you have to talk around the Magic Kingdom to get. Talk to one guy, who asks you a Disney Trivia question, then tells you to go somewhere to find someone, who tells you to go somewhere else.

Walkthrough:

- \* First Guy is right by Main Street and the Castle, he asks you a question. (see Answers below for the answer) Get it right and he sends you to the girl by Space Mountain.
- \* Girl by space mountain asks you a question, and sends you to the front of the Castle.
- \* Guy in front of the Castle asks you a question, and sends you to Small World
- \* Guy in front of Small World asks a question, then tells you that a Dog has the key by the Main Gate.
- \* Guy by the front gate asks a question, and tells you that the dog is by Tom Sawyer's Island (where the Riverboat is).
- \* Girl with dog asks you a question, but then the Dog runs off to Autopia.

\* Boy with dog asks you 2 questions, get them right to get the Last Key!
