PART II: WALKTHROUGH

PART A. THE WISE MEN WALKTHROUGH

Press B to select difficulty
-THE WISE MEN

You start out as a wise man, following the star to baby Jesus. Along the way, it is your mission to collect frankincense, myrrh, and gold. The camel you ride is able to spit at enemies, do this by pressing 'B.' This spitting is your main weapon and defense, aside from jumping.

LEVEL 1

Immediately, there will be three frankincense items to collect. Grab them and continue to scroll the screen to the Left. You will come to a box that shoots out lizards or alligators or something (maybe it's in the bible, I don't know.) Either hop over these enemies or spit at them, they should fall off the level. After this box is another frankincense, grab it. Keep going until you come to a platform with frankincense atop it. Grab the Frankincense but avoid the birds that fly in the air. Also, grab the frankincense in the air to the right. Progress forward and find three more frankincense items in a triangle, grab them. A few more steps is SCROLL 1. Correctly answer the question and continue, past a mound with more lizards. You will come to four pillars, each with Frankincense hovering above. Collect these, keep going, and you will come to a downward slope, followed by a cliff. In the area between these is an enemy hiding in the sand, be sure to jump over it. Jump up the small cliff and avoid the cactus that will shoot out of the ground. Past this cactus will be 5 Frankincense items and SCROLL 2. Get the question correct, keep walking, and the level is complete.

LEVEL 2

Start out by grabbing the fruit right in front of you. Travel down the hill and collect the 5 frankincense items at the bottom. Jump to the small platform, then hop over the moving cactus at an opportune time. Keep going, but avoid the boulder that will fall down at you. Stay on the ground and visit SCROLL 1, then hop onto the platform and jump to the other side. There will

be a porcupine shooting its quills at you, so be sure to jump over it/the quills. Progress to the bridge, collecting the 5 frankincense items along the way. Jump down to the lower level of the bridge, and progress until you see blocks above you. Get close enough to trigger each one, but be sure not to get too close. Walk to the end of the bridge, avoiding the cactus waiting for you, and then walk to SCROLL 2. Get the question right and keep going. Either avoid or spit on the birds that come your way. Jump up onto the first platform and then jump directly vertically to the platform above. Collect the 2 Frankincense items and visit SCROLL 3. Before jumping back down, hurl yourself off this platform to the right, and land on the small platform atop which SCROLL 4 resides. Jump platform to platform until you reach the last platform. Jump off this, holding Right on the D-Pad and land on the long platform below. Walk along this platform and jump, aiming for the Frankincense item that you see at the end. If you aim to hit this, you will successfully land on the following platform. Once again, run and jump at the last possible opportunity to reach the next platform. Once there, jump and grab the Frankincense, landing on the last platform. Now for the first boss battle. It's some dog-like thing, and it shoots projectiles out of its butt (sorry if I've offended some Christians). Hit it 3 times with your Camel's spit and he'll be no more. Keep walking and you're done with Level 2.

LEVEL 3

Start out by walking on the ground to SCROLL 1. Ignore the Myrrh floating above the walkway, hereafter referred to as "ramparts." You'll come back to these later. Walk along the brick path until you reach a hole in the wall. Above you will be a scorpion that jumps down and attacks. Either jump over it or spit at it. Walk past this wall to a platform on top of 2 pillars jump up, then take the stairs to the top of the rampart, grabbing the fruit along the way. Spit at the scorpion along the top of the rampart, and continue left. Jump across and grab those four Myrrh items from the beginning. Walk back to the stairs and the platform on pillars (defeat the Scorpion for a third time), and then walk to the right. Flying at you will be a red pillar, so jump over it or it will push you back. Keep walking until you come to a platform and a gap. Jump on the platform to trigger it, then read SCROLL 2. After the scroll, hop on the moving platform up and grab the Myrrh. Stay on this lower level and wait for the Scorpion that will be above you to jump to its doom. Then, jump up and grab the highest Myrrh. Jump down to the lower platform, using the Myrrh trail as a guide. Jump the gap and you come across SCROLL 3 on a pillar. Read it. Then stay on the ground and grab the Myrrh under the stairs. From here, spit on the bird ahead of you. It shouldn't know you're there. Jump across the gap to another set of stairs with Myrrh under them. Jump off these stairs to the right, then walk back to the left past the pillar to get the Myrrh. Then, continue to the right, grabbing both Myrrhs on the top and bottom. Jump up on the rampart and jump across the gap to the next rampart, grabbing the 3 Myrrh items above, then do it to the next rampart. Jump down to the next one, spit at the bird waiting for you, and grab the 2 Myrrh items. Jump across the next gap, but be careful as there is a scorpion waiting on the next rampart. Spit on it or jump over it and grab all 5 Myrrhs items, then continue to the right to complete the level.

LEVEL 4

Immediately, jump up and grab the fruit. Then walk along this platform and jump across the gap. Here is an apple, but you cannot eat it if you have eaten the fruit in the beginning. Wait until you die if you want to eat this apple. Walk up to SCROLL 1. Complete the scroll and jump up to grab all 5 Myrrh items. Be careful in this next part, as the platform you must jump onto is very narrow. Jump to the narrow platform and then up to the top of the gray brick structure. From here, jump to the next pillar, also very narrow. Atop

this pillar is another Myrrh. From this pillar, spit on the scorpion below, then jump to the platform where it was. From here, walk off the edge to the right (you'll land on another brick platform) and grab the 3 Myrrh items. Move to the right and hop down to another pillar with a Myrrh item hovering above it. Jump up to SCROLL 2 and spit on the bird. After the scroll, jump across the gap to the right and keep walking until you run into SCROLL 3 under some stairs. Complete the scroll and walk up the stairs, then walk across the platform and grab the Myrrh items below. Walk to the right and grab another Myrrh before (what I would call) large gray stairs. Walk up these stairs, and at the top (the third one) will be a scorpion which I advise you spit on. Next is a rather difficult part--a succession of 5 floating red pillars, which you must jump across. There's no real strategy to this, just don't fall. Once across, you will be atop another rampart and at the end of level 4.

LEVEL 5

Walk to the right until you come across SCROLL 1 on a platform above. Jump up and grab the scroll. Jump down to the next platform, but be careful, as there is a mouse that will run at you. I recommend jumping to avoid it, rather than spitting on it. Jump to the next platform, avoid both mice, and then grab both bags of gold. Jump to the next platform and you are confronted with a spikey thing. Jump over it, and then stay on the ground as the next one passes overhead. Once both have passed, jump up to the next platform. There will be 2 mice about midway, so jump over them, then grab the 2 bags of gold. Jump up to the next platform and walk until you come across SCROLL 2. Walk along, traveling down one platform, and then jump up to the next one, then down to a platform with a single mouse. Jump over the mouse and continue to the next platform. On this platform are two hopping red bug-like things. Spit on them both. Progress on this platform past one more red bug to the end of the level.

LEVEL 6

Walk up to SCROLL 1, then past it to a large gap with 2 platforms floating in the middle. Jump across these to the other side, where you will encounter 2 mice; jump over them. Walk along until you get to a small platform. Jump on it and it will carry you across a large gap. Jump off to the next platform as soon as is feasible, because this platform you're riding will drop down at the end of its path. Once here, jump on the next platform, another moving platform that will take you across to some stairs. Once again, this platform will drop down at the end, so get off of it in time. Walk down the stairs and jump over both mice that will rush you. Walk all the way to the right, ignoring the red platform, first visiting SCROLL 2. After the scroll, hop on that red platform and ride up. Hop off to the left as soon as you're able to (if you prefer, you can keep riding it, but it'll drop you there eventually anyway). Walk left until you hit a purple platform with 4 Gold bags hovering above it. Grab all the gold and progress left on the purple platform, avoiding both mice that will jump down from platforms above. Jump up to each of these platforms and up a third until you reach SCROLL 3. Walk along for a very long time until you cannot go any farther. You should see 2 platforms, one small lower one and one larger one above that. Hop up to this large one, then again to a small one above that. From here, keep jumping up these purple platforms, ignoring the isosceles triangle of boulders on the right. Walk along the purple platform, then continue as it turns into brick. Once to the edge, hop onto the floating boulder. Navigate these boulders progressively to the right until you reach another brick platform. Hop up the ledge and grab 4 bags of gold, then walk to the right to complete the level.

LEVEL 7.

Start out, let the hopping duck fall into the pit. Spitting on it doesn't seem to do anything, so just hop over it. Progress forward and dodge another duck, then hop down and grab the 5 Frankincense items, dodging 2 more ducks. Walk more to the right, and hop over the waterfall, being sure not to be hit by

the jumping fish. On the next platform is a duck that will charge right as you land, so jump straight up right away. Hop across to the floating boulder in the waterfall, dodging the flying fish. Hop to each progressively higher step until you reach the next grey platform and pick up SCROLL 1. Walk forward to SCROLL 2. Walk forward to SCROLL 3. Walk forward until you see a large ape creature that will start throwing things at you. The easiest way to defeat this enemy is to sit on the opposite ledge until he throws his stuff, then jump off towards him and spit on him. Quickly hop back onto your ledge, and repeat twice more until he is defeated. Walk past until you get to a series of platforms floating by a waterfall. Navigate these (best way is to jump and hit a direction in the beginning, then have the hang time and descent to adjust your aim). Once across to the grey platform, hit SCROLL 4. Hop from scroll 4's platform up and to the right to another grey platform, atop which SCROLL 5 sits. Walk forward to SCROLL 6. Progress forward, avoiding the flying fish that you will find. Hop down to SCROLL 7 and 5 Frankincense items. Walk to the right to complete the level.

LEVEL 8

Jump up and grab the apple. Hop up to SCROLL 1. Hop down to the next platform and be sure to avoid the spitting cobra. Time a hop to its platform so that you both avoid touching it and getting hit by its spit. Once on its platform, push the jar off the platform by running into it. Hop to the next platform and grab the 3 myrrh items. Walk forward, avoiding the hopping scorpion. Spit on it if you so desire. Also, you'll notice that under the purple rampart there is a banana, in case you didn't eat the apple in the beginning. Walk along this rampart until you hit SCROLL 2 (also notice the apple that will be above you). Jump across to the blue-ish brick structure and grab the 3 myrrh that float above the green platform. Hop from this green platform to the one up and to the right and hit SCROLL 3. Hop down from this green platform, avoiding the scorpion. Grab the 3 myrrh containers and keep going. You'll come to a gap with 2 pillars (each with a green block on top). Hop from pillar to pillar until you are across. Jump up and grab the 2 myrrh items and spit on both scorpions that will charge you. I am currently unaware as to how to get the last 2 scrolls, but perhaps in a later update. Keep walking through a trail of myrrh items until you reach the end of the level.

After completing level 8, you are greeted with the following message:

YOU HAVE REACHED BABY JESUS! Congratulations! You have won! But in order to live a victorious life, you need to give your heart to Jesus Christ. Refer to the end of our manual.

PART B. FLIGHT TO EGYPT

In progress.

PART C. JESUS AND THE TEMPLE

Oh no! Where is young Jesus?
I do not know! We must find him...

PART 1

Jump down, head to the right. Avoid the fish that hops out of the water and the crow that charges you. Don't take the waterfall down, jump at the appropriate time to hit SCROLL 1. After grabbing the scroll, progress to the right. Hop over the first waterfall and land in the patch of grass in between the two falls. Hop across so that you're in the river traveling to the right. Avoid both fish and charging crows (bees?). Once again hop over another waterfall and land on the platform with SCROLL 2. Hop onto the log platform after grabbing the scroll, and quickly hop to the next one, as it will fall quickly. Be careful jumping off of the second one, as there is a bee waiting to sting you and knock you off the level. The best way to avoid the bee is to allow your platform to fall a bit, then jump onto land, so you don't have as much over-land hangtime. Hop across 2 more log platforms, across a log bridge, and proceed to the end of the level.

PART 2

Wait for some platforms to start appearing, and hop across the initial waterfall to the other side of grass. Hop onto the first green platform, then the second, and then hop on top of this green platform and do the same thing you did before across this waterfall. On the other side, there will be three bees waiting to sting you, so don't get hit by them. After you trigger them, walk forward and grab SCROLL 1. Cross this next large waterfall just as you did the others (should be 3 platforms wide). And cross the next one (2 things wide). Hop up this next ledge (don't bother looking down, there's nothing there) and cross the next waterfall. This next part is really hard. Hop onto the first platform, then hop to the second and immediately hop to the other side. There are only 2 platforms, so you have to make quite a leap of faith (Pun intended). After this, all you have to do is keep walking and you'll reach the end.

PART 3

Okay, this level is just jumping off of waterfalls and choosing right or left. Start out, jump down the fall, head right. Then Left. At the next choice, go Right. Then Right again down a rather large fall. Then Left. Then right. Head right, hop over the water fall to the right, and walk away to complete the level. Sorry this isn't terribly descriptive, but it's the best I can do.

PART 4

Hop on the floating platforms up to SCROLL 1 above where you start initially. From here, hop back on and navigate your way up until you reach the very top, walk off to the right to complete the level. This is another level that is very hard to walk through, you just have to do it.

PART 5

Start out by hopping over the 2 spike pits. Walk down the slope, avoiding the spike pit in the middle. At the bottom, spikes will fall from the ceiling, so beware. Jump over the abyss, and be sure not to be hit by the spikes that fall on the other side of it. Walk up the next slope, hop over the 2 spike pits. Avoid the falling spikes that will be at the top of this slope. Walk forward to SCROLL 1. Walk to the right, and avoid the spikes that will fall right before the next slope. Travel down the next slope and avoid spikes that will fall at the base. Continue on and hop over this next abyss. Avoid the falling spikes, then hop up to the stair without any spikes. hop to the top of these stairs and grab SCROLL 2. Do this again, then hop across to the downward slope.

Still in progress, more in next update.

PART D. SCROLL QUESTIONS AND ANSWERS

Here is a list of the scrolls you may encounter. I will add to it if I find more (which is likely). In order to best search this list, since they are in no particular order, copy and paste it into a blank document and then use the control+F (command+F on Mac) function to search for keywords in the question you need to answer. If your question is not listed, I recommend using the bible site listed in the acknowledgments section of this walkthrough, searching for the passage as listed in the question.
