meh, list of contents.

- 1) Teams/Players
- 2) FAQ/Tips

phew, I didn't take three pages for an introduction!

i) Teams and Players

At this point in baseball history, there were only 26 teams in the league! The teams could only play other teams in their league, aside from the world series and exhibition games [which you can't do in this game]. A team consists of four infielders, three outfielders, a catcher and a pitcher. AL teams are also allowed to select a designated hitter.

To use a relief pitcher at any time, hold start and select while the pitcher is set up for a pitch.

Atlanta Braves - NL

Infielders

##	Bats	Avg.	HR	RBI
63	Right	.289	14	54

ii) FAQ & Tips

The best advice I can give for this game is to never end up fielding. Of course, as this is impossible, I should advise scoring many runs. Rather than trying to pelt the ball for a homerun every pitch, use the left and right key while swinging to get the ball to fall into an outfield gap.

Remember to press some direction on the control pad when pitching, otherwise you will just throw it straight ahead at a very hittable speed. Pressing down as you charge up the pitch makes it a fast ball. Pressing up makes it some sort of off speed pitch. You can also move the ball left or right with the directional keys of left or right.

Why in the world aren't there player names?
The Major League Baseball Players Association at the time this game was released did not allow players names to be put in games. However, the jersey numbers do correspond correctly with the players of the time.

UGH, is there ANY way to make outfielders move faster?
No, and it sucks.

Any glitches?
No useful ones, generally if a ball hits the homerun wall, it will count it as a homerun. You can also throw the ball into the stands on accident and then players can run into the crowd to get it... This is very weird when it happens but the crowd in foul territory seems to be fairly never ending.
