2. - Walkthrough

Level 1

Move to the right and you will see a gap above another gap. Fall down and hold the up button. Since you are holding onto the up button, you will grab onto the pipe above the vats of acid. Move all the way to the right on this path. Avoid the drips of acid and you will hit another platform. You will see a little shredder in between two conveyor belts. Land to the left of it and jump to kill the enemy to the right. Now move back to the higher platform and grab onto the pipe to get over the shredder.

Grab the health pack to the right of the ladder and then climb up it. Kill the two enemies at the top and move to the right. Kill that enemy at the end and grab the pipe. Move to the right while avoiding the drips of acid. Kill the

enemy to the right at the end of the pipe. Climb the ladder and kill the enemy at the top. Move to the right along the conveyor belts and kill the enemy at the next immobile platform.

Move to the right along the long conveyor belt and kill the two enemies while avoiding the acid dripping from the ceiling here. Fall down at the end of the conveyor belt and move to the right. Here you will face a tough boss. This boss cannot be killed by shooting him. If you keep shooting at him a certain amount of times, he will be pushed back and eventually fall backwards. Keep shooting him so he falls down to the next conveyor belt. Shoot him again until he falls to the lowest conveyor belt. Jump to the right of him and shoot at him until he falls off the conveyor belt and dies.

Level 2

Immediately grab the pipe to your right and climb across it. Move across the platforms to the right and kill the guards that block your path. Climb the ladder when you reach it. Jump so you could see the acid drip from the ceiling. Fall down the next ladder while avoiding the acid and continue to the right. Fall down the next gap and kill the guards to the left. Move to the left and go up the ladder. Grab the rocket launcher and go back to the right and up the ladder. Climb across the pipe and kill the enemy there.

Move all the way to the right and climb the ladder. Move to the left at the top of the ladder and climb up these steps. Avoid the drips of acid and kill the two guards on the platforms. Climb the ladder and continue to the left. Avoid the acid and grab the health if you need it. Continue to the left and jump over the small grinders while avoiding more acid. Climb up the ladder at the very end.

Move to the right up here and climb up the next ladder. Kill the two enemies there and climb the next ladder to the left. Kill the two enemies up here and move to the right for another ladder. Jump onto the platforms to the left when you can and kill the enemy up there. Grab the pipe at the top and move across to the right along the pipe if you need health. If not, just climb to the top of the ladder and kill the guard at the top. Climb the ladder to the right to get over a small wall. Climb down the ladder on the right or grab onto each pipe one by one as you fall to the bottom and kill the guards.

Climb this tall ladder but be very careful for the enemies to the left. Kill the enemies at the top and move to the right. Climb across the pipe and fall down the two ladders there. Move to the bottom left corner of this area while killing all enemies and avoiding the acid around you. Move to the right and jump over the gaps. Climb the ladder at the end and climb across the pipe. Go down the ladder to the right and go through the door to leave.

Jump across the small platforms to the right and kill the guard. Climb up the ladder at the end of these jumps. Make your way to the bottom of the area to the right by jumping down the platforms. Kill the guards that get in your way as you move to the bottom. When you hit the bottom, start moving to the left. Enter the door to the next area. Move to the left and shoot the computer. Shoot the top of the laser force field to get through. Kill the robot and continue to the left. Use the same strategy to get around the next force fields and robots.

Keep moving to the left and climb across the pipe. Climb the ladder at the end when you reach it. Climb across the pipe and the top and you will see two ladders. Climb down either one and go through the doorway at the bottom. Climb the ladder to the right and jump to the left when you hit the top. Go into the

door below you. Break through the force field to the right and kill the robots. Climb across the pipe to the right. Climb over all of the force fields on the ground and climb the ladder to the lower level.

Kill the robots as you make your way to the left at the next ladder. Keep going down two more ladders and climb across the pipe over the gap for the boss fight. This boss fight is a lot easier than the previous. You just have to shoot the robot's head. Duck below the shots it fires at you and shoot its head just a few times with the rocket launcher for an easy boss fight.

Level 3

Move to the right along these higher paths and kill the robots. Climb down the ladder to the far right and move down the platforms at the bottom. You will see two elevators in this area. Take the higher one to the top left corner. There are only miscellaneous items around the lower half. Climb the ladder to the top of this next elevator shaft and move to the right. Climb down to the bottom of this ladder and hang on. Jump onto the moving platform to the left when you see it. Fall onto another platform to the left and then to the bottom of the elevator shaft.

Kill the robots and keep climbing up the alternating ladders to reach the top. Climb across the pipe when you reach the top. Now you have to drop to the bottom of this area via the pipes. Move to the right at the bottom of this area and shoot the small green objects on the ceiling for a few nice drops. Climb the ladder at the end of this path and climb another ladder. At the top of the second ladder is a robot just like the first boss, except it's a lot easier to kill. Just shoot it a few times and it will fall to the right immediately. Climb a little higher for the next area of this stage.

Move to the left along the higher path and shoot the one robot in this path. Fall down the ladder to the left and then move to the right. Jump across these small platforms and go down the next ladder. Be careful as you continue to the left here. You can only jump on the lower platforms or you will be hurt on the force field. Fall down the gap with the pipe and move to the left. Climb that ladder and climb another ladder all the way to the top. Move to the left and kill the robot. Move down the next ladder all the way to the bottom and kill that robot.

Move all the way to the bottom here, when you hit the bottom, move to the right. Climb the ladder and move to the right of this room. Climb the next ladder and climb across the pipe to the right. Move to the very bottom right of this area for the next area. Climb the ladder to the right and shoot the robot off into the force fields to the left to finish this level off.

Level 4

Move to the left and kill the robot. These robots are tough so be careful. You will see some small moving platforms moving up and down. Go up the second moving platform that you come across. Go up the ladder to the right up here and grab the triple shot rocket launcher. This weapon is a lot more powerful and therefore more useful. Shoot the robot to the right so he falls down the ladder, now you could forget about him. Jump over the small gap and climb the next ladder up.

Climb up the next ladder and jump across the gaps to the left. Climb to the top

left of this area through a path of moving platforms and pipes. When you hit the top left area, start moving to the right and fall down to the bottom of this pit area. At the bottom, jump the gap and enter the door. Immediately kill the robot to the right and climb the ladder behind it. Keep climbing up this series of ladders. Move to the left when you hit the top and exit through the door.

Move to the right of this area. Kill a few robots and you will see some bricks sticking out of the ceiling. Those bricks will fall on you, you could either shoot them or avoid them. After the first few bricks, dogs will start attacking you at the same time. You will enter an elevator shaft. Climb up this area all the way to the top. Go through the door at the very top of this area. Move to the left and go down the elevator, go through the door at the bottom.

Go to the very bottom of this area and move to the right. Hop on the platform and you will move to the very top. Kill the robot and go through the door. Climb across the pipe to the left. Go through the door at the end of this pipe to enter the boss battle. Thankfully boss fights give you full health so this is an easy one. Let the robot move all the way to the left. Grab the pipe and move to the right, jump while on the pipe to move quicker and not get hurt as much. Get just to the right of the robot and drop down. Quickly unload onto the robot's backside to make quick work of it.

Level 5

This level isn't nearly as complicated, for now just move to the right. Kill all of the robots in your way. After a while, you will enter the next area. Move to the right side of this area while killing robots. Fall down the hole at the end when you reach it. Kill the robots down here and move to the right. Jump over the lava pits and you will see a pipe. Fall down the gap there and move to the right of this area. Go down the last ladder and move to the right.

Climb the pipe over the lava pit and go down the ladder at the very end. Keep going down every chance you get, when you hit the bottom move to the left. Climb the ladder to the top when you reach it and move down the platforms to the left. Go through the door in the very bottom left of this area. The boss moves quickly here. Just move to the opposite side of the screen every now and then and keep shooting him. With the rocket launcher, it only takes three shots so you should kill him easily before he kills you.

Level 6

Climb these ladders and kill the robot at the top. Climb across the pipe to the left and jump over the gap. Climb up to the top of the next ladder. Climb across the pipe over the next gap and climb that ladder. Jump to the right and jump across these small platforms while killing the robots to make your way to the top. Climb across the pipes to the left as you make your way to the far top left corner of this area. Go down the ladder there and fall down the gap to be under the pipe. Fall down one more platform to kill the robot.

Go down the next ladder to the left. Jump across the platforms to the right. Climb down the ladder at the end and jump onto the elevator there. Jump off to the left at the bottom of that elevator and move all the way to the left. You will see some platforms that move up and down. Hop onto the first one so you can make it to the top left corner. Climb the small ladder followed by another quick ladder. Jump across the small platforms to the right and up the next

ladder. Climb these next platforms and ladders to reach the top left corner here and you will exit the building.

Move all the way to the left and shoot the dogs that block your path. At the far end of this path, you will enter the boss battle of this stage. This boss fight isn't too tough, it's even easier if you try. It will shift side to side and drop some small bombs. Every now and then he will come down to zap you. Avoid the bombs and shoot him every chance you get. When he comes down to zap you, just run.

Level 7

Jump to the left and climb the next ladder that you see. Jump to the left side and climb another ladder to the top. By now you will notice the red flashing lights. These lights will guide your path, follow them until you see it split to two different light paths. Follow the new path to the right and you will see the path split again into a red and yellow path. Follow the yellow path to the right and destroy the generator it ends at. Move to the top left of this area and destroy the red generator. Keep going down each level one by one here and destroy all of the red generators.

When they are all destroyed move to the right and go to the same area as the yellow generator. Go down all of the ladders and make your way to the very bottom. You will see a green light path at the very bottom. Follow this light path and destroy the green generator. Climb the ladders so you get back to the bottom right corner and go through the door. Climb the ladder to the left and kill the robot at the top.

Climb across the pipe and continue to the right via the platforms. Fall down at the end and fall down the gap with the pipe. Move to the right on this platform. Don't jump on the higher blocks or you will die. Climb the pipe at the end and destroy the green generator. Climb the ladder to your right and fall down the first gap. Go down that ladder to your left. Move down and to your left and destroy the pink generator.

Move to the left and climb across a pipe. You will have to jump onto a small platform. There should be three platforms total there descending to the left. Get on the highest platform and just walk to the right and you will land on a block down there. Continue to the right and destroy the purple generator. Climb down the ladder to the right and grab the pipe. Move to the far left of this room and go down the ladder. Now move to the far right of this area. Go up some ladders until you reach the top.

Jump to the left and grab that ladder. Climb to the top of it and run off the edge to the left. Go up the platforms to the left. Climb the ladder when you reach it and fall off the other side of the platform, go through the door to your left. This boss is easy, shoot him until he explodes and then shoot each body part that is seperated. Each body part basically has the same attacks as your common enemies so it's not difficult. Move to the right for the same boss fight.

Level 8

Climb up to the top of this area. You will see the path split, take the path on the left and go through the door at the top. When you go through the door, immediately hold up to grab the pipe. Move to the left on the pipe and down the

ladder. Kill the robot and hop onto the moving platform. Go up the ladder to the right and go through the door at the top. Move to the left and kill the robots, skip the first door and go up the stairs. You will fall in a pit area. In there, move to the right and through the door.

Do your best to kill these robots. Hop on the platform and move to the left on it. Go up the ladder and jump onto the pipe. Move to the right up here and through the door. Climb to the top of this area and kill the two tanks. Go through the door and immediately kill the robot approaching you from the right. Move to the very top of this area through the path of ladders and enter the door at the very top.

Immediately move to the left of this area and hug the wall. Make sure to have your pistol equipped so you can be closer to the wall. Aim up and shoot the launcher on the left wall. It's an easy kill. Now kill the rocket launcher on the top and take your time with this one. Take your time killing the next rocket launchers and continue to the right. You have to stay on the pipe while you kill the next two rocket launchers and continue to the right when they are destroyed. Now you will have to face the boss. Shoot the rocket launcher at the top of the screen, now you need to shoot the orb to the right. Just take your time on the ladder until it is destroyed.

3. - Passwords

In the main menu, you will see a passwords section. In that section, you could input these passwords to get to each level.

Level 2 - GFL
Level 3 - GBG
Level 4 - RTH
Level 5 - SHL
Level 6 - RSC
Level 7 - SOM
Level 8 - JSB
