- 3. - Enemies
- 4. - Disclaimer

---

## 1. - Controls

---

D-Pad - Move  
A - Attack Below  
B - Shoot  
Start - Pause (It's a little delayed so be careful)  
Select - No Use

---

## 2. - Walkthrough

---

---

### Stage 1

---

You will start with a crab approaching from the left and then three small fish that will shoot straight to the left. You will then reach two more crabs on the ground along with three more small fish that shoot straight. After those fish will be four small fish in a line that will shoot in all directions so be careful when you approach them. You will then come across some jellyfish along with a flower and clam on the ground. From here, it starts to get a bit hectic. You will see some crabs on the small mound of rocks along with a crab approaching from the left with some jellyfish coming from the top and small fish from the far right. After that part it gets a little calm with another small fish and just crabs walking on the ground.

There will be a couple of small fish in a row here and some more crabs along the bottom. After several more small fish, you will finally come across a flower on the ground. You will then run into some stone fish. They won't move so they're easy to avoid. They have a lot of health so it may take a while to kill but you don't have to kill them. Avoid or kill them as you kill the small

fish that keep coming toward you. After you see a couple more small fish, there will be another small fish that shoots three shots to the left which is a bit different so be careful.

You will come across some more stone fish and crabs all in lines so you will have to destroy at least one of them to get by. As usually, there will still be jelly fish coming at you so be careful. After a couple of those fish, you will reach the boss. The boss is just a couple of eels that are overpowered and will swim around a lot. Try to target one at a time quickly so there won't be too many on the screen at once. Just avoid their lasers and shoot them until they are all dead to complete this stage.

---

## Stage 2

---

This round will start with the same small fish from last round. Just kill a couple for a very slow start. After those is a big fish but don't worry. He makes some awkward movements but won't shoot you. Either kill him with some extra shots or avoid him. There will also be some crabs on the ground there and some more small fish, just in different models but same movements and attacks, behind him. After some small fish will be a clam and then a flower with some more small fish. The next small fish make weird movements and different attacks so pay attention. You will see a lot more big and small fish along with crabs for a while.

After a couple of waves of enemies you will start to see a rare clam or flower. Other than that, it's mostly just big and small fish. You will eventually reach the boss of this stage. They are very similar to the boss from the first stage. There will be fewer fish but they are bigger so they are easier to hit. The only real difference is that their laser attacks are wider so you have to be more careful when you avoid their attacks.

---

## Stage 3

---

Right away, you will notice that there are rock formations along the bottom of the stage. You cannot get caught in front of the rocks when they go off the screen or you will die so immediately move to the top of the screen. You will see one small fish until another tall rock formation. There will then be a flower on the bottom and crab slightly higher. There will be a clam near the bottom and then it will start to get tricky at the next rock formation. You will see three big fish swimming towards you that you have to kill to get past the rock. Avoid the crab's bubbles and two flowers along the bottom just past the rocks.

You will see two more crabs on the bottom, be careful because there will be two small fish that are quick when they reach near the middle of the screen. Kill the small fish and advance for two more flowers and a crab. There will be a couple more crabs and flowers along with some clams for a bit until you reach some big fish on top of a rock formation. Some jelly fish will appear shortly too. From here on out, it's mostly just crabs and flowers that you have to worry about. There will be some small and big fish along with jelly fish when you reach tall rocks but that is about the only time you will come across any moving fish.

After a while you will finally reach the boss. This boss is different from the previous two. It is just a very large blowfish. It start in the top right corner and open its mouth. When it opens its mouth, it will shoot three shots

in a straight line and then swim towards the upper left corner. He will then swim to the lower right corner and do the same attack only to swim back to the upper right corner. Just avoid its attacks and attack it while you have a chance to defeat this boss.

---

#### Stage 4

---

The first enemy will appear right away, a small fish. Stay away from the bottom and top of the screen because some of the rocks will be walls and you can die if you are caught behind them. You will see a crab on the ground and then two rock fish. There will be a small fish and then some more crabs along with a jelly fish. Break open the clam for a power up. There will be two more rock fish and clam just after that clam. You will see some big fish shortly after those. The whole time, there will be some crabs on the ground.

When the area gets small again, you will see two more jelly fish. There will be a couple more rock fish here and clams for power ups. Fight off some big fish and a small fish next. There will be a couple of crabs, clams and rock fish for a bit along with the rare small fish until the stage opens up a bit. Once it opens up, some small fish will appear behind you and move to the right. Stay along the top to avoid them and kill them when you get behind them. Some more small fish will appear from the right.

The stage will open up and close again a bit. When that happens, you will see a lot more big fish with the occasional small fish and the usual crabs. After several more waves of enemies, you will finally reach the boss. This boss is a bit tougher, he will shoot bubbles in all directions and then swim towards you really quick. Avoid those shots and his charge and he will then shoot a couple shoots straight at you. After that, he will basically repeat but he is attacking a lot so you have to be quick with your attacks and avoiding his attacks.

---

#### Stage 5

---

There will be some small fish and crabs from the start. Kill them and get past the first rock in the middle. There will be some big fish and then a split in the path. The upper path will have one small fish and crab. The lower path will have a lot of small fish but might be worthwhile for you since there are a lot of clams down there. Pick whichever path you want until you reach the end of the split. There will be some more small fish floating towards you when it splits. As you approach the next split, two fish will appear from the left along the top of the screen. Kill them and kill the rest of the small fish that appear.

The next split in the path will have an equal amount of enemies in both paths but clams on the bottom so I suggest sticking to the bottom path for the power ups. At the end of the split, there will be a small fish from the left so be careful. Kill some more small fish along with rock fish. Kill some more small fish and the boss will appear at the next split in the path.

This boss is kind of strange. It won't move at all and its attacks will stay on the bottom half the screen. It will shoot a large plasma ball from each mouth to the left along the bottom, they may be slightly angled. The only attacks that seem to do any damage is if you hold your attack button for a couple of seconds and then let go, you'll shoot a fireball. Do this a couple of times until you destroy each head and then it can't attack. Now just do this a couple

of times to the body of the boss until he finally explodes and you complete the game.

~~~~~

### 3. - Enemies

---

~~~~~

CRAB                      The crabs will either sit on the sand or walk along it. They will try to hit you with their claws and every now and then will breath a bubble that can hurt you.

SMALL FISH                The small fish will float around slowly up and down while making their way to the left and shoot at you. Some will shoot in a straight line and others will shoot in all directions.

JELLY FISH                The jelly fish move slower than normal fish but will be able to shoot lightning bolts at you. These will be aimed towards you and can travel at angles.

FLOWER                    This ground enemy won't move but will shoot three shots upward from its stationary position. One shot will go straight upward, another will be angled to the top left and the last will be angled to the top right.

CLAM                      These don't seem to do anything other than hurt you if you are floating low on the screen. Most of the clams will drop power ups.

STONE FISH                The stone fish will float in one area and won't move. They have a lot of health but after a couple of power ups, they go down pretty easily. If you want, go ahead and kill them, if not, just avoid them.

BIG FISH                  The big fish doesn't really do anything special other than swim towards you in obscure patterns. They obviously take more shots to kill.
