_____/ 1 - A Little Reading _____

This is mainly a start to end walkthrough. I will not go into details about the enemies or the story. If anyone decides to make a serious FAQ, they have my permission to use this one as a base if they so choose too. Giving due credit of course.

_____/ 2 - Overview _____

The main point of this game is to go back in time and destroy the evil Gordess. But to do that you first need to collect 7 Secret Time Stones found on each level. Each stage contains a hidden dungeon (playable in a Zelda-like way) where you will find each of the 7 Secret Time Stones. To enter a dungeon first you need to fulfill certain conditions.

Each level also contains a warp that warps you further or backwards in the level (good to advance quicker in a level) and it also warps you back or forward in time. This is what you use to end a level and go to the next or previous level.

The catch in all of this is that in order to use the warps, buy items and survive in the dungeons, you need Time Pieces. You get them by defeating enemies while in shooter mode. They basically act as your score, your money and your energy (in dungeon mode only).

_____/ 3 - Items _____

[Secret Time Stone 2]. Exit and warp to 1301

Year 1301

??????????

Reach the end of the level and warp to the next area.

Year 1003

??????????

On this level, once you reach the huge ocean area, start shooting near the center of it. Eventually you will see your shots hitting something invisible. If you shoot it enough times, the screen will flash and you have again altered the future. Warp back to 1301.

Year 1301

??????????

Go through the stage until you see the dungeon entrance. From the start, go right, down and taken the up path there, bomb the tree on top to get [Oanesu Crest 3]. From here go down and then up on the other road, left and you'll be back on the start of the dungeon. From here go 3 left, up, 3 right and bomb the next to last tree on the right. Don't enter yet, first go 3 right and up. Bomb the tree here to be able to buy a Solar Lamp (buy at least 2, you won't need more). Leave the store and go down and 3 left back to the tree you bombed. Enter it and go all the way up, then all the way left, then down. Place a bomb in the center of the circle of trees to get [Secret Time Stone 3]. Warp to 1003.

Year 1003

??????????

Play the stage until you reach a woods area in which you will keep looping. The loop will be removed once you uncover the dungeon entrance in this level. For now there's nothing you can do, so take the warp you will see in that loop to access the warp to the Year 0820.

Year 0820

??????????

Play the stage until you see two rows of stones forming a path on the left side of the screen. At the end of these rows of stones you should see a bunch of stones forming a circle. Fly through the middle of that circle to uncover a hidden entrance. Inside you will get the [Dorera Statue]. Take the warp to the year 1301.

Year 1301

??????????

Find the dungeon entrance again, once inside go right, down and take the up path there, then right 2 times. Bomb the tree there and enter to have the person inside reveal the dungeon entrance to the year 0820. Exit and warp to the year 0820.

Year 0820

??????????

Play through the stage until you see the dungeon entrance. Enter it and go all the way up to see a building with a door on the first floor and a door on the second floor. Enter the first floor. From the start go 3 up, right, 3 down and left. Take the lower exit here and you'll be back outside on that 2nd floor door you saw earlier. Bomb on the left of it to get [Dungeon Crest 5]. Now go back inside and go right, all the way up, 2 left (note the dungeon gate), 2 down and right. Here you will see a monster, you can't defeat it unless you use a Solar Lamp. But considering how expensive they are, it's best if you don't use it.

Just take a hit from the monster and enter the door to get [Dungeon Crest 6].
Now go left, 2 up, left and enter the dungeon gate.

You will be inside a second dungeon. In here you can find a fountain, but that is not necessary now. Not only that, it is recommended you DON'T mess with it right now or it could glitch out the game and you will be stuck.

From the entrance go right, up, right, up, right, up, left, take the top right exit, down and bomb the right wall to get [Secret Time Stone 4]. Exit the dungeon and reach the end of the level to warp to...

Year 0316

??????????

Play through the level until you start to see a large shape on the floor that has one of the Oanesu Crest you've been collecting so far. The large shape looks like a devil or some sort of figure. Well, you're gonna hate me for this but, there's a hidden entrance BEFORE you see the large shape on the ground. So you're probably gonna have to loop the stage (or warp back to the start) to reach that spot again if you missed it. Once you reach back to the point BEFORE you see the large shape on the floor, start searching near the middle of the screen and you'll find a secret entrance. Inside you'll get [Oanesu Crest 4].

Once you get it, just go up a bit further to the large shape on the floor and the dungeon entrance will be open. Make sure you have bombs in stock. This dungeon also has a bunch of one way doors, so if you start to wander around you might go in circles.

Once inside, go up and bomb the wall on the right, enter the door and go up, right, 4 up, right, up, right, kill the creature here and place a bomb on the top wall. Enter this room and pass through the Solar Gate to turn white. Leave this room and go 3 left and up. In here there's another monster, ignore it and enter the door on the left (assuming you are still white). If there's no door, then go back to the Solar Gate, get the power again and go back. After entering the door, go left (there's a hidden shop here with cheap bombs), down, 3 left and up to get [Secret Time Stone 5]. Exit and reach the end of the level to warp to...

Year 0001

??????????

Play through the level and keep watching or those volcanoes in the middle of the screen. Shoot the 2nd or 3rd middle volcano a bunch of times, if done right the screen will flash and the dungeon entrance will appear further on. Make sure you have at least 9000 time pieces before you enter.

As a side note, this is the furthest back you can warp in the game. This is where the evil Gordess is. Reach the end of the stage, and you will face him. If you defeat him right now, WITHOUT having the 7 Secret Time Stones, you'll get a message in Japanese (probably says that you don't have everything yet) and you'll be warped back to the first stage (Year 2010). Obviously so you can look for the Secret Time Stones you are missing.

With that info out of the way, enter the dungeon you just opened. From the dungeon entrance go up. If you want, you can go left or right to reach a lot of stores in case you are missing some items. Don't worry, you won't get lost. So, after going up, you will find one of those invincible creatures, use one of the Solar Lamps you go to defeat him. Enter the gate on top and it will subtract 9000 time pieces (if you have a time pieces cheat, turn it off). Now go right, up, left, right (top exit), right, up and enter the door. You will notice this was a one way door since the way is now shut.

Go left, up, down (left exit), left, down and bomb the wall on the top left. Enter here and talk to the person. Now leave and go back to the one way door (up, right, up, down, right), you will see that the door is open again. Enter it and you will be in a different room. Go right, bomb the top wall, enter and fight the monster there, bomb the top wall again and enter to get [Secret Time Stone 6]. Exit the dungeon. Now your task is to get the last Secret Time Stone, which is in the year 1003, but first you have to go to...

Year 0820

??????????

Play through the level until you find the dungeon entrance. Go in. Go all the way up and enter the building. Now we're gonna find that fountain I mentioned earlier. Go all the way up, all the way right, all the way up, left and enter the dungeon gate. You will now be at the second dungeon. From the entrance go left, up, 2 left, up, left, right (top exit), up (enter the door to buy a Solar Lamp if you don't have one), down (right exit), down, right, right, up, left, up, right, up, 2 right, down, left and down. You should be in front of the fountain. Use your other Solar Lamp to dry it. Now go down (where the river was crossing), right, down, left to reach the exit. You'll be at the first dungeon, go right, 3 down, 2 left and all the way down to exit. Now warp to 1003, but first, make sure you have at least 9000 time pieces.

Year 1003

??????????

Play through the level until you see the dungeon entrance. Once inside the dungeon go left, left (bottom exit), 3 up and defeat the monster here. Step into the portal and it will subtract 9000 time pieces. Now go up, all the way to the right, down, left, down, down (right exit), right, 2 down, 2 left, up and right to get [Secret Time Stone 7]. Exit and now you can warp to the year 0001 and face Gordess, but first you need to know certain things.

Now that you have the 7 Secret Time Stones, you can defeat Gordess. Once you do, you'll be warped to the real last level of the game, the year 2137. You won't be able to warp back, so get everything you need before battling Gordess on the year 0001 because there are no stores on the shooter or dungeon levels. The last dungeon will also drain your time pieces, so make sure you have a TON in stock. Also, the game has 2 endings. These are the conditions to get them: If you go into 2137 and DO NOT enter the level's dungeon, you'll then proceed to the end of the level and face off with a base, the last boss. Destroy it and you'll get the bad ending. If you DO enter the dungeon and proceed to beat it, you'll get the good ending. However... to be able to even see the dungeon entrance you need an item, the Cleopatra mask. To find it you need to warp to the year 0820. So, after beating the last dungeon, warp to 0820.

Year 0820

??????????

Find the dungeon entrance, once inside you have to go back to the fountain. Go all the way up and enter the building. Go all the way up, all the way right, all the way up, left and enter the dungeon gate. You will now be at the second dungeon. Go right, up, left (the water looks blue, but it's really dry) and up.

You should be in front of the fountain, and you should see a hole in the ground. Just enter inside the fountain by walking through left block and get the Cleopatra Mask. Now go down, right, down, left to reach the exit. You'll be at the first dungeon, go right, 3 down, 2 left and all the way down to exit. Now warp to the year 0001 to face Gordess. Make sure you buy everything you need and make sure you have a ton of time pieces.

Year 0001

??????????

Play through the level (or warp ahead) to reach Gordess. Defeat him and you'll be warped to...

Year 2137

??????????

If you want the bad ending, play through the level until it ends and face the last boss (a base).

If you want the good ending, play through the level until you find the dungeon entrance. Once inside your time pieces will start draining, so you have to be quick. This dungeon also changes its rooms, so you could enter one room and leave the same you came in and you'll be in a totally different dungeon area. So follow my directions carefully.

Once inside the dungeon, go right, up, right, up, right. You'll be on an empty room. Leave the same way you came in (left) and you will be in a new room, leave the same way you came in (right) and you will be in a hallway. Go up, left and you will be in another empty room. Leave the same way you came in and you'll be in a new room. Take the bottom left exit, left again, then down, right and you will now be in a room with 3 exits. Just leave the same way you came in (to the left) and then go down. Once you go down, you will automatically place the 7 Secret Time Stones on the pedestals and you will beat the game.

//_/_/ 2 - Thanks _/

Thanks to Procyon for his awesome guide at
