The game greets you with a crowd shouting out the name of the game, Wheel of Fortune. This is technically impossible for the NES, but they did it anyways.

After the colorful 16 color image of Vanna White passed by press start and chose the number of players. Actually there are just 10 colors in Vanna, but her sigature has some greyscales inside. That's better than her hair having them.

You can play with up to 2 friends, making it a maximum of 3 players at once.

For a 2 player game Player 1 uses controller 1 and player 2 uses controller 2. For a 3 player game Player 3 uses controller 2 and Player 1 and Player 2 share controller 1.

If you want to play alone, chose 1 player, and now you can either play all on your own or play against the Computer. Chose the level you want your computer opponent and continue. The different computer player levels mean just how good the computer 'guesses' and solves the puzzles, there are no different puzzles depending on the difficulty.

After that enter your name(s) (with a maximum of 6 letters per name) and then continue. You are now right in the game.

The game 'Wheel of Fortune - featuring Vanna White' is based on the TV Series Wheel of fortune in which funny people try to make a fortune with the wheel of fortune. The TV Series is based on the school game hangman of course but now there is more money involved.

So it's your turn now!

Left and right lets you chose your action, which is either

SPINVOWELSOLVE""""""""""""

You've got 16 seconds to chose. If you haven't decided after these 16 seconds the game switches to the next player.

I will now explain what these 3 different gamemodes are and how to play them.

[1.1]

>>>> SPIN <

You can spin the wheel here by pressing the A Button while the different colors are flashing besides the wheel. The colors indicate the speed with which you will spin the wheel.

the colors are:

> blue

>> green

>>> orange

>>>> white

while white is the fastest and blue the slowest rotation.

If you land on an amount of money you now can select a consonant you think is in the phrase or word that is searched for in this round. If the consonant is in the word you earn that amount of money multiplied with how often the letter is in the word.

If the letter is not in the word it's the next player's turn. Sounds easy, eh? It is, and it is even more entertaining.

But there is not only money on the wheel, to make it harder for you my dear wheel of fortune player, there are also some extras hidden on the wheel:

BANKRUPT: You loose all your money for this round. This is a bad extra.

LOSETURN: So it's the next player's turn.

FREESPIN: Only in round 1&2. If you somehow have to pass your turn you can use this extra and are allowed to spin the wheel again.

If you managed to get a freespin this is shown next to your name on your players place.

Buy a vowel here the same way you would chose a consonant. The only difference is buying vowels costs you money, but it's always 250 \$ per vowel you buy, and it doesn't matter how many times the vowel shows up on the wall, you pay the 250 \$ only once and maybe know a little more about the word everyone is searching for.

If your vowel is in the word it's your turn again, you can now either spin the wheel to guess another consonant, buy another vowel or solve.

How to solve the puzzle is explained just beneath here:

[1.3]

>>>> SOLVE <

The cursor jumps from empty space to empty space and you have to fill in all the needed letters.

If you did fill in a wrong letter, don't worry, B backs up one letter and you can reenter the right one.

Once you are done acknowledge your input with Start.

## [2.0] The Rounds

Each play goes over 4 rounds and if you are good enough the Final Stage. If you have enough cash and won enough Rounds you can play the final round.

If there is a draw between you and an opponent there is an extra round, but this happens very seldom.

If you manage to reach the final stage you have one riddle to solve in 60 seconds. The letters E, L, N, R, S and T are chosen for you and you can chose one more vowel and 3 more consonants.

These letters are the highlighted and turned around by sexy 8 bit Venna White. Now you have to guess/think of the right word in 60 seconds and one of the beautiful 8bit prizes will be yours.

To help you with that and the rest of the game read on to find solutions to all

the riddles Vanna White wants you to solve after this short overview over the features of the different rounds in wheel of fortune.

>>>> WHEEL LAYOUT <

To elaborate this here are the layouts of the wheel in every round: This game is sometimes very random and the amount of money on the wheel seems to be placed randomly, but still in order. This means there is a fixed order, in which the dollars will appear but it is not defenitively said, THAT they will appear. But IF they appear, they have their fixed position in the array of the layout. All the values that MAY appear are in brackets and indented, all others are there on every round of the wheel...

LOSETURN will never appear on the first round of the wheel ever in round 1. After further investigation it seems(!) like the random layout only happens in the first round of the wheel when you start spinning it as Player 1. If you pass your turn to a computer Player 2 the normal layout for each round will appear. I don't know why this happens but if you have further details please contact me on that.

SOLUTIONS

[.solution.]

This Chapter of the Wheel of Fortune FAQ deals with the Solutions. I hope I got them all, if not, feel free to send me some solutions I have missed by mail, you can find my email address in the legal section of the FAQ. I will of course give you credit if you have something to add to the FAQ.

All the solutions here are sorted by Category.

Each category is sorted by number of words and then by number of letters in the word, then by number of the second word and so on, so even if you don't know the first letter you can have a clue what word it is about and find your solution here.

The CATEGORIES are: :era SEIROGETAC ehT

Oh, you're still reading... well, there is even MORE!!!

If you think, this FAQ helped you out, then why not pay a visit to my website for the game and browse around and in case you find an interesting ad consider checking it out. > http://selmiak.bplaced.net/games/nes/index.php?game=Wheel-of-Fortune < You can't loose anything by doing so, except half a minute of your time and I get some tips and write more guides! And eventually you find something really interesting on my page as I have tons of stuff there!! THANK YOUS ツツツツツツツツツツツツツツ [.thanx.] My thanks go to the following individuals and/or companies: Andrew Schultz for starting the NES FAQ Completion Project. Otherwise I maybe wouldn't have written this. Devin Morgan for maintaining the NES FAQ Completion Project website and keeping things in shape. all other contributors to the NES FAQ CompletionProject on GameFAQs.com we can get this done! CJayC and SailorBaconAllen for GameFAQs.com and stuff and all and so on... you for reading all this. Yeah, especially this part here ;) me for writing this. And because I've written all this I can thank myself as much as I want! Yay me! =) god without him (or her, whatever), we all wouldn't be here. visit my page for this game: http://selmiak.bplaced.net/games/nes/index.php?lang=eng&game=Wheel-of-Fortune
