### Introduction

---

Hi my name is Niall Mc Laughlin. This is my second guide for gamefaqs. I first got the idea for this guide when I found the Mario mask. So I decided to look around to see if there were any more things like that in Majoras mask. I found more than I expected and wrote it all down. Thats what this FAQ is, I hope you enjoy doing and finding all the things in Majoras Mask like I did.

### Copyright

---

This guide is copyright Niall Mc laughlin. It should not be reproduced with out my permission. It should not be given away or printed in a magazine, print or online. You may print this out for your own use but you shouldn't sell it. If you want to use this on you own website email me at the address at the top. I will then send an ariginal copy of the guide which you should use in it original and unaltered form.

### Revision notes

---

Version 1.0 (29/12/2000) : All of the secrets that I know in MM.

Version 1.5 (05/01/2001) : More secrets that I've found out added.

---

## The Secrets Guide

---

All the secrets below are, to my knowledge, true. I have tried them all myself to see if they work. I'm sorry if you can't get them to work.

Mario Mask

-----  
Submitted by: Me

This isn't a joke, there is a Mario mask in MM, but you can't actually wear it or touch it, you can only look. First go to Clock town and into the clock tower doors where the Mask seller guy is. Go behind him and look at the masks on his back. There you have it, a Mario mask, he might look a bit flat but it's him alright. Use your zora mask for a better view (He's taller than normal Link).

Overworld theme  
-----

Submitted by: Me

The cool tune that plays in Termina field is the original overworld theme tune from the old zelda games. It's reworked to sound better but the tune is basically the same.

Cows  
-----

Submitted by: Me

After you've played for a while you'll notice little statues of cows in the shops and houses of Clock town. There is one in every shop. Except I think the Honey and Darlings games shop. They might look like they're there just for decoration but go into a shop on the 3rd day and you'll see that they're actually earthquake meters. Watch their heads bounce up and down to an earthquake.

Clocks work  
-----

Submitted by: Me

I'm not sure if this is really a secret but I'll include it anyway. All the clocks around Termina work and you can use them to tell the time. For information on how to tell the time from them see my "The Clocks" guide which is also in gamefaq's.

Dolphin on observatory floor  
-----

Submitted by: Me

Go to the observatory. Down the stairs, near the scarecrow there are some pots on the floor. Smash them and look at the floor. You should see a picture of a dolphin. Are the development team trying to hint at a new zelda game for GAMECUBE (known as Dolphin before launch) in development?

Secret song score in field  
-----

Submitted by: Me

Go to the north of Termina field, the part with all the snow and ice. Jump down the cliff near to the ramp where you can walk down. Turn around and on the stone wall you will see a musical score on the wall with ocarina notes on it. Play the notes on it, as Goron Link, and you will get rupees from the picture of the skull kid above it. The song is randomly generated each time you return, sometimes it's even one of the old ocarina songs from Ocarina of Time.

## Paper plane

-----

Submitted by:Me

In the Ikana valley in the castle ruins(The place with the huge door that you can't open). Go onto the roof and then onto the pillars. At the very last pillar on the right hand side there is a paper aeroplane. You can't touch it or pick it up. You can only look at it.

## Stars in the night sky

-----

Submitted by: Me

At night the sky in termina is filled with stars. If you didn't look carefully you would think that they were just randomly placed dots. But if you do look carefully then you will begin to notice some constialtions. I'm not and astronomer so I can only find two but if anyone knows anymore look at the "Need your help" section for details on how to contribute to the guide. Back to the secrets section. The two that I know of are orion and the big dipper. Look in the night sky on the first day (the moon takes up less sky then) to see them.

## Dogs

----

Submitted by: Me

In the main square of Clock town there is a dog running about. Upon further investigation I found that there are many secrets to do with this dog and the others like it dotted around Termina.

## Swim

Pick up the dog and throw it in to water. It will do the doggy paddle out of the pond. This might not seem like much but it shows how much attention to detail Nintendo put into their games.

## Masks

When link isn't wearing any masks the dog will ignore him but put on one of your transformation masks and it will react differently.

- >Deku Scrub Mask : Wear this and the dog will growl at you, stand still and it will jump at your face, sending you to the floor. You won't lose any health but it looks funny.
- >Goron Mask : This time the dog will growl at you again. But run up to it and try to punch it. The dog should get scared and run away yelping.
- >Zora Mask : For some reason the dog likes zora link. If you run up to it it will sit in front of you run it head on your legs ?!

## Talk to the dog

If you wear the Mask of Truth (do the skultula house in the swamp) and pick up the dog you can talk to it. This comes in handy when you are deciding which dog to pick in the doggy race track in the ranch.

## Gossip Stones

-----

These are the grey coloured stones located around Termina with the picture of a sort of eye on the front.

If you use the mask of truth then you can talk to these stones which are located all around Termina. They give you hints at what to do in the game.

#### Other gossips stone info

Gossip stones give you hints for the game but they do lots more too.

#### Hit with sword/Normal arrow

The gossip stone will wobble around and the screen will go blurry. The time remaining will be displayed. If hit with arrow it won't tell the time remaining .

#### Fire/Ice/Light arrow

The gossip stone will spin around very fast, then stretch out tall and pop back into its normal shape.

#### Bomb/Bombchu

The Gossip stone will start to flash blue, blue, red. Like a 3, 2, 1 count down and make a bleeping sound when it does this. After the count down it will blast off like a rocket and fly straight up until it hits the roof or if you are outside it will fly very high in the air before exploding. To make it come back leave the area that you are in and come back again.

#### Duku Scrub bubble attack/Goron punch

The gossip stone will squash down flat to the ground, then pop back up after a few seconds.

---

### Need Your Help

---

Thanks for reading the guide. Now its your turn to help. If you have any information on secrets in Majoras Mask them email them to me at;

niallmcl@hotmail.com

Please put you header as MM guide so its easier for me to separate those emails from the rest of the stuff I get. If you send in something thats not already in the guide I'll give you credit for it. If more than one person sends in something then the first person the send it in will get the credit for that secret.

---

### Credits

---

Thanks to;

Nintendo, for making the best Zelda game yet.

You, for reading this FAQ. I hope that you enjoy trying all the things here.
