Any code with a \* beside it means that the game may be a bit glitchy. The glitch can not erase game saves or other data. This guide is copyright by me, and is only to be distributed with credit going to me. Copyright SquareGuru, 2000. Also, anyone who would like to contribute can also e-mail me at SquareGuru@hotmail.com I am also trying to figure out codes to change the colour of weapons, explosion size mods, and being able to throw unlimited laptop guns. If you know of any, or have made any, please e-mail me.

#### GUN IMAGE MODS

---

These codes allow you to make a gun look like something else. For example, you could make the Falcon2 look like the PP9i or the Farsight XR-20 look like the RC-P120. The Farsight XR-20 and RC-P120 were contributed by drkshark. Without his codes, these would not be possible.

#### GUN FUNCTION ACTIVATOR CODES

---

These codes enable your gun to use up to 10 functions. For those of you that don't know, an activator code is a code which is used to bypass the ram on a cartridge and temporarily enable a code. Also, to use the activator codes, you must insert the activator code above every line of normal code. Although you can have more than 10 functions (up to 32), I suggest using only 10, or the gun will get to confusing.

Player 1 Activator:           D009C7E4 00BB  
Player 2 Activator:           D009C7EC 00BB  
Player 3 Activator:           D009C7F4 00BB  
Player 4 Activator:           D009C7FC 00BB  
Dual Activator's (Require 3.0 gs)

Dual Activator Player 1: D109C7E4 CCCC  
Dual Activator Player 2: D109C7EC CCCC  
Dual Activator Player 3: D109C7F4 CCCC  
Dual Activator Player 4: D109C7FC CCCC

---

#### ACTIVATOR DIGITS

---

These are the digits required for the activator digits.

#### Normal Activator:

BB Button to Press  
00 Nothing  
01 Right D-Pad  
02 Left D-Pad  
04 Down D-Pad  
08 Up D-Pad  
10 Start Button  
20 Z Button  
40 B Button  
80 A Button

#### Dual Activator:

CCCC Button to Press  
0000 Nothing  
0001 C-Right Button  
0002 C-Left Button  
0004 C-Down Button  
0008 C-Up Button  
0010 R Button  
0020 L Button  
0100 Right D-Pad  
0200 Left D-Pad  
0400 Down D-Pad  
0800 Up D-Pad  
1000 Start Button  
2000 Z Button  
4000 B Button  
8000 A Button

---

#### HOW TO USE THE ACTIVATOR

---

Let's say you want to put the inject function on to the falcon 2 as an activator code. Using Player 1, use the activator code D009C7E4 00XX, and use the Down button on the D-Pad, which is 04. Therefore you will have to input this code before every line of code. For now, let's just keep it simple, and use a one line code. So the code is:

```
D009C7E4 0004  
8106B73E E4E0
```

Then of course, you will have to add a function to change the activator code back to the main single shot. We will use the Up D-Pad to change it back. So the entire code will be:

```
D009C7E4 0004  
8106B73E E4E0  
D009C7E4 0008  
8106B73E B634
```

To change the function on the second function, you will have to insert a different address code. This will be 8106B742 ????, because that is the second function of the falcon 2. Just repeat the above process,

and you'll be set. By the way, don't forget to include another button press to allow you to change the function back to normal!

---

#### USING MULTIPLE BUTTONS

---

To use multiple buttons to activate a code, ex. press A+B to activate a code, simply add the digits together. Therefore, if it was A+B, the buttons pressed would be C0, because 40+80=120, and 120 in hexadecimal is C0.

---

#### RATE OF RELOAD MODIFIER

---

The bulk of these codes were submitted by Wolf1. These allow you to change how fast your ammo animation is. The lower the digit (0000), the faster the reload. Also, 0000 allows you to press reload and your ammo will automatically be refilled.

EXPLOSIVE SHELLS w/DIZZINESS COMBO

---

Here they are. The infamously searched for but never hacked codes...except by me, SquareGuru. By the way, as of now all I have hacked is the code for the RC-P120's Rapid Fire, but hey, you gotta start somewhere!

RATE OF FIRE MODS ON ANY FUNCTION

---

To use these codes, simply lower the numbers to use. (Example: if the default is 09 0E, switch it to 00 00 to make that function fire as fast as possible) Also, be aware that the rocket functions:

Rocket Launcher's rocket launch	01	02
Rocket Launcher's targeted rocket	02	03
Slayer's rocket launch	04	05

\*Note that the above times are the fastest that the rockets can go, otherwise the rockets will hit each other and explode.\*

I would also like to give credit to Wolf1, who first discovered the SuperDragon's grenade launch speed, both Devastator function's speed, both Crossbow functions, Laser's pulse fire, both Mauler function's, Falcon 2's single shot, Psychosis fun's infect, both magnum's single shot, and lastly, both Phoenix function's.

\*\*Another NOTE: These codes only make that function go as fast as that function can possibly go. It does not make every function a rapid fire function, it just makes the function go as fast as possible in the game\*\*

## GUN NAME MODIFIER

Please note that this entire section goes 100% credit to Ribond86.

Here it is:

To get started, let's use the most basic example, which you must know.

For example:

Falcon 2	80126FB8	00XX	(1st letter)
Falcon 2	80126FB9	00XX	(2nd letter)
Falcon 2	80126FBA	00XX	(3rd letter)
Falcon 2	80126FBB	00XX	(4th letter)
Falcon 2	80126FBC	00XX	(5th letter)
Falcon 2	80126FBD	00XX	(6th letter)
Falcon 2	80126FBE	00XX	(7th letter)
Falcon 2	80126FBF	00XX	(8th letter)

CMP150	8012702C	00XX	(1st letter)
CMP150	8012702D	00XX	(2nd letter)
CMP150	8012702E	00XX	(3rd letter)
CMP150	8012702F	00XX	(4th letter)
CMP150	80127030	00XX	(5th letter)
CMP150	80127031	00XX	(6th letter)

As you can see, when renaming a gun you must not create it to have more letters than the original gun. Also, fill in empty space(s) with 01.

An example of the 01 is: Falcon 2 renamed to Pistol should be P-I-S-T-O-L-\_-\_- " " represents space. Here is a brief table which shows which letters are represented by which numbers:

Space 00	, 01	! 21	" 22	# 23	\$ 24	% 25
& 26	' 27	( 28	) 29	* 2A	+ 2B	, 2C
- 2D	. 2E	/ 2F	0 30	1 31	2 32	3 33
4 34	5 35	6 36	7 37	8 38	9 39	: 3A
; 3B	< 3C	= 3D	> 3E	? 3F	@ 40	A 41
B 42	C 43	D 44	E 45	F 46	G 47	H 48
I 49	J 4A	K 4B	L 4C	M 4D	N 4E	O 4F
P 50	Q 51	R 52	S 53	T 54	U 55	V 56
W 57	X 58	Y 59	Z 5A	[ 5B	\ 5C	] 5D
^ 5E	a 61	b 62	c 63	d 64	e 65	f 66
g 67	h 68	i 69	j 6A	k 6B	l 6C	m 6D
n 6E	o 6F	p 70	q 71	r 72	s 73	t 74
u 75	v 76	w 77	x 78	y 79	z 7A	

Falcon 2 renamed to Falcon?! would be:

80126FBE 003F

80126FBF 0021

## GUN NAMES

Add "8012" to the front of each code

Example: 7634 00XX means 80127634 00XX

Too bad but some codes can be 20 lines long! So if you are renaming whole words, make it an 8112 code:

"Falcon 2" to "Shooter"

Method 1 (8012)

80126FB8	0053	(S)	Salcon 2
80126FB9	0068	(h)	Shlcon 2
80126FBA	006F	(o)	Shocon 2
80126FBB	006F	(o)	Shooon 2
80126FBC	0074	(t)	Shootn 2
80126FBD	0065	(e)	Shoote 2
80126FBE	0072	(r)	Shooter2
80126FBF	0001	(_)	Shooter

Method 2 (8112)

81126FB8	5368	(S, h)	Shlcon 2
80126FBA	6F6F	(o, o)	Shooon 2
80126FBC	7465	(t, e)	Shoote 2
80126FBE	7201	(r, _)	Shooter

Do not use 8112 method on last letter if the word has an odd number of letters. Make sure extra letters are filled with spaces.
