Intro

Allright, it's very unlikely that you came here by hasard so I assume that you are familiar with the pokémon game. I will go straight to the point. This guide is a list of the opponents pokémons movesets. I tried to include as much useful information as possible. The names of the opponents, the names of their pokémons, their type (like Pikachu or Eevee), their moves and their levels. The guide is not complete yet but it should help you go through round one. I will also give comments at many points. Have fun! ^-^

By the way, expect the guide to contain spoilers, like what is the Final Battle. If you don't want to know what you'll fight, come back to this guide later. You're warned!

If you like the opponent pokémon color, take note of his name and then rename your pokémon the same way! However, you can't use numbers in a name without a game shark.

This guide is not complete. If you want to help me finish it, scroll the page to the section at the bottom of it.

Round One :

Pika Cup

Comments : Dragon Rage is your friend here. Try to get as many continues as possible in the easier fights. However, don't risk victory for a continue.

Trainer one : BUG BOY

NIDORY	EKANY	VENOMY
Nidoran?	Ekans	Venonat
Level 16	Level 15	Level 15

Comments : that should be easy even with rental pokémons. Fire and ground attacks will be the most effective here.

Trainer two : LAD

PIDGEOTTY	FARFETY	SPROUTY
Pidgeotto	Farfetch	Bellsprout
Level 15	Level 15	Level 15

Level 16	Level 15	Level 15
-???	-Leech Life	-Tackle
-???	-Bite	-???
-¿??	-???	-???

Comments : still pretty easy. Ice will make your day and electricity will help too.

Trainer three : SWIMMER

POLIMER	Tortmer	MAGIMER
Poli???	Wartortle	Magikarp

-Bubblebeam	-???	-Tackle

Comments : electricity and grass will make your day.

Trainer four: BURGLAR

NINELAR	Growlar	SANDLAR
Ninetale	Growlithe	Sands???
Level 16	Level 16	Level 16
-Body Slam	-Bite	-???

Level 17	Level 16	Level 15
-???	-Leer	-Tail Whip
-???	-Growl	-Ember
-¿??	-???	-???
-¿??	-???	-???

Comments : water and ground attacks will make your day. Watch out for the non-fire pokémons though.

Trainer five : MR. FIX

VOLTCIAN	MITECIAN	PORYCIAN
Voltorb	Magnemite	Porygone
Level 16	Level 15	Level 18
-Thunder	-Thunderbolt	-Psychic
-Tackle	-Flash	-Ice Beam
-???	-???	-Conversion
-???	-???	-Sharpen

Mancian	GLERCIAN	RAICIAN

Level 15	Level 16	Level 18
-???	-Body Slam	-???
-???	-Bubblebeam	-???
-???	-???	-???
-???	-???	-???

Comments : ground type attacks and pokémon will do nicely. So will do grass pokémons. Watch out for Raichu and Porygone though. Take a look at the levels of the pokémons. He can't use both Raichu and Porigon in the same team. He can only use Magnemite and Mankey with them. Also, watch out for Kingler.

Trainer six : HIKER

HIHORN	Higglituff	Hidabra
Rhihorn	Wigglituff	Kadabra
Level 20	Level 15	Level 16
-Earthquake	-Reflect	-???
-???	-Mega Kick	-???
-???	-???	-???
-???	-???	-???

HICHOP	Hidra	HIGAST
Machop	Seadra	Gastly
Level 16	Level 15	Level 18
-???	-Surf	-???
-???	-???	-???
-???	-???	-???
-???	-???	-???

Comments : he can only use Seadra and Wigglutuff with Rhihorn. Maybe it's better to keep a pokémon for Rhihorn just in case...

Trainer seven : LASS

GYARADETTE	MIMESS	ARCANESS
Gyarados	Mr. Mime	Arcanine
Level 20	Level 15	Level 15
-???	-???	-Fire Blast
-???	-???	-Dig
-???	-???	-Swift
-???	-???	-???

CRUELETTE	DEWGETTE	MEOWETTE
Tentacruel	Dewgong	Meowth
Level 20	Level 15	Level 15
-Surf	-Body Slam	-???
-???	-Ice beam	-???

-????	-???	-???
-????	-???	-???

Comments : OK. It's where it get really rough. She has two powerhouse : Gyarados and Tentacruel. Happily, she can't use both. Make sure you have something to deal with them. I highly suggest a water pokémon with an electric move like Starmie. The good news is that she doesn't always use them.

Trainer eight : FISHER

NAIRISH	BROISH	FABLISH
Dragonnair	Slowbro	Clefable
Level 18	Level 16	Level 16
-Thunder Wave	-Psychic	-Thunderbolt
-Wrap	-Disable	-Hyper Beam
-????	-Tri Attack	-Double Edge
-????	-Surf	-???

COOLISH	TICATISH	GOLDISH
Tentacool	Raticate	Goldeen
Level 16	Level 18	Level 16
-???	-Dig	-???
-???	-Bubblebeam	-???
-????	-Hyper Fang	-???
-????	-Quick Attack	-???

Comments : like LASS, he has two "powerhouses" but can't use both of them. About Dragnonair, I have three strategies for dealing with dragon type pokémons : ice attacks, "Psychic" (the move) and strong physical attacks (Explosion being on the top of my list!) About Raticate, watch out for his Quick Attack. Also, an Hyper Beam from a Clefable in the Pika Cup is quite brutal. It should be renamed the "Destroy Beam" or something like that!

 Petit Cup

Comments : Dragon Rage is still your friend here. Try to get as many continues as possible in the easier fights. However, don't risk victory for a continue.

Trainer one : BUG BOY

CATERPY	WEEDLY	PARY
Caterpie	Weedle	Paras
Level 25	Level 25	Level 25
-Tackle	-Poison Sting	-???
-String Shot	-String Shot	-???
		-???
		-???

ODDY	BELLY	EGGY
Oddish	Bellsprout	Eggegcutie
Level 25	Level 25	Level 25
-Sleep Powder	-Stun Spore	-Barrage
-Stun Spore	-Vine Whip	-???
-Acid	-Growth	-???
-Absorb	-Poison Powder	-???

Comments : it shouldn't be hard. Fire and flying attacks will make your day.

Trainer two : LAD

PIDDY	RATTY	DITTY
Pidgey	Rattata	Ditto
Level 25	Level 26	Level 25
-???	-Quick Attack	Transform
-???	-Focus Energy	
-¿??	-Tail Whip	
-¿??	-Hyper Fang	

BULBY	EKANSY	ZUBATY
Bulbasaur	Ekans	Zubat
Level 26	Level 26	Level 25
-Vine Whip	-Bite	-Supersonic
-Poison Powder	-Glare	-Bite
-Leech Seed	-Wrap	-???
-¿??	-???	-???

Comments : a bit of everything here here but it shouldn't be too hard. Maybe ice attacks will help?

Trainer three : NERD

DUDEGEO	LYGAST	ORBOLT
Geodude	Gastly	Voltorb
Level 25	Level 25	Level 25
-???	-???	-Explosion
-???	-???	-Sonic Boom
-¿??	-???	-???
-¿??	-???	-???

DERSHELL	FINGKOF	CUTEGG
Shellder	Koffing	Eggxecute
Level 25	Level 30	Level 30
-Explosion	-Selfdestruct	-???
-Clamp	-Toxic	-???
-Supersonic	-Fire Blast	-???
-Take Down	-Smog	-???

Comments : Mr Selfdestruct himself! He has two powerhouses, Koffing and Eggxecute. But I doubt it matter much here. My suggestion : start with a random pokémon then switch to a ghost or rock type pokémon. If you have the speed, moves like Substitute, Double Team, Sand Attack, Growl, Barrier, Accid Armor, Fly, Dig, Fissure and Horn Drill might save you too. Else, try to keep your best pokémon for last.

Trainer four : SAILOR

KRABLOR	SEALOR	MAGILOR
Krabby	Horsea	Magikarp
Level 26	Level 27	Level 26
-???	-Water Gun	-Tackle

Machop	Goldeen	Spearow
Level 26	Level 26	Level 27
-Karate Chop	-???	-???
-Low Kick	-???	-???
-Leer	-???	-???
-Rage	-???	-???

Comments : thunder and grass attacks will make your day. However, watch out for his non-water pokémons.

Trainer five : JR.E

CUCU	GROWLGROWL	MEOWMEOW
Cubone	Growlithe	Meowth
Level 26	Level 27	Level 27
-???	-Double Edge	-Thunderbolt
-???	-Ember	-Bubblebeam
-¿??	-Dig	-Pay Day
-¿??	-Leer	-Screech

ABAB	POLIPOLI	JIGJIG
Abra	Poliwag	Jigglypuff
Level 26	Level 26	Level 27
-???	-Body Slam	-Double Slap
-???	-Ice Beam	-???
-¿??	-Bubblebeam	-???
-¿??	-Hypnosis	-???

Comments : there's a bit of everything here. About Meowth, Growlithe and Jigglypuff, she can't use all three of them together.

Trainer six : JR.W

DIGSTER	MAGSTER	FETCHANT
Diglet	Magnemite	Farfetch
Level 26	Level 26	Level 27
-Sand Attack	-Thunderbolt	-???
-Growl	-Tackle	-???
-Scratch	-Flash	-???
-Dig	-Sonicboom	-???

ZUSTER	CHARMANT	SQUIRTANT
Zubat	Charmander	Squirtle
Level 27	Level 27	Level 27
-Bite	-???	-Bite
-Leech Life	-???	-Surf
-Confuse Ray	-???	-???
-Take Down	-???	-???

Comments :there's a bit of everything her too. Electricity will help a bit but watch out for Diglet and Magnemite. Ice might help too. Just try your best! :) She can only use at max 2 level 27 pokémons.

Trainer seven : LASS

KABUTESS	PIKETTE	VULESS
Kabuto	Pikachu	Vulpix
Level 30	Level 25	Level 25
-Double Edge	-Thunderbolt	-Quick Attack

-???	-Quick Attack	-Fire Blast
-¿??	-???	-Ember
-¿??	-???	-Dig
CLEFAIRESS	PUFFETTE	EEVETTE
Clefairy	Jigglypuff	Eevee
Level 25	Level 25	Level 30
-Body Slam	-Mega Kick	-Double Edge
-Sing	-???	-Toxic
-Metronome	-???	-Quick Attack
-Minimize	-???	-Sand Attack

Comments : LASS again as the #7 trainer? Anyway, same formula, she has two powerhouse but can only use one. They are Eevee and Kabuto. Watch out for them! Also, Gastly will eat away Eevee. Take a look at Eevee moveset. Swift will help as well as rock or poison type pokémons. Overall, fighting attacks will help.

Trainer eight : PKMANIAC

NIDOMANIA	RANMANIA	DRATIMANIA
NidoranW	NidoranE	Dratiny
Level 25	Level 25	Level 30
-Double Kick	-Take Down	-Dragon Rage

Level 25	Level 25	Level 30
-Earthquake	-Surf	-Surf
-Rock Slide	-Ice Beam	-Double Team
-Slash	-Rest	-???
-Sand-Attack	-Scratch	-???

Comments : two powerhouse here too : Omanyte and Dratiny. If Dratiny show up, expect Thunder Wave and a minimum of 40 damage each turn. Expect to see switches during this fight, especially if you're using an electric type pokémon. Give your best shot!

Comments : you have probably noticed it but I'll it anyway. Some of the opponents's pokémon have less than four moves. Anyway, expect Metronome from everybody here. Also, there will be the Dream Eater combo so watch out for that too.

Comments : plenty of water pokémons here and some rock/ground type. More importantly, watch out for Double Team. The best way to deal with Double Team is to KO them before they even use it. But that doesn't always happen, so Swift and maybe Haze are helpful too.

Anyway, Lance's Lapras is trouble. It knows Thunderbolt. By experience, I can tell that it's better to send someone softening Lapras before sending Mewtwo. Dragonair and Charizard both use a Toxic/Wrap combo. You're almost done!

Rival

Comments : Allright, I must explain a little bit. Wether you used pokémon from the Yellow, Blue or Red version of Pokémon, you will face a different final battle. Same thing if you only used rental pokémons in your team.

Rental Version :

Exeggutor	Slowbro	Ninetales
-Solarbeam	-Surf	-Body Slam
-Toxic	-Earthquake	-Toxic
-Double Edge	-Psychic	-Flamethrower
-Leech Seed	-Strenght	-Dig
Clefable	Electabuzz	Pinsir
-Psychic	-Thunder Wave	-Hyper Beam
-Double Edge	-Thunderbolt	-Seismic Toss
-Blizzard	-Seismic Toss	-Toxic
-Thunderbolt	-Reflect	-Sword Dance

Comments : Now that I think about it, how did I manage to get all the moves of the rental team? Anyway, this team is quite balanced so send your best pokémons and cross your fingers! Exeggutor use the Toxic/Leech Seed combo. Ninetales has a Toxic/Dig combo. Electabuzz has Thunder Wave and Reflect. Gives all that you got!

 Red/Blue Version :

Gyarados	Alakazam	Exeggutor
-???	-Flash	-Toxic
-???	-Seismic Toss	-Leech Seed
-¿??	-Psychic	-Psychic
-¿??	-Recover	-Mega Drain
Magneton	Arcanine	Dodrio
-Thunder Wave	-Hyper Beam	-???
-Thunderbolt	-Dig	-???
-Supersonic	-Body Slam	-???
-Swift	-Flamethrower	-???
Blastoise	Charizard	Venusaur
-Earthquake	-Toxic	-???
-Ice Beam	-Slash	-???
-Hydro Pump	-Flamethrower	-???
-Strenght	-Fire Spin	-???

Comments : if you're using pokémons from the Blue or Red version, you will face this team. If your opponent in the game have Blastoise, it will replace Gyarados. If he has Charizard, it will replace Arcanine. If he has Venusaur, it will replace Exeggutor. I would appreciate it a lot if anyone could get me Gyarados and Venusaur movesets. Anyway, Exeggutor has the Toxic/Leech seed combo, Magneon has Thunder Wave and Supersonic and Charizard has the Toxic/Fire Spin Combo. Good Luck!

 Yellow Version :

I can only guess here. Depending of which version of Eevee your opponent has in the Yellow version of pokémon, his team should change. I would greatly appreciate any contributions.

Mewtwo Battle :

```
MEWTWO
-Psychic
-Thunderbolt
-Blizzard
-Rest
```

Comments : There's plenty of way to win if you have trouble. Since Mewtwo is alone, he is vulnerable against stat down moves like Sand Attack, Screech and Psychic. You can pick a team of Self Destructing pokémon. You can also use ice attacks and hope that Mewtwo get frozen. You can use Thunder Wave and then try One Hit KO moves (Fissure, Horn Drill and Guillotine). I suggest the last method if you're using rental pokémons. Just start the battle with Electrode. Oh and if you're wondering, you must beat all of the cups and your rival before he appears.

Mewtwo Battle :

MEWTWO

-Psychic

-Thunderbolt

-Amnesia

-Rest

Comments : This time, he has the highest speed possible for a Mewtwo. Also, he will power up with Amnesia so don't bother with Psychic. I suggest to paralyse him and go for a One Hit KO for rental. Whatever you do, make sure to use Thunder Wave first. Explosion and Self-Destruct could work. Sand Attack too. I highly suggest to use a pokémon with an high special like Chansey or Snorlax. Or you could do it your own way! : P Whatever you do, give your best shot. If you came all the way up to here, you can win that last battle.

-Future edition

I'm not playing the game anymore but if you want this guide to be updated (or free of any mistakes/typos!), e-mail me with the adequate information. Still, I might replay it some day...

Anyway, Round Two is the next big thing to be covered.

If I get enough questions, I might also add an faq section.

How to help me

First make sure you the info you give me is not on my guide.

Make a copy of my guide if needed. Just don't post it or sell it! ^-^

You can also use the text at the very end of the guide if it's of any help.

I want for Round Two the name of the cup, the name of the opponent, and it's number (# 1 is first, # 8 is last).

If possible, I want the exact order of their pokémons, the way the game list it. Something like that :

1	2	3
4	5	6

I also want the nickname and type of the pokémon, like :

PORYACE

Porygone

I want their levels for the Pika, Petit and Poke Cup.

For the entries in general, I want the type of the pokémon (like Pikachu) and all of it's moves. Not all pokémons have four moves!

Now, if you're serious about finding the opponent moves (and you don't have a Gameshark!), you'll need specific pokémons.

The ultimate move for finding out a pokémon moveset is Transform.

However, only the "a bit weak" Ditto and the rather rare Mew has it.

The second best move is Mimic. The problem is that's it's random. Also, if you want a confirmation that your opponent has less than four moves, you have to fight for a while.

If those moves doesn't work well for you, bring a defensive pokémon.

Something like a Snorlax with :

Rest

Double Team

Amnesia

Reflect/Substitute

It will take some time but you will force your opponent to use all of his moves.

You can stop when he use his fourth move or Struggle.

If you're really serious, consider bringing pokémons from Gold/Silver/Crystal like Clefairy or Meowth with the Amnesia or Barrier move.

Now, if anyone can find this info, it would be "cherry on top" if anybody could find the speed of all pokémons. But don't feel obligated about this one.

If you want to get a Mew with Transform, there's a trick to get one.

You know the trick where you must push a truck?

IT'S NOT THIS ONE!

BESIDE, IT DOESN'T WORK!!!

Anyway, there is a guide in www.gamefaqs.com which explain how to get Mew by exploiting a glitch. Since Nintendo made Mews hard to come by, even more than Mewtwo, you might want to give it a look.

The guide is "Mew Glitch FAQ" by TheScythe.

-How to contact me

If you have any information to send for updating or correcting this guide or any question to ask, send it to :

cadieux_philippe@hotmail.com

Please use a polite and understable langage please.

Also please only send e-mail related to this guide and use a title for your e-mail explaining it's nature (like pokémon moveset guide contribution or something like that).

Inadequate e-mail will probably be left unanswered and deleted.

If for some reason, the e-mail bounce back, try e-mailing me another day, the time that I clean my e-mail In-Box.

-"Thanks list"

I thank CJayC for reading my guide and posting it to gamefaqs.

Don't forget to click the banners on the site at least once in a while. ^-^

I will post your name here if you contribute

so please don't be afraid to do so.

This guide is copyrighted by me, Mew seeker. If you want to post this guide on your website, you must post it integrally.

But most importatly, you must ask my permission first! E-mail me so I can give my ok.

Also note that the most updated version will be in www.gamefaqs.com

(In case I get lazy or forgetful while updating... ^-^;)

You can also find a copy at www.neoseeker.com

Also, you can't sell this guide for your own personal gain.

E-mail me first! ;)

Seriously, I took some of my time to make that guide and gave it for free.

The least you could do is send the information for free

and not claiming that you did find it yourself when it isn't true.

Beside, as far as I know, that information isn't anywhere in the web in

english. Because the guide isn't complete yet, you'll get spotted quite fast.

If you don't want to get spotted, you'll have to work hard by completing this guide and wholly reformat it! > : D

-end of the guide

You can use the text at the end of the guide to make your own list.

Well, that's about it.
Have a nice day! ^-^
