MUGENJO MODE OUTLINE

This is the games main mode. You move around in a grided styled map layout. Along the way you fight to gain points and characters that help you along the way. From time to time you will need to use scrolls. Scrolls can come in several versions. They are like mini games to break up the constant fighting. You can win points this way too. Sometimes you will have a blocked area in which you can't go through. To bypass, open up your skill menu and find a item that has a hammer icon next to it. This item will destroy an obstacle on the map.

Treasure Rooms are items you will gain throughout. Select in menu to use them. Healing Rooms heals all your stats. Also you can change your leader and active characters to any character you feel like. Invisible paths are also something you will encounter throughout. To open these paths you need to find a skill that has a magnifying glass icon next to it, these will open the paths. There is 100 floors to traverse.
