III                  GAME MODES
===============================================================================

_____
One Player         As the name implies, this mode is only used when you are
ﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂ        playing with only one player. It is you verses the computer
                    in an old fashioned boxing match. Whomever gets the most
                    hits in 2 minutes wins, as well as the bragging rights.
```

```
_____
Two Player          Two Player mode is used whenever you want to completly
ﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂ           thrash one of your friends. If you happen to get more hits
                     in, then you better watch out. You never know when your
                     "friend" has one more swing left....

================================================================================
IV                        MOVE LIST
================================================================================

In order to be a great boxer, you must first know all of your moves, and how
you can use them.

_____
The Jab             The jab is the most basic of all of the punches, so basic in
ﾂﾂﾂﾂﾂﾂﾂ              fact, that it is your boxers only punch. It is performed by
                     hitting your action button. All it appears to be is your
                     boxer extending his arm.

_____
The Beserker        Beserkers were a group of Vikings that were so agressive
ﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂ         that they were put on their own ship, then to keep them from
                     chopping each other up, they were periodically docked so
                     they could chop down trees, which were then used to make
                     more boats. Similarly, it is a good idea to go "beserk" on
                     your opponent and just throw punches non stop. This is
                     performed by simply hitting the action button over and over
                     and over again.

_____
The "I Think My Mom is Calling"      Whenever you are getting your ass handed
ﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂ       you in a nightmare that you will never
                     awake from simply say "I think my mom is calling me" and run
                     away as fast as possible. This is often supplemented, or
                     even replaced by the "Punch to the Groin" which is equally
                     effective.

================================================================================
V                         STRATEGY
================================================================================

So you want to be great at Boxing, eh? Well you better get your head skrewed on
strait and learn some tricks of the trade, otherwise you'll be picking up your
teeth for weeks, ya see?

_____
Rope a Dope         The basic strategy behind "Rope a Dope" is to sit back and
ﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂ          let your oppenent wail on you for the first few rounds,
                     then when they get tired, you can knock them out.
                     Unfortunatly, there is only one round, and your oppenent,
                     he does not tire. So, "Rope a Dope" is not for those of you
                     who actually want to win the game.

_____
Your Reach          You always want to keep your reach into consitteration
ﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂ           while you are boxing. If you get too close, then you will
                     not be able to hit your oppenent well, if you get too far
```

away, then you can not reach him to even hit him. So, you
need to stay just about an arms length away from your
fellow competitor to be most efficient.

_____
Defense   It is often said that the best offense in a good defense.
ﾂﾂﾂﾂﾂﾂﾂ   Keeping this in mind will help you out quite a bit in
                    Boxing. If your opponent is completely wailling on you,
                    then you will need to back yourself out of there quickly.
                    Or if he is getting some good solid shots in every few
                    seconds, try tieing up with him.

_____
The Tie Up   Unlike some of the more advanced boxing games, the Tie Up
ﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂ   in Boxing is nothing more than running both of your hands
                    into both of the hands of your oppenents. This will give
                    you enough time to recouperate from any hits you have
                    taken, as well as giving you time to think of some good
                    strategy. If you are tied up with the computer, then odds
                    are the computer will be making short trips up and down to
                    try to get you to move. When they do this. Move in the
                    opposite direction that they are going, and then as soon as
                    you can punch.

_____
Can of Whoop Ass   Without a doubt, opening up a can of Whoop Ass on your
ﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂﾂ   enemy is the most effective move in the game. Other than
                     the sheer intimidation factor that you get from seeing it,
                     it deals more damage than is recoverable in such a short
                     period of time. For those who are still wondering what a
                     can of Whoop Ass is and how it is performed, well just be
                     patient you little people. A can of "Whoop Ass" is when you
                     get your oppenent to bounch back and fourth between your
                     right jab and your left jab. This pattern can repeat itself
                     forever, or until you get 100 punches in, whichever comes
                     first. To perform the openning of the can, you must be
                     charging your oppening with full speed, and they must have
                     their back on their rope. Then when you punch them, they
                     should bounch towards your other fist. As long as you keep
                     hitting punch, they should take hit after hit after hit.

      the names are not meant to offend anybody. So if you are offended, do not
      read the rest of the FAQ.
