1. Author's Note

Bakusou Kyodai Let's and Go!! Eternal Wings (or Racing Brothers Let's and Go!! Eternal Wings) is a 3-D anime-racing game on PSX and based also on the popular anime show Bakusou Kyodai Let's and Go!! MAX. It's the same rules as if you were playing other race car (this is NOT the one you hop in BUT a toy to race other Mini-four Wheel Players. I own some cars that has appeared both in the game and the anime version!) but this race car has special techniques that can speed up yours fast and furious. This game was played in Japanese Version (I don't think Jaleco will release this in the US), so set your cars on and let's go!!

2. Basic Controls

These Controls are applied to the menu and in the race.

Directional Pad/Analog Stick-Moves the car left or right

4. Characters

Some information I obtain on every character is not 100% accurate, so if you know them, e-mail me...and a warning, some of the info I wrote is somewhat SPOILERS.....you've been warned.....

Ichimonji Retsuya CV: Hidaka Noriko

The youngest brother of Gouki. He's serious and often criticizing other M4WD cars, he's solving the mystery of the disappearance of their father, a third grader in school and eats A LOT!. His M4WD are the Shadow Breaker Z-3 and Knuckle Breaker.

Ichimonji Gouki CV: Kumiko Watanabe
Retsuya's elder brother by one year. He's hyped up on race challenges and works on a mechanical shop where HE IS the one who fixes the mechanical stuff (did I just say 'mechanical'?) and a fourth grader in school. His M4WD is the Max Breaker.

Marina Ohgami CV: Haruna Ikezawa
Daughter of Seitaro Ohgami (the one who adopted J). She sometimes gets mad on Gouki because of a mispronunciation on her name (Mariko!). Seeks revenge on Borzoi because of her father's disappearance. Her M4WD is the Fire Stinger.

Retsu Seiba (Jet Saber) CV: Yuriko Fuchisaki
The leader of the TRF Victories. Kind and sometimes argues with his brother Go. His M4WD are the Sonic Saber, Vanguard Sonic, Hurricane Sonic and Buster Sonic.

Go Seiba (Joey Saber) CV: Haruna Ikezawa
Member of the Victories. Hot-tempered but serious on the race competition. His M4WD are the Magnum Saber, Victory Magnum, Cyclone Magnum and Beat Magnum.

Ryo Takaba (Ryan Takaba) CV: Takano Urara
Also member of the Victories. Once he challenge the Seiba brothers and was defeated, they became friends and teammates. His M4WD are the TriDagger X, Jiromaru Special(his little brother's car) and Neo TriDagger ZMC.

J CV: Kumiko Watanabe
Also a member of the Victories. When he was a kid, he has a wooden car that his father or his grandfather made, he play with it and then later broke by Proto Rangers and decides J to join his team(his first M4WD is the Proto Saber JB with remote control on his left wrist). Later then he challenges the Seiba brothers, defeated and betrayed Ohgami. His M4WD are the Proto Saber Evolution, Dragon Delta(this is really her sister's car) and his good ol' Proto Saber JB (without the remote control). I forgot to mention that he has a sister named R(yes, she went on a trip for the international race then later she return to Ohgami).

Tokuichi Mikuni (Timothy Mikuni) CV: Chie Koujiro
Also member of the Victories. His father is the founder of the Mikuni Corporation, has a sister named Chickie or Chiiko (she is really in love with Retsu Seiba). Often bossy to Go and always quarreling but has a big responsibility to his sister. His M4WD are Spin Axe, Spin Cobra and Spin Viper.

Rion Cusco (Leon) CV: Yuka Imai
A kid with a mechanical eye-patch on his right eye. His M4WD are the Gun Bluster XTO and Gun Bluster Cusco Special.

Mikhail (Michael) CV: Adachi Shinobu
The leader of the Eisen Wolves along with Schmidt and Eric. A nature-lover boy. His M4WD are the Bergkaiser Type:Michael and Eisen Wolf Farm Machine.

Blade (Brett) CV: Kentaro Itou
The leader of the Astro Rangers in the USA. A typical cool guy. His M4WD is the Buck Blader.

Carlo CV: Yuuki Hiro

A Mini-four wheel racer from Italy and member of Rosso Strada. Serious and a cool guy also. His M4WD is the Diospada Rosso Strada. (Did you know he was the voice of Yoshitora Tokugawa of Samurai Spirits Rei [Samurai Showdown Zero])

Yuri Shuvolks CV: Yuka Imai

A boy who is kind and care free. A nature-lover also. His M4WD is the Omega.

Huan CV:

A Chinese boy who never gives up as a Mini-four Racer, has 3(or 4) siblings. His M4WD are the Shining Scorpion (Blue) and Kong Long.

Juliana CV:

Member of the Savanna Zebra in Africa. She has a feeling for him and was worried that he would quit racing (she once pretended to be sick so Kai would race in her place. That was when the TRF racers changed their opinion on Kai, who sliced Ryo's Tridagger X with his Beak Spider). The metal claw is just a protection against the slicing wind that both Beak Spider (and Zebra) creates. Her M4WD are the Beak Spider(Black), Beak Spider Zebra and Savanna Zebra.

Jim CV: Miyazaki Issei

An Australian boy who has a connection with Mikhail. His M4WD is the Native Sun (his motor is called Solar Motor which you'll use less power of the battery and the sun will be the energy).

Nieminen (not the rapper you know!) CV: Shibihara Chiyako

A member wanna-be, he stole the letter and came to the race in place of The Odin's leader because he felt that he's better than the leader. He always says that his M4WD is the strongest(he said in Japanese "buchigirie!". His M4WD is the White Knight (Red and Blue).

Pico CV:

A Jamaican Racer and the leader of Cool Carribeans and loves to dance. His M4WD is the Jammin' RG.

Twins Jin and Zen CV: Kida Ayumi(Zen)

Rival of the Ichimonji Bros. Their M4WD are the Vise Intruder and Phantom Blade.

Schmidt CV: Ishida Akira

Member of the Eisen Wolves along with Eric. He is always overprotective to Mikhail. His M4WD is the Bergkaiser Type:Schmidt. (He is the voice of Cho Hakkai [Gensoumaden Saiyuuki] and Makoto Kurumizawa [Boys Be] if you don't know)

Eric CV: Shinichiro Miki

Also a member of the Eisen Wolves. His M4WD is the Bergkaiser Type:Mikhail. (You know the voice of Asato Tsuzuki [Yami no Matsuei] and Yoji [Weiss Kreuz])

Rei Hijikata CV: Satoko Kito

Once a member of Ohgami's team along with Gen(he's the one with the lollypop and the owner of Brocken Gigant)J and Kai. Later then she challenges Marina for a match, who will win? It's up to you who'll win. Her M4WD is the Ray Stinger.

Borzoi CV:

The boss of the game! Has a connection with Marina's father. His M4WD

varies the character you play in the game (ex. if you pick Gouki's Max Breaker, then Borzoi has this M4WD too but the color is bronze).

Minami Arai CV: Yuriko Fuchisaki
The announcer of the M4WD race.

Jun Sagami CV: Nishimura Chinami
Retsu and Go's friend who owns a M4WD Shop along with her dad. Her M4WD is the Homerun Manta Jr.

5. Other M4WDs

I'll write here all of the cars that has been mentioned in the game but not playable (but if you play as an edited character, you'll choose any car you like!). Here's an example:

	2	3	4	5	6	7	8	9	10
1	*Chassis* *> - < *> == < * * == * *Weight* T R C B								
Beat Magnum	Super TZ	147.0	90.0	47.7	135.0	3	5	3	4

| 3- Average of the car's drifting | 8- Rev |
| 4- Average of the car's stability | 9- Cornering |
| 5- Average of the car's balance | 10- Brakes |

NOTE: Nos. 7-10, I decided to rate it 1 (weakest) to 5 (strongest).

I'll write them based on their categories in the game. (Let's and Go!!, WGP, MAX)

Brake UP-	500/1000/1500/2500/3000/3500/4000/4500

7d. Types of Chassis

I will write the types of chassis that has appeared in both game and

anime series.

Super 1 Chassis

These are only on the 'Fully Cowled' machines. Their body is a bit big and can add side rollers(not only in the front has rollers) in the middle of the body. Their motors are placed on the back along the gear, the belt(not the belt you know) is like a slim, rectangled part so if you place the batteries on the body, the batteries will not move or fall as long as the belt is in there!

Super TZ Chassis

These are also on the Fully Cowled machines. Their body is slim and if you try to put some side rollers, it'll be harder to manouver so I recommend you should have the extra rollers that can be placed on the back of your machine. The motor is also the same with the Super 1 Chassis.

Super X Chassis

These are only on the Aero M4WD machines. Their body is lot bigger than the other, the side rollers can now be placed again, the gear is also bigger(like 3:1 or so) but the motor is also on the back but look under of the machine, you should see some cilp or something like that, you can change motors anytime so you don't have to open the body and the belt is a clip-on. This chassis is favored among experts.

Super FM Chassis

This is also for the Fully Cowled(or Aero) machines. The body is also bigger, same for the gears but the motor is placed in front!(This is true! My Uncle has this machine with lights like in a real car)

Super LM

Same from the Super FM but the motor is placed in the back of the machine.

Original SS

So far I know Yuri's Omega is the only one who has this chassis.

Custom Chassis

This is one of the weirdest chassis...the motors and gears are different, and the body has differrent sizes and shape. Some of the wheels(like Dragon Delta) has only three wheels actually(so it's not M4WD machine you say?) but they still call it M4WD machine. Really weird.....

M4WD Mechanic Series

I know it shouldn't be in the chassis list but this is the rarest of them all. It doesn't have a chassis but their body is mechanical-like and it doesn't have rollers!

VS Chassis

This chassis is new and also to the Aero machines. The gear is also new(they call it 3.5:1) and belt is a clip-on thing or something like that. So far I know some has this chassis are Blitzer Sonic, Lightning Magnum, Blazing MAX and Blazing MAX Prism Blue Special.

8. Gameshark Codes

I found some codes on the Loading Magazine(Philippine Game Magazine). Here are the codes:

Infinite Points
80082f88 869f
80082f8a 0001

Infinite Battery Power
800fe5b0 00ba

Unlock Secret Option
80089de8 ffff
80089dea ffff

NOTE: If you input the Infinite Points code, you'll notice your points is 700 or something like that but still you can buy all the parts in the shop.

9. Version History

Ver. 1.0 - 04052003
Started making this FAQ, added ToC and others...

Ver. 2.0 - 05232003
Added types of chassis, lyrics, and the codes....
