

Raibu features 2D sprites reminiscent of classic SFC standouts: Zen Nippon: 2-3-4 Budokan and Super Fire Pro Wrestling X Premium mixed with a roster of well known Wrestlers and mixed martial artists from around the world such as Hulk Hogan, Big Van Vader, Tiger Mask, Royce Gracie and even Andre The Giant.

Perhaps, Champion Wrestler's greatest feature is the game's voice over commentary (Jikkyou Raibu translates to "Play by Play Live" in Japanese) with enough enthusiasm to give Wrestlemania The Arcade Game a definite run for it's money.

PRACTICE

Practice and learn Champion Wrestler's grapple
system against an opponent of your choosing.

The lessons in PRACTICE mode are:

- * Lockup timing (after approaching opponent)
- * Picking up opponent (after throwing them to ground)
- * Submission holds (on opponent laying on the ground)
- * Kick out of a pin or submission (applied by opponent)

Once the player or opponent loses the match,
the practice session is over.

TITLE MATCH MODE

After beating WORLD CHAMPIONSHIP mode in either the
singles or tag team division, players can access their
titles (with the use of a Memory Card) and put them on
the line against a human opponent.

A second player can also load their titles (via a
second Memory Card).

Unfortunately, computer players cannot be selected as opponents for title matches.

SECRETS, TIPS & TRICKS

=====
* Unlock the hidden mystery Wrestlers (Method #1):
=====

Complete Championship mode in either the singles or tag team division.

After the credits have finished, the five hidden Wrestlers will now be selectable characters.

=====
* Unlock Antonio Inoki:
=====

At the Title Screen, press Square, Square, Circle, Circle, Left, Down, Right, Up.

A sound effect will indicate the code has been inputted correctly.

Now, select Fujioka Dragon (Tatsumi Fujinami) to select the hidden Wrestler Antonio Inoki

It should also be noted that once Inoki is unlocked, the player will be unable to select the Wrestler "Fujioka

Dragon" (Tatsumi Fujinami) as the hidden Wrestler Inoki will take Dragon's place on the Wrestler selection screen.

To turn off the code and access Dragon once again, simply input the same code at the title screen.

=====
* Unlock Reitsukasa Sudo:
=====

At the title screen, quickly press Up, Right, Down, Left, Circle, Circle, Square, Square.

If done correctly, a ring bell sound effect will be heard allowing the player to select the super secret Wrestler Reitsukasa Sudo (Keiji Mutoh).

It should also be noted that once Sudo is unlocked, the player will be unable to select the Wrestler "Mudo" (The Great Muta) as the hidden Wrestler Sudo will take Mudo's place on the Wrestler selection screen.

To turn off the code and access Mudo once again, simply input the same code at the title screen.

=====
Unlock Title Match mode:
=====

Successfully complete World Championship mode in either the singles or tag team divisions.

After the game's credits, the Title Match Mode icon will now be a selectable option from the main menu.

=====
Easter Egg:
=====

At the title screen, press the A button to watch the trailer of a Japanese Horror thriller called "Shadow".

=====
Change the CPU's attire in WORLD CHAMPIONSHIP mode:
=====

After selecting your Wrestler or tag team, it is possible to change the color of your opponent's attire before beginning WORLD CHAMPIONSHIP mode.

By pressing the Left or Right directional buttons, you

can choose between 1 of 16 available colors for the computer controlled opponent.

This decision will also affect every other opponent in World Championship mode, too.

=====
Tag Team glitch:
=====

When playing against a tag team of computer opponents, place your starting Wrestler on the same side of your opponent's tag partner.

Eventually, when the computer opponent has taken enough damage, the computer opponent will begin to walk toward's their tag team partner's corner along the bottom of the ring.

With good timing and by placing yourself directly in front of the opponent's tag corner, you can prevent your opponent from tagging with a dropkick or strong strike attack (circle, Square + X or Triangle + Circle).

Repeat the glitch a handful of times for a major advantage and an even easier victory method for World Championship mode's tag team division!
