## INTRODUCTION

o-----o

Of all systems that I've FAQ'd a game for, I have never done one for the first Playstation. I've done 2, 3, PSP, and Vita but never the original. Well there is a first time for everything.

If you've played any game in the Twisted Metal series then you will know what to expect here except you are travelling on water in boats instead of using motor vehicles.

          GAMEPLAY  
o-----o

At the start of the game you are greeted with several options

Single Competition - Just a single match where you can choose to have a battle or a race game. A battle game pits four boaters against each other in an attempt to sink the other ships and become the winner. Race game is you against against three other players to get to the finish line. It is not necessary to sink any other ships to win. There are three tracks: The Speedway which is a figure-8 track, The Grand Canyon is full of rocks and has two bridges to cross over, and The Artic is cold place that is broken up and hard to negotiate through.

Race and Battle Tournaments - are the same as the single competitions except it takes you across all three tracks and gives a more fleshed out story.

The invitations arrived without return addresses. The recipients were 13 of the most ruthless and outrageous boat drivers in the world. You are one of them. On the front of the card was a skull and inside, a message. In red print it said "The rules are simple: destroy everything," followed by the locations of the first battle. Quickly you prepared your boat: loading the guns, polishing the chrome on the engine. For years rumors have circulated about a mysterious tournament that takes place once a year. It is also hinted that the organization holding the contest lies in the center of the Bermuda Triangle. The grand prize, if you survive, is the revelation of an age-old secret. Those who have competed before have never been seen again. Now it is your turn. From this moment on you have only two choices: win and get the prize or end up DEAD IN THE WATER.

To Player Competition - Two human players versus each other.

Link Game - Connect 2 Playstations together to play a game.

Load Tournament and Load Settings - Any saved tournament or setting are loaded into the game.

Options - Change how the game is played.

Like I mentioned earlier this is basically Twisted Metal on water. But wait, I am not through yet there are more than those three courses but they are normally accessible during the tournament but to use them, hold [ ] and ( ) at the main menu and press L2, L2, R1, L1 and a chicken clucks. The other courses you will see are The Amazon, The Bayou, Loch Ness, Hong Kong, The Log Ride, The Bermuda Triangle.
