GAME INTRODUCTION  
=====

(Introduction adapted from the "DINOSAUR" movie.)

Set 65 million year ago, DINOSAUR is a game that lets you interact with the compelling story of an iguanodon named Aladar, who is separated from his own kind and raised by a clan of lemurs, including the wisecracking Zini and the compassionate Flia. When a devastating meteor shower plunges their world into chaos, Aladar and his family follow a herd of dinosaurs heading for the safety of the "nesting grounds." Along the way, Aladar befriends Baylene, the dignified, elderly brachiosaur with a take-no-prisoners attitude; Eema, the unstoppable styrachosaur; and Neera, a feisty fellow iguanodon. Together, they must stand strog amidst food and water shortages, and threat of attacks by carnotaurs, and Aladar's run-ins with the herd's stubborn leader, Kron. However, you control the mighty Aladar and his friends, Zini and Flia in this prehistoric adventure game from Disney Interactive.

=====

## MAIN CHARACTERS

=====

(Descriptions of the main characters are taken directly from the in-game encyclopedia.)

**ALADAR (Iguanodon):** Traces of iguanodon have been found all around the world from South America to the Arctic Circle. This evidence suggest that they were widespread, likely living and moving in great herds. When fossilized teeth of an Iguanodon were first found, scientists noticed a similarity to the teeth of an iguana.

**ZINI (Lemur):** Members of this family of mammals lived in trees, some of them leaping and clinging, some walking and running on the top of branches. They had eyes at the front of there face and a large brain for stereoscopic vision, both necessary adaptations to a life in the trees.

**FLIA (Pteranodon):** The pterandon had wings that measured 23 feet, but the entire dinosaur weighed only 90 pounds. It likely glided on up drafts since it would have been difficult to flap such enormous wings. It had a long head that likely stabilized it during flight.

**BAYLENE (Brachiosaur):** The brachiosaur is one of the largest dinosaurs ever discovered. It was about 75 feet long, 10 feet tall, and weighed close to 90 tons. In order to support its huge body mass, the brachiosaur had an incredible hollow skeleton the was lightweight yet super strong.

**EEMA (Styrachosaur):** The styrachosaur had a spectacular array of horns protruding from the back of its skull and a large horn on the tip of its nose. These defenses would have made the styrachosaur a difficult meal for any predator.

**URL (Dinosaur-like dog):** This dinosaur is small an acts like a dog.

**NERRA and KRON (Igaunodons):** Kron is the stubborn leader of the herd while Neera is the sister of Kron.

**CHROME (Carnotaurus):** The big nasty boss of the game that must be defeated in order for the herd to survive and live in peace.

=====

## ENEMIES

=====

(Descriptions of the enemies are also taken directly from the in-game encyclopedia.)

**OVIRAPTOR:** Oviraptors were relatively small, measuring six feet in length. They had a large beak that may have been used for breaking hard surfaces. This had lead to the speculation that the oviraptor ate eggs and so it has been name the "egg" thief.

**CHAMPOSAURUS:** Although entirely unrelated, the champosaurus looked remarkably like the modern crocodile. It had a long slim snout filled with sharp teeth and extremely powerful jaws with which it ate fish, turtles and mollusks. It averaged above five feet in length.

**RAPTOR:** The Raptor had large slashing claws on its feet that could

slice down through the flesh of its victim like a sickle through tall grass making it one of the most dangerous dinosaurs of its time. It was only six feet long which means it was likely very fast and maneuverable.

ALBERTOSAUR: The albertosaur was a close relative of the tyrannosaurus rex; they both came from the family Tyrannosauridae. It was a meat eater with a large head, powerful back legs, tiny arms and only two fingers on each hand. Scientists today are puzzled as to the purpose of the albertosaur's odd arms and hands.

ANKYLOSAUR: The family of dinosaurs known as Ankylosauria takes its name from the Ankylosaur. It was the largest dinosaur of this type, weighing roughly four tons and measuring approximately 16 feet wide. The ankysaurus' body was covered with hundreds of oval shaped plates that ran from the head down to the tail. The tail ended in a large bony club; a common trait among all Ankylosauria.

ICARONYCTERIS: The icaronycteris was an ancestor of modern insect eating bats. Even at this early stage of evolution, bats roosted upside down, as indicated by the claws on the icaronycteris' thumb and forefinger.

SPINOSAUR: The spinosaur had a sail of skin held up with bony spikes on its back that it used for heating and cooling itself. It had a head like a crocodile, very pointed with many teeth, and a huge claw on its thumb; evidence that it was a fish eater.

CARNOTAURUS: The carnotaurus was a theropod, a meat eater, which first evolved some 200 million years ago. It had horns on its head like a bull; hence the name "carno", flesh eating, "taurus", bull. This is the most deadliest dinosaur that you will encounter in the game.

=====  
GENERAL TIPS AND HINTS  
=====

- + If you see lightning strike a tree, collect the balls of energy from it as fast as you can. Save the energy to use later as a powerful special attack.
- + Monoliths record your progress through the level. To save your game to a MEMORY CARD, access the "pause" menu and select "Save Game."
- + A branch in Flia's beak stuns enemies but also blocks some of the damage from enemy attacks.
- + Zini is the only character who can hold the fruits that you will find in the game. Also, he is able to carry stones to throw at enemies.
- + You can team up by pressing the triangle button. Also use this when attacking as much as possible. You can almost defeat any enemy this way.
- + A Health Plant instantly restore full health to the hero that eats it. If the heroes find the plant while teamed up, then they share it and each gain some health.
- + A Life Crystal will automatically revive a dying hero. It will be store safe into your inventory until needed.

+ Orange fruits will replenish approximately one-fourth of your energy, while red fruits will replenish approximately one-half of your energy.

=====  
WALKTHROUGH  
=====

+++++  
ISLAND PARADISE  
+++++

OBJECTIVE: Rescue the egg. Eliminate all enemies on the island.

Flia will automatically fly around the island. When she see that the egg is in trouble, It is up to use to swoop down and defeat the OVIRAPTOR. Next pick up the egg by landing on it and picking it up. Fly to the east and put it down in the moss patch where you started. Put it down in the moss patch and the egg will hatch.

Zini will hear the baby crying and it is up to use to find the baby crying. Walk north to the northwest to reach Flia and the baby dinosaur (Aladar). She will ask Zini for help. Zini is the only one who can pick up fruit. Next, have Zini climb up the tree and snag the fruit to the right. Feed it to Aladar. Aladar is still hungry and Flia informs you of where more fruit can be found.

Next, you will be using Zini to head back to where the egg was originally found. First, walk north and follow the grass path north until it leads west. Next keep walking west until you see what looks like a fairway on a golf course. The path will wind down then up. Continue to the west, but do not fall off the cliff onto the dirt below. When you make it to the fruit tree, there will be two CHAMPOSURUS guarding it. Distract the one by jumping up and down. Then hop up the tree and grab the fruit. Now backtrack the way you came so you can feed Aladar.

Flia informs you that there is no more fruit on this side of the island. Now, you must use Flia to scout the island for more fruit. Fly over the river, south and follow it to the west when it branches off. Now fly southwest from here and you will find a fruit tree. It is guarded by three CHAMPOSAURUS. Save your progress by flying northwest and pass the Monolith. Next fly back to where Aladar and Zini are.

Zini tells Aladar to use his tail swing to break boulders for him so he can use stones for throwing at enemies. Flia asks Aladar to swing his tail into sapling trees so that she can use branches in her beak to stun enemies. Use Aladar to break the boulder around the area. There are three boulders and two sapling trees. Next have Zini walk all the way south, past the elders of Zini that around the tree and up north where a Life Crystal is. Also, have Zini picks up the stones. Next have Flia pick up the tree branch with her beak. You are now ready to make an attack plan.

Now team up and take control of Aladar. Take the river to the west and go up the hill. Next, take the path back to where the second fruit was found. Destroy the two CHAMPOSAURUS lying there. Next, walk back east and follow the dirt path by the palm tree. Walk to the right and

take out the CHAMPOSAURUS. Now that you've cleared the path, use Zini to walk up the hill and collect the energy balls when lightning strike the tree.

After collecting the energy balls, head to the left and walk down the south path that lies over the river. Get ready to battle the three CHAMPOSAURUS that are up ahead. After defeating them, grab the final two fruits for Aladar. Do not forget to use the save Monolith at the northwest part of this island. If needed, break up the sapling tree at the bottom of the island for Flia, because your first big test lies ahead.

Next, walk into the river to the north near the waterfall and get ready to take on two RAPTORS. Be careful because you are very weak at this part of the game and they are strong and very fast. Team up and make sure Flia has a branch in her beak at all times to stun them. When they are stunned, whack them with your tail. After defeating these two enemies, grab the Health Plant.

Now start walking southwest and you will reach a save Monolith at the end of the island. As you walk north, you will encounter four more CHAMPOSAURUS and a Life Crystal. Collect the Life Crystal and make these enemies extinct. Now continue walking northeast until you encounter the final RAPTOR. Team up and take care of this last enemy. Its demise marks the end of the first level.

++++  
A STRANGE NEW WORLD  
++++

OBJECTIVE: Collect the 5 healing fruits on the island. Feed Flia so that she regains full health. (NOTE: Make sure that when you collect all 5 healing fruits that you do not use any of them on Aladar or Zini. Otherwise, you will not be able to complete this level!)

You begin at the bottom of this new island. Walk to the northwest. Defeat the two CHAMPOSAURUS and collect the stones for Zini. Always team up when possible. Next walk towards the northwest until you see a path. Your next encounter will be against a RAPTOR. After defeating it, walk a little to the northwest and have Zini grab the first healing fruit on this level. One down, four to go.

After acquiring the fruit, there is another RAPTOR to the north. Whack it with your tail and gain some more experience. Next, continue walking to the north and dispose of another RAPTOR, that is running next to the tree. Afterward, proceed to the east but use caution. You will have to take on two RAPTORS and a CHAMPOSAURUS at the same time. After taking care of these enemies, walk to the north, and you will find a HEALTH PLANT, and a RAPTOR guarding the second healing fruit. Make quick work of the RAPTOR and have Zini snag the second healing fruit. Two down, three to go.

After grabbing the second healing fruit, walk south/southwest until you reach the save Monolith. This would be a good place to save your game. After saving your game, proceed up north until you reach a path. Follow it to the right. Along the way, pick up the stones for Zini. After picking up the stones, you will have to fend off another RAPTOR. Defeat and continue to the right. The path will slope southeast where you will find a Life Crystal. Keep walking southeast but get ready to

face off against three RAPTORS. Team up and defeat these fast and furious foes. (HINT: Try to lure one of them away at a time because they outnumber you 3 to 1.) Afterwards, pick up the rocks for Zini. If you've been hurt in battle, do not worry. A Health Plant awaits you as you continue walking south along the path. As you walk south, pick up the stones for Zini and take out another RAPTOR or two. Now you know what the RAPTORS were guarding, the third healing fruit! Three down, two to go.

Now you will have to backtrack all the way back to the save Monolith. Save your game here and walk across the river to the east. Three RAPTORS will be waiting for you on the other side. You should be strong enough now to make quick work of these enemies by now. Walk to the northeast and pick up stones for Zini. Next, walk a little to the east and collect the energy balls when the lightning strikes the tree. Finally, grab the fourth healing fruit, right by the tree that was struck by lightning. Four down, one to go.

Now walk down south and continue along the path. You will see a path to the right. There is a health plant for you to collect by the tree. Now you can walk back to the path and continue south and defeat the two CHAMPOSAURUS that you see. Continue southwest along the path and destroy the CHAMPOSAURUS. After defeating it, take out the other CHAMPOSAURUS at the edge of the island. Make your way to the northeast and take on another CHAMPOSAURUS. Do not forget to pick up the stones for Zini. Afterwards, walk a little north and snag the final healing fruit. Now it is time to go find Flia.

Walk along the northeast path to where the merge was previously. Continue walking to the east to where the two fallen RAPTORS are. You will see a little path. Follow it to the west, walk down a little hill where you will find Flia. Fee her the five healing fruits and you will complete the level.

++++  
FOOTPRINTS IN THE SAND  
++++

OBJECTIVE: Find any stragglers that may need help.

Team up and walk south. Pick up the stones for Zini. Next, follow the path south and follow the tracks. It will take you to a RAPTOR. Defeat the RAPTOR and continue to walk south where there are more tracks. Here, you will find BAYLENE, the brachiosaur. She will ask you to help her find EEMA and URL.

Next, walk to the left and pick up the stones for Zini. Next, backtrack to the tracks and take the south path at the intersection. Follow it down and to the left and destroy the CHAMPOSAURUS. Take the path north to where the elder lemur is. He will give you advice and there is an orange fruit for you to take. From where the fallen CHAMPOSAURUS is, take the left path south where another CHAMPOSAURUS will be waiting. Make quick work of it and walk east where a RAPTOR will be waiting. Take care of it and head to the left where a couple of stones for Zini are. Now backtrack and head to the right a little where Aladar can break up a sapling tree for Flia. After equipping Flia, head just a little more to the right and break the boulders down for Zini. Now continue walking east and the tracks will lead to another RAPTOR. After crushing the RAPTOR, walk northwest and follow the path that looks

like a horseshoe. At the dead-end, you will find rocks and a red fruit. Now, start walking to the west and you will find EEMA, the styrachosaur.

To the left of EEMA is a sapling tree for Flia and some stones for Zini. Directly to the north is a save Monolith. Walk to the northwest and take on the two RAPTORS. After defeating them, grab the energy balls, from the lightning struck tree. Next, walk straight to the right and grab the Health Plant to replenish lost energy. From there, walk directly south and destroy the RAPTOR, that is protecting the Life Crystal. Pick up the Life Crystal and there will be a save Monolith as you progress southward. It is the same Monolith as before!

Now walk to the east of EEMA and take the path to the northeast. Follow it and you will find a big pile of rocks for Zini. Backtrack and take the path to the east and make the RAPTOR extinct. After defeating the RAPTOR, pick up the red fruit that is south in the bush. As you walk south, there will be two RAPTORS to finish off. Now, proceed to the southwest and grab some rocks for Zini. After collecting the rocks, backtrack and take the path to the southeast, beat the RAPTOR, follow it and pick up another Life Crystal and an orange fruit. From here, walk to the right where you came and proceed to walk straight north. Defeat the RAPTOR, and then you will find URL, who is a dog? It looks like a smaller version of the Styrachosaur. Anyway, this ends the level.

++++  
KEEPING UP TO THE HERD  
++++

OBJECTIVE: Lead Baylene, Eema, And Url to catch up with the herd.

Before making this journey, have Aladar break the sapling tree for Flia and proceed to the right. Do not move to fast though. Remember, you are leading your elderly friends! The path will wind south. Take out the threatening RAPTOR. Walk south and break up the boulders for Zini. Next, take out the two RAPTORS. The path will wind to the east where you will have to take down a CHAMPOSAURUS. Now, have Aladar break up the boulders for Zini. Next, you will have to defeat another RAPTOR or two by the trees. Snag the stones for Zini as well. (HINT: If any of your elderly friends take damage, you will have to heal them before you proceed.) Now walk to the east where you will encounter two more RAPTORS. KO the RAPTORS and move to the north. Grab the branch for Flia and take out another pesky RAPTOR. If you've been hurt, don't worry. Just pick up the Health Plant. Next, progress to the east where the trees are. Here, you will have to fend of another RAPTOR. Having defeated it, walk to the north and save your game at the Monolith.

Directly to the northeast of the Monolith is a Health Plant. As you proceed to the east, the past with slope southwards. Get ready to battle another RAPTOR. There will also be a PTERANODON flying around. Have Flia fly behind it and ground this flying menace. Now, walk to the southeast where you will meet up with NEERA, fellow Iguanodon and the herd's stubborn leader, KRON. Thus, this ends level four.

++++  
THE LAKE  
++++

OBJECTIVE: Release the water from the cracked ground. (HINT: To get

BAYLENE over the cracks, have Zini jump up and down to get her moving. Also, give EEMA some fruit at the beginning so he does not die on you. He will lose health, a little at a time throughout this level.)

The first of five cracks is at the beginning. Have Baylene walk over it. One down, four to go.

Next, walk up the hill to the south and pick up the orange fruit. Continue walking to the north and pick up another orange fruit. Next, backtrack to where the first crack is at. Now, lead Baylene to the left and smash the boulder for Zini. Walk to the north, and smash the two boulders for Zini. Next, take out the RAPTOR that is on the ground and have Flia defeat the PTERANODON that is flying in the air. Proceed east where the boulders were and defeat the RAPTOR along the way. Next, continue to lead Baylene to the second crack. Two down, three to go.

Now take out another feisty RAPTOR and walk up the hill to the east. Remember, always team up when possible. Make your way to the northwest and pick up the orange and red fruit, a Life Crystal, and another red and orange fruit. However, you will have to defeat the RAPTOR that is guarding these treasures. Afterwards, walk southwest and smash the boulder for Zini. Continue making your way west and defeat the two RAPTORS that are blocking your path. After defeating these two enemies, you will have to take on two more RAPTORS. Keep swinging Aladar's tail and you will triumph. Continue to the west where you will pick up two more orange and red fruits and a valuable Health Plant. However, a RAPTOR will be guarding the Health Plant. Next proceed more to the west where you will find a Life Crystal and a tree that is struck by lightning. Grab the energy balls, if needed. Next to the tree will be another orange and red fruit. Now, backtrack all the way back to Baylene who is at the second crack.

Start leading her to the west, until you encounter another RAPTOR. Take this enemy out and lead Baylene to the north. Another RAPTOR will try and stop your progress. KO this RAPTOR and keep going. As you walk to the north, smash the boulder for Zini and take out the RAPTOR that is in the way. Next, have Baylene step on the third crack. Three down, two to go.

Get Baylene's attention and have her follow you south. When the dried up stream splits, you will have to deal with a PTERANODON. Have Flia ground this flying foe. You will also have to deal with another RAPTOR. Afterwards, proceed down to the southwest and have Baylene step on the fourth crack. Four down, one to go.

Leave Baylene here, and walk northwest to the fifth crack and take out the two RAPTORS and the PTERANODON for more experience points. Walk up the hill then proceed to the south where you can save your progress at the Monolith. Walk to the east and take out the two RAPTORS for some experience points and grab the red fruit. Proceed to the north and KO another RAPTOR. He was guarding an orange fruit that was hiding in a tree and a Health Plant. Eat the plant to replenish lost health. Finally, make your way back to Baylene and lead her northwest to the fifth and final crack. The level is complete and there is plenty of water for everyone.

++++  
BABY SITTING  
++++

OBJECTIVE: Rescue the missing baby Iguanodon and lead them back to the herd.

(WARNING: This is the most frustrating level in the game. If you make it past this level, then it will be clear sailing the rest of the way. Stick with it!)

(HINT: Just like in the last level, when you find a missing baby dino, have Zini jump up and down for it to follow you.)

Team up and walk all the way to the left. Next walk straight up the hill to the south, When you make it up the hill, walk west and then south. Finally, when you reach the end of the cliff, make your way southeast down the hill where you will find the first baby dino. Lead the baby to the east and destroy the two RAPTORS that are in the way. Walk down the hill and to the north. Drop the baby dino off with the herd. One down, three to find.

Next, make your way east and talk to the elder lemur. Grab the orange fruit and proceed southwest. Smash the boulders for Zini and follow the path to the southwest. It will wrap around and you will be rewarded with an orange fruit and a red fruit. Continue along and KO the hungry RAPTOR. Now walk south of the RAPTOR until you reach a dirt path. Follow the path as it winds to the southeast. Whack the RAPTOR with your tail and keep going. Another RAPTOR will try to stop your progress at the end of the path. Defeat the RAPTOR and continue walking south. KO the RAPTOR for more experience points and pick up the stones for Zini. Now walk to the east where you will see lava. Do not walk in the lava because it will hurt you quickly.

Walk along the e path above the lava to the northeast. Pick up the stones for Zini along the way. Follow the path and it will lead you to the second missing baby dino but do not lead it yet. Instead, continue walking to the southeast and pick up the stones for Zini and smash the boulder as well. A PTERANODON will attack. Have Flia take care of this nuisance. Walk to the southwest a little more and save your progress at the Monolith.

Walk to the north and pick up the red fruit. Now walk to the northwest and pick up the rocks for Zini. Finally, meet up with the baby dino and make it follow you. Now you will have to backtrack all the way back to the herd. Just lead it back the same way you came. After you pass through the dirt path on the way back, an ALBERTOSAUR might come down to attack you. Team up and swing that tail until it is dead. After defeating it, you will gain mega experience points. Continue to lead the baby back to the herd. Two down, two more to find.

Now make your way southeast and take out the RAPTOR and pick up the stones for Zini. Next, make your way north and jump on the steps to the left. A RAPTOR will be waiting for you at the top of the hill. Next, jump to the north and walk to the east. Walk across the small slope to the east where you will find the third baby dino. If you walk to the west you will find the tree that gets struck by lightning. Lead the baby dino and make your way southwest, and down the path. Dispose of the waiting RAPTOR and grab yourself a snack via the Health Plant. Lead the baby down the slope to the west and down a couple of steps. Next, smash the boulder for Zini and get ready to battle a PTERANODON and a RAPTOR.

After defeating these enemies, walk to the west where another RAPTOR and an ALBERTOSAUR will come out and play. After beating up

these two worthy opponents, walk to the southeast and take on the three RAPTORS at once. Swing that might tail Aladar. Now, continue to lead the baby dino to the west path and lead the baby all the way northwest back to the herd. Three down, one left to find!

Now, the last missing baby dino is all the way on the southeast end of the map. So you will have to walk, southeast from where you just came. Let the fallen RAPTORS be your guide. When you make it back to where you took on the three RAPTORS, keep walking east where you will have to fend off two more RAPTORS. After defeating them, walk to the east and then southwest and look for a plant with two fruits on it. Slowly make your way up the hill and grab these two orange fruits. Now continue your journey east and grab the red fruit along the way in the bush. Now make your way up the small hill to the southeast and then walk south/southeast. Here you will find the last missing baby dino.

Next, battle the flying PTERANODON, and begin leading this baby dino to the southwest. Go down the hill and KO the RAPTOR that is waiting to pounce you. Make the baby dino follow you and travel east. You will have to take on another RAPTOR. After defeating this enemy, you will walk past two shrubs and the path will change on the ground. Proceed and walk northwest and defeat the awaiting RAPTOR.

Now walk to the north and grab the Health Plant. Then, walk to the east and fend off another RAPTOR. Continue walking to the northwest until you reach the lava. Next, take the path to the left that goes around the lava. Then take the path around the bend. And then walk east. Finally, proceed to the north where the final missing baby will rejoin the herd. Jump for joy, you have survived this level!!!

++++  
FINDING NEERA  
++++

OBJECTIVE: Save Neera from the vicious Spinosaur.

This landscape is pretty dark. Team up and follow the path southeast. Pick up the stones for Zini. As you walk south, you will encounter a RAPTOR. After disposing of the RAPTOR, break up the sapling tree for Flia. Walk to the right and snag the two red fruits and the orange fruit. Now proceed to the left and walk south. Save your progress at the save Monolith.

Now walk south and to the right and pick off the orange and red fruit from the tree. Next proceed to the left and pick up the stones for Zini. Afterwards, KO the ALBERTOSAUR. Now pick up some stones for Zini and walk west. A RAPTOR is waiting for you to make it extinct. Proceed to the left and pick up the Health Plant and the Life Crystal. But do not putter around because Neera keeps losing health a little bit at a time. Walk to the northwest and beat up the two RAPTORS and then pick up the stones for Zini. Proceed to the northwest and triple team the triplicates of RAPTORS. After defeating them, proceed to the north and walk northwest. Grab the orange and the red fruit and save your game at the Monolith.

Now backtrack and walk west to take on another RAPTOR. Keep walking the path to the west and you will find another tree with two orange fruits and a red one. Take the path south and take out the furious ALBERTOSAUR. Do not forget to collect the energy balls from the

tree that got stuck by lightning. After defeating this foe, walk southwest and take on another ALBERTOSAUR. If you need health, do not fret, there is a Health Plant for you. After defeating the ALBERTOSAUR, pluck the two orange and red fruits off of the tree.

Get ready to battle the SPINOSAUR by walking south. Team up and stay on top of him using all the offense that you've got. Try not to let him get near NEERA. When you defeat the Spinosaur, you will be thanked and the level will end.

++++  
CONFRONTING KRON  
++++

OBJECTIVE: Take Url for a walk. Locate the herd and confront Kron.

You will only be able to use Zini on this part of the level. So wherever Url goes, you go. Url will not move if he loses health so protect him and feed him fruit if he gets hit. Walk north and collect the stones. Walk left and collect all of the stones. Take out the two RAPTORS by the stones and catch back up with Url. Walk with Url to the north and save your progress at the Monolith.

Walk to the left and snag the two orange fruits from the bush and also take the Life Crystal. Now catch back up with Url. Url will walk to the west then south. Have Zini walk to the northeast and take out the two prowling RAPTORS. Next, grab the Life Crystal and the two orange fruits. Now hurry and catch up with Url and fend off the ANKYLOSAUR with the stones you have found. Next, Url will walk south and to the right. Fend off the two RAPTORS and heal Url if he gets hit. Url will walk southeast and then north. Grab the stones along the way. Just keep in mind, wherever Url goes, follow him. He moves pretty fast too! Finally, he will eventually walk back to where the others are waiting.

Next, you will only be able to use Flia so she can find out where the herd is. This is the easy part. To locate the herd, fly all the way to the northeast part of the map, locate the herd, and then fly back to the others that are waiting.

Now, you will only be able to use Aladar. His job will be to talk to the herd and confront Kron. Now walk all the way to the north and save your progress at the Monolith. Walk to the southeast then to the northeast. Next, follow the path south where it will wind southeast then south again. Now continue to the right and then walk northeast. If the PTERANODON fly low enough, whack it with your tail. Walk to the north and defeat the STYRACHOSAUR. Continue walking to the northwest, then to the right as far as you can go. Save your progress at the Monolith and grab the Health Plant if needed.

Now, get ready to confront KRON. You will be forced to battle him. Just keep attacking with your tail. When you knock his energy down to about 25%, he will come to his senses, thus ending the level.

++++  
UNWELCOME GUEST  
++++

OBJECTIVE: Defeat the Carnotaur.

Team up and run down to the southwest and then south. Keep moving while your breath for running returns. Heal Aladar when needed with fruit. Continue running to the east. Keep moving, the path will bend northeast. You will see a small path to the right. Take it and grab the Health Plant. Walk further south and collect the energy ball from the lightning struck tree. You will need at least three balls of energy to complete this level. Go back down the small path and run north. You will get the hint that the ceiling is unstable. Lure the Carnotaur into the lighted spot and use Aladar's SPECIAL STOMP. A big boulder will come crashing down on the Carnotaur. One down, two to go.

Run to the east and then southeast because now the beast is really angry with you now. Run southeast and then follow the path up the hill to the Health Plant. Now backtrack back down the hill and run to the right and the down. Lure the Carnotaur near the spotlight and use Aladar's SPECIAL STOMP. Let the Carnotaur have it! Two down, one more to go.

Now run to the northeast and then to the north where the last spotlight is. Wait for the Carnotaur to be near it and use Aladar's SPECIAL STOMP one more time. KABLAM! The Carnotaur is defeated and the level ends.

MOUNTAIN LANE  
++++

OBJECTIVE: Eliminate all enemies along the path to reach the end.

Team up and follow the path to the northeast. Along the way you will do battle with a SPINOSAUR. Defeat it and move on. Eight to go.

Proceed south along the path. When you get to the bottom of the path, break up the sapling tree for Flia. Walk to the east, the northeast. You will do battle with a STYRACHOSAUR. Crush it and move on. Seven to go.

Next, take the path to the west and break up the three boulders for Zini. Get ready to do battle with two SPINOSAURS at once. After you KO these two enemies, proceed to the northwest path. And then there were five.

The path will wrap around to the north, then east, then south where you will reach the lava. You may jump over the lava to the other platform to grab the Life Crystal. Likewise, the other two islands will have a red fruit on each one. When you've gotten these goodies, jump back onto the path and travel northwest as the path leads west. Do not forget to pick up the orange fruits and the red fruits on the trees that you pass by. Now you will engage in battle with a two SPINOSAURS. Team up and make them extinct. Three left to dispose of.

Walk north and then to the northeast and fend off another SPINOSAUR. As you walk northeast you will see lightning strike a tree. Grab the energy ball for your special meter. Next, grab the orange and red fruit off of the tree. Keep moving along the path to the northwest and smash the boulders for Zini. Follow the winding path and you will do battle with another SPINOSAUR. Destroy this enemy and keep going. And then

there was one.

Now, jump across the lava to the northwest and save your game at the Monolith. Next, grab the orange fruit off of the tree. Next, jump across the lava to the right, follow the path and make the STYRACHOSAUR go bye-bye by whacking it with your tail. Do not forget to smash the boulders for Zini and grab the energy balls from the lightning struck tree. Finally, jump up the mountain and take the path north in the middle. This ends the level.

UNPLEASANT COMPANY  
++++

OBJECTIVE: Outrun the Carnotaur to catch up to the herd.

Immediately team up and run to the northeast path. Here, you will discover four Life Crystals. Now, you will have to run south. Next, pick up the orange fruit along the way. Do not worry about killing enemies. The path will wind to the north, follow it. Run, Aladar, run. You will see a little path at the top. It leads to the north. Save your progress at the Monolith.

Now run down the south path. Go up the little hill and snack on the Health Plant. Run around the little path and head south after it wraps around. Snag the orange and the red fruit that is in the bush. Next, move through the opening to the right and run southward. Smash the three boulders for Zini. As you run north, pick up the Life Crystal. Run to the northeast and follow the path uphill that wraps around to a Monolith. Save you game.

Next, run to the southeast. Then, smash the boulders for Zini so you can access the path southwest. Finally, you will meet up with the herd with the CARNOTAUR on your heals. Thus, the level ends.

++++  
FINAL SHOWDOWN  
++++

OBJECTIVE: Defeat the Carnotaur.

Team up and collect all of the stones for Zini. Also, walk to the left and grab the Life Crystal. Walk to the north and grab the two red fruits. If you notice, there are Health Plants scattered all across this level. You may or may not need them later. Now, run to the right and get ready to battle CHROME, the CARNOTAUR. Run south to where he is lurking. Pick up the energy ball from the tree when lightning strikes it.

To defeat CHROME, use Flia's SPECIAL DIZZY ATTACK when the CARNOTAUR is in range. She will fly around in a circle and dizzy this mighty beast. Now, have Aladar whack him with your tail until you push him off the cliff to the left. The CARNOTAUR will fall off and you will hear a big THUD! CONGRATULATIONS! YOU HAVE BEATEN THE GAME! Enjoy the ending sequence and the credits.
