-- Squaresoft(www.squaresoft.com)
For making the best PSX FF to date.

-- Gameshark(www.interact.com)
For making a very cool cheat device...but I liked 3.0 better than 3.2.

-- CJayC(www.gamefaqs.com)
For making a beautiful website and dedication to it.

----- [Introduction] -----

Welcome all...this is these are the first(unofficial) Gameshark codes to be posted on the web for the fabulous game, Final Fantasy IX! These codes are for only use on the Japanese version of FFIIX, I'm pretty certain these codes won't work for the american version of the game since translation files ALWAYS have different hexadecimal values. Don't post these codes on www.cmgsgccc.com or www.gameshark.com without my permission, if you do decide to post these codes at www.cmgsgccc.com or www.gameshark.com then you should credit THEM ALL TO ME...that's the ONLY WAY I WILL GIVE you permission to post these codes up at another site.

These codes are custom made by yours truly...(^^).

Also note that YOU MAY NOT USE THESE CODES ON YOUR FAQ, you can use them on your HTML page and direct a credit link to "www.vfaqs.net" to credit them to me. Why do I not want you to use these codes on your FAQ? Because what would be the point of this FAQ then? And besides...your smart enough to make your own codes aren't you? So any email regarding the usage of these codes WILL BE DELETED. And if you do post them on your FAQ, I will pester you and bother you and tell the webmaster of whatever site your FAQ is posted under to take down your FAQ.

You can however post this FAQ(unaltered, credited to me, and no profit is made) on your website if you wish...you already have my permission assuming you are legit with the information enclosed in the paratheses above on this same paragraph).

Thank you for following my guidelines, and check out my Final Fantasy IX walkthrough as well!

**** TOTAL # OF CODES: 281 ****

Address	Value	Description
80108724	9999	1st character has infinite HP(NOTE1)
8008FBBC	9999	2nd character has infinite HP
801F783C	FFFF	65535 EXP points for 2nd and 4th slot characters(NOTE2)
801F7824	FFFF	
801F77FC	FFFF	
801F783C	9999	33535 EXP points for 2nd and 4th slot characters(NOTE2)
801F7824	9999	
801F77FC	9999	
8008FCF0	FFFF	Maximum Strength/Def. for Freija/Wait Guage ALWAYS FULL
8008FC60	FFFF	Maximum Strength/Def. For Adelbert/Wait Guage ALWAYS FULL
8008FB00	FFFF	Maximum Strength/Def. for Garnet/Wait Guage ALWAYS FULL
8008FAB0	FFFF	Maximum Strength/Def. for Zidane/Wait guage ALWAYS FULL

8008FEA0	FFFF	Maximum Strength/Def. for Coral/WAIT GUAGE ALWAYS FULL
800FF0D0	FFFF	Gain 535 AP points after each battle
8008FD00	0999	Infinite MP for Eiko
8008FFB0	FFFF	Infinite Gold

NOTE1: This code has been prone to freeze the game especially during scenarios...but luckily this code never freezes during battles, and it's good too since you mainly use it during battle! If possible, try to avoid turning on this code with the code below it(the lots of EXP Pts. code)...you practically quindruple the chance of the game being frozen.

NOTE2: This code only works if your characters are in the 2nd and 4th slot, after battles your 1th and 3rd characters will still recieve the normal amount of EXP points while your 3rd and 4th characters will recieve a lot of EXP points. This code does freeze the game sometimes but only 5% of the time, other than that it's a pretty safe code to use. I'm too lazy to make the same code for the 1st and 3rd slot characters...maybe you can do it!

Below are the codes to clear the slot in your item menu, if any of these codes do not work, please inform me(it would be best if you inform me which code does not work, preferably the code with both the lowest value and the one that doesn't function properly...this makes it A LOT more easier to fix the code, those of you who understand the hexidecimal system would know why).

NOTE: The codes above (the C.M. codes) are tricky...DO NOT switch party members (say you switch slots one with three or you try to switch party members) because you will delete that character with another character (the character that you had on). Also when you have two of the same character, they work in synchronized (sp?) fashion, meaning if you lose one HP the other of the SAME character loses one HP and so on. I'll try to fix this code...but I've failed several times and ended up freezing the game...I will keep trying though.

-- Squaresoft (www.squaresoft.com)
For making the best PSX FF to date.

-- Gameshark (www.interact.com)
For making a very cool cheat device...but I liked 3.0 better than 3.2.

-- CJayC (www.gamefaqs.com)
For making a beautiful website and dedication to it.
