No Manipulate Attacks!

Turks:Reno III's ATTACKS:

Attack 1: <Short Staff> [15C] Physical
Target: One Opponent
Element: Hit
Att%: 110
Power: 20
Base Damage: 780 HP

Attack 2: Neo Turk Light [371] Magical 0 Dam
Target: One Opponent
Element: Hit
Att%: 90
Status Inflict: Confusion (100%)

Attack 3: Electroprod 2 [373] Physical
Target: One Opponent
Element: Lightning
Att%: 90
Power: 68
Base Damage: 2652 HP

Attack 4: <(Report)> [164] Physical 0 Dam
Target: Self
Att%: Auto Hit
Death Animation

Turks:Reno III's BATTLE PLAN: (Repeats)

SETUP: Disable default Death Handling

1/2 Chance: Use <Short Staff> on Rnd Target
1/2 Chance: Use Neo Turk Light on Rnd Target

COUNTER: [Bolt, Bolt2, Bolt3, Ice Crystal, Bolt Plume, Swift Bolt]

Use Electroprod 2 on Last Mag Attacker for next turn

DEATH: Cure Self of Sleep, Poison, Silence, Haste, Slow, Regen, D. Sentence, Berserk & Manipulate
Display String: [Reno “These guys are pretty tough.”]
Use <(Report)> on Self, remove Self from Battle

Notes On Turks:Reno III: (Gelnika)

An oversight exists in Turks:Reno III's AI Script. The Counter Script should only do a check for the three Attack IDs pertaining to Bolt, Bolt2 and Bolt3; however, the check does *not* check the Command ID (as it does with the Chocobos). This is why the Ice Crystal, Bolt Plume & Swift Bolt will also trigger the Counter script, as those Items all share the respective IDs as the Bolt Attacks.

Turks:Reno III is an optional battle fought on the Sunken Gelnika, and becomes available once the Player has obtained the Submarine. If you progress past the point-of-no return on Disc 2 (after parachuting into Midgar), then you can no longer encounter the Turks on the Gelnika, unless you exploit one of two glitches.

The variable that prevents the Turks from appearing on the Gelnika is toggled just after the Turks Battle in the Winding Tunnels in Sector 8. This includes opting to skip the battle via the use of dialogue choices. If, however, you were to skip the encounter entirely by hugging the inner support column, you would prevent the var from being toggled and the

POWER req for Overflow:

Base Damage Overflow: 172
Rnd Var Overflow 3x: 115

| Turks would then appear on the Gelnika on Disc 3, provided they had not already been defeated. The same thing will occur if you perform the 'Midgar Skip Glitch'.

Of the two Turks, Reno should have been the less difficult opponent; however, due to a bug in Rude's AI Script, Reno is the main target you want to focus on. Unlike the other Turks Battles, one will *not* flee the battle once the other has been killed, so you do not need to worry about trying to kill them simultaneously to reap the full Battle Spoils.

You should try to steal the Touph Ring from Turks:Reno III; an Accessory that boosts Vitality and Spirit by 50, which can be hugely helpful at times. A Lv 48 Cloud would have a 46.88% chance of stealing from him. If you miss the opportunity to steal from Reno on the Gelnika, then you will have another chance to obtain the Item during the Midgar encounter in the Winding Tunnels; if you miss that opportunity, then the Item will be lost forever. Be sure to also steal the Ziedrich from Rude.

Be sure to equip Ribbons or the Peace Ring to defend against Confusion. If you are low-levelled, then you could also put Lightning defence in place to defend against Electroprod 2.

Turks:Reno III is not a difficult opponent. Use Added Effect+Time to try to inflict him with Slow/Stop, and if necessary, use Dazers to inflict him with Paralyzed. Open with Big Guard, then use whatever means you see fit to kill him. Feel free to drain Reno's MP if yours starts to deplete; he has no need for it.

Unlike some of the other encounters with Turks:Reno, the Formation Setup correctly makes use of the "Pre-Emp OFF" Flag, which prevents the Player from initiating a Pre-Emptive Strike. The same cannot be said for the encounter in Gongaga or Midgar Sector 8 (the encounter in Sector 7 at the beginning of the game appears on a screen without random encounters, so the pre-emptive chance will be off by default).

Turks:Reno III is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. Turks:Reno III is one of 86 enemies that are immune to Seizure. He is also immune to Peerless, along with 104 other enemies.

NOTE - This is the 2nd Battle with Rude in the Gelnika

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Turks:Rude II: (Gelnika)          |   POWER req for Overflow:  |
|                                              |                            |
| A flaw exists with Turks:Rude II's AI        |  Base Damage Overflow: 180 |
|  Script. Once he has used one of his Magical |  Rnd Var Overflow  3x: 120 |
|  abilities, he should have continued to use  o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  nothing but <Shoulder Attack> thereafter.                                |
|  An oversight has occurred when copy and pasting the script from the      |
|  Gongaga version of Rude, and he will no longer attack the Party once any |
|  attack other than <Shoulder Attack> is selected.                         |
| Turks:Rude II is an optional battle fought on the Sunken Gelnika, and     |
|  becomes available once the Player has obtained the Submarine. If you     |
|  progress past the point-of-no return on Disc 2 (after parachuting into   |
|  Midgar), then you can no longer encounter the Turks on the Gelnika,      |
|  unless you exploit one of two glitches.                                  |
| The variable that prevents the Turks from appearing on the Gelnika is     |
|  toggled just after the Turks Battle in the Winding Tunnels in Sector 8.  |
|  This includes opting to skip the battle via the use of dialogue choices. |
|  If, however, you were to skip the encounter entirely by hugging the inner |
|  support column, you would prevent the var from being toggled and the     |
|  Turks would then appear on the Gelnika on Disc 3, provided they had not  |
```

```
|  already been defeated. The same thing will occur if you perform the       |
|  'Midgar Skip Glitch'.                                                      |
|                                                                             |
| Of the two Turks, Rude should have been the more difficult opponent;        |
|  however, due to the bug in his AI Script, he poses little threat. Just     |
|  concentrate on Reno. Unlike the other Turks Battles, one will *not* flee   |
|  the battle once the other has been killed, so you do not need to worry     |
|  about trying to kill them simultaneously to reap the full Battle Spoils.   |
| You should try to steal the Ziedrich from Turks:Rude II; a piece of Armour  |
|  that halves the damage taken by ALL Elemental abilities, including Cut,    |
|  Hit, Punch and Shoot. It will *not* halve the damage taken via Shoot,      |
|  Hidden or Restorative abilities. A Lv 48 Cloud would have a 39.06% chance  |
|  of stealing from Rude. You will have two more chances to steal the         |
|  Ziedrich from Rude; should you fail those opportunities, the Ziedrich      |
|  will become lost forever.                                                  |
| If you steal from Turks:Rude II, then you will not obtain the Elixir. If    |
|  you wished, you could instead just steal from Turks:Rude III in Rocket     |
|  Town and/or Turks:Rude IV in Midgar, if you wished to obtain the Elixir    |
|  now. Be sure to steal the Touph Ring from Reno, also.                      |
| Rude's higher Def and Mdef means he will take less damage than Reno,        |
|  although, that shouldn't matter given that he will be unable to attack     |
|  you after using a magical spell. Just use Physical blows to kill him once |
|  Reno has been defeated.                                                    |
| Unlike some of the other encounters with Turks:Rude, the Formation Setup    |
|  correctly makes use of the "Pre-Emp OFF" Flag, which prevents the Player   |
|  from initiating a Pre-Emptive Strike. The same cannot be said for the      |
|  encounter in Gongaga or Midgar Sector 8 (the encounter on the Shinra-Type  |
|  26 in Rocket Town appears on a screen without random encounters, so the    |
|  pre-emptive chance will be off by default).                                |
| Turks:Rude II is immune to Seizure, which isn't necessary seeing as there   |
|  is no way for the Player to inflict an enemy with Seizure. Turks:Rude II   |
|  is one of 86 enemies that are immune to Seizure. He is also immune to      |
|  Peerless, along with 104 other enemies.                                    |
| It appears that Rude may have a crush on Tifa, as he will refrain from      |
|  attacking her as often as the other characters.                            |
\                                                                             /

Restorative [-]	Slow-numb [-]	Berserk [-]

MAPS:	APPEARANCE RATE:	LOOKALIKES:
Sunken Gelnika Turks Hallway	75%	Beach Plug Poodler Sample

Poodler's ATTACKS:

Manip Attack 1: Bodyblow

Attack 1: <Bodyblow> — Target: One Opponent
[172] Physical — Element: Hit
Att%: 100
Power: 16
Base Damage: 610 HP

Attack 2: Fire — Target: One Opponent — Reflectable
[01B] Magical — Element: Fire
Att%: 100
Power: 8
MP Cost: 4 MP
Base Damage: 381 HP

Poodler's BATTLE PLAN: (Repeats)

OPENING ATTACK: 1/3 Chance start from 1st Attack
1/3 Chance start from 2nd Attack
1/3 Chance start from 3rd Attack

1ST ATTACK: Use <Bodyblow> on 2nd Target; If 2nd Target has Death, skip a turn

2ND ATTACK: Use <Bodyblow> on 1st Target; If 1st Target has Death, skip a turn

3RD ATTACK: Use <Bodyblow> on 3rd Target; If 3rd Target has Death, skip a turn

COUNTER: [All Physical and Magical Attacks]

Poodler's HP > 25%: Do nothing

Poodler's HP <= 25%: 1/3 Chance use Fire on Last Attacker; If Poodler's MP < 4, do nothing
2/3 Chance do nothing

Notes On Poodler:

The Poodler is one of the weaker enemies on the Sunken Gelnika, although, they do appear in groups of four and can catch to Player off guard if they are not careful. If you find yourself overwhelmed, you could use Bad Breath to inflict each Poodler with Sleep, then just use Magical abilities to finish them off; three casts of Beta or Aqualung should do the trick, even with their high MDef stat. You can use Magic Hammer to replenish your own MP, should you need to.

The "1st Target", "2nd Target" & "3rd Target" refers to the right-most,

POWER req for Overflow:

Base Damage Overflow: 176
Rnd Var Overflow 3x: 117
Rnd Var Overflow 4x: 88
Rnd Var Overflow 6x: 59

```
|  central, and left-most characters, respectively.                          |
| The Poodler is the 'Speed Source' variant; once you have acquired Yuffie's |
|  Conformer in the smaller flooded room, you will be able to use your       |
|  regular Attack Command for full damage. Speed Sources will increase a     |
|  character's Dexterity, which helps not only for increasing your ATB       |
|  gauge's gill-rate, but also used to improve your Hit chances (and by      |
|  contrast, your Deathblow chance).                                         |
| Given that the Poodler appears in groups, you can exploit the Extended W-  |
|  Item glitch to dupe yourself a finite amount of Speed Sources; visit the  |
|  "Top Farming Locations" in the Helpful Lists section for more details on  |
|  how to use the Extended W-Item Glitch.                                    |
| You could also try to steal Turbo Ethers from the Poodler; a Lv 49 Cloud   |
|  would have a 12.5% chance of stealing from them. Just note that you       |
|  cannot obtain the Steal and the Drop; you can, however, obtain the Steal  |
|  and the Morphed Item (but not the Drop and the Morphed Item).             |
| The Poodler and the Bad Rap encounters give very large amounts of gil,     |
|  which makes the 'corridor' screen an optimal location to grind in.        |
\                                                                            /

|    After 4th Attack: Jump to 2nd Attack for next turn                          |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Bad Rap:                          |   POWER req for Overflow:       |
|                                              |                                 |
| Compared to some of the other enemies on the |  Base Damage Overflow: 167      |
|  Sunken Gelnika, the Bad Rap are not that    |  Rnd Var Overflow  3x: 112      |
|  strong. Their attacks are fairly weak,      |  Rnd Var Overflow  4x:  84      |
|  although, they can use <Whip> consecutively.|  Rnd Var Overflow  6x:  56      |
| Four uses of Beta or Aqualung should be      o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  enough to dispatch the Bad Rap. You could                                     |
|  also use Magic Breath twice to cripple them.                                  |
| The Bad Rap is the 'Luck Source' variant; once you have acquired Yuffie's      |
|  Conformer in the smaller flooded room, you will be able to use your           |
|  regular Attack Command for full damage. Luck Sources will increase your       |
|  Luck Stat, and you cannot farm Luck Sources anywhere else in the game.        |
|  The higher your Luck, the greater your chance of performing a Critical        |
|  Hit, while also increasing your 'Lucky Hit' and 'Lucky Evade' chances.        |
| Given that the Bad Rap appears in groups, you can exploit the Extended W-      |
|  Item glitch to dupe yourself a finite amount of Speed Sources; visit the      |
|  "Top Farming Locations" in the Helpful Lists section for more details on      |
|  how to use the Extended W-Item Glitch.                                        |
| While Inks are a useless Battle Item, they are rare, and the only other        |
|  way to obtain one is from the Torpedo Attack mini-game in the Wonder          |
|  Square. A Lv 49 Cloud would have a 14.06% chance of stealing from the Bad     |
|  Rap; just bear in mind that when an enemy is inflicted with Darkness, it      |
|  will *not* reduce their Att% by 50% as it would for the Player, as            |
|  Darkness only affects attacks that have been used via the 'Attack'            |
|  Command, which the enemy does not use.                                       |
| The Bad Rap and the Poodler encounters give very large amounts of gil,         |
|  which makes the 'corridor' screen an optimal location to grind in.            |
| The Bad Rap is one of a number of enemies that are elevated above the          |
|  ground, but will not take double damage from the Wind Element, nor will       |
|  it nullify Earth.                                                             |
\                                                                                /

|       After 2nd Attack: Jump to 1st attack for next turn                      |
|                                                                               |
|                                                                               |
|     3RD ATTACK: Use Bite on Rnd Target                                        |
|                                                                               |
|                                                                               |
|  PHASE 2: (Repeats)                                                           |
|                                                                               |
|   Unknown's HP <= 33% AND Unknown has taken Physical Damage since its HP      |
|    has dropped below 33%:                                                     |
|                                                                               |
```

*The Unknown does not use its attacks in sequence, as most other enemies do. Instead, it will only progress to its next attack once Magical damage is taken. The cycle will repeat itself after four Magical hits have been taken.

1ST ATTACK: Use Blaster on Rnd Target

After 1st Attack: Repeat 1st attack for next turn until the next time Magical damage is taken*

2ND ATTACK: Skip a turn

After 2nd Attack: Repeat 2nd attack for next turn until the next time Magical damage is taken*

3RD ATTACK: Use Blaster on Rnd Target

After 3rd Attack: Repeat 3rd attack for next turn until the next time Magical damage is taken*

4TH ATTACK: Use Blaster on Rnd Target

After 4th Attack: Repeat 4th attack for next turn until the next time Magical damage is taken*

Notes On Unknown:

The Unknown is not as fearsome as the other enemies in the Sunken Gelnika, as it will not use any Status inflicting attacks. It does, however, have rather strong attack damage, so put your characters in the Back Row and use Big Guard.
The Unknown's high Dexterity means that it will cycle through its attacks fairly quickly, so try to inflict it with Slow or Stop. The easiest way to deal with the Unknown is to use Bad Breath on it to inflict it with Sleep and Poison, then just use Magical spells. Frog Song also works.
Avoid using Beta and Magic Breath, as it will just absorb the damage.
Open with two casts of Laser or Demi2, then just stick to using Aqualung, Bolt3/Ice3, and Comet2 to deal with its high HP.
Two variants of Tongue exists, one used without the close-up animation (on its 1st Attack), and one with the close-up animation (on its 2nd Attack).
Once the Unknown moves onto its second Phase, it will start using only Hammer Blaster. At this point, if you were to attack it with a Magical spell *once only*, it would then become idle until you attack it with another Magical spell. You can exploit this if you wish, to render the Unknown harmless while you pummel it with Physical blows.
The Unknown is the 'Power Source' variant; once you have acquired Yuffie's Conformer in the smaller flooded room, you will be able to use your regular Attack Command for full damage. Power Sources will increase your Strength, and can be farmed more easily from the Heavy Tank in Gongaga.
The rare Light Curtain can be obtained from the Unknown as a 4.69% drop chance, which casts Barrier around all allies. The only other way to obtain the Light Curtain is from the Garuda as a 10.39% drop, or from the Corvette as a Morph.
You should have no need to steal the Fire Armlet from the Unknown, as you should have already obtained one from Gaea's Cliffs. If you did wish to

POWER req for Overflow:

Base Damage Overflow: 176
Rnd Var Overflow 3x: 117

```
|  steal, then a Lv 49 Cloud would have a 10.94% chance of stealing from     |
|  them. The Fire Armlet absorbs all Fire based attacks.                      |
| All of the encounters with the Unknown have a Run Count value of 3 or       |
|  more, which means you'll have a harder time fleeing from them.             |
| The Unknown is one of a number of enemies that are elevated above the       |
|  ground, but will not take double damage from the Wind Element, nor will    |
|  it nullify Earth.                                                          |
| The Unknown cannot be Back-Attacked or Side-Attacked, meaning that one      |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.             |
| The Unknown is immune to Seizure, which isn't necessary seeing as there is |
|  no way for the Player to inflict an enemy with Seizure. The Unknown is     |
|  one of 86 enemies that are immune to Seizure. It is also immune to         |
|  Peerless, along with 104 other enemies.                                    |
\                                                                             /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Unknown 2:                    |   POWER req for Overflow:     |
|                                          |                               |
| The Unknown 2 is a formidable opponent, and  |  Base Damage Overflow: 185  |
|  should be respected as such. Equip Ribbons, |  Rnd Var Overflow  3x: 123  |
|  Safety Bits and Peace Rings to defend       o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  against the Statuses it inflicts.                                       |
| Tentacle hits for massive amounts of damage, so be sure to have your     |
|  characters in the Back Row, and have Big Guard up at all times. You could |
|  also inflict your characters with Sadness, if you needed the additional |
|  defence.                                                                |
| Try to inflict the Unknown 2 with Sleep, but do not use Bad Breath! The  |
|  Unknown 2 is *not* immune to the Status, but it will absorb the Element, |
|  which means inflicting it with the Poison Status will periodically heal |
|  it instead of harming it. Try to inflict it with Slow and Stop, also.   |
| Once it has been inflicted with Sleep, you can use Laser or Demi2 twice, |
|  followed up with Magic Breath to kill it.                               |
| The Unknown 2 is the 'Guard Source' variant; once you have acquired      |
|  Yuffie's Conformer in the smaller flooded room, you will be able to use |
|  your regular Attack Command for full damage. Guard Sources will increase |
|  your Vitality, which raises your Physical Defence. They can be farmed  |
|  more easily from the Bagnadrana in Mt. Corel.                           |
| The rare Lunar Curtain can be obtained from the Unknown 2 as a 4.69% drop |
|  chance, which casts MBarrier around all allies. The only other way to   |
|  obtain the Lunar Curtain is from the Foulander as a 14.06% drop.        |
| You should have no need to steal the Aurora Armlet from the Unknown 2, as |
|  you should have already obtained one from the Forgotten Capitol. If you |
|  did wish to steal, then a Lv 49 Cloud would have a 10.94% chance of     |
|  stealing from them. The Aurora Armlet absorbs all Ice based attacks.    |
| All of the encounters with the Unknown 2 have a Run Count value of 3,    |
|  which means you'll have a harder time fleeing from them.                |
| The Unknown 2 cannot be Back-Attacked or Side-Attacked, meaning that one |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.          |
| The Unknown 2 is immune to Seizure, which isn't necessary seeing as there |
|  is no way for the Player to inflict an enemy with Seizure. The Unknown 2 |
|  is one of 86 enemies that are immune to Seizure. It is also immune to   |
|  Peerless, along with 104 other enemies.                                 |
\                                                                          /

| Unknown 3 is found in Battle Square:         |  Base Damage Overflow: 195   |
|  Set - 4  (Special Battles)    Battle - 3    |  Rnd Var Overflow  3x: 130   |
|                                              o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| A flaw exists with the Unknown 3's AI                                     |
|  Script. More than one, to be precise. The first being that the chances of |
|  using the varying attacks are wrong; it should have had 2/7 chance of    |
|  using Slap, and a 1/7 chance of using Bolt2 if its MP is greater than 3;  |
|  otherwise, it should have a 2/3 chance of using Poison Fang, and a 1/3    |
|  chance of using Slap when its MP is lower than 4, never to use Bolt2.     |
| The second flaw may be obvious; the MP check performed checks to see if   |
|  the Unknown 3's MP is equal to or greater than the cost of Fire, as       |
|  opposed to Bolt2. If the Unknown 3's MP is greater than 3, but less than  |
|  22, then the "skill power is used up" text string will be displayed each  |
|  time it tries to use Bolt2. Two casts of Magic Hammer will stop if from   |
|  using Bolt2 and Creepy Touch.                                            |
| The Unknown 3 has the highest stats of all the Unknowns; however, it is   |
|  the only enemy in the Gelnika other than the Serpent that is susceptible  |
|  to L4 Suicide, and as such is not too much of a threat. Poison Fang and   |
|  Slap can still deal huge amounts of damage, so be sure to keep your       |
|  characters in the Back Row, and use Big Guard as a precaution.           |
| Given that the Unknown 3's HP exceeds 9999, you will need to use L4       |
|  L4 Suicide on it twice before delivering the final blow. In the Battle    |
|  Square it will have 30,000 HP, so three uses will be necessary. It is     |
|  also susceptible to Gravity-based attacks, so Demi2 and laser work just   |
|  as well to deplete its HP.                                               |
| If all three character become inflicted with Poison, the Unknown 3 will no |
|  longer attack the player, except as a counter attack using Creepy Touch.  |
|  This attack cannot harm the player, other than by inflicting them with    |
|  Sadness, which is not detrimental at all given that it will reduce the    |
|  damage of the Unknown 3's attacks by 30%.                                |
|                                                                           |
| Avoid using Trine and Magic Breath against the Unknown 3, as it will just  |
|  absorb the damage. Stick to using Beta, Comet2 and Deathblow with Added   |
|  Cut. You can use Bad Breath to inflict it with Sleep and Poison, then     |
|  just stick to using Magic.                                               |
| The Unknown 3 is the 'Magic Source' variant; once you have acquired       |
|  Yuffie's Conformer in the smaller flooded room, you will be able to use   |
|  your regular Attack Command for full damage. Magic Sources will increase  |
|  your Magic, which raises your MAttack. They can also be obtained from the |
|  8 eye in the Battle Square, which is the easier way to perform the        |
|  Extended W-Item Trick (see the "Top Farming Locations" in the Helpful     |
|  Lists section for more details).                                         |
| The rare Holy Torch can be obtained from the Unknown 3 as a 4.69% drop    |
```

| chance, which casts DeSpell on all opponents. If you did not Morph the Stilva or Evilhead in Gaea's Cliffs, then you can obtain one now as a drop, or, try to Morph the Stilva/Evilhead in the Batle Square. Unlike the ability "DeSpell", a Holy Torch will *not* cure Death Force and Resist, but *will* cure Small.

You should have no need to steal the Bolt Armlet from the Unknown 3, as you should have already obtained one from Corral Valley. If you did wish to steal, then a Lv 49 Cloud would have a 9.38% chance of stealing from them. The Bolt Armlet absorbs all Lightning based attacks.

All of the encounters with the Unknown 2 have a Run Count value of 3, which means you'll have a harder time fleeing from them.

The Unknown 3 is one of a number of enemies that are elevated above the ground, but will not take double damage from the Wind Element, nor will it nullify Earth.

The Unknown 3 cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

The Unknown 3 is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. The Unknown 3 is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.

Sunken Gelnika Large Cargo Room

APPEARANCE RATE: 28%

LOOKALIKES:

No Manipulate Attacks!

Serpent's ATTACKS:

Attack 1: Huge Tidal Wave [293] Physical

Target: Whole Field

Element: Water

Att%: 95

Power: 20

MP Cost: 20 MP

Base Damage: 1268 HP

Split Damage

Attack 2: Viper Breath	Target: One Opponent	
[300] Magical	Element: Ice/Water	
	Att%: 100	
	Power: 20	
	MP Cost: 20 MP	
	Base Damage: 900 HP	
Attack 3: Dragon Dance	Target: One Opponent	Can't Cover
[301] Physical	Element: None	
	Att%: 100	
	Power: 20	
	Base Damage: 1267 HP	
Attack 4: Aqualung	Target: All Opponents	**Enemy Skill**
[055] Magical	Element: Water	Reflectable
	Att%: 100	No Split Damage
	Power: 52	
	MP Cost: 34 MP	
	Base Damage: 2340 HP	

Serpent's BATTLE PLAN:

SETUP: Take the sum of all Players Current HP, divide by the sum of all Players. Only Players without Death are considered. This action repeats itself at the beginning of each turn.

PHASE 1: (Repeats)

Serpent's HP > 80% of Player's average Current HP:

Use Viper Breath on Target with Highest Current HP

PHASE 2: (Repeats)

Serpent's HP <= 80% of Player's average Current HP:

Use Aqualung on All Targets

PHASE 3: (Repeats)

Serpent's HP <= 40% of Player's average Current HP:

1ST ATTACK: Skip a turn
2ND ATTACK: Use Huge Tidal Wave on Whole Field

PHASE 4: (Repeats)

Serpent's HP <= 20% of Player's average Current HP:

1ST ATTACK: Skip a turn
2ND ATTACK: Skip a turn
3RD ATTACK: Use Dragon Dance on Rnd Target

Notes On Serpent:

POWER req for Overflow:

o'^^'o

NOTE - Ultimate Weapon is an optional Super Boss, but is no where near as difficult as Emerald or Ruby Weapon, and you should be able to defeat it when it becomes available; just after Diamond Weapon is defeated.

- When returning to the Forgotten Capitol, you can land the Highwind in the small ravine to avoid having to fight the Corral Valley enemies.

|         Use <(Report)> on Self, remove Attack Squad from Battle, Attack   |
|          Squad leaves no rewards, end Battle                              |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Turks:Rude III: (Rocket Town)     |   POWER req for Overflow:  |
|                                              |                            |
| The third battle with Turks:Rude is possibly |  Base Damage Overflow: 156 |
|  the easiest Boss Battle in the game; his    |  Rnd Var Overflow  3x: 104 |
|  stats are weaker than Palmer's! You should  o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  not need any help defeating him.                                         |
| The two Attack Squads that appear alongside Turks:Rude III will make use  |
|  of the 'Cover' Flag, which means you will not be able to target Rude with|
|  short-ranged attacks until both Attack Squads have been destroyed. You   |
|  can use Slash-All to target Rude, or, just use Magic Breath twice to end |
|  the Battle very quickly. Your Deathblow chance will be roughly 63%.      |
| If you kill Rude before killing the Attack Squad, the battle will end and |
|  you will not gain the maximum potential Battle Spoils. Be sure to kill   |
|  Attack Squad first if you are bothered about the additional EXP/AP/Gil.  |
| If you have not already obtained the Ziedrich, then you should try to     |
|  steal one from Turks:Rude III; a piece of Armour that halves the damage  |
|  taken by ALL Elemental abilities, including Cut, Hit, Punch and Shoot. It|
|  will *not* halve the damage taken via Shoot, Hidden or Restorative       |
|  abilities. A Lv 49 Cloud would have a 12.5% chance of stealing from Rude.|
|  You will have one more chance to steal the Ziedrich from Rude in the     |
|  Winding Tunnels; should you fail that opportunity, the Ziedrich will     |
|  become lost forever.                                                     |
| Turks:Rude III uses a unique format to the AI Script, given that he will  |
|  not use his attacks in sequence; instead, he may use any one of his      |
| The "Hurry" Theme will play throughout this Boss Battle, and the Victory  |
|  Fanfare theme will not play out following the battle.                    |
| Turks:Rude III is immune to Seizure, which isn't necessary seeing as there|
|  is no way for the Player to inflict an enemy with Seizure. Turks:Rude III|
|  is one of 86 enemies that are immune to Seizure. He is also immune to    |
|  Peerless, along with 104 other enemies.                                  |
| It appears that Rude may have a crush on Tifa, as he will refrain from    |
|  attacking her as often as the other characters.                          |
\                                                                           /

| DEATH: If Diamond Weapon is in Stage 2, use <[No Name]> on Self,            |
|        transform to Stage 1                                                 |
```

Use <(Report)> on Self, end Battle
Notes On Diamond Weapon:
Diamond Weapon is one of four Weapon Bosses, and is the only one that is mandatory to defeat as part of the storyline. It is also considerably easier than any of the other Weapons. Note that the battle is not engaged from the World Map; there is a screen transition to a Field Map just prior to the start of the Battle.
Given Diamond's vulnerability to Physical attacks while in Stage 1, you may wish to remove any Counter Attack Materias you may have equipped. Additionally, Diamond gives a huge amount of AP, so you should equip your Materia accordingly; equip Rune Armlets and any Double/Triple growth Weapons you may have (such as Cloud's Apocalypse, or Cid's Scimitar). You should also consider only having one character use the Enemy Skill Materia for this Battle.
Make sure to equip the Steal Materia, and pair it with the Steal as Well Materia. The Rising Sun is a Double growth Weapon for Yuffie, and is permanently missable. It can only be stolen from Diamond Weapon, and you will not have another chance to obtain it should you miss the opportunity to. A Lv 50 Cloud would have a 42.19% chance of stealing from Diamond. You could optionally give a character the Sneak Glove, which would give them a 100% chance to steal.
You have two options for defeating Diamond Weapon. The first is to never use Limit Breaks or Summons, thereby preventing Diamond from transforming into Stage 2. If you opt for this strategy, then you will be relying on purely Magical abilities; use Magic Breath, Comet2, Bolt3 and Ultima paired with MP Turbo to kill Diamond. Don't forget to equip Circlets!
The second option is to use Summons and Limits to allow Diamond to advance through to its 2nd Stage. Equip Bahamut ZERO and Neo Bahamut to deal with its incredibly high MDef. Typhon and Alexander work well, also. Once it has begun its countdown, pummel it as much as you can before it uses Diamond Flash; your Deathblow chance will be over 75% with the right setup. Pair Added Cut with Deathblow on your Physical Attacker, equip your 2nd character with Mime, and your third with Double Cut.
Be wary of the fact that Diamond Flash will drop your characters HP to Critical, while also inflicting all characters with Silence. You should put the Champion Belt on two of your characters, and the Ribbon on the character with the Enemy Skill to use White Wind. Be prepared to use a Megalixir at this point.
Regardless of the strategy you adopt, you should equip the Time Materia to inflict Diamond with Slow, and, if necessary, put Fire defences in place to reduce the damage taken from <Diamond Fire>. You could also opt to use the Curse Ring to gain a significant boost in stats; just be sure to use Death Force at the start of the Battle. Avoid Fire-based attacks, such as Beta.
Every single Action will trigger the Counter Script, regardless of the Target or the Caster. This includes Actions made by Diamond Weapon. Even Actions such as Change/Defend will trigger the Counter Script.
Two version of <Diamond Fire> exits, one used while in either of its two Stages. Two version of <Foot Stamp> also exist, one of which is never used. The Foot Stamp used by Emerald Weapon is a third variant, not used at all by Diamond.
Diamond Weapon was not present in the the JORG version, and as such the Rising Sun was not obtainable.
Once Diamond Weapon has been defeated, the Party will not perform their

POWER req for Overflow:
Base Damage Overflow: 269
Rnd Var Overflow 3x: 180

```
|  victory pose, and Diamond Weapon will not use a Death animation. Killing  |
|  Diamond allows for Ultimate Weapon to spawn in near Junon.                |
| If the Player were to try to save their game after interacting with        |
|  Diamond Weapon, but before the battle had initiated, they would           |
|  effectively ruin their save, as Diamond Weapon will not be on the World   |
|  Map after loading their save file. The Player would then have no way of   |
|  progressing with the main storyline.                                      |
| Diamond Weapon is immune to Seizure, which isn't necessary seeing as there |
|  is no way for the Player to inflict an enemy with Seizure. Diamond Weapon |
|  is one of 86 enemies that is immune to Seizure. It is also immune to      |
|  Peerless, along with 104 other enemies, and also immune to Regen along    |
|  with 14 other enemies.                                                    |
\                                                                            /

```

- Mt. Nibel Rector
- Mt. Corel Reactor

Ultimate will only spawn near Junon's crater after Diamond Weapon has been killed, and can be defeated prior to the Raid on Midgar. Its HP will carry over from the previous battle at Mideel, and will continue to carry over after each battle thereafter. Once Ultimate's HP is below 20,000, he will fly to Cosmo Canyon for the final battle where he can be killed for good.

After the initial battle at Junon's crater, Ultimate will fly off in a random direction, and can be *very* easy to lose track of. It is advisable that you save just before each battle, as it can a painfully long time to find it again. You will need to ram Ultimate with your Highwind precisely five times before it will head to one of seven random locations.

Be wary of the fact that it is possible to accidentally trigger the point-of-no return on Disc 2 while chasing Ultimate Weapon. You will need to have firstly triggered the events at the Shinra HQ by flying over the Northern Crater, after which you will then be required to fly over Midgar to progress with the story. Avoid Midgar at all costs if you wish to defeat Ultimate on Disc 2, which, by the way, is advisable as you will be able to gain early access to the Final Attack Materia from the Battle Square that way, along with Cloud's Ultimate Weapon, the Ultima Weapon.

If you manage to cause enough damage to kill Ultimate Weapon prior to the final battle, its HP will be set to 20,000 for the final battle. It *is* possible to cause enough damage in the Mideel battle to deal 80,000+ HP, thereby triggering the "Final Battle" version of Ultimate; however, you will still need to battle Ultimate at Junon's crater before it flies off to Cosmo Canyon. The only way to cause that much damage is to exploit the RNG Breeding mechanics to breed a Gold Chocobo prior to the Mideel fight, gaining access to the Knights of The Round Materia.

Setting up for the initial battles with the aerial version of Ultimate is no different from the ground variant; you will not receive any EXP/AP/Gil, so feel free to equip your character's Ultimate Weapons (zero AP growth). You should also use Long-Ranged characters such as Yuffie, Vincent and/or Barret to deal with Ultimate's "Flying" status (Row value equals 16). Just note that Vincent's Death Penalty is useless until you get at least 768 kills with Vincent.

Yuffie's Conformer is the key to defeating Ultimate Weapon, as it will deal 3.8125x normal damage (61 Power). With the Champion Belt equipped, Yuffie's regular attacks will deal upwards of 6000 HP per hit! Give Yuffie Double Cut and (at least one) Counter Attack, as well as Luck Plus and Speed Plus. You should also put Added Effect+Time on her Weapon.

As with the Battle at Mideel, you should equip the Elemental Materia with any non-Elemental Materia (excluding Restorative and other Support Materia). This will give you a defence against the 'Hidden' element, which will halve/negate/absorb the damage taken via Ultima Beam; the only damaging-attack in the game that makes use of the Hidden Element.

There is no need to equip Ribbons for the Ultimate Battles; use Circlets, Champion Belts and Sprint Shoes. If you wish to steal the Circlet (or Reflect Ring) from the initial Weapon Battles, then a Lv 52 Cloud would have a 31.25% chance to steal; you should equip the Sneak Glove to increase this chance to 100%. You can easily steal Circlets from the Snow in the Great Glacier.

The Aerial version of Ultimate Weapon will use Ultima Beam more often, but that should not matter if you have Hidden defence in place. Use Big Guard as standard at the start of each battle, then have Yuffie do most of the work. You should be making use of the Mime Materia by this point, also.

```
| Have your other characters use Comet2, Ultima and Magic Breath; just avoid |
|  any Water-based attacks, such as Aqualung. It should not take you long to |
|  deal 20,000 HP to Ultimate, which is how much you will need to inflict on |
|  it before it flees from the battle. *As soon* as the battle ends, try to  |
|  locate Ultimate on the World Map to avoid losing it.                       |
| Ultimate Weapon Flying variant is one of a number 'elevated' enemies that  |
|  Nullifies the Earth Element, but will no take double damage from Wind.     |
| Ultimate Weapon is immune to Seizure, which isn't necessary seeing as       |
|  there is no way for the Player to inflict an enemy with Seizure. Ultimate |
|  Weapon is one of 86 enemies that is immune to Seizure. It is also immune  |
|  to Peerless, along with 104 other enemies, and also immune to Regen along |
|  with 14 other enemies.                                                     |
\                                                                             /

```

	Base Damage: 10,828 HP	
Attack 3: Quake2 [025] Magical	Target: All Opponents Element: Earth Att%: 100 Power: 24 MP Cost: 28 MP Base Damage: 2079 HP	Reflectable Split Damage
Attack 4: Ultima Beam [39E] Magical	Target: All Opponents Element: Hidden Att%: 100 Power: 24 MP Cost: 40 MP Base Damage: 2079 HP	No Split Damage
Attack 5: <(Report)> [164] Physical 0 Dam	Target: Self Att%: Auto Hit	Escapes Battle

Ultimate Weapon (Ground)'s BATTLE PLAN:

SETUP: Disable default Death Handling
Set GlobalVar [Ultimate Weapon's HP] to Ultimate Weapon's HP

OPENING ATTACK: 1/3 Chance start from 1st Attack
1/3 Chance start from 2nd Attack
1/3 Chance start from 3rd Attack

1ST ATTACK: Use <Claw> on Rnd Target
2ND ATTACK: Use <Claw> on Rnd Target
3RD ATTACK: Use Ultima Beam on All Targets
4TH ATTACK: Use <Claw> on Rnd Target
5TH ATTACK: Use Quake2 on All Targets

6TH ATTACK: Use <(Report)> on Self, remove Self from Battle, leave no rewards, end Battle
Set Ultimate Weapon's HP to GlobalVar [Ultimate Weapon's HP]

COUNTER: [All Physical and Magical Attacks]

Damage taken this Battle <= 20,000: Do nothing

Damage taken this Battle > 20,000:

Use <(Report)> on Self, remove Self from Battle, leave no rewards, end Battle
Set Ultimate Weapon's HP to GlobalVar [Ultimate Weapon's HP]
If Ultimate Weapon's HP <= 20,000, set GlobalVar [Ultimate Weapon Final Battle Active]

DEATH: Use <(Report)> on Self, remove Self from Battle, leave no rewards, end Battle
Set GlobalVar [Ultimate Weapon's HP] to 20,000
set GlobalVar [Ultimate Weapon Final Battle Active]

Notes On Ultimate Weapon: (Ground) | POWER req for Overflow:

This version of Ultimate Weapon carries the Reflect Ring, and can be found in the following locations: - Fort Condor Reactor - Gongaga Reactor - North Crater - Midgar	Base Damage Overflow: 180 Rnd Var Overflow 3x: 120

Refer to the notes on Ultimate Weapon (Aerial) for details on this Battle. The only two varying differences between the ground version and the aerial version is that this Ultimate has slightly lower Dexterity, and the Reflect Ring can be stolen from it, as opposed to the Circlet. You will have already obtained one Reflect Ring from Jenova-DEATH, so you do not need to steal from Ultimate if you are not bothered about additional Reflect Rings. Just note that you will not get another chance to obtain the Accessory once Ultimate has been defeated. A Lv 52 Cloud would have a 31.25% chance of stealing from Ultimate; you should equip the Sneak Glove to give you a 100% chance to steal. Ultimate Weapon is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. Ultimate Weapon is one of 86 enemies that is immune to Seizure. It is also immune to Peerless, along with 104 other enemies, and also immune to Regen along with 14 other enemies.

|         Set GlobalVar [Ultimate Weapon Killed]                              |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Ultimate Weapon: (Cosmo)          |   POWER req for Overflow:    |
|                                              |                              |
| This is the final version of Ultimate, and   |  Base Damage Overflow: 180   |
|  can be fought at Cosmo Canyon once its HP   |  Rnd Var Overflow  3x: 120   |
|  has dropped below 20,000 in the preceding   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  battles. If you cause enough damage to kill                                |
|  Ultimate in the previous encounters, then Ultimate's HP will be set to     |
|  20,000 for the final battle.                                               |
| As with the Aerial version of Ultimate, this variant will have a Row value  |
|  of 16, which means it cannot be targeted via Short-Ranged attacks, so      |
|  stick to using Yuffie and Barret/Vincent, with the Long Range Materia on   |
|  Cloud. This version of Ultimate has the highest Dexterity stat, so using   |
|  Slow is advised.                                                           |
| The Battle Spoils for this encounter are equal to Diamond Weapon's so be    |
|  sure to have the appropriate set-up. Use Double and Triple growth Weapons  |
|  such as Cloud's Apocalypse, and Cid's Scimitar, and prepare accordingly.   |
|  Make sure to save before the Battle.                                       |
|                                                                             |
| You will be able to gain early access to the Enemy Skill Shadow Flare in    |
|  this battle, which has a whopping 125 Attack Power! Ultimate will use it   |
|  once as a Death Counter, and the attack will only target one character.    |
|  Be sure to equip all three Enemy Skills to one character (Yuffie's         |
|  Conformer), and make sure that your nominated character delivers the       |
|  final blow (you won't be able to sense Ultimate).                          |
```

```
| Shadow Flare has the potential to kill its target, so be sure to equip the |
|  Reflect Ring to negate the damage taken; Shadow Flare will still be       |
|  learned if it is reflected; it will also keep if it kills the target. If  |
|  you miss the chance to learn the Skill now, then you will be able to      |
|  learn it from the Dragon Zombie on Disc 3.                                |
| Once the battle begins, just what you've already been doing to defeat      |
|  Ultimate - use Yuffie with her Conformer to deal over 6000 HP per hit,    |
|  and Ultimate should soon fall. Avoid using Water-based attacks, and avoid |
|  using Yuffie's Lv 2-1 Limit Break Landscaper, as Ultimate will negate the |
|  Earth damage taken.                                                       |
| Once Ultimate Weapon is defeated once-and-for-all, it will allow access to |
|  Ancient Forest, which wasn't previously accessible without engaging in    |
|  the Chocobo Breeding sidequest. You will also gain Cloud's Ultima Weapon, |
|  which is one of three pieces of equipment needed to partake in the        |
|  Special Battles at the Battle Square (the other two being Omnislash and   |
|  W-Summon Materia, both obtained at the Battle Square).                    |
| Ultimate Weapon Final variant is one of a number 'elevated' enemies that   |
|  Nullifies the Earth Element, but will no take double damage from Wind.    |
| Ultimate Weapon is immune to Seizure, which isn't necessary seeing as      |
|  there is no way for the Player to inflict an enemy with Seizure. Ultimate |
|  Weapon is one of 86 enemies that is immune to Seizure. It is also immune  |
|  to Peerless, along with 104 other enemies, and also immune to Regen along |
|  with 14 other enemies.                                                    |

|                                                                                |
|   Use Flare on Last Mag Attacker; If Behemoth's MP < 100, do nothing           |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Behemoth:                          |   POWER req for Overflow:      |
|                                               |                                |
| Behemoth is found in Battle Square:           |  Base Damage Overflow: 180     |
|  Set - 4  (Special Battles)    Battle - 6     |  Rnd Var Overflow  3x: 120     |
|                                               o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Behemoth is one of the tougher enemies                                     |
|  randomly encountered in Sector 8. Its attacks have the ability to             |
|  devastate your Party; however, its low HP makes it less of threat than it    |
|  could be.                                                                     |
| Flare will be used as a counter attack each time it takes Magical damage,      |
|  so you should concentrate primarily on using Physical blows. Do *not* use    |
|  Magic Hammer, as that will trigger the counter script. Without Big Guard      |
|  in place, Flare will likely kill your character.                              |
| The Behemoth has fairly high Defence; however, your attacks should still       |
|  be dealing 1000+ HP per hit. Use Double Cut with Mime, and the usual          |
|  Deathblow with Added Cut to quickly defeat the enemy; your Deathblow          |
|  chance will be roughly 66%. You may need to put your characters in the        |
|  Back Row are under-levelled.                                                  |
| If you did not obtain the Enemy Skill ???? from the Jersey in the Shinra       |
|  Mansion, then now would be the optimal time to learn it, as the Behemoth      |
|  will have a much higher chance of using it than the Jersey. Use Laser or      |
|  Demi2 to to inflict 50% of its HP, then just wait for it to use ????,         |
|  which it will have a 33% chance of doing fairly often. Just be mindful of     |
|  the fact that the less HP the Behemoth has, the more damage ???? will         |
|  deal. Also be mindful of the fact that Laser/Demi2 will trigger the use       |
|  of Flare as a counter.                                                        |
| In the Battle Square the Behemoth will have 14,000 HP, 175 Strength and        |
|  137 Magic, so be on guard! Again, avoid using Magical abilities.              |
| War Gongs will inflict all targets with Berserk, and can be fairly useful      |
```

| on the right occasion. The only other way to obtain one is from the Grand Horn as a 9/64 drop, so you should try to steal from the Behemoth when you get the chance. A Lv 53 Cloud would have a 24.98% chance to steal from the Behemoth; remember, that you must *first* fail the chance to obtain the Phoenix Down, which a Lv 53 Cloud would have a 48.44% chance of doing (so an overall steal chance of 73.42%).

Stardusts are also fairly useful, as it will cast Comet2 (four single attacks with 1120 HP Base Damage), however, they can be obtained from the Battle Square for 8000 BP, which would be the easier option to try to obtain the Stardust.

The Behemoth cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

The Behemoth is one of 105 enemies that are Immune to Peerless, which isn't necessary seeing as there is no way for the Player to inflict the enemy with Peerless.

The Behemoth is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy (although you can still encounter it in the Battle Square).

|     Use Fire2 on All Targets for next turn, disable Counter Flag             |
|                                                                              |
|                                                                              |
|  DEATH: Remove inactive Manhole from Battle, inactive Manholes leave no      |
|          rewards, end Battle                                                 |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Manhole:                          |   POWER req for Overflow:     |
|                                              |                               |
| The Manhole is a fairly weak enemy, with low |  Base Damage Overflow: 180    |
|  HP and low damage output. It will target    |  Rnd Var Overflow  3x: 120    |
|  all characters when countering with Ice2 or o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Fire2, but this should not be a problem.                                    |
| At the start of the Battle the Manhole will appear in the centre. On its     |
|  second turn it will transport itself to one of the closed Manhole lids,     |
|  meaning that your attacks will miss if you had the centre Manhole           |
|  targeted.                                                                   |
| Your Deathblow chance will only be roughly 52%, so use Slash-All and Trine   |
|  to quickly dispatch the Manhole. You can only kill one of the three         |
|  Manholes in the Battle, so the EXP/AP/Gil earned is capped at the value     |
```

| of one Manhole. |
| The lids that you see is actually a unique enemy with a unique ID. These lids cannot be targeted or killed, and only exist aesthetically. See the "Extra Enemies" section for more details on the Manhole(Lid) enemy. |
| The Manhole is one of six enemies that are affected by the 'Berserk Glitch', which means that they have no assigned Attack to use when they are inflicted with Berserk. As such the "skill power is used up" text string will be displayed every turn, seeing as the Attack they are trying to use costs 65,535 MP! |
| The Manhole cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage. |
| The Manhole is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. The Manhole is one one of 86 enemies that is immune to Seizure. It is also immune to Peerless, along with 104 other enemies, and also immune to Regen along 14 other enemies. |
| The Manhole is the only enemy that is immune to Barrier, MBarrier, Shield, Death Force, Resist and Lucky Girl. Is is also one of four enemies that are Immune to Reflect. |
| The Manhole is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy |

|                             Base Damage: 911 HP                           |
| - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - |
|   Crazy Saw's BATTLE PLAN: (Repeats)                                      |
|                                                                           |
|  1ST ATTACK: Use <Uppercut> on Rnd Target without Confusion; If all       |
|               Targets have Confusion, skip a turn                         |
|                                                                           |
|  2ND ATTACK: Use Rifle On Rnd Target without Confusion; If all Targets    |
|               have Confusion, select Rnd Target                           |
|                                                                           |
|  3RD ATTACK: Same as 2nd Attack                                           |
|  4TH ATTACK: Same as 2nd Attack                                           |
|                                                                           |
|    After 4th Attack: 1/2 Chance jump to 1st Attack for next turn          |
|                      1/2 Chance jump to 2nd Attack for next turn          |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Crazy Saw:                        |   POWER req for Overflow:    |
|                                              |                              |
| The Crazy Saw is not a difficult opponent.   |  Base Damage Overflow: 172   |
|  Use Trine or Bolt3 to kill it in one hit.   |  Rnd Var Overflow  3x: 115   |
|  Alternatively, you can use L4 Suicide to    |  Rnd Var Overflow  4x:  86   |
|  cripple it.                                 |  Rnd Var Overflow  6x:  58   |
| The worst thing the Crazy Saw can do to you  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  is inflict you with Confusion, so be sure                                |
|  to have defences in place. You could optionally cast Bad Breath to render |
|  the Crazy Saw harmless. Their attacks deal moderate damage, so put your  |
|  characters in the Back Row and use Big Guard/Barrier if necessary. Your  |
|  Deathblow chance will be roughly 62%.                                    |
| The Crazy Saw is encountered in an area that cannot be revisited; once you |
|  progress past a certain point in the game, you can no longer fight the   |
|  enemy.                                                                   |
\                                                                           /

All Targets with Slow: Do nothing

At least one Target without Slow:

Use <Support> Beam on Rnd Target without Slow; If Shadow Maker's MP < 8, skip a turn

Follow-Up: 1/2 Chance use <Support> Beam on Rnd Target without Slow; If Shadow Maker's MP < 8, do nothing
1/2 Chance do nothing

Notes On Shadow Maker:

The Shadow Maker will never inflict damage upon the Player, making them a nuisance enemy at most. Equip Ribbons and Sprint Shoes to defend from Slow. One cast of Bad Breath or two Magic Hammers will render them harmless.

The Shadow Maker has very low Dexterity, similar to those fought prior to obtaining the Buggy, so they will not attack you often. If all three characters are inflicted with Slow, they will cease to attack altogether. Their low HP means that Bolt2 may be strong enough to kill them; Trine will most definitely kill them in one. Your Deathblow chance will be roughly 52%.

If you did not obtain a Graviball from the Deenglow in the Train Graveyard, then the Shadow Maker is your last opportunity to obtain this permanently missable Item (casts Demi on one target). A Lv 53 Cloud would have a 100% chance of stealing from them. They also drop Turbo Ethers as a 100% drop rate; although, farming them from the Search Crown by the "Waterside Tracks" in Mt. Corel (with the Sneak Glove) would be an easier way to farm Turbo Ethers.

If you wished to stockpile on your Items using the standard W-Item glitch, then the Shadow Maker is the optimal enemy to do so against, given that they never harm the Player.

The Shadow Maker is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy.

| This is the fourth and final encounter with |  Base Damage Overflow: 167   |
```

| the Turks, and the only battle with Elena present. If you have completed Yuffie's sidequest, then you will have the option to skip the Battle. The Victory pose and Fanfare theme will *not* play out if you opted to battle the Turks; however, if you did not complete Yuffie's Quest, then you will not have the option to decline the Battle, and the Victory pose and Fanfare theme *will* play out in that scenario.

| Rnd Var Overflow 3x: 112 |
| Rnd Var Overflow 4x: 84 |
| Rnd Var Overflow 6x: 56 |

The Player can also skip the Battle by exploiting a glitch with the walkmesh. If you were to hug the central pillar on the screen, you would bypass the trigger point to initiate the Battle with the Turks.

The Turks Battle is subject to an oversight with the encounter Setup Flag used. As with a handful of prior battles, the "Pre-Emp OFF" Flag has not been implemented, and as such you have the chance to initiate a Pre-Emptive Strike against the Turks.

As with the Turks Battle in Gongaga, when you kill one Turk the other remaining Turks will flee the Battle, putting a limit on the amount of potential Battle Spoils earned. If you wish to gain the maximum possible EXP/AP/Gil, then be sure to cast Sense on each Turk, and regulate their HP accordingly.

Setting up for this Battle should not take long, as it is not a very tough fight. Some of the attacks used have moderate damage output, so put your characters in the Back Row and set up Big Guard if necessary.

Between Elena, Rude, and Reno, all three 'Base' Elements will be absorbed; Fire Ice and Lightning. This means that Magic Breath, Beta and Trine are off the table. Aqualung works well, dealing 2000+ HP per hit. You should pair MP Turbo with either Comet2 or Ultima for maximum effect, and equip a few Summons, also, such as Bahamut ZERO and/or Alexander. Save Bahamut ZERO for your final attack, as it will deal the most amount of damage.

All three Turks carry a useful piece of Armour/Accessory, so be sure to have Steal equipped. Using the Sneak Glove is advised, also, as it will give you a 100% chance of stealing against all three Turks.

None of the Turks have any need for their MP, so feel free to use Magic Hammer to replenish your own, should you need to.

You should set at least one character with defence against Confusion, and be ready to use White Wind when necessary. All three Turks have a vulnerability to Slow, so equipping All+Time is advised.

If you do manage to initiate a Pre-Emptive Strike against the Turks, then Elena will still get the first attack in as her script is part of the 'Pre-Battle' Script, which is the same used via the Sneak Attack Materia.

You should try to steal the Minerva Band from Elena; a piece of Armour that nullifies all Fire/Ice/Gravity/Holy based attacks, and can only be equipped by the females. Note that it will only nullify abilities that use the Gravity Element, as opposed to all %-based attacks. A Lv 54 Cloud would have a 42.19% chance of stealing from Elena, or, a 100% chance with the Sneak Glove equipped. You can obtain another Minerva Band from the Ancient Forest.

Elena will occasionally change her Row positioning, so using long-ranged characters is advised. While she is in the Front Row, Reno and Rude will take halve damage from Physical attacks, and while she is in the Back Row Reno and Rude will take normal damage, while Elena takes Back Damage. Your Deathblow chance will be roughly 67% against Elena.

A possible error occurs with Elena's AI Script. If she is the target killed, then the text string displayed will be the same as Reno's. It is unknown if this is an error or not, as the camera placement suggests that the quote could be coming from Reno. If you kill all three targets at once, only one of the Turk's will make a comment.

Turks:Elena is immune to Seizure, which isn't necessary seeing as there is

```
|  no way for the Player to inflict an enemy with Seizure. Turks:Elena is    |
|  one of 86 enemies that are immune to Seizure. She is also immune to       |
|  Peerless, along with 104 other enemies.                                   |
\                                                                            /

```

```
|   Turks:Reno IV's BATTLE PLAN: (Repeats)                                  |
|                                                                           |
|  1ST ATTACK: Use <Short Staff> on Rnd Target                              |
|                                                                           |
|  2ND ATTACK: 1/2 Chance use <Short Staff> on Rnd Target                   |
|              1/2 Chance use Electroprod on Rnd Target                     |
|                                                                           |
|  3RD ATTACK: Use Turk Light on Rnd Target                                 |
|                                                                           |
|                                                                           |
|  DEATH: Display String: "Reno "Let's call it a day."""                    |
|         Use <(Report)> on Self, remove other active Turks from Battle,    |
|          other active Turks leaves no rewards, end Battle                 |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Turks:Reno IV: (Winding Tunnels)  |   POWER req for Overflow:  |
|                                              |                            |
| This is the fourth and final encounter with  |  Base Damage Overflow: 180 |
|  the Turks, and the only battle with Elena   |  Rnd Var Overflow  3x: 120 |
|  present. If you have completed Yuffie's     |  Rnd Var Overflow  4x:  90 |
|  sidequest, then you will have the option to |  Rnd Var Overflow  6x:  60 |
|  skip the Battle. The Victory pose and       o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Fanfare theme will *not* play out if you                                 |
|  opted to battle the Turks; however, if you did not complete Yuffie's     |
|  Quest, then you will not have the option to decline the Battle, and the  |
|  Victory pose and Fanfare theme *will* play out in that scenario.         |
| The Player can also skip the Battle by exploiting a glitch with the       |
|  walkmesh. If you were to hug the central pillar on the screen, you would |
|  bypass the trigger point to initiate the Battle with the Turks.          |
| The Turks Battle is subject to an oversight with the encounter Setup Flag |
|  used. As with a handful of prior battles, the "Pre-Emp OFF" Flag has not |
|  been implemented, and as such you have the chance to initiate a Pre-     |
|  Emptive Strike against the Turks.                                        |
| As with the Turks Battle in Gongaga, when you kill one Turk the other     |
|  remaining Turks will flee the Battle, putting a limit on the amount of   |
|  potential Battle Spoils earned. If you wish to gain the maximum possible |
|  EXP/AP/Gil, then be sure to cast Sense on each Turk, and regulate their  |
|  HP accordingly.                                                          |
|                                                                           |
| See notes on Turks:Elena above for details on how to prepare for this     |
|  Battle.                                                                  |
|                                                                           |
| Turks:Reno IV can deal moderate damage with his Electroprod attack, so use |
|  MBarrier and put Lightning defences in place if you are under-levelled.  |
|  Reno has the least amount of HP, so try to attack Elena and Rude first if |
|  you want to try to kill all three at the same time.                      |
| If you did not obtain the Tough Ring from Reno previously, then this      |
|  encounter will be your last opportunity to obtain this Accessory which   |
|  raises Vitality and Spirit by +50. A Lv 54 Cloud would have a 45.31%     |
|  chance of stealing from Reno, or, a 100% chance with the Sneak Glove     |
|  equipped.                                                                |
| Your Deathblow chance will be roughly 67% against Turks:Reno IV           |
| Turks:Reno IV is immune to Seizure, which isn't necessary seeing as there |
|  is no way for the Player to inflict an enemy with Seizure. Turks:Reno IV |
|  is one of 86 enemies that are immune to Seizure. He is also immune to    |
|  Peerless, along with 104 other enemies.                                  |
\                                                                           /
 '~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~'

|                                                                          |
|                                                                          |
|  DEATH: If Jamar Armor does not have Death, remove Jamar Armor from Battle, |
|          Jamar Armor leaves no rewards                                   |
|         End Battle                                                       |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Proud Clod:                      |   POWER req for Overflow:  |
|                                             |                            |
| Proud Clod is found in Battle Square:       |  Base Damage Overflow: 207 |
|  Set - 4  (Special Battles)    Battle - 8   |  Rnd Var Overflow  3x: 138 |
|                                             o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The most intimidating thing about Proud Clod                             |
|  is its large HP; other than that, he isn't that tough, as far as bosses |
|  go. If you destroy Proud Clod before killing Jamar Armor, then the Battle |
|  will end and you will not gain the full Battle Spoils; Jamar Armor leaves |
|  a moderate amount of EXP/AP/Gil, so be sure to target the chest-plate   |
|  prior to the main Boss. You will not be able to Sense Proud Clod.       |
| If you do not have any Holy Torches available then you should equip the  |
|  Destruct Materia. Proud Clod will inflict your characters with Reflect, |
|  which can only be removed via the use of the Despell or DeBarrier       |
|  ability. Proud Clod will never use Materia-jammer if Jamar Armor is dead, |
|  so there are multiple reasons to want to focus on the Mini-Boss first.  |
|  Four uses of Magic Hammer will also stop Proud Clod from casting Materia- |
|  jammer.                                                                 |
| Proud Clod is one of the few Bosses that is not vulnerable to the Slow   |
|  Status, so just focus on offensive Materia such as Comet 2, Bahamut ZERO, |
|  Magic Breath, Double-Cut, and of course, Added Cut with Deathblow; your |
|  chance of connecting with Deathblow will be roughly 71%. Its very large |
|  Defence and MDefence means that your attacks will not deal nearly as much |
```

```
|  damage as they normally would. Counter Attack Materias and Champion Belts |
| Once the Battle concludes the party will not perform their victory pose,   |
|  nor will the victory Fanfare theme play. the "Shinra Company" Theme will  |
|  play throughout the battle.                                               |
| All of Proud Clod's attacks are fairly weak; however, when fought in the   |
|  Battle Square it can present a challenge, as it will have 127 Strength,   |
|  150 Magic and 120,000 HP. Any stockpiled X-Potions and Battle Items would |
|  be best used for this battle.                                             |
| Proud Clod is subject to the 'Quadra Magic Ultima Glitch' whereby the game |
|  will freeze when the Player tried cast Ultima, when they have one Ultima  |
|  paired with HP or MP Absorb, and another with Quadra Magic.               |
| Proud Clod is immune to Seizure, which isn't necessary seeing as there is  |
|  no way for the Player to inflict an enemy with Seizure. Proud Clod is one |
|  of 86 enemies that are immune to Seizure. It is also immune to Peerless,  |
|  along with 104 other enemies.                                             |
\                                                                            /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Jamar Armor:                       |   POWER req for Overflow:   |
```

Jamar Armor is found in Battle Square: Set - 4 (Special Battles) Battle - 8	Base Damage Overflow: 226 Rnd Var Overflow 3x: 151

Jamar Armor will never attack you, and is it does not need to be killed for the Battle to end. Given that it drops a reasonable amount of Battle Spoils, you should try to kill the sub-boss prior to the main-boss. You could also use Magic Hammer to replenish your own MP before you kill it, if you wish.

Proud Cloud will never use Materia-jammer to inflict the Party with Reflect once Jamar has been defeated. As with Proud Clod, Jamar Armor has very high Defence and MDefence stats, so you may need to chip away at it before it dies; open with Bahamut ZERO and Neo Bahamut to negate the Def values of the targets. Your Deathblow chance will be roughly 71%.

Jamar Armor is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. Jamar Armor is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.

Grosspanzer-Big's ATTACKS:

Attack 1: <Napalm Bomb> Target: One Opponent Never Used
[319] Physical Element: Fire Can't Cover
Att%: 100
Power: 24
Base Damage: 1717 HP

Grosspanzer-Big's BATTLE PLAN: (Repeats)

```
|  DEATH: Grosspanzer Parts Dead = Grosspanzer Parts Dead + 1                 |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Grosspanzer-Big:                 |   POWER req for Overflow:     |
|                                             |                               |
| The Grosspanzer-Big is the top-part of the  |  Base Damage Overflow: 180    |
|  tank-like enemy, and will never attack the |  Rnd Var Overflow  3x: 120    |
|  Player. If you kill the 'Mobile' part      o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  (bottom-part), then the Battle will end and                                |
|  you will not get the Battle Spoils from the Grosspanzer-Big. Given that    |
|  the 'Mako Cannon Base' screen is the best screen in Disc 2 for average     |
|  EXP/AP/Gil and Enemy Qty, you should try to kill all parts of the          |
|  Grosspanzer.                                                               |
| Use Lightning-based attacks against the Grosspanzer. One blast of Magic     |
|  Breath should be enough to the 'Big' variant, along with the two 'Small'   |
|  variants. Trine works well, as does pairing Elemental+Ramuh on your        |
|  Physical attacker's Weapon. You could also exploit the Grosspanzer's       |
|  weakness to Death by using Odin to end the Battle in one move.             |
| The Grosspanzer-Mobile will be more deadly with the 'Small' variants        |
|  alive, so focus on killing them before focusing on the 'Big' variant.      |
|  Feel free to use Magic Hammer to replenish your MP, should you need to.    |
|                                                                             |
| The Grosspanzer-Big is the last enemy in the game to obtain 8-inch Cannons  |
|  from. While the Battle Item is fairly useless at this point, they are      |
|  easy to farm as they have a 100% drop rate. Be sure to obtain at least     |
|  one if you aim to max out your inventory slots.                            |
| Your Deathblow chance will be roughly 69% against the Grosspanzer-Big.      |
| The Grosspanzer-Big cannot be Back-Attacked or Side-Attacked, meaning that  |
|  one cannot perform Random Variation Overflow with 4x or 6x Damage.         |
| The test Enemy êúô7(úñA) originally took the same model as the Grosspanzer-|
|  Big in the JORG release, however, in the later releases the model was      |
|  changed to that of the Pyramid. Visit the "Extra Enemies" section for      |
|  more info on êúô7(úñA).                                                    |
| The Grosspanzer-Big is encountered in an area that cannot be revisited;     |
|  once you progress past a certain point in the game, you can no longer      |
|  fight the enemy.                                                           |
\                                                                             /

No Manipulate Attacks!

Grosspanzer-Small's ATTACKS:

Attack 1: <Normal Shell> Target: One Opponent Never Used
[2E6] Physical Element: Shoot
Att%: 100
Power: 16
Base Damage: 905 HP

Grosspanzer-Small's BATTLE PLAN: (Repeats)

DEATH: Grosspanzer Parts Dead = Grosspanzer Parts Dead + 2

Notes On Grosspanzer-Small:

The Grosspanzer-Small is the smaller middle-part of the tank-like enemy, and appears in groups of two. They will never attack the Player. If you kill the 'Mobile' part (bottom-part), then the Battle will end and you will not get the Battle Spoils from the Grosspanzer-Small. Given that the 'Mako Cannon Base' screen is the best screen in Disc 2 for average EXP/AP/Gil and Enemy Qty, you should try to kill all parts of the Grosspanzer.

Use Lightning-based attacks against the Grosspanzer. One blast of Magic Breath should be enough to the 'Big' variant, along with the two 'Small' variants. Trine works well, as does pairing Elemental+Ramuh on your Physical attacker's Weapon. You could also exploit the Grosspanzer's weakness to Death by using Odin to end the Battle in one move.

The Grosspanzer-Mobile will be more deadly with the 'Small' variants alive, so focus on killing them before focusing on the 'Big' variant. Feel free to use Magic Hammer to replenish your MP, should you need to. Your Deathblow chance will be roughly 68% against the Grosspanzer-Small.

The Grosspanzer-Small cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

The test Enemy êúô9(úñC) originally took the same model as the Grosspanzer-Small in the JORG release, however, in the later releases the model was changed to that of the Pyramid. Visit the "Extra Enemies" section for more info on êúô9(úñC).

The Grosspanzer-Small is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy.

|    4TH ATTACK: Use <Napalm Bomb> on All Targets                            |
```

```
|                                                                                |
|                                                                                |
|  PHASE 6: (Repeats)                                                            |
|                                                                                |
|   Grosspanzer Parts Dead = 5   2x Grosspanzer-Small + Big is dead              |
|                                                                                |
|    1ST ATTACK: Use <Deadly Wheel> on All Targets                               |
|    2ND ATTACK: Use <Deadly Wheel> on All Targets                               |
|    3RD ATTACK: Skip a turn                                                     |
|    4TH ATTACK: Use <Bodyblow> on Rnd Target                                    |
|                                                                                |
|                                                                                |
|  DEATH: Use <(Vanish)> on Self, remove remaining active Grosspanzer Parts,     |
|          remaining Grosspanzer leaves no rewards, end Battle                   |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Grosspanzer-Mobile:                |   POWER req for Overflow:      |
|                                               |                                |
| The Grosspanzer-Mobile is the large base-     |  Base Damage Overflow: 188     |
|  part of the tank-like enemy, and is the      |  Rnd Var Overflow  3x: 125     |
|  main enemy to deal the damage. If you kill   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  the 'Mobile' variant, the Battle will end                                     |
|  and you will not get the Battle Spoils from the other active Grosspanzer      |
|  parts. Given that the 'Mako Cannon Base' screen is the best screen in         |
|  Disc 2 for average EXP/AP/Gil and Enemy Qty, you should try to kill all       |
|  parts of the Grosspanzer.                                                     |
| Use Lightning-based attacks against the Grosspanzer. One blast of Magic        |
|  Breath should be enough to the 'Big' variant, along with the two 'Small'      |
|  variants. Trine works well, as does pairing Elemental+Ramuh on your           |
|  Physical attacker's Weapon. You could also exploit the Grosspanzer's          |
|  weakness to Death by using Odin to end the Battle in one move.                |
|                                                                                |
| Given that the all of the Grosspanzer-Mobile's attacks are Physical, you       |
|  could put all of your characters in the Back Row to reduce the damage         |
|  dealt. The 3112 Base Damage variant of <Normal Shell> will no longer be       |
|  used once one of the 'Small' variants have been destroyed, so focus on        |
|  killing the side-parts prior to the top-part. Feel free to use Magic          |
|  Hammer to replenish your MP, should you need to.                              |
| The Grosspanzer-Mobile cannot be Back-Attacked or Side-Attacked, meaning       |
|  that one cannot perform Random Variation Overflow with 4x or 6x Damage.       |
| The test Enemy êúô8(úñB) originally took the same model as the Grosspanzer-|
|  Mobile in the JORG release, however, in the later releases the model was      |
|  changed to that of the Pyramid. Visit the "Extra Enemies" section for         |
|  more info on êúô8(úñB).                                                       |
| The Grosspanzer-Mobile is encountered in an area that cannot be revisited;     |
|  once you progress past a certain point in the game, you can no longer         |
|  fight the enemy.                                                              |
\                                                                                /

|    Use Silence on Last Mag Attacker                                       |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On SOLDIER:1st:                  |   POWER req for Overflow:      |
|                                          |                                |
| The SOLDIER:1st can deliver fairly damaging | Base Damage Overflow: 169    |
|  blows to your Party, so put them in the | Rnd Var Overflow  3x: 113      |
|  Back Row, and use Big Guard if you are  | Rnd Var Overflow  4x:  85      |
|  under-levelled.                         | Rnd Var Overflow  6x:  57      |
| One blast of L4 Suicide followed by Slash- o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  All is the easiest way to dispatch the                                   |
|  SOLDIER:1st.                                                             |
| If you did not manage to obtain the Shinra Alpha from the Underwater MP   |
|  or the Captain during the Huge Materia mission in Junon, then your last  |
|  chance to steal this six slotted piece of Armour will be from the        |
|  SOLDIER:1st. A Lv 56 Cloud would have a 14.06% chance of stealing from   |
|  them.                                                                    |
| The SOLDIER:1st leave large quantities of Battle Spoils, and are desirable |
```

```
|  to battle. The Grosspanzer, however, is better to grind against.          |
| The SOLDIER:1st is encountered in an area that cannot be revisited; once   |
|  you progress past a certain point in the game, you can no longer fight    |
|  the enemy.                                                                |
\                                                                            /

|                                                                                |
|  6TH ATTACK: Use <[No Name]> on Self, transform to Stage 1 (Cannon Up)         |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On XCannon:                          |   POWER req for Overflow:       |
|                                              |                                 |
| The XCannon is a very weak enemy. With only  |  Base Damage Overflow: 180      |
|  one very weak attack used every fifth turn, |  Rnd Var Overflow  3x: 120      |
|  you should be able to defeat it before it   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  is able to attack you. Use Laser or Demi2                                     |
|  twice followed by Physical attacks; your Deathblow chance will be roughly    |
|  68%. Avoid using Magical attacks, given its high MDefence.                    |
| The "1st Target", "2nd Target" & "3rd Target" refers to the right-most,        |
|  central, and left-most characters, respectively.                              |
| The XCannon is one of six enemies that are affected by the 'Berserk            |
|  Glitch', which means that they have no assigned Attack to use when they       |
|  are inflicted with Berserk. As such the "skill power is used up" text         |
|  string will be displayed every turn, seeing as the Attack they are trying    |
|  to use costs 65,535 MP!                                                       |
| The XCannon only appears on one small screen with a low encounter rate,        |
|  so it is possible you may go a playthrough without ever seeing this foe.      |
| The XCannon cannot be Back-Attacked or Side-Attacked, meaning that one         |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.                |
| The XCannon is encountered in an area that cannot be revisited; once you       |
|  progress past a certain point in the game, you can no longer fight the        |
|  enemy.                                                                        |
\                                                                                /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Maximum Kimaira:                |   POWER req for Overflow:    |
|                                            |                              |
| Maximum Kimaira is found in Battle Square: |  Base Damage Overflow: 190   |
|  Set - 4  (Special Battles)    Battle - 7  |  Rnd Var Overflow  3x: 127   |
|                                            o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Maximum Kimaira is a tough randomly                                   |
|  encountered enemy. Freeze has the potential to kill its target outright;  |
|  however, it can only use Freeze a maximum of three times per battle. Use  |
|  Big Guard if you are under-levelled.                                     |
| You could use Bad Breath to inflict the Maximum Kimaira with Silence and   |
```

```
|  Sleep to stop it from using Freeze, then use Physical attacks to finish   |
|  it off while it remains asleep. It has fairly high Defence but low HP, so |
|  it shouldn't take long to kill it. Your Deathblow chance will be roughly  |
|  64%.                                                                      |
| A flaw exists with the Maximum Kimaira's AI Script. When it is attacked    |
|  via a Magical ability, it will counter by selecting its last Physical     |
|  Attacker. If it has not yet taken Physical damage, it will select Cloud   |
|  by default. Use Magic Hammer three times to prevent it from using Freeze, |
|  keeping in mind that it may use Freeze as a counter.                      |
| You should try to Morph the Maximum Kimaira into Guard Sources, which      |
|  permanently raise Defence. Use Laser five times, then follow up with      |
|  Morph, which should deal around 200 HP from your Physical attacker.       |
| When met in the Battle Square, the Maximum Kimaira will have 125 Magic,    |
|  and 8000 HP. It is still not too threatening with its low HP; however, it |
|  can still kill your character with the use of Freeze, so use Big Guard.   |
|  Dragon Scales will deal 2601 - 2774 HP against them.                      |
| The Maximum Kimaira cannot be Back-Attacked or Side-Attacked, meaning that |
|  one cannot perform Random Variation Overflow with 4x or 6x Damage.        |
| The Maximum Kimaira is one of 105 enemies that are Immune to Peerless,     |
|  which isn't necessary seeing as there is no way for the Player to inflict |
|  the enemy with Peerless.                                                  |
| The Maximum Kimaira is encountered in an area that cannot be revisited;    |
|  once you progress past a certain point in the game, you can no longer     |
|  fight the enemy (although you can still encounter it in the Battle        |
|  Square).                                                                  |
\                                                                            /

|  At least one Ally has Death: Use <Capsule> on All Allies with Death       |
|                               Restore dead Allies HP to Max HP             |
|                               Restore dead Allies MP to Max MP             |
|                                                                            |
|                                                                            |
|  DEATH: Cure Self of Sleep, Poison, Haste, Slow, D. Sentence & Berserk     |
|         Display String: [Hojo “Haw…now let's see]                          |
|         Display String: [how the Mako Juice is reacting?”]                 |
|         Use <Vanish> on Self                                               |
|         Use <Change> on Self, remove all active enemies from Battle, all   |
|          enemies leaves no rewards, spawn in Helletic Hojo                 |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Hojo:                           |   POWER req for Overflow:     |
|                                            |                               |
| Hojo is the first part of a three-part Boss |  Base Damage Overflow: 185    |
|  Battle, and is considerably easy. Use this |  Rnd Var Overflow  3x: 123    |
|  opening fight to set up Big Guard and      o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Regen.                                                                    |
| Hojo will never attack you; instead, he will in two 'Samples' to do the    |
|  job for him. Every time you kill either the Poodler Sample or Bad Rap     |
|  Sample, Hojo will just revive them straight away. You do not need to kill |
|  the Samples to progress onto Helletic Hojo, and you will not receive any  |
|  EXP/AP/Gil from them, so your main focus should primarily be Hojo.        |
| While the first Battle is relatively easy, you do want to set yourself up  |
|  accordingly for the subsequent Battles. Be sure to equip Ribbons and      |
|  Added Effect+Hades on someones Armour. Your Deathblow chance against Hojo |
|  will be roughly 64%, or 94% with the Mystile equipped. You should also    |
|  equip all of the Counter Attack Materias that you have.                   |
|                                                                            |
| The easiest way to deal with the opening Battle is to cast Bad Breath as   |
|  soon as Hojo spawns in the Samples. This way none of the enemies will be  |
|  able to damage you; stick to using Magic Breath and the like to defeat    |
```

```
|  the first set of enemies.                                                  |
| When the Battle begins both Samples will be dead. When Hojo uses <Capsule> |
|  (of which there are two variants, one of which is never used) to revive    |
|  his pets, the HP restored will read 9999. This is due to the 'Sanity       |
|  Check' that is in place that limits all damage output to 9999. The AI      |
|  Script corrects this, by manually setting their HP and MP values to their |
|  respective Max values.                                                     |
| The "J-E-N-O-V-A" theme will be heard throughout this Boss Battle, as       |
|  opposed to the regular "Still More Fighting" Boss Theme.                   |
| Hojo is immune to Seizure, which isn't necessary seeing as there is no way |
|  for the Player to inflict an enemy with Seizure. Jamar Armor is one of 86  |
|  enemies that are immune to Seizure. It is also immune to Peerless, along   |
|  with 104 other enemies.                                                    |
\                                                                             /

|     After 3rd Attack:                                                     |
|                                                                           |
|      Evil Poison was used: Jump to 3rd Attack for next turn               |
|      <Whip> was used once: Jump to 1st Attack for next turn               |
|     <Whip> was used twice: Jump to 4th Attack for next turn               |
|                                                                           |
|                                                                           |
| 4TH ATTACK: Use Big Fang on Target with Highest Current HP                |
```

```
|                                                                                |
|    After 4th Attack: Jump to 2nd Attack for next turn                          |
|                                                                                |
|                                                                                |
|  DEATH: Cure Self of Sleep, Poison, Haste, Slow, D. Sentence & Berserk         |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Bad Rap Sample:                    |   POWER req for Overflow:        |
|                                               |                                  |
| The Bad Rap Sample will not spawn at the      |  Base Damage Overflow: 180       |
|  start of the battle; instead, Hojo will      |  Rnd Var Overflow  3x: 120       |
|  revive the 'Sample' enemies after one turn. o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Hojo will never attack the Player, he will                                    |
|  have the Bad Rap Sample and Poodler Sample do it for him. You do not need     |
|  to kill the Samples to progress with the fight; just concentrate on           |
|  defeating Hojo.                                                               |
| If either Sample enemies die, Hojo will revive them straight away. The HP      |
|  restored will be displayed as 9999; however, the AI script will make sure     |
|  that the HP and MP values are equal to the Max HP and MP values,              |
|  respectively.                                                                 |
| You will not receive any EXP/AP/Gil from the Bad Rap or Poodler Sample,        |
|  so the best way to deal with them is to use Bad Breath, then use either       |
|  Physical blows on Hojo, or Magical abilities such as Magic Breath.            |
| All of the Bad Rap Sample's attacks are the same as the Bad Rap fought on      |
|  the Gelnika, with the exception of the fact that the 'Sample' variant is      |
|  marginally stronger, so all of the Base Damage values are slightly            |
|  higher.                                                                       |
\                                                                                /

Attack 9: <Transform>	Target: Self	Transformation
[391] Physical 0 Dam	Att%: Auto Hit	to Lifeform-Hojo N

Helletic Hojo's BATTLE PLAN: (Repeats)

SETUP: Disable default Death Handling

OPENING ATTACK: 1/5 Chance start from 1st Attack
1/5 Chance start from 2nd Attack
1/5 Chance start from 3rd Attack
1/5 Chance start from 4th Attack
1/5 Chance start from 5th Attack

STAGE 1: (No Arms Dead)

*If all Targets have Confusion OR all Targets have Sleep, select Rnd Target

1ST ATTACK: Use <Pile Banger> on Rnd Target without Confusion AND Sleep*

Follow-Up: 1/3 Chance repeat 1st Attack
2/3 Chance do nothing

2ND ATTACK: Same as 1st Attack
3RD ATTACK: Same as 1st Attack

After 3rd Attack: 1/3 Chance jump to 4th Attack for next turn
2/3 Chance jump to 5th Attack for next turn

4TH ATTACK:

At least one Target without Confusion AND at least one Target without Sleep AND Helletic Hojo's MP >= 15:

Use Bio Gas on Rnd Target without Confusion AND Sleep

All Targets with Confusion OR all Targets with Sleep OR Helletic Hojo's MP < 15:

Use <Pile Banger> on Rnd Target without Confusion AND Sleep*

After 4th Attack: Jump to 1st Attack for next turn

5TH ATTACK:

At least one Target without Confusion AND at least one Target without Sleep AND Helletic Hojo's MP >= 18:

Use Confu on Rnd Target without Confusion AND Sleep

All Targets with Confusion OR all Targets with Sleep OR Helletic Hojo's MP < 18:

Use <Pile Banger> on Rnd Target without Confusion AND Sleep*

After 5th Attack: Jump to 1st Attack for next turn

STAGE 2: (Right Arm Dead)

*If all Targets have Confusion OR all Targets have Sleep OR all Targets have Reflect, skip a turn

1ST ATTACK: Use Sleepel on Rnd Target without Confusion AND Sleep AND Reflect*

2ND ATTACK: 1/2 Chance skip a turn
1/2 Chance Use <Right Arm Revive> on Self
Cure Right Arm of Death, set Right Arm's HP to Max HP
Transform to Stage 1

PHASE 3: (Left Arm Dead)

*If all Targets have Confusion OR all Targets have Sleep, select Rnd Target

1ST ATTACK: Use <Pile Banger> on Rnd Target without Confusion AND Sleep*

Follow-Up: 1/2 Chance repeat 1st Attack
1/2 Chance do nothing

2ND ATTACK: Same as 1st Attack

3RD ATTACK:

At least one Target without Reflect AND at least one Target without Sleep AND Helletic Hojo's MP >= 8:

Use Silence on Rnd Target without Reflect AND Silence

All Targets with Reflect OR all Targets with Sleep OR Helletic Hojo's MP < 8:

Use <Pile Banger> on Rnd Target without Confusion AND Sleep*

DEATH: Cure Self of Sleep, Poison, Haste, Slow, D. Sentence & Berserk

```
|         Use <Vanish> on Self, remove active Right Arm and Left Arm from    |
|          Battle                                                            |
|         Use <Transform> on Self                                            |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Helletic Hojo:                    |   POWER req for Overflow:   |
|                                              |                             |
| Helletic Hojo is the second part of a three- |  Base Damage Overflow: 190  |
|  part battle. So long as you have equipped   |  Rnd Var Overflow  3x: 127  |
|  three Ribbons, or, two Ribbons and Added    o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Effect+Hades on someones Armour, then you                                 |
|  should not struggle with this Battle.                                     |
| The easiest way of dealing with Helletic Hojo is to first kill the Right   |
|  Arm; it only has 5000 HP, and will stop Helletic from using any damaging  |
|  attacks. If it revives the Right Arm, simply kill it again; Magic Breath  |
|  will deal roughly 3000 HP to the Right Arm (and 2500 - 3000 to the Left   |
|  Arm and Helletic Hojo).  Shadow Flare may be strong enough to kill it in  |
|  one hit.                                                                  |
| There are two ways for you to advance onto the next stage of the Battle;   |
|  the first is to just kill Helletic Hojo, regardless of the Arms being     |
|  alive or dead. The second way is to defeat both of the Arms, at which     |
|  point Helletic will die and you'll face the final stage of the Battle.    |
| Once you have killed the Right Arm, you should just focus on the Left Arm; |
|  it has lower HP and MDefence values to Helletic, but slightly higher      |
|  Defence.                                                                  |
| Your Deathblow chances against Helletic Hojo will be roughly 63%; equip    |
|  the Mystile to increase this chance to roughly 94%.                       |
| Two versions of Pile Banger exists, one used when it is in Stage 1 or      |
|  Stage 2, and one used when it is in Stage 3. Both versions are identical  |
|  in attack properties.                                                     |
| The "J-E-N-O-V-A" theme will be heard throughout this Boss Battle, as      |
|  opposed to the regular "Still More Fighting" Boss Theme.                  |
| Helletic Hojo is subject to the 'Quadra Magic Ultima Glitch' whereby the   |
|  game will freeze when the Player tried cast Ultima, when they have one    |
|  Ultima paired with HP or MP Absorb, and another with Quadra Magic.        |
| Helletic Hojo is immune to Seizure, which isn't necessary seeing as there  |
|  is no way for the Player to inflict an enemy with Seizure. Helletic Hojo  |
|  is one of 86 enemies that are immune to Seizure. He is also immune to     |
|  Peerless, along with 104 other enemies.                                   |
\                                                                            /

|                                                                             |
|   Left Arm is Dead: Use <Appear> on Self, remove Helletic Hojo from Battle  |
|                     Use <Transform> on Self                                 |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Right Arm: (Helletic Hojo)        |   POWER req for Overflow:    |
|                                              |                              |
| Killing the Right Arm first will render      |  Base Damage Overflow: 180   |
|  Helletic Hojo harmless, so long as you have |  Rnd Var Overflow  3x: 120   |
|  Sleep defences in place. If Helletic        o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  revives the Right Arm, simply kill it again;                               |
|  it only has 5000 HP. Your Deathblow chance will be roughly 68%, or 99%     |
|  with the Mystile equipped.                                                 |
| The Right Arm will never attack you itself; all of the damage dealt is      |
|  via Helletic Hojo. You do not need to kill the Arms for the Battle to      |
|  end; you can just defeat Helletic Hojo if you wish. Also, you do not need  |
|  to kill Helletic Hojo for the Battle to end; killing both Arms will do     |
|  the trick.                                                                 |
| The Right Arm is one of six enemies that are affected by the 'Berserk       |
|  Glitch', which means that they have no assigned Attack to use when they    |
|  are inflicted with Berserk. As such the "skill power is used up" text      |
|  string will be displayed every turn, seeing as the Attack they are trying  |
|  to use costs 65,535 MP!                                                    |
| Helletic Hojo's Right Arm is immune to Seizure, which isn't necessary       |
|  seeing as there is no way for the Player to inflict an enemy with          |
|  Seizure. Helletic Hojo's Right Arm is one of 86 enemies that are immune    |
|  to Seizure. He is also immune to Peerless, along with 104 other enemies.   |
\                                                                             /

Sector 8 Raid Mako Cannon Control Panel

LOOKALIKES:

No Manipulate Attacks!

Left Arm's ATTACKS: (Helletic Hojo)

Attack 1: <[No Name]> Target: Self Death Animation
[120] Physical 0 Dam Att%: Auto Hit

Attack 2: <Appear> Target: Self Helletic Hojo
[14F] Physical 0 Dam Att%: Auto Hit Death Animation

Attack 3: <Transform> Target: Self Transformation
[391] Physical 0 Dam Att%: Auto Hit to Lifeform-Hojo N

Left Arm's BATTLE PLAN: (Helletic Hojo) (Repeats)

SETUP: Disable default Death Handling

DEATH:

Right Arm is alive: Use <[No Name]> on Self

Right Arm is Dead: Use <Appear> on Self, remove Helletic Hojo from Battle
Use <Transform> on Self

Notes On Left Arm: (Helletic Hojo)

The Left Arm has slightly less HP and MDef Helletic Hojo, but slightly higher Def. It will never attack you itself; all of the damage dealt is via Helletic Hojo. You do not need to kill the Arms for the Battle to end; you can just defeat Helletic Hojo if you wish. Also, you do not need to kill Helletic Hojo for the Battle to end; killing both Arms will do the trick. If you kill the Left Arm first, Helletic can never revive it, and will

POWER req for Overflow:

Base Damage Overflow: 195
Rnd Var Overflow 3x: 130

```
|  transform into a slightly different version of itself. it will try to     |
|  inflict you with Silence while in this form, so make sure to have the     |
|  necessary defences in place.                                              |
| If you kill the RIght Arm first (which you should), you should then just   |
|  focus on the Left Arm, given that it has less HP than Helletic. Shadow    |
|  Flare will deal upwards of 4500 HP per hit.                               |
| Helletic Hojo's Left Arm is immune to Seizure, which isn't necessary       |
|  seeing as there is no way for the Player to inflict an enemy with         |
|  Seizure. Helletic Hojo's Left Arm is one of 86 enemies that are immune to |
|  Seizure. He is also immune to Peerless, along with 104 other enemies.     |
\                                                                            /

|   All Targets with Slow:                                                |
|                                                                         |
|    Skip a turn, jump to 1st Attack for next turn                        |
|                                                                         |
```

At least one Target without Slow:
Lifeform-Hojo N's MP < 20:
Skip a turn, jump to 4th Attack for next turn
Lifeform-Hojo N's MP >= 20:
Use Slow on All Targets without Slow, jump to 1st Attack for next turn
4TH ATTACK:
Lifeform-Hojo N's HP = 100% AND Lifeform-Hojo N's MP = 100%:
Skip a turn
Lifeform-Hojo N's HP < 100%:
Use <Absorb> on Target with highest Current HP
Lifeform-Hojo N's HP = 100% AND Lifeform-Hojo N's MP < 100%:
Use <Absorb> on Target with highest Current MP
COUNTER: [Magical Attacks Only]
Use Silence on Las Mag Attacker; If Last Mag Attacker has Silence OR
Lifeform-Hojo's MP < 24, do nothing

Notes On Lifeform-Hojo N:	POWER req for Overflow:
Lifeform-Hojo N is the third and final part of the three-part battle against Hojo. He is tougher than the previous two version, but should still not cause you too much of a problem, so long as you have Ribbons and Added Effect+Hades (on Armour) in place.	Base Damage Overflow: 180 Rnd Var Overflow 3x: 120

Lifeform is the only Hojo variant that is vulnerable to Slow, so equip the Time Materia or use Spider Webs to slow him down.

Use Comet2, Shadow Flare, Magic Breath, Ultima and Deathblow to knock out Lifeform's HP. Your Deathblow chance will be roughly 64%, or 95% with the Mystile equipped. You should also equip as many Counter Attack Materias as you have available; every time Lifeform-Hojo N uses <Combo>, it will trigger the Counter Attack chance. Your Physical blows will be slightly stronger than the previous versions, given Lifeform's lower Defence.

Using the Cover Materia on the character with the Counter Attack Materias is a good idea, as they will cover then counter each of the Combo moves.

A flaw exists with the Attack properties of <Absorb>. It makes use of the "Drain HP/MP" Flag, but does not make use of the preliminary "Drain Damage" Flag, so the Drain HP/MP Flag is overlooked.

If Lifeform-Hojo N tries to inflict more than one target with Slow, the Status infliction chance will be subject to Split Damage, and will only have a 66% chance of succeeding.

The "J-E-N-O-V-A" theme will be heard throughout this Boss Battle, as opposed to the regular "Still More Fighting" Boss Theme.

When you target the final Hojo, its name will read "Lifeform-Hojo NA". This is actually Lifeform-Hojo N [A]; the "A" indicating that there are multiple versions of Lifeform. There are, in fact, three versions of the

```
|  enemy; two of which are programmed to be invisible and non-targetable,    |
|  and begin with the Death Status. This is purely to overwrite the enemy    |
|  placeholder slots left over from the Right Arm and Left Arm, to prevent   |
|  the Formation from reading the values left behind from those enemies.     |
| Lifeform-Hojo N is one of a number of enemies that are elevated above the  |
|  ground, but will not take double damage from the Wind Element, nor will   |
|  it nullify Earth.                                                         |
| Lifeform-Hojo N is immune to Seizure, which isn't necessary seeing as      |
|  there is no way for the Player to inflict an enemy with Seizure. Lifeform-|
|  Hojo N is one of 86 enemies that are immune to Seizure. He is also immune |
|  to Peerless, along with 104 other enemies.                                |
\                                                                            /
 '~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~'

-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-.-
             o.,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,o
             ||            {North Crater Descent}                          ||
             o'^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^'o

 NOTE - You are going to have to make a choice in which way to send your
         characters when you get to the Left and Right Fork. To gain the
         "best" possible outcome with the North Crater Item Duplication
         trick, you should make a Party consisting of Barret and Cait Sith
         prior to your descent.

        When you get to the first main split, send Tifa along the Right Path
         by herself, and send everyone else along the Left Path. On the next
         fork, send Red XIII, Yuffie, Cid and Vincent along the Upper-Path,
         and send Yourself along the Lower-Path with Barret and Cait Sith.

        Once you have cleared the Lower-Left Path, progress to the final
         "circular" screen (with the Luck Source chest), then make your way
         *back* through up Lower-Left Path route to then clear out the Swamp
         Area (Upper-Left Path).

        Head back up through the Lower-Left Path once more until you get back
         to the main Left and Right Fork split. You could optionally double-
         back on yourself after clearing the Items from the 'Swamp' route.
         Finally, collect all the items along the Right Path, to then advance
         to the final gathering (point-of-no return) screen. If done
         correctly, you will dupe yourself the following items:

          - Tifa     - Mystile
          - Red XIII - Shield Materia
          - Yuffie   - Counter Materia
          - Cid      - Imperial Guard
          - Vincent  - Magic Source

        If you wanted instead to dupe the Mega All Materia, send Tifa along
         the Right Path, send Cloud Barret and Cait Sith along the Upper-Left
         Fork, and everyone else along the Lower-Left Fork.

        Note that you *can* escape the North Crater after descending.

MAPS: APPEARANCE RATE: | LOOKALIKES:

Crater Descent 1st Scrn Anticlockwise Spiral	50%
Crater Descent 2nd Scrn Narrow Cascading Paths	19%

No Manipulate Attacks!

Gargoyle's ATTACKS: (1st Form)

Attack 1: <[No Name]>	Target: Self	Transformation
[11F] Physical 0 Dam	Att%: Auto Hit	To 2nd Form

Attack 2: <Rock Finger>	Target: One Opponent	Status Inflict:
[31D] Magical	Element: None	Slow-numb (100%)
	Att%: 100	
	Power: 16	
	MP Cost: 10 MP	
	Base Damage: 642 HP	
Attack 3: <Vanish>	Target: Self	Death Animation
[14E] Physical 0 Dam	Att%: Auto Hit	

Gargoyle 1st Form's BATTLE PLAN: (Repeats)

SETUP: Enable Physical immunity, enable Magical immunity

1ST ATTACK: Skip a turn
2ND ATTACK: Skip a turn

3RD ATTACK: Use <[No Name]> on Self, transform to 2nd Form
Use <Vanish> on Self, remove Self from Battle, leave no rewards

COUNTER: [All Physical and Magical Attacks]

Last Command was Item AND Last Item used was Soft:

Do nothing. A Soft will not trigger the Counter Script; here was the intended response to a Soft:

Use <Vanish> on Self, remove Self from Battle, leave no rewards
Spawn in Gargoyle 2nd Form

Last Command was Attack: Do nothing

Last Command was NOT Attack:

Use <Rock Finger> on Last Attacker, remove Self from Battle, leave no rewards
Spawn in Gargoyle 2nd Form

Notes On Gargoyle: (1st Form)

The first version of the Gargoyle can never be killed, and will only transform into its second form after either two turns have passed, or it is attacked via any Command that *isn't* Attack; this means 2x-Cut and Slash-All *will* trigger the transformation.

While the Gargoyle has a vulnerability to the Death Status, the Physical and Magical immunity overwrites this vulnerability; even Cait Sith's 'Game Over' Limit Break (which ignores the target's Status defences) will not kill the Gargoyle 1st Form. Because of this, you can never gain the EXP/AP/Gil earned from it, nor can you obtain the Remedy that it drops.

The Gargoyle should have transformed into its 2nd form after being hit with a Soft; however, a Soft can never trigger the Counter Script, so this bug cannot be neatly resolved. It's likely the developer's were aware of this, but could not fix the problem. The Script is also not coded to check for the use of the W-Item Command.

POWER req for Overflow:

Base Damage Overflow: 190
Rnd Var Overflow 3x: 127

```
| As with a lot of the enemies in the North Crater, the Gargoyle will        |
|  inflict you with a deadly Status; be sure to have Safety Bits equipped    |
|  and Added Effect+Odin on someone's Armour.                                |
| The Gargoyle's positioning within the Enemy Data files is amongst those    |
|  fought on the Mako Cannon towards the end of Disc 2. This suggests that   |
|  the developer's had originally designed the Gargoyle to be fought as part |
|  of the Raid On Midgar batch of encounters.                                |
| The Gargoyle cannot be Back-Attacked or Side-Attacked, meaning that one    |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.            |
\                                                                            /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Gargoyle: (2nd Form)              |   POWER req for Overflow:    |
|                                              |                              |
| The second variant of the Gargoyle will      |  Base Damage Overflow: 190   |
|  spawn in once the first version has either  |  Rnd Var Overflow  3x: 127   |
|  been attacked with a Command that *isn't*   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Attack, or, two turns have passed for the                                  |
|  Gargoyle. You cannot harm the Gargoyle in its first form; however, if you  |
|  were able to damage it, it would *not* transfer over its remaining HP to   |
|  the second variant.                                                        |
| The Gargoyle are not a tough opponent, and can easily be killed with a few  |
|  Physical blows. Be very mindful that it can use L4 Death as a finishing    |
|  move; You should be equipping Safety Bits and Added Effect+Odin (on        |
|  Armour) to help defend against the many enemies in the North Crater that   |
|  can inflict you with Death. You could also use Magic Hammer twice to       |
|  prevent it from using L4 Death.                                            |
| The Gargoyle's positioning within the Enemy Data files is amongst those     |
|  fought on the Mako Cannon towards the end of Disc 2. This suggests that    |
|  the developer's had originally designed the Gargoyle to be fought as part  |
|  of the Raid On Midgar batch of encounters.                                 |
| The Gargoyle 2nd Form is one of a number of enemies that are elevated       |
|  above the ground, but will not take double damage from the Wind Element,   |
|  nor will it nullify Earth.                                                 |
| The Gargoyle cannot be Back-Attacked or Side-Attacked, meaning that one     |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.             |
\                                                                             /

	Att%: 100	Never Used	
	Power: 77	No Split Damage	
	MP Cost: 75 MP		
	Base Damage: 4360 HP		

Parasite's BATTLE PLAN: (Repeats)

Use <Para Tail> on Rnd Target without Sadness; If all Targets have Sadness, use <Head Attack> on Rnd Target

COUNTER: [Magical Attacks Only]

Use Magic Extinguish on last Mag Attacker; If Last Mag Attacker has Silence, do nothing

Notes On Parasite:	POWER req for Overflow:

The Parasite can only use two fairly weak attacks, so they should not pose too much of a problem to the Player. You should have protection from Death in place for the other enemies found in the North Crater, which means you will likely have a vulnerability to Silence; use mainly Physical attacks to deal with the Parasite.	Base Damage Overflow: 195 Rnd Var Overflow 3x: 130 Rnd Var Overflow 4x: 98 Rnd Var Overflow 6x: 65
Your Deathblow chance will be roughly 63% against the Parasite, or 95% with the Mystile equipped. You should also try to steal Remedies from them, which will help to cure yourself of any Statuses should you lose the ability to use White Wind; a Lv 57 Cloud would have a 46.88% chance to steal from the Parasite.	
You should take the time to Manipulate the Parasite to learn L5 Death; just be sure to have Death immunity in place via Safety Bits and Added Effect+Odin on Armour to prevent your characters from being KO'd. Note an Enemy Skill *will* be learned if it kills the character via the use of the Death Status, but not if it kills the character from the damage taken. You can also use Death Force to protect from Death. A Lv 57 Cloud would have a 57% chance to Manipulate the Parasite.	
If you missed the opportunity to learn Magic Breath from the Stilva, then you should acquire that Enemy Skill, also; just be sure to use Big Guard beforehand, as it will hit for roughly 3000 HP. Once you have learned the Enemy Skills you need, you can use the Parasite to cast Magic Breath on itself. If you need to, you can use Bad Breath immobilise the Parasite while trying to Manipulate/Steal from them.	
The Parasite is the only enemy in the game other than the Soul Fire that takes Double Damage from the Holy Element (Alexander), but does not absorb Restorative. This technically means the Parasite cannot be considered to be "Undead".	
Equip Elemental+Choco/Mog on your weapon to exploit the Parasite's weakness to Wind (as with all other 'elevated' enemies). Avoid Earth.

|                                                                              |
|    Dark Dragon's HP <= 25%: 1/2 Chance use Ultima on All Targets              |
|                             1/2 Chance do nothing                            |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Dark Dragon:                      |   POWER req for Overflow:     |
|                                              | 1st Stage:                    |
|  0 Dragon Force used:  Def = 120  MDef = 240 |  Base Damage Overflow: 180    |
|  1 Dragon Force used:  Def = 180  MDef = 360 |  Rnd Var Overflow  3x: 120    |
|  2 Dragon Force used:  Def = 240  MDef = 480 | 2nd Stage:                    |
|                                              |  Base Damage Overflow: 213    |
| The Dark Dragon is a formidable opponent, so |  Rnd Var Overflow  3x: 142    |
|  be sure to use Big Guard, and put your      | 3rd Stage:                    |
|  characters in the Back Row should you need  |  Base Damage Overflow: 260    |
|  the extra defence.                          |  Rnd Var Overflow  3x: 173    |
| Using Bad Breath is the best way to stop the o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  enemy in its tracks, as it will inflict it                                  |
|  with Silence, preventing it from using Ultima as a Counter Attack, which    |
|  has the potential to destroy your Party. If it passes the chance to cast    |
|  Ultima while inflicted with Silence, it will *not* use Ultima should you    |
|  cure it of Silence.                                                         |
| While it is inflicted with Sleep, you should cast Laser on it twice, then    |
|  follow up with powerful Magic abilities such as Shadow Flare or Comet2;     |
|  avoid using Magic Breath as it will nullify the damage. So long as it is    |
|  inflicted with Silence, you could also use Magic Hammer to replenish your   |
|  own MP without fear of Ultima.                                              |
| A Lv 57 Cloud would have a 51% chance of Manipulating the Dark Dragon,       |
|  which you will need to do if you wish to learn the Dragon Force and Laser   |
|  Enemy Skills. The Dark Dragon will not retaliate to Magical attacks while   |
|  under the influence of Manipulate, which is another way to defeat it with   |
|  the use of Magical spells without the fear of Ultima.                       |
| When the Dark Dragon uses Dragon Force on itself it will raise its Defence   |
|  and MDefence values by 50%, up to a maximum of +100% of their base          |
|  values. It will not keep track of how many times it has used Dragon Force   |
|  on itself, and will continue to use the ability once it has reached the     |
|  maximum boost in stats.                                                     |
| If you did not get a chance to obtain a set of Dragon Armlets from the       |
|  Blue Dragon in Gaea's Cliff, then you could steal them now from the Dark    |
|  Dragon; a Lv 57 Cloud would have a 10.94% chance of stealing from them.     |
|  Alternatively, you could opt *not* to steal from them to try to obtain      |
|  the Elixir it carries, as you will need a stockpile of Elixirs to deal      |
|  with the Magic Pot (they cannot be bought).                                 |
| When the Dark Dragon uses Dark Dragon Breath, the Status chances will be     |
|  subject to Split Damage, and will only have a 51% chance of inflicting      |
|  your Party with Darkness.                                                   |
| The Dark Dragon cannot be Back-Attacked or Side-Attacked, meaning that one   |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.              |
\                                                                              /

|  enemy; however, it can inflict the Player |  Rnd Var Overflow  3x: 104        |
|  with Death when it transforms into its 2nd  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  stage, so you should equip Safety Bits and                                    |
|  Added Effect+Odin (on Armour), as is standard for dealing with most of        |
|  the enemies in the North Crater. You could also use Death Force to            |
|  protect from Death, or by setting up Resist (Lv 3 Heal Materia or use a       |
|  Vaccine).                                                                     |
| Use Laser or Demi2 once to trigger the transformation to the 2nd stage. If     |
|  you manage to kill the Scissors before it transforms (which is easy to do     |
|  using Deathblow with Added Cut, given its low HP), then you will only         |
|  gain the Battle Spoils for killing the Scissors. Given that the other         |
|  Scissors parts leaves more rewards, you should aim to only end the battle     |
|  once the other parts have spawned in.                                         |
| If you do trigger the transformation, you will not receive the Spoils from     |
|  the Scissors; if you wanted to, you could try to steal the Ether from it      |
|  before it transforms. A Lv 57 Cloud would have a 64.06% chance of             |
|  stealing from the Scissors; although, Ethers can easily bought at this        |
|  point.                                                                        |
| The Scissors' positioning within the Enemy Data files is amongst those         |
|  fought on pathways in Junon towards the Reactor. This suggests that the       |
|  developer's had originally designed the Scissors to be fought as part of      |
|  the Junon Huge Materia Quest batch of encounters.                             |
| The Scissors cannot be Back-Attacked or Side-Attacked, meaning that one        |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.                |
| The Scissors is immune to Seizure, which isn't necessary seeing as there       |
|  is no way for the Player to inflict an enemy with Seizure. The Scissors       |
|  is one of 86 enemies that are immune to Seizure. It is also immune to         |
|  Peerless, along with 104 other enemies.                                       |
\                                                                                /

No Manipulate Attacks!

Scissors(Upper)'s ATTACKS:

Attack 1: Cross Scissor [330] Physical
Target: One Opponent
Element: Shoot
Att%: 100
Power: 16
Base Damage: 294 HP

Attack 2: Scissor Tornado [333] Physical 0 Dam
Target: One Opponent
Att%: Auto Hit
Ejects From Bat
Flag as Escaped

Attack 3: Bloody Nail [334] Physical
Target: One Opponent
Element: None
Att%: 255
Power: 16
Base Damage: 294 HP
Drains HP

Scissors(Upper)'s BATTLE PLAN: (Repeats)

1ST ATTACK: Use Cross Scissor on Rnd Target without Confusion; If all Targets have Confusion, skip a turn

2ND ATTACK: Same as 1st Attack

3RD ATTACK:

All Targets with Confusion OR Scissors(Upper)'s HP = 100%

Use Cross Scissor on Rnd Target without Confusion; If all Targets have Confusion, skip a turn

At least one Target without Confusion AND Scissors(Upper)'s HP < 100%:

Use Bloody Nail on Target with Highest Current HP without Confusion

After 3rd Attack:

Scissor Tornado has not been used: Jump to 4th Attack for next turn

|
| Scissor Tornado has been used: Jump to 1st Attack for next turn |
|
|
| 4TH ATTACK:
|
| All Targets with Confusion: Skip a turn
|
| At least one Target without Confusion:
|
| 1/3 Chance: Use Scissor Tornado on Target with Highest Current HP
| without Confusion
| 2/3 Chance: Use Cross Scissor on Rnd Target without Confusion
|>~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| Notes On Scissors(Upper): | POWER req for Overflow: |
| |
| The Scissors(Upper) along with the (Lower) | Base Damage Overflow: 156 |
| variant will only spawn in once the | Rnd Var Overflow 3x: 104 |
| Scissors' HP has reached 50% or lower. The o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| Battle Spoils will be slightly higher if
| you trigger the transformation to the 2nd stage, so you should use Laser
| or Demi2 to spawn in the Scissors(Upper)+(Lower).
| The Scissor Tornado attack is similar to the Midgar Zolom's Blown Away, in
| that the character will *not* be flagged as Dead, but rather as escaped
| from Battle. If your remaining two characters were to be KO'd following
| the use of Scissor Tornado, you will not be met with a Game Over and
| instead will be taken back to the Field Map. Scissor Tornado can only be
| used per Battle, per Scissors (Upper).
| It will not take much to kill the Scissors(Upper). A few Physical blows
| from the likes of 2x-Cut and Deathblow+Added Cut will be enough to
| dispatch the enemy. While the Scissors(Lower) is scripted to use Cure3 on
| the Upper-half, it only has enough MP for one use which it will always
| use on itself, so it will not cure the Upper half unless you replenish
| its MP via the use of Ethers.
| The Scissors' positioning within the Enemy Data files is amongst those
| fought on pathways in Junon towards the Reactor. This suggests that the
| developer's had originally designed the Scissors to be fought as part of
| the Junon Huge Materia Quest batch of encounters.
| The Scissors cannot be Back-Attacked or Side-Attacked, meaning that one
| cannot perform Random Variation Overflow with 4x or 6x Damage.
| The Scissors(Upper) is immune to Seizure, which isn't necessary seeing as
| there is no way for the Player to inflict an enemy with Seizure. The
| Scissors(Upper) is one of 86 enemies that are immune to Seizure. It is
| also immune to Peerless, along with 104 other enemies.

No Manipulate Attacks!

Scissors(Lower)'s ATTACKS:

Attack 1: Scissor Kick [331] Physical
Target: One Opponent
Element: Shoot
Att%: 100
Power: 16
Base Damage: 294 HP

Attack 2: Confu [00C] Magical 0 Dam
Target: One Opponent
Att%: 100
MP Cost: 18 MP
Reflectable
Status Inflict: Confusion (59%)

Attack 3: Cure3 [002] Magical Spcl Formula
Target: One Opponent
Element: Restorative
Att%: 255
Power: 130
MP Cost: 64 MP
Base Damage: 3448 HP
Reflectable

Scissors(Lower)'s BATTLE PLAN: (Repeats)

1ST ATTACK: Use Scissor Kick on Rnd Target without Confusion; If all Targets have Confusion, skip a turn

2ND ATTACK: Same as 1st Attack

3RD ATTACK:

All Targets with Confusion OR Scissors(Lower)'s MP < 18:

Use Scissor Kick on Rnd Target without Confusion; If all Targets have Confusion, skip a turn

At least one Target without Confusion AND Scissors(Lower)'s MP >= 18:

Use Confu on Rnd Target without Confusion

After 3rd Attack:

Cure3 has not been used OR Cure3 was last used on Scissors(Upper):

Jump to 4th Attack for next turn

Cure3 was last used on Scissors(Lower):

Jump to 5th Attack for next turn

4TH ATTACK:

Scissors(Lower)'s HP > 33% OR Scissors(Lower)'s MP < 64:

Use Scissor Kick on Rnd Target without Confusion; If all Targets have Confusion, skip a turn

Scissors(Lower)'s HP <= 33% AND Scissors(Lower)'s MP >= 64:

Use Cure3 on Self

After 4th Attack: Jump to 1st Attack for next turn

5TH ATTACK:

Scissors(Upper)'s HP > 33% OR Scissors(Lower)'s MP < 64:

Use Scissor Kick on Rnd Target without Confusion; If all Targets have Confusion, skip a turn

Scissors(Upper)'s HP <= 33% AND Scissors(Lower)'s MP >= 64:

Use Cure3 on Scissors(Upper)

Notes On Scissors(Lower):

The Scissors(Lower) along with the (Upper) variant will only spawn in once the Scissors' HP has reached 50% or lower. The Battle Spoils will be slightly higher if you trigger the transformation to the 2nd stage, so you should use Laser or Demi2 to spawn in the Scissors(Lower)+(Upper).

If you have placed Status defences in place to protect from Death (which you should be doing while in the North Crater), then you may be left vulnerable to the Confusion Status. Be prepared to use White Wind or a Remedy, should you need to.

It will not take much to kill the Scissors(Lower). A few Physical blows from the likes of 2x-Cut and Deathblow+Added Cut will be enough to dispatch the enemy. Once its HP has dropped below 33% it will use Cure3 on itself, after which it should have then used Cure3 on the Upper half. Given that it only has enough MP for one cast of Cure3, it will never cure its ally unless the Player feeds it an Ether to restore its MP.

The Scissors' positioning within the Enemy Data files is amongst those fought on pathways in Junon towards the Reactor. This suggests that the developer's had originally designed the Scissors to be fought as part of the Junon Huge Materia Quest batch of encounters.

The Scissors cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

The Scissors(Lower) is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. The Scissors(Lower) is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.

Master Tonberry's BATTLE PLAN: (Repeats)

SETUP: Start in Stage 2 (Centre Position)

STAGE 1: (Right Position)

M Tonberry is at the Back: Use <Move> on Self, move M Tonberry forward +1

M Tonberry is has moved forward once OR twice:

3/8 Chance: Use <Move Left> on Self, move M Tonberry to Centre
5/8 Chance: Use <Move> on Self, move M Tonberry forward +1

M Tonberry has moved forward three times:

1/2 Chance: Use Knife on 1st Target, move M Tonberry to Back and Centre; If 1st Target has Death, use <Move Left> on Self, move M Tonberry to Centre

1/2 Chance: Use <Move Left> on Self, move M Tonberry to Centre

STAGE 2: (Centre Position)

M Tonberry is at the Back: Use <Move> on Self, move M Tonberry forward +1

M Tonberry is has moved forward once:

1/4 Chance: Use <Move Right> on Self, move M Tonberry to Right
1/4 Chance: Use <Move Left> on Self, move M Tonberry to Left
1/2 Chance: Use <Move> on Self, move M Tonberry forward +1

M Tonberry is has moved forward twice:

3/8 Chance: Use <Move Right> on Self, move M Tonberry to Right
3/8 Chance: Use <Move Left> on Self, move M Tonberry to Left
1/4 Chance: Use <Move> on Self, move M Tonberry forward +1

M Tonberry has moved forward three times:

1/2 Chance: Use Knife on 2nd Target, move M Tonberry to Back and Centre; If 2nd Target has Death, move onto remaining 1/2 chance

1/4 Chance: Use <Move Left> on Self, move M Tonberry to Left
1/4 Chance: Use <Move Right> on Self, move M Tonberry to Right

STAGE 3: (Left Position)

M Tonberry is at the Back: Use <Move> on Self, move M Tonberry forward +1

M Tonberry is has moved forward once OR twice:

3/8 Chance: Use <Move Right> on Self, move M Tonberry to Centre

```
|    5/8 Chance: Use <Move> on Self, move M Tonberry forward +1                |
|                                                                              |
|                                                                              |
|   M Tonberry has moved forward three times:                                  |
|                                                                              |
|     1/2 Chance: Use Knife on 3rd Target, move M Tonberry to Back and         |
|                 Centre; If 3rd Target has Death, use <Move Right> on         |
|                 Self, move M Tonberry to Centre                              |
|                                                                              |
|     1/2 Chance: Use <Move Right> on Self, move M Tonberry to Centre          |
|                                                                              |
|                                                                              |
|  COUNTER: [All Physical and Magical Attacks]                                 |
|                                                                              |
|   1ST COUNTER: Do nothing                                                    |
|   2ND COUNTER: Use Everyone's Grudge on Last Attacker                        |
|                                                                              |
|    At the start of every turn, the Master Tonberry's Counter Script will     |
|     jump back to the 1st Counter                                             |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Master Tonberry:                 |   POWER req for Overflow:      |
|                                             |                                |
| The Master Tonberry acts identically to the |  Base Damage Overflow: 188     |
|  way the Tonberry would, if the Tonberry    |  Rnd Var Overflow  3x: 125     |
|  could be randomly encountered. The only    o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  difference between the two variants is that                                 |
|  the Master Tonberry will use Everyone's Grudge when it is attacked twice    |
|  in one turn, whereas the Tonberry will use Time Damage when it is           |
|  attacked thrice in one turn.                                                |
| The "1st Target", "2nd Target" & "3rd Target" refers to the right-most,      |
|  central, and left-most characters, respectively.                            |
| As is standard for dealing with most of the North Crater enemies, you        |
|  should equip Safety Bits and Added Effect+Odin on someone's Armour to       |
|  defend from the Death Status. You could also inflict the Master Tonberry    |
|  with Stop or Paralyzed (Dazers) to prevent it from advancing. Inflicting    |
|  it with Slow and Poison helps, also. You could also set up defence          |
|  against the Death Status by casting Death Force, or casting Resist on       |
|  your characters (Lv 3 Heal Materia, or a use a Vaccine).                    |
| The Master Tonberry's biggest threat is the fact that it will use            |
|  Everyone's Grudge as a Counter Attack when attacked twice in one turn,      |
|  which can be devastating once the Player reaches 'Lv 99' territory. You     |
|  should use attacks such as 4x-Cut and Added Cut+Deathblow, along with       |
|  other multiple-attack abilities to maximise the amount of damage            |
|  delivered per turn. Avoid using Laser or other Gravity-based attacks.       |
| Given the Master Tonberry's high Lv, Yuffie's Conformer works extremely      |
|  well against them, as her regular attacks will have 77 Power' equal to      |
|  4.8125x normal damage. You should easily be able to Morph a them into a     |
|  Ribbon using Yuffie.                                                        |
| Stealing Elixirs from the Master Tonberry would be a good idea, as they      |
|  will be required for defeating the Magic Pot. A Lv 58 Cloud would have a    |
|  21.88% chance of stealing from the Master Tonberry, or, a 100% chance       |
|  with the Sneak Glove equipped. Elixirs can also be stolen from Gighee;      |
|  although, you would have an easier time stealing from the M Tonberry.       |
| The Master Tonberry is the only enemy in the game to carry Megalixirs;       |
|  just note that you cannot obtain both the Steal and the Drop.               |
| All of the encounters with the Master Tonberry have a Run Count value of     |
|  3, which means you'll have a harder time fleeing from them.                 |
| The Master Tonberry cannot be Back-Attacked or Side-Attacked, meaning that   |
|  one cannot perform Random Variation Overflow with 4x or 6x Damage.          |
\                                                                              /

                                oo~~~~~~~~~~~~oo

 NOTE - The Master Tonberry can also be fought here; however, I will not be
        duplicating that entry. You can find the Master Tonberry within the
        "North Crater Descent" listings just above.

|   Use Comet2 on All Targets; If King Behemoth's MP < 110, do nothing        |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On King Behemoth:                  |   POWER req for Overflow:      |
|                                            |                                |
| The King Behemoth is a strong opponent, so |  Base Damage Overflow: 190     |
|  use Big Guard if you need the additional  |  Rnd Var Overflow  3x: 127     |
|  defence. You could also use Dragon Force if o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  you are under-levelled. Its biggest                                        |
|  weakness is the fact that it has no Status immunities, so one quick blast |
|  of Bad Breath will render it incapacitated. If you wanted to use Magic    |
|  Hammer to replenish your MP, then wait until it has been inflicted with   |
|  Sleep/Silence before doing so.                                             |
| If you are going to use a Gravity-based attack, then Demi3 will deal 6750  |
|  HP while the King Behemoth is at full health. You could also just use L4  |
|  Suicide to quickly defeat it, or, one blast of L5 Death will kill it      |
|  instantly.                                                                 |
| All of the encounters with the King Behemoth have a Run Count value of 2,  |
|  which means you'll have a harder time fleeing from them.                   |
| The King Behemoth cannot be Back-Attacked or Side-Attacked, meaning that   |
|  one cannot perform Random Variation Overflow with 4x or 6x Damage.         |
\                                                                             /

|                                                                            |
|     Allemagne's HP <= 25%: 1/2 Chance use L4 Death on All Targets*         |
|                            1/2 Chance do nothing                           |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Allemagne:                          |   POWER req for Overflow:   |
|                                                |                             |
| While the Allemagne does not appear to be      |  Base Damage Overflow: 167  |
|  very tough, it can use some abilities that    |  Rnd Var Overflow  3x: 112  |
|  can devastate your Party. You should stick    o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  to using Physical attacks to kill this                                    |
|  enemy, and avoid using L4 Suicide. You could cast Bad Breath firstly to   |
|  prevent it from using any Magic, then follow up with L4 Suicide.          |
|  Alternatively, you could manipulate it and have it cast L4 Death on       |
|  itself, ending the Battle instantly.                                      |
| If the Allemagne uses L3 Flare as a Counter, it will inflict 125% of the   |
|  caster's Current HP *against all targets*. This can be a real problem if  |
|  you are grinding late-game, with three Lv 99 characters. Avoid using      |
|  Vincent's Limit Breaks, as it will restore his HP to full, meaning a      |
|  certain Game Over if L3 Flare is used and all character's are hit.        |
| Seeing as L3 Flare is a %-based attack, you can not defend from the damage |
|  taken by using MBarrier. You can, however, halve/negate/absorb the damage |
|  dealt by equipping Elemental+Fire on your Armour.                         |
| You should have defences in place against the Death Status to protect from |
|  L4 Death, as is standard when traversing through the North Crater. Equip  |
|  Safety Bits and Added Effect+Odin (on Armour). Death Force can also be    |
|  used to defend against Death, or, you could set up Resist (Vaccine or Lv  |
|  3 Heal Materia).                                                          |
| When you make the final descent to the Planet's Core (after the point-of-  |
|  no return), you will have an overall 2.94% chance encountering a single   |
|  Allemagne for each of the thirteen platform jumps.                        |
| A slight flaw exists with the Allemagne's AI Script. When it performs an   |
|  MP check to use L4 Death, it checks to see if its MP is equal to or       |
|  greater than the amount needed to use L3 Flare. Seeing as they both cost  |
|  the same amount of MP, this does not cause any problems.                  |
| The Allemagne's appearance is that of a giant flying eyeball, and as such  |
|  the 'eyeball enemy' carries Eye drops. Go figure.                         |
| Most of the encounters with the Allemagne have a Run Count value of 2,     |
|  which means you'll have a harder time fleeing from them. The encounters   |
|  in the Swamp area with the Allemagne have the default value of 1.         |
| Equip Elemental+Choco/Mog on your weapon to exploit the Allemagne's        |
|  weakness to Wind (as with all other 'elevated' enemies). Avoid Earth.     |
| The Allemagne cannot be Back-Attacked or Side-Attacked, meaning that one   |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.            |
\                                                                            /
```

Armored Golem's BATTLE PLAN: (Repeats)

STAGE 1: (Back Row)

Set Strength to 94 and Defence to 132
Set Magic to 74 and MDefence to 160

1/2 Chance: Use <Advance> on Self, transform to Stage 2 (Centre-B Row)
Set Strength to 98 and Defence to 124
Set Magic to 80 and MDefence to 150

1/3 Chance: Use Snap on All Targets
1/6 Chance: Use Golem Laser on All Targets

STAGE 2: (Centre-Back Row)

1/2 Chance: Use <Advance> on Self, transform to Stage 3 (Centre-F Row)
Set Strength to 102 and Defence to 116
Set Magic to 86 and MDefence to 140

1/3 Chance: Use Snap on All Targets
1/6 Chance: Use Golem Laser on All Targets

STAGE 3: (Centre-Front Row)

1/2 Chance: Use <Advance> on Self, transform to Stage 4 (Front Row)
Set Strength to 106 and Defence to 108
Set Magic to 92 and MDefence to 130

1/3 Chance: Use Snap on All Targets
1/6 Chance: Use Golem Laser on All Targets

STAGE 4: (Front Row)

Use Megaton Punch on Rnd Target

SPCL STAGE: (Arms Folded)

Armored Golem's HP >= 50%: Do not transform into Spcl Stage

```
|   Armored Golem's HP  < 50%: Transform into Spcl Stage (Arms Folded)       |
|                              Use <Defence Start> on Self                   |
|                              Set Defence to 400 and MDefence to 470        |
|                                                                            |
|    STAGE 1: (Back Row)                                                     |
|                                                                            |
|     Use <Advance> on Self, transform to Stage 2 (Centre-B Row)             |
|                                                                            |
|    STAGE 2: (Centre-Back Row)                                              |
|                                                                            |
|     Use <Advance> on Self, transform to Stage 3 (Centre-F Row)             |
|                                                                            |
|    STAGE 3: (Centre-Front Row)                                             |
|                                                                            |
|     Use <Advance> on Self, transform to Stage 4 (Front Row)                |
|                                                                            |
|    STAGE 4: (Front Row)                                                    |
|                                                                            |
|     1ST ATTACK: Use <Defence Down> on Self                                 |

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Armored Golem:                  |   POWER req for Overflow:    |
|                                            | Default:                     |
|    Default: Str 110 Def 100 Mag 98  MDef 120 |  Base Damage Overflow: 172  |
|  1st Stage: Str 94  Def 132 Mag 74  MDef 160 |  Rnd Var Overflow  3x: 115  |
|  2nd Stage: Str 98  Def 124 Mag 80  MDef 150 | 1st Stage:                  |
|  3rd Stage: Str 102 Def 116 Mag 86  MDef 140 |  Base Damage Overflow: 186  |
|  4th Stage: Str 106 Def 108 Mag 92  MDef 130 |  Rnd Var Overflow  3x: 124  |
| Spcl Stage:         Def 400         MDef 470 | 2nd Stage:                  |
|                                            |  Base Damage Overflow: 182  |
| Even though the Armored Golem appears to   |  Rnd Var Overflow  3x: 112  |
|  change rows mid-battle, its 'row value' is  | 3rd Stage:                |
|  always 1, which means you'll always deal  |  Base Damage Overflow: 178  |
|  normal damage (as opposed to Back Row     |  Rnd Var Overflow  3x: 119  |
|  damage for 50% of your normal damage).    | 4th Stage:                  |
| The further forward the Armored Golem is,  |  Base Damage Overflow: 175  |
|  the higher its Strength and Magic, and the |  Rnd Var Overflow  3x: 117 |
|  lower is Def and MDef (except for when it's | Spcl Stage:                |
|  in its default form).                     |  Base Damage Overflow: N/A  |
| If the Armored Golem takes damage before its |  Rnd Var Overflow  3x: 420 |
|  first turn, then it will modify its Base  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  stats to the 1st Stage stats *after* the                                 |
|  damage for the first attack against it has been calculated.              |
| When the Armored Golem enters into its 'Special Stage', its Strength and  |
|  Magic values are not changed; they will only be set once it leaves its   |
|  Special Stage. Seeing as it does not attack while in its Special Stage,  |
|  this does not matter.                                                    |
| Turbo Ethers make for an easy steal; a Lv 59 Cloud would have a 59.38%     |
|  chance of stealing from the Armored Golem. You should also try to Morph  |
|  them into Guard Sources (raises Defence). Either use Yuffie's Conformer, |
|  or, use Laser/Demi2 six times (or Demi3 three times) followed by Morph,  |
|  which should deal at least 150 HP at this point in the game.             |
| A flaw exists in the Armored Golem's script, whereby it does not check for |
|  the Restorative Element used when it runs its Counter Script. If you were |
|  to heal the enemy, the game would not recognise the use of the 'Healing' |
|  Flag; instead of thinking that you've healed it by [Healing Damage], it  |
|  will instead think that you've caused [4,294,967,296 - Healing Damage]   |
|  worth of damage, sending the figure through the reverse process of       |
|  overflow. Because of this, healing the Golem will trigger the Counter    |
|  Script.                                                                  |
| Two versions of <Advance> and <Retreat> exist for the Armored Golem; one  |
|  of each ability is used when it is in its 'normal' stages, and another   |
|  set used when it is in its 'special' stage.                              |
| The Armored Golem has the 2nd highest MDef in the game while in its       |
|  'Special' Stage, so you would be better off using Physical attacks. With |
|  that said, its Def while in its 'Special' Stage is only slightly lower   |
|  than its MDef, and as such the Armored Golem is one of four enemies with |
|  a Def stat too great to overflow against; only Vincent can overflow      |
|  against it while it's in this stage, and he would need 52,480 kills to   |
|  have a 2.34% chance to cause Random Variation Overflow against it, or,   |
|  56,064 kill to have a 100% chance (448 Power).                           |
| All of the encounters with the Armored Golem have a Run Count value of 2, |
|  which means you'll have a harder time fleeing from them.                 |
| The Armored Golem cannot be Back-Attacked or Side-Attacked, meaning that  |
|  one cannot perform Random Variation Overflow with 4x or 6x Damage.       |
\                                                                           /

|      Do nothing                                                             |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Magic Pot:                          |   POWER req for Overflow:    |
|                                                |                              |
| The Magic Pot is arguable the best enemy in    |  Base Damage Overflow: 158   |
|  the game to grind against, given the          |  Rnd Var Overflow  3x: 105   |
|  extraordinarily large amounts of EXP/AP/Gil   |  Rnd Var Overflow  4x:  79   |
|  it leaves behind. They can never harm the     |  Rnd Var Overflow  6x:  53   |
|  player with damage; however, they can (and    o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  will) steal your most prized possessions,                                  |
|  and then flee with no way to recover the lost Ultima Weapon, or Sneak      |
|  Glove. Remember, when grinding in the North Crater, be like Jesus - save   |
|  often!                                                                     |
| You should consider using your Save Crystal in the Swamp Area, on the       |
|  first screen with the two chests. This screen has a better Area Encounter  |
|  Rate than the second screen, so you will engage Magic Pots more often      |
|  there.                                                                     |
| The only way to recover a stolen Item is to kill them before they are able  |
|  to flee the Battle. They may try to steal from you more than once,         |
|  although, they can only carry one stolen Item, which will be the first     |
|  stolen Item. Any subsequent Steal attempts will always fail. Also note     |
|  that an item can only be stolen if it can be sold in the shops.            |
| You will need to use one Elixir per Magic Pot you encounter in order to     |
|  defeat them, so having a stockpile of Elixirs is mandatory. You can        |
|  either make use of the Standard W-Item Glitch, or, you can dupe yourself   |
|  a finite amount of Elixirs from the Great Glacier, using the "Great        |
|  Glacier Elixir Dupe" exploit. If you do not wish to make use of exploits,  |
|  then the best way to farm Elixirs is to either steal from the Master       |
|  Tonberry, or, to Morph the Harpy. With two mastered Chocobo Lure Materias  |
|  equipped you would encounter the Harpy 33.2% of the time.                  |
| Take note of the fact that the check performed is specifically for the use  |
|  of Item ID #05, which is an Elixir; using a Megalixir will not work.       |
|  Once you have lifted their Physical and Magic immunities you can easily    |
|  defeat them using your regular attacks, as they have very low HP. All of   |
|  the Magic Pot's stats are rounded binary numbers.                          |
\                                                                             /

|                                                                             |
|  1ST ATTACK: Use Spcl Attack                                                |
|  2ND ATTACK: Use Spcl Attack                                                |
|                                                                             |
|    After 2nd Attack: 1/2 Chance jump to 3rd Attack for next turn            |
|                      1/2 Chance jump to 4th Attack for next turn            |
|                                                                             |
|                                                                             |
|  3RD ATTACK:                                                                |
|                                                                             |
|   All Targets with Frog: Use Spcl Attack                                    |
|                                                                             |
|   At least one Target without Frog:                                         |
```

*If Christopher's MP < 5, use Aspil on Target with Highest Current MP

Christopher's HP > 75%: 1/5 Chance use Frog Song on Rnd Target without Frog*
4/5 Chance use Spcl Attack

Christopher's HP <= 75%: 1/4 Chance use Frog Song on Rnd Target without Frog*
3/4 Chance use Spcl Attack

Christopher's HP <= 50%: 1/3 Chance use Frog Song on Rnd Target without Frog*
2/3 Chance use Spcl Attack

Christopher's HP <= 25%: 1/2 Chance use Frog Song on Rnd Target without Frog*
1/2 Chance use Spcl Attack

4TH ATTACK:

Christopher's HP > 50%: Use Spcl Attack

Christopher's HP <= 50%: Use Cure2 on All Allies with HP <= 66%; If Christopher's MP < 24, use Aspil on Target with Highest Current MP

5TH ATTACK:

Gighee is dead OR Christopher's MP < 10: Use Spcl Attack

Gighee is alive AND Christopher's MP >= 10:

No Targets with Fury: Use Aspil on Target with Highest Current MP

At least one Target with Fury:

Use High/Low Suit Sadness variant on Rnd Target with Fury

Follow-Up: Use High/Low Suit on selected Target; If selected Target has Death, do nothing

6TH ATTACK:

Gighee is dead: Use Spcl Attack

Gighee is alive:

No Targets with Sadness:

Use Bolt3 on Rnd Target; If Christopher's MP < 52, us Aspil on Target with Highest Current MP

At least one Target with Sadness:

Use Suffocation Song on Rnd Target with Sadness

```
|                                                                                |
|  7TH ATTACK:                                                                   |
|                                                                                |
|   Gighee is dead: Use Bolt3 on Rnd Target; If Christopher's MP < 52, use       |
|                   Aspil on Target with Highest Current MP                      |
|                                                                                |
|   Gighee is alive: Use Stardust March on Rnd Target                            |
|                                                                                |
|    After 7th Attack: 1/2 Chance jump to 1st Attack for next turn               |
|                      1/2 Chance jump to 2nd Attack for next turn                |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Christopher:                      |   POWER req for Overflow:       |
|                                              |                                 |
| The Christopher always appears alongside the |  Base Damage Overflow: 159      |
|  Gighee, and together they resemble 'Ziggy   |  Rnd Var Overflow  3x: 113      |
|  Stardust' (David Bowie's persona). All of   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  their attacks are song-related.                                               |
| The Christopher along with the Gighee both have relatively low Defence and     |
|  HP values, so it will not take much to kill them. The worst thing the         |
|  Christopher can do to you is inflict you with Death, which it will only       |
|  do if at least one character is inflicted with Sadness; make sure to          |
|  equip Safety Bits and Added Effect+Odin (on Armour), as is standard while     |
|  navigating the North Crater. You can also use Death Force or Resist to        |
|  defend from the Death Status.                                                 |
| A flaw exists with Christopher's AI Script; more than one to be exact. The     |
|  first error is with its 5th Attack; it should have been scripted to use       |
|  Flutilizer (Spcl Attack) if no characters are inflicted with Fury, and        |
|  Aspil if one or more characters are inflicted with Fury but its MP is         |
|  less than 10. It will incorrectly use Aspil if no characters have Fury,       |
|  and Flutilizer if one or more have Fury.                                      |
| The second flaw is with its 6th attack. If Gighee is alive one or more         |
|  characters are inflicted with Sadness, it should have had a small chance      |
|  of using Suffocation Song (chance increases as HP drops), and a large         |
|  chance of using High/Low Suit Fury variant (chance decreases as HP            |
|  drops), using Aspil if its MP is less than the cost of High/Low Suit.         |
|  It instead selects Suffocation Song in both instances; it will even           |
|  perform an MP check to make sure it has enough to use High/Low Suit, but      |
|  incorrectly selects Suffocation Song as the chosen attack. Because of         |
|  this, the Fury variant of High/Low suit will never be used (although          |
|  Gighee can still inflict you with Fury).                                      |
| You can steal Earth Drums from Christopher if you wish; they are fairly        |
|  useless at this point (casts Quake2 on all opponents for 640 HP Base          |
|  Damage); however, they are rare. The Christopher is the only enemy that       |
|  you can steal Earth Drums from; all other enemies carrying Earth Drums        |
|  carry them as a Drop. A Lv 60 Cloud would have a 17.19% chance of             |
|  stealing from them, or, a 26.56% chance with the Sneak Glove equipped.        |
| Christopher cannot be Back-Attacked or Side-Attacked, meaning that one         |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.                |
\                                                                                /

Gighee's ATTACKS:

Attack 1: <Guitar Slap>	Target: One Opponent	Status Inflict:	
[354] Physical	Element: Shoot	Fury (100%)	
	Att%: 100		
	Power: 24		
	Base Damage: 438 HP		
Attack 2: Petrif-Eye	Target: One Opponent	Status Inflict:	
[355] Magical	Element: Shoot	Petrify (100%)	
	Att%: 100		
	Power: 16		
	MP Cost: 10 MP		
	Base Damage: 594 HP		
Attack 3: Voice of Ages	Target: All Opponents	Split Damage	
[356] Magical	Element: Shoot	Status Inflict:	
	Att%: 100	Silence (100%)	
	Power: 16		
	MP Cost: 10 MP		
	Base Damage: 594 HP		
Attack 4: Sun Diver	Target: One Opponent	Ejects From Bat	
[357] Physical 0 Dam	Att%: Auto Hit	Flag as Escaped	

Gighee's BATTLE PLAN: (Repeats)

NOTE - When Gighee uses Voice of Ages, its 'Special Chance' variable will be set to 2, meaning it will have a 1/2 chance of passing the follow-up chances. This value will remain as 2 until the next time Gighee takes Damage, when it will then be set to either 6, 5, 4 or 3, in accordance with its Current HP.

OPENING ATTACK: 1/3 Chance start from 1st Attack
1/3 Chance start from 2nd Attack
1/3 Chance start from 3rd Attack

```
| 1ST ATTACK: Use <Guitar Slap> on Rnd Target without Petrify                |
|                                                                           |
|  Follow-Up:                                                               |
|                                                                           |
|   Gighee's HP  > 75%: 1/6 Chance repeat 1st Attack                        |
|                       5/6 Chance do nothing                               |
|                                                                           |
|   Gighee's HP <= 75%: 1/5 Chance repeat 1st Attack                        |
|                       4/5 Chance do nothing                               |
|                                                                           |

|   At least one Target without Silence: Use Voice of Ages on All Targets    |
|                                        Set 'Special Chance' to 2           |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Gighee:                       |   POWER req for Overflow:       |
|                                          |                                 |
| Gighee will always appears alongside     |  Base Damage Overflow: 162      |
|  Christopher, and together they resemble |  Rnd Var Overflow  3x: 108      |
|  'Ziggy Stardust' (David Bowie's persona).   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  All of their attacks are song-related.                                    |
| The Gighee along with the Christopher both have relatively low Defence and |
|  HP values, so it will not take much to kill them. The worst thing Gighee  |
|  can do to you is use <Petrif-Eye>, which is one of three Enemy Attacks in |
|  the game that inflict Petrify (as opposed to Slow-numb), the other two    |
|  being Stone Strike (Bagrisk), and Deadly Needles (Crown Lance). Make sure |
|  to equip Safety Bits and Added Effect+Odin (on Armour), which also        |
|  protects against Petrify; if all three characters become inflicted with   |
|  Petrify then it's a Game Over.                                            |
| Note that the Petrif-Eye used by Gighee is *not* the same attack as used   |
|  by Demons Gate, and does not use the 'Hidden' Element (so you cannot      |
|  defend against the Status by putting Hidden defence on your Armour).      |
| When you use any Magical ability on Gighee, it will respond by using Voice |
|  of Ages to inflict Silence on all characters. At this point it will       |
|  become more deadly, as its chance of passing the various checks will be   |
```

```
|  much greater, so just use Physical blow to dispatch the enemy.            |
| You should try to steal valuable Elixirs from the Gighee, as they will be  |
|  necessary for defeating the Magic Pot. A Lv 60 Cloud would have a 17.19%  |
|  chance of stealing from the Gighee, or, a 26.56% chance with the Sneak    |
|  Glove equipped. Master Tonberrys are easier to steal Elixirs from.        |
| The Sun Diver attack is similar to the Midgar Zolom's Blown Away, in that  |
|  the character will *not* be flagged as Dead, but rather as escaped from   |
|  Battle. If your remaining two characters were to be KO'd following the    |
|  use of Sun Diver, you will not be met with a Game Over and instead will   |
|  be taken back to the Field Map.                                           |
| While the damage dealt via Voice of Ages is subject to Split Damage, the   |
|  Status chances are *not* subject to Split Damage, seeing that the chance  |
|  of inflicting Silence is set to 100%, and will always inflict all         |
|  characters with Silence, so long as they do not have Silence immunity.    |
| Gighee cannot be Back-Attacked or Side-Attacked, meaning that one cannot   |
|  perform Random Variation Overflow with 4x or 6x Damage.                   |
\                                                                            /

| - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - |
|  Mover's BATTLE PLAN: (Repeats)                                           |
|                                                                           |
| OPENING ATTACK: 1/4 Chance start from 1st Attack                          |
|                 1/4 Chance start from 2nd Attack                          |
|                 1/4 Chance start from 3rd Attack                          |
|                 1/4 Chance start from 4th Attack                          |
|                                                                           |
|                                                                           |
| PHASE 1: (Repeats)                                                        |
|                                                                           |
|  All Movers alive:                                                        |
|                                                                           |
|  NOTE - This Attack pattern is only true if the Mover passes the 1/4      |
|         chance to start from the 1st Attack. If it starts from its 2nd,   |
|         3rd or 4th Attack, then the pattern will be displaced.            |
|                                                                           |
|         Triangle Attack will always be every after six turns *since its   |
|          initial attack*; so, if the Mover begins from its 2nd Attack,    |
|          Triangle Attack will instead be used its seventh turn, as        |
|          opposed to its sixth.                                            |
|                                                                           |
|         Bodyblow will be used every four turns, unless Triangle Attack    |
|          is used, in which case Bodyblow will be used on its 5th turn.    |
|          These alternating attack patterns will come full-circle every    |
|          24 turns.                                                        |
|                                                                           |
|                                                                           |
|   1ST ATTACK: Skip a turn                                                 |
|   2ND ATTACK: Skip a turn                                                 |
|   3RD ATTACK: Skip a turn                                                 |
|   4TH ATTACK: Use <Bodyblow> on Rnd Target                                |
|   5TH ATTACK: Skip a turn                                                 |
|   6TH ATTACK: Use <Triangle Attack> on Rnd Target                         |
|   7TH ATTACK: Skip a turn                                                 |
|   8TH ATTACK: Skip a turn                                                 |
|   9TH ATTACK: Use <Bodyblow> on Rnd Target                                |
|  10TH ATTACK: Skip a turn                                                 |
|  11TH ATTACK: Skip a turn                                                 |
|  12TH ATTACK: Use <Triangle Attack> on Rnd Target                         |
|  13TH ATTACK: Skip a turn                                                 |
|  14TH ATTACK: Use <Bodyblow> on Rnd Target                                |
|  15TH ATTACK: Skip a turn                                                 |
|  16TH ATTACK: Skip a turn                                                 |
|  17TH ATTACK: Skip a turn                                                 |

|  PHASE 2: (Repeats)                                                            |
|                                                                                |
|   At least one Mover dead:                                                     |
|                                                                                |
|    1ST ATTACK: Skip a turn                                                     |
|    2ND ATTACK: Skip a turn                                                     |
|    3RD ATTACK: Skip a turn                                                     |
|    4TH ATTACK: Use <Bodyblow> on Rnd Target                                    |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Mover:                          |   POWER req for Overflow:         |
|                                            |                                   |
| The Mover is incredibly rare, and only     |  Base Damage Overflow: 195        |
|  appears as a 4.69% chance encounter on the|  Rnd Var Overflow  3x: 130        |
|  two 'Swamp' screens in the North Crater.  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  They will always appear in groups of three,                                   |
|  leaving 2400 AP per battle! They do not leave any EXP, but they do leave     |
|  90,000 gil. A double growth Weapon would mean 4800 AP per battle, and a      |
|  triple growth would mean 7200. The Movers incredible Battle Spoils           |
|  contributes to the Swamp area being the best in the game.                    |
| The Mover's remarkably high Dexterity means that they will get through        |
|  their turns fairly quickly. Avoid using Magic Breath, Trine and Beta;        |
|  Aqualung will deal around 2000 HP, which you can then follow up with         |
|  Slash-All or Comet2. Your Deathblow chance will be roughly 57% against       |
|  the Mover, or, 94% with the Mystile equipped. If you have obtained the       |
|  Enemy Skill Pandora's Box, then that should kill them in one, as it will     |
|  disregard the target's MDefence value.                                       |
| Turbo Ethers are a very easy steal; a Lv 60 Cloud would have a 42.19%          |
|  chance of stealing from the Mover, or, a 100% chance with the Sneak Glove    |
|  equipped. You could also use Yuffie's Conformer to Morph them into           |
|  Protect Rings if you missed the opportunity to steal from Schizo(Right).     |
|  This Accessory will permanently set up Barrier and MBarrier, and cannot      |
|  be obtained anywhere else. The damage formula used for the Conformer         |
|  means that Yuffie should be able to kill them outright in one hit; be        |
|  sure to make use of the Mega All Materia!                                    |
| The Mover each contains three variants of the same identical attacks; As      |
|  the battle begins each Mover is assigned one of the three sets of attacks    |
|  according to it 'Group ID' Flag i.e. the Mover [A] will use one set, the     |
|  Mover [B] will use the second set, and the Mover [C] will use the third      |
|  set of the attacks available.                                                |
| The Mover is one of a number of enemies that are elevated above the           |
|  ground, but will not take double damage from the Wind Element, nor will      |
|  it nullify Earth.                                                            |
| The Mover cannot be Back-Attacked or Side-Attacked, meaning that one          |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.               |
\                                                                                /

NOTE - The Parasite can also be fought here; however, I will not be duplicating that entry. You can find the Parasite within the "North Crater Descent" listings just above. The Malboro can also be fought here; you can find the Malboro within the "Gaea's Cliffs" listings further above.

- Be sure to have all three Enemy Skill Materia equipped for the first encounter with the Dragon Zombie, as it is scripted to use Pandora's Box as a death-counter *once per save only*. If you miss the opportunity to learn the Skill then it will be lost forever.

|                                                                        |
|                                                                        |
|  1ST ATTACK: Use <Poison Fang> on Rnd Target without Poison; If all    |
|               Targets have Poison, select Rnd Target                   |
|                                                                        |
|   Follow-Up:                                                           |
|                                                                        |
|    All Targets with Poison: Do nothing                                 |
|                                                                        |
|    At least one Target without Poison:                                 |
|                                                                        |
|     Dragon Zombie's HP  > 75%: 1/5 Chance use <Poison Fang> on Rnd Target  |
|                                     without Poison                     |
|                                4/5 Chance do nothing                   |
|                                                                        |
|     Dragon Zombie's HP <= 75%: 1/4 Chance use <Poison Fang> on Rnd Target  |
|                                     without Poison                     |
|                                3/4 Chance do nothing                   |
|                                                                        |
|     Dragon Zombie's HP <= 50%: 1/3 Chance use <Poison Fang> on Rnd Target  |
|                                     without Poison                     |
|                                2/3 Chance do nothing                   |
|                                                                        |
|     Dragon Zombie's HP <= 25%: 1/2 Chance use <Poison Fang> on Rnd Target  |
```

```
                                    without Poison
                                1/2 Chance do nothing

      After 1st Attack:

       Dragon Zombie's HP  > 75%: 4/5 Chance jump to 2nd Attack next turn
                                  1/5 Chance jump to 3rd Attack next turn

       Dragon Zombie's HP <= 75%: 3/4 Chance jump to 2nd Attack next turn
                                  1/4 Chance jump to 3rd Attack next turn

       Dragon Zombie's HP <= 50%: 2/3 Chance jump to 2nd Attack next turn
                                  1/3 Chance jump to 3rd Attack next turn

       Dragon Zombie's HP <= 25%: 1/2 Chance jump to 2nd Attack next turn
                                  1/2 Chance jump to 3rd Attack next turn

  2ND ATTACK: Use Body Tail on All Targets

    After 2nd Attack: jump to 4th Attack for next turn

  3RD ATTACK:

   All Targets with Paralyzed:

    Use Body Tail on All Targets

   At least one Target without Paralyzed:

    Dragon Zombie's HP  > 75%: 1/5 Chance use Bone on Rnd Target without
                                    Paralyzed
                               4/5 Chance use Body Tail on All Targets

    Dragon Zombie's HP <= 75%: 1/4 Chance use Bone on Rnd Target without
                                    Paralyzed
                               3/4 Chance use Body Tail on All Targets

    Dragon Zombie's HP <= 50%: 1/3 Chance use Bone on Rnd Target without
                                    Paralyzed
                               2/3 Chance use Body Tail on All Targets

    Dragon Zombie's HP <= 25%: 1/2 Chance use Bone on Rnd Target without
                                    Paralyzed
                               1/2 Chance use Body Tail on All Targets

  4TH ATTACK:

   All Targets with Poison OR Dragon Zombie's MP < 20:

    Skip a turn

   At least on Target without Poison AND Dragon Zombie's MP >= 20:

    Dragon Zombie's HP  > 75%: 1/5 Chance use Abnormal Breath on Rnd Target
                               4/5 Chance use 1st Attack

    Dragon Zombie's HP <= 75%: 1/4 Chance use Abnormal Breath on Rnd Target
```

```
|                              3/4 Chance use 1st Attack                    |
|                                                                           |
|    Dragon Zombie's HP <= 50%: 1/3 Chance use Abnormal Breath on Rnd Target |
|                              2/3 Chance use 1st Attack                    |
|                                                                           |
|    Dragon Zombie's HP <= 25%: 1/2 Chance use Abnormal Breath on Rnd Target |
|                              1/2 Chance use 1st Attack                    |
|                                                                           |
|                                                                           |
|  5TH ATTACK:                                                              |
|                                                                           |
|   Dragon Zombie's MP < 100:                                               |
|                                                                           |
|    Use Body Tail on All Targets                                           |
|                                                                           |
|   Dragon Zombie's MP >= 100:                                              |
|                                                                           |
|      *If no Targets have Paralyzed, select Rnd Target                     |
|                                                                           |
|    Dragon Zombie's HP  > 75%: 1/5 Chance use Shadow Flare on Rnd Target   |
|                                    with Paralyzed*                        |
|                              4/5 Chance use Body Tail on All Targets      |
|                                                                           |
|    Dragon Zombie's HP <= 75%: 1/4 Chance use Shadow Flare on Rnd Target   |
|                                    with Paralyzed*                        |
|                              3/4 Chance use Body Tail on All Targets      |
|                                                                           |
|    Dragon Zombie's HP <= 50%: 1/3 Chance use Shadow Flare on Rnd Target   |
|                                    with Paralyzed*                        |
|                              2/3 Chance use Body Tail on All Targets      |

|    Dragon Zombie's HP <= 25%: 1/2 Chance use Shadow Flare on Rnd Target   |
|                                    with Paralyzed*                        |
|                              1/2 Chance use Body Tail on All Targets      |
|                                                                           |
|      After 5th Attack: 1/2 Chance jump to 1st Attack for next turn        |
|                        1/2 Chance jump to 2nd Attack for next turn        |
|                                                                           |
|                                                                           |
|  DEATH:                                                                   |
|                                                                           |
|   GlobalVar [Pandora's Box] has not been set:                             |
|                                                                           |
|    Use Pandora's Box on All Targets                                       |
|    Set GlobalVar [Pandora's Box]                                          |
|                                                                           |
|   GlobalVar [Pandora's Box] has been set: Do nothing                      |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Dragon Zombie:                 |   POWER req for Overflow:       |
|                                           |                                 |
| The Dragon Zombie is one tough enemy, and |  Base Damage Overflow: 195      |
|  can inflict some heavy damage. Put your  |  Rnd Var Overflow  3x: 130      |
|  characters in the Back Row and use Big   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Guard if you need the extra defence. Use                                 |
|  Laser or Demi3 a few times as the battle begins to deplete its HP.       |
| You can only learn the Enemy Skill Pandora's Box from the Dragon Zombie,  |
|  and the enemy is scripted to use the ability *once per save file only*.  |
|  If the Dragon Zombie does not have enough MP to cast the Skill, then the |
|  GlobalVar will still be toggled, and Pandora's Box will be lost forever. |
|  If, however, the Dragon Zombie was to be defeated via the use of Poison  |
```

```
|  damage, a Counter Attack, or from the Petrify Status, then the GlobalVar  |
|  will *not* be toggled, and the ability will be used on the next encounter |
|  with the foe. Be sure to equip all of the Enemy Skill Materias that you   |
|  wish to learn the Skill on; Pandora's Box will target all opponents, so   |
|  you can equip one Enemy Skill on each character.                          |
| The GlobalVar for Pandora's Box will also be toggled following the Jenova- |
|  SYNTHESIS battle, strangely enough. Seeing as the Jenova-SYNTHESIS fight  |
|  takes place after the point-of-no return, the Player cannot exploit this  |
|  without the use of the "Yuffie Warping" glitch to transport them back to  |
|  the North Crater following the fight with Jenova-SYNTHESIS.               |
| Pandora's Box is not as strong as Shadow Flare; however, it will ignore    |
|  the target's MDefence, as as such it can prove to be very effective       |
|  against foes with high MDefence, such as the Mover.                       |
| You can also learn the Enemy Skill Shadow Flare from the Dragon Zombie, if |
|  you missed the opportunity to learn it from Ultimate Weapon. It will      |
|  always use the ability on a character that is inflicted with Paralyzed,   |
|  so use Dazers on the character that needs to learn the Skill. Shadow      |
|  Flare only deals 50% of the damage dealt compared to Ultimate Weapon's    |
|  use of the ability, but if you are struggling to survive the attack then  |
|  you can set up Reflect to negate the damage taken (the Skill will still   |
|  be learned, along with Pandora's Box which can also be reflected).        |
| Cauldrons are the Item version of Bad Breath, and can be useful in the     |
|  Battle Square if you have lost the ability to use your Command Materia.   |
|  You can obtain a single Cauldron from the Torpedo Attack Mini-Game in the |
|  Wonder Square; if you wished to farm them, then you would have to do so   |
|  from the Dragon Zombie. A Lv 64 Cloud would have a 51.56% chance of       |
|  stealing from them, or, a 100% chance withy the Sneak Glove equipped.     |
| The Dragon Zombie is considered an "Undead" enemy, which means that they   |
|  will take damage from healing items and spells such as Cure, Potions etc. |
|  Throwing a Phoenix Down would have a 25% chance of instantly killing the  |
|  Dragon Zombie, whereas a Megalixir/Elixir/X-Potion has a 100% chance.     |
|  White Wind will Petrify the Dragon Zombie, ending the battle instantly.   |
| As with all "Undead" Enemies (excluding the Parasite and Soul Fire), the   |
|  Dragon Zombie takes Double Damage from the Holy Element, which you will   |
|  have access to by now (Alexander Materia).                                |
| The Dragon Zombie is one of four enemies that absorbs the Death Status,    |
|  meaning that Physical attacks performed by Players with Added Effect +    |
|  Death Status on their Weapon (Destruct Materia) will cure the Dragon      |
|  Zombie. The other three enemies that absorb Death are the Ghost, Zenene,  |
|  Ghost Ship.                                                               |
| When you make the final descent to the Planet's Core (after the point-of-  |
|  no return), you will have an overall 11.52% chance encountering the       |
|  Dragon Zombie for each of the thirteen platform jumps.                    |
| The Dragon Zombie cannot be Back-Attacked or Side-Attacked, meaning that   |
|  one cannot perform Random Variation Overflow with 4x or 6x Damage.        |
| The Dragon Zombie is immune to Seizure, which isn't necessary seeing as    |
|  there is no way for the Player to inflict an enemy with Seizure. The      |
|  Dragon Zombie is one of 86 enemies that are immune to Seizure. It is also |
|  immune to Peerless, along with 104 other enemies.                         |
\                                                                            /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Pollensalta:                    |   POWER req for Overflow:         |
|                                            |                                   |
| The Pollensalta is the only enemy you can  |  Base Damage Overflow: 156        |
|  learn the Enemy Skill Angel Whisper from, |  Rnd Var Overflow  3x: 104        |
|  which will have a 100% chance of curing one |  Rnd Var Overflow  4x:  78      |
|  character of Death, Sleep, Poison, Silence, |  Rnd Var Overflow  6x:  52      |
|  Confusion, Slow, Stop, Frog, Small,       o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Petrify, Slow-numb, Berserk, Paralyzed and                                    |
|  Darkness. You will need to Manipulate the Pollensalta to learn the Skill;     |
|  a Lv 60 cloud would have a 74% chance of successfully manipulating them.      |
| The Pollensalta has very low HP and Physical Defence, similar to that of       |
|  the Snow, so it should not take more than a few Physical blows to kill        |
|  them. Your Deathblow chance will approximately 64%. You could use Bad         |
|  Breath to incapacitate the enemy, then use Magical spells such as             |
|  Comet2 to defeat them. Avoid using Fire based attack, such as Beta and        |
|  Magic Breath.                                                                 |
| The Pollensalta will only use Cold Breath unless provoked into using a         |
|  Counter Attack. She will not perform an MP check when it tries to use         |
|  Fascination, and as such the "skill power is used up" text string will be     |
|  displayed whenever she tries to use that attack.                              |
\                                                                                /

|                                                                          |
|  8TH ATTACK: Use Sun on Rnd Target without Darkness; If all Targets have |
```

Darkness, use <Spin Turn> on Rnd Target without Stop; If all Targets have Stop, use <Spin Turn> on Rnd Target

After 8th Attack: Jump to 1st Attack for next turn

9TH ATTACK: Use Sun on Rnd Target without Silence; If all Targets have Silence, use <Spin Turn> on Rnd Target without Stop; If all Targets have Stop, use <Spin Turn> on Rnd Target

After 9th Attack: Jump to 1st Attack for next turn

COUNTER: [All Physical and Magical Attacks]

Death Dealer's HP > 25%: Do nothing

Death Dealer's HP <= 25%:

Roulette has been used: Do nothing

Roulette has not been used:

Use Roulette on Rnd Enemy or Ally

Notes On Death Dealer:

The Death Dealer can deal a moderate amount of damage, although, they do not have too much health, so they can easily be defeated using Shadow Flare, or by using L4 Suicide. You can also use Bad Breath to immobilise them.

As is standard when traversing the North Crater, you should have defences in place to protect against the Death Status, such as Safety Bits and Added Effect+Odin (on Armour). When the Death Dealer uses Roulette, it will target one target at random, including itself and other allies. Seeing as the Death Dealer does not have immunity to Death, the ability will also kill the enemy should it be selected as the chose target. You can also use Death Force or Resist (Vaccine or Lv 3 Heal Materia) to defend against the Death Status.

To learn the Enemy Skill Roulette, the easiest method is to firstly put all three Enemy Skills on one character, then kill the remaining two characters mid-battle. A Lv 64 Cloud would have a 67% chance of manipulating the Death Dealer; you can then have it cast Roulette. Your chances of learning Roulette will be much greater, as there will be fewer targets to select from. Note that the character's Luck will *not* affect your chances of being selected; every target has the same equal chance of being chosen.

If you have equipment in place to defend against Death (which you should have), then you will likely be vulnerable to Silence and Stop. Be sure to have access to White Wind or Remedies to cure your characters of the negative Statuses inflicted by the Death Dealer.

The Kiss of Death will cast Death on all opponents, and is incredibly rare. It can only be obtained from the Death Dealer as a 14.06% drop chance, and cannot be obtained anywhere else in the game. You could optionally try to steal Turbo Ethers from them; just note that you cannot obtain the steal *and* the drop; it's one or the other. A Lv 64 Cloud would have a 56.25% chance of stealing from the Death Dealer, or, a 100% chance with the Sneak Glove equipped.

POWER req for Overflow:

Base Damage Overflow:	190
Rnd Var Overflow 3x:	127
Rnd Var Overflow 4x:	95
Rnd Var Overflow 6x:	64

| The Death Dealer is the only enemy in the game to Nullify the Restorative |
| Element, and as such any curing abilities will be negated, although the |
| damage dealt will be a 'green' 0. This is an oversight, as the Death |
| Dealer can never heal itself when using Emperor. |
| The Death Dealer is one of a number of enemies that are elevated above the |
| ground, but will not take double damage from the Wind Element, nor will |
| it nullify Earth. |

-.-.-.

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Iron Man:                      |   POWER req for Overflow:          |
|                                           |                                    |
| The Iron Man is a unique enemy that can only |  Base Damage Overflow: 260      |
|  be encountered after the Player has passed  |  Rnd Var Overflow  3x: 173      |
|  the point-of-no return. While traversing    o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  the two 'Floating Platform' screens, you                                    |
|  will have an overall 14.45% chance of facing the Iron Man, which is         |
|  basically a stronger version of the Wolfmeister fought on Disc 2. It can    |
|  never be Back-Attacked.                                                     |
| Like the Wolfmeister, the Iron Man will take double damage from Water-       |
|  based attacks; however, its incredibly high MDefence means that Aqualung    |
|  will only hit for around 1600 HP; the same goes for Dragon Scales. Either   |
|  pair the Elemental Materia with Leviathan, or, use Pandora's Box which      |
|  will overlook the target's MDefence and hit for over 4000 HP. Avoid         |
|  using Magic Breath, although feel free to use Bad Breath to subdue the      |
|  enemy. Laser/Demi3 works well, also. You could use a Holy Torch to remove   |
|  the Iron Man's Haste and Barrier Statuses, although he will just set them   |
|  back up again (no more than four times).                                    |
| Feel free to try to steal Elixirs from the Iron Man; you may need to         |
|  re-stock your supply if you have been battling the Magic Pots. With that    |
|  said, you are at a point in the game where you can start using your         |
|  remaining Megalixirs, if you have any left to use. The Escort Guard is      |
|  a piece of Armour for the men-only that nullifies Lightning, Earth, Water   |
|  and Poison. You should have already obtained one from the Sunken Gelnika.   |
| The encounter with the Iron Man is one of a handful of forced encounters     |
|  that allow you to flee the battle, although, the 'Run Value' will be set    |
|  to 2, meaning you'll have a slightly harder time trying to escape.          |
| The "J-E-N-O-V-A" theme will be heard throughout the encounters with the     |
|  Iron Man, and the Victory Fanfare Theme will not be heard.                  |
\                                                                              /

|  Jenova-SYNTHESIS' BATTLE PLAN: (Repeats)                                 |
|                                                                           |
|  NOTE - The battle with Jenova-SYNTHESIS consists of 3x Jenova-SYNTHESIS, |
|         two of which are flagged to be invisible as the battle initiates. |
|         Jenova-SYNTHESIS [A] is the visible "main" boss, and Jenova-      |
|         SYNTHESIS [B] and [C] act as the tentacles. Jenova-SYNTHESIS [B]  |
|         and [C] will never attack; all of the actions are performed by    |
|         Jenova-SYNTHESIS [A].                                             |
|                                                                           |
|                                                                           |
|  SETUP:                                                                   |
|                                                                           |
|   Set Jenova-SYNTHESIS [A]'s Head as the body-part selected as target     |
|                                                                           |
|   Disable default Death Handling for Jenova-SYNTHESIS [B]                 |
|   Set Jenova-SYNTHESIS [B]'s Left Tentacle as the body-part selected      |
|   Set Jenova-SYNTHESIS [B] Max HP to 10,000                               |
|   Set Jenova-SYNTHESIS [B] Current HP to 10,000                           |
|   Set Jenova-SYNTHESIS [B] EXP value to 0                                 |

|   End of Setup                                                             |
|                                                                            |
|                                                                            |
|  PHASE 1: (Repeats)                                                        |
|                                                                            |
|    Jenova-SYNTHESIS' HP >= 15,000:                                         |
|                                                                            |
|     1ST ATTACK:                                                            |
|                                                                            |
|      Jenova-SYNTHESIS [B] does not have Death: Use <Repeating Slap> on Rnd |
|                                                Target                      |
|                                                                            |
|      Jenova-SYNTHESIS [B] has Death: Set Defence to 80, skip a turn        |
|                                                                            |
```

2ND ATTACK:

Jenova-SYNTHESIS [C] does not have Death: Use Absorb on Rnd Target

Jenova-SYNTHESIS [C] has Death: Set MDefence to 150, skip a turn

3RD ATTACK: Same as 1st Attack
4TH ATTACK: Same as 2nd Attack

5TH ATTACK:

Jenova-SYNTHESIS [B] has Death AND Jenova-SYNTHESIS [C] has Death:

Use <Right Hand Revived> on Self
Cure Jenova-SYNTHESIS [C] of Death
Set Jenova-SYNTHESIS [C]'s Current HP to 25% of Max HP

Use <Left Hand Revived> on Self
Cure Jenova-SYNTHESIS [B] of Death
Set Jenova-SYNTHESIS [B]'s Current HP to 25% of Max HP

Set Defence back to 100 and MDefence back to 180

Jenova-SYNTHESIS [B] is Alive AND Jenova-SYNTHESIS [C] has Death:

Use Stop on Rnd Target; If Jenova-SYNTHESIS' MP < 34, skip a turn

Jenova-SYNTHESIS [B] has Death AND Jenova-SYNTHESIS [C] is Alive:

Use Cure3 on All Allies; If Jenova-SYNTHESIS' MP < 64, skip a turn

Jenova-SYNTHESIS [B] is Alive AND Jenova-SYNTHESIS [C] is Alive:

Use Bio2 on All Targets; If Jenova-SYNTHESIS' MP < 36, skip a turn

PHASE 2:

Jenova-SYNTHESIS' HP < 15,000:

1ST ATTACK: Display String: [5]
2ND ATTACK: Display String: [4]
3RD ATTACK: Display String: [3]
4TH ATTACK: Display String: [2]
5TH ATTACK: Display String: [1]

6TH ATTACK: Use Ultima on All Targets
Remove all active enemies from Battle, active enemies leaves no rewards, end Battle

Run Post-Battle Script

COUNTER: [All Physical and Magical Attacks]

Last Command was [Summon OR W-Summon] AND Last Attack was KOTR:

Set GlobalVar [Jenova KOTR used]

DEATH: Jenova-SYNTHESIS [B] has died:

Set Jenova-SYNTHESIS [A]'s Defence to 80

Jenova-SYNTHESIS [C] has died:

Set Jenova-SYNTHESIS [A]'s MDefence to 150

Jenova-SYNTHESIS [A] has died:

Last Command was [Summon OR W-Summon] AND Last Attack was KOTR:

Set GlobalVar [Jenova KOTR used]

Remove remaining Jenova-SYNTHESIS from Battle, remaining Jenova-SYNTHESIS leaves no rewards, end Battle

POST-BATTLE: This script will run when Jenova-SYNTHESIS is killed, or when Jenova-SYNTHESIS uses Ultima, or, when Jenova-SYNTHESIS attempts to use Ultima with insufficient MP.

Set GlobalVar [Pandora's Box] to 0

This single-byte variable is overwritten, and is instead used as a flag during the opening scripts in the Bizarro battles to prevent its HP values from being set to their Max values each time you switch parties.

Set GlobalVar [Ultimate Weapon's HP] to 0

These three-bytes are overwritten, and are instead used as Global Variables to indicate which body parts have been killed during the Bizarro battles.

Byte 1:

- Bizarro Head Death Count

Byte 2:

- Bizarro Head Dead
- 2-Party Left/3-Party Centre Bizarro Core Dead
- 2-Party Right/3-Party Left Bizarro Core Dead
- 2-Party Left/3-Party Centre/3-Party Left Bizarro Shoulder Dead
- 3-Party Centre/3-Party Right Bizarro Shoulder Dead
- 2-Party Left Bizarro Wing Dead

Byte 3:

- 3-Party Right Bizarro Core Dead
- 2-Party Party Right Bizarro Shoulder Dead
- 2-Party Right/3-Party Left Bizarro Wing Dead
- 3-Party Right Bizarro Wing Dead

Set GlobalVar [Qty of Lv 99 Players] to [Qty of Lv 99 Players]

*All of the following checks run sequentially, and the allocated value can be overwritten by the subsequent checks.

GlobalVar [Cloud's Lv>60] set:

Set GlobalVar [Bizarro Party Count] to 3*

Global Var [Cloud's Lv>60] is not set:

Set GlobalVar [Bizarro Party Count] to 2*

Jenova-SYNTHESIS' HP reaches 25% or less in < 6 turns OR [Qty of Lv<45 Players] = 0:

Set GlobalVar [Bizarro Party Count] to 3*

[Qty of Lv<45 Players] > 0 OR [Qty Of Players] < 8 OR [Level Average] < 68:

Set GlobalVar [Bizarro Party Count] to 2*

Jenova-SYNTHESIS' HP reaches 25% or less in > 12 turns OR [Level Average] < 54 OR [Qty of Lv<35 Players] > 0:

Set GlobalVar [Bizarro Party Count] to 1

To summarise, here are the conditions required for each Bizarro Party variation. Note that Aeris' Lv is *not* considered for any of the checks, nor will Yuffie or Vincent's respective Lv be considered if they have not been recruited. Also note that the 'Bizarro Party Count' Var is set *prior* to earning any EXP from the Jenova-SYNTHESIS battle.

Firstly, if *any* of the following three checks come true, the party count will be automatically set to 1, disregarding any other factors:

1-PARTY BIZARRO FIGHT:

- Jenova-SYNTHESIS used 13 turns or more before it began its countdown
- The combined Lv average is lower than 54
- At least one character is Lv 34 or lower

If Jenova-SYNTHESIS had begun its countdown in twelve turns or less, the combined Lv average is 54 or greater, *and* all of your characters are Lv 35 or greater, then following checks then play out. If any of the three checks pass, the party count will be set to 2:

2-PARTY BIZARRO FIGHT:

- Vincent or Yuffie have *not* been recruited (or both)
- The combined Lv average is lower than 68
- At least one character is Lv 44 or lower

If Jenova-SYNTHESIS had begun its countdown in twelve turns or less, the combined Lv average is 68 or greater, *and* Vincent and Yuffie have both been recruited, then following checks then play out, setting the party count to 3 when the second check passes:

3-PARTY BIZARRO FIGHT:

- Jenova-SYNTHESIS is killed or begins its countdown in five turns or less
- All of your characters are Lv 45 or greater

The party count should also have been affected by Cloud's Lv being 60 or greater; however, given that the checks for the 2-Party fight searches for 'at least one character Lv 44 or lower' and the 3-Party fight checks to make sure that 'all characters Lv 45 or greater', one of these two checks *must* come true, and as such the [Cloud's Lv>60] flag used in the preceding checks will not affect the Party count.

If you want an easy Bizarro-Sephiroth battle then simply wait until Jenova-SYNTHESIS has used 13 turns before you attacker her; so long as her HP is above 15,000 as she takes her 13th turn, you will always face the 1-Party Bizarro regardless of your average level.

Notes On Jenova-SYNTHESIS:

	Def	MDef
Default:	100	180
J-Synth [B] dead:	80	
J-Synth [C] dead:		150

Jenova-SYNTHESIS is the first part of a four-part final Boss encounter, and has remarkably low Physical and Magical Defence given the fact that she is a Final Boss; although, her Strength and Dexterity aren't too shabby. You do not have to kill the tentacles, although, you will gain additional AP if you do, but only for killing them once. The main part of Jenova-SYNTHESIS is the only part that leaves EXP. It is likely that the developer's had intended to also adjust the AP values for the Tentacles to 0; however, no function exists within the game to modify the AP of an actor mid-battle.

POWER req for Overflow:

1st Stage:	
Base Damage Overflow:	172
Rnd Var Overflow 3x:	115
2nd Stage:	
Base Damage Overflow:	164
Rnd Var Overflow 3x:	109

The battle will end automatically if Jenova-SYNTHESIS is able to use Ultima, even if it does not have enough MP to cast the ability (the "skill power is used up" text string will be displayed instead). She will not use any Death animation if any case, and you will not gain any EXP. If, however, you do kill Jenova-SYNTHESIS for the 60,000 EXP, then your average level will *not* be affected, as the "Average Level" variables are assigned prior to the experience being applied to the Player.

Before advancing past the point-of-no return, the Player should consider making their way back to the Highwind to swap your Party around, as you will not be able to PHS using the Save Point created via the Save Crystal. You will be given the option to swap your Party out just before you plunge past the PONR; however, you will only get a single opportunity to select your Party.

Yuffie makes a good candidate, as the Power value for her Conformer will be set to Jenova-SYNTHESIS' Lv, which is 61 (3.8125x normal damage). Equip her with the Double Cut Materia, Counter Attacks and Counter + Deathblow. Give another character (Cloud) the Mystile, and give them Added Cut+Deathblow along with Mega All. Give your third character the Magic Plus Materia, and prepare them with Flare (Contain Materia),

| Comet2, Bahamut ZERO, along with MP Turbo, Quadra Magic and Magic |
| Counter. You should also equip Ribbons and/or Added Effect+Hades (on |
| Armour) to defend from the Status inflictions dealt via Jenova. |
| Shadow Flare works well against Jenova-SYNTHESIS, as does Pandora's Box. |
| If you have 4x-Cut available (Lv 2 Double Cut Materia), then Yuffie will |
| make very short work of this Boss. Be very wary when it begins its |
| countdown, which it will do once its HP falls below 25%. If it has not |
| been killed by the time it reaches its 6th turn thereafter, then it will |
| use Ultima which can potentially causing a Game Over. You can use Dragon |
| Force, Shield, and of course, Big Guard to defend against this. If you |
| have any Hero Drinks to use, you could also give a few to Yuffie to boost |
| her Att by 30% (capped at +100%). |
| |
| When you kill the Right Tentacle, Jenova-SYNTHESIS' Defence will be |
| lowered and it will use Cure3 every 5th turn. If you kill the Left |
| Tentacle, Jenova-SYNTHESIS' MDefence will be lowered and it will use Stop |
| every 5th turn. If you kill both Tentacles, it will revive them both on |
| its 5th turn; If you are struggling with this battle you should aim |
| firstly to kill the Left Tentacle, then just stick to using Magic. |
| When Jenova-SYNTHESIS uses Right/Left Hand Revived, it will instead target |
| itself, and manually lift the Death status of the Tentacles via the AI |
| Script. Seeing as the Attack makes use of the "Miss If Alive" flag, it |
| will always miss, and is instead considered more of an animation than an |
| Attack. |
| If you use Knights of The Round on Jenova-SYNTHESIS, you will cause the |
| following battles with Bizarro-Sephiroth and Safer-Sephiroth to be |
| sightly more difficult; Bizarro will gain additional 60,000 HP for the |
| 'Body' Part [A] (main party only), and Safer-Sephiroth will gain an |
| additional 80,000 HP. |
| A flaw exists with the Attack properties of <Absorb>. It makes use of the |
| "Drain HP/MP" Flag, but does not make use of the preliminary "Drain |
| Damage" Flag, so the Drain HP/MP Flag is overlooked. |
| Two versions of <Repeating Slap> exist; one used when both Tentacles are |
| alive, and one used when the its Right Tentacle is alive and its Left |
| Tentacle is dead. Two version of Absorb exist; one used when both |
| Tentacles are alive, and one used when the its Right Tentacle is dead and |
| its Left Tentacle is alive. Two versions of <Right Hand Revived> and |
| <Left Hand Revived> exist, one of each is never used. All of the |
| duplicated attacks share the same attack properties. |
| the "Jenova Absolute" Theme can be heard throughout this Boss Battle. |
| Unlike other enemies that use multiple parts, Jenova-SYNTHESIS is *not* |
| subject to the 'Quadra Magic Ultima Glitch' whereby the game will freeze |
| when the Player tried cast Ultima, when they have one Ultima paired with |
| HP or MP Absorb, and another with Quadra Magic. |
| Jenova-SYNTHESIS is one of a number of enemies that are elevated above the |
| ground, but will not take double damage from the Wind Element, nor will |
| it nullify Earth. |
| Jenova-SYNTHESIS is immune to Seizure, which isn't necessary seeing as |
| there is no way for the Player to inflict an enemy with Seizure. Jenova- |
| SYNTHESIS is one of 86 enemies that are immune to Seizure. It is also |
| immune to Peerless, along with 104 other enemies. |
\ /
'~~~

| You will face the this Bizarro-Sephiroth variant with one Party if *any* of the following comes true before the Jenova-SYNTHESIS battle ends:

- Jenova-SYNTHESIS managed 13 or more turns before its HP reached 15,000
- The average level of your characters is Lv 53 or lower
- At least one of your characters is Lv 34 or below

Experience gained from the Jenova-SYNTHESIS battle will *not* contribute towards the average Lv, nor will Aeris' Lv. Vincent and Yuffie's Lv will only be considered if they have been recruited, respectively.

Bizarro [A] (Body)	HP = 40,000 + 5,000 per Lv 99 Player	
Bizarro [B] (Head)	HP = 2,000 + 250 per Lv 99 Player	
Bizarro [C] (Core)	HP = 10,000 + 1,250 per Lv 99 Player	
Bizarro [D] (Right)	HP = 4,000 + 500 per Lv 99 Player	
Bizarro [E] (Left)	HP = 4,000 + 500 per Lv 99 Player	

Bizarro [A] (Body) will receive an additional 60,000 HP if KOTR was used during the Jenova-SYNTHESIS battle.

Bizarro [A] (Body)	Min HP = 40,000	Max HP = 140,000
Bizarro [B] (Head)	Min HP = 2,000	Max HP = 4,000
Bizarro [C] (Core)	Min HP = 10,000	Max HP = 20,000
Bizarro [D] (Right)	Min HP = 4,000	Max HP = 8,000
Bizarro [E] (Left)	Min HP = 4,000	Max HP = 8,000

[3B2]	Magical	Element: Shout	No Split Damage	
		Att%: 100	Status Inflict:	
		Power: 24	Poison (100%)	
		Base Damage: 1845 HP	Slow	
Attack 10:	Heartless Angels	Target: All Opponents	Fixed Damage	
[3AE]	Physical	Element: None		
	Spcl Formula	Att%: 255		
		Power: 255		
		Base Damage: Target's Current HP - 1		

Attack 11: <[No Name]> [11F]	Target: Self Physical 0 Dam	Head Death Animation
Attack 12: <[No Name]> [120]	Target: Self Physical 0 Dam	Head Revive Animation
Attack 13: <Vanish> [14E]	Target: Self Physical 0 Dam	Sub-Part Death Animation
Attack 14: <Vanish> [150]	Target: Self Physical 0 Dam	Main Body Death Animation

Bizarro-Sephiroth's BATTLE PLAN: (Repeats) 1-Party Centre

NOTE - This battle consists of 5x Bizarro-Sephiroth, four of which are flagged to be invisible as the battle initiates.

Bizarro-Sephiroth [A] = Body
Bizarro-Sephiroth [B] = Head
Bizarro-Sephiroth [C] = Core
Bizarro-Sephiroth [D] = Right Magic (Player's Left)
Bizarro-Sephiroth [E] = Left Magic (Player's Right)

The perspective is from Bizarro-Sephiroth's perspective, so its 'Right Magic' is the the left shoulder from the Player's POV. Only Bizarro [A] (Body) will attack the Player; the two Shoulders and the Head do nothing by themselves. The Core will heal the Body with every turn, so long as it is alive to do so.

SETUP:

Disable default Death Handling for all Bizarro-Sephiroths
Disable "Battle Rewards Flag"

Set Bizarro [D] (Right Magic) to absorb Ice and Lightning Elements
Set Bizarro [E] (Left Magic) to absorb Fire and Earth Elements

Set Bizarro [A]'s Body as the body-part selected as target
Set Bizarro [B]'s Head as the body-part selected as target
Set Bizarro [C]'s Core as the body-part selected as target
Set Bizarro [D]'s Right Shoulder as the body-part selected as target
Set Bizarro [E]'s Left Shoulder as the body-part selected as target

Load GlobalVar [Qty of Lv 99 Players]

Set Bizarro [A]'s Max HP to 40,000 + ([Qty of Lv 99 Players] * 5000)
Set Bizarro [B]'s Max HP to 4,000 - ((8 - [Qty of Lv 99 Players]) * 250)
Set Bizarro [C]'s Max HP to 10,000 + ([Qty of Lv 99 Players] * 1250)
Set Bizarro [D]'s Max HP to 4,000 + ([Qty of Lv 99 Players] * 500)
Set Bizarro [E]'s Max HP to 4,000 + ([Qty of Lv 99 Players] * 500)

If GlobalVar [Jenova KOTR used] has been set, increase Bizarro [A]'s Max HP by 60,000

Enable Bizarro [C] Core's Physical and Magical immunity

Set Bizarro [A] Body's Current HP Max HP

```
|   Set Bizarro [B] Head's  Current HP Max HP                                  |
|   Set Bizarro [C] Core's  Current HP Max HP                                  |
|   Set Bizarro [D] Right's Current HP Max HP                                  |
|   Set Bizarro [E] Left's  Current HP Max HP                                  |
|                                                                              |
|                                                                              |
|   Display String: [Think about the sequence of the 5 targets]               |
|   Display String: [ and beat them!]                                          |
|                                                                              |
|   End of Setup                                                               |
|                                                                              |
|                                                                              |

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Bizarro-Sephiroth: 1-Party Centre |   POWER req for Overflow:         |
|                                              |                                   |
| Bizarro-Sephiroth is the second part of a    |  Base Damage Overflow: 226        |
|  four-part final Boss encounter, and the     |  Rnd Var Overflow  3x: 151        |
|  1-Party variant is by far the easiest of    o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  the various Bizarro-Sephiroths. You will                                        |
|  encounter this version if Jenova-SYNTHESIS was able to use 13 or more           |
|  turns before it began its countdown, the average Lv of all of your active       |
|  characters is less than 54, or, at least one of your character's Lv is          |
|  below 35.                                                                       |
| All of the five Bizarro-Sephiroths will have a default immunity to Gravity       |
|  as the battle begins. The AI Script will then manually set the Right            |
|  Magic [D] to absorb Ice and Lightning, and the Left Magic [E] to absorb         |
|  Fire and Earth.                                                                 |
| Aurora Fence will target all characters (including those with the Death          |
|  Status), and have a 100% chance of removing the following Statuses:             |
|  Death, Sleep, Poison, Sadness, Fury, Confusion, Haste, Slow, Frog, Small,       |
|  Slow-numb, Petrify, Regen, Barrier, MBarrier, Reflect, Shield, Berserk,         |
|  Peerless, Death Force and Resist. The AI Script will additionally remove        |
```

Stop, Seizure, Silence, D. Sentence and Paralyzed. Split Damage will not apply to the chances of the Status inflictions, although, the damage part is prone to Split Damage.

Setting up for this battle you should either use Sprint Shoes which sets up Auto-Haste, and cannot be removed via the use of Aurora Fence, or, use Champion Belts/Circlets/Curse Rings to gain a boost in offence. If you do use the Curse Ring, be sure to equip Added Effect+Odin on your Armour to defend against the Death Status, as Aurora Fence will remove Death Force and/or Resist.

To make this Battle easy, simply equip all three characters with Mystiles (to increase your Deathblow chance), then equip one character with Added Cut+Deathblow, one with Counter+Deathblow and Mega All, and the third character with Mime. Yuffie works extremely will, as her Conformer will deal 3.8125x normal damage. Use Counter Attacks and the Counter (Command) Materia, also.

If you wanted to use Magical abilities, then Pandora's Box works well, as does Shadow Flare. Avoid using Magic Breath and other Elemental abilities, as the shoulder parts will absorb the Elements. Bahamut Zero, Flare and Ultima work well, also. This battle is not difficult, even if Bizarro does gain the additional 60,000 HP from having used KOTR during the Jenova-SYNTHESIS battle.

Be mindful of the fact that you will not be able to set up for the subsequent battle with Safer-Sephiroth, so the setup you choose now will be the setup you enter the Safer battle with. Consider equipping the Destruct Materia for the following fight to remove Safer's Barrier/ MBarrier Statuses (Holy Torches work, also). Also note that each time you kill the Bizarro's Head, Safer-Sephiroth's HP will drop by 100 up to a maximum of 24,900 (249 kills).

The main objective is to destroy the Body [A] part; once the Body has been defeated, the battle will end and you will advance onto the next Boss battle; Safer-Sephiroth. The Core [C] will heal the Body for 6414 - 6840 HP with every turn, so the idea is to first destroy the Core before turning your attention to the Body. The Core will be impervious to all attacks until the two shoulder parts have first been destroyed.

It is possible to brute-strength your way through the fight ignoring the other body parts and focusing solely on the Body; however, the battle may take longer that way. Here is the general strategy you should adopt to defeat the 1-Party variant of Bizarro-Sephiroth:

- Firstly, destroy the Right Magic [D] and Left Magic [E] to remove the Core's Physical and Magical immunity.
- Secondly, destroy the Core before the Body revives the Shoulder parts, which it will do after (at least) eight turns have passed since destroying the shoulders.
- With the Core taken out, Bizarro may use Heartless Angel on all players, which will bring their HP down to critical. Destroy the Head to prevent this from happening.
- Finally, with the four other body-parts dead Bizarro will become a non-threat; just focus on the Body until the battle ends. If it revives the head, just destroy it again.

This battle really isn't that difficult, but if you are struggling then you should put your players in the Back Row, inflict them with Sadness and set up Regen and Big Guard. Every eight turns Bizarro may use Aurora Fence; just use Regen and Big Guard again if this happen. You can also use Dragon Force twice on each character to boost their Defence and MDefence, but it shouldn't be necessary.

| Bizarro-Sephiroth will automatically replenish its MP at the beginning of every turn, so it will never be in a position where it has insufficient MP to us an ability. Two identical version of <Sephiroth Shock> exist; one used its Head is alive and one used when its Head is dead. Two versions of Stigma exist; one with 2152 HP base damage, and one with 1845 base damage, the latter of which is never used. It was intended to have been used if the Head was dead; however, the preceding check to use Stigma will only pass if the Head is alive.

| Unlike the battles during the Kalm Flashback, the "Disable Battle Rewards" Flag is manually toggled via the AI Script, as opposed to the Field Script. When the battle with Bizarro-Sephiroth finishes you will be immediately thrown into the Safer-Sephiroth battle.

| The Player will hear "The Birth of God" Theme play throughout the battle with Bizarro-Sephiroth. The Victory Pose, Victory Fanfare Theme, and Battle Rewards Screen will be disabled for this battle.

| Bizarro-Sephiroth is subject to the 'Quadra Magic Ultima Glitch' whereby the game will freeze when the Player tried cast Ultima, when they have one Ultima paired with HP or MP Absorb, and another with Quadra Magic.

| Bizarro-Sephiroth is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. Bizarro-Sephiroth is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.

NOTE - This is the 2-Party Left Side "Main" variant

{Bizarro-Sephiroth} !! FINAL BOSS BATTLE !!

https://photos.app.goo.gl/AXW1T3W27xNzNvh68 | ID: 147

| The 2-Party variant of Bizarro-Sephiroth will only be considered if *all* of the checks for the 1-Party battle fails, which are as follows:

- Jenova-SYNTHESIS managed 13 or more turns before its HP reached 15,000
- The average level of your characters is Lv 53 or lower
- At least one of your characters is Lv 34 or below

| If all of these checks fail, then you will face the 2-Party Bizarro-Sephiroth variant if *any* of the following comes true before the Jenova-SYNTHESIS battle ends:

- The average level of your characters is Lv 67 or lower
- At least one of your characters is Lv 44 or below
- The Player has not recruited Yuffie and/or Vincent

| Experience gained from the Jenova-SYNTHESIS battle will *not* contribute towards the average Lv, nor will Aeris' Lv. Vincent and Yuffie's Lv will only be considered if they have been recruited, respectively.

| Bizarro [A] (Body) HP = 40,000 + 5,000 per Lv 99 Player
| Bizarro [B] (Head) HP = 2,000 + 250 per Lv 99 Player
| Bizarro [C] (Core) HP = 14,000 + 1,750 per Lv 99 Player
| Bizarro [D] (Magic) HP = 6,000 + 750 per Lv 99 Player
| Bizarro [E] (Wing) HP = 4,000 + 500 per Lv 99 Player

| Bizarro [A] (Body) will receive an additional 60,000 HP if KOTR was used during the Jenova-SYNTHESIS battle.

```
|  Bizarro [A] (Body)   Min HP = 40,000   Max HP = 140,000                  |
|  Bizarro [B] (Head)   Min HP =  2,000   Max HP =   4,000                  |
|  Bizarro [C] (Core)   Min HP = 14,000   Max HP =  28,000                  |
|  Bizarro [D] (Magic)  Min HP =  6,000   Max HP =  12,000                  |
|  Bizarro [E] (Wing)   Min HP =  4,000   Max HP =   8,000                  |

|   Bizarro-Sephiroth's BATTLE PLAN: (Repeats)                2-Party Left|
|                                                                        |
|  NOTE - This battle consists of 5x Bizarro-Sephiroth, four of which are|
|          flagged to be invisible as the battle initiates. Note that the|
|          Setup Script is ran *each time the Party switches sides*.     |
|                                                                        |
|           Bizarro-Sephiroth [A] = Body                                 |
|           Bizarro-Sephiroth [B] = Head                                 |
|           Bizarro-Sephiroth [C] = Core                                 |
|           Bizarro-Sephiroth [D] = Right Magic (Player's Left)          |
|           Bizarro-Sephiroth [E] = Right Wing  (Player's Left)          |
|                                                                        |
|         The perspective is from Bizarro-Sephiroth's perspective, so its|
|          'Right Magic' is the the left shoulder from the Player's POV. |
```

This 'left side' variant is actually Bizarro's right. Only Bizarro [A] (Body) will attack the Player; the Head, Shoulder and Wing do nothing by themselves. The Core will heal the Body with every turn, so long as it is alive to do so.

The battle will open with this version of Bizarro, and will prompt the Player to switch sides each time one of the body-parts have been killed. This version of Bizarro considered the "1st Party", or "Main" variant. When you switch from one party to the other, the Death Status of the Head will carry over, although its Current HP will not. An oversight means that the Head will still be alive when switching from the 1st Party to the 2nd Party if the 1st Party Wing has not been killed.

SETUP:

Disable default Death Handling for all Bizarro-Sephiroths
Disable "Battle Rewards Flag"
Set current battle as the "Main" battle

Set Bizarro [D] (Right Magic) to absorb Ice and Lightning Elements
Set Bizarro [E] (Right Wing) to absorb Ice and Lightning Elements

Load GlobalVar [Head Death Status]
Load GlobalVar [1st Party Core Death Status]
Load GlobalVar [Right Magic Death Status]
Load GlobalVar [Right Wing Death Status]

Set Bizarro [A]'s Body as the body-part selected as target
Set Bizarro [B]'s Head as the body-part selected as target
Set Bizarro [C]'s Core as the body-part selected as target
Set Bizarro [D]'s Right Shoulder as the body-part selected as target
Set Bizarro [E]'s Right Wing as the body-part selected as target

Load GlobalVar [Qty of Lv 99 Players]

Set Bizarro [A]'s Max HP to 40,000 + ([Qty of Lv 99 Players] * 5000)
Set Bizarro [B]'s Max HP to 4,000 - ((8 - [Qty of Lv 99 Players]) * 250)
Set Bizarro [C]'s Max HP to 14,000 + ([Qty of Lv 99 Players] * 1750)
Set Bizarro [D]'s Max HP to 6,000 + ([Qty of Lv 99 Players] * 750)
Set Bizarro [E]'s Max HP to 4,000 + ([Qty of Lv 99 Players] * 500)

If GlobalVar [Jenova KOTR used] has been set, increase Bizarro [A]'s Max HP by 60,000

2nd Party Core Alive OR 1st Party Shoulder Alive OR 1st Party Wing Alive:

Enable Bizarro [C] Core's Physical and Magical immunity

2nd Party Core Dead AND 1st Party Shoulder Dead AND 1st Party Wing Dead:

Disable Bizarro [C] Core's Physical and Magical immunity

First time Setup Script is ran:

Set Bizarro [A] Body's Current HP Max HP

```
|    Set Bizarro [B] Head's  Current HP Max HP                                  |
|    Set Bizarro [C] Core's  Current HP Max HP                                  |
|    Set Bizarro [D] Right's Current HP Max HP                                  |
|    Set Bizarro [E] Wing's  Current HP Max HP                                  |
|                                                                               |
|    Display String: [Think about the sequence of the 5 targets]               |

|                                                                               |
|                Head was revived during the Spcl Attack: Do nothing            |
|                                                                               |
|                Head was not revived during Spcl Attack:                       |
|                                                                               |
|                 Use <Sephiroth Shock> on Rnd Target                           |
|                                                                               |
|               Set GlobalVar [Party 1 Turn Count] to 1                         |
|                                                                               |
|                                                                               |
|  DEATH:                                                                       |
|                                                                               |
|     *Due to flaws in the AI Script, the GlobalVar for the Death Status for    |
|       each body-part will only be correctly set if the Wing [E] has died.     |
|       If the wing is still alive when any of the other parts die, their       |
|       Death Status will not be recorded and will still be alive when you      |
|       switch from the 2nd Party back to the 1st. Any body-parts that are      |
|       already dead when you kill the Wing *will* then have their Death        |
|       Status recorded correctly.                                              |
|                                                                               |
|   Bizarro-Sephiroth [A] (Body) has died:                                      |
|                                                                               |
|    Use <Vanish> on Self, remove active enemies from Battle, end Battle        |
|                                                                               |
|                                                                               |

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Bizarro-Sephiroth: 2-Party Left   |   POWER req for Overflow:     |
|                                              |                               |
| Bizarro-Sephiroth is the second part of a    |  Base Damage Overflow: 234    |
|  four-part final Boss encounter, and the     |  Rnd Var Overflow  3x: 156    |
|  2-Party variant is slightly more difficult  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  that the 1-Party variant, but not by much.                                  |
|  This version is the "Main" version of Bizarro, and the battle can only      |
|  end by killing the Body from the left-side. Its stats are the same as the   |
|  1-Party variant, and is slightly stringer then the 2-Party right-side       |
|  variant, excluding Dexterity which is slightly lower.                       |
| To face the 2-Party version the Player must have all characters at Lv 35     |
|  or greater, the average Lv of all active characters is greater than 53,     |
|  AND Jenova-SYNTHESIS must not have used 13 (or more) turns before its HP    |
|  dropped below 25%. Following this, if at least one of the Player's active   |
|  characters is Lv 44 or below, OR the average Lv of all active characters    |
|  is Lv 67 or lower, OR either Vincent or Yuffie (or both) have not been      |
|  recruited, then you automatically qualify for the 2-Party scenario with     |
|  Bizarro-Sephiroth.                                                          |
| All of the five Bizarro-Sephiroths will have a default immunity to Gravity   |
|  as the battle begins. The AI Script will then manually set the Shoulder     |
|  Magic [D] and the Wing [E] to absorb Ice and Lightning.                     |
| Aurora Fence will target all characters (including those with the Death      |
|  Status), and have a 100% chance of removing the following Statuses:         |
|  Death, Sleep, Poison, Sadness, Fury, Confusion, Haste, Slow, Frog, Small,   |
|  Slow-numb, Petrify, Regen, Barrier, MBarrier, Reflect, Shield, Berserk,     |
|  Peerless, Death Force and Resist. The AI Script will additionally remove    |
|  Stop, Seizure, Silence, D. Sentence and Paralyzed. Split Damage will not    |
```

apply to the chances of the Status inflictions, although, the damage part is prone to Split Damage.

Setting up for this battle you should allocate two Physical attackers and one defender for both sides. Give your Physical Attackers the Mystile (to increase your Deathblow chance) along with Sprint Shoes or a Champion Belt, and give your Left-Side defender a Ribbon. The Right-Side Bizarro will not use any Status inflicting abilities, so give your right-side defender the Circlet, Sprint Shoes, or any other accessory of your choice. The Right-Side version will never use Aurora Fence, either, so you can use the Curse Ring if you wish along with Death Force/Resist, as it will not remove those Statuses (although the Left-Side version will).
Whenever you switch from the left-side to the right-side it will be regarded as a fresh battle, so you will gain a fresh Sneak Attack chance, as well as having the "Mega All" count reset to 0 along with the regular "All" count. You should set up accordingly; Yuffie makes for a great candidate as a Physical attacker, as her Conformer will deal 3.8125x damage. Equip Counter Attacks and the Counter (Command) Materia, also. Give one Enemy Skill to your chosen two defenders, and one to one of the left-side attackers (Cloud?).
Set your defenders up with All+Restore to be able to use Regen, and equip them with Magical abilities such as Magic Counter+Comet2. Pandora's Box works well, as does Shadow Flare. Avoid using Magic Breath and other Elemental abilities, as the shoulder parts will absorb the Elements. Bahamut Zero, Flare and Ultima work well, also. This battle is not difficult, even if the left-side Body part of Bizarro does gain the additional 60,000 HP from having used KOTR during the Jenova-SYNTHESIS battle (the right-side Body-part cannot be targeted).
Given that the right-side version of Bizarro contains a fatal AI Script error, it will continuously use Demi3 until the Shoulder and Wing have been killed. Equip all of your right-side characters with Elemental+ Gravity (on Armour), the Ziedrich or Minerva Band (females only) to defend from Gravity. Feel free to fill all of your unused slots with Stat-boosting Materia, such as Steal, Pre-Emptive, Chocobo Lure etc.
Be mindful of the fact that you will not be able to set up for the subsequent battle with Safer-Sephiroth, so the Party you choose as your "Main" Party will be the Party to face Safer. Consider equipping the Destruct Materia for the following fight to remove Safer's Barrier/ MBarrier Statuses (Holy Torches work, also). Also note that each time you kill any of Bizarro's Heads, Safer-Sephiroth's HP will drop by 100 up to a maximum of 24,900 (249 kills).

The main objective is to destroy the Body [A] part for the left-side; once the Body has been defeated, the battle will end and you will advance onto the next Boss battle; Safer-Sephiroth. You will not be able to target the Body from the right-side. While on the left the Core [C] will heal the Body for 6414 - 6840 HP with every turn, so the idea is to first destroy the Core before turning your attention to the Body.
The left-side Core will be impervious to all attacks until the right-side Core has been destroyed, along with the left-side Shoulder and Wing. To destroy the right-side Core, you must first kill the right-side Shoulder and Wing. It is possible to brute-strength your way through the fight ignoring the other body parts and focusing solely on the Body; however, the battle may take longer that way. Here is the general strategy you should adopt to defeat the 2-Party variant of Bizarro-Sephiroth:

- Firstly, destroy the left-side Wing [E] followed by the left-side Shoulder [D], in that order (or both at once). Switch to Party 2 once both parts have been killed.
- Secondly, destroy the right-side Shoulder [D] and Wing [E] in any

| order you like. Once the Core's defences have dropped, destroy the |
| right-side Core then switch to Party 1. |
| - Thirdly, with the left-side Core vulnerable, destroy it before Body |
| revives the Shoulder and Wing, which it will do after (at least) |
| eight turns have passed since the left-side Core became vulnerable. |
| - Finally, just focus on the left-side Body until it is dead. You can |
| kill the Head if you wish, but it is not necessary to win the Battle. |
| |
| This battle really isn't that difficult, but if you are struggling then |
| you should put your players in the Back Row, inflict them with Sadness |
| and set up Regen and Big Guard. Every eight turns Bizarro may use Aurora |
| Fence; just use Regen and Big Guard again if this happen. You can also |
| use Dragon Force twice on each character to boost their Defence and |
| MDefence, but it shouldn't be necessary. |
| |
| A flaw exists with the 2-Party "Main" variant of Bizarro-Sephiroth. When a |
| body-part is killed it will *not* correctly record the Death-status of |
| the body-part to the Global Variable, *unless* the Wing is dead. If the |
| Wing is killed *after* the other body-parts have been killed, the Global |
| Var bit-mask will then auto-correct itself, and the killed body-parts |
| will be saved properly. If the Wing is then revived, the glitch will |
| reactivate until it has been killed again. |
| When you switch parties the battle starts as a fresh battle would, except |
| for the fact that the HP value for each body-part will be loaded from the |
| values they were previously. Everything else (such as Statuses inflicted |
| on the characters) will be reset to 0. Even though the Head shares a |
| Global "Death" flag, its HP will not carry over from one party to the |
| other (if it is alive when switching). If the Head is dead when you swap |
| parties, then it will be revived on the opening turn as the "Head Death |
| Turn Count" variable is not globally saved. |
| Bizarro-Sephiroth will automatically replenish its MP at the beginning of |
| every turn, so it will never be in a position where it has insufficient |
| MP to us an ability. Two identical version of <Sephiroth Shock> exist; |
| one used its Head is alive and one used when its Head is dead. Two |
| versions of Stigma exist; one with 2152 HP base damage, and one with 1845 |
| base damage, the latter of which is never used. It was intended to have |
| been used if the Head was dead; however, the preceding check to use |
| Stigma will only pass if the Head is alive. |
| Unlike the battles during the Kalm Flashback, the "Disable Battle Rewards" |
| Flag is manually toggled via the AI Script, as opposed to the Field |
| Script. When the battle with Bizarro-Sephiroth finishes you will be |
| immediately thrown into the Safer-Sephiroth battle. |
| The Player will hear "The Birth of God" Theme play throughout the battle |
| with Bizarro-Sephiroth. The Victory Pose, Victory Fanfare Theme, and |
| Battle Rewards Screen will be disabled for this battle. |
| Bizarro-Sephiroth is subject to the 'Quadra Magic Ultima Glitch' whereby |
| the game will freeze when the Player tried cast Ultima, when they have |
| one Ultima paired with HP or MP Absorb, and another with Quadra Magic. |
| Bizarro-Sephiroth is immune to Seizure, which isn't necessary seeing as |
| there is no way for the Player to inflict an enemy with Seizure. Bizarro- |
| Sephiroth is one of 86 enemies that are immune to Seizure. It is also |
| immune to Peerless, along with 104 other enemies. |
\ /
 '~~~

The 2-Party variant of Bizarro-Sephiroth will only be considered if *all* of the checks for the 1-Party battle fails, which are as follows:

- Jenova-SYNTHESIS managed 13 or more turns before its HP reached 15,000
- The average level of your characters is Lv 53 or lower
- At least one of your characters is Lv 34 or below

If all of these checks fail, then you will face the 2-Party Bizarro-Sephiroth variant if *any* of the following comes true before the Jenova-SYNTHESIS battle ends:

- The average level of your characters is Lv 67 or lower
- At least one of your characters is Lv 44 or below
- The Player has not recruited Yuffie and/or Vincent

Experience gained from the Jenova-SYNTHESIS battle will *not* contribute towards the average Lv, nor will Aeris' Lv. Vincent and Yuffie's Lv will only be considered if they have been recruited, respectively.

Bizarro [A] (Body)	HP = 35,000 + 5,000 per Lv 99 Player		
Bizarro [B] (Head)	HP = 2,000 + 250 per Lv 99 Player		
Bizarro [C] (Core)	HP = 12,000 + 1,500 per Lv 99 Player		
Bizarro [D] (Magic)	HP = 6,000 + 750 per Lv 99 Player		
Bizarro [E] (Wing)	HP = 4,000 + 500 per Lv 99 Player		
Bizarro [A] (Body)	Min HP = 35,000	Max HP = 75,000	(non-targetable)

Bizarro-Sephiroth's ATTACKS:

Attack 1: <Sephiroth Shock>	Target: One Opponent	Can't Cover
[3AC] Physical	Element: Cut	
[3B0]	Att%: 100	
	Power: 10	
	Base Damage: 1702 HP	
Attack 2: Aurora Fence	Target: All Opponents	Never Used
[3B1] Magical	Element: Restorative	Miss If Alive
Spcl Formula	Att%: 100	Split Damage
	Power: 1	Status Remove:
	Base Damage: 1156 HP	21 Statuses
		(See Notes)
Attack 3: Fire3	Target: One Opponent	Never Used
[01D] Magical	Element: Fire	Reflectable
	Att%: 100	
	Power: 64	
	MP Cost: 52 MP	
	Base Damage: 4536 HP	
Attack 4: Demi3	Target: One Opponent	
[02C] Magical	Element: Gravity	
% Based	Att%: 75	
	Power: 24	
	MP Cost: 48 MP	
	Base Damage: 75% Current HP	
Attack 5: Quake3	Target: One Opponent	Never Used
[026] Magical	Element: Earth	Reflectable
	Att%: 100	
	Power: 70	
	MP Cost: 68 MP	
	Base Damage: 4961 HP	
Attack 6: Stop	Target: One Opponent	Never Used
[015] Magical 0 Dam	Att%: Auto Hit	Reflectable
	MP Cost: 34 MP	Status Inflict:
		Stop (59%)
Attack 7: Bizzarro Enegy	Target: 1/A Allies	Never Used
[3C5] Magical	Element: Restorative	Split Damage
Spcl Formula	Att%: 255	
	Power: 255	
	Base Damage: 6744 HP	
Attack 8: Heartless Angels	Target: All Opponents	Fixed Damage
[3AE] Physical	Element: None	
Spcl Formula	Att%: 255	
	Power: 255	
	Base Damage: Target's Current HP - 1	
Attack 9: Stigma	Target: All Opponents	No Split Damage
[3AF] Magical	Element: Shout	Status Inflict:
	Att%: 100	Poison (100%)
	Power: 28	Slow
	Base Damage: 1984 HP	

Attack 10: Stigma	Target: All Opponents	Never Used
[3B2] Magical	Element: Shout	No Split Damage
	Att%: 100	Status Inflict:
	Power: 24	Poison (100%)
	Base Damage: 1701 HP	Slow
Attack 11: <[No Name]>	Target: Self	Head Death
[11F] Physical 0 Dam	Att%: Auto Hit	Animation
Attack 12: <[No Name]>	Target: Self	Head Revive
[120] Physical 0 Dam	Att%: Auto Hit	Animation
Attack 13: <Vanish>	Target: Self	Sub-Part Death
[14E] Physical 0 Dam	Att%: Auto Hit	Animation
Attack 14: <Vanish>	Target: Self	Never Used
[150] Physical 0 Dam	Att%: Auto Hit	Animation

Bizarro-Sephiroth's BATTLE PLAN: (Repeats) 2-Party Right

NOTE - This battle consists of 5x Bizarro-Sephiroth, four of which are flagged to be invisible as the battle initiates. Note that the Setup Script is ran *each time the Party switches sides*.

Bizarro-Sephiroth [A] = Body (non-targetable)
Bizarro-Sephiroth [B] = Head
Bizarro-Sephiroth [C] = Core
Bizarro-Sephiroth [D] = Left Magic (Player's Right)
Bizarro-Sephiroth [E] = Left Wing (Player's Right)

The perspective is from Bizarro-Sephiroth's perspective, so its 'Left Magic' is the the right shoulder from the Player's POV. This 'right side' variant is actually Bizarro's left. Only Bizarro [A] (Body) will attack the Player; the Head, Core, Shoulder and Wing do nothing by themselves.

The battle will prompt you switch sides each time one of the body-parts have been killed. This version of Bizarro is considered the "2nd Party", or "Sub" variant. When you switch from one party to the other, the Death Status of the Head will carry over, although Current HP will not. An oversight means that the Head will still be alive when switching from the 1st Party to the 2nd Party if the 1st Party Wing has not been killed.

SETUP:

Disable default Death Handling for all Bizarro-Sephiroths
Disable "Battle Rewards Flag"
Set current battle as the "Sub" battle

Set Bizarro [D] (Left Magic) to absorb Fire and Gravity Elements
Set Bizarro [E] (Left Wing) to absorb Fire and Gravity Elements

*Due to flaws in the AI Script, the GlobalVar for the Death Status of the Head will only load correctly when transitioning from the 1st Party to the 2nd Party if the 1st Party Wing has killed. If the 1st Party Wing was still alive when you switch to the 2nd Party, the Head will always be alive regardless of it being killed prior.

```
|                                                                                |
|   Load GlobalVar [Head Death Status]*                                          |
|   Load GlobalVar [2nd Party Core Death Status]                                 |
|   Load GlobalVar [Left Magic Death Status]                                     |
|   Load GlobalVar [Left Wing Death Status]                                      |
|                                                                                |
|   Set Bizarro [A]'s Body as non-targetable                                     |
|   Set Bizarro [B]'s Head as the body-part selected as target                   |
|   Set Bizarro [C]'s Core as the body-part selected as target                   |
|   Set Bizarro [D]'s Left Shoulder as the body-part selected as target          |
|   Set Bizarro [E]'s Left Wing as the body-part selected as target              |
|                                                                                |
|                                                                                |
|   Load GlobalVar [Qty of Lv 99 Players]                                        |
|                                                                                |
|   Set Bizarro [A]'s Max HP to 35,000 + ([Qty of Lv 99 Players] * 5000)         |
|   Set Bizarro [B]'s Max HP to  4,000 - ((8 - [Qty of Lv 99 Players]) * 250)    |
|   Set Bizarro [C]'s Max HP to 12,000 + ([Qty of Lv 99 Players] * 1500)         |
|   Set Bizarro [D]'s Max HP to  6,000 + ([Qty of Lv 99 Players] * 750)          |
|   Set Bizarro [E]'s Max HP to  4,000 + ([Qty of Lv 99 Players] * 500)          |
|                                                                                |
|                                                                                |
|   2nd Party Shoulder Alive OR 2nd Party Wing Alive:                            |
|                                                                                |
|    Enable Bizarro [C] Core's Physical and Magical immunity                     |
|                                                                                |
|   2nd Party Shoulder Dead AND 2nd Party Wing Dead:                             |
|                                                                                |
|    Disable Bizarro [C] Core's Physical and Magical immunity                    |
|                                                                                |
|                                                                                |
|   First time Setup Script is ran:                                              |
|                                                                                |

|      Set Bizarro [A]'s Current MP to Max MP                                    |
|      Use <[No Name]> on Self                                                   |
|      Remove Bizarro [B] Head's Death Status                                    |
|      Set Bizarro [B] Head's Current HP to Max HP                               |
|      Display String: [Head Portion (B) Revived]                                |
|      Unset GlobalVar [Head Death Status]                                       |
|                                                                                |
|                                                                                |
|   STAGE 1: (Shoulder or Wing Alive - Core immunity active)                     |
|                                                                                |
|    Use Spcl Attack                                                             |
|    Follow-Up: Use Demi3 on Rnd Target                                          |
|                                                                                |
|                                                                                |
|   STAGE 2: (Shoulder and Wing Dead - Core immunity disabled)                   |
|                                                                                |
|    1ST ATTACK: Use Spcl Attack                                                 |
|                                                                                |
|     Follow-Up: Head was revived during the Spcl Attack: Do nothing             |
|                                                                                |
|                Head was not revived during Spcl Attack:                        |
|                                                                                |
|                 Use <Sephiroth Shock> on Rnd Target                            |
|                                                                                |
|                                                                                |
|    2ND ATTACK: Same as 1st Attack                                              |
|                                                                                |
|                                                                                |
|    3RD ATTACK: Use Spcl Attack                                                 |
|                                                                                |
|     Follow-Up: Bizarro [B] (Head) is Alive AND Bizarro [C] (Core) is Alive:    |
|                                                                                |
|                 Use Stigma 1984 Base Damage variant on All Targets             |
|                                                                                |
|                                                                                |
|                Bizarro [B] (Head) is Alive AND Bizarro [C] (Core) is Dead:     |
|                                                                                |
|                 Use Heartless Angel on All Targets                             |
|                                                                                |
|                                                                                |
|                 Bizarro [B] (Head) has Death:                                  |
|                                                                                |
|                  Head was revived during the Spcl Attack: Do nothing           |
|                                                                                |
|                  Head was not revived during Spcl Attack:                      |
```

Use <Sephiroth Shock> on Rnd Target

4TH ATTACK: Use Spcl Attack (skip a turn if Head was not revived)
5TH ATTACK: Use Spcl Attack (skip a turn if Head was not revived)

THEREAFTER: Same as 1st Attack

The "Sub" variant of the 2-Party Bizarro-Sephiroth suffers from a fatal error with the AI Script. Instead of setting the "Turn Count" variable to the Global Variable assigned as the "2nd Party Turn Count" at the beginning of each turn, it will instead set it to the variable used to count the amount of turns that have passed since the Core's defences have come down.

This means that it will always use Demi3 while the Core's defences are up, after which it will play out its normal attack pattern as soon as the Core becomes vulnerable, starting from the 2nd Attack. When it gets to its 8th Attack, it will continue to repeat that attack forever more, never to jump back to its 1st Attack (even when the count wraps around after exceeding 255).

The Battle Plan should have looked virtually the same as all of the other Bizarro-Sephiroths, using slightly different attacks. Here is how the repeating attack sequence *should* have looked (refer to the other variants for the full conditions in which each attack is selected).

1st Attack: Use Bizarro Enegy, Aurora Fence or <Sephiroth Shock>
2nd Attack: Use Fire3 if Shoulder is alive, or <Sephiroth Shock>
3rd Attack: Use Stop if Wing is alive, or <Sephiroth Shock>
4th Attack: Use Stigma, Heartless Angel or <Sephiroth Shock>
5th Attack: Skip a turn
6th Attack: Skip a turn
7th Attack: Use Quake3 if Shoulder is alive, or <Sephiroth Shock>
8th Attack: Use Demi3 if Wing is alive, or <Sephiroth Shock>

DEATH:

Bizarro-Sephiroth [B] (Head) has died:

Use <Vanish> on Self
Use <[No Name]> on Self
Display String: [Head Portion (B) Dead]
1/3 Chance: Turns before Head is revived = 1
1/3 Chance: Turns before Head is revived = 2
1/3 Chance: Turns before Head is revived = 3
GlobalVar [Head Death Count] = GlobalVar [Head Death Count] + 1
If GlobalVar [Head Death Count] > 249, GlobalVar [Head Death Count] =249
Set GlobalVar [Head Death Status]
Prompt the Player to switch to Party 1

Bizarro-Sephiroth [C] (Core) has died:

1st Party Magic has Death AND 1st Party Wing has Death AND 1st Party Core does not have Death:

```
|      Use <Vanish> on Self                                                    |
|      Display String: [Core (C) Dead]                                         |
|      Display String: [Core (C) Defense Down]                                 |
|      Display String: [ in front of Cloud's party.]                           |
|      Set GlobalVar [2nd Party Core Death Status]                             |
|      Prompt the Player to switch to Party 1                                  |
|                                                                              |
|    1st Party Magic does not have Death OR 1st Party Wing does not have       |
|     Death OR 1st Party Core has Death:                                       |
|                                                                              |
|      Use <Vanish> on Self                                                    |
|      Display String: [Core (C) Dead]                                         |
|      Set GlobalVar [2nd Party Core Death Status]                             |
|      Prompt the Player to switch to Party 1                                  |
|                                                                              |
|                                                                              |
|   Bizarro-Sephiroth [D] (Left Magic) has died:                               |
|                                                                              |
|    Bizarro-Sephiroth [E] (Left Wing) does not have Death:                    |
|                                                                              |
|     Use <Vanish> on Self                                                     |
|     Display String: [Left Magic (D) Dead]                                    |
|     Set GlobalVar [Left Magic Death Status]                                  |
|     Prompt the Player to switch to Party 1                                   |
|                                                                              |
|    Bizarro-Sephiroth [E] (Left Wing) has Death:                              |
|                                                                              |
|     Use <Vanish> on Self                                                     |
|     Display String: [Left Magic (D) Dead]                                    |
|     Display String: [Left Core (C) Defense Down]                             |
|     Disable Bizarro [C] Core's Physical and Magical immunity                 |
|     Set GlobalVar [Left Magic Death Status]                                  |
|     Prompt the Player to switch to Party 1                                   |
|                                                                              |
|                                                                              |

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Bizarro-Sephiroth: 2-Party Right  |   POWER req for Overflow:     |
|                                              |                               |
| Bizarro-Sephiroth is the second part of a    |  Base Damage Overflow: 226    |
|  four-part final Boss encounter, and the     |  Rnd Var Overflow  3x: 151    |
|  2-Party variant is slightly more difficult  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  that the 1-Party variant, but not by much.                                  |
|  The right-side version is considered to be the "Sub" version, and has       |
```

| slightly lower stats compared to the left-side, although it has slightly higher Dexterity. The battle cannot be won from the right-side. |
| To face the 2-Party version the Player must have all characters at Lv 35 or greater, the average Lv of all active characters is greater than 53, AND Jenova-SYNTHESIS must not have used 13 (or more) turns before its HP dropped below 25%. Following this, if at least one of the Player's active characters is Lv 44 or below, OR the average Lv of all active characters is Lv 67 or lower, OR either Vincent or Yuffie (or both) have not been recruited, then you automatically qualify for the 2-Party scenario with Bizarro-Sephiroth. |
| All of the five Bizarro-Sephiroths will have a default immunity to Gravity as the battle begins. The AI Script will then manually set the Shoulder Magic [D] and the Wing [E] to absorb Fire and Gravity; this is likely an error, and the allocated Elements should have instead been Fire and Earth (compared to the other versions of Bizarro). |
| Aurora Fence will target all characters (including those with the Death Status), and have a 100% chance of removing the following Statuses: Death, Sleep, Poison, Sadness, Fury, Confusion, Haste, Slow, Frog, Small, Slow-numb, Petrify, Regen, Barrier, MBarrier, Reflect, Shield, Berserk, Peerless, Death Force and Resist. The AI Script will additionally remove Stop, Seizure, Silence, D. Sentence and Paralyzed. An error with the AI Script as described in the Battle Plan means that this version of Bizarro will never use Aurora Fence. |
| |
| Refer to the notes on the 2-Party left-side "Main" variant above for info on how to set up for this battle. Given that the right-side variant will only use Demi3 until the Shoulder and Wing have been destroyed, you should make sure to equip Elemental+Gravity (on Armour), the Ziedrich and/or Minerva Band (females only) to defend from Gravity. |
| |
| The main objective while on the right-side is to first kill the Shoulder and Wing, which will then drop the Core's defences. Once the right-side Core has been killed, you can then switch back to the 1st Party. Again, refer to the notes on the left-side "Main" variant for info on how to defeat the Boss for good. |
| This battle really isn't that difficult, but if you are struggling then you should put your players in the Back Row, inflict them with Sadness and set up Regen and Big Guard. You can also use Dragon Force twice on each character to boost their Defence and MDefence, but it shouldn't be necessary. Note that each time you kill any of Bizarro's Heads, Safer-Sephiroth's HP will drop by 100 up to a maximum of 24,900 (249 kills). |
| |
| Given that the attack-sequence for the right-side version of Bizarro is completely broken (read the description in the Battle Plan), it will never use Fire3, Quake3, Stop, Aurora Fence or Bizarro Enegy. This means that it will never revive the "Magic" parts after (at least) eight turns, as was the design. The left-side variant also contains a glitch whereby the Head will still be alive when switching to the right-side if the left-side Wing had not been killed previously. |
| The main Body-part can only be targeted from the left-side, and as such the right-side Body's HP value is irrelevant. It will *not* gain an additional 60,000 HP if KOTR was used during the Jenova-SYNTHESIS battle, although it wouldn't matter in any case. The Core for the right-side will be inactive, as opposed to healing the Body every turn. |
| If you find yourself in a scenario whereby you all of the right-side body-parts have been killed, just wait for Bizarro to revive the Head; after-which you can then kill it again to prompt the Player to switch sides. |
| |
| When you switch parties the battle starts as a fresh battle would, except for the fact that the HP value for each body-part will be loaded from the |

| values they were previously. Everything else (such as Statuses inflicted on the characters) will be reset to 0. Even though the Head shares a Global "Death" flag, its HP will not carry over from one party to the other (if it is alive when switching). If the Head is dead when you swap parties, then it will be revived on the opening turn as the "Head Death Turn Count" variable is not globally saved.

| Bizarro-Sephiroth will automatically replenish its MP at the beginning of every turn, so it will never be in a position where it has insufficient MP to us an ability. Two identical version of <Sephiroth Shock> exist; one used its Head is alive and one used when its Head is dead. Two versions of Stigma exist; one with 1984 HP base damage, and one with 1701 base damage, the latter of which is never used. It was intended to have been used if the Head was dead; however, the preceding check to use Stigma will only pass if the Head is alive.

| The Player will hear "The Birth of God" Theme play throughout the battle with Bizarro-Sephiroth. The Victory Pose, Victory Fanfare Theme, and Battle Rewards Screen will be disabled for this battle.

| Bizarro-Sephiroth is subject to the 'Quadra Magic Ultima Glitch' whereby the game will freeze when the Player tried cast Ultima, when they have one Ultima paired with HP or MP Absorb, and another with Quadra Magic.

| Bizarro-Sephiroth is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. Bizarro-Sephiroth is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.

NOTE - This is the 3-Party Centre "Main" variant

{Bizarro-Sephiroth}

!! FINAL BOSS BATTLE !!

https://photos.app.goo.gl/AXW1T3W27xNzNvh68 | ID: 148

| The 3-Party variant of Bizarro-Sephiroth will automatically be encountered if *all* of the checks for the 1-Party and 2-Party battle fails, which means that all of the following must come true:

- Jenova-SYNTHESIS managed 12 or less turns before its HP reached 15,000
- The average level of your characters is Lv 68 or higher
- None of your characters Lv is lower than 45
- Both Vincent and Yuffie have been recruited

| Experience gained from the Jenova-SYNTHESIS battle will *not* contribute towards the average Lv, nor will Aeris' Lv. Vincent and Yuffie's Lv will only be considered if they have been recruited, respectively.

| Bizarro [A] (Body) HP = 40,000 + 5,000 per Lv 99 Player
| Bizarro [B] (Head) HP = 2,000 + 250 per Lv 99 Player
| Bizarro [C] (Core) HP = 16,000 + 2,000 per Lv 99 Player
| Bizarro [D] (Magic) HP = 8,000 + 1,000 per Lv 99 Player
| Bizarro [E] (Wing) HP = 8,000 + 1,000 per Lv 99 Player

| Bizarro [A] (Body) will receive an additional 60,000 HP if KOTR was used during the Jenova-SYNTHESIS battle.

| Bizarro [A] (Body) Min HP = 40,000 Max HP = 140,000
| Bizarro [B] (Head) Min HP = 2,000 Max HP = 4,000
| Bizarro [C] (Core) Min HP = 16,000 Max HP = 32,000
| Bizarro [D] (Magic) Min HP = 8,000 Max HP = 16,000

| Bizarro [E] (Wing) Min HP = 8,000 Max HP = 16,000 |

Attack 15: [150]	<Vanish> Physical 0 Dam	Target: Self Att%: Auto Hit	Main Body Death Animation

Bizarro-Sephiroth's BATTLE PLAN: (Repeats) 3-Party Centre

NOTE - This battle consists of 5x Bizarro-Sephiroth, four of which are flagged to be invisible as the battle initiates. Note that the Setup Script is ran *each time the Player switches Parties*.

Bizarro-Sephiroth [A] = Body
Bizarro-Sephiroth [B] = Head
Bizarro-Sephiroth [C] = Core
Bizarro-Sephiroth [D] = Right Magic (Player's Left)
Bizarro-Sephiroth [E] = Left Magic (Player's Right)

The perspective is from Bizarro-Sephiroth's perspective, so its 'Right Magic' is the the left shoulder from the Player's POV. Only Bizarro [A] (Body) will attack the Player; the two Shoulders and the Head do nothing by themselves. The Core will heal the Body with every turn, so long as it is alive to do so.

This version of Bizarro considered the "1st Party", or "Main" variant. When you switch from one party to the other, the Death Status of the Head and respective shoulder will carry over, although their Current HP will not.

The battle will open with this version of Bizarro, and will prompt the Player to switch sides each time one of the body-parts have been killed; killing the Head or the Right Magic will allow the Player to switch to left-side "Sub 1" Party (Bizarro's right), and killing the Core or Left Magic will allow the Player to switch to the right-side "Sub 2" Party (Bizarro's left).

SETUP:

Disable default Death Handling for all Bizarro-Sephiroths
Disable "Battle Rewards Flag"
Set current battle as the "Main" battle

Set Bizarro [D] (Right Magic) to absorb Ice and Lightning Elements
Set Bizarro [E] (Left Magic) to absorb Ice and Lightning Elements

Load GlobalVar [Head Death Status]
Load GlobalVar [1st Party Core Death Status]
Load GlobalVar [Right Magic Death Status]
Load GlobalVar [Left Magic Death Status]

Set Bizarro [A]'s Body as the body-part selected as target
Set Bizarro [B]'s Head as the body-part selected as target
Set Bizarro [C]'s Core as the body-part selected as target
Set Bizarro [D]'s Right Magic as the body-part selected as target
Set Bizarro [E]'s Left Magic as the body-part selected as target

Load GlobalVar [Qty of Lv 99 Players]

Set Bizarro [A]'s Max HP to 40,000 + ([Qty of Lv 99 Players] * 5000)
Set Bizarro [B]'s Max HP to 4,000 - ((8 - [Qty of Lv 99 Players]) * 250)
Set Bizarro [C]'s Max HP to 16,000 + ([Qty of Lv 99 Players] * 2000)
Set Bizarro [D]'s Max HP to 8,000 + ([Qty of Lv 99 Players] * 1000)
Set Bizarro [E]'s Max HP to 8,000 + ([Qty of Lv 99 Players] * 1000)

If GlobalVar [Jenova KOTR used] has been set, increase Bizarro [A]'s Max HP by 60,000

2nd Party Core Alive OR 3rd Party Core Alive OR Left Magic Alive OR

```
|    Right Magic Alive:                                                    |
|                                                                          |
|     Enable Bizarro [C] Core's Physical and Magical immunity              |

|    Prompt the Player to switch to Party 3                                  |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Bizarro-Sephiroth: 3-Party Centre |   POWER req for Overflow:   |
|                                              |                             |
| Bizarro-Sephiroth is the second part of a    |  Base Damage Overflow: 242  |
|  four-part final Boss encounter, and the     |  Rnd Var Overflow  3x: 161  |
|  3-Party variant is the hardest of all       o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  variants, but only marginally. This version                               |
|  is the "Main" version of Bizarro, and the battle can only end by killing  |
|  the Body from the central "Main" side. Its stats are the the highest of   |
|  all six variants of Bizarro-Sephiroth, but not by much. This central      |
|  version's attack pattern is almost identical to the 1-Party version, with |
|  the added fact it will use Demi3 as a counter when the Head dies.         |
| To face the 3-Party version the Player must not have any characters Lv     |
|  lower than 45, the average Lv is 68 or higher, Vincent and Yuffie must    |
|  both have been recruited *and* Jenova-SYNTHESIS must not have used 13 (or |
|  more) turns before its HP dropped below 25%. If the Player used KOTR at   |
|  any point during the Jenova-SYNTHESIS battle then the Body's HP will      |
|  increase by 60,000, but only for the "Main" variant; the Body cannot be   |
|  targeted from the left or right sides.                                    |
| All of the five Bizarro-Sephiroths will have a default immunity to Gravity |
|  as the battle begins. The AI Script will then manually set the Right      |
|  Magic [D] and the Left Magic [E] to absorb Ice and Lightning. This is     |
|  likely an error, considering that the right-side Party (Left Magic side)  |
|  absorbs Fire and Earth, and the Left Magic for the 1-Party variant        |
|  absorbs Fire and Earth, it is likely that the Left Magic for this variant |
|  should have also absorbed Fire and Earth.                                 |
| Aurora Fence will target all characters (including those with the Death    |
|  Status), and have a 100% chance of removing the following Statuses:       |
|  Death, Sleep, Poison, Sadness, Fury, Confusion, Haste, Slow, Frog, Small, |
|  Slow-numb, Petrify, Regen, Barrier, MBarrier, Reflect, Shield, Berserk,   |
|  Peerless, Death Force and Resist. The AI Script will additionally remove  |
|  Stop, Seizure, Silence, D. Sentence and Paralyzed. Split Damage will not  |
|  apply to the chances of the Status inflictions, although, the damage part |
|  is prone to Split Damage.                                                 |
|                                                                            |
| You have two options when setting up for this battle. Given that you will  |
|  not get a chance to set your party up following the battle (prior to the  |
|  subsequent battle with Safer), you may wish to *only* set you "Main"      |
|  Party up with all of the best Materia, focusing on a Physically offensive |
|  setup. Your aim would be to deal more damage to the Body per turn than    |
|  the Core is able to heal it for, without using your "Sub" Parties at all. |
|  This may also be the faster option.                                       |
| Your other option is to defeat Bizarro as was intended; by firstly taking  |
|  out the two "Sub" Cores, followed by the "Main" Core to leave the Body    |
|  vulnerable. If you opt for this option, then allocate 1 Physical attacker |
|  for each Party (Yuffie makes a good candidate as her Conformer will deal  |
|  3.8125x damage), and set them up with Champion Belts, Double Cut, Added   |
|  Cut+Deathblow, Sneak Attack+Deathblow, Counter+Deathblow, Counter          |
```

Attacks, and Mega All with Deathblow. Equip Mystiles, also, to increase your Deathblow chance to 100%.

Your remaining characters will be your defenders; give one Enemy Skill Materia to a defender in each Party, and equip them with Ribbons. Set them up with All+Restore to be able to use Regen, and equip them with Magical abilities such as Magic Counter+Comet2. Pandora's Box works well, as does Shadow Flare. Avoid using Magic Breath and other Elemental abilities, as the shoulder parts will absorb the Elements. Bahamut Zero, Flare and Ultima work well, also. This battle is not difficult, even if the central Body part of Bizarro does gain the additional 60,000 HP from having used KOTR during the Jenova-SYNTHESIS battle.

Bizarro will occasionally use Aurora Fence to remove any positive Status buffs you have in place, but will only do so once every eight turns; simply use Big Guard and Regen again if this happens. Regardless of the setup you choose, just remember that your "Main" Party will be the Party to face Safer-Sephiroth, so be sure to prioritise their setup. Equipping the Destruct Materia will help to deal with Safer's Barrier/MBarrier Statuses (Holy Torches work, also). Also note that each time you kill any of Bizarro's Heads, Safer-Sephiroth's HP will drop by 100 up to a maximum of 24,900 (249 kills).

Whenever you switch parties it will be regarded as a fresh battle, so you will gain a fresh Sneak Attack chance, as well as having the "Mega All" count reset to 0 along with the regular "All" count. Also, Feel free to fill all of your unused slots with Stat-boosting Materia, such as Steal, Pre-Emptive, Chocobo Lure etc.

The main objective is to destroy the Body [A] part for the centre "Main" side; once the central Body has been defeated, the battle will end and you will advance onto the next Boss battle; Safer-Sephiroth. You will not be able to target the Body from the left or right-side. While in the centre the Core [C] will heal the Body for 6414 - 6840 HP with every turn, so the idea is to first destroy all three Cores before turning your attention to the Body.

The central Core be impervious to all attacks until both the left-side and the right-side Cores has been destroyed. To destroy the Cores on either side, you must first destroy the respective Shoulder and Wing parts. Unlike the previous versions of Bizarro, the Wing parts will now revive the Shoulder parts if the Shoulder parts are dead at the time of the Wing being killed.

From the "Main" Party, killing the Head or Right Magic [D] will prompt the Player to switch to Party 2, and killing the Core or Left Magic [E] will prompt the Player to switch to Party 3. The "Death Status" of the Head and two Shoulder parts will carry over when you switch parties. Seeing as the Shoulder parts can be revived, you should start by killing the Head, then turn your attention to the "Sub 1" Wing.

As mentioned above, a viable strategy would be to just brute-force your way through the "Main" version of Bizarro, which may turn out to be quicker (and would set you up more appropriately for the following Safer-Sephiroth battle). If you did wish to defeat Bizarro-Sephiroth the legit way, then here is the general strategy you should adopt to defeat the 3-Party variant of Bizarro:

- Firstly, destroy the Head to prompt you to switch to Party 2. Avoid killing the Shoulders as they will just get revived.
- Secondly, destroy the left-side Wing [E] *first*, followed by the Shoulder [D] to drop the "Sub 2" Core's defences. Kill the Core to then switch to Party 3.
- Thirdly, destroy the right-side Wing [E] *first*, followed by the Shoulder [D] to drop the "Sub 3" Core's defences. Kill the Core to then switch back to Party 1.

```
|   - Finally, kill the "Main" Core then just focus on the Body until it is  |
|      dead. You can kill the Head if you wish, but it is not necessary to   |
|      win the Battle.                                                       |
|                                                                            |
| This battle really isn't that difficult, but if you are struggling then    |
|  you should put your players in the Back Row, inflict them with Sadness    |
|  and set up Regen and Big Guard. You can also use Dragon Force twice on    |
|  each character to boost their Defence and MDefence, but it shouldn't be   |
|  necessary.                                                                |
|                                                                            |
| When you switch parties the battle starts as a fresh battle would, except  |
|  for the fact that the HP value for each body-part will be loaded from the |
|  values they were previously. Everything else (such as Statuses inflicted  |
|  on the characters) will be reset to 0. Even though the Head shares a      |
|  Global "Death" flag, its HP will not carry over from one party to the     |
|  other (if it is alive when switching), neither will the Shoulder parts.   |
|  If the Head is dead when you swap parties, then it will be revived on the |
|  opening turn as the "Head Death Turn Count" variable is not globally      |
|  saved.                                                                    |
| Bizarro-Sephiroth will automatically replenish its MP at the beginning of  |
|  every turn, so it will never be in a position where it has insufficient   |
|  MP to us an ability. Two identical version of <Sephiroth Shock> exist;    |
|  one used its Head is alive and one used when its Head is dead. Two        |
|  versions of Stigma exist; one with 2152 HP base damage, and one with 1845 |
|  base damage, the latter of which is never used. It was intended to have   |
|  been used if the Head was dead; however, the preceding check to use       |
|  Stigma will only pass if the Head is alive.                               |
| Unlike the battles during the Kalm Flashback, the "Disable Battle Rewards" |
|  Flag is manually toggled via the AI Script, as opposed to the Field       |
|  Script. When the battle with Bizarro-Sephiroth finishes you will be       |
|  immediately thrown into the Safer-Sephiroth battle.                       |
| The Player will hear "The Birth of God" Theme play throughout the battle   |
|  with Bizarro-Sephiroth. The Victory Pose, Victory Fanfare Theme, and      |
|  Battle Rewards Screen will be disabled for this battle.                   |
| Bizarro-Sephiroth is subject to the 'Quadra Magic Ultima Glitch' whereby   |
|  the game will freeze when the Player tried cast Ultima, when they have    |
|  one Ultima paired with HP or MP Absorb, and another with Quadra Magic.    |
| Bizarro-Sephiroth is immune to Seizure, which isn't necessary seeing as    |
|  there is no way for the Player to inflict an enemy with Seizure. Bizarro- |
|  Sephiroth is one of 86 enemies that are immune to Seizure. It is also     |
|  immune to Peerless, along with 104 other enemies.                         |
\                                                                            /
 '~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~'

  .----------------------.  NOTE - This is the 3-Party Left Side "Sub 1" V
 /  {Bizarro-Sephiroth}  \        !! FINAL BOSS BATTLE !!
/~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~\
|  https://photos.app.goo.gl/AXW1T3W27xNzNvh68                    | ID: 14A |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~<|
| The 3-Party variant of Bizarro-Sephiroth will automatically be encountered |
|  if *all* of the checks for the 1-Party and 2-Party battle fails, which    |
|  means that all of the following must come true:                           |
|                                                                            |
|  - Jenova-SYNTHESIS managed 12 or less turns before its HP reached 15,000  |
|  - The average level of your characters is Lv 68 or higher                 |
|  - None of your characters Lv is lower than 45                             |
|  - Both Vincent and Yuffie have been recruited                             |
|                                                                            |
| Experience gained from the Jenova-SYNTHESIS battle will *not* contribute   |
```

```
|  towards the average Lv, nor will Aeris' Lv. Vincent and Yuffie's Lv will  |
|  only be considered if they have been recruited, respectively.             |
|                                                                            |
|                                                                            |
|  Bizarro [A] (Body)   HP = 35,000 + 4,000 per Lv 99 Player                 |
|  Bizarro [B] (Head)   HP =  2,000 +   250 per Lv 99 Player                 |
|  Bizarro [C] (Core)   HP = 12,000 + 1,500 per Lv 99 Player                 |
|  Bizarro [D] (Magic)  HP =  8,000 + 1,000 per Lv 99 Player                 |
|  Bizarro [E] (Wing)   HP =  6,000 +   750 per Lv 99 Player                 |
|                                                                            |
|  Bizarro [A] (Body)   Min HP = 35,000   Max HP = 67,000  (non-targetable)  |
|  Bizarro [B] (Head)   Min HP =  2,000   Max HP =  4,000                    |
|  Bizarro [C] (Core)   Min HP = 12,000   Max HP = 24,000                    |
|  Bizarro [D] (Magic)  Min HP =  8,000   Max HP = 16,000                    |
|  Bizarro [E] (Wing)   Min HP =  6,000   Max HP = 12,000                    |

|   Bizarro-Sephiroth's BATTLE PLAN: (Repeats)                 3-Party Left   |
|                                                                             |
|  NOTE - This battle consists of 6x Bizarro-Sephiroth, four of which are     |
|         flagged to be invisible as the battle initiates, and one flagged    |
```

to be inactive. Note that the Setup Script is ran *each time the Player switches Parties*.

Bizarro-Sephiroth [A] = Body (non-targetable)
Bizarro-Sephiroth [B] = Head
Bizarro-Sephiroth [C] = Core
Bizarro-Sephiroth [D] = Right Magic (Player's Left)
Bizarro-Sephiroth [E] = Right Wing (Player's Left)
Bizarro-Sephiroth [F] = Disabled

The perspective is from Bizarro-Sephiroth's perspective, so its 'Right Magic' is the the left shoulder from the Player's POV. This 'left side' variant is actually Bizarro's right. Only Bizarro [A] (Body) will attack the Player; the Head, Shoulder and Core do nothing by themselves. The Wing will revive the Shoulder if the Shoulder is dead at the time of killing the Wing.

This version of Bizarro considered the "2nd Party", or "Sub 1" variant. When you switch from one party to the other, the Death Status of the Head and respective shoulder will carry over, although their Current HP will not.

The battle will prompt you to switch to this side when you kill the 1st-Party Head or Right Magic, or, when you kill the 3rd-Party Left Magic or Left Wing, or Core while the 2nd-Party Core is still active. If you kill the 2nd-Party Left Magic, Wing, Head or Core (while the 3rd-Party Core is still active), then you will be prompted to switch to the 3rd-Party. If you kill the 2nd-Party Core with the 3rd-Party Core dead, then the prompt will bring you back to the 1st Party.

SETUP:

Disable default Death Handling for all Bizarro-Sephiroths
Disable "Battle Rewards Flag"
Set current battle as the "Sub 1" battle

Set Bizarro [D] (Right Magic) to absorb Ice and Lightning Elements
Set Bizarro [E] (Right Wing) to absorb Ice and Lightning Elements

Load GlobalVar [Head Death Status]
Load GlobalVar [2nd Party Core Death Status]
Load GlobalVar [Right Magic Death Status]
Load GlobalVar [Right Wing Death Status]

Set Bizarro [A]'s Body as non-targetable
Set Bizarro [B]'s Head as the body-part selected as target
Set Bizarro [C]'s Core as the body-part selected as target
Set Bizarro [D]'s Right Shoulder as the body-part selected as target
Set Bizarro [E]'s Right Wing as the body-part selected as target
Set Bizarro [F]'s AI Script as inactive and disable the enemy

Load GlobalVar [Qty of Lv 99 Players]

Set Bizarro [A]'s Max HP to 35,000 + ([Qty of Lv 99 Players] * 4000)
Set Bizarro [B]'s Max HP to 4,000 - ((8 - [Qty of Lv 99 Players]) * 250)
Set Bizarro [C]'s Max HP to 12,000 + ([Qty of Lv 99 Players] * 1500)
Set Bizarro [D]'s Max HP to 8,000 + ([Qty of Lv 99 Players] * 1000)

```
|   Set Bizarro [E]'s Max HP to  6,000 + ([Qty of Lv 99 Players] * 750)      |
|                                                                           |
|                                                                           |
|   2nd Party Shoulder Alive OR 2nd Party Wing Alive:                       |
|                                                                           |
|    Enable Bizarro [C] Core's Physical and Magical immunity                |
|                                                                           |
|   2nd Party Shoulder Dead AND 2nd Party Wing Dead:                        |
|                                                                           |
|    Disable Bizarro [C] Core's Physical and Magical immunity               |
|                                                                           |
|                                                                           |
|   First time Setup Script is ran:                                         |
|                                                                           |
|    Set Bizarro [A] Body's  Current HP Max HP                              |
|    Set Bizarro [B] Head's  Current HP Max HP                              |
|    Set Bizarro [C] Core's  Current HP Max HP                              |
|    Set Bizarro [D] Right's Current HP Max HP                              |

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Bizarro-Sephiroth: 3-Party Left   |   POWER req for Overflow:       |
|                                              |                                 |
| Bizarro-Sephiroth is the second part of a    |  Base Damage Overflow: 234      |
|  four-part final Boss encounter, and the     |  Rnd Var Overflow  3x: 156      |
|  3-Party variant is the hardest of all       o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  variants, but only marginally. This version                                   |
|  is the "Sub 1" version of Bizarro, and the battle can only end by killing     |
|  the Body from the central "Main" side. the "Sub 1" version's attack           |
|  sequence is almost identical to that of the 2-Party left-side, and has        |
|  slightly higher stats than the right-side "Sub 2" version.                    |
| The left "Sub 1" and right "Sub 2" versions of Bizarro both have unique        |
|  properties not seen with any other version of Bizarro. Firstly, the           |
|  battle will initiate with 6x Bizarro-Sephiroths instead of 5x; the reason     |
|  for this is unknown (Bizarro [F] is invisible, non-targetable and has its     |
|  AI Script disabled). Secondly, the Wing parts will now revive the             |
|  Shoulder parts should the Shoulders parts be dead at the time when the        |
|  Wing is killed. Thirdly, the check to perform Heartless Angel will pass       |
|  if the *1st-Party* Core is alive, and as such they will both favour           |
|  Heartless Angel over Stigma when they come to use that attack.                |
| To face the 3-Party version the Player must not have any characters Lv         |
|  lower than 45, the average Lv is 68 or higher, Vincent and Yuffie must        |
|  both have been recruited *and* Jenova-SYNTHESIS must not have used 13 (or     |
|  more) turns before its HP dropped below 25%. Using KOTR in the Jenova-        |
```

| SYNTHESIS battle will *not* increase the HP of the "Sub 1" Body by 60,000, as only the "Main" Body can be targeted. |
| All of the six Bizarro-Sephiroths will have a default immunity to Gravity as the battle begins. The AI Script will then manually set the Right Magic [D] and the Right Wing [E] to absorb Ice and Lightning. |
| Aurora Fence will target all characters (including those with the Death Status), and have a 100% chance of removing the following Statuses: Death, Sleep, Poison, Sadness, Fury, Confusion, Haste, Slow, Frog, Small, Slow-numb, Petrify, Regen, Barrier, MBarrier, Reflect, Shield, Berserk, Peerless, Death Force and Resist. The AI Script will additionally remove Stop, Seizure, Silence, D. Sentence and Paralyzed. Split Damage will not apply to the chances of the Status inflictions, although, the damage part is prone to Split Damage. |
| |
| Refer to the notes on the 3-Party central "Main" variant above for info on how to set up for this battle. The main objective while on the left-side is to first kill the Wing and Shoulder (in that order), which will then drop the Core's defences. Once the left-side Core has been killed, you can then switch to the 3rd Party to do the same thing. Again, refer to the notes on the central "Main" variant for info on how to defeat the Boss for good. |
| This battle really isn't that difficult, but if you are struggling then you should put your players in the Back Row, inflict them with Sadness and set up Regen and Big Guard. You can also use Dragon Force twice on each character to boost their Defence and MDefence, but it shouldn't be necessary. Note that each time you kill any of Bizarro's Heads, Safer-Sephiroth's HP will drop by 100 up to a maximum of 24,900 (249 kills). |
| |
| You will be prompted to switch to the "Sub 1" left-side Party if you kill the 1st-Party "Main" Head or Right Magic, or, if you kill the 3rd-Party "Sub 2" Left Magic, Left Wing, or Left Core while the 2nd-Party "Sub 1" Core is still alive. While controlling the 2nd-Party "Sub 1" team, killing any part will prompt the Player to switch to the 3rd-Party, unless you kill the "Sub 1" Core with the "Sub 2" Core dead, in which case the prompt will bring you back to the 1st-Party. |
| When you switch parties the battle starts as a fresh battle would, except for the fact that the HP value for each body-part will be loaded from the values they were previously. Everything else (such as Statuses inflicted on the characters) will be reset to 0. Even though the Head shares a Global "Death" flag, its HP will not carry over from one party to the other (if it is alive when switching), neither will the Shoulder parts. If the Head is dead when you swap parties, then it will be revived on the opening turn as the "Head Death Turn Count" variable is not globally saved. |
| Bizarro-Sephiroth will automatically replenish its MP at the beginning of every turn, so it will never be in a position where it has insufficient MP to us an ability. Two identical version of <Sephiroth Shock> exist; one used its Head is alive and one used when its Head is dead. Two versions of Stigma exist; one with 2068 HP base damage, and one with 1773 base damage, the latter of which is never used. It was intended to have been used if the Head was dead; however, the preceding check to use Stigma will only pass if the Head is alive. |
| The Player will hear "The Birth of God" Theme play throughout the battle with Bizarro-Sephiroth. The Victory Pose, Victory Fanfare Theme, and Battle Rewards Screen will be disabled for this battle. |
| Bizarro-Sephiroth is subject to the 'Quadra Magic Ultima Glitch' whereby the game will freeze when the Player tried cast Ultima, when they have one Ultima paired with HP or MP Absorb, and another with Quadra Magic. |
| Bizarro-Sephiroth is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. Bizarro- |

```
|  Sephiroth is one of 86 enemies that are immune to Seizure. It is also     |
|  immune to Peerless, along with 104 other enemies.                          |
\                                                                              /
 '~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~'

  .---------------------.  NOTE - This is the 3-Party Right Side "Sub 2" V
 /  {Bizarro-Sephiroth}  \        !! FINAL BOSS BATTLE !!
/~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~\
|  https://photos.app.goo.gl/AXW1T3W27xNzNvh68                  | ID: 149 |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~<|
| The 3-Party variant of Bizarro-Sephiroth will automatically be encountered |
|  if *all* of the checks for the 1-Party and 2-Party battle fails, which    |
|  means that all of the following must come true:                           |
|                                                                            |
|  - Jenova-SYNTHESIS managed 12 or less turns before its HP reached 15,000  |
|  - The average level of your characters is Lv 68 or higher                 |
|  - None of your characters Lv is lower than 45                             |
|  - Both Vincent and Yuffie have been recruited                             |
|                                                                            |
| Experience gained from the Jenova-SYNTHESIS battle will *not* contribute   |
|  towards the average Lv, nor will Aeris' Lv. Vincent and Yuffie's Lv will  |
|  only be considered if they have been recruited, respectively.             |
|                                                                            |
|                                                                            |
|  Bizarro [A] (Body)   HP = 30,000 + 3,000 per Lv 99 Player                 |
|  Bizarro [B] (Head)   HP =  2,000 +   250 per Lv 99 Player                 |
|  Bizarro [C] (Core)   HP = 12,000 + 1,500 per Lv 99 Player                 |
|  Bizarro [D] (Magic)  HP =  8,000 + 1,000 per Lv 99 Player                 |
|  Bizarro [E] (Wing)   HP =  6,000 +   750 per Lv 99 Player                 |
|                                                                            |
|  Bizarro [A] (Body)   Min HP = 30,000   Max HP = 54,000  (non-targetable)  |
|  Bizarro [B] (Head)   Min HP =  2,000   Max HP =  4,000                    |
|  Bizarro [C] (Core)   Min HP = 12,000   Max HP = 24,000                    |
|  Bizarro [D] (Magic)  Min HP =  8,000   Max HP = 16,000                    |
|  Bizarro [E] (Wing)   Min HP =  6,000   Max HP = 12,000                    |

Bizarro-Sephiroth's BATTLE PLAN: (Repeats) 3-Party Right

NOTE - This battle consists of 6x Bizarro-Sephiroth, four of which are flagged to be invisible as the battle initiates, and one flagged to be inactive. Note that the Setup Script is ran *each time the Player switches Parties*.

Bizarro-Sephiroth [A] = Body (non-targetable)
Bizarro-Sephiroth [B] = Head
Bizarro-Sephiroth [C] = Core
Bizarro-Sephiroth [D] = Left Magic (Player's Right)
Bizarro-Sephiroth [E] = Left Wing (Player's Right)
Bizarro-Sephiroth [F] = Disabled

The perspective is from Bizarro-Sephiroth's perspective, so its 'Left Magic' is the the right shoulder from the Player's POV. This 'right side' variant is actually Bizarro's left. Only Bizarro [A] (Body) will attack the Player; the Head, Shoulder and Core do nothing by themselves. The Wing will revive the Shoulder if the Shoulder is dead at the time of killing the Wing.

This version of Bizarro considered the "3rd Party", or "Sub 2" variant. When you switch from one party to the other, the Death Status of the Head and respective shoulder will carry over, although their Current HP will not.

The battle will prompt you to switch to this side when you kill the 1st-Party Core or Left Magic, or, when you kill the 2nd-Party Left Magic or Left Wing, Head, or Core while the 3rd-Party Core is still active. If you kill the 3rd-Party Left Magic, Wing or Core (while the 2nd-Party Core is still active), then you will be prompted to switch to the 2nd-Party. If you kill the 3rd-Party Head, or Core with the 2nd-Party Core dead, then the prompt will bring you back to the 1st Party.

SETUP:

Disable default Death Handling for all Bizarro-Sephiroths
Disable "Battle Rewards Flag"

```
|   Set current battle as the "Sub 2" battle                                  |
|                                                                             |
|   Set Bizarro [D] (Left Magic) to absorb Fire and Earth Elements            |
|   Set Bizarro [E] (Left Wing) to absorb Fire and Earth Elements             |
|                                                                             |
|   Load GlobalVar [Head Death Status]                                        |
|   Load GlobalVar [3rd Party Core Death Status]                              |
|   Load GlobalVar [Left Magic Death Status]                                  |
|   Load GlobalVar [Left Wing Death Status]                                   |
|                                                                             |
|   Set Bizarro [A]'s Body as non-targetable                                  |
|   Set Bizarro [B]'s Head as the body-part selected as target                |
|   Set Bizarro [C]'s Core as the body-part selected as target                |
|   Set Bizarro [D]'s Left Shoulder as the body-part selected as target       |
|   Set Bizarro [E]'s Left Wing as the body-part selected as target           |
|   Set Bizarro [F]'s AI Script as inactive and disable the enemy             |
|                                                                             |
|                                                                             |
|   Load GlobalVar [Qty of Lv 99 Players]                                     |
|                                                                             |
|   Set Bizarro [A]'s Max HP to 30,000 + ([Qty of Lv 99 Players] * 3000)      |
|   Set Bizarro [B]'s Max HP to  4,000 - ((8 - [Qty of Lv 99 Players]) * 250)|
|   Set Bizarro [C]'s Max HP to 12,000 + ([Qty of Lv 99 Players] * 1500)      |
|   Set Bizarro [D]'s Max HP to  8,000 + ([Qty of Lv 99 Players] * 1000)      |
|   Set Bizarro [E]'s Max HP to  6,000 + ([Qty of Lv 99 Players] * 750)       |
|                                                                             |
|                                                                             |
|   3rd Party Shoulder Alive OR 3rd Party Wing Alive:                         |
|                                                                             |
|    Enable Bizarro [C] Core's Physical and Magical immunity                  |
|                                                                             |
|   3rd Party Shoulder Dead AND 3rd Party Wing Dead:                          |
|                                                                             |
|    Disable Bizarro [C] Core's Physical and Magical immunity                 |
|                                                                             |
|                                                                             |

```

Notes On Bizarro-Sephiroth: 3-Party Right

Bizarro-Sephiroth is the second part of a four-part final Boss encounter, and the 3-Party variant is the hardest of all variants, but only marginally. This version is the "Sub 2" version of Bizarro, and the battle can only end by killing the Body from the central "Main" side. the "Sub 2" version's attack sequence is almost identical to how the 2-Party right-side *should* have looked, and has the weakest stats of all three 3-Party variants.

The left "Sub 1" and right "Sub 2" versions of Bizarro both have unique properties not seen with any other version of Bizarro. Firstly, the battle will initiate with 6x Bizarro-Sephiroths instead of 5x; the reason for this is unknown (Bizarro [F] is invisible, non-targetable and has its AI Script disabled). Secondly, the Wing parts will now revive the Shoulder parts should the Shoulders parts be dead at the time when the Wing is killed. Thirdly, the check to perform Heartless Angel will pass if the *1st-Party* Core is alive, and as such they will both favour Heartless Angel over Stigma when they come to use that attack.

To face the 3-Party version the Player must not have any characters Lv lower than 45, the average Lv is 68 or higher, Vincent and Yuffie must both have been recruited *and* Jenova-SYNTHESIS must not have used 13 (or more) turns before its HP dropped below 25%. Using KOTR in the Jenova-SYNTHESIS battle will *not* increase the HP of the "Sub 2" Body by 60,000, as only the "Main" Body can be targeted.

All of the six Bizarro-Sephiroths will have a default immunity to Gravity as the battle begins. The AI Script will then manually set the Left Magic [D] and the Left Wing [E] to absorb Fire and Earth. This does not correspond with the 1st-Party's Left Magic Elemental attributes, which instead absorbs Ice and Lightning (of the two, the "Sub 2" variant has correct Elemental attributes applied).

Aurora Fence will target all characters (including those with the Death Status), and have a 100% chance of removing the following Statuses: Death, Sleep, Poison, Sadness, Fury, Confusion, Haste, Slow, Frog, Small, Slow-numb, Petrify, Regen, Barrier, MBarrier, Reflect, Shield, Berserk, Peerless, Death Force and Resist. The AI Script will additionally remove Stop, Seizure, Silence, D. Sentence and Paralyzed. Split Damage will not apply to the chances of the Status inflictions, although, the damage part is prone to Split Damage.

Refer to the notes on the 3-Party central "Main" variant above for info on how to set up for this battle. The main objective while on the right-side is to first kill the Wing and Shoulder (in that order), which will then drop the Core's defences. Once the right-side Core has been killed, you can then switch to the 2nd Party to do the same thing. Again, refer to the notes on the central "Main" variant for info on how to defeat the Boss for good.

This battle really isn't that difficult, but if you are struggling then you should put your players in the Back Row, inflict them with Sadness and set up Regen and Big Guard. You can also use Dragon Force twice on each character to boost their Defence and MDefence, but it shouldn't be necessary. Note that each time you kill any of Bizarro's Heads, Safer-Sephiroth's HP will drop by 100 up to a maximum of 24,900 (249 kills).

You will be prompted to switch to the "Sub 2" right-side Party if you kill the 1st-Party "Main" Core or Left Magic, or, if you kill the 2nd-Party "Sub 1" Right Magic, Right Wing, Head, or Right Core while the 3rd-Party "Sub 2" Core is still alive.

While controlling the 3rd-Party "Sub 2" team, killing the Shoulder, Wing

POWER req for Overflow:

Base Damage Overflow: 226
Rnd Var Overflow 3x: 151

```
|  or Core (while the 2nd-Party "Sub 1" Core is still alive) will prompt you |
|  to switch to the 2nd-Party, and killing the Head or Core with the "Sub 1" |
|  Core dead will prompt you to switch the the 1st-Party "Main" side.        |
| When you switch parties the battle starts as a fresh battle would, except  |
|  for the fact that the HP value for each body-part will be loaded from the |
|  values they were previously. Everything else (such as Statuses inflicted  |
|  on the characters) will be reset to 0. Even though the Head shares a      |
|  Global "Death" flag, its HP will not carry over from one party to the     |
|  other (if it is alive when switching), neither will the Shoulder parts.   |
|  If the Head is dead when you swap parties, then it will be revived on the |
|  opening turn as the "Head Death Turn Count" variable is not globally      |
|  saved.                                                                    |
| Bizarro-Sephiroth will automatically replenish its MP at the beginning of  |
|  every turn, so it will never be in a position where it has insufficient   |
|  MP to us an ability. Two identical version of <Sephiroth Shock> exist;    |
|  one used its Head is alive and one used when its Head is dead. Two        |
|  versions of Stigma exist; one with 1984 HP base damage, and one with 1701 |
|  base damage, the latter of which is never used. It was intended to have   |
|  been used if the Head was dead; however, the preceding check to use       |
|  Stigma will only pass if the Head is alive.                               |
| The Player will hear "The Birth of God" Theme play throughout the battle   |
|  with Bizarro-Sephiroth. The Victory Pose, Victory Fanfare Theme, and      |
|  Battle Rewards Screen will be disabled for this battle.                   |
| Bizarro-Sephiroth is subject to the 'Quadra Magic Ultima Glitch' whereby   |
|  the game will freeze when the Player tried cast Ultima, when they have    |
|  one Ultima paired with HP or MP Absorb, and another with Quadra Magic.    |
| Bizarro-Sephiroth is immune to Seizure, which isn't necessary seeing as    |
|  there is no way for the Player to inflict an enemy with Seizure. Bizarro- |
|  Sephiroth is one of 86 enemies that are immune to Seizure. It is also     |
|  immune to Peerless, along with 104 other enemies.                         |
\                                                                            /

|                                                                              |
|                                                                              |
|  OPENING ATTACK: Use <x> on Self                                             |
```

Use <Appear> on Self

*Safer-Sephiroth will cycle through the same eight attacks; however, it will alternate its attack pattern slightly every other cycle.

STAGE 1: (Normal - Row 1)

1ST ATTACK:

Safer-Sephiroth has Slow: Use DeSpell on Self

Safer-Sephiroth does not have Slow:

1ST CYCLE: Use Wall on Self
2ND CYCLE: Use DeSpell on All Targets

2ND ATTACK:

1ST CYCLE: Use Shadow Flare on All Targets
2ND CYCLE: Use Deen on All Targets

3RD ATTACK: Use <[No Name]> 8182 Base Damage variant on Target with Highest Current HP

4TH ATTACK: Use <[No Name]> on Self, transform to Stage 2
Set Row value to 16 (Flying)

STAGE 2: (Flying - Row 16)

5TH ATTACK: Use Pale Horse on Rnd Target
6TH ATTACK: Use Super Nova on All Targets

7TH ATTACK:

Safer-Sephiroth's HP > 25%: Use Break on Rnd Target
Safer-Sephiroth's HP <= 25%: Use Heartless Angel on All Targets

8TH ATTACK: Use <[No Name]> on Self, transform to Stage 1
Set Row Value back to 1

DEATH: Use <[No Name]> on Self, end battle

Notes On Safer-Sephiroth:

Safer-Sephiroth is the third part of a four-part final Boss encounter; however, given that the following final battle with Sephiroth is a scripted battle and cannot be lost, Safer can be regarded as the final battle of the game. He is the hardest of of all of the final bosses, but can still be easily defeated with the right setup.

POWER req for Overflow:

Min Def:
Base Damage Overflow: 172
Rnd Var Overflow 3x: 115

Max Def:
Base Damage Overflow: 280
Rnd Var Overflow 3x: 187

Safer's base HP will be doubled if KOTR was used against Jenova-SYNTHESIS, and will be further increased along with his Strength, Magic, Defence and MDefence for every character that is Lv 99 (read above). A Party of Lv 99 characters should have no trouble with Safer, even if it has maxed stats.

| Its Max HP will be deducted by 100 for each time the Head part of Bizarro was killed. Note that if a character was to reach Lv 99 following the Jenova-SYNTHESIS battle, their Lv will *not* contribute to the "Quantity of Lv 99 Characters". |
| DeSpell will have a 100% chance of removing the following Statuses: Haste, Slow, Stop, Regen, Barrier, MBarrier, Reflect, Shield, Death Force and Resist. |
| |
| You will be thrown straight into the battle with Safer following Bizarro's demise, so you will not get a chance to set your Party up properly if you encountered the 3-Party variant of Bizarro. So long as you have one character appropriately setup to be physically offensive, with another defensive character equipped with a Ribbon and Enemy Skill (for White Wind), then you should be fine. |
| You could also rely on Remedies to deal with Safer's Status inflictions, or, you could cast Resist (Lv 3 Heal Materia) or use Vaccines to protect the Player from being inflicted with *all* Statuses; just remember to have cast Haste on your characters beforehand. Safer will remove Resist when he uses DeSpell on your characters, so you will need to set up Resist once more if this happens. DeSpell can *not* be reflected. |
| Safer is vulnerable to Slow, so be sure to equip the Time Materia or have your Spider Webs ready. He will also set up Barrier and MBarrier on himself, so equipping the Destruct Materia would be handy. You could also use a Holy Torch to remove his barriers. |
| Having Yuffie as your main attacker with the Conformer equipped is the optimal way to defeat Safer, as her damage output will be 5.4375x normal damage. Equipping her with the Mystile will not only boost her Deathblow chances to 100%, but will also help to avoid Shadow Flare which can kill your character in one hit. |
| Safer will set its Row value to 16 mid-way through its attack patter, which means it will be regarded as "Flying" and will not be targetable via short-ranged attacks. Use the Long Range Materia, or stick to Magical abilities when this happens. Bahamut ZERO is a good Summon to use as it will ignore Safer's MDefence value, as will Pandora's Box. |
| |
| When the Battle begins, your HP will be at the same value it was following the Bizarro fight, so be ready to use a Megalixir if you need to. Open with Big Guard and Regen, as standard, then setup additional defences by using Dragon Force, Shield, Resist and/or Reflect should you need to. |
| Safer will replenish its MP at the beginning of every turn, so using Magic Hammers is off the table, other than to restore your own MP, although, you should really be relying on Elixirs and Megalixirs at this point. |
| Be sure to inflict Safer with Slow, then just do what you've been doing throughout the game thus far, and this Boss will fall very easily. If you are fast enough it is probable to kill him before he gets a chance to use Super Nova, which has one of the longest animations in the game (but is worth the watch if you have never seen it before). |
| Safer does not have the ability to kill all of your Party at once, with the exception of Deen; so long as you prioritise reviving your fallen characters it can be very difficult for Safer to cause the Player a Game Over. |
| |
| Two versions of the "No Name" Death Animation exists; one used while Safer is in its default stage, and one used while it is in its "Flying" stage. |
| Unlike the battles during the Kalm Flashback, the "Disable Battle Rewards" Flag is manually toggled via the AI Script, as opposed to the Field Script. When the battle with Safer-Sephiroth finishes you will be transported back to the 'Point-Of-No-Return' screen to face the final Sephiroth once and for all. |

| The Player will hear the "One-Winged Angel" Theme play throughout the battle with Safer-Sephiroth. The Victory Pose, Victory Fanfare Theme, and Battle Rewards Screen will be disabled for this battle.
| Safer-Sephiroth is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. Safer-Sephiroth is one one of 86 enemies that is immune to Seizure. He is also immune to Peerless, along with 104 other enemies, and also immune to Regen along with 14 other enemies.
| Safer-Sephiroth is one of four enemies that are Immune to Reflect. This is so that it cannot reflect Wall back onto the Players.
| Safer-Sephiroth is one of a number of enemies that are elevated above the ground, but will not take double damage from the Wind Element, nor will it nullify Earth.

.-------------. NOTE - This is the end-game (enemy) version of Sephiroth

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Sephiroth:                                                          |
|                                                                                |
| Sephiroth is the fourth and final part of a four-part final Boss               |
|  encounter. This is a scripted battle, and is impossible to lose even          |
|  without any input from the controller. You can either use Omnislash to        |
|  defeat Sephiroth, or, wait for him to attack Cloud, after which Cloud         |
|  will automatically counter, killing Sephiroth in one blow.                    |
|                                                                                |
| A number of special flags are used for this battle. The Field Script are       |
|  responsible for creating a Party consisting of just Cloud, replenishing       |
|  his HP & MP, and curing Cloud of any Statuses (Fury and Sadness). It will     |
|  also remove Cloud's Materia; although, even with Materia, the following       |
|  flags will disable the use of any Command other than Limit.                   |
| The Formation Setup uses the same "Pre-Emptive Strike" Flag used in the        |
|  five Wutai Pagoda Battles. The enemy will take Double Damage from the         |
|  first attack (provided the attack is Physical); the enemy will be front-      |
|  facing; and, the ATB gauge will start at a random value for all actors        |
```

(this gets overridden via the Formation Setup AI Script). The "Change" Command will also be greyed out; although, the "Defend" Command will still be available to the Player.

As the battle initiates the Formation Setup AI Script will activate the use of two unique flags; the first of which (2180) sets the Limit gauge refresh rate to 222 (slow), and the second of which (2160) sets up a a number of special parameters used only in the final encounter with Sephiroth.
The "Final Battle" Flag will firstly disable all commands excluding the Limit Break Command. Note that the Limit Command will still be available even if the Limit gauge was not filled. The "Limit Gauge Refresh Rate" is set to 222 for this battle; 0 = No Fill (default); 1 = Fastest Fill; 255 = Slowest Fill. The value is set so that Cloud's Limit fill rate will synchronise with the opening animation.
Although the formation setup sets the ATB Gauge to random values, the "Final Battle" Flag will override this and set Cloud's ATB to full, and Sephiroth's ATB to null. If Cloud enters the battle with 7777 HP, then All Lucky 7's will *not* activate during this battle.
As soon as the enemy attacks the Player with the "Final Battle" Flag active, the Command Window will deactivate and you will not be able to input any commands.

There is also a special animation script that is ran which controls the intro sequence to the battle. It will load up a unique battle model of Cloud, only seen in this one encounter. When Cloud uses Omnislash, you will also see an additional "flash" to Cloud-then-Sephiroth's face as Cloud lands the final blow. This animation script will also override the ATB settings from your current settings to "Active".
The final additional parameter for this battle is Cloud's Limit being set to lv 4. While Cloud will unlock all unlearnt Limits following the battle with Safer, he will *not* automatically be able to use Omnislash for the final battle via the use of the flags mentioned; it is currently unknown exactly how Omnislash becomes available for this battle.

The battle with Sephiroth is set to play out in one of two ways. Either Cloud can remain idle (or use Defend), in which case Sephiroth will attack Cloud with an attack that will deplete his HP to critical, after-which Sephiroth's AI Script will take control of Cloud and have him use "Attack" on Sephiroth, triggering the counter script and ending the battle. This use of the AI Script is unique, and creates an Auto-Counter effect (without having the Counter Attack Materia equipped).
The second way is to just use Omnislash, as intended, and watch Cloud knock Sephiroth down once-and-for-all. Congratulations! You've just beat Final Fantasy VII.

It is worth noting that all of final encounters with Sephiroth are battles of the mind, and the enemies you are battling are manifestations of Sephiroths will. The final encounter is intended as one last attempt for Sephiroth to try to regain control of Cloud's mind, but by that point he is too weak to withstand Cloud's strength, which is the reason Sephiroth only has 1 HP.
If using hacks to enable the use of Materia and Commands, one will find that Sephiroth can also be killed via the use of Steal, as stealing will trigger the counter-script to end the battle. If Sephiroth's attack were to miss, Cloud will still counter thereby ending the battle.
The "Those Chosen By The Planet (Intro)" Theme will play throughout this battle. Cloud will not perform his victory pose, and the Victory Fanfare theme will not be heard.
Unlike the battles during the Kalm Flashback, the "Disable Battle Rewards"

```
|  Flag is manually toggled via the AI Script, as opposed to the Field       |
|  Script. As a precaution, the final battle also makes use of a unique "End |
|  Battle, bypass rewards screen" Flag only used by Sephiroth as part of his |
|  Death Counter script. Once Sephiroth is defeated the ending FMV will      |
|  play.                                                                     |
| Sephiroth is immune to Seizure, which isn't necessary seeing as there is   |
|  no way for the Player to inflict an enemy with Seizure. Sephiroth is one  |
|  one of 86 enemies that is immune to Seizure. He is also immune to         |
|  Peerless, along with 104 other enemies, and also immune to Regen along    |
|  with 14 other enemies. He is also one of four enemies that are Immune to  |
|  Reflect.                                                                  |
\                                                                            /

Attack 8: <Vanish> [14E]	Physical 0 Dam	Target: Self Att%: Auto Hit	Death Animation

Emerald Weapon's BATTLE PLAN: (Repeats)

NOTE - Once you have killed all four Eyes, Emerald Weapon will not revert back to its original form until its next turn. Transforming back to Stage 1 will use up a turn for Emerald.

Emerald Weapon's attack sequence will play out differently if the "Angry Emerald" variable has been activated; it will use less turns before transforming to Stage 2, and it will use Aire Tam Storm as its 1st attack when it does transform to its "Eyes Open" Stage.

The following actions will activate the "Angry Emerald" variable:

- KOTR has been used
- Revenge Stamp has been used 10 or more times

The following actions will disable the "Angry Emerald" variable:

- Bahamut, Neo Bahamut or Bahamut ZERO was used while Emerald is in Stage 2 (Eyes Open)
- Aire Tam Storm was used naturally (not via the use of a Counter Attack) AND Emerald's HP > 50%

```
|                                                                              |
|         Note that once Revenge Stamp has been used at least ten times,       |
|          "Angry Emerald" will activate each time Revenge Stamp is used.      |
|          This means that using any of the Bahamuts will *not* disable the    |
|          variable, and Aire Tam Storm will only disable the variable until   |
|          the next time Revenge Stamp is used.                                |
|                                                                              |
|                                                                              |
|  SETUP: Disable default Death Handling                                       |
|                                                                              |
|                                                                              |

```

```
|                                                                              |
|       Use Revenge Stamp on All Targets                                       |
|                                                                              |
|  If Revenge Stamp has been used 10 or more times, activate "Angry Emerald"   |
|                                                                              |
|                                                                              |
|  DEATH: Use <Vanish> on Self, remove active Eyes from Battle, end Battle     |
|         Set GlobalVar [Emerald Weapon Killed]                                |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Emerald Weapon:                  |   POWER req for Overflow:      |
|                                             |                                |
| Emerald Weapon is one of two Super-Bosses,  |  Base Damage Overflow: 213     |
|  the other being Ruby Weapon. Both are      |  Rnd Var Overflow  3x: 142     |
|  extremely tough, but can be defeated in a  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  number of ways by exploiting various                                        |
|  weaknesses. Emerald's weakness is that it does not nullify Gravity, so      |
|  Demi can be used to inflict 9999 with each hit. It is also weak against     |
|  Lightning and the Slow Status; the Eyes are weak against Fire. Most of      |
|  suggested methods for defeating Emerald can be completed with a Party of    |
|  Lv 60+ characters.                                                          |
| Emerald can be encountered as early as Disc 2, following the Submarine       |
|  mission. Once the Player has obtained either the Blue or Red Submarine,     |
|  Emerald can be found in one of four spawn locations in the 'Underwater'     |
|  version of the World Map; Outside the Sunken Gelnika; near the Red Sub-     |
|  marine (South of map); in the central crater; or, circling in a clock-      |
|  wise motion near the central crater. Be very wary when exiting the Sunken   |
|  Gelnika, as Emerald may take you by surprise if you're not careful.         |
| When battling Emerald a 20-minute countdown timer will appear; if it runs    |
|  down to 0, then it will cause a Game Over. To remove the countdown timer    |
|  one must first obtain the Underwater Materia from the Kalm Traveller.       |
|  This is exchanged for the Guide Book, which must be Morphed from the        |
|  Ghost Ship in the underwater pipes leading towards Junon's Underwater       |
|  Reactor. It is possible to defeat Emerald without the need for the          |
|  Underwater Materia, depending on the strategy you adopt.                    |
| To battle Emerald one must ram into him with the submarine. Unlike most      |
|  bosses, Emerald Weapon does not make use of the "Can't Escape" Flag, and    |
|  as such it is possible for the Player to flee the battle. The "Run Count"   |
|  will be set to 3, so it may take a while for you to successfully escape.    |
|  You can avoid knocking into Emerald Weapon altogether by navigating the     |
|  submarine at maximum height.                                                |
| Emerald Weapon is the only Lv 99 enemy in the game, and with 1 million HP    |
|  it has the highest HP in the game. Compared to Ruby Weapon (who is Lv 59    |
|  and has 800,00 HP), Emerald has lower stats and a more predictable attack   |
|  pattern, which makes it slightly easier than Ruby. With that said,          |
|  Emerald's Eyes will attack independently, and can bombard the player with   |
|  attacks; Ruby's Tentacles do nothing by themselves, which makes Emerald a   |
|  larger threat when it has its eyes open. Emerald will drop slightly more    |
|  EXP and gil than Ruby; however, they both leave 50,000 AP.                  |
| Emerald's signature attack is Aire Tam Storm (maTeriA spelt backwards),      |
|  which will deal 1111 HP per Materia the target has equipped, so having 9+   |
|  Materia equipped to any one character will cause certain death to that      |
|  character. You will need to have Final Attack paired with either Phoenix    |
|  or Revive to be able to withstand the attack, unless you choose to equip    |
|  less than 9 pieces per character. Going into the battle with 9999 HP and    |
|  just 2x Materias equipped will trigger 7777 Fever, which is one option      |
|  for defeating this super-boss.                                              |
| Aire Tam Storm will have a 100% chance of removing the following Statuses:   |
|  Haste, Slow, Stop, Regen, Barrier, MBarrier, Reflect, Shield, Death Force   |
|  and Resist.                                                                 |
| Once Emerald Weapon has been defeated you will obtain the Earth Harp,        |
```

which can used to trade with the Kalm traveller to obtain the Master Magic, Master Command and Master Summon Materia (one of each). It may be wise to defeat Emerald before Ruby, as the set of Master Materia will massively help against the Ruby Weapon.

If you need to level up your characters or Materia prior to the fight with either of the two Super-Bosses, then the Magic Pots in the 'Swamp Area' in the North Crater are the ideal candidate; just be sure to have enough Elixirs to feed them.

SETUP:

While your setup may vary heavily depending on your chosen strategy, there are a few things you should consider for every method. The first thing to highlight is the incredible amount of AP Emerald will leave; consider equipping Cloud's Apocalypse to gain triple growth, which means any Materia equipped will gain 150,000 AP. If you plan to use KOTR against Ruby Weapon, then you should equip it even even if you do not plan to use it against Emerald, as so that it levels up. Cid's Scimitar is also a useful weapon to equip, as is his Javelin.

For you Armour, you should equip either the Mystile, Imperial Guard, or Warrior Bangle for maximum defence. You could optionally equip Rune Armlets if you wanted to gain double AP.

Emerald Weapon will not inflict any Statuses on you characters, so Ribbons will not be needed. You could equip Sprint Shoes to gain the edge over Emerald, or, equip Tough Rings/Circlets/Champion Belts if you are in need of the extra defence, which you may need.

Put all of your characters in the Back Row, inflict them with Sadness and slow the ATB Speed as slow as possible. Make sure that the ATB is set to 'Wait', and give your short-ranged characters the Long Range Materia. While it *is* possible to defeat Emerald in less than 20 minutes, you may wish to equip the Underwater Materia as a precaution.

You will want to have at least six Megalixirs for this battle. Arrange your Items so that Megalixirs are at the top, followed by X-Potions then Turbo Ethers. Also make sure to have other items that you plan on using at the top, such as Tranquilizers or Hero Drinks. If you have been stock-piling your Sources, then now would be the time to use them. should you wish to turn the tide in your favour, then you could spend some time in the Sunken Gelnika to farm Sources; visit the "Top Farming Locations" section of Helpful Lists for more info on Source Farming.

Be sure to exploit Emerald's weakness to Slow by making use of the Time Materia, or by using a Spider Web. You should also consider equipping Elemental+Ramuh on your attacker's Weapon to deal double damage with your Physical attacks against Emerald, and Elemental+Ifrit to deal double damage against the Eyes.

You should utilise the Final Attack Materia by pairing it with Phoenix, which may be your saving grace for this super-battle. Just note that a Lv 1 Phoenix will only allow for one use of Final Attack, even if the Final Attack is at Lv 5. You should also utilise Yuffie's Conformer, which will deal 6.1875x normal damage. Combine the Mystile with Deathblow and Mega All for maximum efficiency.

STRATEGIES:

- General Tips:

As soon as the battle begins you should cast Dragon Force twice on each character to boost their Defence and MDefence by 100%. If you have any Hero Drinks, then you could optionally give up to four per character to

increase their offence; if you do opt to use Hero Drinks then there will be no need to use Dragon Force. If one of your characters gets killed it will reset their stat values.

Emerald Weapon will remove any Barriers you put in place, so Big Guard is off the table, along with Shield, Regen and Haste. You are going to want to inflict Emerald with Slow, either by using a Spider Web or by using the Time Materia.

The amount of Materia you equip is an important factor. *Most* of the strategies focus on not allowing Emerald to use Aire Tam Storm, which it will do so after three turns have passed since the Eyes were opened. If it does manage to use Aire Tam Storm this way, it will continue to use it every other turn thereafter until the Eyes have been destroyed. It will also use Aire Tam Storm as a counter attack to Knights of The Round being used while it is Stage 2 and its HP is less than 50%.

If the Player were to activate the "Angry Emerald" parameter, then Emerald Weapon would become much more of a threat. It will begin skipping out portions of its attack sequence, opting to use Aire Tam Storm on its subsequent turn after opening its Eyes instead of three turns after. Additionally, Emerald will only use one turn while in its first form before opening its Eyes.

Using Knights of The Round at any point during the battle will activate "Angry Emerald". It will also be set once Revenge Stamp has been used ten or more times. To unset the "Angry Emerald" parameter, Emerald must use Aire Tam Storm as part of its attack sequence (as opposed to a counter-attack) *and* its HP must be above 50%. It can also be unset by using any one of the three Bahamuts while it has at least one Eye open, so long as Revenge Stamp has not been used ten or more times.

Emerald will usually transform into its second form on its fourth turn after reverting back to its original form; however, it will sometimes use Emerald Shoot and/or Foot Stamp more than once, increasing the amount of turns used before opening its Eyes.

If you were to enter into the battle with Emerald at Lv 99, then you could use the Enemy Skill Goblin Punch for 0 MP to inflict 9999 HP with each hit.

- The 'As Early As Possible' Method:

This method is possibly the hardest of all strategies for defeating Emerald, but also takes the least amount of time preparing. As soon as have finished clearing out the North Crater you can begin preparing for Emerald with a team of Lv 58+ characters.

You should already have obtained most of the Materia you will need for this battle; however, you may need to spend a small amount of time battling the Magic Pots to ensure you have the adequate setup. Here is the ideal checklist for this method:

- Underwater Materia
- Mega All Materia
- 1x Mime Materia (2 helps)
- Lv3 Magic Counter + Lv 3 Lightning
- Lv2 Quadra Magic + Lv 3 Gravity
- 3x Lv3 Counter Attack
- 2x Lv3 Counter + Deathblow
- Lv3 Final Attack + Phoenix

Yuffie makes an excellent candidate as your main Physical attacker, as her Conformer will deal 6.1875x normal damage. Load her up with Mega All, Counter+Deathblow, Added Cut+Deathblow, Elemental+Ramuh, Added Effect+Time, and as many Counter Attacks that you have room for.

Allocate another player to be your Magical attacker, and give the third character the Mime Materia. Don't worry too much if your Materia is not at the exact Lv as suggested above; with that said, you will need a Lv3 Lightning as well as a Lv3 Gravity.

The idea is to not allow Emerald to use Aire Tam Storm at all. As the battle opens, set up your necessary defences then be ready to use a Megalixir when Emerald opens its Eyes. You need to destroy the Eyes as quickly as possible; use your Mega All+Deathblow followed by Mime, then use Beta to dispatch them quickly. Each time Emerald counters with Revenge Stamp it should trigger a round of counter attacks in response from Yuffie.

Once Emerald has reverted back to its original form you can firstly heal, then begin a Mime chain of Quadra Magic+Demi3. Just be mindful that the chain can be broken when Yuffie Counter Attacks, so time the beginning of your chain just after Emerald has attacked. Having two Mime Materias is useful, but not mandatory for defeating Emerald.

So long as you are able to defeat the Eyes before Emerald has a chance to use Aire Tam Storm, you should not struggle too much. *Always* use a Megalixir after Emerald Beam is used, and be ready to use Angel Whisper on a fallen character. If a character does fall you will need to use Dragon Force twice on them once more.

- The 'KOTR Mime' Method:

This is perhaps the oldest strategy in the book, and also the most boring. Given that Emerald can use Aire Tam Storm in retaliation to KOTR being used while it is in Stage 2 (and its HP is less than 50%), you should prepare accordingly; be sure to master two lots of Final Attack to pair with Phoenix/Revive, or, equip less Materia than is necessary for Aire Tam Storm to kill you.

Avoid using any types of Counter Attack Materia, as they will break the Mime chain, Naturally you will need at least two Mime Materias, although three will help. Make sure that KOTR is at *least* Lv 2; you may need to break the Mime Chain at some point to heal, so you will need to be able to cast KOTR at least twice; although, it may not be necessary.

Any Support Materia you equip with KOTR will also be mimed, so you could pair HP Absorb with KOTR to heal your characters with every use. Your aim is to try to deal 7500+ HP with each hit, so you should equip things such as the Magic Plus Materia or Circlets to increase your damage output. You could also pair KOTR with MP Turbo to increase your damage if you wished; the increased MP cost will *not* carry over when Mimed, although the increased damage will (carry over).

Using this method, the Underwater Materia should not be needed as Emerald will usually be defeated in less than 16 minutes. Make sure to equip the W-Summon Materia, and consider using Sprint Shoes if you do not need to use Circlets.

As the Battle begins, use either four Hero Drinks or two Dragon Forces per character to boost their stats, then wait for the Eyes to open. Use a Megalixir following Emerald Beam, then begin the KOTR Mime chain. You should be able to kill Emerald with before it opens its Eyes for a second time, after eight casts of KOTR.

- The 'Supreme' Method:

This method requires the most amount of effort to setup, but is also the easiest method for defeating Emerald. You should adopt this method if you are naturally trying to Master all Materia and get to Lv 99. This strategy will not require the Underwater Materia, as you should be able

to end the battle in roughly 7 minutes.

You will want to focus on fulfilling the following Materia check-list:

- 3x Mastered Final Attack Materia
- 3x Mastered Phoenix or Revive Materia
- 4x Mastered Counter Materia
- 4x Mastered Deathblow Materia
- 9x Mastered Counter Attack Materia
- 2x Mastered Quadra Magic Materia
- 1x Mastered MP Turbo Materia
- 3x Mastered Magic Counter Materia
- 3x Mastered Lightning Materia
- 2x Mastered Gravity Materia
- 1x Mastered Contain Materia
- 3x Mastered Mega All Materia
- 3x Mastered HP Plus Materia
- 1x Mastered Magic Plus Materia

Do not concern yourself too much about fulfilling the above list; if you only master two pieces of Mega All then that will yield a third piece, so you can get away with having a few less mastered pieces than stated; with that said, you *will* need to have the required mastered Lightning and Gravity Materias.

Use your strongest Physical attackers (Yuffie) and equip them with their Ultimate Weapons. Give all three characters the Sprint Shoes, Circlets or Champion Belts, then equip them with either Mystiles or Wizard Bracelets.

The idea behind this strategy is to let the counters do their thing; give all characters 3x Counter Attacks, then distribute the rest of the above Materia list accordingly. Use Hero Drinks or Dragon Forces as the battle begins, then just focus on using your turns to heal your characters. Each time Emerald attacks, your characters will open with a frenzy of counter attacks dealing over 100,000 HP to Emerald.

Note that paring Magic Counter with Lightning/Gravity *will* combine with Quadra Magic, so long as the the paired Magic is at the same level i.e. pairing a Lv 2 Lightning with Magic Counter and a Lv 3 Lightning with Quadra Magic will result in four uses of Bolt2 when countering.

All you need to do is watch your HP, and the battle will play itself out very quickly with this method.

- The '7777 Fever' Method:

While this method requires very little preparation, it can be quite difficult to execute properly, and may take a few attempts. The Underwater materia *shouldn't* be necessary, although you may need it as a precaution.

The idea is to activate All Lucky 7s following the use of Aire Tam Storm. Make sure that at least one of your characters HP reaches 9999 with two HP Plus Materias equipped; when Aire Tame Storm is used, the damage dealt will be exactly 2222 and your character's HP value will hit exactly 7777, provided they were at full HP when the attack was used.

You only need to have one character set up with 9999 HP and two Materias equipped for this method to work; although, having two characters set up will help as a precaution in case one character is not at full HP when Aire Tam Storm is used. Barret makes a good candidate as he has the highest natural base HP.

When one or more characters enters into 7777 Fever mode, they will attack 64 times dealing 7777 HP per hit. It does not matter if one or all of your characters enters into 7777 fever mode simultaneously; the result would still be 64 hits, the difference being that your characters would

take it in turns to attack. You cannot activate All Lucky 7s twice in one battle; however, if your character's HP reaches 7777 once more then they will continue to deal 7777 HP with each hit until their HP value is changed.

Make sure to overload one character with Materia, making sure they have the following equipped: Final Attack+Phoenix, HP Absorb+KOTR, W-Summon, Mime, Enemy Skill, and give them either the Sprint Shoes or Touph Ring. Magic Plus, MP Plus and Speed Plus Materia helps, also. For clarity, I will refer to this character as the "central" character i.e. the character that does *not* have 9999 HP (the weaker character).

As the battle begins, give central character 2x Hero Drinks and 1x Dragon Force. Be sure to inflict Emerald with Slow via the use of a Spider Web. Make sure to use X-Potions to keep your HP up, and be ready to use a Megalixir the instant that Emerald opens its Eyes. You *mustn't* let your central character get killed before the use of Aire Tam Storm, as it can ruin the strategy (unless your Final Attack and Phoenix are both high levelled).

Your aim is to try to firstly kill the two outer "Blue" Eyes, as these will attack your HP. Beta works well, as does Shadow Flare. You could also use Fire Veils to deal 2240-2390 HP to each Eye. Once Emerald has used Emerald Beam a 2nd time, it will use Aire Tam Storm as its next attack, so make sure your characters are at full HP when this happens. With only the two "Yellow" Eyes remaining, your HP cannot be targeted between the use of Emerald Beam and Aire Tam Storm.

The idea is to let Aire Tam Storm kill your central character, who will then counter by using Phoenix thereby killing the two remaining Eyes. Two prior casts of Beta should ensure that this happens. Your other two characters will then take it in turns to attack Emerald following the activation of All Lucky 7s, dealing a total of 487,728 HP.

Your next action will determine the outcome of the battle. You *must* wait until Emerald Weapon has transformed back to its original form, *and* you must wait until it has used Emerald Shoot once before beginning your KOTR Mime chain. Use this down-time to give your central character 2 Hero Drinks and 1 Dragon Force once more, and be sure they are at full HP/MP.

If you begin using KOTR before it has transformed back to its 1st Stage, then it will counter with Aire Tam Storm killing your central character once more, breaking your Mime chain. If you begin the Chain before Emerald has used Emerald Shoot (after it has reverted back), then it will open its Eyes prematurely (due to the "Angry Emerald" parameter being enabled), countering with Aire Tam Storm following the first use of KOTR.

To defeat Emerald you will need to use KOTR four times in addition to using 7777 Fever, so one use of W-Summon followed by one Mime will do the trick. So long as you time your use of KOTR wisely, you should be able to get two turns in before Emerald opens it Eyes.

If you mess the strategy up by killing the Eyes too early (preventing Emerald from using Aire Tam Storm), then do not fret; you may still be able to defeat it by using your KOTR Mime chain *first*, then preparing for Aire Tam Storm the second time it opens its Eyes (which it will do so as its 1st attack as opposed to its 3rd attack due to the "Angry Emerald" parameter).

Another way to activate All Lucky 7s is via the use of the Chocobuckle Enemy Skill, which deals damage equal to the qty of escapes the player has. You will need [Character's HP - 7777] number of escapes for Choco-buckle to deal the correct amount of damage to bring one character's HP down to 7777. There are several other methods for activating All Lucky 7s; visit section E.18 A for more info.

- The 'Limit Break' Methods:

There a few different strategies involving the use of Limit Breaks. The first involves just using Cloud's Omnislash; firstly, master 7x Counter Materias and 7x Mime Materias so you have 8 if each, then link them all together. Make sure Cloud has his Lv 4 Limit available going into the battle, and that the other two characters are KO'd. Do not equip any Counter Attacks.

Try to use Omnislash as the battle opens before Emerald is able to attack, and then sit back and watch Cloud retaliate with every attack by using Omnislash. You may need to break the Mime chain to heal, but by that point Cloud's Limit gauge should have refilled. Inflict Cloud with Fury to be on the safe side.

This method can be achieved with as little as just two Counter + Mime Materias. You should time your X-Potion use just before it uses Emerald Beam; that way you can mime the X-Potion, then begin with Omnislash to destroy the Eyes. Use the downtime Emerald spends with its Eyes closed to refill your Limit Bar, then begin with Omnislash once more when the Eyes open.

You may need Final Attack+Revive to survive this method. Elemental+Ramuh will also help if Cloud is under-levelled, as will Hero Drinks. If using Cloud's Ultima Weapon, make sure his HP is at full before using Omnislash. The Underwater Materia should not be necessary, although Long Range might.

The other 'Limit Break' strategy involves using all three characters, with minimal amount of time spent preparing. You will want to use your strongest Lv 3 Limit Breaks; Barret's Angermax and Cid's Big Brawl make good candidates, as does Yuffie's Doom of The Living.

Equip HP Plus, Enemy Skill and a few Counter Attacks on each character. Counter+Deathblow, Mega All and Magic Counter+Restore work well, also. Make sure that all of your characters are inflicted with Fury, and equip them all with either the Sprint Shoes or Touph Rings. Equip any other Materia you like; Emerald will not be using Aire Tam Storm with this method. Make sure to have replacement Commands available in place of Attack, such as Deathblow.

You will not need the Underwater Materia or Final Attack using this method, as it is a fairly easy method to adopt which should take around fifteen minutes. A healthy supply of Elixirs and Megalixirs will be required, and you should also aim to have at least nine Hero Drinks. Make sure to equip the W-Item Materia.

The idea is to allow Emerald to fill up your Limit Breaks while its Eyes are closed. During this time you should give three-four Hero Drinks to each character, while keeping their HP up. As soon as Emerald opens its Eyes be ready to use a Megalixir, then use all of your Limit Breaks in succession; the Eyes should not last long this way.

When Emerald reverts back to its original form, use attacks such as Deathblow and Shadow Flare to weaken it, while letting it refill your Limit gauges once more; by the time it opens its Eyes again your Limits should be available to use. Rinse and repeat until Emerald is dead. Do not be tempted into using Lv 4 Limit Breaks, as they take too long to refill.

- The 'Damage Overflow' Method:

Only Vincent and Barret can reach a Power value high enough to cause Damage Overflow, and the *minimum* amount of kills required for Vincent's Death Penalty to reach the required Power value is 16,896 kills. Because

of this, Barret makes the ideal candidate to use when trying to one-hit Emerald Weapon via the use of Damage Overflow.

There are two ways in which Barret can cause the damage figure to overflow; the first is via Base Damage Overflow, which requires more AP equipped on Barret's Missing Score than the second method (Random Variation Overflow). You do not need to use Critical or Berserk when performing Base Damage Overflow; however, you will need to give Barret at least two Hero Drinks.

The most amount of AP Barret can fit on his Missing Score is 4,000,000; this is via 8x Mastered KOTR Materias. At Lv 99, Barret would need a *minimum* Att value of 183 while using four Hero Drinks with 8x Mastered KOTR Materia equipped to cause Base Damage Overflow.

At Lv 99 with 255 Att, Barret would need 2,120,000 AP equipped to cause Base Damage Overflow with four Hero Drinks; 2,350,000 AP with three Hero Drinks; or, 3,340,00 AP with just two Hero Drinks.

The second option to one-hit Emerald is via the use of Random Variation Overflow, which requires the use of Berserk and a Critical Hit. You should make sure to have 255 Luck; this way you will have a 63.75% chance to land a Critical Hit against Emerald. Make sure to have War Gongs available, or a Lv 2 Mystify Materia to inflict Barret with Berserk.

At Lv 99, Barret would need a *minimum* Attack value of 143 to have a 20.7% chance of causing Random Variation Overflow against Emerald (with 8x Mastered KOTR Materia equipped, four Hero Drinks, Critical and Berserk); he will gain a 100% chance with 151 Attack.

With 255 Attack and Lv 99, Barret would need a *minimum* of 1,410,000 AP equipped to his Weapon to have a 5.86% chance of causing Random Variation overflow; this is with four Hero Drinks, Berserk and a Critical Hit. To gain a 100% chance with four Hero Drinks, Barret would need 1,500,000 AP on his Weapon.

Three Hero Drinks would need 1,570,000 AP (8.2% chance) or 1,670,000 (100% chance). Two Hero Drinks would need 2,220,000 AP (0.39% chance) or 2,370,000 AP (100% chance). One Hero Drink would need 3,160,000 AP (4.69% chance) or 3,370,000 AP (100% chance). it is impossible for Barret to one-hit Emerald without any Hero Drinks.

To gain the required stats needed for performing Damage Overflow, you will need to farm Sources; Power Sources can be easily farmed from the Heavy Tank in Gongaga, and Luck Sources can be farmed from the Bad Rap in the Sunken Gelnika. You could optionally make use of the "Extended W-Item Glitch" to dupe a finite amount of Sources; explore the "Top Farming Locations" in the Helpful Lists section for more info on Item duping.

- The 'Game Over' Method:

Possibly the hardest of all methods, the 'Game Over' strategy focuses on exploiting the fact that Cait Sith's Lv 2 Limit ability 'Game Over' will ignore any Death immunities in place, and will kill any target in one hit; this includes Emerald. Given that Game Over can be used at any Lv, this strategy is the preferred method for Low-Levelled playthroughs.

To perform Game Over the Player must align 3x Cait Sith symbols when using Cait Sith's 'Slots' Limit Break. If the Player accidentally aligns two Cait Sith symbols followed by a BAR, then the 'Death Joker' ability will be used, killing the Party instead.

You should mash Square repeatedly to slow down the reels, the same way you would in the Battle Square or with Tifa's Limit Breaks. There are two Cait Siths on the first reel, two on the second, and one on the third:

Reel 1 - BAR, Mog, Cait Sith Heart, BAR, Cait Sith

| Reel 2 - BAR, Crown, Cait Sith BAR, Crown, Cait Sith |
| Reel 3 - Crown, Mog, Cait Sith |
| |
| Aligning the first two symbols isn't too tough once you get the hang of it; the problem is the "Evil Flag", which ensures you will *never* be able to align the third symbol, as it will always jump one symbol even if you stop the reel at the correct spot. If the first symbol is a 'Cait Sith', then the Evil Flag will be deactivated if the 'Game Time' clock count is divisible by 64; this means you only have a 1.5625% chance that the game will allow for the use of Game Over. |
| The way to use Game Over with the "Evil Flag" activated is to trick the game into thinking that the third symbol you have landed on is the Cait Sith. To perform this technique, you must first align two Cait Siths, then pause the third reel as the Cait Sith symbol aligns. You must then mash Circle as fast as you can while releasing Square; this will stop the reel from skipping one symbol, and Game Over will be the ability used. |
| |
| |
| - The 'No Button' Method: (credit to Death_Unites_Us) |
| |
| Make sure that you have 3x Mastered Final Attack Materias and 2x Mastered Knights of The Round Materias, then equip the following onto one character: Final Attack+Revive, Final Attack+KOTR, Final Attack+KOTR, HP Plus and HP <-> MP. There's nothing else to it! Get into a battle with Emerald Weapon, put the control pad down, and let the AI Script do the work for you :) |
| |
| |
| It is possible to cause the game to break by defeating Emerald Weapon and getting a Game over simultaneously; this occurs when Emerald begins flashing red with eight or less seconds remaining on the clock. If this were to occur, then the Game Over screen would overlap with the rewards screen, and the Player will then be brought to the main "New Game/Load Game" Screen. Should you load a new/saved game, the save file will contain numerous errors & glitches, and will not be playable. |
| Two versions Emerald Beam and Emerald Shoot exist, one of each is never used. The unused variant of Emerald Beam inflicts 65.625% of the target's Current HP, as opposed to 62.5%. |
| Emerald Weapon, along with Ruby and Diamond Weapon are not present in the JORG version. |
| When the AI Script checks for the use of any of the three Bahamuts, it correctly checks to make sure that the Command used was a Summon. This means that using Items that share the same ID as any of the Bahamuts will *not* trigger the Counter Script, as seen with a handful of enemies previously. |
| The battle with Emerald Weapon consists of Emerald, 4x Eyes and 1x Leg, the latter of which is the base-stump part. Emerald Weapon is the top half of the enemy; the part that flies over the player when using Aire Tam Storm. The Leg is non-targetable and has no AI Script; visit the "Extra Enemies" section for more details on the Leg. |
| Emerald Weapon is subject to the 'Quadra Magic Ultima Glitch' whereby the game will freeze when the Player tried cast Ultima, when they have one Ultima paired with HP or MP Absorb, and another with Quadra Magic. |
| Emerald Weapon is one of a number 'elevated' enemies that Nullifies the Earth Element, but will no take double damage from Wind. |
| Emerald Weapon is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. Emerald Weapon is one one of 86 enemies that is immune to Seizure. It is also immune to Peerless, along with 104 other enemies, and also immune to Regen along with 14 other enemies. |

|                                                                             |
|   Use Emerald Laser 712 MP Base Damage variant on Rnd Target                |
|                                                                             |
|                                                                             |
|  SELF IS EYE [C] (inner-right Eye)                                          |
|                                                                             |
|   Use Emerald Laser 712 MP Base Damage variant on Rnd Target                |
|                                                                             |
|                                                                             |
|  SELF IS EYE [A] (outer-right Eye)                                          |
|                                                                             |
|   Use Emerald Laser 4162 HP Base Damage variant on Rnd Target               |
|                                                                             |
|                                                                             |
|  DEATH: Use <Vanish> on Self, remove Self from Battle                       |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Eye:                             |   POWER req for Overflow:     |
|                                             |                               |
| Emerald Weapon's Eyes will be closed as the  |  Base Damage Overflow: 139   |
|  battle begins, and will open after at least |  Rnd Var Overflow  3x:  93   |
|  four turns have passed for Emerald. While   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  the Eyes are active, Emerald will become                                   |
|  much more of a threat, so the Player should focus on killing them as       |
|  quickly as possible.                                                       |
| The two outer Blue Eyes will attack your characters HP, and the inner two   |
|  Yellow Eyes will attack you MP, so always try to take out the Blue Eyes    |
|  first. Beta works well given their weakness to Fire, as does Shadow        |
|  Flare.                                                                     |
| All versions of the Eyes have fairly low Defence and MDefence; however,     |
|  they have fairly high Dexterity. The outer Blue Eyes will have 150 Dex,    |
|  and the inner Yellow Eyes will have 250 Dex.                               |
| In the J-INT version the abilities used by the Eyes are revered; the Blue   |
|  Eyes attack your HP and the Yellow Eyes attack your MP.                    |
| Four versions of Emerald Laser exist; one used by each variant of the Eye.  |
| The Eye is one of a number 'elevated' enemies that Nullifies the Earth      |
|  Element, but will no take double damage from Wind.                         |
| The Eye is immune to Seizure, which isn't necessary seeing as there is no   |
|  way for the Player to inflict an enemy with Seizure. The Eye is one one    |
|  of 86 enemies that is immune to Seizure. It is also immune to Peerless,    |
|  along with 104 other enemies, and also immune to Regen along with 14       |
|  other enemies.                                                             |
```

```
\                                                                                /

|   Ruby Weapon's BATTLE PLAN:                                                |
|                                                                             |
|  NOTE - Ruby's Tentacles do nothing by themselves; all of the Actions are   |
```

```
|          performed from Ruby Weapon. Ruby's Tentacle [A] is the Player's   |
|          Right, and will use Right Thrust/Revenge. Ruby's Tentacle [B] is  |
|          the Player's left, and will use Left Thrust/Revenge.              |
|                                                                            |
|         Whenever Ruby Weapons transitions through its Stages it will       |
|          continue on from the 'Attack Count' that it was on previously. If |
|          a character gets ejected from the battle via Whirlsand they will  |
|          be flagged as being dead.                                         |
|                                                                            |
|                                                                            |
|  SETUP: Disable default Death Handling for Ruby Weapon                     |
|         Set Ruby Weapon to absorb Fire, Ice, Lightning, Earth and Hidden   |
|         Enable Ruby Weapon's Physical and Magical immunity                 |
|                                                                            |
|                                                                            |

|                                                                             |
|                                                                             |
|  DEATH: Use <Vanish> on Self, remove active enemies from Battle, end Battle|
|         Set GlobalVar [Ruby Weapon Killed]                                  |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Ruby Weapon:                                                     |
|                                                                             |
| Ruby Weapon is one of two Super-Bosses, the other being Emerald Weapon.     |
|  Both are extremely tough, but can be defeated in a number of ways by      |
|  exploiting various weaknesses. Ruby's weakness is that it is vulnerable    |
|  to Slow and Paralyzed Statuses. It is considered to be the hardest enemy   |
|  in the game. Most of the suggested strategies can be performed with a      |
|  Party of Lv 60+ characters.                                                |
| Ruby Weapon has 200,000 less HP than Emerald and is 40 Lvs lower; however,  |
|  it has insatiably high Defence and MDefence, which makes it a tougher      |
|  opponent than Emerald. With the highest Def in the game it is the only     |
|  enemy that cannot be defeat via the use of Damage Overflow. It also has    |
|  the highest *base* MDef; the Grimguard in its 'Magical' form is the only   |
|  enemy to have higher MDef than Ruby. It also has the highest natural       |
|  Evade stat in the game, excluding enemies that can modify their base       |
|  Evade (Cactuar; Black Bat; Magnade; Evilhead; Rilfsak; Cactuer).           |
| Ruby Weapon has a much more unpredictable attack pattern than Emerald, and  |
|  requires more preparation to defeat. It is advisable to defeat Emerald     |
|  prior to Ruby to gain the EXP and AP that Emerald leaves; while both       |
|  Super-Bosses leave 50,000 AP, Ruby will leave less EXP and gil. You        |
|  should use the Emerald battle to level up your KOTR Materia, and to also   |
|  gain a set of Master Materia.                                              |
| Ruby Weapon can be encountered as early as Disc 2, following the defeat of  |
|  Ultimate Weapon (after killing Diamond Weapon but before parachuting into  |
|  Midgar). Once Ultimate has been defeated the Player must fight one random  |
|  encounter on the World Map to trigger Ruby to spawn in the Desert terrain  |
|  in the Gold Saucer Area. You can either ram into Ruby with your Highwind   |
|  or a Gold Chocobo to engage it.                                            |
| Unlike most boss battles, Ruby Weapon does not make use of the "Can't       |
|  Escape" Flag, and as such it is possible for the Player to flee the        |
|  battle. The "Run Count" will be set to 3, so it may take a while for you   |
|  to successfully escape. You will only be able to flee the battle while     |
|  Ruby's Tentacles are un-buried. If you do flee from Ruby then its Field    |
|  Model will remain un-earthed on the World Map until you travel far enough  |
|  away from it that it is no longer in view; when you travel towards it to   |
|  bring it back into view it will once more have buried it body leaving      |
|  only its head poking out from the sand.                                    |
| While the Battle with Ruby is considered to be a 'Pincer Attack', the       |
|  standard "Attack from both sides" prompt will not be displayed; although,  |
|  *most* other Pincer Attack properties will come into effect. Your ATB      |
|  gauge will start empty, and the first time Ruby uses Big Swing your        |
|  characters will take double damage. Unlike most Pincer Attacks, all        |
|  characters will be front-facing; if you were to a character to use a       |
|  restorative item such as an X-Potion to another character, he/she will     |
|  then face the opposite direction and will once again take double damage    |
|  from Physical attacks (Big Swing is the only Physical ability that Ruby    |
|  uses). As soon as they are attacked by Ruby they will become front-facing  |
|  again.                                                                     |
| Once Ruby Weapon has been defeated you will obtain the Desert Rose, which   |
|  can be used to trade with the Kalm Traveller to obtain a Gold Chocobo.     |
|  You should have already obtained a Gold Chocobo prior to Ruby as to        |
```

obtain the KOTR Materia; however, you can use Ruby as a means to gaining KOTR without having to breed if you wish. The Gold Chocobo obtained from Ruby has very poor racing stats:

- Sex = 50% chance male 50% chance female
- MDash = 3000 (88 KPH)
- Dash = 1000
- MRun = 2500 (73 KPH)
- Run = 500
- Stam = 1000
- Accl = 60
- Intl = 30
- Coop = 0
- Per = 0
- Type = Great

If you need to level up your characters or Materia prior to the fight with either of the two Super-Bosses, then the Magic Pots in the 'Swamp Area' in the North Crater are the ideal candidate; just be sure to have enough Elixirs to feed them.

SETUP:

The easiest way to avoid your characters being ejected from the battle is to enter into the fight with two characters KO'd. This way Ruby will bury its Tentacles as the battle opens, leaving you free to revive your characters by with using All+Revive or Phoenix. You should also try to fill the Limit gauge of your remaining character prior to the battle; the easiest way to do this is by manipulating the Valron in Nibel Area and having it use Dive Kick on you.

While your setup may vary heavily depending on your chosen strategy, there are a few things you should consider for every method. The first thing to highlight is the incredible amount of AP Ruby will leave; consider equipping Cloud's Apocalypse to gain triple growth, which means any Materia equipped will gain 150,000 AP. Cid's Scimitar is also a useful weapon to equip, as is his Javelin. You could also equip Rune Armlets to gain double AP on your Armour.

If you are not bothered about the AP the Ruby leaves, then you should equip your character's Ultimate Weapons; you will gain a considerable boost in Magic even if you do not plan to attack Physically.

For you Armour, you should equip either the Mystile, Imperial Guard, or Warrior Bangle for maximum defence. The Mystile will massively increase your Defence%, which will mean that Ultima, Comet2 and Shadow Flare will have a 65% chance of missing. it will also increase your chance of connecting, which will help if you plan to use Physical attacks given Ruby's incredibly high Evade stat. The Fire Armlet will drain the damage dealt via Ruby Flame. Dragon Armlets make a good candidate, also.

The Ziedrich can prove to be a deal-breaker if you are low-levelled, as it will halve the damage taken from all attacks excluding <Big Claw>, Comet2, Ultima and Shadow Flare. The %-based attacks from the Tentacles *will* be halved; the only downside to the Ziedrich is the fact that it has 0 Materia slots. Note that the while the Tentacles use %-based attacks, they do *not* use the Gravity Element, so setting up Gravity defence on your Armour will not affect the damage received (the Ziedrich, however, will).

You have the option to either equip Ribbons to defend against Ruby's Status-inflicting attacks, or, you can opt to use Vaccines/Resist (Lv 3 Heal Materia) as the battle opens. If you choose to use Resit then you should equip either the Tough Ring for the extra defence, or, Champion Belt/Circlet for the boost in offence. The downside to using Resist is that your characters will not be able to set up any defensive Statuses once Resist is in place; the only way to remove Resist is either to kill your character, or via the use of DeSpell (Lv 2 Destruct Materia); a Holy Torch will *not* remove Resist.

Other Accessories you should consider if you plan to use Resist consist of the Protect Ring which sets up auto Barrier/MBarrier. The Reflect Ring will help against Shadow Flare, and the Tetra Elemental will absorb the damage taken via Ruby Flame (if you have the Ziedrich equipped then it will also halve the absorbed damage). Sprint Shoes are useful if you are not in need of additional defence.

Equipping Added Effect+Hades on your Armour is another option to free up your Accessory slot, just bear in mind that you will *not* be protected from Paralyzed and Slow-numb/Petrify with this setup, so a Vaccine may still be needed.

For your Materia, you should consider equipping things such as Magic Counter+Restore; Elemental+Fire (on Armour to defend against Ruby Flame); Sneak Attack+Lv 2 Time (to open with Slow); HP Absorb+Master Command; W-Item Materia.

You should utilise the Final Attack Materia by pairing it with Phoenix, which may be your saving grace for this super-battle. Just note that a Lv 1 Phoenix will only allow for one use of Final Attack, even if the Final Attack is at Lv 5, so you may wish to instead pair Final Attack with Revive.

Unlike Emerald you can equip as much Materia as you wish without fear of any reprisals. You also do not have to worry about a time-limit; although, you do have to kill Ruby before its has reached its 26th turn to reap the spoils for all three characters. Feel free to equip as many HP Plus Materias as is necessary to get your characters to 9999 HP and any6 other stat-boosting Materia, such as Magic Plus, Speed Plus and Luck Plus.

You can equip as many Counter Attack Materias as you wish (unless it conflicts with any 'Mime' strategies you wish to adopt); whenever the Tentacles attack you, your character will retaliate by attacking Ruby seeing as Ruby Weapon is the enemy performing the attack (so you do not need to worry about Ruby un-burying its Tentacles due to the them being killed). Ruby will *not* retaliate with Whirlsand when attacked via a Counter-Attack.

Slow the ATB Speed down as low as possible, and make sure the ATB setting is set to 'Wait'. You could opt to put all of your characters in the Back Row; however, the only attack that will be affected by the Back-Row modifier is Big Swing, as it is the only Physical ability used by Ruby. Sadness, on the other hand, *will* reduce both Physical and Magical attacks by 30% excluding the %-Based abilities.

You are going to want to exploit Ruby's weakness to Slow and Paralyzed, so make sure to equip a Lv 2 Time Materia (unless paired with Added Effect on your Weapon), or, make sure to have a few Spider Webs in your inventory. You can steal Spider Webs from the Kimara Bug in Gongaga Jungle. Dazers will be your means of inflicting Ruby with Paralyzed, and can be stolen/morphed from the Boundfat in Corral Valley.

You will want to have at least nine Megalixirs for this battle. Arrange your Items so that Megalixirs are at the top, followed by Dazers, Turbo Ethers then X-Potions. Also make sure to have other items that you plan on using at the top, such as Tranquilizers, Vaccines, Spider Webs and Hero Drinks.

If you have been stock-piling your Sources, then now would be the time to use them. should you wish to turn the tide in your favour, then you could spend some time in the Sunken Gelnika to farm Sources; visit the "Top Farming Locations" section of Helpful Lists for more info on Source Farming. You should also make use of the W-Item glitch to dupe yourself the required amount of Items needed.

STRATEGIES:

- General Tips:

As advised, you should enter the battle with two of your characters KO'd. Open by casting Phoenix or Revive, then have one character use Big Guard while another inflicts Ruby with Slow. If you inflict Ruby with Slow *before* you inflict it with Paralyzed, it will prolong the time it spends inflicted with Paralyzed.

If you have chosen to use Resist to as opposed to Ribbons, then be sure to use Big Guard *before* casting Resist/using Vaccines, as Resist will prevent you from setting up any Barriers. If a character becomes KO'd you will need to cast Resist once more.

Ruby Weapon has the highest natural Evade in the game, which means you will have a hard time trying to attack it Physically without the Mystile equipped (approximately 50%). Ultima and Shadow Flare can also obliterate you without the Mystile, as they will have a much greater chance of connecting. Be sure to set up defences to survive Ultima such as Reflect, Shield and Wall.

You should also have your W-Item bearer use four Hero Drinks on each character to increase their Defence, MDefence, Attack and MAttack by 100%. This may be the only way to deal with Ruby without dealing inferior amounts of HP.

If you decide not to enter the battle with two characters killed, then you must either kill two of your characters or have Ruby use Whirlsand twice before it reaches its sixth turn. You can prompt Ruby into using Whirlsand as a counter-attack by attacking it, just note that Whirlsand will choose a random target to eject as opposed to the last player to have attacked Ruby. Once a character has been ejected from the battle they will be flagged as being Dead (unlike the Midgar Zolom, Scissors or Gighee, which flags a character as having escaped).

If Ruby does not bury its Tentacles within its first six turns, you will need to wait until it has used a further nine turns before it has a chance of burying its tentacles, which it will only have a 20% chance of doing so each turn. If you find yourself in this scenario then it means Whirlsand will have been used twice, and you will only have one character remaining. You should probably restart the battle if this happens.

As the battle opens Ruby will be impervious to all abilities; this includes the use of Dazers. It will only become susceptible to attacks once it has buried its Tentacles, at which point the Physical and Magical immunities can *never* be reapplied, even if it unburies its Tentacles mid-battle. Note that Cait Sith's 'Game Over' will also miss while it is in its initial state.

Killing just one of the Tentacles will trigger Ruby to unbury both of its Tentacles, thereby reverting back to its original form. While it is less of a threat in this stage, it will use Whirlsand as a counter to every attack until there is only one character left, so it is in your interest to *not* kill the Tentacles (unless your plan is to just use one character). You do not need to kill the Tentacles to end the battle; killing Ruby is all that's needed.

If you want to reap the rewards for all three players then you must defeat Ruby before it reaches its 26 turn, as it will then use Whirlsand if more than two characters are alive. Reviving a fallen character after its 26th turn will prompt Ruby into using Whirlsand on its next turn. Once it reaches its 33rd turn it will use Whirlsand if more than one character is alive. Luckily, Ruby will *not* use any turns while inflicted with Paralyzed.

All of the attacks come from Ruby, and the Tentacles will never act on their own accord. This means that there is only one ATB gauge to worry

about, unlike Emerald's Eyes which all attack independently. The Tentacles will, however, be used as a counter attack via the use of the "Thrust" version of their attacks (which deals greater damage than the "Revenge" variant) whenever Ruby takes damage.

If you plan to use KOTR against Ruby then be sure to only cast Ultimate End while Ruby is inflicted with Paralyzed; this way it will not counter with Ultima. If you do find yourself accidentally casting KOTR while Ruby is active, then be sure that you have enough defences in place to survive Ultima. Note that using Dazers on Ruby while it is inflicted with Paralyzed will *not* reset the timer for the Status; you must wait until the Paralyzed Status has been lifted before using Dazers once more.

Given that Pandora's Box is one of the few abilities in the game that overlooks the target's MDefence, you can use it to inflict moderate amounts of damage against Ruby. A character with four Hero Drinks and Magic boosting equipment in place should deal 9999 HP with each hit. You can also use other fixed-damage abilities to defeat Ruby, such as Chocobuckle, ????, or Coin.

You can use Magic Hammer 26 times if you wished to; this way it will not have enough MP to cast Comet2, Ultima, or Shadow Flare. Just be wary of the fact that you should aim to defeat Ruby before it has used 26 turns. Note that Barret's Mindblow uses the Gravity Element, which Ruby will nullify.

If you go into battle with any Lv 59 characters then they can use Goblin Punch for 0 MP cost to deal around 4000 HP with each, assuming four Hero Drinks have been used. Note that Goblin Punch is a Physical ability, which means that your attacks will likely miss half the time without the use of the Mystile equipped.

It is possible to inflict Ruby Weapon with Fury, which will make Comet2, Ultima and Shadow Flare less likely to hit. To inflict Ruby with Fury you must have one character enter into the battle *without* a Ribbon equipped, then inflict that character with Confusion. Quickly have that character use a Hyper before you lose control of them; if you are lucky they will instead use the Hyper on Ruby. You should then cure the character of Confusion and then use Resist (or a Vaccine) on them to grant them Status immunity.

- The 'KOTR Mime' Method:

Perhaps the easiest and oldest method for defeating Ruby, the Knights of The Round 'Mime Chain' strategy has been used since 1997. It takes a while to prepare your load-out for this method; however, it is a lot easier to use against Ruby than it is Emerald Weapon, as you do not need to worry about the use of Aire Tam Storm killing your Party. You do, however, need to worry about the use of Ultima, which Ruby will use in retaliation to KOTR while it is active.

As is standard you will be using Dazers to subdue Ruby, preventing it from using Ultima as a counter attack. When it breaks free from its Paralysis it will likely use Ultima before use have a chance to use Dazers; be sure to have the appropriate defences in place as described above to prevent a Game Over (Mystile/Final Attack).

Here is the checklist for this method:

- 1x Mastered MP Turbo Materia
- 1x Mastered Knights of The Round Materia (or Master Summon)
- 2x Mastered Mime Materia
- 3x Mastered HP Plus Materia
- 1x Mastered Magic Plus Materia (optional)
- 1x W-Summon Materia
- 1x W-Item Materia

- 1x Final Attack Materia (minimum)
- 1x Revive Materia (minimum)
- 1x Mega All Materia
- 1x Sneak Attack Materia (optional with Time Materia)

Pairing the Sneak Attack Materia with a Lv 1 Time Materia will mean that you will open with Haste, giving you the slight edge as the battle opens. Pairing it with a Lv 2 Time Materia will mean that you will open with Slow, saving from having to use a Spider Web. Either strategy works.
As standard, enter the battle with two characters KO'd and have the third character's Limit gauge filled. Make sure that this character has Final Attack+Revive and Mega All so that they can cast Life2 on both dead characters as the battle begins.
Give one of your other characters the W-Summon Materia, MP Turbo+KOTR, HP Absorb+KOTR (or Master Summon), and the Magic Plus. Give the remaining character W-Item. Make sure that everyone has Mime, HP Plus, Enemy Skill and any other Materia of your choice, such as the Speed Plus materia. Do not equip any Counter Attacks.

Once the battle begins and your characters are all alive (with Ruby's Tentacles buried), have your W-Item bearer cast a Spider Web and Dazers *in that order* (to prolong the effect of Paralyzed), while your other characters use Big Guard/Haste and their Limit Break. Try to feed at least two Hero Drinks to each character to boost their offence; if you have the time to, feed them four each.
Wait until Ruby has broken free from it Paralysis, then cast a Megalixir followed by Dazers, then begin your KOTR chain. So long as your average damage per hit is greater than 8792 you should kill Ruby with seven uses of KOTR. The HP Absorb Materia will save you from having to heal; the only time you need to break your chain is when Ruby's Paralyzed Status wears off, at which point it will likely use Ultima. If you are fast enough you may be able to kill Ruby before Paralyzed wears off.
Simply heal or allow the Final Attack to take effect, then cast some more Dazers on Ruby, and use Hero Drinks once more if your characters were KO'd, then begin your KOTR chain once more. It is very unlikely to happen, but bear in mind that you need to have killed Ruby before it reaches its 26th turn if you want to reap the rewards for all three players, as it will begin using Whirlsand thereafter. The time that Ruby spends inflicted with Paralyzed will *not* contribute towards its turn count.

- The 'Pandora's Box Spam' Method:

Allocate one character as your Physical attacker, and equip them with the Mystile and 4xCut. Pair Added Cut with Master Command, and give them as many Counter Attacks that you have room for. You can optionally give them Added Effect+Time if you do not wish to use a Spider Web.
Allocate one character as your Magical attacker, and give them as many magic-boosting buffs as you can. Equip them with Magic Counter+Restore and All+Restore (for Regen).
Your third character should be your character that you go into battle with. Equip them with All+Revive and W-Item. As standard, make sure that all three character have Enemy Skills equipped.
The idea is to use your third character to keep Ruby subdued with Dazers, while the other two characters take it in turns to use Pandora's Box and 4xCut. Focus on giving Hero Drinks to your attackers before giving any to your third character; once all characters have the maximum Hero Drink boost, you can have your third character use Pandora's Box occasionally. Be sure to re-feed your characters four Hero Drinks if they get KO'd.

You could also have your Magical attacker use Bahamut ZERO, which also ignores the MDefence value of the target. Pair it with MP Turbo for maximum effect, along with the W-Summon Materia. Note that this strategy may take longer than the KOTR method, but is less boring.

- The 'Solo Summon' Method:

This is perhaps one of the easiest methods for killing Ruby, as it require little to no preparation. All of your Materia can be Lv 1 for this strategy, unless you wish to revive your characters at the last hurdle to gain the full amount of Battle Spoils, in which case you will need either a Lv 2 KOTR Materia or the Master Summon Materia. The idea is to just use one character to bring Ruby's HP to critical without the need for the other two characters.

Select your character that you wish to go into the battle with and equip them with the following: W-Summon, Hades, HP Absorb+KOTR and Mime. If you have the Master Summon or two KOTR Materias then you can link an additional piece to MP Turbo for additional damage. Make sure to equip the Phoenix Materia (if not using Master Summon) to be able to revive your fallen characters.

Fill your remaining slots with stat-boosting Materia such as Magic Plus, HP Plus, MP Plus, and Speed Plus. As mentioned above, you can choose to wear a Ribbon, or use a Vaccine mid-battle to prevent Status changed; if you opt to use Resist then you should equip the Sprint Shoes to gain Auto-Haste. Be sure to equip W-Item, also. Do not equip any Counter Attack Materias.

As the battle opens use a Spider Web followed by Dazers (in that order), then use any buffs that you may need, such as Resist (Vaccine), Big Guard and Hero Drinks. Try to use four Hero Drinks before Ruby becomes un-Paralyzed. You will need to wait until Ruby is no longer inflicted with Paralyzed before you can begin your assault; make sure your MP is at full before doing so.

As soon as Ruby as active once more use W-Summon to cast Hades and KOTR in that order; Hades will inflict Ruby with Paralyzed while KOTR will heal your character via the HP Absorb Materia. You will not need to worry about Ruby's attacks this way; so long as your MDefence is high enough to withstand the attack that it may throw at you (which will likely be Ultima), you should be fine; Hades will re-inflict Paralyzed, and KOTR will heal your character.

Using Mime costs 0 MP, so you will not have to break the Mime chain for any reason other than to revive your characters at the end of the battle, before the final cast of KOTR. For the final cast you can use Phoenix followed by KOTR to finish Ruby off; you may wish to have the Mime Materia on your other two characters to be able to get more uses in. Be wary of Ultima (equipping the Mystile will help).

It helps if you know how many castings of KOTR is needed to kill Ruby:

Between 8792 ~ 9999 HP per attack - 7 casts of Ultimate End
Between 7693 ~ 8791 HP per attack - 8 casts of Ultimate End
Between 6838 ~ 7692 HP per attack - 9 casts of Ultimate End
Between 6154 ~ 6837 HP per attack - 10 casts of Ultimate End
Between 5595 ~ 6153 HP per attack - 11 casts of Ultimate End

- The 'Fixed Damage' Methods:

All Lucky 7s:

Using 7777 Fever, one can inflict 497,728 HP worth of damage against Ruby, leaving it with just over 300,000 HP left. You can then finish it off with three to four uses of KOTR. You will want to use Cloud with Omnislash learned and ready to use, with two of the other characters killed off. You will also need Cloud's HP to be at precisely 7767 HP; visit section E.18 A for more info on how to achieve this.

It is likely that you will not be able to pull this strategy off without the Sprint Shoes, unless your Dexterity is maxed out. Otherwise, equip the Sprint Shoes and Speed Plus, along with any other Dexterity boosting Materia, such as Pre-Emptive, Double Cut and Steal. Have Cloud equip W-Item, W-Summon and either HP Absorb or MP Turbo paired with KOTR. You should also equip the Mystile, as Cloud will only have roughly a 63% chance of connecting with normal (non-Source boosted) Dexterity otherwise (even when in 7777 Fever mode).

As soon as the battle begins Ruby will bury its Tentacles. You *must* have Cloud use Omnislash on the Tentacles before Ruby gets a turn in, and you must also kill at least one of the Tentacles with one use of Omnislash. Ruby will then use its next turn unburying its Tentacles, which will give Cloud time to W-Item a Spider Web and Potion *in that order* (do *not* use Dazers just yet), beginning the onslaught of All Lucky 7s.

Once 7777 Fever has worn off, Ruby will use its next turn to bury its Tentacles once more, at which point you can revive your fallen teammates to kill Ruby with whichever means you see fit (Dazers followed by KOTR). Make sure not to use Revive until *after* the Tentacles have been buried. There is a strong chance that you'll heal your teammates for 7777 HP, meaning that they will attack for 7777 HP with each hit. Also, make sure not to kill the Tentacles from this point onwards, as it may provoke a glitch to occur as described below whereby the battle will not end upon Ruby's death, other than by escaping which will void you of the Battle Spoils.

Coin:

By using a Lv 2 Throw Materia or Master Command, one can use the Coin Command to throw 100,000 gil at Ruby inflicting 9999 HP with each hit. You can have the other two characters using Mime to imitate the action, using Dazers and megalixirs wherever needed.

The easiest way to amass the amount of gil required for this method to work (8,000,000) is to sell 5 mastered All Materias. You can do this by battling the Magic Pots in the North Crater for large amounts of AP, while also equipping the Gil Plus Materia to help you along the way.

????:

While this strategy may seem difficult, it can be one of the easier methods and requires very little preparation. The ???? Enemy Skill (learned from the Jersey in the Shinra Mansion) will deal damage equal to your Max HP minus your Current HP, so you will want to equip HP Plus Materias so that everyone's Max HP is at 9999. If you have a character at a Lv that is divisible by four (for L4 Suicide), then allocate him/her as your chosen character to enter the battle with. It helps if all three characters are susceptible to L4 Suicide.

Make sure that you have a healthy supply of Phoenix Downs, and arrange them at the top of your list along with Dazers. Make sure that someone has the W-Item Materia equipped, and give everyone Ribbons. Mystiles will help to avoid some of Ruby's attacks. If you haven't done so already, set the ATB to 'Wait' and slow the battle speed down all the way (crucial for this method to work).

Once Ruby has buried its Tentacles use a Spider Web and Dazers *in that order*, then use Phoenix Downs to revive your characters, keeping their HP at critical. Cast L4 Suicide to bring your 'main' character's HP down to critical (if applicable); if Ruby uses its tentacles to attack, the damage dealt will be %-based so they will never kill your characters. Use Big Guard or Haste as standard, and if any of your characters gets KO'd (which they may do occasionally) use Phoenix Downs to revive them.

The timing of your use of Dazers is critical; *always* wait with the Command Window open before selecting ???? as your attack; this way you can see if Ruby needs to be inflicted with Dazers or not after the attack animation has finished. It will also prolong the amount of time Ruby spend Paralyzed. It is imperative that Ruby gets as few attacks in as possible. Equip Final Attack+Phoenix as a precaution; although, it shouldn't be necessary. You will need to cast ???? roughly 95 times to kill Ruby Weapon.

- The 'No Dazers' Method:

This strategy is for those that prefer a challenge, as opposed to keeping Ruby subdued for the entirety of the battle. This can be incredibly difficult, as your aim is to defeat Ruby in before it starts using Whirlsand after its 25th turn. The easiest was to do this is by spamming Limit Breaks, using Pandora's Box while waiting for your Limit Breaks to fill. You will also need a very healthy supply of Megalixirs, so exploiting the W-Item glitch is recommended. You will also need at least 12 Hero Drinks.

It is worth noting that a lot of preparation is required for this method to work; you will likely fail unless you have spent time maxing out your characters stats via Sources.

Given Ruby's high Defence it helps if you have your character's Limit Lv set to 4; the Tentacles %-based attacks should quickly fill your limit gauges. The best characters to use for their Limits consist of Tifa (Final Heaven), Red XIII (Cosmo Memory), Barret (Catastrophe), and Cid (Highwind). Make sure that they all have their Ultimate Weapons equipped (if using Barret, then be sure to put as much AP on his weapon that you can).

Give all three characters Fury before the battle begins, and distribute your Materia evenly. Make sure that everyone has HP Plus, MP Plus, Enemy Skill, and equip as many Magic Plus, Speed Plus, Mime, W-Item and Final Attack+Revive Materias that you have. Make sure that you have either Phoenix or Mega All + Revive equipped on the character that you go into the battle with to revive the two fallen teammates. Using Magic Counter + Restore helps, also.

Do not equip any Counter Attacks or Counter+Deathblows, as your Physical attacks will not be connecting very often due to Fury. Avoid using the Mystile as it will not improve your characters chance of connecting by a great deal, besides, you *want* Ruby's attacks to be connecting with this method as so that your Limits fill faster. You should instead equip the Warrior Bangle or Gigas Armlet which boosts your Strength.

Once the battle has begun and you have revived your teammates, cast the usual round of Big Guard, Slow, and four Hero Drinks to each characters. Use a Megalixir at least once every turn, relying on Pandora's Box while you wait for your Limit Breaks to fill. Make sure that Cloud is at full HP before using Omnislash, as his Ultima Weapon will deal greater damage when Cloud is at full HP.

There is a strong chance that Ruby will get to its 26th turn before it has been defeated, *unless* you prevent Ruby from filling its ATB gauge. This is achieved by setting the ATB to 'Wait', then selecting your chosen

attack without confirming the attack until the current animation has finished playing. You *must* do this for every action; this way Ruby's ATB gauge will not fill during the down-time during the animations. This method will also help to select to best course of action i.e. *not* using Pandora's Box when you needed to have used a Megalixir. Use Mime to save your MP.

Another option would be to pair Quadra Magic with a mastered Bahamut ZERO Materia, and HP Absorb with Master Summon. This way you could begin a Summon chain, breaking the chain every so often to use your Limit Breaks and a Megalixir.

- The 'Game Over' Method:

Possibly the hardest of all methods, the 'Game Over' strategy focuses on exploiting the fact that Cait Sith's Lv 2 Limit ability 'Game Over' will ignore any Death immunities in place, and will kill any target in one hit; this includes Ruby. Given that Game Over can be used at any Lv, this strategy is the preferred method for Low-Levelled playthroughs.

Note that you will *not* be able to use Game Over while Ruby has its immunities in place. If Cait Sith uses Game Over while facing the Tentacles, Ruby Weapon will still be the enemy targeted, ending the battle.

To perform Game Over the Player must align 3x Cait Sith symbols when using Cait Sith's 'Slots' Limit Break. If the Player accidentally aligns two Cait Sith symbols followed by a BAR, then the 'Death Joker' ability will be used, killing the Party instead.

You should mash Square repeatedly to slow down the reels, the same way you would in the Battle Square or with Tifa's Limit Breaks. There are two Cait Siths on the first reel, two on the second, and one on the third:

Reel 1 - BAR, Mog, Cait Sith	Heart, BAR, Cait Sith
Reel 2 - BAR, Crown, Cait Sith	BAR, Crown, Cait Sith
Reel 3 - Crown, Mog, Cait Sith	

Aligning the first two symbols isn't too tough once you get the hang of it; the problem is the "Evil Flag", which ensures you will *never* be able to align the third symbol, as it will always jump one symbol even if you stop the reel at the correct spot. If the first symbol is a 'Cait Sith', then the Evil Flag will be deactivated if the 'Game Time' clock count is divisible by 64; this means you only have a 1.5625% chance that the game will allow for the use of Game Over.

The way to use Game Over with the "Evil Flag" activated is to trick the game into thinking that the third symbol you have landed on is the Cait Sith. To perform this technique, you must first align two Cait Siths, then pause the third reel as the Cait Sith symbol aligns. You must then mash Circle as fast as you can while releasing Square; this will stop the reel from skipping one symbol, and Game Over will be the ability used.

- The 'No Button' Method: (credit to Death_Unites_Us)

Make sure that you have 3x Mastered Final Attack Materias and 2x Mastered Knights of The Round Materias, then equip the following onto one character: Final Attack+Revive, Final Attack+KOTR, Final Attack+KOTR, HP Plus and HP <-> MP. There's nothing else to it! Get into a battle with Ruby Weapon, put the control pad down, and let the AI Script do the work for you :)

Note that this method is not as fool-proof with Ruby as it is with Emerald, as the Left Tentacle can drain your MP before the combo begins.

| |
| |
| It is possible to cause a glitch which disables the Battle from ending. |
| With other enemies that use multiple parts (such as Carry Armor, or |
| Bottomswell), there is usually some script running in the background as |
| part of the Formation which loops over and over again, checking for the |
| Death Status of particular enemies as to know when to end the battle. The |
| absence of such script with Ruby means that the battle can remain active |
| when a certain condition is met, with no means to end the battle other |
| than to escape. |
| To trigger the glitch you must first kill both Tentacle's simultaneously, |
| causing Ruby to unbury its Tentacles. When it re-buries it Tentacles once |
| more, kill just one of them causing it to unbury its Tentacles a second |
| time. If you were to kill Ruby Weapon while in this state, the game will |
| think that the remaining Tentacle is still alive and the battle will not |
| end. When you escape from the World Map Ruby will have disappeared from |
| the World Map. |
| This glitch can sometimes be accidentally triggered when performing the |
| 7777 Fever strategy, which requires you to kill at least Tentacle as the |
| battle begins; using Omnislash, one may kill both Tentacles setting up |
| the first part of the glitch. |
| |
| Two versions of Whirlsand exist; one used while it has its Tentacles un- |
| buried, and another use while they are buried. |
| While the damage output of Big Swing is prone to Split Damage, the Status |
| infliction chances are not subject to Split Damage. |
| Ruby Weapon, along with Emerald and Diamond Weapon are not present in the |
| JORG version. |
| You can learn Shadow Flare from Ruby if you wish; however, you would have |
| a much easier time learning it from Dragon Zombie in the North Crater. |
| Ruby Weapon will absorb the Hidden Element, and is the only enemy in the |
| game to do so. If you were to pair the Elemental Materia with any non- |
| element Materia (excluding other Support Materia and Restorative |
| Materia) such as HP Plus, then your Physical attacks would heal Ruby. |
| A function exists within the Counter Script to record the amount of damage |
| dealt via the Player; however, this value is never looked at and can be |
| considered to be dummied out. It is unknown what the intention for this |
| function should have been; however, it is likely that Whirlsand should |
| only been used a counter if a certain amount of HP had been dealt. |
| Ruby Weapon is immune to Seizure, which isn't necessary seeing as there is |
| no way for the Player to inflict an enemy with Seizure. Ruby Weapon is |
| one of 86 enemies that are immune to Seizure. It is also immune to |
| Peerless, along with 104 other enemies. |

Holy [-]	Small [-]	Manipulate [-]
Restorative [-]	Slow-numb [-]	Berserk [-]

MAPS:	APPEARANCE RATE:	LOOKALIKES:
Gold Saucer Area Desert		

Ruby's Tentacle's ATTACKS:	No Manipulate Attacks!

No Attacks or AI Script! All of the actions performed by the Tentacles are controlled via Ruby Weapon's AI Script.

Notes On Ruby's Tentacle:	POWER req for Overflow:

Ruby's Tentacles will never attack the Player by themselves; all of the attacks come from Ruby. The battle will end as soon as Ruby has been killed; you do not need to worry about killing the Tentacles.

	Base Damage Overflow: 172
	Rnd Var Overflow 3x: 115

As the battle begins the Tentacles will be invisible and non-targetable. Ruby will be impervious to all attacks until it buries its Tentacles, at which point the Tentacles will become 'active', and Ruby will occasionally use the Tentacles to attack the Player.

The (Player's) right Tentacle is Ruby's Tentacle [A], and will use <Right Thrust> and <Right Revenge> which targets your HP while inflicting you with Frog and Small. The (Player's) left Tentacle is Ruby's Tentacle [B], and will use <Left Thrust> and <Left Revenge> which targets your MP while inflicting you with Poison and Slow-numb.

<Right Thrust> will deplete 93.75% of your current HP, whereas <Right Revenge> will deplete 46.875% of your Current HP. <Left Thrust> will deplete 78.125% of your Current MP, Whereas <Left Revenge> will deplete 46.875% of your Current MP

When you attack Ruby it will have a 50/50 chance of countering with either Tentacle, selecting a target at random. It will use the 'Thrust' variant, which deals greater damage than the 'Revenge' variant.

Seeing as all four of Ruby's Tentacles attacks use the Punch Element, one can halve the damage from these %-Based attacks via the use of the Ziedrich. You will *not* be able to negate the damage by using Gravity defence, Back Row, Sadness, MBarrier, or any other damage-reducing buffs.

If you kill just one of the Tentacles you will cause Ruby to unbury both of them, reverting back to its original state, barring the fact that it will *not* regain Physical and Magical immunity. While Ruby is less of a threat in its 1st Stage, it will use Whirlsand as a counter to every attack until one character remains, so it is in your interest to keep the Tentacles alive (unless your plan is to just use one character).

The battle with Ruby is technically considered to be a Pincer Attack, which means you cannot escape the battle while one side remains. This means that you can only flee while Ruby's Tentacles are unburied; once it has reverting to its 2nd Stage you will not be able to flee the battle. You will also be unable to attack both the Tentacles and Ruby simultaneously.

| |
| As explained above in the notes on Ruby Weapon, a glitch can occur |
| preventing the battle from ending if you first kill both Tentacles |
| simultaneously, wait for Ruby to re-bury them, then just kill one |
| Tentacle; Ruby will then un-bury its Tentacles once more, and the battle |
| will soft-lock when you kill Ruby with no means to end the battle other |
| than by escaping, voiding you of the Battle Spoils. |
| There are three ways for a coder to adjust the AI Script to prevent this |
| from happening; the first is to follow suit with the way in which the |
| game handles most other enemies that should be instantly removed |
| following the death of the 'main' enemy (such as the Warning Board, or |
| some of the Turks battles). When Ruby is killed it will make it so the |
| remaining Tentacles are flagged to disable their AI Script (although non |
| exists anyway), and mark them as non-targetable. This is standard; |
| however, absent from the Death Counter script are two other functions |
| that should be used. The first is to set a flag which marks the enemy as |
| 'Inactive', and another which makes it so the the battle can end without |
| the need for that enemy to be killed. |
| The second fix for this error would be to make it so that Ruby will unbury |
| its Tentacles when *both* Tentacles have been killed, as opposed to just |
| one. This may look a little peculiar, given that a dead Tentacle should |
| not be able to attack you. This fix would require some additional script |
| to use alternative attacks in place of the attacks used by a Tentacle |
| with Death Status. |
| The final fix would be to run a continuously looping script in the |
| background as part of the Formation script; this is how the game deals |
| with the first Turks battle in Sector 7 to ensure that the Pyramids are |
| removed (and the battle will end) when Turks:Reno is killed. This may |
| slow the frame-rate down slightly, but would be the most discreet way of |
| fixing the error. |
| Ruby's Tentacle is immune to Seizure, which isn't necessary seeing as |
| there is no way for the Player to inflict an enemy with Seizure. Ruby's |
| Tentacle is one of 86 enemies that are immune to Seizure. It is also |
| immune to Peerless, along with 104 other enemies. |

{Extra Enemies}

¬¬¬

I have written a comprehensive guide on how to breed a stable full of maxed out Chocobos using RNG manipulation, without the need to race; visit the following link for more details:

https://thelifestream.net/forums/threads/guide-to-breeding-a-stable-of-maxed-out-chocobos.19965/

When you equip a Lv 1 Chocobo Lure Materia, your "Chocobo Lure Rating" increases to 8, and will continue to increase with the following Chocobo Lure Materia equipped:

- Chocobo Lure Rating 8 - Lv 1 Chocobo Lure
- Chocobo Lure Rating 12 - Lv 2 Chocobo Lure
- Chocobo Lure Rating 16 - Lv 3 Chocobo Lure / Mastered Chocobo Lure

- Chocobo Lure Rating 20 - Lv 2 + Lv 1 Chocobo Lure
- Chocobo Lure Rating 24 - Lv 3 + Lv 1 / Lv 2 + Lv 2 Chocobo Lure
- Chocobo Lure Rating 28 - Lv 3 + Lv 2 Chocobo Lure
- Chocobo Lure Rating 32 - Lv 3 + Lv 3 Chocobo Lure

You can also theoretically obtain a rating of 24, by equipping 3 x Lv 1 Chocobo Lures, although that would be impossible without the use of hacks, seeing as there are only two unique Chocobo Lure Materias in the game. The first one can be bought from Choco Billy, and the second one found on Disc 2 after obtaining the Highwind in the same location as the Choco/Mog Materia.

I'm not going to dive into the maths behind the way the Chocobo Lure Rating works, as it's rather long-winded. Just note that the higher the Formation ID of the Chocobo encounter, the higher the chance of receiving that encounter, although, the impact that Formation ID has on the Chocobo chance is minimal.

This chart has accurately worked out the chances of each Chocobo encounter:

	Rte 8	Rte 12	Rte 16	Rte 20	Rte 24	Rte 28	Rte 32
Grasslands	75.4%	100%	100%	100%	100%	100%	100%

Choc Enc #1 & #2 - Lv 33 "Wonderful" Choc Enc #3 & #4 - Lv 33 "Terrible"

	Rte 8	Rte 12	Rte 16	Rte 20	Rte 24	Rte 28	Rte 32
Mideel	25.8%	38.7%	51.6%	64.5%	77.3%	89.8%	100%
Choc Enc #1	5.9%	8.6%	11.3%	14.5%	17.2%	19.9%	22.7%
Choc Enc #2	5.5%	8.6%	11.3%	14.1%	16.8%	19.5%	22.7%

| Choc Enc #3 | 7.4% | 10.6% | 14.5% | 18.0% | 21.5% | 25.4% | 28.9% |
Choc Enc #4	7.0%	10.9%	14.5%	18.0%	21.9%	25.0%	25.8%
Choc Enc #1 & #2 - Lv 36 "Great" Choc Enc #3 & #4 - Lv 36 "Poor"

As you can see, the Grasslands and Junon Area both contain encounters that can become locked off once your Chocobo Lure Level becomes too high.

It is important to note that the Chocobo's "Rating" (Good, Bad etc.) is not stored on the Chocobo itself, but rather, on the encounter itself. As you can see above, the Lv 36 Chocobo is a 'Great' Chocobo in the first two encounters and a 'Poor' Chocobo in the second two.

- Rank 1 Wonderful Chocobo: Icicle Area Enc #1 & #2

- Rank 2 Great Chocobo: Rocket Pad Enc #1 & #2
  Mideel Enc #1 & #2

- Rank 3 Good Chocobo: Gold Saucer Enc #1 & #2

  Junon Enc #3 & #4

- Rank 8 Terrible Chocobo: Grasslands Enc #3 & #4
  Icicle Area Enc #3 & #4

As for the Chocobo themselves, a lot of the stats pertaining are identical for each Chocobo, namely the AI script and Attacks found on them.

In the spirit of not making this FAQ unnecessarily long, I shall first detail the general info found all Chocobos, followed by the individual Chocobo entries themselves.

Remember - The Chocobo chances worked out assume you to have a single Level 1 Chocobo Lure equipped (Chocobo Rating of 8).

| Follow-Up: Print Message [Chocobo "Wark! Wark!"]                          |
|            Use <Escape> on Self, remove from Battle, leave no rewards     |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Chocobos:                                                      |
|                                                                           |
| The opening message that reads "A Chocobo!" is handled via the Enemy's    |
|  that appear alongside the Chocobo, and not the Chocobo itself.           |
| The Chocobo will never leave any EXP, AP or gil, even if you successfully |
|  perform Damage Overflow against it. This is due to the fact that normal  |
|  death handling has been disabled for the Chocobo.                        |
| The Chocobuckle Enemy Skill can be learned from any Chocobo, not just     |
|  those susceptible to L4 Suicide. So long as the Chocobo has survived the |
|  Attack, has more than (1/32)+1 of its maximum HP left, AND has been fed  |
|  either a Sylkis or Mimett Green, then it will counter with Chocobuckle.  |
|  The only Attack available to the Player in the game that can do this     |
|  other than L4 Suicide is, ahem, Chocobuckle (damage is fixed based on qty |
|  of escapes).                                                             |
| The Chocobo's high Dexterity stat means that it will go through its turns |
|  much more quickly than normal the other actors.                          |
| Make sure to have the ATB set to "Wait" so that you will have the time to |
|  select the Greens in Battle.                                             |
| The script that exists on the Chocobo to capture the Chocobo (and display |
|  the message "Caught a Chocobo") is very rarely called upon, and only     |
|  exists as a safety net in case the default 'Chocobo-capturing' script    |
|  found on each enemy fails. The only instance in which the Chocobo makes  |
|  use of this safety net is during the Encounter with the Harpy + Lv 22 B  |
|  Chocobo.                                                                 |
| The Chocobos are immune to Seizure, which isn't necessary seeing as there |
|  is no way for the Player to inflict an Enemy with Seizure. The Chocobos  |
|  are 9 of 86 enemies that are immune to Seizure. They are also immune to  |
```

```
|  Peerless, along with 96 other enemies.                                    |
| There are two version of the animation <Escape>; one used while it is      |
|  feeding, and one used while in its normal idle state. There is also       |
|  another version of <Chocobo, goes nuts>, although this Attack is never    |
|  used (ID 35C).                                                            |
\                                                                            /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~o~~~~~~~~~~~~~~~~<|
|   Notes On Chocobo Lv 22 B:                   |   POWER req for Overflow:   |
|                                               |                             |
| <Chocobo, goes nuts> Base Damage: 21 HP       |  Base Damage Overflow: 150  |
|                                               |  Rnd Var Overflow  3x: 100  |
| When you encounter the Lv 22 B Chocobo        |  Rnd Var Overflow  4x:  75  |
|  alongside the Harpy, an error occurs with    |  Rnd Var Overflow  6x:  50  |
|  the Harpy's AI Script whereby it will ONLY   o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  end the battle instantly if the Harpy's HP                                 |
|  is below 25% (and the Chocobo is still alive). If you kill the Harpy       |
|  while its HP is above 25%, then you will have to wait for the Chocobo's    |
|  ATB gauge to fill up before the battle will end.                           |
| When this happens, the message printed well either be "Caught a Chocobo"    |
|  (this time playing out the script from the Chocobo itself, instead of      |
|  from the enemy as it normally would), or, if the 1/X Chance passes for     |
|  the Chocobo to escape the battle, then instead the "Chocobo "Wark!         |
|  Wark!"" message would appear as if were about to escape. You will still    |
|  capture the Chocobo if this happens.                                       |
\                                                                             /

|                                                         | Chocobo Lv 22 B |
|   Rank 2 "Good": 1st Row: 2x Spencer                    | Chocobo Lv 30   |
|         (3.91%)  2nd Row: 1x Chocobo Lv 29              | Chocobo Lv 33   |
|                                                         | Chocobo Lv 36   |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~o~~~~~~~~~~~~~~~~<|
|   Notes On Chocobo Lv 29:                     |   POWER req for Overflow:   |
|                                               |                             |
| <Chocobo, goes nuts> Base Damage: 24 HP       |  Base Damage Overflow: 150  |
|                                               |  Rnd Var Overflow  3x: 100  |
| Many players are under the false impression   |  Rnd Var Overflow  4x:  75  |
|  that the Lv 29 'Good' Chocobo can only be    |  Rnd Var Overflow  6x:  50  |
|  fought alongside the 2x Spencer, which only  o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  has a 3.91% chance of occurring (assuming a                                |
|  Lv 1 Chocobo Lure Materia).                                                |
```

```
| The Lv 29 'Good' Chocobo can actually be fought alongside the 2x Flapbeat  |
|  also, *so long* as the Chocobo is in the Front Row and the Flapbeat are   |
|  in the Back Row. This Encounter has a 4.30% chance of occurring, meaning  |
|  that you have an 8.21% chance of encountering the Good Chocobo on the     |
|  Gold Saucer tracks (assuming a Lv 1 Chocobo Lure).                        |
\                                                                            /

 '~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~'
```

```
 //>~~~~~~~~~~~~~~~~~~~~~~~<\\
 ||>    {MYSTERY NINJA}    <||
 \\>~~~~~~~~~~~~~~~~~~~~~~~<//
```

When you encounter the Mystery Ninja, the Enemy selected will be based on Cloud's Lv:

Cloud's Lv 1-20 - Yuffie Lv 17 (Formation IDs #268 & #269)
Cloud's Lv 21-25 - Yuffie Lv 22 (Formation IDs #270 & #271)
Cloud's Lv 26-30 - Yuffie Lv 27 (Formation IDs #272 & #273)
Cloud's Lv 31-35 - Yuffie Lv 32 (Formation IDs #274 & #275)
Cloud's Lv 36-40 - Yuffie Lv 37 (Formation IDs #276 & #277)
Cloud's Lv 40-99 - Yuffie Lv 42 (Formation IDs #278 & #279)

One of two Formation IDs are pulled based on the terrain you are traversing on; one with the Forest Battle Background, and one with the Jungle Battle Background.

Provided you have not already recruited Yuffie; the following chances of encountering the Mystery Ninja occur:

```
           Junon Forest - 12.5% Chance
         Gongaga Jungle -   25% Chance
           Nibel Forest -   25% Chance (Large Forest)
      Rocket Town Forest - 99.6% Chance (Small Forest)
        Woodlands Jungle -   50% Chance (Near Temple of The Ancients)
           Mideel Jungle -   50% Chance
    Goblin Island Forest -   50% Chance
     Round Island Forest -   50% Chance
```

Naturally, the Mystery Ninja encounter chances affect the chances of

receiving the Normal or Special Battles. If you are battling in Mideel Jungle, then you have a 50% chance of encountering the Mystery Ninja, and a 50% chance the other Battle checks plays out when a battle occurs.

This means that the average EXP/AP/Gil calculated for each area will be vastly different with the presence of the Mystery Ninja, and as such the averages have not considered the presence of the Mystery Ninja (or Chocobos for that matter).

The Mystery Ninja has six variants which all differ from each other. She uses Attacks which share the same name as some of the damaging items available; however, these Attacks are *not* the same as the thrown Items; her Attacks all conform to the regular Physical or Magical formula based on her Level and Strength/Magic values (plus subsequent checks). The Item formula only factors in Item Strength and Target's Def; see the "Damage Calculation" section in the introduction.

None of the Mystery Ninja's Attacks cost any MP, although the Mystery Ninja does have MP to use, which is pointless.

There is a glitch that can be exploited with Yuffie to increase her affection points to a maximum of 30 by the time you recruit her. Wait until you get to Rocket Town Forests (so that you have a 99% chance of encountering her), then purposely fail the last dialogue option.

Every time you give a correct response, her affection rating is increased by two, so you can raise it by +8 before failing the last option, rinse and repeat. Once her affection points reach 30, it will not exceed any further, so there is no need to do this more than twice. When you do fail the last option, she will steal 700 gil from you, although all that she has taken shall be returned to the Player once Yuffie is finally recruited.

Here are the following dialogue options you want to select to recruit Yuffie following the Battle:

```
  Option 2:  Not Interested
  Option 1:  ......petrified
  Option 2:  Wait a second!
  Option 1:  ......That's right
  Option 2:  ......Let's hurry on
```

So then, "let's hurry on"! Here are the six Mystery Ninja Enemies:

```

Goblin Island Forest	50%	

No Manipulate Attacks!

Mystery Ninja Lv 17's ATTACKS:

Attack 1: <Fight> [362] Physical
Target: One Opponent
Element: Cut
Att%: 95
Power: 16
Base Damage: 102 HP

Attack 2: <Fire Fang> [360] Physical
Target: All Opponents
Split Damage
Element: Fire
Att%: 95
Power: 16
Base Damage: 102 HP

Attack 3: <Spider Web> [35E] Physical 0 Dam
Target: One Opponent
Att%: 95
Status Inflict: Slow (100%)

Attack 4: <Impaler> [35F] Physical 0 Dam
Target: One Opponent
Att%: 95
Status Inflict: Frog (100%)

Attack 5: <Throw> [361] Physical 0 Dam
Target: Self
Att%: Auto Hit
Escapes From Battle

Mystery Ninja Lv 17's BATTLE PLAN: (Repeats)

SETUP: Disable default Death handling

OPENING ATTACK: Use <Fire Fang> on All Targets

THEREAFTER: 1/2 Chance use <Fight> on Rnd Target

1/4 Chance use <Fire Fang> on All Targets

1/8 Chance use <Spider Web> on Rnd Target without Slow; If All Targets have Slow, use <Fire Fang> on All Targets

1/8 Chance use <Impaler> on Rnd Target Without Frog; If All Targets have Frog, use <Fire Fang> on All Targets
After 10 turns if Mystery Ninja Lv 17 has not been killed, use <Throw> on Self for 11th turn, cure Self of Sleep, Poison, Confusion, Silence, Haste, Slow, Stop, Frog, Small, Slow-numb, Petrify, Regen, D.Sentence, Manipulate, Berserk & Paralyzed. Remove Self from Battle, leave no rewards, end Battle
DEATH: Set GlobalVar [Yuffie's Starting Level] to 17

Notes On Mystery Ninja Lv 17:	POWER req for Overflow:
Mystery Ninja Lv 17 will not play any death animation once she has been killed.	Base Damage Overflow: 155 Rnd Var Overflow 3x: 104
You will only encounter the Lv 17 Mystery Ninja if Cloud is Lv 20 or lower.	
If you encounter the Mystery Ninja Lv 17 early on then she could inflict you with Frog with no way to cure yourself. Always have Magical spells available.	
The Mystery Ninja Lv 17's AI Script is identical to the Lv 22 Mystery Ninja.	
The Mystery Ninja Lv 17 is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an Enemy with Seizure. The Mystery Ninja Lv 17 is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.	
The Mystery Ninja cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

OPENING ATTACK: Use <Fire Veil> on All Targets

THEREAFTER: 1/8 Chance use <Fire Veil> on All Targets

1/8 Chance use <Leviathan Scales> on All Targets

1/8 Chance use <Swift Bolt> on All Targets

1/8 Chance use <Swift Bolt> on Rnd Target

1/4 Chance use <Fight> on Rnd Target

1/4 Chance use <Spider Web> on Rnd Target without Slow; If All Targets have Slow, use <Fight> on Rnd Target

After 10 turns if Mystery Ninja Lv 37 has not been killed, use <Throw> on Self for 11th turn, cure Self of Sleep, Poison, Confusion, Silence, Haste, Slow, Stop, Frog, Small, Slow-numb, Petrify, Regen, D.Sentence, Manipulate, Berserk & Paralyzed.
Remove Self from Battle, leave no rewards, end Battle

DEATH: Set GlobalVar [Yuffie's Starting Level] to 37

Notes On Mystery Ninja Lv 37:

Mystery Ninja Lv 37 will not play any death animation once she has been killed.

You will only encounter the Lv 37 Mystery Ninja if Cloud is Lv 40 or lower.

The Mystery Ninja Lv 37 will frequently attack all Players, so keep an eye on your HP. At this Level the Mystery Ninja becomes a small threat, but you should still be able to kill her with a few blasts of your strongest magic.

POWER req for Overflow:

Base Damage Overflow: 163
Rnd Var Overflow 3x: 109

| The Mystery Ninja Lv 37's AI Script is identical to the Lv 27, 32 and 42 Mystery Ninja.
| The Mystery Ninja Lv 37 is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an Enemy with Seizure. The Mystery Ninja Lv 37 is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.
| The Mystery Ninja cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

| The Mystery Ninja cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage. |

{TEST ENEMIES}

There are nine enemies in the game used for testing purposes only. These are all the same model as the Pyramid seen in the first Turks:Reno Battle in Sector 7, however, in the JORG version these enemies shared the same design as some of the real enemies:

- êúô0(äñ) - Guard Hound (found on Corel Well in JORG version)
- êúô1() - Grunt
- êúô2(ñ) - Deenglow
- êúô4(ëöù) - Boundfat
- êúô5(áñô) - Serpent
- êúô6(ñâ) - Adamantaimai
- êúô7(úñA) - Grosspanzer-Big
- êúô8(úñB) - Grosspanzer-Mobile
- êúô9(úñC) - Grosspanzer-Small

In addition to the battle models using a different design, the default Test Area Battle Background was different in the JORG version, also. In the regular versions, the test area is an entirely black background, whereas the JORG version has an orange sunset Battleground with the Shinra logo on the floor.

First off, let's look at the Formations in which the test enemies appear. It's worth pointing out that a few battles in the game make use of the "Next Battle" flag, which indicates that the Battle won't end once you've killed all the enemies, and instead move onto another Battle. The game uses this flag on two occasions; once during the Hundred/Heli Gunner Battle, and once during the Hojo/Helletic/Lifeform Hojo Battles.

There are a few test Formations that make use of the same "Next Battle" flag, but for some reason, the battle will not jump to the next Formation ID as intended. Instead, the battle remains active with no enemies to target, and without the ability to use your characters or to escape the Battle.

DEBUG TEST AREA BACKGROUND:

Test Encounter #1	EXP - 1000	1st Row: 1x êúô0(äñ)	#0
	AP - 100		#2
	GIL - 10,000		#23
Test Encounter #2	EXP - 500,000	1st Row: 2x êúô2(ñ)	
	AP - 10,000	2nd Row: 2x êúô2(ñ)	#10

```
|                      GIL - 500,000   3rd Row: 1x êúô2(ñ)              #999 |
|                                                                             |

```

REACTOR 5 BACKGROUND:

```
.-----------------------------------------------------------------------------.
|   Test Encounter #1  EXP - 4320      1st Row: 3x Adamantaimai               |
```

```
|                      AP  - 600       2nd Row: 3x Adamantaimai              |
|                      GIL - 12,000                                    #27   |
'----------------------------------------------------------------------------'
```

So, as you can see, there are more test formations that just the ones with the test enemies. Note that the "Blank" Background looks precisely like the Debug Test Area, but is a unique background within itself.

There are a lot more unused test Formations contained within the scene.bin than I have listed; the above list cites the main test formations. The unused formations in the JORG scene.bin differ quite drastically from the International versions.

So, now for the Enemy listings for the nine test enemies. Note that all of these test enemies have a Back Damage modifier of 255, which means your Back Attack dame will be multiplied by: Damage = (Damage * 255) / 8.
This is equivalent to 31.875x normal Damage!

Because of this, if you were to encounter one of the Test Enemies via a Pre-Emptive Strike or Side Attack, then the following damage multipliers can take effect (to cause Random Variation Overflow):

- 3 x Damage - Berserk & Critical
- 31.875 x Damage - Back Attack
- 47.8125 x Damage - Back Attack & Berserk
- 63.75 x Damage - Back Attack & Critical
- 95.625 x Damage - Back Attack & Critical & Berserk

This means you can overflow with an incredibly low Power value. The damage multiplier is so high that a normal Attack with a Power value of 16 (+ 4 Hero Drinks) will likely have sent the value through its positive-to-negative-to-positive stages multiple times.

With most of the enemies, you should be able to cause random variation *without* any Hero Drinks using a basic Attack with 16 Power and using Back Damage, Critical and Berserk (sometimes Berserk won't be necessary depending on the Def value).

All of the enemies have the same Attacks, excluding êúô2(ñ) which also has Cure3 and Bolt3. Also, the final four enemies all have the same stats barring Dexterity. They are all vulnerable to Berserk but have no designated Berserk Attack.

êúô0(äñ)'s BATTLE PLAN: (Repeats)

Formation ID is [#000]: (Test Encounter #1 on Debug Test Area Background)

1ST ATTACK: Print Message [ENCOUNT ERROR]
2ND ATTACK: Print Message [If you found this message]
Print Message [then please call staff]

Formation ID is NOT [#000]:

Do nothing

COUNTER: [All Physical and Magical Attacks]

1/8 Chance: Print Message [monster"Not a probrem"]
1/8 Chance: Print Message [monster"I'm sorry"]
3/4 Chance: Print Message [monster"That's too bad"]

Notes On êúô0(äñ):

In the JORG version the êúô0(äñ) takes the form of the Guard Hound; in all subsequent releases it takes the form of the Pyramid.

POWER req for Overflow:

Base Damage Overflow: 144
Rnd Var OF 3x: 96
Rnd Var OF 31.875 x: 9

```
| There are 15 different Formations in which   |  Rnd Var OF 47.8125 x:   6  |
|  the êúô0(äñ) appears in, three of which     |  Rnd Var OF   63.75 x:   5  |
|  are identical to Formation #000. You will   |  Rnd Var OF  95.625 x:   3  |
|  only see the ENCOUNTER ERROR message if the o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Formation ID# is #000. This was likely to                                 |
|  have been placed there as a safeguard in case they had accidentally left  |
|  a formation ID with a value of 0, instead of clearing the entry.          |
| The Formation ID for the 4x êúô0(äñ) found in the well in Coral Prison      |
|  is #001 (not #000).                                                       |
| The êúô0(äñ)'s high Dexterity means that you will see the encounter error   |
|  message without pause.                                                    |
| The êúô0(äñ) has no death animation.                                        |
| All thirteen attacks for êúô0(äñ) are identical barring the names           |
|  themselves, and are never used.                                           |
| The Back Damage modifier for êúô0(äñ) is 255, which means your back-        |
|  attacks will hit for 31.875x normal damage, which allows for ridiculously |
|  low Power values to overflow against it.                                  |
\                                                                            /

No Manipulate Attacks!

êúô2(ñ)'s BATTLE PLAN: (Repeats)

DEATH:

êúô2(ñ) is 5th Enemy ("êúô2(ñ) E") AND all other enemies still alive:

Use Bolt3 on All Allies

Notes On êúô2(ñ):

In the JORG version the êúô2(ñ) takes the from of the Deenglow; in all subsequent releases it takes the form of the Pyramid. There are 7 different Formations in which the êúô1() appears in; 2 in the Debug Test Area, 1 in the Train Graveyard, 1 in the Sister Ray Base and 3 in "Blank". Only one Encounter contains enough enemies to trigger the Death script, and this is Test Encounter #2 on the Debug Test Area Background. This 5x êúô2(ñ) Formation is the infamous "999"

POWER req for Overflow:

Base Damage Overflow:	146
Rnd Var OF	3x: 98
Rnd Var OF 31.875	x: 10
Rnd Var OF 47.8125	x: 7
Rnd Var OF 63.75	x: 5
Rnd Var OF 95.625	x: 4

```
|  Battle (Formation ID), and can be accessed from the Debug Room. This      |
|  Formation was used to quickly boost the developer's EXP AP and gil        |
|  amounts tremendously. One will also gain 5x Turbo Ethers from this        |
|  battle.                                                                   |
| It was programmed so that one could quickly end the Battle by killing the  |
|  Back Row êúô2(ñ) E, this way it will cast Bolt3 on all of its Allies. The |
|  Bolt2 animation will not play out, however; instead the êúô2(ñ) will use  |
|  a disappearing animation.                                                 |
| The êúô2(ñ) has no normal death animation (unless you use kill the êúô2(ñ) |
|  "E" to rigger the custom Bolt3 death animation).                          |
| All of the "i" Attacks for êúô2(ñ) are identical barring the names         |
|  themselves, and are never used.                                           |
| The Back Damage modifier for êúô2(ñ) is 255, which means your back-attacks |
|  will hit for 31.875x normal damage, which allows for ridiculously  low    |
|  Power values to overflow against it.                                      |
\                                                                            /

êúô6(ñâ)'s BATTLE PLAN: (Repeats)

No AI Script exists for êúô6(ñâ).

Notes On êúô6(ñâ):

In the JORG version the êúô6(ñâ) takes the from of the Adamantaimai; in all subsequent releases it takes the form of the Pyramid.

The êúô6(ñâ) appears in three Formations; 1 in the Forest, 1 on the Dirt Wasteland and one on the Snow Background.

The êúô6(ñâ) has no death animation.

All thirteen attacks for êúô6(ñâ) are identical barring the names themselves.

The Back Damage modifier for êúô6(ñâ) is 255, which means your back-attacks will hit for 31.875x normal damage, which allows for ridiculously low Power values to overflow against it.

POWER req for Overflow:

Base Damage Overflow:	156
Rnd Var OF 3x:	104
Rnd Var OF 31.875 x:	10
Rnd Var OF 47.8125 x:	7
Rnd Var OF 63.75 x:	5
Rnd Var OF 95.625 x:	4

```

```
 //>~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
 ||>    {ENEMY COUNTERPARTS}    <||
 \\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~</\\
```

There are fifteen enemies in the game that exist purely for aesthetic purposes. These enemies can never be killed or targeted; they never leave any rewards and are used when an enemy has more than one part that can separate from the main body.

Eight of these fifteen enemies have not been given a designated name, and as such, they have been listed as [No Name]. The entries in the game's core file are blank for these names.

- [No Name] 1 - Hammer Blaster Base
- [No Name] 2 - Helicopter in Rufus Battle
- [No Name] 3 - Mu Base
- [No Name] 4 - Helicopter in Palmer Battle
- [No Name] 5 - Truck in Palmer Battle

- [No Name] 6 - Trickplay Base
- [No Name] 7 - Magnade Left Shield
- [No Name] 8 - Magnade Right Shield

The final seven 'Counterpart' enemies have been given names, and exist in the same fashion that the 'No Named' enemies; for aesthetic purposes only:

- Chain   - Ghirofelgo's Chain
- Ying/Yang   - Base for Ying and Yang
- Pedestal   - Roulette Cannon Base
- Guardian(Right) - Guardian's right 'mace'
- Guardian(Left) - Guardian's left 'mace'
- Manhole(Lid)   - Lid for the Manhole
- Leg   - Emerald Weapon's Leg

NO NAMED COUNTERPART ENEMIES:

None of these enemies has any Attacks on them, nor do they have any AI Script to play out. [No Name] 3 is the only No Name Enemy that has EXP AP and gil; these will not be earned.

[No Name] 7 and [No Name] 8 are both immune to Seizure, along with 84 other enemies. They are also both immune to Peerless, along with 103 other enemies.

NAMED COUNTERPART ENEMIES:

None of these enemies has any Attacks on them, nor do they have any AI Script to play out. They purely exist aesthetically, and can never be targeted or killed. None of the EXP/AP/Gil can be earned for these enemies.

The Leg, Guardian(Right) and Guardian(Left) are three of 86 enemies immune to Seizure, three of 105 enemies immune to Peerless, and the Leg is one of 15 enemies immune to Regen.

 //>~~~~~~~~~~~~~~~~~~~~<\\
 ||>    {PARTY DATA}    <||
 \\>~~~~~~~~~~~~~~~~~~~~</\\
```

While I was digging around the various data files needed to compile this FAQ, I accidentally stumbled across the AI Script for the playable characters, which made me decide to include this section.

As I'm sure all of you are aware, some of the decisions you make while playing on Disc 1 will affect the outcome of the date sequence just after obtaining the Tiny Bronco. What isn't commonly known is the fact there is also a separate, isolated 'Battle Love Point' count that records specific actions mid-battle.

These functions have been dummied out, and do not contribute to the overall score for the standard dating mechanics. The script, however, was not removed from the characters, and the Battle Love Point count will continue to increment, even following the date sequence!

The following actions will affect the dummied out Battle Love Points:

- Cloud has revived Aeris, Tifa, Yuffie or Barret:
  +4 Battle Love Points capped at 200 maximum

- Cloud covers Aeris, Tifa, Yuffie, or Barret (using the Cover Materia):

+3 Battle Love Points capped at 200 maximum

- Cloud has cured Aeris, Tifa, Yuffie or Barret:
  +2 Battle Love Points capped at 200 maximum

- Cloud has damaged (but not killed) Aeris, Tifa, Yuffie or Barret:
  -2 Battle Love Points capped at 50 minimum

- Cloud has killed Aeris, Tifa, Yuffie or Barret:
  -4 Battle Love Points capped at 50 minimum

- Aeris, Tifa, Yuffie, or/and Barret are dead at the end of the battle:
  -5 Battle Love Points capped at 50 minimum

The AI Script for Tifa, Yuffie and Barret all share the same unique function, which is to link their AI Script to Character #13; Aeris. Of the four dateable characters, only Aeris contains the script the adjust the Battle Love Points; the other three will imitate the script found on Aeris.

All of the characters you recruit will start in the Front Row, excluding Aeris who begins in the Back Row.

The starting Lv of most characters will be based on the average Level of all characters that you have recruited thus far. If you recruit Vincent after Aeris has left the party, her Lv *not* will contribute to the overall average Lv.

```
     Cloud - Starts at Lv 6
    Barret - Starts at [Average Overall Lv] - 1
      Tifa - Starts at [Average Overall Lv] - 2
     Aeris - Starts at [Average Overall Lv] - 3
  Red XIII - Starts at [Average Overall Lv] + 2
    Yuffie - Starts at GlobalVar [Yuffie's Starting Level]
 Cait Sith - Starts at [Average Overall Lv]
   Vincent - Starts at [Average Overall Lv] + 3
       Cid - Starts at [Average Overall Lv] + 3
```

Yuffie's starting Lv is based on Cloud's Lv; see the 'Mystery Ninja' section above for details on Yuffie's starting Lv.

2,420,933 EXP is needed for Cloud, Barret, Yuffie and Cid to reach Lv 99
2,452,783 EXP is needed for Tifa, Red, Cait Sith and Vincent to reach Lv 99
2,484,643 EXP is needed for Aeris to reach Lv 99

Each character will start with the following equipment:

	Weapon	Armour	Materia
Cloud	Buster Sword	Bronze Bangle	Lightning, Ice
Barret	Gatling Gun	Bronze Bangle	/
Tifa	Leather Glove	Bronze Bangle	/
Aeris	Guard Stick	Bronze Bangle	/
Red XIII	Mythril Clip	Mythril Armlet	Fire, All, Sense
Yuffie	4-point Shuriken	Carbon Bangle	Throw
Cait Sith	Yellow M-phone	Silver Armlet	Manipulate, Transform
Vincent	Quicksilver	Silver Armlet	/
Cid	Spear	Gold Armlet	/

```
 Young Cl  - Buster Sword       Iron Bangle      Pre-Emptive
 Sephiroth - Masamune           Gold Armlet      Revive, Restore, Earth+All,
                                                 Fire, Ice+All, Lightning+All
```

None of the characters will have any Accessories on them when you recruit them. Only Young Cloud and Sephiroth have Accessories; Young Cloud will have the Power Wrist, and Sephiroth will have the Touph Ring equipped.

Young Cloud also has the Pre-Emptive Materia equipped. I do not wish to spoil anything, but the Power Wrist combined with the Pre-Emptive Materia is how Young Cloud is able to [do the things that he did] during the Disc 2 flashbacks.

It's worth noting that Cait Sith shares the same character slot as Young Cloud. If you were to enable the use of equipment during the flashback via hacks, then you would find that Young Cloud will accept Cait Sith's Weapons. The same applies to Vincent and Sephiroth (Vincent can equip the Masamune, although he cannot use it).

It is also worth noting that the character's stats as described below will be slightly different if playing on the earlier PSX versions of the game; namely, MDefence. As mentioned before in this FAQ, the MDefence is locked to the value of the Spirit stat in the earlier versions, and the Armor's MDefence value is ignored.

|                                Capped at 50                               |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Cloud:                                                         |
|                                                                           |
| When the game opens Cloud will automatically be in the Front Row.         |
| There are two Battle Models for Cloud; the standard model you will see    |
|  throughout the game, and another, high-resolution model used for the     |
|  final battle with Sephiroth only.                                        |
| Cloud's initial base stats as described above are instantly modified due  |
|  to the two pieces of Magical Materia equipped. The Buster Sword will also |
|  increase Cloud's Magic by 2. Here are Cloud's 'actual' starting stats:   |
|                                                                           |
|    Strength: 18             Attack: 36          Max HP: 302               |
|    Vitality: 12            Attack%: 96          Max MP:  56               |
|       Magic: 23            Defense: 20                                    |
|      Spirit: 17           Defense%:  1          Attack Base Damage:       |
```

```
|   Dexterity:  6          Magic atk: 23           42 HP                  |
|        Luck: 14          Magic def: 17          Fire/Ice Base Damage:   |
|                         Magic def%:  0           87 HP                  |
|                                                                         |
| Cloud will begin the game with 610 EXP, and will need 6 EXP to level up.|
|  This will be gained during the first automated battle on the opening   |
|  screen. A bug means that the EXP needed will incorrectly state that 35 |
|  EXP is needed in the 'Status' menu; this will auto-correct itself after|
|  the first battle.                                                      |
| Cloud needs 2,420,933 EXP to reach Lv 99, along with Barret, Yuffie and |
|  Cid.                                                                   |
\                                                                         /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Barret:                                                           |
|                                                                              |
| When Barret is recruited he will automatically be in the Front Row.          |
| Barret will be assigned the above stats at the start of the game; however,   |
|  once Barret has been recruited his stats will be adjusted to the range      |
|  of stats for his level, which will be one lower than the average level of   |
|  all recruited characters.                                                   |
| It is probable that Cloud will be Lv 7 when Barret is recruited, which       |
|  means that Barret will likely be Lv 6. Here is the range of starting        |
|  stats for a Lv 6 Barret with the Gatling Gun and Bronze Bangle equipped:    |
|                                                                              |
|    Strength: 16 - 21         Attack: 30 - 35      Max HP: 313 - 334          |
|    Vitality: 15 - 22        Attack%: 97           Max MP:  41 - 44           |
|       Magic: 13 - 19        Defense: 23 - 30                                 |
|      Spirit: 11 - 17       Defense%:  1 - 2       Attack Base Damage:        |
|   Dexterity:  6 - 11      Magic atk: 13 - 19       35 - 41 HP                |
|        Luck: 13 - 19      Magic def: 11 - 17                                 |
|                          Magic def%:  0                                      |
|                                                                              |
| Barret needs 2,420,933 EXP to reach Lv 99, along with Cloud, Yuffie and      |
|  Cid.                                                                        |
\                                                                              /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Tifa:                                                             |
|                                                                              |
| When Tifa is recruited she will automatically be in the Front Row.           |
| Tifa will be assigned the above stats at the start of the game; however,     |
|  once Tifa has been recruited her stats will be adjusted to the range of     |
|  stats for her level, which will be two lower than the average level of      |
|  all recruited characters.                                                   |
| It is probable that Cloud will be Lv 8 and Barret will be Lv 7 when Tifa     |
|  is recruited, which means that Tifa will likely be Lv 5. Here is the        |
|  range of starting stats for a Lv 5 Tifa with the Leather Glove and Bronze   |
|  Bangle equipped:                                                            |
|                                                                              |
|    Strength: 12 - 18         Attack: 25 - 31      Max HP: 279 - 296          |
|    Vitality: 12 - 18        Attack%: 99           Max MP:  38 - 40           |
|       Magic: 12 - 18        Defense: 20 - 26                                 |
|      Spirit: 11 - 17       Defense%:  2 - 3       Attack Base Damage:        |
|   Dexterity:  8 - 13      Magic atk: 12 - 18       25 - 35 HP               |
|        Luck: 14 - 19      Magic def: 11 - 17                                |
|                          Magic def%:  0           Crit%: 2                   |
|                                                                              |
| Tifa needs 2,452,783 EXP to reach Lv 99, along with Red XIII, Cait Sith      |
|  and Vincent.                                                                |
\                                                                              /

|  No AI Script exists for Red XIII                                          |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Red XIII:                                                       |
|                                                                            |
| When Red XIII is recruited he will automatically be in the Front Row.      |
| Red XIII will be assigned the above stats at the start of the game;        |
|  however, once Red has been recruited his stats will be adjusted to the    |
|  range of stats for his level, which will be two greater than the average  |
|  level of all recruited characters.                                        |
| It is probable that your average Lv will be 11 when Red XIII is recruited, |
|  which means that Red will likely be Lv 13. Here is the range of starting  |
|  stats for a Lv 13 Red with the Mythril Clip and Mythril Armlet equipped   |
|  (note that the Mythril Clip will boost Red XIII's Magic by 6, and the     |
|  Fire Materia will further modify Red's stats which the below figures      |
|  reflect):                                                                 |
|                                                                            |
|    Strength: 19 - 26         Attack: 43 - 50      Max HP: 502 - 538        |
|    Vitality: 20 - 28        Attack%: 100          Max MP:  87 - 93         |
|       Magic: 26 - 32        Defense: 38 - 46                               |
|      Spirit: 19 - 26       Defense%:  7 - 9       Attack Base Damage:      |
|   Dexterity: 17 - 24      Magic atk: 26 - 32       60 - 70 HP              |
|        Luck: 14 - 20      Magic def: 27 - 34      Fire Base Damage:        |
|                          Magic def%:  0            117 - 135 HP            |
|                                                                            |
| Red XIII needs 2,452,783 EXP to reach Lv 99, along with Tifa, Cait Sith    |
|  and Vincent.                                                              |
\                                                                            /

|   Notes On Yuffie:                                                         |
|                                                                            |
| When Yuffie is recruited she will automatically be in the Front Row.       |
| Yuffie will be assigned the above stats at the start of the game; however, |
|  once Yuffie has been recruited her stats will be adjusted to the range of |
|  stats for her level, which will be set according to Cloud's Lv at the     |
|  time of recruiting her:                                                   |
|                                                                            |
|   Cloud's Lv  1-20 - Yuffie Lv 17                                          |
|   Cloud's Lv 21-25 - Yuffie Lv 22                                          |
|   Cloud's Lv 26-30 - Yuffie Lv 27                                          |
|   Cloud's Lv 31-35 - Yuffie Lv 32                                          |
|   Cloud's Lv 36-40 - Yuffie Lv 37                                          |
|   Cloud's Lv 40-99 - Yuffie Lv 42                                          |
```

It is probable that Yuffie will be Lv 17 if you recruit her as early as possible. Here is the range of starting stats for a Lv 17 Yuffie with the 4-point Shuriken and the Carbon Bangle equipped (note that the 4-point Shuriken will boost Yuffie's Magic by 6, and the throw Materia will boost her Vitality by 1, which the below figures reflect):

Strength: 24 - 31	Attack: 47 - 54	Max HP: 594 - 631
Vitality: 22 - 29	Attack%: 100	Max MP: 113 - 120
Magic: 31 - 39	Defense: 49 - 56	
Spirit: 23 - 31	Defense%: 7 - 9	Attack Base Damage:
Dexterity: 19 - 27	Magic atk: 31 - 39	95 - 110 HP
Luck: 16 - 22	Magic def: 37 - 45	
	Magic def%: 0	

Yuffie needs 2,420,933 EXP to reach Lv 99, along with Barret, Cloud and Cid.
Yuffie can be recruited in one of several locations:

Junon Forest	12.5% Chance	
Gongaga Jungle	25% Chance	
Nibel Forest	25% Chance	(Large Forest)
Rocket Town Forest	99.6% Chance	(Small Forest)
Woodlands Jungle	50% Chance	(Near Temple of The Ancients)
Mideel Jungle	50% Chance	
Goblin Island Forest	50% Chance	
Round Island Forest	50% Chance	

To recruit Yuffie you must choose the following dialogue options:

Option 2: Not Interested
Option 1: ......petrified
Option 2: Wait a second!
Option 1: ......That's right
Option 2: ......Let's hurry on

{Cait Sith}

|  No AI Script exists for Cait Sith                                         |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Cait Sith:                                                      |
|                                                                            |
| When Cait Sith is recruited he will automatically be in the Front Row.     |
| The character slot for Cait Sith is also used by Young Cloud during the    |
|  Kalm Flashback. At the beginning of the game Cait Sith's slot will be     |
|  assigned to all of Young Cloud's starting data until after the Flashback, |
|  at which point his stats will revert to the above stats for Cait Sith.    |
| When you recruit Cait Sith his stats will be adjusted to the range of      |
|  stats for his level, which equal to the average level of all recruited    |
|  characters.                                                               |
| It is probable that your average Lv will be 18 when Cait Sith is           |
|  recruited, which means that Cait will likely be Lv 19. Here is the range  |
|  of starting stats for a Lv 19 Cait Sith with the Yellow M-phone and       |
|  Silver Armlet equipped (note that the Yellow M-phone will boost Cait      |
|  Sith's Magic by 6, and the Transform Materia will further modify Cait's   |
|  stats which the below figures reflect):                                   |
|                                                                            |
|    Strength: 23 - 30         Attack: 59 - 66      Max HP: 819 - 875        |
|    Vitality: 23 - 31        Attack%: 100          Max MP: 134 - 143        |
|       Magic: 34 - 41        Defense: 57 - 65                               |
|      Spirit: 28 - 35       Defense%:  7 - 9       Attack Base Damage:      |
|   Dexterity: 15 - 22      Magic atk: 34 - 41       129 - 144 HP            |
|        Luck: 15 - 21      Magic def: 50 - 57                               |

|                                                                              |
|    7/10 Chance: Use Berserk Dance on Rnd Target                              |
|    3/10 Chance: Use Beast Flare on All Targets                               |
|                                                                              |
|   Limit Break Lv 2: (Death Gigas)                                            |
|                                                                              |
|    7/10 Chance: Use Gigadunk on Rnd Target                                   |
|    3/10 Chance: Use Livewire on All Targets                                  |
|                                                                              |
|   Limit Break Lv 3: (Hellmasker)                                             |
|                                                                              |
|    7/10 Chance: Use Splattercombo on 5 Rnd Targets                           |
|    3/10 Chance: Use Nightmare on Rnd Target                                  |
|                                                                              |
|   Limit Break Lv 4: (Chaos)                                                  |
|                                                                              |
|    7/10 Chance: Use Chaos Saber on All Targets                               |
|    3/10 Chance: Use Satan Slam on All Target                                 |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Vincent:                                                          |
|                                                                              |
| When Vincent is recruited he will automatically be in the Front Row.         |
| The character slot for Vincent is also used by Sephiroth during the Kalm     |
|  Flashback. At the beginning of the game Vincent's slot will be assigned     |
|  to all of Sephiroth's starting data until after the Flashback, at which     |
|  point his stats will revert to the above stats for Vincent.                 |
| When you recruit Vincent his stats will be adjusted to the range of stats    |
|  for his level, which three greater than the average level of all            |
|  recruited characters. If you recruit Vincent *after* Aeris leaves your      |
|  Party, her Lv will not contribute towards the average level.                |
| It is probable that your average Lv will be 24 when Vincent is recruited,    |
|  which means that Vincent will likely be Lv 27. Here is the range of         |
|  starting stats for a Lv 27 Vincent with the Quicksilver and Silver Armlet   |
|  equipped (note that the Quicksilver will boost Vincent's Magic by 10,       |
|  which the below figures reflect):                                           |
|                                                                              |
|    Strength: 33 - 41         Attack: 71 - 79      Max HP: 1140 - 1212        |
|    Vitality: 33 - 40        Attack%: 110          Max MP: 205 - 216          |
|       Magic: 49 - 56        Defense: 67 - 74                                 |
|      Spirit: 38 - 45       Defense%:  9 - 11      Attack Base Damage:        |
|   Dexterity: 21 - 28      Magic atk: 49 - 56       248 - 277 HP             |
|        Luck: 14 - 21      Magic def: 60 - 67                                 |
|                          Magic def%:  0                                      |
|                                                                              |
| Vincent needs 2,452,783 EXP to reach Lv 99, along with Tifa, Red XIII and    |
|  and Cait Sith.                                                              |
| To recruit Vincent you must reach the Shinra Mansion following the Cosmo     |
|  Canyon events, then input the following combination into the safe on the    |
```

```
|  2nd Floor Wester Wing:                                                      |
|                                                                              |
|    Right 36     Left 10     Right 59     Right 97                           |
\                                                                              /

|  No AI Script exists for Cid                                                 |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Cid:                                                              |
|                                                                              |
| When Cid is recruited he will automatically be in the Front Row.             |
| Cid will be assigned the above stats at the start of the game; however,      |
|  once Cid has been recruited his stats will be adjusted to the range of      |
|  stats for his level, which will be three greater than the average level     |
|  of all recruited characters.                                                |
| It is probable that your average Lv will be 28 when Cid is recruited,        |
|  which means that Cid will likely be Lv 31. Here is the range of starting    |
|  stats for a Lv 31 Cid with the Spear and Gold Armlet equipped (note that    |
|  the Spear will boost Cid's Magic by 8, which the below figures reflect):    |
|                                                                              |
|    Strength: 43 - 49         Attack: 87 - 93      Max HP: 1529 - 1630        |
|    Vitality: 47 - 54        Attack%: 97           Max MP:  218 - 232         |
|       Magic: 47 - 54        Defense: 93 - 100                                |
|      Spirit: 43 - 50       Defense%: 10 - 11      Attack Base Damage:        |
|   Dexterity: 24 - 31      Magic atk: 47 - 54       339 - 363 HP             |
|        Luck: 14 - 21      Magic def: 71 - 78                                |
|                          Magic def%:  0                                      |
|                                                                              |
| Cid needs 2,420,933 EXP to reach Lv 99, along with Cloud, Yuffie and         |
|  Barret.                                                                     |
\                                                                              /

|   Young Cloud's Background AI Script:                                       |
|                                                                             |
|  No AI Script exists for Young Cloud                                        |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Young Cloud:                                                     |
|                                                                             |
| The Pre-Emptive Materia that Cloud has can not be removed, nor can his      |
|  other equipment. The Pre-Emptive starts with 0 AP and will not gain any    |
|  AP during the flashback; once the Flashback has finished, you will lose    |
|  all of Young Cloud's equipment.                                            |
| Young Cloud uses the same character slot as Cait Sith; at the start of the |
|  game Cait Sith's clot will be filled using the stats for Young Cloud as    |
|  above, then revert to Cait Sith's starting stats after the flashback       |
|  sequence.                                                                  |
| The Power Wrist will increase Young Cloud's Strength by 10, the Buster      |
|  Sword will increase his Magic by 2, and the Pre-Emptive Materia will       |
|  increase his Dexterity by 2, which means Young Cloud's actual stats will   |
|  be as follows:                                                             |
|                                                                             |
|    Strength: 22              Attack: 40           Max HP: 140               |
|    Vitality: 12             Attack%: 96           Max MP:   4               |
|       Magic: 13             Defense: 22                                     |
|      Spirit: 10            Defense%:  2           Attack Base Damage:       |
|   Dexterity: 8            Magic atk: 13            41 HP                    |
|        Luck: 5            Magic def: 12                                     |
|                          Magic def%:  0                                     |
|                                                                             |
| The minimum a character's Max MP can be is 10, so even though Young         |
|  Cloud's starting MP is 4, it will automatically be adjusted to 10.         |
| Young Cloud cannot gain any EXP, but if he were able to then he would       |
|  require 860,038 EXP to reach Lv 99.                                        |
\                                                                             /

| - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - |
|   Sephiroth's Background AI Script:                                       |
|                                                                           |
```

NOTE - Sephiroth's AI Script will check to see if there is only one enemy alive. This is a check to see if the encounter is with either the Dragon or the Zuu; however, there are no encounters in the Kalm Flashback that contain the Zuu. Because of this, Fire3 will never be used.

SETUP: Enable AI Script
Enable Physical immunity
Enable Magical immunity
Enable 'No MP Cost' Flag

Young Cloud has Death:

1/3 Chance: Use Life2 on Young Cloud
2/3 Chance: Use subsequent attack sequence:

Young Cloud does not have Death OR 1/3 Chance failed:

Only one Enemy Alive: (Zuu or Dragon Encounter)

Enemy is Flying: Use Fire3 on Target
Enemy is NOT Flying: Use Attack Command on Target

More than one Enemy Alive:

At least one Enemy has resistance to Earth Element: (Sonic Speed)

1/2 Chance: Use Ice3 on All Targets
1/2 Chance: Use Bolt3 on All Targets

No Enemies have resistance to Earth Element:

1/3 Chance: Use Quake3 on All Targets
1/3 Chance: Use Ice3 on All Targets
1/3 Chance: Use Bolt3 on All Targets

>~~~~~~<

Notes On Sephiroth:

None of Sephiroth's Materia can be removed, neither can his equipment. All of Sephiroth's Materia are mastered, and are not necessary to be equipped as all of Sephiroth's attacks are scripted. If you were to hack the game to remove his Materia then his attack sequence will still play out the in the exact same way.

Sephiroth uses the same character slot as Vincent; at the start of the game Vincent's slot will be filled using the stats for Sephiroth as above, then revert to Vincent's starting stats after the flashback sequence.

The Touph Ring will increase Sephiroth's Vitality and Spirit by 50, and the Materia he has equipped will modify Sephiroth's stats so that his *actual* stats are as follows:

Strength: 78	Attack: 177	Max HP: 3264
Vitality: 121	Attack%: 255	Max MP: 529
Magic: 75	Defense: 167	
Spirit: 121	Defense%: 20	Attack Base Damage:
Dexterity: 65	Magic atk: 75	2109 HP

```
|        Luck: 46           Magic def: 121          Quake3 Base Damage:      |
|                          Magic def%:   0           3281 HP                 |
|                               Crit%: 255          Fire3/Ice3/Bolt3 Damage: |
|                                                    3000 HP                 |
|                                                                            |
| Sephiroth cannot gain any EXP, but if he were able to then he would        |
|  require the same as Cloud, Barret, Yuffie and Cid which is 2,420,933 EXP. |
| Sephiroth's Masamune is the only Weapon in the game to have 255 Crit%,     |
|  which means his Attacks will always be an Auto-Critical. The only enemy   |
|  Sephiroth uses the Attack Command on is the Dragon, and will kill it in   |
|  two hits, dealing 3027 - 3228 HP per hit.                                 |
| Sephiroth's Physical and Magical immunity also grants him resilience to    |
|  any Status changes. He also makes use of a flag that is not used by any   |
|  other Actor in the game, which is to disable the cost of MP for all       |
|  attacks, so Sephiroth will never run out of MP.                           |
\                                                                            /

{Helpful Lists}

```
¬¬¬
```

Once you have been allocated your "Pool", you will then have an equal 25% chance of encountering one of four different formations. After the first Battle, you will then have an equal 25% chance of encountering one of the four formations in the next Battle *from the same Pool*.

When you finish your 7th Battle, the 8th Battle will only have one pool of four encounters for you to fight, which you will encounter regardless of the initial Pool you were placed into.

The fourth "Special Battle" set does not have an Enemy "Pool" group to put you into, nor does it have a choice of four different encounters to pick from per Battle. All eight battles are fixed encounters.

All enemies will have had their HP values doubled while in the Battle Square, along with their Strength and Magic values being multiplied by 1.25.

Note that I will *not* be giving detailed advice on how to deal with the Battle Square here, search section E.08 D - Battle Square for the full breakdown. For now, bear in mind the following few tips:

- Use Smoke Bombs to flee the Battle while retaining you earned BP.
- Stock up on Right Arms from the Bomb for Set 1.
- Enemy Skills learned in the Battle Square are not kept.
- Always try to get Magic Materia or All Materia Broken for your last two handicaps for the most amount of BP.
- Use L4 Suicide on the Grangalan, Bagnadrana, Dragon, Ying/Yang, Stilva, Malboro, Tonberry, Ghost Ship, Serpent and Unknown 3.

Note that the values you see in the bottom-right corner of each encounter (#305, for example) are the Formation IDs for the Battles. You can disregard these unless you plan to work with FFVII on a coding level; these IDs exist purely to enable me to error-check my work in the future.

```
//>~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
||>    {SHINRA HQ ELEVATOR}    <||
\\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~<//
```

If you choose to storm the front of the Shinra HQ on Disc 1, then you will find yourself facing one of several different encounters while taking the small interior elevator to the 59th Floor.

The Floor you start on is always the 6th Floor, and you each time you interact with the console, you will ascend a set amount of floors based on the following chances:

2/16 Chance	7 Floors Higher
2/16 Chance	8 Floors Higher
2/16 Chance	9 Floors Higher
2/16 Chance	10 Floors Higher
2/16 Chance	11 Floors Higher
2/16 Chance	12 Floors Higher
2/16 Chance	13 Floors Higher
1/16 Chance	14 Floors Higher
1/16 Chance	15 Floors Higher

This means that you will have a minimum of three stops till you get to the 59th Floor, and a maximum of seven stops. you will not be able to flee any of the Battles in the Shinra HQ elevators.

There are eight different encounters that you can face, as well as a Shinra employee that has been given the Field Script title of 'Hito'. You will only encounter battles #1 - #4 up until floor 28, after which you will always get battles #5 - #8. Hito appears on four floors.

Battle #1 = 2x Grenade Combatant Front Row
Battle #2 = 2x Grenade Combatant Front Row, 1x Grenade Combatant Back Row
Battle #3 = 1x Mighty Grunt
Battle #4 = 2x Mighty Grunt Front Row

Battle #5 = 1X Hammer Blaster
Battle #6 = 1x Sword Dance
Battle #7 = 2x Sword Dance Front Row
Battle #8 = 1x Moth Slasher

```

```
//>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
||>    {TOP TRAINING AREAS FOR EACH DISC}    <||
\\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<///
```

Using the Training Rating that I've generated for each area, I've been able to compile a list of the top training areas for each section of the game. This factors in the "Average EXP/AP/Gil" for each screen. As mentioned in the introductions section, the averages can be considered a mathematically "true" average, seeing as I've factored in the encounter rates for each formation.

First of all, though, I would like to highlight the definitive "Best" training areas for each disc:

```
  .--------.
  | Disk 1 |
  '--------'
```

Disk 1 Best EXP:

1.) 2043.1 EXP - Corral Valley 1st Screen With Log Bridge (Water Ring)
2.) 1687.5 EXP - Mideel Area Grass
3.) 1534.2 EXP - Temple of The Ancients Mural Room
4.) 1472.0 EXP - Wutai Area Dirt
5.) 1412.5 EXP - Junon "T" Intersection (Sound The Alarm)

Disk 1 Best AP:

1.) 220.3 AP - Corral Valley 1st Screen With Log Bridge (Water Ring)
2.) 200.0 AP - Mideel Area Beach / Grass
3.) 147.6 AP - Mideel Area Dirt
4.) 139.1 AP - Temple of The Ancients Mural Room
5.) 136.3 AP - Mt. Nibel "5 Pipe" Screen (Materia Keeper)

Disk 1 Best Gil:

1.) 5000.0 Gil - Mideel Area Beach
2.) 2782.0 Gil - Junon "T" Intersection (Sound The Alarm)
3.) 2775.0 Gil - Mideel Area Grass
4.) 2570.3 Gil - Corral Valley 1st Screen With Log Bridge (Water Ring)
5.) 2441.5 Gil - Mideel Area Dirt

Note that the Trickplay on the Grass of Bone Village also offers massive amounts of gil, as their "Gold Mountain" attack will increase your end-of-battle gil reward by 800 with every use. There is no cap to the amount of gil you can earn!

```
  .--------.
  | Disk 2 |
  '--------'
```

Disk 2 Best EXP:

1.) 3000.0 EXP - Red Submarine Dock (Past Barking Dog)
2.) 2993.4 EXP - Sunken Gelnika Turks Hallway
3.) 2643.9 EXP - Junon's Path Towards Reactor 2nd & 3rd Screen
4.) 2400.8 EXP - Ancient Forest 1st & 3rd Screen
5.) 2400.0 EXP - Sector 8 Raid Mako Cannon Base (W Save Point)

Disk 2 Best AP:

1.) 320.0 AP - Mako Cannon Base
2.) 266.3 AP - Mideel Area Jungle
3.) 255.0 AP - Red Submarine Dock (Past Barking Dog)
4.) 234.2 AP - Junon's Path Towards Reactor 2nd & 3rd Screen
5.) 220.3 AP - Corral Valley 1st Screen With Log Bridge (Water Ring)

Disk 2 Best Gil:

1.) 7294.9 Gil - Sunken Gelnika Turks Hallway
2.) 6982.4 Gil - Sunken Gelnika Small Flooded Room
3.) 5976.6 Gil - Sunken Gelnika Large Cargo Room
4.) 5000.0 Gil - Mideel Area Beach
5.) 4900.0 Gil - Sector 8 Raid Mako Cannon Base (W Save Point)

Disk 3 Best EXP:

1.) 6945.7 EXP - North Crater Swamp Area (Both Screens)
2.) 3747.9 EXP - North Crater Descent Rear Cavern From 2D Platform Jumps
3.) 3325.4 EXP - North Crater Descent 3rd Screen 2D Platform Jumps
4.) 2993.4 EXP - Sunken Gelnika Turks Hallway
5.) 2797.7 EXP - North Crater Descent 2nd Screen Narrow Cascading Paths

Disk 3 Best AP:

1.) 879.7 AP - North Crater Swamp Area (Both Screens)
2.) 266.3 AP - Mideel Area Jungle
3.) 263.6 AP - North Crater Descent Rear Cavern From 2D Platform Jumps
4.) 261.6 AP - North Crater Descent 3rd Screen 2D Platform Jumps
5.) 253.5 AP - North Crater Right Path (All 4 Screens)

Disk 3 Best Gil:

1.) 11,507.9 Gil - North Crater Swamp Area (Both Screens)
2.) 7294.9 Gil - Sunken Gelnika Turks Hallway
3.) 6982.4 Gil - Sunken Gelnika Small Flooded Room
4.) 5976.6 Gil - Sunken Gelnika Large Cargo Room
5.) 5000.0 Gil - Mideel Area Beach

So finally for the best screens for average qty of enemies per Battle. Seeing that the Qty of enemies is constant throughout the game, I have not listed the top 5 training spots for each disc for Enemy Qty as I have EXP, AP and gil. Instead, I have just listed the top 10 areas in the game for kill-griding for your Limits:

TOP 10 TRAINING SPOTS FOR AVERAGE QTY OF ENEMIES:

1.) 5.0 Average - Corel Area Grass (Grangalan)
2.) 4.4 Average - Mt.Corel Waterside Tracks (W Flippable Switch)
3.) 4.28 Average - Corral Valley 1st Screen With Log Bridge (Water Ring)
4.) 4.22 Average - Mythril Mines North Western Cavern
5.) 4.03 Average - Nibel Area Forests
6.) 4.0 Average - Sector 8 Raid Mako Cannon Base (Grosspanzer)
7.) 4.0 Average - Corel Prison Well (2-Faced)
8.) 3.95 Average - Sector 4 1st Grate (Ether) and 2nd Grate (Jessie)
9.) 3.93 Average - Reactor 1 Upper Catwalk (Ladder Tutorial)
10.) 3.88 Average - Mt. Corel Long Roller-Coaster Screen

Note that the Grangalan requires you to spawn in its 'children' to gain the five kills per Battle, which makes it rather time-consuming. Also, you need to take out the 2-Faced rather quickly before they kill themselves, voiding you of the kill (and Battle spoils).

Now, to list the individual *best* screens to train on for each area should you feel the need at any point for some grind time:

Reactor 1: Inner Reactor Upper Catwalk (Ladder Tutorial)

Average EXP = 79.7 Average Enemy QTY = 3.93
Average AP = 9.5 Area Enc Rate = 72 Medium
Average Gil = 47.2 My Rating: * * *

Sector 4: Winding Tunnel Guard Post (Obviously)

Average EXP = 84 Average Enemy QTY = 3
Average AP = 9 Area Enc Rate = N/A
Average Gil = 120 My Rating: * * * *

This unique area allows you to continuously battle without having to run around, which makes for amazing spoils per hour.

Reactor 5: Inner Reactor Upper Catwalk

Average EXP = 87.4 Average Enemy QTY = 3.02
Average AP = 8.8 Area Enc Rate = 72 Medium
Average Gil = 144.6 My Rating: * * *

Sector 5/6: Sector 6 Destroyed Road

Average EXP = 60.9 Average Enemy QTY = 2.02
Average AP = 6.5 Area Enc Rate = 72 Medium
Average Gil = 252.7 My Rating: * *
- - -

Cargo Ship: Both rooms are the same

Average EXP = 245.5 Average Enemy QTY = 3.15
Average AP = 25.2 Area Enc Rate = 40 Very High
Average Gil = 418.5 My Rating: * * *

- -

Corel Area: Grass

Average EXP = 363 Average Enemy QTY = 5
Average AP = 36 Area Enc Rate = 32 Medium
Average Gil = 495 My Rating: * * *

This assumes you to be killing all "Grangalan" enemies, which can be annoying, and as such this area loses one star.

- -

Mt. Corel: Waterside Tracks (W Flippable Switch)

Average EXP = 355.4 Average Enemy QTY = 4.40
Average AP = 36.1 Area Enc Rate = 72 Medium
Average Gil = 511.7 My Rating: * * * *

- -

Corel Prison: Well

Average EXP = 400 Average Enemy QTY = 4
Average AP = 40 Area Enc Rate = 72 Medium
Average Gil = 624 My Rating: * * *

Make sure to actually kill all 2-Faced; if they use Cure3 (1/8) or Self-destruct (1/8), then you get no rewards from that 2-Faced.

- -

Gold Saucer Area: Grass

Average EXP = 401.6 Average Enemy QTY = 3.01
Average AP = 52.0 Area Enc Rate = 32 Medium
Average Gil = 602.1 My Rating: * * * *

- -

Junon's Under-Path: "T" Intersection (Sound The Alarm)

Average EXP = 1412.5 Average Enemy QTY = 1.92
Average AP = 137.9 Area Enc Rate = 48 High
Average Gil = 2782.0 My Rating: * * * * *

- -

Gongaga Area: Jungle

Average EXP = 525.9 Average Enemy QTY = 3.06
Average AP = 61.5 Area Enc Rate = 20 High
Average Gil = 622.3 My Rating: * * * *

- -

Gongaga: Reactor (both screens)

Average EXP = 340 Average Enemy QTY = 1
Average AP = 45 Area Enc Rate = 48 High
Average Gil = 1300 My Rating: * * *

- -

Cosmo Area: Grass

Average EXP = 533.3 Average Enemy QTY = 2.29
Average AP = 50.3 Area Enc Rate = 32 Medium
Average Gil = 634.8 My Rating: * * *

- -

Cave of The Gi: 2nd Screen (Oil Slick)

Average EXP = 803.3 Average Enemy QTY = 3.07
Average AP = 68.7 Area Enc Rate = 48 High
Average Gil = 901.2 My Rating: * * * *

- -

Shinra Mansion: Ground Floor (both screens)

Average EXP = 856.9 Average Enemy QTY = 2.78
Average AP = 99.9 Area Enc Rate = 48 High
Average Gil = 589.4 My Rating: * * * *

- -

Mt. Nibel: "5 Pipe" Cavern (Materia Keeper)

Average EXP = 1344.4 Average Enemy QTY = 3.59
Average AP = 136.3 Area Enc Rate = 72 Medium
Average Gil = 1487.5 My Rating: * * * * *

- -

Nibel Area: Forests

Average EXP = 1108.8 Average Enemy QTY = 4.03
Average AP = 118.2 Area Enc Rate = 12 Very High
Average Gil = 1440.6 My Rating: * * * * *

This area gains an extra star due to the presence of the 6x Battery Cap.

- -

Rocket Pad Area: Forest

Average EXP = 933.8 Average Enemy QTY = 2.90
Average AP = 92.6 Area Enc Rate = 12 Very High
Average Gil = 992.2 My Rating: * *

- -

Mideel Area: Beach

| Average EXP = 1300 Average Enemy QTY = 1 |
| Average AP = 200 Area Enc Rate = 96 Very Low |
| Average Gil = 5000 My Rating: * * * * * |
| |
| - - -

```

|                                                                              |
| The first screen has a higher encounter rate than the second screen.         |
'------------------------------------------------------------------------------'
```

```
 //>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
 ||>    {TOP FARMING LOCATIONS}    <||
 \\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<///
```

To begin with, let's look at everyone's favourite farming Item - Sources. As I'm sure you're already aware of, Yuffie's Conformer does not receive a penalty when using the Morph Command. Typically, the Power value of the attack is divided by 8 when using Morph (so the value is reduced from 16 to 2); however, the formula used by the Conformer overrides the Morph penalty.

Just for clarification, here is the effect of each Source:

```
   Power Source - Raises Strength  (Attack)
   Guard Source - Raises Vitality  (Defence)
   Magic Source - Raises Magic     (Mattack)
    Mind Source - Raises Spirit    (MDefence)
   Speed Source - Raises Dexterity (Defence% and Hit Chances)
    Luck Source - Raises Luck      (Hit, Critical and Evade Chances)
```

The best place in the game to stock up on Sources is the Sunken Gelnika, which becomes available to the Player once they have obtained the Submarine on Disc 2.

```
 Power Source - Unknown    (Small Flooded Room and Large Cargo Room)
 Guard Source - Unknown 2  (Small Flooded Room and Large Cargo Room)
 Magic Source - Unknown 3  (Small Flooded Room and Large Cargo Room)
  Mind Source - Serpent    (Large Cargo Room)
```

```
 Speed Source - Poodler    (Turks Hallway)
  Luck Source - Bad Rap    (Turks Hallway)
```

Here is a list of alternative locations in which Sources can be farmed (note that most of them can be encountered near reactors):

```
 Power Source - Heavy Tank       (Gongaga Reactor)
                Screamer         (Mt. Nibel Reactor Exterior)

 Guard Source - Bagnadrana       (Mt. Corel Reactor)
                Spiral           (Mideel Area Grass and Dirt)
                Armored Golem    (North Crater Left Path Lower Fork)
                Maximum Kimaira  (Battle Square)

 Magic Source - 8 eye            (Battle Square)

  Mind Source - Dragon Rider     (Battle Square)
 Speed Source - Poodler          (Turks Hallway)
  Luck Source - Bad Rap          (Turks Hallway)
```

As you probably know by now, the only way to boost your Attack for Damage Overflow purposes is via Power Sources, and the maximum your Attack can reach is 255. You have the choice to either farm your Sources one at a time, or, you could make use of the Extended W-Item Glitch which enables you to dupe items that you cannot usually select in Battle. The Extended W-Item glitch is best performed when there are two or more enemies present in the field.

If you are not interested in using the W-Item glitch, then the best place for Power Sources is the Heavy Tank, where you'll have a 100% encounter rate in Gongaga Reactor.

EXTENDED W-ITEM GLITCH:

To perform the Extended W-Item Glitch, you must sell all but one of your Potions, then arrange your Item list by Type so that the Potion is at the top of the list. Make sure the ATB is set to 'wait', and make sure that the character with the Morph Materia is *not* the player with the W-Item Materia.

Let's say you were trying to morph Power Sources from the Screamer in Mt. Nibel. Kill all but two of the enemies, then use the Morph Command. You then need to promptly open W-Item with your other character and use the Potion. Do not use the second Item.

If done correctly, the morphed Power Source will fill the empty slot where the Potion was, and you will then be able to perform the standard W-Item method to dupe yourself 99.

It *is* possible to perform the Extended W-Item glitch against a single enemy; however, it takes precision with your setup. Explore QSI Link [Extended W-Item Trick] for more details on how to make use of the exploit.

REPEAT BOSS GLITCH:

It is also possible to dupe yourself items obtained via Bosses by making use of the 'Repeat Boss Glitch'. You need to save the game firstly, then get into

a Battle just before the boss fight. Try to identify the exact frame in which the battle began.

Reset your game; then, your aim is to press triangle to open the menu on the exact frame in which the battle occurred. If done correctly, you will skip the Battle, and the next forced encounter will play out twice, meaning you can gain the Battle rewards twice. Explore QSI Link [Repeat Boss Glitch] in my walkthrough for more details on how to make use of the glitch.

Finally, to look at the best locations for regular Items. I shall first list the best place to farm useful generic items, such as X-Potions and Turbo Ethers; after which I shall compile a list of valuable and rare Items area-by-area.

NOTE - While this list denotes all permanently missable Battle Items, it will *not* include ALL missable items, such as Ifrit or Ramuh. This list focuses on primarily Battle-only collectables.

GENERIC ITEM FARMING LIST:

These items have been listed via their ID (when arranged by 'Type' in-game), and cite the *best* place to farm each item (D = Drop, S = Steal, M = Morph):

Hi-Potion	S Devil Ride	Midgar Area Dirt	Cures 500 HP
	M Kalm Fang	Midgar Area Dirt	Cures 500 HP
X-Potion	S Spiral	Mideel Area Dirt	Fully Cures HP
	M Custom Sweeper	Midgar Area Dirt	Fully Cures HP
Ether	S Ark Dragon	Mythril Mines	Cures 100 MP
	M Mandragora	Grasslands Grass	Cures 100 MP
Turbo Ether	S Search Crown	Mt. Corel Tracks	Fully Cures MP
	M Beach Plug	Gongaga Beach	Fully Cures MP
Elixir	S Master Tonberry	North Crater	Fully Cures HP/MP
	M Harpy	Gold Saucer Grass	Fully Cures HP/MP
Megalixir	D Master Tonberry	North Crater	Fully Cures Party
Remedy	S Velcher Task	Rocket Area Grass	Cures Statuses
Smoke Bomb	S Slalom	Junon Paths	Escape Battle
Right Arm	S Bomb	Mt. Corel Bridge	Damage all Targets
T/S Bomb	S Flapbeat	Gold Saucer Grass	Demi2 one Target
Dazers	S Battery Cap	Nibel Forests	Paralyze one Target

USEFUL/RARE ITEM FARMING LIST:

These items have been listed according to their in-game appearance, and also include valuable Weapons and Armour to obtain (* = Permanently Missable, D = Drop, S = Steal, M = Morph):

Start - Midgar Area

Spider Web	D Grashtrike	Sector 4	Slow on all Targets
Deadly Waste	D Smogger	Reactor 5	Bio2 on all Targets
*Ghost Hand	S Ghost	Train Graveyard	Drain MP one Target

*Graviball	D	Deenglow	Train Graveyard	Demi one Target
Ether	S	Deenglow	Train Graveyard	Cures 100 MP
Striking Staff	S	Eligor	Train Graveyard	Weapon for Aeris
Speed Drink	S	Vice	Sector 6	Haste one Ally
Loco Weed	D	Hammer Blaster	Shinra HQ Ascent	Confusion one Target
Loco Weed	D	Sword Dance	Shinra HQ Ascent	Confusion one Target
Carbon Bangle	S	Moth Slasher	Shinra HQ Ascent	Armour
Hardedge	S	SOLDIER:3rd	Shinra HQ Ascent	Weapon for Cloud

Midgar Area - Buggy

Hi-Potion	S	Devil Ride	Midgar Area	Cures 500 HP
Atomic Scissors	S	Custom Sweeper	Midgar Area	Weapon for Barret
Grand Glove	S	Madouge	Mythril Mines	Weapon for Tifa
Ether	S	Ark Dragon	Mythril Mines	Cures 100 MP
Boomerang	S	Formula	Junon Area Forest	Weapon for Yuffie
Hi-Potion	S	Hell Rider VR2	Junon Area Dirt	Cures 500 HP
*Vagyrisk Claw	D	CMD.Grand Horn 19	Fort Condor Shack	Petrify one Target
Ether	S	Scrutin Eye	Junon Cargo Ship	Cures 100 MP
*Shinra Beta	S	Marine	Junon Cargo Ship	Armour
Turbo Ether	S	Search Crown	Mt. Corel Tracks	Fully Cures MP
Diamond Pin	S	Bagnadrana	Mt. Corel Reactor	Weapon for Red XIII
Right Arm	S	Bomb	Mt. Corel Bridge	Damage all Targets
Phoenix Down	S	2-Faced	Corel Prison	Revive on Ally
Tent	D	Bandit	Corel Prison	Fully Cures Party
Platinum Bangle	S	Death Claw	Corel Prison	Double Growth Armour
X-Potion	S	Bullmotor	Corel Prison	Fully Cures HP
Turbo Ether	S	Land Worm	Corel Prison	Fully Cures MP

Buggy - Tiny Bronco

T/S Bomb	S	Flapbeat	Gold Saucer Grass	Demi2 one Target
War Gong	D	Grand Horn	Gongaga Area	Berserk all Targets
Earth Drum	D	Flower Prong	Gongaga Jungle	Quake 2 all Targets
Spider Web	S	Kimara Bug	Gongaga Jungle	Slow on all Targets
Turbo Ether	S	Golem	Cosmo Area Canyon	Fully Cures MP
M-Tentacles	D	Sneaky Step	Cave of the Gi	Bio3 all Targets
Smoke Bomb	D	Gi Spector	Cave of the Gi	Escape Battle
*Vagyrisk Claw	S	Bagrisk	Cosmo Area Dirt	Petrify one Target
Mirror	D	Mirage	Shinra Mansion	Reflect all Allies
Turbo Ether	S	Jersey	Shinra Mansion	Fully Cures MP
Vampire Fang	D	Black Bat	Shinra Mansion	Drains HP one Target
Bird Wing	S	Zuu	Mt. Nibel Bridge	Damage all Targets
Gold Armlet	S	Dragon	Mt. Nibel Caverns	Armour
Ether	S	Twin Brain	Mt. Nibel	Cures 100 MP
Earth Drum	D	Screamer	Mt. Nibel Reactor	Quake 2 all Targets
Remedy	S	Velcher Task	Rocket Area Grass	Cures Statuses
Dazers	S	Battery Cap	Nibel Forest	Paralyze one Target

Tiny Bronco - End of Disc 1

Adaman Bangle	S	Adamantaimai	Wutai Area Beach	Armour
Dragon Scales	D	Adamantaimai	Wutai Area Beach	Damage all Targets
X-Potion	D	Bizarre Bug	Wutai Area Dirt	Fully Cures HP
Smoke Bomb	D	Edgehead	Wutai Area Grass	Escape Battle
Hourglass	D	Edgehead	Wutai Area Grass	Stop all Targets
*8-inch Cannon	S	Attack Squad	Wutai Mat Quest	Damage all Targets

Remedy	D	Jayjujayme	Da-chao Statue	Cures Statuses
Ice Crystal	D	Garuda	Da-chao Statue	Ice3 all Targets
Light Curtain	D	Garuda	Da-chao Statue	Barrier all Allies
Lunar Curtain	D	Foulander	Da-chao Statue	MBarrier all Allies
Bird Wing	D	Tonadu	Woodlands Beach	Damage all Targets
Remedy	S	Under Lizard	Woodlands Dirt	Cures Statuses
Turbo Ether	D	Ancient Dragon	TOTA Mural Room	Fully Cures MP
Magic Source	M	8 eye	TOTA Room III	Increase MAttack
Carob Nut	S	Vlakorados	Icicle Area Grass	Breeding Chocobos
Elixir	M	Vlakorados	Icicle Area Grass	Fully Cures HP/MP
Dazers	S	Boundfat	Corral Valley	Paralyze one Target

NOTE - Once you have obtained the Morph Materia the following Items become available:

Guard Source	M	Bagnadrana	Mt. Corel	Increase Defence
Fire Fang	M	Land Worm	Corel Prison	Fire2 all Targets
Elixir	M	Harpy	Gold Saucer Area	Fully Cures HP/MP
Power Source	M	Heavy Tank	Gongaga Reactor	Increase Attack
Hourglass	M	Kimara Bug	Gongaga Jungle	Stop all Target
Fire Veil	M	Desert Sahagin	Cosmo Area Canyon	Fire3 all Targets
Dream Powder	M	Crown Lance	Cosmo Area Beach	Sleepel all Targets
Power Source	M	Screamer	Mt. Nibel Reactor	Increase Attacks
Turbo Ether	M	Twin Brain	Mt. Nibel Reactor	Fully Cures MP

Beginning of Disc 2 - Highwind

Water Ring	S	Acrophies	Corral Valley	Accessory
Antarctic Wind	M	Jumping	Icicle Area	Ice2 all Targets
Ice Crystal	M	Bandersnatch	Icicle Area	Ice3 all Targets
Circlet	S	Snow	Great Glacier	Accessory
M-Tentacles	D	Malboro	Gaea's Cliffs	Bio3 all Targets
Holy Torch	M	Stilva	Gaea's Cliffs	DeSpell on Target
Holy Torch	M	Evilhead	Gaea's Cliffs	DeSpell on Target
Dragon Armlet	D	Blue Dragon	Gaea's Cliffs	Armour
Protect Ring	S	Schizo(Right)	Gaea's Cliffs	Accessory
*Earth Mallet	D	Gigas	Whirlwind Maze	Quake3 all Targets
Gigas Armlet	S	Gigas	Whirlwind Maze	Armour
Right Arm	S	Grenade	Whirlwind Maze	Damage all Targets
Tent	S	Gremlin	Whirlwind Maze	Fully Cures Party
Mind Source	M	Dragon Rider	Whirlwind Maze	Increase MDefence
Mind Source	M	Killbin	Whirlwind Maze	Increase MDefence
Turbo Ether	S	Killbin	Whirlwind Maze	Fully Cures MP
*8-inch Cannon	S	Attack Squad	Junon Escape	Damage all Targets
Remedy	S	SOLDIER:2nd	Junon Escape	Cures Statuses

Highwind - Raid on Midgar

Dragon Scales	S	Sea Worm	Mideel Beaches	Damage all Targets
Dream Powder	M	Crysales	Mideel Jungle	Sleepel all Targets
Zeio Nut	S	Goblin	Goblin Island	Breeding Chocobos
Tetra Elemental	M	Cactuer	Cactus Island	Accessory
X-Potion	S	Spiral	Mideel Grass	Fully Cures HP
Guard Source	M	Spiral	Mideel Grass	Increase Defence
Imperial Guard	D	CMD.Grand Horn 37	Fort Condor Shack	Armour
*Curse Ring	S	Ultimate Weapon	Mideel	Accessory
Wizard Bracelet	S	Epiolnis	Ancient Forest	Armour
Smoke Bomb	S	Slalom	Junon Paths	Escape Battle

Guide Book	M	Ghost Ship	Junon Underwater	Trade for Materia
*Shinra Alpha	S	Captain	Junon Reactor	Armour
Speed Source	M	Poodler	Sunken Gelnika	Increases Dexterity
Luck Source	M	Poodler	Sunken Gelnika	Increases Luck
Light Curtain	D	Unknown	Sunken Gelnika	Barrier all Allies
Power Source	M	Unknown	Sunken Gelnika	Increase Attack
Lunar Curtain	D	Unknown 2	Sunken Gelnika	MBarrier all Allies
Guard Source	M	Unknown 2	Sunken Gelnika	Increase Defence
Holy Torch	D	Unknown 3	Sunken Gelnika	DeSpell on Target
Magic Source	M	Unknown 3	Sunken Gelnika	Increase MAttack
Dragon Scales	D	Serpent	Sunken Gelnika	Damage all Targets
Mind Source	M	Serpent	Sunken Gelnika	Increase MDefence
*Touph Ring	S	Turks:Reno III	Sunken Gelnika	Accessory
*Ziedrich	S	Turks:Rude II	Sunken Gelnika	Armour
*Ziedrich	S	Turks:Rude III	Rocket Town	Armour
*Rising Sun	S	Diamond Weapon	Midgar Area	Weapon for Yuffie
Circlet	S	Ultimate Weapon	Flying variant	Accessory
Reflect Ring	S	Ultimate Weapon	Ground Variant	Accessory

NOTE - You can also obtain the following from the Battle Square:

Circlet	S	Ho-chu	Battle Square	Accessory
Ribbon	M	Ho-chu	Battle Square	Accessory
Turbo Ether	S	Tonberry	Battle Square	Fully Cures MP
Elixir	M	Tonberry	Battle Square	Fully Cures HP/MP

Raid on Midgar - End Game

Stardust	D	Behemoth	Sector 8 Raid	Comet2 all Targets
War Gong	S	Behemoth	Sector 8 Raid	Berserk all Targets
*Graviball	S	Shadow Maker	Sector 8 Raid	Demi one Target
Minerva Band	S	Turks:Elena	Sector 8 Raid	Armour
*Touph Ring	S	Turks:Reno IV	Sector 8 Raid	Accessory
*Ziedrich	S	Turks:Rude IV	Sector 8 Raid	Armour
*8-inch Cannon	D	Grosspanzer-Big	Mako Cannon	Damage all Targets
*Shinra Alpha	S	SOLDIER:1st	Mako Cannon	Armour
Guard Source	M	Maximum Kimaira	Mako Cannon	Increase Defence
Elixir	D	Dark Dragon	North Crater	Fully Cures HP/MP
Dragon Armlet	S	Dark Dragon	North Crater	Armour
Vaccine	M	Dark Dragon	North Crater	Resist one Target
Megalixir	D	Master Tonberry	North Crater	Fully Cures Party
Elixir	S	Master Tonberry	North Crater	Fully Cures HP/MP
Ribbon	S	Master Tonberry	North Crater	Accessory
Guard Source	M	Armored Golem	North Crater	Increase Defence
Elixir	S	Gighee	North Crater	Fully Cures HP/MP
Protect Ring	M	Mover	North Crater	Accessory
Cauldron	S	Dragon Zombie	North Crater	Bad Breath one Tar
Vaccine	M	Dragon Zombie	North Crater	Resist one Target
Kiss of Death	D	Death Dealer	North Crater	Death all Targets

\\>~~~~~~~~~~~~~~~~~~~~~~~~~~<///
```

Credit to JBedFord for the following list of enemies that share the same Battle Model, using a different colour pallet:

MP/Grenade Combatant/Marine/Attack Squad/Submarine Crew/Captain/Underwater MP
Guard Hound / Blood Taste / Dark Nation / êúô0(äñ) (JORG Test Enemy)
Mono Drive / Scrutin Eye
Grunt / Special Combatant / Senior Grunt / êúô1() (JORG Test Enemy)
1st Ray / Laser Cannon
Sweeper / Custom Sweeper / Death Machine
Rocket Launcher / Rocket Launcher
Grashtrike / Head Hunter
Blugu / Bloatfloat
Chuse Tank / Malldancer
Corneo's Lackey / Scotch
Hedgehog Pie / Boundfat / êúô4(ëöù) (JORG Test Enemy)
Smogger / Slalom / Gas Ducter
Vice / Prowler / Bandit
Whole Eater / Zolokalter
Sahagin / Desert Sahagin
Ceasar / Castanets
Deenglow / Flapbeat / Wind Wing / êúô2(ñ) (JORG Text Enemy)
Cripshay / Edgehead
Proto Machine Gun / Machine Gun / Quick Machine Gun
Sword Dance / Corvette
Warning Board / Guard System
SOLDIER:3rd / SOLDIER:2nd / SOLDIER 1ST
Moth Slasher / Crazy Saw
Vargid Police / Twin Brain / Chekhov
Zenene / Sneaky Step
Kalm Fang / Nibel Wolf / Bandersnatch
Mu / Trickplay
Levrikon / Epiolnis
Mandragora / Razor Weed
Madouge / Screamer / Staniv
Ark Dragon / Ancient Dragon
Crawler / Heg
Formula / Sonic Speed
Jenova-BIRTH / Jenova-LIFE / Jenova-DEATH
Beach Plug / Poodler / Poodler Sample
Search Crown / Battery Cap
Needle Kiss / Thunder Bird
Bomb / Grenade
Joker / Death Dealer
Bullmotor / Hard Attacker
Land Worm / Sea Worm
Harpy / Maximum Chimera
Grand Horn / CMD.Grand Horn Lv 19 / CMD.Grand Horn Lv 25 / CMD.Grand Horn Lv37
Gagighandi / Under Lizard
Touch Me / Toxic Frog
Griffin / Hippogriff
Skeeskee / Shake / Headbomber
Golem / Ice Golem / Armoured Golem
Valron / Gorkii
Black Bat / Evilhead
Dragon / Red Dragon / Blue Dragon / Dark Dragon
Materia Keeper / Stilva
Zuu / Tonadu
Velcher Task / Diablo
Adamantaimai / êúô6(ñâ) (JORG Test Enemy)
Jayjujayme / Crysales
Rapps / Lessaloploth

Jemnezmy / Snow / Pollensalta
Kelzmelzer / Frozen Nail
Serpent / êúô5(áñô) (JORG Test Enemy)
Gun Carrier / Cromwell
Wolfmeister / Iron Man
Guardian(Right) / Guardian(Left)
Bad Rap / Bad Rap Sample
Behemoth / King Behemoth
Grosspanzer-Big / êúô7(úñA) (JORG Test Enemy)
Grosspanzer-Mobile / êúô8(úñB) (JORG Test Enemy)
Grosspanzer-Small / êúô9(úñC) (JORG Test Enemy)
Mover / Waterpolo (?)
Cactuar / Cactuer
Tonberry / Master Tonberry (I guess)
Grangalan / Grangalan Jr. / Grangalan Jr.Jr.
Ying / Yang
Carry Armor's Arms
Turks:Reno (four variants)
Turks:Rude (four variants)
Ultimate Weapon (four variants)
Chocobo (nine variants)
Mystery Ninja (six variants)
[No Name] (two variants - Mu / Trickplay Base)
[No Name] (two variants - Magnade's Arms)
Bizarro-Sephiroth (six variants)
Pyramid / Test Enemies (nine variants of Test Enemies)

```
 //>~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
 ||>    {ELEVATED ENEMIES}    <||
 \\>~~~~~~~~~~~~~~~~~~~~~~~~~~<///
```

An 'Elevated' Enemy is an enemy that is considered to be hovering above the ground slightly, and as such it will *usually* take Double Damage from the Wind Element, while also nullifying the Earth Element.

Note that an 'Elevated' enemy and a 'Flying' enemy are two different things; a Flying enemy is an enemy that has been given a Row value of 16, and will not be targeted by short-ranged attacks. All Flying enemies are elevated, but not all elevated enemies are Flying.

Also note that there are a number of elevated enemies that will nullify Earth, but will not take Double Damage from Wind. A smaller number of enemies will be physically hovering off the ground, but will not take Double Damage from Wind nor will they Nullify Earth.

NORMAL 'ELEVATED' ENEMIES:

Nullifies Earth, takes Double Damage from Wind

- Mono Drive — Sector 1
- Blugu — Sector 4
- Deenglow — Train Graveyard
- Aero Combatant 1st Form — Sector 7
- Heli Gunner — Shinra HQ
- Ark Dragon — Mythril Mines

- Zemzelett Junon Area
- Formula Junon Area
- Bottomswell Junon Harbour
- Scrutin Eye Junon Cargo Ship
- Needle Kiss Mt. Corel
- Bloatfloat Mt. Corel
- Joker Gold Saucer Area Grass
- Flapbeat Gold Saucer Area Grass
- Soul Fire Cave of The Gi
- Black Bat Shinra Mansion
- Sonic Speed Mt. Nibel
- Zuu Mt. Nibel
- Garuda Da-chao Statue
- Gorkii Wutai Pagoda
- Tonadu Woodlands/Icicle Beach
- Slaps Woodlands Area Jungle
- Ancient Dragon Temple of The Ancients
- Shred Great Glacier
- Lessaloploth Great Glacier
- Dragon Rider Gaea's Cliffs
- Serpent Sunken Gelnika
- Parasite North Crater
- Allemagne North Crater

SPECIAL 'ELEVATED' ENEMIES:

Nullifies Earth, does *not* take Double Damage from Wind

- Air Buster Sector 5
- Ghost Train Graveyard
- Sword Dance Shinra HQ Ascent
- Sample:H0512-opt Shinra HQ Ascent
- Brain Pod Shinra HQ Escape
- Grangalan Corel Area
- Grangalan Jr. Corel Area
- Grangalan Jr.Jr. Corel Area
- Bomb Mt. Corel Bridge
- 2-Faced Corel Prison
- Crown Lance Cosmo Area Beach
- Gi Nattak Cave of The Gi
- Ghirofelgo Shinra Mansion
- Malldancer Corral Valley
- Grenade Whirlwind Maze Crater
- Eagle Gun Mt. Corel Train
- Rilfsak Ancient Forest
- Ghost Ship Junon Underwater Pipe
- Corvette Junon Underwater Pipe
- Diver Nest Junon Underwater Pipe
- Ultimate Weapon (Aerial) Junon Crater, Mideel, Nibel and Corel Area
- Ultimate Weapon (Final) Cosmo Canyon Area
- Emerald Weapon Ocean Floor
- Eye Ocean Floor

NON-ELEVATED 'HOVERING' ENEMIES:

Hovering, does *not* Nullify Earth, does *not* take Double Damage from Wind

- Chuse Tank Sector 4
- Valron Nibel Area (Flying Form)
- Dorky Face Shinra Mansion
- Mirage Shinra Mansion
- Jersey Shinra Mansion
- Thunderbird Wutai Area Dirt
- Bizarre Bug Wutai Area Dirt (Flying Form)
- Rapps Da-chao Statue
- Evilhead Gaea's Cliffs
- Ironite Whirlwind Maze
- Wind Wing Whirlwind Maze
- Bad Rap Sunken Gelnika
- Unknown Sunken Gelnika
- Unknown 3 Sunken Gelnika
- Lifeform-Hojo N Mako Cannon
- Gargoyle (2nd Form) North Crater Descent
- Mover North Crater Swamp
- Death Dealer North Crater Right Path
- Jenova-SYNTHESIS Planet's Core
- Safer-Sephiroth Planet's Core

'FLYING' ENEMIES:

Row Value of 16 (cannot be targeted via short-ranged Attacks)

- Hundred Gunner Shinra HQ Escape
- Heli Gunner Shinra HQ Escape
- Zemzelett Junon Area (Flying Form)
- Bottomswell Junon Harbour
- Griffin Cosmo Area (Flying Form)
- Zuu Mt. Nibel (Bridge only)
- Hippogriff Mideel Area (Flying Form)
- Ultimate Weapon (Flying) Junon Crater, Mideel, Nibel & Corel Area
- Ultimate Weapon (Final) Cosmo Canyon Area
- Safer-Sephiroth Planet's Core (2nd Stage)

```
//>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
||>    {ENEMY SKILL LISTING}    <||
\\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<///
```

Here you will find a rundown of all 24 Enemy Skills, and how to obtain them. Firstly though, you need to know how to get the Enemy Skill Materia, of which there are four to obtain:

- Hojo's laboratory, following the Sample:H0512 Battle (missable)
- Junon 'Right Side' Intermediate Hall (1st house on the Left Basement)
- Forgotten Capitol Central Shell with beds (Eastern Area)
- Chocobo Sage's House (interact with the Green Chocobo)

One of the Enemy Skill Materias is permanently missable (the one from Hojo's Laboratory), and two of the Enemy Skills are missable; Pandora's Box, which is used as a Death Counter by the Dragon Zombie *ONCE ONLY* in the whole game! The other permanently missable Skill is Trine, which can only be

learned from Materia Keeper, Godo and the Stilva.

If you wish to learn Trine on all four Enemy Skills, then make sure not to kill Godo until *after* you obtain the fourth Enemy Skill Materia.

For an Enemy Skill to be learned, the Battle must end, and the character that has acquired the Skill must be present as the Battle concludes. If the ability used has killed the target learning the Skill, then the Skill will still be learned providing that the Battle has not come to an end following the ability used (referring specifically to the Midgar Zolom's ability to eject the Party members from Battle, preventing a Game Over).

Frog Song

Ability: Toggles Sleep/Frog Status on one opponent

Learn From:	Touch Me	Gongaga	Need Manip: No
	Toxic Frog	Temple of The Ancients	MP Cost: 5 MP
	Christopher	North Crater Swamp Area	

L4 Suicide

Ability: Inflicts Small and Critical on targets with a Lv divisible by 4
Base Damage: 31/32 Current HP

Learn From:	Mu	Grasslands Grass	Need Manip: No
	Trickplay	Icicle Area Grass	MP Cost: 10 MP

Magic Hammer

Ability: Drains 100 MP from Target
Base Damage: 100 MP

Learn From:	Razor Weed	Wutai Area Grass	Need Manip: Yes
			MP Cost: 3 MP

NOTE - The Grass Area of Wutai can be accessed as soon as you land on its shores; head immediately to your left to find a small patch of grass. This enables you to learn Magic Hammer without having to first complete Yuffie's Sidequest.

White Wind

Ability: Restores Party's HP and cures negative Statuses
Base Damage: Equal to Caster's Current HP

Learn From:	Zemzelett	Junon Area Grass	Need Manip: Yes
			MP Cost: 34 MP

.-----------.
| Big Guard |
'-----------'

Ability: Casts Haste, Barrier and MBarrier on all allies

Learn From: Beachplug Corel Area Beach Need Manip: Yes
MP Cost: 56 MP

.---------------.
| Angel Whisper |
'---------------'

Ability: Revives and heals all allies, and cures negative Statuses

Learn From: Pollensalta North Crater Right Path Need Manip: Yes
MP Cost: 50 MP

.--------------.
| Dragon Force |
'--------------'

Ability: Raises on allies Def and MDef by 50%, max per battle is +100%

Learn From: Dark Dragon North Crater Descent Need Manip: Yes
MP Cost: 19 MP

.-------------.
| Death Force |
'-------------'

Ability: Grants one ally Death immunity for the remainder of the Battle

Learn From: Adamantaimai Wutai Area Beach Need Manip: Yes
MP Cost: 3 MP

.---------------.
| Flame Thrower |
'---------------'

Ability: Fire Damage on one opponent
Base Damage: 14 Power, Magical Formula

Learn From: Ark Dragon Mythril Mines Need Manip: No
Dragon Mt. Nibel Caverns MP Cost: 10 MP

.-------.
| Laser |
'-------'

Ability: Gravity based Damage on one opponent
Base Damage: 50% Current HP

Learn From: Death Claw — Corel Prison — Need Manip: No
Dark Dragon — North Crater Descent — MP Cost: 16 MP

.-------------.
| Matra Magic |
'-------------'

Ability: Non-Elemental Damage on all opponents
Base Damage: 11 Power, Magical Formula (No Split Damage)

Learn From: Custom Sweeper — Midgar Area Dirt — Need Manip: No
Bullmotor — Corel Prison — MP Cost: 8 MP
Death Machine — Junon Paths

.------------.
| Bad Breath |
'------------'

Ability: Poison, Confu, Sleep, Silence, Small and Frog on all opponents

Learn From: Malboro — Gaea's Cliff Snow Paths — Need Manip: No
North Crater Right Path — MP Cost: 58 MP

.------.
| Beta |
'------'

Ability: Fire Damage on all opponents
Base Damage: 54 Power, Magical Formula (No Split Damage)

Learn From: Midgar Zolom — Grasslands Marsh — Need Manip: No
MP Cost: 35 MP

.----------.
| Aqualung |
'----------'

Ability: Water Damage on all opponents
Base Damage: 52 Power, Magical Formula (No Split Damage)

Learn From: Harpy — Gold Saucer Grass — Need Manip: No
Jenova-LIFE — Forgotten Capitol — MP Cost: 34 MP
Serpent — Sunken Gelnika Cargo Room

NOTE - If you still have the Buggy, then you can easily encounter the Harpy
on the 'Desert' terrain on the World Map. Otherwise, you can only
encounter it alongside a Chocobo on the Gold Saucer tracks.

.-------.
| Trine |
'-------'

Ability: Lightning Damage on all opponents
Base Damage: 34 Power, Magical Formula (No Split Damage)

```
 Learn From: Materia Keeper                Mt. Nibel      Need Manip: No
             Godo                        Wutai Pagoda         MP Cost: 20 MP
             Stilva                      Gaea's Cliff
```

```
 .--------------.
 | Magic Breath |
 '--------------'
```

```
    Ability: Fire/Ice/Lightning Damage on all opponents
Base Damage: 77 Power, Magical Formula (No Split Damage)

 | ???? |
 '------'
```

```
    Ability: Special Formula
Base Damage: Equal to Caster's Max HP - Current HP

 Learn From: Jersey                    Shinra Mansion      Need Manip: No
             Behemoth     Sector 8 Large Catwalk Area         MP Cost: 3 MP
```

```
 .--------------.
 | Goblin Punch |
 '--------------'
```

```
    Ability: Non-Elemental Damage on one opponent
Base Damage: 12 Power, Physical Formula (Damage = Damage * 8 if Target's Lv
                                                  is equal to Caster's Lv)

 Learn From: Goblin              Goblin Island Forest      Need Manip: No
                                  Round Island Forest         MP Cost: 0 MP
```

```
 .-------------.
 | Chocobuckle |
 '-------------'
```

```
    Ability: Non-Elemental Damage on one opponent
Base Damage: Equal to quantity of escapes (1 escape = 1HP of damage)

 Learn From: Chocobo Lv 16           Grasslands Grass      Need Manip: No
             Chocobo Lv 36          Mideel Area Grass         MP Cost: 3 MP

NOTE - While all Chocobos have the ability to cast Chocobuckle, the
        condition for it to cast the Skill is that its HP must be 31/32 of
        its Max HP or below (you also needed to have fed it one Sylkis or
        Mimett Green). Because of this, the only way to realistically learn
        Chocobuckle is via the use of L4 Suicide, and as such you can only
        learn the Skill from the the Lv 16 and Lv 36 Chocobo.
```

```
 .----------.
 | L5 Death |
 '----------'
```

Ability: Inflicts Death on targets with a Lv divisible by 5

Learn From: Parasite — North Crater Descent — Need Manip: No
MP Cost: 22 MP

Death Sentence

Ability: Inflicts Death Sentence on one opponent

Learn From: Gi Spector — Cave of The Gi — Need Manip: No
Sneaky Step — Cave of The Gi — MP Cost: 10 MP
Boundfat — Corral Valley

Roulette

Ability: Inflicts Death on random ally/enemy

Learn From: Death Dealer — North Crater Right Path — Need Manip: No
MP Cost: 6 MP

Shadow Flare

Ability: Non-Elemental Damage on one opponent
Base Damage: 125 Power, Magical Formula

Learn From: Ultimate Weapon — Cosmo Area — Need Manip: No
Dragon Zombie — North Crater Right Path — MP Cost: 100 MP
Ruby Weapon — Gold Saucer Desert

NOTE - Ultimate Weapon will only use Shadow Flare while in his final form at Cosmo Canyon.

Pandora's Box

Ability: Non-Elemental Damage on all opponent
Base Damage: 60 Power, Magical Formula (No Split Damage) Ignores Target's Def

Learn From: Dragon Zombie — North Crater Right Path — Need Manip: No
MP Cost: 110 MP

NOTE - Once the Dragon Zombie has cast Pandora's Box once in a game, it will never use it again. You can use the Yuffie Warping glitch to reset the variable; use QSI Link [Yuffie Warping] to explore the way in which Yuffie Warping works.

```
 //>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
 ||>    {ABILITIES THAT USE MULTI-ELEMENTS}    <||
 \\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<///
```

In total, nine attacks in the game make use of more than one Element, one of which is an Enemy Skill, and two of which are Summons. Note that the value along the left-side column is the Attack ID#.

SUMMONS:

[040]	Tetra Disaster (Kjata)	Fire/Ice/Lightning
[045]	Disintegration (Typhon)	Fire/Ice/Lightning/Earth

ENEMY SKILL:

[057]	Magic Breath (Stilva, Parasite)	Fire/Ice/Lightning

ENEMY ATTACKS:

[398]	Blue Light (Jenova-LIFE)	Water/Shout
[2C5]	Double Breath (Schizo(Right))	Fire/Ice
[2CC]	Double Breath (Schizo(Left))	Fire/Ice
[300]	Viper Breath (Serpent)	Ice/Water
[39A]	Red Light (Jenova-DEATH)	Fire/Shout
[39B]	Tropic Wind (Jenova-DEATH)	Fire/Wind

Having more than one Elemental resistance in place to defend against multiple Elements will *not* allow the damage modification to stack.

```
 //>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
 ||>    {ENEMIES SUSCEPTIBLE TO L4 SUICIDE}    <||
 \\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<///
```

Once you have learned the Enemy Skill L4 Suicide from either the Mu or the Trickplay, you will be able to knock an Enemy's HP to down 1/32 of its *current* HP, so long as the Enemy's Level is divisible by four.

This list is a compilation of all 83 enemies who's Level is divisible by 4 (some of which you cannot cast L4 Suicide on seeing as you cannot obtain the Enemy Skill until you have reached the Chocobo Ranch):

//>~~~~~~<\\
||> {ENEMIES THAT CHANGE STATS MID-BATTLE} <||
\\>~~~~~~<///

In total, 26 enemies can modify their base stats mid-battle; although, technically there are 33 if you also include enemies that change stats such as HP, and absorbed Elements, such as Ruby Weapon and the six variants of Bizarro-Sephiroth.

--

• GUARD SCORPION:

Base Def = 40 Base MDef = 300
Stage 1 Def = 40 Stage 1 MDef = 256
Stage 2 Def = 255 Stage 2 MDef = 384

As the battle opens, the Guard Scorpion’s stats will be immediately set to the 'Stage 1' stats. It enters into its 2nd Stage when its tail is up and will transform back to its original form on its 3rd turn after raising its tail.

--

• SAHAGIN:

Base Def = 32
Spcl Stage Def = 512

The Sahagin will have a 1/16 chance of setting its Def to 512 with every Action performed. Its Def value will remain at 512 until the next Action is completed, at which point its Def will be set back to 32, and a new 1/16 chance will occur to set its Def to 512.

--

• HELI GUNNER:

Base Def = 40 Base MDef = 220
Stage 2 Def = 90 Stage 2 MDef = 270

The battle will open with the Heli Gunner's stats set to its base stats and will transform to Stage 2 once its Current HP falls below (or is equal to) 25% of its Max HP, which is 250/1000.

--

• ZEMZELETT:

Base Def = 50 Base Evade = 1 Base Row = 1
Stage 2 Def = 20 Stage 2 Evade = 11 Stage 2 Row = 16 (Flying)

The battle will open with the Zemzelett's stats set to its base stats and will transform to Stage 2 once it is either attacked using Fire or Ice Elements, or, as a 1/4 chance every turn. It will then go on to have a 1/4 chance every turn to revert to its original form.

--

• CACTUAR:

```
      Base Evade = 20
Spcl Stage Evade = 255
```

The Cactuar will have a 7/8 chance of setting its Evade to 255 with every Action performed. Its Evade value will remain at 255 until the next Action is completed, at which point its Evade will be set back to 20, and a new 7/8 chance will occur to set its Evade to 255.

--

• GRIFFIN:

```
   Base Evade = 1        Base Row = 1 or 2
Stage 2 Evade = 21    Stage 2 Row = 16 (Flying)
```

The battle will open with the Griffin's stats set to its base stats and will transform to Stage 2 as a 1/4 chance every turn. It will then go on to have a 1/4 chance every turn to revert to its original form.

--

• GOLEM:

```
   Base Str = 60      Base Def = 56      Base Mag = 5        Base MDef = 100
Stage 1 Str = 48   Stage 1 Def = 80   Stage 1 Mag = 243   Stage 1 MDef = 130
Stage 2 Str = 52   Stage 2 Def = 72   Stage 2 Mag = 249   Stage 2 MDef = 120
Stage 3 Str = 45   Stage 3 Def = 64   Stage 3 Mag = 255   Stage 3 MDef = 110
```

The battle will open with the Golem's stats set to its base stats, and immediately be set to the 'Stage 1' stats after its 1st turn. It will advance one Stage with every turn and will revert to its previous Stage each time it is attacked. Its 'Row Value' never changes when it moves through its Stages.

--

• VALRON:

```
   Base Evade = 1        Base Row = 1 or 2
Stage 2 Evade = 21    Stage 2 Row = 16 (Flying)
```

The Valron will have a 1/2 Chance starting in either its standard form or its flying form. While on the ground, it will have a 1/4 chance to transform to Stage 2 with every turn. It will then go on to have a 1/8 chance every turn to revert to its original form while its MBarrier is active; if it does not have MBarrier in place, it will have an 11/64 chance every turn to revert to its original form.

--

• BLACK BAT:

```
      Base Evade = 1
 Spcl Stage Evade = 255
```

The Black Bat will have a 1/8 chance of setting its Evade to 255 with every Action performed. Its Evade value will remain at 255 until the next Action is completed, at which point its Evade will be set back to 1, and a new 1/8 chance will occur to set its Evade to 255.

--

- YANG:

```
   Base Str = 5       Base Mag = 32
```

The battle will open with Yang's stats set to its base stats. Each time it takes Physical damage, its Strength will increase by 10, capped at 255. Each time it takes Magical damage its Magic will increase by 10, capped at 255. Yang never uses Physical abilities, so its increased Strength will not matter.

--

- BIZARRE BUG:

```
   Base Def = 50       Base Evade = 1        Base Row = 1, 2 or 3
 Stage 2 Def = 0     Stage 2 Evade = 50    Stage 2 Row = 16 (Flying)
```

The battle will open with the Bizarre Bug's stats set to its base stats and will transform to Stage 2 on its 1st turn. It will then revert to its original form on its 6th turn after becoming airborne. It will then become flying four turns after that, and the sequence will then repeats itself. The Bizarre Bug has the lowest Defence in the game while in its flying form.

--

- GORKII:

```
   Base Evade = 5        Base Row = 1
 Stage 2 Evade = 25    Stage 2 Row = 16 (Flying)
```

Gorkii will begin in Stage 2, and its base stats will be immediately modified to its Stage 2 stats. Gorkii will never revert to its original form.

--

- GRIMGUARD:

```
   Base Def = 50        Base MDef = 180
 Stage 1 Def = 50     Stage 1 MDef = 510
 Stage 2 Def = 254    Stage 2 MDef = 180
```

The Grimguard's base stats will be immediately changed as the battle begins according to the Stage it begins in; it will have a 50% chance of starting in stage 1 (Magical form), and a 50% chance of starting in Stage 2 (Physical Form). It will switch forms every two turns after that. While in its Magical Form the Grimguard has the highest MDefence in the game (even higher than Ruby Weapon's MDefence).

--

- MAGNADE:

```
    Base Evade = 5
 Stage 2 Evade = 255
```

The Magnade will change its Evade to 255 after the first Action is performed. Once 20-24 Actions have been made its Shields will break, and its Evade will be set back to its default value.

--

• HEADBOMBER:

```
    Base Dexterity = 60
 Stage 2 Dexterity = 120
```

The Headbomber will only transform into Stage 2 if it the last enemy alive.

--

• EVILHEAD:

```
       Base Evade = 1
 Spcl Stage Evade = 255
```

The Evilhead will have a 1/4 chance of setting its Evade to 255 with every Action performed. Its Evade value will remain at 255 until the next Action is completed, at which point its Evade will be set back to 1, and a new 1/4 chance will occur to set its Evade to 255.

--

• BLUE DRAGON:

```
    Base Def = 86        Base MDef = 240
 Stage 1 Def = 129    Stage 1 MDef = 360
 Stage 2 Def = 172    Stage 2 MDef = 480
```

The Blue Dragon's Defence and MDefence will increase with every use of Dragon Force. Once Dragon Force has been used twice, its stats will not continue to increase.

--

• CACTUER:

```
       Base Evade = 1
 Spcl Stage Evade = 255
```

The Cactuer will have a 7/8 chance of setting its Evade to 255 with every Action performed. Its Evade value will remain at 255 until the next Action is Completed, at which point its Evade will be set back to 1, and a new 7/8 chance will occur to set its Evade to 255.

--

• HIPPOGRIFF:

```
    Base Evade = 1        Base Row = 1
 Stage 2 Evade = 31    Stage 2 Row = 16 (Flying)
```

The battle will open with the Hippogriff's stats set to its base stats and will transform to Stage 2 once it takes Physical damage when its Current HP falls below (or is equal to) 50%, which is 1500/3000. It will transform back to its original form when it takes Magical damage.

--

• SPIRAL:

```
   Base Def = 80        Base MDef = 80
Stage 2 Def = 320    Stage 2 MDef = 320
```

The Spiral will begin in its standard form, and will have a chance of transforming to its 2nd Stage when it takes damage after its first turn; with each turn, it will have a higher chance of changing. It will automatically transform to its 2nd Stage after taking damage once it reaches its fourth turn.

It will then have a chance of transforming back to its original form with each turn thereafter, excluding its 1st turn. With each turn, it will have a higher chance of changing; if it has not changed by the time it reaches its fourth attack, it will do so automatically.

--

• RILFSAK:

```
      Base Evade = 2
Spcl Stage Evade = 255
```

The Rilfsak will have a 7/8 chance of setting its Evade to 255 with every Action performed. Its Evade value will remain at 255 until the next Action is completed, at which point its Evade will be set back to 2, and a new 7/8 chance will occur to set its Evade to 255.

--

• DARK DRAGON:

```
   Base Def = 120       Base MDef = 240
Stage 2 Def = 180    Stage 2 MDef = 360
Stage 3 Def = 240    Stage 3 MDef = 480
```

The Dark Dragon's Defence and MDefence will increase with every use of Dragon Force. Once Dragon Force has been used twice, its stats will not continue to increase.

--

• ARMORED GOLEM:

```
   Base Str = 110      Base Def = 110      Base Mag = 98      Base MDef = 120
Stage 1 Str = 94    Stage 1 Def = 132   Stage 1 Mag = 74   Stage 1 MDef = 160
Stage 2 Str = 98    Stage 2 Def = 124   Stage 2 Mag = 80   Stage 2 MDef = 150
Stage 3 Str = 102   Stage 3 Def = 116   Stage 3 Mag = 86   Stage 3 MDef = 140
Stage 4 Str = 106   Stage 4 Def = 108   Stage 4 Mag = 92   Stage 4 MDef = 130
                 Spcl Stage Def = 400                   Spcl Stage MDef = 470
```

The battle will open with the Armored Golem's stats set to its base stats and immediately be set to the 'Stage 1' stats after its 1st turn. It will advance

one Stage with every turn, and will revert to its previous Stage each time it is attacked, provided the attack dealt more than 1000 HP. The Armored Golem will enter into its Spcl Stage if its Current HP reaches less than (or equal to) 50% of its Max HP while it is *not* in stage 4, which is 5000/10,000. Its 'Row Value' never changes when it moves through its Stages.

--

• JENOVA-SYNTHESIS:

```
   Base Def = 100       Base MDef = 180
Stage 1 Def = 80
                     Stage 2 MDef = 150
```

Jenova-SYNTHESIS will enter into Stage 1 if Jenova-SYNTHESIS [B] (left Tentacle) is dead, and Stage 2 if Jenova-SYNTHESIS [C] (right Tentacle) is dead. If both Tentacles are dead, then its Defence and MDefence will be dropped.

Jenova-SYNTHESIS will also automatically adjust its HP according to the 'Group Formation ID' slot each enemy fills:

```
  Jenova-SYNTHESIS [A] Max HP = 60,000
  Jenova-SYNTHESIS [B] Max HP = 10,000
  Jenova-SYNTHESIS [C] Max HP = 10,000
```

--

• BIZARRO-SEPHIROTH: (1-Party Version)

Bizarro-Sephiroth will also automatically adjust its HP according to the 'Group Formation ID' slot each enemy fills:

```
  Bizarro-Sephiroth [A] Max HP = 40,000 + 5,000 per Lv 99 Chr + 60,000 if KOTR
                                                              used against J-Synth
  Bizarro-Sephiroth [B] Max HP =  2,000 +   250 per Lv 99 Chr
  Bizarro-Sephiroth [C] Max HP = 10,000 + 1,250 per Lv 99 Chr
  Bizarro-Sephiroth [D] Max HP =  4,000 +   500 per Lv 99 Chr
  Bizarro-Sephiroth [E] Max HP =  4,000 +   500 per Lv 99 Chr
```

Bizarro-Sephiroth will also adjust the Elements absorbed by some of the enemies according to their 'Group Formation ID':

```
  Bizarro-Sephiroth [D] set to absorb Ice and Lightning
  Bizarro-Sephiroth [E] set to absorb Fire and Earth
```

--

• BIZARRO-SEPHIROTH: (2-Party Left "Main" Version)

Bizarro-Sephiroth will also automatically adjust its HP according to the 'Group Formation ID' slot each enemy fills:

```
  Bizarro-Sephiroth [A] Max HP = 40,000 + 5,000 per Lv 99 Chr + 60,000 if KOTR
                                                              used against J-Synth
  Bizarro-Sephiroth [B] Max HP =  2,000 +   250 per Lv 99 Chr
  Bizarro-Sephiroth [C] Max HP = 14,000 + 1,750 per Lv 99 Chr
  Bizarro-Sephiroth [D] Max HP =  6,000 +   750 per Lv 99 Chr
  Bizarro-Sephiroth [E] Max HP =  4,000 +   500 per Lv 99 Chr
```

Bizarro-Sephiroth will also adjust the Elements absorbed by some of the enemies according to their 'Group Formation ID':

  Bizarro-Sephiroth [D] set to absorb Ice and Lightning
  Bizarro-Sephiroth [E] set to absorb Ice and Lightning

--

 • BIZARRO-SEPHIROTH: (2-Party Right "Sub" Version)

Bizarro-Sephiroth will also automatically adjust its HP according to the 'Group Formation ID' slot each enemy fills:

  Bizarro-Sephiroth [A] Max HP = 35,000 + 5,000 per Lv 99 Chr (non-targetable)
  Bizarro-Sephiroth [B] Max HP = 2,000 +   250 per Lv 99 Chr
  Bizarro-Sephiroth [C] Max HP = 12,000 + 1,500 per Lv 99 Chr
  Bizarro-Sephiroth [D] Max HP = 6,000 +   750 per Lv 99 Chr
  Bizarro-Sephiroth [E] Max HP = 4,000 +   500 per Lv 99 Chr

Bizarro-Sephiroth will also adjust the Elements absorbed by some of the enemies according to their 'Group Formation ID':

  Bizarro-Sephiroth [D] set to absorb Fire and Gravity
  Bizarro-Sephiroth [E] set to absorb Fire and Gravity

--

 • BIZARRO-SEPHIROTH: (3-Party Centre "Main" Version)

Bizarro-Sephiroth will also automatically adjust its HP according to the 'Group Formation ID' slot each enemy fills:

  Bizarro-Sephiroth [A] Max HP = 40,000 + 5,000 per Lv 99 Chr + 60,000 if KOTR
                                                              used against J-Synth
  Bizarro-Sephiroth [B] Max HP = 2,000 +   250 per Lv 99 Chr
  Bizarro-Sephiroth [C] Max HP = 16,000 + 2,000 per Lv 99 Chr
  Bizarro-Sephiroth [D] Max HP = 8,000 + 1,000 per Lv 99 Chr
  Bizarro-Sephiroth [E] Max HP = 8,000 + 1,000 per Lv 99 Chr

Bizarro-Sephiroth will also adjust the Elements absorbed by some of the enemies according to their 'Group Formation ID':

  Bizarro-Sephiroth [D] set to absorb Ice and Lightning
  Bizarro-Sephiroth [E] set to absorb Ice and Lightning

--

 • BIZARRO-SEPHIROTH: (3-Party Left "Sub 1" Version)

Bizarro-Sephiroth will also automatically adjust its HP according to the 'Group Formation ID' slot each enemy fills:

  Bizarro-Sephiroth [A] Max HP = 35,000 + 5,000 per Lv 99 Chr (non-targetable)
  Bizarro-Sephiroth [B] Max HP = 2,000 +   250 per Lv 99 Chr
  Bizarro-Sephiroth [C] Max HP = 12,000 + 1,500 per Lv 99 Chr
  Bizarro-Sephiroth [D] Max HP = 8,000 + 1,000 per Lv 99 Chr
  Bizarro-Sephiroth [E] Max HP = 6,000 +   750 per Lv 99 Chr

Bizarro-Sephiroth will also adjust the Elements absorbed by some of the enemies according to their 'Group Formation ID':

```
  Bizarro-Sephiroth [D] set to absorb Ice and Lightning
  Bizarro-Sephiroth [E] set to absorb Ice and Lightning
```

--

• BIZARRO-SEPHIROTH: (3-Party Left "Sub 2" Version)

Bizarro-Sephiroth will also automatically adjust its HP according to the 'Group Formation ID' slot each enemy fills:

```
  Bizarro-Sephiroth [A] Max HP = 30,000 + 3,000 per Lv 99 Chr (non-targetable)
  Bizarro-Sephiroth [B] Max HP =  2,000 +   250 per Lv 99 Chr
  Bizarro-Sephiroth [C] Max HP = 12,000 + 1,500 per Lv 99 Chr
  Bizarro-Sephiroth [D] Max HP =  8,000 + 1,000 per Lv 99 Chr
  Bizarro-Sephiroth [E] Max HP =  6,000 +   750 per Lv 99 Chr
```

Bizarro-Sephiroth will also adjust the Elements absorbed by some of the enemies according to their 'Group Formation ID':

```
  Bizarro-Sephiroth [D] set to absorb Fire and Earth
  Bizarro-Sephiroth [E] set to absorb Fire and Earth
```

--

• SAFER-SEPHIROTH:

Bizarro-Sephiroth will also automatically adjust its HP according to various factors:

```
  Safer-Sephiroth's Max HP = 80,000 + 30,000 per Lv 99 Chr + 80,000 if KOTR
                                                          used against J-Synth
```

Safer-Sephiroth will also adjust its base stats:

```
  Safer-Sephiroth's Str  = 230 + 2  per Lv 99 Chr
  Safer-Sephiroth's Def  = 100 + 20 per Lv 99 Chr
  Safer-Sephiroth's Mag  = 100 + 5  per Lv 99 Chr
  Safer-Sephiroth's MDef = 180 + 16 per Lv 99 Chr
```

Safer-Sephiroth will also change its Row Value to 16 (Flying) on its fourth attack and will revert to its original form on its eighth turn.

--

• EYE:

```
               Base Dexterity = 254
   Blue (Outer) Eye Dexterity = 150
 Yellow (Inner) Eye Dexterity = 250
```

The Eye's for Emerald Weapon will begin with 254 Dexterity, and will be immediately overwritten according to its 'Group Formation ID'.

--

• RUBY WEAPON:

Ruby Weapon will automatically nullify Gravity and Water Elements, then will automatically set up the following resistances as soon as the battle begins:

Ruby Weapon set to absorb Fire, Ice, Lightning, Earth and Hidden

```
//>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
||>    {ENEMIES THAT CANNOT BE PRE-EMPTED}    <||
\\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~//
```

As explained in the Introduction section, various randomly-encountered enemies have been noted as being 'powerful' and as such, the Pre-Emptive Flag has been disabled, meaning they cannot be Back-Attacked.

Here is a list detailing each randomly encountered enemy in which Pre-Emptive Strikes have been disabled (or at least 'should' have been):

- Sweeper
- Vice
- Hell House (Can be Side-Attacked)
- Ghost
- Eligor
- Aero Combatant
- Mighty Grunt (Bug - 1x Might Grunt can be Pre-Empted)
- Hammer Blaster
- Sword Dance
- Warning Board + Machine Gun + Laser Cannon
- Devil Ride
- Custom Sweeper (Can be Side-Attacked)
- Mu
- Chocobo Lv 16
- Madouge
- Ark Dragon
- Formula
- Hell Rider VR2
- Grangalan (+ Jr. + Jr.Jr.)
- Bagnadrana
- 2-Faced
- Bandit
- Land Worm
- Harpy
- Flower Prong (Can be Side-Attacked)
- Kimara Bug
- Heavy Tank
- Griffin (Bug - 2x Skeeskee, 1x Griffin can be Pre-Empted)
- Golem
- Gi Spector (Bug - Gi Spector on 1st Screen of caverns can be Pre-Empted)
- Stinger
- Ghirofelgo
- Mirage
- Jersey
- Ying + Yang
- Sonic Speed
- Zuu
- Dragon
- Screamer
- Velcher Task (Bug - 2x Velcher Task in Larger Forests can be Pre-Empted)
- Adamantaimai
- Chocobo Lv 30
- Attack Squad

- Tonadu
- Kelzmelzer (Can be Side-Attacked)
- Toxic Frog
- Doorbull
- Ancient Dragon
- Jemnezmy
- 8 eye
- Vlakorados
- Trickplay
- Hungry
- Grimguard
- Acrophies
- Lessaloploth (Bug - 1x Lessaloploth in Icicle Snow Storm can be Pre-Empted)
- Ice Golem (Bug - 2x Ice Golem in Icicle Snow Storm can be Pre-Empted)
- Magnade
- Malboro
- Stilva
- Blue Dragon
- Gigas
- Ironite
- Sculpture
- Dragon Rider
- Killbin
- Tonberry
- Roulette Cannon
- Hippogriff
- Spiral
- Sea Worm
- Diablo (Bug - 2x Diablo in Ancient Forest Cavern can be Pre-Empted)
- Guard System + Quick Machine Gun + Locket Launcher
- Ghost Ship
- Corvette
- Diver Nest
- Guardian
- Gun Carrier
- Unknown
- Unknown 2
- Unknown 3
- Serpent
- Behemoth
- Manhole
- Grosspanzer (three variants)
- XCannon
- Maximum Kimaira
- Gargoyle
- Dark Dragon
- Scissors
- Master Tonberry
- King Behemoth
- Allemagne
- Armored Golem
- Christopher
- Gighee
- Mover
- Dragon Zombie
- Iron Man
- Mystery Ninja

For the reverse of this list (every Enemy that CAN be Back-Attacked), visit

the Damage Overflow section E.18 D.

```
 //>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
 ||>    {ENEMIES BY INDEX ID}     <||
 \\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~</\/
```

For the feature Enemy listings above, I have arranged the enemies by order of appearance, and *not* by ID. Below, however, you will find a listing of all enemies that *are* arranged by Index ID.

It's interesting to note that some enemies are not found where they should be amongst their peers. Take the Slaps, for example, which can be found amongst the Gongaga enemies. This suggests that initially, the Slaps were to be fought in Gongaga (instead of Woodlands Area). The same goes for Scissors which can be found amongst the Junon enemies on Disc 2, instead of the North Crater.

The enemies that you see that are entitled [No Name] aren't explicitly called "[No Name]"; they are called "". Exactly; their name field is entirely blank, so the title [No Name] is a description of the Enemy's name, not the name itself. The same thing can be said for any Enemy Attack labelled [No Name].

The blank entries that you see are just that; blank entries in the game's scene.bin.

```

As much as I love Final Fantasy VII, I have to admit that the game is like Cloud in so many ways; it's virtually broken, and very few people know! (or should I say knew...) This section is my way of moaning about the things that need moaning about. Feel free to add your own rant by e-mailing me - DynamixDJ@writeme.com. I will be sure to mention your name should you contribute to this section.

!!SPOILER ALERT!! Be sure not to read this section unless you have completed the game already.

```
````````````````````````````````````````````````````````````````````````````````
```

D1.01 B - “This isn't just a reactor!”

During the first Boss sequence you will be told to 'Attack while its tails up'! So, I attacked whilst its tail was up and it killed me. What gives?

O.k, so this is probably the oldest rant in the games history

```
````````````````````````````````````````````````````````````````````````````````
```

D1.03 B - Sector 4 Platforms

When you first meet President Shinra on the bridge of the reactor, he will claim that Cloud was previously in Soldier... even though Cloud never was in Soldier! Maybe he was just mistaken from the glow in Cloud's eyes, but something about the way he said it suggests otherwise.

```
````````````````````````````````````````````````````````````````````````````````
```

D1.06 B - Hojo's Laboratory

So what exactly was Hojo planning with Aeris and Red XIII??? It seems he was trying to mate them to make a, erm, Red Cetra? Or Aeris XIII...

```
````````````````````````````````````````````````````````````````````````````````
```

D1.06 C - Escaping From Shinra

Sephiroth, upon meeting the Midgar Zolom - “Dammit! I left the damn Masamune Blade back in the Shinra HQ! I'll just double back to fetch it...” Was (Jenova) Sephiroth just very forgetful, or was he able to spawn more copies of the Masamune blade as he did the first time (remember that it was actually Jenova in the form of Sephiroth).

```
````````````````````````````````````````````````````````````````````````````````
```

D1.07 B - The Nibelheim Incident

How does Cloud remember so much of something if he wasn't actually there to see it for himself? I'm talking about the part where Cloud waits outside the reactor to guard Tifa whilst Zack and Sephiroth venture inside.

```
````````````````````````````````````````````````````````````````````````````````
```

D1.09 C - Cargo Ship

Not a huge rant, but how exactly did the rest of Cloud's companions make it onto the Cargo Ship? I just though, imagine if they made a FF7 spin off where they basically made the same game but through the eyes of another character, say, Tifa! That would be cool...

```
```

D1.10 B - Mt. Corel/North Corel

When Barret and Dyne look out to the village of Corel, they are supposed to be looking at a desert followed by a horizon. So why then are they looking at forests surrounded by mountains? Plus, Corel is half a continent away!!

Bumb - one speculation is that what they were supposed to be looking at, before the story line had changed during development, was Gongaga. 'There was an explosion at a reactor' doesn't specify which reactor exploded, and originally this could have been referring to the ruined reactor in Gongaga. Either way, the cinematics makes little sense whatsoever.

```
```

D1.11 A - Gold Saucer

When you board the Ropeway 'cart' you'll notice that the propellors are on the upper side of the cart, but whilst the cinematics are playing on your first visit you'll see that they are on the lower side. Then they'll be on the upper side again when it boards at the Gold Saucer.

When you first approach the Battle Square (after recruiting Cait Sith) you will be lead to believe that Barret has shot the place up. This will later be clarified as being Dyne. WHY OH WHY (and how) would Dyne just 'hop' out of prison, shoot a few people in the Battle Square, and then just jump back down into the prison again? What the hell's all that about??

```
```

D1.15 B - Shinra Mansion

This one has bugged me for a long, long time. When we see Sephiroth in the basement of the Shinra Mansion (where we obtain the Destruct Materia), he tells us to go through Mt. Nibel. Why? Sephiroth's next destination was the Temple of The Ancients, and there is absolutely nothing waiting for us (that Sephiroth knows about) on the other side of Mt. Nibel.

My personal theory of this has been that there was meant to be an additional scene within the reactor itself, but due to the limitations of the PS1 discs, they were forced to edit it out. Perhaps a small encounter with Sephiroth and Cloud in the rooms with all the 'monster' tanks, where Sephiroth reveals a small insight into Cloud's past, and mentions the Temple of The Ancients as his next destination...

```
```

D1.16 A - Meet the Astrona.... errr, I mean Captain, Cid!

...How  did the plane just take off all by itself?? That whole scene seems pretty far-fetched.

```
```

D1.19 B - The Date

How exactly did Cloud work out that Sephiroth was after the Black Materia? As I recall, the first mention of the Black Materia was upon Cloud's first arrival to the Gold Saucer. If you speak to Dio, he will mention that a boy

of Cloud's age was asking about it. The second reference to the Black Materia comes from the weapon seller south of Gongaga (where you exchange the mythril). He talks about 'Ultimate Destructive Magic'. Cloud was then able to piece the two together... how exactly? He must be a detective of some sorts (Hot-Blooded Detective Joe).

During the date sequence, we learn of Cait Sith's true nature. We know that he has Marlene held captive somewhere... but that whole side-story never concludes! Do you think it's possible that Reeve just forgot about poor old Marlene and she starved to death? And yes I'm aware that the little girl in Kalm in the final cinematics is supposed to be Marlene, but that isn't conclusive.

```
```

D1.21 B - Corral Valley/City of The Ancients

I'm not sure where to begin here.

1) When you approach the alter Aeris is facing the stairs, but while the FMV is playing she has her back to the stairs. Once the FMV has finished she is facing the stairs again.

2) Whilst Sephiroth is descending on to of Aeris he has no gloves, but right at the end as he plunges his sword in he is wearing gloves.

3) When we first approach the alter the floor is almost transparent. Then when the FMV begins we see that it is chequered like a chess board. Then it changes to being hard brown, like marble, then it changes back to transparent after the FMV has finished.

4) As Holy falls out of Aeris's hair, her Ribbon falls off, then it (the ribbon) is back in her hair afterwards.

5) The only line that Jenova has in the entire game has a spelling mistake - 'beacause'.

6) When Cloud picks Aeris up she has her head to the right of Cloud, then when he drops into the water her head is to his left.

7) Did Cloud actually kill Aeris? I mean, she may have just been unconscious?? Also, it seems weird how Cloud can float whilst carrying Aeris.

```
```

D2.11 A - The Final Frontier

Cloud and his companions went out of their way to stop the Shinra from getting their hands on the Huge Materia as so that they could use them for their own deeds. But... what if the Shinra's plan had succeeded? I mean, it was a pretty good plan after all, and the Huge Materia isn't really necessary for Cloud to defeat Sephiroth.

```
```

D2.12 A - Bugenhagen's Laboratory

When you board the Highwind you can talk to Yuffie about her travel sickness. This is quite hilarious as Cloud will talk to Yuffie as though he still believes he was previously in Soldier! Maybe he was having a relapse, and his mind is still sick and twisted (or maybe the dev's made (another) mistake).

```
```

D3.03 C - Bizarro

When you kill Sephiroth you see blood dripping down his face. Why would they show blood on Sephiroth but not Aeris?

Welcome to the Quick-Search Index. Here you will find a reference to every Quick-Search Index Link contained within the guide.

How to use the Index:

Should you wish to learn more about (for example) 3D Battler, then type 3D Battler into the search field (using Control + F) AND SURROUND THE CRITERIA WITH BRACES {}. These are the keys above []. You will then be taken directly to the relevant part of the guide that teaches you about 3D Battler!

Some search criteria will have more than one entry, for example, a Zeio Nut which will be present in the Chocobo Breeding section E.14 and the Items section G.04.

Current unique entries: 983
Current  total entries: 1250

**********

This section is dedicated to all of the people who have influenced this guide. Thank you people, this guide wouldn't have been the same without you!!

All listings are arranged alphabetically.

* = Extra special thanks!!

 * Absolute Steve for the immense amount of content contained within his
   walkthrough/FAQ:
   http://www.gamefaqs.com/pc/130791-final-fantasy-vii/faqs/45703

 - BrutalAl for his help with Random Number Generators and other glitches.

 - sithlord48 for his Black Chocobo tool:
   http://forums.qhimm.com/index.php?topic=9625.0

 - Death_Unites_Us for info on certain glitches, and methods on defeating the
   WEAPONs. Also for making some great FFVII vids (search 4-8 Productions).

 - Ex-SOLDIER-13 for finding a hidden Potion in Sector 7.

 - ff7.fr for help with Cait Sith's Limits and Yuffie's Materia priority list:
   http://ff7.fr/

 - GideonD for his excellent Limit Break Mechanics Guide:
   http://www.gamefaqs.com/pc/130791-final-fantasy-vii/faqs/16441

 - GlassGiant.com for some of the ASCII artwork:
   http://www.glassgiant.com/ascii/

 * gmo7897 for his fantastic Chocobo Breeding Guide:
   http://www.gamefaqs.com/ps/197341-final-fantasy-vii/faqs/58077

 * James Baxter for his 7777 guide:
   http://www.gamefaqs.com/ps/197341-final-fantasy-vii/faqs/60479

 * JBedGames for Great Glacier help and infinite Elixir trick:
   https://www.youtube.com/watch?v=D7o2HKTI3rs

   Update! JBed has helped me out with quite a few coding related
   obscurities, and for that he gets upgraded to a *.

 - LaSaiaV2 for pointing out some of the Steam variations to me.

 - Dating script:
   http://letao.is-a-geek.net/ff7script/part12.html

 - Little Chiba for his FF7 Script faq.
   http://www.rpgamer.com/games/ff/ff7/ff7cscript.html

 - Master Epyon for Fort Condor Battles:
   http://www.gamefaqs.com/ps/197341-final-fantasy-vii/faqs/19004

 * MGSB for his Training/Random Encounter FAQ:
   http://www.gamefaqs.com/ps/197341-final-fantasy-vii/faqs/3149

 * myst6re for his Makou Reactor tool: <- IT'S ALL ABOUT THIS RIGHT HERE!!!
   http://forums.qhimm.com/index.php?topic=9658.0

 * NFITC1 for helping out tremendously with the games mechanics, and also for
   his Proud Clod tool, and Wall Market tool:
   Proud Clod  - http://forums.qhimm.com/index.php?topic=8481.0
   Wall Market - http://forums.qhimm.com/index.php?topic=7928.0

 - Shadow666 for helping out consistently on the forums.

 * TFergusson's has definitely done the most to help the FFVII community, and
   subsequently my guide with all of his Mechanic FAQs:
   Battle Mechanics:
   http://www.gamefaqs.com/ps/197341-final-fantasy-vii/faqs/22395
   Enemy Mechanics:
   http://www.gamefaqs.com/ps/197341-final-fantasy-vii/faqs/31903
   Party Mechanics:
   http://www.gamefaqs.com/ps/197341-final-fantasy-vii/faqs/36775
   Dating Mechanics:
   http://www.gamefaqs.com/ps/197341-final-fantasy-vii/faqs/2385
   Chocobo Mechanics:
   http://forums.qhimm.com/index.php?topic=3241.0

 - trueOgre_Killer for pointing out to me that the Trickplay is a *great*
   source of gil as an alternative to power Leveling up against the Sea Worm.

 - xPsychoMantis for his metronome idea on the Super Dunk game.

And of course, the games developers:

 * Hironobu Sakaguchi - Producer
 * Yoshinori Kitase   - Director, Writer
 * Kazushige Nojima   - Writer
 * Nobuo Uematsu      - Composer
