Normal Encounter: 3x Jayjujayme [B] in Front Row should cover:
1x Garuda in Back Row

Kelzmelzer (Temple of The Ancients):
Normal Encounter: 2x Kelzmelzer in Front Row
2x Toxic Frog in Back Row

- Various enemies that have been denoted as 'powerful', and as such the "Pre-Emptive" Flag will usually be disabled for encounters in which those enemies appear in. There are a few instances, however, where a single encounter has been accidentally given the "Normal Battle" (Pre-Emp ON) Flag:

Rocket Launcher (Sector 4): 1x Rocket Launcher, 2x Blugu #342
Mighty Grunt (Shinra HQ): 1x Mighty Grunt #419

```
  Griffin            (Cosmo Area Canyon): 2x Skeeskee, 1x Griffin        #127
  Gi Spector            (Cave of The Gi): 2x Forced Encounters on 1st Screen
  Velcher Task             (Rocket Area): 2x Velcher Task   #149, #150 & #158
  Kelzmelzer           (Woodlands Grass): 2x Kelzmelzer                   #190
  Lessaloploth  (Icicle Area Snow Storm): 1x Lessaloploth                 #208
  Ice Golem     (Icicle Area Snow Storm): 2x Ice Golem                    #209
  Diablo                (Ancient Forest): 2x Diablo                       #976
  Cromwell            (Sector 8 Catwalk): 1x Crazy Saw, 1x Cromwell       #826
```

The 2x Diablo encounter can only be found in the final cavern of the Ancient Forest. It's worth noting that the 2x Rilfsak and 1x Epiolnis encounter *does* have the Pre-Emp flag disabled, and usually, those enemies can be back-attacked. Given that the Ancient Forest Cavern was a late addition to the game, it's likely that the developers had denoted the wrong formation to have the Pre-Emp Flag disabled (the Formation ID for the Diablo is 976, and the ID for the Rilfsak/Epiolnis is 977, so an easy mistake to make).

- The Bridges in Wutai Area on the World Map contain encounter data, however, given that the bridges have a swinging motion, Cloud's X, Y & Z coordinates on the World Map could not be appropriately identified post-battle, and as such the battle would end by returning Cloud to the beginning of the bridge (had battles been enabled). Because of this, random encounters have been disabled while on those two bridges, but the encounter data still exists within the coding (all of the encounters there have the same "Bridge Battle Background" as seen in Mt. Corel).

If Random Encounters had not been disabled for the Bridge terrain, then it would have been one of the best areas to train in on Disc 1!

- The Goblin Island has no Beach terrain; when you battle around on the Beach, the game recognises that you are still on the grass and you will always fight the Dual Horn or Under Lizard with the Grass Battleground. The data exists within the rest of the Goblin Island Formations for the Beach encounters, which would have been either 1x Desert Sahagin or 2x Desert Sahagin ('Beach' Sahagins?), but for reasons unknown, the beach area was not assigned a different walkmesh terrain from the grass.

And now for the featured content!

For a more in-depth look into the game's Formation Data, explore my Enemy Formations Chart: https://pastebin.com/raw/MUcyFwwi

|  MAPS:                            APPEARANCE RATE: |   LOOKALIKES:          |
```

Sector 1 Train Station (Opening Screen)	67%	Blood Taste
Sector 1 "Meet Avalanche"	67%	Dark Nation
Sector 1 Back Alleyways	67%	
Sector 7 Train Graveyard "Moving Trains" 1st	27%	
Sector 5 Back of The Church	N/A	

Guard Hound's ATTACKS:

Manip Attack 1: Bite
Manip Attack 2: Tentacle

Attack 1: <Bite> — Physical [112]
Target: One Opponent
Element: Hit
Att%: 100
Power: 16
Base Damage: 8 HP
Berserk Attack

Attack 2: Tentacle — Physical [113]
Target: One Opponent
Element: Hit
Att%: 90
Power: 24
Base Damage: 12 HP

Guard Hound's BATTLE PLAN: (Repeats)

1/3 Chance: Use Tentacle on Target with Lowest Current HP
2/3 Chance: Use <Bite> on Target with Lowest Current HP

NOTE - The Guard Hound's AI Script is flawed, and does not play out as intended. Here is how the Guard Hound's Battle Plan *should* have looked:

Guard Hound's Unused BATTLE PLAN:

1/3 Chance: Use Tentacle on Target in Back Row with Lowest Current HP; If at least one Target is in Front Row, select Target with Lowest Current HP.

2/3 Chance: Use <Bite> on Target in Front Row with Lowest Current HP; If at least least one Target is in Back Row, select Target with Lowest Current HP.

Notes On Guard Hound:

Guard Hound is found in Battle Square:
Set - 1 (Before Tiny Bronco) Battle - 1

In the JORG version a group of Test Enemies could be fought in the Well of Corel Prison named êúô0(äñ). These test subjects took the same form as the Guard Hound, although in the later releases the Test Enemy was changed to the Pyramid Enemy. Explore the "Extra Enemies" section for more info on êúô0(äñ).

The Guard Hound is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy.

Grunt is in Back Row: 1/15 Chance use <Handclaw> on Rnd Target
15/16 Chance use Beam Gun on Rnd Target

The Players Rows are mixed:

Grunt is in Front Row: 1/2 Chance use Beam Gun on Rnd Target
1/2 Chance use <Handclaw> on Rnd Target

Grunt is in Back Row: 1/12 Chance use <Handclaw> Rnd Target
11/12 Chance use Beam Gun on Rnd Target

Notes On Grunt:	POWER req for Overflow:

| Grunt is found in Battle Square:
| Set - 1 (Before Tiny Bronco) Battle - 1
|
| In the 1996 Demo Release, the Grunts were
| called Combatants, and appeared alongside
| the boss, which was a large version of the
| Sweeper as opposed to the Guard Scorpion.
| The writing on their arm translates as "Flammable".
| The test Enemy êúô1() originally took the same model as the Grunt in the
| JORG release, however, in the later releases the model was changed to
| that of the Pyramid. Visit the "Extra Enemies" section for more info on
| êúô1().
| The Grunt is encountered in an area that cannot be revisited; once you
| progress past a certain point in the game, you can no longer fight the
| enemy.

|                              Base Damage: 31 HP                              |
```

Attack 3: Smoke Shot	Target: One Opponent	Can't Cover
[119] Physical	Element: Shoot	
	Att%: 75	
	Power: 24	
	Base Damage: 27 HP	

Sweeper's BATTLE PLAN: (Repeats)

OPENING ATTACK: 1/3 Chance start from 1st Attack
1/3 Chance start from 2nd Attack
1/3 Chance Start from 3rd Attack

1ST ATTACK: Use Smoke Shot on Rnd Target without Darkness; If all Targets have Darkness, select Rnd Target
2ND ATTACK: Use <Machine Gun> on Target with Lowest Current HP
3RD ATTACK: Use W Machine Gun on Target with Highest Current HP

Notes On Sweeper:	POWER req for Overflow:
Sweeper is found in Battle Square: Set - 1 (Before Tiny Bronco) Battle - 2	Base Damage Overflow: 144 Rnd Var Overflow 3x: 96

The Sweeper's Smoke Shot searches for a Player that is not inflicted with Darkness, however, the Player cannot be inflicted with Darkness at this stage in the game. This suggests that Smoke Shot should have inflicted Darkness (the name also supports that theory). The Custom Sweeper uses the same Attack, and the same check for Darkness is carried out.
In the 1996 Demo, a larger version of the Sweeper could be found as the boss instead of the Guard Scorpion.
The Sweeper cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.
The Sweeper is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy.

|                                                                               |
|  STAGE 1: (Tail Down)                                                         |
|                                                                               |
|   1ST ATTACK: Use Search Scope on Rnd Target, selects Target for next         |
|               turn. Display String: [Locked on Target]                        |
|                                                                               |
|   2ND ATTACK: 1/3 Chance use Scorpion Tale on Selected Target                 |
|               2/3 Chance use Scorpion Tale on Selected Target; If Guard       |
|                    Scorpion's HP <= 50%, use Rifle                            |
|                                                                               |
|   3RD ATTACK: Same as 1st Attack                                              |
```

4TH ATTACK: Same as 2nd Attack

5TH ATTACK: Use <[No Name]> on Self, transform to Stage 2 (Tail Up)
Set Defence to 255 and MDefence to 384

STAGE 2: (Tail Up)

The following strings of text are displayed once only, the first time the Guard Scorpion enters Stage 2:

If Cloud is alive & Barret is dead:
Display String: [Cloud "It's gonna fire that laser…"]
["Attack while it's tail's up!]
[It's gonna counterattack with its laser."]

If Cloud & Barret are both alive:
Display String: [Cloud "Barret, be careful!"]
["Attack while it's tail's up!]
[It's gonna counterattack with its laser."]

If Cloud is dead & Barret is alive:
Display String: [Barret "I dunno what's goin' on, but…]
[it looks pretty bad.]
[Let's see what it does when it's tail's up…"]

1ST ATTACK: Skip a turn
2ND ATTACK: Skip a turn

3RD ATTACK: Use <[No Name]> on Self, transform to Stage 1 (Tail Down)
Set Defence back to 40 and MDefence back to 256

COUNTER: [All Physical and Magical Attacks]

STAGE 1: Do nothing
STAGE 2: Use Tail Laser on All Targets

Notes On Guard Scorpion:

Even though the Guard Scorpion's base MDef value is 300, the AI Script sets the MDef to 256 as the default stat.

1st Stage: Def = 40 MDef = 256
2nd Stage: Def = 255 MDef = 384

POWER req for Overflow:

1st Stage:
Base Damage Overflow: 150
Rnd Var Overflow 3x: 100

2nd Stage:
Base Damage Overflow: 275
Rnd Var Overflow 3x: 183

There is an unused "Rifle" Attack that is set to target the Guard Scorpion by default. It is unclear what this Attack was intended for.
The line "Attack while it's tail's up!" is a classically misleading line, which confused many players in the early days. It was meant as a warning, but instead was interpreted as an instruction.
In the 1996 Demo, the Guard Scorpion was replaced with a larger version of the Sweeper (alongside 2x Grunt).
If the Guard Scorpion is killed while in its 2nd Form, it will first revert back to its original Form before playing the death animation.
Tail Laser Attacks all Targets, and therefore has the "Split Damage" Flag enabled, meaning it will hit for 66% of its normal Damage.
Instead of hearing the normal "Still More Fighting" Boss Theme, you will hear the normal "Bombing Mission" Theme.

```

Attack 2: Silk
[122] Magical 0 Dam
Target: One Opponent
Att%: 90
Status Inflict: Slow (100%)

Grashtrike's BATTLE PLAN: (Repeats)

Use Silk on Rnd Target without Slow; If all Targets have Slow, use <Sickle> on Rnd Target

Notes On Grashtrike:

Grashtrike is found in Battle Square: Set - 1 (Before Tiny Bronco) Battle - 1

The Player should increase the Battle Speed in the menus up all the way to deal with the Grashtrike's Silk Attack.

Although a rare drop, it's worth trying to grab a few Spider Webs (casts Slow on all opponents), seeing as many Enemies and Bosses are vulnerable to Slow.

The Grashtrike is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy.

POWER req for Overflow:

Base Damage Overflow:	143
Rnd Var Overflow 3x:	96
Rnd Var Overflow 4x:	72
Rnd Var Overflow 6x:	48

|  2ND ATTACK: Use Rocket Launcher on Target with Lowest Current HP          |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Rocket Launcher: (Sector 4)       |   POWER req for Overflow:   |
|                                              |                             |
| This Rocket Launcher looks identical to the  |  Base Damage Overflow: 139  |
|  Rocket Launcher found as part of the Guard  |  Rnd Var Overflow  3x:  93  |
|  System (Junon Disc 2).                      |  Rnd Var Overflow  4x:  70  |
| There are four formations in which the       |  Rnd Var Overflow  6x:  47  |
|  Rocket Launcher appears in, and in three of o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  these formations the "Pre-Emp" Flag has                                   |
|  been disabled, meaning you should not be able to Back Attack the Rocket   |
|  Launcher. However, due to an oversight you will have a chance of Back     |
|  Attacking the single Rocket Launcher alongside the 2x Blugu in Sector 4   |
|  (Formation ID #343).                                                      |
| Given the Rocket Launcher's high MDef stat, avoid using Magical Attacks.   |
```

| The Rocket Launcher is encountered in an area that cannot be revisited; once you progress past a certain in the game, you can no longer fight the enemy. |

Blugu's ATTACKS:

Manip Attack 1: Bodyblow
Manip Attack 2: Hell Bubbles

Attack 1: <Bodyblow> [126] Physical
Target: One Opponent
Element: Hit
Att%: 95
Power: 16
Base Damage: 8 HP
Berserk Attack

Attack 2: Hell Bubbles [127] Magical 0 Dam
Target: One Opponent
Att%: Auto Hit
Status Inflict: Sleep (79%)

Blugu's BATTLE PLAN: (Repeats)

OPENING ATTACK: 1/4 Chance start from 1st Attack
1/4 Chance start from 2nd Attack
1/4 Chance start from 3rd Attack
1/4 Chance start from 4th Attack

1ST ATTACK: Use <Bodyblow> on Rnd Target with Paralyzed; If no Targets have Paralyzed, select Rnd Target

2ND ATTACK: Same as 1st Attack
3RD ATTACK: Same as 1st Attack

After 3rd Attack: 1/3 Chance jump to 4th Attack for next turn
2/3 Chance jump to 2nd Attack for next turn

4TH ATTACK: Use Hell Bubbles on Rnd Target without Paralyzed; If all Target have Paralyzed, use <Bodyblow> on Rnd Target

Notes On Blugu:

Blugu is found in Battle Square:
Set - 1 (Before Tiny Bronco) Battle - 2

The Blugu's Attacks are coded to target Players that are inflicted with Paralyzed, which is a redundant feature of the AI Script seeing as there is no way for the Player to be inflicted with Paralyzed at that point in the game.

The Blugu has unusually high Def and MDef compared to other enemies encountered at that point in the game; it Defence is that of Emerald Weapon's.

The Blugu is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy.

The Blugu is an 'elevated' enemy; although, you cannot exploit an enemy's weakness to the Wind Element until you reach the Chocobo Ranch.

POWER req for Overflow:

Base Damage Overflow: 213
Rnd Var Overflow 3x: 142
Rnd Var Overflow 4x: 107
Rnd Var Overflow 6x: 71

Reactor 5 Large Interior Complex W Slide 27%	Machine Gun
Reactor 5 Upper Catwalk 27%	Quick Machine Gun
Reactor 5 Core (Save Point) 33%	
Reactor 5 Valve (No Guard Scorpion) 33%	
Reactor 5 Panel Pushing & Save Point 40%	

Proto Machinegun's ATTACKS:

Manip Attack 1: Machine Gun

Attack 1: Machine Gun — Target: One Opponent — Berserk Attack
[110] Physical — Element: Shoot
Att%: 100
Power: 16
Base Damage: 12 HP

Proto Machinegun's BATTLE PLAN: (Repeats)

1ST ATTACK: Use Machine Gun on Target with Lowest Current HP
2ND ATTACK: Skip a turn

Notes On Proto Machinegun:

All + Lightning works well to dispatch the groups of Proto Machineguns you encounter. Only some of the formations have the "Pre-Emp" Flag off, meaning you can back-attack some but not all of the Proto Machinegun encounters. If there are three or more Proto Machineguns then you cannot Back-Attack them; less than three and you can Back-Attack them.

The Proto Machinegun is encountered in an area that cannot be revisited; once you progress past a certain in the game, you can no longer fight the enemy.

MAPS:	APPEARANCE RATE:	LOOKALIKES:
Reactor 5 Core (Save Point)	67%	Guard Hound
Reactor 5 Valve (No Guard Scorpion)	67%	Dark Nation
Reactor 5 Panel Pushing & Save Point	39%	

Blood Taste's ATTACKS:

Manip Attack 1: Bite
Manip Attack 2: Tentacle Drain

Attack 1: <Bite> — Physical [112]
Target: One Opponent
Element: Hit
Att%: 100
Power: 16
Base Damage: 12 HP
Berserk Attack

Attack 2: Tentacle Drain — Physical [12C]
Target: One Opponent
Element: None
Att%: 110
Power: 10
Base Damage: 7 HP
Drains HP

Blood Taste's BATTLE PLAN:

NOTE - The Blood Taste targets the last Player to attack it. If it hasn't taken any damage, select a Rnd Target and keep attacking that target until damage is taken.

1st Attack and 2nd Attacks gave set chances of being triggered based on Blood Taste's Current HP:

Blood Taste's HP > 75%: 1/8 Chance use 1st Attack
7/8 Chance use 2nd Attack

Blood Taste's HP <= 75%: 1/3 Chance use 1st Attack
2/3 Chance use 2nd Attack

Blood Taste's HP <= 50%: 1/2 Chance use 1st Attack
1/2 Chance use 2nd Attack

Blood Taste's HP <= 25%: Use 1st Attack

1ST ATTACK: Blood Taste's HP = 100%: Use <Bite> on Last Attacker; If Last Attacker has Death, select Rnd Target

Blood Taste's HP < 100%: Use Tentacle Drain on Last Attacker; If Last Attacker has Death, select Target with Highest Current HP

2ND ATTACK: Use <Bite> on Last Attacker; If Last Attacker has Death, select Rnd Target

Follow-Up: Blood Taste's HP > 75%: 1/8 Chance repeat 2nd Attack
Blood Taste's HP <= 75%: 1/3 Chance repeat 2nd Attack
Blood Taste's HP <= 50%: 1/2 Chance repeat 2nd Attack

Notes On Blood Taste:

POWER req for Overflow:

There are two screens in which you can encounter 3x Blood Taste as a Back-Attack: Reactor 5 Save Point core, and Reactor 5 "Valve" (where you previously fought the Guard Scorpion). The "Cover" Flag is not working correctly here, which means you can attack the Blood Taste in the Back Row before killing the first two.	Base Damage Overflow: 144 Rnd Var Overflow 3x: 96 Rnd Var Overflow 4x: 72 Rnd Var Overflow 6x: 48
The lower the Blood Taste's HP, the higher the chance it'll have of using <Bite> twice consecutively in one turn, until its HP is less then 25%. At which point, the Blood Taste will only use Tentacle Drain until its HP is greater than 25% again (seeing as Tentacle Drain will absorb roughly 5 HP per use).	
The Blood Taste is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy.

Reactor 5 "T" Shaped Walkway

LOOKALIKES:

No Manipulate Attacks!

Air Buster's ATTACKS:

Attack 1: Rear Gun
[130] Physical
[133]
Target: One Opponent
Element: Shoot
Att%: 115
Power: 20
Base Damage: 43 HP

Attack 2: Big Bomber
[12E] Physical
[131]
Target: One Opponent
Element: Shoot
Att%: 100
Power: 50
Can't Cover

	Base Damage: 109 HP	
Attack 3: Energy Ball [12F] [132]	Target: One Opponent Physical Element: Shout Att%: 100 Power: 30 Base Damage: 65 HP	Can't Cover
Attack 4: <Bodyblow> [12D] [1A9]	Target: One Opponent Physical Element: Hit Att%: 95* Power: 40 Base Damage: 87 HP	
Attack 5: <[No Name]> [11F] [120]	Target: Self Physical 0 Dam Att%: Auto Hit	Turning Animation
Attack 6: <Destroyed> [396] [397]	Target: Self Physical 0 Dam Att%: Auto Hit	Death Animation

Air Buster's BATTLE PLAN:

NOTE - When Air Buster's HP reaches less than 20%, it will display the text string: [Turn Function non-operational]. Air Buster will not be able to turn from this point onwards.

SETUP: Disable default Death handling, start facing Cloud

PHASE 1:

Display String: [Program 1 Operation]

1ST ATTACK: Use Big Bomber on Rnd Target
2ND ATTACK: Use Big Bomber on Rnd Target
3RD ATTACK: Use Big Bomber on Rnd Target
4TH ATTACK: Use Big Bomber on Rnd Target

Uses Turning Animation if not facing Selected Target.

After 4 uses of Big Bomber Air Buster moves onto Phase 2. If its HP <= 25% before this point, it will move onto Phase 2 early ONLY if it's facing Cloud's Row and cloud has Death or Petrify, OR, if it is facing Barret's Row and Barret and Tifa both have Death or Petrify.

PHASE 2: (Repeats)

OPENING ATTACK: Display String: [Big Bomber's out of ammo.]
[Program 2 Operation]

THEREAFTER: Use Energy Ball on Rnd Target; If Air Buster is not facing Selected Target, use Rear Gun

COUNTER: [All Physical and Magical Attacks]

```
|   Facing Attacker: Do nothing                                                |
|                                                                              |
|   Back to Attacker: Display String: [Counter Attack]                         |
|                                                                              |
|    Air Buster's HP  > 20%: 2/3 Chance use <Bodyblow> on Last Attacker        |
|                                Use Turning Animation                         |
|                            1/3 Chance use Rear Gun on Last Attacker          |
|                                                                              |
|    Air Buster's HP <= 20%: Use Rear Gun on Last Attacker                     |
|                                                                              |
|                                                                              |
|  DEATH: Use <[Destroyed]> on Self, end Battle                                |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Air Buster:                      |   POWER req for Overflow:      |
|                                             |                                |
| This Boss-Battle is a Side-Attack formation, |  Base Damage Overflow: 164    |
|  with Cloud on the right, and Barret & Tifa  | Rnd Var Overflow   3x: 109    |
|  on the left.                                | Rnd Var Overflow   5x:  66    |
| No Victory Pose will be seen once Air Buster | Rnd Var Overflow 7.5x:  44    |
|  has been defeated; also, Air Buster has a   | Rnd Var Overflow  10x:  33    |
|  unique death animation.                     | Rnd Var Overflow  15x:  22    |
| The Air Buster is one of three enemies that  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  takes greater than normal Back Damage, the                                  |
|  other two being Aps and Acrophies. Air Buster takes 5x normal Damage from   |
|  Back-Attacks, and therefore one can be hit for 10x Damage if one also       |
|  land a critical, which will be roughly a 4% ~ 6% chance against Air         |
|  Buster for this stage in the game.                                          |
| The Player should utilise this weakness as a strategy; although Air Buster   |
|  has a weakness to Lightning, the Player can deal more than twice as much    |
|  damage if they can coordinate their Attacks so they always attack Air       |
|  Buster Physically from behind. Cloud's "Braver" Limit Break will hit for    |
|  over 700 if used from behind.                                               |
| Air Buster actually has 12 Attacks instead of 6; each one of his Attacks     |
|  has been duplicated, and it will call on one or the other depending on      |
|  which direction he is facing.                                               |
| A slight mistake was made with the <Bodyblow> Attack; the two variants       |
|  should have been identical, however, the <Bodyblow> Air Buster uses when    |
|  facing Cloud has an Att% of 95, and when facing Barret/Tifa it has an       |
|  Att% of 90. In real terms, this shouldn't make any noticeable difference,   |
|  seeing as your Def% should be about 4 at this stage in the game, and as     |
|  such <Bodyblow> will have a 100% chance of hitting, until your Def%         |
|  reaches 12 if the Att% is 90, or your Def% reaches 17 if the Att% is 95.    |
| If the Attack does miss, that's because you have a "Lucky Evade Chance"      |
|  every time you are attacked, and at that stage in the game your chance of   |
|  evading all (Physical) Attacks is approximately 4.5% (based on a Luck       |
|  value of 20).                                                               |
| When Air Buster checks to see which Characters are KO'd, it also checks to   |
|  see if any of them have Petrified. This suggests that one of its Attacks    |
|  may have originally been designed to inflict Petrify, or, the check could   |
|  just be there as a Copy + Pasted "safety net".                              |
| Air Bomber is one of a number 'elevated' enemies that Nullifies the Earth    |
|  Element, but will no take double damage from Wind.                          |
\                                                                              /

|                                                                               |
|  NOTE - The Whole Eater targets the last Player to attack it. If it hasn't    |
|         taken any damage, select a Rnd Target and keep attacking that         |
|         target until damage is taken. If the Last Attacker has Death,         |
|         select a Rnd Target.                                                  |
|                                                                               |
|                                                                               |
|  Whole Eater's HP  > 50%: 1/8 Chance use <Sickle> on Last Attacker            |
|                           7/8 Chance do nothing                               |
|                                                                               |
|                  Follow-Up: Use <Sickle> on Rnd Target                        |
|                                                                               |
|                                                                               |
|  Whole Eater's HP <= 50%: 1/2 Chance use <Sickle> on Last Attacker            |
|                           1/2 Chance do nothing                               |
|                                                                               |
```

```
|               Follow-Up: Use <Sickle> on Rnd Target                          |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Whole Eater:                      |   POWER req for Overflow:     |
|                                              |                               |
| Whole Eater is found in Battle Square:       |  Base Damage Overflow: 142    |
|  Set - 1 (Before Tiny Bronco)  Battle - 2    |  Rnd Var Overflow  3x:  95    |
|                                              |  Rnd Var Overflow  4x:  71    |
| The Whole Eater shouldn't be underestimated, |  Rnd Var Overflow  6x:  48    |
|  specifically the encounters on the Sector 6 o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Destroyed Road; they come in groups of 4,                                   |
|  and can double up on their uses of <Sickle>, so watch out! Especially in   |
|  Battle Square, where their Strength value has been multiplied by 1.25.     |
\                                                                              /

|   Vice's BATTLE PLAN:                                                       |
|                                                                             |
|  NOTE - The Vice targets the last Player to attack it. If it hasn't taken   |
|          any damage, select a Rnd Target. If the Last Attacker has Death,   |
|          select a Rnd Target.                                               |
|                                                                             |
|                                                                             |
|  PHASE 1: (Repeats)                                                         |
|                                                                             |
|   1/6 Chance use Grind on Last Attacker                                     |
|   1/6 Chance use Steal on Last Attacker                                     |
|   4/6 Chance skip a turn                                                    |
|                                                                             |
|    After using Steal or Grind the Vice moves onto Phase 2.                  |
|                                                                             |
|                                                                             |
|  PHASE 2: (Repeats)                                                         |
|                                                                             |
|   OPENING ATTACK: 1/3 Chance use <Escape> on Self, remove Self from         |
|                        Battle, leave no rewards                             |
|                   2/3 Skip a turn                                           |
|                                                                             |
|                                                                             |
|   THEREAFTER: 1/2 Skip a turn                                               |
|               1/2 Chance use <Escape> on Self for next turn, remove Self    |
|                    from Battle, leave no rewards                            |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Vice:                          |   POWER req for Overflow:       |
|                                           |                                 |
| If the Vice manages to escape the battle, |  Base Damage Overflow: 142      |
|  then the Item stolen is lost forever.    |  Rnd Var Overflow  3x:  95      |
| When attempting to steal, the Vice will   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  always have a 100% success rate of                                         |
|  stealing. An item is always chosen at random from your available           |
|  inventory, provided that the Item can be sold in the shops. If the Vice    |
|  cannot steal an Item from you, it will still continue to flee the battle   |
|  after the steal attempt.                                                   |
| Killing the Vice that has stolen from you is the only way to retrieve the   |
|  item stolen.                                                               |
| The Vice can and will steal your most powerful Weapons, Armour and          |
|  Accessories, so always be cautious when battling them.                     |
| Although the Attacks <Hit> and Seize can be found on the Vice, they are     |
|  never scripted to be used, and <Hit> can only be seen if the Vice is       |
|  Manipulated or Berserked. This means that the Vice will never deal any     |
|  damage to the player.                                                      |
| Given its low MDef, using magic is a good idea to dispatch the Vice         |
|  quickly.                                                                   |
| Although risky, the Player can decide to try to "Vice-Versa" the situation  |
|  and attempt to steal from the Vice; Speed Drinks can be very useful early  |
|  on in the game, as there is no other way to cast Haste on your characters  |
|  until later on. You won't have the Steal Materia on your first encounter   |
|  with the Vice, so you'd have to steal from them following the first Turks  |
```

```
|  Battle with Reno. A Lv 12 Cloud would have a 45.31% chance of stealing    |
|  from the Vice.                                                            |
| The Vice cannot be Back-Attacked or Side-Attacked, meaning that one cannot |
|  perform Random Variation Overflow with 4x or 6x Damage.                   |
\                                                                            /

|                                                                                |
|   Hell House's HP >  75%: Do nothing                                           |
|                                                                                |
|   Hell House's HP <= 75%:                                                      |
|                                                                                |
|    1/2 Chance: Do nothing                                                      |
|    1/2 Chance: Use Suicide Drop on All Targets, transform to 2nd Form,         |
|                transfer remaining HP, leave no rewards                         |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Hell House: (1st Form)            |   POWER req for Overflow:       |
|                                              |                                 |
| If you kill both versions of the Hell House, |  Base Damage Overflow: 139      |
|  then the end-of-battle rewards do NOT       |  Rnd Var Overflow  3x:  93      |
|  stack, which means if you manage to kill    |  Rnd Var Overflow  4x:  70      |
|  the Hell House while it is in its 1st Form  |  Rnd Var Overflow  6x:  47      |
|  you will receive 250 gil instead of 200.    o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  The EXP and AP values remain the same.                                        |
| The Hell House gives a good amount of gil, which is helpful for the            |
|  upcoming Wall Market events.                                                  |
| Use Magic Attacks to deal with the Hell House's high HP.                       |
| The Suicide Drop Attack is the first Attack that we've seen that targets       |
|  All Opponents since the Guard Scorpion's Tail Laser.                          |
| Suicide Drop Attacks all Targets, and therefore has the "Split Damage"         |
|  Flag enabled, meaning it will hit for 66% of its normal Damage.               |
| The 1st Form Hell House is immune to Death Sentence, whereas the 2nd From      |
|  is vulnerable.                                                                |
| Given its low Def value, the Hell House is the 2nd best enemy for              |
|  practising Damage Overflow against (2nd to the Bizarre Bug).                  |
| The Hell House cannot be Back-Attacked, but it can be Side-Attacked.           |
\                                                                                /

|  MAPS:                              APPEARANCE RATE: |   LOOKALIKES:         |
```

Sector 6 Destroyed Road	62%	

Hell House's ATTACKS: (2nd Form)	No Manipulate Attacks!

Attack 1: <Bodyblow>	Target: One Opponent		
[12D] Physical	Element: Hit		
	Att%: 90		
	Power: 40		
	Base Damage: 107 HP		
Attack 2: Suicide Drop	Target: All Opponents	Split Damage	
[13F] Physical	Element: Earth		
	Att%: 255		
	Power: 16		
	Base Damage: 43 HP		
Attack 3: Lunattack	Target: One Opponent		
[140] Physical	Element: Hit		
	Att%: 90		
	Power: 28		
	Base Damage: 75 HP		
Attack 4: Hell Press	Target: One Opponent		
[141] Physical	Element: Hit		
	Att%: 100		
	Power: 24		
	Base Damage: 64 HP		

Hell House 2nd Form's BATTLE PLAN: (Repeats)

1/4 Chance: Use Suicide Drop on All Targets
1/4 Chance: Use Use Hell Press on Rnd Target
1/2 Chance: Use <Bodyblow> on Rnd Target in the Front Row; If all Targets are in the Back row, select Rnd Target

COUNTER: [All Physical and Magical Attacks]

Hell House's HP > 25%: Do nothing

Hell House's HP <= 25%: 1/4 Chance use Lunattack on Last Attacker
3/4 Chance do noting

Notes On Hell House: (2nd Form)	POWER req for Overflow:
If you kill both versions of the Hell House, then the end-of-battle rewards do NOT stack, which means if you manage to kill the Hell House while it is in its 1st Form you will receive 250 gil instead of 200. The EXP and AP values remain the same.	Base Damage Overflow: 139 Rnd Var Overflow 3x: 93 Rnd Var Overflow 4x: 70 Rnd Var Overflow 6x: 47

The Hell House 2nd Form's HP is equal to the Hell House 1st Form's HP at the point in which it transformed, which will be after its first use of Suicide Drop.
The 2nd version of the Hell House has all of its stats slightly boosted, except for its Def stat which remains at 2. Regardless, you still want to use Magic Attacks to deal with the Hell House 2nd Form, as you'll only be dealing approximately 7HP less damage than you would against its

```
|  counterpart.                                                                |
| The 2nd Form Hell House is vulnerable to Death Sentence, whereas the 2nd     |
|  From is immune.                                                             |
| Suicide Drop Attacks all Targets, and therefore has the "Split Damage"       |
|  Flag enabled, meaning it will hit for 66% of its normal Damage.             |
| Given its low Def value, the Hell House is the 2nd best enemy for            |
|  practising Damage Overflow against (2nd to the Bizarre Bug).                |
| Watch out for the Hell House 2nd Form's <Bodyblow> Attack - it hits hard!    |
|  You should have acquired Cover by this point in the game, so it would be    |
|  a good idea to equip it on Cloud to protect Aeris, or, equip it on Aeris    |
|  to get a head start in her Limit levelling!                                 |
| The Hell House cannot be Back-Attacked, but it can be Side-Attacked.         |
\                                                                              /

|   Scotch's BATTLE PLAN:                                                   |
|                                                                           |
|  NOTE - Scotch targets the last Player to attack it. If it hasn't taken   |
|         any damage, select a Rnd Target and keep attacking that target    |
|         until damage is taken. If the Last Attacker has Death, select Rnd |
|         a Target.                                                         |
|                                                                           |
|                                                                           |
|  PHASE 1: (Repeats)                                                       |
|                                                                           |
|   Use <Hit> on Last Attacker                                              |
|                                                                           |
|    Scotch moves onto Phase 2 when the following condition is met:         |
|      Any Corneo's Lackey's HP <= 50%                                      |
|                                                                           |
|    Scotch moves onto Phase 3 when one of the following conditions are met: |
|      An Enemy has died                                                    |
|      Scotch has been attacked                                             |
|                                                                           |
|                                                                           |
|  PHASE 2: (Repeats)                                                       |
|                                                                           |
|   Use <Machine Gun> on Last Attacker                                      |
|                                                                           |
|                                                                           |
|  PHASE 3: (Repeats)                                                       |
|                                                                           |
|   Use <Machine Gun> on Last Attacker                                      |
|   Use <Machine Gun> on Last Attacker (Follow-Up)                          |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Scotch:                       |   POWER req for Overflow:      |
|                                          |                                |
| Scotch is a unique enemy, and while he is |  Base Damage Overflow: 147     |
|  technically considered a Mini-Boss, he  |  Rnd Var Overflow  3x:  98     |
|  should not be considered a threat. Four |  Rnd Var Overflow  4x:  74     |
|  uses of your Physical Attacks, or two casts |  Rnd Var Overflow  6x:  49  |
|  of your Magic should be enough to kill him. o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| When Scotch is attacked (even from 0 Damaging Attacks/Items), it will     |
|  trigger Corneo's Lackey to move onto Phase 2 of its Battle Plan. It will |
|  also trigger Scotch to start using <Machine Gun> twice consecutively in a |
|  single turn.                                                             |
\                                                                           /

|   Aps's BATTLE PLAN:                                                    |
|                                                                         |
|  OPENING ATTACK: Use Sewer Tsunami on Whole Field (Front Attacks Party) |
|                                                                         |
|                                                                         |
|  PHASE 1: (Repeats)                                                     |
|                                                                         |
|   1/4 Chance use Lick on 2nd Target; If 2nd Target has Death, select Rnd |
|       Target                                                            |
|   3/4 Chance use <Tail Attack> on Rnd Target in Back Row; If all Targets |
|       are in Front Row, select Rnd Target                               |
|                                                                         |
|    If Aps takes Magical Damage at any point, OR Physical Damage once Aps |
|     HP <= 33%, move onto Phase 2                                        |
|                                                                         |
|                                                                         |
|  PHASE 2:                                                               |
|                                                                         |
|   1ST ATTACK: Skip a turn                                               |
|   2ND ATTACK: Use Sewer Tsunami on Whole Field (Front Attacks Party)    |
|   3RD ATTACK: Skip a turn                                               |
|   4TH ATTACK: Use Sewer Tsunami on Whole Field (Back Attacks Party)     |
|                                                                         |
|    After 4th Attack, move back to Phase 1 until the conditions are met to |
|     move onto Phase 2 once more.                                        |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Aps:                          |   POWER req for Overflow:    |
|                                          |                              |
| The "2nd Target" is the Character that you |  Base Damage Overflow: 149  |
|  have placed in the middle, which will be  |  Rnd Var Overflow  3x:  99  |
|  Aeris by default if you didn't change the |  Rnd Var Overflow  4x:  75  |
|  order of your party before the fight.     |  Rnd Var Overflow  6x:  50  |
| Make sure your 2nd Player is the only Player |  Rnd Var Overflow  8x:  38  |
|  in the Back Row, seeing as they are likely |  Rnd Var Overflow 12x:  25  |
|  to be inflicted with Sadness when Aps uses  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Lick. This means they will always be                                   |
|  targeted when Aps uses <Tail Attack>, and will take less damage as a   |
|  result of Sadness. Aeris is the ideal Character to use for this, given |
|  her healing Limit Break ability. She will only take roughly 24 HP per hit |
```

```
|  of <Tail Attack> with this setup.                                          |
| Aps is one of three enemies that takes greater than normal back damage,     |
|  the other two being Air Buster and Acrophies. Aps takes 4x Normal Damage   |
|  from Back-Attacks, and therefore one can be hit for 8x Damage if one also  |
|  land a Critical with the Back-Attack, which will be roughly a 2.5% ~ 5%    |
|  chance against Aps for this stage in the game.                             |
| The Aps Boss Battle is one of five Boss Battles in which the "Pre-Emp"      |
|  Flag has been mistakenly enabled, meaning you have a chance of             |
|  encountering it as a Pre-Emptive Strike and can land a cheeky Back-Attack  |
|  for 4x Damage.                                                             |
| When Aps uses the Sewer Tsunami which Front Attacks your Party, Aps will    |
|  take Back Damage and be hit for 180 - 192 HP. When he uses the Sewer       |
|  Tsunami which Back Attacks your Party, Aps will take Normal Damage and be  |
|  hit for 45 - 48 HP.                                                        |
| Sewer Tsunami Attacks all Targets, and therefore has the "Split Damage"     |
|  Flag enabled, meaning it will hit for 66% of its normal Damage.            |
| If you have managed to unlock Cloud's Lv 1-2 Limit Cross Slash, or Aeris's  |
|  Lv 1-2 Limit Seal Evil, then you can use either to exploit Aps's           |
|  vulnerability to Paralyzed.                                                |
\                                                                             /

|                                                                              |
|                                                                              |
|  COUNTER: [All Actions made by All Players and Enemies]                      |
|                                                                              |
|    1/16 Chance: Use <Shell Defense> on Self, sets Def to 512 until the       |
|                 next action is performed                                     |
|   15/16 Chance: Do nothing                                                   |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Sahagin:                          |   POWER req for Overflow:     |
|                                              |                               |
| Sahagin is found in Battle Square:           |  Base Damage Overflow: 147    |
|  Set - 1 (Before Tiny Bronco)  Battle - 2    |  Rnd Var Overflow  3x:  98    |
|                                              |  Rnd Var Overflow  4x:  74    |
| The Sahagin is one of a few Enemies that     |  Rnd Var Overflow  6x:  49    |
|  has a weakness to one of the Physical       o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Elements; any "Punch" Element Attack will                                   |
|  be an Automatic Hit. Unfortunately, none of your Weapons will will use      |
|  the Punch Element at this stage in the game.                                |
| Every single Action will trigger the 1/16 chance of the Sahagin casting      |
|  <Shell Defense>, regardless of the Target or the Caster. This includes      |
|  Actions made by the Sahagin. Even Actions such as Change/Defend will        |
|  trigger the Counter chance.                                                 |
| Once the Sahagin has activated <Shell Defense>, its Def will be set to       |
|  512, meaning that Physical Attacks will land just 1 HP of damage. The       |
|  effect will only last until the next Player or Enemy performs an Action,    |
|  after which Def will be set back to its original value and a fresh 1/16     |
|  chance of reactivating <Shell Defense> occurs.                              |
| Stealing Hypers is a great idea at this stage in the game as they can        |
|  really help with Limit Levelling (to inflict Fury), although they can be    |
|  quite difficult to obtain. A Lv 12 Cloud would have a 10.94% chance of      |
|  stealing from the Sahagin.                                                  |
| The Sahagin is encountered in an area that cannot be revisited; once you     |
|  progress past a certain point in the game, you can no longer fight the      |
|  enemy.                                                                      |
\                                                                              /

|   Notes On Ceasar:                           |   POWER req for Overflow:   |
|                                              |                             |
| Ceasar is found in Battle Square:            |  Base Damage Overflow: 175  |
|  Set - 1 (Before Tiny Bronco)  Battle - 2    |  Rnd Var Overflow  3x: 117  |
|                                              |  Rnd Var Overflow  4x:  88  |
| The Ceasar is one of a few Enemies that has  |  Rnd Var Overflow  6x:  59  |
|  a weakness to one of the Physical Elements; o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  any "Punch" Element Attack will be an                                     |
|  Automatic Hit. Unfortunately, none of your Weapons will will use the      |
|  Punch Element at this stage in the game.                                  |
| Stealing Tranquilizers is a great idea at this stage in the game as they   |
|  can really help with Limit Levelling (to cure Fury), although they can be |
|  quite difficult to obtain. A Lv 12 Cloud would have a 12.5% chance of     |
|  stealing from the Ceasar.                                                 |
| Ceasar's Attacks hit for very low HP, so they shouldn't be feared, In      |
|  addition to this, they have a chance of skipping a turn if their HP is    |
|  above 50%. With that said, once their HP drops to below 25%, they will    |
|  always use both of their Attacks consecutively in one turn.              |
| The Ceasar is encountered in an area that cannot be revisited; once you    |
|  progress past a certain point in the game, you can no longer fight the    |
|  enemy.                                                                    |
\                                                                            /

|                                                                             |
|  1ST ATTACK: Use <Scratch> on Rnd Target                                    |
|                                                                             |
|    After 1st Attack: 1/2 Chance jump to 1st Attack for next turn            |
|                      1/2 Chance jump to 2nd Attack for next turn            |
|                                                                             |
|  2ND ATTACK: Use Drain on Target with Highest Current HP                    |
|  3RD ATTACK: Use Fire on Rnd Target; If Ghost's MP < 4, use <Scratch> on    |
|               Rnd Target                                                    |
|                                                                             |
|                                                                             |
|  COUNTER: [All Physical and Magical Attacks]                                |
|                                                                             |
|   Use <Vanish> on Self, disappears from Battle for one turn                 |
|   Use <Appear> on Self, reappears into Battle                               |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Ghost:                          |   POWER req for Overflow:      |
|                                            |                                |
| Ghost is found in Battle Square:           |  Base Damage Overflow: 140     |
|  Set - 1 (Before Tiny Bronco)  Battle - 3  |  Rnd Var Overflow  3x:  94     |
|                                            o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| One blast of All=Fire should be enough to                                   |
|  wipe out all Ghosts, which will save you from having to wait for their     |
|  disappear and reappear animations to play out.                             |
| A Lv 12 Cloud would have a 42.19% chance of stealing Ghost Hands, which     |
|  drains anywhere between 20 - 32 MP depending on Target's MDef.             |
| Ghost Hands are permanently missable. You will be able to obtain them from  |
|  the Ghosts at the Battle Arena (before obtaining the Tiny Bronco), and     |
|  while Ghost Hands are Morph-able from the Gi Spector and Sneaky Step in    |
|  the Cave of The Gi, you will not have obtained the Morph Materia by that   |
|  point in the game (although you can encounter the Cave of The Gi enemies   |
|  in the Battle Arena after obtaining the Tiny Bronco, but before the        |
|  Highwind, at which point you will have obtained the Morph Materia).        |
| The Ghost is considered an "Undead" enemy, which means that they will take  |
|  damage from healing items and spells such as Cure, Potions etc.            |
```

```
|  Throwing a Phoenix Down would have a 25% chance of instantly killing the  |
|  Ghost, whereas a Megalixir/Elixir/X-Potion has a 100% chance.             |
| As with all "Undead" Enemies (excluding the Parasite and Soul Fire), the   |
|  Ghost takes Double Damage from the Holy Element, and seeing you will not  |
|  obtain any Holy based Materia (Alexander) till you reach disc 2, you      |
|  cannot exploit this weakness.                                             |
| All=Cure would deal more damage than All=Fire, but shouldn't be necessary  |
|  unless your Characters are under-levelled.                                |
| The Ghost is one of two Enemies that will be instantly killed with the use |
|  of the Holy Element, the other being the Sculpture.                       |
| The Ghost is one of four Enemies that absorbs the Death Status, meaning    |
|  that Physical attacks performed by Players with Added Effect + Death      |
|  Status on their weapon will cure the Ghost. The other three Enemies that  |
|  absorb Death are the Zenene, Ghost Ship and Dragon Zombie.                |
| The Ghost cannot be Back-Attacked or Side-Attacked, meaning that one       |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.            |
| Aeris's Lv 1-2 Limit Break Seal Evil is no good against the Ghost, seeing  |
|  as they are immune to Silence and Paralyzed.                              |
| The Ghost is one of a number 'elevated' enemies that Nullifies the Earth   |
|  Element, but will no take double damage from Wind.                        |
| The Ghost is encountered in an area that cannot be revisited; once you     |
|  progress past a certain point in the game, you can no longer fight the    |
|  enemy.                                                                    |
\                                                                            /

|                 Use Demi on Last Mag Attacker for next turn; If Deenglow's |
|                  MP < 4, OR Last Mag Attacker has Death, use <Wing Cutter> |
|                  on Target with Highest Current HP for next turn         |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Deenglow:                          |   POWER req for Overflow:  |
|                                               |                            |
| Deenglow is found in Battle Square:           |  Base Damage Overflow: 147 |
|  Set - 1 (Before Tiny Bronco)  Battle - 3     |  Rnd Var Overflow  3x:  98 |
|                                               |  Rnd Var Overflow  4x:  74 |
| Try to take out the Deenglow within three     |  Rnd Var Overflow  6x:  49 |
|  Attacks if you can, seeing as it will use    o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  either Demi or Ice after it's been attacked                             |
|  three times, both of which are quite powerful.                          |
| Graviballs are an amazing item to stockpile on at this stage in the game,  |
|  especially if you're planning on defeating the Midgar Zolom on your first |
```

| encounter. They inflict 25% of the Target's Current HP, and it is the only way the Player can inflict Gravity (% Based Damage) until they have reach Corel Prison and can learn the Enemy Skill Laser from the Death Claw.

Ethers are a very easy steal here. A Lv 12 Cloud would have a 42.19% chance of stealing from the Deenglow. Just note that you cannot steal AND get the drop from an Enemy; it's one or the other, and Graviballs are a much better item to try to obtain (although you only have a 14.06% chance of getting the Graviball as a drop).

Graviballs are permanently missable, so you should try to leave the Train Graveyard with at least one. You can steal them much later on in the game from the Shadow Maker during the Raid On Sector 8.

If the third Attack against the Deenglow was Ice, it will Absorb the Attack and will not trigger the Counter Attack of Demi. It will instead counter the next time you attack it with a damaging attack.

The Deenglow is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy.

The test Enemy êúô2(ñ) originally took the same model as the Deenglow in the JORG release, however, in the later releases the model was changed to that of the Pyramid. Visit the "Extra Enemies" section for more info on êúô1().

The Deenglow is an 'elevated' enemy; although, you cannot exploit an enemy's weakness to the Wind Element until you reach the Chocobo Ranch.

The Deenglow could be fought in the 1996 Demo Release.

|                                                                            |
|                 If all Targets have Sleep, use Silence on Rnd Target; If   |
|                  Eligor's MP < 24, use Phase 2 Attack                      |
|                                                                            |
|                 If all Targets have Silence, use Phase 2 Attack            |
|                                                                            |
|     3/5 Chance: Use Phase 2 Attack                                         |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Eligor:                          |   POWER req for Overflow:    |
|                                             |                              |
| Eligor is found in Battle Square:           |  Base Damage Overflow: 152   |
|  Set - 1 (Before Tiny Bronco)  Battle - 3   |  Rnd Var Overflow  3x: 101   |
|                                             o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Eligor cannot be Back-Attacked or side-                                |
|  attacked, meaning that one cannot perform Random Variation Overflow with  |
|  4x or 6x Damage.                                                          |
| The "1st Target", "2nd Target" & "3rd Target" refers to the right-most,    |
|  Target" refers to the right-most,, and left-most characters,
respectively.                          |
| The Eligor has rather high HP, Def and MDef, and given then fact that it   |
|  can use Mono Laser three times consecutively in a single turn once its HP |
|  is lees than 50%, one should always be wary of the Eligor.                |
| In the Battle Square Cloud will fill all three Character slots, so the     |
|  Eligor will hit Cloud 3 times consecutively when it uses its Stage 2      |
|  Attack.                                                                   |
| Silence will Prevent you from casting Magical Attacks, so use any Echo     |
|  Screens that the Eligor drop to cure yourself of Silence.                 |
| One should always try to steal from the Eligor when they first encounter   |
|  it to try to obtain the Striking Staff, a Weapon for Aeris (not available |
|  until Junon otherwise). A Lv 12 Cloud would have a 10.94% chance of       |
|  stealing from the Eligor.                                                 |
| The Eligor is encountered in an area that cannot be revisited; once you    |
|  progress past a certain point in the game, you can no longer fight the    |
```

```
|  enemy.                                                                                |
\                                                                                        /

| 1/2 Chance: Use <[No Name]> on Self, transform to Aero Combatant 2nd Form, transfer remaining HP, leave no rewards |

Notes On Aero Combatant: (1st Form)	POWER req for Overflow:
Aero Combatant is found in Battle Square: Set - 1 (Before Tiny Bronco) Battle - 3	Base Damage Overflow: 145 Rnd Var Overflow 3x: 97

- The Aero Combatant cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.
- The Aero Combatant's high Evade Stat means that you'll only have roughly a 70% chance of a landing Physical Attack, but a 100% chance of landing a a Magical Attack, so stick with Magic.
- The end-of-battle rewards do NOT stack for killing both version of the Aero Combatant.
- The standard Battle Victory Fanfare will be disable for all encounters with the Aero Combatant.
- The Aero Combatant is encountered in an area that cannot be revisited; once you progress past a certain in the game, you can no longer fight the enemy.
- The Aero Combatant 1st Form is an 'elevated' enemy; although, you cannot exploit an enemy's weakness to the Wind Element until you reach the Chocobo Ranch.

|                              Base Damage: 32 HP                            |
| - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - -  |
|   Aero Combatant 2nd Form's BATTLE PLAN: (Repeats)                         |
|                                                                            |
|  1/4 Chance: Use Sword Rush on Rnd Target                                  |
|  3/4 Chance: Use <Propeller Sword> on Rnd Target                           |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Aero Combatant: (2nd Form)        |   POWER req for Overflow:   |
|                                              |                             |
| Aero Combatant is found in Battle Square:    |  Base Damage Overflow: 145  |
|  Set - 1 (Before Tiny Bronco)  Battle - 3    |  Rnd Var Overflow  3x:  97  |
|                                              o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Aero Combatant cannot be Back-Attacked                                 |
|  or Side-Attacked, meaning that one cannot perform Random Variation        |
|  Overflow with 4x or 6x Damage.                                            |
| When the Aero Combatant transforms into its 2nd Form its Strength and      |
|  Defence values remain the same, although its Magic and MDefence receives  |
|  a boost, so stick with Physical Attack. Its Evade stat will have dropped  |
|  also, so your Physical Attacks will have a 100% chance of hitting         |
|  (unlike the 1st version of the Aero Combatant).                           |
| The boost in Magic is pointless, seeing as the Aero Combatant 2nd Form     |
|  does not use any Magical Attacks.                                         |
| When the Aero Combatant transforms into its 2nd Form it will transfer      |
|  over its remaining HP.                                                    |
| The end-of-battle rewards do NOT stack for killing both version of the     |
|  Aero Combatant.                                                           |
| The standard Battle Victory Fanfare will be disable for all encounters     |
|  with the Aero Combatant.                                                  |
| The Aero Combatant is encountered in an area that cannot be revisited;     |
|  once you progress past a certain in the game, you can no longer fight the |
|  enemy.                                                                    |
\                                                                            /

	Turks:Reno IV

No Manipulate Attacks!

Turks:Reno I's ATTACKS:

Attack 1: <Short Staff>	Target: One Opponent		
[15C] Physical	Element: Hit		
	Att%: 110		
	Power: 20		
	Base Damage: 61 HP		
Attack 2: Pyramid	Target: One Opponent	Status Inflict:	
[15D] Magical 0 Dam	Att%: 255	Imprisoned (100%)	
[15E]			
[15F]			
Attack 3: <Pyramid Release>	Target: One Opponent		
[160] Magical	Att%: 255		
[161]			
[162]			
Attack 4: Electro-mag Rod	Target: One Opponent	Status Inflict:	
[163] Physical	Element: Lightning	Paralyzed (23%)	
	Att%: 100		
	Power: 24		
	Base Damage: 73 HP		
Attack 5: <(Report)>	Target: Self	Death Animation	
[164] Physical 0 Dam	Att%: Auto Hit		

Turks:Reno I's BATTLE PLAN: (Repeats)

SETUP: Disable default Death handling

OPENING ATTACK: Use Pyramid on Rnd Target without Death AND Imprisoned
Display String: [Reno “Try and break it if you can.”]

1ST ATTACK: 1/3 Chance use Electro-mag Rod on Rnd Target
2/3 Chance use <Short Staff> on Rnd Target

2ND ATTACK: Same as 1st Attack

3RD ATTACK:

0 Players Imprisoned: Use Pyramid on Rnd Target without Death AND Imprisoned, jump to 1st Attack for next turn

```
|   1 or 2 Players Imprisoned: Use 1st Attack                                  |
|                                                                              |
|  4TH ATTACK:                                                                 |
|                                                                              |
|   0 or 1 Players Imprisoned: Use Pyramid on Rnd Target without Death AND     |
|                               Imprisoned, jump to 1st Attack for next turn   |
|        2 Players Imprisoned: Use 1st Attack                                  |
|                                                                              |
|  5TH ATTACK: Use Pyramid on Rnd Target without Death AND Imprisoned, jump    |
|               to 1st Attack for next turn                                    |
|                                                                              |
|                                                                              |
|  COUNTER: [Bolt, Bolt2, Bolt3]                                               |
|                                                                              |
|   Use Electro-mag Rod on Last Mag Attacker for next turn; If next selected   |
|    Attack is Pyramid, use Elector-mag Rod on the turn after; If Last         |
|    Attacker has Death or Imprisoned, select Rnd Target                       |
|                                                                              |
|                                                                              |
|  DEATH: Remove Pyramids from Battle, cure Self of Sleep, Poison, Silence,    |
|          Haste, Slow, Regen, D. Sentence, Berserk & Manipulate               |
|         Display String: [Reno "It's time."], use <(Report)> on Self, end     |
|          Battle                                                              |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Turks:Reno I: (Sector 7)          |   POWER req for Overflow:     |
|                                              |                               |
| If all three Players become inflicted with   |  Base Damage Overflow: 154    |
|  Imprisoned, it's a Game Over, so watch out! |  Rnd Var Overflow  3x: 103    |
|  To break free from Imprisoned, simply       o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  attack the Pyramid and it will release the                                  |
|  Player. Magical Attacks work, too, although unnecessary.                    |
| Turks:Reno I actually has three versions of Pyramid in his Attack list,      |
|  one for each Player.                                                        |
| Turks:Reno I is immune to Seizure, which isn't necessary seeing as there     |
|  is no way for the Player to inflict an enemy with Seizure. Turks:Reno I     |
|  is one of 86 enemies that are immune to Seizure.                            |
| Avoid Lightning-based Attacks. Stick to Ice and Fire to deal with            |
|  Turks:Reno I.                                                               |
| Once the battle ends the party will not perform their victory pose, and      |
|  the Battle Victory Fanfare will not play.                                   |
\                                                                              /

Grenade Combatant's ATTACKS:

Manip Attack 1: Machine Gun
Manip Attack 2: Hand Grenade

Attack 1: <Machine Gun> Target: One Opponent Berserk Attack
[110] Physical Element: Shoot
Att%: 100
Power: 16
Base Damage: 18 HP

Attack 2: Hand Grenade Target: One Opponent
[17C] Physical Element: Shoot
Att%: 70
Power: 35
Base Damage: 39 HP

Grenade Combatant's BATTLE PLAN:

PHASE 1: (Repeats)

Grenade Combatant's HP > 75%:

1ST ATTACK: Use Hand Grenade on Target with Lowest Current HP
2ND ATTACK: Use <Machine Gun> on Rnd Target
3RD ATTACK: Use <Machine Gun> on Rnd Target
4TH ATTACK: Use <Machine Gun> on Rnd Target

After 4 uses of Hand Grenade, 1st Attack changes to:
1ST ATTACK: Use <Machine Gun> on Target with Lowest Current HP

PHASE 2: (Repeats)

Grenade Combatant's HP <= 75%, Hand Grenade used < 4 times:

Use Hand Grenade on Target with Lowest Current HP

Once Hand Grenade has been used 4 times in total, move onto Phase 3

PHASE 3: (Repeats)

Grenade Combatant's HP <= 75%, Hand Grenade used 4 times:

Use <Machine Gun> on Rnd Target

Notes On Grenade Combatant:

POWER req for Overflow:

Hand Grenade cannot be used more than four times in a single Battle. The Grenade Combatant can be found on 8 of the 46 floors when riding in the small elevator to the 59th Floor.	Base Damage Overflow: 145 Rnd Var Overflow 3x: 97 Rnd Var Overflow 4x: 73 Rnd Var Overflow 6x: 49

|                                                                                |
|   Mighty Grunt's HP <= 50%:                                                    |
|                                                                                |
|    Use <Grunt Death> on Self, transform to Mighty Grunt 2nd Form, transfer     |
|     remaining HP, leave no rewards                                             |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Mighty Grunt: (1st Form)          |   POWER req for Overflow:       |
|                                              |                                 |
| The Mighty Grunt 1st Form has formidable     |  Base Damage Overflow: 172      |
|  HP, Def and MDef, making it a stronger      |  Rnd Var Overflow  3x: 115      |
|  random encounter than the player will be    |  Rnd Var Overflow  4x:  86      |
|  used to facing by this point.               |  Rnd Var Overflow  6x:  58      |
| The easiest way to deal with the Mighty      o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Grunt is to have Cloud use Ice/Fire/Bolt on                                    |
|  a single Enemy; do *not* use All as this will only inflict 66% of the         |
|  spells output. This way you should be able to take out half of its HP in      |
|  one hit, triggering the transformation to its 2nd Form, at which point       |
|  you can just use Tifa and Barret to finish it off physically.                 |
| When the Mighty Grunt transforms, it transfers over its remaining HP to        |
|  its counterpart. It will *not* leave any Battle Spoils, meaning the           |
|  rewards will not stack. Also, if you have stolen from the Mighty Grunt in     |
|  its 1st Form you will not be able to steal from it in its 2nd Form.           |
| Tranquilizers can be useful to steal from at this point in the game for        |
|  Limit Leveling (cures Fury). A Lv 13 Cloud would have a 42.19% chance of      |
|  stealing a Tranquilizer from the Mighty Grunt, and a 6.32% chance of          |
|  stealing a Grenade (only one Item can be stolen). You can use                 |
|  Tranquilizers when the Sword Dance inflicts you with Fury.                    |
| The Mighty Grunt has the "Pre-Emp" Flag disabled for most of its               |
|  Formations, however, you can sometimes Back-Attack the Mighty Grunt when      |
|  there is only one of them (Formation ID #419; this does not apply to the      |
|  Battles in the small elevator).                                               |
\                                                                                /

Mighty Grunt's ATTACKS: (2nd Form)

Manip Attack 1: Roller Dash

Attack 1: <Roller Dash> [177] Physical
Target: One Opponent
Element: Hit
Att%: 110
Power: 16
Base Damage: 38 HP
Berserk Attack

Attack 2: Rollerspin [178] Physical
Target: One Opponent
Element: Hit
Att%: 90
Power: 28
Base Damage: 66 HP

Attack 3: <Skating> [179] Physical 0 Dam
Target: Self
Att%: Auto Hit
Skating Animation

Mighty Grunt 2nd Form's BATTLE PLAN: (Repeats)

1/4 Chance: Use <Roller Dash> on Rnd Target
3/8 Chance: Use Rollerspin on Rnd Target
3/8 Chance: Use <Skating> on Self

Notes On Mighty Grunt: (2nd Form)

The Mighty Grunt 2nd Form has much lower Def and MDef, although it has slightly higher Strength. It does however have vastly improved Dexterity, Luck and Evade. Luck doesn't matter that much at this stage in the game, however, the increased Dexterity means that it will attack more often, and the increased Evade means that your Physical Attacks will only have an 80% chance of connecting (depending on Character's stats). Magical Attacks will have a 100% hit chance.

The Attack <Skating> is just a pointless (and rather comical) animation whereby the Mighty Grunt just skates around the Player. This uses up a turn for the Mighty Grunt, and it has a 3/8 chance of using this animation every turn, making the 2nd Form of the Mighty Grunt a lot less of a threat than it could be.

The 1st Form of the Mighty Grunt has varying Status immunities to its counterpart; The 2nd form is vulnerable to Slow-numb, Petrify, D. Sentence, Manipulate and Berserk, whereas the 1st Form is immune.

When the Mighty Grunt 1st Form transforms, it transfers over its remaining HP to the 2nd form. It will *not* leave any Battle Spoils, meaning the

POWER req for Overflow:

Base Damage Overflow:	139
Rnd Var Overflow 3x:	93
Rnd Var Overflow 4x:	70
Rnd Var Overflow 6x:	47

```
|  rewards will not stack. Also, if you have stolen from the Mighty Grunt in |
|  its 1st Form you will not be able to steal from it in its 2nd Form.       |
| Tranquilizers can be useful to steal from at this point in the game for    |
|  Limit Leveling (cures Fury). A Lv 13 Cloud would have a 42.19% chance of  |
|  stealing a Tranquilizer from the Mighty Grunt, and a 6.32% chance of      |
|  stealing a Grenade (only one Item can be stolen). You can use             |
|  Tranquilizers when the Sword Dance inflicts you with Fury.                |
| The Mighty Grunt has the "Pre-Emp" Flag disabled for most of its           |
|  Formations, however, you can sometimes Back-Attack the Mighty Grunt when  |
|  there is only one of them (except for the Battles in the small elevator). |
\                                                                            /

|                                                                           |
|   Hammer Blaster's HP <= 25%:                                             |
|    1/2 Chance: Use <Muyddle Mallet> on Rnd Target without Confusion*       |
|    1/2 Chance: Use <Hammer Blaster> on Rnd Target                         |
|                                                                           |
|  2ND ATTACK: Same as 1st Attack                                           |
|                                                                           |
|  3RD ATTACK: Use <Vanish> on Self, disappears from Battle                 |
|                                                                           |
|  4TH ATTACK: 1/2 Chance jump to 5th Attack for next turn                  |
|              1/2 Chance jump to 6th Attack for next turn                  |
|                                                                           |
|  5TH ATTACK: Use <Appear> on Self, reappears into Battle, jump to 1st     |
|               Attack for next turn                                        |
|                                                                           |
|  6TH ATTACK: Use <Appear> on Self, reappears into Battle                  |
|   Follow-Up: Use 1st Attack, jump to 2nd Attack for next turn             |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Hammer Blaster:                  |   POWER req for Overflow:   |
|                                             |                             |
| The Hammer Blaster has eight Physical       |  Base Damage Overflow: 141  |
|  that it could use, however, the AI Script  |  Rnd Var Overflow  3x:  94  |
|  only calls for two of those Attacks.       o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| With every cast of <Muyddle Mallet> the                                   |
|  Hammer Blaster has a 47% chance to inflict Confusion on the Player, which |
|  can be deadly at this early stage in the game, seeing as you will have   |
|  no Status defences by this point. The lower the Hammer Blaster's HP, the |
|  greater the chance it'll use <Muyddle Mallet>.                           |
| Obtaining Loco Weeds is a good idea seeing as the only way to inflict     |
|  an Enemy (such as the Midgar Zolom) with Fury is to first confuse the    |
|  Player that is about to use a Hyper. You won't have any other means of   |
|  inflicting Confusion until you get to Gongaga to buy the Mystify Materia. |
| You can also obtain Loco Weed in the Shinra HQ from the Sword Dance and   |
|  SOLDIER:3rd.                                                             |
| You will have a 14.06% chance of getting the Loco Weed as a drop, but do  |
|  not attempt to steal Echo Screens as you cannot get the Drop and and the |
|  Steal.                                                                   |
| When you return to the Shinra HQ on Disc 2, you could easily Morph        |
|  yourself some Smoke Bombs, which will help for the Battle Square (allows |
|  you to escape the Battle while retaining your currently earned BP).      |
| The Hammer Blaster actually consists of two Enemies; the Hammer Blaster   |
|  itself and one of several Enemies that labelled [No Name]. Explore the   |
|  "Extra Enemies" section for more information on Hammer Blaster's Base.   |
| The Hammer Blaster cannot be Back-Attacked or Side-Attacked, meaning that |
|  one cannot perform Random Variation Overflow with 4x or 6x Damage.       |
\                                                                           /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Sword Dance:                   |   POWER req for Overflow:   |
|                                           |                             |
| Sword Dance is found in Battle Square:    |  Base Damage Overflow: 145  |
|  Set - 1 (Before Tiny Bronco)  Battle - 4 |  Rnd Var Overflow  3x:  97  |
|                                           o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Attack Sawback is the third Attack that                             |
|  in the game which attacks all players.                                 |
| The Sword Dance has two Attacks that never uses; Gash and Spinning Cut. |
| Once Sword Dance's HP is less than 50%, it will have a higher chance of |
|  doubling up in its Attacks.                                            |
| The Sword Dance is the first Enemy in the game to use an Attack which   |
|  inflicts Fury, which is a very useful Status for Limit Leveling. You can |
|  obtain Tranquilizers to cure yourself from Fury from the Mighty Grunts |
|  and the Grenade Combatants.                                            |
| The Sword Dance is one of three Enemies that takes Double Damage from   |
|  Confusion. This means that if you had the Added Effect Materia paired  |
|  with Mystify/Contain, your Physical Attacks would do Double Damage. The |
|  other two Enemies are the SOLDIER:3rd and the Corvette.                |
| Obtaining Loco Weeds is a good idea seeing as the only way to inflict   |
|  an Enemy (such as the Midgar Zolom) with Fury is to first confuse the  |
|  Player that is about to use a Hyper. You won't have any other means of |
|  inflicting Confusion until you get to Gongaga to buy the Mystify Materia. |
| You can also obtain Loco Weed in the Shinra HQ from the Hammer Blaster and |
|  the SOLDIER:3rd.                                                       |
| You will have a 14.06% chance of getting the Loco Weed as a drop, but do |
|  not attempt to steal Hypers as you cannot get the Drop and and the Steal. |
|  While Hypers are useful at this point, a Lv 13 Cloud would only have a |
|  10.94% chance of stealing from the Sword Dance, and you can easily stock |
|  up on Hypers from Wall Market before visiting the Shinra HQ.           |
```

| If you are short on Hypers then just Attack the Sword Dance with the Player that you wish to be inflicted with Fury, and it'll counter by using Slap on that Player for its next turn, which has a 47% chance of inflicting the Player with Fury.
| The Sword Dance is one of a number 'elevated' enemies that Nullifies the Earth Element, but will no take double damage from Wind.
| The Sword Dance cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

|  THEREAFTER: Allows Machine Gun or Laser Cannon to spawn in                 |
```

| DEATH: Disable Death Animation, use <Vanish> on Self, end Battle |

Notes On Warning Board:	POWER req for Overflow:
The Warning Board by themselves do nothing. After the initial message has appeared they will spawn in either the Machine Gun or the Laser Cannon (whichever ATB bar fills up first AND passes a special chance), and only these Enemies can attack the Player.	Base Damage Overflow: 141 Rnd Var Overflow 3x: 94

Once The Warning Board has spawned in an Enemy it can swap that Enemy out with its counterpart from time to time.

Once you have killed the Enemy that the Warning Board spawns in the Warning Board will sit there doing nothing until you kill it. This is a bug; once you'd killed either Enemy that it spawns, it should have then continued to spawn in its counterpart until that Enemy was killed, at which point the Warning Board would go into idle mode. An oversight in scripting means that the killed Machine Gun/Laser Cannon is still flagged as active, and as such its counterpart thinks it is still alive.

You do not need to kill its counterparts to end the Battle, however, you will gain an extra 5 EXP if you do kill the Machine Gun/Laser Cannon.

While the Warning Board Nullifies lightning-based Attacks, its counter-parts take Double Damage from Lightning.

The Warning Board cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

Attack 1: Machine Gun [110] Physical — Target: One Opponent — Element: Shoot — Att%: 100 — Power: 16 — Base Damage: 18 HP — Berserk Attack

Attack 2: <Appear> [14F] Physical 0 Dam — Target: Self — Att%: Auto Hit — Appearing Animation

Attack 3: <Vanish> [14E] Physical 0 Dam — Target: Self — Att%: Auto Hit — Disappearing Animation

Machine Gun's BATTLE PLAN: (Repeats)

NOTE - The Machine Gun's "Spcl Attack" is activated from the Laser Cannon's AI Script. It is deactivated once it has been used once.

OPENING ATTACK:

SPCL ATTACK: Use <Appear> on Self, appears into Battle
Follow-Up: 1/2 Chance use Machine Gun on Rnd Target
1/2 Chance do nothing

At least one Target without Paralyzed:

1/2 Chance: Use <Appear> on Self, appears into Battle
Follow-Up: Use <Machine Gun> on Rnd Target

1/2 Chance: Do nothing

All Targets with Paralyzed:

1/4 Chance: Use <Appear> on Self, appears into Battle
Follow-Up: Use <Machine Gun> on Rnd Target

3/4 Chance: Do nothing

THEREAFTER:

1/4 Chance: Use <Vanish> on self, disappears from Battle, activates Laser Cannon's Spcl Attack when it spawns in

1/4 Chance: Use <Vanish> on self, disappears from Battle

1/2 Chance: Use Machine Gun on Rnd Target

Notes On Machine Gun:	POWER req for Overflow:
The Machine Gun is not a stand-alone Enemy; it part of the Warning Board and will only spawn in after the Warning Board has displayed its warning message, which it will do so after one turn.	Base Damage Overflow: 141 Rnd Var Overflow 3x: 94

The Machine Gun is one of two Enemies that could spawn in after the Warning Board's message, the other being the Laser Cannon. The Enemy to fill up its ATB gauge first AND pass a special chance will be the Enemy

| to spawn in first.
| Occasionally, the Machine Gun will retreat back into the Warning Board, at which point the two Enemy variants have the same chances of appearing again.
| Once you have killed either the Machine Gun or the Laser Cannon, the Warning Board will no longer spawn in any enemies, and will just sit there till you kill it. This is a bug; the AI script does a check to see if its counterpart is still alive, which will always fail seeing as the Machine Gun cannot spawn in after you've killed the Laser Cannon, and vice-versa, which was not the intention.
| There are various flags used in this Battle, one which will dictate if an Enemy is "Alive" and one which will indicate if an Enemy is "Active". The check which the Machine Gun/Laser Cannon performs is to see if its counterpart is "Active", and this flag does not get set to 0 upon death. So, the inactive Enemy thinks that the other Enemy is still active, even though it is flagged as being dead.
| You do not need to kill the Machine Gun/Laser Cannon to end the Battle; just killing the Warning Board is enough, however, you will gain an additional 5 EXP if you do kill the Warning Board's counterpart.
| Each variant of Enemy has a "Special Attack" which is sometimes used when it spawns in; The Machine Gun activates the Laser Cannon's Spcl Attack, and the Laser Cannon activates the Machine Gun's Spcl Attack.
| While the Warning Board Nullifies Lightning, the Machine Gun and Laser Cannon both take Double Damage from Lightning-based Attacks.
| The Machine Gun is vulnerable to Death and Berserk, whereas the Warning Board is not.
| The Machine Gun cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

|              Use Flying Sickle on Rnd Target without Sleep*             |
|                                                                         |
|                                                                         |
|    After 5th Attack: Jump to 2nd Attack for next turn                   |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On SOLDIER:3rd:                     |   POWER req for Overflow:   |
|                                             |                             |
| The SOLDIER:3rd will cast some powerful     |  Base Damage Overflow: 149  |
|  Magical Spells, however, they do not have  |  Rnd Var Overflow  3x: 110  |
|  large amounts of MP, and therefore will not |  Rnd Var Overflow  4x:  75  |
|  cast their Magical Spells too many times in |  Rnd Var Overflow  6x:  50  |
|  a single Battle.                           o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| If you have unlocked Barret's Lv 1-2 Limit                              |
|  Break Mindblow then that would be a good way to render the SOLDIER:3rd's |
|  harmless.                                                              |
| The large groups that they appear in along with good Battle Spoils makes |
|  the SOLDIER:3rd one of the bet Enemies to level up from at that point in |
|  the game; The Upper Laboratories following the Sample:H0152 Battle (but |
|  before you get captured) is the best screen to train in.               |
| The SOLDIER:3rd will sometimes inflict the Player with Sleep; if this   |
|  happens the SOLDIER:3rd will never attack the sleeping Player with     |
|  Physical Attacks, although they will always attack them with Ice2 and  |
|  Bolt2. Unfortunately only Physical Attacks will cure the Player of Sleep, |
|  so you'll either have to wait it out, or Physically Attack the sleeping |
|  Player yourself as you'll have no other means of curing Sleep at this  |
|  point.                                                                 |
| The lower the SOLDIER:3rd's HP, the higher the chance it will have of   |
|  doubling up on its basic attacks.                                      |
| An oversight in the AI Script appears whereby the SOLDIER:3rd does not  |
|  check to make sure that it has enough MP to cast the attack Flying Sickle |
|  which costs 8 MP. Because of this, a text string will be displayed which |
|  reads: [SOLDIER:3rd A's skill power is used up] (or "B or "C"). This may |
|  or may not have been intentional, but given the fact that it has a high |
|  chance using Flying Sickle once its MP is less than 8, it will spend a |
|  lot of turns doing nothing which makes the SOLDIER:3rd a lot less      |
|  formidable than they could have been.                                  |
| The Flapbeat and Frozen Nail also use Flying Sickle, ans as such also fall |
|  victim to the oversight (which may or may not have been intentional).  |
| Normally the SOLDIER:3rd can be Back-Attacked, although the 3x SOLDIER:3rd |
|  Formation found in the Upper Laboratories has the Pre-Emp Flag OFF, and |
|  as such you cannot Back-Attack them when they come in groups of threes |
|  (Formation ID #440).                                                   |
| The SOLDIER:3rd is one of three Enemies that takes Double Damage from   |
|  Confusion. This means that if you had the Added Effect Materia paired  |
|  with Mystify/Contain, your Physical Attacks would do Double Damage. The |
|  other two Enemies are the Sword Dance and the Corvette.                |
| The Hardedge is a very worthwhile steal at this stage in the game, seeing |
|  as you won't be able to obtain that Weapon for Cloud until you get to  |
|  Junon otherwise. A Lv 13 Cloud would have a 10.94% chance of stealing  |
|  from the SOLDIER:3rd.                                                  |
| Obtaining Loco Weeds is a good idea seeing as the only way to inflict   |
```

```
|  an Enemy (such as the Midgar Zolom) with Fury is to first confuse the     |
|  Player that is about to use a Hyper. You won't have any other means of    |
|  inflicting Confusion until you get to Gongaga to buy the Mystify Materia. |
| You can also obtain Loco Weed in the Shinra HQ from the Sword Dance and    |
|  Hammer Blaster. You will have a 14.06% chance of getting the Loco Weed as |
|  a drop from the SOLDIER:3rd.                                              |
\                                                                            /

|                                                                           |
|  DEATH: Use <Vanish> on Self, end Battle                                  |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Sample:H0512:                    |   POWER req for Overflow:   |
|                                             |                             |
| If you managed to obtain any Spider Webs    |  Base Damage Overflow: 156  |
|  from the Grashtrike in Sector 4, then now  |  Rnd Var Overflow  3x: 104  |
|  would the time to use them, as Sample:     o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  H0512 is vulnerable to Slow.                                             |
| You should have obtained the Star Pendant, Elemental Materia and Poison   |
|  Materia by this point (if following a guide), and all three will be      |
|  useful. Have one Player equip the Star Pendant, and another equip the    |
|  Elemental Materia linked with Poison on their Armor; the Elemental       |
|  Materia will not only halve the damage taken from Poison, but also halve |
|  the chances of Shady Breath inflicting you with Poison.                  |
| Sample:H0512 will only attack Players that are inflicted with Poison, so  |
|  whoever is wearing the Star Pendant will never be touched. If all Players|
|  are cured of Poison then Sample:H0512 will always use Shady Breath to    |
|  re-inflict Poison onto the Players.                                      |
| If Sample:H0512 has ran out of MP a message will appear every time it     |
|  tries to use Shady Breath which reads [Sample:H0512's skill power is used|
|  up], and it will skip a turn. Once this has happened, the Player can cure|
|  everyone of Poison and Sample:H0512 will begin attacking targets at      |
|  random.                                                                  |
| Sample:H0512 will only be able to use Reanimagic 2-3 times in total, so   |
|  once its HP is less than 40 it will always use either Shady Breath or    |
|  <Keyclaw> (the message only appears when it tries to use Shady Breath    |
|  with not enough MP).                                                     |
| You do not need to kill any of the Sample:H0512-opts in order to end the  |
|  Battle, just killing the main boss is enough. There is no use of the     |
|  "Cover" Flag either, so you can target Sample:H0512 without having to    |
|  kill his minions beforehand. Note that you will gain a small amount of   |
|  extra EXP and AP if you do kill them, but only for killing them once.    |
| When you kill a Sample:H0512-opt, a check is performed to see which       |
```

| Element was used to kill the opt. The main Boss then looks at that Element at the beginning of its next Attack (before using Reanimagic), but then does nothing with it in any of the subsequent checks. It's probable that Sample:H0512 was originally intended to act differently according to the Element that the Player used to kill the opts, but the idea was then dummied out.

If you manage to inflict Sample:H0512 with Paralyzed then the opts will attack slightly less often.

The Talisman that you get as a reward helps greatly when defending against Magical Attacks, such as the Midgar Zolom's Beta. Also, following the fight be sure to grab the missable Enemy Skill Materia from the Test Chamber.

If you are playing the game on any of the PC versions, then you can optionally choose to exploit a glitch that works very similar to the way Yuffie Warping works. Create a fresh save just prior the the Boss fight, don't save over it.

When you get a Game Over to Sample:H0512, the flag that disables the random encounters is *not* toggled, meaning random encounters will be disabled when you reload your save, until you make a screen traversal. This can be particularly useful if you are attempting to do the Fort Condor Battles, as the glitch will extend to the World Map.

Let's say you are at Cosmo Canyon. Make a save on the World Map, then reload the save file just prior to the Sample:H0512 battle. Lose to the Boss, then reload your save outside Cosmo Canyon. You will now be able to travel back to Costa Del Sol in the Buggy battle-free!

|                                                                          |
|  Attack 4:  Rolling Attack     Target: One Opponent                      |
|  [191]       Physical         Element: Hit                                |
|                                  Att%: 90                                |
|                                 Power: 48                                |
|                            Base Damage: 66 HP                            |
| - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - -  |
|   Sample:H0512-opt's BATTLE PLAN: (Repeats)                              |
|                                                                          |
|  7/12 Chance: Use <Bodyblow> on Rnd Target                               |
|  3/12 Chance: Use Rolling Attack on Rnd Target; If Sample:H0512 has      |
|                Paralyzed, do nothing                                     |
|  1/12 Chance: Use Fire on Rnd Target; If Sample:H05120-opt's MP < 4, use |
|                <Bodyblow> on Rnd Target                                  |
|  1/12 Chance: Use Ice on Rnd Target; If Sample:H05120-opt's MP < 4, use  |
|                <Bodyblow> on Rnd Target                                  |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Sample:H0512-opt:                |   POWER req for Overflow:  |
|                                             |                            |
| You do not have to kill the opts, but you   |  Base Damage Overflow: 152 |
|  will gain the EXP and AP for killing them  |  Rnd Var Overflow  3x: 101 |
|  *once only*.                               o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| If you kill all three Sample:H0512-opts then                             |
|  you will obtain three Tranquilizers at the end of the Battle (but no more |
|  than three).                                                            |
| As soon as you kill a Sample:H0512-opt the main Boss will revive them    |
|  straight away, but he can only do so a maximum of three times per Battle. |
| The Battle will end as soon as you kill Sample:H0512, regardless of how  |
|  many opts are still left alive.                                         |
| There are three different variants of Rolling Attack, one used by each of |
|  the three Sample:H0512-opts. Each Rolling Attack is identical in Attack |
|  Power, the only difference being the animation that plays out.          |
| If Sample:H0512 is inflicted with Paralyzed from Cloud's Lv 1-2 Limit    |
|  Break Cross Slash then the opts will have a 3/12 chance that they'll skip |
|  a turn.                                                                 |
| Sample:H0512-opt is one of a number 'elevated' enemies that Nullifies the |
|  Earth Element, but will no take double damage from Wind.                |
\                                                                          /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Brain Pod:                          |   POWER req for Overflow:   |
|                                                |                             |
| Brain Pod is found in Battle Square:           |  Base Damage Overflow: 146  |
|  Set - 1 (Before Tiny Bronco)  Battle - 4      |  Rnd Var Overflow  3x:  97  |
|                                                |  Rnd Var Overflow  4x:  73  |
| You should have a Star Pendant by now, along   |  Rnd Var Overflow  6x:  49  |
|  with the Elemental + Poison Materia which     o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  you can whack on someones Armour to halve                                 |
|  the Brain Pod's Poison-Based attacks.                                     |
| There are two variants of the Attack "Refuse", on which inflicts Sleep and |
|  one which inflicts Poison. The Poison variant hits for slightly more HP   |
|  than the Sleep variant.                                                   |
| The Brain Pod will not attack a Player Physically once they have been      |
|  inflicted with Sleep, so you cannot cure that Player other than by just   |
|  waiting it out, or attacking that Player physically yourself.             |
| The Brain Pod's weird appearance makes it one of the more peculiar Enemy   |
|  designs for sure. In the JAP original release the Statuses used instead   |
|  were Berserk and Confusion, which made the Brain Pod a deadly foe. Their  |
|  Attacks were then nerfed in the later releases.                           |
| The Brain Pod is considered an "Undead" enemy, which means that they will  |
|  take damage from healing items and spells such as Cure, Potions etc.      |
|  Throwing a Phoenix Down would have a 25% chance of instantly killing the  |
|  Brain Pod, whereas a Megalixir/Elixir/X-Potion has a 100% chance.         |
| As with all "Undead" Enemies (excluding the Parasite and Soul Fire), the   |
|  Brain Pod takes Double Damage from the Holy Element, and seeing you will  |
|  not obtain any Holy based Materia (Alexander) till you reach disc 2, you  |
|  cannot exploit this weakness.                                             |
| The Brain Pod is one of a number 'elevated' enemies that Nullifies the     |
|  Earth Element, but will no take double damage from Wind.                  |
\                                                                            /

Vargid Police's ATTACKS:

Manip Attack 1: Needle

Attack 1: Needle
[183] Physical
Target: One Opponent
Element: None
Att%: 10
Power: 1
MP Cost: 1
Base Damage: 1 HP
Berserk Attack
Status Inflict:
Paralyzed (7%)

Attack 2: Suicide
[184] Magical
% Based
Target: One Opponent
Element: None
Att%: 255
Power: 6
MP Cost: 10 MP
Base Damage: 18.75% Current HP

Vargid Police's BATTLE PLAN: (Repeats)

*A 'Group Enemy' is an Enemy that is NOT another Vargid Police, and also shares the same 'Group ID' Flag as the Vargid Police running the AI Script; Vargid Police 'A' = Group A, 'B' = Group B, 'C' = Group C.

Encounter is NOT a Back-Attack:

At least one 'Group Enemy' alive* AND Vargid Police's HP > 25%:
Use Needle on Rnd Target

All 'Group Enemies' dead* OR Vargid Police's HP <= 25%:
Use Suicide on Rnd Target, remove Self from Battle, leave no rewards

Encounter is a Back-Attack:

1/4 Chance: Use Suicide on Rnd Target, remove Self from Battle, leave no rewards

3/4 Chance: At least one 'Group Enemy' alive* AND Vargid Police's HP

```
|                > 25%:                                                      |
|                 Use Needle on Rnd Target                                   |
|                                                                            |
|               All 'Group Enemies' dead* OR Vargid Police's HP <= 25%:      |
|                Use Suicide on Rnd Target, remove Self from Battle, leave   |
|                 no rewards                                                 |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Vargid Police:                    |   POWER req for Overflow:   |
|                                              |                             |
| Vargid Police is found in Battle Square:     |  Base Damage Overflow: 143  |
|  Set - 1 (Before Tiny Bronco)  Battle - 4    |  Rnd Var Overflow  3x:  95  |
|                                              |  Rnd Var Overflow  4x:  72  |
| A Lv 14 Cloud would have a 45.31% chance of  |  Rnd Var Overflow  6x:  48  |
|  stealing Tranquilizers from the Vargid      o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Police, which would be good to stock up on                                |
|  as they help for Limit-Levelling (cures Fury). Alternatively, you could   |
|  just get the Phoenix Down as a 100% drop, which also helps to stock up on |
|  (but you cannot get both).                                                |
| The Vargid Police can be annoying to destroy, seeing as they will          |
|  remove themselves from Battle once their HP has dropped below 25% leaving |
|  behind no Battle rewards. Only attempt to steal from them when the        |
|  encounter is normal battle, that way they will *not* have the 1/4 chance  |
|  of using Suicide every turn as they will when they Back-Attack you.       |
| Have your weakest Characters attack the Vargid Police once first, then     |
|  follow up with a cast of your Magic with All to finish them off.          |
| Although unlikely, if the Vargid Police's MP was to fall below the cost of |
|  the Attack it is trying to use, then the string of text which reads       |
|  [Vargid Police A's skill power is used up] (or "B or "C") would appear.   |
\                                                                            /

|   Zenene's BATTLE PLAN: (Repeats)                                          |
|                                                                            |
|  1/4 Chance: Use Piazzo Shower on Rnd Target                               |
|  1/4 Chance: Use Ghenghana on Rnd Target                                   |
|  1/2 Chance: Use <Fang> on Rnd Target                                      |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Zenene:                     |   POWER req for Overflow:         |
|                                        |                                   |
| Zenene is found in Battle Square:      |  Base Damage Overflow: 144        |
|  Set - 1 (Before Tiny Bronco)  Battle - 4  |  Rnd Var Overflow  3x:  96     |
|                                        |  Rnd Var Overflow  4x:  72        |
| You should have a Star Pendant by now, along |  Rnd Var Overflow  6x:  48   |
|  with the Elemental + Poison Materia which   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  you can whack on someones Armour to halve                                 |
|  the Zenene's Piazzo Shower, which can hit hard (as does Ghenghana).       |
| Deadly Wastes can be useful to try to obtain (casts Bio2) at this point    |
|  for the upcoming Midgar Zolom Battle. A Lv 14 Cloud would have a 40.63%   |
|  chance to steal from the Zenene.                                          |
| The Zenene is considered an "Undead" enemy, which means that they will     |
|  take damage from healing items and spells such as Cure, Potions etc.      |
|  Throwing a Phoenix Down would have a 25% chance of instantly killing the  |
|  Zenene, whereas a Megalixir/Elixir/X-Potion has a 100% chance.            |
| As with all "Undead" Enemies (excluding the Parasite and Soul Fire), the   |
|  Zenene takes Double Damage from the Holy Element, and seeing you will not |
|  obtain any Holy based Materia (Alexander) till you reach disc 2, you      |
|  cannot exploit this weakness.                                             |
| Using All+Cure on the Zenene is the best way to take them out in one shot, |
|  if not cripple them.                                                      |
| The Zenene is one of four Enemies that absorbs the Death Status, meaning   |
|  that Physical attacks performed by Players with Added Effect + Death      |
|  Status on their weapon will cure the Zenene. The other three Enemies that |
|  absorb Death are the Ghost, Ghost Ship and Dragon Zombie.                 |
\                                                                            /

|                                                                           |
```

Attack 6: <Charging>	Target: Self	Charging
[19C] Physical 0 Dam	Att%: Auto Hit	Animation
Attack 7: <Glass Shatter>	Target: Self	Appearing
[194] Physical 0 Dam	Att%: Auto Hit	Animation
Attack 8: <Destroyed>	Target: Self	Transformation
[197] Physical 0 Dam	Att%: Auto Hit	to Phase 2
Attack 9: <Destroyed>	Target: Self	Death Animation
[19A] Physical 0 Dam	Att%: Auto Hit	

Hundred Gunner's BATTLE PLAN:

OPENING ATTACK: Use Aux Artillery on Rnd Target

PHASE 1: (Repeats)

Hundred Gunner's HP > 66%: 1/4 Chance use Hidden Artillery on Rnd Target
3/4 Chance use Aux Artillery On Rnd Target

PHASE 2: (Repeats)

Hundred Gunner's HP <= 66%: Use Main Artillery on All Targets

PHASE 3: (Repeats)

Hundred Gunner's HP <= 33%:

1ST ATTACK: Display String: [Sensor Cannon Charging!]
2ND ATTACK: Display String: [Sensor Cannon Charged!]
3RD Attack: Use Wave Artillery on All Targets

DEATH: Use <Destroyed> on Self, remove Self from Battle, leaves no rewards, spawn in Heli Gunner

Notes On Hundred Gunner:

This Boss Battle has two stages to it; once you have defeated Hundred Gunner, Heli Gunner will spawn in immediately afterwards.

This Battle is fought with Aeris, Barret and Red XIII.

When you kill Hundred Gunner the AI script removes his EXP, AP and gil amount for the end-of-battle spoils.

Hundred Gunner has its Row value set to 16, which means it is considered as "Flying" and cannot be attacked with short-range Attacks. Use Barret to attack it physically, and have Aeris and Red XIII blast him with Bolt.

Alternatively, you could equip Barret with Elemental+Lightning on his weapon to inflict Double Damage with his Physical Attacks, although Aeris and Red XIII would deal more damage with Bolt than Barret would deal with Physical Attacks + Lightning Element.

If you managed to obtain any Spider Webs from the Grashtrike, then they would be good to use here as Hundred Gunner is vulnerable to Slow.

Red XIII's Limit Breaks are Long Range, so you can use them to damage Hundred Gunner.

POWER req for Overflow:

Base Damage Overflow: 152
Rnd Var Overflow 3x: 101

| The normal "Fighting" Theme plays out for this Battle, instead of the regular "Still More Fighting" Boss Theme.

Heli Gunner's ATTACKS:

No Manipulate Attacks!

Attack 1: AB Cannon	Target: One Opponent	Status Inflict:	
[19D] Physical	Element: Shoot	Sleep (27%)	
	Att%: 100		
	Power: 16		
	Base Damage: 119 HP		
Attack 2: C Cannon	Target: One Opponent	Status Inflict:	
[19E] Physical	Element: Shoot	Poison (27%)	
	Att%: 100		
	Power: 16		
	Base Damage: 119 HP		
Attack 3: Firing Line	Target: All Opponents	Split Damage*	
[19F] Physical	Element: Shoot	Status Inflict:	
	Att%: 100	Sleep (19%)	
	Power: 19	Poison	
	Base Damage: 141 HP		
Attack 4: Spinning Bodyblow	Target: One Opponent		
[1A1] Physical	Element: Hit		
	Att%: 100		
	Power: 20		
	Base Damage: 148 HP		

Attack 5: Flying Drill	Target: One Opponent	
[1A2] Physical	Element: Hit	
	Att%: 95	
	Power: 24	
	Base Damage: 178 HP	
Attack 6: <Start Spin>	Target: Self	Transformation
[1A0] Physical 0 Dam	Att%: Auto Hit	to Phase 2
Attack 7: <[No Name]>	Target: Self	Death Animation
[11F] Physical 0 Dam	Att%: Auto Hit	

Heli Gunner's BATTLE PLAN:

OPENING ATTACK: Use AB Cannon on Rnd Target

PHASE 1: (Repeats)

Heli Gunner's HP > 25%:

1ST ATTACK: 1/4 Chance use Firing Line on Rnd Target, jump to 3rd Attack for next turn
3/4 Chance use C Cannon on Rnd Target

2ND ATTACK: 1/4 Chance use Firing Line on All Targets
3/4 Chance use AB Cannon on Rnd Target, jump to 1st Attack for next turn

3RD ATTACK: 1/4 Chance use C Cannon on Rnd Target, jump to 2nd Attack for next turn
3/4 Chance use AB Cannon on Rnd Target

PHASE 2: (Repeats)

Heli Gunner's HP <= 25%: Sets Def to 90 and MDef to 270

1/2 Chance: Use Spinning Bodyblow on Rnd Target
1/2 Chance: Use Flying Drill on Rnd Target

Notes On Heli Gunner:

The Heli Gunner's Def and MDef increase by 50 once its HP is less than 25%:

1st Stage: Def = 40 MDef = 220
2nd Stage: Def = 90 MDef = 270

POWER req for Overflow:	
1st Stage:	
Base Damage Overflow:	150
Rnd Var Overflow 3x:	100
2nd Stage:	
Base Damage Overflow:	167
Rnd Var Overflow 3x:	112

The Attack Firing Line is subject to Split Damage for the damage calculations; however, the Statuses inflicted via Firing Line are *not* subject to Split Damage.

This Battle is fought with Aeris, Barret and XIII, and has two stages to it; you need to have first killed Hundred Gunner before Heli Gunner will spawn in.

As with Hundred Gunner, Heli Gunner has its Row value set to 16, which means it is considered as "Flying" and cannot be attacked with short-range Attacks. Use Barret to attack him physically, and have Aeris and Red XIII blast it with Bolt.

The Heli Gunner has high MDef, however, you will still deal more damage

```
|  using Bolt with Aeris and Red XIII than you would having Barret attack    |
|  physically with the Elemental+Lightning on his Weapon (as with Hundred    |
|  Gunner).                                                                  |
| With slightly less HP than Hundred Gunner, Heli isn't too difficult to     |
|  take out, just watch out for its Status changing Attacks. Make sure one   |
|  of your Characters is wearing the Star Pendant.                           |
| If you managed to obtain any Spider Webs from the Grashtrike, then they    |
|  would be good to use here as Heli Gunner is vulnerable to Slow.           |
| Red XIII's Limit Breaks are Long Range, so you can use them to damage      |
|  Heli Gunner.                                                              |
| At the end of the Battle your EXP, AP and gil amounts will be for Heli     |
|  Gunner only.                                                              |
| The Heli Gunner is an 'elevated' enemy; although, you cannot exploit an    |
|  enemy's weakness to the Wind Element until you reach the Chocobo Ranch.   |
| The normal "Fighting" Theme plays out for this Battle, instead of the      |
|  regular "Still More Fighting" Boss Theme.                                 |
\                                                                            /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Rufus:                       |   POWER req for Overflow:       |
|                                         |                                 |
| Rufus is a very easy Boss fight, with low HP |  Base Damage Overflow: 147  |
|  and a 1/3 chance he'll do nothing every     |  Rnd Var Overflow  3x:  98  |
|  turn (conditionally), he is not a threat.   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  It's his companion Dark Nation that will be                              |
|  dealing most of the damage, but he does not need to be killed for the    |
|  Battle to end; just killing Rufus is enough.                             |
| Dark Nation will check to see if Rufus has Barrier every turn. If Rufus   |
|  does not have Barrier, then Dark Nation will cast Barrier on Rufus by    |
|  default.                                                                 |
| It is beneficial to kill Dark Nation, as you will gain the extra EXP, AP  |
|  and gil for doing do, and more importantly, a Guard Source.              |
| Cloud will be fighting this Battle solo. Make sure that he has the        |
|  Talisman equipped to deal with Dark Nation's Bolt.                       |
| If you had obtained any Deadly Wastes to this point, then now would be the |
|  time to use them. Failing that, whack All+Poison on Cloud to exploit     |
|  Rufus and Dark Nation's vulnerability to the Poison Status.              |
| Be sure to make use of Cloud's Lv 1-2 Limit Break Cross Slash to inflict  |
|  Rufus with Paralyzed.                                                    |
| The helicopter you see flying around in the background is actually one of |
|  several enemies entitled [No Name]; explore the "Extra Enemies" section  |
|  further below for more information on this enemy.                        |
| Once Rufus is defeated Cloud will not perform his victory pose, and the   |
|  Battle Victory Fanfare will not play.                                    |
\                                                                           /

MAPS:

Shinra HQ Roof

LOOKALIKES:

Guard Hound
Blood Taste

Dark Nation's ATTACKS:

Manip Attack 1: Bite

Attack 1: <Bite> [112] Physical
Target: One Opponent
Element: Hit
Att%: 100
Power: 16
Base Damage: 67 HP
Berserk Attack

Attack 2: Barrier [00F] Magical 0 Dam
Target: One Ally
Att%: Auto Hit
MP Cost: 16 MP
Reflectable
Inflicts Status: Barrier (100%)

Attack 3: MBarrier [010] Magical 0 Dam
Target: One Ally
Att%: Auto Hit
MP Cost: 24 MP
Reflectable
Inflicts Status: MBarrier (100%)

Attack 4: Bolt [021] Magical
Target: 1/A Opponents
Element: Lightning
Att%: 100
Power: 8
MP Cost: 4 MP
Base Damage: 99 HP
Reflectable
Split Damage

Dark Nation's BATTLE PLAN: (Repeats)

*If Dark Nation's MP < Attack MP Cost, use Bite on Rnd Target

Rufus does not have Barrier: Use Barrier on Rufus*

Rufus has Barrier:

1/4 Chance: Use Bolt on Rnd Target*
1/4 Chance: Use <Bite> on Rnd Target
1/2 Chance: Dark Nation does not have Barrier: Use Barrier on Self*
Dark Nation has Barrier:
Dark Nation does not have MBarrier: Use MBarrier on Self*
Dark Nation has MBarrier: Use Bolt on All Targets*

Notes On Dark Nation:

You do not need to kill Dark Nation to end the Battle; killing Rufus is enough.
It is advisable to kill Rufus's companion,

POWER req for Overflow:

Base Damage Overflow: 149
Rnd Var Overflow 3x: 100

```
|  however, seeing as you will gain the EXP,                                  |
|  AP and gil for doing so, and more importantly, the Guard Source!           |
| With very low HP, you should be able to take out Dark Nation fairly         |
|  quickly; just stick to Magical Attacks if it has set Barrier on itself.    |
| Dark Nation will always make sure that Rufus is protected with Barrier,     |
|  before anything else.                                                      |
| Cloud will be fighting this Battle solo. Make sure that he has the          |
|  Talisman equipped to deal with Dark Nation's Bolt.                         |
| If you had obtained any Deadly Wastes to this point, then now would be the |
|  time to use them. Failing that, whack All+Poison on Cloud to exploit       |
|  Rufus and Dark Nation's vulnerability to the Poison Status.                |
| The helicopter you see flying around in the background is actually one of   |

|                                                                             |
|  OPENING ATTACK: Use <Highway> on All Targets                               |
|                                                                             |
|                                                                             |
|  STAGE 1: 1ST ATTACK: Use Arm Attack on Target with Highest Current HP      |
|            Follow-Up: 1/2 Chance use Arm Attack on Target with Highest      |
|                              Current HP                                     |
|                         1/2 Chance do nothing                               |
|                                                                             |
|           2ND ATTACK: Same as 1st Attack                                    |
|                                                                             |
|           3RD ATTACK: Use <[No Name]> on Self, transform to Stage 2         |
|            Follow-Up: Use Twin Burner on All Targets; If Motor Ball's       |
|                        MP < 16, use <Deadly Wheel> on All Targets           |
|                                                                             |
|                                                                             |
|  STAGE 2: 1ST ATTACK: Skip a turn                                           |
|           2ND ATTACK: Use <Deadly Wheel> on Rnd Target                      |
|           3RD ATTACK: Use <[No Name]> on Self, transform to Stage 3         |
|                                                                             |
|                                                                             |
|  STAGE 3: Use Rolling Fire on All Targets; If Motor Ball's MP < 24, use     |
|            <Deadly Wheel> on All Targets                                    |
|           Use <[No Name]> on Self, transform to Stage 1                     |
|                                                                             |
|                                                                             |
|  COUNTER: [All Physical and Magical Attacks]                                |
|                                                                             |
|   Motor Ball's HP <= 12.5% AND in Stage 2                                   |
|                                                                             |
|    Use <[No Name]> on Self, transform to Stage 1, jump to 3rd Attack        |
```

```
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Motor Ball:                       |   POWER req for Overflow:   |
|                                              |                             |
| As far as Boss Battles go, this one is       |  Base Damage Overflow: 147  |
|  tougher than the bosses you've encountered  |  Rnd Var Overflow  3x:  98  |
|  so far. Most of Motor Ball's Attacks will   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  hit all Players, and Rolling Fire will deal                               |
|  extra damage, seeing as Split Damage is off for that Attack (unlike       |
|  most other attacks which target all Players). Always keep you HP up!      |
| Motor Ball's appearance is the same in Stage 1 and Stage 3; it will only   |
|  look different while in Stage 2.                                          |
| The Attack <Deadly Wheel> has two variants, one which is used in Stage 1   |
|  and 3, and another used only in Stage 2.                                  |
| The more damage you take during the Highway Mini-Game, the less HP you     |
|  chosen Characters will start the Battle with. If their HP bar was fully   |
|  depleted then you would start the Battle with 1 HP. Motor Ball will then  |
|  use his Opening Attack <Highway> to kill those Characters. In theory this |
|  could cause an instant Game Over, although I' not sure it is possible to  |
|  drain Cloud's HP Bar to 0 during the Mini-Game.                           |
| The fight opens as a Back Attack, which means that your rows will have     |
|  been reversed. Be sure to change your rows before the Mini-Game to the    |
|  reverse of what you'd normally have them in.                              |
| Defence is crucial for this Battle. Give one Player the Talisman, and      |
|  another with Elemental+Fire on their Armour to defend from Motor Ball's   |
|  Fire-based Attacks. Note that casting Bolt on Motor Ball deals more       |
|  damage than equipping Elemental+Lightning on someones Weapon.             |
| Spider Webs would be a good call to inflict Motor Ball with Slow, if you   |
|  had managed to obtain any from the Grashtrike in Sector 4.                |
| If you had obtained a Star Pendant from the Coupon Exchange in the Shinra  |
|  HQ, then you can go ahead and sell the one from Motor Ball for 4000 gil   |
|  when you get to Kalm, seeing as you won't need two.                       |
\                                                                            /

|  1/2 Chance: Use W Machine Gun on Rnd Target                              |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Custom Sweeper:                    |   POWER req for Overflow:   |
|                                               |                             |
| Custom Sweeper is found in Battle Square:     |  Base Damage Overflow: 147  |
|  Set - 1 (Before Tiny Bronco)  Battle - 5     |  Rnd Var Overflow  3x:  98  |
|                                               |  Rnd Var Overflow  4x:  74  |
| The Custom Sweeper's Smoke Shot searches for  |  Rnd Var Overflow  6x:  49  |
|  a Player that is not inflicted with          o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Darkness, however, the Player cannot be                                  |
```

| inflicted with Darkness via the use of the Enemy's Attacks. This suggests that Smoke Shot should have inflicted Darkness (the name also supports that theory). The Sweeper uses the same Attack, and the same check for Darkness is carried out.

The Custom Sweeper has higher than normal HP for this stage in the game, so feel free to cast Bolt.

The Atomic Scissors is a Weapon for Barret you cannot get until Junon normally (costs 1400 gil). Make sure to steal at least on from the Custom Sweeper, if you steal any more you can sell them for 700 gil each in Kalm. A Lv 15 Cloud would have a 10.94% chance of stealing from the Custom Sweeper.

Matra Magic is one of the best Enemy Skills to learn at this stage in the game seeing as it will hit all opponents for *non-split* damage, meaning it will not incur a 33% drop on damage output as a normal spell would when paired with All (and attacking all targets).

Once you have obtained the Morph Materia from the Temple of The Ancients, it wouldn't be a bad idea to revisit the Custom Sweeper to stock up on X-Potions (if you don't have any left over from hoard of X-Potions you would have collected in Wutai, or you haven't done Wutai yet). Your Morph Damage would deal around 60 HP after obtaining Morph.

The Custom Sweeper cannot be Back-Attacked, but it can be Side-Attacked.

```

Prowler's ATTACKS:

Attack 1: <Hit> [134] Physical — Target: One Opponent; Element: Hit; Att%: 100; Power: 16; Base Damage: 31 HP — Never Used Berserk Attack

Attack 2: Steal [135] Physical 0 Dam — Target: One Opponent; Att%: Auto Hit — Steals From Target

Attack 3: Grind [136] Physical 0 Dam — Target: One Opponent; Att%: Auto Hit — Steals From Target

Attack 4: Seize [137] Physical — Target: One Opponent; Element: None; Att%: 100; Power: 16; Base Damage: 31 HP

Attack 5: <Escape> [138] Physical 0 Dam — Target: Self; Att%: Auto Hit — Disappearing Animation

Prowler's BATTLE PLAN:

NOTE - The Prowler targets the last Player to attack it. If it hasn't taken any damage, select a Rnd Target. If the Last Attacker has Death, select a Rnd Target.

OPENING ATTACK: 1/4 Chance use Steal on Last Attacker
1/4 Chance use Grind on Last Attacker
1/2 Chance use Seize on Last Attacker

THEREAFTER: 1/2 Chance jump to 1st Attack for next turn
1/2 Chance jump to 2nd Attack for next turn

1ST ATTCK: Skip a turn
2ND ATTCK: Use <Escape> on Self, remove Self from Battle, leave no rewards

Notes On Prowler:

If the Prowler manages to escape the battle, then the Item stolen is lost forever.
When attempting to steal, the Prowler will always have a 100% success rate of stealing, An item is always chosen at random from your available inventory, provided that the Item can be sold in the shops. If the Prowler cannot steal an Item from you, it will still continue to flee the battle after the steal attempt.
Killing the Prowler that has stolen from you is the only way to retrieve the item stolen.
The Prowler can and will steal your most powerful Weapons, Armour and Accessories, so always be cautious when battling them. They will have a 50% chance of fleeing on their 2nd turn, and a 50% chance of fleeing on their 3rd turn. Always dispatch the Prowler first.
The Prowler may use Seize as its first attack, in which case it will not

POWER req for Overflow:

Base Damage Overflow:	146
Rnd Var Overflow 3x:	98
Rnd Var Overflow 4x:	73
Rnd Var Overflow 6x:	49

```
|  perform a steal attempt that Battle.                                      |
| Ethers are a very easy steal; A Lv 15 Cloud would have a 43.75% chance of  |
|  stealing from the Prowler, however, you probably don't want to try more   |
|  than once if you fail the first attempt.                                  |
| Normally the Prowler can be back-attacked, however, the 2x Kalm Fang &     |
|  1x Prowler encounter on the Grass area cannot be Pre-Empted.              |

Elfadunk's ATTACKS:

Manip Attack 1: Bodyblow
Manip Attack 2: Shower

Attack 1: <Bodyblow> — Berserk Attack
[172] Physical
Target: One Opponent
Element: Hit
Att%: 100
Power: 16
Base Damage: 40 HP

Attack 2: Shower
[1AE] Magical
Target: One Opponent
Element: Shoot
Status Inflict: Sadness (99%)
Att%: 95
Power: 8
MP Cost: 5 MP
Base Damage: 60 HP

Elfadunk's BATTLE PLAN: (Repeats)

SETUP: If a Chocobo is present, Display String: [A Chocobo!]

Elfadunk has not taken Physical Damage since it's last turn:

1/2 Chance: Use Shower on Rnd Target
1/2 Chance: Use <Bodyblow> on Rnd Target

Elfadunk has taken Physical Damage since it's last turn:

1/4 Chance: Use Shower on Last Attacker
3/4 Chance: Use <Bodyblow> on Last Attacker

DEATH: If Chocobo is present AND Chocobo is last alive Enemy:
Display String: [Caught a Chocobo.], activates Chocobo on World Map

Notes On Elfadunk:

Elfadunk is found in Battle Square:
Set - 1 (Before Tiny Bronco) Battle - 5

All of the Encounters with the Elfadunk on the Grass Area have been mistakenly placed in the "Special Battle" slots, which means that you will not encounter the Elfadunk nearly as often as you should have.

The Elfadunk does not perform an MP check to make sure it can perform Shower, and as such the "skill power is used up" text string will be displayed when it tries to use that Attack without enough MP.

Shower will inflict the Player with Sadness even if they already had Fury,

|   Notes On Mu:                              |   POWER req for Overflow:     |
|                                             |                               |
| Mu is found in Battle Square:               |  Base Damage Overflow: 147    |
|  Set - 1 (Before Tiny Bronco)  Battle - 5   |  Rnd Var Overflow  3x:  98    |
|                                             o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| Hot Springs is one of a few healing Attacks                                 |
|  that uses a stronger-than-normal Magical formula.                          |
| Be careful when fighting the Mu; their Sewer Attack can hit hard!           |
| L4 Suicide is an amazing Enemy Skill to obtain at this point in the game,   |
|  seeing as it will drop all Enemy's HP to 31/32 of its current HP,          |
|  provided that their Lv is divisible by 4. This can be a huge help,         |
|  especially in the Battle Square. If the target is vulnerable to Small, it |
|  will inflict that Status also.                                             |
| The Mu consists of two Enemy's; the base that it rests upon is one of       |
|  several enemies named [No Name], and cannot be targeted. Explore the       |
|  "Extra Enemies" section for details on Mu's Base.                          |
| The Mu cannot be Back-Attacked or Side-Attacked, meaning that one cannot    |
|  perform Random Variation Overflow with 4x or 6x Damage.                    |
\                                                                             /

Mandragora's BATTLE PLAN:
SETUP: If a Chocobo is present, Display String: [A Chocobo!]
PHASE 1: (Repeats)
None of the Mandragora has taken damage: Skip a turn
PHASE 2:
At least one of the Mandragora has taken damage:
Last Attack on any Mandragora was Physical: Use Slow Dance on Target with Lowest Current HP
Last Attack on any Mandragora was Magical: Use <Grass Punch> on Target with Lowest Current MP
Jumps back to Phase 1 after performing Phase 2 Attack
DEATH: If Chocobo is present AND Chocobo is last alive Enemy:
Display String: [Caught a Chocobo.], activates Chocobo on World Map
Notes On Mandragora:
POWER req for Overflow:
The Mandragora has extremely high MDefence, so just stick to Physical Attacks.
The Mandragora will not do anything until you attack one of them, at which point all of them will execute their Attack when their ATB gauge fills. Once they have used their Attack, they will remain idle until they are attacked once more.
If you kill the Mandragora with your Attack, then it will not trigger the other Mandragora to Attack you.
The Mandragora has the 3rd/4th highest MDef in the game, tied with Demons Gate.
Base Damage Overflow: 141
Rnd Var Overflow 3x: 94
Rnd Var Overflow 4x: 71
Rnd Var Overflow 6x: 47

|                                                                              |
|                                                                              |
|  DEATH: If Chocobo is present AND Chocobo is last alive Enemy:               |
|         Display String: [Caught a Chocobo.], activates Chocobo on World Map|
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Levrikon:                        |   POWER req for Overflow:      |
|                                             |                                |
| Levrikon is found in Battle Square:         |  Base Damage Overflow: 150     |
|  Set - 1 (Before Tiny Bronco)  Battle - 5   |  Rnd Var Overflow  3x: 100     |
|                                             |  Rnd Var Overflow  4x:  75     |
| The Levrikon can inflict the Player with    |  Rnd Var Overflow  6x:  50     |
|  Fury, which can help for Limit Levelling,  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  although the chances of inflicting Fury are                                 |
|  quite small (7% when using Flaming Peck).                                   |
| Although you can steal Ethers from the Levrikon, you would be better off     |
|  trying to steal from the Ark Dragon in the Mythril Mines. A Lv 15 Cloud     |
|  would have a 10.94% chance of stealing from the Levrikon.                   |
| An error has been made in regards to the Encounter placements in the         |
|  Grasslands Area Grass. The two Back Attack encounters have been             |
|  mistakenly placed in the "Normal Battle" slots, which means that you will   |
|  be back-attacked far more often than you should in this area.               |
\                                                                              /

```

Midgar Zolom's HP <= 1500 HP:

Use Beta on All Targets; If Beta has been used once, do nothing

Notes On Midgar Zolom:

The main reason to battle the Midgar Zolom on your first encounter is to try to learn the Enemy Skill Beta, but it won't be easy. In order for the Skill to be learned the Battle must end, and the Player that has learned Beta must still be present when the Battle concludes; although, they do not need to have survived the attack.

To go into the Battle, set up the following:

- Slow the Battle Speed all the way to 0
- Barret and Red XIII in Party
- All Player's in Back Row
- All Player's with Sadness
- All Player's Limit Breaks completely filled (optional)
- Enemy Skill Materia on Red XIII
- Talisman on Red XIII
- Elemental + Fire on Red XIII
- Unlock Red XIII's Lv 1-2 Limit Break Lunatic High (optional)

Red XIII will not only have the highest MDef, but also the highest HP to deal with Beta. If the Player survives the Attack, then the Enemy Skill will still be learned; however, if the ability killed the every remaining character, then the skill will not keep when you are taken back to the World Map (assuming one player has been ejected). If Beta misses Red XIII then the Enemy Skill *will* still be learned. If Red XIII gets 'flicked' out of Battle after learning Beta, the Skill will *not* be learned.

If you managed to obtain any Graviballs from the Deenglow earlier in the Train Graveyard, then now is the optimal time to use them. Opening with a Graviball will instantly drop its HP by 1000, triggering its 2nd Phase.

If the Midgar Zolom has already used Blown Away prior to its HP dropping below 2000, then it will not use the Counter Attack. If Blown Away is used as a Counter Attack then it will 'flick' the last Player to have attacked it; try to make sure that this is Barret. If Blown Away is used as a normal Attack (as opposed to a Counter), then a random target will selected, and cannot be used more than twice in one Battle.

Make sure to be aware of its HP at all times; cast Sense early on and make sure that Red XIII is not the one to drop its HP below 50%.

When the Midgar Zolom uses Beta it will do so as a Counter Attack, meaning that it could follow up with a use of Bite if its ATB gauge is close to being filled. Always make sure that Red XIII's HP is a priority once the Midgar Zolom's HP is close to reaching 1500 HP.

Poison will deal more damage than Deadly Wastes, and have a higher chance of inflicting Poison, so have Cloud use Bio until the Midgar Zolom is poisoned. Have Cloud cast Choco/Mog also (but not Barret, as Cloud's MAtt will be stronger than Barret's).

Quake and Bio are both stronger than Bolt/Ice/Fire, Quake being marginally stronger than Bio.

There are two identical versions of Bite; one used while the Midgar Zolom is in Phase 1, and another used while it is in Phase 2.

If you were playing a low-levelled game then you could make use of the Loco Weeds that you may have collected in the Shinra HQ. Throw a Loco Weed at one of your Characters, then quickly have that Character use a Hyper before they become confused. If done correctly, the confused

POWER req for Overflow:

Base Damage Overflow: 167
Rnd Var Overflow 3x: 112

| Character will throw a Hyper and a random target, and with luck that target will be the Midgar Zolom. If you manage to inflict the Zolom with Fury then it will have approximately a 20% chance of missing when it casts Beta.
| If an Attack misses the Target then the Enemy Skill will still be learned.
| Once a player is ejected from Battle, they will be flagged as 'escaped' (as opposed to dead), and the Player will *not* be met with a Game Over screen if the remaining Character's are killed. Instead, the Player will spawn back on the World Map at the same edge of the Marsh that they had started on.
| It is possible with a bit of skill to make across the Marsh without the use of a Chocobo; that goes for travelling both ways!
| Once defeated, the Midgar Zolom will re-spawn in, and will continue to do so each time you defeat it. There is no way to permanently kill the Midgar Zolom.

```

Att%: 100	Darkness (100%)
Power: 4	
Base Damage: 13 HP	

Madouge's BATTLE PLAN: (Repeats)

Madouge is in Front Row:

1/4 Chance: Use Swamp Shoot on Rnd Target
3/4 Chance: Use <Ironball> on Rnd Target

Madouge is in Back Row:

1/4 Chance: Use <Ironball> on Rnd Target
3/4 Chance: Use Swamp Shoot on Rnd Target

Notes On Madouge:	POWER req for Overflow:
Madouge is found in Battle Square: Set - 1 (Before Tiny Bronco) Battle - 6	Base Damage Overflow: 144 Rnd Var Overflow 3x: 96

You will want to try to steal the Grand Glove for Tifa, which you wouldn't be able to buy until Junon otherwise. A Lv 15 Cloud would have a 10.94% chance of stealing from the Madouge. The Madouge can inflict you with Darkness, which doesn't help at all if your Players are inflicted with Fury for Limit Levelling. One quick blast of L4 Suicide will render the Madouge harmless. The Madouge cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

|  don't underestimate them.                                                  |
| Of all the Enemies in the Mythril Mines, the Ark Dragon gives the most      |
|  amount of Battle Spoils, and the North Western Cavern of the Mythril       |
|  Mines is one of the best places to train on Disc 1!                        |
| Flame Thrower is a strong Enemy Skill to learn at this stage in the game,   |
|  and with a Power value of 14 it is your strongest "normal" Magical spell   |
|  (Beta doesn't count) to this point.                                        |
| Equip Elemental+Choco/Mog on your weapon to exploit the Ark Dragon's        |
|  weakness to Wind (as with all other 'elevated' enemies). Avoid Earth.      |
| Ethers make an easy steal, and the Player should have acquired a 2nd Steal  |
|  Materia from Kalm by now, so you should always steal from every Ark        |
|  Dragon you encounter. A Lv 15 Cloud would have a 37.5% chance of stealing  |
|  from the Ark Dragon.                                                       |
| The Ark Dragon cannot be Back-Attacked or Side-Attacked, meaning that one   |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.             |
\                                                                             /

Zemzelett's BATTLE PLAN: (Repeats)

STAGE 1: (Ground)

OPENING ATTACK: Use <Flap> on Rnd Target

THEREAFTER: 1/2 Chance use <Flap> on Rnd Target
1/4 Chance use Thunderbolt on Rnd Target
1/4 Chance use <[No Name]> on Self, transform to Stage 2
Set Evade to 11 and Defence to 20

STAGE 2: (Flying - Row 16)

OPENING ATTACK: Use Thunderbolt on Rnd Target

THEREAFTER: 1/2 Chance use <Flap> on Rnd Target
1/4 Chance use Thunderbolt on Rnd Target
1/4 Chance use <[No Name]> on Self, transform to Stage 1
Set Evade back to 1 and Defence back to 50

The Opening Attack will be used each time the Zemzelett transforms to its new stage.

COUNTER: [All Physical and Magical Attacks]

If Last Attack on Zemzelett was Fire OR Ice Element

Use <[No Name]> on Self, transform to Stage 2 (Flying - Row 16)
Set Evade to 11 and Defence to 20

Notes On Zemzelett:

Zemzelett is found in Battle Square:
Set - 1 (Before Tiny Bronco) Battle - 7

1st Stage: Def = 50 Evade = 1
2nd Stage: Def = 20 Evade = 11

White Wind will have a 100% chance of curing the following Statuses: Sleep, Poison, Confusion Silence, Slow, Stop, Frog, Small, Slow-numb, Petrify, Berserk, Paralyzed, Darkness, Death Force and Resist.

The Zemzelett will never use White Wind, so you must manipulate it to learn the Enemy Skill, which you won't be able to do the first time you encounter it. Come back once you have obtained the Buggy. A Lv 22 Cloud would have a 56% chance to manipulate the Zemzelett.

White Wind will cure all Allies for the same value as the caster's Current HP, and, it will also damage Undead enemies for the same value. In addition to this, casting White Wind on an Undead Enemy will have a 100% chance of inflicting Petrify on those vulnerable to said Status.

The Zemzelett has two identical versions of Thunderbolt; one use for each of its two stages.

When the Zemzelett transforms to its second stage it is given a Row value of 16, which means it is considered as "Flying". You will not be able to target it with short-ranged Physical Attacks while it is in this form.

Thunderbolt can hit hard, so keep an eye on your HP when fighting the Zemzelett.

Equip Elemental+Choco/Mog on your weapon to exploit the Zemzelett's weakness to Wind (as with all other 'elevated' enemies). Avoid Earth.

The Zemzelett is one of a handful of enemies that take Double Damage from Wind based attacks while it is on the ground.

POWER req for Overflow:

1st Stage:
Base Damage Overflow: 153
Rnd Var Overflow 3x: 102
Rnd Var Overflow 4x: 77
Rnd Var Overflow 6x: 51

2nd Stage:
Base Damage Overflow: 144
Rnd Var Overflow 3x: 96
Rnd Var Overflow 4x: 72
Rnd Var Overflow 6x: 48

|                  1/4 Chance start from 3rd Attack                          |
|                  1/4 Chance start from 4th Attack                          |
|                                                                            |
|                                                                            |
|  1ST ATTACK: Use <Air Bomber> on Rnd Target; If Formula's MP < 5, skip a   |
|               turn                                                         |
|                                                                            |
|  2ND ATTCK: Same as 1st Attack                                             |
|  3RD ATTCK: Same as 1st Attack                                             |
|                                                                            |
|  4TH Attack:                                                               |
|                                                                            |
|   Formula's HP > 60%:                                                      |
|                                                                            |
|    Use Blue Impulse on All Targets; If Formula's MP < 18, use <Air Bomber> |
|     on Rnd Target; If Formula's MP < 5, skip a turn                        |
|                                                                            |
|   Formula's HP <= 60%:                                                     |
|                                                                            |
|    Use Cross Impulse on All Targets; If Formula's MP < 26, use Blue        |
|     Impulse on All Targets; If Formula's MP < 18, use <Air Bomber> on Rnd  |
|     Target; If Formula's MP < 5, skip a turn                               |
|                                                                            |
|    After 4th Attack: 1/3 Chance jump to 1st Attack for next turn           |
|                      1/3 Chance jump to 2nd Attack for next turn           |
|                      1/3 Chance jump to 3rd Attack for next turn           |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Formula:                      |   POWER req for Overflow:       |
|                                          |                                 |
| Formula is found in Battle Square:       |  Base Damage Overflow: 149      |
|  Set - 1 (Before Tiny Bronco)  Battle - 7|  Rnd Var Overflow  3x:  99      |
|                                          o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Formula will often use attack which                                    |
|  targets all opponents, so be careful! Keep an eye on your HP, especially  |
|  when encountering the 3x Formula formations.                              |
| Equip Elemental+Choco/Mog on your weapon to exploit the Formula's          |
|  weakness to Wind (as with all other 'elevated' enemies). Avoid Earth.     |
|  Alternatively, if you were under-levelled then you could equip Elemental+ |
|  Choco/Mog on your Armour to defend from the Formula's Wind-based Attacks. |
```

| You will want to try to steal the Boomerang from the Formula, a weapon for Yuffie that is not obtainable until Junon otherwise. If you obtain more than one than you can sell your surplus stock for 700 gil each, although they are not the easiest to steal. A Lv 16 Cloud would have a 10.94% chance of stealing from the Formula. You should have obtained a 2nd Steal Materia from Kalm by now. Using Barret's Lv 1-2 Limit Break Mindblow will make it so that the Formula can never attack you.

One quick blast of L4 Suicide will deplete the Formula's HP to critical, which will make it easier to safely steal from them, and also to deal with the Formula's rather high HP.

The Formula cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

|   Hell Rider VR2's BATTLE PLAN: (Repeats)                                 |
|                                                                           |
|  OPENING ATTACK: Use Electromag on All Targets                            |
|                                                                           |
|  THEREAFTER: 1/2 Chance use <Iron Mallet> in Rnd Target                   |
|              1/2 Chance use <Ballistic> on Rnd Target                     |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Hell Rider VR2:                  |   POWER req for Overflow:   |
|                                             |                             |
| Hell Rider VR2 is found in Battle Square:   |  Base Damage Overflow: 152  |
|  Set - 1 (Before Tiny Bronco)  Battle - 8   |  Rnd Var Overflow  3x: 101  |
|                                             o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Hell Rider's Physical Attacks are rather                              |
|  strong, so be on guard. His Electromag Attack will reverse all the rows  |
|  of your Players, which isn't a bad thing if you have your Players in the |
|  Front Row; Reversing their rows to the Back Row will help against the    |
|  Hell Rider VR2's strong Attacks. This Attack uses the Hidden Element,    |
|  but you cannot defend from your rows being swapped in the same way you   |
|  would defend from a Status inflicting Attack that uses Hidden.           |
| You should try to grab some Hi-Potions from the Hell Rider VR2 as they are |
|  an easy steal. A Lv 16 Cloud would have a 39.06% chance of stealing from |
|  the Hell Rider VR2, and you should have a 2nd Steal Materia by now.      |
| The Hell Rider VR2 is one of 105 enemies that are Immune to Peerless,     |
|  which isn't necessary seeing as there is no way for the Player to inflict |
|  the enemy with Peerless.                                                 |
| The Hell Rider VR2 cannot be Back-Attacked or Side-Attacked, meaning that |
|  one cannot perform Random Variation Overflow with 4x or 6x Damage.       |
\                                                                           /

|    1/2 Chance: Do nothing                                                  |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On CMD.Grand Horn Lv 19:            |   POWER req for Overflow:    |
|                                             |                              |
| You will always encounter the CMD.Grand Horn |  Base Damage Overflow: 147  |
|  Lv 19 if you lose the Fort Condor Mini-Game |  Rnd Var Overflow  3x:  98  |
|  and at least one of the following          o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  conditions are met:                                                       |
|                                                                            |
|   - There are only two or less Characters in your team                     |
|   - The average Party Level is below 19                                    |
|                                                                            |
|  If the average Player Level is above 25 then you will never encounter the |
|  CMD.Grand Horn Lv 19.                                                     |
|  If your average Player level is between 19 - 25 then you will only fight  |
|  the CMD.Grand Horn Lv 19 based on the following conditions:               |
|                                                                            |
|   - Fort Condor Battles 1 - 3: CMD.Grand Horn Lv 19 is always fought       |
|   - Fort Condor Battles 4 - 6: CMD.Grand Horn Lv 19 is only fought if 15+  |
|                                enemies have been killed.                   |
|   - Fort Condor Battles 7 - 9: CMD.Grand Horn Lv 19 is only fought if 20+  |
|                                enemies have been killed.                   |
|   - Fort Condor Battles 4 - 6: CMD.Grand Horn Lv 19 is only fought if 25+  |
|                                enemies have been killed.                   |
|                                                                            |
| Aeris's Lv will not be considered for you average level, although the sum  |
|  of the other two Character's levels will still be divided by three, which |
|  can be very handy to know if you are trying to encounter the CMD.Grand    |
|  Horn Lv 19 for the Vagyrisk Claw (Petrifies on opponent).                 |
| There is only one other Enemy in the game that carries the Vagyrisk Claw,  |
|  which is the Bagrisk in Cosmo Canyon Area. If your Lv exceeds 77 then you |
|  can never steal the Vagyrisk Claw from the Bagrisk, which is why it can   |
|  be a good idea to try to instead obtain one from the CMD.Grand Horn Lv    |
|  19 if you are looking to max your inventory.                              |
| Poison Breath can hit hard, however, the CMD.Grand Horn Lv 19 does not     |
|  perform an MP check for its Attacks, so you can render the use of Poison  |
|  Breath and Grand Attack inert with one use of Barret's Mindblow, causing  |
|  the "skill power is used up" text string to be displayed when it tries to |
|  use those Attacks.                                                        |
| Make use of Bio to exploit the CMD.Grand Horn's vulnerability to Poison.   |
| Losing to the CMD.Grand Horn will not prompt a Game Over.                  |
| The CMD.Grand Horn Lv 19 is immune to Seizure, which isn't necessary       |
|  seeing as there is no way for the Player to inflict an Enemy with         |
|  Seizure. The CMD.Grand Horn Lv 19 is one of 86 enemies that are immune to |
|  Seizure. It is also immune to Peerless, along with 104 other enemies.     |
\                                                                            /

|   3RD ATTACK: Use Grand Attack on All Targets                                     |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
```

Notes On CMD.Grand Horn Lv 25:	POWER req for Overflow:
You will always encounter the CMD.Grand Horn Lv 25 if you lose the Fort Condor Mini-Game and the following condition is met:	Base Damage Overflow: 153 Rnd Var Overflow 3x: 102

- The average Party Level is above 25 AND Fort Condor Battle # > 3

You will never encounter the CMD.Grand Horn Lv 25 on the first three Fort Condor Battles, or if the average Party Level is below 19.
If your average Player level is between 19 - 25 then you will only fight the CMD.Grand Horn Lv 25 based on the following conditions:

- Fort Condor Battles 4 - 6: CMD.Grand Horn Lv 25 is only fought if less than 15 enemies have been killed.
- Fort Condor Battles 7 - 9: CMD.Grand Horn Lv 25 is only fought if less than 20 enemies have been killed.
- Fort Condor Battles 4 - 6: CMD.Grand Horn Lv 19 is only fought if less than 25 enemies have been killed.

Aeris's Lv will not be considered for you average level, although the sum of the other two Character's levels will still be divided by three.
Poison Breath can hit hard, however, the CMD.Grand Horn Lv 25 will keep using Poison breath until all three Players are inflicted with Poison. If you were to equip one Character with Poison Status defence, then Poison Breath would be continually used on that Character, rendering the CMD. Grand Horn Lv 25 harmless.
Once the CMD.Grand Horn Lv 25 has ran out of MP it will display the "Skill Power is used up" text string when it tries to use Poison Breath or Grand Attack.
Make use of Bio to exploit the CMD.Grand Horn's vulnerability to Poison.
Losing to the CMD.Grand Horn will not prompt a Game Over.
The CMD.Grand Horn Lv 25 is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an Enemy with Seizure. The CMD.Grand Horn Lv 25 one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.

|                                                                            |
|  DEATH: Use Big Wave on All Targets, use <Vanish> on Self, end Battle      |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Bottomswell:                      |   POWER req for Overflow:   |
|                                              |                             |
| Bottomswell is a 'Flying' Enemy, which means |  Base Damage Overflow: 149  |
|  that you cannot Attach it physically with   |  Rnd Var Overflow  3x:  99  |
|  Players that are short-ranged. Use Yuffie   o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  if you have recruited her, and make use of                                |
|  the Long Range Materia that you obtained in the Mythril Mines for Cloud.  |
|  Barret will not be Long Ranged if you have the Atomic Scissors on him.    |
| The "1st Target", "2nd Target" & "3rd Target" refers to the right-most,    |
|  central, and left-most characters, respectively.                          |
| Equip Elemental+Choco/Mog on your weapon to exploit Bottomswell's          |
|  weakness to Wind (as with all other 'elevated' enemies). Avoid Earth.     |
| Bottomswell has two version of <Bodyblow>; one used while in Phase 1 which |
|  has an Att% if 90, and one used while in Phase 2 which has an Att% of 95  |
|  (the same variants of Bodyblow as Air Buster). There are also three       |
|  identical versions of Waterball, one used for each Character.             |
| When Bottomswell uses <Waterball> it also inflicts the Death Status, which |
|  is primarily used as a flag to induce Seizure. The Death Status is        |
|  lifted once you cure the Character of Imprisoned. The Player that is      |
|  imprisoned will *not* be considered has having Death for the check during |
|  the jump after the 5th Attack during Stage 3; A Player must have 0 HP and |
|  actually ne KO'd to pass that check.                                      |
| Unlike Turks:Reno 1's Pyramid, the Waterpolo cannot be destroyed with the  |
|  use of Physical Attacks. Use Matra Magic or All+Magic to also damage      |
|  Bottomswell when you free your Players. Waterpolo drop no Battle rewards. |
| The Waterpolo is the only Enemy in the game to inflict the Player with     |
|  Seizure, which acts as "Reverse-Regen", and slowly depletes the Player's  |
|  HP over time.                                                             |
| An oversight in the AI script means that once Bottomswell has gone into    |
|  Stage 2 via its HP dropping below 75%, it will instantly enter into Stage |
|  3 the next time you attack it, which will then trigger the use of         |
|  <Waterball>.                                                              |
| If you wanted to turn this into an easy Battle then just cast Beta three   |
|  times to kill Bottomswell with no problems. Just be mindful of the fact   |
|  that Bottomswell will counter with Big Wave upon death.                   |
\                                                                            /

MAPS:

Under-Junon Rocky Beach

LOOKALIKES:

Mover

No Manipulate Attacks!

Waterpolo's ATTACKS:

Attack 1: <Appear> Target: Self Appearing
[14F] Physical 0 Dam Att%: Auto hit Animation

Attack 2: <Vanish> Target: Self Disappearing
[14E] Physical 0 Dam Att%: Auto hit Animation

Waterpolo's BATTLE PLAN: (Repeats)

SETUP: Enable Physical immunity

DEATH: Allow Target to be selected. Remove Imprisoned from Target.
Use <Vanish> on self, remove Self from Battle, leave no rewards

Notes On Waterpolo:

Waterpolo acts much like the Pyramid Enemy, in that it will imprison one of your Players, flagging them as dead. If all three Players have been imprisoned, then it would be a Game Over, although Bottomswell will never inflict all use Waterpolo on all three Players.

There are two main differences between the Pyramid and the Waterpolo; Firstly only Magical Attack can hurt them, and secondly, while under the Waterpolo's imprisonment your HP will drain over time. This "Reverse-Regen" effect is called Seizure (or Dual Drain), and it is the only time in the game that you will come across this negative Status.

You can still target the imprisoned Player while they are incapacitated, which means that they can be cured if their HP starts to drop while under the effect of Seizure.

When freeing your Players be sure to use an Attack that targets all enemies, this way you can hurt Bottomswell as well as releasing yourself from the Waterpolo. Matra Magic works well.

The Waterpolo are immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. The Waterpolo is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies, and also immune to Regen along with 14 other enemies.

The Waterpolo will leave no EXP upon death.

There is an additional "Death Counter" script that runs in the background whenever a Player dies; this script does not exist on the Waterpolo, but as part of the Formation itself. It basically removes the Waterpolo once the imprisoned Character's HP is drained to 0.

POWER req for Overflow:

Base Damage Overflow: 172
Rnd Var Overflow 3x: 115

|                                                                             |
|  1ST ATTACK:                                                                |
|                                                                             |
|   At least one Target with Paralyzed AND at least one Target with Darkness |
|    Use <Smoke Bullet> on Rnd Target                                         |
|                                                                             |
|   At least one Target with Paralyzed AND no Targets have Darkness           |
|    Use <Smoke Bullet> on Rnd Target without Darkness                        |
|                                                                             |
|   No Targets with Paralyzed                                                 |
|    Use <Smoke Bullet> on Rnd Target without Paralyzed                       |
```

2ND ATTACK:

No Targets with Paralyzed AND no Targets have Darkness
Use <Machine Gun> on Rnd Target

No Targets with Paralyzed AND at least one Target with Darkness
Use <Machine Gun> on Rnd Target with Darkness

At least one Target with Paralyzed
Use <Machine Gun> on Rnd Target with Paralyzed

2RD ATTACK: Same as 2nd Attack
3RD ATTACK: Same as 2nd Attack
4TH ATTACK: Same as 2nd Attack

5TH ATTACK:

Marine's HP > 66%: Skip a turn, jump to 1st Attack for next turn

Marine's HP <= 66%:

Grenade used less than 4 times:
Use Grenade on All Targets, jump to 4th Attack for next turn

Grenade used 4 times:
Same as 2nd Attack, jump to 1st Attack for next turn

Notes On Marine:

The Marine searches Players that have/do not have Paralyzed, which seems to be an error with the AI script seeing as there is no way for the Player to inflicted with Paralyzed at this stage in the game. It is likely that the intended check was instead for Sleep, seeing as <Smoke Bullet> inflicts Sleep (and Darkness).

Equip the Silver Glasses and Headband that you would have bought from Junon to deal with the Marine's Status inflicting Attack.

The Attack <Smoke Bullet> is one of seven Status inflicting Attacks that use the 'Hidden' Element, and as such can be defended from by equipping the Elemental on your Armour with any other non-element Materia (excluding other Support Materia and Restorative Materia). The Elemental Materia has to be Lv 2 minimum for the effect to work, the effect being that the chance of each Status being inflicted is dropped to 0. The Player is still considered to be vulnerable to the Statuses used, and the "Miss" will perpetually appear above their head. A Lv 1 Elemental would instead halve the chance of the Element being inflicted.

Shinra Betas are a useful steal seeing as you cannot obtain them normally; the only other time to obtain this piece of Armour is as a drop from the Submarine Crew much later on in the game, making them permanently missable. A Lv 18 Cloud would have a 10.94% chance of stealing from the Marine, and you should have two Steal materias by now. Shinra Betas have low MDef, but contain one extra Materia slot than the Carbon Bangle.

The Marine is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy.

POWER req for Overflow:

Base Damage Overflow:	147
Rnd Var Overflow 3x:	98
Rnd Var Overflow 4x:	74
Rnd Var Overflow 6x:	49

```

[015] Magical 0 Dam	Att%: Auto Hit	Status Inflict:
	MP Cost: 34 MP	Stop (59%)

Jenova-BIRTH's BATTLE PLAN: (Repeats)

OPENING ATTACK: 1/2 Chance start from 1st Attack
1/2 Chance start from 4th Attack

1ST ATTACK:

At least one Target with Stop: Use Gas on Rnd Target with Stop

No Targets with Stop: Use Stop on Rnd Target; If Jenova-BIRTH's MP < 34, skip a turn

2ND ATTACK: Skip a turn
3RD ATTACK: Skip a turn

4TH ATTCK:

1/3 Chance: Use <Laser> on 2nd Target; If 2nd Target has Death OR Stop, do nothing
Follow-Up: Use <Laser> on 1st Target; If 1st Target has Death OR Stop, do nothing
Follow-Up: Use <Laser> on 3rd Target; If 3rd Target has Death OR Stop, do nothing

2/3 Chance: Use <Laser> on Rnd Target without Stop; If all Targets have Stop, select Rnd Target

5TH ATTACK: Use Tail Laser on All Targets
Follow-Up: 1/2 Chance use Tail Laser on All Targets
1/2 Chance do nothing

6TH ATTACK:

1/3 Chance: Use W-Laser on 2nd Target; If 2nd Target has Death OR Stop, do nothing
Follow-Up: Use W-Laser on 1st Target; If 1st Target has Death OR Stop, do nothing
Follow-Up: Use W-Laser on 3rd Target; If 3rd Target has Death OR Stop, do nothing

2/3 Chance: Use W-Laser on Rnd Target without Stop; If all Targets have Stop, select Rnd Target

7TH ATTACK: Use Gas on Rnd Target with Stop; If no Targets have Stop:
1/3 Chance select Rnd Target
2/3 Chance skip a turn

Notes On Jenova-BIRTH:	POWER req for Overflow:
Use strong Magic such as Quake and Flame Thrower to deal with Jenova-BIRTH's high	Base Damage Overflow: 155 Rnd Var Overflow 3x: 104

| MDef. You could 'cheat' and use Beta for 700+ HP per hit. | Rnd Var Overflow 4x: 78 | Rnd Var Overflow 6x: 52 |

Jenova-BIRTH will inflict the Players with Stop every now and then, however, it will only do so three times before it runs out of MP. One blast of Barret's Lv 1-2 Limit Break Mindblow will sufficiently deplete its MP.

While Jenova-BIRTH isn't the toughest of bosses, it will occasionally use its Attack consecutively, and they all hit for 150+ HP (except for Tail laser which has Split Damage), so be on guard. Make use of your Long Range Materia and Long Ranged Characters for this Battle.

The "1st Target", "2nd Target" & "3rd Target" refers to the right-most, central, and left-most characters, respectively.

The Jenova-BIRTH Boss Battle is one of five Boss Battles in which the "Pre-Emp" Flag has been mistakenly enabled, meaning you have a chance of encountering it as a Pre-Emptive Strike and can land a cheeky Back-Attack for 4x Damage.

The White Cape that you get as a reward massively helps for the Battle Square until you get a Ribbon, and also against the Touch Me in Gongaga.

The Tail laser that Jenova-BIRTH is not the same Tail Laser that the Guard Scorpion uses; while they both have an Attack Power of 48, Jenova-BIRTH's variant has 90 Att%, and Guard Scorpion's has 120 Att%.

The "J-E-N-O-V-A" theme will be heard throughout this Boss Battle, as opposed to the regular "Still More Fighting" Boss Theme.

|                                                                            |
```

Grangalan IS covered by Grangalan Jr. OR Grangalan Jr.Jr. A

1ST ATTACK: Skip a turn
2ND ATTACK: Skip a turn
3RD ATTACK: Skip a turn
4TH ATTACK: Use Silver Wheel on Rnd Target

PHASE 3: (Repeats)

Grangalan Jr. has spawned:

Grangalan is NOT covered by Grangalan Jr. OR Grangalan Jr.Jr. A

1ST ATTACK: Use Silver Wheel on Rnd Target
2ND ATTACK: Use Silver Wheel on Rnd Target
3RD ATTACK: Use Silver Wheel on Rnd Target
4TH ATTACK: Use Darkeye on Rnd Target

COUNTER: [All Physical and Magical Attacks]

Grangalan Jr. has not spawned in:

1ST COUNTER: Do Noting
2ND COUNTER: Do Noting
3RD COUNTER: Use <Pull out> on Self, spawn Grangalan Jr. in

Grangalan Jr. has spawned in:

Do nothing

DEATH: Use <Vanish> on Self, remove Grangalan Jr. and Grangalan Jr.Jr. from battle, end Battle

Notes On Grangalan:

Grangalan is found in Battle Square:
Set - 1 (Before Tiny Bronco) Battle - 8

POWER req for Overflow:

Base Damage Overflow: 167
Rnd Var Overflow 3x: 111

The Grangalan can be a very annoying Enemy to kill, seeing as once it spawns in the Grangalan Jr. you will not be able to target it physically. If the Grangalan Jr. spawns in the Grangalan Jr.Jr. then you will not be able to target the Grangalan Jr. until the Jr.Jr. have been defeated. You can still use Magic or long-ranged Attacks to target the Grangalan, and the Battle will end once the Grangalan has been killed.

Use L4 Suicide to dispatch the Grangalan quickly, especially in the Battle Square should you get the Grangalan on the final Battle (assuming you still have Command Materia available) before Tiny Bronco.

The "Average "EXP AP and gil earned" assumes you to kill the Grangalan plus it counterparts. If you only kill the Grangalan then you will not gain the spoils for the other Grangalans, and the average spoils per battle will be much lower.

There are two identical versions of Silver Wheel, one used while it it being covered by the enemies in front of it, and another when it is not being covered.

Only the Grangalan Jr. and Grangalan Jr.Jr. A (right-most Jr.Jr.) cover the Grangalan; kill these two enemies and the Grangalan can be targeted

```
|  again, even if the middle and left-most Jr.Jr. are still present.          |
| The Grangalan is one of a number 'elevated' enemies that Nullifies the      |
|  Earth Element, but will no take double damage from Wind.                   |
| The Grangalan is one of 105 enemies that are Immune to Peerless, which      |
|  isn't necessary seeing as there is no way for the Player to inflict the    |
|  enemy with Peerless.                                                       |
| The Grangalan cannot be Back-Attacked or Side-Attacked, meaning that one    |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.             |
\                                                                             /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Grangalan Jr.:                 |   POWER req for Overflow:      |
|                                           |                                |
| Grangalan Jr. is found in Battle Square:  |  Base Damage Overflow: 159     |
|  Set - 1 (Before Tiny Bronco)  Battle - 8 |  Rnd Var Overflow  3x: 106     |
|                                           o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Grangalan Jr. will spawn in once you                                 |
|  have attacked the Grangalan three times. At which point the Grangalan in|
|  the Back Row will no longer be targetable by short-ranged attacks.      |
| The Grangalan Jr. will always spawn in the Jr.Jrs once you have attacked |
```

| it three times. Prior to that it will have a 25% chance of spawning in its children when you attack it.

Once the Grangalan Jr.Jr. have spawned in you will not be able to target the Grangalan Jr. with short-ranged attacks, however, only the right-most Grangalan Jr.Jr. "A" will cover the Grangalan Jr. Kill the right-most Jr.Jr. and the Grangalan Jr. will be targetable again.

Be warned; once the Grangalan Jr. is targetable again he will start using Triclops which could inflict the Player with Slow-numb. Make sure to have bought Softs from Costa Del Sol! Set the ATB to "Wait" so that the timer doesn't run down as you make your selections.

If you kill the main Grangalan while Grangalan Jr. is still alive then the Battle will end instantly. You will not gain the spoils for the Grangalan Jr. or Jr.Jrs if this happens.

The "Average "EXP AP and gil earned" assumes you to kill the Grangalan plus it counterparts. If you only kill the Grangalan in the Back Row then you will not gain the spoils for the other Grangalans, and the average spoils per battle will be much lower.

There are two identical versions of Silver Wheel, one used while it it being covered by the enemy in front of it, and another when it is not being covered.

The Grangalan Jr. is one of a number 'elevated' enemies that Nullifies the Earth Element, but will no take double damage from Wind.

The Grangalan Jr. is one of 105 enemies that are Immune to Peerless, which isn't necessary seeing as there is no way for the Player to inflict the enemy with Peerless.

The Grangalan Jr. cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

	Att%: 100	
	Power: 20	
	Base Damage: 35 HP	

Grangalan Jr.Jr's BATTLE PLAN: (Repeats)

1/4 Chance: Skip a turn
3/4 Chance: Use Silver Wheel on Rnd Target

Notes On Grangalan Jr.Jr.:

Grangalan Jr.Jr. is found in Battle Square: Set - 1 (Before Tiny Bronco) Battle - 8

You will only see the Grangalan Jr.Jr. once the Grangalan has first spawned in the Grangalan Jr., and the Grangalan Jr. has then spawned in the Jr.Jr. which it will do so after it has been attacked three times (or 1/4 chance when attacked once and twice).
Once the Grangalan Jr.Jr. has spawned in you will not be able to target the Grangalan Jr. in the middle row with short-ranged attacks, however, you only need to kill the right-most Grangalan Jr.Jr. "A" to make it so that the Grangalan Jr. is targetable again.
Killing the main Grangalan in the BacK Row will end the Battle instantly, and you will not gain the spoils for killing the other Grangalan's if that happens.
The "Average "EXP AP and gil earned" assumes you to kill the Grangalan plus it counterparts. If you only kill the Grangalan in the Back Row then you will not gain the spoils for the other Grangalans, and the average spoils per battle will be much lower.
There are two identical versions of Silver Wheel, one of which is never used. Also, the Grangalan Jr.Jr. carries an Attack called Stop Eye which will only be used if the Grangalan Jr.Jr is inflicted with Berserk.
The Grangalan Jr.Jr. is one of a number 'elevated' enemies that Nullifies the Earth Element, but will no take double damage from Wind.
The Grangalan Jr.Jr. is one of 105 enemies that are Immune to Peerless, which isn't necessary seeing as there is no way for the Player to inflict the enemy with Peerless.
The Grangalan Jr.Jr. cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

POWER req for Overflow:

Base Damage Overflow: 151
Rnd Var Overflow 3x: 101

|   Use Ice on Rnd Target for next turn; If Beachplug's MP < 4, use <Bite>    |
|    on Rnd Target for next turn, jump to 1st Attack for turn after           |
```

```
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Beachplug:                        |   POWER req for Overflow:   |
|                                              |                             |
| Beachplug is found in Battle Square:         |  Base Damage Overflow: 149  |
|  Set - 1 (Before Tiny Bronco)  Battle - 7    |  Rnd Var Overflow  3x:  99  |
|                                              |  Rnd Var Overflow  4x:  75  |
| Big Guard is a must-get Enemy Skill as it    |  Rnd Var Overflow  6x:  50  |
|  will inflict (100%) Haste, Barrier and      o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  MBarrier on all allies. You can only learn                               |
|  the Enemy Skill by manipulating the Beachplug, which you will not be able |
|  to do until you have recruited Cait Sith. A Lv 22 Cloud would have a 57%  |
|  chance to manipulate the Beachplug.                                      |
| Beachplugs do not have massive amounts of HP, so once you have the Morph   |
|  Materia from the Temple of The Ancients you could return to the beaches   |
|  of Corel/Gold Saucer/Gongaga to morph yourself some easy Turbo Ethers.    |
|  Use L4 Suicide to drop their HP to critical, then Morph them for roughly  |
|  60 HP worth of Damage.                                                   |
\                                                                           /

	MP Cost: 8 MP
	Base Damage: 120 HP

Search Crown's BATTLE PLAN: (Repeats)

1/2 Chance: Use Seed Shot on Rnd Target
1/2 Chance: Use Four Laser on Rnd Target

Notes On Search Crown:

Search Crown is found in Battle Square:
Set - 2 (After Tiny Bronco) Battle - 2

The large amounts of Battle Spoils given by the Search Crown means that the 5x Encounter on the Waterside Tracks (before the bridge) is one of the best training areas for this point in the game.

Be wary when encountering the 5x Search Crown Formation, as Four Laser can ruin you. One blast of Matra Magic should be enough to take them out in one hit.

Four Laser can only be cast 3 times before the Search Crown runs out of MP, at which point the "skill power is used up" text string will be displayed every time it tries to use that Attack.

Turbo Ethers are an incredibly useful steal, although a Lv 20 Cloud would only have a 12.5% chance of stealing from them.

The only reason the the Waterside Tracks in Mt. Corel is not better than the North West Mythril Mine cavern is due to the fact that it can take a while for the Search Crown to play out their Attack animations, especially if they Back-Attack you. Also, the area encounter rate is slightly lower on the Waterside Tracks. Still, the amazing Battle Spoils per average battle makes it an amazing spot to train in, especially for racking up kills for your Limit Breaks!

Set - 1 (Before Tiny Bronco) Battle - 8	Rnd Var Overflow 3x: 100
Set - 2 (After Tiny Bronco) Battle - 2	

The Bagnadrana aren't too difficult, although they do have a rather large amount of HP. They also have a 25% chance of using Poison Breath every turn, which can hit for high damage. Be sure to give someone the Star Pendant.

One blast of L4 Suicide will weaken the Bagnadrana's HP to Critical, which can be especially useful in the Battle Square if you encounter them on the final Battle (and still have use of your Command Materia).

Once you have the Morph Materia from the Temple of The Ancients, you could come back to Mt. Corel to morph the Bagnadrana into Guard Sources. The best screen to do this is the main Reactor screen. Use L4 Suicide, then

follow up with Morph which should deal around 60 HO worth of Damage.
On your first encounter you shout try to steal the Diamond Pin from it; a Weapon for Red XIII that will not be available until Gongaga otherwise. If you steal more than one then you can sell your surplus supply for 650 gil each. A Lv 20 Cloud would have a 12.5% chance of stealing from the Bagnadrana.
Poison Breath can only be used six times per battle at which point it will run out of MP. When this happens the "skill power is used up" text string will be displayed when the Bagnadrana tries to use Poison Breath.
You should also have been able to encounter the Bomb on the Mt. Corel Bridge as a 38.09% chance encounter, however, due to an overflow glitch with the encounter rate, the 1x Bomb Encounter overrides the chance of the 1x Bagnadrana Encounter.
The Bagnadrana cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Bloatfloat:                        |   POWER req for Overflow:   |
|                                               |                             |
| The Bloatfloat only appear on a few screens,  |  Base Damage Overflow: 149  |
|  so you won't see them very often during a    |  Rnd Var Overflow  3x:  99  |
|  playthrough.                                 |  Rnd Var Overflow  4x:  75  |
| Be very mindful of the fact one blast of      |  Rnd Var Overflow  6x:  50  |
|  Matra Magic may not kill them, and it will   o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  trigger the use of Spiky Hell from each                                  |
|  Bloatfloat on the Character that used Matra Magic. If this happens during |
|  the 3x Bloatfloat Encounter, then they will retaliate with 600 HP worth  |
|  of damage, likely killing the Character to have used Matra Magic.        |
| If you don't have many Softs by now then you could try to steal from them, |
|  although you'd have an easier job stealing Softs from the Cokatolis and  |
|  Needle Kiss. A Lv 20 Cloud would have a 10.94% chance of stealing from   |
|  the Bloatfloat.                                                          |
| Equip Elemental+Choco/Mog on your weapon to exploit the Bloatfloat's      |
|  weakness to Wind (as with all other 'elevated' enemies). Avoid Earth.    |
\                                                                           /

MAPS:	APPEARANCE RATE:	LOOKALIKES:
Corel Area Mountain Path	22%	
Mt. Corel Short Mountain-Side Tracks	45%	
Mt. Corel Long Roller-Coaster Screen	94%	
Mt. Corel Bird's Nest (Phoenix Downs)	N/A	
Mt. Corel Bridge	19%	

Cokatolis's ATTACKS:

Manip Attack 1: Beak
Manip Attack 2: Bird Kick
Manip Attack 3: Petrify Smog

Attack 1: <Beak> [1E7] Physical
Target: One Opponent
Element: Punch
Att%: 100
Power: 16
Base Damage: 45 HP
Berserk Attack

Attack 2: Bird Kick [1B6] Physical
Target: One Opponent
Element: Hit
Att%: 108
Power: 16
Base Damage: 45 HP

Attack 3: Petrify Smog [1E8] Magical 0 Dam
Target: One Opponent
Element: Hidden
Att%: 100
Status Inflict: Slow-numb (71%)

Cokatolis's BATTLE PLAN: (Repeats)

OPENING ATTACK: 1/4 Chance use Petrify Smog on Rnd Target without Slow-numb OR Petrify
3/4 Skip a turn

1ST ATTACK:

1/2 Chance: Use <Beak> on Rnd Target without Slow-numb OR Petrify
1/2 Chance: Use Bird Kick on Rnd Target without Slow-numb OR Petrify

If all targets are inflicted with either Slow-numb OR Petrify, skip turn.

2ND ATTACK:

Petrify Smog used less than 2 times:

1/3 Chance: Use Petrify Smog on Rnd Target without Slow-numb OR Petrify
2/3 Chance: Use 1st Attack

Petrify Smog used 2 times:

Use 1st Attack

Notes On Cokatolis:	POWER req for Overflow:

The Cokatolis will not you for much HP, although they can inflict you with Slow-numb which will act as a countdown timer to becoming Petrified. Make sure to have stocked up on Softs at Costa Del Sol; if you are short on Softs then just steal them from the Cokatolis. Set the ATB to "Wait" to help make your selection without the timer running down.	Base Damage Overflow: 149 Rnd Var Overflow 3x: 99 Rnd Var Overflow 4x: 75 Rnd Var Overflow 6x: 50

A Lv 19 Cloud would have a 43.75% chance of stealing from the Cokatolis.

The Cokatolis have fairly high HP, so don't hold back on using Magic against them.

You can gain 10 Phoenix Downs by opting to fight the Cokatolis in the bird's nest from the Waterside Tracks. Your party will not gain or lose any affection based on your choice.

The Attack Petrify Smog is one of seven Status inflicting Attacks that use the 'Hidden' Element, and as such can be defended from by equipping the Elemental on your Armour with any other non-element Materia (excluding other Support Materia and Restorative Materia). The Elemental Materia has to be Lv 2 minimum for the effect to work, the effect being that the chance of each Status being inflicted is dropped to 0. The Player is still considered to be vulnerable to the Status used, and the word "Miss" "Miss" will perpetually appear above their head. A Lv 1 Elemental would instead halve the chance of the Element being inflicted.

|  Bomb's Current HP:                       |  Rnd Var Overflow  6x:  52   |
|   Bomb's HP  > 75%: <Bodyblow> Att% = 95  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Bomb's HP <= 75%: <Bodyblow> Att% = 100                                  |
|   Bomb's HP <= 50%: <Bodyblow> Att% = 90                                   |
|                                                                            |
| Make sure to use Sense on the Bomb, and be wary once their HP comes close  |
|  to dropping below 150. You have to take the Bomb out in one hit at that   |
|  point, so use Matra Magic on it to deal 200+ worth of damage.             |
| If the Bomb manages to use Bomb Blast the it'll likely kill the Character  |
|  that it hits, and you'll get no spoils for that Battle.                   |
```

| Make sure to steal as many Right Arms as you can from the Bomb, as they will massively help out in the Battle Square (they have a Base Damage of 1600 HP). A Lv 20 Cloud would have a 10.94% chance of stealing from the Bomb, and this is best done at the beginning of the battle where it'll have a 50% chance of skipping each turn.
| The Bomb is one of a number 'elevated' enemies that Nullifies the Earth Element, but will no take double damage from Wind.

-.-.-.

MP Cost: 64 MP
Base Damage: 3118 HP
Reflectable
Split Damage

Attack 2: Self-destruct [1ED]
Magical
% Based
Target: One Opponent
Element: None
Att%: 255
Power: 24
Base Damage: 75% Current HP

2-Faced's BATTLE PLAN:

No main AI Script exists for 2-Faced

COUNTER: [All Physical and Magical Attacks]

1/8 Chance: Use Self-destruct on Rnd Target, remove Self from Battle, leave no rewards

1/8 Chance: Use Cure3 on All Targets, remove Self from Battle, leave no rewards

3/4 Chance: Do nothing

Notes On 2-Faced:

A flaw exists with the 2-Faced's AI Script. If the other (non 2-Faced) enemies that share the same 'Group ID' as the 2-Faced have been killed (2-Faced A = Group A; 2-Faced B = Group B etc), then the 2-Faced *should* have had a 100% chance of activating its Counter Script, with a 50/50 chance of using either Attack. As it stands, the Counter script will check for the Death Status of the other 2-Faced in the same group, which is illogical due to the fact there can only be one "2-Faced A" (or "B" or "C").

The 2-Faced will never attack unless prompted to via a Counter Attack. They will either heal you for massive amounts of HP, or damage you for

POWER req for Overflow:

Base Damage Overflow: 149
Rnd Var Overflow 3x: 100

| massive amounts of HP, which can be great for Limit Leveling but also hazardous to your Phoenix Down supply. It's a good job that a Lv 21 Cloud would have a 42.19% chance of stealing Phoenix Downs from the 2-Faced.
| If the 2-Faced's Counter script activates then you will not receive any rewards for that 2-Faced. Because of this, the average spoils per Battle will be affected when the 2-Faced escapes.
| The 2-Faced is one of six enemies that are affected by the 'Berserk Glitch', which means that they have no assigned Attack to use when they are inflicted with Berserk. As such the "skill power is used up" text string will be displayed every turn, seeing as the Attack they are trying to use costs 65,535 MP!
| The 2-Faced is one of a number 'elevated' enemies that Nullifies the Earth Element, but will no take double damage from Wind.
| The 2-Faced cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.
| The 2-Faced is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy.

Bandit's BATTLE PLAN: (Repeats)

NOTE - The Bandit targets the last Player to attack it. If it hasn't taken any damage, select a Rnd Target and keep attacking that target until damage is taken. If the Last Attacker has Death, select a Rnd Target.

1ST ATTACK: Skip a turn

2ND ATTACK: 1/2 Chance use Hold-up on Last Attacker
1/2 Chance use Mug on Last Attacker

3RD ATTACK: 1/2 Chance skip a turn
1/2 Chance use <Escape> on Self, remove Self from Battle, no rewards

4TH ATTACK: Use <Escape> on Self, remove Self from Battle, leave no rewards

Notes On Bandit:

If the Bandit manages to escape the battle, then the Item stolen is lost forever.
When attempting to steal, the Bandit will always have a 100% success rate of stealing An item is always chosen at random from your available inventory, provided that the Item can be sold in the shops. If the Bandit cannot steal an Item from you, it will still continue to flee the battle after the steal attempt.
Killing the Bandit that has stolen from you is the only way to retrieve the item stolen.
The Bandit can and will steal your most powerful Weapons, Armour and Accessories, so always be cautious when battling them. They will have a 50% chance of fleeing on their 3rd turn, and will always flee on their 4th turn. Always deal with the Bandits as a priority.
The Bandit may use Hold-up which will steal gil equal to the Caster's Level * 20, in this case that will be 340 gil. Kill the Bandit to get it back. The Bandit is the only Enemy in the game that uses an attack which steals gil from you.
X-Potions can be am extremely useful steal, although you will not have time to get more than one steal attempt in. A Lv 21 Cloud would have a 12.5% chance of stealing from the Bandit. Tents can be equally useful, as such it may be better just to hope for the Tent as a drop (you cannot get the Drop and the Steal).
The Bandit cannot be Back-Attacked or Side-Attacked, meaning that one

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Death Claw:                    |   POWER req for Overflow:       |
|                                           |                                 |
| Make sure to learn the Enemy Skill Laser  |  Base Damage Overflow: 151      |
|  from the Death Claw; you won't be able to|  Rnd Var Overflow  3x: 101      |
|  until you get to Disc 3 otherwise, and it|  Rnd Var Overflow  4x:  76      |
|  is an invaluable Skill to learn which is |  Rnd Var Overflow  6x:  51      |
|  the equivalent of casting Demi2 (drains  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  50% of the target's current HP).                                         |
| The Death Claw can only cast its Magic so many times before it depletes   |
|  its MP, at which point the "skill power is used up" text string will be  |
|  displayed when it tries to use any attack other than Claw.               |
| You most definitely want to be trying to steal a set of Platinum Bangles  |
|  from the Death Claw; a Double Growth Armour that would have to be        |
|  purchased from Costa Del Sol for 1800 a piece otherwise. A Lv 21 Cloud   |
|  would have a 42.19% chance of stealing from the Death Claw.              |
| Now would be the perfect time to make use of your new Manipulate Materia; |
|  A Lv 22 Cloud would have a 53% chance to manipulate the Death Claw.      |
| The Death Claw is encountered in an area that cannot be revisited; once   |
|  you progress past a certain point in the game, you can no longer fight   |
|  the enemy.                                                               |
\                                                                           /

Manip Attack 1: Bodyblow
Manip Attack 2: Matra Magic

Attack 1: <Bodyblow> [172] Physical
Target: One Opponent
Element: Hit
Att%: 100
Power: 16
Base Damage: 57 HP
Berserk Attack

Attack 2: Matra Magic [052] Magical
Target: All Opponents
Element: None
Att%: 100
Power: 11
MP Cost: 8 MP
Base Damage: 111 HP
Enemy Skill
Reflectable
No Split Damage

Bullmotor's BATTLE PLAN: (Repeats)

1/2 Chance: Use Matra Magic on All Targets
1/2 Chance: Use <Bodyblow> on Rnd Target in Back Row; If all Targets are in Front Row, select Rnd Target

Notes On Bullmotor:

Bullmotor is found in Battle Square:
Set - 2 (After Tiny Bronco) Battle - 1

If you missed Matra Magic the first time around from the Super Sweeper, then now's the time to relearn it. Regardless, you'll want to learn it for your 2nd Enemy Skill as it is one of the best abilities for your party at this stage in the game (it has no-split damage unlike most other attacks that target all opponents).

For the first time in the game you are able to steal X-Potions, and they

POWER req for Overflow:

Base Damage Overflow: 150
Rnd Var Overflow 3x: 100
Rnd Var Overflow 4x: 75
Rnd Var Overflow 6x: 50

```
|  are an easy steal at that! A Lv 21 Cloud would have a 42.19% chance of    |
|  stealing from the Bullmotor, and you should steal from every one you      |
|  encounter. You can also steal X-Potions from the Bandit, but that would   |
|  be very ill-advised given their stealing -> escaping tactics.             |
| The Bullmotor is encountered in an area that cannot be revisited; once you |
|  progress past a certain point in the game, you can no longer fight the    |
|  enemy.                                                                    |
\                                                                            /

|                          1/2 Chance use Sandstorm on All Targets               |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Land Worm:                          |   POWER req for Overflow:     |
|                                                |                               |
| The Land Worm performs an illogical check to   |  Base Damage Overflow: 164    |
|  see if it is inflicted with Confusion; it     |  Rnd Var Overflow  3x: 109    |
|  has an immunity to Confusion (!). I suspect o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  that the check may have instead been for                                      |
|  Silence, although that is only speculation based on the sequencing of the    |
|  Statuses (Silence is one after Confusion sequentially).                      |
| The Attack Sandstorm is subject to Split Damage for the damage                 |
|  calculations; however, the Status inflicted via Sandstorm is *not*            |
|  subject to Split Damage.                                                      |
| You can only encounter the Land Worm on one screen, and given the              |
|  ridiculously low encounter rate on that screen it's likely you may never     |
|  encounter the Land Worm on a playthrough. Note that the desert screen        |
|  *with* the crevice does not contain enemies. You can revisit the Desert      |
|  of Corel Prison by driving the Buggy straight into the base of the Gold      |
|  Saucer in the centre of the quicksand.                                        |
| If you do encounter the Land Worm then you should definitely try to steal     |
|  some Turbo Ethers from it; a Lv 21 Cloud would have a 10.94% chance of       |
|  stealing from the Land Worm, and a 50% Chance of manipulating it.             |
| Don't hold back on using your stronger Magical attacks to deal with the       |
|  Land Worm's high HP, especially Ice! If you are under levelled then you      |
|  should put Elemental+Earth on someones Armour to help defend against the     |
|  Land Worm's rather strong attacks.                                            |
| The Land Worm can only use Earthquake 8 times before it runs out of MP, at    |
|  which point the "skill power is used up" text string will be displayed       |
|  when it tries to use that Attack.                                             |
| The Land Worm cannot be Back-Attacked or Side-Attacked, meaning that one      |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.                |
| The Land Worm is encountered in an area that cannot be revisited; once you    |
|  progress past a certain point in the game, you can no longer fight the       |
|  enemy. So long as you have the Buggy, you can revisit Corel Prison Desert    |
|  which will be when up until reach Icicle Inn on Disc 2.                       |
\                                                                                /

Corel Prison Desert Screen 1 (Without Crevice)	6%	Cactuer

Cactuar's ATTACKS:

Manip Attack 1: 1000 Needles
Manip Attack 2: Mystery Kick

Attack 1: <Mystery Kick>
[36B] Physical
Target: One Opponent
Element: Hit
Att%: 90
Power: 48
Base Damage: 144 HP

Attack 2: 1000 Needles
[34E] Magical
Spcl Formula
Target: One Opponent
Element: Shoot
Att%: 100
Power: 50
Base Damage: 1000 HP
Never Used
Fixed Damage

Attack 3: <Dodge>
[23A] Physical 0 Dam
Target: Self
Att%: Auto Hit
Never Used

Attack 4: <(Report)>
[164] Physical 0 Dam
Target: Self
Att%: Auto Hit
Escapes Battle

Cactuar's BATTLE PLAN: (Repeats)

1ST ATTACK: 1/2 Chance use <Mystery Kick> on Rnd Target
1/2 Chance skip a turn

2ND ATTACK: Same as 1st Attack

3RD ATTACK: Use <Mystery Kick> on Rnd Target
Follow-Up: 1/2 Chance do nothing
1/2 Chance use <(Report)> on Self, remove Self from Battle, leave no rewards, end Battle

4TH ATTACK: Same as 3rd Attack
5TH ATTACK: Same as 3Rd Attack

6TH ATTACK: Use <Mystery Kick> on Rnd Target
Follow-Up: Use <(Report)> on Self, remove Self from Battle, leave no rewards, end Battle

COUNTER: [All Actions made by All Players and Enemies]

7/8 Chance: Set Evade to 255 until the next action is performed
1/8 Chance: Do nothing

Notes On Cactuar:	POWER req for Overflow:
The Cactuar can be one of the most annoying	Base Damage Overflow: 150

enemies in the game, seeing as they have an 87.5% chance of triggering the Counter script every time any Action is performed, regardless of the Target or the Caster. This includes all Actions made by the Cactuar. Even actions such as Change/Defend will trigger the Counter chance.	Rnd Var Overflow 3x: 100 Rnd Var Overflow 4x: 75 Rnd Var Overflow 6x: 50

Once the Cactuar has set its Evade to 255, all Physical attacks will only have a 1% chance of connecting. Because of this, and the fact that it is impervious to all magical Elements you should open with L4 suicide which has the "Auto Hit" flag enabled, and then follow up with Matra Magic as it is the only non-elemental Magical attack at your disposal (other than Choco/Mog, which is also a good alternative option). The following Battle Items also have the "Auto Hit" flag enabled:

- Grenade
- Shrapnel
- Right Arm
- Molotov
- S-mine
- 8-inch Cannon

Every action performed by both the Player and Enemy will set the Cactuar's Evade back to 20, and a fresh 7/8 chance of the Counter script will then occur. If the Cactuar's Evade does pass the 1/8 chance of being set back to it default value, then your attacks will still only have approximately 90% chance of connecting.

Thankfully the Cactuar does not make use of its 1000 Needles Attack which deals a fixed 1000 HP of damage. It likely exists as a copy and paste leftover from the Cactuer.

The Cactuar is one of 105 enemies that are Immune to Peerless, which isn't necessary seeing as there is no way for the Player to inflict the Enemy with Peerless. It is also immune to Regen, along with 14 other enemies.

The Cactuar is the only enemy in the game that nullifies the Hidden Element. This means that it would take 0 damage from your physical attacks if you were to equip the Elemental Materia on your Weapon with any non=elemental Materia (excluding other Support Materia and Restorative Materia).

The Cactuar is only found in one screen in the game (the Desert screen *without* the crevice), and it only has a 6.25% chance encounter rate. This makes it an extremely rare enemy, so if you do encounter it be sure to kill it as the 10,000 gil reward can be massively helpful at this current point in the game. You can revisit the Desert of Corel Prison by driving the buggy straight into the base of the Gold Saucer.

The Cactuar can be a good option to try to battle if you are playing a low-levelled game given its obsolete EXP and AP amount. You can also stock up on Turbo Ethers from the Land Worm for the 60/64 times that you'll be encountering it.

The Cactuar is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy. So long as you have the Buggy, you can revisit Corel Prison Desert which will be when up until reach Icicle Inn on Disc 2.

{Dyne} !! BOSS BATTLE !!

|                     3/4 Chance use Needle Gun on Rnd Target                  |
|                                                                              |
|                                                                              |
|  PHASE 4: (Repeats)                                                          |
|                                                                              |
|   Dyne's HP <= 25%: Use Needle Gun on Rnd Target                             |
|                                                                              |
|                                                                              |
|  DEATH: 1/2 Chance use Molotov Cocktail on All Targets                       |
|         1/2 Chance do nothing                                                |
|                                                                              |
|   Follow-Up: Display String: [Dyne "Urgh!"], cure Self of Sleep, Poison,     |
|               Haste, Slow, D.Sentence & Berserk                              |
|              Use <[No Name]> on Self, end Battle                             |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Dyne:                           |   POWER req for Overflow:       |
|                                            |                                 |
| This Battle is fought with Barret-only, and|  Base Damage Overflow: 158      |
|  as far as bosses go, Dyne does not present|  Rnd Var Overflow  3x: 105      |
|  too much of a challenge, just be sure to  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  have enough HP to survive Molotov Cocktail                                  |
|  which he has a 50% chance of using as a Death Counter. Keep Barret in the   |
|  Back Row and equip him with the Long Range Materia (if equipped with the    |
|  Atomic Scissors) as Dyne's attacks can do moderate damage.                  |
| Be 100% sure that Barret has the Restore Materia equipped prior to the       |
|  Battle, and also use Poison to exploit Dyne's vulnerability to the          |
|  Status. If you were low-levelled then a Right Arm will kill Dyne in one     |
|  hit, or alternatively just cast Beta (DynemixDJ says that's cheating).      |
| The "S-Mine" Attack that you see is not the same as the Battle Item; the     |
|  S-mine (small "m") has a Base Damage of 1600 and is much stronger than      |
|  Dyne's Attack.                                                              |
| Molotov Cocktail is scripted to attack all opponents, however, seeing as     |
|  only Barret exists as a target it will attack just him, and as such the     |
|  Attack will *not* be subject to Split Damage.                               |
| Even though Dyne has incredibly high MDefence, he will still take more       |
|  damage from your Lv 2 Magical Materia. Ifrit is your strongest Summon,      |
|  and will deal over 250 HP of damage.                                        |
| Once Dyne is defeated Barret will not perform his victory pose, and the      |
|  Battle Victory Fanfare will not play.                                       |
\                                                                              /

ENEMIES

NOTE - The Grangalan, Grangalan Jr., Grangalan Jr.Jr. and Beachplug can also be fought here, however, I will not be duplicating their entries. You can find those enemies within the "Corel Area" listings above. You can also find the Chocobo Lv 22 B and Lv 29 here; scroll down to

the Chocobos section of "Extra Enemies" for those listings.

Spencer's ATTACKS:

Manip Attack 1: Swordblade
Manip Attack 2: Upper Cutter

| Attack 1: <Swordblade> [1F3] Physical | Target: One Opponent | Element: Cut | Att%: 95 | Power: 16 | Base Damage: 64 HP | Berserk Attack |

| Attack 2: Upper Cutter [1F4] Physical | Target: One Opponent | Element: Cut | Att%: 110 | Power: 20 | Base Damage: 80 HP |

Spencer's BATTLE PLAN: (Repeats)

SETUP: If a Chocobo is present, Display String: [A Chocobo!]

1/2 Chance: Use <Swordblade> on Rnd Target
1/2 Chance: Use Upper Cutter on Rnd Target

DEATH: If Chocobo is present AND Chocobo is last alive Enemy:
Display String: [Caught a Chocobo.], activates Chocobo on World Map

Notes On Spencer:

POWER req for Overflow:

Spencer is found in Battle Square:	Base Damage Overflow: 144
Set - 2 (After Tiny Bronco) Battle - 1	Rnd Var Overflow 3x: 96
	Rnd Var Overflow 4x: 72
It is commonly thought that the 'Good'	Rnd Var Overflow 6x: 48
Chocobo will only appear alongside the 2x o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<
Spencer. This is incorrect; the 'Good'
Chocobo also appears alongside 2x Flapbeat, *so long as the Chocobo is in
the Front Row*.
The Sahara Nuts are actually a useful item to obtain, seeing as you will
always have a 50% chance of getting a Black Chocobo when breeding a Blue
+ Green Chocobo, *regardless of the amount of wins they have
accumulated*. A Lv 22 Cloud would have a 12.5% chance of stealing from
the Spencer.

Gold Saucer Area Grass	71%	Deenglow
Gold Saucer Area Desert	50%	Wind Wing

Flapbeat's ATTACKS:

Manip Attack 1: Tailbeat
Manip Attack 2: Flying Sickle

Attack 1: <Tailbeat> [1FB] Physical
Target: One Opponent
Element: Hit
Att%: 255
Power: 16
Base Damage: 62 HP
Berserk Attack

Attack 2: Flying Sickle [1FC] Magical
Target: One Opponent
Element: Wind
Att%: 255
Power: 12
MP Cost: 8 MP
Base Damage: 225 HP

Flapbeat's BATTLE PLAN: (Repeats)

SETUP: If a Chocobo is present, Display String: [A Chocobo!]

*A 'Group Enemy' is an Enemy that is NOT another Flapbeat, and also shares the same 'Group ID' Flag as the Flapbeat running the AI Script; Flapbeat 'A' = Group A, 'B' = Group B, 'C' = Group C etc.

At least one 'Group Enemy' alive*:

1/4 Chance: Use Flying Sickle on Rnd Target
3/4 Chance: Use <Tailbeat> on Rnd Target

All 'Group Enemies' dead*:

1/3 Chance: Use <Tailbeat> on Rnd Target
2/3 Chance: Use Flying Sickle on Rnd Target

DEATH: If Chocobo is present AND Chocobo is last alive Enemy:
Display String: [Caught a Chocobo.], activates Chocobo on World Map

Notes On Flapbeat:	POWER req for Overflow:
Flapbeat is found in Battle Square:	Base Damage Overflow: 149

Set - 2 (After Tiny Bronco) Battle - 1	Rnd Var Overflow 3x: 99
	Rnd Var Overflow 4x: 75
The Flying Sickle Attack is the same Attack	Rnd Var Overflow 6x: 50
used by the SOLDIER:3rd (and Frozen Nail),	o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<
and can hit quite hard. The Flapbeat will	
use Flying Sickle more often if it is the last enemy alive in its	
'Group'. If you were fighting the 3x Spencer and 1x Flapbeat Encounter,	
then the other 'Group Enemy' would be the Spencer A; Kill the Spencer B	
and Spencer C first to keep the Flapbeat from using Flying Sickle as	
often.	
The Flapbeat can only use Flying Sickle 8 times, at which point the "skill	
power is used up" text string will be displayed every time it tries to	
use that Attack.	
With a high MDef value, the Flapbeat will take less damage from your	
Magical attacks, although, things like Bolt2 will still deal more damage	
than your Physical attacks (unless you acquired the Champion Belt from	
the Battle Square).	
If you failed to obtain the Laser Enemy Skill from the Death Claw in Corel	
Prison, then you should definitely try to obtain some T/S Bombs from the	
Flapbeat, as they have the same effect (deals damage equal to 50% of the	
target's current HP). A Lv 22 Cloud would have a 45.31% chance of	
stealing from the Flapbeat.	
If you intend to embark on Yuffie's Sidequest when the game intends you to	
(after acquiring the Tiny Bronco), then you would do well to obtain at	
least two T/S Bombs for the Rapps Battle, as Rapps is one of a handful of	
Bosses that do not nullify % based Gravity Attacks.	
Equip Elemental+Choco/Mog on your weapon to exploit the Flapbeat's	
weakness to Wind (as with all other 'elevated' enemies). Avoid Earth.

|  DEATH: If Chocobo is present AND Chocobo is last alive Enemy:             |
|         Display String: [Caught a Chocobo.], activates Chocobo on World Map|
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Harpy:                        |   POWER req for Overflow:       |
|                                          |                                 |
| Harpy is found in Battle Square:         |  Base Damage Overflow: 147      |
|  Set - 1 (Before Tiny Bronco)   Battle - 8  |  Rnd Var Overflow  3x:  98   |
|                                          o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The AI Script for the Harpy acts very                                      |
|  peculiarly when faced alongside a Chocobo. If you kill the Harpy while    |
|  its HP is less than or equal to 25%, then it will play out the normal AI  |
|  Script to instantly end the battle and capture the Chocobo. If, however,  |
|  you manage to kill the Harpy with its HP above 200, then the battle will  |
|  *not* end instantly. Instead, you must wait for the Chocobo's ATB gauge   |
|  to fill, at which point the Chocobo's 'safety net' AI Script kicks in and |
|  ends the Battle for you, still capturing the Chocobo.                     |
| If The Chocobo passes the chance to flee the Battle once its ATB gauge has |
|  filled, instead of displaying the default "Caught A Chocobo" text string, |
|  the message will instead display the “Wark! Wark!”" text string,          |
|  signifying that the Chocobo is about to escape; it will not. The battle   |
|  will end before that happens, and you will still capture the Chocobo.     |
| Be VERY cautious when battling the Harpy, as Aqualung can wipe out your    |
|  party in one fell swoop. If you encounter the Harpy as the last Battle    |
```

```
|  in the Battle Square (Set 1), then you should consider using any Right    |
|  Arms or Smoke Bombs that you may have.                                     |
| Aqualung is a must-get Enemy Skill, seeing as it has an Attack power of 52 |
|  (only 2 less than Beta), and will hit all Opponents for Non-Split Damage  |
|  which makes it practically as good as Beta. It is also one of just two    |
|  available Water-based attacks available to the Player; the other being    |
|  the Leviathan Summon.                                                      |
| The easiest way to encounter the Harpy is by driving the Buggy around in   |
|  the quicksand 'Desert' area on the World Map. Here you'll have a 50%      |
|  chance of encountering it, whereas on the Grass Chocobo tracks you'll     |
|  only have an 8.59% chance on encountering the Harpy (assuming a Lv 1      |
|  Chocobo lure).                                                             |
| You should try to manipulate the Harpy when attempting to learn Aqualung;  |
|  a Lv 22 Cloud would have a 55% chance on manipulating it. Once its        |
|  manipulated, you could optionally have it cast Poison Storm on itself.    |
| The easiest way to deal with the Harpy is to Open with Laser dealing 200   |
|  HP, then follow up with Aqualung to finish it off. You could try to       |
|  manipulate it to have it cast Aqualung on itself to save your own MP; the |
|  Harpy's high MP count means it can use Aqualung several times per battle. |
| Once you have obtained the Morph Materia from the Temple of The Ancients,  |
|  you would be wise to come back to the Harpy to try morph some Elixirs     |
|  (unless you're prepared to exploit the infinite Elixir glitch in the      |
|  Great Glacier further on). Your Morph Damage following the TOTA will be   |
|  around 60 HP, so attack it once normally before trying to Morph it.       |
| When your party reaches end-game levels you will be able to stockpile      |
|  Elixirs from the Harpy easier than any other enemy, which will be         |
|  necessary for defeating the Magic Pots to reap the spoils they leave.     |
|  With 2x Lv 3 Chocobo Lures equipped (or Mastered) you would have a 33.2%  |
|  chance to encounter the Harpy on the Chocobo tracks on the Gold Saucer    |
|  World Map terrain.                                                         |
| There is no need to try to steal the Striking Staff from the Harpy, as you |
|  should already have obtained the Weapon for Aeris while in the Train      |
|  Graveyard from the Eligor, or from one of Junon Weapon Shops.              |
| The word 'Harpy' means 'snatchers' in Greek and Roman mythology, and one   |
|  would take the form of a female monster-like bird with the face of a      |
|  human. In the JORG version, the Harpy was named "Chimera"; a term used    |
|  describe an animal that has been spliced with one (or more) other         |
|  animal/s to create a hybrid creature.                                      |
| The Harpy is one of 105 enemies that are Immune to Peerless, which isn't   |
|  necessary seeing as there is no way for the Player to inflict the Enemy   |
|  with Peerless.                                                             |
| The Harpy cannot be Back-Attacked or Side-Attacked, meaning that one       |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.             |
\                                                                             /

Gagighandi's ATTACKS:

Manip Attack 1: Claw
Manip Attack 2: Stone Stare

Attack 1: <Claw>	Target: One Opponent	Berserk Attack	
[1BE] Physical	Element: Hit		
	Att%: 100		
	Power: 16		
	Base Damage: 63 HP		
Attack 2: Stone Stare	Target: One Opponent	Status Inflict:	
[1FE] Magical 0 Dam	Element: Hidden	Slow-numb (100%)	
	Att%: 255		
	MP Cost: 5 MP		

Gagighandi's BATTLE PLAN: (Repeats)

OPENING ATTACK:

1/4 Chance: Use <Claw> on Rnd Target
3/4 Chance: Use Stone Stare on Rnd Target without Petrify; If all Targets have Petrify, use <Claw> on Rnd Target

THEREAFTER:

3/4 Chance: Use <Claw> on Rnd Target
1/4 Chance: Use Stone Stare on Rnd Target without Petrify; If all Targets have Petrify, use <Claw> on Rnd Target

Notes On Gagighandi:

Gagighandi is found in Battle Square:
Set - 2 (After Tiny Bronco) Battle - 2
Set - 2 (After Tiny Bronco) Battle - 3

The Gagighandi does not hit you for very much damage, but they can ruin your day if they manage to inflict all three players with Petrify, which will happen

POWER req for Overflow:

Base Damage Overflow:	149
Rnd Var Overflow 3x:	100
Rnd Var Overflow 4x:	75
Rnd Var Overflow 6x:	50

| once the 'Slow-numb' countdown timer expires on each Character. A Petrified Character is considered 'dead', and a Game Over screen will follow if all three are Petrified, so try to finish them off quickly.

If you don't have many Softs, be sure to steal from the Gagighandi. A Lv 23 Cloud would have a 45.31% chance of stealing from the Gagighandi. You can also stock up on Softs while in Gongaga.

When the Gagighandi uses Stone Stare, it will only check for a player that has the Petrify Status, meaning that it can target a player that already has Slow-numb but are not yet petrified. This works in our favour. Make sure the ATB is set to 'Wait', this way the Slow-numb countdown does not continue to deplete while you are making your selection.

Although unlikely, if the Gagighandi were to use Stone Stare 11 times its MP would deplete and the "skill power is used up" string text would be displayed when it tries to use that Attack.

The Attack Stone Stare is one of seven Status inflicting Attacks that use the 'Hidden' Element, and as such can be defended from by equipping the Elemental on your Armour with any other non-element Materia (excluding other Support Materia and Restorative Materia). The Elemental Materia has to be Lv 2 minimum for the effect to work, the effect being that the chance of each Status being inflicted is dropped to 0. The Player is still considered to be vulnerable to the Status used, and the word "Miss" "Miss" will perpetually appear above their head. A Lv 1 Elemental would instead halve the chance of the Element being inflicted.

Touch Me's BATTLE PLAN:

PHASE 1:

OPENING ATTACK: 1/4 Chance start from 1st Attack
1/4 Chance start from 2nd Attack
1/4 Chance start from 3rd Attack
1/4 Chance start from 4th Attack

1ST ATTACK: Use Frog Jab on Rnd Target
2ND ATTACK: Use Frog Jab on Rnd Target
3RD ATTACK: Use Frog Jab on Rnd Target
4TH ATTACK: Use Frog Jab on Rnd Target

After 4th Attack move onto Phase 2

PHASE 2: (Repeats)

OPENING ATTACK: 1/2 Chance start from 2nd Attack
1/2 Chance start from 3rd Attack

1ST ATTACK: Skip a turn
2ND ATTACK: Skip a turn
3RD ATTACK: Skip a turn
4TH ATTACK: Use Frog Song on Rnd Target without Frog; If all Targets have Frog, use Frog Jab on Rnd Target

After 4th Attack:

Frog Jab was used last: Jump to 4th Attack for next turn
Frog Song was used Last: 1/3 chance jump to 1st Attack for next turn
1/3 chance jump to 2nd Attack for next turn
1/3 chance jump to 3rd Attack for next turn

COUNTER: [All Physical and Magical Attacks]

4/5 Chance: Do nothing
1/5 Chance:
Last Attack on Touch Me was Physical: Use Frog Jab on Last Attacker
Last Attack on Touch Me was Magical: Use Frog Song on Last Attacker

Notes On Touch Me:

POWER req for Overflow:

```
| Touch Me is found in Battle Square:          |  Base Damage Overflow: 144  |
|  Set - 2 (After Tiny Bronco)   Battle - 3    |  Rnd Var Overflow  3x:  96  |
|                                              |  Rnd Var Overflow  4x:  72  |
| The Touch Me can be an incredibly annoying   |  Rnd Var Overflow  6x:  48  |
|  enemy to battle, as they can repeatedly     o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  toggle the Frog Status of your Characters.                               |
|  Equipping the White Cape that you acquired from Jenova-BIRTH will be a   |
|  big help, as it protects you from Frog.                                  |
| Frog Song isn't the best Enemy Skill to learn, however, their are times   |
|  that it can come in handy, seeing as it will toggle the Sleep Status. It |
|  can be used for the future as a cheap cure if ever your players becomes  |
|  inflicted with Sleep (as opposed to spending 34 MP on White Wind).       |
| The 6x Touch Me Pincer Attack Encounter can be one of the most annoying   |
|  battles in the game, however, it also yield *huge* battle spoils. Don't  |
|  mess around; just use your strongest Magic (Aqualung) and reap the       |
|  rewards without turning the battle into an ordeal.                       |
| It is highly unlikely that the Touch Me will still be alive by the time it |
|  runs out of MP, but if it were to run out of MP it would not be able to  |
|  use any of its attacks, and the "skill power is used up" text string     |
|  would be displayed every time it tries to attack you.                    |
\                                                                           /

Turks:Reno III
Turks:Reno IV

No Manipulate Attacks!

Turks:Reno II's ATTACKS:

Attack 1: <Short Staff>
[15C] Physical
Target: One Opponent
Element: Hit
Att%: 110
Power: 20
Base Damage: 73 HP

Attack 2: Turk Light
[370] Magical
Target: One Opponent
Element: None
Att%: 90
Power: 12
Base Damage: 256 HP

Attack 3: Electroprod	Target: One Opponent
[372] Physical	Element: Lightning
	Att%: 90
	Power: 48
	Base Damage: 117 HP
Attack 4: <(Report)>	Target: Self
[164] Physical 0 Dam	Att%: Auto Hit

Death Animation

Turks:Reno II's BATTLE PLAN: (Repeats)

SETUP: Disable default Death handling

Turks:Rude has Death:

Use <(Report)> on Self, remove Self from Battle, leave no rewards, end Battle

Turks:Rude does not have Death:

1/2 Chance: Use <Short Staff> on Rnd Target
1/2 Chance: Use Turk Light on Rnd Target

COUNTER: [Bolt, Bolt2, Bolt3, Ice Crystal, Bolt Plume, Swift Bolt]

Use Electroprod on Last Mag Attacker for next turn

DEATH: Cure Self of Sleep, Poison, Silence, Haste, Slow, Regen, D. Sentence, Berserk & Manipulate
Display String: [Reno "We may be retreating, but…] [we're still victorious."]
Use <(Report)> on Self, if Turks:Rude has Death, end Battle

Notes On Turks:Reno II: (Gongaga)

The Gongaga Turks Battle is optional (along with Gongaga Village itself), and you can avoid the battle entirely if you wish. The latest you can come back to fight the Turks is just prior to the date (after obtaining the Tiny Bronco).

If you kill one of the Turks before the other, then the battle will end and you will only get the spoils for the one that you killed.

You should use Sense on them both, and regulate their health as so that the last attack kills them both (Aqualung hits for 600+ HP). Once Reno's HP has dropped below 50%, Rude will start curing him every third turn, so dispose of them quickly.

When you kill one of the Turks, the other will not flee until his ATB gauge has filled. This gives you a window opportunity to kill him before he takes his turn. If the remaining Turk flees the battle, then the string of text will *not* be displayed; if you did manage to kill the remaining Turk in that window, the string of text *will* be displayed. This is how you know that you've successfully killed him (aside from the end-of-battle reward values).

This is one of the few battles where I condone the use of Beta or Aqualung. Make sure to equip the Sprint Shoes if you obtained them from

POWER req for Overflow:

Base Damage Overflow:	159
Rnd Var Overflow 3x:	106
Rnd Var Overflow 4x:	80
Rnd Var Overflow 6x:	53

```
|  the Battle Square, or, open with a cast of Big Guard (or do both), then   |
|  smash the Turks for all you're worth!                                      |
| The Turks Boss Battle in Gongaga is one of five Boss Battles in which the  |
|  "Pre-Emp" Flag has been mistakenly enabled, meaning you have a chance of  |
|  encountering them as a Pre-Emptive Strike and can land a cheeky Back-      |
|  Attack for 4x Damage.                                                      |
| If you Kill Rude before Reno, then you will miss out on the Fairy Tale     |
|  (weapon for Aeris), and will have to buy it for 2500 from Junon on Disc 2 |
|  (you see the problem there, right?). This seven-slot Weapon has decent    |
|  Strength and you do not want to miss it.                                   |
| An oversight exists in Turks:Reno II's AI Script. The Counter Script       |
|  should only do a check for the three Attack IDs pertaining to Bolt, Bolt2 |
|  and Bolt3, however, the check does *not* look to see what the Command ID  |
|  was (as it does with the Chocobos). This is why the Ice Crystal, Bolt     |
|  Plume & Swift Bolt will also trigger the Counter script, as those Items   |
|  all share the respective IDs as the Bolt Attacks.                          |
\                                                                             /

|         Display String: [Rude "……"]                                         |
|         Use <(Report)> on Self, if Turks:Reno has Death, end Battle         |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Turks:Rude I: (Gongaga)           |   POWER req for Overflow:    |
|                                              |                              |
| The Gongaga Turks Battle is optional (along  |  Base Damage Overflow: 172   |
|  with Gongaga Village itself), and you can   |  Rnd Var Overflow  3x: 115   |
|  avoid the battle entirely if you wish. The  |  Rnd Var Overflow  4x:  86   |
|  latest you can come back to fight the Turks |  Rnd Var Overflow  6x:  58   |
|  is just prior to the date (after obtaining  o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   the Tiny Bronco).                                                         |
| If you kill one of the Turks before the other, then the battle will end     |
|  and you will only get the spoils for the one that you killed.              |
| You should use Sense on them both, and regulate their health as so that     |
|  the last attack kills them both (Aqualung hits for 600+ HP). Once Reno's   |
|  HP has dropped below 50%, Rude will start curing him every third turn, so  |
|  dispose of them quickly.                                                   |
| When you kill one of the Turks, the other will not flee until his ATB       |
|  gauge has filled. This gives you a window opportunity to kill him before   |
|  he takes his turn. If the remaining Turk flees the battle, then the        |
|  string of text will *not* be displayed; if you did manage to kill the      |
|  remaining Turk in that window, the string of text *will* be displayed.     |
|  This is how you know that you've successfully killed him (aside from the   |
|  end-of-battle reward values).                                              |
| This is one of the few battles where I condone the use of Beta or           |
|  Aqualung. Make sure to equip the Sprint Shoes if you obtained them from    |
|  the Battle Square, or, open with a cast of Big Guard (or do both), then    |
|  smash the Turks for all you're worth!                                      |
| The Turks Boss Battle in Gongaga is one of five Boss Battles in which the   |
|  "Pre-Emp" Flag has been mistakenly enabled, meaning you have a chance of   |
|  encountering them as a Pre-Emptive Strike and can land a cheeky Back-      |
|  Attack for 4x Damage.                                                      |
| Of the two Turks, Rude's attacks will hit harder than Reno's, plus he has   |
|  higher MDefence so your Magic attacks will not hit for as much damage. On  |
|  top of that, he will start using Cure on Reno when his HP drops below      |
|  50%, so be mindful of Rude more so than Reno.                              |
| It appears that Rude may have a crush on Tifa, as he will refrain from      |
|  attacking her as often as the other characters.                            |
\                                                                             /

|   Flower Prong's HP <=70%: Use <Change> on Self, transform to 2nd Form,        |
|                            leave no rewards                                    |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Flower Prong: (1st Form)          |   POWER req for Overflow:       |
|                                              |                                 |
| Flower Prong is found in Battle Square:      |  Base Damage Overflow: 156      |
|  Set - 2 (After Tiny Bronco)   Battle - 3    |  Rnd Var Overflow  3x: 104      |
|                                              |  Rnd Var Overflow  4x:  78      |
| Unlike other enemies that transform into     |  Rnd Var Overflow  6x:  52      |
|  other version of themselves, the Flower     o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Prong will *not* transfer over its                                            |
|  remaining HP when it transforms (which it will do once its HP drops to        |
|  below 70%).                                                                   |
| Of the three Flower Prongs, the 1st Form gives you the highest amount of       |
|  spoils. If you are able to, try to deliver 550 in one hit; one blast of       |
|  Fire2 from Cloud should be enough to kill it in one. It also has the          |
|  lowest Strength, Magic and MDefence (they all have the same HP).              |
| Once the Flower Prong 1st Form has used Bio2 once, it will not have enough     |
|  MP to cast it a second time. It will then sit there idle until it             |
|  transforms or is killed.                                                      |
| The Flower Prong is one of the few enemies in the game that take Double        |
|  Damage from the Earth Element; now would be a perfect time to equip your      |
|  new Titan Materia to Elemental on the weapon of the Character with the        |
|  Champion Belt/Power Wrist.                                                    |
| The Flower Prong cannot be Back-Attacked, but it can be Side-Attacked.         |
\                                                                                /

|                                                                                           |
|   Flower Prong's HP <=70%: Use <Change> on Self, transform to 3rd Form,                   |
|                             leave no rewards                                              |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Flower Prong: (2nd Form)          |   POWER req for Overflow:                  |
|                                              |                                            |
| Flower Prong is found in Battle Square:      |  Base Damage Overflow: 156                 |
|  Set - 2 (After Tiny Bronco)   Battle - 3    |  Rnd Var Overflow  3x: 104                 |
|                                              |  Rnd Var Overflow  4x:  78                 |
| You will only encounter the Flower Prong in  |  Rnd Var Overflow  6x:  52                 |
|  its 2nd Form once the 1st Form Flower Prong o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  has had its HP dropped to below 70%.                                                     |
| Unlike other enemies that transform into other version of themselves, the                 |
|  Flower Prong will *not* transfer over its remaining HP when it transforms                |
|  (which it will do once its HP drops below 70%).                                          |
| Of the three Flower Prongs, the 2nd Form is the least intimidating. It                    |
|  will only use its weak attack every other turn. As with the first Flower                 |
|  Prong, try to take the 2nd Form out in one hit to gain slightly more                     |
|  EXP/AP/Gil, and also to save from having to fight the 3rd (hardest)                      |
|  Flower Prong.                                                                            |
| The Flower Prong 2nd Form has slight higher Strength, Magic and MDefence                  |
|  than the first, however, Cloud should still be strong enough to kill it                  |
|  with one blast of Fire2.                                                                 |
| The Flower Prong is one of the few enemies in the game that take Double                   |
|  Damage from the Earth Element; now would be a perfect time to equip your                 |
|  new Titan Materia to Elemental on the weapon of the Character with the                   |
|  Champion Belt/Power Wrist.                                                               |
| The Flower Prong cannot be Back-Attacked, but it can be Side-Attacked.                    |
\                                                                                           /

Gongaga Jungle Entrance Screen (Turks) 37%

No Manipulate Attacks!

Flower Prong's ATTACKS: (3rd Form)

Attack 1: W Laser
[203] Magical % Based
Target: One Opponent
Element: Shoot
Att%: 98
Power: 30
Base Damage: 93.75% Current HP

Attack 2: Pollen
[204] Physical
Target: All Opponents
Element: None
Att%: 130
Power: 12
Base Damage: 52 HP
Split Damage*
Status Inflict: Sleep (52%)

Attack 3: Bio2
[028] Magical
Target: One Opponent
Element: Poison
Att%: 100
Power: 21
MP Cost: 36 MP
Base Damage: 511 HP
Reflectable
Status Inflict: Poison (47%)

Flower Prong 3rd Form's BATTLE PLAN: (Repeats)

OPENING ATTACK: Use Pollen on All Target

THEREAFTER: 1/8 Chance use Bio2 on Rnd Target; If Flower Prong's MP < 36, use W Laser on Target with Highest Current HP
7/8 Chance use W Laser on Target with Highest Current HP

Notes On Flower Prong: (3rd Form)

Flower Prong is found in Battle Square:
Set - 2 (After Tiny Bronco) Battle - 3

POWER req for Overflow:

Base Damage Overflow: 156
Rnd Var Overflow 3x: 104
Rnd Var Overflow 4x: 78

You will only encounter the Flower Prong in its 3rd Form once the 2nd Form Flower Prong has had its HP dropped to below 70%.	Rnd Var Overflow 6x: 52
The Attack Pollen is subject to Split Damage for the damage calculations; however, the Status inflicted via Pollen is *not* subject to Split Damage.	
Of the three Flower Prongs, the 3rd Form is the most formidable, although, it still does not present a great threat to you. It can only use Bio2 once before it runs out of MP, at which point it will only use % based attacks which targets your *current* HP (not max HP). This means W Laser can never kill you; if your HP drops to 1, W Laser will deal 0 HP.	
The Flower Prong 3rd Form has the highest Strength, Magic and MDefence, but also gives the lowest amount of EXP/AP/Gil (only marginally).	
The Flower Prong is one of the few enemies in the game that take Double Damage from the Earth Element; now would be a perfect time to equip your new Titan Materia to Elemental on the weapon of the Character with the Champion Belt/Power Wrist.	
The Flower Prong cannot be Back-Attacked, but it can be Side-Attacked.

|   1/2 Chance: Use Spider Attack on Rnd Target                              |
|   1/2 Chance: Use Butterfly Attack on Rnd Target                           |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Kimara Bug:                        |   POWER req for Overflow:    |
|                                               |                              |
| Kimara Bug is found in Battle Square:         |  Base Damage Overflow: 150   |
|  Set - 2 (After Tiny Bronco)   Battle - 3     |  Rnd Var Overflow  3x: 100   |
|                                               o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The hardest thing about the Kimara Bug is                                  |
|  its moderately High HP. It will only use its stronger Spider Attack       |
|  'attack' if all players are inflicted with Stop, which shouldn't happen   |
|  if you have obtained White Wind (cures most negative Statuses).           |
| While Stop can be frustrating, the Kimara Bug can only use it five times   |
|  before it runs out of MP, at which point the "skill power is used up"     |
|  text string will be displayed every time it tries to use that Attack.     |
| If you didn't acquire any Spider Webs from the Grashtrike in Midgar Sector |
|  4 earlier on, then the Kimara Bug is the only other enemy in the game to  |
|  carry them, so you should aim to get a few. They cast Slow on all         |
|  opponents, although, you do currently have access to the Time Materia     |
|  from Gongaga, which you should put on your Weapon as soon as you get      |
|  your hands on the Added Effect Materia! A Lv 23 Cloud would have a 45.31% |
|  chance of stealing from the Kimara Bug.                                   |
| The Hourglass casts Stop on all opponents, and while it isn't the most     |
|  useful of items to collect, it can be quite hard to obtain. The only      |
|  other enemy in the game to carry the Hourglass is the Edgehead, and the   |
|  chances of getting it as a drop from them are 10.39%. Because of this you |
|  should consider coming back to Gongaga once you have the Morph Materia    |
|  from the Temple of The Ancients if you intend to obtain one of every      |
|  item. Your Morph Damage will only be around 60 HP at that point, so       |
|  attack it once normally before trying to Morph it.                        |
| The Kimara Bug cannot be Back-Attacked or Side-Attacked, meaning that one  |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.            |
\                                                                            /

|   Follow-Up: If all three chances to use Big Spiral failed, use Big Spiral |
|              on All Targets                                              |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Heavy Tank:                    |   POWER req for Overflow:    |
|                                           |                              |
| Heavy Tank is found in Battle Square:     |  Base Damage Overflow: 148   |
|  Set - 2 (After Tiny Bronco)   Battle - 3 |  Rnd Var Overflow  3x:  99   |
|                                           o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Heavy Tank has only 400 less HP than the                             |
|  two Turks you will have just faced, which makes this foe one of the more |
|  powerful randomly encountered enemies. The more HP you drain, the greater |
|  the chance it'll have of using its attacks in succession, so be on guard! |
| The "1st Target", "2nd Target" & "3rd Target" refers to the right-most,  |
|  central, and left-most characters, respectively.                        |
| All the Heavy Tank's attacks have the same Base Damage value, just bear in |
|  mind that Big Spiral uses Split Damage, which means it will hit for 66% |
|  of its normal damage. The main difference between each attack is the    |
|  Att%.                                                                   |
| If you wanted to boost you gil values, then the Heavy Tank would be the  |
|  enemy to enemy to do it with on your first encounter. With each battle  |
|  yielding 1300 gil, you won't see this type of a payout again until you  |
|  reach Mt. Nibel.                                                        |
| The Heavy Tank is a great way to become OP early on in the game. Come back |
|  to Gongaga once you have the Morph Materia from the Temple of The       |
|  Ancients to farm some Power Sources; their 100% encounter rate makes them |
|  preferable to grind against than the Screamer in Mt. Nibel. Your Morph  |
|  Damage will only be approximately 60 HP, so use Sense and be sure to    |
|  regulate its HP accordingly.                                            |
| The Heavy Tank cannot be Back-Attacked or Side-Attacked, meaning that one |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.          |
\                                                                          /

Skeeskee's ATTACKS:

Manip Attack 1: Beak
Manip Attack 2: Rage Bomber

Attack 1: <Beak> [1C5] Physical — Berserk Attack
Target: One Opponent
Element: Punch
Att%: 103
Power: 16
Base Damage: 101 HP

Attack 2: Rage Bomber [20E] Physical — Status Inflict: Fury (71%)
Target: One Opponent
Element: Shout
Att%: 75
Power: 40
Base Damage: 252 HP

Skeeskee's BATTLE PLAN: (Repeats)

Skeeskee does not have Poison: Use <Beak> on Rnd Target

Skeeskee has Poison: 1/2 Chance use <Beak> on Rnd Target
1/2 Chance Rage Bomber on Rnd Target

COUNTER: [All Physical and Magical Attacks]

Skeeskee's HP > 50%: Do nothing

Skeeskee's HP <= 50%: Use Rage Bomber on Last Attacker

Notes On Skeeskee:

Skeeskee is found in Battle Square:
Set - 2 (After Tiny Bronco) Battle - 4
Set - 2 (After Tiny Bronco) Battle - 5

The Skeeskee are not a difficult enemy.
They can inflict you with Fury, which isn't

POWER req for Overflow:

Base Damage Overflow:	150
Rnd Var Overflow 3x:	100
Rnd Var Overflow 4x:	75
Rnd Var Overflow 6x:	50

```
|  the worst Status to be inflicted with (helps for Limit Levelling). You    |
|  should have enough gil by now to be able to afford to stock up on         |
|  Tranquilizers, however, if you did want to steal some then a Lv 23 Cloud  |
|  would have a 43.75% chance of stealing from the Skeeskee.                 |
| Rage Bomber will only be if the Skeeskee is Poisoned, or as a counter once |
|  its HP drops to below 50%. You will likely need to use Matra Magic three  |
|  times to kill them.                                                       |

		Armored Golem

No Manipulate Attacks!

Golem's ATTACKS:

Attack 1: <Golem Punch> [213] Physical
Target: One Opponent
Element: Hit
Att%: 95
Power: 16
Base Damage: 111, 120, 130 or 150 HP

Attack 2: Finger Shot [214] Physical
Target: One Opponent
Element: Shoot
Att%: 120
Power: 20
Base Damage: 138, 150, 162 or 187 HP

Attack 3: Megaton Punch [215] Physical
Target: One Opponent
Element: Hit
Att%: 110
Power: 30
Base Damage: 208, 225, 243 or 281 HP

Attack 4: <Advance> [216] Physical 0 Dam
Target: Self
Att%: Auto Hit
Transformation
To Stage 2/3

Attack 5: <Retreat> [217] Physical 0 Dam
Target: Self
Att%: Auto Hit
Transformation
To Stage 2/1

Golem's BATTLE PLAN:

STAGE 1: (Back Row)

OPENING ATTACK: 1/3 Chance use <Golem Punch> on Rnd Target
2/3 Chance use Finger Shot on Rnd Target

Follow-Up: Sets Strength to 48 and Defence to 80

Sets Magic to 243 and MDefence to 130

THEREAFTER: Use <Advance> on Self, transform to Stage 2 (Middle Row)
Set Strength to 52 and Defence to 72
Set Magic to 249 and MDefence to 120

STAGE 2: (Middle Row)

Use <Advance> on Self, transform to Stage 3 (Front Row)
Set Strength to 56 and Defence to 64
Set Magic to 255 and MDefence to 110

STAGE 3: (Front Row) (Repeats)

Use Megaton Punch on Rnd Target

COUNTER: [All Physical and Magical Attacks]

Last Attack on Golem dealt <= 200 HP OR in Stage 1 (Back Row):

Do nothing

Last Attack on Golem dealt > 200 HP AND in Stage 2 (Middle Row):

Use <Retreat> on Self, transform to Stage 1 (Back Row)
Set Strength to 48 and Defence to 80
Set Magic to 243 and MDefence to 130

Last Attack on Golem dealt > 200 HP AND in Stage 3 (Front Row):

Use <Retreat> on Self, transform to Stage 2 (Middle Row)
Set Strength to 52 and Defence to 72
Set Magic to 249 and MDefence to 120

Notes On Golem:

Golem is found in Battle Square:
Set - 2 (After Tiny Bronco) Battle - 4

Default: Str 60 Def 56 Mag 5 MDef 100
1st Stage: Str 48 Def 80 Mag 243 MDef 130
2nd Stage: Str 52 Def 72 Mag 249 MDef 120
3rd Stage: Str 45 Def 64 Mag 255 MDef 110

Even though the Golem appears to change rows mid-battle, its 'row value' is always 1, which means you'll always deal normal damage (as opposed to Back Row damage for 50% of your normal damage).

The further forward the Golem is, the higher its Strength and Magic, and the lower its Def and MDef (except for when it's in its default form).

When the Golem modifies its Magic stat, it will decrease the base stat of 5 by either 6, 12 or 18, according to the Stage that it is advancing or retreating into. Because of this, the 8bit value will underflow to 255 as it wraps around past the 0. None of the Golem's Attacks are Magical, so

POWER req for Overflow:

Default:
Base Damage Overflow: 155
Rnd Var Overflow 3x: 104

1st Stage:
Base Damage Overflow: 164
Rnd Var Overflow 3x: 109

2nd Stage:
Base Damage Overflow: 161
Rnd Var Overflow 3x: 107

3rd Stage:
Base Damage Overflow: 158
Rnd Var Overflow 3x: 105

```
|  this does not matter.                                                      |
| A flaw exists in the Golem's script, whereby it does not check for the      |
|  Restorative Element used when it runs its Counter Script. If you were to   |
|  heal the Golem, the game would not recognise the use of the 'Healing'      |
|  Flag; instead of thinking that you've healed it by [Healing Damage], it    |
|  will instead think that you've caused [4,294,967,296 - Healing Damage]     |
|  worth of damage, sending the figure through the reverse process of         |
|  overflow. Because of this, healing the Golem will trigger the Counter      |
|  Script.                                                                    |
| Turbo Ethers are a good idea to steal from the Golem seeing as they cannot  |
|  be bough in shops. If you wanted to farm them, however, the Jersey in The  |
|  Shinra Mansion further on has a Steal Rate of [32] and appear in groups    |
|  of threes. A Lv 23 Cloud would have a 10.94% chance of stealing from the   |
|  Golem.                                                                     |
| The Golem cannot be Back-Attacked or Side-Attacked, meaning that one        |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.             |
\                                                                             /

|  COUNTER: [All Actions made by All Players and Enemies]                      |
|                                                                              |
|    1/16 Chance: Use <Shell Defense> on Self, sets Def to 512 for the         |
|                 remainder of the Battle                                      |
|   15/16 Chance: Do nothing                                                   |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Desert Sahagin:                  |   POWER req for Overflow:      |
|                                             |                                |
| Desert Sahagin is found in Battle Square:   |  Base Damage Overflow: 147     |
|  Set - 2 (After Tiny Bronco)   Battle - 4   |  Rnd Var Overflow  3x:  98     |
|                                             |  Rnd Var Overflow  4x:  74     |
| The Desert Sahagin is one of a few Enemies  |  Rnd Var Overflow  6x:  49     |
|  that has a weakness to one of the Physical  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Elements; any "Punch" Element Attack will                                   |
|  be an Automatic Hit. All of Cid's Weapons, three of Tifa's Weapons and      |
|  three of Barret's weapons use the Punch Element.                            |
| Every single Action will trigger the 1/16 chance of the Desert Sahagin       |
|  casting <Shell Defense>, regardless of the Target or the Caster. This       |
|  includes Actions made by the Desert Sahagin and other enemies. Even         |
|  Actions such as Change/Defend will trigger the Counter chance.              |
| Once the Desert Sahagin has activated <Shell Defense>, its Def will be set   |
|  to 512, meaning that Physical Attacks will land just 1 HP of damage.        |
| A flaw in the AI script means that the Desert Sahagin's Def will be set to   |
|  512 for the remainder of the battle once the 1/16 chance of using <Shell    |
|  Defence> has passed.                                                        |
| Equipping Elemental Resistance to defend against Earth will affect the       |
|  chances of Sandgun inflicting you with Darkness. For example; a Lv 1        |
|  Elemental paired with Earth (on your Armour) would halve the chances of     |
|  Darkness being inflicted; a Lv 2 or greater Elemental would nullify the     |
|  chances of Darkness being inflicted. You will still be vulnerable to the    |
|  Status; instead, the Att% of the ability is halved/nullified.               |
| The Goblin Island Beach Area has formations in place for 1x Desert Sahagin   |
|  and 2x Desert Sahagin (with the Beach Battleground), however, the           |
|  walkmesh terrain does not make a distinction between the Grass and Beach    |
|  areas. Running on the Beach is considered as Grass, and you'll encounter    |
|  the Dual Horn and Under Lizard there; this was likely an oversight. The     |
|  Desert Sahagin should have been fought on the Beach.                        |
\                                                                              /

|                        2/3 Chance use <Tail> on Rnd Target                     |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Bagrisk:                          |   POWER req for Overflow:       |
|                                              |                                 |
| Bagrisk is found in Battle Square:           |  Base Damage Overflow: 151      |
|  Set - 2 (After Tiny Bronco)   Battle - 4    |  Rnd Var Overflow  3x: 101      |
|                                              |  Rnd Var Overflow  4x:  76      |
| The Bagrisk can only be fought just past     |  Rnd Var Overflow  6x:  51      |
|  Cosmo Canyon in the Dirt Area just beyond   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  the point where the 'sunset' effect takes                                     |
|  place. You can encounter them prior to the Cosmo Canyon events by             |
|  traversing there on foot.                                                     |
| Quake2 will cause heavy damage, however, the Bagrisk will only have enough     |
|  MP to inflict it once per Battle.                                             |
| The Vagyrisk Claw Item is notoriously missable, seeing as you cannot           |
|  obtain it once your Lv is too great. If your 'thief' is Lv 78 or higher,      |
|  then you will have a 100% chance of succeeding one of the two attempts        |
|  for the Softs, and will never make it to the Vagyrisk Claw check. The         |
|  only other way to obtain the Vagyrisk Claw is from the CMD.Grand Horn Lv      |
|  19, however, you can only encounter that enemy conditionally when you         |
|  fail the Fort Condor Mini-Game (see CMD.Grand Horn entry for more             |
```

| details). The Vagyrisk Claw will Petrify one opponent. |
| A Lv 23 Cloud would have a 45.31% chance of stealing the first Soft from the Bagrisk, a 24.78% chance of stealing the second Soft, and a 3.74% chance of stealing the Vagyrisk Claw (only one Item can be stolen). He would have a 26.17% chance of failing the steal attempt. |
| Remember, the percent chances you see listed alongside the Item Names *assumes you to be the same level as the enemy*; A Lv 19 Cloud would have a greater chance to steal the Vagyrisk Claw than a Lv 23 Cloud, as he would have a lower chance of stealing one of the two Softs. |
| The Attack Stone Strike is one of three Enemy Attacks in the game that inflict Petrify (as opposed to Slow-numb), the other two being Deadly Needles (Crown Lance), and Petrif-Eye (Gighee). Stone Strike is only scripted to be used once per battle, per Bagrisk; be sure to have your Softs ready, or use White Wind as three characters with Petrify means a Game Over. |
| The Attack Stone Strike is one of seven Status inflicting Attacks that use the 'Hidden' Element, and as such can be defended from by equipping the Elemental on your Armour with any other non-element Materia (excluding other Support Materia and Restorative Materia). The Elemental Materia has to be Lv 2 minimum for the effect to work, the effect being that the chance of each Status being inflicted is dropped to 0. The Player is still considered to be vulnerable to the Status used, and the word "Miss" "Miss" will perpetually appear above their head. A Lv 1 Elemental would instead halve the chance of the Element being inflicted. |

|                                                                           |
|   1ST ATTACK: 1/4 Chance use Sleepel on Rnd Target; If Selected target    |
|                    has Sleep, use Bolt on Rnd Target                      |
|                3/4 Chance use Bolt on Rnd Target                          |
|                                                                           |
|   2ND ATTACK: Same as 1st Attack                                          |
|   3RD ATTACK: Use <Advance> on Self, move Self to Front Row               |
|   4TH ATTACK: Use <Claw> on Rnd Target                                    |
|   5TH ATTACK: Use <Claw> on Rnd Target                                    |
|   6TH ATTACK: Use <Claw> on Rnd Target                                    |
|   7TH ATTACK: Use <Retreat> on Self, move Self to Back Row                |
|                                                                           |
|                                                                           |
|  COUNTER: [All Physical and Magical Attacks]                              |
|                                                                           |
|   Crown Lance is in Front Row AND HP < 220:                               |
|                                                                           |
|    Use Deadly Needles on last Attacker                                    |
|    Move Crown Lance to Back Row IF Crown Lance started in Back Row        |
|                                                                           |
|   Crown Lance is in Back Row OR HP >= 220:                                |
|                                                                           |
|    Do nothing                                                             |
```

```
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Crown Lance:                       |   POWER req for Overflow:   |
|                                               |                             |
| Crown Lance is found in Battle Square:        |  Base Damage Overflow: 147  |
|  Set - 2 (After Tiny Bronco)   Battle - 2     |  Rnd Var Overflow  3x:  98  |
|  Set - 2 (After Tiny Bronco)   Battle - 4     |  Rnd Var Overflow  4x:  74  |
|                                               |  Rnd Var Overflow  6x:  49  |
| The Crown Lance that starts in the Front Row o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  can never change rows, and will only use                                   |
|  <Claw> as its basic attacks. The Crown Lance that starts in the Back Row   |
|  can change rows, and uses stronger attacks while in the Back Row.          |
| If Deadly Needles is used as a counter, the Crown Lance will only retreat   |
|  to the Back Row if it began the Battle in the Back Row.                    |
| It is very unlikely that the Crown Lance will run out of MP before you      |
|  kill them, however, if the Back Row Crown Lance were to run out of MP,     |
|  the "skill power is used up" text string would be displayed every time     |
|  they tried to use Sleepel or Bolt.                                         |
| The Attack Deadly Needles is one of three Enemy Attacks in the game that    |
|  inflict Petrify (as opposed to Slow-numb), the other two being Stone       |
|  Strike (Bagrisk), and Petrif-Eye (Gighee). Be sure to have your Softs      |
|  ready, or use White Wind as three characters with Petrify means a Game     |
|  Over.                                                                      |
| Although the Dream Powder is not the most useful of Battle Items (casts     |
|  Sleep on all opponents), they are uncommon. Only the Crown Lance and       |
|  Crysales carry the Dream Powder, and in both instances it needs to be      |
|  morphed. Your Morph Damage following the TOTA will only be around 60 HP,   |
|  so use L4 Suicide then follow up with Morph to finish them.                |
| The Crown Lance is one of a number 'elevated' enemies that Nullifies the    |
|  Earth Element, but will no take double damage from Wind.                   |
\                                                                             /

MAPS:	APPEARANCE RATE:	LOOKALIKES:
Cave Of The Gi 1st Screen (4 Caverns)	66%	Crawler
Cave Of The Gi 2nd Screen (Oil Slick)	25%	
Cave Of The Gi 3rd Screen (Stingers)	50%	

Heg's ATTACKS:

Manip Attack 1: Poison Fang
Manip Attack 2: halt Whip

Attack 1: <Poison Fang> [21E]
Physical
Target: One Opponent
Element: Hit
Att%: 110
Power: 16
Base Damage: 108 HP
Berserk Attack
Status Inflict: Poison (100%)

Attack 2: Halt Whip [21F]
Physical
Target: One Opponent
Element: Punch
Att%: 110
Power: 14
Base Damage: 94 HP
Status Inflict: Paralyzed (27%)

Heg's BATTLE PLAN: (Repeats)

OPENING ATTACK: 1/4 Chance start from 1st Attack
1/4 Chance start from 2nd Attack
1/2 Chance start from 3rd Attack

1ST ATTACK: Use <Poison Fang> on Rnd Target without Poison AND with Paralyzed; If no Targets have Paralyzed, select Rnd Target without Poison; If all Targets have Poison, skip a turn

2ND ATTACK: Same as 1st Attack

3RD ATTACK: Use Halt Whip on Rnd Target without Paralyzed AND with Poison; If no Targets have Poison, select Rnd Target without Paralyzed; If all Targets have Paralyzed, skip a turn

Notes On Heg:

Heg is found in Battle Square:
Set - 2 (After Tiny Bronco) Battle - 5

If all Players are inflicted with Poison, the Heg will skip two of its three turns.

Equip the Fairy Ring that you find in the Cave of The Gi to protect yourself from Poison, as well as the Star Pendant. If you are playing a low-levelled game. You can also (finally) make use of the Added Effect Materia to protect yourself from negative Status ailments.

The large groups in which the Heg appears in makes for some great Battle Spoils if you wished to level up. Just bear in mind that you cannot save while in the Cave Of The Gi, so keep an eye on your HP.

The Heg is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy.

POWER req for Overflow:

Base Damage Overflow:	147
Rnd Var Overflow 3x:	98
Rnd Var Overflow 4x:	74
Rnd Var Overflow 6x:	49

|  to learn, you should still try to acquire   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
```

```
|  Death Sentence for your E Skill collection.                                 |
|  If you missed it while in the Cave Of The Gi then you can easily obtain     |
|  the Enemy Skill from the Boundfat in Corral Valley a little later on. The   |
|  Sneaky Step only has enough MP for 6 uses of Death Sentence. A Lv 24        |
|  Cloud would have a 54% chance of manipulating the Sneaky Step.              |
| The Morph Materia is not available to the Player at this stage in the        |
|  game, so unfortunately you cannot obtain any Ghost Hands from the Sneaky    |
|  Step (a missable Item). You can, however, still obtain Ghost Hands from     |
|  the Ghost in the Battle Square before the Enemy listings switch to 'Set     |
|  2' (after Tiny Bronco), at which point the Item will be unobtainable.      |
| M-Tentacles are a huge help in the Battle Square if you manage to obtain     |
|  them as a Drop. They "cast Bio3" on all opponents, and have a Base Damage   |
|  value of 2400. Unfortunately, you only have a 14.06% chance of receiving    |
|  at the end of the Battle.                                                   |
| The Sneaky Step is encountered in an area that cannot be revisited; once     |
|  you progress past a certain point in the game, you can no longer fight      |
|  the enemy.                                                                  |
\                                                                              /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Gi Spector:                        |   POWER req for Overflow:   |
|                                               |                             |
| Gi Spector is found in Battle Square:         |  Base Damage Overflow: 147  |
|  Set - 2 (After Tiny Bronco)   Battle - 5     |  Rnd Var Overflow  3x:  98  |
|                                               |  Rnd Var Overflow  4x:  74  |
| Although it is not a very useful Enemy Skill  |  Rnd Var Overflow  6x:  49  |
|  to learn, you should still try to acquire    o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Death Sentence for your E Skill collection.                                |
|  If you missed it while in the Cave Of The Gi then you can easily obtain    |
|  the Enemy Skill from the Boundfat in Corral Valley a little later on. The  |
|  Gi Spector has enough MP for 8 uses of Death Sentence. A Lv 24 Cloud       |
|  would have a 52% chance of manipulating the Gi Spector.                    |
| The Gi Spector is one of a few enemies that appear to be 'elevated', yet    |
|  do not take Double Damage from Wind nor Nullify the Earth Element.         |
| Smoke Bombs are extremely useful in the Battle Square, as they allow you    |
|  to flee the Arena while retaining the BP you've earned during the Battle.  |
|  You would benefit from grabbing a few while you have the opurtunitty to.   |
| The Gi Spector is considered an "Undead" enemy, which means that they will  |
```

| take damage from healing items and spells such as Cure, Potions etc. |
| Throwing a Phoenix Down would have a 25% chance of instantly killing the |
| Gi Spector, whereas a Megalixir/Elixir/X-Potion has a 100% chance. |
| As with all "Undead" Enemies (excluding the Parasite and Soul Fire), the |
| Gi Spector takes Double Damage from the Holy Element, and seeing you will |
| not obtain any Holy based Materia (Alexander) till you reach disc 2, you |
| cannot exploit this weakness. |
| All=Cure2 would deal more damage than All=Fire2, but shouldn't be |
| necessary unless your Characters are under-levelled. Fire2 should kill |
| the Gi Spector with one hit (even with Split Damage). If you wanted to, |
| you could cast White Wind to instantly Petrify the Gi Spector, ending the |
| Battle instantly. |
| The Morph Materia is not available to the Player at this stage in the |
| game, so unfortunately you cannot obtain any Ghost Hands from the Gi |
| Spector (a missable Item). You can, however, still obtain Ghost Hands |
| from the Ghost in the Battle Square before the Enemy listings switch to |
| 'Set 2' (after Tiny Bronco), at which point the Item will be |
| unobtainable. |
| The Gi Spector is considered to be a 'Powerful' enemy, and as such the |
| "Pre-Emp" Flag should have been disabled for encounters that contain the |
| Gi Spector. An oversight means that you have a chance to initiate a Pre- |
| Emptive Strike against the Gi Spector during the forced encounters on the |
| 1st Screen inside the small caverns (Formation IDs #553 and #554). |
| The Gi Spector is encountered in an area that cannot be revisited; once |
| you progress past a certain point in the game, you can no longer fight |
| the enemy. |

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Stinger:                          |   POWER req for Overflow:       |
|                                              |                                 |
| The Stinger only has enough MP for two uses  |  Base Damage Overflow: 155      |
|  of Sting Bomb, after which the "skill power |  Rnd Var Overflow  3x: 104      |
|  is used up" text string will be displayed   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  every time it tried to use that Attack.                                       |
| Sting Bomb can never kill you, however, the Stinger can still demolish         |
|  your Party if you are not careful. Big Guard is recommended for the           |
|  Stinger battles, of which there are three.                                    |
| If you are struggling with the Stinger, then try exploiting some of its        |
|  weaknesses. Mini (Small) is perhaps the best thing to inflict it with,        |
|  failing that use Poison, Sleep, Slow and/or D. Sentence. If you had any       |
|  Loco Weeds in your stock from the Shinra HQ enemies, then they can also       |
|  help against the Stinger (inflicts Confusion).                                |
| If you were to pause the game at the exact frame in which the Stinger          |
|  Battle engages, then you could skip the Battle altogether; a trick the        |
|  Speed Runners use.                                                            |
\                                                                                /

```
|  the Soul Fire below for tips on how to kill them quickly. If you do kill  |
|  them it will bring Gi Nattak into the Front Row, meaning Physical Attacks |
|  will hit him for normal damage instead of 0.5x Back Row damage.           |
| There are two identical version of Take Over, one used for each Soul Fire. |
| As with all "Undead" enemies, Gi Nattak will take damage from healing      |
|  items and spells such as Cure, Potions etc. You could end the battle very |
|  easily by just throwing an X-Potion at it, or one cast of Life works      |
|  equally as well (DynamixDJ disapproves of such tactless strategies).      |
| Using White Wind will damage Gi Nattak, as well as inflicting it with Slow |
|  and Darkness (although Darkness is an obsolete Status to inflict an enemy |
|  with, seeing as it only affects the Player's default Physical Attacks).   |
|  Cure2 will also deal more damage than your other Lv 2 Magic spells.       |
| As with all "Undead" Enemies (excluding the Parasite and Soul Fire), Gi    |
|  Nattak takes Double Damage from the Holy Element, and seeing you will not |
|  obtain any Holy based Materia (Alexander) till you reach disc 2, you      |
|  cannot exploit this weakness.                                             |
| Gi Nattak is one of a number 'elevated' enemies that Nullifies the Earth   |
|  Element, but will no take double damage from Wind.                        |
| Gi Nattak is one of 15 enemies that are immune to Regen.                   |
\                                                                            /

|  on the Soul Fire [B]. This is where Elemental+Choco/Mog helps, as the     |
|  Soul Fire is an 'Elevated' enemy.                                         |
| After 10 uses of Fire2 the Soul Fire's MP will have depleted, and the      |
|  "skill power is used up" string text will be displayed, *only* when it    |
|  tries to use Fire2 on a Player; if it uses it on itself the message will  |
|  not be displayed.                                                         |
| The Soul Fire is the only enemy in the game other than the Parasite that   |
|  takes Double Damage from the Holy Element (Alexander), but does not       |
|  absorb Restorative. This technically means the Soul Fire cannot be        |
|  considered to be "Undead".                                                |
\                                                                            /

Nibel Wolf's ATTACKS:

Manip Attack 1: Bodyblow
Manip Attack 2: Fang

Attack 1: <Bodyblow> [172] Physical
Target: One Opponent
Element: Hit
Att%: 100
Power: 16
Base Damage: 120 HP
Berserk Attack

Attack 2: Fang [189] Physical
Target: One Opponent
Element: Hit
Att%: 120
Power: 16
Base Damage: 120 HP

Attack 3: <Howling> [225] Magical % Based
Target: One Ally
Element: Restorative
Att%: 255
Power: 32
Base Damage: 100% Max HP
Miss If Alive
Status Remove: Death (100%)

Attack 4: <Howling> [2AC] Physical 0 Dam
Target: Self
Att%: Auto Hit
Howling Animation

Nibel Wolf's BATTLE PLAN: (Repeats)

1ST ATTACK: Use <Bodyblow> on Rnd Target
2ND ATTACK: Use <Bodyblow> on Rnd Target
3RD ATTACK: Use <Bodyblow> on Rnd Target
4TH ATTACK: Use Fang on Rnd Target

5th ATTACK:

At least one other Nibel Wolf Dead AND <Howling> (Attack) used less than three times:

2/3 Chance: Use <Howling> (Animation) on Self
1/3 Chance: Use <Howling> (Attack) on Rnd Nibel Wolf Ally with Death
Increase Self's EXP worth by 265
Increase Self's GIL worth by 260

All other Nibel Wolfs Alive OR <Howling> (Attack) used three times:

```
|                                                                                |
|    Use Fang on Rnd Target                                                      |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Nibel Wolf:                       |   POWER req for Overflow:       |
|                                              |                                 |
| Nibel Wolf is found in Battle Square:        |  Base Damage Overflow: 149      |
|  Set - 2 (After Tiny Bronco)   Battle - 5    |  Rnd Var Overflow  3x:  99      |
|                                              |  Rnd Var Overflow  4x:  75      |
| Every time the Nibel Wolf successfully       |  Rnd Var Overflow  6x:  50      |
|  revives one of its teammates, its end-of-   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Battle EXP increases by 265, and its gil                                      |
|  increases by 260. This can only be done three times per battle, which         |
|  means the maximum end-of-Battle EXP you can gain is +795, and maximum         |
|  gil you can gain is +780 *per Nibel Wolf*. It's highly unlikely that          |
|  they'll still be alive by the time they reach their 5th turn, however.        |
| When the Nibel Wolf uses <Howling> (Attack), the revived Nibel Wolf will       |
|  be facing its teammate until its next turn.                                   |
| If the Nibel Wolf fails the chance to use the <Howling> Attack variant, it     |
|  instead use the <Howling> Animation variant.                                  |
\                                                                                /

|   1/4 Chance: Transform to Stage 2 (Flying), set Evade to 21              |
|    Follow-Up: 1/2 Chance use <Dive Kick> on Rnd Target                    |
|               1/2 Chance use Demi3 on Target with Highest Current HP*     |
|                                                                           |
|                                                                           |
|  STAGE 2: (Flying - Default Row)                                          |
|                                                                           |
|   Valron does not have MBarrier:                                          |
|                                                                           |
|    32/64 Chance: Use MBarrier on Self*                                    |
|                                                                           |
|    12/64 Chance: Use Despell* (see below)                                 |
|                                                                           |
|    11/64 Chance: Transform to Stage 1 (Ground), set Evade back to 1       |
|                                                                           |
```

3/64 Chance: Use Demi3 on Target with Highest Current HP*

3/64 Chance: Use MBarrier on Rnd Ally*; If all Allies have MBarrier OR all Allies have Death, use <Dive Kick> on Rnd Target

3/64 Chance: Use <Dive Kick> on Rnd Target

Valron has MBarrier:

1/2 Chance: Use Despell* (see below)

1/8 Chance: Use <Dive Kick> on Rnd Target

1/8 Chance: Use Demi3 on Target with Highest Current HP*

1/8 Chance: Use MBarrier on Rnd Ally*; If all Allies have MBarrier OR all Allies have Death, use <Dive Kick> on Rnd Target

1/8 Chance: Transform to Stage 1 (Ground), set Evade back to 1

DESPELL:

When Despell is selected, nine checks play out in sequence:

Valron has Slow: Use DeSpell on Self
At least one Ally has Slow: Use DeSpell on Rnd Ally with Slow
At least one Ally has Stop: Use DeSpell on Rnd Ally with Stop
At least one Ally has Silence: Use DeSpell on Rnd Ally with Silence
At least one Target has Barrier: Use DeSpell on Rnd Target with Barrier
At least one Target has Haste: Use DeSpell on Rnd Target with Haste
At least one Target has MBarrier: Use DeSpell on Rnd Target with MBarrier
At least one Target has Reflect: Use DeSpell on Rnd Target with Reflect
At least one Target has Regen: Use DeSpell on Rnd Target with Regen

If all nine checks fail, use <Dive Kick> on Rnd Target

DEATH: If Chocobo is present AND Chocobo is last alive Enemy:
Display String: [Caught a Chocobo.], activates Chocobo on World Map

Notes On Valron:

Valron is found in Battle Square:
Set - 2 (After Tiny Bronco) Battle - 6

1st Stage: Evade = 1
2nd Stage: Evade = 21

POWER req for Overflow:

Base Damage Overflow: 153
Rnd Var Overflow 3x: 102
Rnd Var Overflow 4x: 77
Rnd Var Overflow 6x: 51

DeSpell will have a 100% chance of removing the following Statuses: Haste, Slow, Stop, Regen, Barrier, MBarrier, Reflect, Shield, Death Force and Resist.
Similar to the Zemzelett, the Valron can become airborne mid-battle. Unlike the Zemzelett, the Valron is *not* considered to be an 'elevated' enemy, so it does not take Double Damage from Wind, nor Nullify Earth.
The Valron does *NOT* get given a row value of 16 when it becomes air-bourne, which means you can still target it with short-ranged Physical Attacks when it is in its 'Flying' form.
Demi3 cannot kill you, but it can heavily deplete your HP, so watch out!

| The Valron only has enough MP for one cast of Demi3; however, its default <Dive Kick> Attack used when its MP has depleted can be more deadly than Demi3, given that its damage is based on you *Max* HP, and can kill you if your Current HP is less than 25% of its max value.

| The Valron is *ONE OF THE BEST* enemies in the game to Limit Level against! Manipulate them to use their Dive Kick Attack against your characters, and make sure they are inflicted with Fury; just be sure not to accidentally kill them with Dive Kick! A Lv 27 Cloud would have a 54% chance of manipulating the Valron.

| The Valron's appearance in the same area as the 6x Battery Cap Encounter makes the Nibel Area (larger) Forests perhaps *the* best area in the game to Limit Level in.

| If one of your Players has the Sprint Shoes equipped, the Valron will still use DeSpell on that target, depleting its MP unnecessarily.

| Although the Valron has high MDef, your Lv 2 Magical Attacks should still deal more damage than your Physical Attacks, unless you're using All for Split Damage (or you have acquired the Champion Belt), in which case Physical Attacks would be preferred. Use Trine or Quake2 if you have either ability available, failing that, open with Laser and follow up with basic attacks. Matra Magic is not worth it at this point.

| If you encounter the Valron in the Battle Square, then use L4 Suicide to deal with it quickly.

| The Valron is one of a number of enemies that are elevated above the ground (while in its flying form), but will not take double damage from the Wind Element, nor will it nullify Earth.

-.-.-.

Dorky Face's ATTACKS:

- Manip Attack 1: Cutter
- Manip Attack 2: Curses
- Manip Attack 3: Funny Breath

Attack 1: <Cutter>	Target: One Opponent	Berserk Attack	
[231] Physical	Element: Cut		
	Att%: 100		
	Power: 16		
	Base Damage: 120 HP		
Attack 2: Curses	Target: One Opponent	Status Inflict:	
[232] Magical 0 Dam	Element: Hidden	Silence (100%)	
	Att%: 100		
	MP Cost: 10 MP		
Attack 3: Funny Breath	Target: All Opponents	No Split Damage	
[233] Magical 0 Dam	Element: Hidden	Status Inflict:	
	Att%: 255	Confusion (23%)	
	MP Cost: 10 MP		
Attack 4: <Ascend>	Target: Self	Disappearing	
[234] Physical 0 Dam	Att%: Auto Hit	Animation	

Dorky Face's BATTLE PLAN: (Repeats)

All Targets with Silence AND All Targets with Paralyzed:

Use <Ascend> on Self, remove Self from Battle on the next turn, leave no rewards

At least one Target without Silence OR At least one Target without Paralyzed:

OPENING ATTACK: 1/2 Chance start from 1st Attack
1/2 Chance start from 5th Attack

1ST ATTACK: Use Curses on Rnd Target without Silence; If all Targets have Silence, use <Cutter> on Rnd Target

2ND ATTACK: Skip a turn
3RD ATTACK: Skip a turn
4TH ATTACK: Use <Cutter> on Rnd Target

5TH ATTACK: Use Funny Breath on All Targets; If all Targets have Paralyzed, use <Cutter> on Rnd Target

6TH ATTACK: Skip a turn
7TH ATTACK: Skip a turn
8TH ATTACK: Use <Cutter> on Rnd Target

Notes On Dorky Face:

A flaw exists with the Dorky Face's AI Script. Instead of checking or Players that have Silence and/or Confusion, it instead looks for Players that have Silence and/or Paralyzed. The only way for the Player to be inflicted with Paralyzed within the Shinra Mansion is to self-inflict it via the use of Dazers. The Player does not have access to Dazers the first time they visit Nibelheim.

If the Dorky Face's AI Script had ran correctly, then it would have used its <Ascend> Attack once all players had become inflicted with both Silence and Confusion, following which it would flee the battle leaving no rewards. If it does use <Ascend>, you will have to wait one turn until the battle ends, which would have left the Player vulenrable to a potential Game Over seeing as all three characters would have been inflicted Confusion and Silence, with no readily available means to cure Confusion.

If you managed to obtain the Peace Ring from the 2nd Fort Condor Battle, then you should equip it to defend from Confusion. Also make sure to have Added Effect+Mystify on someone else's Armour, that way two of your three characters will have defence against one of the most detrimental Statuses in the game.

The Attacks Curses and Funny Breath are two of seven Status inflicting Attacks that use the 'Hidden' Element, and as such can be defended from by equipping the Elemental on your Armour with any other non-element Materia (excluding other Support Materia and Restorative Materia). The Elemental Materia has to be Lv 2 minimum for the effect to work, the effect being that the chance of each Status being inflicted is dropped to 0. The Player is still considered to be vulnerable to the Status used, and the word "Miss" will perpetually appear above their head. A Lv 1 Elemental would instead halve the chance of the Element being inflicted.

The Dorky Face's low Dexterity stat means that they will take a fairly

POWER req for Overflow:

Base Damage Overflow:	149
Rnd Var Overflow 3x:	99
Rnd Var Overflow 4x:	75
Rnd Var Overflow 6x:	50

```
|  long time between turns. It has enough MP for four uses of Funny Breath   |
|  and four uses of Curses, at which point the "skill power is used up" text |
|  string will be displayed when it tries to use either of those Attacks;    |
|  However, it is highly unlikely that you'll make it through 32 turns in    |
|  the Battle, which is how many turns it would take for the Dorky Face to   |
|  run out of MP.                                                            |
| Do not use Deathblow on the Dorky Face, as their high Evade stat will mean |
|  that you'll have less than 25% chance of successfully performing a        |
|  Deathblow.                                                                |
| The Dorky Face is one of a number of enemies that are elevated above the   |
|  ground, but will not take double damage from the Wind Element, nor will   |
|  it nullify Earth.                                                         |
\                                                                            /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Ghirofelgo:                      |   POWER req for Overflow:      |
|                                             |                                |
| Ghirofelgo is found in Battle Square:       |  Base Damage Overflow: 172     |
|  Set - 2 (After Tiny Bronco)   Battle - 8   |  Rnd Var Overflow  3x: 115     |
|                                             o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Ghirofelgo consists of two enemies; the                                  |
|  "Chain" that you see is a non-targetable                                    |
|  enemy that exists for aesthetic purposes only (so the Ghirofelgo can        |
|  separate itself from its counterpart). Visit the "Extra Enemies" section    |
|  further below for more information on this enemy.                           |
| If you wish, you can cast Demi2 or the Enemy Skill Laser to instantly kill   |
|  the Ghirofelgo. This can be especially helpful in the Battle Square,        |
|  should you still have access to such abilities; failing that, a T/S Bomb    |
|  will also kill it in one.                                                   |
| Avoid using Magical attacks when faced with the Ghirofelgo; its high MDef    |
|  stat means that your Physical attacks will deal more damage than your       |
|  Lv 2 Magic. Even Beta and Aqualung will only deal approx 100 HP more than   |
|  your regular attacks! Equip Elemental+Gravity on your weapon for maximum    |
|  damage, and avoid Deathblow given its high Evade stat.                      |
| While it won't attack you often, the Ghirofelgo has high Dexterity, so it    |
|  will go through its turns quite quickly.                                    |
| The Ghirofelgo is one of a number 'elevated' enemies that Nullifies the      |
|  Earth Element, but will no take double damage from Wind.                    |
| The Ghirofelgo is one of 105 enemies that are Immune to Peerless, which      |
|  isn't necessary seeing as there is no way for the Player to inflict the     |
|  enemy with Peerless.                                                        |
```

```
| The Ghirofelgo cannot be Back-Attacked or Side-Attacked, meaning that one  |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.            |
\                                                                            /

Notes On Mirage:	POWER req for Overflow:
The Mirage's AI Script is a bit peculiar. It check for players without D. Sentence, and the only way for the you to become inflicted with D. Sentence in the Shinra Mansion is to cast Death Sentence on yourself, or, equip a Curse Ring. Seeing as you do not obtain the Curse ring till midway through Disc 2, my only guess is that either the Curse Ring was originally intended to be collected in the Shinra Mansion, or, one of the other enemies were going to have originally been designed to inflict D. Sentence.	Base Damage Overflow: 149 Rnd Var Overflow 3x: 99
The Mirror Item can only be obtained from the Mirage, and you only have a 14.06% chance of getting as a Drop. Be sure to obtain one if you intend to complete your inventory list (uses Reflect on all allies).	
The Mirage is one of four enemies that are Immune to Reflect. This is so that the Status cannot be lifted from the Enemy once it has setup Reflect as the Battle initiates, and as such the Mirage gains permanent Reflect.	
The Mirage is one of a number of enemies that are elevated above the ground, but will not take double damage from the Wind Element, nor will it nullify Earth.	
The Mirage cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

|                                                                            |
|   PHASE 2: Do nothing                                                      |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Jersey:                          |   POWER req for Overflow:    |
|                                             |                              |
| A flaw exists with the Jersey's AI Script.  |  Base Damage Overflow: 150   |
|  When it moves into Phase 2, it is supposed |  Rnd Var Overflow  3x: 100   |
|  to move back into its first Phase when     o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  attacked via Magical attacks. As it stands,                               |
|  once the Jersey flips its right counter down (from the Player's POV), it  |
|  will never revert back to its original Phase.                             |
| If you wish to learn the Enemy Skill ????, then you must not attack the    |
|  Jersey as any physical damage will cause it to change into Phase 2. This  |
|  means that the chances of it using ???? will always be 1/6, and without   |
|  the means to manipulate it you could be waiting a while to learn the      |
|  Enemy Skill.                                                              |
| You will have an easier time learning ???? from the Behemoth in Sector 8   |
|  towards the end of Disc 2 if you do not have the patience to learn it     |
|  when you first encounter the Jersey. ???? can be useful at times, as it   |
|  will deal damage equal to the Caster's Max HP - Current HP, meaning the   |
|  lower your HP the more damage you'll deliver. Given the conditions in     |
|  which ???? becomes effective, most Players prioritise their character's   |
|  HP, and as such the Skill does not get used often.                        |
| You should definitely try to steal Turbo Ethers from the Jersey,           |
|  especially if waiting to learn ????. Their low damage output and high     |
|  steal rates makes Turbo Ethers ripe for the picking. A Lv 27 Cloud would  |
|  have a 42.19% chance of stealing from the Jersey.                         |
| The Jersey is one of a number of enemies that are elevated above the       |
|  ground, but will not take double damage from the Wind Element, nor will   |
|  it nullify Earth.                                                         |
| Two identical variants of Spin Attack exists on the Jersey; one for each   |
```

```
|  of the two Phases it is in.                                                  |
| The Jersey cannot be Back-Attacked or Side-Attacked, meaning that one         |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.               |
\                                                                               /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~<|
|   Notes On Black Bat:                                    |   POWER req for Overflow:   |
|                                                          |                             |
```

| Black Bat is found in Battle Square:
| Set - 2 (After Tiny Bronco) Battle - 7

| Base Damage Overflow: 149
| Rnd Var Overflow 3x: 99
| Rnd Var Overflow 4x: 75
| Rnd Var Overflow 6x: 50

The Black Bat poses little threat to the Party. Vampire Fangs are not easy to come by, so if you wish to complete your inventory list then you should try leave the Shinra Mansion with one. The only other enemy to carry a Vampire Fang is the Evilhead in Gaea's Cliff's, and they have the same drop rate as the Black Bat; 14.06%. Alternatively, you could come back to the Shinra Mansion once you have the Morph Materia and your characters are stronger.

Every single Action will trigger the 1/8 chance of the Black Bat setting its Evade to 255, regardless of the Target or the Caster. This includes Actions made by the Black Bat. Even Actions such as Change/Defend will trigger the Counter chance.

Once the Black Bat has set its Evade to 255, all Physical attacks will only have a 1% chance of connecting. Every action performed by both the Player and Enemy will set the Black Bat's Evade back to 1, and a fresh 1/8 chance of the Counter script will then occur with every fresh action.

The Black Bat is considered an "Undead" enemy, which means that they will take damage from healing items and spells such as Cure, Potions etc. Throwing a Phoenix Down would have a 25% chance of instantly killing the Black Bat, whereas a Megalixir/Elixir/X-Potion has a 100% chance.

As with all "Undead" Enemies (excluding the Parasite and Soul Fire), the Black Bat takes Double Damage from the Holy Element, and seeing you will not obtain any Holy based Materia (Alexander) till you reach disc 2, you cannot exploit this weakness now. If you were to return to the Shinra Mansion later on, then your attacks should be killing the Black Bat in one hit, so Holy won't be necessary.

The Black Bat's high MDef stat means that your normal Physical Attacks will deal about the same as your Lv 2 Magic Spells, unless you cast the spells on single targets (no Split Damage). Using All+Cure2 will kill the Black Bat in one hit, as will White Wind.

Equip Elemental+Choco/Mog on your weapon to exploit the Black Bat's weakness to Wind (as with all other 'elevated' enemies). Avoid Earth.

No Manipulate Attacks!

Ying's ATTACKS:

Attack 1: <Ying Punch> — Target: One Opponent
[23E] Physical — Element: Hit
Att%: 100
Power: 16
Base Damage: 243 HP

Attack 2: Sadistic Attack — Target: One Opponent
[23F] Physical — Element: Hit
Att%: 100
Power: 20
Base Damage: 303 HP

Attack 3: <Vanish> — Target: Self — Death Animation
[14E] Physical 0 Dam — Att%: Auto Hit

Ying's BATTLE PLAN: (Repeats)

SETUP: Disable default Death Handling

1/4 Chance: Use Sadistic Attack on Target with Lowest Current HP
3/4 Chance: Use <Ying Punch> on Target with Lowest Current HP

DEATH: If Yang has Death, use <Vanish> on Self, remove Ying/Yang from Battle, Ying/Yang leaves no rewards

Notes On Ying:	POWER req for Overflow:
Ying is found in Battle Square: Set - 2 (After Tiny Bronco) Battle - 8	Base Damage Overflow: N/A Rnd Var Overflow 3x: 511

The Ying Yang Battle can be notoriously long, given how long Yangs animation are. Ying is not the problem, so just focus your attention on Ying's other half before dealing with him. From the player's POV, Ying is the Enemy on the right.

You can open with L4 Suicide if you wish, just be wary of Yang's Death Counter (read the notes on Yang below). If you face Ying & Yang in the Battle Square, you may wish to consider using a Smoke Bomb if you have them at your disposal (Yang is the problem).

The Ying/Yang 'stump' that is left when Ying or Yang dies in actually an enemy itself; visit the "Extra Enemies" section further below for more information on Ying/Yang. It cannot be targeted, and will not leave behind the EXP AP and gil that it has.

A flaw exists within Ying's AI Script. If one of your characters has died, Ying should have had a 0% chance of using <Ying Punch>, and a 100% chance of using Sadistic Attack with every turn.

Ying has the second highest Def stat in the game, 2nd to Ruby Weapon. Its ridiculously high Def stat means that your Physical Attacks will deal around 50 HP; stick to Magic! Yang, on the other hand has ridiculously

```
|  high MDef, so do not use 'All'. Without Split Damage, your Lv 2 Magic     |
|  Spells should deal 500+ HP worth of damage.                                |
| Ying is one of four enemies that has a Def stat that is too high to be      |
|  able perform Base Damage Overflow against (max Def for Base Dam Overflow  |
|  is 376). Only Vincent can cause Random variation overflow against Ying,    |
|  and with a Power value of 511 (64,128 kills), he would only have a 3/256  |
|  chance to overflow. With the maximum Power value of 521 (65,408 kills) he |
|  would have an 82/256 chance to cause Rnd Var Overflow (with Critical and  |
|  Berserk).                                                                  |
| Ying cannot be Back-Attacked or Side-Attacked, meaning that one cannot      |
|  perform Random Variation Overflow with 4x or 6x Damage.                    |
| Yang is one of 105 enemies that are Immune to Peerless, which isn't         |
|  necessary seeing as there is no way for the Player to inflict the Enemy    |
|  with Peerless.                                                             |
\                                                                             /

|                                                                          |
|    Use <Enchanted Yang> on Self, increase Magic by 10 capped at 255      |
|    Display String: [Yang's excited.]                                     |
|                                                                          |
|                                                                          |
|  DEATH: If Ying has Death, use <Vanish> on Self, remove Ying/Yang from   |
|          Battle, Ying/Yang leaves no rewards                             |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Yang:                          |   POWER req for Overflow:    |
|                                           |                              |
| Yang is found in Battle Square:           |  Base Damage Overflow: 153   |
|  Set - 2 (After Tiny Bronco)   Battle - 8 |  Rnd Var Overflow  3x: 102   |
|                                           o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| Yang is the more problematic of the two, and                             |
|  you should focus on killing Yang before                                 |
```

```
|  turning your attention to its counterpart. Yang is the Enemy on the left  |
|  from the Player's POV, and his boringly long animations make the Ying/    |
|  Yang battles tediously long.                                              |
| The easiest way to deal with Yang is *wait until he has just had his       |
|  turn*. As soon as he has cast Bolt2/Ice2, use L4 Suicide and follow up    |
|  with two Physical Attacks. This way he will not perform his Death Counter |
|  when his HP drops below 150, which it does *on his next turn*.            |
| Suicide Yang cannot kill you, but it can cripple you leaving you           |
|  vulnerable to Ying's attacks, which always target the character with the  |
|  lowest HP. In addition to this, Yang will not leave any rewards if he     |
|  uses his Death Counter.                                                   |
| If you still are still using Aeris's Lv 1-2 Limit Break Seal Evil, then    |
|  you could render Yang harmless by inflicting him with Silence. You could  |
|  also equip Added Effect+Seal to your Weapon (or use Silence of you have   |
|  it unlocked, although, chances are you won't have levelled up Seal on     |
|  your first visit to the Shinra Mansion.                                   |
| Should you encounter Yang in the Battle Square, you should consider using  |
|  using a Smoke Bomb if you have them available to use. Yang can ruin your  |
|  day.                                                                      |
| The Ying/Yang 'stump' that is left when Ying or Yang dies in actually an   |
|  enemy itself; visit the "Extra Enemies" section further below for more    |
|  information on Ying/Yang. It cannot be targeted, and will not leave       |
|  behind the EXP AP and gil that it has.                                    |
| Yang has the 6th highest MDef in the game, so stick to Physical Attacks    |
|  only. Event Beta will only deal around 400 HP worth of damage!            |
| Yang is one of 105 enemies that are Immune to Peerless, which isn't        |
|  necessary seeing as there is no way for the Player to inflict the Enemy   |
|  with Peerless.                                                            |
| Yang cannot be Back-Attacked or Side-Attacked, meaning that one cannot     |
|  perform Random Variation Overflow with 4x or 6x Damage.                   |
\                                                                            /

|                                                                             |
|   Follow-Up:                                                                |
```

2nd Attack killed Target: Do nothing

2nd Attack did not kill Target:

Lost Number's HP > 83.3%: 1/6 Chance use <Punch> on Rnd Target
5/6 Chance do nothing

Lost Number's HP <= 83.3%: 1/5 Chance use <Punch> on Rnd Target
4/5 Chance do nothing

Lost Number's HP <= 66.6%: 1/4 Chance use <Punch> on Rnd Target
3/4 Chance do nothing

Lost Number's HP <= 50%: 1/3 Chance use <Punch> on Rnd Target
2/3 Chance do nothing

After 2nd Attack: 2/3 Chance jump to 1st Attack for next turn
1/3 Chance jump to 3rd Attack for next turn

3RD ATTACK: Use Bolt2 on Rnd Target without Reflect; If all Targets have Reflect OR Lost Number's MP < 22, use <Punch> on Rnd Target

Follow-Up:

Lost Number's HP > 83.3%: 1/6 Chance repeat 3rd Attack
5/6 Chance do nothing

Lost Number's HP <= 83.3%: 1/5 Chance repeat 3rd Attack
4/5 Chance do nothing

Lost Number's HP <= 66.6%: 1/4 Chance repeat 3rd Attack
3/4 Chance do nothing

Lost Number's HP <= 50%: 1/3 Chance repeat 3rd Attack
2/3 Chance do nothing

After 3rd Attack: 1/2 Chance jump to 1st Attack for next turn
1/2 Chance jump to 2nd Attack for next turn

COUNTER: [All Physical and Magical Attacks]

Lost Number has Paralyzed OR Stop OR Sleep: Do nothing

Lost Number does NOT have [Paralyzed, Stop AND Sleep]:

Lost Number's HP > 50%: Do nothing

Lost Number's HP <= 50%:

Attack was Physical: Use <[No Name]> on Self, transform to 3rd Form, transfer remaining HP, leave no rewards

Attack was Magical: Use <[No Name]> on Self, transform to 2nd Form, transfer remaining HP, leave no rewards

Notes On Lost Number: (1st Form)

POWER req for Overflow:

Lost Number is an optional Boss that can be fought at any point in the game. He will much harder than most bosses you've fought by the time you get to Nibelheim, but with the right setup he won't present too much of a challenge.	Base Damage Overflow: 180 Rnd Var Overflow 3x: 120

You will need to defeat Lost Number if you wish to gain the 'Basement Key' Item, which is required to obtain the optional character Vincent. To face Lost Number, the game intends you to first solve Hojo's puzzle as to obtain the combination for the safe, which is found on the 2nd Floor Western Wing. The safe combination is as follows:

Right 36 Left 10 Right 59 Right 97

You will also gain the Odin Materia, and Red XIII's Lv 4 Limit Break manual - Cosmo Memory. If you wish to learn how to dupe yourself an extra copy of Cosmo Memory, explore the "Top Farming Locations" section further below for more information.

Open the Battle with Big Guard, then cast Choco/Mog to try to inflict Lost Number with Stop. Make sure to put Added Effect+Time on someones weapon, and have someone else try to inflict it with Poison. If you successfully inflict it with Stop, then it will not transform into its other forms once its HP drops below 50%, therefore you could kill it while it is still in its first form if you are fast enough. Once Stop wears off, he will need to be hit *twice* to trigger the transformation.

If you inflict Lost Number with Slow while it is in its first Form, the Status will carry over to its subsequent form, as will the Poison Status. The damage taken from Poison will not trigger the transformation if it drops Lost Number's HP below 50%.

You *DO NOT* want Lost Number to transform into its Physical (3rd) form, as that version is a lot harder than the Magical (2nd) form. Cast Sense on Lost Number, and be sure that you are using a Magical Attack as its HP falls below 50%.

Although Lost Number performs a check to see if it is inflicted with Sleep, it is immune to Sleep and the check is obsolete.

NOTE - This is Lost Number in its 2nd Form (Magical)

{Lost Number} !! OPTIONAL BOSS !!

|   Notes On Lost Number: (3rd Form)           |   POWER req for Overflow:    |
|                                              |                              |
| The Lost Number 3rd Form is only triggered   |  Base Damage Overflow: N/A   |
|  to appear if you hit the 1st Form Lost      |  Rnd Var Overflow  3x: 420   |
|  Number with a Physical attack as its HP     o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  drops below 50%. This blue version is the                                |
|  Physical version of Lost Number, and is much harder than the 2nd version. |
| Don't hold back when faced with this variant of Lost Number, as his       |
|  Attacks can obliterate your team. Your Physical attacks will deal just   |
|  50 HP, so use Beta and Aqualung to deal 900+ HP with every hit.          |
| See the notes above on Lost Number 1st Form for details on how to setup   |
|  for this Battle (you should have inflicted it with Slow prior to the     |
|  transformation).                                                         |
| Lost Number 3rd Form has the third highest Def stat in the game, and is   |
|  also one of four enemies that has a Def stat that is too high to be able |
|  perform Base Damage Overflow against, the other three being Ying, Armored |
|  Golem while in its 'Special Stage', and Ruby Weapon (max Def for Base Dam |
|  Overflow is 376).                                                        |
\                                                                           /

|              2/3 Chance do nothing                                         |
|                                                                            |
|  1/2 Chance: Use Harrier on Last Attacker; If Sonic Speed has not been     |
|               attacked, or Last Attacker has Death, select Rnd Target      |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Sonic Speed:                      |   POWER req for Overflow:   |
|                                              |                             |
| Sonic Speed is found in Battle Square:       |  Base Damage Overflow: 154  |
|  Set - 2 (After Tiny Bronco)   Battle - 7    |  Rnd Var Overflow  3x: 103  |
|                                              o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Sonic Speed do not pose a massive threat                               |
|  to the Player. If you were inclined to, you could try to steal som Ethers |
|  to sell; although, you'd have an easier time stealing from the Twin       |
|  Brain. A Lv 29 Cloud would have a 10.94% chance of stealing from the      |
|  Sonic Speed.                                                              |
| Equip Elemental+Choco/Mog on your weapon to exploit the Sonic Speed's      |
|  weakness to Wind (as with all other 'elevated' enemies). Avoid Earth.     |
| The Sonic Speed cannot be Back-Attacked or Side-Attacked, meaning that one |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.            |
\                                                                            /

Kyuvilduns's ATTACKS:

Manip Attack 1: Lay Flat

Attack 1: Lay Flat [24B] Physical
Target: One Opponent
Element: None
Att%: 97
Power: 40
Base Damage: 300 HP
Berserk Attack

Kyuvilduns's BATTLE PLAN: (Repeats)

SETUP: If a Chocobo is present, Display String: [A Chocobo!]

Use Lay Flat on Rnd Target

DEATH: If Chocobo is present AND Chocobo is last alive Enemy:
Display String: [Caught a Chocobo.], activates Chocobo on World Map

Notes On Kyuvilduns:

Kyuvilduns is found in Battle Square:
Set - 2 (After Tiny Bronco) Battle - 7

Individually, the Kyuvilduns are not very tough. In groups of five, however, they can be deadly if you're not careful. Be particularly cautious in the Battle Square if you encounter the 5x Kyuvilduns formation; cast Big Guard not only to defend from the onslaught of Lay Flats, but also to prepare you for the final battle.

Zuu's ATTACKS:

Manip Attack 1: Claw
Manip Attack 2: Great Gale

Attack 1: <Claw> — Target: One Opponent — Berserk Attack
[249] Physical — Element: Punch
Att%: 100
Power: 32
Base Damage: 294 HP

Attack 2: Great Gale — Target: All Opponents — Split Damage*
[24A] Physical — Element: Wind — Status Inflict: Darkness (39%)
Att%: 100
Power: 30
Base Damage: 275 HP

Zuu's BATTLE PLAN:

OPENING ATTACK: 1/4 Chance start from 1st Attack
1/4 Chance start from 2nd Attack
1/4 Chance start from 3rd Attack
1/4 Chance start from 4th Attack

1ST ATTACK: Use <Claw> on Rnd Target

Follow-Up:

Zuu's HP > 75%: 1/8 Chance use <Claw> on Rnd Target
7/8 Chance do nothing

Zuu's HP <= 75%: 1/4 Chance use <Claw> on Rnd Target
3/4 Chance do nothing

Zuu's HP <= 50%: 1/3 Chance use <Claw> on Rnd Target
2/3 Chance do nothing

Zuu's HP <= 25%: 1/2 Chance use <Claw> on Rnd Target
1/2 Chance do nothing

2ND ATTACK: Same as 1st Attack
3RD ATTACK: Same as 1st Attack

After 3rd Attack:

Zuu's HP > 75%: 1/8 Chance jump to 4th Attack for next turn
7/8 Chance jump to 1st Attack for next turn

Zuu's HP <= 75%: 1/4 Chance jump to 4th Attack for next turn
3/4 Chance jump to 1st Attack for next turn

Zuu's HP <= 50%: 1/3 Chance jump to 4th Attack for next turn
2/3 Chance jump to 1st Attack for next turn

Zuu's HP <= 25%: 1/2 Chance jump to 4th Attack for next turn
1/2 Chance jump to 1st Attack for next turn

4TH ATTACK: Use Great Gale on All Targets

COUNTER: [All Physical and Magical Attacks]

Zuu's HP > 50%: Do nothing

Zuu's HP <= 50%:

1ST COUNTER: Display String: [Zuu feels Fury.] Jump to 4th Attack for next turn

THEREAFTER: Do nothing

Notes On Zuu:

Zuu is found in Battle Square:
Set - 2 (After Tiny Bronco) Battle - 8

POWER req for Overflow:

Base Damage Overflow: 153
Rnd Var Overflow 3x: 102

The Attack Great Gale is subject to Split Damage for the damage calculations; however, the Status inflicted via Great Gale is *not* subject to Split Damage.

The Zuu is a formidable randomly encountered Enemy, although its attacks are not the strongest. The only thing challenging about the Zuu is its high HP, but it should not survive an onslaught of Physical Attacks for long.

When you encounter the Zuu on the Bridge in Mt. Nibel it will have a row value of 16, meaning that it will be 'Flying', and you cannot attack it with short ranged attacks. In the Battle Square and along the paths to the Reactor, the Zuu has a row value of 1, meaning it can be attacked normally.

You can never encounter the Zuu in the Kalm Flashback; however, Sephiroth is scripted to react differently according the Zuu you encounter; the 'Flying' Zuu would have been met with Fire3, and the regular Zuu would have been met with a standard Attack. Subsequently, these abilities are never used by Sephiroth.

Bird Wings are a good idea to steal, as they have a decent Base Damage value, and are one of the few Wind based abilities available to the Player; save for the Battle Square! A Lv 29 Cloud would have a 42.19% chance of stealing from the Zuu.

Should you encounter the Zuu for the final Battle in the Battle Square, then don't fret; the Zuu is the easiest of the 4 final Battles. Use any Bird Wings that you have at your disposal to deal with them quickly.

The Zuu is one of 105 enemies that are Immune to Peerless, which isn't necessary seeing as there is no way for the Player to inflict the Enemy

```
|  with Peerless.                                                              |
| Equip Elemental+Choco/Mog on your weapon to exploit the Zuu's weakness to  |
|  Wind (as with all other 'elevated' enemies). Avoid Earth.                   |

Notes On Dragon:	POWER req for Overflow:
Dragon is found in Battle Square: Set - 2 (After Tiny Bronco) Battle - 8	Base Damage Overflow: 180 Rnd Var Overflow 3x: 120

The Dragon is one of the hardest randomly encountered enemies that you will have fought yet. If you are under-levelled, then be sure to set up the necessary defences; Big Guard, Players in the Back Row, and give your weaker characters the Fire Ring and Protect Vest if you need to. the <Dragon Fang> Attack can obliterate your Party, so be on guard!

If you haven't learned the Enemy Skill Flame Thrower for your second Enemy Skill, then now would be the time to do so. You can Manipulate the Dragon if you wish; a Lv 29 Cloud would have a 48% chance to manipulate.

You'll want to try to steal at least 2 Gold Armlets from the Dragon, as they will have to be bought for 2000 a piece otherwise from Rocket Town. When you recruit Cid he will have one equipped on him; sell your surplus supply for 1000 gil each. A Lv 29 Cloud would have a 37.5% chance of stealing from the Dragon.

If you do steal from the Dragon, then note that you will not obtain the Fire Fang (casts 'Fire2' on all opponents), as you cannot obtain both the steal and the drop. You can acquire Fire Fangs later on in the game as a prize from the Chocobo Square, or by morphing the Land Worm once you have the Morph Materia from the Temple of The Ancients (but only while you still have the Buggy).

Use L4 Suicide to weaken the Dragon, especially if you encounter it within the Battle Square. Avoid Deathblow, and stick to Physical Attacks to deal around 200 HP per hit (your Lv 2 Magic will only hit for around 100 HP more than your Physical attacks), or, use Aqualung to deal 650+ HP per hit (but avoid Beta). Try Poisoning the Dragon, also.

The Dragon is one of 105 enemies that are Immune to Peerless, which isn't necessary seeing as there is no way for the Player to inflict the Enemy with Peerless.

The Dragon cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Screamer:                          |   POWER req for Overflow:    |
|                                               |                              |
| Screamer is found in Battle Square:           |  Base Damage Overflow: 151   |
|  Set - 2 (After Tiny Bronco)   Battle - 7     |  Rnd Var Overflow  3x: 101   |
|                                               o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| Once you have the Morph Materia from the                                     |
|  Temple of The Ancients, you could optionally come back to Mt. Nibel to      |
|  Morph some Power Sources from the Screamer, although, the Heavy Tank in     |
|  Gongaga is a better option, as they have a 100% appearance rate. The        |
|  Screamer only appear on three screens, and the best screen to encounter     |
|  them on is the "Mt. Nibel Reactor Exterior" screen. Your Morph Damage       |
|  following the TOTA will be approximately 60 HP.                             |
| Once you have the W-Item materia, you could dupe yourself finite amount of   |
|  Power Sources given that they appear in pairs. Explore the "Top Farming     |
|  Locations" section further below for more information on duping items       |
|  that cannot be duped using the standard W-Item method.                      |
| The Screamer cannot be Back-Attacked or Side-Attacked, meaning that one      |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.              |
\                                                                              /

|                                                                            |
|                                                                            |
|  5TH ATTACK: Use Trine on All Targets; If Materia Keeper's MP < 20, use    |
|              Hell Combo on Rnd Target                                      |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Materia Keeper:                  |   POWER req for Overflow:    |
|                                             |                              |
| As far as bosses go, Materia Keeper is one  |  Base Damage Overflow: 172   |
|  of the more tougher ones. Make sure to keep |  Rnd Var Overflow  3x: 115   |
|  Big Guard up at all times, and if necessary o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  place your characters in the Back Row.                                    |
| Trine is a permanently missable Enemy Skill, and if you don't obtain it    |
|  now then you will have two more opportunities to learn it (Godo and       |
|  Stilva). You should set your sights on learning Trine now though, as it   |
|  is more powerful than Matra Magic (which is starting to become obsolete), |
|  and costs less MP than Beta and Aqualung. Materia Keeper will always use  |
|  Trine as its next attack after using Cure2, and it will only use Cure2    |
|  once its HP has dropped below 50% (make sure to have Sense equipped).     |
| Avoid using Deathblow against Materia Keeper, unless Vincent in your party |
|  with the Sniper CR equipped. You can exploit its vulnerability to Slow    |
|  and Stop by equipping Added Effect+Time on one of your characters         |
|  Weapons, and also inflict it with Poison. Just bear in mind that the      |
|  damage taken from the Poison Status will not cause it to recognise that   |
|  its HP has dropped below the threshold to start using Cure2.              |
```

| Odin's Gunge Lance has a whopping 78 Power, and will hit for around 1200 HP. Use Choco/Mog also for a chance to inflict Materia Keeper with Stop, and if you have Quake2 unlocked that will be your strongest Lv Magic spell (24 power). Do not use Vincent's Limit Break Galian Beast, as his 'Beast Flare' ability is Fire based and will heal Materia Keeper. |

-.-.-.

Velcher Task's ATTACKS:

- Manip Attack 1: Claw
- Manip Attack 2: Poison Blow

Attack 1: <Claw> [1BE] Physical

Target: One Opponent
Element: Hit
Att%: 100
Power: 16
Base Damage: 130 HP

Berserk Attack

Attack 2: Poison Blow	Target: One Opponent	Status Inflict:
[226] Magical 0 Dam	Element: Shoot	Poison (71%)
	Att%: 100	
	MP Cost: 4 MP	

Velcher Task's BATTLE PLAN: (Repeats)

SETUP: If a Chocobo is present Print Message [A Chocobo!]

*If all Targets have Poison, skip a turn

OPENING ATTACK: 1/4 Chance use Poison Blow on Rnd Target without Poison*
3/4 Chance use <Claw> on Rnd Target without Poison*

THEREAFTER: 1/3 Chance use Poison Blow on Rnd Target without Poison*
2/3 Chance use <Claw> on Rnd Target without Poison*

COUNTER: [All Physical and Magical Attacks]

Velcher Task does not have Poison AND Velcher Task's HP < 12.5%:

Use <Claw> on Last Attacker

Velcher Task has Poison OR Velcher Task's HP <= 12.5%:

Use Poison Blow on Rnd Target without Poison; If all Targets have Poison, do nothing

DEATH: If Chocobo is present AND Chocobo is last alive Enemy:
Display String: [Caught a Chocobo.], activates Chocobo on World Map

Notes On Velcher Task:

Velcher Task is found in Battle Square:
Set - 2 (After Tiny Bronco) Battle - 6

The Velcher Task poses little threat to the Party. It will only target characters that are not inflicted with Poison, and once all three teammates are Poisoned, the Velcher Task will stop attacking you.

The Velcher Task only has enough MP for 7 uses of Poison Blow, after which the "skill power is used up" text string will be displayed every time it tries to use that Attack.

Stick to using Physical Attacks against the Velcher Task given its high MDef value. Trine will deal 800+ damage, and may not be enough to kill them in one hit.

The Velcher Task provides the first opurtunitty in the game to steal Remedys, so *make sure* to try to steal a few, as the help tremendously not only in the Battle Square but also for general use (cures 13 negative Statuses). A Lv 31 Cloud would have a 45.31% chance of stealing from the Velcher Task.

The Velcher Task is considered to be a 'Powerful' enemy, and as such the "Pre-Emp" Flag should have been disabled for encounters that contain the Velcher Task. An oversight means that you have a chance to initiate a Pre-Emptive Strike against the 2x Velcher Task Encounter in the Forests of Rocket Launce Pad Area (larger of the two forests; Formation ID #158). You can also Pre-Emp the Velcher Task on the Grass Area.

POWER req for Overflow:

Base Damage Overflow:	153
Rnd Var Overflow 3x:	102

|    Last Attacker has Death OR Last Attacker has Silence:                   |
|                                                                            |
|     Do nothing, jump to 1st Attack for next turn                           |
|                                                                            |
|    Last Attacker does not have Death AND Last Attacker does not have       |
|     Silence:                                                               |
|                                                                            |
|      Use Silence on Last Attacker; If Bahba Velamyu's HP < 20, use Magic   |
|       Cutter on Last Attacker, jump to 1st Attack for next turn            |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Bahba Velamyu:                  |   POWER req for Overflow:     |
|                                            |                               |
| Bahba Velamyu is found in Battle Square:   |  Base Damage Overflow: 149    |
|  Set - 2 (After Tiny Bronco)   Battle - 6  |  Rnd Var Overflow  3x: 100    |
|                                            |  Rnd Var Overflow  4x:  75    |
| The weirdly name Bahba Velamyu inflicts very |  Rnd Var Overflow  6x:  50  |
|  low damage against the Player, and        o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  therefore they pose little threat. The                                    |
|  worst thing they can do is inflict you with Slow and/or Silence, neither  |
|  of which prevent you from taking them out via Physical attacks.           |
| The Bahba Velamyu can drain your MP, which can be rather annoying. Another |
|  reason to just use Physical attacks.                                      |
| The large forests of Nibel is one of the best place in the game to level   |
|  up your Limit Breaks, however, the presence of the 2x Bahba Velamyu       |
|  considerably drop the averages earned there.                              |
| A bug exists in the Battle Square with the 2x Bahba Velamyu Encounter; the |
|  Formation exists in both Pool A and Pool B, although it should only exist |
|  in Pool A. If you land on that Formation while in Pool B on your 6th      |
|  Battle (Set 2), then you will be incorrectly placed into Pool A for the   |
|  7th Battle.                                                               |
| Only a handful of enemies carry Mute Masks (casts Silence on all           |
|  opponents), so you would do well to try to obtain one now if you are      |
|  trying to complete your inventory list. You will have an opurtunitty to   |
|  steal Mute Masks from the Crazy Saw during the Raid on Midgar on Disc 2.  |
\                                                                            /

MAPS:	APPEARANCE RATE:	LOOKALIKES:
Nibel Area Forest (Larger Forest)	58%	Search Crown

Battery Cap's ATTACKS:

Manip Attack 1: Seed Shot
Manip Attack 2: Four Lase

Attack 1: Seed Shot [22D] — Physical 0 Dam
Target: One Opponent
Element: Shoot
Att%: 100
Berserk Attack
Status Inflict: Darkness (100%)

Attack 2: Four Laser [22E] — Magical
Target: One Opponent
Element: None
Att%: 100
Power: 16
MP Cost: 16 MP
Base Damage: 396 HP

Battery Cap's BATTLE PLAN: (Repeats)

1/2 Chance: Use Four Laser on Rnd Target
1/2 Chance: Use Seed Shot on Rnd Target with Poison; If no targets have Poison, select Rnd Target.

Notes On Battery Cap:

Battery Cap is found in Battle Square: Set - 2 (After Tiny Bronco) Battle - 6

A flaw exists with the Battery Cap's AI script. The check is for 'any players with Poison'; it should be for 'any Players without Darkness', seeing as Seed Shot inflicts Darkness.

The Battery Cap can cause your problems if you are not careful. Their Four Laser Attack deals a moderate amount of damage, and their 6x Formations can easily ruin your day. Be particularly careful in the Battle Square.

To deal with the Battery Cap swiftly, open with L4 Suicide and follow up with Matra Magic. Alternatively, one cast of Trine should wipe them out.

The Battery Cap only has enough MP for three casts of Four Laser, after which the "skill power is used up" text string will be displayed every time it tries to use that Attack.

For the first time in the game, you have access to Dazers which inflicts one opponent with Paralyzed (Ruby Weapon's weakness). Until this point, you could only inflict Paralyzed via the use of Cloud's 1-2 and Aeris's 1-2 Limit Breaks, and seeing as a few Bosses are vulnerable to Paralyzed, you should definitely try to stock up on a few now. A Lv 31 Cloud would have a 48.44% chance of stealing from the Battery Cap.

The Nibel Area Forests (larger of the two) is considered to be the best area in the game to level up your Limit Breaks in. You can manipulate the Valron to have it use its % Based attacks on you (Dive Kick), and you can also rack up an amount of kills from the 6x Battery Cap Encounter. Unfortunately, the presence of the 2x Bahba Velamyu greatly drops the effectiveness of the training area.

There are only three other randomly encountered formations that fill the maximum six enemy slots; the Touch Me Pincer Attack, and the Warning

POWER req for Overflow:

Base Damage Overflow:	149
Rnd Var Overflow 3x:	100
Rnd Var Overflow 4x:	75
Rnd Var Overflow 6x:	50

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Palmer:                          |   POWER req for Overflow:    |
|                                             |                              |
| Palmer is one of the easiest Bosses in the  |  Base Damage Overflow: 172   |
|  game, and is weaker than some Mini-Bosses. |  Rnd Var Overflow  3x: 115   |
|  So long as you maintain Big Guard and don't o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  let your HP drop below 50%, you should be                                 |
|  fine. His attacks do moderate damage at best.                             |
| Feel free to use your new Enemy Skill Trine and/or Beta and Aqualung, or,  |
|  just pummel him with Physical attacks until he falls to his comical fate. |
| Equip Added Effect+Time on your Weapon, and cast Choco/Mog to exploit      |
|  Palmer's weakness to Slow and Stop. If you wished to, you could also      |
|  use Dazers to inflict Paralyzed. Just avoid Deathblow.                    |
| Palmer is the only enemy in the game to take Double Damage from Sleep.     |
|  This means that if were to equip the Added Effect Materia with Sleep on   |
|  your Weapon (Seal Materia), your Physical attacks would do Double Damage. |
|  Palmer is, however, immune to the Status Sleep.                           |
| Alongside Palmer are two [No Name] enemies, one for the helicopter and one |
|  for the truck. Explore the "Extra Enemies" section for more information   |
|  on those enemies.                                                         |
| Following the funny scenes with Palmer, you will not hear the standard     |
|  Battle victory 'Fanfare' theme.                                           |
| Palmer is one of 105 enemies that are Immune to Peerless, which isn't      |
|  necessary seeing as there is no way for the Player to inflict the Enemy   |
|  with Peerless.                                                            |
\                                                                            /

|   Use <Light Shell> on Last Attacker                                        |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Adamantaimai:                    |   POWER req for Overflow:     |
|                                             |                               |
| Adamantaimai is found in Battle Square:     |  Base Damage Overflow: 156    |
|  Set - 3  (After Highwind)     Battle - 2   |  Rnd Var Overflow  3x: 104    |
|                                             o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| A flaw exists in the Adamantaimai's AI                                      |
|  script. Each time it takes its turn, it *should* have ran a check to see   |
|  if it is inflicted with Barrier AND MBarrier, in which case it would have  |
|  skipped a turn. The absence of this check means that it will always try    |
|  to use the Attack that it used on its previous turn, which is due to the   |
|  fact that the Var for the Attack ID to be used is not reset after each     |
|  turn.                                                                      |
| If you were to cast Big Guard on the Adamantaimai before it has a chance    |
|  to use its first turn, the Var for the Attack ID to be used will be set    |
|  to 0000 by default, and Attack ID 0000 is Cure. Seeing as it does not      |
|  have this Attack available to use, a fatal error will occur, and the       |
|  following text string will be displayed on repeat: [Data Error]            |
|  [Scene:179 /Code:32] [Push L1+R1+Select for Reset.]. Note that the         |
|  'Scene' is not actually referring to the Scene ID, but rather, the         |
|  Formation ID. You will lose control of your Party should this fatal error  |
|  occur.                                                                     |
| Death Force can be a useful skill to learn, as it will grant one character  |
|  Death immunity for the remainder of the Battle. This can be helpful once   |
|  you obtain the Curse Ring, as well as in the North Crater, where a lot of  |
|  enemies can inflict you with instant Death.                                |
| You will need to manipulate the Adamantaimai in order to learn Death        |
|  Force; a Lv 32 Cloud would have a 53% chance to manipulate the it.         |
| The Adamantaimai will not attack the Player unless provoked. Its only       |
|  damaging attack <Light Shell> will only be used as a counter attack. Note  |
|  that steal attempts will trigger the Counter script, whereas Manipulate    |
|  will not.                                                                  |
```

| The Adaman Bangle is a piece of armour that has few slots, but incredibly high Def; good for the upcoming 'No-Materia' quest. A Lv 32 Cloud would have a 42.19% chance of stealing from the Adamantaimai, and you cannot obtain this Armour anywhere else in the game.

| If you were to steal the Adaman Bangle, then you would have a 0% chance of receiving the Dragon Scales at the end of the Battle, which is an incredibly useful Battle Item for the Battle Square. It has a Base Damage value of 3680, and hits all opponents for Water Damage (one of the few Water based abilities available to the Player). Note that you can very easily steal Dragon Scales from the Sea Worm on the shores of Mideel.

| Don't bother using your Lv 2 Magic against the Adamantaimai, as they will hit for the same HP as your normal attacks. If you do wish to use Magic, stick with Trine/Beta/Aqualung.

| The test Enemy êúô6(ñâ) originally took the same model as the Adamantaimai in the JORG release, however, in the later releases the model was changed to that of the Pyramid. Visit the "Extra Enemies" section for more info on êúô6(ñâ).

| The Adamantaimai cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

Wutai Area Dirt	46%	Needle Kiss

Thunderbird's ATTACKS:

Manip Attack 1: Stab
Manip Attack 2: Lightning

Attack 1: <Stab> [251] Physical

Target: One Opponent
Element: Punch
Att%: 95
Power: 16
Base Damage: 253 HP

Berserk Attack

Attack 2: Lightning	Target: All Opponents	No Split Damage
[252] Magical	Element: Lightning	
	Att%: 95	
	Power: 20	
	MP Cost: 16 MP	
	Base Damage: 450 HP	

Thunderbird's BATTLE PLAN: (Repeats)

1/4 Chance: Use Lightning on All Targets
3/4 Chance: Use <Stab> on Rnd Target

COUNTER: [All Physical and Magical Attacks]

If Last Attack on Thunderbird was Ice Element

Use Lightning on All Targets

Notes On Thunderbird:

Do not use All+Ice on the Thunderbird, as they will each counter by using Lightning one all opponents, which can very easily wipe out your Party.

When you first encounter the Thunderbird you will not have any Materia to use, however, when you make the trip back to the Tiny Bronco you will have magic at your disposal. Avoid Ice and Lightning; two casts of Fire2 and one Matra Magic should be enough to kill them.

Lightning is one of a handful of attacks that target all opponents for *No Split Damage*, which means it will not be subject to a 66% drop in damage output. In short, be vary wary when faced with groups of Thunderbirds.

The Thunderbird is one of a number of enemies that are elevated above the ground, but will not take double damage from the Wind Element, nor will it nullify Earth.

|   5TH ATTACK: Same as 1st Attack                                             |
|                                                                              |
|   6TH Attack: Use <[No Name]> on Self, transform to Stage 1 (Ground)         |
|               Set Defence back to 50 and Evade back to 1                     |
|                                                                              |
|                                                                              |
|  STAGE 1: (Ground)                                                           |
```

1ST ATTACK: Use <Bodyblow> on Rnd Target
2ND ATTACK: Use <Bodyblow> on Rnd Target
3RD ATTACK: Use <Bodyblow> on Rnd Target

4TH Attack: Use <[No Name]> on Self, transform to Stage 2 (Flying)
Set Defence to 0 and Evade to 50

Notes On Bizarre Bug:

Bizarre Bug is found in Battle Square:
Set - 3 (After Highwind) Battle - 1
Set - 3 (After Highwind) Battle - 2

1st Stage: Def = 50 Evade = 1
2nd Stage: Def = 0 Evade = 50

The Bizarre Bug is *the best* Enemy in the game to practise Damage Overflow on, given that its Defence will be dropped to 0 when it is in its flying form. The only other Enemy in the game to have 0 Def is Sephiroth (Final Form). You can also encounter the Bizarre Bug as a Side Attack formation, so you can continuously back-attack them.

A Lv 99 Character (bar Aeris) with 255 Attack and Four Hero Drinks would have a 100% chance to overflow against the Bizarre Bug while in its Flying Form, provided they met the condition to gain the maximum Power value on their Ultimate Weapon (which also means Yuffie is excluded), while also landing a Back-Damaging Critical hit while in Berserk.

The high Evade stat of the Flying Bizarre Bug means that your normal Physical Attacks will have approximately a 66% chance of connecting, and your Deathblow chance would be 1%. This is based on your stats following the acquisition of the Tiny Bronco; if you were to fight the Bizarre Bug with end-game stats for Overflow purposes, then you would have a 100% chance of connecting.

Note that the Bizarre Bug will *not* gain a Row Value of 16 while in its Flying Form (unlike some of the other enemies that can become air-bourne mid-battle), so your short-ranged attacks can still target it.

You will encounter the Bizarre Bug at a time in the game when you have no Materia, so equip the Fairy Ring and/or Star Pendant to defend from the Poison Status, if you wish.

The Wutai Dirt Area can be a fantastic place to train, not only for the large quantities of EXP/AP/Gil, but also for the fact that the Bizarre Bug will drop X-Potions 100% of the time. Just be sure to train *after* Yuffie's sidequest, so that you can level up your Materia. If you are not bothered about the X-Potions, then take note of the fact that the "Corral Valley 1st Screen With Log Bridge" is the best screen to train on Disc 1.

The Attack Toxic Powder is subject to Split Damage for the damage calculations, however, the Status inflicted via Toxic Powder is *not* subject to Split Damage, and will always have a 100% chance to inflict you with Poison.

The Bizarre Bug is one of a number of enemies that are elevated above the ground (while in its flying form), but will not take double damage from the Wind Element, nor will it nullify Earth.

The Bizarre Bug should also have been encountered on the three swinging bridges on the World Map alongside the Tail Vault, however, due to limitations these encounters were phased out of the final version. This is unfortunate; given the high Battle Spoils, it would have produced a better training rating than the Dirt Area (but not as high as Corral Valley's 1st Screen).

POWER req for Overflow:

1st Stage:
Base Damage Overflow: 153
Rnd Var Overflow 3x: 102
Rnd Var Overflow 4x: 77
Rnd Var Overflow 6x: 51

2nd Stage:
Base Damage Overflow: 138
Rnd Var Overflow 3x: 92
Rnd Var Overflow 4x: 69
Rnd Var Overflow 6x: 46

```
\                                                                                /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Tail Vault:                          |   POWER req for Overflow:  |
|                                                 |                            |
| Tail Vault is found in Battle Square:           |  Base Damage Overflow: 152 |
|  Set - 3  (After Highwind)     Battle - 2       |  Rnd Var Overflow  3x: 101 |
|                                                 |  Rnd Var Overflow  4x:  76 |
| The Tail Vault has high MDefence, but that      |  Rnd Var Overflow  6x:  51 |
|  will not matter as you encounter it at a       o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  time when you have no Materia. Its attacks                                  |
|  do moderate damage, and it will attack all three players consecutively      |
|  as a counter every fourth time it is attacked Physically. Once you do       |
|  get your Materia back, one blast oF Trine will critically injure them.      |
| The "1st Target", "2nd Target" & "3rd Target" refers to the right-most,      |
|  central, and left-most characters, respectively.                            |
| The 100% Phoenix Down drop rate will help a huge deal for the upcoming       |
|  quest, unless your Materia count exceeds the amount Yuffie can steal, and   |
|  you still have the Revive Materia available. You can also get some          |
|  amazing Battle SPoils from the Tail Vault.                                  |
| The Tail Vault should also have been encountered on the three swinging       |
|  bridges on the World Map alongside the Bizarre Bug, however, due to         |
|  limitations these encounters were phased out of the final version. This     |
|  is unfortunate; given the high Battle Spoils, it would have produced        |
|  a better training rating than the Dirt Area (but not as high as Corral      |
|  Valley's 1st Screen).                                                       |
\                                                                              /

MAPS:	APPEARANCE RATE:	LOOKALIKES:
Wutai Area Grass	50%	Mandragora
Wutai Area Dirt	Choc	
Da-chao Status 1st Screen (Base)	45%	
Da-chao Statue Top-Most Hand	3%	

Razor Weed's ATTACKS:

Manip Attack 1: Glasscutter
Manip Attack 2: Spaz Voice
Manip Attack 3: Magic Hammer

Attack 1: <Glasscutter> — Target: One Opponent — Berserk Attack
[253] Physical — Element: Cut
Att%: 95
Power: 16
Base Damage: 154 HP

Attack 2: Spaz Voice — Target: One Opponent — Status Inflict:
[254] Magical 0 Dam — Att%: 95 — Fury (47%)
MP Cost: 15 MP

Attack 3: Magic Hammer — Target: One Opponent — **Enemy Skill**
[04A] Magical — Element: None — Never Used
Att%: 100 — Drains MP
Power: 5 — Reflectable
MP Cost: 3 MP
Base Damage: 100 MP

Razor Weed's BATTLE PLAN: (Repeats)

SETUP: If a Chocobo is present Print Message [A Chocobo!]

1/3 Chance: Use <Glasscutter> on Rnd Target
2/3 Chance: Skip a turn

COUNTER: [Physical Attacks Only]

Use Spaz Voice on Last Phys Attacker, skip the next turn

DEATH: If Chocobo is present AND Chocobo is last alive Enemy:
Display String: [Caught a Chocobo.], activates Chocobo on World Map

Notes On Razor Weed:

Razor Weed is found in Battle Square:
Set - 3 (After Highwind) Battle - 1

While the Razor Weed is not a very tough Enemy, you will be facing it at a time when you have no Materia, so you'll have to rely on Physical Attacks. Every Physical Attack will provoke it to use Spaz Voice as a Counter. Make sure to have some Tranquilizers ready if you are not trying to Limit Level, and/or equip the Peace Ring if you have

POWER req for Overflow:

Base Damage Overflow:	153
Rnd Var Overflow 3x:	102
Rnd Var Overflow 4x:	77
Rnd Var Overflow 6x:	51

```
|  obtained it from Fort Condor.                                                |
| Magic Hammer is one of the best Enemy Skills to learn, as it will drain    |
|  100 MP from its Target, provided the Target has any MP to drain. The      |
|  Razor Weed will never use Magic Hammer normally, so you will have to      |
|  manipulate it following Yuffie's Sidequest. A Lv 34 Cloud would have a    |
|  58% chance of manipulating the Razor Weed.                                |
| Take note of the fact that Magic Hammer *can* be learned prior to the      |
|  start of the Materia Quest; there is a small patch of grass to the left   |
|  of the beach area where you disembark the Tiny Bronco where you can fight |
|  the Razor Weed. This option is for those that wish to do Yuffie's         |
|  Sidequest at a later date.                                                |
\                                                                             /

|  1/4 Chance: Use <Scissors> on Rnd Target                                      |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Edgehead:                          |   POWER req for Overflow:    |
|                                               |                              |
| The Edgehead has enough MP for 10 uses of     |  Base Damage Overflow: 152   |
|  Electric Burst, after which the "skill       |  Rnd Var Overflow  3x: 102   |
|  power is used up" text string will be        |  Rnd Var Overflow  4x:  76   |
|  displayed each time it tries to use that     |  Rnd Var Overflow  6x:  51   |
|  Attack.                                      o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| You won't need to worry about the Edgehead's                                   |
|  high MDefence stat, seeing as you will not have any Materia when you         |
|  first encounter them. When you do have access to your Materia, avoid         |
|  Trine as they will absorb the Lightning Element.                              |
| The Hourglass casts Stop on all opponents, and while it isn't the most        |
|  useful of items to collect, it can be quite hard to obtain. The only         |
|  other enemy in the game to carry the Hourglass is the Kimara Bug, and you    |
|  would have an easier time Morphing the Kimara Bug once you have obtained     |
|  the Morph Materia from Temple of The Ancients.                                |
| Smoke Bombs are the most useful thing you can obtain from the Edgehead, as    |
|  they give you the ability to flee the Battle Square while retaining your     |
|  earned BP.                                                                    |
\                                                                                /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Attack Squad:                    |   POWER req for Overflow:    |
|                                             |                              |
| The Attack Squad is the only non-randomly   |  Base Damage Overflow: 159   |
|  encountered recurring Enemy in the game.   |  Rnd Var Overflow  3x: 106   |
|  They are fairly weak even the first time   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  you encounter them; on Disc 2 you should be                               |
|  able to dispatch them without any issues. You can never Back-Attack them. |
| S-mines are not that great, however, 8-inch Cannons are not only great for |
|  the Battle Square (3200 Base Damage against on opponent), they are also a |
|  permanently missable Item. You will not be able to steal them on you      |
|  first encounter with the Attack Squad (assuming you embark on Yuffie's    |
|  Sidequest when the game intends you to), so make sure to steal 8-inch     |
|  Cannons when you encounter them in Junon on Disc 2 (Press Conference      |
|  Room). A Lv 39 Barret would have a 12.5% chance of stealing from the      |
|  Attack Squad, just note that the Grosspanzer-Big has them as a 100% drop  |
|  rate.                                                                     |
| If Yuffie was in your party the first time you encounter the Attack Squad  |
|  at the start of the Materia Quest, then you will have to fight them with  |
|  just two party members. Even without Materia they should not cause you    |
|  any problems.                                                             |
| The second time you encounter the Attack Squad will be in Junon on Disc 2, |
|  and you will have just Barret and Cait Sith in you Party. Be sure to      |
|  equip both with an Enemy Skill Materia and any other basic setup you see  |
```

| fit prior to the forced encounter. You can flee from this battle if you |
| wish; although, this was likely to have been an error. |
| The third encounter with the Attack Squad in Mt. Corel on Disc 2, during |
| the Huge Materia Quest. Unlike all other battles with the Attack Squad, |
| this encounter allows for a Pre-Emptive Strike. Be sure to steal 8-inch |
| Cannons here, also. |
| The fourth and final encounter with the Attack Squad will be in Rocket |
| Town, just before the Rocket Mission. They will be covering Turks:Rude |
| during the Boss Battle, but by this point you should be strong enough to |
| kill them in one hit. You will not be able to target Turks:Rude with |
| short-ranged attacks until the Attack Squad have been killed. |
| The Attack Smoke Bullet is one of seven Status inflicting Attacks that use |
| the 'Hidden' Element, and as such can be defended from by equipping the |
| Elemental on your Armour with any other non-element Materia (excluding |
| other Support Materia and Restorative Materia). The Elemental Materia has |
| to be Lv 2 minimum for the effect to work, the effect being that the |
| chance of each Status being inflicted is dropped to 0. The Player is |
| still considered to be vulnerable to the Statuses used, and the word |
| "Miss" will perpetually appear above their head. A Lv 1 Elemental would |
| instead halve the chance of the Element being inflicted. |

-.-.-.

	Base Damage: 283 HP	
Attack 3: Silk	Target: One Opponent	Status Inflict:
[122] Magical 0 Dam	Att%: 90	Slow (100%)
Attack 4: Thread	Target: One Opponent	Status Inflict:
[269] Magical 0 Dam	Att%: 90	Stop (100%)

Jayjujayme's BATTLE PLAN: (Repeats)

OPENING ATTACK: 1/2 Chance start from 1st Attack

```
|                  1/2 Chance start from 2nd Attack                        |
|                                                                          |
|                                                                          |
|  1ST ATTACK:                                                             |
|                                                                          |
|   At least one Target with Stop: Use <Bite> on Rnd Target with Stop      |
|                                                                          |
|                                                                          |
|   No Targets with Stop:                                                  |
|                                                                          |
|    At least one Target with Slow AND at least two Targets alive:         |
|                                                                          |
|     Use Thread on Rnd Target with Slow                                   |
|                                                                          |
|    No Targets with Slow OR only one Target alive:                        |
|                                                                          |
|     Use Silk on Rnd Target without Slow; If all Targets have Slow, use   |
|      <Bite> on Rnd Target                                                |
|                                                                          |
|                                                                          |
|  2ND ATTACK:                                                             |
|                                                                          |
|   At least one Target without Slow: Use Silk on Rnd Target without Slow  |
|                                                                          |
|                                                                          |
|   All Targets with Slow:                                                 |
|                                                                          |
|    At least one Target without Stop AND at least two Targets alive:      |
|                                                                          |
|     Use Thread on Rnd Target without Stop                                |
|                                                                          |
|    All Targets with Stop OR only one Target alive:                       |
|                                                                          |
|     Use <Bite> on Rnd Target with Slow                                   |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Jayjujayme:                    |   POWER req for Overflow:      |
|                                           |                                |
| Jayjujayme is found in Battle Square:     |  Base Damage Overflow: 152     |
|  Set - 3  (After Highwind)     Battle - 1 |  Rnd Var Overflow  3x: 101     |
|                                           |  Rnd Var Overflow  4x:  76     |
| The Jayjujayme can be a nuisance at most. |  Rnd Var Overflow  6x:  51     |
|  Make sure to have the Sprint Shoes       o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  equipped, and also the Choco Feather to                                 |
|  help with the Jayjujayme's Slow-Status inflicting Attacks.              |
| You will have a cumulative 26.15% chance to obtain a Remedy as a drop from |
|  the Jayjujayme, which can help for the Battle Square (cures abnormal    |
|  Statuses).                                                              |
| An error occurs in the 3x Jayjujayme, 1x Garuda encounter on the 3rd     |
|  Screen (Cavern Exterior). The middle Jayjujayme should have covered the |
|  Garuda, however, the Cover Flag has been incorrectly set here.          |
\                                                                          /

|   Foulander's BATTLE PLAN: (Repeats)                                        |
|                                                                             |
|  NOTE - The Foulander targets the last Player to attack it. If it hasn't    |
|         taken any damage, select a Rnd Target and keep attacking that       |
|         target until damage is taken. If the Last Attacker has Death,       |
|         select a Rnd Target.                                                |
|                                                                             |
|                                                                             |
|  OPENING ATTACK: 1/5 Chance start from 1st Attack                           |
|                  1/5 Chance start from 2nd Attack                           |
|                  1/5 Chance start from 3rd Attack                           |
|                  1/5 Chance start from 4th Attack                           |
|                  1/5 Chance start from 5th Attack                           |
|                                                                             |
|                                                                             |
|  1ST ATTACK: Use <Claw> on Last Attacker                                    |
|   Follow-Up: 1/3 Chance use <Claw> on Last Attacker; If Last Attacker has   |
|                   Death, do nothing                                         |
|              2/3 Chance do nothing                                          |
|                                                                             |
```

```
|  2ND ATTACK: Same as 1st Attack                                          |
|  3RD ATTACK: Same as 1st Attack                                          |
|  4TH ATTACK: Same as 1st Attack                                          |
|                                                                          |
|  5TH ATTACK: Use Flame Dance on All Targets; If Foulander's MP < 16, skip |
|              a turn                                                      |
|                                                                          |
|    After 5th Attack: 1/2 Chance jump to 1st Attack for next turn         |
|                      1/2 Chance jump to 2nd Attack for next turn         |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Foulander:                      |   POWER req for Overflow:   |
|                                            |                             |
| Foulander is found in Battle Square:       |  Base Damage Overflow: 152  |
|  Set - 3  (After Highwind)     Battle - 1  |  Rnd Var Overflow  3x: 101  |
|                                            |  Rnd Var Overflow  4x:  76  |
| The Foulander isn't too tough, although it |  Rnd Var Overflow  6x:  51  |
|  does have a 1/3 chance of using its <Claw>  o~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Attack twice consecutively.                                             |
| Lunar Curtains are extremely difficult to get; the only other way to     |
|  obtain one is from the Unknown 2 as a 4.69% drop chance. If you plan to |
|  complete your inventory list, then be sure to obtain at least one Lunar |
|  Curtain from the Foulander.                                             |
| A Lunar Curtain will inflict MBarrier on all allies, which can be a huge |
|  help against Aero3, a devastating Attack used by the upcoming Rapps Boss. |
\                                                                          /

|                                                                          |
|  4TH ATTACK: Use Aero3 on Rnd Target; If Rapps' MP < 50, skip a turn     |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Rapps:                        |   POWER req for Overflow:     |
|                                          |                               |
| Rapps is definitely one of the tougher   |  Base Damage Overflow: 156    |
|  Bosses in the game, especially if you are  |  Rnd Var Overflow  3x: 104 |
|  facing it straight after acquiring the Tiny o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Bronco, with your Levels in the late 20's,                              |
|  early 30's.                                                             |
| You can fight Rapps at any point during the up until the Raid on Midgar; |
|  once you progress past that point, you will not be able to complete     |
```

| Yuffie's Sidequest, and Rapps will no longer be available to fight. You can, however, embark on the Pagoda Sidequest at any point in the game without restriction.

The best way to deal with Rapps is to put Barret in your party and set his Limit Break to Lv 1; open the Battle with Mindblow, and this will fully deplete Rapps' MP. This way it will not be able to use its deadly Aero3 Attack, which hits for roughly 1500 HP and can very easily insta-kill you. He normally uses Aero3 once every four turns, and only has enough MP for six castings.

Another option is to inflict Sadness on all of your characters, which will drop the damage of Aero3 to around 1100. Putting your characters in the Back Row will only halve Rapps' Physical Attacks; Aero3 uses the Magical formula and is not affect by Row value. Equip the Talisman on your Player with the lowest MDefence.

Rapps is one of a few Bosses that does not negate % Based Gravity Attacks, and as such you can exploit this. T/S Bombs are extremely effective, and can easily be stolen from the Flapbeat should you wish to empty your stock now. Each use of a T/S Bomb will drop Rapps' current HP by 50%, and using two straight off the bat will drop its HP down to 1500.

If you do not have any T/S Bombs, then Graviballs work half as well. Avoid using any Magical Battle Items such as Fire Veils etc, as Rapps' extremely high MDef stat means even the strongest Magic Battle Item (Dragon Scales) will only hit for less than 800 HP.

Physical Battle Items, on the other hand work fine given its low Defence; a Right Arm will hit for around 1400 HP, and an 8-inch Cannon will hit for around 2700 HP. You may have obtained one or two 8-inch Cannons from the Attack Squad Battles by now. Also, you could optionally exploit its vulnerability to Slow or Stop by using a Spider Web or Hourglass, respectively, to deal with its high Dexterity.

Equipping Cloud with the Yoshiyuki is a good idea, seeing as he will gain twice the damage output with one character dead, and thrice the output with two characters dead. Combine with the Champion Belt/Power Wrist, and Cloud will hit for a devastating amount.

Rapps is one of a number of enemies that are elevated above the ground, but will not take double damage from the Wind Element, nor will it nullify Earth.

-.-.-.

ENEMY ENCOUNTERS

NOTE - A special 'Pre-Emptive Strike' Flag is used for the five Pagoda Battles. Your first hit will hit for Double Damage as it would a normal Pre-Emp Strike; however, the enemy will be facing forwards, and the ATB gauge of both the Player and Enemy will start at a random value. The "Change Row" Command has also been disabled.

Valron

No Manipulate Attacks!

Gorkii's ATTACKS:

Attack 1: <Dive Kick> [22C]
Magical % Based
Target: One Opponent
Element: Hit
Att%: 100
Power: 8
Base Damage: 25% Max HP

Attack 2: Demi2 [02B]
Magical % Based
Target: One Opponent
Element: Gravity
Att%: 75
Power: 16
MP Cost: 33 MP
Base Damage: 50% Current HP

Attack 3: Barrier [00F]
Magical 0 Dam
Target: One Ally
Att%: Auto Hit
MP Cost: 16 MP
Reflectable
Status Inflict: Barrier (100%)

Attack 4: Reflect [011]
Magical 0 Dam
Target: One Ally
Att%: Auto Hit
MP Cost: 30 MP
Status Inflict: Reflect (100%)

Attack 5: Regen [003]
Magical 0 Dam
Target: One Ally
Att%: 255
MP Cost: 30 MP
Reflectable
Status Inflict: Regen (100%)

Gorkii's BATTLE PLAN: (Repeats)

SETUP: Start in Stage 2 (Flying - Default Row)
Set Evade to 25

1ST ATTACK:

Valron does not have Barrier: Use Barrier on Self

Valron has Barrier:

Valron does not have Regen: Use Regen on Self

Valron has Regen: Use Reflect on Self; If Valron has Reflect, use Demi2 on Rnd Target

```
|  2ND ATTACK: Use <Dive Kick> on Rnd Target                                  |
|                                                                            |
|  3RD ATTACK: 1/2 Chance use Demi2 on Rnd Target                            |
|              1/2 Chance use <Dive Kick> on Rnd Target                      |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Gorkii:                       |   POWER req for Overflow:       |
|                                          |                                 |
| Gorkii is the first of five bosses for   |  Base Damage Overflow: 156      |
|  Yuffie's Pagoda Quest. While the main part  |  Rnd Var Overflow  3x: 104      |
|  of her quest becomes locked off after you   |  Rnd Var Overflow  4x:  78      |
|  parachute into Midgar on Disc 2, these five |  Rnd Var Overflow  6x:  52      |
|  optional bosses can be fought at any point  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  in the game, even on Disc 3.                                              |
| The 'Game Over' Flag has be   disabled for all five battles. A special     |
|  Pre-Emptive Strike flag is also used, whereby the enemy will take Double  |
|  Damage from the first attack (provided the attack is Physical), however,  |
|  the enemy will be front-facing, and the ATB gauge will start at a random  |
|  value for both Yuffie and Gorkii. You will not be able to change Yuffie's |
|  Row for these Battles.                                                    |
| Gorkii, Shake, Chekhov and Staniv all have the same Strength, Defence,     |
|  Magic and MDefence values. The fact that each Boss is two Levels greater  |
|  than their predecessor means that each foe will be incrementally          |
|  stronger than the last.                                                   |
|                                                                            |
| Gorkii (spelt Gorky in the Field) is quite a tough Mini-Boss, and takes    |
|  after the Valron fought in Nibel/Rocket Area. He is the 'Power' sub-boss. |
|  Keep your HP above 50% at all times, as his Gravity Based Attacks can     |
|  wipe you out if you are not on guard.                                     |
| Do not bother with Big Guard, as MBarrier does not apply to % Based        |
|  Attacks. Equip the Sprint Shoes, Counter Attack Materia, and put Added    |
|  Effect + Time on your Weapon. Also equip Poison if you wish, although it  |
|  shouldn't be necessary. Equip Elemental+Choco/Mog on your weapon to       |
|  exploit Gorkii's weakness to Wind (as with all other 'elevated' enemies). |
|  Avoid Earth, and avoid Deathblow given its high Evade stat.               |
| You should also make use of the Destruct materia for this Battle. As soon  |
|  as Gorkii opens with Barrier, destroy the Barrier via the DeBarrier       |
|  ability. This means that your first attack will hit for quadruple damage, |
|  if you equip Wind on your Weapon as advised.                              |
| Unlike the Valron, Gorkii will never fall to the ground and will always be |
|  air-bourne. Short-ranged attacks will still be able to target him, which  |
|  doesn't matter anyway given that all of Yuffie's Weapons are long-ranged. |
| While Gorkii has a high MDefence value, Beta will still hit for +750, and  |
|  Trine will hit for +450. Yuffie's Physical Attacks will only be hitting   |
|  for around 250, so stick to powerful Enemy Skills.                        |
| Gorkii only has enough MP for 4-5 uses of its magic based Attacks, after   |
|  which the "skill power is used up" text string will be displayed each     |
|  time it tries to use any attack other than <Dive Kick>.                   |
| Gorkii is immune to Seizure, which isn't necessary seeing as there is no   |
|  way for the Player to inflict an enemy with Seizure. Gorkii is one of 86  |
|  enemies that are immune to Seizure. It is also immune to Peerless, along  |
|  with 104 other enemies.                                                   |
\                                                                            /

LOOKALIKES:

Skeeskee
Headbomber

No Manipulate Attacks!

Shake's ATTACKS:

Attack 1: <Beak> [1C5] Physical
Target: One Opponent
Element: Punch
Att%: 103
Power: 16
Base Damage: 284 HP

Attack 2: Rage Bomber [20E] Physical
Target: One Opponent
Element: Shout
Att%: 75
Power: 40
Base Damage: 710 HP
Status Inflict: Fury (71%)

Shake's BATTLE PLAN: (Repeats)

Shake does not have Poison: Use <Beak> on Rnd Target

Shake has Poison: 1/2 Chance use <Beak> on Rnd Target
1/2 Chance use Rage Bomber on Rnd Target

COUNTER: [All Physical and Magical Attacks]

Shake's HP > 50%: Do nothing
Shake's HP <= 50%: Use Rage Bomber on Last Attacker

Notes On Shake:

Shake is the second of five bosses for Yuffie's Pagoda Quest. While the main part of her quest becomes locked off after you parachute into Midgar on Disc 2, these five optional bosses can be fought at any point in the game, even on Disc 3.

The 'Game Over' Flag has been disabled for all five battles. A special

POWER req for Overflow:

Base Damage Overflow: 156
Rnd Var Overflow 3x: 104
Rnd Var Overflow 4x: 78
Rnd Var Overflow 6x: 52

| Pre-Emptive Strike flag is also used, whereby the enemy will take Double Damage from the first attack (provided the attack is Physical), however, the enemy will be front-facing, and the ATB gauge will start at a random value for both Yuffie and Shake. You will not be able to change Yuffie's Row for these Battles.

| Gorkii, Shake, Chekhov and Staniv all have the same Strength, Defence, Magic and MDefence values. The fact that each Boss is two Levels greater than their predecessor means that each foe will be incrementally stronger than the last.

| Shake is the 'Speed' sub-boss which after the Skeeskee in the Cosmo Canyon Area, and she is not hard at all. Simply open up with L4 Suicide, then finish it off with Physical Attacks. If you do not have the Enemy Skill yet, then use Poison and put Added Effect+Time on your Weapon.

| With the Champion Belt, Yuffie's Physical Attacks will hit for +400 HP. Alternatively, equip the Earring to inflict 850+ with Beta.

| When Shake is Poisoned it will use Rage Bomber more often, which can deal a fair amount of damage, so keep your HP up as well as your Big guard. Rage Bomber can also inflict you with Fury; if you are bothered by this, equip the Peace Ring.

| Shake will not have use for its MP, so you can use the Magic Hammer Enemy Skill if you have learned it to refill your MP, if you wish.

| Shake is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. Shake is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.

|                                                                                |
|  OPENING ATTACK:                                                               |
|                                                                                |
|   1/2 Chance: Skip a turn                                                      |
|   1/2 Chance: Use Stare Down on Rnd Target without Paralyzed; If all           |
|               have Paralyzed, select Rnd Target                                |
|                                                                                |
|  THEREAFTER:                                                                   |
|                                                                                |
|   Chekhov's HP  > 50%: Skip a turn                                             |
|   Chekhov's HP <= 50%: Use <Absorb> on Rnd Target with Paralyzed; If no        |
|                        Targets have Paralyzed, select Target with Highest      |
|                        HP                                                      |
|                                                                                |
|                                                                                |
|  COUNTER: [Magical Attacks Only]                                               |
|                                                                                |
|   Use Stare Down on Last Mag Attacker                                          |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Chekhov:                          |   POWER req for Overflow:       |
|                                              |                                 |
| Chekhov is the third of five bosses for      |  Base Damage Overflow: 156      |
|  Yuffie's Pagoda Quest. While the main part  |  Rnd Var Overflow  3x: 104      |
|  of her quest becomes locked off after you   |  Rnd Var Overflow  4x:  78      |
|  parachute into Midgar on Disc 2, these five |  Rnd Var Overflow  6x:  52      |
|  optional bosses can be fought at any point  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  in the game, even on Disc 3.                                                  |
| The 'Game Over' Flag has been disabled for all five battles. A special       |
|  Pre-Emptive Strike flag is also used, whereby the enemy will take Double    |
|  Damage from the first attack (provided the attack is Physical), however,    |
|  the enemy will be front-facing, and the ATB gauge will start at a random    |
|  value for both Yuffie and Chekhov. You will not be able to change           |
|  Yuffie's Row for these Battles.                                             |
| Gorkii, Shake, Chekhov and Staniv all have the same Strength, Defence,       |
|  Magic and MDefence values. The fact that each Boss is two Levels greater    |
|  than their predecessor means that each foe will be incrementally            |
|  stronger than the last.                                                     |
|                                                                              |
| Chekhov can be a nuisance, as he can inflict you with Paralyzed and then     |
|  replenish his HP while Yuffie is inactive. Equip the Jem Ring to protect    |
|  from this. He is the 'Magic' sub-boss, and takes after the Twin Brain in    |
|  Mt. Nibel.                                                                  |
| After Chekhov has used its Opening Attack (or not), he will not attack you   |
|  until its HP drops below 50%, or you attack it using a Magical ability.     |
|  Just stick to Physical Attacks, and make sure to have equipped Added        |
|  Effect+Time on your Weapon. Use Big Guard to give Yuffie Haste.             |
| You can try using Deathblow if you wish; a Lv 28 Yuffie would have a         |
|  58.75% chance to successfully perform a Deathblow against Chekhov,          |
```

```
|  assuming she has the Razor Ring and Diamond Bangle equipped (and has 39   |
|  Dexterity).                                                               |
| Chekhov is immune to Seizure, which isn't necessary seeing as there is no  |
|  way for the Player to inflict an enemy with Seizure. Chekhov is one of 86 |
|  enemies that are immune to Seizure. It is also immune to Peerless, along  |
|  with 104 other enemies.                                                   |
\                                                                            /

|   Staniv's BATTLE PLAN: (Repeats)                                          |
|                                                                            |
|  1ST ATTACK: Skip a turn                                                   |
```

2ND ATTACK: Use <Ironball> on Rnd Target with Paralyzed; If no Targets have Paralyzed, select Rnd Target with Sadness; If no Targets have Sadness, select Target with Highest Current HP

3RD ATTACK: Skip a turn

4TH ATTACK: Same as 2nd Attack

After 4th Attack: All Targets with Sadness:
Jump to 1st Attack for next turn

At least one Target without Sadness:
1/3 Chance: Jump to 5th Attack for next turn
2/3 Chance: Jump to 1st Attack for next turn

5TH ATTACK: Use War Cry on Rnd Target without Sadness; If no Targets have Sadness, select Rnd Target

COUNTER: [All Physical and Magical Attacks]

Staniv's HP > 12.5%: Do nothing

Staniv's HP <= 12.5%:

1ST COUNTER: 1/2 Chance use Iron Attack on All Targets
1/2 Chance do nothing

THEREAFTER: Do nothing

Notes On Staniv:

Staniv is the fourth of five bosses for Yuffie's Pagoda Quest. While the main part of her quest becomes locked off after you parachute into Midgar on Disc 2, these five optional bosses can be fought at any point in the game, even on Disc 3.

The 'Game Over' Flag has been disabled for all five battles. A special Pre-Emptive Strike flag is also used, whereby the enemy will take Double Damage from the first attack (provided the attack is Physical), however, the enemy will be front-facing, and the ATB gauge will start at a random value for both Yuffie and Staniv. You will not be able to change Yuffie's Row for these Battles.

Gorkii, Shake, Chekhov and Staniv all have the same Strength, Defence, Magic and MDefence values. The fact that each Boss is two Levels greater than their predecessor means that each foe will be incrementally stronger than the last.

Staniv is the 'Weapon' sub-boss, and can be a minor threat. Open with L4 Suicide, and when you do he will have a 50% chance of countering with his powerful Iron Attack 'Attack' which will hit for 600+ HP. If this chance failed, it will not have another chance of using Iron Attack.

Equip Elemental+Titan on you Armour if you are low-levelled, or use the

POWER req for Overflow:

Base Damage Overflow: 156
Rnd Var Overflow 3x: 104
Rnd Var Overflow 4x: 78
Rnd Var Overflow 6x: 52

```
|  Talisman. Sadness is also an option. Note that Iron Attack will only hit  |
|  for Split Damage if there is more than one target; seeing as Yuffie is    |
|  alone, the ability's damage output will *not* be reduced to 66%.          |
| Staniv takes after the Screamer from Mt. Nibel, and the AI Script is a     |
|  straight copy and paste from the Screamer, which is why there is an       |
|  obsolete check for the Paralyzed Status.                                  |
| If you have learned Magic Hammer then you could use it to replenish your   |
|  MP for the upcoming Godo fight. Beta will hit Staniv for 750+ HP.         |
| Staniv is immune to Seizure, which isn't necessary seeing as there is no   |
|  way for the Player to inflict an enemy with Seizure. Staniv is one of 86  |
|  enemies that are immune to Seizure. It is also immune to Peerless, along  |
|  with 104 other enemies.                                                   |
\                                                                            /

|                      1/4 Chance jump to 7th Attack for next turn          |
|                                                                           |
|                                                                           |
|  3RD ATTACK:                                                              |
|                                                                           |
|   Yuffie does not have Reflect AND Yuffie does not have Sleep:            |
|                                                                           |
|     Transform to Stage 0 (Human), use <Sleepel> on Rnd Target*            |
|                                                                           |
|   Yuffie has Reflect OR Yuffie has Sleep:                                 |
|                                                                           |
|    Transform to Stage 2 (Beast), use Beast Sword on All Targets           |
|                                                                           |
|      After 3rd Attack: 1/3 Chance jump to 1st Attack for next turn        |
|                        2/3 Chance jump to 2nd Attack for next turn        |
|                                                                           |
|                                                                           |
|  4TH ATTACK:                                                              |
|                                                                           |
|   Yuffie does not have Reflect AND Yuffie does not have Small:            |
|                                                                           |
|    Transform to Stage 0 (Human), use <Mini> on Rnd Target*                |
|                                                                           |
|   Yuffie has Reflect OR Yuffie has Small:                                 |
|                                                                           |
|    Transform to Stage 2 (Beast), use Beast Sword on All Targets           |
|                                                                           |
|      After 4th Attack: 2/3 Chance jump to 1st Attack for next turn        |
|                        1/3 Chance jump to 2nd Attack for next turn        |
|                                                                           |
|                                                                           |
|  5TH ATTACK: Transform to Stage 3 (Cheater), use Drain on Target with     |
|               Highest Current HP*                                         |
|                                                                           |
|    After 5th Attack: 1/4 Chance jump to 1st Attack for next turn          |
|                      1/4 Chance jump to 2nd Attack for next turn          |
|                      1/4 Chance jump to 6th Attack for next turn          |
|                      1/4 Chance jump to 7th Attack for next turn          |
|                                                                           |
|                                                                           |
|  6TH ATTACK:                                                              |
```

Yuffie does not have Reflect:

Transform to Stage 3 (Cheater), use Bio2 on All Targets

Yuffie has Reflect:

Transform to Stage 2 (Beast), use Beast Sword on All Targets

After 6th Attack:

Godo's HP > 80%: 4/5 Chance jump to 2nd Attack for next turn
1/5 Chance jump to 8th Attack for next turn

Godo's HP <= 80%: 3/4 Chance jump to 2nd Attack for next turn
1/4 Chance jump to 8th Attack for next turn

Godo's HP <= 60%: 2/3 Chance jump to 2nd Attack for next turn
1/3 Chance jump to 8th Attack for next turn

Godo's HP <= 40%: 1/2 Chance jump to 2nd Attack for next turn
1/2 Chance jump to 8th Attack for next turn

7TH ATTACK: Transform to 2nd Stage (Beast), use Trine on All Targets*

After 7th Attack:

Godo's HP > 80%: 4/5 Chance jump to 1st Attack for next turn
1/5 Chance jump to 8th Attack for next turn

Godo's HP <= 80%: 3/4 Chance jump to 1st Attack for next turn
1/4 Chance jump to 8th Attack for next turn

Godo's HP <= 60%: 2/3 Chance jump to 1st Attack for next turn
1/3 Chance jump to 8th Attack for next turn

Godo's HP <= 40%: 1/2 Chance jump to 1st Attack for next turn
1/2 Chance jump to 8th Attack for next turn

8TH ATTACK: Transform to Stage 3 (Cheater), use Demi3 on All Target*

After 8th Attack: 1/2 Chance jump to 1st Attack for next turn
1/2 Chance jump to 2nd Attack for next turn

COUNTER: [All Physical and Magical Attacks]

Godo has Reflect OR Godo's HP > 40% OR Godo's MP < 24:

Do nothing

Godo does not have Reflect AND Godo's HP <= 40% AND Godo's MP > 24:

Transform to Stage 1 (Human)
Yuffie's HP > 20%: Use Cure2 on Self
Yuffie's HP <= 20%: 1/2 Chance use Cure2 on Yuffie
1/2 Chance use Cure2 on Self

Notes On Godo:	POWER req for Overflow:
Godo is the fifth and final bosses for Yuffie's Pagoda Quest. While the main part of her quest becomes locked off after you parachute into Midgar on Disc 2, these five optional bosses can be fought at any point in the game, even on Disc 3.	Base Damage Overflow: 156 Rnd Var Overflow 3x: 104 Rnd Var Overflow 4x: 78 Rnd Var Overflow 6x: 52
The 'Game Over' Flag has been disabled for all five battles, and for Godo only, the Battle victory 'Fanfare' theme will not play, nor will Yuffie perform her victory pose.	
A special Pre-Emptive Strike flag is also used, whereby the enemy will take Double Damage from the first attack (provided the attack is Physical), however, the enemy will be front-facing, and, the ATB gauge will start at a random value for both Yuffie and Godo. You will not be able to change Yuffie's Row for these Battles.	
Godo's Strength, Defence, Magic and MDefence are all weaker than the four previous Mini-Bosses, however, the fact that he is five levels greater than Staniv gives him the edge over his predecessors.	
Be warned - the 'Omni' boss Godo is *hard*, especially if you are facing him straight after you have obtained the Tiny Bronco. Just be very mindful of the fact that Godo is one of three enemies that use the Enemy Skill Trine, so if you missed it from the Materia Keeper then you can learn it now. You will also be able to learn it from the Stilva in Gaea's Cliffs later on.	
While you will be able to learn Trine for three of the four Enemy Skills in the game, you will not be able to learn it for the fourth if you defeat Godo before obtaining the fourth Enemy Skill Materia. Maxing out four Enemy Skills has no practical use; it is only necessary for those with a completionist's nature.	
Defence is paramount for the Godo Battle; Put Elemental+Gravity on your armour to defend from Demi3; equip the Peace Ring to defend from Confusion; equip Added Effect+Transform on your Armour to defend from Small. Alternatively, equip the Bolt Ring if you have obtained it to defend from Trine, seeing as it will hit for 900+ HP.	
Godo is one of a few Bosses in the game that does *not* Nullify the Gravity Element, so you should exploit this. Use the Enemy Skill Laser if you have it, failing that use Demi2 and T/S Bombs to deal 50% of its current HP. Graviballs and Demi works well, also.	
Open with Big Guard, and make sure that you have Barrier and MBarrier up at all times. You should attempt to inflict Godo with Poison as soon as the battle begins, then try to inflict him with Slow (Spider Webs). If you have learned Magic Hammer, you could spam the E Skill to drain Godo's MP, meaning he'll only be able to use Beast Sword.	
While his 'All Opponent' targeting attacks are subject to Split Damage, the damage output will *not* be subject to a 33% penalty, seeing as only one target exists.	
The biggest problem with Godo is the fact that he will start using Cure2 on himself as a Counter Attack once his HP drops below 40%. Once this happens, you will want to spam Beta to hit him for about 1400 HP worth of Damage, which is more than he is able to heal for. You should have also inflicted him with Poison by this point. He will sometimes cure Yuffie if her HP is less than 20%.	
If you had obtained a Mirror from the Mirage in the Shinra Mansion, then you could inflict Godo with Reflect to stop him from using Cure2 altogether.	
Once you defeat Godo you will obtain Yuffie's Lv Limit Break Manual, the All Creation. If you wish to learn how to dupe yourself a copy of All Creation, explore the "Top Farming Locations" section further below.	

| Godo is immune to Seizure, which isn't necessary seeing as there is no way |
| for the Player to inflict an enemy with Seizure. Godo is one of 86 |
| enemies that are immune to Seizure. It is also immune to Peerless, along |
| with 104 other enemies. |

|                         2/3 Chance jump to 1st Attack for next turn      |
|                                                                          |
|     Tonadu's HP <= 25%: 1/2 Chance jump to 4th Attack for next turn      |
|                         1/2 Chance jump to 1st Attack for next turn      |
|                                                                          |
|                                                                          |
|  4TH ATTACK: Use Great Gale on All Targets                               |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Tonadu:                       |   POWER req for Overflow:     |
|                                          |                               |
| Tonadu is found in Battle Square:        |  Base Damage Overflow: 154    |
|  Set - 3  (After Highwind)     Battle - 2|  Rnd Var Overflow  3x: 103    |
|                                          o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Attack Great Gale is subject to Split                                |
|  Damage for the damage calculations; however, the Status inflicted via   |
|  Great Gale is *not* subject to Split Damage.                            |
| The Tonadu is easily defeated, and drops valuable Bird Wings which use the |
|  Wind Element for 1040 Base Damage; very handy for the Battle Square. You |
|  do not need to steal them as they have a 100% drop rate.                |
| Avoid using Deathblow against the Tonadu.                                |
| Equip Elemental+Choco/Mog on your weapon to exploit the Tonadu's weakness |
|  to Wind (as with all other 'elevated' enemies). Avoid Earth.            |
| The Tonadu cannot be Back-Attacked or Side-Attacked, meaning that one    |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.          |
\                                                                          /

Element: Hit
Att%: 100
Power: 16
Base Damage: 259 HP
Berserk Attack

Attack 2: Petrified Frog [26E] Magical 0 Dam
Target: One Opponent
Att%: 95
MP Cost: 45 MP
Status Inflict: Frog (83%), Slow-numb

Under Lizard's BATTLE PLAN: (Repeats)

OPENING ATTACK: 1/4 Chance start from 1st Attack
1/4 Chance start from 2nd Attack
1/4 Chance start from 3rd Attack
1/4 Chance start from 4th Attack

1ST ATTACK: Use <Bodyblow> on Rnd Target without Petrify
2ND ATTACK: Use <Bodyblow> on Rnd Target without Petrify
3RD ATTACK: Use <Bodyblow> on Rnd Target without Petrify

After 3rd Attack: 1/2 Chance jump to 4th Attack for next turn
1/4 Chance jump to 1st Attack for next turn
1/4 Chance jump to 2nd Attack for next turn

4TH ATTACK: Use Petrified Frog on Rnd Target without Petrify AND without Slow-numb; If all Targets have Slow-numb, use <Bodyblow> on Rnd Target without Petrify

Notes On Under Lizard:

Under Lizard is found in Battle Square: Set - 3 (After Highwind) Battle - 2

Similar to the Gagighandi, the Under Lizard can inflict you with Slow-numb, which means a Game Over once all three characters become Petrified. They can also inflict you with Frog, making it difficult to cure yourself of the Status.

The good news is that Remedies make an easy steal; a Lv 35 Cloud would have a 46.88% chance of stealing from the Under Lizard. Alternatively, you can make use of Softs. Equip the Jem Ring to protect from Petrify. White Wind will also help, as will Esuna (Lv 2 Heal Materia).

The Under Lizard only has enough MP for three casts of Petrified Frog, after which the "skill power is used up" text string will be displayed

POWER req for Overflow:

Base Damage Overflow: 153
Rnd Var Overflow 3x: 102
Rnd Var Overflow 4x: 77
Rnd Var Overflow 6x: 51

```
|  each time it tries to use that attack.                                    |
| If the chance to inflict you with a Status passes when Petrified Frog is   |
|  used, both Statuses will be inflicted at once.                            |
| Two casts of Trine or one cast of Beta should be enough to kill the Under  |
|  Lizard.                                                                   |
| The Under Lizard allows for a Pre-Emptive Strike for the encounters in the |
|  Woodlands area, however, you cannot Pre-Emp them in the Temple of The     |
|  Ancients.                                                                 |
\                                                                            /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Dual Horn:                       |   POWER req for Overflow:  |
|                                             |                            |
| Dual Horn is found in Battle Square:        |  Base Damage Overflow: 160 |
|  Set - 3  (After Highwind)     Battle - 1   |  Rnd Var Overflow  3x: 107 |
|                                             |  Rnd Var Overflow  4x:  80 |
| The Dual Horn has fairly high HP. It will   |  Rnd Var Overflow  6x:  54 |
|  take two casts of Bets followed by a       o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Physical Attack to kill them, luckily their                             |
|  Attacks do not deal much damage.                                        |
| A flaw exists with the Dual Horn's AI Script. The Attack [No Name] is a  |
|  dummied out action which costs more MP than it has. If it tries to use  |
|  the Attack, the "skill power is used up" text string will be displayed  |
|  with each attempt.                                                      |
| If you were to hack the Dual Horn's MP to give it enough to use the      |
|  ability, then the animation would be the same as the Horn Lift, although|
|  it could also be used on another Enemy.                                 |
| Pepio Nuts are the worst type of Nut for breeding, so don't bother trying|
|  to acquire any.                                                         |
\                                                                          /

Slaps' ATTACKS:	No Manipulate Attacks!

Attack 1: Bug Needle	Target: One Opponent	Status Inflict:	
[205] Magical	Element: Punch	Poison (87%)	
	Att%: 120	Sadness	
	Power: 1		
	Base Damage: 23 HP		
Attack 2: Berserk Needle	Target: One Opponent	Status Inflict:	
[206] Magical	Element: Punch	Berserk (47%)	
	Att%: 120		
	Power: 1		
	Base Damage: 23 HP		
Attack 3: Paralyzer Needle	Target: One Opponent	Status Inflict:	
[207] Magical	Element: Punch	Paralyzed (19%)	
	Att%: 120		
	Power: 1		
	Base Damage: 23 HP		

Slaps' BATTLE PLAN: (Repeats)

3/4 Chance: Use Berserk Needle on Rnd Target
1/8 Chance: Use Bug Needle on Rnd Target
1/8 Chance: Use Paralyzer Needle on Target with Lowest Current HP; If Paralyzer Needle been used once, use Berserk Needle on Rnd Target

Notes On Slaps:	POWER req for Overflow:
Slaps is found in Battle Square: Set - 3 (After Highwind) Battle - 2	Base Damage Overflow: 150 Rnd Var Overflow 3x: 100 Rnd Var Overflow 4x: 75 Rnd Var Overflow 6x: 50

The Slaps are a nuisance at most; one blast of Trine should be enough to wipe them out in one.

Whenever a Berserk attempt is made on the Player, it will always have a 100% success rate. This means that you may easily find yourself with all three characters inflicted with Berserk, which is not the worst thing in the world of Gaia to be inflicted with. They can also inflict you with Paralyzed, although they can only do so once per Battle.

The Slaps' low HP means that they will not last very long, and their low damage output will be very unlikely to kill you. Equip the Peace Ring to defend from Berserk and Sadness. If you encounter them in the Battle Square, then make sure you have your Ribbon equipped; if you have received the 'Accessory Broken' handicap, then consider quitting the Battle if they manage to inflict you with Berserk.

The Slaps has no use for its MP, so feel free to use Magic Hammer on them to replenish your MP.

Equip Elemental+Choco/Mog on your weapon to exploit the Slaps' weakness to Wind (as with all other 'elevated' enemies). Avoid Earth.

APPEARANCE RATE:	LOOKALIKES:
Woodlands Area Jungle 29%	Frozen Nail
Temple of The Ancients "Stairs And Vines" Maze 58%	

Kelzmelzer's ATTACKS:

Manip Attack 1: Claw
Manip Attack 2: Liquid poison

Attack 1: <Claw> [124] Physical
Target: One Opponent
Element: Hit
Att%: 110
Power: 16
Base Damage: 142 HP
Berserk Attack

Attack 2: Liquid poison [17F] Physical 0 Dam
Target: One Opponent
Element: Poison
Att%: 100
Status Inflict: Poison (100%)

Kelzmelzer's BATTLE PLAN: (Repeats)

*A 'Group Enemy' is an Enemy that is NOT another Kelzmelzer, and also shares the same 'Group ID' Flag as the Kelzmelzer running the AI Script; Kelzmelzer 'A' = Group A, 'B' = Group B, 'C' = Group C etc.

At least one 'Group Enemy' alive*:

1/4 Chance: Use Liquid poison on Rnd Target
3/4 Chance: Use <Claw> on Rnd Target

All 'Group Enemies' dead*:

3/4 Chance: Use Liquid poison on Rnd Target
1/4 Chance: Use <Claw> on Rnd Target

Notes On Kelzmelzer:

POWER req for Overflow:

| Kelzmelzer is found in Battle Square: Set - 3 (After Highwind) Battle - 2

With low HP and low damage output, the Kelzmelzer is not a threat. Use Trine to kill them in one. Avoid Deathblow.

The Kelzmelzer will use Liquid poison more often if it is the last enemy alive in its 'Group'. If you were fighting the 1x Kelzmelzer and 2x Toxic Frog Encounter, then the Kelzmelzer A and Toxic Frog A would share the same Flag; Toxic Frog [B] would not share its Flag with another enemy.

An error occurs in the 2x Kelzmelzer, 2x Toxic Frog encounter on the 1st 'Maze' screen in the Temple of The Ancients (Formation ID #634). The Kelzmelzer [A] should have covered the Toxic Frog [A], and the same goes for both [B] enemies. The cover Flag has been set incorrectly, and the Toxic Frog are not covered.

The Kelzmelzer is considered to be a 'Powerful' enemy, and as such the "Pre-Emp" Flag should have been disabled for encounters that contain the Kelzmelzer. An oversight means that you have a chance to initiate a Pre-Emptive Strike against the Kelzmelzer in the Jungle terrain within the Woodlands Area (Formation ID #190). It can also be Side-Attacked.

|    Last Attack on Toxic Frog was Magical: Use Frog Song on Last Attacker   |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Toxic Frog:                    |   POWER req for Overflow:    |
|                                           |                              |
| Toxic Frog is found in Battle Square:     |  Base Damage Overflow: 147   |
|  Set - 3  (After Highwind)     Battle - 3 |  Rnd Var Overflow  3x:  98   |
|                                           o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| With low HP and low Def, the Toxic Frog pose                               |
|  very little threat. You may be strong enough to kill them in one with     |
|  your Physical Attack, failing that Trine or All+Ice2 will take care of    |
|  them.                                                                     |
| You could learn Frog Song if you missed it from the Touch Me, although     |
|  it is not a very helpful Skill to learn. You can always get it from the   |
|  Touch Me at a later date.                                                 |
| Impalers will inflict an Enemy with Frog, and can be bought from Gongaga.  |
|  If you did wish to steal them, then a Lv 36 Cloud would have a 51.56%     |
|  chance of stealing from the Toxic Frog.                                   |
| The Confusion check performed by the Toxic Frog is for the Battle with the |
|  Jemnezmy in Room I.                                                       |
| An error occurs in the 2x Kelzmelzer, 2x Toxic Frog encounter on the 1st   |
|  'Maze' screen in the Temple of The Ancients (Formation ID #634). The      |
|  Kelzmelzer [A] should have covered the Toxic Frog [A], and the same goes  |
```

```
|  for both [B] enemies. The cover Flag has been set incorrectly, and the    |
|  Toxic Frog are not covered.                                               |
| The Toxic Frog cannot be Back-Attacked or Side-Attacked, meaning that one  |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.            |
| The Toxic Frog is encountered in an area that cannot be revisited; once    |
|  you progress past a certain point in the game, you can no longer fight    |
|  the enemy (although you can still encounter it in the Battle Square).     |
\                                                                            /

Attack 4: Light Shell	Target: One Opponent — Can't Cover
[36A] Physical	Element: Shout
	Att%: 95
	Power: 16
	Base Damage: 298 HP

Doorbull's BATTLE PLAN: (Repeats)

Doorbull has Poison OR Doorbull has Confusion:

1/2 Chance: Use Fang on Rnd Target
1/2 Chance: Use Fire Shell on Rnd Target

Doorbull does not have Poison AND Doorbull does not have Confusion:

1ST ATTACK: Use <Claw> on Rnd Target
2ND ATTACK: Use Fang on Rnd Target
3RD ATTACK: Use Fire Shell on Rnd Target
4TH ATTACK: Use Light Shell on Rnd Target

Notes On Doorbull:

Doorbull is found in Battle Square:
Set - 3 (After Highwind) Battle - 3

POWER req for Overflow:

Base Damage Overflow: 159
Rnd Var Overflow 3x: 106

The Doorbull is a fairly strong randomly encountered Enemy. His high HP means that he can take a few hits before being defeated. Avoid Beta; one cast of Aqualung followed by Trine should bring its HP to critical. Avoid Vincent's Lv 1 Limit Break Galian Beast, as his Beast Flare Attack will restore the Doorbull's HP to full.

Your Dexterity should be high enough now to make Deathblow effective; you should have approximately a 54% chance to connect with Deathblow against the Doorbull.

You can exploit the Doorbull's vulnerability to most Statuses, just avoid Confusion given that it will always attack itself, thereby curing itself of the Status.

The Doorbull is one of six enemies that are affected by the 'Berserk Glitch', which means that they have no assigned Attack to use when they are inflicted with Berserk. As such the "skill power is used up" text string will be displayed every turn, seeing as the Attack they are trying to use costs 65,535 MP!

The Doorbull is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. The Doorbull is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.

The Doorbull cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

The Doorbull is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy (although you can still encounter it in the Battle Square).

MAPS:	APPEARANCE RATE:	LOOKALIKES:
Temple of The Ancients Bottom of Clock	N/A	Ark Dragon
Temple of The Ancients Mural Room	57%	

Ancient Dragon's ATTACKS:

Manip Attack 1: Horn
Manip Attack 2: Southern Cross

Attack 1: <Horn> [1E5] Physical
Target: One Opponent
Element: Punch
Att%: 100
Power: 18
Base Damage: 328 HP
Berserk Attack

Attack 2: Southern Cross [26D] Physical
Target: One Opponent
Element: Ice
Att%: 95
Power: 32
Base Damage: 584 HP
Can't Cover

Ancient Dragon's BATTLE PLAN: (Repeats)

1ST ATTACK: Use <Horn> on Rnd Target
Follow-Up: 1/3 Chance use <Horn> on Rnd Target
2/3 Chance do nothing

2ND ATTACK: Same as 1st Attack
3RD ATTACK: Same as 1st Attack

After 3rd Attack: 1/2 Chance jump to 4th Attack for next turn
1/4 Chance jump to 1st Attack for next turn
1/4 Chance jump to 2nd Attack for next turn

4TH ATTACK: Use Southern Cross on Rnd Target

After 4th Attack: 1/2 Chance jump to 1st Attack for next turn
1/2 Chance jump to 2nd Attack for next turn

Notes On Ancient Dragon:

POWER req for Overflow:

| Ancient Dragon is found in Battle Square: | Base Damage Overflow: 167 |
| Set - 3 (After Highwind) Battle - 3 | Rnd Var Overflow 3x: 112 |
| o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Ancient Dragon has decent EXP/AP/Gil values, and can be great to level up against in the Mural Room if you are struggling against Demons Gate. Their attacks do moderate damage at best, and they shouldn't be a problem so long as you keep an eye on your HP. |
| The Ancient Dragon is one of a few enemies that take Double Damage from Gravity based attacks. Use the Enemy Skill Laser, Demi2 or a T/S Bomb to kill them in one hit. If you don't have any Gravity based abilities available, stick to Physical attacks; their high MDef means that Beta will only hit for twice as much as your normal attacks. |
| The Ancient Dragon has no use for its MP, so feel free to replenish you MP supply using Magic Hammer (or just use the Temple Guardians). |
| The Ancient Dragon is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. The Ancient Dragon is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies. |
| The Ancient Dragon cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage. |
| Equip Elemental+Choco/Mog on your weapon to exploit the Ancient Dragon's weakness to Wind (as with all other 'elevated' enemies). Avoid Earth. |
| The Ancient Dragon is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy (although you can still encounter it in the Battle Square). |

[004] Magical 0 Dam	Att%: 255	Status Remove:
	MP Cost: 3 MP	Poison (100%)
Attack 3: Fascination	Target: One Opponent	Status Inflict:
[37A] Magical 0 Dam	Att%: 90	Confusion (100%)
	MP Cost: 5 MP	
Attack 4: Cold Breath	Target: One Opponent	
[37B] Magical	Element: Ice	
	Att%: 90	
	Power: 6	
	MP Cost: 12 MP	
	Base Damage: 130 HP	

Jemnezmy's BATTLE PLAN: (Repeats)

1ST ATTACK:

No Targets with Frog: Use 2nd Attack

At least one Target with Frog:

Select Rnd Target with Frog AND without Confusion; If all Targets have Confusion, select Rnd Target with Frog

Use Cold Breath on selected Target

2ND ATTACK:

1/2 Chance: Skip a turn

1/2 Chance: Select Rnd Target without Confusion; If all Targets have Confusion, select Rnd Target

Target is Cloud, Barret, Red XIII, Vincent, Cait Sith OR Cid:
Use Fascination on selected Target

Target is Tifa, Aeris OR Yuffie:
Use Cold Breath on selected Target

COUNTER: [All Physical and Magical Attacks]

Last Attacker does not have Frog OR Poison: Do nothing

Last Attacker has Frog AND Jemnezmy's MP > 13: Use Toad on Last Attacker

Last Attacker has Frog AND Jemnezmy's MP <= 13, OR Last Attacker does not have Frog:

Use Poisona on Last Attacker; If Jemnezmy's MP < 3, do nothing

Notes On Jemnezmy:	POWER req for Overflow:

Jemnezmy is found in Battle Square: Set - 3 (After Highwind) Battle - 3	Base Damage Overflow: 156 Rnd Var Overflow 3x: 104

While Jemnezmy is technically not considered to be a Mini-Boss, you cannot randomly encounter her, making her a unique Enemy (along with the 8 eye). You can, however face her in the Battle Square.

While the Jemnezmy cannot inflict you with much damage, she can inflict the male party members with Confusion; make sure to have either the Peace Ring, Ribbon or Added Effect+Mystify one of of your male characters.

The Jemnezmy performs a check during her Counter Script to see if any player is inflicted with Poison, which is illogical seeing as neither the Jemnezmy nor the Toxic Frog can inflict you with Poison. The only way this check could pass is if the Player were to inflict themselves with the Status.

The MP check only occurs for the Counter Script; if Jemnezmy were to run out of MP, then the "skill power is used up" text string would be displayed each time she tried to use one her regular attacks.

The Jemnezmy and 8 eye are the only two enemies in the game that take instant Death from the Poison Element. Cast Bio to end the Battle quickly. Failing that, use L4 Suicide and follow up with a normal Attack.

If the Attack 'Toad' is being used on a Player that is already inflicted with Frog, the Status toggle success rate will be 100%.

The Jemnezmy cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

Temple of The Ancients Room III

LOOKALIKES:

No Manipulate Attacks!

8 eye's ATTACKS:

Attack 1: <Eyesight>	Target: One Opponent	Attacks MP
[275] Magical % Based	Element: None Att%: 255 Power: 24 Base Damage: 75% Current MP	
Attack 2: <Eyesight> [276] Magical % Based	Target: One Opponent Element: None Att%: 255 Power: 24 Base Damage: 75% Current HP	
Attack 3: <Eyesight> [277] Magical	Target: One Opponent Element: None Att%: 255 Power: 48 Base Damage: 1620 HP	
Attack 4: <Eyesight> [278] Magical 0 Dam	Target: One Opponent Att%: 255	Status Inflict: Darkness (100%) Slow

8 eye's BATTLE PLAN: (Repeats)

STAGE 1:

No Targets with Darkness OR no Targets have Slow:

Use <Eyesight> 1620 HP Base Damage variant on Target with Highest Current HP

STAGE 2:

At least one Target has Darkness AND at least one Target has Slow:

1ST ATTACK: Use <Eyesight> 75% Current HP variant on Rnd Target with Darkness OR Slow

2ND ATTACK: Use <Eyesight> 1620 HP Base Damage variant on Target with Highest HP

COUNTER: [All Physical and Magical Attacks]

Attack was Physical:

Use <Eyesight> Status inflicting variant on Last Phys Attacker, jump to 2nd Attack for next turn if in Stage 2

Attack was Magical:

Use <Eyesight> 75% Current MP variant on last Mag Attacker, jump to 2nd Attack for next turn if in Stage 2

Notes On 8 eye:	POWER req for Overflow:
8 eye is found in Battle Square: Set - 3 (After Highwind) Battle - 3	Base Damage Overflow: 226 Rnd Var Overflow 3x: 151

| o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| While 8 eye is technically not considered to be a Mini-Boss, you cannot randomly encounter it, making it a unique Enemy (along with Jemnezmy). You can, however face it in the Battle Square.
| The 8 eye and Jemnezmy are the only two enemies in the game that take instant Death from the Poison Element. Cast Bio to end the Battle quickly.
| You would be wise to try to make use of your new Morph Materia to obtain two Magic Sources, although getting them won't be easy. Remove the Counter Attack Materia, and make sure to collect the Ribbon before battling the 8 eye; put the Ribbon on the Player with the Morph Materia, and put Added Effect+Time on their Weapon.
| Keep Big Guard up at all times. If the Player with the Ribbon is the only Player to attack them physically, then the 8 eye can never inflict your Players with Darkness/Slow, meaning they will always use their powerful [277] Attack (1620 HP Base Damage), and will never move into Stage 2.
| You should open with Trine, then follow up with Matra Magic. The 8 eye will retaliate by depleting the MP of its attacker; do not try to use Magic Hammer, as that will also trigger the Counter script to use the MP depleting Attack. Follow up using Morph, which will hit for around 40 HP.
| The 8 eye has the same Defence value as Carry Armour, Jamar Armor and Bizarro-Sephiroth, meaning at will take very low damage from your Physical Attacks, especially if you are using Morph. Just chip away at until they die; if you manage to inflict one of them with Stop, you can then use Magic Hammer if you wish to replenish your MP.
| If you wish do dupe yourself a finite amount of Magic Sources later on in the game, then you can do so in the Battle Square. Explore the "Top Farming Locations" section further below for more info on Source Duping against multiple targets. Note that you will need Counter+Morph on Yuffie, and you will also need to cast Stop on one of the 8 eyes.
| You can also use the 'Repeat Boss Glitch to encounter the 8 eye twice while in the Temple of The Ancients; again, visit the "Top Farming Locations" for more info.
| The 8 eye cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

|                                  Power: 20                                   |
|                              Base Damage: 930 HP                             |
| - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - -  |
|   Red Dragon's BATTLE PLAN: (Repeats)                                        |
|                                                                              |
|  OPENING ATTACK: 1/4 Chance use <Dragon Fang> on Rnd Target                  |
|                  3/4 Chance use Red Dragon Breath on Rnd Target              |
|                                                                              |
|  THEREAFTER: 1/2 Chance use <Dragon Fang> on Rnd Target                      |
|              1/4 Chance use <Tail Attack> on Rnd Target                      |
|              1/4 Chance use Red Dragon Breath on Rnd Target                  |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Red Dragon:                        |   POWER req for Overflow:    |
|                                               |                              |
| The Red Dragon is a moderately tough Boss,    |  Base Damage Overflow: 164   |
|  but is no where near as difficult as the     |  Rnd Var Overflow  3x: 109   |
|  upcoming Demons Gate Battle.                 o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| Its <Dragon Fang> Attack is its strongest                                    |
|  Attack, and can kill you in one hit if your HP is low. Maintain Big Guard   |
|  at all times, and equip the Champion Belt and Protect Vest to increase      |
|  your Defence. If you are under-levelled, then put all of your Players in    |
|  the Back Row and inflict them with Sadness (Tranquilizers). You could       |
|  also equip the Fire Ring if you wished to defend against its Red Dragon     |
|  Breath Attack.                                                              |
| Inflict the Red Dragon with Poison to begin with, then try to inflict it     |
|  with Slow by either using Spider Webs or by using Added Effect+Time on      |
|  someone's Weapon.                                                           |
| The Red Dragon's high MDefence stat means that Trine will only hit for       |
|  around 200 HP more than your Physical Attacks, which should deal roughly    |
|  400+ HP. Avoid using Beta; Aqualung will hit for around 850+.               |
| You should have approximately a 55% chance to succeed with a Deathblow       |
|  attempt. The Red Dragon has no use for its MP, so feel free to Magic        |
|  Hammer it up to three times. Do not use  Vincent's Lv 1 Limit Break         |
```

```
|  Galian Beast, as his Beast Flare Attack will restore the Red Dragon's HP. |
| The Red Dragon is immune to Seizure, which isn't necessary seeing as there |
|  is no way for the Player to inflict an enemy with Seizure. The Red Dragon |
|  is one of 86 enemies that are immune to Seizure. It is also immune to     |
|  Peerless, along with 104 other enemies.                                   |
\                                                                            /

```

	Base Damage: 2115 HP
Attack 5: <Advance>	Target: Self — Transformation
[216] Physical 0 Dam	Att%: Auto Hit — To Front Row
Attack 6: <Retreat>	Target: Self — Transformation
[217] Physical 0 Dam	Att%: Auto Hit — To Back Row

Demons Gates' BATTLE PLAN: (Repeats)

OPENING ATTACK: 1/5 Chance start from 1st Attack
1/5 Chance start from 2nd Attack
1/5 Chance start from 3rd Attack
1/5 Chance start from 4th Attack
1/5 Chance start from 5th Attack

1ST ATTACK: Use <Falling Rocks> on Rnd Target without Slow-numb AND without Petrify; If all Targets have Slow-numb, skip a turn

Follow-Up:

Demons Gates' HP > 75%: 1/8 Chance repeat 1st Attack
7/8 Chance do nothing

Demons Gates' HP <= 75%: 1/4 Chance repeat 1st Attack
3/4 Chance do nothing

Demons Gates' HP <= 50%: 1/3 Chance repeat 1st Attack
2/3 Chance do nothing

Demons Gates' HP <= 25%: 1/2 Chance repeat 1st Attack
1/2 Chance do nothing

2ND ATTACK: Same as 1st Attack

3RD ATTACK: Use Cave-in on All Targets without Slow-numb AND without Petrify; If all Targets have Slow-numb, skip a turn

4TH ATTACK:

All Targets with Slow-numb OR Petrify: Skip a turn

At least one Target without Slow-numb AND at least one Target without Petrify:

*Use Attack on Rnd Target without Slow-numb AND without Petrify

Demons Gates' HP > 75%: 1/8 Chance: Use Petrif-Eye on Rnd Target*
7/8 Chance: Use <Falling Rocks> on Rnd Target*

Demons Gates' HP <= 75%: 1/4 Chance: Use Petrif-Eye on Rnd Target*
3/4 Chance: Use <Falling Rocks> on Rnd Target*

Demons Gates' HP <= 50%: 1/3 Chance: Use Petrif-Eye on Rnd Target*
2/3 Chance: Use <Falling Rocks> on Rnd Target*

```
|     Demons Gates' HP <= 25%: 1/2 Chance: Use Petrif-Eye on Rnd Target*     |
|                              1/2 Chance: Use <Falling Rocks> on Rnd Target*|
|                                                                            |
|                                                                            |
|  5TH ATTACK: Use <Advance> on Self, move Self to Front Row                 |
|                                                                            |
|    After 5th Attack: 1/3 Chance jump to 6th Attack for next turn           |
|                      2/3 Chance jump to 7th Attack for next turn           |
|                                                                            |
|                                                                            |
|  6TH ATTACK: Skip a turn                                                   |
|                                                                            |
|                                                                            |
|  7TH ATTACK: Use Demons Rush on All Targets without Petrify                |
|   Follow-Up: Use <Retreat> on Self, move Self to Back Row                  |
|                                                                            |
|                                                                            |
|  COUNTER: [All Physical and Magical Attacks]                               |
|                                                                            |
|   Demons Gates' HP  > 75%: Do nothing                                      |
|   Demons Gates' HP <= 75%: Jump to 5th Attack for next turn                |
|   Demons Gates' HP <= 50%: Jump to 5th Attack for next turn                |
|   Demons Gates' HP <= 25%: Jump to 5th Attack for next turn                |
|                                                                            |
|    Demons Gate will only jump to the 5th Attack for its next turn if it    |
|     has used its 7th Attack since its last Counter.                        |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Demons Gate:                     |   POWER req for Overflow:    |
|                                             |                              |
| Demons Gate can be a real tough Boss if you | Base Damage Overflow: 172    |
|  are under-levelled. Its MDefence stat is   | Rnd Var Overflow  3x: 115    |
|  joint 3rd/4th place for the highest MDef   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  in the game, sharing its position with the                                |
|  Mandragora. The Mural Room is a fantastic place to level up your          |
|  characters should you feel the need to.                                   |
| Setting up for the battle is crucial for defeating Demons Gate. Firstly,   |
|  allocate one player as the Physical Attacker. Give that player the Long   |
|  Range Materia, Deathblow, Luck Plus, Counter Attack, Deathblow, Added     |
|  Effect+Time, and the Champion Belt (or Power Wrist if you do not have a   |
|  CHampion Belt). A successful Deathblow will hit for over 1000 HP, and     |
|  you'll have roughly a 52% chance to connect with Deathblow. This is how   |
|  you will defeat Demons Gate, seeing as Beta will only hit for less than   |
|  250 HP.                                                                   |
| Give the other two Players Enemy Skills (White Wind), and make sure they   |
|  have equipped the Ribbon and Jem Ring, then put everyone in the Back Row. |
|  You could also inflict everyone with Sadness (via the use of              |
|  Tranquilizers) to reduce the damage taken by 30%. If you had the Materia  |
|  slots so spare, you could also make use of Materias such as Cover which   |
|  will boost your Vitality. Also consider Elemental+Shive on your Armour to |
|  defend against the Cave-in Attack, and slow the ATB speed all the way     |
|  down.                                                                     |
| Make sure to equip your new Bahamut Materia, and put Sense on one of your  |
|  characters also. Bahamut is one of a few abilities that ignore the        |
|  Target's Def/MDef, and as such it will hit Demons Gate for 2400+ HP. Do   |
|  not bother equipping any other Summons. If you have unlocked Aeris' Lv 4  |
|  Limit Break Great Gospel, then try to fill her Limit gauge by             |
|  manipulating an Ancient Dragon in the Mural Room prior to the Battle.     |
| The Attack Petrif-Eye is one of seven Status inflicting Attacks that use   |
|  the 'Hidden' Element, and as such can be defended from by equipping the   |
|  Elemental on your Armour with any other non-element Materia (excluding    |
```

| other Support Materia and Restorative Materia). The Elemental Materia has to be Lv 2 minimum for the effect to work, the effect being that the chance of each Status being inflicted is dropped to 0. The Player is still considered to be vulnerable to the Status used, and the word "Miss" will perpetually appear above their head. A Lv 1 Elemental would instead halve the chance of the Element being inflicted.

Once the Battle begins, use Big Guard and be sure to recast it once your Barriers have depleted. Upon with Bahamut, then use your Physical Attacker to spam Deathblow on Demons Gate, hoping to also inflict it with Slow. Feel free to use Magic Hammer to replenish your MP if it falls low. Make sure to sense Demons Gate also; once its HP drops below its thresholds, it will prompt the use of Demons Gate soon after, which can be lethal if you are not prepared for it.

Even though Demons Gate appears to change rows mid-battle, its 'row value' is always 1, which means you'll always deal normal damage (as opposed to Back Row damage for 50% of your normal damage).

Keep using your normal Physical Attacks until it is dead. Do not try to Poison Demons Gate; it is the only enemy in the game the Nullifies the Poison Element but is vulnerable to the Poison Status. The only way to inflict it with Poison is via the use of Added Effect, however, the damage dealt would be 0 each time Poison takes effect.

-.-.-.

ENEMY LOOT

	DROP	STEAL	MORPH
HI-POTION	Trickplay [8]		
ELIXIR			Vlakorados
BIRD WING	Tonadu [63]	Tonadu [63]	
CAROB NUT	Vlakorados [32]	Vlakorados [32]	

ENEMY ENCOUNTERS

SCREEN GROUPING 1: * Area Enc Rate:

Icicle Area Beach 96 Very Low

Average: EXP: 600 AP: 45 GIL: 600 Enemy QTY: 1

The same Encounter can be found in Woodlands Area Beach.

[100%] Nrml Bat #1	EXP - 600	1st Row: 1x Tonadu	
Pre-Emp OFF	AP - 45		
	GIL - 600		#187

SCREEN GROUPING 2: ** BEST Area Enc Rate:

Icicle Area Grass 32 Medium

Average: EXP: 658.0 AP: 49.0 GIL: 955.5 Enemy QTY: 1.35

The Trickplay's Gold Mountain Attack can significantly boost the average gil earned, which is why it gains an extra point.

[30.4%] Nrml Bat #1	EXP - 510	1st Row: 1x Vlakorados	
Pre-Emp OFF	AP - 40		
	GIL - 460		#192
[29.0%] Nrml Bat #2	EXP - 480	1st Row: 1x Trickplay	
Pre-Emp OFF	AP - 35		
	GIL - 800		#193
[29.0%] Nrml Bat #3	EXP - 960	1st Row: 2x Trickplay

	GIL - 1600		#194
[5.86%] Back Att #1	EXP - 960	1st Row: 2x Trickplay	
Run = 2	AP - 70		
	GIL - 1600		#195
[5.86%] Back Att #2	EXP - 510	1st Row: 1x Vlakorados	
Run = 2	AP - 40		
	GIL - 460		#196

ENEMIES

NOTE - The Tonadu can also be fought here; however, I will not be duplicating that entry. You can find the Tonadu within the "Woodlands Area" listings further above.

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Vlakorados:                     |   POWER req for Overflow:     |
|                                            |                               |
| Vlakorados is found in Battle Square:      |  Base Damage Overflow: 156    |
```

| Set - 3 (After Highwind) Battle - 4 | Rnd Var Overflow 3x: 104 |

While the Vlakorados can be a challenging opponent, its attacks deal moderate damage at best. The most formidable aspect of this enemy is its high HP. Use Haste or Big Guard to speed up the Battle, and make use of your strongest magic to defeat it. You cannot use Sense on an enemy with HP greater than 30,000, which means the Vlakorados.

Cast Poison to begin with, then use Laser or T/S Bombs to drain its HP considerably. While the Vlakorados only takes halve damage from Gravity based attacks, you will still deal over 8000 on the first hit and over 6000 on the second hit. These abilities prove extra useful in the Battle Square, when the enemy has 66,666 HP!

Avoid using Deathblow, as you'll have less than a 50% chance of connecting given the Vlakorados' high Evade stat. Beta will hit for 1500+, and Trine will hit for 1000+. Using Added Effect+Time on someone's Weapon proves useful, also. If you run low on MP, feel free to use Magic Hammer.

You will definitely want to try to obtain at least three Carob Nuts from the Vlakorados, as they are required for the Chocobo Breeding process. a Lv 38 Cloud would have a 45.31% chance of stealing from it. The Carob Nut can also be obtained from the Battle Square at a cost of 500GP.

If you were skillful, you could try to Morph yourself an Elixir from the Vlakorados, although, you would have a much easier task morphing the Harpy. If you do wish to stock up on Elixirs early on in the game, then be sure to do so before you lose the Buggy, as the Harpy's appearance rate is greater on the Gold Saucer Area Desert terrain.

The Vlakorados cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Trickplay:                    |   POWER req for Overflow:       |
|                                          |                                 |
| Trickplay is found in Battle Square:     |  Base Damage Overflow: 150      |
|  Set - 3  (After Highwind)     Battle - 4|  Rnd Var Overflow  3x: 100      |
```

| o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| If you missed L4 Suicide from the Mu, then |
| you can learn it from the Trickplay. they have a marginally higher chance |
| of casting it. |
| You can use L4 Suicide to weaken the Trickplay, otherwise, Beta will do |
| roughly the same amount of damage. A single Physical blow will kill them |
| thereafter. |
| If you wish to amass an amount of gil *without* becoming ridiculously over |
| powered against the Sea Worm on the shores of Mideel (worth 5000 gil a |
| Battle), then the Trickplay make a great alternative. Increase the Battle |
| Speed up all the way, equip Haste and remove Counter Attack. Get into a |
| Battle with the 2x Trickplay, and cast Haste on them. With every turn |
| they will have a 17.39% chance of casting Gold Mountain, which will |
| increase the end-of-battle gil value by 800, with no cap! With that said, |
| if the Trickplay were to use the Attack 2,684,353 times, your end-of- |
| battle gil value would reach the maximum value possible (2,147,483,647). |
| The Trickplay consists of two Enemy's; the base that it rests upon is one |
| of several enemies named [No Name], and cannot be targeted. Explore the |
| "Extra Enemies" section for details on Trickplay's Base. |
| The Trickplay cannot be Back-Attacked or Side-Attacked, meaning that one |
| cannot perform Random Variation Overflow with 4x or 6x Damage. |

MAPS:	APPEARANCE RATE:	LOOKALIKES:
Corral Valley 1st Screen With Log Bridge	66%	Hedgehog Pie
Corral Valley Spiny Path towards Forgotten Cap.	75%	
Corral Valley 2-D "Cave Climbing" Screen	36%	
Corral Valley Upper Cavern To World Map	36%	

Boundfat's ATTACKS:

Manip Attack 1: Ice2
Manip Attack 2: Dark Needle
Manip Attack 3: Death Sentence

Attack 1: <Bodyblow>	Target: One Opponent		
[126] Physical	Element: Hit		
	Att%: 95		
	Power: 16		
	Base Damage: 147 HP		
Attack 2: Ice2	Target: One Opponent	Berserk Attack	
[01F] Magical	Element: Ice	Reflectable	
	Att%: 100		
	Power: 20		
	MP Cost: 22 MP		
	Base Damage: 577 HP		
Attack 3: Dark Needle	Target: One Opponent	Status Inflict:	
[287] Physical	Element: None	Darkness (100%)	
	Att%: 95		
	Power: 16		
	Base Damage: 147 HP		
Attack 4: Death Sentence	Target: One Opponent	**Enemy Skill**	
[05C] Magical 0 Dam	Att%: 100	Status Inflict:	
	MP Cost: 10	D. Sentence (100%)	

Boundfat's BATTLE PLAN: (Repeats)

Boundfat has not taken damage OR last Attack on Boundfat was Physical:

1ST ATTACK: Use <Bodyblow> on Target with Lowest Current HP
2ND ATTACK: Use <Bodyblow> on Target with Lowest Current HP
3RD ATTACK: Use <Bodyblow> on Target with Lowest Current HP
4TH ATTACK: Use <Bodyblow> on Target with Lowest Current HP
5TH ATTACK: Use <Bodyblow> on Target with Lowest Current HP
6TH ATTACK: Use Dark Needle on Target with Lowest Def

Boundfat has taken damage AND last Attack on Boundfat was Magical:

Use Ice2 on Target with Lowest MDef; If Boundfat's MP < 22, use Dark Needle on Target with Lowest Def

If the Boundfat takes Magical Damage and then takes Physical Damage, it will always start from the 3rd Attack. After using Dark Needle it will jump back to its 1st Attack, unless Magical Damage is taken.

DEATH: If Last Command used was Magic, Summon, W-Magic OR W-Summon:

```
|          Use Death Sentence on Last Attacker                                |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Boundfat:                          |   POWER req for Overflow:    |
|                                               |                              |
| Boundfat is found in Battle Square:           |  Base Damage Overflow: 156   |
|  Set - 3  (After Highwind)     Battle - 4     |  Rnd Var Overflow  3x: 104   |
|                                               |  Rnd Var Overflow  4x:  78   |
| The Boundfat is not a strong enemy. It will   |  Rnd Var Overflow  6x:  52   |
|  use its slightly stronger Ice2 Attack if     o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  attacked with Magical Spells, but it should                                |
|  not be considered a threat. After three casts of Ice2 it will not be able |
|  to use it any more; one use of Magic Hammer would prevent it from using   |
|  the Attack altogether. The most annoying thing it can do to you is        |
|  inflict you with Darkness.                                                 |
| You should try to steal some Dazers, as they help against Ruby Weapon. A   |
|  Lv 38 Cloud would have a 51.56% chance of stealing from the Boundfat.     |
|  The Battery Cap appear in larger groups, and are lower levelled which     |
|  makes farming in the Nibel Area Forests the preferable option.            |
| If you missed the Enemy Skill Death Sentence in the Cave of The Gi, then   |
|  the only other enemy you can learn it from is the Boundfat. It will only  |
|  use the ability as a Death Counter to a Magical ability from the "Magic"  |
|  Command (*not* from an Enemy Skill) or a Summon; its low HP means that    |
|  one blast of Bolt2 or Fire2 should kill it in one. You will have to learn |
|  it from the Boundfat if you wish to complete your third Enemy Skill       |
|  Materia.                                                                   |
| The Boundfat's appearance alongside the Malldancer on the Corral Valley    |
|  "Log Bridge" Screen (with the Water Ring chest) makes for the *best*      |
|  screen on Disc 1 to train on.                                              |
| The test Enemy êúô4(ëöù) originally took the same model as the Boundfat in |
|  the JORG release, however, in the later releases the model was changed to |
|  that of the Pyramid. Visit the "Extra Enemies" section for more info on   |
|  êúô4(ëöù).                                                                 |
\                                                                             /

|                           Base Damage: 183 HP                            |
| - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - -  |
|   Malldancer's BATTLE PLAN: (Repeats)                                    |
|                                                                          |
|  OPENING ATTACK: Use Dance on All Targets without Darkness; If all Targets |
|                  have Darkness, use standard Attack                      |
|                                                                          |
|  THEREAFTER: Use <Claw> on Rnd Target with Darkness; If no Targets have  |
|              Darkness, select Rnd Target                                 |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Malldancer:                        |   POWER req for Overflow:  |
|                                               |                            |
| Malldancer is found in Battle Square:         |  Base Damage Overflow: 156 |
|  Set - 3  (After Highwind)     Battle - 4     |  Rnd Var Overflow  3x: 104 |
|                                               |  Rnd Var Overflow  4x:  78 |
| The Malldancer are an easy enemy to defeat;   |  Rnd Var Overflow  6x:  52 |
|  one blast of Trine is enough to kill them.   o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Their end-of battle rewards are extremely                               |
|  high, considering the large groups in which they appear. The 1st Screen |
|  in Corral Valley with the Log Bridge and Water Ring is the *best* screen |
|  to train in on Disc 1, which you won't be able to access until you have |
|  completed the Temple of The Ancients events.                            |
| The Malldancer has no use for its MP, so feel free to make use of Magic  |
|  Hammer to replenish your own. Avoid using Deathblow, given its high Evade |
|  stat.                                                                   |
| The Attack Dance is subject to Split Damage for the damage calculations; |
|  however, the Statuses inflicted via Dance are *not* subject to Split    |
|  Damage.                                                                 |
| The Malldancer is one of a number 'elevated' enemies that Nullifies the  |
|  Earth Element, but will no take double damage from Wind.                |
\                                                                          /

|                                                                            |
|     Hungry's HP <= 75%: 1/3 Chance use Eat on Rnd Target with Small        |
|                         2/3 Chance <Bodyblow> on Rnd Target without Small* |
|                                                                            |
|     Hungry's HP <= 50%: 1/2 Chance use Eat on Rnd Target with Small        |
|                         1/2 Chance <Bodyblow> on Rnd Target without Small* |
|                                                                            |
|     Hungry's HP <= 25%: Use Eat on Rnd Target with Small                   |
|                                                                            |
|       After 3rd Attack: 2/3 Chance jump to 1st Attack for next turn        |
|                         1/3 Chance jump to 2nd Attack for next turn        |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Hungry:                         |   POWER req for Overflow:     |
|                                            |                               |
| The Hungry are not difficult to defeat. Open |  Base Damage Overflow: 158  |
|  with Trine and then follow up with Physical |  Rnd Var Overflow  3x: 105  |
|  Attack to finish it.                      o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The most annoying thing that the Hungry can                                |
|  do to you is eject a Player from the Battle. Unlike the Midgar Zolom's    |
|  Attack Blown Away, 'Eat' will flag the Player as dead. This usually won't |
|  cause you a problem, seeing as it can never use Eat if there is only one  |
|  Player left alive.                                                        |
| Be extra cautious against the 3x Boundfat, 1x Hungry Encounter in the      |
|  final caverns of Corral Valley; the Boundfat can inflict Death Sentence   |
|  as a death counter attack, which can leave you vulnerable to an unlucky   |
|  Game Over if the Hungry "eats" two of your Players.                       |
| Use Magic Hammer to deplete the Hungry's MP, rendering it harmless. You    |
|  can also use a Ribbon, White Cape and/or Small Status defence on you      |
|  Armour to defend from Mini; it will never eat an opponent unless it is    |
|  first inflicted with Small.                                               |
```

| The Hungry will never use Mini on a target already inflicted with Small;
| however, if it were to use Mini on a target with Small, the chance of
| toggling the Status would be 100%.
| The Hungry's 3x encounter in the Great Glacier "Frostbite Cavern" makes
| great Battle spoils.
| The Hungry cannot be Back-Attacked or Side-Attacked, meaning that one
| cannot perform Random Variation Overflow with 4x or 6x Damage.

|                                                                            |
|   Jenova-LIFE does not have Reflect: Use Reflect on Self; If Jenova-LIFE's |
|                                      MP < 30, do nothing                   |
```

Notes On Jenova-LIFE:	POWER req for Overflow:
All of Jenova-LIFE's attacks are Water-based, so equip the Water Ring you found in Corral Valley and you should be fine. If you have defeated Godo in Wutai, then you should also equip Elemental+Leviathan on someone's armour. Give the third character Sadness and the Talisman to survive Aqualung.	Base Damage Overflow: 176 Rnd Var Overflow 3x: 117
Now is your chance to learn Aqualung on your third Enemy Skill Materia. Make sure that you put the Enemy Skill on the player/s with Water defence in place. Cast Sense on Jenova-LIFE, and stop attacking once her HP has dropped below 2500 if she hasn't cast Aqualung by that point.	
Jenova-LIFE has high Dexterity, so use Slow if you have unlocked the ability (Lv 2 Time Materia); just make sure to inflict Slow on her before she has set up Reflect. Otherwise, equip Added Effect+Time on your nominated Physical attacker (the player with Counter Attack). Be sure to also put Elemental+Titan on that character's Weapon.	
Do not use Deathblow against Jenova-LIFE, as your chances of connecting would be less than 50%. Make sure to equip Bahamut which will hit for 2250+ HP (ignores Defence), and Kjata which will hit for 1500+ HP. You also want to make of your new Comet Materia, which will hit for 1200+ HP.	
In terms of Magic, Quake2 is useful as she takes Double Damage from earth-based attacks, and will hit for 700+HP. Just be mindful of the fact that Jenova-LIFE will reflect Quake2 once Reflect has been setup. You can optionally remove Reflect via the use of DeBarrier (Lv 1 Destruct Materia). Beta is *not* reflectable, and will hit for 800+. Trine is also not reflectable, and will hit for 500+.	
Once the battle begins, open with the usual casting of Big Guard, then use your Summons. With the appropriate Water defences setup, Jenova-LIFE is a very easy battle. Use Regen of you have it unlocked on the player/s without Water defence, and keep pummelling her with whichever means you see fit. Avoid Aqualung and Leviathan.	
You could optionally use Magic Hammer three times to render Jenova-LIFE harmless. She will set up Reflect each time you use Magic Hammer, so you will have to use DeBarrier after each use of Magic Hammer. All of her attacks cost MP, and without any MP to draw from the "skill power is used up" text string will be displayed each time she tries to use any of her attacks. Just bear in mind that you will not learn Aqualung this way, and you will instead have to learn it from the Harpy.	
The Aeris Theme is played throughout the Jenova-LIFE Battle. Once the battle ends the party will not perform their victory pose, and the Battle Victory Fanfare will not play.	
Jenova-LIFE is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. Jenova-LIFE is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.

|                                                                           |
```

| STAGE 1: (Magical)

1ST ATTACK: 1/2 Chance use Ice2 on Rnd Target
1/2 Chance use Bolt2 on Rnd Target

2ND ATTACK: Use <Spin Shield> on Self
Set Defence to 254 and MDefence back to 180

STAGE 3: (Physical)

3RD ATTACK: Use Grim Rod on Rnd Target

4TH ATTACK: Use <Spin Shield> on Self
Set MDefence to 510 and Defence back to 50

| Notes On Grimguard: | POWER req for Overflow:
| | 1st Stage:
| 1st Stage: Def = 50 MDef = 510 | Base Damage Overflow: 153
| 2nd Stage: Def = 254 MDef = 180 | Rnd Var Overflow 3x: 102
| | 2nd Stage:
| The Grimguard are a rare Enemy, and it is | Base Damage Overflow: 274
| possible that you will go a playthrough | Rnd Var Overflow 3x: 183
| without ever encountering this foe.

| Trine will be enough to drop their HP to critical, unless they are in their Magical form, in which case Trine will only deal 5 HP worth of damage. Work out which Stage they are in based on the Attacks they use, and act accordingly. Your Physical Attacks will deal roughly 400+ HP while they are in their Magical form, and 230+ while they are in their Physical Form.

| The Grimguard only have enough MP for five uses of their Magical attacks, after which the "skill power is used up" text string will be displayed whenever they tried to use their Magic. One cast of Magic Hammer will stop them in their tracks.

| Two variants of <Spin Shield> exist, one for each Stage it is transforming into.

| While the Grimguard is in its Magical Form, it has the highest MDefence in the game; even higher than Ruby Weapon's!

| You could try to steal Shrivels from them if you wish (casts Small on one opponent). A Lv 39 Cloud would have a 48.44% chance of stealing from the Grimguard. They can be easily bought from Gongaga for 500 gil.

| The Grimguard cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

Acrophies' ATTACKS:

Manip Attack 1: Big Red Clipper

Attack 1: <Big Red Clipper> [291] — Physical
Target: One Opponent
Element: None
Att%: 95
Power: 16
Base Damage: 190 HP
Berserk Attack

Attack 2: Isogin Smog [292] — Magical
Target: One Opponent
Element: None
Att%: 95
Power: 16
MP Cost: 10 MP
Base Damage: 540 HP
Status Inflict: Darkness (99%)

Attack 3: Huge Tidal Wave [293] — Physical
Target: Whole Field
Element: Water
Att%: 95
Power: 20
MP Cost: 20 MP
Base Damage: 237 HP
Split Damage

Acrophies' BATTLE PLAN:

PHASE 1: (Repeats)

Acrophies' HP > 75%:

1/4 Chance: Use <Big Red Clipper> on Rnd Target without Darkness; If all Targets have Darkness, use Isogin Smog on Rnd Target
3/4 Chance: Use <Big Red Clipper> on Rnd Target

PHASE 2: (Repeats)

Acrophies' HP <= 75%:

1/4 Chance: Use <Big Red Clipper> on Rnd Target without Darkness; If all Targets have Darkness, use Isogin Smog on Rnd Target
1/8 Chance: Use Huge Tidal Wave on Whole Field
5/8 Chance: Use <Big Red Clipper> on Rnd Target

PHASE 3: (Repeats)

```
|                                                                              |

|    3/8 Chance: Use <Big Red Clipper> on Rnd Target                           |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Acrophies:                        |   POWER req for Overflow:     |
|                                              |                               |
| Acrophies is found in Battle Square:         |  Base Damage Overflow: 160    |
|  Set - 3  (After Highwind)     Battle - 4    |  Rnd Var Overflow  3x: 107    |
|                                              o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| A flaw exists with the Acrophies' AI Script.                                 |
|  The Darkness check that is performed searches for any Player *without*      |
|  Darkness, in which case it will use <Big Red Clipper>. It can never use     |
|  Isogin Smog, seeing as the Player cannot be inflicted with Darkness         |
|  without self-inflicting the Status via the use of Inks.                     |
| The Acrophies is a rare Enemy, and the Player may go through a playthrough   |
|  without ever encountering the Enemy. It is one of three enemies that        |
|  takes greater than normal back damage, the other two being Air Buster and   |
|  Aps.                                                                        |
| The only use for increased Back Damage multiplier is for the Attack Huge     |
|  Tidal Wave, which will deal 8x normal healing Damage to Acrophies,          |
|  healing it for 1024 - 1093 HP.                                              |
| Trine should hit for 800+HP, and Beta should hit for 1300+. Avoid Aqualung   |
|  and Deathblow.                                                              |
| Should you encounter the Acrophies, you should definitely try to steal the   |
|  Water Ring from it which can be sold for 5000 gil. This will greatly help   |
|  for the next round of Weapons in Icicle Inn. A Lv 39 Cloud would have a     |
|  12.5% chance of stealing from the Acrophies.                                |
| The Acrophies cannot be Back-Attacked or Side-Attacked, meaning that one     |
|  cannot perform Random Variation Overflow with 4x or 6x Damage. Given the    |
|  high Damage multiplier of the Acrophies, if one were to be able to Back-    |
|  Attack it you could theoretically overflow against it with a Power value    |
|  as low as 14!                                                               |
\                                                                              /
 '~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~'
```

```
-.-.-.
```

- Now that you have the third Enemy Skill Materia, it is highly recommended that you retrace your step to learn all the skill that you can. You should *at least* get the following:

- Beta - Midgar Zolom - Grasslands Marsh
- White Wind - Zemzelett - Junon Grass
- Big Guard - Beachplug - Gongaga Beach
- Magic Hammer - Razor Weed - Wutai Grass, left of shoreline
- Aqualung - Harpy - Gold Saucer Area Desert

- Don't worry about Aqualung if you learned it from Jenova-LIFE. If you didn't, then make sure to get it from the Harpy before losing the Buggy (it's easier than trying to get it alongside the Chocobo).

MAPS:	APPEARANCE RATE:	LOOKALIKES:
Icicle Area Snow	35%	
Icicle Area Snow Storm (Great Glacier)	43%	

Jumping's ATTACKS:

Manip Attack 1: Dive Kick
Manip Attack 2: Club Sword

Attack 1: Dive Kick [2A7] — Physical
Target: One Opponent
Element: None
Att%: 95
Power: 20
Base Damage: 65 HP
Berserk Attack

Attack 2: Club Sword [2A8] — Physical
Target: One Opponent
Element: Cut
Att%: 95
Power: 200
Base Damage: 650 HP

Jumping's BATTLE PLAN: (Repeats)

SETUP: If a Chocobo is present Print Message [A Chocobo!]

1/2 Chance: Use Club Sword on Rnd Target
1/2 Chance: Use Dive Kick on Rnd Target

DEATH: If Chocobo is present AND Chocobo is last alive Enemy:
Display String: [Caught a Chocobo.], activates Chocobo on World Map

Notes On Jumping:

Jumping is found in Battle Square:
Set - 3 (After Highwind) Battle - 4
Set - 3 (After Highwind) Battle - 5

POWER req for Overflow:

Base Damage Overflow: 150
Rnd Var Overflow 3x: 100
Rnd Var Overflow 4x: 75
Rnd Var Overflow 6x: 50

A flaw exists with the Jumping's AI Script. It should have had a 1/4 chance of using Club Sword and a 3/4 chance of using Dive Kick if one Player is dead. If two or zero players are dead, then it should have had a 1/2 chance of using either attack. As it stands, it will always have a 50/50 chance of using either attack.

The Jumping has low Defence and MDefence for your current place in the game. Two or three Physical attacks should be enough to kill them, or one blast of Trine will do the job. Avoid Deathblow, as your chance of connecting will be less than 43%.

Feel free to use L4 Suicide on the Jumping to then Morph them into an Antarctic Wind; a battle Item that has 3/4 the strength of a Right Arm (casts Ice2 on all The only other way to obtain an Arctic Wind is from the Chocobo Races (all Classes).

The Jumping was initially going to change its Evade stat mid-battle, however, this idea was phased out of the final edit for reasons unknown.

The only way to breed a Gold Chocobo is by mating a Wonderful Chocobo with a Black Chocobo using a Zeio Nut, and the Wonderful Chocobo will only appear alongside either one or two Jumping. You should aim to level your Chocobo Lure Materia up to at least Lv 2 by the time you come to catch a

| Wonderful Chocobo, which you can combine with the second Chocobo Lure to |
| increase your chances of encountering the Jumping + Chocobo encounter. |

Bandersnatch's ATTACKS:	Manip Attack 1: Bodyblow
	Manip Attack 2: Bite

Attack 1: <Bodyblow>	Target: One Opponent	Berserk Attack
[172] Physical	Element: Hit	
	Att%: 100	
	Power: 16	
	Base Damage: 257 HP	
Attack 2: Bite	Target: One Opponent	Status Inflict:
[2AB] Physical	Element: None	Confusion (47%)
	Att%: 95	
	Power: 20	
	Base Damage: 321 HP	
Attack 3: <Howling>	Target: One Ally	Miss If Alive
[225] Magical % Based	Element: Restorative	Status Remove:
	Att%: 255	Death (100%)
	Power: 32	
	Base Damage: 100% Max HP	
Attack 4: <Howling>	Target: Self	Howling
[2AC] Physical 0 Dam	Att%: Auto Hit	Animation

Bandersnatch's BATTLE PLAN: (Repeats)

SETUP: If a Chocobo is present Print Message [A Chocobo!]

1ST ATTACK: Use <Bodyblow> on Rnd Target without Confusion; If all Targets have Confusion, select Rnd Target

2ND ATTACK: Same as 1st Attack

3RD ATTACK: Same as 1st Attack

4TH ATTACK:

All Targets with Confusion: Use <Bodyblow> on Rnd Target

At least one Target without Confusion:

1/2 Chance: Use Bite on Rnd Target without Confusion

1/2 Chance: Use <Bodyblow> on Rnd Target without Confusion

5TH ATTACK:

All other Nibel Wolfs Alive:

Use <Bodyblow> on Rnd Target without Confusion; If all Targets have Confusion, select Rnd Target

At least one other Nibel Wolf Dead:

1/2 Chance: Use <Howling> (Attack) on Rnd Bandersnatch Ally with Death

1/2 Chance: Use <Howling> (Animation) on Self

DEATH: If Chocobo is present AND Chocobo is last alive Enemy:
Display String: [Caught a Chocobo.], activates Chocobo on World Map

Notes On Bandersnatch:	POWER req for Overflow:

With the ability to inflict you with Confusion, the Bandersnatch is tougher than its counterpart in Nibel Area (the Nibel Wolf). Be sure to equip the Ribbon and/or Peace Ring on the Player with access to the Enemy Skill White Wind.	Base Damage Overflow: 152 Rnd Var Overflow 3x: 101 Rnd Var Overflow 4x: 76 Rnd Var Overflow 6x: 51
Unlike the Nibel Wolf, the Bandersnatch can use Howling to revive its teammates an unlimited amount of times. Unfortunately, the end-of-battle gil and EXP values will not increase with each successful revival.	
Fire2 may not be enough to kill the Bandersnatch in one; Trine will, and it costs less MP.	
Ice Crystals are incredibly useful in the Battle Square as they have a Base Damage value of 2080 (casts Ice3 on all opponents). You should cast Laser four times then follow up with Morph for roughly 70 HP worth of damage, or, use Fire2+All if you are weak enough.	
The Bandersnatch is the most recurring enemy in the game in terms of qty of screens it appears on; it can be found on a whopping 25 screens!	

{Great Glacier}

NOTE - It was impossible to list these screens in order of chronological appearance; instead I have arranged them by their 'Screen Grouping'.

- The screen with the Hot Springs does not contain encounters.

- The Icicle Area Snow Storm is technically considered as being part of the World Map, and considers the battles in the same way as all other World Map encounters.

| Shred is one of four enemies in the Great  |  Rnd Var Overflow  6x:  53    |
|  Glacier that takes Double Damage from the o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Fire Element, so you should equip Fire with                               |
|  the Elemental Materia on someone's Weapon.                                |
| If you were to cast L4 Suicide on the Shred, they would just retaliate by  |
|  healing themselves using Cure3. You could use Magic Hammer first to       |
|  deplete their MP, then follow up with L4 Suicide. Alternatively, Trine    |
|  should be enough to kill them in one hit, unless you are under-levelled.  |
| While the Shred can inflict your characters with Berserk, their attacks    |
|  are very weak, and should not cause you any problems. Equip the Ribbon    |
|  and/or Peace Ring if you are bothered by the Berserk Status.              |
| Equip Elemental+Choco/Mog on your weapon to exploit the Shred's weakness   |
|  to Wind (as with all other 'elevated' enemies). Avoid Earth.              |
\                                                                            /

Frozen Nail's ATTACKS:

Manip Attack 1: Continu-claw
Manip Attack 2: Flying Sickle

Attack 1: Continu-claw [2A6] — Physical — Berserk Attack
Target: One Opponent
Element: Cut
Att%: 184
Power: 16
Base Damage: 183 HP

Attack 2: Flying Sickle [1FC] — Magical
Target: One Opponent
Element: Wind
Att%: 255
Power: 12
MP Cost: 8 MP
Base Damage: 418 HP

Frozen Nail's BATTLE PLAN: (Repeats)

1/4 Chance: Use Flying Sickle on Rnd Target
3/4 Chance: Use Continu-claw on Rnd Target

Notes On Frozen Nail:

Frozen Nail is found in Battle Square: Set - 3 (After Highwind) Battle - 5

Frozen Nail is one of four enemies in the Great Glacier that takes Double Damage from the Fire Element, so you should equip Fire with the Elemental Materia on someone's Weapon.

Trine will not be enough to kill the Frozen Nail in one hit; two castings of Fire2 will, however. You could always just use L4 Suicide and follow

POWER req for Overflow:

Base Damage Overflow:	154

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Lessaloploth:                    |   POWER req for Overflow:        |
|                                             |                                  |
| Lessaloploth is found in Battle Square:     |  Base Damage Overflow: 161       |
|  Set - 3  (After Highwind)     Battle - 5   |  Rnd Var Overflow  3x: 108       |
|                                             |  Rnd Var Overflow  4x:  81       |
| As far as random encounters go, the         |  Rnd Var Overflow  6x:  54       |
|  Lessaloploth is rather tough. Thankfully it o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  will never use its Attack Snowstorm, which                                    |
|  has the power to kill you in one. Avalanche can still do moderate damage.    |
| Avoid using Deathblow. Two blasts of Beta will be enough to kill the           |
|  Lessaloploth.                                                                 |
| Equip Elemental+Choco/Mog on your weapon to exploit the Lessaloploth's         |
|  weakness to Wind (as with all other 'elevated' enemies). Avoid Earth.         |
| The Lessaloploth is considered to be a 'Powerful' enemy, and as such the       |
|  "Pre-Emp" Flag should have been disabled for encounters that contain the      |
|  Lessaloploth. An oversight means that you have a chance to initiate a         |
|  Pre-Emptive Strike against the single Lessaloploth in the 'Snow Storm'        |
|  terrain (Formation ID #208).                                                  |
| Typically, the Lessaloploth will have a Run Counter of 2, so you won't be      |
|  able to flee as easily when faced against them. Again, and oversight          |
|  means that the Run Value is set to its default value of 1 when faced with     |
|  the Lessaloploth on the 'Snow Storm' World Map terrain.                       |
\                                                                                /

|  4TH ATTACK: use Wide Grazer on All Targets                                 |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Ice Golem:                       |   POWER req for Overflow:     |
|                                             |                               |
| Ice Golem is found in Battle Square:        |  Base Damage Overflow: 164    |
|  Set - 3  (After Highwind)     Battle - 4   |  Rnd Var Overflow  3x: 109    |
|                                             |  Rnd Var Overflow  4x:  82    |
| Unlike the Golem and Armored Golem, the Ice |  Rnd Var Overflow  6x:  55    |
|  Golem will not advance or retreat mid-     o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  battle, nor will it modify its base stats.                                 |
|  It is also only 1/8 the size of its counterparts.                          |
| Wide Grazer is one of a few Enemy Attacks in the game that targets all      |
|  opponents for non-split damage, which means the damage output will *not*   |
|  be reduced to 66% of its normal output.                                    |
| Use L4 Suicide if you wish to quickly deal with the Ice Golem. Avoid using  |
|  Deathblow; Beta will hit for 1600+, so you would be better off opening     |
|  with Laser or Demi2, which would hit for 2000, then follow up with Beta    |
|  and a physical blow.                                                       |
| The Ice Golem is considered to be a 'Powerful' enemy, and as such the       |
|  "Pre-Emp" Flag should have been disabled for encounters that contain the   |
|  Ice Golem. An oversight means that you have a chance to initiate a Pre-    |
|  Emptive Strike against the single Ice Golem in the 'Snow Storm' terrain    |
|  (Formation ID #209).                                                       |
\                                                                             /

Snow's BATTLE PLAN: (Repeats)

OPENING ATTACK: 1/4 Chance start from 1st Attack
1/4 Chance start from 2nd Attack
1/4 Chance start from 3rd Attack
1/4 Chance start from 4th Attack

1ST ATTACK: Use Cold Breath on Rnd Target without Confusion; If all Targets have Confusion, select Rnd Target

2ND ATTACK: Same as 1st Attack

3RD ATTACK: Same as 1st Attack

4TH ATTACK: Use Fascination on Rnd Target without Confusion; If all Targets have Confusion, select Rnd Target

After 4th Attack: 1/2 Chance jump to 1st Attack for next turn
1/2 Chance jump to 2nd Attack for next turn

COUNTER: [All Physical and Magical Attacks]

Attack was Magical:

Use Fascination on Last Mag Attacker; If Last Mag Attacker has Confusion, do nothing

Attack was Physical:

Snow's HP > 75%: Do nothing

Snow's HP <= 75%: Use Ice2 on Last Phys Attacker the first time Snow's HP drops below 75%; If Snow's MP < 22, do nothing

Snow's HP <= 50%: Use Ice2 on Last Phys Attacker the first time Snow's HP drops below 50%; If Snow's MP < 22, do nothing

Snow's HP <= 25%: Use Ice2 on Last Phys Attacker the first time Snow's HP drops below 25%; If Snow's MP < 22, do nothing

Notes On Snow:

Snow is found in Battle Square:
Set - 3 (After Highwind) Battle - 5

Snow is one of four enemies in the Great Glacier that takes Double Damage from the Fire Element, so you should equip Fire with the Elemental Materia on someone's Weapon.

Snow is not difficult to defeat, although her Ice2 Attack can deal fairly moderate damage. Equip Ice defence if necessary. You could always use L4 Suicide and finish up with a Physical blow to finish her off quickly.

The forced encounter in the North East Cavern may appear to be a Boss-Battle given the theme that plays out, however, the Snow enemy is the same Snow as the randomly encountered Snow; defeat her the same as you would any normal enemy. You need to have first touched the Hot Springs to be able to fight her, otherwise you cannot engage her. Defeating Snow is the only way to obtain the only Holy-based Materia in the game; the Alexander Summon Materia (has 120 Attack Power).

Snow *can* be back-attacked normally, and the same goes for the Mini-Boss Battle. It is likely that the developer's had intended the Pre-Emp Flag

POWER req for Overflow:

Base Damage Overflow: 159
Rnd Var Overflow 3x: 106
Rnd Var Overflow 4x: 80
Rnd Var Overflow 6x: 53

```
|  to have been disabled here, however, similar to a handful of other Boss   |
|  Battles, this one can be Pre-Empted.                                       |
| You cannot get a Game Over during the forced encounter with the Snow.       |
|  Should you lose the Battle, you will pass out in the same was you would    |
|  once your step counter reaches 544, and be transported to Holzoff's        |
|  Cabin with 1 HP remaining for each party member.                           |
| You should try to obtain at least one Circlet from the Snow. This piece     |
|  of equipment is the Magical version of the Champion Belt, and will help    |
|  turn the tide in many battles. A Lv 40 Cloud would have a 12.5% chance of  |
|  stealing from the Snow. Circlets only sell for 1 gil in the shops, so      |
|  there is no need to farm them.                                             |
| Ice Crystals can be helpful in the Battle Square (casts Ice3 on all         |
|  opponents with a Base Damage value of 2080); however, you will *not*       |
|  obtain the Drop from Snow if you stole from her.                           |
| While Snow is immune to being manipulated, she does have an assigned        |
|  Manipulate Attack, which will also be assigned as her berserked attack.    |
|  Again, she cannot be inflicted with Berserk.                               |
\                                                                             /

|  DEATH: Use <Vanish> on Self, end Battle                                       |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Magnade:                          |   POWER req for Overflow:       |
|                                              |                                 |
| Magnade is found in Battle Square:           |  Base Damage Overflow: 160      |
|  Set - 3  (After Highwind)     Battle - 3    |  Rnd Var Overflow  3x: 107      |
|                                              o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  1st Stage:  Evade = 255                                                       |
|  2nd Stage:  Evade = 5                                                         |
|                                                                                |
| Every single Action will set the Magnade's Evade to 255, regardless of the    |
|  Target or the Caster. This includes Actions made by the Magnade. Even         |
|  Actions such as Change/Defend will trigger the Counter script.                |
| The Magnade is one of four enemies in the Great Glacier that takes Double      |
|  Damage from the Fire Element, however, given the fact that it will evade      |
|  all Physical Attacks, you should stick to Fire using Magic. Beta will         |
|  kill it in one, and Fire2 should kill if not cripple them.                    |
| Alternatively, you could exploit the Magnade's weakness to Gravity; one        |
|  cast of Laser, Demi2 or a T/S Bomb will kill them in one.                     |
| The Magnade has no use for its MP, so feel free to use Magic Hammer to         |
|  replenish your own.                                                           |
| While the Magnade appears to have very high Strength, the attacks it uses      |
|  are very low in Attack Power. You should still be wary, however, given        |
|  that the Magnade can use its attacks consecutively.                           |
| The Shields that are equipped on the Magnade are both unique enemies, each     |
|  with their own Enemy ID. These enemies will leave no rewards, and can         |
|  never be targeted or killed. Visit the "Extra Enemies" section further        |
|  below for more info on the Magnade's Shields.                                 |
| All of the encounters with the Magnade have a Run Count value greater than     |
|  1, which means you'll have a harder time fleeing from them.                   |
| The Magnade cannot be Back-Attacked or Side-Attacked, meaning that one         |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.                |
| The Magnade is immune to Seizure, which isn't necessary seeing as there is     |
|  no way for the Player to inflict an enemy with Seizure. The Magnade is        |
|  one of 86 enemies that are immune to Seizure. It is also immune to            |
|  Peerless, along with 104 other enemies.                                       |
\                                                                                /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Malboro:                        |   POWER req for Overflow:     |
|                                            |                               |
| Malboro is found in Battle Square:         |  Base Damage Overflow: 176    |
|  Set - 3  (After Highwind)     Battle - 7  |  Rnd Var Overflow  3x: 117    |
|                                            o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Malboro is a notoriously difficult                                     |
|  randomly encountered enemy, as its Bad Breath can devastate your party    |
|  if you do not have the correct defences in place. The only way for the    |
|  Player to be cured of Sleep/Confusion is via a Physical attack, and       |
|  seeing a all of Malboro's attack are Magical, you may find yourself in a  |
|  defenceless position without any means to cure yourself.                  |
| The Player should make use of the Ribbon found in the Temple of The        |
|  Ancients, and also the one found in Gaea's Cliffs to defend from the      |
|  Malboro's Bad Breath; this way you can learn the Enemy Skill without fear |
|  of a Game Over. Be sure to give the Ribbon to the same character with     |
|  access to the White Wind Enemy Skill; if you have not learned White Wind, |
|  be sure to have your Remedies ready to use!                               |
```

| If you missed the chance to learn Bad Breath during the first encounter |
| with the Malboro, then you will have another chance to learn the Skill |
| once you reach Disc 3 by encountering it on the 'Right Path' in the |
| Northern Crater, at which point the Malboro should not be a threat. |
| Note that the Status inflictions dealt via Bad Breath are *not* subject to |
| Split Damage; each casting will always have a 100% chance to inflict ALL |
| targets with ALL Statuses. |
| |
| If you are under-levelled, then you should consider equipping the |
| appropriate defences against Ice to reduce the damage taken via the |
| Malboro's Frozen Beam Attack; equip the Aurora Armlet, Dragon Armlet, Ice |
| Ring, and/or Elemental+Shiva on one's armour. Don't forget about Big |
| Guard, also! |
| Open with L4 Suicide the quickly dispatch the Malboro, especially if you |
| encounter it in the Battle Square, where it will have 8800 HP! Just be |
| mindful of the fact that it will be more likely to use Bad Breath once |
| its HP has dropped below 50%, which can be useful if you are trying to |
| learn the Enemy Skill. |
| Avoid using Deathblow against the Malboro. You can exploit its weakness to |
| Water by casting Aqualung, which should hit for 3000+ HP (it may kill the |
| enemy in one hit if you have the Circlet and/or Magic Plus equipped). |
| Alternatively, equip Elemental+Leviathan on your Physical Attacker's |
| Weapon to deal 1000+ HP with each hit. |
| When the Malboro uses Bio2, it performs a weird MP check; if there is at |
| least one target without Poison AND Malboro's MP > 35, select Rnd Target |
| without Poison; If all Targets have Poison, OR Malboro's MP < 36, |
| select Rnd Target. This check makes no sense, as it will still be unable |
| to use the attack if it has no MP. It seems as though the Malboro should |
| have had a second Attack to use once its MP has been drained; however, |
| the "skill power is used up" text string will be displayed each time it |
| tries to use any attack that costs more MP than it has. |
| The Malboro's large stock of MP makes for a quick refill of your own MP |
| via Magic Hammer, should you fall short of Ethers (or you;d rather save |
| them for the Battle Square). |
| Do not bother trying to steal form the Malboro, as they will have a 100% |
| chance of dropping M-Tentacles, which have 2400 HP Base Damage and can be |
| fantastic for the Battle Square. If you did try to steal from the |
| Malboro, then there is a chance you will instead obtain a useless Echo |
| Screen which can be bought from various shops. A Lv 41 Cloud would have a |
| 37.5% chance of stealing the M-Tentacles from the Malboro, and a 23.44% |
| chance of receiving the Echo Screen. |
| All of the encounters with the Malboro have a Run Count value greater than |
| 1, which means you'll have a harder time fleeing from them. |
| The Malboro cannot be Back-Attacked or Side-Attacked, meaning that one |
| cannot perform Random Variation Overflow with 4x or 6x Damage. |
| The Marlboro is immune to Seizure, which isn't necessary seeing as there |
| is no way for the Player to inflict an enemy with Seizure. The Malboro is |
| one of 86 enemies that are immune to Seizure. It is also immune to |
| Peerless, along with 104 other enemies. |
| The Malboro's name sounds similar to the cigarette brand Marlboro. The |
| Malboro uses an attack called 'Bad Breath', which Marlboro cigarettes can |
| give you. Coincidence? |

Headbomber's ATTACKS:

Manip Attack 1: Dorsal Punch

Attack 1: <Dorsal Punch> Physical [2B4]
Target: One Opponent
Element: Hit
Att%: 95
Power: 16
Base Damage: 298 HP
Berserk Attack

Attack 2: Extreme Bomber Physical [2B3]
Target: One Opponent
Element: Shout
Att%: 100
Power: 70
Base Damage: 1303 HP
Status Inflict: Fury (71%)

Headbomber's BATTLE PLAN:

PHASE 1: (Repeats)

More than one Enemy alive:

Use <Dorsal Punch> on Rnd Target

PHASE 2: (Repeats)

Headbomber is the last Enemy alive:

Set Dexterity to 120

| Use Extreme Bomber on Rnd Target |

Notes On Headbomber:	POWER req for Overflow:
Headbomber is found in Battle Square:	Base Damage Overflow: 156
Set - 3 (After Highwind) Battle - 6	Rnd Var Overflow 3x: 104
	Rnd Var Overflow 4x: 78
1st Stage: Dexterity = 60	Rnd Var Overflow 6x: 52
2nd Stage: Dexterity = 120	

The Headbomber poses little threat to the Party when there is more than one enemy alive; however, when the Headbomber is the last remaining enemy, they can become a threat. Their Extreme Bomber ability can cause massive damage, so be sure to keep your HP above 1200 for characters in the Front Row.
Trine should hit for 1200+ HP, and Beta will hit for 2000+. Avoid using Deathblow, as your chances if hitting will only be roughly 50%.
You could optionally use the Headbomber to replenish your MP via the use of Magic Hammer, seeing as they have no use for their MP.
The Headbomber is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy (although you can still encounter it in the Battle Square).

|   Use Toxic Barf on Rnd Actor other than Self                               |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Zolokalter:                          |   POWER req for Overflow:   |
|                                                 |                             |
| Zolokalter is found in Battle Square:           |  Base Damage Overflow: 156  |
|  Set - 3  (After Highwind)     Battle - 6       |  Rnd Var Overflow  3x: 104  |
|                                                 |  Rnd Var Overflow  4x:  78  |
| The Zolokalter's AI Script has been written     |  Rnd Var Overflow  6x:  52  |
|  in a way that seems strange, and it does       o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  not appear to be a mistake. If attacked                                    |
|  Physically, it will target a Player/Enemy at random (other than itself)    |
|  and use Toxic Barf on that actor. The existence of the script for it to    |
|  not target itself suggests that the Zolokalter's design was intentional.   |
| The Zolokalter will only ever use Toxic Barf if there is at least one       |
|  Player without Poison; equip the Ribbon, Star Pendant and Fairy Ring to    |
|  render the enemy harmless.                                                 |
| If another enemy becomes inflicted with Poison, the Zolokalter will use     |
|  its <Bite> attack on them. Try to inflict Headbomber it appears alongside  |
|  with Poison to effectively turn the Zolokalter into an ally.               |
| The Zolokalter has low HP, so it should not survive more than a few         |
|  Physical blows before it is killed.                                        |
| The large groups in which the Zolokalter appears in makes for excellent     |
|  Battle Spoils.                                                             |
| The Zolokalter is encountered in an area that cannot be revisited; once     |
|  you progress past a certain point in the game, you can no longer fight     |
|  the enemy (although you can still encounter it in the Battle Square).      |
\                                                                             /

|  4TH ATTACK: Use Magic Breath on All Target; If Stilva's MP < 75, use     |
|               Jump Attack on Target with Highest Current HP               |
|                                                                           |
|  5TH ATTACK: Use Jump Attack on Target with Highest Current HP            |
|                                                                           |
|  6TH ATTACK: Use Big Red Clipper on Rnd Target                            |
|                                                                           |
|  7TH ATTACK: 1/2 Chance use Big Horn on Rnd Target                        |
|              1/2 Chance use Big Red Clipper on Rnd Target                 |
|                                                                           |
|  8TH ATTACK: Use Magic Breath on All Target; If Stilva's MP < 75, use     |
|               Jump Attack on Target with Highest Current HP               |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Stilva:                          |   POWER req for Overflow:   |
|                                             |                             |
| Stilva is found in Battle Square:           |  Base Damage Overflow: 156  |
|  Set - 3  (After Highwind)     Battle - 6   |  Rnd Var Overflow  3x: 104  |
|                                             o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Stilva is an extremely worrisome enemy,                               |
|  seeing as Magic Breath has the capability to wipe your Party out in one  |
|  hit. Keep Big Guard up at all times! Stilva will only have enough MP for |
|  four casts of Magic Breath, so use Magic Hammer to stop it from using the|
|  Attack.                                                                  |
| If you are under-levelled, you should equip the necessary defences; Magic |
|  Breath uses multiple Elements, so any defence from Fire, Ice or Lightning|
|  will help defend against the Attack. Equip the Circlet to gain a boost in|
|  MDefence, and if necessary, inflict everyone with Sadness.               |
| You should take the time to learn Magic Breath now, as you will not get   |
|  another opportunity to learn the Skill until you get to Disc 3 from the  |
|  Parasite. In addition to this, the Stilva will be your last source to    |
|  learn Trine if you have already defeated Godo. You will have to          |
|  manipulate the Stilva to have it cast Trine; a Lv 41 Cloud would have a  |
|  52% chance to manipulate it.                                             |
| The Stilva has low HP, so you can use Magic Breath to kill it in one.     |
|  Alternatively, you can use L4 Suicide to cripple it, to then follow up   |
|  with the Morph Command to obtain a Holy Torch. Your Deathblow chance will|
|  be roughly 62%.                                                          |
| You should try to obtain at least one Holy Torch while in Gaea's Cliffs;  |
|  the only other way to obtain the item is from the Unknown 3 in the Sunken|
|  Gelnika as a 4.69% drop rate. You can also try morph the Evilhead, who   |
|  are susceptible to L4 Suicide also. The item will "Use "DeSpell" on all  |
|  opponents"; however, unlike the DeSpell ability, the item it will *not*  |
|  cure Death Force or Resist, and it *will* cure Small.                    |
| If you Morph the Stilva then you will still have a chance of receiving the|
```

```
|  valuable Tent as a Drop.                                                    |
| The Stilva cannot be Back-Attacked or Side-Attacked, meaning that one        |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.              |
| The Stilva is encountered in an area that cannot be revisited; once you      |
|  progress past a certain point in the game, you can no longer fight the      |
|  enemy (although you can still encounter it in the Battle Square).           |
\                                                                              /

No Manipulate Attacks!

Icicle's ATTACKS:

Attack 1: Icicle Drop [2A9]
Physical
Target: One Opponent
Element: Hit
Att%: 90
Power: 48
Base Damage: 831 HP
Can't Cover

Attack 2: <Crack> [2AA]
Physical
Target: Self
Element: Hit
Att%: 90
Power: 48
Base Damage: 831 HP
Death Animation
Damage Value
Hidden

Icicle's BATTLE PLAN: (Repeats)

SETUP: Disable default Death Handling

COUNTER: [All Physical and Magical Attacks]

1/2 Chance: Use Icicle Drop on Rnd Target
1/2 Chance: Do nothing

DEATH: Use <Crack> on Self, remove Evilhead from Battle, Evilhead leaves no rewards, end Battle

Notes On Icicle:

The Icicle cannot be randomly encountered, and is therefore classed as a Mini-Boss of sorts, although it poses no threat to the

POWER req for Overflow:

Base Damage Overflow: 158
Rnd Var Overflow 3x: 105

| Player. |
| The Icicle will not attack the Player unless provoked, in which case it will have a 50% of countering by using its damaging Icicle Drop Attack. |
| You will have approximately a 62% chance of succeeding with Deathblow, although, given the Icicle's low Lv, your regular attacks will have just less than 10% chance of landing a Critical hit. Beta will kill it in one, as will Demi2, Laser or a T/S Bomb. |
| If you kill the Icicle before taking out the Evilhead, the Battle will end and you will not reap the spoils from the Evilhead. It is beneficial to the Player to kill the Evilhead, as the end-of-battle rewards are quite |
| Feel free to use Magic Hammer to restore your MP, as the Icicle has no need for its own. |
| The encounters with the Icicle *can* be escaped, unlike most forced encounters in the game. You will not be able to Pre-Emp the Icicle, seeing as random encounters are disabled for the screen you meet them on. |

|                                                                         |
```

2ND ATTACK: Use <Dragon Fang> on Rnd Target

Follow-Up:

Blue Dragon's HP > 75%: 1/5 Chance use <Dragon Fang> on Rnd Target
4/5 Chance do nothing

Blue Dragon's HP <= 75%: 1/4 Chance use <Dragon Fang> on Rnd Target
3/4 Chance do nothing

Blue Dragon's HP <= 50%: 1/3 Chance use <Dragon Fang> on Rnd Target
2/3 Chance do nothing

Blue Dragon's HP <= 25%: 1/2 Chance use <Dragon Fang> on Rnd Target
1/2 Chance do nothing

3RD ATTACK: Use Tail Attack on Rnd Target

Follow-Up:

Blue Dragon's HP > 75%: 1/5 Chance use Tail Attack on Rnd Target
4/5 Chance do nothing

Blue Dragon's HP <= 75%: 1/4 Chance use Tail Attack on Rnd Target
3/4 Chance do nothing

Blue Dragon's HP <= 50%: 1/3 Chance use Tail Attack on Rnd Target
2/3 Chance do nothing

Blue Dragon's HP <= 25%: 1/2 Chance use Tail Attack on Rnd Target
1/2 Chance do nothing

After 3rd Attack: Jump to 3rd Attack for next turn

4TH ATTACK: Use Blue Dragon Breath on Target with Highest Current HP; If
Blue Dragon's MP < 20, use Tail Attack on Rnd Target

After 4th Attack:

Blue Dragon's HP > 75%: 4/5 Chance jump to 1st Attack for next turn
1/5 Chance jump to 2nd Attack for next turn

Blue Dragon's HP <= 75%: 3/4 Chance jump to 1st Attack for next turn
1/4 Chance jump to 2nd Attack for next turn

Blue Dragon's HP <= 50%: 2/3 Chance jump to 1st Attack for next turn
1/3 Chance jump to 2nd Attack for next turn

Blue Dragon's HP <= 25%: 1/2 Chance jump to 1st Attack for next turn
1/2 Chance jump to 2nd Attack for next turn

5TH ATTACK: Use Great Gale on All Targets

After 5th Attack: 1/2 Chance jump to 1st Attack for next turn
1/2 Chance jump to 2nd Attack for next turn

```

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Blue Dragon:                      |   POWER req for Overflow:       |
|                                              | 1st Stage:                      |
| Blue Dragon is found in Battle Square:       |  Base Damage Overflow: 166      |
|  Set - 3  (After Highwind)     Battle - 7    |  Rnd Var Overflow  3x: 111      |
|                                              | 2nd Stage:                      |
|  0 Dragon Force used:  Def = 86   MDef = 240 |  Base Damage Overflow: 184      |
|  1 Dragon Force used:  Def = 129  MDef = 360 |  Rnd Var Overflow  3x: 123      |
|  2 Dragon Force used:  Def = 172  MDef = 480 | 3rd Stage:                      |
|                                              |  Base Damage Overflow: 208      |
| The Attack Great Gale is subject to Split    |  Rnd Var Overflow  3x: 139      |
|  Damage for the damage calculations;         o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  however, the Status inflicted via Great                                       |
|  Gale is *not* subject to Split Damage.                                        |
| The Blue Dragon is a formidable opponent; you should be cautious when          |
|  facing the enemy, particularly if you are low levelled. <Dragon Fang> can     |
|  hit for over 1500 HP, so be sure to have your characters in the Back Row,     |
|  and keep Big Guard up at all times. Inflict your characters with Sadness      |
|  should you need the extra defence.                                            |
| The Blue Dragon will use <Dragon Fang> twice consecutively more often when     |
|  when its HP is low, so be sure to take it out quickly. It can also use        |
|  Tail Attack consecutively, which will hit for around 800 HP.                  |
| Avoid using Magic Breath, as the Blue Dragon will absorb the damage. Stick     |
|  to using Beta, which should hit for around 1200 HP, unless it has used        |
|  Dragon Force once, in which case Beta will hit for 650+. If Dragon Force      |
|  has been used twice, Beta will hit for less than 175, so just use             |
|  Physical blows if this happens.                                               |
| The 'Blue Dragon Breath' attack deals No Split Damage, meaning the             |
|  damage will *not* be reduced to 66% of its normal output. The damage          |
|  dealt is via the Attack minor, so that should not be a worry.                 |
| Be sure to exploit the Blue Dragon's weakness to Slow and Stop be putting      |
|  Added Effect+Time on your Physical attacker's Weapon. You can also use        |
|  Bio2 or Bad Breath to inflict it with Poison.                                 |
|                                                                                |
| You should try to fight at least one Blue Dragon on a playthrough; the         |
|  Dragon Armlet that it carries has a 100% chance of being dropped, and is      |
|  a piece of Armour with six slots. It will halve all Ice/Fire/Lightning        |
|  based attacks, and you will have already obtained one from the Red            |
|  Dragon; you can also obtain them much later in the game from the Dark         |
|  Dragon on Disc 3 by stealing from them. Your surplus stock can be sold        |
|  for 1900 gil a piece.                                                         |
| If an attack (such as Magic Breath) uses more than one of the Elements         |
|  defended from via the Dragon Armlet, the damage will only be halved           |
|  *once*, and will not stack. These pieces of Armour will help for the          |
|  upcoming Battle with the Schizos.                                             |
| When the Blue Dragon uses its Great Gale attack, an MP check is perform;       |
|  if this check fails, it will use <Dragon Fang> on a random target. Seeing     |
```

```
|  as Great Gale costs 0 MP, the check can never fail.                          |
| The Blue Dragon carries the Enemy Skill Dragon Force, which is a very         |
|  useful Enemy Skill to learn. However, you cannot manipulate the Blue         |
|  Dragon, therefore you will not be able to learn the Skill until you reach    |
|  Disc 3, by manipulating the Dark Dragon.                                     |
| When the Blue Dragon reaches its third Attack, it will continue to loop       |
|  the attack until its HP is reduced below the threshold to use its fifth      |
|  Attack. After which, if it reaches its third Attack once more, it will       |
|  continue to loop the attack until its HP drops below the next threshold.     |
| The Blue Dragon cannot be Back-Attacked or Side-Attacked, meaning that one    |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.               |
| The Blue Dragon is encountered in an area that cannot be revisited; once      |
|  you progress past a certain point in the game, you can no longer fight       |
|  the enemy (although you can still encounter it in the Battle Square).        |
\                                                                               /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Cuahl:                          |   POWER req for Overflow:      |
|                                            |                                |
| Cuahl is found in Battle Square:           |  Base Damage Overflow: 150     |
|  Set - 3  (After Highwind)     Battle - 3  |  Rnd Var Overflow  3x: 100     |
|                                            |  Rnd Var Overflow  4x:  75     |
| The Cuahl is not a very tough opponent,    |  Rnd Var Overflow  6x:  50     |
|  although, it will use its fairly powerful o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Blaster attack when attacked Physically.                                   |
|  They have low HP, so two Physical blows should be enough to kill them if   |
|  you are strong enough, or, Trine should kill if not cripple them.          |
| The Cuahl will never attack you normally. When they take damage, they will  |
|  counter attack accordingly, but only once their ATB gauge has filled up.   |
|  Once they have performed their Counter Attack, they will remain idle       |
|  until they have been attacked once more.                                   |
| Your Deathblow chance will be approximately 62%, so your Physical attacker  |
|  can use Deathblow to try to kill them in one hit.                          |
| A flaw exists with the Cuahl's AI Script. When it takes Magical damage, it  |
|  counter physically, and when it take Physical damage, it counters          |
|  magically. This within itself does not suggest a design flaw; however,     |
|  the fact that it will use its Magical attack on the target with the        |
|  lowest (Physical) Defence, and its Physical attack on the target with the  |
|  lowest (Magical) defence suggests that the wrong attack had been assigned  |
|  for both instances.                                                        |
| The Cuahl is encountered in an area that cannot be revisited; once you      |
|  progress past a certain point in the game, you can no longer fight the     |
|  enemy (although you can still encounter it in the Battle Square).          |
\                                                                             /

[2C5] Magical
Target: One Opponent
Element: Fire/Ice
Att%: 255
Power: 55
MP Cost: 10 MP
Base Damage: 1711 HP

Attack 4: <Tremor>
[2C6] Magical
[2C7]
Target: All Opponents
No Split Damage
Element: Earth
Att%: 255
Power: 24
MP Cost: 8 MP
Base Damage: 747 HP

Schizo(Right)'s BATTLE PLAN: (Repeats)

SETUP: Disable default Death Handling

1ST ATTACK: Use <Right Breath> on Rnd Target
2ND ATTACK: Use <Right Breath> on Rnd Target
3RD ATTACK: Use <Right Breath> on Rnd Target
4TH ATTACK: Skip a turn
5TH ATTACK: Skip a turn

6TH ATTACK:

Schizo(Left) does not have Death: Use <Double Breath> on Rnd Target

Schizo(Left) has Death: Use <Right Breath> on 2nd Target; If 2nd has

```
|                          Death, do nothing                                 |
|               Follow-Up: Use <Right Breath> on 1st Target; If 1st has      |
|                          Death, do nothing                                 |
|               Follow-Up: Use <Right Breath> on 3rd Target; If 3rd has      |
|                          Death, do nothing                                 |
|                                                                            |
|                                                                            |
|  COUNTER: [All Physical and Magical Attacks]                               |
|                                                                            |
|   1ST COUNTER: Do nothing                                                  |
|   2ND COUNTER: Do nothing                                                  |
|   3RD COUNTER: Do nothing                                                  |
|   4TH COUNTER: Use <Tremor> on All Targets                                 |
|                                                                            |
|                                                                            |
|  DEATH: Use <Right Breath 2> on All Targets                                |
|         If Schizo(Left) does not have Death, do not end Battle             |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Schizo(Right):                    |   POWER req for Overflow:   |
|                                              |                             |
| The "1st Target", "2nd Target" & "3rd        |  Base Damage Overflow: 154  |
|  Target" refers to the right-most, central,  |  Rnd Var Overflow  3x: 103  |
|  and left-most characters, respectively.     o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Schizo Battle can be fairly tough, even                                |
|  if you are not under-levelled. Setting up the right equipment is key to   |
|  to this Battle, as all of Schizos attacks are Element-based. Equip the    |
|  Aurora Armlet, Fire Armlet and Bolt Armlet, or, if you are short on one   |
|  of those three, then the Dragon Armlet work well. Equip each character    |
|  with a Fire Ring, Ice Ring and Bolt Ring also, so that each character has |
|  (at least) two Elemental defence in place. You could also equip the       |
|  Elemental Materia with Earth for extra defence.                           |
| As with all Boss Battles, keep your Big Guard up, and give your characters |
|  Sadness if you are low-levelled. Put all of your short-ranged characters  |
|  in the Front Row, as Magical attacks are not affected by Row position,    |
|  and all of Schizos attacks are Magical.                                   |
| Unlike some other Battles, you will need to kill both variants in order    |
|  for the Battle to end. Both enemies have the same stats, and both attack  |
|  patterns are pretty much identical. Seeing as all of their moves cost MP, |
|  you could use Magic Hammer four times on each enemy to render them        |
|  harmless. They will still use their Death Counter, even without MP.       |
|                                                                            |
| Two of Schizos attacks will hit for No Split Damage, meaning that the      |
|  damage output will not be reduced to 66% of its normal output. You should |
|  be very wary of this, and be ready to use a Megalixir if you need to. All |
|  of Schizos attacks will have a 100% chance of connecting.                 |
| Every fourth attack Schizo(Right) will use a powerful counter attack. Be   |
|  very wary of this, and be sure to watch your Barrier/MBarrier meters.     |
| Do not use Magic Breath or Beta against Schizo, as they will just absorb   |
|  the damage. Trine will hit for 1050+ HP, and your Physical attacks should |
|  hit for around 550+. Your Deathblow chance will be approximately 62%, so  |
|  make use of the Added Cut Materia on your Physical attacker combined with |
|  Deathblow.                                                                |
| Be sure to steal the Protect Ring from Schizo(Right); an Accessory that    |
|  automatically sets up Barrier and MBarrier. A Lv 43 Cloud would have a    |
|  10.94% chance of stealing from the Schizo; try to take out the Left       |
|  variant first to make the steal attempts easier. You will be able to      |
|  obtain the Protect Ring later in the game on Disc 3 by morphing the       |
|  Movers.                                                                   |
|                                                                            |
| Most of Schizo's attacks have been duplicated; one will be used when both  |
```

```
|  variants are alive, and one used when one has died.                          |
| Once Schizo(Right)'s counterpart has had its HP drop to below 75%, the        |
|  right variant should have behaved slightly differently; however, no AI       |
|  Script has been written past the check for Schizo(Left)'s HP.                |
| Once you defeat Schizo, the game falls victim to a bug whereby the "Can't     |
|  Escape" Flag remains active post-battle. This flag will remain active        |
|  for every random encounter you face, until you make the transition to        |
|  another Field Map. If you are playing on any of the PC versions, then        |
|  this glitch will also extend to a Game Over; should Schizo be the cause      |
|  of your demise, you will find that the "Can't Escape" Flag will remain       |
|  active after having loaded your save file, until you make a screen           |
|  transition. This is the same bug that allows for Yuffie Warping.             |
| Schizo(Right) is immune to Seizure, which isn't necessary seeing as there     |
|  is no way for the Player to inflict an enemy with Seizure. Schizo(Right)     |
|  is one of 86 enemies that are immune to Seizure. It is also immune to        |
|  Peerless, along with 104 other enemies.                                      |
\                                                                               /

|   4TH COUNTER: Do nothing                                                 |
|   5TH COUNTER: Use <Tremor> on All Targets                                |
|                                                                           |
|                                                                           |
|  DEATH: Use <Left Breath 2> on All Targets                                |
|         If Schizo(Right) does not have Death, do not end Battle           |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Schizo(Left):                  |   POWER req for Overflow:     |
|                                           |                               |
| The "1st Target", "2nd Target" & "3rd     |  Base Damage Overflow: 154    |
|  Target" refers to the right-most, central,  |  Rnd Var Overflow  3x: 103 |
|  and left-most characters, respectively.  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Schizo Battle can be fairly tough, even                               |
|  if you are not under-levelled. Setting up the right equipment is key to  |
|  to this Battle; see the notes on Schizo(Right) for details on how to     |
```

```
|  setup for this Battle.                                                    |
| Both variants of Schizo are pretty much identical; the only thing that     |
|  varies with Schizo(Left) is the fact that it will use its Counter Attack  |
|  every five hits, instead of four. The Left variant also uses lightly      |
|  different Elements, but if you have set up your Elemental defences as     |
|  described above, this shouldn't matter.                                   |
| As with its counterpart, Schizo(Left) contains duplicates for most of its  |
|  attacks; one used for when its counterpart is alive, and one when it is   |
|  dead.                                                                     |
| Once Schizo(Left)'s counterpart has had its HP drop to below 75%, the Left |
|  variant should have behaved slightly differently; however, no AI Script   |
|  has been written past the check for Schizo(Right)'s HP.                   |
| Schizo(Left) is immune to Seizure, which isn't necessary seeing as there   |
|  is no way for the Player to inflict an enemy with Seizure. Schizo(Left)   |
|  is one of 86 enemies that are immune to Seizure. It is also immune to     |
|  Peerless, along with 104 other enemies.                                   |
\                                                                            /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Gigas:                          |   POWER req for Overflow:      |
|                                            |                                |
| Gigas is found in Battle Square:           |  Base Damage Overflow: 164     |
|  Set - 3  (After Highwind)     Battle - 3  |  Rnd Var Overflow  3x: 109     |
|                                            o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| As the name suggests, the Gigas is an                                         |
|  incredibly large foe. It is also extremely rare; it appears on one small     |
|  screen with a 30% encounter rate. The *only* way for the Player to obtain    |
|  the elusive Earth Mallet (casts Quake3 for 2560 Base Damage) is from the     |
```

```
|  Gigas as a 9/64 drop rate, making it permanently missable.                 |
| You can also steal Gigas Armlets from the Gigas, which boosts the wearer's |
|  Strength by +30; however, you will not obtain the Earth Mallet if you     |
|  successfully steal from them. You will have already obtained one Gigas    |
|  Armlet from Demons Gate in the Temple of The Ancients.                     |
| While the Gigas' Physical attacks are not massively devastating, it will   |
|  use them consecutively more often when its HP is low, so watch out.       |
|  Quake3 can hit for a decent amount of damage, however, the attack will be |
|  subject to Split Damage, and will only deal around 1400 HP. This can      |
|  still cause you a Game Over if you are not careful, so be sure to use Big |
|  Guard.                                                                     |
| The Gigas does not have massive amounts of HP, making him less formidable  |
|  than it could have been. Two casts of Beta should be enough to wipe it    |
|  out. Alternatively, cast L4 Suicide and follow up with a normal blow.     |
| Be mindful of the fact that the Gigas will counter using <Squish> when     |
|  attacked Magically, so use Frog Song to inflict it with Sleep if you wish |
|  to use Magic, as only Physical attacks will cure Sleep.                    |
| Feel free to use Magic Hammer to stop the Gigas from being able to use     |
|  Quake3 altogether, and to replenish some of your own MP. Your Deathblow   |
|  chance will only be roughly 50%, so don't bother using it.                 |
| The Gigas cannot be Back-Attacked or Side-Attacked, meaning that one       |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.             |
| The Gigas is encountered in an area that cannot be revisited; once you     |
|  progress past a certain point in the game, you can no longer fight the    |
|  enemy (although you can still encounter it in the Battle Square).          |
\                                                                             /

|   Grenade's HP <= 50%: <Bodyblow> Att% = 90                                |
```

| |
| The Grenade is a rare enemy, and can only be encountered on one small |
| screen at the edge of the Whirlwind Maze. They have the same Defence as |
| their counterparts, the Bomb found in Mt. Corel, and they also have a |
| very similar Battle Plan. |
| As with the Bomb, the Grenade will use a devastating counter if it is |
| still alive once its HP has dropped below 25%, and will then flee the |
| Battle leaving no EXP/AP/Gil. The biggest difference between the two |
| enemies is that the Grenade will have a 50% chance of using Bomb Blast |
| once its HP drops below 50%, causing upwards of 3500 HP to your Players |
| in the Front Row. |
| DO NOT open with L4 Suicide, as the Grenade will Counter with Bomb Blast |
| that way. Instead, use either Frog Song or Bad Breath to first inflict |
| them Sleep, then follow up with L4 Suicide. Matra Magic or Physical |
| attacks (or Morph) can then be used to finish them off. |
| Alternatively, Trine will deal 1100+ HP, so two blasts of should kill them |
| off efficiently. Avoid using Beta and Magic Breath, as they will absorb |
| the Fire Element. Your Deathblow chance will be roughly 65%; however, |
| unless you have Cloud set up as your Physical attacker, it is likely |
| that a Deathblow shot will not be enough to kill them, trigger the use of |
| Bomb Blast as a Counter. |
| Right Arms will no longer be your strongest Battle Item, however, they |
| still have their uses. You can try to steal from as the Battle begins; a |
| Lv 44 Cloud would have a 14.06% chance of stealing from the Grenade. |
| Once you have successfully stolen from them, you can use the Bad Breath/ |
| L4 Suicide method as mentioned above. |
| The Grenade is one of a number 'elevated' enemies that Nullifies the Earth |
| Element, but will no take double damage from Wind. |
| The Grenade is encountered in an area that cannot be revisited; once you |
| progress past a certain point in the game, you can no longer fight the |
| enemy. |

| The Gremlin is not a tough enemy. You will   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  likely kill it in one with a successful                                  |
|  Deathblow, which will have approximately a 61% chance of connecting.     |
|  Trine will not kill them in one; however, Beta will.                     |
| You could make use of L4 Suicide to render them harmless, as they are     |
|  vulnerable to the Small status. The Sculpture they appear alongside are  |
|  also susceptible to L4 Suicide ad Small.                                 |
| The Gremlin is the only enemy in the game that you can steal Tents from.  |
|  You should try to steal from every Gremlin you encounter; a Lv 44 Cloud  |
|  would have a 48.44% chance of stealing from them.                        |
| The Gremlin's attacks deal low to medium damage at best. They have no use |
|  for their MP, so feel free to use Magic Hammer to replenish your own.    |
| You should also have been able to encounter 2x Gremlin alongside 1x       |
|  Killbin on the final "Blinking Eye" screen as a 26.6% encounter chance.  |
|  However, it is impossible to face the enemies on that screen without the |
|  use of hacks.                                                            |
| The Gremlin is encountered in an area that cannot be revisited; once you  |
|  progress past a certain point in the game, you can no longer fight the   |
|  enemy (although you can still encounter it in the Battle Square).        |
\                                                                           /

|                                                                           |
|    Ironite's MP  < 8: Use Flying Upper on Rnd Target with Sleep; If no    |
|                       Targets have Sleep, use <Bodyblow> on Rnd Target    |
|                                                                           |
|   All Targets with Sleep: Use Flying Upper on Rnd Target                  |
|                                                                           |
|                                                                           |
|  2ND ATTACK: Use Flying Upper on Rnd Target with Sleep; If no Targets have |
|              Sleep, select Rnd Target                                     |
|                                                                           |
|  3RD ATTACK: Same as 2nd Attack                                           |
|                                                                           |
|  4TH ATTACK:                                                              |
|                                                                           |
|   At least one Target has Sleep: Use Flying Upper on Rnd Target with Sleep |
|                                                                           |
```

```
|   No Targets with Sleep:                                                    |
|                                                                             |
|    Use Sleepel on Rnd Target without Sleep; If Ironite's MP < 8, use        |
|     <Bodyblow> on Rnd Target without Sleep                                  |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Ironite:                          |   POWER req for Overflow:    |
|                                              |                              |
| Ironite is found in Battle Square:           |  Base Damage Overflow: 156   |
|  Set - 3  (After Highwind)     Battle - 6    |  Rnd Var Overflow  3x: 104   |
|  Set - 3  (After Highwind)     Battle - 7    o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|                                                                             |
| The Ironite cannot inflict your Party with much damage, however, they can   |
|  inflict you with Sleep, which can prove annoying. Use Ribbons to defend    |
|  from this. They will always use Flying Upper to cure an inflicted          |
|  character.                                                                 |
| Your Deathblow chance will be approximately 64%, and a successful blow      |
|  should knock out half of their health. Two casts of Trine will kill them,  |
|  or, you could cast Beta to cripple them. Magic Breath will one-hit them,   |
|  but shouldn't be necessary.                                                |
| Feel free to use Magic Hammer to deplete its MP, stopping it from casting   |
|  Sleep.                                                                     |
| You should also have been able to encounter 1x Ironite alongside 2x Wind    |
|  Wing on the final "Blinking Eye" screen as a 28.1% encounter chance.       |
|  However, it is impossible to face the enemies on that screen without the   |
|  use of hacks.                                                              |
| The Ironite is one of a number of enemies that are elevated above the       |
|  ground, but will not take double damage from the Wind Element, nor will    |
|  it nullify Earth.                                                          |
| The Ironite cannot be Back-Attacked or Side-Attacked, meaning that one      |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.             |
| The Ironite is encountered in an area that cannot be revisited; once you    |
|  progress past a certain point in the game, you can no longer fight the     |
|  enemy (although you can still encounter it in the Battle Square).          |
\                                                                             /

1/2 Chance use Fire Shell on Rnd Target
Follow-Up: Use Fire Shell on Rnd Target
Follow-Up: Use Fire Shell on Rnd Target

Notes On Sculpture:	POWER req for Overflow:
Sculpture is found in Battle Square:	Base Damage Overflow: 150
Set - 3 (After Highwind) Battle - 6	Rnd Var Overflow 3x: 100

The Sculpture is not a strong enemy, and with a very low Defence value, they pose little threat. Beta should kill them in one hit, as will your Deathblow strikes, which will have a 64% (approx) chance of connecting.

You could also use L4 Suicide to render them harmless, as they the Sculpture are vulnerable to Small. The Gremlin they appear alongside are also susceptible to L4 Suicide (and you should be stealing Tents from every Gremlin you encounter).

The Sculpture is one of two Enemies that will be instantly killed with the use of the Holy Element, the other being the Ghost. Equip Elemental + Alexander on your weapon to instantly kill the enemy.

The Sculpture has no use for its MP, so feel free to cast Magic Hammer to restock your own supply of MP.

The Sculpture cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

The Sculpture is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy (although you can still encounter it in the Battle Square).

|   Wind Wing's HP <= 25%: Jump to 1st Attack for next turn the first time |
|                          Wind Wing's HP drops below 25%                  |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Wind Wing:                     |   POWER req for Overflow:    |
|                                           |                              |
| Wind Wing is found in Battle Square:      |  Base Damage Overflow: 156   |
|  Set - 3  (After Highwind)     Battle - 6 |  Rnd Var Overflow  3x: 104   |
|  Set - 3  (After Highwind)     Battle - 7 |  Rnd Var Overflow  4x:  78   |
|                                           |  Rnd Var Overflow  6x:  52   |
| White Wind will have a 100% chance of curing o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  the following Statuses: Sleep, Poison,                                  |
|  Confusion Silence, Slow, Stop, Frog, Small, Slow-numb, Petrify, Berserk,|
|  Paralyzed, Darkness, Death Force and Resist.                            |
| You cannot learn White Wind from the Wind Wing by manipulating it, as it |
|  does not contain the attack in its Manipulate list. You can, however,   |
|  exploit the fact that it susceptible to Confusion. When an enemy becomes|
|  confused, they will have their 'Enemy' and 'Ally' flags reversed, so it  |
```

```
|  will instead use White Wind on the Party.                                  |
| For the second and last time in the game, the Player will be faced with     |
|  the deadly Aero3 ability. The Wind Wing has a lower Magic stat to Rapps,   |
|  and is also lower-levelled, so the Base Damage is lower. You should be     |
|  able to survive the attack, but use Big Guard to be on the safe side.      |
| The Wind Wing are not difficult to defeat. Simply cast L4 Suicide on them   |
|  to render them harmless, or, use Deathblow to cripple them. Your           |
|  Deathblow chance will be roughly 63%. Beta should just about kill them in  |
|  one. You could also use Magic Hammer on them four times to stop them from  |
|  casting Aero3 altogether.                                                  |
| You can encounter the Wind Wing endlessly on the three "Wind Barrier"       |
|  screens. The Run Value will always be three for these battles, meaning     |
|  you will not be able to flee as easily.                                    |
| You should also have been able to encounter 2x Wind Wing alongside 1x       |
|  Ironite on the final "Blinking Eye" screen as a 28.1% encounter chance.    |
|  However, it is impossible to face the enemies on that screen without the   |
|  use of hacks.                                                              |
| The Wind Wing is one of a number of enemies that are elevated above the     |
|  ground, but will not take double damage from the Wind Element, nor will    |
|  it nullify Earth.                                                          |
| The Wind Wing is encountered in an area that cannot be revisited; once you  |
|  progress past a certain point in the game, you can no longer fight the     |
|  enemy (although you can still encounter it in the Battle Square).          |
\                                                                             /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Dragon Rider:                  |   POWER req for Overflow:    |
|                                           |                              |
| Dragon Rider is found in Battle Square:   |  Base Damage Overflow: 164   |
|  Set - 3  (After Highwind)     Battle - 7 |  Rnd Var Overflow  3x: 109   |
|                                           o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Dragon Rider is a rare enemy fought on                                 |
|  one screen only, and you may go an entire playthrough without ever facing |
|  the enemy. They are relatively tough, so put your characters in the Back  |
|  Row if you are under levelled, and make use of Big Guard also.            |
| One way you could deal with the Dragon Rider is to inflict it with Berserk |
|  via the use of a War Gong or the Mystify Materia. This way it will only   |
|  be able to use its 'Dual Attack' attack, which will be weaker than its    |
|  other powerful abilities.                                                 |
| Depending on your stats, two casts of Beta will either be enough to kill   |
|  it, or cripple it. Magic Breath will deal over 2500 HP, just be mindful   |
|  of its powerful Counter Attack when using Magical spells.                 |
| Your Deathblow chance will only be roughly 51%, so it is not worth using.  |
```

```
|  Avoid using Aqualung, also, as the Dragon Rider will negate the damage    |
|  taken.                                                                    |
| If you are able to, try to Morph the Dragon Rider into a Mind Source       |
|  (permanently increases MDefence). It has 3500 HP, so cast Beta and watch  |
|  to see how much damage it does. If it inflicts less than 1700, then you   |
|  should be OK to cast it a second time with the same character without     |
|  killing the enemy; just be mindful of the way in which Random Variation   |
|  works. A blow that deals 1700 on one turn could deal 1800 on the next,    |
|  killing the enemy.                                                        |
| If you face the Dragon Rider in the Battle Square without the ability to   |
|  use your Command Materia, then consider using a Bird Wing which will deal |
|  between 1492 - 1592 HP. It will take four Bird Wings followed by a few    |
|  Physical blows to kill it.                                                |
| Equip Elemental+Choco/Mog on your weapon to exploit the Dragon Rider's     |
|  weakness to Wind (as with all other 'elevated' enemies). Avoid Earth.     |
| The Dragon Rider cannot be Back-Attacked or Side-Attacked, meaning that    |
|  one cannot perform Random Variation Overflow with 4x or 6x Damage.        |
| The Dragon Rider is encountered in an area that cannot be revisited; once  |
|  you progress past a certain point in the game, you can no longer fight    |
|  the enemy (although you can still encounter it in the Battle Square).     |
\                                                                            /

```

3RD ATTACK: Same as 2nd Attack

4TH ATTACK:

At least on Enemy's HP < 33%:

Use <Cure2> on All Allies; If Killbin's MP < 20, use <Aspil> on Target with Highest Current MP

All Enemy's HP >= 33%:

1/2 Chance: Use <Fire2> on Rnd Target; If Killbin's MP < 22, use <Aspil> on Target with Highest Current MP

1/2 Chance: Use <Ice2> on Rnd Target; If Killbin's MP < 22, use <Aspil> on Target with Highest Current MP

Notes On Killbin:

The Killbin is a very peculiar opponent, and only appears on one screen in the entire game as a 13.7% encounter chance, making it a rare enemy.

While the Killbin's attack pattern remains constant, the enemy will appear to perform a 'Dice Roll' each time it uses its attack, and the face that is shown *on the topside* will correlate to the attack used:

- Yellow Swords <x>
- Pink Heart <Cure2>
- Red Flame <Fire2>
- Blue Ice <Ice2>
- Blue Syringe <Aspil>
- Gold Clock <Slow>

They are not the toughest of enemies, and two casts of Beta should be enough to kill them. Your Deathblow chance will be roughly 54%. Do not try to cast Magic Hammer on them, as they will just use <Aspil> on replenish their own stock. Note that <Aspil> costs 1 MP, so if you were to fully deplete the Enemy's MP, then they will not be able to use their Magical abilities.

Should you be lucky enough to encounter the Killbin, be sure to obtain the Spoils they carry. Turbo Ethers make an easy Steal; a Lv 44 Cloud would have a 54.69% chance of stealing from them.

You should also try to Morph Mind Sources from the Killbin (permanently increases MDefence); they are vulnerable to Gravity based attacks, so use Laser and/or Demi2 to sequentially deplete their HP. Your Morph damage should deal over 100 HP for the character with the Champion Belt equipped.

You should also have been able to encounter 1x Killbin alongside 2x Gremlin on the final "Blinking Eye" screen as a 26.6% encounter chance. However, it is impossible to face the enemies on that screen without the use of hacks.

The Killbin cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

The Killbin is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy.

POWER req for Overflow:

Base Damage Overflow: 158

Rnd Var Overflow 3x: 105

```

```
|                1/2 Chance do nothing                                        |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Jenova-DEATH:                    |   POWER req for Overflow:    |
|                                             |                              |
| A flaw exists with Jenova-DEATH's AI Script. |  Base Damage Overflow: 167  |
|  The attack Tropic Wind is instructed to     |  Rnd Var Overflow  3x: 112  |
|  target all opponents via the AI Script;     o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  however, the attack properties for Tropic                                  |
|  Wind does not allow for the use of the "Toggle Multiple" flag, which is    |
|  required for any attack that is instructed to target all opponents.        |
| The "1st Target", "2nd Target" & "3rd Target" refers to the right-most,     |
|  central, and left-most characters, respectively.                           |
| As with Jenova-LIFE, this boss sticks to using one main Element; Fire. Set |
|  your characters up with the Dragon Armlet, Fire Armlet, Fire Ring and/or   |
|  Elemental+Ifrit on your Armour. If you are low-levelled, then set the      |
|  usual Big Guard defences in place, although, you shouldn't really need     |
|  it aside from the Haste effect it brings. Use Regen, also.                 |
| Jenova-DEATH will occasionally try to inflict the Player with Silence;      |
|  however, it will never use it if one character is already inflicted with   |
|  the Status. Equip the Ribbons and Added Effect+Seal to defend from this.   |
| Be sure to try to inflict Jenova-DEATH with Slow via the use of the Time    |
|  Materia, or, by using a Spider Web. You can also exploit her weakness      |
|  to Paralyze by using any Dazers you may have.                              |
| Tifa will be a forced Party member for this battle. You should equip her    |
|  with the Dragon Claw and Fire Armlet and make her your Physical Attacker;  |
|  her Deathblow chance will be approximately 67% with this set-up. Be sure   |
|  to link Deathblow with Added Cut.                                          |
| Set Cloud up as your Magical attacker, and give him Magic Plus. Equip       |
|  Neo-Bahamut which can deal over 4000 HP, and Bahamut which will for for    |
|  over 3200. Magic Breath will hit for between 1000 - 1500 HP depending on   |
|  the caster.                                                                |
| The "J-E-N-O-V-A" theme will be heard throughout this Boss Battle, as       |
|  opposed to the regular "Still More Fighting" Boss Theme.                   |
| Jenova-DEATH is immune to Seizure, which isn't necessary seeing as there    |
|  is no way for the Player to inflict an enemy with Seizure. Jenova-DEATH    |
|  is one of 86 enemies that are immune to Seizure. It is also immune to      |
|  Peerless, along with 104 other enemies.                                    |
\                                                                             /

Tonberry's BATTLE PLAN: (Repeats)

SETUP: Start in Stage 2 (Centre Position)

STAGE 1: (Right Position)

Tonberry is at the Back: Use <Move> on Self, move Tonberry forward +1

Tonberry is has moved forward once OR twice:

3/8 Chance: Use <Move Left> on Self, move Tonberry to Centre
5/8 Chance: Use <Move> on Self, move Tonberry forward +1

Tonberry has moved forward three times:

Formation ID is NOT [#956]: (Battle Square Encounter)

1/2 Chance: Use Knife on 1st Target, move Tonberry to Back and Centre; If 1st Target has Death, use <Move Left> on Self, move Tonberry to Centre

1/2 Chance: Use <Move Left> on Self, move Tonberry to Centre

Formation ID is [#956]: (Battle Square Encounter)

Use <Move Left> on Self, move Tonberry to Centre

STAGE 2: (Centre Position)

Tonberry is at the Back: Use <Move> on Self, move Tonberry forward +1

Tonberry is has moved forward once:

1/4 Chance: Use <Move Right> on Self, move Tonberry to Right
1/4 Chance: Use <Move Left> on Self, move Tonberry to Left
1/2 Chance: Use <Move> on Self, move Tonberry forward +1

Tonberry is has moved forward twice:

3/8 Chance: Use <Move Right> on Self, move Tonberry to Right
3/8 Chance: Use <Move Left> on Self, move Tonberry to Left
1/4 Chance: Use <Move> on Self, move Tonberry forward +1

Tonberry has moved forward three times:

Formation ID is NOT [#956]: (Battle Square Encounter)

1/2 Chance: Use Knife on 2nd Target, move Tonberry to Back and Centre; If 2nd Target has Death, move onto remaining 1/2 chance

1/4 Chance: Use <Move Left> on Self, move Tonberry to Left
1/4 Chance: Use <Move Right> on Self, move Tonberry to Right

Formation ID is [#956]: (Battle Square Encounter)

1/2 Chance: Use Knife on Target, move Tonberry to Back and Centre
1/4 Chance: Use <Move Left> on Self, move Tonberry to Left
1/4 Chance: Use <Move Right> on Self, move Tonberry to Right

STAGE 3: (Left Position)

Tonberry is at the Back: Use <Move> on Self, move Tonberry forward +1

Tonberry is has moved forward once OR twice:

3/8 Chance: Use <Move Right> on Self, move Tonberry to Centre
5/8 Chance: Use <Move> on Self, move Tonberry forward +1

Tonberry has moved forward three times:

Formation ID is NOT [#956]: (Battle Square Encounter)

1/2 Chance: Use Knife on 3rd Target, move Tonberry to Back and Centre; If 3rd Target has Death, use <Move Right> on Self, move Tonberry to Centre

1/2 Chance: Use <Move Right> on Self, move Tonberry to Centre

Formation ID is [#956]: (Battle Square Encounter)

```
|     Use <Move Right> on Self, move Tonberry to Centre                        |
|                                                                              |
|                                                                              |
|  COUNTER: [All Physical and Magical Attacks]                                 |
|                                                                              |
|   1ST COUNTER: Do nothing                                                    |
|   2ND COUNTER: Do nothing                                                    |
|   3RD COUNTER: Use Time Damage on last Attacker                              |
|                                                                              |
|    At the start of every turn, the Tonberry's Counter Script will jump      |
|     back to the 1st Counter                                                  |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|

| Tonberry is found in Battle Square:        |  Base Damage Overflow: 153      |
|  Set - 3  (After Highwind)     Battle - 7  |  Rnd Var Overflow  3x: 102      |
|                                            o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The infamous Tonberry was phased out of the                                  |
|  final release of FFVII, and can only be encountered in the Battle Square    |
|  (same as the enemy Ho-chu). It was intended for you to fight this foe on    |
|  the final "Blinking Eye" screen in the Whirlwind Maze as a 45% encounter    |
|  chance. However, the developers decided to go in a different direction      |
|  for that screen, and disabled the Player from being able to traverse on     |
|  it. They overlooked the fact that the Tonberry can only be fought on that   |
|  screen. Its AI Script is coded to behave differently if the enemy is        |
|  randomly encountered, or if it is faced in the Battle Square.               |
| The "1st Target", "2nd Target" & "3rd Target" refers to the right-most,      |
|  central, and left-most characters, respectively. The Tonberry should have   |
|  used Knife on the target that stands in front of it; however, seeing as     |
|  only one character can face it in the Battle Square, it can only use the    |
|  attack when it is in the centre position.                                   |
| Be sure to use Death Force if you face the Tonberry in the Battle Square.    |
|  If you have lost the ability to use Command Materia, then consider using    |
|  a Vaccine. Just be mindful of the fact that a Vaccine will lock in any      |
|  Status incurred on the final handicap reel.                                 |
| The Tonberry will have 30,000 HP while in the Battle Square. His Strength    |
|  and Magic will also have increased, although is a moot point, seeing as     |
|  neither of its attack use the standard Physical/Magical formula.            |
| If you have Death immunity in place, then the Tonberry does not pose a       |
|  threat. Otherwise, use Frog Song or Bad Breath to inflict it with Sleep,    |
|  the use Magic Breath to finish it off. You can also use Dazers to           |
|  Paralyze it, or Stop to inflict it with Stop.                               |
| The Tonberry will rarely use its Time Damage counter attack; it will need    |
|  to have taken damage three times before the Tonberry's ATB fills up, and    |
|  this can be very hard to do naturally within the Battle Square. The         |
|  Tonberry will have to be inflicted with Slow, and you character will have   |
|  to be inflicted with Haste to be able to hit it three times in one turn.    |
|  Be very wary of this Attack if you are facing the Tonberry end-game.        |
| Any Item that you steal from the Battle Square will remain in your           |
|  inventory. If you have the Steal Materia equipped, then you can try to      |
|  steal some Turbo Ethers; A Lv 45 Cloud would have a 15.63% chance of        |
|  stealing from the Tonberry. If you are using Yuffie with the Conformer      |
|  equipped, then you can also try to Morph it into an Elixir.                 |
| The Tonberry cannot be Back-Attacked or Side-Attacked, meaning that one      |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.              |
\                                                                              /

|   Use Sword of Doom on Last Mag Attacker                                 |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On SOLDIER:2nd:                    |   POWER req for Overflow:   |
|                                            |                             |
| The SOLDIER:2nd has a very peculiar way of |  Base Damage Overflow: 156  |
|  selecting its target, which made it       |  Rnd Var Overflow  3x: 104  |
|  difficult to write up the Battle Plan. Take |  Rnd Var Overflow  4x:  78  |
|  note of the fact that it will ONLY clear  |  Rnd Var Overflow  6x:  52  |
|  the target selected after using its normal  o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  attack.                                                                 |
| This means that at the start of the battle it will select a random target, |
|  and keep selecting a random target until it takes damage. If it takes   |
|  damage before its first turn, it will not target its last attacker;     |
|  otherwise it will select the last player to have attacked for its next  |
|  turn only. If its HP has dropped below its threshold to use its 'Spcl   |
|  Attack', it will select its last attacker for *two* turns.              |
| The way this unusual AI Script is set up allows for a rather comical bug. |
|  Should you encounter the 2x SOLDIER:2nd Formation, you could try to     |
|  Manipulate one of them and have it attack its ally. The result would be |
|  that both enemies would have their Counter script triggered, meaning that |
|  they will perpetually attack each other until one of them has died, or  |
|  the Player has intervened.                                              |
| The SOLDIER:2nd have fairly high HP for the first time you encounter them, |
|  however, one blast of Magic Breath should knock out 7/8ths of their HP. |
|  They have no use for their MP, so feel free to use Magic Hammer to      |
|  restock on your own supply of MP.                                       |
| Remedies are a fairly useful Item for the Battle Square (cures abnormal  |
|  statuses). A Lv 39 Barret would have a 10.94% chance of stealing from the |
```

```
|  SOLDIER:2nd. If you were trying to steal from them on your 2nd visit to   |
|  Junon (on Disc 2), then a Lv 46 Cloud would have a 14.06% chance of       |
|  stealing. You can easily buy Remedies from Mideel.                        |
| If you fail the Submarine Mission, you will encounter the SOLDIER:2nd on   |
|  the Red Submarine Dock, past the barking dog. A bug with the encounter    |
|  rate means that you will always fight 3x SOLDIER:2nd here, and as such    |
|  this single screen offers the best EXP per Battle for Disc 2.             |
\                                                                            /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Roulette Cannon:                  |   POWER req for Overflow:         |
|                                              |                                   |
| The Roulette Cannon will never attack the    |  Base Damage Overflow: 156        |
|  Player normally; they will only respond via |  Rnd Var Overflow  3x: 104        |
|  the use of Counter Attacks. If two players  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  are dead, then they will not attack. Be                                       |
|  mindful of the fact that if there are only two characters in your Party,      |
|  the Roulette Cannon will still attack if one character has died.              |
| Three versions of the attack 'Fire Roulette' exists; one used for each         |
|  of the three characters in your Party.                                        |
| The Roulette Cannon has a 100% chance to drop X-Potions as a Battle Spoil,     |
|  which makes them a worth-while enemy to battle.                               |
| The Roulette Cannon consists of two enemies; the 'Pedestal' that it sits       |
|  upon is a unique enemy within itself. Scroll down to the "Extra Enemies"      |
|  section further below for more info on the enemy.                             |
| The Roulette Cannon cannot be Back-Attacked or Side-Attacked, meaning that     |
|  one cannot perform Random Variation Overflow with 4x or 6x Damage.            |
| The Roulette Cannon is immune to Seizure, which isn't necessary seeing as      |
|  there is no way for the Player to inflict an enemy with Seizure. The          |
|  Roulette Cannon is one of 86 enemies that are immune to Seizure. It is        |
|  also immune to Peerless, along with 104 other enemies.                        |
\                                                                                /

ELEMENTS AND STATUSES

ELEMENTS TO USE:

Ice - Sea Worm	- Double	
Wind - Tonadu	- Double	

ELEMENTS TO AVOID:

Earth - Sea Worm	- Absorb	
Earth - Tonadu	- Nullify	
Gravity - Sea Worm	- Nullify	
Water - Tonadu	- Nullify	
Fire - Sea Worm	- Halve	

ELEMENTS USED BY ENEMIES:

NOTE - The Mystery Ninja also uses Fire (Fire Fang; Fire Veil), Lightning (Swift Bolt), Water (Leviathan Scales), and Cut (Fight).

Earth - Sea Worm	- Earthquake	
Earth - Sea Worm	- Sandstorm	
Wind - Tonadu	- Great Gale	
Cut - Goblin	- Fight	
Hit - Under Lizard	- Bodyblow	
Hit - Cactuer	- Mystery Kick	
Hit - Sea Worm	- Crush	
Punch - Dual Horn	- Angle Punch	
Punch - Tonadu	- Claw	
Shoot - Cactuer	- 1000 Needles	

STATUSES TO DEFEND FROM:

NOTE - The Mystery Ninja also uses Slow (Spider Web), and Frog (Impaler).

Sleep - Goblin	- Sleepel	(71%	Inflict)
Frog - Under Lizard	- Petrified Frog	(83%	Inflict)
Slow-numb - Under Lizard	- petrified Frog	(83%	Inflict)
Darkness - Tonadu	- Great Gale	(39%	Inflict)
Darkness - Sea Worm	- Sandstorm	(47%	Inflict)

STATUSES TO USE:

Sleep, Poison, Silence, Slow

North Corel Area Desert 96 Very Low

Average: EXP: 964.3 AP: 116.1 GIL: 2285.7 Enemy QTY: 1.0

This is a unique training area, in that it is the only terrain in the game

whereby the total encounter chance of all normal battles will *not* total 100%; it totals 87.5%. This means that if the chance to receive an battle passes, there will be a 1/8 chance that the battle will be skipped.

[31.3%]	Nrml Bat #1	EXP - 1300	1st Row: 1x Sea Worm	
Pre-Emp OFF		AP - 200

ENEMIES

NOTE - The Under Lizard, Dual Horn and Tonadu from Woodlands Area can be also fought here, however, I will not be duplicating their entries. You can find those enemies within the "Woodlands Area" listings further above. You can also fight the Sea Worm here; scroll down to the "Mideel Area" just below for that listing.

- You can also find the Mystery Ninja here; scroll down to the Mystery Ninja section of "Extra Enemies" for those listings.

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Cactuer:                     |   POWER req for Overflow:        |
|                                         |                                  |
| The Cactuer is no where near as frustrating  |  Base Damage Overflow: 167  |
|  as its other-half; the Cactuar. This        |  Rnd Var Overflow  3x: 112  |
|  version will not flee the Battle; however,  |  Rnd Var Overflow  4x:  84  |
|  it will not leave 10,000 gil as a reward,   |  Rnd Var Overflow  6x:  56  |
|  so there is less incentive to want to       o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  battle the Cactuer.                                                       |
| As with its brother, the Cactuer will have a 7/8 chance of triggering the  |
|  counter script every time any Action is performed, regardless of the      |
|  Target or the Caster. This includes all Actions made by the Cactuer. Even |
|  actions such as Change/Defend will trigger the Counter chance.            |
| Once the Cactuer has set its Evade to 255, all Physical attacks will only  |
```

| have a 1% chance of connecting. Unlike that Cactuar, the Cactuer is *not* immune to all elemental properties, so you can use Magic to kill it.

Every action performed by both the Player and Enemy will set the Cactuer's Evade back to 1, and a fresh 7/8 chance of the Counter script will then occur.

The main reason to want to battle the Cactuer is to try to obtain a few Tetra Elementals; an accessory that absorbs all Fire/Ice/Lightning/Earth based attacks. You only need to obtain two, as one will be available from the North Crater (Right Path).

You should put Vincent in your Party, then head over to Costa Del Sol to buy the Long Barrel R, if you haven't already (bought from the Weapon Seller in the Bar). This is one of three Weapons with an Attack% of 255; however, your chances of hitting the Cactuer will still only be roughly 26%. Equip Vincent with everything to increase his Dexterity and MDef% as much as possible; equip the Aurora Armlet, Choco Feather, Steal Materia, Pre-Emptive Materia, Speed Plus Materia, and of course, Morph.

Open with L4 Suicide to deplete the Cactuer's HP to critical. With the above setup, Vincent should have roughly a 39% chance to connect with his Morph attempts. Note that if the Cactuer is inflicted with any of the following Statuses, the attack will be an automatic-hit: Sleep, Stop, Confusion, Manipulate and/or Paralyzed. Use Frog Song, Bad Breath or Manipulate to have a 100% chance to connect when trying to use Morph (a Lv 40 Tifa would have a 51% chance to manipulate the Cactuer).

Be mindful of the Cactuer's 1000 Needles attack, which deals a fixed 1000 HP of damage, and cannot be defended from the likes of Big Guard or Defend. its <Mystery Kick> attack can deal a fair amount of damage, too, so keep an eye on your HP.

{Goblin}

Manip Attack 1: Fight

Goblin's ATTACKS:	Manip Attack 2: Goblin Punch
	Manip Attack 3: Sleepel

Attack 1: <Fight>	Target: One Opponent	Berserk Attack
[362] Physical	Element: Cut	
	Att%: 95	
	Power: 16	
	Base Damage: 274 HP	

Attack 2: Goblin Punch	Target: One Opponent	**Enemy Skill**
[059] Physical	Element: None	If Caster's Lv
	Att%: 100	Equals Target's
	Power: 12	Lv, Damage * 8
	Base Damage: 205 HP or 1644 HP	

Attack 3: Sleepel	Target: One Opponent	Reflectable
[00B] Magical 0 Dam	Att%: 100	Status Inflict:
	MP Cost: 8 MP	Sleep (71%)

Goblin's BATTLE PLAN: (Repeats)

OPENING ATTACK: 1/4 Chance start from 1st Attack
1/4 Chance start from 2nd Attack
1/4 Chance start from 3rd Attack
1/4 Chance start from 4th Attack

1ST ATTACK: 1/3 Chance use Goblin Punch on Rnd Target with Sleep; If no Targets have Sleep, select Rnd Target

2/3 Chance use <Fight> on Rnd Target with Sleep; If no Targets have Sleep, select Rnd Target

2ND ATTACK: Same as 1st Attack
3RD ATTACK: Same as 1st Attack

4TH ATTACK: 1/2 Chance use Sleepel on Rnd Target without Sleep; If all Targets have Sleep OR Goblin's MP < 8, use 1st Attack

1/2 Chance use 1st Attack

After 4th Attack: 1/2 Chance jump to 1st Attack for next turn
1/2 Chance jump to 2nd Attack for next turn

Notes On Goblin:	POWER req for Overflow:
The Goblin can easily be defeated via one cast of Beta, or via the use of L4 Suicide, followed by a Physical blow. Their very low Battle Spoils make them an undesirable foe to battle.	Base Damage Overflow: 161 Rnd Var Overflow 3x: 108 Rnd Var Overflow 4x: 81 Rnd Var Overflow 6x: 54

There are only two reasons to want to fight the Goblin; firstly, for Zeio Nuts, which is a required item to breed a Gold Chocobo. You should only need to obtain one Zeio Nut; a Lv 40 Tifa would have a 10.94% chance of stealing from the Goblin.
The other reason is for the Enemy Skill Goblin Punch, which is the only Enemy Skill to cost 0 MP. It acts the same as your normal Physical blows, except for the fact that Power is 3/4 of its normal value. If that caster is the same level as the target, then Power will be multiplied to six

| times that of a normal physical blow, which can help in certain |
| situations. |
| You can try to manipulate the Goblin if you wish, to make it slightly |
| more easy to steal from them. A Lv 40 Tifa would have a 51% chance to |
| manipulate them. |
| The Goblin performs an unnecessary MP check whin it perform its Goblin |
| Punch attack, which will always fail as the ability costs 0 MP. This may |
| suggest that Goblin Punch was initially supposed to cost MP. |

-.-.-.

	Att%: Lv 2 = Auto Hit	Confusion (100%)
	MP Cost: 18 MP	
Attack 5: <[No Name]>	Target: Self	Transformation
[11F] Physical 0 Dam	Att%: Auto Hit	To Stage 2
Attack 6: <[No Name]>	Target: Self	Transformation
[120] Physical 0 Dam	Att%: Auto Hit	To Stage 1

Hippogriff's BATTLE PLAN: (Repeats)

*If all Targets have Confusion, skip a turn

OPENING ATTACK: Use L2 Confu on Rnd Target without Confusion*

STAGE 1: (Ground)

1ST ATTACK: Use <Beak> (Punch variant) on Rnd Target without Confusion*
2ND ATTACK: Use <Beak> (Punch variant) on Rnd Target without Confusion*
3RD ATTACK: Use <Beak> (Punch variant) on Rnd Target without Confusion*

4TH ATTACK:

Hippogriff has not entered into Stage 2 yet:

Use <Beak> (Punch variant) on Rnd Target without Confusion*

Hippogriff has entered into Stage 2 at least once:

Use ??? on Rnd Target without Confusion*

STAGE 2: (Flying - Row 16)

OPENING ATTACK: Use <Beak> (Shoot variant) on Rnd Target without Confusion*

Opening Attack will only be considered if Hippogriff enters into Stage 2 before using its first turn.

1ST ATTACK: Use <Beak> (Shoot variant) on Rnd Target without Confusion*
2ND ATTACK: Use <Beak> (Shoot variant) on Rnd Target without Confusion*
3RD ATTACK: Use <Beak> (Shoot variant) on Rnd Target without Confusion*

COUNTER: [All Physical and Magical Attacks]

Attack was Physical:

Hippogriff is in Stage 2 OR Hippogriff's HP > 50%: Do nothing

```

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Hippogriff:                     |   POWER req for Overflow:       |
|                                            |                                 |
| Hippogriff is found in Battle Square:      |  Base Damage Overflow: 164      |
|  Set - 3  (After Highwind)     Battle - 4  |  Rnd Var Overflow  3x: 109      |
|                                            o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  1st Stage:  Evade = 1                                                       |
|  2nd Stage:  Evade = 31                                                      |
|                                                                              |
| The Hippogriff will always appear alone, and is not a very menacing foe.     |
|  The worst thing it can do to you is inflict one of your characters with     |
|  Confusion, which it can only do once, at the beginning of the battle.       |
|  Equip the Ribbon/Peace Ring to defend from this.                            |
| L2 Confu will only connect if the target's Lv is divisible by two. The       |
|  Hippogriff will never attack a Player that is inflicted with Confusion,     |
|  so you will have to cure it yourself. Have White Wind, Esuna or a Remedy    |
|  ready to use.                                                               |
| You can optionally fight the Hippogriff as early as Disc 1, as soon as you   |
|  obtain the Tiny Bronco. The Spiral and Head Hunter can also be fought on    |
|  the Grass terrain, and make for amazing Disc 1 spoils!                      |
| When the Hippogriff transforms to its second stage, it is given a Row        |
|  value of 16, which means it is considered as "Flying". You will not be      |
|  able to target it with short-ranged Physical Attacks while it is in this    |
|  form.                                                                       |
| A slight flaw exists with the Hippogriff's AI Script. Its Magical Counter    |
|  script performs a "Hit Count" check, and is only supposed to trigger        |
|  after it has taken x amounts of hits, before it returns to its original     |
|  Form. The problem is the fact that the value the Hit Count needs to be      |
|  for the script to trigger has not been set, so it is 0 by default (the      |
|  Hit Count variable is supposed to count *down* from a determined value).    |
| The 'Hit Count' var is also used to trigger an alternative third attack      |
|  while in Stage 2; it should have used ??? (flying variant) if Hit Count     |
|  is greater than 0. This will always fail, which means the Hippogriff will   |
|  never use ??? while flying, and will only use it while it is in Stage 1.    |
| Do not confuse the attack '???' with the Enemy Skill '????', learned from    |
|  the Jersey and Behemoth.                                                    |
| As with ???, two versions of <Beak> also exists, one used for each Stage     |
|  the Hippogriff is in.                                                       |
| Two casts of Beta should be sufficient to kill the Hippogriff.               |
| The Hippogriff cannot be Back-Attacked or Side-Attacked, meaning that one    |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.              |
\                                                                              /

MAPS:	APPEARANCE RATE:	LOOKALIKES:
Mideel Area Grass	50%	Grashtrike
Mideel Area Jungle	66%	

Head Hunter's ATTACKS:

Manip Attack 1: Sickle
Manip Attack 2: Rising Dagger

Attack 1: <Sickle> Physical [121] — Berserk Attack
Target: One Opponent
Element: Cut
Att%: 100
Power: 16
Base Damage: 472 HP

Attack 2: Rising Dagger Physical [1C7]
Target: One Opponent
Element: None
Att%: 95
Power: 16
Base Damage: 472 HP

Head Hunter's BATTLE PLAN: (Repeats)

SETUP: If a Chocobo is present Print Message [A Chocobo!]

1/4 Chance: Use Rising Dagger on Rnd Target
3/4 Chance: Use <Sickle> on Rnd Target

DEATH: If Chocobo is present AND Chocobo is last alive Enemy:
Display String: [Caught a Chocobo.], activates Chocobo on World Map

Notes On Head Hunter:	POWER req for Overflow:
The Head Hunter appears in groups of four, and can make for an ideal enemy to train	Base Damage Overflow: 156 Rnd Var Overflow 3x: 104

```
|  against (until you have access to the Swamp |  Rnd Var Overflow  4x:  78  |
|  Area on Disc 3). You will be able to        |  Rnd Var Overflow  6x:  52  |
|  encounter the Head Hunter as early as Disc  o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  1, as soon as you obtain the Tiny Bronco,                                 |
|  although, you will only be able to fight them on the Grass terrain. The   |
|  Jungle Area has better overall Battle Spoils on average, and you cannot   |
|  access that terrain until Disc 2.                                         |
| Both of the Head Hunter's attacks are low in damage output, and they can   |
|  easily be defeated with two casts of Trine or one cast of Beta if your    |
|  characters are strong enough.                                             |
\                                                                            /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Spiral:                          |   POWER req for Overflow:    |
|                                             | 1st Stage:                   |
|  1st Stage:  Def = 80   MDef = 80           |  Base Damage Overflow: 164   |
|  2nd Stage:  Def = 320  MDef = 320          |  Rnd Var Overflow  3x: 109   |
|                                             | 2nd Stage:                   |
| The Spiral appears alongside the Head Hunter |  Base Damage Overflow: 368   |
|  and the Hippogriff, and makes for some     |  Rnd Var Overflow  3x: 245   |
|  excellent average EXP/AP/Gil. You can      o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  encounter the Spiral as early as Disc 1, as                                   |
|  soon as you obtain the Tiny Bronco; although, they may be fairly tough at |
|  that stage given their high defences while in their spinning form.          |
| You can exploit their weakness to Death by casting Odin to finish them in   |
|  one. Alternatively, if you give one of your characters the Circlet with     |
|  the Magic Plus Materia, then you may just be strong enough to kill them     |
|  with one cast of Beta. Magic Breath may also be just strong enough to do    |
|  the job.                                                                      |
| One of the main incentives to battle the Spiral early on is to try to        |
|  steal some X-Potions from them, which can help for Yuffie's sidequest on    |
|  Disc 1. A Lv 32 Cloud would have a 34.38% chance of stealing from the       |
|  Spiral. You can always try to steal from them when the game intends you     |
|  to face them on Disc 2; a Lv 40 Tifa would have a 42.19% chance of          |
|  stealing from them.                                                           |
| The Spiral are a good candidate for Morphing Guard Sources (increases        |
|  Defence), as they come in groups of two or more, which means you can        |
|  exploit the Extended W-Item Glitch to dupe yourself a finite amount of      |
|  Guard Sources; visit the "Top Farming Locations" in Helpful Lists for       |
|  more information on how to use the Extended W-Item Glitch.                  |
| The Bagnadrana in Mt. Corel are easier to Morph Guard Sources From, as       |
|  they are susceptible to L4 Suicide, whereas the Spiral are not. If you      |
|  did wish to Morph the Spiral, then cast Laser six times before attempting |
|  use the Morph Command.                                                        |
| The Spiral cannot be Back-Attacked or Side-Attacked, meaning that one        |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.              |
\                                                                                /

MAPS:	APPEARANCE RATE:	LOOKALIKES:
Mideel Area Jungle	34%	Jayjujayme

Crysales' ATTACKS:

Manip Attack 1: Bite
Manip Attack 2: Sleep Scales

Attack 1: <Bite> Target: One Opponent Berserk Attack
[112] Physical Element: Hit
Att%: 100
Power: 16
Base Damage: 550 HP

Attack 2: Sleep Scales Target: One Opponent Status Inflict:
[1CB] Magical 0 Dam Att%: 95 Sleep (100%)
MP Cost: 10 MP

Crysales' BATTLE PLAN: (Repeats)

No Targets with Sleep: 1/4 Chance use <Bite> on Rnd Target
3/4 Chance use Sleep Scales on Rnd Target

One Target or two Targets have Sleep:

1/2 Chance use <Bite> on Rnd Target with Sleep
1/2 Chance use Sleep Scales on Rnd Target without Sleep

All Targets with Sleep: Use <Bite> on Rnd Target

Notes On Crysales:

The Crysales are not a very difficult foe; although, they can often try to inflict you with Sleep, which can be annoying. Wear Ribbons to combat this.

You could also use Magic Hammer once to deplete their MP; that way they will not be able to use Sleep Scales, and instead the "skill power is used up" text string would be displayed each time they tried to use the attack.

The Crysales are the only enemy in Mideel that cannot be fought on Disc 1 when you obtain the Tiny Bronco, as they only appear in the Jungle area. The average Battle Spoils within the Jungle terrain make for the best in the area, and is the optimal spot to train in until you get to Disc 3.

One cast of Beta or Aqualung will be enough to take the Crysales out in one hit.

Although the Dream Powder is not the most useful of Battle Items (casts Sleep on all opponents), they are uncommon. Only the Crysales and Crown Lance carry the Dream Powder, and in both instances it needs to be Morphed. If you wish to obtain the Item, the you would have an easier time trying to Morph the Crown Lance, as they can are susceptible to L4 Suicide, whereas the Crysales are not.

POWER req for Overflow:

Base Damage Overflow: 152
Rnd Var Overflow 3x: 101
Rnd Var Overflow 4x: 76
Rnd Var Overflow 6x: 51

1ST ATTACK: Skip a turn

2ND ATTACK:

At least one Target without Darkness AND Sandstorm used less than five times:

Use Sandstorm on All Targets without Darkness

All Targets with Darkness OR Sandstorm used five times:

Use Crush on Rnd Target

3RD ATTACK: Skip a turn

4TH ATTACK:

At least one Target with Darkness: Use Crush on Rnd Target with Darkness

No Targets with Darkness: 1/2 Chance use Crush on Rnd Target
1/2 Chance skip a turn

5TH ATTACK: Skip a turn

6TH ATTACK:

At least one Target without Darkness: Use Earthquake on All Targets

All Targets with Darkness: Use Crush on Rnd Target

Notes On Sea Worm:

Sea Worm is found in Battle Square:
Set - 3 (After Highwind) Battle - 8
Set - 4 (Special Battles) Battle - 1

POWER req for Overflow:

Base Damage Overflow: 164
Rnd Var Overflow 3x: 109

The Sea Worm can be fought as early as Disc 1, as soon as the Player obtains the Tiny Bronco. The fact that the Sea Worm drops 5000 gil per Battle makes it an optimal enemy to battle to farm gil; six encounters with the enemy will pay for the Gold Saucer's 'Gold Ticket'.
The Attack Sandstorm is subject to Split Damage for the damage calculations; however, the Status inflicted via Sandstorm is *not* subject to Split Damage.
The Sea Worm has the same stats as its counterpart; the Land Worm, meaning that all of its attacks have reasonably low damage output. the Sea Worm should not be considered too much of a threat, although, it does have rather high MDefence. Equip the Ribbon, Silver Glasses and/or Fairy Ring to defend against Darkness.
You should equip Elemental+Shiva on your Weapon when battling the Sea Worm; your Physical Attacker should hit for 1600+ HP that way. Your Deathblow chance should be roughly 64%, so as equip Deathblow with Added Cut as standard.
Magic Breath works well, and hits for over 1700 HP. Note that the effects of using Magic Breath which has the Fire Element (which the Sea Worm Halves), along with the Ice Element (which the Sea Worm Doubles) means the Elemental attributes will be negated, and the damage output will be normal. Feel free to use Magic Hammer to replenish your own MP, as the Sea Worm has no need for its 200 MP.

| You should take the time to try to steal some Dragon Scales from the Sea Worm (Water based damage on all opponents for 3680 Base Damage). They can massively help in the Battle Square, or against the Rapps Boss during Yuffie's Sidequest. A Lv 32 Cloud would have a 51.53% chance of stealing from the Sea Worm. You can always try to steal from it when the game intends you to face it on Disc 2; a Lv 40 Tifa would have a 59.38% chance of stealing from it.
| If you face the Sea Worm in the Battle Square, be mindful of the fact that it will have 18,000 HP. Inflict it with Poison via the use of Bad Breath or M-Tentacles. You could also exploit its weakness to Sleep by using Frog Song, then just sticking to Magical abilities.
| If you had the Ice Crystals to spare, then you could use them against the Sea Worm to inflict 2146 - 2290 HP worth of damage. Dragon Scales will inflict 1899 - 2026 HP worth of damage.
| All of the encounters with the Sea Worm have a Run Count value greater than 1, which means you'll have a harder time fleeing from them.
| The Sea Worm cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.
| The Sea Worm is one of 105 enemies that are Immune to Peerless, which isn't necessary seeing as there is no way for the Player to inflict the enemy with Peerless.

-.-.-.

|                            1/2 Chance do nothing                               |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Gas Ducter:                        |   POWER req for Overflow:        |
|                                               |                                  |
| The Gas Ducter is a non-randomly encountered  |  Base Damage Overflow: 162       |
|  enemy, and can only be fought during the     |  Rnd Var Overflow  3x: 108       |
|  first two train 'hops' while embarking       o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  on the Huge Materia Quest in Mt. Corel.                                       |
| You will be on a time limit for these battles, so be sure to dispatch the      |
|  Gas Ducter promptly. Its high MDef means that it will take two casts of       |
|  Beta to kill them. Given that the animation of Beta can be quite lengthy,     |
|  your best approach would be to use Physical blows, which should deal          |
|  around 750 HP. Your Physical Attacker will deal over 1000 HP, so use          |
|  Deathblow with Added Cut to kill them in one hit if your Deathblow            |
|  connects, which it should have approximately a 62% chance of doing.           |
| Magic Breath will not be enough to kill them in one hit, unless you have a     |
|  character set up with the Circlet and Magic Plus; in which case, Magic        |
|  Breath will hit for over 3250 HP.                                             |
| Be sure to have Ribbons equipped to defend against Smog Alert.                 |
\                                                                                /

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Wolfmeister:                      |   POWER req for Overflow:       |
|                                              |                                 |
| Wolfmeister is found in Battle Square:       |  Base Damage Overflow: 172      |
|  Set - 4  (Special Battles)    Battle - 5    |  Rnd Var Overflow  3x: 115      |
|                                              o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Wolfmeister is a non-randomly                                              |
|  encountered enemy that can only be fought on the third train 'hop' during     |
|  the Mt. Corel Huge Materia Quest. It leaves a generous amount of EXP.         |
| The Wolfmeister will never use Big Guard on the Player, and you cannot         |
|  Manipulate or inflict Confusion on the enemy, so you cannot learn the         |
|  Skill from the Wolfmeister. it will have a 100% chance of inflicted all       |
|  Allies with Haste, Barrier and MBarrier.                                      |
| You will be on a time limit for these battles, so try to take out the          |
|  Wolfmeister hastily. The easiest way to do this is to equip your              |
|  Physical Attacker with the Champion Belt and Elemental+Leviathan on their    |
|  Weapon. As standard, equip Deathblow with Added Cut; your Deathblow           |
|  chance will be roughly 64%.                                                   |
| Open with two casts of Laser or Demi2 (or T/S Bombs) to drop its HP to         |
|  25%, then attack it Physically. If it sets up Big Guard, you can use          |
|  DeBarrier (Destruct Materia), or cast a Holy Torch.                           |
| Alternatively, you could cast Haste on the Wolfmeister, which will prevent     |
|  it from using Big Guard altogether. Jut be mindful that you may cure it       |
|  of Haste if you have Added Effect+Time on your Weapon. Two uses of Magic      |
|  Hammer will stop it from using Big Guard, also.                               |
| If you face the Wolfmeister while in the Battle Square, then be mindful of     |
|  the fact that it has 20,000 HP. It will also have 175 Strength, and 125       |
|  Magic, which is rather strong. Be sure to cast Big Guard yourself when        |
|  battling the enemy.                                                           |
| The Wolfmeister is one of 105 enemies that are Immune to Peerless, which       |
|  isn't necessary seeing as there is no way for the Player to inflict the       |
|  enemy with Peerless.                                                          |
\                                                                                /

Follow-Up: 1/2 Chance use Single Wing Fire on Rnd Target
1/2 Chance do nothing

1/4 Chance: Use Dual Wing Fire on All Targets
Follow-Up: 1/2 Chance use Dual Wing Fire on All Targets
1/2 Chance do nothing

Notes On Eagle Gun:

POWER req for Overflow:

| The Eagle Gun is a non-randomly encountered enemy, and can only be faced on the fourth and final train 'hop' while undertaking the Mt. Corel Huge Materia Quest. with a large amount of HP, it is the strongest of the three enemies faced on the train, but can still be dispatched with the correct setup.

Be sure to remove the Leviathan Materia (if you used it for the previous battle), and replace it with Ramuh to exploit the Eagle Gun's weakness to Lightning.

As before, you can use Laser twice to drop the Eagle Gun's HP to 25%; however, you do not want to kill it until you have stolen the Warrior Bangle from it. You cannot obtain this piece of Armour (which has the 2nd highest Physical Def in the game) anywhere else, so be sure to leave yourself with enough time to obtain it. A Lv 41 Cid would have a 35.94% chance of stealing from the Eagle Gun.

There is an unused formation contained within the game's scene data with the Eagle Gun against the Mako Cannon Battle Background. This Formation is located amongst the other Formations found at the Mako Cannon (at the end of Disc 2), which suggests the Eagle Gun was originally intended to be randomly encountered there.

The Eagle Gun is one of a number 'elevated' enemies that Nullifies the Earth Element, but will no take double damage from Wind.

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On CMD.Grand Horn Lv 37:            |   POWER req for Overflow:    |
|                                             |                              |
| The CMD.Grand Horn Lv 37 can only be fought |  Base Damage Overflow: 160   |
|  if you fail the For Condor Mini-Game during|  Rnd Var Overflow  3x: 107   |
|  the Materia Quest on Disc 2. If you defeat o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  the CMD.Grand Horn, then you will sill                                    |
|  obtain the Huge Materia, and the quest will be successful.                |
| If, however, you lose to the enemy, then you will not be met with a Game   |
|  Over. Instead, you will spawn at the entrance to Fort Condor, with no way |
|  to return, as the rope ladder will have been retracted. The mission will  |
|  be considered as failed, and you will have lost the Huge Materia. You can |
|  still obtain the Yellow Huge Materia, so long as you do not fail any more |
|  missions (it's the Blue Huge Materia that you will have lost forever).    |
| It is recommended that you purposely lose the Fort Condor Mini-Game to     |
```

battle the CMD.Grand Horn Lv 37, as you will be able to get early access to the Imperial Guard this way, which has the best overall defence in the game (unless you are playing on the earlier versions, in which case your MDefence will be set to your Spirit stat, and the MDefence boost from the Imperial Guard will be obsolete).

If you do not obtain the Imperial Guard from the CMD.Grand Horn Lv 37, then you can still obtain one later on in the game from the North Crater Swamp Area. It is possible to dupe yourself a third Imperial Guard via the use of the North Crater Item Dupe trick; however, you will have to choose the least-optimal route to get an extra piece. The alternative method to obtain a set of Imperial Guards is to exploit the 'Repeat Boss Glitch'; visit the "Top Farming Locations" section in Helpful Lists for more information on hot to perform the Repeat Boss Glitch.

The CMD.Grand Horn is not difficult to defeat. Three uses of Magic Breath should be enough to destroy it. If you do not have Magic Breath, or you are under-levelled, then you can exploit its vulnerability to Poison, Slow and Stop.

None of the CMD.Grand Horn Lv 37's attacks deal very much damage, just be mindful of the fact that it will use a counter attack upon death, which will deal around 290 HP to all characters. If this attack kills your Party, you will fail the Fort Condor mission.

The CMD.Grand Horn Lv 37 is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an Enemy with Seizure. The CMD.Grand Horn Lv 37 one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.

```

Set GlobalVar [Ultimate Weapon's HP] to 20,000
set GlobalVar [Ultimate Weapon Final Battle Active]

Notes On Ultimate Weapon: (Mideel)

The Ultimate Weapon you fight in Mideel is the only mandatory encounter with the Boss; the other three encounters are optional. You will not be able to kill Ultimate on your first face-off, as it will flee the battle once its HP has dropped below 80,000, or, four turns have passed. You can defeat Ultimate Weapon properly once Diamond Weapon has been defeated towards the end of Disc 2.

Ultimate Weapon has the potential to wipe out your Party, so be prepared! Ultima Beam is the only attack in the game to use the 'Hidden' Element that *doesn't* deal 0 damage, which means this can be exploited via the use of the Elemental Materia. Link the Materia with any non-elemental Materia (besides other Support Materia and Restorative Materia) such as HP Plus. This way you will halve/negate/absorb the damage done via Ultima Beam.

You can also equip Tetra Elementals to absorb the damage dealt via Quake2, or use a Reflect Ring to reflect the damage back onto Ultimate. Keep your characters in the Back Row to defend from Claw, and use Big Guard.

When Ultimate Weapon flees the Battle, its HP will be stored for the next time you encounter the Boss. If you were to deal 80,000 HP or more in this battle, it will trigger the 'Final Battle at Cosmo Canyon' Flag to be activated; however, you will still need to battle it once above the crater near Junon before it flies off towards Cosmo Canyon.

The only way to deal 80,000+ HP in one hit is via the use of the Knights of The Round Materia, which can become available to the Player prior to the Gold Saucer re-opening. This is achieved by exploiting the broken RNG mechanics within the Chocobo Stables. You will need to equip your strongest Magical attacker with the Magic Plus Materia, Circlet, and as many Magic boosting Materia as possible to be able to pull it off; your attacks will need to deal at 6153 HP on average to deal 80,000 HP in total.

Once the Battle begins, cast Big Guard on yourself, then try to inflict Ultimate Weapon with Slow. Do not worry about trying to drain its health; your main focus is to try to steal the Curse Ring from it, which is an Accessory that significantly boosts your stats, while also placing the wearer in Death Sentence (can be negated using the Death Force Enemy Skill).

A Lv 41 Cid would have a 20.31% chance of stealing from Ultimate Weapon. If it flees the battle without a successful steal attempt, reload your save if you wish; you will have already had the opportunity to obtain one from the Weapon Store in Mideel. If you missed that opportunity, then the Ultimate Weapon fought in Mideel will be your last chance to obtain one. The Curse Ring is best paired with Tifa, once she has obtained the Master Fist from Shinra HQ at the end of Disc 2.

Once you have successfully stolen from Ultimate Weapon, use Neo Bahamut, Bahamut and Magic Breath to get a head start on the future encounters with the Boss.

The standard Victory Fanfare will not play out following this battle, and the "Weapon Raid" Theme will play throughout.

Ultimate Weapon is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. Ultimate Weapon is one of 86 enemies that is immune to Seizure. It is also immune to Peerless, along with 104 other enemies, and also immune to Regen along with 14 other enemies.

POWER req for Overflow:

Base Damage Overflow: 180
Rnd Var Overflow 3x: 120

|   1/8 Chance: Do nothing                                                   |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Rilfsak:                      |   POWER req for Overflow:       |
|                                          |                                 |
| The Rilfsak's attacks deal very low damage, |  Base Damage Overflow: 167   |
|  and as such, they are not a threat. They  |  Rnd Var Overflow  3x: 112   |
|  will try to inflict you with Darkness, so |  Rnd Var Overflow  4x:  84   |
|  equip Ribbons.                          |  Rnd Var Overflow  6x:  56   |
| Every single Action will trigger the 7/8   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  chance of the Rilfsak setting its Evade to                                |
|  255, regardless of the Target or the Caster. This includes Actions made   |
|  by the Rilfsak. Even Actions such as Change/Defend will trigger the       |
|  Counter chance.                                                           |
| Once the Rilfsak has set its Evade to 255, all Physical attacks will only  |
|  have a 1% chance of connecting. Every action performed by both the Player |
|  and enemy will set the Rilfsak's Evade back to 1, and a fresh 7/8 chance  |
|  of the Counter script will then occur with every fresh action.            |
| Use L4 Suicide, then follow up with Matra Magic to easily defeat them. The |
|  Epiolnis they appear alongside are also susceptible to L4 Suicide. You    |
|  could optionally put Vincent in your party, and equip him with the Long   |
```

```
|  Barrel R which has an att% of 255. Give him the Champion Belt, Added Cut  |
|  with Deathblow, Counter Attack, and all the other attributes you would    |
|  apply to your Physical Attacker (such as Slash-All, which you will obtain |
|  while in the Ancient Forest).                                             |
| The Rilfsak encounters normally allow for a Pre-Emptive Strike; however,   |
|  the encounters in the final Cavern screen have made use of the "Pre-Emp   |
|  OFF" Flag. This was likely done in error, as the Diablo in the cavern     |
|  *can* be back-attacked, where they can't be normally.                     |
| The Rilfsak is one of a number 'elevated' enemies that Nullifies the Earth |
|  Element, but will no take double damage from Wind.                        |
\                                                                            /

|    Use Flame on Last Mag Attacker for next turn                             |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Diablo:                          |   POWER req for Overflow:     |
|                                             |                               |
| The Diablo's AI Script does not work as     |  Base Damage Overflow: 164    |
|  intended. It does not check for the Command |  Rnd Var Overflow  3x: 109    |
|  ID used, just the Attack ID. Because of    |  Rnd Var Overflow  4x:  82    |
|  this, using an Item that shares the same   |  Rnd Var Overflow  6x:  55    |
|  Attack ID as one if the abilities that it  o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  checks for will also trigger the Counter                                   |
|  Script.                                                                    |
| The Diablo should also have reacted to Beta, Flame Thrower, Ifrit Summon    |
|  and Phoenix Summon, with the said abilities triggering the use of Cold.    |
|  The Shiva Summon should have triggered the use of Flame.                   |
| Avoid using Beta and Magic Breath against the Diablo, as it will just       |
|  Nullify the Elements. Stick to Aqualung, Trine, or basic Physical blows    |
|  to kill the enemy.                                                         |
| The Diablo is considered to be a 'Powerful' enemy, and as such the "Pre-    |
|  Emp" Flag should have been disabled for encounters that contain the        |
|  Diablo. An oversight means that you have a chance to initiate a Pre-       |
|  Emptive Strike against the 2x Diablo encounter in the final Cavern         |
|  (Formation ID #976).                                                       |
\                                                                             /

Epiolnis' ATTACKS:

Manip Attack 1: Bird Kick
Manip Attack 2: Catapult
Manip Attack 3: Acid Rain

Attack 1: Bird Kick [1B6] Physical
Target: One Opponent
Element: Hit
Att%: 108
Power: 16
Base Damage: 393 HP
Berserk Attack

Attack 2: Catapult [28D] Magical
Target: One Opponent
Element: None
Att%: 95
Power: 16
Base Damage: 393 HP

Attack 3: Acid Rain [28E] Magical
Target: One Opponent
Element: Poison
Att%: 95
Power: 20
MP Cost: 15 MP
Base Damage: 645 HP
Status Inflict: Poison (100%)

Epiolnis' BATTLE PLAN: (Repeats)

OPENING ATTACK: Use Bird Kick on Rnd Target

THEREAFTER: 1/2 Chance use Bird Kick on Rnd Target
1/4 Chance use Catapult on Rnd Target
1/4 Chance use Acid Rain on Target with Highest Current HP

Notes On Epiolnis:

The Epiolnis are not a tough enemy, and can easily be defeated via the use of L4 Suicide or regular Attacks.
You do not need to try to steal Wizard

POWER req for Overflow:

Base Damage Overflow: 156
Rnd Var Overflow 3x: 104
Rnd Var Overflow 4x: 78
Rnd Var Overflow 6x: 52

```
|  Bracelets from the Epiolnis, as they can be o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  bought Mideel for 12,000 gil a piece. If                                   |
|  you were short of gil, then you could try to farm this eight-slotted      |
|  piece of Armour (with low defences) to sell for 6000 gil each. A Lv 45     |
|  Cloud would have a 12.5% chance of stealing from the Epiolnis. Use Frog    |
|  Song or Bad Breath to incapacitate the enemy while you attempt to steal    |
|  from it.                                                                   |
| The Epiolnis encounters normally allow for a Pre-Emptive Strike; however,   |
|  the encounters in the final Cavern screen have made use of the "Pre-Emp    |
|  OFF" Flag. This was likely done in error, as the Diablo in the cavern      |
|  *can* be back-attacked, where they can't be normally.                      |
\                                                                             /

|    7/8 Chance: Use Whip Sting on Rnd Target                             |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Ho-chu:                          |   POWER req for Overflow:   |
|                                             |                             |
| Ho-chu is found in Battle Square:           |  Base Damage Overflow: 159  |
|  Set - 3  (After Highwind)     Battle - 8   |  Rnd Var Overflow  3x: 106  |
|  Set - 4  (Special Battles)    Battle - 2   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|                                                                         |
| The infamous Ho-chu was phased out of the final release of FFVII, and can  |
|  only be encountered in the Battle Square (same as the Tonberry). It was   |
|  likely that the Ho-chu was intended to be a forced encounter if the       |
|  Player walks into the Venus Flytrap. An unused Formation (#795) can be    |
|  found placed amongst the other Ancient Forest enemies, containing the Ho- |
|  chu (with a Jungle Battle Background). This Formation makes use of the    |
|  "Can't Escape" Flag (but not the "Pre-Emp OFF" Flag).                     |
| A flaw exists with the Ho-chu's AI Script. It will perform a check for     |
|  the Confusion Status, and there is no way for the Player to become        |
|  inflicted with Confusion unless it is self-inflicted. None of the enemies |
|  in the Ancient Forest inflict you with Confusion.                         |
| As with the Marlboro, the Ho-chu is weak to Water-based attacks. Two casts |
|  of Aqualung should be enough to kill it, even in the Battle Square when   |
|  it has 8600 HP. If you have lost the use of the Command materia, then     |
|  consider using Dragon Scales, which will hit for 5632 - 6008 HP.          |
| Make sure to have your Ribbons equipped for the Battle Square (as          |
|  standard). If you have lost the use of your Accessory, then consider      |
|  using a Vaccine to defend against Status changes. *Do not* use a Vaccine  |
|  if you are fighting the Ho-chu on the second Battle in the Special        |
|  Battles, as the Statuses inflicted via the handicaps will become fixed,   |
|  and you won't be able to cure yourself of the Statuses (unless you use    |
|  White Wind or DeSpell; a Holy Torch will *not* cure Resist).              |
| The Ho-chu is the perfect candidate to obtain a third Ribbon from. Wait    |
|  until you have obtained Yuffie's Conformer, and equip Elemental+Leviathan |
|  on her Weapon. You will have a 25% chance of encountering the Ho-chu in   |
|  the final Battle; alternatively, you could wait until you have defeated   |
|  Ultimate Weapon, at which point the Special Battles will become           |
|  available and you will always encounter the Ho-chu on the 2nd Battle. You |
|  cannot use Yuffie for the Special Battles. Master Tonberrys can also be   |
|  Morphed into Ribbons; Yuffie's Conformer will deal 4.8125x normal damage  |
|  against them, so they are not too difficult to Morph from the M Tonberry. |
| If you wished to obtain a Circlet (Magical equivalent of the Champion      |
|  Belt), then you would have an easier time trying to steal from the Snow   |
|  enemy in the Great Glacier. You can also steal them from the Flying       |
|  version of Ultimate Weapon. A Lv 46 Cloud would have a 12.5% chance of    |
|  stealing from the Ho-chu.                                                 |
| The Ho-chu is one of 105 enemies that are Immune to Peerless, which isn't  |
|  necessary seeing as there is no way for the Player to inflict the enemy   |
|  with Peerless.                                                            |

ENEMY ENCOUNTERS

NOTE - The averages assumes you to kill every Quick Machine Gun/Rocket Launcher that spawns in. A bug in the AI script prevents you from killing both the Quick Machine Gun *and* the Rocket Launcher that is part of the same Guard System.

Death Machine's ATTACKS:

Manip Attack 1: W Machine Gun
Manip Attack 2: 100 Needles
Manip Attack 3: Matra Magic

Attack 1: W Machine Gun
[118] Physical
Target: One Opponent
Element: Shoot
Att%: 100
Power: 28
Base Damage: 535 HP
Berserk Attack

Attack 2: 100 Needles
[2FC] Physical
Target: One Opponent
Element: None
Att%: 100
Power: 20
Base Damage: 382 HP
Can't Cover

Attack 3: Matra Magic
[052] Magical
Target: All Opponents
Element: None
Att%: 100
Power: 11
MP Cost: 8 MP
Base Damage: 247 HP
Enemy Skill
Reflectable
No Split Damage

Death Machine's BATTLE PLAN: (Repeats)

1ST ATTACK: Use 100 Needles on Rnd Target

2ND ATTACK: Use W Machine Gun on Rnd Target
Follow-Up: 1/2 Chance use W Machine Gun on Rnd Target
1/2 Chance do nothing

3RD ATTACK: Same as 2nd Attack

After 3rd Attack: jump to 1st Attack for next turn

4TH ATTACK: Use W Machine Gun on Last Attacker; If Last Attacker has Death, select Rnd Target

Follow-Up: 1/2 Chance use W Machine Gun on Last Attacker; If Last Attacker has Death, select Rnd Target
1/2 Chance do nothing

After 4th Attack: Jump to 1st Attack for next turn

5TH ATTACK: Use 100 Needles on Last Attacker; If Last Attacker has Death, select Rnd Target

Follow-Up: 1/2 Chance use 100 Needles on Last Attacker; If Last Attacker has Death, select Rnd Target

1/2 Chance do nothing

Follow-Up: Use W Machine Gun on Last Attacker; If Last Attacker has Death, select Rnd Target

Follow-Up: 1/2 Chance use W Machine Gun on Last Attacker; If Last Attacker has Death, select Rnd Target
1/2 Chance do nothing

After 5th Attack: Jump to 1st Attack for next turn

6TH ATTACK: Use Matra Magic on All Targets
Follow-Up: 1/2 Chance use Matra Magic on All Targets
1/2 Chance do nothing

After 6th Attack: Jump to 1st Attack for next turn

COUNTER: [All Physical and Magical Attacks]

Death Machine's HP > 83%: Do nothing

Death Machine's HP <= 83%: Jump to 4th Attack the first time Death Machine's HP drops below 83%

Death Machine's HP <= 66%: Jump to 5th Attack the first time Death Machine's HP drops below 66%

Death Machine's HP <= 50%: Jump to 5th Attack the first time Death Machine's HP drops below 50%

Death Machine's HP <= 33%: Jump to 6th Attack the first time Death Machine's HP drops below 33%

Notes On Death Machine:

The Death Machine can be encountered as early as Disc 1 by travelling back to Junon once the Player has obtained the Buggy. Head to the "T" Intersection where the guards are being drilled, and interact with the red panel to activate random encounters. This is not a glitch; the developers intended you to be able to face these foes on Disc 1.

If you are facing the Death Machine when the game naturally intends you to on Disc 2, then they can easily be defeated using Physical blows. Beta should be enough to kill them in one.

If you are facing them on Disc 1, however, then you will need to be prepared. Put your characters in the Back Row, and cast Big Guard. When it uses Matra Magic twice, it can wipe out your Party. Cast Laser twice, then follow up with Beta or Aqualung to kill them. You can use Frog Song on them if you have learned the Enemy Skill to incapacitate them.

You do not need to steal the W Machine Gun from them, as the Weapon for Barret can be obtained from a chest in Mt. Corel.

Do not confuse the Death Machine's 100 Needles attack with the Cactuer's 1000 Needles attack; 100 Needles uses the regular Physical formula, and does not deal a fixed amount of damage.

The Death Machine cannot be Back-Attacked, but it can be Side-Attacked.

POWER req for Overflow:

Base Damage Overflow:	156
Rnd Var Overflow 3x:	104
Rnd Var Overflow 4x:	78
Rnd Var Overflow 6x:	52

|                                                                          |
|  OPENING ATTACK: 1/2 Chance start from 2nd Attack                        |
|                  1/2 Chance start from 3rd Attack                        |
```

1ST ATTACK: Use <Punch> on Rnd Target

Follow-Up:

Slalom's HP > 75%: 1/8 Chance use <Punch> on Rnd Target
7/8 Chance use do nothing

Slalom's HP <= 75%: 1/6 Chance use <Punch> on Rnd Target
5/6 Chance use do nothing

Slalom's HP <= 50%: 1/3 Chance use <Punch> on Rnd Target
2/3 Chance use do nothing

Slalom's HP <= 25%: 1/2 Chance use <Punch> on Rnd Target
1/2 Chance use do nothing

2ND ATTACK: Same as 1st Attack

3RD ATTACK: Use Smog [Poison] on Rnd Target

Follow-Up:

Slalom's HP > 75%: 1/8 Chance use Smog [Darkness] on Rnd Target
7/8 Chance use do nothing

Slalom's HP <= 75%: 1/6 Chance use Smog [Darkness] on Rnd Target
5/6 Chance use do nothing

Slalom's HP <= 50%: 1/3 Chance use Smog [Darkness] on Rnd Target
2/3 Chance use do nothing

Slalom's HP <= 25%: 1/2 Chance use Smog [Darkness] on Rnd Target
1/2 Chance use do nothing

Notes On Slalom:

The Slalom can be encountered as early as Disc 1 by travelling back to Junon once the Player has obtained the Buggy. Head to the "T" Intersection where the guards are being drilled, and interact with the red panel to activate random encounters. This is not a glitch; the developers intended you to be able to level up against these foes on Disc 1.

The Slalom can be very easily defeated when you encounter them on Disc 2. One blast of Trine may be enough to kill them in one. Your Deathblow chance will be approximately 52%.

If you are encountering the Slalom on Disc 1, then be sure to equip the Star Pendent and Silver Glasses to protect from Poison and Darkness, respectively. Use Aqualung and Beta to kill them in two hits.

The main reason to want to battle the Slalom (regardless of what Disc you are on) is to obtain some Smoke Bombs. These Battle Items will enable you to flee the Battle, and can be a huge help in the Battle Square, seeing as you will retain the BP earned during that Battle. A Lv 46 Cloud would have a 12.5% chance of stealing from the Slalom. If you were trying to steal from them on Disc 1, then a Lv 22 Cloud would have a 7.81% chance of stealing from them.

POWER req for Overflow:

Base Damage Overflow:	161
Rnd Var Overflow 3x:	108
Rnd Var Overflow 4x:	81
Rnd Var Overflow 6x:	54

| The Slalom is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. The Slalom is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.

Submarine Crew's ATTACKS:

Manip Attack 1: Machine Gun
Manip Attack 2: Hand Grenade

Attack 1: <Machine Gun> — Berserk Attack
[110] Physical
Target: One Opponent
Element: Shoot
Att%: 100
Power: 16
Base Damage: 300 HP

Attack 2: Hand Grenade — Never Used
[17C] Physical
Target: One Opponent
Element: Shoot
Att%: 70
Power: 35
Base Damage: 656 HP

Submarine Crew's BATTLE PLAN:

OPENING ATTACK:

Formation ID is NOT [#786]: Do nothing

Formation ID is [#786]: (Submarine Cockpit Battle)
Display String: [“Eyaaarrrgh!”]

PHASE 1: (Repeats)

Submarine Crew's HP > 75%: Use <Machine Gun> on Rnd Target

PHASE 2: (Repeats)

Submarine Crew's HP <= 75%: Use <Machine Gun> on Target with Lowest Current HP

DEATH: Formation ID is NOT [#786]: Do nothing

Formation ID is [#786]: (Submarine Cockpit Battle)

Submarine Crew [A] has been killed:
Display String: [“Captain… I can't hold on any longer!”]

Submarine Crew [B] has been killed:
Display String: [“The Special Pose…”]

Notes On Submarine Crew:

The Submarine Crew cannot be randomly encountered, and only appear during the Junon Huge Materia mission. They are very weak, and can be taken out with just a few Physical blows. You could use L4 Suicide if you wish, or, Trine should be enough to kill them in one.

Shinra Betas are useless at this point in the game; however, they are permanently missable. If you did not manage to obtain one from the Marine on the Cargo Ship on Disc 1, then the Submarine Crew is the last means to obtain this piece of Armour.

8-inch Cannons can help for the Battle Square, as they have a Base Damage of 3200. The item is permanently missable, so you should try to obtain at least one if you have not already. A Lv 46 Cloud would have a 14.06% chance of stealing from the Submarine Crew. Note that the Grosspanzer-Big will drop 8-inch Cannons as a 100% drop rate.

A possible flaw exists with the Submarine Crew's AI Script. As with the Grenade Combatant, a check is performed to see how many times it has used its Attack. Normally, Hand Grenade will be used three times before it starts using Machine Gun; however, with the Submarine Crew, it counts how many times Machine Gun has been used, only to continue using Machine Gun once 'Count' equals 0. This is likely not an error, but a lazy way of copy + pasting, then varying the script slightly as to not be identical.

The optional forced encounter with the Submarine Crew on the Submarine's Cockpit can be fought from both the Blue and Red Submarine (Formation ID #786). These NPCs are the same Shinra troops that you performed with during Rufus' send-off on Disc 1. If you opt to kill them in the Grey Submarine then fail the mission, you will be still able to kill the same enemies on the red Submarine, which seems to be an oversight.

|                                                                           |
|  DEATH: Disable Death Animation, use <Vanish> on Self, end Battle         |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Guard System:                     |   POWER req for Overflow:  |
|                                              |                            |
| The Guard System by themselves do nothing.   |  Base Damage Overflow: 160 |
|  After the initial message has appeared they |  Rnd Var Overflow  3x: 107 |
|  will spawn in either the Quick Machine Gun, o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  or the Rocket Launcher; whichever ATB bar                                |
|  fills up first. Only these enemies can attack the Player.                |
| Once The Guard System has spawned in an enemy, it can swap that enemy out |
|  with its counterpart from time to time.                                  |
| Once you have killed the enemy that the Guard System spawns in, the Guard |
|  System will sit there doing nothing until you kill it. This is a bug;    |
|  once you'd killed either enemy that it spawns, it should have then       |
|  continued to spawn in its counterpart until that enemy was killed, at    |
```

```
|  which point the Guard System would go into idle mode. An oversight in     |
|  scripting means that the killed Quick Machine Gun/Rocket Launcher is       |
|  still flagged as active, and as such its counterpart thinks it is still    |
|  alive.                                                                     |
| You do not need to kill its counterparts to end the Battle, however, you    |
|  will gain additional Battle Spoils if you do kill the Quick Machine Gun/   |
|  Rocket Launcher.                                                           |
| While the Guard System Nullifies lightning-based Attacks, its counter-      |
|  parts take Double Damage from Lightning. Aqualung or Beta should be        |
|  strong enough to kill them in one. Your Deathblow chance will be above     |
|  65%.                                                                       |
| The Guard System cannot be Back-Attacked or Side-Attacked, meaning that     |
|  one cannot perform Random Variation Overflow with 4x or 6x Damage.         |
| The Guard System is immune to Seizure, which isn't necessary seeing as      |
|  there is no way for the Player to inflict an enemy with Seizure. The       |
|  Guard System is one of 86 enemies that are immune to Seizure. It is also   |
|  immune to Peerless, along with 104 other enemies.                          |
\                                                                             /

[14E] Physical 0 Dam	Att%: Auto Hit	Animation

Quick Machine Gun's BATTLE PLAN: (Repeats)

NOTE - The Quick Machine Gun's "Spcl Attack" is activated from the Rocket Launcher's AI Script. It is deactivated once it has been used once.

OPENING ATTACK:

At least one Target without Confusion OR Spcl Attack activated:

Use <Appear> on Self, appears into Battle

Follow-Up: Use <Machine Gun> on 2nd Target; If 2nd Target has Death, do nothing
Follow-Up: Use <Machine Gun> on 1st Target; If 1st Target has Death, do nothing
Follow-Up: Use <Machine Gun> on 3rd Target; If 3rd Target has Death, do nothing

All Targets with Confusion:

Use <Appear> on Self, appears into Battle
Follow-Up: Use <Machine Gun> on Rnd Target

THEREAFTER:

1/4 Chance: Use <Vanish> on self, disappears from Battle, activates Rocket Launcher's Spcl Attack when it spawns in

1/4 Chance: Use <Vanish> on self, disappears from Battle

1/4 Chance: Use Machine Gun on Rnd Target

1/4 Chance: Use <Machine Gun> on 2nd Target; If 2nd Target has Death, do nothing
Follow-Up: Use <Machine Gun> on 1st Target; If 1st Target has Death, do nothing
Follow-Up: Use <Machine Gun> on 3rd Target; If 3rd Target has Death, do nothing

Notes On Quick Machine Gun:

The "1st Target", "2nd Target" & "3rd Target" refers to the right-most, central, and left-most characters, respectively.

The Quick Machine Gun is not a stand-alone enemy; it part of the Guard System and will only spawn in after the Guard System has displayed its warning message, which it will do so after one turn.

The Quick Machine Gun is one of two enemies that could spawn in after the Guard System's message, the other being the Rocket Launcher. The enemy to fill up its ATB gauge first will be the enemy to spawn in first.

Occasionally, the Quick Machine Gun will retreat back into the Guard System, at which point the two enemy variants have the same chances of

POWER req for Overflow:

Base Damage Overflow: 153
Rnd Var Overflow 3x: 102

| appearing again. |
| Once you have killed either the Quick Machine Gun or the Rocket Launcher, the Guard System will no longer spawn in any enemies, and will just sit there till you kill it. This is a bug; the AI script does a check to see if its counterpart is still alive, which will always fail seeing as the Quick Machine Gun cannot spawn in after you've killed the Rocket Launcher, and vice-versa, which was not the intention. |
| There are various flags used in this Battle, one which will dictate if an enemy is "Alive" and one which will indicate if an enemy is "Active". The check the Quick Machine Gun/Rocket Launcher performs is to see if its counterpart is "Active", and this flag does not get set to 0 upon death. So, the inactive enemy thinks that the other enemy is still active, even even though it is flagged as being dead. |
| You do not need to kill the Quick Machine Gun/Rocket Launcher to end the Battle; just killing the Guard System is enough; however, you will gain additional Battle Spoils if you do kill the Guard System's counterpart. Seeing as you cannot kill both counterparts, the maximum EXP/AP/Gil you can earn is capped to the value of the Guard System's Spoils plus the Quick Machine Gun *or* Rocket Launcher's Spoils. |
| Each variant of enemy has a "Special Attack", which is sometimes used when it spawns in; The Quick Machine Gun activates the Rocket Launcher's Spcl Attack, and the Rocket Launcher activates the Quick Machine Gun's Spcl Attack. |
| While the Guard System Nullifies Lightning, the Quick Machine Gun and Rocket Launcher both take Double Damage from Lightning-based Attacks. Trine should not be necessary, as your Physical blows should easily kill them. You could use L4 Suicide, if you wished. |
| Two identical versions of Machine Gun is used; one when attacks a single target, and one when it uses its 3x combo. |
| The Quick Machine Gun cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage. |
| The Quick Machine Gun is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. The Quick Machine Gun is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies. |

NOTE - This is Rocket Launcher Version 2 found in Junon, NOT the one found in Sector 4

No Manipulate Attacks!

Rocket Launcher's ATTACKS:

Attack 1: Rocket Launcher [123] Physical	Target: One Opponent Element: Shoot Att%: 75 Power: 24 Base Damage: 681 HP	Can't Cover	
Attack 2: Confu Missile [2DF] Physical	Target: One Opponent Element: None Att%: 95 Power: 20 Base Damage: 567 HP	Can't Cover Status Inflict: Confusion (100%)	
Attack 3: <Appear> [14F] Physical 0 Dam	Target: Self Att%: Auto Hit	Appearing Animation	
Attack 4: <Vanish> [14E] Physical 0 Dam	Target: Self Att%: Auto Hit	Disappearing Animation	

Rocket Launcher's BATTLE PLAN: (Repeats)

NOTE - The Rocket Launcher's "Spcl Attack" is activated from the Quick Machine Gun's AI Script. It is deactivated once it has been used once.

OPENING ATTACK:

At least one Target without Confusion:

Use <Appear> on Self, appears into Battle
Follow-Up: 1/4 Chance use Confu Missile on Rnd Target without Confusion; If all Targets have Confusion, select Rnd Target
3/4 Chance use Rocket Launcher on Rnd Target

All Targets with Confusion OR Spcl Attack activated:

Use <Appear> on Self, appears into Battle
Follow-Up: Use Rocket Launcher on Rnd Target without Confusion; If all Targets have Confusion, select Rnd Target

THEREAFTER:

1/4 Chance: Use <Vanish> on self, disappears from Battle, activates Quick Machine Gun's Spcl Attack when it spawns in

1/4 Chance: Use <Vanish> on self, disappears from Battle

1/4 Chance: Use Confu Missile on Rnd Target without Confusion; If all Targets have Confusion, select Rnd Target

1/4 Chance: Use Rocket Launcher on Rnd Target

Notes On Rocket Launcher: (Junon)	POWER req for Overflow:
This Rocket Launcher looks identical to the Rocket Launcher found in Sector 4 at the beginning of the game.	Base Damage Overflow: 153 Rnd Var Overflow 3x: 102

The Rocket Launcher is not a stand-alone enemy; it part of the Guard System and will only spawn in after the Guard System has displayed its warning message, which it will do so after one turn.

The Rocket Launcher is one of two enemies that could spawn in after the Guard System's message, the other being the Quick Machine Gun. The enemy to fill up its ATB gauge first will be the enemy to spawn in first.

The Rocket Launcher is slightly stronger than the Quick Machine Gun, and will also inflict the Player with Confusion. Be sure to wear Ribbons.

Occasionally, the Rocket Launcher will retreat back into the Guard System, at which point the two enemy variants have the same chances of appearing again.

Once you have killed either the Rocket Launcher or the Quick Machine Gun, the Guard System will no longer spawn in any enemies, and will just sit there till you kill it. This is a bug; the AI script does a check to see if its counterpart is still alive, which will always fail seeing as the Rocket Launcher cannot spawn in after you've killed the Quick Machine Gun, and vice-versa, which was not the intention.

There are various flags used in this Battle, one which will dictate if an enemy is "Alive" and one which will indicate if an enemy is "Active". The check which the Rocket Launcher/Quick Machine Gun performs is to see if its counterpart is "Active", and this flag does not get set to 0 upon death. So, the inactive enemy thinks that the other enemy is still active, even though it is flagged as being dead.

You do not need to kill the Quick Rocket Launcher/Machine Gun to end the Battle; just killing the Guard System is enough; however, you will gain additional Battle Spoils if you do kill the Guard System's counterpart. Seeing as you cannot kill both counterparts, the maximum EXP/AP/Gil you can earn is capped to the value of the Guard System's Spoils plus the Rocket Launcher *or* Quick Machine Gun's Spoils.

Each variant of enemy has a "Special Attack" which is sometimes used when it spawns in; The Rocket Launcher activates the Quick Machine Gun's Spcl Attack, and the Quick Machine Gun activates the Rocket Launcher's Spcl Attack.

While the Guard System Nullifies Lightning, the Rocket Launcher and Quick Machine Gun both take Double Damage from Lightning-based Attacks. Trine should not be necessary, as your Physical blows should easily kill them. You could use L4 Suicide, if you wished.

The Rocket Launcher cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.

The Rocket Launcher is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. The Rocket Launcher is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.

3RD ATTACK: Same as 1st Attack

4TH ATTACK: Use <Fight> on Rnd Target

```
|   Follow-Up: 1/3 Chance use <Fight> on Rnd Target                          |
|              2/3 Chance do nothing                                         |
|                                                                            |
|  5TH ATTACK: Use St.Elmos Fire on Rnd Target                               |
|                                                                            |
|  6TH ATTACK:                                                               |
|                                                                            |
|   Goannai used twice: Use <Fight> on Rnd Target                            |
|                                                                            |
|   Goannai used less than twice:                                            |
|                                                                            |
|    1/2 Chance: Use Goannai on Target with Highest Current HP               |
|    1/2 Chance: Use <Fight> on Rnd Target                                   |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Ghost Ship:                    |   POWER req for Overflow:        |
|                                           |                                  |
| Ghost Ship is found in Battle Square:     |  Base Damage Overflow: 160       |
|  Set - 3  (After Highwind)     Battle - 8 |  Rnd Var Overflow  3x: 107       |
|                                           o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| While the Ghost's Ship's attacks are not                                   |
|  very strong, it can eject your characters from the Battle, flagging them  |
|  as dead, which can be hazardous if you are off-guard.                     |
| You will want to try to Morph the Ghost Ship into the Guide Book, which    |
|  can be traded with the Kalm Traveller for the Underwater Materia. This    |
|  way you can defeat Emerald Weapon without the 20 minute time-limit. Use   |
|  L4 Suicide, then follow up with Morph. You will be able to revisit the    |
|  Underwater Pipe at any point in the game following the Submarine Mission, |
|  if you missed your first opurtunitty to obtain the Guide Book.            |
| The Ghost Ship is considered an "Undead" enemy, which means that they will |
|  take damage from healing items and spells such as Cure, Potions etc.      |
|  Throwing a Phoenix Down would have a 25% chance of instantly killing the  |
|  Ghost Ship, whereas a Megalixir/Elixir/X-Potion has a 100% chance.        |
| As with all "Undead" Enemies (excluding the Parasite and Soul Fire), the   |
|  Ghost Ship takes Double Damage from the Holy Element, which you will have |
|  access to by now (Alexander Materia).                                     |
| The Ghost Ship is one of four enemies that absorbs the Death Status,       |
|  meaning that Physical attacks performed by Players with Added Effect +    |
|  Death Status on their Weapon (Destruct Materia) will cure the Ghost Ship. |
|  The other three enemies that absorb Death are the Ghost, Zenene, and      |
|  Dragon Zombie.                                                            |
| The Ghost Ship should be feared, especially if you encounter them in the   |
|  Battle Square. Use L4 Suicide to take them out quickly, or use an X-      |
|  Potion. If it manages to use Goannai on your character, then you will     |
|  fail the Battle, and it will have a 1/12 chance it will open with the     |
|  Attack. If it uses St.Elmos Fire, the watch out; the next turn it will    |
|  have a 50% chance of using Goannai. White Wind is also an effective means |
|  of defeating them (casts Petrify, amongst other Statuses). Another way to |
|  deal with the Ghost Ship is to inflict them with Berserk via the use of a |
|  War Gong; that way they will not be able to use Goannai. You can Silence  |
|  it to also prevent it from using the Attack.                              |
| The Ghost Ship is one of a number 'elevated' enemies that Nullifies the    |
|  Earth Element, but will no take double damage from Wind.                  |
| The Ghost Ship cannot be Back-Attacked or Side-Attacked, meaning that one  |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.            |
\                                                                            /

                        2/3 Chance do nothing

  Corvette's HP <= 25%: 1/2 Chance use Spinning Cut on Rnd Target
                        1/2 Chance do nothing

3RD ATTACK: Same as 1st Attack

COUNTER: [All Physical and Magical Attacks]

 Corvette's HP  > 75%: Do nothing

 Corvette's HP <= 75%: Use Slap on Last Attacker for next turn; If Last
                        Attacker has Death, do nothing
                       Jump to 1st Attack for next turn

 Corvette's HP <= 50%: Use Slap on Last Attacker for next turn; If Last
                        Attacker has Death, do nothing
                       Jump to 1st Attack for next turn

 Corvette's HP <= 25%: Use Slap on Last Attacker for next turn; If Last
                        Attacker has Death, do nothing
                       Jump to 1st Attack for next turn
```

```
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Corvette:                              |   POWER req for Overflow:   |
|                                                   |                             |
| The Corvette is not a very tough enemy, and       |  Base Damage Overflow: 159  |
|  can be easily defeated via the use of L4         |  Rnd Var Overflow  3x: 106  |
|  Suicide.                                         o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Corvette is one of three enemies that                                       |
|  takes Double Damage from Confusion. This means that if you had the Added       |
|  Effect Materia paired with Mystify/Contain, your Physical Attacks would        |
|  do Double Damage. The other two Enemies are the SOLDIER:3rd and Sword          |
|  Dance. The Corvette are vulnerable to the Confusion Status (unlike the         |
|  Sword Dance).                                                                  |
| Light Curtains are a rare item, and can only be obtained from the Garuda        |
|  as a 10.39% drop, or from the Unknown as a 4.69% drop. The Item will cast      |
|  Barrier on all allies, and can prove useful at times. You should try to        |
|  obtain one from the Corvette if you are trying to max your inventory.          |
| The Corvette cannot be Back-Attacked or Side-Attacked, meaning that one         |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.                 |
| The Corvette is one of a number 'elevated' enemies that Nullifies the           |
|  Earth Element, but will no take double damage from Wind.                       |

|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Diver Nest:                    |   POWER req for Overflow:       |
|                                           |                                 |
| The Diver Nest's attacks are moderately   |  Base Damage Overflow: 167      |
|  strong, but the enemy should not pose too|  Rnd Var Overflow  3x: 112      |
|  much of a threat to the party. If your   o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Magical Attacker is strong enough, they                                    |
|  may be able to kill them in one hit with Beta. Avoid Aqualung.             |
| You could use Bad Breath if you are under-levelled to incapacitate the      |
```

| Diver Nest. Use Big Guard if you must. |
| The Diver Nest is one of a number 'elevated' enemies that Nullifies the Earth Element, but will no take double damage from Wind. |
| The Diver Nest cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage. |

-.-.-.

ELEMENTS TO USE:

Lightning - Gun Carrier	- Double	
Lightning - Carry Armor	- Double	(Boss)
Lightning - Right Arm	- Double	(Mini Boss)
Lightning - Left Arm	- Double	(Mini Boss)

ELEMENTS TO AVOID:

Poison - Carry Armor	- Nullify	(Boss)
Poison - Right Arm	- Nullify	(Mini Boss)
Poison - Left Arm	- Nullify	(Mini Boss)
Gravity - Carry Armor	- Nullify	(Boss)
Gravity - Right Arm	- Nullify	(Mini Boss)
Gravity - Left Arm	- Nullify	(Mini Boss)
Fire - Hard Attacker	- Halve	
Water - Senior Grunt	- Halve	
Water - Hard Attacker	- Halve	

ELEMENTS USED BY ENEMIES:

Fire - Hard Attacker	- Oil
Cut - Guardian	- Jumping Blow
Cut - SOLDIER:2nd	- Fight
Cut - SOLDIER:2nd	- Sword of Doom
Hit - Hard Attacker	- Bodyblow
Hit - Guardian	- Rocket Punch
Hit - Guardian	- W Rocket Punch
Hit - Gun Carrier	- Bodyblow
Hit - Right Arm	- Arm Punch
Hit - Left Arm	- Arm Punch
Punch - Senior Grunt	- Handclaw
Shoot - Senior Grunt	- Harrier Beam
Shoot - Gun Carrier	- Normal Shell
Shoot - Gun Carrier	- Abnormal Shell
Shoot - Submarine Crew	- Machine Gun
Shoot - Underwater MP	- Machine Gun
Shoot - Underwater MP	- Hand Grenade
Shoot - Captain	- Machine Gun
Shout - Senior Grunt	- Water Wave

STATUSES TO DEFEND FROM:

Slow - Gun Carrier	- Abnormal Shell	(100% Inflict)	
Darkness - Gun Carrier	- Abnormal Shell	(100% Inflict)	
Imprisoned - Right Arm	- Arm Grab	(100% Inflict)	
Imprisoned - Left Arm	- Arm Grab	(100% Inflict)	

STATUSES TO USE:

Death, Confusion, Silence, Slow, Stop, Petrify

|  1/2 Chance: Use <Bodyblow> on Rnd Target in the Front Row; If all Targets |
|               are in the Back Row, select Rnd Target                       |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Hard Attacker:                  |   POWER req for Overflow:     |
|                                            |                               |
| The Hard Attacker are not a strong enemy.  |  Base Damage Overflow: 167    |
|  Their attacks are very weak, and they can |  Rnd Var Overflow  3x: 112    |
|  easily be dispatched by using L4 Suicide  |  Rnd Var Overflow  4x:  84    |
|  then following up with Matra Magic or     |  Rnd Var Overflow  6x:  56    |
|  regular Attacks.                          o~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
| The Attack 'Oil' uses the same animation as                                |
|  Fire2; however, the attack itself is considered as a Physical Attack, and |
|  can be defended from by putting your characters in the Back Row (if one   |
|  character is in the Front Row, it will always use Oil on that character). |
| Avoid using Beta or Aqualung. Trine should be dealing 1750+ HP.            |
| The Hard Attacker is encountered in an area that cannot be revisited; once |
|  you progress past a certain point in the game, you can no longer fight    |
|  the enemy.                                                                |
\                                                                            /

```

2ND ATTACK: Same as 1st Attack
3RD ATTACK: Same as 1st Attack

After 3rd Attack: 1/2 Chance jump to 4th Attack for next turn
1/2 Chance jump to 5th Attack for next turn

4TH ATTACK: Use W Rocket Punch on Rnd Target

Follow-Up:

Guardian's HP > 75%: 1/8 Chance use W Rocket Punch on Rnd Target
7/8 Chance do nothing

Guardian's HP <= 75%: 1/6 Chance use W Rocket Punch on Rnd Target
5/6 Chance do nothing

Guardian's HP <= 50%: 1/4 Chance use W Rocket Punch on Rnd Target
3/4 Chance do nothing

Guardian's HP <= 25%: 1/2 Chance use W Rocket Punch on Rnd Target
1/2 Chance do nothing

5TH ATTACK: Use Jumping Blow on Rnd Target

Follow-Up:

Guardian's HP > 75%: 1/8 Chance use Jumping Blow on Rnd Target
7/8 Chance do nothing

Guardian's HP <= 75%: 1/6 Chance use Jumping Blow on Rnd Target
5/6 Chance do nothing

Guardian's HP <= 50%: 1/4 Chance use Jumping Blow on Rnd Target
3/4 Chance do nothing

Guardian's HP <= 25%: 1/2 Chance use Jumping Blow on Rnd Target
1/2 Chance do nothing

DEATH: Use <Vanish> on Self, end Battle

Notes On Guardian:

While the Guardian may appear to be a tough enemy, they can easily be defeated using L4 Suicide. Their attacks do moderate damage, but should not cause you many problems.
Your Deathblow chance will be approximately 60%. Use Added Cut if you wish to take them out using Physical blows (paired with Deathblow).
The Guardian consists of three enemies; the arms that it shoots at you are unique enemies, with their own IDs. These enemies cannot be targeted or killed, and you cannot claim the Spoils they carry; see the "Extra Enemies" section for more information on the Guardian's counterparts.
The Guardian is one of six enemies that are affected by the 'Berserk Glitch', which means that they have no assigned Attack to use when they are inflicted with Berserk. As such the "skill power is used up" text

POWER req for Overflow:

Base Damage Overflow: 162
Rnd Var Overflow 3x: 108

| string will be displayed every turn, seeing as the Attack they are trying to use costs 65,535 MP!
| The Guardian cannot be Back-Attacked or Side-Attacked, meaning that one cannot perform Random Variation Overflow with 4x or 6x Damage.
| The Guardian is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. The Guardian is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.
| The Guardian is encountered in an area that cannot be revisited; once you progress past a certain point in the game, you can no longer fight the enemy.

|      All Targets with Slow AND All Targets with Darkness:                    |
|                                                                              |
|       Jump to 3rd Attack for next turn                                       |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Gun Carrier:                     |   POWER req for Overflow:      |
|                                             |                                |
| The [No Name] Attack on the Gun Carrier has |  Base Damage Overflow: 162     |
|  the same attack properties as the [No Name] |  Rnd Var Overflow  3x: 108     |
|  attack found on the Dual Horn; however,     o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  The Guin Carrier will never use the attack.                                 |
| The "1st Target", "2nd Target" & "3rd Target" refers to the right-most,      |
|  central, and left-most characters, respectively.                            |
| The Gun Carrier will try to inflict your characters with Darkness and        |
|  Slow, then it will target the inflicted characters. Wear Ribbons and        |
|  Sprint Shoes to defend from this.                                           |
| One blast of Trine may be enough to kill them in one hit, as they take       |
|  Double Damage from Lightning based attacks.                                 |
| The Gun Carrier cannot be Back-Attacked or Side-Attacked, meaning that one   |
|  cannot perform Random Variation Overflow with 4x or 6x Damage.              |
| The Gun Carrier is encountered in an area that cannot be revisited; once     |
|  you progress past a certain point in the game, you can no longer fight      |
|  the enemy.                                                                  |
```

Base Damage: 292 HP
Attack 2: Hand Grenade Target: One Opponent
[17C] Physical Element: Shoot
Att%: 70
Power: 35
Base Damage: 638 HP
Underwater MP's BATTLE PLAN: (Repeats)
1ST ATTACK: Use <Machine Gun> on Rnd Target
Follow-Up: Use <Machine Gun> on Rnd Target
Follow-Up: Use <Machine Gun> on Rnd Target
2ND ATTACK: Use Hand Grenade on Rnd Target

Notes On Underwater MP:	POWER req for Overflow:
The Underwater MP only appears in a single forced encounter, making them somewhat of a unique enemy.	Base Damage Overflow: 164 Rnd Var Overflow 3x: 109

You can very quickly dispatch the Underwater MP with one use of Trine, or, use Deathblow with Added Cut. Your Deathblow chance will be roughly 62%.

The Shinra Alpha is a six slotted piece of Armour with moderate defence, and is permanently missable, so you should try to obtain one from the Underwater MP when you get the chance. A Lv 47 Cloud would have a 14.06% chance of stealing from them. You will get another chance to steal the Shinra Alpha from the Captain (in the Submarine), and the SOLDIER:1st towards the end of Disc 2.

|   Left Arm does not have an Imprisoned Character: Do nothing         |
|                                                                      |
|                                                                      |
|  DEATH:                                                              |
|                                                                      |
|   Right Arm has an Imprisoned Character:                             |
```

Use <Free Right Character> on Right Arm, free Imprisoned Character
Left Arm has an Imprisoned Character:
Use <Free Left Character> on Left Arm, free Imprisoned Character
Use <Vanish> on Self, remove Right Arm and Left Arm from Battle, Right Arm and Left Arm leave no rewards, end Battle

Notes On Carry Armor:	POWER req for Overflow:
Carry Armor is a notoriously difficult boss, as it can Imprison you Characters in the same way that Turks:Reno I and Bottomswell could. It will only imprison two of your characters, which leaves your third character vulnerable to a Game Over he/she is killed.	Base Damage Overflow: 226 Rnd Var Overflow 3x: 151

Be sure to set up for this Battle accordingly; Carry Armor has very high defences, so equip Neo Bahamut and Bahamut, which ignores the target's Def. It also takes double damage from Lightning based attacks, so equip Lightning with either All or MP Turbo, and equip Elemental+Ramuh on you Physical attacker's Weapon. Your Deathblow chance will be roughly 67%, so be sure to pair it with Added Cut.

If you need the extra defense, then give you characters Sadness, and equip them with Circlets do protect from Lapis Laser. You could also put your characters in the Back Row to defend from the Arms <Arm Punch> attack.

When the battle begins, set up Big Guard as standard, and start off by casting your Summons. Have your Physical attacker concentrate on the Arms; once both Arms are dead, Carry Armor becomes much easier. You could also use Magic Hammer twice to stop it from using Lapis Laser.

Use Magic Breath, Comet2, Trine, Bolt3 and Deathblow to defeat Carry Armor. Dragon Fangs also work well, and will inflict 1862 - 1986 HP in all opponents. The Battle will end once Carry Armor has been killed, although, you will want to kill the Arms for extra Battle Spoils.

If one of the Arms manages to use Arm Grab, the character that becomes Imprisoned will be flagged as 'Dead', and their HP will show in red if you try to use an Item such as a Megalixir. You will not be able to target them, and they can only be freed by killing the Arm.

Every time you attack either Carry Armor, the Left Arm or the Right Arm when a character is Imprisoned, each enemy will retaliate by using <Damage Attack> on the Imprisoned character/s. This means that if you were to use an attack that targets all opponents, such as Magic Breath, the Imprisoned character/s would each be hit three times. If one of your characters uses a Counter Attack, it will not trigger the use of <Damage Attack>.

Four versions of Lapis Laser exist; one used when no characters are Imprisoned; one used when the Left Arm has a character Imprisoned; one used when the Right Arm has; and one used when both Arms has.

Carry Armor's Arms can never grab more than two characters; however, if you were to use Cait Sith's 'Transform' Limit Break, then only one Target would be considered in the Battle. If the Arms were to then Imprison Cait Sith, it would mean Game Over. Should you activate Transform while a character is already Imprisoned, the character would disappear while still being flagged as Imprisoned. Cait Sith would then instead be inflicted with the damage taken via <Damage Attack>.

Carry Armor is subject to the 'Quadra Magic Ultima Glitch' whereby the game will freeze when the Player tried cast Ultima, when they have one

| Ultima paired with HP or MP Absorb, and another with Quadra Magic. |
| Carry Armor is immune to Seizure, which isn't necessary seeing as there is |
| no way for the Player to inflict an enemy with Seizure. Carry Armor is |
| one of 86 enemies that are immune to Seizure. It is also immune to |
| Peerless, along with 104 other enemies. |

.-------------. NOTE - This is the Right Arm that is part of Carry Armor

|                                                                              |
```

DEATH:
Right Arm has an Imprisoned Character:
Use <Free Right Character> on Self, free Imprisoned Character
Use <Vanish> on Self, remove Self from Battle

Notes On Right Arm: (Carry Armor)	POWER req for Overflow:
The Right Arm along with the Left Arm should be dealt with as a priority before turning your attention to Carry Armor; with the Arms dead, the Battle becomes much easier. See the notes on Carry Armor above for details on how to setup for the fight. The Battle will end when Carry Armor is defeated; however, you should try to kill both Arms for extra Battle Spoils Two versions of Arm Grab and Arm Punch exist; one used when the Left Arm does not have a character Imprisoned, and one used when it does. While the Attack <Damage Attack> ignores any Status defences in place, it will *not* overlook the use of MBarrier, if MBarrier is active. Right Arm is immune to Seizure, which isn't necessary seeing as there is no way for the Player to inflict an enemy with Seizure. Right Arm is one of 86 enemies that are immune to Seizure. It is also immune to Peerless, along with 104 other enemies.	Base Damage Overflow: 226 Rnd Var Overflow 3x: 151

.------------. NOTE - This is the Left Arm that is part of Carry Armor

|                                                                                |
|   Left Arm does not have an Imprisoned Character: Do nothing                   |
|                                                                                |
|                                                                                |
|   Right Arm has an Imprisoned Character:                                       |
|                                                                                |
|    Use <Damage Attack> on Imprisoned Character in Right Arm                    |
|                                                                                |
|   Right Arm does not have an Imprisoned Character: Do nothing                  |
|                                                                                |
|                                                                                |
|  DEATH:                                                                        |
|                                                                                |
|   Left Arm has an Imprisoned Character:                                        |
|                                                                                |
|    Use <Free Right Character> on Self, free Imprisoned Character               |
|                                                                                |
|   Use <Vanish> on Self, remove Self from Battle                                |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Left Arm: (Carry Armor)           |   POWER req for Overflow:       |
|                                              |                                 |
| The Left Arm along with the Right Arm should |  Base Damage Overflow: 226      |
|  be dealt with as a priority before turning  |  Rnd Var Overflow  3x: 151      |
|  your attention to Carry Armor; with the     o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  Arms dead, the Battle becomes much easier.                                    |
|  See the notes on Carry Armor above for details on how to setup for the        |
|  fight.                                                                        |
| The Battle will end when Carry Armor is defeated; however, you should try      |
|  to kill both Arms for extra Battle Spoils                                     |
| Two versions of Arm Grab and Arm Punch exist; one used when the Right Arm      |
|  does not have a character Imprisoned, and one used when it does.              |
| While the Attack <Damage Attack> ignores any Status defences in place, it      |
|  will *not* overlook the use of MBarrier, if MBarrier is active.               |
| Left Arm is immune to Seizure, which isn't necessary seeing as there is no     |
|  way for the Player to inflict an enemy with Seizure. Right Arm is one of      |
|  86 enemies that are immune to Seizure. It is also immune to Peerless,         |
|  along with 104 other enemies.                                                 |
\                                                                                /

|         Formation ID is [#786]: (Submarine Cockpit Battle)                    |
|                                                                               |
|          Display String: ["Captain "Ugh… they got me."]                       |
|>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|   Notes On Captain:                          |   POWER req for Overflow:      |
|                                              |                                |
| The Captain can only be fought in the        |  Base Damage Overflow: 159     |
|  Cockpit of the Submarine, which makes it a  |  Rnd Var Overflow  3x: 106     |
|  unique enemy. It is the strongest of the    o~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
|  enemies that share the same model design,                                    |
|  but should still not be considered a threat. A few Physical blows should     |
|  be enough to kill him; your Deathblow chance will be roughly 67%.            |
| The "1st Target", "2nd Target" & "3rd Target" refers to the right-most,       |
|  central, and left-most characters, respectively.                             |
| The Shinra Alpha is a six slotted piece of Armour with moderate defence,      |
|  and is permanently missable, so you should try to obtain one from the        |
|  Captain if you did not get one from the Underwater MP. A Lv 47 Cloud         |
|  would have a 14.06% chance of stealing from them. You will get another       |
|  chance to steal the Shinra Alpha from the SOLDIER:1st towards the end of     |
|  Disc 2.                                                                      |
| The optional forced encounter with the Captain on the Submarine's Cockpit     |
|  can be fought from both the Blue and Red Submarine (Formation ID #786).      |
|  These NPCs are the same Shinra troops that you performed with during        |
|  Rufus' send-off on Disc 1. If you opt to kill them in the Grey Submarine     |
|  then fail the mission, you will be still able to kill the same enemies on    |
|  the red Submarine, which seems to be an oversight.                           |
\                                                                               /
