V1.05 - Uploaded 23/Jun/2019
Size - 7.31 MB

Amendments made:

 - Item Section in 'Game Data' completed
 - Enemies And Encounters Section in 'Game Data' completed (HUGE)
 - Missing Mind Source added for Nibelheim
 - Info on when to access the menu after the Demons Gate battle
 - Underwater Materia corrected as *not* permanently missable
 - Countless revisions and amendments

So, as you can see, there has been a three-year lapse in time since my last update. I'd like to explain what I've been doing in this time briefly.

In July 2016, I began work on a database which started as a side-project but grew into something that took me two and a half years to complete. I knew that I needed to finish my walkthrough, but I had decided that my database was a necessary tool for the creation of my guide, so I persevered and

completed my project. It is possible that I have put more hours into my database than the guide you are currently reading, and is one of my most accomplished pieces of work that I have done with FFVII:

https://gamefaqs.gamespot.com/boards/197341-final-fantasy-vii/77502737

With that out of the way, I am finally free to focus on my walkthrough once more, which I am still committed on finishing. Next I think I will work on finishing the final few sections of the glitches section (which I don't think will ever truly be finished), then work on the final sections within Game Data. I also plan to reconstruct my guide; there is still a *lot* of work to do.....

''''''

V1.01 - Uploaded 14/Jan/2016
Size - 2.07 MB

Amendments made:

 - Section F Finished 21/Oct/2015 - Detailed ASCII artwork of each continent
                                    of the World Map.

 - Revised load-out strategies.
 - Many amendments and tweaks made for PS4 version.
 - Slight tweak to the legal notice.
 - Grammar and spelling corrections, and a lot of error fixes.
 - Amendments to some of the ASCII artwork, including redesign of front page.
 - Additional sub-contents included within each main section.
 - All capitalisation's of the first letter of the words 'Materia' and
   'Chocobo', and de-capitalisation of the word 'gil'.
 - Reworked Midgar Zolom strategy.
 - Slightly reworked 'Affection Game' ratings.
 - Reworked chocobo breeding strategies.
 - Corrected errors with the end-game bosses, and reworked end-game
   strategies.
 - Quotes for each section finished.
 - The inclusion of a newly found hidden Potion in Sector 7.

Thank you to friends and forum contributors who have helped me to make my
guide better by pointing out some of the errors and inconsistencies to me.

```

  Final Fantasy VII is now approaching two decades old. 'Why am I investing

hundreds of hours into a walkthrough for a game that is nearly 20 years old', I find myself asking, and the answer is... I don't entirely know. All I know is that I've never felt for a game the way I have felt for Final Fantasy VII. In fact, be it game, book, film, TV series; nothing has ever compelled or intrigued, scratch that, nothing has ever left me thinking “how in the flying funk did they ever come up with this???” Welcome to the impossibly brilliant, expertly paced, masterfully executed nostalgic global phenomenon that is FF7.

'And given the fact that the game is getting a HD upscaled version brought out to the PS4 *with trophies* this winter (2015), I thought to myself “hey, why not scratch that age old itch and write the most comprehensive, detailed walkthrough I am capable of writing?” Why not indeed....'

I may be over selling the game a little; for those who are completely new to the game I'm not going to beat around the bush. The graphics are outdated; the battle system is (by today's standards) way too easy; and the Japanese to English translation is some-what flawed. 'So why should I invest time into the game then', you may be asking? Because, if one was to make a 'Games to play before you die list', then FF7 would have to be at the top of every list. “BUT WHY??” I hear you screaming. Because... never before or since has a story-plot twist literally blown my mind to the point where even now, having played the game for around the 20th time, I am still learning elements of the story that are completely new to me; I am still marvelling at sub-contextual dialogue that I'd previously missed and/or not fully understood before; and I am still finding more of the hundreds upon hundreds of hidden secrets that the game harvests. Seasoned player or not, one will still be able to appreciate FF7 for what it naturally is - a humorous and sometimes promiscuous but fascinatingly deep and compelling, well-paced story; an immensely huge and rewarding collectable system; a diverse and balanced battle system with engrossing tactics and strategies; beautifully pre-rendered background graphics that give the game a certain 'magical' feel; and the most awesome midi soundtrack that you will most likely ever hear in a game! And remember folks - be like Jesus. Save often!

'Whether you're playing the game for the first time ever, you've played it a few times as a kid but didn't really get into it properly, or you're a FF7 veteran and (like me) you're overjoyed at the prospect of having actual Playstation trophies for the game, I can guarantee this: Using this guide you *will* experience the game to its absolute fullest, and regardless of how much you think you know about the game, you *will* learn something that you hadn't previously. This has been my endeavour.'

If you find this walkthrough to be helpful, please remember to rate/recommend/like it!

Dear reader: During the development of this guide, I came about some great tools that have been developed solely for the purpose of understanding Final Fantasy VII's scripting and mechanics. So, the majority of the 'factual' data contained within this guide can be trusted, as it has been obtained *from source*.

Of course, I didn't come across these tools until quite soon into the guide, and there may still be a few grey-areas that I've missed. If you notice something that doesn't quite add-up to your own knowledge and understanding of the game, the please feel free to get in touch with me and I would be more than happy

to look into the game's coding - DynamixDJ@writeme.com

Acknowledgements for the tools that I have been using can be found in section J - Special Thanks.

 |_| DICE                 - Use Cait Sith's 1st Limit

  {MATERIA OVERLORD CHECKLIST} - Steam version only:

Seeing as you start the game with Lightning and Ice you can cross these off
your list straight away. Also, Underwater, Master Magic, Master Command and
Master Summon do not require Mastering.

 Anything with a * by it is permanently miss-able, there are 83 pieces in
 total to collect (17 of which are miss-able):

|    MAGIC     |   SUPPORT    |    COMMAND     |  INDEPENDENT  |    SUMMON
| (Green - 22) | (Blue - 13)  | (Yellow - 14)  | (Purple - 17) |  (Red - 17)
|              |              |                |               |

| Fire         |              |                |               |

PERMANENTLY MISSABLE MATERIA:

= = = = = = = = = = =   - - - - - - - - - - - - - - - - - - - - - - - - - -
```

ENEMY SKILL - Disc 1 - After defeating Sample:H0512 in Hojo's Lab, be sure
MATERIA to pick up the Materia from the test container.
= = = = = = = = = = = -
IFRIT - Disc 1 - This must be obtained before leaving the Cargo Ship
after defeating Jenova-BIRTH.
= = = = = = = = = = = -
RAMUH - Disc 1 - This must be obtained before leaving the Jockey's
Room in the Gold Saucer after defeating Dyne.
= = = = = = = = = = = -
ADDED EFFECT - Disc 1 - This must be obtained whilst navigating the Cave of
the Gi in Cosmo Canyon.
= = = = = = = = = = = -
LUCK PLUS - Disc 1 - These must all be obtained whilst traversing the
MORPH Temple of The Ancients.
BAHAMUT
= = = = = = = = = = = -
KJATA - Disc 1 - As with Final Attack, Kjata falls victim to the
"full-capacity Materia" glitch. If you try to pick
up Kjata with a full Materia inventory list (200),
then instead of receiving an error message telling
you that your inventory is full, the Materia will be
permanently removed from the field, without being
added to your inventory.
= = = = = = = = = = = -
ENEMY SKILL: - Disc 2 - If you didn't learn it from the Materia Keeper in Mt.
TRINE Nibel, and you've already defeated Godo in the
Pagoda in Wutai, then the Stilva in Gaea's Cliff
will be the last place that you can learn Trine.
= = = = = = = = = = = -
MP TURBO - Disc 2 - These must be obtained whilst navigating the
NEO BAHAMUT Whirlwind Maze in the North Crater.
= = = = = = = = = = = -
ULTIMA - Disc 2 - During the North Corel Huge Materia mission, you
must catch up to the second train otherwise you'll
never be able to buy Ultima from the kid.
= = = = = = = = = = = -
UNDERWATER - Disc 2 - If you did not obtain the Morph Materia from the
Temple of The Ancients, then you subsequently would
not be able to Morph a Ghost Ship for the Guide Book
to exchange for the Underwater Materia.

UPDATE - Thanks to Raiu for pointing out the obvious to me.
You can still get the Morph Command from the Master
Command Materia by beating Emerald.
= = = = = = = = = = = -
STEAL AS WELL - Disc 2 - You must obtain the Leviathan Scales from the
Underwater Reactor to put out the flames in the Da-
chao cavern.
= = = = = = = = = = = -
BAHAMUT ZERO - Disc 2 - To obtain the Bahamut ZERO Materia you must first
obtain Bahamut, Neo Bahamut and the Huge Blue
Materia. If you fail to obtain one of these, then
you can dig Bahamut ZERO up from Bone Village, but
ONLY if you failed one of the Huge Materia
missions (it doesn't matter which one).
If you have obtained the Huge Blue Materia, then
Bahamut ZERO cannot be dug up from Bone Village.
= = = = = = = = = = = -
FINAL ATTACK - Disc 2 - As with Kjata, Final Attack falls victim to the
"full-capacity Materia" glitch. If you try to pick

up Final Attack with a full Materia inventory list (200), then instead of receiving an error message telling you that your inventory is full, the Materia will be permanently removed from the field, without being added to your inventory.

= = = = = = = = = = = = -

MP ABSORB - Disc 2 - You must complete Yuffie's sidequest before raiding Midgar at the end of Disc 2. Note that you can still complete the Pagoda Challenge at any point in the game regardless of whether or not you have completed the main part to Yuffie's Sidequest first.

= = = = = = = = = = = = -

ENEMY SKILL: PANDORA'S BOX - Disc 3 - The Dragon Zombie you encounter at the Northern Cave will use this move ONCE PER GAME ONLY! If you defeated it on your first encounter without learning Pandora's Box (because it's MP is too low) then re-load your save.
You have been warned!

Welcome to the wonderful and alluring world that is Final Fantasy VII, I hope you thoroughly enjoy it! Before scrolling down to the walkthrough itself, I suggest spending a few brief moments to familiarise yourself with the way in which I've designed my guide:-

Every area that you enter you will be faced with a brief run-down of the enemies you will encounter, as follows:

```
+--------------------------#~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~#
|                          >  ENEMIES:                          **********  <
|      NOTE ON ENEMIES:    >           [           ENEMY NAME] [TOXIC FROG] <
|                          >                                    **********  <
| Here you can find a brief > ------Lv: [Enemies Current Level] [--------26] <
| description of the       > ------HP: [-------Enemies Max HP] [-------500] <
| enemies that you will be  > ------MP: [-------Enemies Max MP] [-------100] <
| facing. Note that if you  > -----EXP: [----Experience Gained] [-------420] <
| see stars above an        > ------AP: [Ability Points Gained] [--------30] <
| enemies name as shown in  > -----GIL: [-----------Gil Gained] [-------260] <
| the example then it means > ---STEAL: [---Item You Can Steal] [---Impaler] <
| an Enemy Skill can be     > ---MORPH: [---Item You Can Morph] [----Remedy] <
| learned from that enemy.  > ----DROP: [-Item That Is Dropped] [---Impaler] <
| Also, you'll need the     > --ABSORB: [---Elemental Strength] [-------PSN] <
| Steal Materia to be able  > -NULLIFY: [---Elemental Strength] [----------] <
| to steal, and you'll need > ---HALVE: [---Elemental Strength] [----------] <
| the Morph Materia to be   > --DOUBLE: [---Elemental Weakness] [-------ICE] <
| able to morph.            > -E-SKILL: [--Enemy Skill Learned] [-FROG SONG] <
```

Holding R1 + L1 together will make you flee from battle.

CHEATS!

CHEATING TAKES THE FUN OUT OF THE GAME, AND AT NO POINT WILL I EVER SUGGEST THE USE OF THE BUILT-IN CHEATS AS A STRATEGY!

L3 - Activates 3x Speed
R3 - Activates 'God' Mode
L3&R3 - Toggles random encounters

God mode will keep your HP/MP and Limit bars topped up, but you can still get taken out in one hit if the move is powerful enough.

The control map for the PS4 cannot be adjusted. The X and O buttons have been reversed from their original settings.

****

TIPS:

- Make the most of the quick-search feature! This walkthrough is immensely huge, and utilising Control + F will save you a lot of time and headaches. I have tentatively set-up a feature that allows for effective use of quick-searching, see the index for more info.

- Save often. There is no auto-save feature, so forgetting to make use of a save point could be costly. I also recommend making multiple save files.

- Your kills count towards Leveling up your Limit Breaks! Try to bear that in mind when choosing which player to be the main attacker.

- Press Select whilst in the field to bring up the helpful arrow indicators.

- Arranging your Items by 'Type' in the Item Menu is always a good idea.

- You can change the speed of the battle in the 'Config' menu. You can also fiddle with the colour of the window, just don't touch the button config.

- When swapping your characters over, be sure to also swap their current Armour and Accessory over too.

- You can use the 'Exchange' tab in the Materia menu to arrange your Materia around with characters that aren't currently in your party.

- Whilst in the PHS menu you can press confirm twice on a character to see what current equipment they have on them, without having to put them in your party first.

These tips are just scratching the surface, I've included within the walkthrough all of the useful things that you will need to know about the game.

!!!

```
' All feedback is very much appreciated, and helps to improve my guide!      '
'_ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ '
```

And now for the main feature!

```
,,,
```

```
|/\/\/\
```

NOTE - We will be bringing the battle speed down eventually, I've sped it up just for now to make for a smoother gaming experience.

There's nothing left to do in the menus, so back out then run over to the first unconscious soldier that you see to search him for a [POTION]. Then search him again for a second [POTION] (the cancel button is to run by the way). Note that you could search either guard for the Potions; an error in coding means that they both carry the *same* two Potions.

Run towards the exit to engage in our first battle encounter - 2 x MPs. Press SELECT during battle to make the status bar appear; this will help for later on. If you like, you can also make a 'target' icon appear over the enemies with R2. As I mentioned earlier, just use Ex-SOLDIER's basic attacks to kill these foes, unless of course you're curious to see what his Bolt/Ice attacks looks like, in which case fire away! Once the battle is done, you may be rewarded with a Potion from one of the enemies.

NOTES - Newcomers to the game, I know what you're thinking, and trust me, the battle system does get better. It'll eventually develop into one of the most intricate and ingeniously thought out battle systems that you'll ever play, you'll just have to put up with the relatively boring and comparatively simple 'introductory' system for now. It's the same as most old-skool turn-based RPGs, really; It'll break you in bit-by-bit, piece-by-piece.

- PS4 players will just have unlocked the First Blood Trophy for winning their first battle.

- You will not be able to fight any random encounters on the opening screen until you have left then re-entered the screen.

Once escaping to the second screen, you'll have some dialogue with your comrades, then you'll be able to name your characters [CLOUD] and [BARRET]. Once you regain control of Cloud, consider tuning down the field message setting if it's too quick for you, you really are going to want to follow the story in this game (as opposed to flashing through the dialogue boxes as quickly as possible). You'll be missing out hugely otherwise!

Follow your posse to the next screen fighting enemies along the way to come to a T-shaped bridge. Head north into the Reactor, and after some dialogue with Barret he'll join your team.

¬¬¬

+--------------------------------#~~~

Before following them east to the elevator shaft, head south to find a treasure chest containing a [PHOENIX DOWN]. Note - These are to be used if you get KO'd during a battle. Note that you will not encounter any battles on this screen (for now, at least).

Now head into the elevator shaft and press then blue and purple arrow button on the far wall to descend. After some dialogue with Barret you'll emerge on top of a giant complex of sorts (battles are enabled again).

NOTE - When you do use your Limit Break for the first time, you'll unlock the Breaking New Ground Trophy.

Follow the path down two giant sets of stairs into the next area (remember to have pressed select to enable the red exit arrow/triangles). Note the green arrow here, it indicates a climbable object, in this case a ladder. Talk to Jessie then follow her down grabbing the [POTION] near to where she stops.

NOTE - Remember to talk to Jessie on your way out, you won't be able to progress otherwise.

Head down the remaining two sets of ladders, then save using the weird pink and purple ? mark. Before heading down to the next screen (to the boss), consider battling around here for a while getting some Barret only kills and aim to progress only after you've used both Cloud's and Barret's Limit Break once. Entirely optional, of course. The sweeper deals a nice amount of damage, and can only be fought on the bottom screen. Don't just stand there taking hits though, keep getting a constant flow of kills with Barret. Make sure not to run out of potions either; keep at least 2!

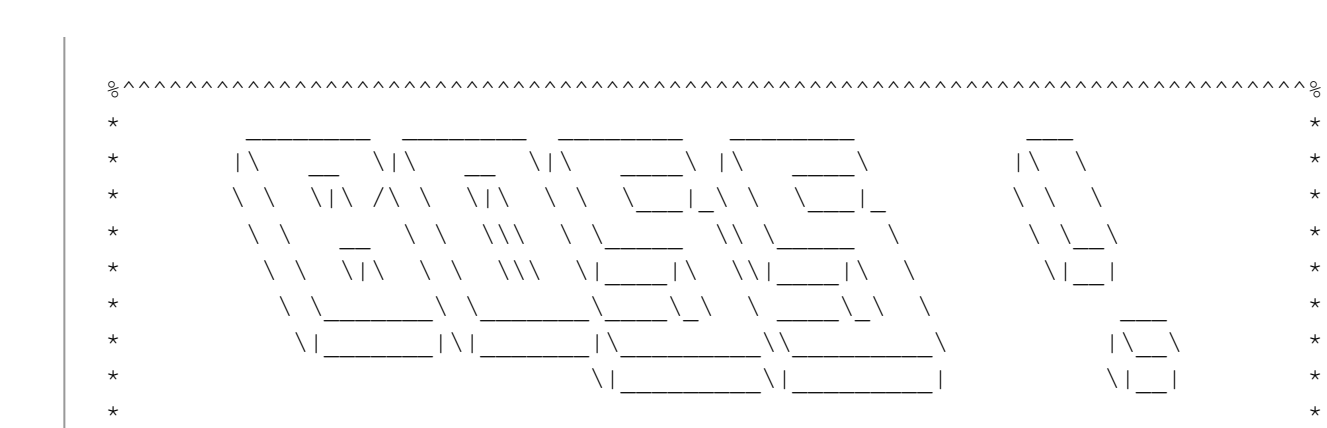
NOTES - After the boss battle we will have a 10 minute time limit in which we must escape the reactor. You should have plenty of time, but by all means you can start using Cloud again during this time. The count down timer will continually run down even whilst you're in the menus, so if you do wish to completely pause the game then you can do so by pressing START whilst in battle. Also, when a battle begins you can keep the action button held down to auto-attack.

- During the boss battle you can let it annihilate Cloud and Barret if you wish to unlock the Failure IS an Option Trophy. Just make sure to have saved beforehand!!!!

```
 ____________________________________________________________________________
]                                                                            [
] SIDE NOTE - ESCAPING FROM BATTLES                                          [
]                                                                            [
] O.K., it is highly recommended that you don't get into the habit of        [
] running away from every other battle you encounter, you won't earn any EXP [
] etc. that way. Hold L1 + R1 to start running away, it may take 10 seconds  [
] or so. Only consider doing this at certain times in the game i.e. because  [
] you're on a time limit.                                                    [
]____________________________________________________________________________[
```

When you're ready, save-up and potion-up then head south east to the following screen. Grab the [RESTORE MATERIA] (we can't use this just yet..), then attempt to interact with the valve. After hearing a (mysterious voice) you'll be up against your first boss of the game! How I still love this sound track!

NOTE - The Boss theme you're about to hear (entitled "Still More Fighting") sounds like "Metallica - For Whom the Bell Tolls"; skip to 1:49. Credit to slk_23 for discovering the connection!



GUARD SCORPION	BOSS BATTLE:	01
	---------Lv:	12---------
	---------HP:	800--------
	--------EXP:	100--------
	---------AP:	10---------
	--------GIL:	100--------
	-------DROP:	Assault Gun
	----NULLIFY:	GRV--------
	-----DOUBLE:	LHT--------

The main thing to point out about this Boss is that it's weak against Lightning, so have Cloud pummel him with his Bolt attack while Barret deals normal, physical damage. If your health drops below 100 then make sure to heal. He only has one move you need to be wary of, and this is his Tail Laser which he will only use as a counter attack if his tail is raised in the air (some bad translation here), which it will do after four turns.

Some would advise at that stage not to attack it until its tail has lowered, however if you were to attack it once, whilst making sure that your HP was above 100, then his counter will more than likely fill up Cloud and Barret's Limit Breaks with one hit. Once its tail is down you can unleash hell, it'll die fairly quickly after this. Your reward will be a new weapon for Barret, the [ASSAULT GUN].

YOU NOW HAVE 10 MINUTES TO ESCAPE THE REACTOR!

1.) Equip Barret's new weapon, the Assault Gun.
2.) Head back to the save point and make use of it.
3.) Head up two of the three sets of ladders then talk to Jessie.
   MAKE SURE TO DO THIS.
4.) Make your way up the third set of ladders, out and up the two long
    flights of stairs and into the elevator once again.
5.) Once out the elevator, talk to Jessie then Biggs, respectively.

You should now have roughly 6 - 7 Minutes left on the clock, possibly longer.
When you get to the screen with the Phoenix Down chest, random encounters
will have been enabled.
Depending on how many potions/time you have left you could optionally battle
it out until about 2 minutes is left on the clock getting some Barret only
kills, it's completely up to you. The next time you fight your HP/MP will be
restored. Note that it is absolutely fine to use up all of your potions at
this stage.

When you're ready, head outside to the T-shaped bridge to finish the section.
You'll then view a short FMV.

?       ```````````````        ```````````````        ```````````````         ?
$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$$
```

NOTE - Due to the simplicity of the Trophy list, you won't see many of these Trophy Notes floating about.

Once you've finished conversing (Best Bromance - choose option 2, then 1, then buy a flower for 1 gil), follow the Flower Girl to the adjoining screen. Head south, obtaining a [POTION] to the left along the way.

In the next screen you will have the choice between fighting or running from 3 sets of guards. I always choose to fight for the EXP (and more importantly for the kills), but the choice is yours to make - make it quickly! Note that the MPs here are exactly the same as the ones you fought inside the reactor.

Once you've battled/ran from the guards, a few animated events play out followed by some dialogue, then you'll have control of Cloud again on a train. Head south to the next screen.

You can talk to whomever you like here, when you're ready to continue talk to Jessie who is at the front right of the screen. She'll give you a guided virtual tour of Midgar. When you have control of Cloud again, talk to Jessie once more (Best Bromance - choose option 2, “Looking forward to it”), then talk to Barret. Next stop, Sector 7!

--D1.02 B - Tifa's Bar (“I want to talk about my money”)

```
+---------------------------#~~~
```

through to the eastern screen a little later on. In the next screen, head north to save your game, and if you wish to see a long winded scene of the overhead support tower then you can talk to kid that's standing by the save point.

We can't go south, so head west. In the next screen talk to Barret to enter the bar, we won't be bothering to explore here just yet. Here you'll be able to name a new character [TIFA], and if you bought a flower earlier you can choose to give it to her, raising her affinity towards you (Best Bromance - give the flower to Marlene instead). Try to leave and Barret will come barging in, remarking that he wants to start the meeting. You can have a drink with Tifa before going down if you like (Best Bromance - choose option 1, "I don't feel like it"), otherwise just interact with the pinball machine to descend.

After some dialogue you'll try to leave the bar. Tifa will stop you (Best Bromance - when prompted, select option 2 '...Sorry'), and you'll end up in a flashback. Although it may seem a little cheesy, there's actually a lot more going on here than meets the eye. Once the flashback has finished, and after receiving Barret's stash of [1500 GIL], you'll (eventually) have control of Cloud again after sleeping the night.

When you awake, ascend the pinball machine. (Best Bromance - Before anything else talk to Tifa and choose option 1, "Barret's snoring kept me up...") As you try to leave you'll have to talk to Barret once more and he'll ask you to explain to him (and to us) how Materia works. If you're completely new to this game then you may wish to view this tutorial, although it is slightly long. Afterwards, check the Menus to see that we will now have access to the Materia option, whoopee! Time to go shopping.

Head outside and into the south-western most building. Buy yourself 1 x Restore Materia and 1 x Lightning Materia.

NOTE - Robotic based creatures are usually weak against Lightning based attacks, and there's a fair few robots to fight soon which is why I've advised you to by a second Lightning as opposed to a Fire which we haven't yet obtained. We will soon enough though, patience my friends. I'll also give a full Elemental breakdown when I feel the time is right.

Then, head over to the store just east from the one you were in and talk to the guy on the left. Buy from him 3 x Iron Bangles. If you talk to the kid here he'll let you rest up for 10 gil, this'll come in handy for later.

Head to the second floor to find a bouncing save point. This is the [BEGINNERS HALL], and straight off the bat GRAB THAT MATERIA! the [ALL MATERIA] to the right. Then straight after grab the [ETHER] from the falling chest (this restores MP). If you talk to the people in this room then you will learn more about the mechanics of how the game works, although this walkthrough should cover most of what you will need to know as you're going along.

$$$

? are several Materias in this game that can be permanently missed, so if ?
? you're going for the Materia Overlord Achievement then you're really not ?
? going to want to miss a single piece. Note that Materia Overlord is only ?
? available on the Steam version; you don't need to acquire every piece if ?
? you are playing the PS4 version, although it's still advised.   ?
?   ?

? `````````````````````   `````````````````````   ````````````````````` ?
$$

NOTE - The All Materia is the best piece of Materia for this early stage in
the game, and will dominate your battle strategy for a while.

If you have 0 Potions in your inventory, you could talk to the big guy standing next to the dog for a free [POTION]! Select the option “How to heal your allies?”, just bear in mind that you can only obtain the one. Shout out to Ex-SOLDIER-13 for finding this potion (that's his online tag; I'm not thanking Cloud...)!

There's nothing left to do here now, although feel free to explore the rooms I haven't gone into yet to converse with various NPCs (you can also talk to Johnny at the top of the screen). When you're ready, equip everyone with the Iron Bangle, then give Barret All and Lightning making sure that they are 'paired', Barret's Bolt attack will now hit all enemies! Give Cloud Restore & Ice and give Tifa Restore and Lightning.

NOTES - Any blue (Support) Materia we obtain has to be paired with another
green (Magic) or red (Summon) Materia in order for them to take
affect; they will not work independently (some yellow (Command)
Materias can also be paired, but not all).

- The AP we gain during battles stands for Ability Points, they go into Leveling up our Materia. At Lv 1, All can only be used to target all enemies once per battle, this will increase as the Alls' level increases.

- Any magic that is linked to All will deal 66% of its normal power. You can toggle All's in-battle effect using R1.

Time to save the game!

Before heading out onto the train, consider heading east to the Train Graveyard in order to get some kills with Barret's All set up. All of the enemies here are ones we've fought before,remember that the Mono Drive can sometimes drop Ethers. Battle here for a bit, when Barret's MP runs out head back to the inn to rest up for 10 gil (talk to the boy in the weapon shop then climb to the third floor). You don't want to spend too long training here though because there is an awesome training spot coming up which will eliminate the 'random encounter' regime; we will get non-stop uninterrupted battles! We won't be able to rest there though so when our MP runs low we'll be relying on Ethers which is why it's good to try to get a one or two now from the Mono Drives, I left with 3.

When you're ready, rest, save, then head out onto the train to begin the next mission. One last top tip to give to you before moving on, a tip that'll save you from ever having to use Potions outside of battle again!

____
]   [
] SIDE NOTE - THE 'ALL TRICK'   [

] [
] When your characters healths start to run low, equip Cloud (who has the [
] highest magic stat at this stage) with All and pair it with Restore. Now, [
] go into 'Magic' from the main menu and select Cloud. Then select Magic, [
] Cure, then when the finger prompts you to choose which party member it is [
] you wish to heal, press R1 to activate the All's effect. You have just [
] healed your entire party for 4 MP! This is how you're going to want to [
] heal outside of battle from now on. Once you're done, don't forget to give [
] the All back to Barret! [
]_____[

```

¬¬¬
```

jumping from cart to cart whilst obtaining items by talking to individuals along the way as quickly as we can. I'll number bullet point this section again for simplicity.

NOTES - Getting caught early will mean that you'll be dropped off further south of your target than if you'd stayed on until the end, but subsequently closer to the aforementioned training spot. Also, if you get caught you will not gain a boost to your friends affinity rating (Best Bromance - stay on till the final cart; don't get caught).

- The Cart that you come in on is considered as Cart No.1.

Talk to Tifa when you are ready.
WHEN THE ALARM GOES OFF YOU'LL HAVE AROUND 15 SECONDS TO GET TO THE NEXT CART!

CART 1.) Head back and talk to the guy at the back and on the right for a [PHOENIX DOWN]
CART 2.) Head down and talk to the guy at the front left of the screen for a [HI-POTION]
CART 3.) A guy (Johnny) will run past you stealing 100 gil in the process. Run back to him and select option no.2 to reclaim your d'oh.
CART 4.) Nothing

When you get to cart 5 you'll eventually end up jumping out of the (speeding) train onto some train tracks, relatively unscathed!

To the north is our destination, and to the south is that training spot I mentioned earlier, and there are 6 screens separating the two. The longer you stayed on the train, the further you'll have to double back on yourself, unless you wanted to continue on with the mission, in which case head north. Either way, make sure to have sped up the Battle Speed in the options as previously advised as to deal with the Grashtrike.

Label the north-most screen 7, and the south-most screen 0. The 6 screens in-between are 'repeated' screens, and depending on where you were thrown out depends on which screen number you are on:

If you were thrown out of:

- Cart 1 then you would be on screen 2
- Cart 2 then you would be on screen 3
- Cart 3 then you would be on screen 4
- Cart 4 then you would be on screen 5
- Cart 5 then you would be on screen 6

Heading south, you'll eventually end up at screen 0, the guard post, and here you'll be able to enter into an infinite number of battles!

NOTES - For these battles keep everyone in the front row. Before using Barret's Bolt have every player weaken 1 enemy first, having Cloud attack the enemy in the back row (always have your strongest attacker hitting the enemies in the back row). When you get round to using Cloud as your main attacker, note that his magic is strong enough to kill all of them in one hit.

- (Cheers to Vinny 1983 for this tip) Equip the Bronze Bangles for these battles to reduce you defence, resulting in more damage taken, which will fill your Limit bars up more quickly!! Just don't forget to re-equip the Iron Bangles when you're done.

And this, my friends, is the perfect time to give you guys (and gals) another Limit Break rundown:

```
 ____________________________________________________________________________
]                                                                            [
] SIDE NOTE - LIMIT BREAK TRAINING No.2 - Requirements of Leveling up        [
]                                                                            [
] So, there as two things that we need to focus on in order to level our     [
] Limit Breaks up. The first being the amount of times we use our basic      [
] (default) Limit Break. For example, once Barret has used his Big Shot      [
] (also known as his 1-1 Limit) 9 times he will unlock his 1-2 Limit,        [
] Mindblow. Once he has then acquired 80 kills he'll unlock his 2-1 Limit,   [
] Grenade Bomb. There are 2 things to remember for now:                      [
]                                                                            [
] 1.) You don't HAVE to unlock a character's 1-2 Limit in order to unlock    [
]     their 2-1 Limit. Meaning, if you get 80 kills with Barret before you   [
]     have used Big Shot 9 times then you can just skip out Mindblow         [
]     altogether. This is inadvisable, firstly because Mindblow is quite a   [
]     handy skill to have, and secondly because the prerequisite for         [
]     learning a Level 4 Limit Break is that all previous Limits have been   [
]     learned.                                                               [
]                                                                            [
] 2.) You must manually set your Limit Breaks when acquiring a new level!    [
]     Very soon (if you've been following my advice) you're going to unlock  [
]     Barret's 2-1 Limit, I then recommend using Big Shot the required       [
]     amount of times to unlock Mindblow. When you are ready, go into        [
]     'Limit' in the main menu and 'set' your Limit Break to level 2; your   [
]     kills won't start counting towards your level 3 Limit's otherwise.     [
]                                                                            [
] Sadly, Tifa doesn't have a 'paired' Materia slot at this stage, so we       [
] won't be utilising the All=Lightning combo for her. Cloud on the other     [
] hand does, so once you've gained 80 kills with Barret be sure to swap your [
] Materia around to start letting Cloud rack up some kills. It's worth       [
] pointing out that Tifa's Limits are unique in the sense that they will     [
] 'stack' against each other, use Beat Rush 9 times to unlock her 1-2 Limit  [
] and then use her Limit in-battle to learn what I mean. Also, Tifa's Level  [
] 1 Limit gauge requires the least amount of damage to fill up (40% of max   [
] HP), so you should fly through to her 1-2 Limit. Keep her in the front     [
] row.                                                                       [
]____________________________________________________________________________[
```

For a full guide on Limit Breaks see section E.02. For the sake of helpfulness, I have decided to include a Limit Break description for each character depicting how many kills/uses required for each Limit. Every new character that you acquire you will see their Limit info displayed like so:

```
   CLOUD STRIFE

  ++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++
  |                                    |                                   |
  | 1-1  BRAVER                        | 2-1  BLADE BEAM                   |
  |      (default)                     |      (120 kills)                  |
  |                                    |                                   |
  |   Attacks one opponent             |   Diffuses after hitting one      |
  |                                    |   opponent                        |
  |````````````````````````````````````|```````````````````````````````````|
  | 1-2  CROSS-SLASH                   | 2-2  CLIMHAZZARD                  |
  |      (use 1-1 8 times)             |      (use 2-1 7 times)            |
  |                                    |                                   |
  |   Attacks and Paralyzes one        |    Attacks one opponent           |
```

opponent	
3-1 METEORAIN (320 kills) Attacks all opponents	4 OMNISLASH Damages all opponents Use the item Omnislash Won from the Battle Square from Disc 1 onwards
3-2 FINISHING TOUCH (use 3-1 6 times) Blows away all opponents	

BARRET WALLACE

1-1 BIG SHOT (default) Attacks one opponent	2-1 GRENADE BOMB (80 kills) Attacks all opponents
1-2 MINDBLOW (use 1-1 9 times) Reduces one opponent's MP	2-2 HAMMERBLOW (use 2-1 8 times) Blows away one opponent
3-1 SATELLITE BEAM (160 kills) Attacks all opponents	4 - CATASTROPHE Damages all opponents Use the item Catastrophe Found on Disc 2 in Corel after the Train Ride Event by talking to a small girl
3-2 ANGERMAX (use 3-1 6 times) Attacks all opponents	

TIFA LOCKHEART

1-1 BEAT RUSH (default) Attacks an opponent	2-1 WATERKICK (96 kills) Attacks an opponent
1-2 SOMERSAULT	2-2 METEODRIVE

```
|      (use 1-1 9 times)              |      (use 2-1 7 times)           |
|                                     |                                  |
|   Attacks an opponent               |    Attacks an opponent           |
|                                     |                                  |
|+++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++|
|                                     |                                  |
| 3-1  DOLPHIN BLOW                   | 4 - FINAL HEAVEN                 |
|      (192 kills)                    |                                  |
|                                     |   Attacks an opponent            |
|   Attacks an opponent               |                                  |
|                                     | Use the item Final Heaven        |
|`````````````````````````````````````|                                  |
| 3-2  METEOR STRIKE                  | Found on Disc 2 in Nibelheim     |
|      (use 3-1 6 times)              | after the Life Stream Events by  |
|                                     | playing Tifa's piano             |
|   Attacks an opponent               |                                  |
|                                     |                                  |
 ++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++++
```

So! Battling it out with the special combatants, I was able to get Barret's 80 kills, unlocking grenade bomb with 30MP to spare for the boss. Nice! (LAST reminder, set the Limit Break manually to Lv 2 in the menus!!!) If you run out of MP with Barret and you haven't unlocked his Lv 2-1 Limit, don't bother giving him an Ether, there'll be plenty of chances to train him up later on.

Before leaving this area I decided to whack All=Lightning onto Cloud, and I left just before he had reached Level 12. Barret was Lv 11 and Tifa was Lv 10. Once you've had enough, head 7 screens north until you come to a grate. There's really nothing left to do here now, so once you're ready jump down into to the area below.

NOTE - Try getting a few Spiders Webs from the Grashtrike, they can slow down the ATB of most enemies, even some Bosses!

--D1.03 B - Sector 4 Platforms ("Sephiroth... SOLDIER... Mako Reactors... Everything! I hate them all!")

```

| The Rocket Launcher can also be fought here. Make sure to sue your Bolt  |
| Magic. The Blugu can put you to sleep, and the Smogger can poison you    |
| which you can fix with an Antidote.                                      |
+--------------------------------------------------------------------------+
```

--Items - Ether x 2, Potion, Tent
--Boss - Air Buster Lv 15 (Titan Bangle)

Follow the tunnel picking up an [ETHER] along the way, then descend into a large construction-like area. Head west and you'll find two ladders along the way, along with Wedge. It doesn't matter which ladder you climb, they'll both lead to the same place.

You'll either see Jessie in front of you, or to (our) right depending on which ladder you climbed. Either way, grab the [POTION] you see to the left of her, then carry on west and down the ladder until you come to a save point, picking up a [TENT] along the way.

```
 ____________________________________________________________________________
]                                                                            [
] SIDE NOTE - BACK ATTACKS                                                   [
]                                                                            [
] If you haven't had one yet, you soon will. There are two things to note    [
] about enemies that like to attack you from the rear:                       [
]                                                                            [
] You're rows will have swapped. If you're really bothered by it, select     [
] change (left) to swap them back, or just attack for less damage (magic is  [
] unaffected). You'll also find it more difficult to flee from battle.       [
]                                                                            [
] With your back to the enemy, they'll hit you for more damage. You can      [
] negate this by momentarily holding down L1+R1 as if to run away, then when [
] you release you'll be facing the enemy; they'll then hit you for normal    [
] damage.                                                                    [
]                                                                            [
]  UPDATE - I know now the above to be false; while the enemy is *supposed*  [
]           to hit you for x2 damage, a bug causes it to hit for regular     [
]           damage, and the "L1+R1" trick does absolutely nothing!!!         [
]____________________________________________________________________________[
```

Climb the ladder next to Biggs (if you talk to him he'll run away for some reason), then in the next screen slide all the way down the long chute (weeee). Start heading south-west then north-west and you should start to recognise where we are.

DON'T FRET! If you're new to this game and you're thinking 'Oh God, not another game that uses repeated scenery over and over and over', then I assure you that this isn't one of them. This is probably the only time in the game that we will see a 'screen repeat'. Besides, technically speaking this isn't actually a repeated screen; it's just a look-a-like!

Head down into the reactors core, saving along the way. This time we won't have any Guard Scorpion to fight, there'll be no time limit to escape but we will have another one of Cloud's 'moments' (this is the second time in the game that we hear the name Sephiroth, the first being the flashback at the well).

Once the bomb has been placed, make your way outside of the reactors core, up the elevator shaft once more, back into what initially may look like a different room from before but actually turns out to be the same room just from a different perspective. Grab the [ETHER] from the visible chest.

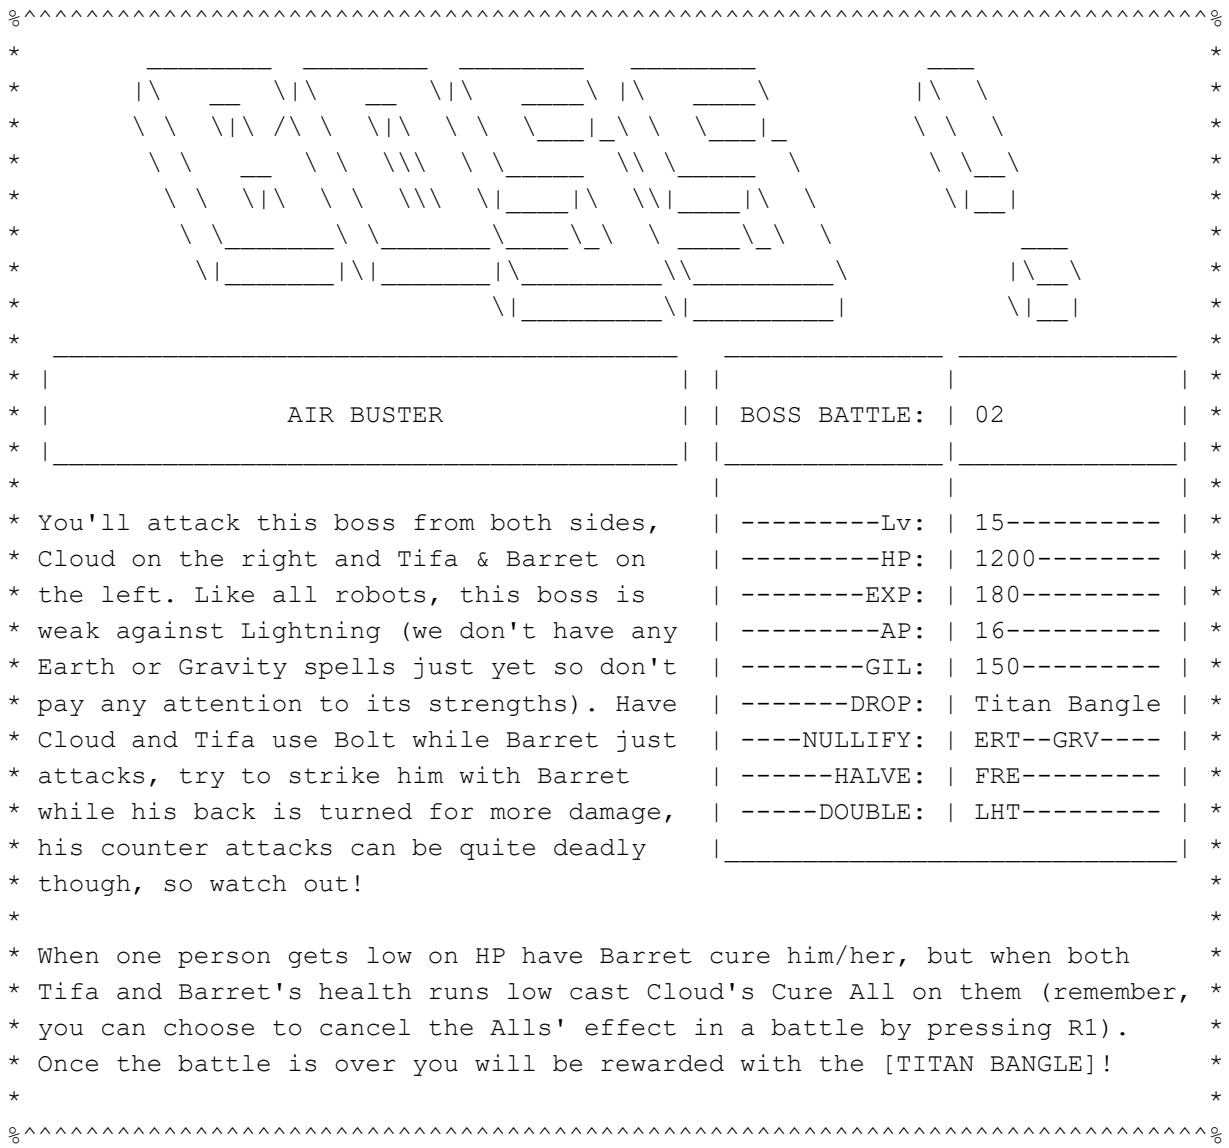
Head NW, and you characters will try to operate the nearby panel. After pushing confirm on the last dialogue box, wait roughly 2 seconds then press

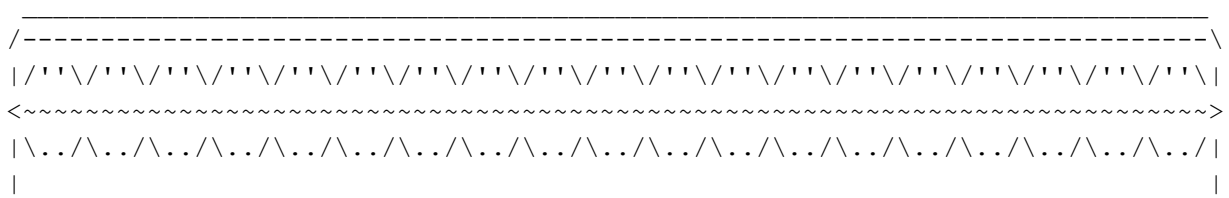
confirm again. It's a pretty easy mini-game to be honest, you'll figure it out in no time. Before heading out to the T-shaped bridge, change your Load out for the upcoming boss (or battle around for a bit first, I'm not bothering):

```
 Cloud  - All=Restore, Lightning
 Barret - Ice, Restore
 Tifa   - Lightning
```

Remember to heal using the All trick I showed you, also if you haven't done so already then go into Config and slow the Battle Speed down to about 3/4 to the left; we don't need it as quick as it is, the enemies will overtake us when we hesitate otherwise. Make sure to do this.

Use an Ether on Cloud if necessary, save the game, then head outside for some dialogue (there's that name Sephiroth again), eventually we'll be up against a Boss! Finish this boss to finish up this section of the walkthrough (Best Bromance - when prompted, choose option 1, “Be strong”).





{D1.04} - Sector 6 & Wall Market

```
|                                                                              |

¬¬¬
```

Bangle. Lastly, equip All=Ice, Restore & Lightning onto Cloud, and Restore & Lightning onto Aeris. I suggest leaving Aeris in the front row for now; her later Limit Breaks are awesome and we're going to want to start Leveling them up straight away.

NOTE - (Best Bromance) - in this next section, it's *very important* that you tell Aeris to Hold on a minute!, and then purposely push the wrong barrel 3 times.

Jump across to the central platform and ascend the stairs and eventually Cloud and Aeris will get split up. You'll then have three choices to make:
-Hold on a minute!
-Fight 'em!
-RUN!
I always choose fight 'cus I'm after the kills (running always results in a fight aswell). There are Guard Hounds and MPs from Reactor 1 here for Aeris to fight, nothing too hard. Aeris is worth grinding from the word go, but if you want to avoid fighting and play a small mini-game at the same time then here's how:

Choose 'Hold on' or Run, then run to the top platform to find 4 barrels. Hit the western one first, then the northern one followed by the eastern one last (or hit the wrong ones if you're going for the Best Bromance trophy). Bear in mind that Cloud can also run into Hedgehog Pies here. Afterwards, you'll have crushed all 3 Shinra scum and you'll be reunited with Aeris again. (What did they say, something about an Ancient?...)

So, they were the Turks! Well at least one of them was, anyway. Spies that generally involve themselves the Shinra's dirty work. This time they're after Aeris, but why...? After doing some roof-jumping, you'll have control of Cloud on the ground again (Loving the beat).

NOTE - Every piece of green (and red) Materia we equip decreases our physical stats whilst at the same time raising our magical stats. At this early stage in the game we really don't need to worry too much about this, it's just something worth bearing in mind once the whole magic system really gets under-way. For now I suggest keeping everyone equipped with Materia as so that the Materia can level up with AP.

Head west, save the game, then feast your eyes on Aeris's Limit Break list:

AERIS GAINSBOROUGH

1-1 HEALING WIND (default) Restore HP of all allies	2-1 BREATH OF EARTH (80 kills) Cure all Status ailments of all allies
1-2 SEAL EVIL (use 1-1 8 times) Constrains and stops magic of all opponents	2-2 FURY BRAND (use 2-1 6 times) Fills up rest of party's Limit gauge
3-1 PLANET PROTECTOR	4 - GREAT GOSPEL

(160 kills) Makes all allies invincible for one time		Makes all allies invincible for one time and fully restores all allies Use the item Great Gospel
3-2 PULSE OF LIFE (use 3-1 5 times) Fully restores all allies		Found on Disc 1 by Gongaga from the Blacksmith. After obtaining the buggy and then the Mythril, exchange the Mythril for the Great Gospel

Head west to a fork, then north to find yourself in the slums. Head into the pipe on the left to find a sick guy with a numbered tattoo on him. (Note Aeris - 'This guy are sick'. This is an infamous grammar mistake within FFVII, along with “Attack while its tail is up”. In the PS4/Steam version the grammar mistake was fixed).

Next head into the south western house, the Materia Shop to buy yourself 1 x Ice and 1 x Fire (or 2 Fire if you can afford it, the game will give us our second Fire eventually though, plus you'll want to save around 3000 gil for the Wall Market). There's nothing worth grabbing from the next shop along, the Item Shop (unless you want to stock up on a few Phoenix Downs), so instead head into the eastern house. Upstairs, IF you were to talk to the sleeping kid and then check the small drawers you can take his 5 gil. DON'T DO THIS! Leaving this small amount of cash here now will make it worth a lot more when you revisit this area later on (you must may sure to have examined the draws here first, mind)!

Why have I brought you into this house then, you ask? It's so that you can read the [Turtle Paradise Poster #1] at the top of the stairs, of course!

SIDE NOTE - TURTLE PARADISE SIDE QUEST

Along your travels you are going to come across several news leaflets from the Turtle Paradise. Finding all of these leaflets will result in some pretty cool items down the line! Note that one of these leaflets is permanently missable, and although none of the items that are obtained are unique, they are valuable enough for you to want to complete this side quest! For a full rundown on where every single newsletter is and the prizes up for grabs, see section E.03 or use QSI Link [Turtle Paradise Mini-Game].

!! IMPORTANT NOTE !! QUICK SEARCH INDEX LINKS

Whenever you see 'QSI Link', you'll be able to jump directly to the relevant section within the guide by firstly pressing Control + F to open the search field, then enter the criteria (i.e. Turtle Paradise Mini-Game), but replace the [] with {}. These are the keys above [], not the keys above 9 & 0. You will then jump straight to that section!

At the very back of the guide you'll find the Quick Search Index, where you'll be able to see every QSI Link found within the guide.

The last place to visit is the Weapon Shop up north. Now, you could buy a Titan Bangle or two, but very shortly on were going to be able buy the Mythril Armlet which is better than the Titan Bangle. So, instead of visiting the Weapon Shop let's just head straight through the north-eastern exit into a flowery, colourful area with a big house and a waterfall in the background (how tranquil). Before heading into Aeris's house, head past the house and up the ladders and round to the bottom garden to pick up the [COVER MATERIA] on the left and an [ETHER] on the right. Save and then head into the house.

After some dialogue (Best Bromance - choose option 2, “Yeah, that's right”), head upstairs to rest up. In the night, you'll hear the (mysterious voice) once more in your dreams. Once you awake, before leaving, pick up the white package in your bedroom by the door which contains a [POTION] and a [PHOENIX DOWN]. Then, WALK along the northern side by the railings (or you'll get caught by Aeris) and make your way down the stairs and out the house.

Make your way back through the slums and down to the crossroads we came to before, this time heading west at the fork to find someone waiting for us. Note that you will not fight any battles here with a Cloud-only party.

The next screen is the only screen where you can fight the Hell House, which an enemy that has a fair amount of HP but also delivers some pretty damaging moves. You can probably get 2 uses out of Aeris's 1-1 Limit before the next screen. Equip Aeris with the Cover Materia also to help her take more damage. Try and have at least 3020 gil before moving on.

Make your way through to the next screen, and after a few scripted events have played out (Best Bromance - choose option 1, “See her home”), you'll be taking Cloud two screens further north to the Wall Market!

¬¬¬

each shop in due course anyway. Firstly, we'll need to enquire about Tifa. Save, then head to the south eastern corner to arrive at The Honey Bee Inn. Talk to the big guy in the purple jacket and grey hair to continue with the story. You can also talk to Johnny on the left as well if you like (isn't that the same Johnny that tried to rob us on the train earlier?).

Time to go shopping! head back to the markets then enter the shop just north of the item shop, which subsequently happens to be, the Item Shop (the first one was a fake)! We're going to have to watch how much we spend here, make sure to leave 2020 gil minimum. Depending on whether or not you bought a Fire earlier you should have roughly 3000 - 3500 gil to play with. Buy from the item shop 5 x Hypers and 5 x Tranquilizers costing 100 each if you can afford them, or at least 2 Hypers and 3 Tranquilizers. These will help for later on.

Next up is the oh-so-crucial-at-this-stage Weapon Shop! Head north to the next screen, then enter the second shop on your right and buy yourself:

```
1 x Mythril Rod     O=O  - Aeris          370 gil
1 x Metal Knuckle   O=O  - Tifa           320 gil
3 x Mythril Armlet  O=O  - Armour        1050 gil
                                Total - 1740 gil
```

NOTE - Another top tip here - you can equip Materia onto a character that isn't currently a party member! A little later on, there'll be some short moments in which we can set up Tifa prior to a Boss fight. You don't have to wait till she's in your party to do this though! Go to 'Materia' in the menus, select 'Arrange' then 'Exchange'. Here we can equip all of our characters with Materia regardless of whether or not they're in our party. We can also exchange Materia from one character to another either piece by piece, row by row or even all at the same time! Give Tifa some Restore.

After equipping your new weapons and armour (now everyone can have a paired slot, yippee!), head out of the shop and then all the way to the north. The eastern exit is a dead end so just ignore it for now. Chat to the guy you find to at the very top to further the story. (lol)

So, the main thing to point out her is that you only need to obtain a dress and a wig in order to enter Don's mansion, however there are a number of optional accessories you can obtain that will change the future outcome (call this a mini-game if you will). You also get varying qualities of these items; choose the best items to get the most comical and shortest events, get the shabbier items to have some extra battles and a Phoenix Down! Note that the Phoenix Down can be obtained a little later on in the game if you miss it here due to you opting for the 'best' outcome. Also note that you can sometimes get the best outcome even if you got one or two variations of the available items.

For a full run down on how the whole scoring system works for each item look in section E.04.

```
$$$
```

? ?
? _____ _____ _____ ?
? !!TROPHY NOTE!! !!TROPHY NOTE!! !!TROPHY NOTE!! ?
? ``````````````` ``````````````` ``````````````` ?
$$$

Now head south to the Item Shop (the actual item shop, not the fake one) and speak to the clerk to exchange your coupon:

1.)Select Digestive for the Sexy Cologne.
 2.)Select Deodorant for the Flower cologne.
 3.)Select Disinfectant for the Cologne.

Make your way back to the toilets in the bar and speak to the sick person to receive your fragrance.

 4 - Obtaining the Tiara:

Head back to the Markets and into the north east shop, the Materia Shop, then talk to the shop owner inside to be sent on another errand. Now head to the Inn on the south west side and spend the night there for 10 gil.

During the night you'll be able to choose the following from the dispenser:

1.)Spend 200 gil to receive the Diamond Tiara.
 2.)Spend 100 gil to receive the Ruby Tiara
 3.) Spend 50 gil to receive the Glass Tiara.

Head back to the Materia Shop to claim your headpiece, then have a quick save if you wish. Only one more piece to get now! (this next bit is my favourite bit!)

 NOTE - The Materia Shop is currently closed, and won't re-open for some time.

 5 - Obtaining the Underwear and Make-Up:

From the save point head south and talk to the biggish guy at the bottom of the screen. You'll receive the Members Card to the Honey Bee Inn to the right. Head over there, once inside you'll have two rooms to pick from. it doesn't matter which one you pick; you just need to have obtained one of the two items that are available (note that you can peek through the keyholes of the NE and NW rooms for some rather peculiar scenes). You'll only be able to choose one room, mind (I always choose the NW door).

1.) Choose the SW door for the Group Room. Here you'll receive the Bikini briefs and watch a very funny and slightly uncomfortable scene involving Clouds' good time being interrupted by a bunch of men.

2.) Choose the NW door for the &$#% Room. Here you'll receive the Lingerie and watch a scene where Cloud has another one of his moments hearing from the (mysterious voice) once more. I always prefer this option, but that's only because I have a firm grasp on what the hell is actually going on in this crazy, crazy story. MAKE SURE to talk to the Honey Bee on your way out to obtain the lingerie; it is missable.

Before you leave the Honey Bee Inn, head into the northern room to have the left most Honey Bee apply make-up onto you.

You're all set! Head back to the Clothing Shop to get changed. Note that you won't be able to leave Wall Market once you are dressed as a woman, so if there's any reason you'd like to go back to Sectors 6 & 5, do so now before you get changed.

Once you're in your attire, head back to Don's mansion. Once inside and you have control of Cloud, head up the stairs and into the left doorway, then down a long flight of steps. After some more talking, you'll have a chance to

grab the [ETHER] that you can see flashing on the left.

Once you're ready to head out, whack the Menu up to kit Tifa out before the Boss. You will get another chance to do this btw. Equip Tifa with the Metal Knuckle and the Mythril Armlet, then take note of the Materia set-up I had:

```
 Cloud - Lv 12 - All=Restore, Fire
 Tifa  - Lv 11 - Restore, Cover, Lightning, Ice
 Aeris - Lv  8 - Lightning, Ice (if you bought a second Fire earlier then
                                 equip it instead of Ice)
```

Cloud's magic stat is the highest at the this stage, that's why I like him to be the healer of the group. Others prefer Aeris. And also I want Tifa to take the damage which is why I've given her Cover Materia, I really want her 1-2 Limit asap!

If you have gone for the less glamorous attire because you wanted some extra battles, then swap Cloud's All=Restore with All=Lightning to deal with the upcoming goons. Head back up the long flight of stairs and enter into Don Corneo's office.

If Cloud is wearing the Silk Dress, Blonde Wig, Sexy Cologne, Diamond Tiara, a piece of underwear and some make-up then he will get chosen. If that happens then you can skip the next 2 paragraphs. Cloud could have a few variations of his clothing and still get picked.

Here is how the scoring system works:

```
  DRESS

+5 - Silk Dress   (Soft, Shimmers)
+3 - Satin Dress  (Soft, Shiny)
+1 - Cotton Dress (Clean)

  WIG

+5 - Blonde Wig (Beat Big Bro)
+3 - Dyed Wig   (Draw with Big Bro)
+1 - Wig        (Lose to Big Bro)

  COLOGNE

+5 - Sexy Cologne   (Digestive)
+3 - Flower cologne (Deodorant)
+1 - Cologne        (Disinfectant)

  TIARA

+5 - Diamond Tiara (200 gil)
+3 - Ruby Tiara    (100 gil)
+1 - Glass Tiara   (50 gil)

  UNDERWEAR

+0 - Bikini briefs (Group Room)
+0 - Lingerie      (&$#% Room)
```

Note - The Bikini briefs were supposed to grant you +5, the Mystery Panties was supposed to grant you +3 and the Lingerie was supposed to grant you +1 but for unknown reasons the scoring system along with the

Mystery Panties was phased out of the final game.

MAKE-UP

+5 - 25% chance (Wind sound, difficult to hear)
+3 - 38% chance (Healing sound)
+1 - 38% chance ('Tink' sound)

FINAL SCORE -If cloud has:

2 - 11: Tifa will be chosen as Don's date
12 - 18: Aeris will be chosen as Don's date
19 - 25: Cloud will be chosen as Don's date

If Tifa or Aeris got picked then you'll wind up in a room with a bunch of guys 'zombified' by your presence. Pick up the [PHOENIX DOWN] on the far right, then talk to a few of the gropers. After a while, you'll talk to Scotch and engage in 2 battles.

Once they've been defeated (and their bodies have mysteriously vanished), head out of the room to find yourself on the Mansion's top floor. Head left and then down the long flight of stairs once more. After some (affection) dialogue, you can grab the Ether if you missed it before, otherwise head through to the back of Don's office.

After the rather hilarious interrogation (Best Bromance - if Cloud was chosen then remember to pick option 2 then option 2, "Yeah his name is Barret..."), you'll have a window of opportunity to grab the well hidden [HYPER] hiding behind the shrivelled Don's bed. Change Cloud's Materia back to All=Restore if you'd changed it earlier, then try to leave. It doesn't matter which dialogue option you choose next, all three will end the same way (option 2 is the correct one btw).

```

|                                                                            |
|  NOTE - If an enemy absorbs Restorative, then you can use curative items/  |
|         spells to harm them. Try using Cure or a Potion on the Ghost.      |
+----------------------------------------------------------------------------+

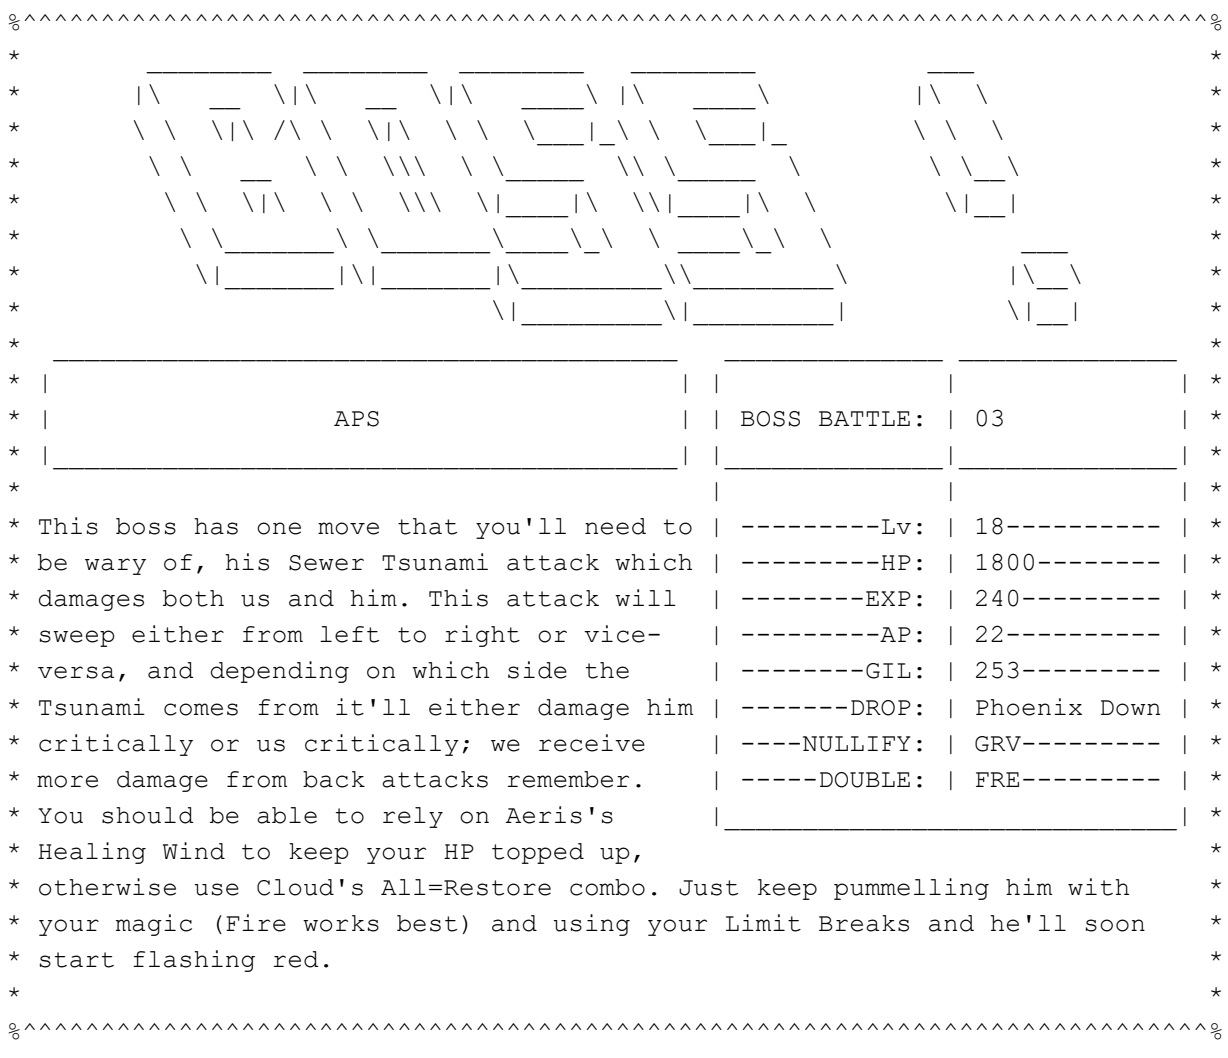
--Items - Potion x 4, Steal Materia, Hi-Potion x 3, Echo Screen, Ether
--Boss  - Aps Lv 18

  After watching a scene in which an executive named Reeve was disagreeing
with some of President Shinra's' decisions, you'll finally awaken in the
sewers. This is your last chance to Equip everyone if you haven't already.
Before you talk to your buddies, go into the Item menu and give everyone a
Hyper. Why? (I smell a Side note coming on...)

 ____________________________________________________________________________
]                                                                            [
] SIDE NOTE - LIMIT BREAK TRAINING No.3 - Hypers & Tranquilizers              [
]                                                                            [
] It is advised that you keep your characters inflicted with Fury to help    [
] them reach their 1-2 Limit Breaks.                                         [
]                                                                            [
] Hyper - Cures Sadness, induces Fury.                                       [
]                                                                            [
]         Whilst your characters are inflicted with Fury their Limit gauges  [
]         will fill up much quicker than normal! The downside to this is     [
]         that your players physical and magical attacks are 30% more likely [
]         to miss.                                                           [
]                                                                            [
```

] Tranquilizer - Cures Fury, Induces Sadness.   [
]   [
]   Whilst inflicted with Sadness your characters Limit gauge will   [
]   fill up much slower than normal. The flip-side being that they   [
]   will also receive 30% less damage than they normally would from   [
]   both physical and magical attacks! This can be particularly useful [
]   against certain bosses (such as the Midgar Zolom).   [
]   [
] Once any character has levelled up their Limit to 1-2, you should treat   [
] their Fury with a Tranquilizer immediately as Fury will impair the   [
] fluidity of the battle system. At least that is until they have unlocked [
] their 2-1 Limit by reaching their kill threshold and they are ready to   [
] start working on their 2-2 Limit, of course! Fury and Sadness are the only [
] 'permanent' Statuses, all other Statuses will wear off once the battle has [
] finished.   [
]____[

Now talk to your allies to engage in a Boss battle (Best Bromance - talk to Tifa first)!



After this battle I unlocked Cross-Slash, Cloud's 1-2 Limit! You shouldn't be too far off yourself now. When you do unlock it remember to give Cloud a Tranquilizer to clear his Fury Status.

We're definitely going to want to start getting some Aeris kills now, so heal up using the 'All Trick' with Cloud if you need to then give Aeris the All=Ice combo. Just note that when all players are Fury'd the battle system get can get a little messy. You should be able to absolutely storm through to their 1-2 in no time though, so Fury shouldn't be too much of a hindrance.

Grab the [POTION] on the left if you haven't already. I unlocked Tifa's Somersault in the next battle, when you achieve Tifa's 1-2 remember to give the Cover Materia to Aeris.

Traverse through the mucky sewers until you reach the [STEAL MATERIA]. Guess what? The battle system just got more interesting. Equip this onto Cloud and have him steal on every turn, just let the girls get the kills (Aeris first, always Aeris first, Tifa can weaken). Try to steal a few Hypers and Tranquilizers before leaving the sewers if you can.

NOTE - If you steal an item from an enemy then that enemy will no longer drop an item. Also, the character that is the highest level has the best chance of stealing, which is why I suggest making Cloud your main thief.

Drop down to the next screen then make your way up the ladders and out into the Train Graveyard. Save your game here.

Before continuing change from an All=Ice combo to an All=Fire combo, Aeris can take out the Ghosts one hit that way. If you happen to come across the Eligor (on the 2nd screen) make sure to steal a Striking Staff from it. Aeris won't acquire a better weapon for quite some time.

Head through the train cart by the save point and inspect the barrel on the left for a [HI-POTION]. Credit to Vas0 for pointing out to me that you can farm Ethers here to sell for 700 gil a pop - be sure to Steal from the Deenglow every time you encounter them, as Ethers are an easy steal. You are going to want a Graviball or 2, which are dropped by the Deenglow, so it may be worth not stealing from them every now and then so that you actually have a chance of getting a Graviball.

Head back the way you came then up the ladders to the right of the save point for another [HI-POTION]. Keep heading north until you find another barrel containing an [ECHO SCREEN].

Now head under the bridge and into the middle cart for a [POTION]. Follow the path through until you've traversed the set of train carts to the right, eventually coming to a [POTION] just before the next screen.

In the next screen you'll see a flashing item to the left, make your way round to it for a [POTION], then head over to the western barrel for an [ETHER].

NOTE - In the menus, try arranging your items by 'Type' for the best arrangement.

Now make your way to the east. The pre-rendered backgrounds should make it fairly obvious what to do here, I'll walk you through it just in case. Hop into the first train, once it has finished moving hop back into it to move it back into its original position. Now make your way into the newly accessible train, and finally head up the ladders for the [HI-POTION].

Before heading through to the next screen (it should start looking familiar now), consider battling around for the Eligor if you haven't already obtained the Striking Staff. This would also be a good time also to try to work on Aeris's 80 kills. Don't worry too much about it though, we've a long adventurous journey ahead of us! Also, stocking up on a few Graviballs from the Deenglow can help out for certain bosses (in fact, if you want to obtain a powerful skill a little later on then I suggest walking away with at least 2). Lastly, if you want to obtain one of everything then I suggest walking

away with at least one Ghost Hand (obtained from the Ghost). You'll get one more chance to obtain a Ghost Hand later on at the Battle Square.

NOTE - When you do head back through to Sector 7 (the next screen), Aeris will leave your party for a while. Any Materia she may be carrying at the time will be deposited back into your stock, so you don't need to worry about that, however you do want to replace her Mythril Armlet with something less worthy; you'll need the Mythril Armlet for Barret.

--D1.05 B - Sector 7 Slums Revisited ("In my veins courses the blood of the ancients. I am one of the rightful heirs to this planet!")

```

--Boss - Turks:Reno I Lv 17

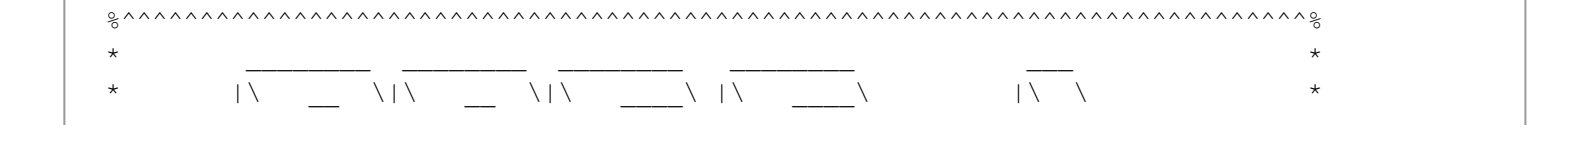
After some short events have played out, you'll regain control of Cloud. Talk to the guy with grey hair to stock up on a few Hypers and Tranquilizers if you wish, then save.

We won't be able to revisit the slums to the left so we have no choice but to ascend the support tower. Along the way you'll fight Aero Combatants, they have a decent amount of HP. You can also talk to the other Avalanche members as you climb the structure.

Once at the top, you'll have a brief opportunity to equip your characters. I suggest you make use of it. After equipping Barret with the Mythril Armlet, give him a Hyper and then set up you Materia something like this:

Cloud - Lv 14 - All=Restore, Fire, Steal
Barret - Lv 12 - Ice, Lightning, Cover
Tifa - Lv 13 - Ice, Restore, Lightning

Use the 'All Trick' to heal up Cloud and Tifa (In case you've forgotten how to do this, go into 'Magic' in the menus then go to use Cloud's Cure, and before selecting a party member press R1 to select everybody simultaneously). Note that the following boss is strong against Lightning so we won't be using it, I've only equipped it for the AP.



TURKS 01	BOSS BATTLE: 04	RENO I
	-------Lv:	17------
	-------HP:	1000----
	------EXP:	290-----
	-------AP:	22------
	------GIL:	500-----
	-----DROP:	ETHER---
	--NULLIFY:	GRV-----
	----HALVE:	LHT-----

This boss isn't too hard, as long as you know what you're doing. Reno will use some fairly strong attacks, if one of your players gets Paralyzed then there's not much you can do but with that person but wait until they have recovered. Don't use Bolt, it will only do half its normal damage, just use Fire and Ice and of course your Limit Breaks. When he uses Pyramid on you the afflicted player will effectively be out of the battle. The way to cure the afflicted player is to have an ally attack that player as to remove the pyramid. You shouldn't struggle with Reno, Once he's had enough he'll do a runner from the battle.

NOTE - If all three characters are inflicted with Pyramid, it's game over, so watch out!

After the fight we'll have to talk to Tifa, then after an animated scene followed by an amount of dialogue, we'll eventually regain control of Cloud again (I'd be worried if we didn't).

We'll grab the yellow Materia you saw in the previous screen a little later on. Head south for now, and after a moment where Cloud remembers something that Sephiroth once said, Tifa & Barret will join you. Equip an All=Ice combo. If you really want to grab that command Materia now, by all means do so, otherwise make your way back to Sector 5 Slums.

NOTE - Now that you have the Steal Materia, you could try to steal a few Ethers from the Hedgehog Pie to sell on for 700 gil a piece.

--D1.05 C - I Hope Marlene's Alright ("Oh yeah? Well to me it looks like a golden shiny wire of hope.")

ENEMIES:

	[HEDGEHOG PIE]	[WHOLE EATER]	[HELL HOUSE]	[VICE]
------Lv:	[----------6]	[---------9]	[--------------11]	[-----------7]
------HP:	[----------40]	[---------72]	[--------------450]	[-----------68]
------MP:	[----------52]	[----------]	[----------------]	[------------]
-----EXP:	[----------20]	[---------24]	[---------------44]	[-----------24]
------AP:	[----------3]	[----------2]	[----------------6]	[-----------3]
-----GIL:	[----------25]	[---------70]	[--------------250]	[-----------80]

```
> ---STEAL: [-------Ether] [-----Potion] [-----------------] [--Speed Drink] <
> ---MORPH: [-------Ether] [-----Potion] [-----------Potion] [-------Potion] <
> ----DROP: [------Potion] [-----------] [Hi-Potion, Potion] [-------Potion] <
> --DOUBLE: [---------ICE] [-----------] [-----------------] [-------------] <
#~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~#
|                               NOTE ON ENEMIES:                             |
|                                                                            |
| You have fought all of these enemies before, but now you have the Steal    |
| Materia, so try to steal a few Speed Drinks from the Vice as this is the   |
| only way to inflict Haste on yourselves at this stage in the game.         |
+----------------------------------------------------------------------------+

--Items   - Turbo Ether, Ether, Sense Materia
--Extra   - Batteries x 3
```

If you had left that 5 gil in the chest from before then you can revisit the boys room to receive a [TURBO ETHER]. Examine the Turtle Paradise poster now if you didn't previously. Then head over To Aeris's house, having a quick save along the way.

When you enter (Oh God, the music), you'll have to listen to Elmyra's story, then eventually you can control Cloud. Head upstairs and talk to Barret (Best Bromance - choose option 1, “I don't know”). You can rest here for free if you like, just run over to the bed you slept in before. Then head outside and Tifa will suggest heading over to the Wall Market.

If you encounter the Vice be sure to steal from them. If you didn't pick it up earlier, now is the time to pick up the [SENSE MATERIA] from the park. Note that once you have sensed an enemy during a battle you won't need to sense it a second time. Just make sure that the Status Bar is open (Select) and you'll be able to see an enemies remaining HP.

When you return to Wall Market you'll notice that peoples disposition towards you will have changed. The stunt you played before has earned you a bit of a reputation! The Materia Shop is now open, but unless you're wanting to buy another Cover Materia then there's really nothing worth going in there for. My advice is to buy a 2nd piece, as the effects stack against each other, but it's up to you!

Head up to the Weapon Shop again and this time talk to the guy on the left. He'll ask you if you want to buy some batteries - buy them! You won't be able to progress otherwise.

As you head north towards Don's mansion you will be beckoned by a bunch of kids. If you didn't pick up the Phoenix Down from earlier because Cloud was chosen by the Don then you can go and grab it now. Head into the mansion, up the stairs and into the room on the right. If you were then to head down the long flight of stairs once more, you could engage in some optional dialogue. Head to the eastern dead-end that the kids were mentioning when you're ready.

After hearing Barret's famous Shiny Golden Wire speech, you'll be able to climb this wire (which wasn't there before btw). When you get to the top make your way over to the lit area on the bottom right. Insert the battery to make the propeller blade start to spin, once it has stopped you can climb up it. Place the second battery at the top also.

This next bit can be a little bit tricky, keep climbing until you come to a swinging rod. You have to time it so that you push the action button at the exact moment the rod touches the other object of similar colour to the left

(or just slightly before). Once across, you can make your way up to the next screen.

Before heading all the way up here, follow the rope back down to the third battery slot to receive an [ETHER]. Head back down to the previous screen to do the whole rod swinging thing again, once you've completely ascended you'll finally arrive at the Shinra HQ!

¬¬¬

--Items - Elixir, Elemental Materia, Star Pendant, Four Slots, All Materia,
Phoenix Down, Ether
--Extra - Turtle Paradise Poster #2, Keycard 60, Keycard 62, Keycard 65,
A Coupon, B Coupon, C Coupon, Midgar Parts x 5, Keycard 66

When you first arrive at the Shinra's HQ you'll have the option to bust in guns blazin', or sneak in through the back. Obviously you know which my choice is gonna be, I'm looking on getting some Tifa kills with the All=Lightning combo at this point, so I'm bustin in through the front. You'll be able to come back for the item in the back entrance later on.

NOTE - Your choice here will not affect Tifa's or Barret's affection towards you. Also, if you choose one route, you can still opt to change your mind.

The Back Entrance.

Head left, you have a long climb ahead of you. Just after half way up the tremendously long stair case you'll come across an [ELIXIR] for you troubles. When you (finally) get to the top, you'll have to fight 3 Mighty Grunts in order to obtain the Keycard 60.

The Front Entrance.

As you enter, you'll have defeat a few Grenade Combatants. Once they're out of the way, head north west on the 1st Floor to the big billboard to read the [Turtle Paradise Poster #2]. Then, head up to the 2nd Floor and into the shop to stock up on a few Eyedrops (I bought 8). You won't be able to open those chests just yet, but you can watch a few promotional Shinra vids from the terminals to the left.

There is nothing on the 3rd Floor, so just head into the lifts. On your way up you'll have to fight a number of enemies until you finally reach the 59th Floor, where you'll then have to kill 3 x Mighty Grunts for the Keycard 60.

Whichever path you took, consider now tracing back to the other path; if you bust your way in all guns blazin', you could now head down the huge staircase on the left if you wanted to for the Elixir roughly half way down (it's quicker to double back once you've obtained it).

If you'd sneaked in through the back entrance then at this point you are really going to want to head back down to the 1st floor in the elevator to visit the shop for a few Eyedrops, but more importantly the Billboard on the 1st Floor for the Turtle Paradise Poster #2.

NOTE - This Turtle Paradise Poster is permanently missable! Don't worry if you did miss it here, as you will get one more chance in the game to examine it. This won't be until much, much later on though.

Shinra HQ - 60th Floor:

We now have a series of floors we must ascend by finding their corresponding Key cards on the floors below them. Whilst on the 60th Floor, you will have 2 sets of guards that you must navigate past. It's simple enough to work out. If you get caught you will have to fight them, and if you get caught 4 times then they will have vanished completely after the battle (unfortunately). Now Head up to the 61st Floor.

Shinra HQ - 61st Floor:

All you have to do here is talk to the guy walking around in the grey suit. Simply choose dialogue option 2 and he'll give you Keycard 62.

Shinra HQ - 62nd Floor:

There is a highly missable piece of Materia here, so head back to the 1st floor and save your game. Then head back up to the 62nd Floor and talk to Mayor Domino on the left side to engage him in a quiz. Guess right and he'll give you Keycard 65. Guess right on the 1st try then he'll throw in the highly under-rated [ELEMENTAL MATERIA]. The answer changes from game to game so if you don't guess correctly on your first try then just keep guessing until you've got the right answer, then reload your save. You WILL be thankful you did this. I'll explain the most proficient ways of using the Elemental Materia a little later on (when we obtain the Choco/Mog Materia).

NOTES - There is a way to know the password on the first try. Go to the upper-right room (Space Dev. Research Library) and check the middle left bookshelf. if the file is :

2	Economic Report: Space Dev Program	Password BEST
1	Breakdown of SOLDIER members by class	Password BOMB
10	New plans for urban planning	Password MAKO
1	Result of failed space mission “YA-79”	Password KING

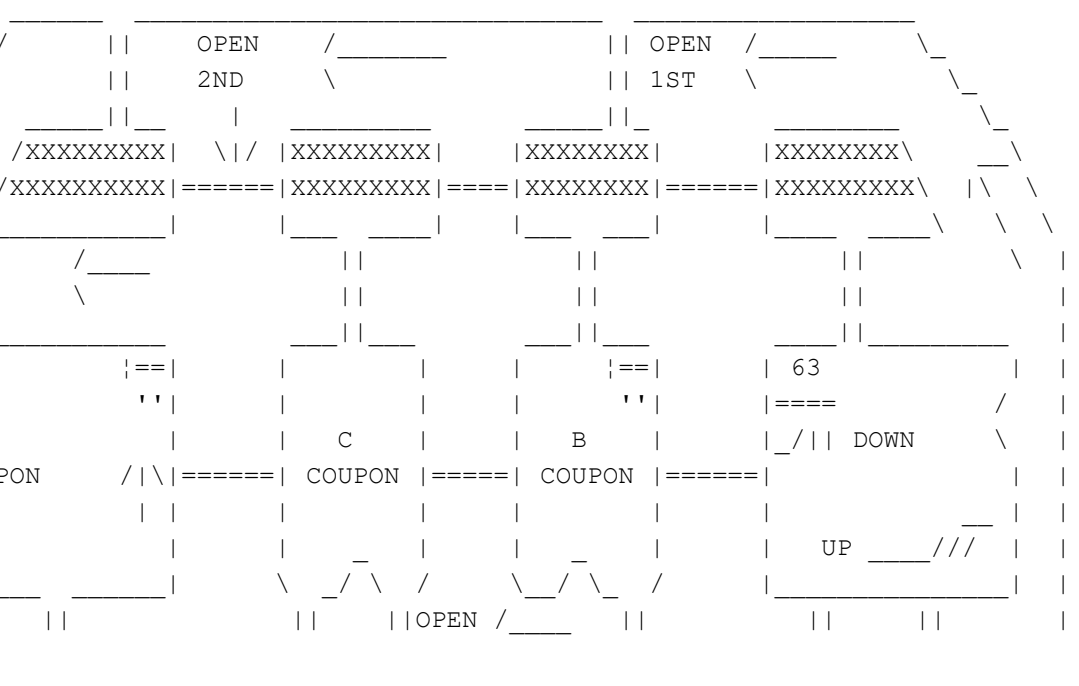
Thanks to BrutalAl on this one

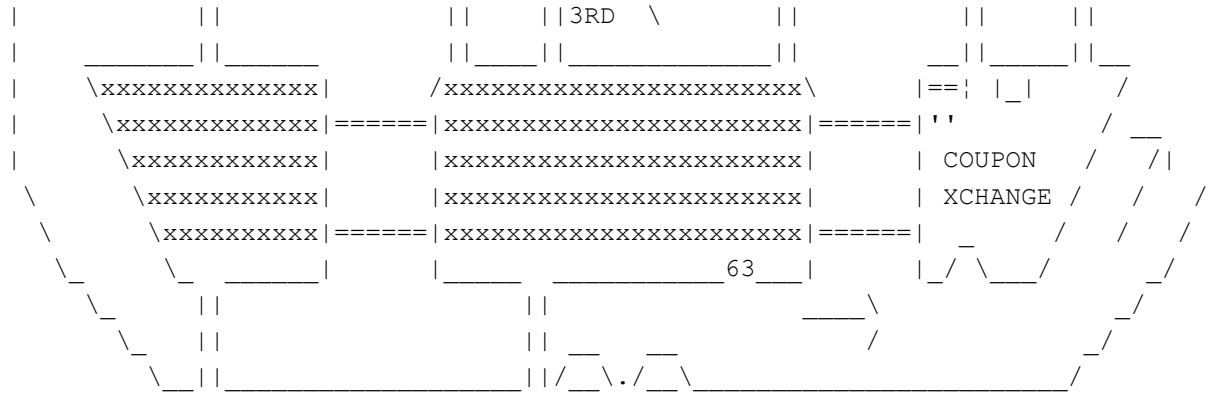
- If you get the password correct on your 2nd attempt then you will receive an Elixir, get it on your 3rd attempt for an Ether, and get it on your 4th attempt for a Potion.

- The password can only ever be Best, Bomb, Mako or King, and is selected based on how many seconds you have been playing.

Shinra HQ - 63rd Floor:

The next two floors are optional but I highly recommend that you don't skip them as you'll being missing out otherwise. Examine the terminal on the right to start a Mini-Game of sorts. You have three doors to open and three items to obtain. If you mess up you can reset the doors by using the terminal to try again.





First head all the way east then north round to the upper most door. Open it, from there you should be able to get into the western most room by opening one more door. Pick up the A Coupon which can be exchanged for the [STAR PENDANT] (don't exchange it just yet).

Then head into the air-duct and make you way east and then north to bring you out at the eastern room containing the B Coupon which can be exchanged for the [FOUR SLOTS]. Head out of this room and open your last door for the C Coupon which can be exchanged for the [ALL MATERIA].

Now head back into the air-duct and this time take the route back to the terminal. Here you can exchange your Coupons for their prizes. My suggestion is to give Cloud the second All combined with Restore so we don't have to keep swapping our Materia around every time we want do the 'All Trick'. Also, Four Slots is a piece of armour that has (you guessed it) four Materia slots, but also has low defence stats. The Star Pendant can be equipped as an accessory which can protect you from Poison, this will help a little later. Equip it to Cloud, if you wish.

Shinra HQ - 64th Floor

Not much to do here. You can head to the left to rest up for free, just remember that you may need to give someone a Hyper if you're Limit Training them as resting will cure you of Fury Status. Save if you wish, then head to the northern room with all of the lockers in. Search the southern strip for a [PHOENIX DOWN], the middle strip for an [ETHER] and the northern strip for a Megaphone that Cloud has no use for at this moment in time.

NOTE - *Make sure* to try to use the vending machine in the gym. Bang on it if you have to, nothing will come out of it, yet..... (but do bang on it)

Shinra HQ - 65th Floor

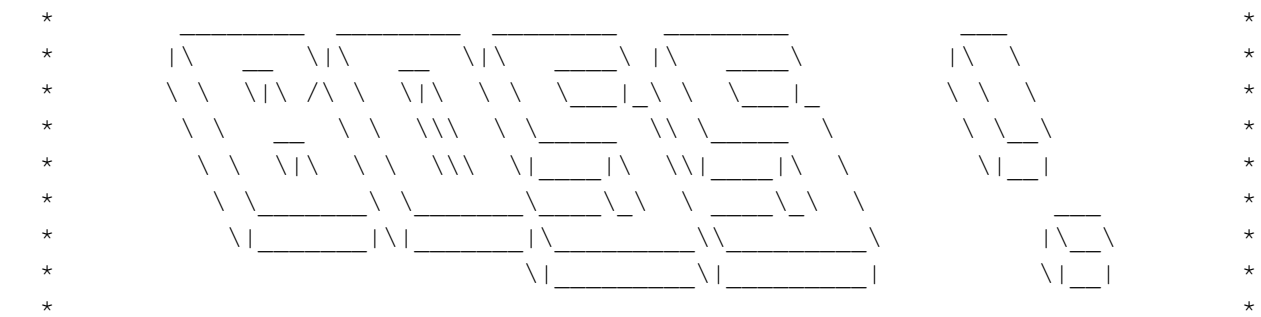
You can encounter enemies here by the way. Dotted around the room are several chests, only one will be open at a time (at random). Once you've found the unlocked chest, take its contents to the middle room where you will be able to place it down, thereby opening up another chest. Repeat this process until all but one piece has been placed (because there is no Sector 7 anymore), and the chest by the stairs will unlock granting us the Keycard 66.

Shinra HQ - 66th Floor

Here you are required to spy on a meeting. Head over to the toilet cubicles at the top left of the screen and examine one of the cubicles to climb up. Crawl down the shaft to eves-drop on President Shinra's meeting. Here is where we first meet Professor Hojo and also learn the name of Aeris's biological mother, Ifalna. Once the meeting has finished follow Hojo up to

the next floor and into his lab.

¬¬¬



This Boss will most likely use his Shady Breath in order to inflict you with Poison. This shouldn't be too much of a problem. If you'd equipped the Star Pendant to Cloud that you obtained earlier from the 63rd Floor then he won't be affected by the Poison Status. You don't have to kill the smaller samples; once the main foe at the back is destroyed then all the rest shall follow. You can however kill the little critters if you like for a small amount of extra EXP and AP. The main Boss will revive them straight away initially, but he will eventually run out of MP and when he does it'll just be him left. Don't use Poison on him. Once he is done for you shall receive the [TALISMAN].	BOSS BATTLE: 05	SAMPLE:H0512	SAMPLE:H0512 OPT X 3
	-------Lv:	19----------	7----------
	-------HP:	1000--------	300---------
	-------MP:	120---------	48----------
	------EXP:	300---------	20----------
	-------AP:	30----------	2----------
	------GIL:	250---------	----------
	-----DROP:	Talisman----	----------
	---ABSORB:	PSN---------	----------
	--NULLIFY:	GRV---------	ERT---------
	----HALVE:	LHT---------	----------

After the battle you shall get an opportunity to arrange the characters that you would like to have in your party. I decided to have Barret and Red XIII (Best Bromance - choose the same party members), so first I put Tifa in party then I used the 'Remove All' option (from the 'Arrange' tab in 'Materia'), then I exchanged her armour and removed her accessory. Once Red XIII and Barret were loaded with the best equipment, I set up my Materia with the following:

1) Cloud - Lv 15 (Front)

    Buster Sword - All=Restore
    Carbon Bangle - Fire, Lightning, Steal
    Star Pendant

2) Barret - Lv 14 (Front)

    Assault Gun   - All=Fire
    Carbon Bangle - Elemental=Poison, Ice
    Talisman

3) Red XIII - Lv 15 (Front)

    Mythril Clip - All=Lightning, Sense
    Four Slots   - Restore, Ice, Cover, Cover

NOTE - Equipping the Elemental combo onto a character's armour will have a different affect to placing it on a characters weapon. This doesn't

matter for now, I just thought I'd mention it. I'm only equipping Elemental now as so that it starts receiving AP. More Elemental details on the way. Also note that Red XIII came with an All, so we can now have one on each character!

GRAB THAT MATERIA! Pick up the [ENEMY SKILL MATERIA] that you see in the test chamber. You don't need to worry about equipping this just yet, I'll explain what it's all about in a short while (Enemy Skill does not gain AP!).

RED XIII

1-1 SLED FANG (default) Attacks one opponent	2-1 BLOOD FANG (72 kills) Attacks and drains the HP/MP from one opponent
1-2 LUNATIC HIGH (use 1-1 8 times) Casts [Haste] and raises "Defence %" for all allies	2-2 STARDUST RAY (use 2-1 7 times) Attacks all opponents
3-1 HOWLING MOON (144 kills) Begins fighting wildly	4 - COSMO MEMORY Attacks all opponents Use the item Cosmo Memory
3-2 EARTH RAVE (use 3-1 6 times) Attacks all opponents	Found on Disc 1 in Nibelheim in the Shinra mansion by opening the safe on the 2nd floor

Battle around for a little while until you encounter SOLDIER:3rd. You are going to want to try to steal a weapon for Cloud - the Hardedge from them, although it can be notoriously hard to do so. It took me roughly 10 minutes! Try to get a few uses of Red XIII's 1-1 while your here, if you can.

Head south from where you picked up the Enemy Skill to find a set of stairs leading to 2 [POTIONS]. You can talk to the chap in the Control Centre for the Keycard 68. Head back down the stairs and then to the right to find another 2 [POTIONS].

Now head back to the main elevator shaft, remembering to equip Cloud's Hardedge if you managed to obtain one. Also un-equip any armour/accessories you have equipped on Red or Barret. We're about to run into a small bit of bother!

NOTE - You won't be able to encounter the enemies that drop the Carbon Bangle and the Hardedge past this point.

--D1.06 C - Escaping From Shinra (“A little fear will control the minds of the common people.”)

NOTE ON ENEMIES:	ENEMIES:	[VARGID POLICE]	[BRAIN POD]	[ZENENE]
Make sure to have a Star Pendant equipped, and make sure *not* to have on All=Fire. The Zenene and the Brain Pod can both be damaged by using Cure on them seeing as they are Zombie based creatures. Also, having Elemental=Poison on someones Armour will help.	------Lv:	----------9]	----------15]	----------14]
	------HP:	----------140]	---------240]	---------250]
	------MP:	----------28]	----------46]	----------93]
	-----EXP:	----------44]	----------52]	----------58]
	------AP:	----------7]	----------6]	----------6]
	-----GIL:	----------40]	----------95]	----------60]
	---STEAL:	[-Tranquilizer]	[----Antidote]	[Deadly Waste]
	--DROP 1:	[-Phoenix Down]	[Deadly Waste]	[-------Ether]
	--ABSORB:	[----------]	[----PSN--RES]	[----PSN--RES]
	-NULLIFY:	[----------]	[---------ERT]	[----------]
	---HALVE:	[----------]	[----------]	[---------FRE]
	--DOUBLE:	[----------]	[---------HLY]	[---------HLY]

--Boss - Hundred Gunner Lv 18 + Heli Gunner Lv 19 (Mythril Armlet),
Rufus Lv 21 (Protect Vest) + Dark Nation Lv 18,
Motor Ball Lv 19 (Star Pendant)

So you've wound up in Shinra's Security cells. Bummer. You can talk to your friends here for some (affection) dialogue, then when you're ready you can get some shut-eye. (Best Bromance - When talking to Tifa, choose option 2, “Kinda Hard”. Then think of Barret first, and Red XIII second)

NOTE - There is a glitch you can exploit here to raise Tifa's affection towards you indefinitely. See section E.01 B for more details, or use QSI Link [Speed Dating]. Remember, copy Speed Dating into the search field, replacing the [] with {} to jump straight to that relevant section. This does work in the Steam/PS4 versions.

When you awaken you'll notice something weird is going on. Take a look around and eventually you'll have to follow RED XIII out of the cells. Set up your new party with the best equipment and give both girls the All=Ice combo, not forgetting to give Hypers out to those who are Limit Leveling!

Make your way round to Hojo's lab to find out the possible cause for all the weirdness. Head to the northern lift. Follow the trail of blood all the way to the 69th Floor where you can save; I recommend doing so. Also, replace Tifa's Carbon Bangle with something else before moving up to the 70th Floor.

NOTE - When we continue on all of our HP & MP will be restored.

Head upstairs to find a few shocking revelations and then head through the northern door. Eventually you will have the option to remove all of Cloud and Tifa's Materia. Select yes, give Barret the Carbon Bangle then consider the following set up (And yes I am equipping certain Materias just for the sake of equipping them, like Enemy Skill):

1) Aeris - Lv 12 (Back)

Striking Staff - All=Restore, Sense, Steal
Carbon Bangle - Lightning, Poison, Enemy Skill
Talisman

2) Barret - Lv 14 (Back)

Assault Gun - Elemental=Lightning
Carbon Bangle - All=Ice, Fire

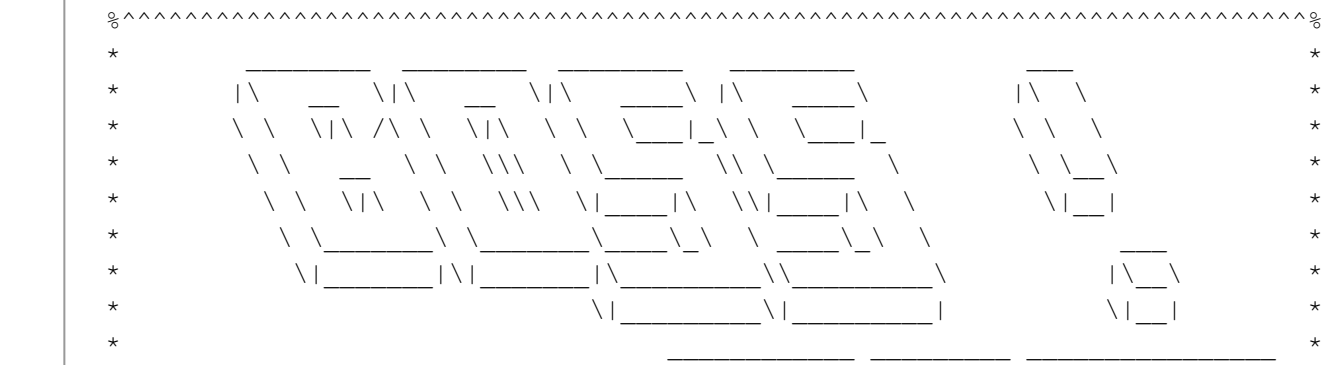
3) Red XIII - Lv 15 (Back)

Mythril Clip - All=Restore, Sense
Carbon Bangle - Ice, Fire, Cover

SIDE NOTE - ELEMENTAL MATERIA

It is crucial to point out that I have equipped Barret with the Elemental=Lightning combo on his weapon and not his armour. The following few Bosses are weak vs Lightning attacks and with this combo attached to Barret's weapon it will make his attacks lightning based hitting for extra damage. If you had attached it to his armour by mistake then he would be defending from Lightning based attacks which would be pointless at this stage.

Depending on where you are with your Limit Breaks and how many Hypers you have remaining, you may want to give Barret and/or Red XIII one to get a few uses from their Limits. When you're ready, head over to the elevators to engage in not one but two Boss battles! (Even though the battle music suggests otherwise...)



Ok, so you'll have to defeat these robots one after the other. The main thing to point out about them is that only long range weapons can attack them, this means Barret! If you have the Elemental=Lightning combo on his weapon then he should be able to plough through these sucka's with ease. Also Remember that if you need to heal just 1 player you can negate the All's effect with R1. Have Aeris cast Bolt and Red XIII cast Ice/Fire while Barret just attacks until Hundred gunner is no more, then Heli Gunner will rear its ugly machine butt!

BOSS BATTLE: 06	HUNDRED GUNNER	HELI GUNNER
-------Lv:	18-----	19----------
-------HP:	1600---	1000-------
------EXP:	330----	250--------
-------AP:	35-----	25----------
------GIL:	300----	200--------
-----DROP:	-------	Mythril Armlet
--NULLIFY:	-------	ERT--------
----HALVE:	GRV----	----------
---DOUBLE:	LHT----	LHT--WND----

* NOTE - Don't forget you can sense the enemy to see their remaining HP, so long as you have the status bar open (with select).

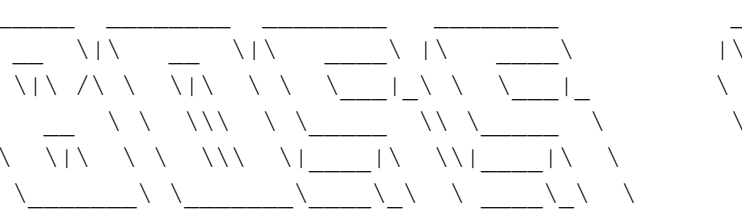
Heli Gunner has less HP, but can inflict a few Status changes to you. He's still fairly easy though, take care of him in the same fashion as you did the Hundred Gunner and hopefully you'll get a few uses of Red XIII's Limits along the way (provided you gave him a Hyper earlier). You'll be rewarded with a [MYTHRIL ARMLET] when you're done.

As soon as this battle has finished you'll be back with Cloud and Rufus. Press Sq when prompted to remove everyone's Materia, then set Cloud up with something like this:

1) Cloud - Lv 15 (Front)

Hardedge - All=Poison, Restore, Ice
Carbon Bangle - Elemental=Lightning, Fire
Star Pendant

And without further ado, we have another Boss battle:



As soon as the battle begins cast Bio and hopefully you'll inflict Rufus with Poison. His companion, Dark Nation, can cast some rather annoying spells, namely Barrier and MBarrier which will half the damage of your physical and magical attacks respectively. If you had equipped Elemental=Lightning on your armour then you will half the damage you take from Dark Nation's Bolt attack. Just like with Sample:H0512

BOSS BATTLE: 07	RUFUS	DARK NATION
Lv:	21	18
HP:	500	140
MP:		80
EXP:	240	70
AP:	35	7
GIL:	400	250
DROP:	Protect Vest	Guard Source
NULLIFY:	GRV	

earlier we don't have to kill the main Boss's companion, but we will gain extra EXP, AP and gil if we do, not to mention a Guard Source. Rufus himself is really easy and once you have weakened him enough he'll flee from the battle leaving behind a [PROTECT VEST] for you.

As soon as the battle is done head back down to the 69th Floor. Save if you wish then talk to Tifa to make our POV change to our other team. After a cool FMV you'll have an opportunity to swing your sword about a bit, and set up a party. I went with:

1) Cloud - Lv 16 (Back)

    Hardedge   - All=Restore, Lightning, Ice
    Carbon Bangle - Elemental=Fire, Enemy Skill
    Star Pendant

2) Barret - Lv 14 (Front)

    Assault Gun   - All=Restore
    Carbon Bangle - All=Fire, Steal
    Talisman

3) Red XIII - Lv 15 (Back)

    Mythril Clip - Lightning, Ice, Sense
    Carbon Bangle - Poison, Sense, Cover, Cover
    Protect Vest

I have set up my party in the reverse of their normal rows for this fight for reasons that'll make sense in just a sec, for now we have a Mini-Game to play!

SIDE NOTE - G-BIKE MINI GAME

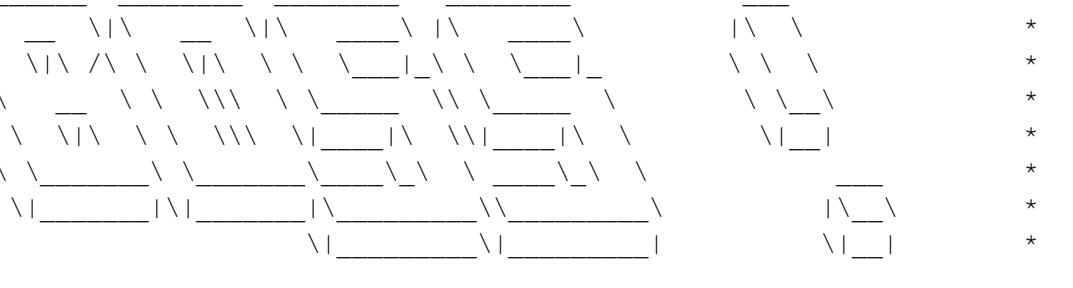
Ahh, I can still remember playing this for the first time roughly 18 years ago. O.k., so there are going to be two types of bikers that are going to try to attack your blue truck that has your companions in, and the more health taken out of the truck the less health your players will have going into the Boss battle at the end (ha ha at Red XIII's Pic). Press Sq to swing to the left and O to swing to the right. Sounds simple enough, right?

Orange Bike - The easier of the two. These bikes have a fairly predictable pattern and shouldn't be too difficult for you to take out, you just have to time you swings right.

Red Bike - These are the bikes that will cause you problems. Instead of attacking your blue truck, these bikers will draw you away from your comrades, and while you're busy trying to take out the red bikes the orange bikes will sneak up without you noticing. Just stay by you team, let the bikes come to you.

Blue Bike - These only appear on the Steam/PS4 version, and appear to act identical to the orange bikes.

don't forget you can cause a 'domino affect' by lining them up right. Once you reach the end of the Highway you'll be instantly engaged in a Boss battle!



```
*  ___________________________________________   _____________ _____________  *
* |                                           | |             |             | *
* |               MOTOR BALL                  | | BOSS BATTLE: | 08          | *
* |___________________________________________| |_____________|_____________| *
*                                             |             |             | *
* This boss has an incredibly powerful        | ---------Lv: | 19--------- | *
* attack, Rolling Fire which can deliver      | ---------HP: | 2600------- | *
* roughly 250HP to all allies, so make sure   | ---------MP: | 120-------- | *
* to keep your HP topped up. Your rows will   | --------EXP: | 440-------- | *
* be automatically reversed to whatever you   | ---------AP: | 45--------- | *
* had set them to, which is why I'd advised   | --------GIL: | 350-------- | *
* you to put your characters in the back row  | -------DROP: | Star Pendant | *
* earlier. Bolt is your best friend here, so  | ----NULLIFY: | GRV-------- | *
* just let Cloud and Red XIII fry the Motor   | ------HALVE: | FRE-------- | *
* Ball while Barret heals the group and then  | -----DOUBLE: | LHT-------- | *
* attacks him normally. Don't forget to       |_____________________________| *
* sense him aswell so that you can see his                                    *
* remaining HP. He can deliver a few powerful Fire based moves here, which    *
* is why I'd recommended the Elemental=Fire combo on Cloud's armour. Lastly,  *
* don't use Fire based spells as they will inflict 1/2 the normal damage.     *
* Once he's been annihilated you'll be rewarded with the [STAR PENDANT].      *
*                                                                             *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

Once you've jumped down to the outskirts of Midgar you'll be able to engage in some optional dialogue. When you're ready, go to leave the south screen to be prompted to set up a party (Best Bromance - choose Barret & Red XIII). When you're ready, head outside to the vast and wonderful World Map!

NOTES - Very shortly we will gain the ability to swap our players around at will, so don't worry trying to decide on the best character to pick just yet.

- There are two amazing spots in this game for Leveling up our Limit Breaks, the first of which we will be arriving at pretty shortly.

- Red XIII's 1-2 Limit is a really effective method to defeating one soon-to-fight mega hard boss, as it will caste Haste and raise the defence of all allies, so try to learn it soon (8 uses of Sled Fang).

```

+----#~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~#----+
|                              NOTE ON ENEMIES:                                  |
|                                                                                |
| While you are engaging the Custom sweeper you are going to want to steal       |
| the Atomic Scissors from it whilst waiting for it to cast Matra Magic.         |
| This weapon for Barret will save you 1400 gil and at the same time it'll       |
| sell for 700 gil should you wish to stock up on a few. Other than that,        |
| watch out for the prowler; if it steals from you then make sure to kill it     |
| before it can run away. Ethers are a very easy steal from the Prowler.         |
+--------------------------------------------------------------------------------+
```

Now the we have access to the World Map, now we can truly feel as though we are playing a vintage Final Fantasy game. Up until now the game has been fairly linear, it's about to massively open itself up! I have designed a map of every part of the World Map, visit section F.01 for a map of the continent you're on!

3 things to point out about the World Map:

1 - You can save at any point whilst on the World Map.
2 - Press Select once to bring up the Mini Map, press Select again to bring up the Full Map.
3 - Pressing R1/L1 will rotate your camera's view of the map. Pressing R2 will change the camera back to the annoying overhead view.

Our next destination, Kalm, is east north-east from Midgar. Equip an All=Fire combo for the Kalm Fangs and an All=Lightning combo for the Custom Sweeper, also make sure to equip the Enemy Skill Materia and then battle around until you engage with the Custom Sweeper (stealing Ethers from Prowlers and Kalm fangs as they appear)!

```
 _____________________________________________________________________________
]                                                                             [
] SIDE NOTE - ENEMY SKILL                                                     [
]                                                                             [
] Probably one of the most diverse pieces of Materia in the whole game, the   [
] Enemy Skill will allow you to learn certain moves that the enemies can      [
] cast. The player must survive the move and the battle must be won in order  [
] for the skill to be learned. There are 24 moves to obtain in total, two of  [
] which are permanently missable (Trine and Pandora's Box). There are 4       [
] Enemy Skill Materias to collect and only one needs to be filled in order    [
] to achieve the Materia Overlord Achievement, however I highly recommend     [
] that you set your sights on filling all 4 pieces up. Some of the moves      [
```

] that you can learn can be incredibly useful, like for example, Matra [
] Magic! [
] [
] Matra Magic will be our best friend for now, it does non-elemental damage [
] to all foes for 8MP! Nice! Eventually it'll become obsolete as we obtain [
] bigger and badder Enemy Skills, but for now it'll do just nicely. [
]_____[

So, you've learned the Enemy Skill Matra Magic and you've stolen the Atomic Scissors (which isn't long range btw), and now you're ready to head to Kalm. There are just 2 more points and a Side Note to mention before concluding this incredibly short mini sub-section:

1 - I feel as though now is a good time to slow the battle speed down a little bit. our characters are starting to level up nicely which means their ATB gauge will start filling up quicker. We can afford to bring the Battle Speed down to roughly 3/5's maybe slightly quicker. Reason being, we don't want the enemies to overtake us when we hesitate.

2 - You'll have picked up a Guard Source along the way whilst in the Shinra building. This is an item that will permanently increase one of your stats! Most people whack these straight onto Cloud, my suggestion however is to leave every single one of these 'sources' that you find until you get to a certain point, deep into the game (and the Ocean), The Sunken Gelnika!

_____
] [
] SIDE NOTE - UNDERSTANDING WHAT THE STATS MEAN [
] [
] Go into 'Status' in the main menu to view your stats. I've been using [
] these stats to help me decide on my battle plans so far. Here is what they [
] mean: [
] [
] Strength - The higher your Strength stat the more damage you will deliver [
] from your physical based attacks. Your Attack stat is directly [
] linked to your Strength. [
] [
] Dexterity - The higher your Dexterity Stat the quicker your ATB gauge will [
] fill up. Also, you will be more likely to evade physical [
] attacks as your Defence% stat is directly linked to your [
] Dexterity and Luck. [
] [
] Vitality - The higher your Vitality stat the less damage you will receive [
] from physical based attacks. Your Defence stat is directly [
] linked to your Vitality. [
] [
] Magic - The higher your Magic stat the more damage you will deliver from [
] you magical based attacks. Your Magic Attack stat is directly [
] linked to your Magic [
] [
] Spirit - The higher your Spirit stat the less damage you will receive from [
] magical based attacks. Your Magic Defence stat is always [
] identical to your Spirit. [
] [
] Luck - The higher your Luck stat the more likely you are to land a [
] critical hit. Also, you will be more likely to evade physical [
] attacks as your Defence% stat is directly linked to your Dexterity [
] and Luck [
] [
] The are only two stats that aren't directly linked: [

]   [
] Attack% - The higher your Attack% stat the less likely you are to miss   [
]   with your physical based attacks.   [
]   [
] Magic Defence% - The higher your Magic Defence% stat the more likely you   [
]   are to evade magical based attacks.   [
]   [
] So, Strength - Luck, our main attributes, are our 'base' stats if you   [
] will. These stats will only increase by Leveling up (usually). Our Attack [
] - Magic Defence stats are variable based on our weapons and armour. As   [
] your base stats increase, so will the variable stats, of which will also   [
] increase as we obtain better equipment. This doesn't apply to Magic   [
] Defence. For some reason that stat is fixed to our Spirit stat and won't   [
] budge due to a glitch, which was fixed with the Steam/PS4 release.   [
]   [
] Lastly, whilst in the Status screen you can toggle through with confirm to [
] see your Elemental and Status strengths' and weaknesses. More on these to [
] follow.   [
]____[

Head into Kalm. We can explore around a little later on, for now head into the Inn and you'll eventually be venturing inside another flashback!

¬¬¬

NOTE - It's worth noting that if you were to take a look through the menus you'd be able to view Sephiroth's stats and Materia, although you wouldn't be able to swap any of it around. You'll also be able to see what Materia Cloud was getting excited about earlier on - the Pre-Emptive Materia (which isn't that great to be fair).

Save the game when prompted. Then.....

You'll eventually get to a point where you are required to explore a creepy mansion. Look around, eventually you will find a passage that leads to an underground tunnel (2nd floor). Here you will find Sephiroth, and he will uncover some shocking truths regarding his mother. Then leave the basement.

Once you've awakened, visit Sephiroth in the basement once more. Once he has finished, head outside. You shouldn't need to pick up this walkthrough until the flashback has finished and you have received the APS system (Best Bromance - after the flashback, choose option 1, “Wait a sec”, followed by option 1, “Beautiful, just beautiful” when talking to Barret)!

Wow! So now we know why Cloud feels compelled to pursue his old friend and now arch-rival, Sephiroth! For us, however it's time to retrieve some items and buy some weapons in Kalm!

NOTE - Make use of the PHS! If you're looking to obtain the Best Bromance Trophy, then you're going to want to place Barret and Red XIII in your party now. Go out to the world map to make use of the PHS system.

Head back into the 2nd Floor of the Inn to find a cabinet on the west side. Search it multiple times, and eventually you will be able to obtain the [MEGALIXIR] inside.

Now make your way to the next house along on the right. Search underneath the stairs on the 1st Floor to find an [ETHER] (Best Bromance - then talk to the woman on the left and choose option 2, “You're full of it”, then head upstairs and talk to the girl choosing option 1, “Yeah, maybe” (make sure to have Barret and Red XIII in your party)).

Search the next house along on the 2nd Floor and you'll find a cabinet containing another [ETHER].

In the third house along you'll find a [GUARD SOURCE] in a cabinet on the 2nd Floor. Head back down to the 1st Floor and on the left hand side you'll find a spiral staircase. Take it to the top to find a [PEACEMAKER], a weapon that you cannot use just yet as you don't have the character recruited.

Finish of the rounds by grabbing the last [ETHER] from the south eastern house on the 1st Floor.

Now to spend some gil. Head up the main set of stairs that you see and enter the shop on the left, the Item Shop. I suggest stocking up on 15 Hypers amounting to 1500 gil. These will definitely come in handy later on.

Now head to the next shop along, the Materia Shop, and buy yourself:

1 x Earth Materia - 1500 gil
1 x Steal Materia - 1200 gil
1 x Heal Materia - 1500 gil
Total - 4200 gil

] [
] SIDE NOTE - ESUNA [
] [
] Whilst Heal at Lv 1 will only cure of the Poison Status, Lv 2 Heal, Esuna, [
] will cure you of any Status! Equip Heal straight away and don't take her [
] out until she's levelled up. Esuna is crucial to any battle strategy. [
]_____[

You should now head into the Weapon Shop just right of the Materia Shop to sell some weapons. You shouldn't need to buy the following:

1) Mythril Saber for Cloud assuming you were able to steal the Hardedge from the SOLDIER:3rd in the Shinra building.
2) Cannon Ball for Barret assuming you were able to steal the Atomic Scissors from the Custom Sweeper in Midgar Area
3) Full Metal Staff for Aeris assuming you were able to steal the Striking Staff from Eligor in the Train Graveyard, and
4) Mythril Armlet assuming you were able to steal 3 Carbon Bangles from the Moth Slasher in the Shinra building.

The only weapon you won't have is the Mythril Claw for Tifa, but don't worry, we're going to be stealing a much better weapon than that very shortly anyway.

_____
] [
] SIDE NOTE - SELLING UNWANTED WEAPONS & AMOUR [
] [
] I guess the golden rule here is to NEVER sell anything that has got either [
] a Double or Triple growth stat against it (which we currently don't have). [
] In fact, there are only three points in this game where I feel it is [
] necessary to sell my inventory, now is one of them. For peace of mind, I [
] suggest you only ever sell what is recommended in this guide to sell. And [
] make a fresh Save, aswell. Sell non listed items at your peril. [
] [
] First, go to 'Item', then 'Arrange', then arrange by 'Type'. Next, goto [
] any shop to sell your items. Sell the following (assuming you've been [
] following my guide to the letter so far): [
] [
] * = Unique item, cannot obtain again [
] [
] *Guard Stick x 1 - 70 gil [
] *Iron Bangle x All - 80 gil Each (I had 3) [
] Mythril Armlet x All - 175 gil Each (I had 4) [
] *Leather Glove x 1 - 60 gil [
] Mythril Rod x 1 - 185 gil [
] *Bronze Bangle x All - 50 gil Each (I had 4) [
] *Titan Bangle x All - 140 gil Each (I had 3) [
] Star Pendant x 2 - 2000 gil Each [
] Total - 5875 gil [
] [
] Note that you **must leave at least two pieces of armour** available for [
] your players to get changed into whilst you're swapping them around. I [
] made sure to be left with 1 x Carbon Bangle and 1 x Four Slot in my [
] inventory. Also, I left Barret's Assault Gun because it is long ranged and [
] we'll need it for later! [
] [
] If you're concerned about not having a full end-game inventory, then only [
] sell everything that you have more than one of, with the exception of the [
] Star Pendant which at this stage in the game is only good for selling for [
] gil. We'll obtain another one soon enough. [
]_____[

We're all done with Kalm now, nothing left to do but to set up our team and
to make our way over to the Chocobo Ranch!

```

¬¬¬
```

--Extra   - Chocobo Lure Materia (cost 2000 gil)

Before heading out, now that we have the ability to change our characters around whenever we want using the PHS (provided we are at a save point), I'd like to make a quick note regarding the most efficient ways of swapping you party around.

SIDE NOTE - EFFICIENT WAYS OF STRIPPING DOWN A CHARACTER

Before changing a players armour and accessory you're going to want to explore the quickest way of swapping your Materia around. Some people like to us the 'Remove All' feature, others like to 'Exchange' their Materia all in one go.

For me, I've found that the quickest way is to first 'Arrange' my Materia. Then, I'll select the top-left piece of Materia of the character that I'd like to swap out, then I'll press R1 to scroll down to an empty inventory space. Then I'll press O, Right, O, Down, O, Right, O, Down etc. (or X if I'm playing the PS4 version) until all of my Materia has been removed in order. Then, pressing Square I'll jump straight over to the Equipment menu, where I'll remove any Accessory using Triangle and replace the good Armour with something less fancy.

This way I can set my new player up with everything that the old player had in less than 60 sec. I find that the 'Exchange' way of doing it can sometimes be a little tedious due to the fact that not everyone has the same amount of Materia Slots. Each to their own, I suppose. I'm sure you'll find the quickest way that works for you.

NOTE - Whilst in the PHS menu you can press confirm twice against a character to see what equipment and Materia they have on them without having to place them in your party. Also, any party member not in your team will receive 1/2 the amount of EXP that your team does.

O.K., so we're finally ready to head on. Take a quick look at my set-up, give people Hypers that need them and then make your way south-east to the Chocobo Ranch:

1) Cloud - Lv 16 (Front)

    Hardedge   - All=Restore, Sense Steal
    Carbon Bangle - All=Lightning, Heal

2) Aeris - Lv 13 (Front)

    Striking Staff - Poison, Ice, Fire, Enemy Skill
    Carbon Bangle - Elemental=Earth, Lightning
    Talisman

3) Red XIII - Lv 16 (Front)

    Mythril Clip - All=Fire, Ice
    Four Slots   - Restore, Steal, Cover, Cover
    Protect Vest

NOTE - There are only certain stages in the game that it is necessary to

have Barret in your party to earn the Best Bromance Trophy. This *isn't* one of them.

Along the way you should encounter the Mu. Don't forget to learn the Enemy Skill L4 Suicide from him, although it could take a while as it has a 1 in 14 chance of using it.

When you get near to the Chocobo ranch you may notice the huge swamp to the west; don't venture out into it or you'll be attacked by a giant snake (Midgar Zolom)! We are going to have to get across somehow, perhaps a Chocobo could get us across? Let's enquire at the Ranch.

NOTES - When I was roughly 12 years old (1999) I spent ages trying to see if it was possible to dash across the swamp on foot without the Zolom catching me. It is possible. It's incredibly difficult to do however, you have to time your run just when the Solid Snake is all the way over to the left of you. For what it's worth, just catch a Chocobo.

- The Midgar Zolom has a powerful Enemy Skill called Beta,and is perhaps the strongest magic you'll obtain for a good long while. I'll walk you through how to obtain it shortly.

GRAB THAT MATERIA! Once you have reached the Chocobo Ranch you can talk to the nearest Chocobo, select option 1 (wark) to receive the [CHOCO/MOG MATERIA]. Not only is this our first summon Materia, but it is also our first Materia that is Wind based!

```
 ____________________________________________________________________________
]                                                                            [
] SIDE NOTE - SUMMON MATERIA                                                 [
]                                                                            [
] 18 Years ago these in-battle sequences blew me away. Today, However they   [
] just seem to go on a little bit too long for me to be bothered to cast     [
] them, ESPECIALLY given the fact that they can be incredibly detrimental to [
] our physical stats. Take a look at Choco/Mog:                              [
]                                                                            [
]   Magic  + 1                                                               [
]   Max HP - 02%                                                             [
]   Max MP + 02%                                                             [
]                                                                            [
] So we can see that whilst having a negative effect on our physical stats,  [
] we are also receiving a positive effect on our magical stats. The stronger [
] the Materia, the stronger the effect on our stats will be. Down the line,  [
] we will find that our max HP could be dropped by as much as 10%! Because   [
] of this, you should be very wary when choosing to overload someone with    [
] Materia.                                                                   [
]                                                                            [
] BUT!!!                                                                     [
]                                                                            [
] Summon Materia will sometimes have an Element property, and Choco/Mog is   [
] our first Wind based Materia, of which more enemies are weak against than  [
] any other Element in the game! Additionally, the Fledgling Summoner Trophy [
] can be obtained by casting a summon in-battle (which we're going to be     [
] doing shortly).                                                            [
]____________________________________________________________________________[
```

```
 ____________________________________________________________________________
]                                                                            [
] SIDE NOTE - ELEMENTS AND MATERIA'S                                         [
]                                                                            [
] As you know by now many enemies will have various Elemental strengths and  [
```

] weaknesses. Here is every Element in the game, my abbreviation of that [
] Element, and all of the Materia associated with that Element (S = Summon): [
] [
] FIRE (FRE) - Fire (Fire), Contain (Flare), Ifrit (S), Phoenix (S), [
] Kjata (S), E-Skill: Flame Thrower, Beta, Magic Breath [
] [
] ICE (ICE) - Ice (Ice), Contain (Freeze), Shiva (S), [
] E-Skill: Magic Breath [
] [
] LIGHTNING (LHT) - Lightning (Bolt), Ramuh (S), Kjata (S), [
] E-Skill: Trine, Magic Breath [
] [
] EARTH (ERT) - Earth (Quake), Contain (Break), Titan (S), Kjata (S) [
] [
] POISON (PSN) - Poison (Bio) [
] [
] GRAVITY (GRV) - Gravity (Demi) [
] [
] WATER (WTR) - Leviathan (S), E-Skill: Aqualung [
] [
] WIND (WND) - Contain (Tornado), Choco/Mog (S), Typhoon (S) [
] [
] HOLY (HLY) - Alexander (S) [
] [
] O.K. so there are a few things here to point out: [
] [
] 1.) Contain has four different spells to cast that each have a different [
] Elemental property, aswell as casting Status changes. This makes it [
] one of the most useful magic Materias to have in the game. [
] [
] 2.) There are two Materias that can inflict multiple Elements in one go. [
] These are: [
] [
] Kjata - Hits with Fire, Ice, lightning & Earth. [
] E-Skill Magic Breath - Hits with Fire, Ice & Lightning. [
] [
] 3.) Once you've finished setting up your characters you can check that [
] you have set them up correctly by viewing their Elemental Strengths [
] and Weaknesses in the 'Status' menu. Press confirm once to flick to [
] the Elemental window. As your Elemental Materia levels up, so does [
] the effect of placing the combo on your Armour: [
] [
] Lv 1 - 1/2's the damage taken from the paired Element. [
] Lv 2 - Nullifies the damage taken from the paired Element. [
] Lv 3 - Absorbs the damage taken from the paired Element. [
] [
] So in theory, once you had obtained a level 3 Elemental you could [
] equip it with Fire onto your Armour and then use your Fire spell to [
] heal yourself. Nice! [
] [
] 4.) Poison is the only Element on this game that weirdly enough also [
] considered a Status. So, you could have the Elemental=Poison set up [
] on your weapon and you would be inflicting physical damage that is [
] Poison based (if a creature is weak vs Psn). Or, you could equip the [
] Added Effect=Poison combo on your weapon to have a chance of [
] inflicting your enemies with the poison Status when you attack (if [
] they are not immune to Poison). More on Statuses and the Added Effect [
] Materia once we receive it later on. [
] [
] There is still a lot more to learn about Elements, for a full rundown [

] visit section E.05. [
]_____[

Phew, side-note overload. We are now getting to a stage in the game where these side notes should start to ease up a little, now that we're getting quite adept to the game. there is one long Limit Break training note coming shortly though, you have been warned!!

So, if you wanted to rest up for 100 gil then you can do so in the smaller building on the left. Otherwise head into the barn to talk to Choco Billy to request a Chocobo. You must buy a the [CHOCOBO LURE MATERIA] at this stage for 2000 gil in order to proceed. Also, stock up on a few Gysahl greens, 5 should be enough for now. When you're ready to leave you can just exit through the NE side of the screen, no need to run all the way back round the pen.

NOTE - Chocobuckle is an Enemy Skill that will deal damage proportionate to the amount of times you have fled from battle (so in other words it's useless). And considering how much of a pain in the backside it is to obtain, I suggest leaving it for now and coming back to learn it once you have obtained all 4 Enemy Skill Materias, so you only have to learn it once (by equipping all 4 E-Skills onto one character). If you really must learn it now, however, then here's how:

First, make sure to have the ATB set to 'Wait' in Config (if you haven't already), then purchase a Mimett Green from Choco Billy. These cost 1500 gil, so they're not cheap. Then, you're going to want to equip the Chocobo Lure Materia and battle around until you come across a Lv16 Chocobo.

You'll know if it's a Lv16 or a Lv13 without having to use Sense simply by the companions it keeps; If it is accompanied by either two Levrikons or two Elfadunks then it's Lv16. If you see any other enemies with it then it's a Lv13. Throw the Mimett Green immediately, once the Chocobo is fed cast L4 Suicide. If done correctly, the Chocobo will retaliate with the move Chocobuckle. Congrats! You've just acquired the most useless Enemy Skill in the game!

Now, back to the quest, it's time to learn a much more worth-while Enemy Skill; Beta! Bear in mind that we will be returning to this area shortly on in the game, and when we do we'll have a second Enemy Skill Materia to learn Beta on, so you could just wait until then. Or grab it now. It's up to you.

NOTE - Beta is a ridiculously over-powered move, and will make an easy game even easier. I suggest refraining from Beta-spamming your way through your play-through; it'll take all of the fun out of it!

Still want to learn Beta? Here's how:

1) Make sure to have unlocked Red XIII's 1-2 Limit Break, Lunatic High.

2) Make a party consisting of Cloud, Barret and Red XIII, then fill their Limit Breaks up all the way.

3) Give everyone Tranquilizers to inflict them with Sadness. If you don't have any Tranquilizers then the Elfadunk can inflict Sadness on you.

4) Slow the battle speed right down. This is a good tip for any hard boss battle.

5) Put everyone in the back row.

6) Now set up the following:

1) Cloud - Lv 16 (Back)

    Hardedge   - All=Restore, Poison, Steal
    Carbon Bangle - Lightning, Ice, Heal
    Protect Vest

2) Red XIII - Lv 16 (Back)

    Mythril Clip   - All=Restore, Enemy Skill
    Carbon Bangle - Elemental=Fire, Sense
    Talisman

3) Barret - Lv 15 (Back)

    Atomic Scissors - All=Ice, Earth, Lightning
    Carbon Bangle   - Fire, Steal, Choco/Mog

The reason I've chosen Red XIII to be the Enemy Skill bearer is not only because he has the highest amount of HP, but also because he has one of the highest Spirit stats (2nd to Aeris, who doesn't have enough HP to withstand Beta). Accompanied by the fact that he has the Talisman, Elemental=Fire in is armour, along with Sadness (which reduces all damage taken by 30%) he should be able to withstand Beta!

Now, heal yourself using the Restore Materia (don't use the Inn at the Chocobo Ranch, or you'll clear the Sadness status), then save the game. It's time for the hardest boss battle yet!

NOTES - In order to successfully learn Beta, you must first make sure that the Enemy Skill bearer has survived the attack itself. You must also make sure to actually win the battle. The Midgar Zolom will 'flick' one of the players out of battle, and if that person happens to be the Enemy Skill bearer, then you'll have to battle it again I'm afraid (even if the character was able to learn the move).

- If there was ever a time to make use of your Hi-Potions, Elixir or Megalixir then now would be that time!

* have attacked it out of battle (the move | --------GIL: | 400----- | *
* itself is called Blown Away). This player is | ------MORPH: | X-Potion | *
* then regarded to have fled from battle, and if | ENEMY SKILL: | BETA---- | *
* the remaining two players are then KO'd, you |_____| *
* would return to the world map as opposed to *
* meeting a game-over screen. Once the Zolom's HP reaches 1500, it'll cast *
* Beta as a counter attack, which it can only do once per battle. At any *
* point during the battle after it has stood up, it may flick a player out *
* of battle (at random), however the chances of it doing so increase after *
* Beta has been cast. It will not use Blown Away more than twice per battle, *
* and if it does use Blown Away prior to its health being knocked below 50%, *
* it'll not use the move as a Counter Attack as its HP falls below 2000. *
* *
* NOTES - This can be a dangerous strategy, but if you are brave then you *
* could cast a Loco Weed on your characters to inflict the Status *
* 'Confusion' upon them (provided you were able to obtain one from *
* the Hammer Blaster earlier on). After selecting the command, but *
* before the item has been used, make sure to have another *
* character use a Hyper. If you're lucky, when that character *
* becomes confused the Hyper will be cast on the Midgar Zolom, *
* thereby reducing its accuracy by 30%! This can be tricky because *
* you then need to inflict physical damage on a character to negate *
* the effects of Confusion, and things could get messy in that *
* time. Thank BrutalAl for this Zolom tip! *
* *
* - If Beta is cast, and it misses the target who is wearing the *
* Enemy Skill Materia, then the move will still be learnt. *
* *
* As soon as the battle begins you're going to want to cast Lunatic High, *
* followed by Sense. If you had obtained 2 Graviballs as previously advised, *
* then now would be the time to use them, as doing so will drop its health *
* down to 2250. You can then have Barret use his Limit Break and/or cast *
* Choco/Mog to bring its health down to 2000, thereby triggering Blown Away. *
* If you hadn't acquired any Graviballs earlier, then I'm sure you'll be *
* able to chip at its health however you see fit (Poison works really well *
* here). Just make sure that Barret is the one to bring its HP past 2000. *
* *
* NOTE - Casting a Summon will unlock the Fledging Summoner Trophy for the *
* PS4 players (or as Sony would rather me refer to them as - 'the *
* players'). *
* *
* Now try to inflict the Zolom with Poison if he hasn't already been *
* poisoned, and *make sure* that Red XIII is at full health as the Zolom's *
* HP drops below 1500, as it'll use Beta as a counter attack. Beta isn't *
* considered as a turn for the Zolom, so it'll usually follow on to use its *
* Bite attack after casting Beta, which could easily kill Red if you're not *
* careful. Now it's just a case of trying to revive Cloud whilst not being *
* caught in a revive-die-revive-die loop (use your Megalixir if you have *
* to), once both players have fully recovered you should be able to take *
* care of the snake by using Lightning and Bio. The biggest concern now is *
* Blown Away, as every three or four turns it'll have a 25% chance of *
* casting it, and if Red happens to be the one that gets flicked, you'll *
* have to try all over again! *
* *
%^^^

Time to catch yourself a Chocobo. Equip the Chocobo Lure Materia and then battle around until you hear the funky music. Then, cast a Gysahl green on the Chocobo (be quick) and defeat the foes whilst the Chocobo is grazing. Once the enemies have been defeated and it's just you and the Chocobo left, you'll have captured it, meaning that you can ride around on the back of a Chocobo, battle free! Just note that when you get off your Chocobo it'll run off, and you'll have to catch another one should you want one. Note - if you're quick and strong enough you don't actually have to use a Green. Remember this for later.

Make your way across the swamp avoiding the Solid Snake (or more accurately, Midgar Zolom) to the other side. Note that once you have jumped off your Chocobo, you won't be able to return to the Chocobo Ranch or Kalm again until much later on in the disc.

NOTE - If you had decided to skip out Kalm altogether, when you go to disembark from your Chocobo, it would not run away; instead Cloud will remark that he may have forgotten something, and will ask the Chocobo to hang around. When you enter the Mythril Mines your party stops you from venturing further.

¬¬¬

After witnessing the might of Sephiroth, you'll be able to set foot inside the Mythril Mines. My load out looks a little like this:

1) Cloud - Lv 17 (Front)

    Hardedge   - All=Restore, Sense Steal
    Carbon Bangle - Ice, Poison, Heal

2) Aeris - Lv 14 (Front)

    Striking Staff - Ice, Fire, Sense, Enemy Skill
    Carbon Bangle - All=Fire, Lightning
    Talisman

3) Red XIII - Lv 16 (Front)

    Mythril Clip - Elemental=Choco/Mog, Restore
    Carbon Bangle - All=Earth, Steal
    Protect Vest

Red XIII will now do additional damage to the Ark Dragons who are weak against Wind. Head right first, and in the adjoining screen climb the vine that you see on your left and GRAB THAT MATERIA! the [LONG RANGE MATERIA]. Bear in mind that the Mythril Mines are re-visitable.

NOTE - The Long Range Materia acts as if you had equipped a long ranged weapon onto someone. This also applies against flying creatures that normally only Barret etc. would be able to hit.

Make sure to steal a Grand Glove from the Madouge and to learn the Enemy Skill Flame Thrower from the Ark Dragon (aswell as stealing Ethers) here. Head back down the vine and grab the green [ETHER] on the floor on the right and the [TENT] from the chest up the stairs.

] SIDE NOTE - OUR MATERIA LEVELS UP! [

] It is always around this point in the game where my first Materia will [
] level itself up - the All Materia. We can now use the paired spell twice [
] during battle! Leveling up Materia is crucial to advancing in the game, [
] pretty soon we're going to see what our upgraded versions of Bolt, Fire & [
] Ice look will like. When a Materia levels up all the way ('Mastered'), it [
] will spring fourth a brand new little baby Materia. [

] NOTE - The All Materia requires the least amount of AP to master compared [
]   to most other Materias, and given that it sells for a whopping [
]   1.4 Million gil, it is definitely worth considering mastering as [
]   many of these as possible! [

Head back to the previous screen and head all the way south east to find a chest containing a [MIND SOURCE]. Then head west to the next screen to bump into some people we'd really rather not bump into.

Once we've met the new recruit, head north first to an area containing a chest with an [ELIXIR] inside as you enter, and a blue [HI-POTION] to the right. Now head back, up the vines and out the exit to the World Map.

NOTE - The Mythril Mines are a great place to do some Limit Leveling, but I'd hold fire for now, as the forests just up ahead are better in my opinion, but only slightly.

--D1.08 C - Fort Condor ("It seems the Shinra doesn't like the idea of having a condor on top of the reactor.")

NOTE ON ENEMIES:

We won't be able to learn White Wind just yet because the Zemzelett must be manipulated in order for him to cast the move on us, and we don't currently have the Manipulate Materia. Also, the Zemzelett can sometimes fly, meaning only long range weapons can harm him. This could hinder your Elemental=Choco/Mog combo.

Avoid having a quake combo, and make sure to steal a Boomerang from the Formula. These sell for 700 gil each, so stock up on a few. Elemental=Choco/Mog is one effective way of dealing with them, L4 Suicide is another.

The Capparwire can be found in groups of 5 when training in the forest area, making this a great place to stop and Limit Break train for a while. They can all be taken out with one Matra Magic Blast.

The Mystery Ninja is actually a recruit-able character, and although she doesn't have to be recruited just yet it is advisable to recruit her as soon as possible. Why? No reason. I just like to have her as early as she is available. Note that her stats are variable depending on Cloud's current level. If you are a much higher level to the level I currently am with Cloud (Lv17), then expect her stats to increase. Details on how to

| recruit her below. She has a 12.5% encounter rate chance. |
+---+

--Required gil - 4000 (Reserve)
--Extra - Carbon Bangle (recruit equipment), Throw Materia (recruit equipment)
Fort Condor Battle #1 - Magic Comb

Just west of us is Junon, our next destination. Before heading over, there are a few things to do first. Make your way your way south-west to a weird looking structure that is actually a huge bird on top of a reactor (Best Bromance - make a party of Barret and Red XIII, no need to swap equipment/Materia)!

As you enter you'll have to agree to lend a helping hand if you want to step inside. Once inside, climb the long ladder rope and talk to the guy sitting down. Once you've agreed to help him (Best Bromance - choose option 1, "I guess so", followed by option 1, "All right"), you'll now have access to the save point and the beds just below. And, you can sleep for free aswell!

Head up the ladder on the right hand side for the Item Shop and the Materia Shop. *Make sure* to save 4000 gil before deciding to spend frivolously; you won't be able to take part in the optional battle otherwise! Stock up on Hypers, Tranquilizers, and Phoenix Downs. 10 of each should be enough. If you really wanted to you could buy one more Fire, Ice, Lightning and/or Restore to complete 3 sets of 'basic' Materia, but I don't think it's necessary; I'm not bothering. Plus, as mentioned, you'll need to save 4000 gil as a reserve.

Now head back down the rope ladder and up the ladder to the left. Follow the stairs up, it's time to take part in an optional Mini-Game! If you don't fancy doing these for whatever reason then I suggest you at least consider doing 7 of them due to the prizes that are up for grabs, or at the very least 2.

SIDE NOTE - THE 'FORT CONDOR BATTLE' MINI-GAME

These Mini-Games are completely optional, and while most of the prizes are fairly boring, some of them are worth getting. After finishing one battle, you will have to wait until you have progressed to a certain trigger point in the main story before you can return to complete the next battle sequence.

NOTE - If you miss a battle then the prize you would've won will still be available on your next battle, it's the final prize that you'll be missing out on (if that makes sense). If you complete the first battle for the Magic comb and don't comeback until say, battle eight then you'll still receive the prize for the 2nd battle, the Peace Ring (which is a must have).

Here are the prizes you can win in the order that you win them:

1.) Magic Comb (Weapon for Red XIII)
2.) Peace Ring (VERY useful accessory)
3.) Ether (even though it'll say Trincture)
4.) Megalixir
5.) 5 x Potions (Glitch - you actually get 5 x Hi-Potions)
6.) 5 x Potions (Glitch - you actually get 5 x Hi-Potions)
7.) Superball (Weapon for Yuffie)

] 8.) 3 x Turbo Ethers [
] 9.) 3 x Turbo Ethers [
] 10.) 5 x X-Potions (although the game will indicate otherwise) [
] 11.) 5 x X-Potions (although the game will indicate otherwise) [
] 12.) 5 x X-Potions (although the game will indicate otherwise) [
] 13.) 3 x Elixirs [
] 14.) 3 x Elixirs [
] [
] There is also one final compulsory battle in which you will be rewarded [
] with the Phoenix Materia. Apart from this last battle, you will need 4000 [
] gil in your wallet to play this game. It won't cost you 4000 however, you [
] just need it in your pocket as reserve. [
] [
] Strategy: [
] [
] It's basically a Point-and-Click strategy type game, it's not too [
] complicated to work out and you really will get the hang of it just by [
] playing it. All I need to say for now is think of it as a rock paper [
] scissors type strategy: [
] [
] 440 gil - Attackers - Beats Beast [
] Loses to Barbarian [
] [
] 440 gil - Defender - Beats Barbarian [
] Loses to Wyvern [
] [
] 520 gil - Shooter - Beats Wyvern [
] Loses to Beast [
] [
] Set up 2/3 groups of each type in clusters as far down the hill as you are [
] able to. Once the battle has started, press R1 a couple of times to speed [
] up the battle, then move your units in to play according to which type of [
] enemy shows. You'll get the hang of it. When the big boss appears at the [
] end have everyone jump him, and don't let an enemy slip by you, keep the [
] bunker covered at all times. [
] [
] NOTE - I'll update you with strategy tips as you play it more. [
] [
] If there are any surviving units on the field after the battle has [
] finished then 200 gil per unit will be refunded back to you, meaning that [
] once you really get the hang of the strategy you'll be able to defeat the [
] Shinra fairly cheaply. [
] [
] If the enemies make it to the bunker then you will have to fight the boss, [
] the CMD. Grand Horn. You will not win the prize if this happens, you must [
] be victorious if you wish to claim the goodies. If you lose any of the [
] first four battles you'll have to fight the CMD. Grand Horn Lv19, after [
] that it'll be the CMD. Grand Horn Lv25. The final battle would throw you [
] the CMD. Grand Horn Lv37: [
] [
] #~~~

] > ----DROP: [---Vagyrisk Claw] [----------------] [--Imperial Guard] < [
] #~~~~~~# [
] [
] I will make you aware of every-time a new battle is available and the [
] prize that is up for grabs. For now, the prize is the Magic Comb, a Weapon [
] for Red XIII that has DOUBLE GROWTH, meaning any Materia you put on it [
] will earn double the AP! Whack Heal on there, now! [
] [
] For a much more detailed guide see section E.06. [
]_____[

NOTE - The Vagyrisk Claw is a very elusive item to obtain, and it is very worth while considering purposely losing one of the first few battles as to fight the CMD. Grand Horn Lv 19 to obtain one from them.

Once you've finished up at Fort Condor it is now time to recruit an optional character, Yuffie! To recruit her you must first defeat her, you'll find her wandering in the forest area on your way to Junon. You may encounter her in the first battle, it may be the 10th (she has a 1/8 chance of appearing)!. You ARE going to want to work on Aeris's Limits here, the Capparwire comes in groups of 5!

_____
] [
] SIDE NOTE - LIMIT BREAK TRAINING No.4 - Junon Area and the Capparwire [
] [
] This is it folks, the first of two great training spots of the game, the [
] Junon Area forests. You'll be able to fight 5 x Capparwire here whilst at [
] the same time obtaining a new character, Yuffie. When you do engage the [
] Mystery Ninja, make sure to have read the section below to find out how to [
] recruit her. You're also going to want to steal as many Boomerangs as [
] possible from the Formulas as these sell for 700 gil each! [
] [
] Try to get Aeris's 2-2 Fury Brand up as soon as possible; the ability to [
] instantly fill up the other 2 players Limit gauge is key to flying through [
] at least the first stage of your character's Limit Levels. Be mindful of [
] her 2-1 though, as it will cure your party members of their Fury Statuses. [
] Make sure to have stocked up on Hypers, Tranquilizers & Phoenix Downs. Use [
] Cloud's All=Restore Combo outside of battle to keep yourselves healed, [
] and should you need to obtain a few Ethers you can steal them from [
] Capparwire. [
] [
] The most important thing here is to remember not to overdo it, as you [
] could be in danger of becoming too over-powered otherwise. Try not to let [
] Cloud get past Lv 20. Also, feel free to revisit the northern cavern of [
] the Mythril Mine if you like, it's almost as good as the forests, plus I [
] kinda like the music there as it reminds me of what's to come. Along the [
] way you should start to level up quite a few pieces of Materia; it's not [
] just about Limits! Lastly, don't forget to manually set the Limit's when [
] your characters level up, it's very easily forgotten. [
]_____[

TIP - Remember to try out variations of battle strategies - you can try having one attacking, one defending and one acting passively, or you could try Physical attacker, Magical attacker and defender...

_____
] [
] SIDE NOTE - OBTAINING YUFFIE [
] [
] Yuffie can be obtained at almost any area on the World Map where there is [
] forest, and the longer you wait to find her the more likely she is to [

] appear. Meaning, that at this stage in the game we may have to battle for [
] a little while before we get a chance to destroy her. Also note that when [
] Cloud reaches a certain Level Yuffie's level will increase also, so her [
] above stats might not be entirely accurate. [
] [
] Once Yuffie has been defeated you will be taken to a non-World Map screen. [
] DO NOT use the save point, Yuffie will mug you otherwise. In fact, don't [
] even open the Menus. Choose the following dialogue options to recruit [
] Yuffie (any deviation will result in having to battle her again and a loss [
] of gil): [
] [
] 1) “Not Interested.” (2) [
] 2) “.....Petrified.” (1) [
] 3) “Wait a Second!” (2) [
] 4) “....That's right” (1) [
] 5) “Let's hurry on.” (2) [
] [
] If done correctly you will be able to name [YUFFIE], then she will become [
] a member of your team! There are many other areas in which to obtain [
] Yuffie, for a full run down see section E.07. [
] [
] NOTES - When you obtain Yuffie you'll unlock the Shuriken Join Us Trophy. [
] [
] - There is an exploit that can be performed here. Search for [
] 'Yuffie Warping' for more info. [
]_____[

YUFFIE KISARAGI

1-1 GREASED LIGHTNING (default)	2-1 LANDSCAPER (64 kills)
Attacks opponent with weapon after cutting them	Attacks all opponents
1-2 CLEAR TRANQUIL (use 1-1 8 times)	2-2 BLOOD FEST (use 2-1 7 times)
Restores HP of all allies	Continuously attacks all opponents
3-1 GAUNTLET (128 kills)	4 - ALL CREATION
Attacks all opponents	Attacks all opponents
3-2 DOOM OF THE LIVING (use 3-1 6 times)	Use the item All Creation Found on Disc 1 in Wutai after completing the Pagoda Challenge.
Continuously attacks all opponents	

So, You've obtained Yuffie, you're content with your Limit Levels and now

you're ready to continue with the game. Here is what my players looked like by the time I was ready to continue:

```
    Cloud: Lv 19 Limit 2-1 Blade Beam
   Barret: Lv 17 Limit 2-2 Hammerblow
     Tifa: Lv 18 Limit 1-2 Somersault
    Aeris: Lv 17 Limit 2-2 Fury Brand
 Red XIII: Lv 18 Limit 1-2 Lunatic High
   Yuffie: Lv 18 Limit 1-2 Clear Tranquil
```

Before heading to Junon, consider the following set-up for the Boss battle. This boss is a flying creature which is why I have Barret and Yuffie, they are the only characters that can use Attacks on this beast with their long range weapons. And just in case you hadn't noticed by now, nearly all flying creatures are weak against Wind and strong against Earth.

1) Cloud - Lv 19 (Back)

```
    Hardedge      - All=Restores, Enemy Skill, Sense
    Carbon Bangle - Lightning, Poison, Long Range
    Protect Vest
```

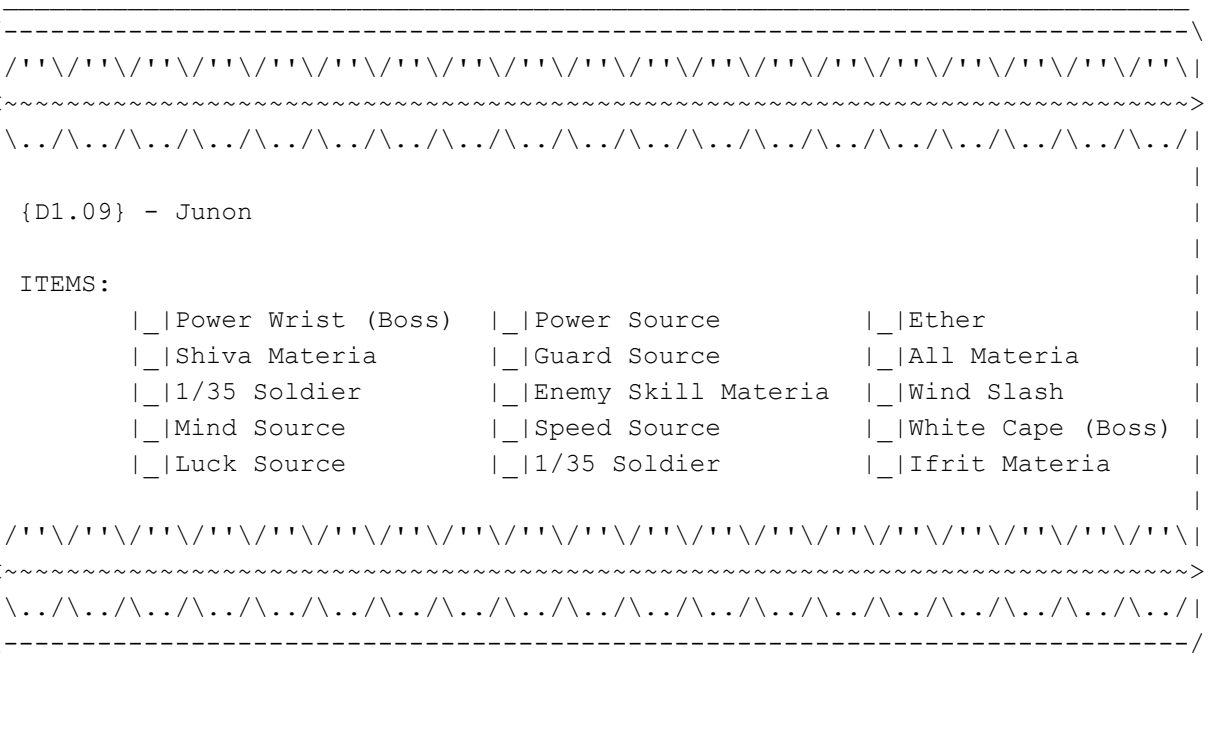
2) Yuffie - Lv 18 (Back)

```
    Boomerang     - Elemental=Choco/Mog, Heal, Ice
    Carbon Bangle - Lightning, Fire, Steal
    Talisman
```

3) Barret - Lv 17 (Back)

```
    Assault Gun   - All=Restore
    Carbon Bangle - All=Ice, Sense
```

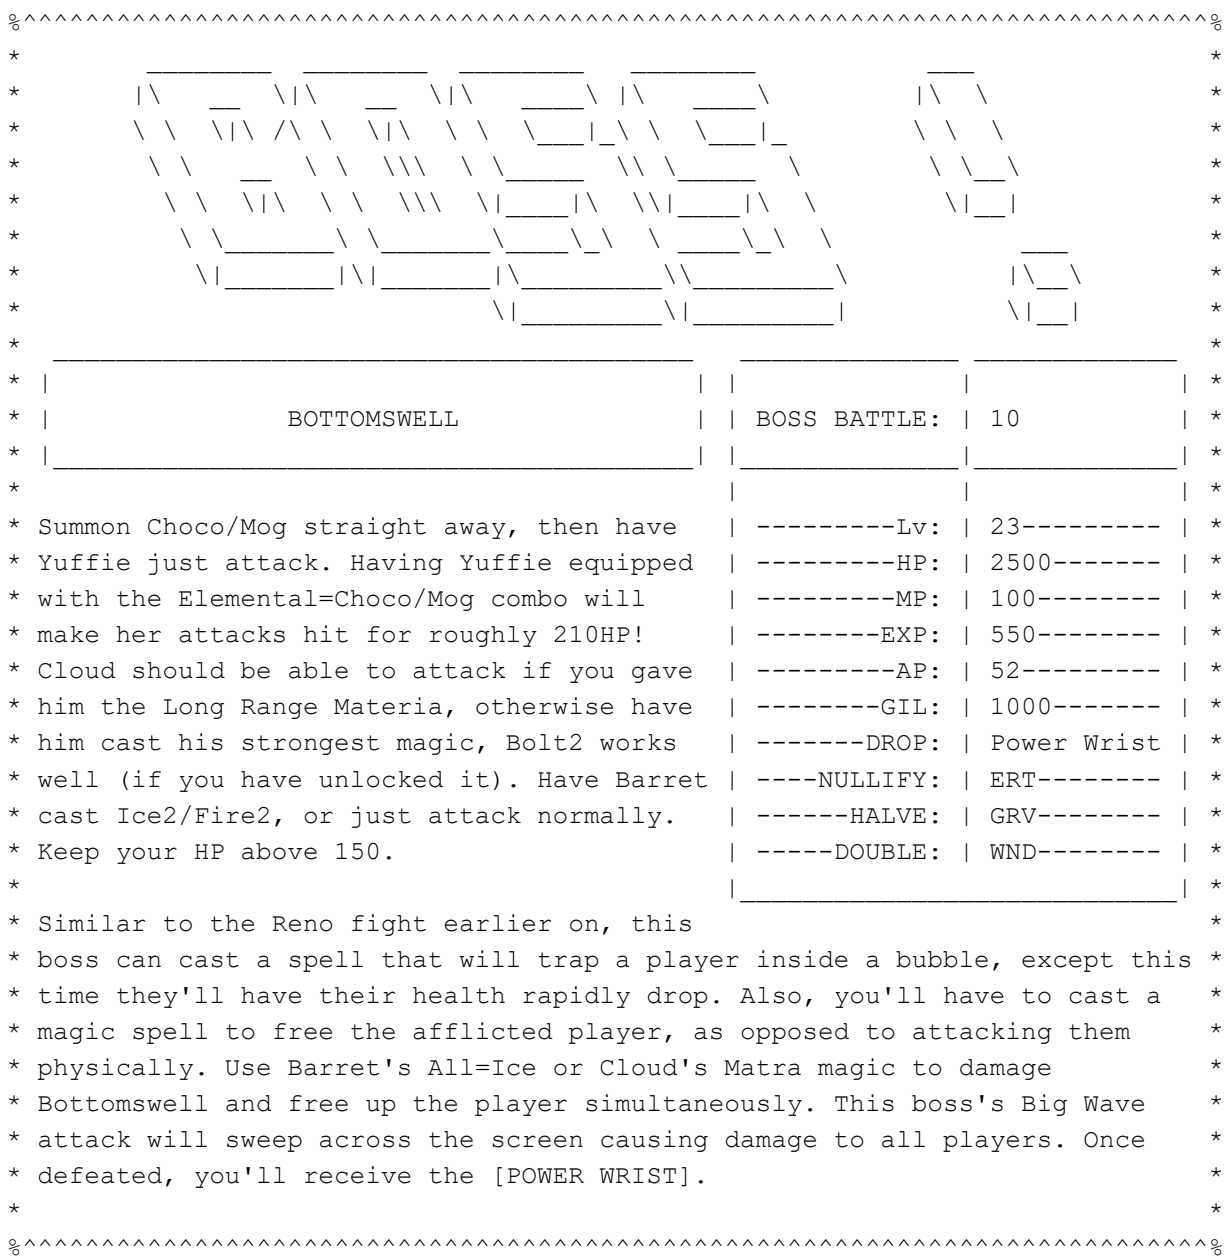
NOTE - We've now reached a stage in the game I feel where we can start putting our Long Ranged characters in the back row, if you haven't already. Also, once we have obtained the 2nd Enemy Skill Materia and the Manipulate Materia we will be heading back to this area to obtain a few things.



--D1.09 A - Junon Harbour ("Why don't you try asking Tifa?")

--Items - Power Wrist, Shiva Materia
--Boss - Bottomswell Lv 23 (Power Wrist)
--Extra - Shiva Materia
Fort Condor Battle #2 - Peace Ring
Fort Condor Battle #3 - 3x Ethers

Junon Harbour can be found on the far west of the continent. Bring up the mini-map if you're struggling to find it, or alternatively look in section F.01 for a map of the continent. Once you've arrived you can look around if you like but there's not much to see. Head west down to the beach area and talk to the girl there.



After the battle you'll have to partake a really boring and pointless mini-game that involves pressing Square.... then pressing Square again roughly 10 seconds later. Repeat about 6 times.

Once you've finished reviving Priscilla, head back to town and into the southern house after talking to the NPC outside. After choosing to rest, then hearing the (mysterious voice) once more, you'll be beckoned by Tifa to see

what's going on outside.

Head up the flight of stairs that all of your comrades are gathered by to talk to Priscilla. She will be so thankful that you rescued her that she will give you the [SHIVA MATERIA], a Summon that is best used paired with Elemental to give ourselves Ice based attacks.

```
 _____________________________________________________________________________
]                                                                             [
] SIDE NOTE - FORT CONDOR BATTLE No.2                                         [
]                                                                             [
] Make your way back over to Fort Condor should you wish to receive a [PEACE [
] RING]. I highly suggest that you obtain this, even if you don't plan on     [
] completing anymore Fort Condor battles. You must do this before stepping    [
] into the water with Mr Dolphin. Also, make sure to equip Cloud with the     [
] Power Wrist as he'll be running back on his own.                            [
]                                                                             [
]  NOTES - The Peace Ring is slightly glitched in the PSX NTSC version. It    [
]          will read 'Protects against [Berserk/Fury/Sadness]' but it will    [
]          also protect you from Confusion, and it's the Confusion Status     [
]          that we really need protecting from later on in the game. If you   [
]          wish to confirm this for yourself then equip the Peace Ring and    [
]          go into Status to view your Status immunities.                     [
]                                                                             [
]        - If you missed this battle, then you'll still be able to get the    [
]          Peace Ring the next time you partake in a battle.                  [
]_____________________________________________________________________________[
```

After everyone has finished spurring Cloud on head back to the beach to go swimming with Mr Dolphin. This can be rather tricky if you don't know what you're doing, luckily you're reading a walkthrough so you shouldn't really struggle. Unless I decide not to tell you. Hmmmmmm.

```
 _____________________________________________________________________________
]                                                                             [
] SIDE NOTE - FORT CONDOR BATTLE No.3                                         [
]                                                                             [
] This time your reward will be an Ether, even though the game will tell you [
] that you have received a 'Tincture'. You must complete this after getting   [
] in the water with Mr Dolphin but before jumping up onto the beam.           [
]                                                                             [
] Remember that the Vagyrisk Claw is extremely difficult to come by, and if   [
] wish to obtain one you must fight the CMD. Grand Horn before four battles   [
] have taken place.                                                           [
]                                                                             [
]  Strategy Update - You'll have to fight more Shinra troops this time, so    [
]   it may be advisable to slow down the speed gauge then speed it back up    [
]   accordingly to the situation. Go all out on the offensive, as soon as     [
]   you see an enemy appear send your troops out to them, don't wait for      [
]   them to come to you. Remember - If you see a beast send an Attacker, if   [
]   you see a Barbarian send a Defender and if you see a Wyvern send a        [
]   Shooter. Lastly, your troops will auto-attack the enemy, you don't have   [
]   to keep commanding them to attack each turn.                              [
]_____________________________________________________________________________[
```

Once you've made it onto the beam (It was the very southern part of the screen, near the centre btw), climb up the ladder to the left to see a nice FMV of the Highwind!

¬¬¬

configuration.

Now it' time to do a bit of shopping! Save if you wish and head back into Upper Junon. I'll number bullet point each shop , 1 being the first shop we encounter:

1) Materia Shop. Talk to the guy outside to enter, and buy from him a Seal Materia (3000 gil) and a Revive Materia (3000 gil). You'll want to start Leveling up Revive straight away. When a player is KO'd, remember that you can use Revive outside of battle under the 'Magic' sub-menu.

2) Head into the back alley to enter the Weapon Shop. If you've been following my guide exactly then you should have obtained all but one of the weapons that are available here (Diamond Pin). Buy what you need to buy, and don't forget to sell all of your surplus Boomerangs, I had 4 to sell. There's nothing to do in the basement.

3) Item Shop. Make sure to stock up on a few Phoenix Downs, Hypers & Tranquilizers here. If you can afford it try to stock up on a few tents aswell, I left with 4.

4) First head up the stairs and look around for a [1/35 SOLDIER] (does nothing), a [MIND SOURCE] and a [LUCK SOURCE]. Then head to the top floor for a [POWER SOURCE] and a [GUARD SOURCE].

   Now head back down to the ground floor and talk to the Shinra soldier you see to descend into Beginner's Hall (Intermediate). GRAB THAT MATERIA! Pick up the [ENEMY SKILL MATERIA] on the bottom right, then if you wish to learn more about the games mechanics you can talk to the NPCs here.

    NOTE - If you hadn't obtained the free Potion from the NPC at the beginners hall in Sector 7, then you can obtain it here by talking to the south-most shimmering NPC. You must have 0 Potions in your inventory to obtain it mind, which makes it pretty pointless, but it's handy to know for those looking for a 'perfect game'.

Now head left 4 screens until you come to Lower Junon, ignoring the T fork along the way. You could talk to the guy at the end of the T fork if you wanted to find out that the Service lift to the underwater Mako Reactor is out of service. Note that you won't need to equip the second Enemy Skill until you get a bit further ahead in the story.

 NOTE - When you enter the west side of Junon for the first time, promptly head left to see all of your comrades in disguise!

 5) Nothing to do in here other than to talk to some acquaintances.

 6) On the ground floor you can rest and save if you like. The second floor is the Materia Shop but isn't as good as the one we previously visited, and the top floor is the Accessory shop. Only if you've got the cash would I suggest buying the Silver Glasses and the Headband for 3000 gil each, they will help a little bit later on.

 7) On the ground floor you'll find a [SPEED SOURCE], and on the second floor you'll find a [1/35 SOLDIER].

 8) Weapon Shop. Not even worth visiting.

Now head back to 6) and save your game, we're about to take part in the aforementioned mini-game. Head all the way to the west to the docks to give

Rufus one hell of a send-off (possible exaggeration).

```
 _____________________________________________________________________________
]                                                                             [
] SIDE NOTE - RUFUS SEND OFF MINI GAME                                        [
]                                                                             [
] This one is much more simple to explain than the previous mini-game. This   [
] time all we must do is press certain buttons as we are instructed to press  [
] them. It really couldn't be more simple. Just bear in mind that the 2nd     [
] prize is actually the best prize:                                           [
]                                                                             [
]    0-50 - Silver Glasses                                                    [
]   60-90 - HP Plus Materia                                                   [
]    100+ - Force Stealer                                                     [
]                                                                             [
]  The Force Stealer is a weapon for Cloud that has Double Growth stats and  [
]  can be purchased very shortly on in the game for 2200 gil.                 [
]                                                                             [
]  The HP Plus Materia will give you 10% extra HP which will increase by 10% [
]  every time it levels up, meaning that we want to start Leveling it up     [
]  now. Also, it won't be available until later on in the game (Cosmo         [
]  Canyon) and will cost 8000 gil.                                           [
]                                                                             [
] It really is a no brainer, purposely mess up a few commands so that you     [
] keep the 'mood' below 100. Unless of course you're not bothered by the      [
] extra HP and you'd rather start getting some Double AP from the Force       [
] Stealer. Remember that if you'd completed the first Fort Condor mission     [
] then you'll already have a Double growth weapon for Red XIII, the Magic     [
] Comb.                                                                       [
]                                                                             [
]  NOTE - Once the game has finished you can make Cloud do some rather funny [
]         poses!                                                              [
]_____________________________________________________________________________[
```

After the mini-game has finished Heidegger will reward you with your prize. There's nothing left to do now other than to head into the cargo ship (notice Red XIII hiding in the background).

```
¬¬¬
```

| Suicide. Steal Ethers from the Scrutin Eye, also. |
+---+

--Items - Ether, All Materia, Wind Slash, Ifrit Materia
--Boss - Jenova-BIRTH Lv 25 (White Cape)

Open the chest you see on your left for an [ETHER]. You won't be able to grab the All Materia that you see because it is blocked by none other than Yuffie (if you'd recruited her)! You can talk to all of your comrades here to affect their feelings towards you, although they'll be in disguise (Best Bromance - When talking to Yuffie, select option 2, “Nope”, when talking to Aeris select option 2, “I dunno...”, and when talking to Tifa select option 2, “I don't know”. Make sure to engage in these optional conversations).

Head upstairs and chat to the people on board, you'll eventually find Red XIII by the save point. There will be a man on the lower left side that is blocking our way for now. After talking to Red XIII head back down to the lower deck to talk to Aeris again. When you check upstairs again you'll find that the man blocking our path has disappeared.

After a small amount of commotion you'll be able to pick your team again. First choose the same team that you had going into Junon Harbour (Barret & Yuffie) and remove their Armours and Accessories. Then speak to one of the characters that you didn't choose to re-assign your party again. I chose Tifa and Red XIII for the following Boss Battle:

1) Cloud - Lv 20 (Back)

    Hardedge   - All=Restore, Steal, Shiva
    Carbon Bangle - All=Lightning, Long Range (The All is obtained shortly)
    Headband

2) Tifa - Lv 18 (Front)

    Grand Glove   - Elemental=Choco/Mog, Restore, Enemy Skill
    Carbon Bangle - All=Ice, HP Plus
    Silver Glasses

3) Red XIII - Lv 18 (Front)

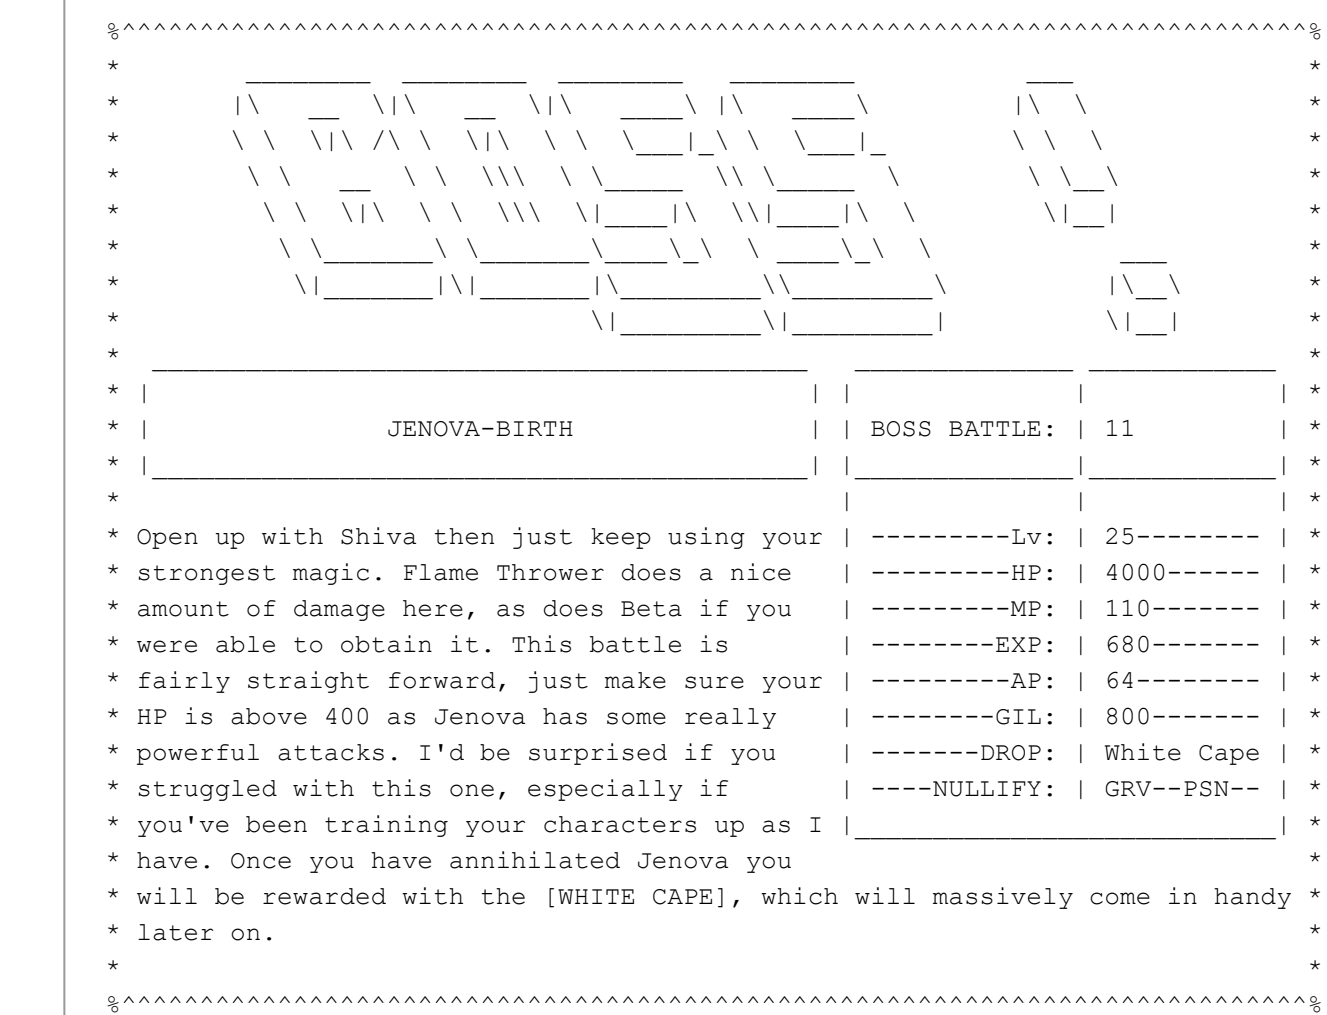
    Magic Comb   - Revive, Heal, Steal
    Carbon Bangle - All=Fire, Sense
    Power Wrist

You can talk to one of the crew on the top deck here to shop for Potions & Phoenix Downs and also to restore your HP/MP for 250 gil. When you are set up head back to the lower decks (you'll now encounter enemies) and grab the [ALL MATERIA] that was previously blocked by Yuffie (or not). Equip this to Cloud if you're going with my advised set-up, then head through the previously blocked door to the north.

Use the Seal Materia to send the Marine to sleep then steal a few Shinra Betas from them; a piece of Armour that has 4 Materia slots but weak Magic Defence. Equip them if you want and then fill up your new slots with Materia as to keep them Leveling up. You can also get some easy Ether steals from the Scrutin Eye.

Before talking to the Red Captain, head up the ladder and follow the cat walk round to a chest containing the [WIND SLASH], a weapon for Yuffie that has

Double Growth! Then make your way back around and down the ladder. Make sure you have stolen a few Shinra Betas before continuing, then heal up then talk the Captain to engage in a Boss Battle with an abnormal sound track!



After the Battle has finished you will have the option to let Cloud explain the story to date. Before leaving, GRAB THAT MATERIA! the [IFRIT MATERIA], then head out of the Control room to finally arrive at Costa Del Sol. If you missed Ifrit here then you *won't* get another opportunity to obtain it. (Did anyone else notice that Sephiroth's speech boxes had no name above them? Strange...)

{D1.10} - Costa Del Sol & Mt. Corel

ITEMS:

|_|Power Source	|_|Star Pendant	|_|Tent
|_|Fire Ring	|_|Turbo Ether	|_|Mind Source
|_|Motor Drive	|_|Transform Materia	|_|Power Source
|_|Wizard Staff	|_|Phoenix Down x 10	|_|Ether
|_|W Machine Gun		

--D1.10 A - Costa Del Sol ("Have you ever had the feeling something is calling you, or that you had to visit some place?")

ENEMIES:	GRANGALAN	GRANGALAN JR	GRANGALAN JR JR	BEACHPLUG
				**********
------Lv:	[----------16]	[----------15]	[-------------14]	[---------16]

-E-SKILL:	[-------------]	[-------------]	[---------------]	[--BIG GUARD]

NOTE ON ENEMIES:

You won't be able to obtain the Big Guard Enemy Skill until you have obtained the Manipulate Materia. The Grangalan will spawn in the Grangalan Jr, then the Grangalan Jr will spawn in the Grangalan JR JR x 3. They can be quite annoying, try to take out the Grangalan quickly to avoid unnecessary battles. You can only engage the Beachplug on the beach.

--Items - Power Source, Fire Ring, Motor Drive
--Required gil - 1150

When you regain control of Cloud head into the Villa across the bridge. You can talk to the owner here to find out that he is selling the place and will offer to sell it to you for a whopping 300,000 gil! Obviously we can't afford it now, but when we do eventually buy it we will be able to sleep here for free (hardly seems worth it). Head downstairs to rob some items, a [POWER SOURCE], a [FIRE RING], and a [MOTOR DRIVE] which is a Double Growth weapon for Tifa!

NOTE - A few scenes here will play out slightly differently depending on who is and isn't in your party at the minute. Also, you could buy a few Platinum Bangles from the guy in the bar (to the left), or you could wait to steal them a little later on. They do have Double Growth slots, so you may wish to buy a few now to start reaping their rewards..

You can have a look around now if you want, enter the house next to Red XIII (interact with the ball for jokes) and you can talk to (Johnny) once more. Back outside you can talk to the girl behind the counter next to the Inn to buy some Softs. I recommend stocking up on a minimum of 6.

Head down to the beach when you're ready to talk to a certain somebody, then head out of Costa Del Sol to the World Map by heading underneath the bridge in the previous screen. Set yourselves up with whoever you see fit, I'm taking Aeris & Yuffie.

NOTE - We are going to be obtaining our first Lv4 Limit Break item quite soon on - the Great Gospel for Aeris, so she'll be staying in my team for now. I want to get her to Limit Level 3 asap. Here was my set-up heading out:

1) Cloud - Lv 20 (Front)

Hardedge - All=Restore, Earth, Steal
Shinra Beta - All=Lightning, Cover, Cover
Talisman

2) Aeris - Lv 18 (Back)

Striking Staff - Elemental=Choco/Mog, Seal, Enemy Skill
Shinra Beta - All=Poison, HP Plus, Long Range
Power Wrist

3) Yuffie - Lv 19 (Back)

Wind Slash - Revive, Heal, Restore
Shinra Beta - All=Ice, Sense, Steal
Protect Vest

Start making your way south west towards the river then follow the winding path right and then over a bridge until eventually you'll wind up at the entrance to Mt. Corel. Note that whilst crossing the bridge you may encounter the Needle Kiss and/or Cokatolis as noted below.

--D1.10 B - Mt. Corel/North Corel ("Don't waste your time talkin' to that Techno-freak!")

+---------------------------------------------------------------------------+

--Items - Wizard Staff, W Machine Gun, Star Pendant, Turbo Ether, Transform
          Materia, Phoenix Down x 10, Tent, Mind Source, Power Source
```

As you enter you'll see a man sitting by a rock. Talk to him to learn that Sephiroth has passed through this way. As you make your way forward you'll come across another Mako Reactor, it is here that you will encounter the Bagnadrana, so make sure to steal a Diamond Pin from it (steal a few, they sell for 650 gil).

In the next screen along you can make your way around and back to the open area near the reactor if you want, but there really is nothing to do there. Instead, head along the bridge to the next screen to find a save point.

As you progress you will be prompted to press confirm to jump across a gap in the tracks. *Don't jump*. Instead, allow yourself to fall and as you are falling rapidly press confirm whilst holding Left and you will land on the side containing the [WIZARD STAFF] (Double Growth weapon for Aeris). The next time you fall tap confirm and hold Right for the [STAR PENDANT]. There are three of these falls in total so if you do mess one up you will get one extra chance.

Head to the upper tracks first to find a chest containing a Double Growth weapon for Barret, the [W MACHINE GUN]. Then head back down to the lower set of tracks and as you progress you'll be able to double back to pick up the [TURBO ETHER] and the [TRANSFORM MATERIA].

Now head along the upper right path. If you were to take the lower path you could to talk to your team mates to PHS if you wanted. Head along upper the bridge and into the small shack to operate the lower bridge.

NOTE - This screen is probably the best training spot you'll encounter for a while, and offers the best qty of enemies per battle on average, which is great for Limit leveling. Be sure to steal Turbo Ethers from the Search Crowns also.

Before heading back, climb up the side wall that *isn't* indicated with a green arrow. It's just to the south and on the right from where the shack was, and you'll hear chirping when you're in the right place. Here you will have the option to leave or take some treasure. If you take the treasure you will have to fight a Cokatolis. Your companions will dislike you for it but you will receive 10 [PHOENIX DOWN'S] (note that their affection rating isn't affected by this action)!

Now head back to the previous screen and make your way to the lower side of

the tracks. Then head to the right side of the screen and take the left fork, then follow it round to find a well hidden crevice containing a [TENT], [MIND SOURCE] and a [POWER SOURCE].

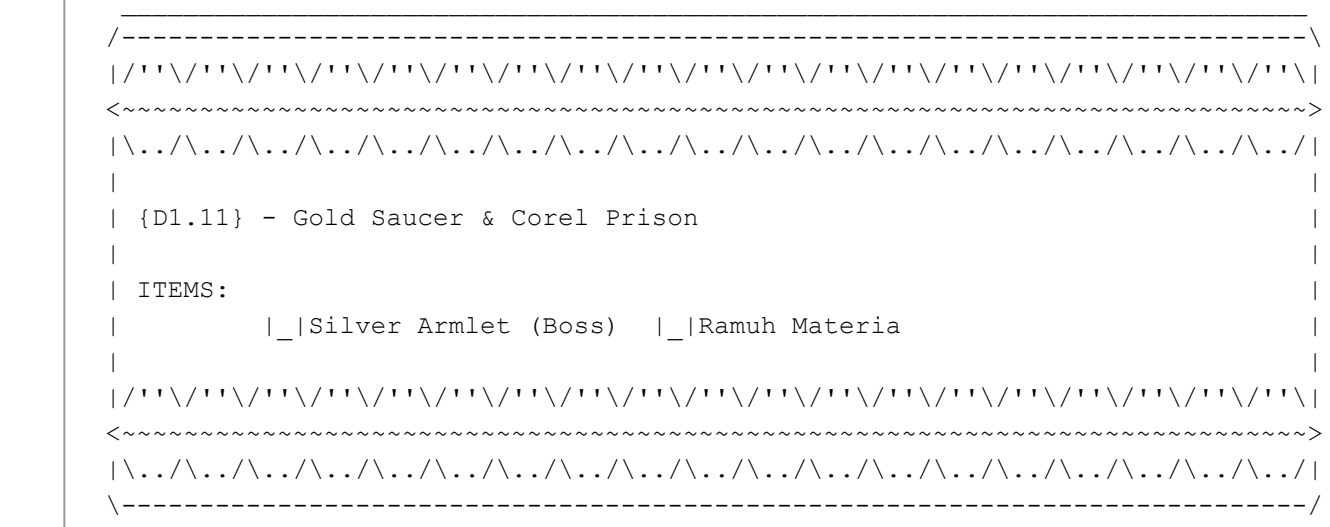
Now make your way back and take the right fork to find yourself on a long bridge. Watch out for the bomb here, he has a suicide move that can do a lot of damage. Try to steal a few Right Arms from them, they will prove invaluable later on. I left with 5. Head south to the other side of the bridge to enter into North Corel.

After a rather rude greeting, we'll be able to talk to the guys behind the counters on the lower left. Here is where we can buy the Force Stealer for Cloud if you didn't win it from Heidegger at the Rufus send-off. Stock up on a few Cornucopias and Maidens Kiss's, and if you like you can sleep for 50 gil on the top level. Feel free to sell any surplus Diamond Pins that you have.

NOTE - Thanks to Absolute Steve for this one. There is an extremely obscure item hidden here that very few know about. Enter the far right house. See the vase on the top right corner? You have to wait for the woman on the left to move, then stand next to her and when she moves again she will walk around you leaving you free to search the vase for an [ETHER].

When you're ready, head outside to the World Map by heading east, then save your game. There's nothing to do out here just yet, so after you've saved head back through North Corel to the left to arrive at the rope-way station to the Gold Saucer. Listen to Barret's story, then hop on the cart for a cool FMV!

NOTE - If you wanted to, you could make your way out to obtain the Aqualung Enemy Skill, but there wouldn't be much need (especially if you had obtained Beta). Aqualung is a powerful Water based attack, and if you were interested in learning it early then skip down to section D1.12 A to learn how (the 'Desert' can be found directly south of North Corel).



--D1.11 A - Gold Saucer ("What you pursue will be yours. But you will lose something dear.")

--Required gil - 3000

--Extra - Silver Armlet (recruit equipment), Manipulate Materia (recruit equipment), Transform Materia (recruit equipment)

Welcome to the Gold Saucer. The entrance fee is 3000 gil, or you can buy a lifetime pass for 30,000 gil. I'm expecting you to not have a spare 30,000 knocking about, so just buy the single pass for now. Note that like many things in the Gold Saucer, you have to pay for the save point using GP. GP being the currency used here and it is obtained either by playing arcade games in the Wonder Square or by winning at the Chocobo Races.

SIDE NOTE - CONVERTING GIL INTO GP EASILY

Very uncommonly you'll see a man standing beside the save point who will convert 100 gil into 1 GP, with a maximum of 100 GP for 10,000 gil. To save any confusion, this man will NOT appear until you are at a certain point on Disc 2. A lot of people tend to waste time here running back and forth from screen to screen trying to make him appear on Disc 1, all in vein.

As you enter into the foyer you'll have some dialogue to read, then Barret'll storm off through the Wonder Square portal. Pick one character that you'd like to accompany you then follow Barret through the giant hole to the Wonder Square (Best Bromance - Speak to Tifa first then choose not to go with her. it doesn't matter who you choose after that, so long as you have declined Tifa first. Only speak to Tifa first if you've been following my guide to the very letter, if you've made a few mistakes then talk to Aeris first and tell her not to go with you).

NOTE - There is a lot to do in the Gold Saucer, and when the time is right I will guide you through to all of the places of interest. For now however this is going to be a relatively short visit.

When we get to the Wonder Square We'll meet a new character [CAIT SITH]. Once he has joined your party you can look at his Materia to see that you have now obtained the Manipulate Materia! Yesss. Feel free to head further into the Wonder Square, there are a number of mini-games to play here. Again, we will be visiting this area more in depth a little later on.

NOTE - If you can master the Super Dunk game now you can save a bit of time later on. Try to save up as much GP as possible, you'll need it for the Battle Square (If you happen to be using an emulator you can quite easily rack up loads of GP very quickly here due to the fact that you'd be able save and load your state. You could also then buy the Golden Ticket from the clerk by the Arm Wrestling machine).

You can (optionally) head over to the Speed Square to speak to the owner of the Gold Saucer to learn a few things about our adversary. Then head over to the Battle Square and after a few scenes have played out you will get thrown down the Gateway To Heaven (why couldn't Cloud have just used Bolt?).

CAIT SITH

1-1 DICE (default)	2-1 SLOTS (40 kills)

Every 10 levels Cait Sith gains, an extra die is added with a maximum of six. The sum of the dice times by the quantity of 'repeat' numbers times by 100 will be the resulting damage total. So, 1,2,2,2,4,6 would be: 17 x 3 x 100 = 5100 damage	Similar to Tifa's Limit only this time it's more like a fruit machine. If all 3 slots are different then Cait Sith will use Toy Box which will cast one of 7 different basic attacks. If all three should match, however:

3 x STARS - The party's HP/MP & Status is fully restored.

3 x CROWNS - Attacks all enemies for heavy damage.

3 x BARS - A random Summon will be used.

3 x MOG - Cait Sith turns into a giant!

3 x HEARTS - Lucky Girl. Every player will have 100% critical hits.

3 x CAIT SITH - All enemies are instantly killed

2 x CAIT SITH 1 x BAR - All allies are instantly killed, Game Over.

--D1.11 B - Corel Prison ("...Don't ever make her....cry....")

NOTE ON ENEMIES:

You'll find Bandits and 2-Faced in the Town area, Land Worms & Cactuars in the main Desert and Bullmotors & Death Claws on your way to the scrapyard. Bandits can Mug you so, disperse of them

> ----DROP: [------Ether] [------Hi-Potion] < quickly. Cactuars have
> -E-SKILL: [MATRA MAGIC] [----------LASER] < enormous amounts of gil but
#~~~~~~# make a very rare appearance
| and can be quite hard to
| kill, L4 Suicide does the trick. Try to manipulate the Land Worm to steal
| a Turbo Ether or two. Make Sure to steal a few Platinum Bangles from the
| Death Claw as it is a piece of armour that has Double Growth! Make sure to
| have both Enemy Skills equipped so you can learn Laser - a move that will
| lessen an opponent's HP by half. You can also learn Matra Magic for your
| second E-Skill. Lastly, try to steal a few X-Potions from the Bullmotor,
| they'll come in handy for later (and are an easy steal).
|
| NOTE - Various sources suggest that one can encounter a Griffon here, not
| to be confused with the Griffin that can be fought it the Cosmo
| area. This is false; there is no Griffon in FF VII.
+---+

--Boss - Dyne Lv 23 (Silver Armlet)

What a terrible judicial system the Gold Saucer has! No trial or nothing!?! Now that we have seen what Barret may be capable of, it's time to find out what his side of the story is. Head south to have a quick moment with the troubled fella, then follow him south to the next screen.

Unless you're planning to use Cait Sith, I suggest removing his Silver Armlet. If you wanted to you could head into the lorry to the south to have a quick chat with Mr Coates about possibly leaving the prison, and you can also rest up in the cab of the truck for free. Head into the south eastern house to buy a few items, and when you're ready to continue head into the larger house just north of the previous one (this happens to be the same house from the flashback).

Now you'll see another flashback that will uncover certain truths to the whole story. Select your 3rd party member then set yourselves up something like this: (Note that you can talk to your other team mates to re-select your party) (Best Bromance - choose Red XIII to accompany you and Barret. *DO NOT* choose Aeris, as she gains a huge boost if you do, and you'll have completely ruined your progress so far)

1) Cloud - Lv 21 (Front)

    Hardedge   - All= Fire, Revive, Heal
    Shinra Beta - All=Restore, Earth, Steal
    Talisman

2) Red XIII - Lv 20 (Back)

    Diamond Pin   - Elemental=Shiva, Seal, Enemy Skill
    Silver Armlet - All=Lightning, Manipulate, Long Range
    Power Wrist

3) Barret - Lv 19 (Front)

    Atomic Scissors - Poison, Restore, HP Plus, Steal
    Shinra Beta   - All=Ice, Enemy Skill, Sense
    Protect Vest

NOTES - Make sure that Barret doesn't have the empty Enemy Skill equipped.

- The southern house has a bar where you can buy a few worthless items. It's not really worth visiting.

Once you're all set make your way north. Here you'll see a well, you can take a look inside if you wish but there's not much to see other than an empty chest. The skeleton that you see here is actually the remains of a the 'Test 0' enemy. This well was basically a testing ground for the Developers, and in the original Japanese version you could still fight these test enemies here; they had extremely high amounts of HP and would not attack. There is also a very weird looking hidden 'Red Man' hiding in the background layers of the graphics. Trivia over.

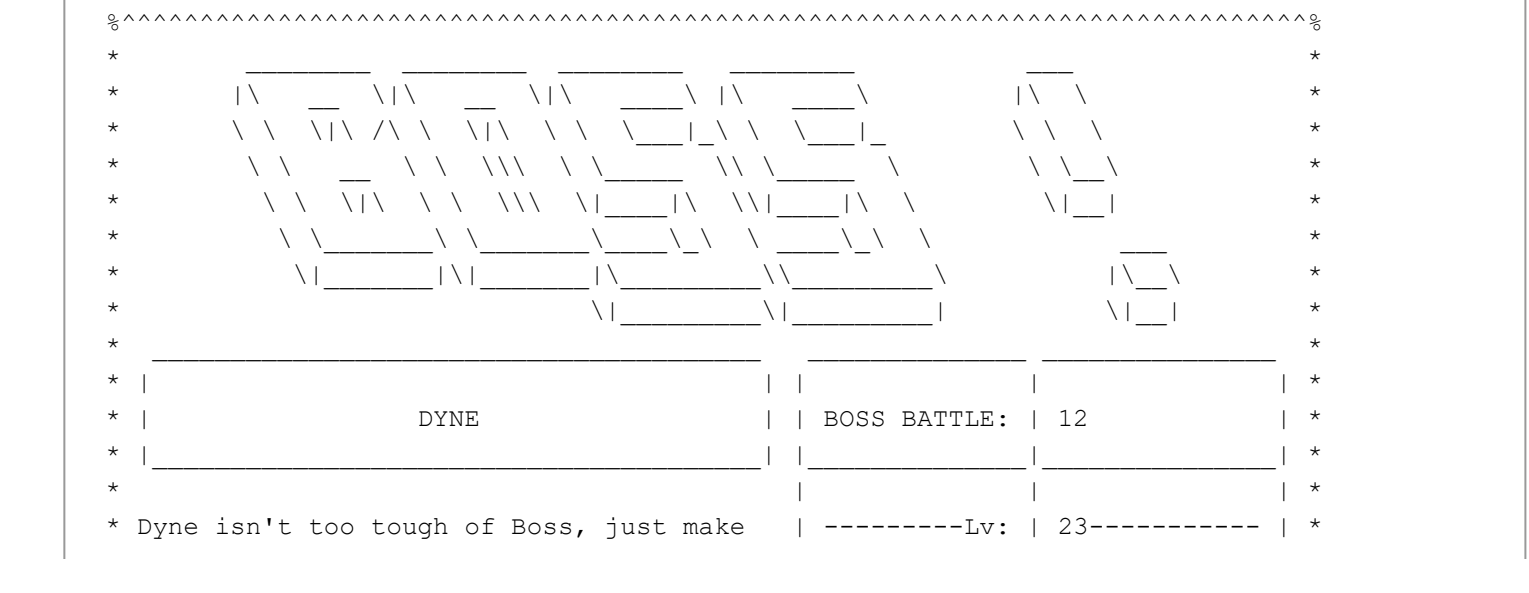
You'll have a choice in which way to go next; take the left path to continue on with the story (scrapyard), or take the right path to engage in some optional battles with the Land Worm to try and steal some Turbo Ethers, and the Cactuar to try and earn some gil (10,000 per battle). Note that after a dozen screens or so a Chocobo carriage will appear to take you back to the central prison. Also, you may end up randomly appearing at the scrapyard (left path).

NOTE - Once you have finished up with Corel Prison you will never be able to return to it. You will however be able to return to the desert to fight the Land Worm and Cactuar again, so if you don't want to battle them now then that's fine. You can come back once you have obtained the Enemy Skills Big Guard and White Wind. The scrapyard cannot be revisited),

Take the left path and then follow the fence through the opening to the north of the fissure to wind up in the scrapyard. Do not go into the next screen until you have obtained all of the Steals and Enemy Skills that you plan to obtain (Platinum Bangle, Laser and Matra Magic). Remember you can manipulate your foes to make them cast the spell of your choice, on the party member of your choice. If you don't get the Laser E-Skill here then you won't be able to obtain it until you reach disc 3, and you really are going to want to learn it here as it depletes an enemies HP by 50%.

NOTE - As with the Steal Materia, the Manipulate has a higher chance of success the higher the users Lv is.

If you'd set up Barret as I'd advised earlier then you shouldn't need to swap anything around, otherwise bear in mind that the following Boss battle is a Barret only battle, so make sure Barret has the 'better' Enemy Skill equipped, and that he has full HP. Head north and you'll engage with one of Barret's old friends. Unfortunately, things don't quite turn out for the best.



```
* sure to keep your HP above 300 and you    | ---------HP: | 1200--------- | *
* should be O.K. Start the fight by          | ---------MP: | 20----------- | *
* Poisoning him and then just blast him      | --------EXP: | 600---------- | *
* with your best magic. Ice2 works well      | ---------AP: | 55----------- | *
* here, Laser doesn't. Make sure to          | --------GIL: | 750---------- | *
* prioritise your health, Dyne has a few     | -------DROP: | Silver Armlet | *
* moves that he can pull off in rapid        | ----NULLIFY: | GRV---------- | *
* succession and if you're not careful he    |_____________________________| *
* could get the better of you. Keep Barret                                   *
* in the back row, and with not a lot of HP Dyne shouldn't pose too much of  *
* a threat. After the battle you'll be rewarded with the [SILVER ARMLET].    *
*                                                                            *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

--D1.11 C - Chocobo Racing to Freedom! (“Why don't you get his autograph?”)

--Items - Ramuh Materia

Once the battle has finished you'll have a few touching scenes followed by an amount of dialogue including a lesson on how to ride Chocobos. When you finally regain control of Cloud in the Jockey's room, GRAB THAT MATERIA! You'll be able to make out the shining [RAMUH MATERIA] at the top right of the screen (grab it). We now have a Lightning based Summon, hoo-rah(muh)! If you missed it here then it is lost forever and you'll have to reload your save.

After all the Jockeys have left Ester will come and grab you to enter you into the race. You can listen again on how to ride a Chocobo, or you can listen to my expert advice:

```
 _____________________________________________________________________________
]                                                                             [
] SIDE NOTE - CHOCOBO RACING                                                  [
]                                                                             [
] The main thing to remember is to keep R1+R2 held down at all times, this   [
] will gradually refill your Stamina bar. As soon as the race begins press   [
] Select to gain manual control of the Chocobo, then press Square a number   [
] of times until he is running as fast as he can go. With R1+R2 held down he [
] should still be regaining Stamina, so every now and then hold down O in    [
] short bursts to sprint, making sure to save enough for the final dash.     [
] Once you and Number 2 have crossed the finish line you can press Start to  [
] end the race. It really isn't too hard, but if you do lose you will be     [
] able to try again until you win.                                           [
]_____________________________________________________________________________[
```

After the race you'll be told that there is a gift waiting for us... A buggy (along with the Chocochampion Trophy)! We can now cross Deserts and Rivers! That, accompanied by the fact that we now have the Manipulate Materia means that there is a world of side-quests for us to now do! Bear in mind that you can still engage in random battles whilst driving around in your buggy.

```

-E-SKILL:	[--------]	[---------]	[----------]	[------AQUALUNG]	[---------]

NOTE ON ENEMIES:

The Harpy can be found if you have the Chocobo Lure Materia equipped and you are on Chocobo tracks. It can also be found by driving in your buggy around the desert. The joker has a move that can kill you in one, so watch out. If you were to explore the beaches you would find Beachplugs & Grangalans.

From leaving the Desert, head east towards the peninsula that contains Chocobo tracks. Make sure to have the Chocobo Lure Materia equipped and battle around until you meet the Harpy (or alternatively you could just drive around in the desert on the World Map). They are reasonably powerful, you can Manipulate it if you like, or just wait for it to cast Aqualung. Make sure to have both Enemy Skills equipped, and make sure to have full HP as Aqualung could take you out in one hit.

NOTE - There are only two magic spells that we can cast that are water based, Aqualung being one of them and the other being the Leviathan (Summon) Materia.

--D1.12 B - Obtaining The Enemy Skill Big Guard

--Enemies - Beachplug

Now head to the Beach Area either near the Desert or near Costa Del Sol to fight with the Beachplugs. Manipulate one and then have it cast Big Guard on you.

This is probably one of the best Enemy Skills in the game. It will cast Haste, Barrier & MBarrier on all of your players! Although at 56MP it may seem a little pricey, eventually you'll get to a point where the cost won't seem so steep. When your players have levelled up you'll find yourself using this move more and more often.

--D1.12 C - Obtaining The Mythril

--Items - Mythril, Bolt Ring

Head north over the river to head back to Costa Del Sol. Drive your buggy straight into Costa from the World Map, then head back to the harbour. Talk to the guy you see in front of the ship and he'll charge you 100 gil to stow you (and your buggy) back to Junon.

Once at Junon head right one screen to talk to the air conductor flapping his arms about. He'll call in a helicopter that'll take you all the way to the World Map for free!. Now make your way back to the forest area we were training in before, then cross the river that you see. Keep heading north east to come to a cave.

Inside this cave is the Sleeping Man. Talk to him for a random game stat. The stat we're after is our battle count. If he tells you something else then run out then back in again to hear him give us a different stat. When I came here he told me that I'd fought 193 times.

If the last two digits are the same he'll give you one of two prizes, the prize depends on whether the last two digits are odd or even. If they are even then he will give you the [BOLT RING] which is an accessory that nullifies Lightning attacks and can be bought again later on disc 2. You will not receive the Bolt Ring if the last two digits are 00, and he will not give you more than one.

If the last two digits are odd then he'll give you the Mythril, which is what we came here for. If you got lucky and you are nearer to your kills being odd as opposed to even then you don't have to battle around for the Bolt Ring unless you really want to, it's not that great of an accessory. The Mythril will be used a little later on to obtain an incredibly valuable item.

NOTE - If you want to complete your inventory list, but don't want to battle around for ages then know that you'll be able to buy one from Mideel on Disc 2.

Whilst battling around to get your kill count up you're going to want to do some Limit Training in the nearby forests. If your kill count is way out, then read below to obtain the Enemy Skills White Wind & Flame Thrower, just make sure not to forget about your kill count.

--D1.12 D - Obtaining The Enemy Skill White Wind

--Enemies - Zemzelett

Whilst battling around you're going to want to learn White Wind from the Zemzelett right outside the Sleeping Man's cave. Manipulate it then have it cast White wind, a move that'll heal all of your party members and clear them of any Statuses all for 34MP, a very valuable Enemy Skill indeed!

NOTE - The amount of HP healed is equal to the casters current HP. So in other words, always have the person with the highest HP cast White Wind. Also, casting White Wind on Undead creatures will not only harm them but will also Petrify them, which is nice to know.

--D1.12 E - Fort Condor Battle No. 4

This time your reward will be 1 Megalixir. Be warned, the battles are starting to get a little bit tougher now. Make sure to stock up on an few Tents, Hypers and Tranquilizers before heading out. This will become unavailable once you set foot in Cosmo Canyon.

--D1.12 F - Obtaining The Enemy Skill Flame Thrower

--Enemies - Ark Dragon

You should have already obtained this once so you'll know where to get it from. Note that the Ark Dragon only appears in the northern rooms of the Mythril Mines.

--D1.12 G - Obtaining The Enemy Skill Beta

--Boss - Midgar Zolom Lv 26

If you've already beaten the Zolom before then you should find it much, much easier now, especially seeing as you have Laser which will drop its HP

by 50%. You're still going to want to take the following precautionary measures:

1) Make sure to have filled everyone's Limit gauge up all the way. Manipulating an Ark Dragon and using Flame Thrower is the best way to do this.

2) Make sure to have given everyone Tranquilizers to inflict them with Sadness. This will make them take 30% less damage, which is crucial.

3) Make sure to have the Fire Ring equipped and Elemental=Fire on someone's armour. It's the only way to survive Beta unless you have Aeris's 3-1.

4) Make sure *not* to have both Enemy Skill Materias attached to one person if one of the Enemy Skills has already learned Beta.

5) Make sure to have everyone in the back row.

This is the set-up I had:

1) Cloud - Lv 23 (Back)

Force Stealer - Revive, Heal, Ice
Shinra Beta - All=Restore, Poison, Enemy Skill
Fire Ring

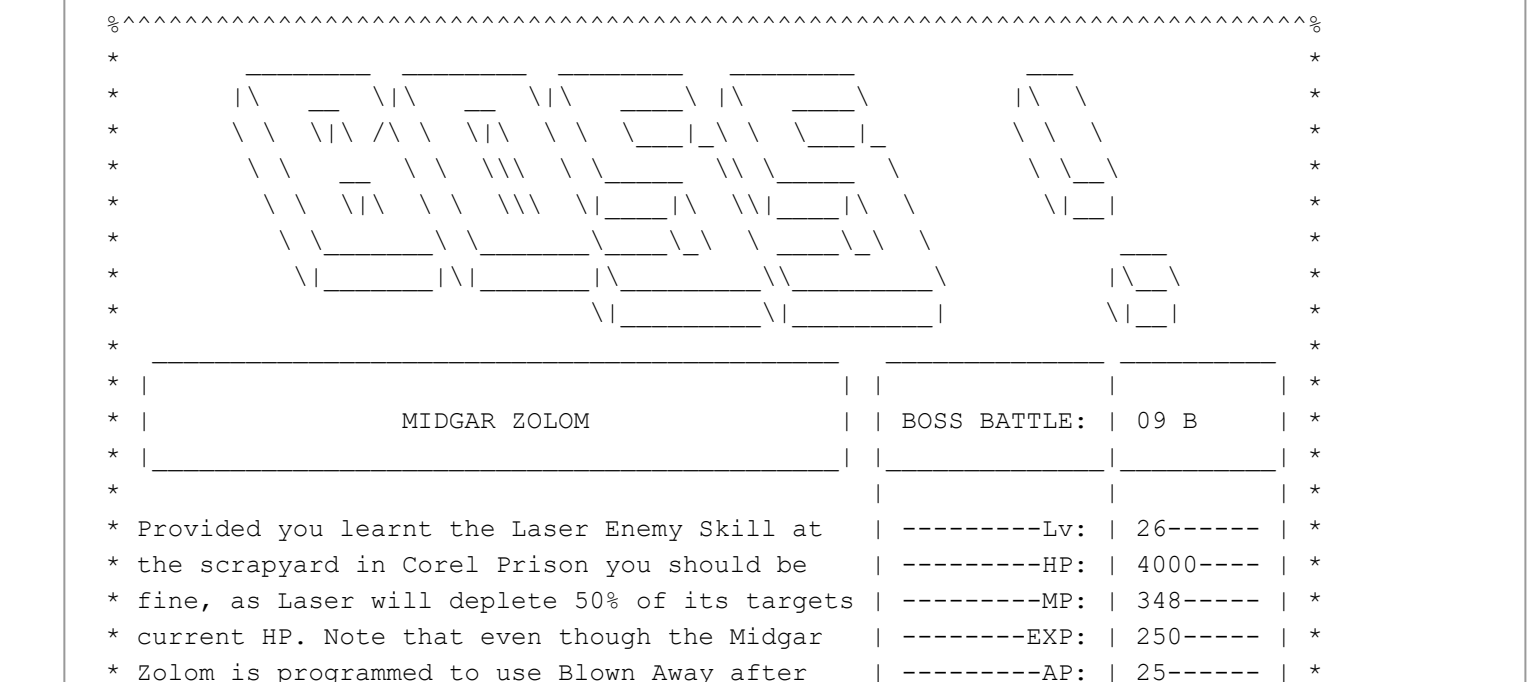
2) Red XIII - Lv 21 (Back)

Diamond Pin - All=Restore, Sense, Lightning
Silver Armlet - Elemental=Fire, HP Plus, Long Range
Talisman

3) Barret - Lv 20 (Back)

W Machine Gun - Seal, Transform, Earth
Silver Armlet - All=Lightning, Ice, Sense
Power Wrist

Some of the Materia are equipped just for the sake of equipping them. Use a Tent and then save!



```
* its HP has fallen below 2000, it *cannot* use  | --------GIL: | 400----- | *
* the move as a counter attack on the first or   | ------MORPH: | X-Potion | *
* second uses of Laser, however it will use      | ENEMY SKILL: | BETA---- | *
* Blown Away the third time Laser is used. Beta  |______________________| *
* will be used as a counter attack the fourth                              *
* time Laser is used. So long as the Enemy Skill bearer isn't the third    *
* player to attack the Zolom, he/she/ won't get flicked away. Once you have *
* used Laser 4 times, feel free to cast Beta to finish off the Midgar Zolom! *
*                                                                          *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

Once the battle is done remember to relieve you players of their Sadness. The reason that they're sad is because we can't cross the marsh to learn L4 Suicide from Mu, unless of course you're prepared to defeat the Zolom multiple times, which isn't too difficult in all honesty, I was able to make it across within three battles.

Just as a reference, here is the Materia set-up that I had after battling the Midgar Zolom:

1) Cloud - Lv 24 (Front)

    Force Stealer - Earth, Revive, Heal
    Shinra Beta   - All=Restore, Fire, Steal
    Talisman

2) Tifa - Lv 21 (Back)

    Grand Glove   - Elemental=Shiva, Long Range, Transform
    Silver Armlet - All=Lightning, Enemy Skill, Manipulate
    Power Wrist

3) Red XIII - Lv 21 (Front)

    Magic Comb   - Poison, Steal, HP Plus
    Silver Armlet - All=Restore, Enemy Skill, Sense
    Protect Vest

```
¬¬¬
```

Make your way back to Junon in your buggy and drive into the Town. You can rest for free in the house on the left as you enter, you could also ride on the back Mr Dolphin all the way to the Cargo Ship. If you did that then you would be missing out on an amazing training spot!

Head to the main elevator shaft and pay the guy there 100 gil to ride it to the top. SAVE YOUR GAME! We're about to fight some of the hardest enemies available at this point in the game. Keep heading west until you come to the T Fork. Head west to see a bunch of Shinra being drilled. To the left of them is a red panel, activate it to set off the alarm. You can now fight the Death Machine and the Slalom.

The important thing here is not to over-kill it, I only stayed for 3-4 battles or so. If you experience grind too much now then you'll just end up becoming over powered, subsequently making the game way too easy. This is an excellent way to level up your Materia though, the Slaloms comes in 3's which will give you 210AP per battle, that's 420 if you've equipped a Double Growth weapon! That's Crazy AP for where we are in the game. Make sure to try to steal as many Smoke Bombs as you can, they'll massively help for the Battle Square at the Gold Saucer. I left with 4.

If you like you can also take the tram that Rufus and Heidegger rode up on earlier, but there really is nothing much to see up there. When you're ready to continue, head over to the Cargo Ship to ride to Costa Del Sol Once more.

¬¬¬

(Thanks to PMMCL for this Turbo Ether trick, I wouldn't have known about it otherwise.)

¬¬¬

UPDATE - I have worked out a formula that has a 40% chance of winning a bet at the Chocobo races. Use QSI Link [Chocobo Square] for more details.

Ghost Square - This is basically the scariest hotel you'll ever spend the night in. Here you can rest for 5 GP, you can stock up on a few items and you can also read the [Turtle Paradise Poster #3]. Make sure to read this.

Round Square - Nothing much to do here other than to waste 3GP on a ride that will show you the sights of The Gold Saucer. Don't bother, it's a waste of time.

Speed Square - This is where you'll want to go if you've got any left over GP. for 10GP you can play a roller coaster shoot-em-up game where you have to shoot flying targets for points. If you score over 3000 points then you'll receive either a Super Sweeper, 1/35 Soldier or a Masamune Blade. All of which are completely useless and do absolutely nothing.

If you are just that good enough however, and you can score 5000+ then you will receive the [UMBRELLA], a weapon for Aeris that has very high attack power, but no Materia slots. You have to be insatiably skilled (or using an emulator) to pull that off though, you have to hit almost every single target. Tip for the space ship at the end - just keep tapping confirm without letting your bar run down more than an eighth (or less) and he should pop right at the last second for 1000 points. There are a few targets remaining after him aswell. A youtube would help here more than I could, nevertheless, see section E.08 G for more details.

NOTES - PS4/PC users - you can shoot something called the Zeppelin propeller to gain a crazy amount of points! It appears to the right just after the giant red 'frog' type thing, and can be quite hard to hit.

- Thanks to MidianGTX for pointing this out. The Zeppelin Propellor will appear twice, the second time much briefer than the first. If you aim your crosshairs in the very bottom-right hand corner of the screen, then you will hit the propellor on it's second pass every time.

- There is a glitch that occurs on the PS4 version that involves you getting stuck at the giant UFO part. If this happens, you must change the PS4's system clock to a date *after* 5th Dec 2015, but before 1st Jan 2016. This should fix the glitch (it did with me). Thank you Elatreus for finding the fix!
Additionally, you don't have to quit the game first, you can change the system's clock whilst 'stuck', and when you re-open the application you'll become un-stuck (not 100% confirmed; works for some).
UPDATE - Fixed with patch 1.01.

Event Square - This is where shows and concerts are held, and right now there's a phat lot of nothing going on.

Wonder Square - This is where the GP will be coming from for now. The most efficient way of gaining GP is with the Super Dunk game, but I think I'll give you a very quick rundown of the games that are on offer:

Arm Wrestling - You earn 1 GP for beating the Sumo Wrestler and 2GP for beating the Wrester. Complete waste of time.

NOTE - Talk to the woman standing next to the Arm Wrestling machine to exchange your GP for prizes (if you wanted to). There will be more prizes available later on in the game, for now the only item of interest is the Golden Ticket (300GP), but to be honest you'd be better of saving your GP for the Battle Square and buying the Golden Ticket for 30,000 gil later on. the '??????' prize is a Carob Nut which is very easily obtained elsewhere.

Super Dunk -

This is where the real grind wants to come from. You'll very quickly get the hang of what to do here, just hold down O for roughly half a second and then release. I find it easier to maintain the zone by not concentrating on the game at all, I'll be reading my E-Mails on my phone in one hand while pressing O with the other. I've managed to chain the maximum of 44 a few times this way, netting a nice 300GP each time. This takes quite a bit of practise though..

NOTE - Thank xPsychoMantis a huge amount for this!
Go to https://www.metronomeonline.com/ and set it to 120 BPM. It will take a while to get used to but eventually you will start to find a rhythm where you'll be scoring every time. It also helps greatly if you mute the Gold Saucer backing music. Simply push O for one beat. Try not to over think it; in fact try to think about something else while you are playing. Look away from the screen and nod your head slightly to the beep, but don't close your eyes.

Another way to master the Super Dunk is to look at the ball in relation to Cloud's front hair-spike.

Wonder catcher -

Again, complete waste of time (almost).

G-Bike -

(You guessed it) This is basically the same game as the one we played whilst escaping from Midgar, only now when we take out the other bikers we gain points. The first time you play this you will always receive a Speed Source, so it is highly recommended that you play at least once. You'll receive 2GP for scoring 5000+ and 10GP for scoring 10,000+.

PS4 players - score 10,500 or more to unlock the Corel's Angel Trophy.

Crystal Fortune -

This will tell you something that is relevant to your current progression in the story, and will change every time you hit a certain trigger point in the game.

Mog's House -

Complete this game and you'll receive 30GP, but only once. You'll get no reward for completing it a second time. It's fairly simple really, you just have to keep feeding Mog until his belly stops rumbling (5 nuts). Then do it again (3 nuts). Viola! Make sure to talk to the girl standing by the machine to claim your prize.

3D Battler -

Rock, Paper, Scissors type game that can be incredibly difficult to beat. Defeating the 2nd guy nets you 3GP, the 3rd guy 30GP and the 4th guy 300GP, but he's that notoriously difficult to beat that the

5th guy is more of a joke than an opponent, he's completely invisible and cannot be beaten.

Battle Square - As previously mentioned, your BP will remain valid until you leave the Battle Square. So, before heading into the Battle Square, make sure to have saved up a decent whack of GP, I'd say 150-200 should be plenty, and make sure to have saved your game aswell (using the save point at the entrance to the Gold Saucer that costs 5GP). If you mess up and run out of GP whilst falling a few thousand BP short of the required amount (46,080), then the last thing you want is to have to accumulate all of that hard earned GP again.

NOTE - Use QSI Link [Battle Square] to view an in-depth explanation to everything the Battle Square has to offer.

MAKE SURE to talk to the woman standing at the bottom of the stairs leading up to the Battle Square, she'll say 'I like fighters, but not ones that are all talk'. Make sure that she has said this.

To fight at the Battle Square you must first pay 10GP, then you'll be placed into 8 consecutive battles receiving random handicaps after each battle. The higher the handicap, the higher the BP reward, but only the final two really make an impact on your overall BP. The enemies here are all ones we've faced before, and none of them pose much of a threat. For a full listings of which enemies are likely to appear look in section E.08 D. Just note that the enemies will increase in difficulty eventually, so it's worth taking advantage now of the weaker enemies now.

The main thing to point out is that for the first 6 fights you're going to want to try to get the easiest handicaps, but for the final two you are going to want to try to get the more extreme handicaps. if you see 'All Materia Broken' pop up then try to get it, you'll get 10,000BP if you do so on the final battle. 'Magic Materia Broken' will also net you decent amount. Avoid 'Cure' or 'Lucky Seven' on your final 2 fights. Also, a handicap can appear more than once, so don't try to save the 'best' handicaps for later as the h/cap that you get will have no affect whatsoever on the following reel; it's all scripted in from the beginning.

NOTE - You can slow the reels down by tapping square.

If you were able to steal some Smoke Bombs earlier from the Slaloms then you could use them to escape from the Battle Arena whilst retaining all of you BP. This is particularly useful if you're on the final battle, you've received the 'All Materia Broken', you're up against a Harpy and you think you may lose. Try to have beaten all 8 battles at least once, however.

NOTE - Using a Smoke Bomb will constitute as an escape, so if you're looking for that 'perfect game', then don't use them (the sleeping man that gives us the Mythril will tell you your escape count).

When in battle cast Big guard straight away. Even though the Barrier and MBarrier will run out quite quickly, the Haste effect will last for the whole 8 fights. The enemies will have more HP than before and will deliver more damage, so watch your HP. If you'd equipped the White Cape earlier as advised then you don't have to worry about the Frog/Small Status ruining your day. If you find that all of your attacks are missing for some reason then it's probably because you've been Fury'd by the Sword Dance and you need to use a Tranquilizer (or cast White Wind).

If you get the 'All Materia Broken' or 'Independent (Purple) Materia Broken' handicap then remember to change Cloud into the front row (if you had placed him in the back previously). Then, Unless you're planning on healing I suggest just holding down confirm, you'll auto-attack that way without wasting any time. Make sure to have full health when fighting the Harpy aswell, his Aqualung can take you out in one hit of you're not careful. If you were able to accumulate any Right Arms earlier from the Bombs then they will prove useful here as they will hit all enemies for very high damage. Lastly, any Enemy Skills that you learned within the Battle Square will not keep.

NOTE - If you encounter the Grangalan in the final battle, you only need to kill the right-most Grangalan Jr.Jr. "A" to make the Grangalan Jr. targetable again. Kill the Grangalan Jr. and you can then target the Grangalan; kill the Grangalan and the battle will end even if two of the Grangalan Jr.Jr. are still left alive.

You need to save up a total of 46,080BP, 40,960BP for the Champion Belt, an Accessory that will really turn the tide in your favour, and 5120BP for the Enemy Lure Materia which will make grinding A LOT quicker down the line as 2 mastered versions of these will stack with each other. I suggest using any leftover BP on buying a few Shrapnels which will really help out when certain handicaps have removed our ability to damage all opponents. We shall return later on to get the Pre-Emptive Materia and the Speed Plus Materia. The Fury Ring can be bought a little later on. The items used whilst battling within the Battle Square are perishable btw, but your HP and MP will reset back to whatever they were before you went into the battle. Also, if you were to steal an item whilst in the Battle Square then it would keep once the battle has finished.

If you were able to win all 8 battles then on your way out make sure to talk to the woman at the bottom of the stairs again and she will be so impressed that you were able to beat the Battle Arena that she will reward you with the [SPRINT SHOES], an EXTREMELY useful accessory that will automatically put a character into Haste!

There will be a new set of prizes up for grabs quite soon in the game, for now though just try to obtain the Champion Belt (if you're feeling really ambitious try to get two!) and the Enemy Lure Materia, then you're good to go. You would be wise to spend any surplus BP on Ethers (640 BP), which you can then sell for 750 gil each!

If you have got some left over GP then you don't have to worry about using it now, it will still be there when you next return to the Gold Saucer (unlike BP). You may however wish to try your skills at the Speed Square, if you are super-hot at it then maybe you could score 5000 and win the Umbrella for Aeris? Otherwise, time to pack up and move onto the next side quest.

Oh, and one last thing, now that you can give +30 Strength to someone equip them with Elemental=Shiva and fight a few Land Worms to steal a few Turbo Ethers. Equip Cloud (or whoever you have stealing) with the Sprint Shoes and you'll absolutely obliterate these things. Here is the Materia set up I have for my characters upon leaving the Gold Saucer:

1) Cloud - Lv 25 (Front)

Force Stealer - Revive, Heal, Steal
Silver Armlet - All=Restore, Poison, Steal

Sprint Shoes

2) Tifa - Lv 23 (Back)

Grand Glove - Elemental=Earth, Enemy Skill, Manipulate
Silver Armlet - All=Fire, Long Range, HP Plus
Champion Belt

3) Aeris - Lv 23 (Front)

Striking Staff - All=Restore, Lightning, Steal
Shinra Beta - All=Ice, Enemy Skill, Sense
White Cape

NOTE - These set-ups are purely here as a reference only, you do not have to set your characters up as I have. In fact, I encourage you to experiment with what you can do. When we are about to face a Boss, however, the set-ups that I give then will be more of a suggestion than a reference, but again you can fiddle with it as you see fit.

--D1.12 K - Obtaining The Enemy Skill Frog Song

ENEMIES:	[GAGIGHANDI]	[GRAND HORN]	[TOUCH ME]	[MYSTERY NINJA Lv 22]
------Lv:	[--------19]	[--------19]	[----------18]	[----------22]
------HP:	[-------480]	[-------460]	[----------300]	[---------800]
------MP:	[--------55]	[--------43]	[----------74]	[---------150]
-----EXP:	[-------173]	[-------180]	[----------170]	[---------240]
------AP:	[--------18]	[--------15]	[----------23]	[----------40]
-----GIL:	[-------220]	[-------240]	[----------180]	[---------800]
---STEAL:	[------Soft]	[----------]	[------Impaler]	[----------]
---MORPH:	[----Remedy]	[-Hi-Potion]	[-------Remedy]	[----------]
--DROP 1:	[------Soft]	[-Hi-Potion]	[Maiden's Kiss]	[----------]
--DROP 2:	[----------]	[--War Gong]	[----------]	[----------]
-E-SKILL:	[----------]	[----------]	[----FROG SONG]	[----------]

NOTE ON ENEMIES:

The Touch Me will only be found in the Forests, the Beachplug and the Grangalan can be found at the beaches. The Gagighandi can cause Slow-Petrify so be sure to have some Softs with you. MAKE SURE to save before fighting in the Forests as the Touch Mes have a 6x formation that can really ruin your day, especially if you'd forgotten to equip the White Cape. This is the second point in the game where Yuffie can be recruited, and her stats may vary depending on Cloud's Level. She has a 25% encounter rate chance.

As mentioned, the 6x Frog formation can be incredibly annoying, so make sure to save your game and also to have the White Cape on before venturing into the forests. Frog song will send your character to sleep and also cast frog on them. Not the best of E-Skills to have but certainly not the worst.

If you look to the east you'll be able to see a lone house. There's no-one

home at the minute so it looks like we'll have to return later! And that just about wraps up my optional sidequest section! Even though technically speaking Gongaga *is* considered a sidequest and can be skipped, it is considered a 'Major' sidequest and as such it gets its own section (as will Yuffie's sidequest later on).

```

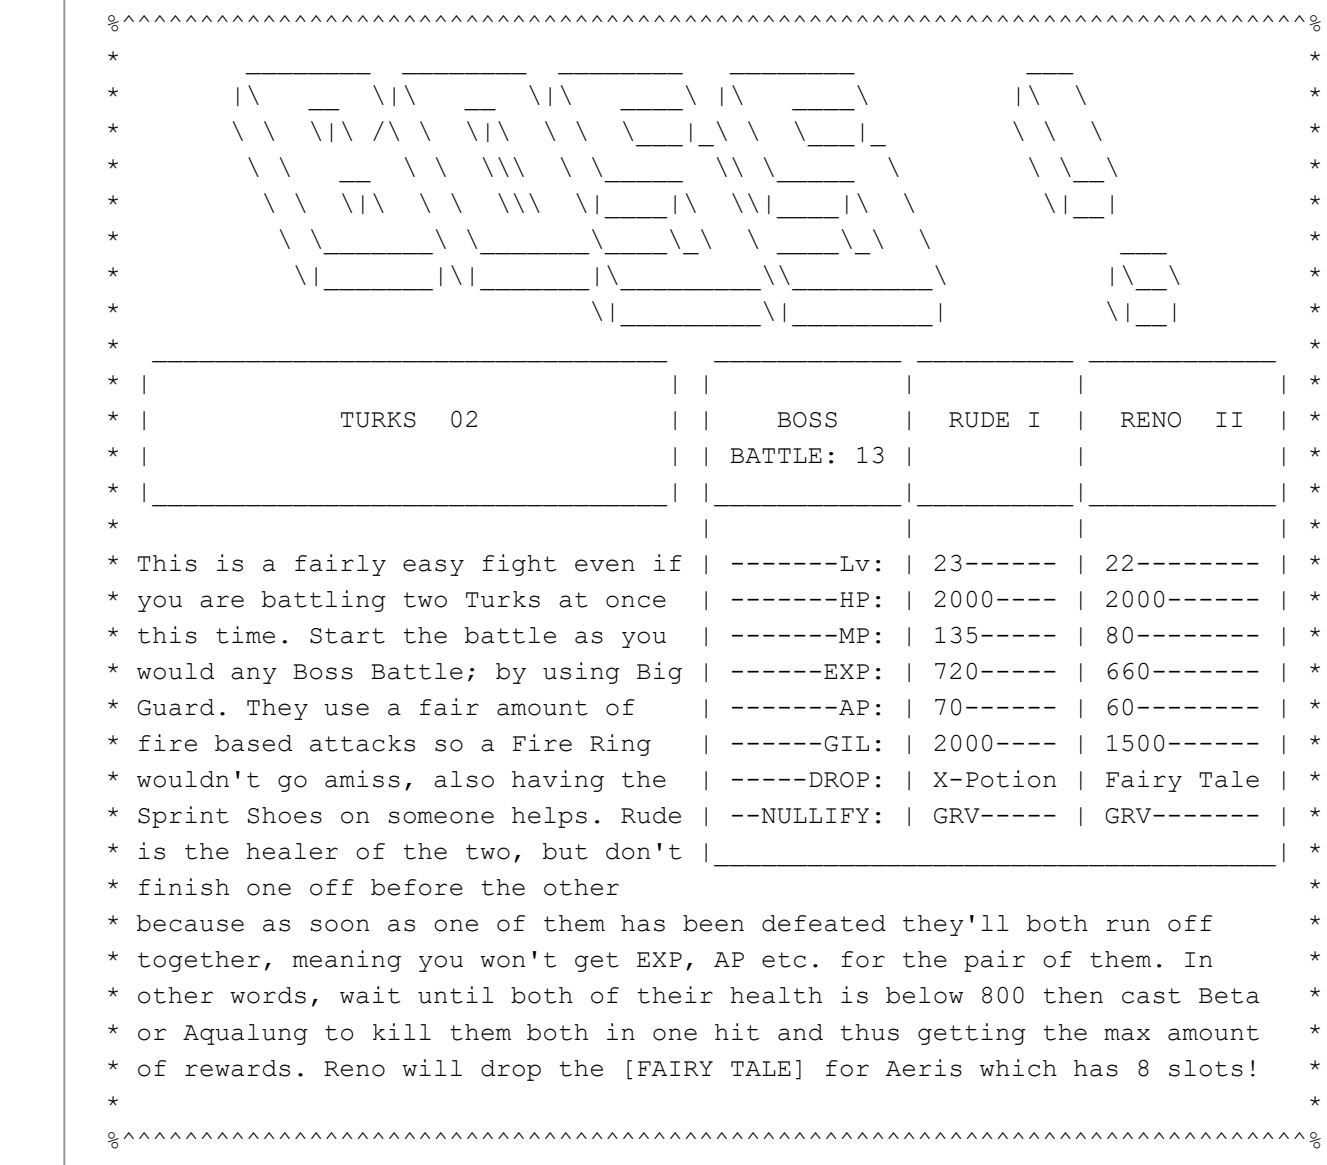
```

¬¬¬

--Items - Titan Materia
--Boss - Turks:Reno II Lv 22 (Fairy Tale) + Turks:Rude I Lv 23

You will see Gongaga directly in front of you as you cross the southern river from the Gold Saucer Desert. It is a round village surrounded by forest (2nd chance to recruit Yuffie). Save and set up your Materia and accessories to defend against Fire, as soon as you enter you'll have to fight:



When the battle has finished make sure to set up your Materia for Fire based attacks, then head to the right. As you make your way down into the ruined reactor you'll have to hide from the Shinra whilst listening in on their plans.

After Scarlett and Tseng have departed, search the spot where Scarlett was standing to GRAB THAT MATERIA! - the [TITAN MATERIA]! We now have an Earth based Summon! Too bad that a heap of enemies are strong vs Earth, oh well! Now make your way back to the crossroads where you met the Turks.

--D1.13 B - Gongaga Village ("You ever hear of a Zack in SOLDIER?")

--Items   - X-Potion, White M-Phone, Deathblow Materia
--Required gil - 17,000

NOTE - (Best Bromance) Make a party of Aeris and Tifa and save your game.

Make your way left at the first fork and then Right on the second fork. Welcome to Gongaga, a broken rundown town, and it's all thanks to the Shinra.

Head into the first hut on the left to buy two new pieces of Materia - Mystify - 6000 gil and Time - 6000 gil. You can buy a Fury Ring for 5000 gil which save us having to win it at the Battle Square. You can also buy another White Cape here for 5000 gil if you wish (I'm not bothering).

```
 _____________________________________________________________________________
]                                                                             [
] SIDE NOTE - TIME MATERIA                                                    [
]                                                                             [
] You can now cast Haste for 18MP instead of having to use Big Guard, so      [
] whack an All=Time combo on someone and never take it out of your battle     [
] strategy! Also, if you're trying to learn an Enemy Skill from an enemy      [
] that can't be manipulated, you can cast Haste on them to make them attack   [
] you more frequently.                                                        [
]_____________________________________________________________________________[
```

You could climb up the pole here for the Weapon Shop, but it doesn't stock anything new. Head to the western most hut to rest for 80 gil, and also to loot a chest containing an [X-POTION].

Now head into the hut just north of the inn to find another chest containing a weapon for Cait Sith, the [WHITE M-PHONE].

Now head to the south eastern huts and enter into the northern hut first to stock up on a few items. I suggest leaving with a minimum of 10 Tents, Maiden's Kiss's, Cornucopias, Softs & Phoenix Downs. Remember you can sell a few Ethers for 750 gil if you must.

Now head into the last hut to find out a little bit about a character named (Zack). Again, this scene will play out differently depending on who is in your party, and you may need to talk to you friends first before they'll re-join you.

NOTE - (Best Bromance) Leave Gongaga now without talking to Aeris or Tifa. Although their affection value will drop, you'll be missing out on a small amount of dialogue, so If you're keen on hearing what they have to say then you can talk to them now, but then you'll have to re-load your save so that you can completely ignore them (you do have a small margin for error with this trophy by the way).

We're all done with Gongaga now, well almost. Head out of the village and this time take the left (and last) fork picking up the [DEATHBLOW MATERIA] along the way.

Head out of Gongaga and travel west through the forest to eventually be able to cross a river.

NOTE - Although Deathblow is a handy Materia to have, it doesn't get its own side note box or anything, just a few line breaks & spaces as it isn't really all that game-changing. You will hit with a critical blow IF you hit; your accuracy drops by 33% (only while you are using Deathblow, selecting your normal attack will still retain its normal accuracy). The best use for Deathblow is when you have your Limit Break up and you're saving it for a Boss, you can use Deathblow as an

alternative to attacking.

```

| NOTE - If you were to sense the Desert Sahagin then you would discover       |
|        that they are weak against 'Punch'. This is likely to be a mistake    |
|        left in the game accidentally by the developers, as the 5 physical    |
|        Elements - 'Cut / Punch / Hit / Shoot / Shout' were supposed to       |
|        have been phased out of the final edit of the game. See section       |
|        E.05 C for more info.                                                 |
+------------------------------------------------------------------------------+

--Items        - Elixir
--Required gil - 19,400+
--Extra        - Turtle Paradise Poster #4, Turtle Paradise Poster #5
                 Fort Condor Battle #5 - 5x Hi potions
```

Make your way round the mountain side until you eventually come to a huge observatory. **DO NOT drive past it**. If you do the buggy will breakdown and you will not be able to complete one of the Fort Condor Battles. Park up just outside and then enter the Cosmo Canyon, the place that Barret has always dreamed of visiting (Best Bromance - make sure that he is in your party as you enter)!

```
$$$
```

Follow them up the stairs to a save point and the [Turtle Paradise Poster #4] just left of the counter. Don't bother with Tiger Lily's Weapon Shop for now, we'll return here very shortly.

Head to the back of Tiger Lily's Shop to talk to Barret if you like (Best Bromance - choose option 1, "Go on", then option 1, "And then"), then head to the left of her shop and up two flights of stairs.

NOTE - To exploit the aforementioned glitch to boost Barret's affection rating indefinitely, you would have to pick option 1 followed by option 2, then run out of the room and re-enter. Rinse and repeat. Again, don't exploit it too heavily as doing so would cause Barret's affection to exceed its limit, preventing the Best Bromance Trophy from popping.

The first shop on the right is the Materia Shop, again we'll return here very soon (trust me). The second shop is a kitchen, nothing to do here just yet. Then large door is sealed and the left exit leads to a viewpoint.

So, head up the ladder and into the observatory to talk to Red XIII and Bugenhagen. After a short amount of conversing, you'll have to choose two companions to accompany you. Head back down the ladders and run into the kitchen (right of the big sealed door). Here you can talk to Cait Sith to arrange your party (you could talk to any one of your teammates, Cait Sith just happens to be the closest one to talk to).

Once you've selected your party (I chose Barret & Aeris) you can head back up to the observatory to view Bugenhagen's machinery.

Once the lesson has finished make your way back down to the entrance to Cosmo Canyon to find all of your comrades sat around a giant flame. Before heading over to the flame yourself, head into the inn to talk to one of the elders to learn a bit about the Ancients. This is the only time in the game you can hear this dialogue.

Talk to all of everybody saving Red XIII till last. When you do talk to Red, Bugenhagen will turn up wanting to show you something. Form a party and follow him up to the big sealed door. When he asks you if you're ready, tell him that you are. Once you have gone through the door **TURN AROUND!!!*** There's a few thing you'll want to do first:

NOTE - If you only wanted to do 7 of the Fort Condor battles to obtain all of the unique items available, then it would be absolutely fine for you to sit out the next 3 battles, as the travelling time can be a little bit arduous.

SIDE NOTE - FORT CONDOR BATTLE No.5

The prize will read 5 x Potions even though you actually receive 5 x Hi-Potions. Note that there is an extremely tight window in which this battle can be completed, and if your buggy has broken down (because you drove past the Cosmo Canyon) then this battle is lost forever (forfeiting the final 'optional' prize; the actual final battle/prize is mandatory). Make sure that Bugenhagen has unsealed the giant door before heading out.

Remember also that on your return through Junon you can hitch a ride to the World Map using the helicopter, and using Mr Dolphin you can jump straight to the Cargo Ship (using 'Square' to blow the whistle).

Once you've finished the (optional) Fort Condor battle, make a dash over to Tiger Lily's Weapon Shop and make a fresh save. Also make sure to have a minimum of 19,400 gil on you. Buy the following:

NOTE - If you're reluctant to sell any of your weapons (which is completely understandable), then you're going to want to save 16,000 gil for the materia shop. It may be that you just buy the weapons for the characters in your party, then buy the remaining equipment after the forthcoming dungeon.

```
1 x Butterfly Edge   O=O O=O  - Cloud      - 2800 gil
1 x Tiger Fang       O=O O=O  - Tifa       - 2500 gil
1 x Heavy Vulcan     O=O O=O  - Barret     - 2700 gil
1 x Prism Staff      O=O O=O  - Aeris      - 2600 gil
1 x Silver Barrette  O=O O=O  - Red XIII   - 2500 gil
1 x Pinwheel         O=O O=O  - Yuffie     - 2600 gil
1 x Green M-Phone    O=O O=O  - Cait Sith  - 2400 gil
1 x Silver Armlet    O=O O O  - Armour     - 1300 gil
                                   Total - 19,400 gil
```

If you're selling your weapons head back to the Cosmo Flame and talk to you team to change your Party and equip every single one of your characters with their new weapons. Equip your selected team with Silver Armlets and everyone else with Carbon Bangles. Now arrange your items by 'Type' and get ready to sell the following:

NOTES - This is the second and last time that I plan to sell my weapons, we shouldn't need to worry about gil too much pretty soon. So far we have been collecting Double Growth weapons with 3 Materia slots. We are about to collect Double Growth 4-slotted weapons for everyone, so I'm selling all of my current Double Growth weapons. Also, MAKE SURE to leave a few pieces of armour (Platinum Bangles) to get changed into. Don't sell any of you accessories. Sell anything that isn't on this list at your peril.

* = Unique Item

```
 Cloud    - Hardedge        -  750 gil | Aeris   - Striking Staff   -  650 gil
            Force Stealer   - 1100 gil |           Wizard Staff     -  900 gil
                                       |
 Tifa     - Metal Knuckle   -  160 gil | Yuffie  -*4 Point Shuriken -  300 gil
            Mythril Claw    -  375 gil |           Boomerang        -  700 gil
            Grand Glove     -  600 gil |           Wind Slash       - 1000 gil
           *Motor Drive     -  900 gil |
                                       | Cait Sith - Yellow M-Phone -  250 gil
 Barret   - Assault Gun     -  175 gil |             White M-Phone  - 1150 gil
            Atomic Scissors -  700 gil |
            W Machine Gun   - 1000 gil | Other - Mythril Armlet - 175 gil (x2)
                                       |         Carbon Bangle -  400 gil (x1)
 Red XIII -*Mythril Clip    -  400 gil |        *Shinra Beta   -  475 gil (x4)
            Diamond Pin     -  650 gil |         Four Slots    -  650 gil (x1)
            Magic Comb      - 1000 gil |
                                       |                   Total = 16,060 gil
```

I appreciate that some may have a hard time parting with one of a kind weapons that can never be obtained again. If that's you then don't fret, there are other ways of earning gil....

Make your way up to the Materia Shop near the unsealed door and to buy two HP

Plus Materias for 8000 gil each. These things really want Leveling up straight away, and although it's setting me back 16,000 gil, it's completely justifiable. I'll be returning to purchase the MP Plus's a little later on (If you can afford 1 x MP Plus then go right ahead. Equip it on Red XIII). Here is my set-up going into the cave:

1) Cloud - Lv 26 (Front)

Butterfly Edge - All=Fire, All=Time
Silver Armlet - All=Restore, Lightning, HP Plus
Sprint Shoes

2) Red XIII - Lv 23 (Back)

Silver Barrette - Elemental=Ifrit, Enemy Skill, Deathblow
Silver Armlet - All=Ice, HP Plus, Long Range
Champion Belt

3) Barret - Lv 22 (Back)

Heavy Vulcan - Revive, Heal, Transform, Enemy Skill
Silver Armlet - Steal, Manipulate, Sense, HP Plus
Star Pendant

Before entering I suggest sleeping at the Inn (or just use a tent), and then saving by Tiger Lily's before heading into the Cave of the Gi!

NOTE - We're not far off getting our first Level 4 Limit manual, the Cosmo Memory for Red XIII! For now, Red and Red alone shall be getting all of the kills.

--D1.14 B - The Cave of The Gi ("The vengeful spirits of the Gi didn't disappear, and couldn't return to the Lifestream...")

ENEMIES:	HEG	SNEAKY STEP	GI SPECTOR	STINGER
Lv:	22	21	23	25
HP:	400	600	450	2200
MP:		65	88	60
EXP:	250	270	260	290
AP:	20	24	20	25
GIL:	240	330	150	358
STEAL:				Ether
DROP:	Hi-Potion	M-Tentacles	Smoke Bomb	-Hi-Potion
ABSORB:	PSN		RES	
DOUBLE:	ICE		HLY--FRE	
E-SKILL:		DEATH SENTENCE	DEATH SENTENCE	

NOTE ON ENEMIES:

Death Sentence will basically be a countdown timer above your head counting down till you are dead (uh). Manipulate your foe to learn it quicker. I recommend one person being Ice based and one person being Fire based to deal with the creatures here. Equipping a Star Pendant will help

| against the enemies Poison attacks, just bear in mind that the Fairy Ring |
| we obtain will also protect against Poison (and Darkness). Lastly, the |
| Stinger can be 'Transformed', so cast Small on it when you encounter one |
| (thank MGSB for that), and watch out for its Sting Bomb attack. |
| |
| NOTE - Smoke Bombs and M-Tentacles are amazingly good for the Battle |
| Arena. |
| |
+---+

--Items - Added Effect Materia, Black M-Phone, Ether, X-Potion, Fairy Ring,
Turbo Ether, Gravity Materia
--Boss - Gi Nattak Lv 29 (Wizer Staff) + Soul Fire Lv 21 x 2
--Extra - Seraph Comb

Make you war down the rope and into the depths of the cave. As you enter you will notice a few rocks with cracks in them, along with a blue Support Materia.

There are four rocks in total, exploring the correct one will result in the secret passageway opening, while the other three will result in a battle. Figure it out for yourselves; you probably need the gil (I know I do), besides, battling is fun!

Once you've opened the way to the next area you can explore the remaining cracks if any, then head through. Make your way left at the fork and WALK across the oil slick, then head south. If you run through it you'll be flung into a Spike Trap swiping out roughly a third of everyone's HP. Follow the path to the previous screen to GRAB THAT MATERIA! the [ADDED EFFECT MATERIA]! The game just got more advanced. Adhere to the fact that should you miss Added Effect here then you'll have missed it forever.

```
 _____________________________________________________________________________
]                                                                             [
] SIDE NOTE - STATUSES & THE ADDED EFFECT MATERIA                             [
]                                                                             [
] Just like with the Elemental Materia, the Added Effect Materia will have a [
] different effect when adding it onto your weapon as opposed to your        [
] armour. The main difference being that we can now inflict Status changes   [
] to our opponents just by attacking them and defend against their Status    [
] changing attacks! As the game progresses, the possibilities become         [
] seemingly endless.                                                         [
]                                                                             [
] For now though you would do well to equip Added Effect=Poison onto         [
] someone's armour, making sure that it isn't the same person who has the    [
] Star Pendant. Poison isn't exactly the worst Status in the world, so it's  [
] not that crucial to equip it, just bear in mind (again) that Poison is the [
] only Materia in the game that is both an Element and a Status, and is the  [
] only Materia that will work when paired with both Elemental and Added      [
] Effect.                                                                    [
]                                                                             [
]  NOTE - A Lv 2 Elemental linked with Poison in your armour will also       [
]         protect you from the Poison Status, whereas a Lv 3 Elemental would [
]         make you absorb the poison damage (when poisoned)!                 [
]                                                                             [
] For what it's worth, here is a list of all of the *main* negative Statuses [
] in the game, their affect and the associated Materia:                      [
]                                                                             [
]-----------------------------------------------------------------------------[
]  DEATH       | The Character is instantly K.O'd | Destruct, Flash, Odin (S)[
```

		E-Skills L5 Death, Roulette
SLEEP	The player cannot attack until the Sleep has worn off or they are attacked by a physical attack	Seal, Hades (S), E-Skills Bad Breath, Frog Song
POISON	The character will periodically lose 1/32 of their health	Poison, Hades (S), E-Skill Bad Breath
SADNESS	Your Limit gauge will fill up at half its normal rate but you will also receive 30% less damage	
FURY	Your Limit gauge will fill at twice its normal rate but you accuracy will drop by 30%	
CONFUSION	You will lose control of the afflicted player and they will spin around in circles. When the player's ATB gauge fills up whoever they are looking at will then get attacked by the player. If they attack themselves then they will be cured of the Status	Mystify, Contain, Hades (S), E-Skill Bad Breath
SILENCE	You will not be able to cast magic spells	Seal, Hades (S)
SLOW	The player's ATB gauge will fill up at a slower rate	Time, Hades (S)
STOP	The Player's ATB gauge will stop filling up all-together	Time, Contain, Choco/Mog (S)
FROG	All Materia is broken and attack power is greatly reduced	Transform, Hades (S), E-Skills Bad Breath, Frog Song
SMALL	Attack damage reduced to 1	Transform, Hades (S) E-Skills Bad Breath, L4 Suicide
PETRIFY	Basically the same as being K.O'd only you won't lose your Limit gauge progress, and it can be cured by other means i.e. Soft instead of Phoenix Down. If all three characters are Petrified then it's game over	Contain
SLOW-NUMB	The same as Petrify only a countdown timer will appear above your head	
DEATH - SENTENCE	The same as Death only a countdown timer will appear	E-Skill Death Sentence

] | above your head | [
]--------------+----------------------------------+---------------------------[
] BERSERK | You will lose control of the | Mystify   [
] | player and they will attack | [
] | automatically when their ATB | [
] | gauge fills up for 1.5x their | [
] | normal damage | [
]--------------+----------------------------------+---------------------------[
] PARALYZED | Virtually the same as Stop, just | Hades (S)   [
] | doesn't last as long and your | [
] | Limit gauge won't fill up | [
]--------------+----------------------------------+---------------------------[
] DARKNESS | Halves the accuracy of your | [
] | physical attacks. Enemies are | [
] | not affected by Darkness | [
]---[
]   [
] The Contain Materia really is one of the best Materias in the game as it   [
] also inflicts Status changes as well as having Elemental properties. Hades   [
] is a Summon that can also be linked to our weapon or armour with Added   [
] Effect to attack/protect with/from some nasty Statuses. Don't forget White   [
] Wind and Esuna can cure you from most Statuses.   [
]   [
] 91% of all enemies are vulnerable to Slow, 73% are vulnerable to Silence,   [
] 67% are vulnerable to Sleep and 62% are vulnerable to Stop, making the   [
] Time Materia or the Seal Materia the best pieces to attach onto your   [
] weapon for now, at least until you obtain Contain and Hades on Disc 2.   [
]   [
] Adding Choco/Mog to your weapon with Added Effect will add the 'Stop'   [
] Status to your attacks, which is pointless seeing as you could just   [
] combine Time to your weapon to have a chance of inflicting Stop & Slow.   [
] The level of the Time Materia doesn't matter btw; a level 1 Materia will   [
] still pair all the Statuses attributed to that Materia. You can check the   [
] 'Status' tab in the menus to see for yourself.   [
]   [
] Lastly, there is an incredibly useful accessory out there called a Ribbon.   [
] This little beauty can protect you from virtually any harmful Status, and   [
] there are a total of 2 to collect. Additionally, they can be morphed from   [
] two different creatures.   [
]   [
] A comprehensive guide to Statuses can be found in section E.09.   [
]____[

Wow that was a long side note. I feel it's more important to learn the game bit by bit instead of having all the information crammed into one large section either at the front or the back of a guide which probably won't get read until one has finished the game and by that point it was too late, one has already missed out on some crucial information yadayada.....

Love me or hate me, I acknowledge that my explanations can be slightly long-winded. And with that in mind, let's crack on with the game shall we!

Set up the Added Effect Materia (or don't), then walk back over the oil slick and to the right. Follow the path north, then down the visible flight of steps to the south to come to a chest containing the [BLACK M-PHONE], which is the first 4 slotted double growth weapon.

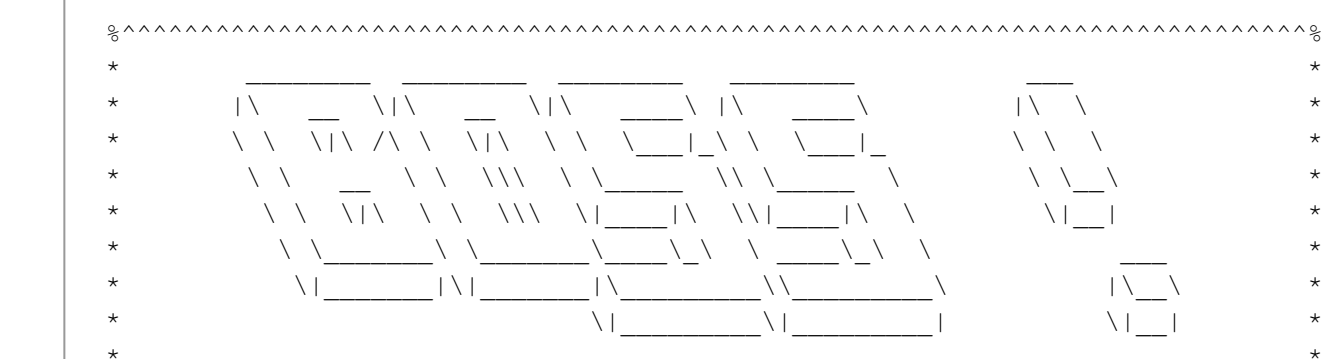
Then head north, past the flight of steps to the visible chest that contains an [ETHER]. Now make your way back up the flight of steps and head north to the next screen.

Here you will see a 'knuckle duster' like branching in the caves. Number them 1 to 5, left to right. 1 basically leads back round to 5, and 3 is a dead end. Head through 4 first and fight the Stinger that lays waiting for you. Don't forget to cast Mini on it (Frog Song also works well), and head up the path to grab an [X-POTION] from the chest.

Now head back down to the knuckle duster, this time going through 2 to fight the second Stinger. Then head west, then south through the rocks, then bear right to find a fork in the path leading to the chest that contains a [FAIRY RING], which is basically an upgraded version of the Star Pendant.

Now make your way north to the third and final Stinger's web, then head through a hidden split in the rocks to the left to grab a [TURBO ETHER] from the visible chest.

Time to heal-up and Ether-up, we're about to fight a boss. Change to Elemental=Choco/Mog on someone's weapon, equip someone with the Fire ring and replace Transform with Shiva. If anyone has the All=Fire set up then change it for All=Ice. In fact stay away from Fire altogether. Head to the north screen and eventually you'll be face to face with:



As you can see, Beta and Aqualung are off the table. Stick to mainly Ice attacks and you should be fine. Cast Haste and then open with Shiva. You only have to destroy the main guy at the back but killing his pets will net you extra EXP etc. That's what the Elemental=Choco/Mog is for. The fact that this boss can drain your MP, aswell as the fact that Soul Fire can 'posses' you means that you may want to consider finishing him off as quickly as poss. He is weak against Holy which means casting cure or White Wind on him will damage him, you could even kill him in one hit with an X-Potion, but where's the fun in that? Once he is finito you will be rewarded with your second 4-slot Double Growth weapon, the [WIZER STAFF].

BOSS	GI	SOUL
BATTLE: 14	NATTAK	FIRE X 2
-------Lv:	29---------	21------
-------HP:	5500-------	1300----
-------MP:	200--------	220-----
------EXP:	1400-------	200-----
-------AP:	150--------	10------
------GIL:	3000-------	100-----
-----DROP:	Wizer Staff	--------
---ABSORB:	RES--------	FRE-----
NULLIFY 1:	GRV--ERT---	PSN--GRV
NULLIFY 2:	WTR--------	ERT--WTR
---DOUBLE:	HLY--------	HLY--WND

GRAB THAT MATERIA! After the Boss you will be able to pick up the [GRAVITY MATERIA]. Note that if you missed it here you *will* have another chance of obtaining one. A few scenes will play out and eventually you will have to select your party.

Once you're ready you can now purchase any weapons that you didn't buy earlier, and make sure to leave with at least 1 MP Plus Materia (you should already have 3 HP Plus's).

Now make your way out of Cosmo Canyon to have Red XIII re-join the group. You'll now have the Seraph Comb in your equipment, which is a weapon for Red XIII.

NOTE - If you encounter the Bagrisk, try to steal a Vagyrisk Claw from it. This can be much easier said than done, as your steal attempt is broken into three steals - the first two are for a Soft, the third for the Vagyrisk Claw, and the higher the level of the thief, the higher the chance of obtaining a Soft on the first two attempts.

```

]_____________________________________________________________________________[
```

Now make your way north to head towards Nibelheim, the home-town of Cloud and Tifa. As you enter you will notice something isn't quite right...

Go into the house on the right and head up the stairs. In the attic you'll find two weird looking things, one of them will give you a [LUCK SOURCE] if you talk to it.

Now head into the next house along, Tifa's house and go into the kitchen. Another, larger black blob at the back here will give you a [TURBO ETHER]. He has the number 11 tattooed on him. (Hang on a minute, didn't a guy in Midgar Sector 7 have a tattoo on him? hmmm...)

Now head up the stairs and in the northern bedroom to grab the [PLATINUM FIST] from number '4'. You can head into Tifa's bedroom if you like and play her piano again, aswell as reading an incredibly interesting note left on her writing desk.

The next house along is Cloud's old house, there's nothing much here other than a bit of weird banter, so head into the next house on the other side of the street to grab an [ELIXIR] from number '12'. You can also buy a few items from here.

Now head into the inn and grab a [LUCK SOURCE] from number '6'. Note that if you opt to take the Luck Source then you will not be able to grab the Mind Source in a sec (due to a bug). You can rest here for 100 gil if you like, I suggest doing so as the next area can get rather tricky.

Make your way north to the Shinra Mansion. If you were to talk to one of the blobs outside you'll learn that Sephiroth is inside. The left side "blob" will give you a [MIND SOURCE], provided that you didn't obtain the Luck Source just (you cannot grab both). The Mind Source will be misspelt as "Mind Plus".

I suppose we'd better take a look inside then. Save first.

> ---HALVE: [-------] [---GRV] [---GRV] <  basement.                         |
#~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~#                                     |
|                                                                           |
| The Jersey will only use ???? if their left counter is down, which will be |
| as soon as the battle begins. When their left counter is down they will    |
| only use and be hurt by physical attacks. When their right counter is down |
| they will only use and be hurt by Magic attacks. ???? will deal damage     |
| equal to your Max HP - Current HP. Turbo Ethers are an easy steal from     |
| them.                                                                     |
|                                                                           |
| The Dorky Face can really ruin you if you're not prepared. MAKE SURE to    |
| equip the Peace Ring on someone and to have the Added Effect=Mystify combo |
| on someone else's armour. For the Ghirofelgo have Gravity on you weapon,   |
| you can also cast the E-Skill Laser to damage it critically. Oh, and for   |
| the Mirage, DON'T cast L4 Suicide on them, it'll just mirror back to you.  |
|                                                                           |
| The Ying Yangs are the most annoying enemy in the game. Yang gains a boost |
| to Magic when hit with a Magic attack ("Yang's excited"), and gains        |
| Strength when hit with a Physical attack ("Yang's happy"). Yang also has   |
| very high Magic Defence, while Ying has very high Physical Defence.        |
+---------------------------------------------------------------------------+

--Items - Silver M-Phone, Twin Viper, Magic Source, Enemy Launcher,
          Odin Materia, Destruct Materia
--Boss  - Lost Number Lv 35 (Cosmo Memory)
--Extra - Basement Key, Silver Armlet (recruit equipment)

  Make note of my set-up before going inside, particularly the fact that I
have set-up defence from Confusion:

 1) Cloud - Lv 28 (Front)

     Butterfly Edge - All=Time, Sense, Steal
     Silver Armlet  - All=Restore, HP Plus, MP Plus
     Sprint Shoes

 2) Tifa - Lv 25 (Front)

     Tiger Fang    - Elemental=Gravity, Deathblow, Enemy Skill
```

Silver Armlet - Added Effect=Mystify, HP Plus, MP Plus
Champion Belt

3) Red XIII - Lv 26 (Front)

Seraph Comb - Revive, Heal, Manipulate, Enemy Skill
Silver Armlet - All=Lightning, HP Plus, MP Plus
Peace Ring

NOTE - If you have a Lv 2 Elemental at this stage (it's unlikely) then you could equip it with any other non-Element Materia (such as HP Plus) to protect yourselves from attacks which use the "Hidden" Element. 2 of the Dorky Face's attacks us Hidden, and as such you would be able to protect yourself from Confusion for all 3 characters that way! Use QSI Link [Hidden] for more info!

First things first, let's scoop up all of the items. Head through the right door on the 1st floor to come to a chest containing a [SILVER M-PHONE].

Now make your way back round to the northern hallway on the 1st floor to obtain the chest to the east that you saw just containing the [TWIN VIPER].

Now make your way to the eastern wing on the 2nd floor and enter the northern room for a chest containing a [MAGIC SOURCE]. If you encounter the Jersey, you can learn ???? from them, which they will use if they haven't yet been attacked. Steal from each one for easy Turbo Ether steals.

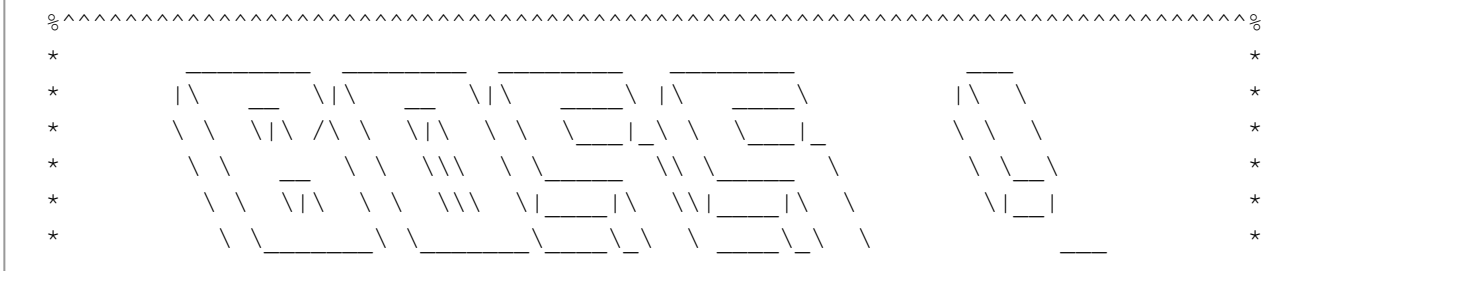
Lastly, head to the western wing on the 2nd floor for a chest containing the [ENEMY LAUNCHER].

SIDE NOTE - OBTAINING VINCENT

We are now about to recruit our 2nd optional character in the game, Vincent Valentine. In order to do this we have to embark on a mini-game. First head to the bottom left of the screen of the entrance to find a note. Contained within the note are some clues that will lead to the combination of a safe found on the 2nd floor western wing.

For what it's worth I'm not going to help you out..... just yet. See if you can figure it out yourself. If you think you've cracked it then try to open the safe to fight the Boss, Lost Number. Otherwise skip down to just below the Boss section where I shall reveal the combination and how you were to have figured it out. Just remember that whilst inputting the numbers you cannot go past the correct digit, otherwise you'll have to start over.

NOTE - Equip Added Effect=Choco/Mog on to someone's weapon, this Boss is vulnerable to Stop. Elemental=Lightning in you armour would be good too.



```
*          \|_______|\|_______|\_________\\_________\          |\__\        *

*                                                                              *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

O.K., so you've either figured out the puzzle on your own in which case you can skip out the next paragraph, or you've given up (or you're just lazy) and you want to know the combination the easy way. Here's how to solve it:

Dial 1 - Right 36 - 'The lid of the box with the most oxygen.' This was the treasure chest we opened on the western side of the 2nd Floor.

Dial 2 - Left 10 - 'Behind the ivory's short of tea and ray.' This was written on the floor behind the piano on the 1st Floor on the western side.

NOTE - This is left to the number 10 (so left 26 clicks).

Dial 3 - Right 59 - 'The creek in the floor board near the chair on the second floor... Then to the left five steps, up nine steps, left two steps and up six steps.' This is the one I remember struggling with. In the eastern room on the 2nd floor, search the hallway in line with the chest.

Dial 4 - Right 97 - 'The fourth has been written in invisible ink....' When selecting which clue you'd like to read you can bring the finger cursor down to the fourth line which will give the answer away in invisible ink.

```

+-------------------------------------------------------------------------+
```

Now that you have opened the safe and defeated Lost Number, set your Materia back to the way it was and GRAB THAT MATERIA! the [ODIN MATERIA], and also

the 'Key to the Basement' from the safe itself. If you've unlocked all of Red XIII's Limit Breaks then you can go ahead and teach him Cosmo Memory (by selecting it from the item menu), unlocking the 'A Universe Of Pain' Trophy.

NOTE - Odin can be paired with Added Effect for the 'Death' Status.

Now head down the spiral staircase on the eastern 2nd floor wing, and into the basement. Before reaching the lab, go through the now open door leading to a coffin. inspect the coffin to talk to the man residing inside about Sephiroth.

After he has finished, inspect the coffin one more to name [VINCENT]. When you get the dialogue box “let me sleep” it's time to leave. Congratulations, you've now acquired Vincent! He'll join your party as you leave the basement (unlocking the Won't You be My Valentine? Trophy). Before doing that however, head into the laboratory to the east for an encounter with someone..... (There's that name again, Professor Gast..)

After he has finished confusing Cloud talking about Jenova and Reunion, he'll leave behind the [DESTRUCT MATERIA]. Before making your way out you can examine various reports in the main office, and you can also examine the two test tubes in the lower right corner of the lab.

That's just about all there is to do here for now. Head out of the Shinra Mansion (grabbing ???? from the Jersey on the 2nd floor if you haven't already), rest up at the inn and head out of Nibelheim through the northern exit to the World Map. Follow the mountain path north until you reach Mt. Nibel.

VINCENT VALENTINE

1 - GALIAN BEAST (default)	2 - DEATH GIGAS (40 kills)
Turns into a Galian Beast	Turns into a Death Gigas
3 - HELLMASKER (96 kills)	**4 - CHAOS**
Turns into a Hellmasker	Turns into Chaos Use the item Chaos Found on Disc 2 in Lucrecia's Cave after obtaining the Submarine

---

--D1.15 C - Mt. Nibel (“I will go North past Mt. Nibel. If you wish to know... then follow...”)

```

#~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~#  as the Zuu is a flying creature.    |
|                                        Consider revisiting this place once |
| you've obtained the Morph Materia as you can gain quite a few Power        |
| Sources from the Screamer's! The Zuu is found on the bridge, the paths to  |
| the reactor, and at the reactor (it is only "flying" at the bridge); the   |
| Screamer is found at the reactor and the paths leading to the reactor; and |
| the Dragon is found in the mountain caves and on the path to the reactor.  |
|                                                                            |
|  NOTE - The Dragon will drop a Fire Fang if you haven't stolen from it, so |
|         don't steal more Gold Armlets than you actually need as the Fire   |
|         Fangs can help in the Battle Square.                               |
+----------------------------------------------------------------------------+

--Items - Rune Blade, Plus Barrette, Powersoul, Elixir, Elemental Materia,
          Sniper CR, All Materia, Counter Attack Materia
--Boss  - Materia Keeper Lv 38 (Jem Ring)

  This is my set up going into Mt. Nibel:

 1) Cloud - Lv 30 (Back)

     Butterfly Edge - All=Fire, Heal, Steal
     Silver Armlet  - All=Restore, Long Range, HP Plus
     Sprint Shoes

 2) Vincent - Lv 29 (Back)
```

Peacemaker - Elemental=Choco/Mog, Enemy Skill, Sense
Silver Armlet - Manipulate, Deathblow, HP Plus, MP Plus
Champion Belt

3) Yuffie - Lv 25 (Back)

Pinwheel - Added Effect=Time, Revive, Enemy Skill
Silver Armlet - All=Ice, Steal, HP Plus
Fire Ring

Traverse through the winding paths of Mt. Nibel until you come to a path leading up the mountain. Having the Finger Indicator enabled with SELECT helps here. At the top of the mountain you'll find a chest containing the [RUNE BLADE].

Make you way back round the mountain side and back down onto the main path. Head towards the bridge on the left and just before you reach it you'll notice a path that bears off to the north. Make your way up the second mountain to obtain the [PLUS BARRETTE]. These paths can be slightly tricky to navigate, so once you do finally make your way back down to the main path head up and over the bridge.

NOTE - The soundtrack here, 'Under The Rotting Pizza' is one of my fav in the game. For a midi soundtrack that was made in the 90's, you can't help but appreciate the suspense and the tension that the track holds, not to mention the reverb of the bass and the crisp-ness of the drums (I have made music in the past so I can appreciate good production value. In fact, making this walkthrough isn't too dis-similar from making a track).

You'll eventually come to a large cavern with 5 pipes. Only number 2 and number 4 lead to treasure, the other three lead to nowhere special. Head down number 2 first to land on a rock containing the [POWERSOUL]. We'll circle back round for the remaining treasure a little later on.

NOTE - The Powersoul is a weapon for Tifa that doubles in power if she is either in critical HP, and quadruples if she is inflicted with Death Sentence (effects stack for 8x power). It is also double growth.

I never fight the Boss here straight away for some reason, although feel free to do so if you wish. Save the game regardless and then head through the southern screen. Drop down to the path below and head though the opening on the right. Had you ventured to see what was on the left you would have found the place where Sephiroth & co. had landed after the bridge had collapsed during the flashback.

In this screen you can make your way round to the top of the screen, and then double back through the not-so-obvious path to the opening on the left. Follow the path south to emerge at a chest containing an [ELIXIR].

Make your way back through to progress into the next screen. It seems that the 'knowledge of the Ancients that is contained within the Materia' (quote) has taken form. Just to the left of the life stream fountain is (breath in) GRAB THAT MATERIA! the [ELEMENTAL MATERIA]! (If you missed it at the Shinra HQ and you didn't 'jam on the piano' during the flashback then this will be the only place to obtain the Elemental Materia. This area is revisit-able.)

The next screen along takes you to a mini maze of sorts, follow your instincts to the chest containing the [SNIPER CR], a weapon for Vincent that has the max stat (255) for his attack%. Meaning, he'll never miss a shot with

this weapon equipped! Try pairing it with Deathblow for the ultimate combo (at this stage). Note that Vincent *may* miss a shot with Deathblow (although it's rare), it's only his normal attacks that are impossible to miss.

The next screen leads to another winding path. There's nothing to find on the right, so head west to eventually arrive at the reactor. You can take a look around inside if you like, but there's nothing to obtain. When you're ready, head past the reactor to return to the cavern with 5 shoots, a save point and the Materia Keeper!

NOTE - If you haven't managed to steal 3 Gold Armlets yet then don't worry, you'll be able to buy them for 2000 gil each in the next town along.

If you're planning on doing the Fort Condor battles then I suggest that you *make sure* to interact with the lower ladder to release its latch (do it anyway even if you aren't doing the FC battles). Now head up the other ladder to return to the shoots, this time sliding down No. 4. After picking up the [ALL MATERIA], head over to the save point and take a leak. No I mean, errr, save your game, obviously. It's time to come face to face with.....

An Achievement Note?

```
$$$
```

```
*                                                  |              |          | *
* This boss has some fairly powerful moves, so    | ---------Lv: | 38------ | *
* keep your players in the back row and keep      | ---------HP: | 8400---- | *
* your Big Guard topped up. Weaken him but DON'T | ---------MP: | 300----- | *
* kill him accidentally before he has used        | --------EXP: | 3000---- | *
* Trine, sense him to know what his current HP    | ---------AP: | 200----- | *
* is. When his HP starts to run low he'll use     | --------GIL: | 2400---- | *
* cure on himself so make sure to do the same     | -------DROP: | Jem Ring | *
* (cure yourselves, not the Materia Keeper,       | -----ABSORB: | FRE----- | *
* obviously) and stay away from Fire attacks.     | ----NULLIFY: | GRV----- | *
* Deathblow works nicely here with your           | ENEMY SKILL: | TRINE--- | *
* character that has the Champion Belt, and you   |______________________| *
* can also Poison him once you've learned Trine.                           *
* He'll drop the [JEM RING] once it's over.                                *
*                                                                          *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

Before continuing make sure to GRAB THAT MATERIA! the [COUNTER ATTACK MATERIA] that the Materia Loser drops behind. Now follow the new path to eventually emerge out onto the World Map. Counter Attack can also be won at the Chocobo Races.

NOTE - (sigh) The Counter Attack Materia. It may sound pleasing at first, the idea of having a 30% chance to Counter each time the bearer is hit. That is unless of course your trying to steal an item from your enemy. Or you are trying to fill your Limits up, or if you are trying to learn an Enemy Skill and you keep accidentally killing your opponent. only equip it if you are 100% sure that you actually want it.

```
 _____________________________________________________________________________
]                                                                             [
] SIDE NOTE - COUNTER ATTACK COMBO                                            [
]                                                                             [
]  A mastered Counter Attack Materia will have a 100% success rate of        [
]  countering, and the more you equip on one character the more times they   [
]  will counter. if you were to equip 8 mastered Counter Attacks onto one    [
]  person along with HP Plus and Cover, then they would retaliate to being   [
]  hit once with 8 attacks! 8 is the maximum you can equip by the way; any   [
]  more and they will not take effect.                                       [

-NULLIFY:	[---------ERT]	[-----------]	[---------]	[----------]	[--------]
--DOUBLE:	[---------FRE]	[-----------]	[---------]	[-------FRE]	[--------]

NOTE ON ENEMIES:

There are a number of new enemies here as aswell as old ones. Remember that the Mystery Ninja's Lv will vary depending on Cloud's current Lv (unless of course you've already obtained Yuffie).

- Large Forest - Bahba Velamyu, Battery Cap, Valron, Mystery Ninja (25%)
- Small Forest - Velcher Task, Kyuvilduns, Valron, Mystery Ninja (100%)
- Beaches - Crown Lance
- Grass - Velcher Task, Nibel Wolf, Chocobo Level 22

The larger forest is probably the best Limit Break training ground in the entire game! You will encounter the Battery Caps that have a 6x formation and can be hit with L4 Suicide. Also, the Valron here will take out 1/4 of your max HP with his Dive Kick move. Steal a few remedies from the Velcher Task as they can cure you of any Status. The Chocobo tracks west of Rocket Town holds the exact same Chocobo we encountered at the Gold Saucer Area. Lastly, equip items/Materia that protect you from Darkness (Battery Cap), Slow (Bahba Velamyu) and Poison (Velcher Task). Oh, and don't forget the Kyuvilduns are weak against Fire.

--Items - Yoshiyuki, Power Source, Drill Arm
--Boss - Palmer Lv 38 (Edincoat)
--Required gil - 36,600 (or less)

--Extra   - Gold Armlet (recruit equipment)
                 Fort Condor Battle #7 - Superball

As mentioned, the forest area is the absolute number 1 spot in the game for Limit Break Leveling. Don't spend any time in there now, however, there's still a few things to do and collect before we're ready to blast it here properly. For now, head clock-wise around the mountains in a reverse 'C' shape to eventually arrive at Rocket Town.

Head into the first house on the right to rest up for 100 gil. Then leave the Inn and head into the Weapon Shop on the left. Buy the following, deducting any Gold Armlets that you stole from the Dragons in Mt. Nibel (you're about to recruit someone that has a Gold Armlet equipped, also) :

1 x Shotgun   O=O O=O - Vincent   - 3100 gil
2 x Gold Armlet O=O O=O - Armour   - 2000 gil each
1 x Earring   - Accessory - 7500 gil
                               Total - 16,600 gil

NOTE - You can also buy a few Power Wrists here if you want, just bear in mind that the Champion Belt from the Gold Saucer will go down in price very shortly, and I do intend to take you to get a second one. Also, equip the healer of the group with the Earring as so they can heal more HP per Cure.

Equip your characters with their new wears, then head a little to the north to see a man standing outside of a house. Talk to him twice to look up at the rocket with him, and he'll willingly give you the [YOSHIYUKI], a weapon for Cloud that will double in power when one of Cloud's companions are KO'd, and will triple in power when both are KO'd.

Now head inside the house he old man was standing on front of, which turns out to be the Item Shop. Here we can buy a few new pieces of Materia, Barrier (10,000 gil) and Exit (10.000 gil). Exit will make you can escape from battles without having to hold down L1+R1 (so basically it's useless), and Barrier will do the same as Big Guard but without the Haste effect. You only really need to buy these to complete your Materia collection, although a levelled up Barrier can be quite useful.

NOTE - The Exit Materia can be used during the Battle Square to escape whilst still retaining all of your current BP, so it probably is worth getting. Just remember that if you escape the normal way (L1+R1) then you shall lose all of the BP earned in that battle.

There is absolutely nothing to do in the western house, so head over to the eastern most house and search the chest on the right for a [POWER SOURCE].

Now head into the final house on the north to find a chest containing the [DRILL ARM]. That's it for the miscellaneous things to do in Rocket Town so head out of the house you're in via the back door to talk to Shera.

After learning that the Shinra are expected to pay a visit to Rocket Town, you are advised to speak to Cid who is up in his Rocket. Not before.....

] SIDE NOTE - FORT CONDOR BATTLE No.7 [

] Aside from being the longest trek back to the Junon area, this will also [
] be your last. If you had forgotten to flip the ladder down in Mt. Nibel [

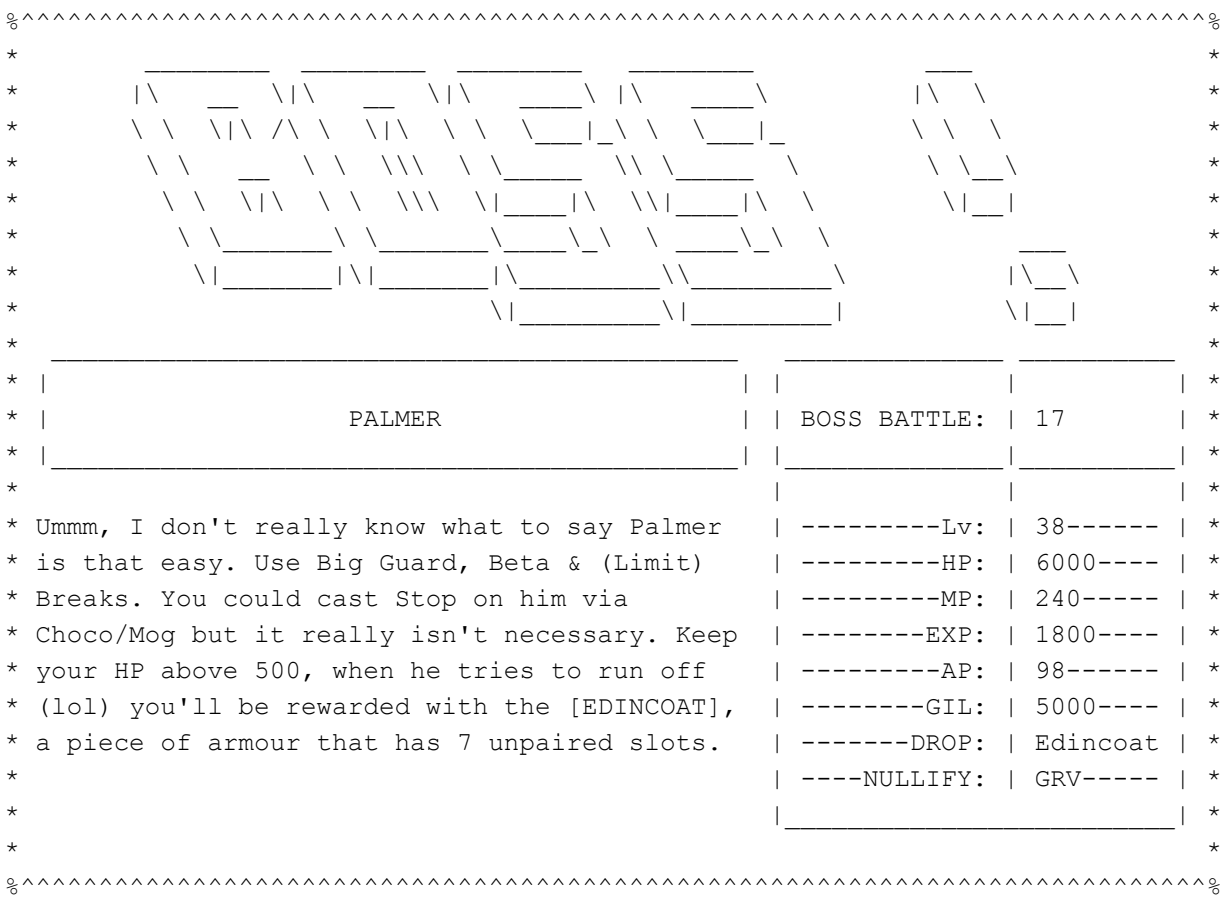
] then you'll have to go the long way round (at least you'd get to hear the [
] beat a little more). Your prize for this battle will be the Superball, a [
] weapon for Yuffie. This has to be fought after talking to Shera but before [
] talking to Cid. [
] [
] NOTE - In case you hadn't noticed by now, most of the weapons we obtain [
] come in batches. By that I mean the previous batch was 4 slotted [
] Double Growth weapons for everyone. The next batch will be the [
] same as the Superball - zero Materia slots but very high attack [
] power (just like the Umbrella for Aeris). These will help for a [
] certain quest. [
]_____[

When you return to Rocket Town make sure to rest at the Inn as there is a (very easy) Boss coming up. Enjoying the reggae attempt once more, head north towards the leaning Shin-Ra Type 26 to speak to The Captain. After naming him [CID], you will have a dialogue option come up. To continue with the story, choose option 1.

Head back into the northern house and make your way to the back to trigger a sequence involving yet another flashback. One of the things that I truly love about this game is how deep the side-characters stories are, Cid's is no different. Once you've regained control of Cloud head out to the front of the house.

Once Shera has beckoned you back into the house you will have time to set up for a particularly easy Boss battle, then head out through the back door and talk to Palmer.

NOTE - Palmer will take double damage from Sleep based attacks. Equip Added Effect with Seal on your weapon to see for yourself!



After watching a short FMV you will finally be able to fly the Tiny Bronco! Well, maybe not fly, more like swim about in shallow water, but it still

beats the buggy. Disembark on the nearby land mass to save, but DO NOT head north up the hill, otherwise you will trigger the start of a sidequest that must be completed before anything else can be done, and there's still a few things I wish for you to do before we embark on that adventure. Time to head anti-clockwise around the World Map for a load more optional sidequests!

NOTE - If you wanted to, you could battle around on the beaches where you landed (Wutai Area) to fight the Adamantaimai. Manipulate it, then have it cast Death Force on your characters to learn the Enemy Skill Death Force. Steal an Adaman Bangle from it aswell. We'll be returning here shortly anyway, so you can learn it then if you like, but it will help at the Battle Square if you plan to return there (which I advise to).

UPDATE - I have now created a map section! For a detailed ASCII map of the world broken into 5 segments, visit section F, or use QSI Link [Maps]. Here you will be able to plot your course accordingly, as you'll be able to clearly see the routes of shallow water that are available.

One last thing to mention before moving on, we have now recruited every character in the game! Assuming of course that you have recruited the two optional characters, Yuffie & Vincent. This shall be the last Limit Break rundown of the walkthrough:

CID HIGHWIND

1-1 BOOST JUMP (default) Attacks an opponent	2-1 HYPER JUMP (60 kills) Attacks all opponents, sometimes dealing [Death]
1-2 DYNAMITE (use 1-1 7 times) Attacks all opponents	2-2 DRAGON (use 2-1 6 times) Attacks and drains the HP/MP from one opponent
3-1 DRAGON DIVE (136 kills) Continuously attacks, sometimes dealing [Death]	4 - HIGHWIND Causes big damage to all opponents Use the item Highwind Found on Disc 2 in the Sunken Gelnika
3-2 BIG BRAWL (use 3-1 5 times) Attacks all opponents

\--/

 NOTE - If you decide to venture into the Gold Saucer then *make sure* not to
        head into Dio's Showroom in the Battle Square, as that will further
        the main story and you won't be able to remove Aeris from your party
        for quite some time after.

¬¬¬

- Every time you learn a Lv 4 Limit Break, you'll unlock a trophy.
  When you learn Great Gospel you'll obtain the See The Light Trophy.

--D1.17 B - Fort Condor Battle No. 8

From the lone house head south first and then east. You'll eventually come to a pyramid surrounded by forest. Remember its location and keep heading around it to navigate the tight gulley. Disembark at the beaches near to Fort Condor, your prize this time will be 3 x Turbo Ethers. If you've missed out a few battles, then I suggest completing the next few battles until you at least obtain the Superball.

NOTE- If you have less than 4000 Gil, read the next section to learn how to raise some in the shortest amount of time possible!

Strategy Update - You should really be getting the hang of this now. What I'm doing is creating 3 x Attackers scattered across the map, and as soon as the battle begins I'm slowing the speed down to one (with L1). I'll then command each troop to make their way down the hill as far is they can go. As enemies appear I will create a new soldier as far downhill as I can that is suited to the enemy that awaits.

If you haven't realised by now, you can end the battle prematurely by wiping out every single opponent in play. This is what you want to be aiming for, there's no need to hang around for the Boss. Just go all out on the offensive, and keep instructing your troops to head south. Speed the battle bar up to 4 once all commands have been given, then slow it back down when you need to give more commands. With this strategy you should never need to buy anything other than the three 'elemental' types (or 'rock-paper-scissors' types, you know what I mean), although feel free to experiment if you'd like to spice things up a little bit.

--D1.17 C - Gil Farming in Mideel

ENEMIES:	[SEA WORM]	[SPIRAL]	[HIPPOGRIFF]	[HEAD HUNTER]
------Lv:	[22]	[39]	[37]	[30]
------HP:	[9000]	[2800]	[3000]	[2000]

---HALVE:	[FRE]	[]	[]	[]
--DOUBLE:	[ICE]	[]	[]	[]

NOTE ON ENEMIES:

| |
| Make sure to have either the Peace Ring or Added Effect=Mystify equipped |
| to protect you from the Hippogriff's L2 Confuse. That person also ideally |
| wants to have an Enemy Skill equipped (for White Wind) or All=Heal (Esuna) |
| to be able to cure your characters from Confusion. You may want to equip a |
| Fairy Ring to protect you from the Sea Worm's Sandstorm move, which by the |
| way can only be fought at the beaches. Equip Elemental=Shiva on your |
| strongest character, as well as Counter Attack. The Head Hunter can only |
| be found in grassy areas. |
+---+

Follow the coastline around Fort Condor whilst heading for the land mass in the south eastern corner of the map. If you pass the Chocobo Ranch then you've gone too far. You should be able to disembark on the beaches of a dirt area with a small bit of grass. You'll know if you're in the correct area because it'll read 'Mideel Area' in the Menus.

You won't be able to access Mideel just yet, but you can fight the Sea Worm on the beaches for 5000 gil a pop! Not to mention 200AP! The Dragon Scales will help for the Battle Square, but they won't drop Turbo Ethers if you steal from them. With a whopping 9000HP, you may want to equip Ice on the character/s that don't have the Elemental=Shiva combo. The Sea Worms will be our main source of gil for the time being. Don't forget about the Enemy Lure Materia.

The Spirals give out tremendous amounts of EXP, but we really, really don't want that just yet. The only reason you'd want to battle them is for their X-Potions. They come in formations of 2 and 3, so two battles with them will net you 4 - 6 X-Potions, which will help for later.

I CAN'T STRESS THIS ENOUGH DO NOT spend a lot of time here. I battled the Sea Worms until I had 30,000 gil and I'd stolen 4 X-Potions then I left. The higher the level we become the easier (and subsequently more boring) the game will become. Make sure to leave with a minimum of 20,600 gil. It may be worth killing off one or two of your players so that they don't earn any Exp (remember that everyone who isn't in your party receives 0.5x the Exp earned in-battle).

NOTES - If you *haven't* been following this guide to the letter, and you're a low levelled wuss that plans to train here for a bit, then make sure to swing by Bone Village once you have 20,600 gil. You can buy some great Double Growth Armour there!

- We're going to be spending a little bit of time Limit Leveling shortly on, so don't worry too much if you don't raise a shed load of gil now. You'll need 20K for Bone Village, 30K for a Golden Ticket, 5K to play with in the Gold Saucer and 12K for the remaining 2 MP Plus's (unless you've already obtained them). The Golden Ticket is optional at this stage, and you could just spend 3K for the entrance fee.

- BIG THANKS to trueOgre_Killer for pointing this out - an incredibly easy way to earn gil without Leveling up is to battle around near Bone Village until you encounter 2 x Trickplay (Steal from the Vlakorados if you encounter it). The trickplay have a 17.4% chance of using Gold Mountain, which will add 800 to their value. In one battle I was able to walk away with roughly 40,000 gil, and less than 1000 EXP! Nice! Just watch out for L4 Suicide. Gold Mountain costs them 0MP to cast, so they can keep using it indefinitely.

- If an enemy has more than 30,000 HP, which the Vlakorados has, then you will not be able to cast Sense on that enemy.

--D1.17 D - Bone Village

--Items - Kjata Materia
--Required gil - 20,600

From Mideel head north along the eastern side of the continent. If you wanted to you could stop off by the Chocobo Ranch to learn L4 Suicide and/or Chocobuckle for your 2nd Enemy Skill if you haven't already, but it isn't necessary just yet. You could also learn Matra Magic near Midgar if for some weird reason you haven't obtained it already.

If you wanted to, you could stop by at Kalm to buy another Steal Materia (to make 3) for 1200 gil each. Not only will this help us when we need to steal rare items, but also...

```
 ____________________________________________________________________________
]                                                                            [
] SIDE NOTE - MUG                                                            [
]                                                                            [
] Just like with the Counter Attack Materia, we kind of do and don't want    [
] Mug, which is what Steal will become once it's levelled up. Yes it's nice  [
] being able to weaken our opponent whilst also attempting to steal from     [
] them, but it can be rather frustrating when you end up killing them with a [
] critical blow. My advice is that when you level Steal up, keep it equipped [
] but also equip another Lv 1 Steal onto someone else.                       [
]                                                                            [
]  NOTE - There is a glitch involving Vincent using Mug to skip out          [
]         animations. Use QSI Link [Vincent Mug Glitch] for more details.    [
]____________________________________________________________________________[
```

From Kalm head north then west passing Midgar to your left. If you haven't already, enable the mini-map in the lower right corner and head for the marked area on the Northern Continent. You'll know if you're in the right area because you'll see some giant dinosaur bones surrounded by a peculiar forest.

NOTES - I don't plan on battling here, so I won't give an enemy description until we revisit this place during the story. Just note that if you encounter the Vlakorados (a red dragon) here then you may wish to consider escaping from these things as they have an insatiable 33,333 HP! Do steal a Carob Nut from them however....

- As mentioned, the Trickplay a great source of Gil at this stage in the game.

Once inside Bone Village you can talk to the guy on the right to enquire about Sephiroth, otherwise talk to the guy sitting down on the left to buy 3 x Diamond Bangles (3200 each) and 3 x Rune Armlet (3700 each) coming to 20,600 gil. We now have 4-slotted Double Growth Armour for everyone, yippee!

Now climb up the ladders to the right and head through the exit on the left. After heading through one screen, you'll arrive in the sleeping forest. You won't be able to progress just yet, but you can obtain the Kjata Materia

here. Stand at the base of the first tree you see on the left and after about 4 seconds a red Materia orb will start floating upwards. GRAB THAT MATERIA! the [KJATA MATERIA]. If you don't get it now then you can get it later on.

NOTES - If you're Materia inventory is full then the game would normally disallow you from picking up any more pieces. Kjata unfortunately is glitched, and if you were to pick it up with a full Materia inventory then you would remove Kjata from the screen without adding it to your inventory, thereby losing it forever.

- Kjata will hit for Fire, Ice, Lightning & Earth. This isn't always a good thing as the enemies strengths could end up softening the blow. Equipping Kjata with the Elemental Materia has absolutely no affect whatsoever.

- Kjata has been re-translated as 'Kujata' in the Steam/PS4 release. I'll be referring to the summon as its original, mis-spelt name - Kjata.

--D1.17 E - Limit Break Training No. 5

This will be the last time this guide will focus on Limit Break training as the large forest near Rocket Town/Mt. Nibel is the ultimate spot that you can keep coming back to (head west from Bone village). Do not spend more time here now than is necessary, in fact I'm only getting a few kills with Vincent and a few uses of Cid's 1-1 then I'm moving on. Once Cloud hits 35, stop training (even that may be a little too high). This is a very long game, and right now we're roughly a third of the way through it, so there's no need to Limit level everyone to the max straight away.

If you are planning to level up here then I suggest you make use of the Rune Armlets, and don't forget about the Enemy Lure Materia. Trine will take out the 6 x Battery caps in one hit, and Manipulating the Valrons is the best way to fill up your Limits. Here is my set up:

1) Cloud - Lv 33 (Back)

Rune Blade - Gravity, Heal, Restore, Manipulate
Rune Armlet - Steal, Long Range, Enemy Lure, HP Plus
Earring

2) Vincent - Lv 32 (Back)

Sniper CR - All=Restore, Enemy Skill, MP Plus
Rune Armlet - Revive, Deathblow, Counter Attack, HP Plus
Champion Belt

3) Cid - Lv 32 (Front)

Spear - All=Time, Enemy Skill, Cover
Rune Armlet - Poison, Earth, Elemental, HP Plus
Sprint Shoes

Just to re-cap, here is a table listing the requirements of each Limit Level. The same table can be found in section E.02.

	Lv 1-1	Lv 1-2	Lv 2-1	Lv 2-2	Lv 3-1	Lv 3-2
Cloud	Default	8 Uses	120 Kills	7 Uses	320 Kills	6 Uses
Barret	Default	9 Uses	80 Kills	8 Uses	160 Kills	6 Uses
Tifa	Default	9 Uses	96 Kills	7 Uses	192 Kills	6 Uses
Aeris	Default	8 Uses	80 Kills	6 Uses	160 Kills	5 Uses
Red XIII	Default	8 Uses	72 Kills	7 Uses	144 Kills	6 Uses
Yuffie	Default	8 Uses	64 Kills	7 Uses	128 Kills	6 Uses
Cait Sith	Default	N/A	40 Kills	N/A	N/A	N/A
Vincent	Default	N/A	40 Kills	N/A	96 Kills	N/A
Cid	Default	7 Uses	60 Kills	6 Uses	136 Kills	5 Uses

Here are my Limit levels once I was done:

```
    Cloud: Lv 35 Limit 2-2 Climhazzard
   Barret: Lv 30 Limit 2-2 Hammerblow
     Tifa: Lv 31 Limit 2-2 Meteodrive
    Aeris: Lv 30 Limit 4-1 Great Gospel
 Red XIII: Lv 32 Limit 2-2 Stardust Ray
   Yuffie: Lv 31 Limit 1-2 Clear Tranquil
Cait Sith: Lv 29 Limit 1   Dice
  Vincent: Lv 34 Limit 2   Death Gigas
      Cid: Lv 33 Limit 1-2 Dynamite
```

Once you're happy with your Levels and you're ready to move on you'll have a few options available to you. If you weren't too keen on grinding the Super Dunk machine at the Gold Saucer and you don't fancy bashing it out some more to obtain some prizes at the Battle Square, then you can skip out the next section and jump straight to Yuffie's Sidequest. Just bear in mind that the Champion Belt has now gone down in price and can be obtained for 25,600 BP, and having two of these will massively help for Yuffie's Sidequest.

NOTE - If you're passing through Cosmo Canyon, you should stop by to grab some MP Plus Materias so that you own 3.

- (Best Bromance) If you have been following my guide to the letter, then you should have done everything necessary to secure Barret as the winner of the affection game, however completing Yuffie's sidequest will boost her affection towards you. This shouldn't matter, but If you wish to play it safe, then I suggest (after you've finished up with the optional Gold Saucer stuff) skipping down to section D1.19 - Gold Saucer Re-visited before doing Yuffie's sidequest.

--D1.17 F - Battling it Out at The Battle Square (again)

--Items - Champion Belt (25,600 BP), Speed Plus Materia (12,800 BP),
Pre-Emptive Materia (6400 BP)

Now that all of the prizes have gone down in price I recommend heading back to the Gold Saucer. Before heading to the rope-way, first equip all three characters with the Steal Materia and head to the rope bridge just past North Corel. Battle around to steal some Right Arms from the Bombs here, they really do tremendous amounts of damage to all enemies.

Once you're ready to head up the rope-way, set Cloud up with the following and rest in North Corel so that you enter the Gold Saucer with max HP/MP.

Cloud - Lv 35 (Back)

Butterfly Edge - Heal, Restore, Enemy Skill, Deathblow
Diamond Bangle - Added Effect=Time, Counter Attack, Long Range, HP Plus
White Cape

Inflict Cloud with Sadness after you have slept in the Inn.

If you don't have enough to buy the Gold Ticket for 30,000 gil, then don't fret. As soon as you enter the Gold Saucer, head over to the Ghost Square to stock up on items, particularly Echo Screens. Then head to the Wonder Square to accumulate roughly 150 GP from the Super Dunk Game.

When you're ready, head back to the station and save your game for 5GP, then head to the Battle Square. **DO NOT** head into the showroom to the right of the arena as that will further the story, which will mean that you will not be able to take Aeris out of your party until after the Temple of the Ancients.

The enemies here now are quite harder, and you will probably find yourself dying more than you did previously. Trine will be your best friend. Use the Exit Materia or Smoke Bombs if you have any to escape from the battle whilst retaining all of your BP. Always play it safe, cast Big Guard on the 7th battle to prepare yourself for the 'All Materia Broken Handicap', and remember, the harder the handicap the higher the BP reward. That only really matters for the final two handicaps though.

Remember to use Laser on the Ghirofelgo, and L4 Suicide on the Dragon and Ying Yang.

You'll notice that Cloud's Level 4 Limit Break, Omnislash is now available for a whopping 51,200 BP! This will go down in price eventually, and we will be able to gain GP much more easily when that does happen, so unless you've got a lot of time to spare then I suggest just getting a 2nd Champion Belt, the Speed Plus Materia and the Pre-Emptive Materia for a total of 44,800 BP.

Use any BP that you have left over on buying another Enemy Lure to make three in total as the effects will stack with each other, then buy Bird Wings and Remedys. The S-Mines are a waste of BP. If you have any GP left over then I suggest trying to score over 5000 in the Speed Square to obtain the Umbrella, just remember to save first. If you do manage to nab the weapon then it will help later on, but it's so bloody hard to do so that I wouldn't blame you if you decided to give up! I managed to obtain it by watching more than a few youtube vids more than a few times.

NOTE - If you're playing on the PC/PS4 version, then you can shoot the
Zeppelin propeller to gain a ridiculous amount of points, making the

Umbrella easily obtainable. Look it up!

And that just about wraps up all of the optional Sidequests, for now. That is of course excluding Yuffie's Sidequest, probably the biggest sidequest of the game. You have a few varying options available to you now. Seeing as you can complete her sidequest at any point before the end of Disc 2, you could if you wanted to come back later on to complete it. If this is what you want to do then head into Dio's Showroom to continue on with the story and skip to section D1.19 - Gold Saucer Re-visited. Otherwise head back to the Tiny Bronco and then make your way to the land mass west of Rocket Town.

NOTES - If your characters are currently at a fairly low level then it would be worth considering completing the Temple of the Ancients first before doing Yuffie's sidequest. The weapons found there, like the Umbrella, will massively help out.

- If you plan on taking Aeris along to do Yuffie's sidequest, then I would advise continuing on with the main part of the story, as it requires you coming back to the Gold Saucer to engage in a battle at the Battle Arena. Doing so now would save you having to re-equip yourself, and would also save you the entrance fee (assuming you haven't bought a Golden Ticket yet). Skip down to D1.19 if this is for you. This is also recommended if you're after the Best Bromance Trophy. Once you commit yourself to the next step of the story, you won't be able to remove Aeris from your party until after the Temple of The Ancients.

```

|                              NOTE ON ENEMIES:                           |
|                                                                         |
| Both Death Force and Magic hammer can only be learnt by Manipulating the  |
| enemy. Death Force will make you invulnerable to 'Death' for one battle   |
| which can prove quite useful. Not nearly as useful as Magic Hammer which  |
| will drain 100MP out of all opponents! This should save on Ethers, just   |
| bear in mind that it costs 3MP to cast. The Adaman Bangles are worth      |
| Stealing, also.                                                         |
+-------------------------------------------------------------------------+
```

--Items - Magic Shuriken, Hairpin, MP Absorb, Swift Bolt, Elixir
--Extra - Turtle Paradise Poster #6

If you're struggling to find the shoreline that you're supposed to be looking for, then head for the ocean closest to Cosmo Canyon. With Cosmo directly behind you, head west to find the dirt beach that you're after on the left. Oh, and it goes without saying that you must have recruited Yuffie in order to embark on this quest. If for some weird reason you still haven't then head to the forests near Rocket Town, now!

NOTES - While Yuffie's sidequest doesn't have to completed now, it does has to be done prior to the end-of-Disc-2 events. If you fail to partake in the sidequest then you shall be forever missing out on the MP Absorb Materia. You *can* still partake in the added mini-quest (The Pagoda) on Disc 3 if you haven't completed Yuffie's main sidequest first.

- For a detailed map of Wutai see section F.03.

Before making your way up the hill, battle around on the shoreline to encounter the Adamantaimai to steal 3 x Adaman Bangles from them, and to learn the Enemy Skill Death Force if you haven't already. The Adaman Bangles

have very high defence from physical attacks, but only two Materia Slots. Remember that the Magic Defence stat is always fixed to your Spirit level, so you don't actually lose anything even though the weapon stat for Magic Def will be in red (this bug has been fixed in the Steam/PS2 versions). You won't encounter the Razor Weed until further up past the dirt area.

NOTE - I sometimes arrange my Party according to what's about to happen in the storyline. I have always brought Tifa & Aeris along on this one, although I have a feeling Barret & Red XIII were meant to tag along...

Start heading up the hill to engage in an altercation with two Shinra Guards. You'll have to fight the Attack Squads which are fairly easy.... but something's missing....

Wait, what the..... That #%*%&!!! Ok, so now you know why I've recommended a 2nd Champion Belt, we're going to be relying on pure strength for this side quest. Equip the Adaman Bangles too, and also any high attack-powered weapons (like the Umbrella). If you had Yuffie in your party when you went into the fight then she will leave your party and Barret will join once the fights over. Unless Barret was already in your party, in which case Red XIII shall join.

NOTE - Yuffie can only steal 48 pieces of Materia, if you have more then 48 then you will be left with a few to play with. There is a particular order to the Materia she take:

01 Master Summon	22 Slash-All	43 Odin	64 Cover
02 Knights of Round	23 EXP Plus	44 MP Turbo	65 Destruct
03 Master Command	24 Alexander	45 Titan	66 Gravity
04 Master Magic	25 Kjata	46 Ramuh	67 Time
05 Bahamut ZERO	26 Bahamut	47 Deathblow	68 Barrier
06 W-Summon	27 W-Item	48 Ifrit	69 Exit
07 W-Magic	28 Contain	49 gil Plus	70 Transform
08 Mega-All	29 HP<->MP	50 Counter Attack	71 Mystify
09 Counter	30 Morph	51 Shiva	72 Seal
10 Typoon	31 Steal As Well	52 Long Range	73 Revive
11 Hades	32 Added Cut	53 Pre-emptive	74 Earth
12 Quadra Magic	33 Final Attack	54 Chocobo Lure	75 Poison
13 Mime	34 Manipulate	55 Choco/Mog	76 Sense
14 Magic Counter	35 Sneak Attack	56 Enemy Away	77 Steal
15 Ultima	36 Added Effect	57 Luck Plus	78 Heal
16 Shield	37 Comet	58 Magic Plus	79 Restore
17 Full Cure	38 Elemental	59 Speed Plus	80 Lightning
18 Neo Bahamut	39 Throw	60 Enemy Lure	81 Ice
19 Phoenix	40 Leviathan	61 All	82 Fire
20 Enemy Skill	41 HP Absorb	62 HP Plus	83 Underwater
21 Double Cut	42 MP Absorb	63 MP Plus	

This was my load-out following the fight:

1) Cloud - Lv 36 (Front)

Yoshiyuki - Ice, Fire
Adaman Bangle - Sense, Steal
Fury Ring

2) Tifa - Lv 32 (Front)

Tiger Fang - Heal, Restore, Ice, Fire
Silver Armlet - Sense, Steal
Champion Belt

3) Aeris - Lv 31 (Front)

Umbrella -
Adaman Bangle - Restore, Steal
Champion Belt

Obviously having the Fury Ring attached to Cloud will make his Materia set-up obsolete, but at least they will still receive AP. It's completely up to you of course, the Sprint Shoes or the Power Wrist would make a suitable alternative.

NOTE - Comically, it is possible to sell/discard every single piece of Materia prior to the sidequest, and still embark on it! It wouldn't make much sense, and you wouldn't be able to leave Wutai until he had his Materia back.... all 0 pieces of it! Lol

Make your way across two bridges, then head south and under the bridge you just crossed. Now make your way north to cross a third bridge then keep heading north to eventually arrive at Yuffie's home-town, Wutai!

SIDE NOTE - MATERIA CAVES

Dotted around the map are 4 Materia caves that can only be accessed by 'special' means. You'll probably spot one these caves whilst on your way to Wutai. You would've also spotted one on your way to North Corel. The Materia held within these caves are quite special, more on how to obtain them later on. (You just gotta love this game for its abundance of collectables and things to do, if nothing else!)

As soon as you enter the tranquil town of Wutai you'll see Yuffie. We're going to be visiting each house soon enough, so for now make just your way to the save point then head north west to the tall Pagoda.

In the next screen along head into the house on your right where you can rest for free in the room just on the left. Once you've slept, head through the concealed passage way on the left to find a chest containing the [MAGIC SHURIKEN].

Now head back to the entrance and this time go right. You'll see an obviously hidden door on the lower right of the screen, head down another passage way for the [HAIRPIN].

Back out of the corridor then talk to the sleeping man in the northern room several times. He will eventually reveal himself to have been lying, and once Godo and Yuffie have finished arguing make your way back into the main part of Wutai (you could chase after Yuffie if you wanted to, but it would be in vain).

Before continuing, stop by the south western most building which just so happens to be - the Turtle Paradise! Here you can engage in some dialogue with the Turks here, you can also read their promotional advert just outside on the billboard (make sure to do this).

When you're ready, head into the house next to the save point and open the

chest for the [MP ABSORB MATERIA], GRAB THAT MATERIA! We can buy items from the shop a little later on, but for now we just want our Materia back!

Head to the very entrance of Wutai and enter the house on the right. You'll find Yuffie hiding behind the curtain rack. Next make your way over to the Turtle Paradise. In case you didn't spot it yourself, she's hiding in the pot just outside. Smash it a few times to annoy Yuffie, she'll then concede and agree to give you your Materia back.

After watching a commotion stirring with the Turks, you'll eventually regain control of Cloud. Head downstairs and check the notice just outside for the [Turtle Paradise Poster #6]. It doesn't matter which switch you pull here, the outcome is always the same. Flick the switch once more, then leave Yuffie's house.

Head all the way back to the tall Pagoda, but this time head to the structure on the left. Ring the bell here to open up (yet another) secret passageway. After bumping into a certain randy little fellow, you'll be able to open the chests here for a [SWIFT BOLT] and an [ELIXIR].

Head upstairs now to somehow end up in a fight with the Shinra. It'll be the same Attack Squads that you fought near the bridges earlier. Once you've annihilated them step outside and talk to Reno, then head over to the save point and save.

Now would be a good time to head into the shop to the left to stock up on a few Fire Veils and Swift Bolts. Also, you can buy the Choco Feather here for 10,000 gil, but if you've got the Sprint Shoes then it isn't really necessary. Plus, you'll have a shot at obtaining one for free the next time we visit the Gold Saucer, anyway (which really isn't that hard).

NOTE - I know I have recommended Aeris & Tifa for this sidequest, just bear in mind the upcoming Boss is pretty solid, especially with your lack of Materia. If you're a low level, consider choosing your strongest and preferably long ranged characters to have by your side. I'm more than confident with my current level, so I'm sticking with Tifa & Aeris.

#~~~~~~~~~~~~~~~~~~~~~~~~~#--------------------------------------------------+
```

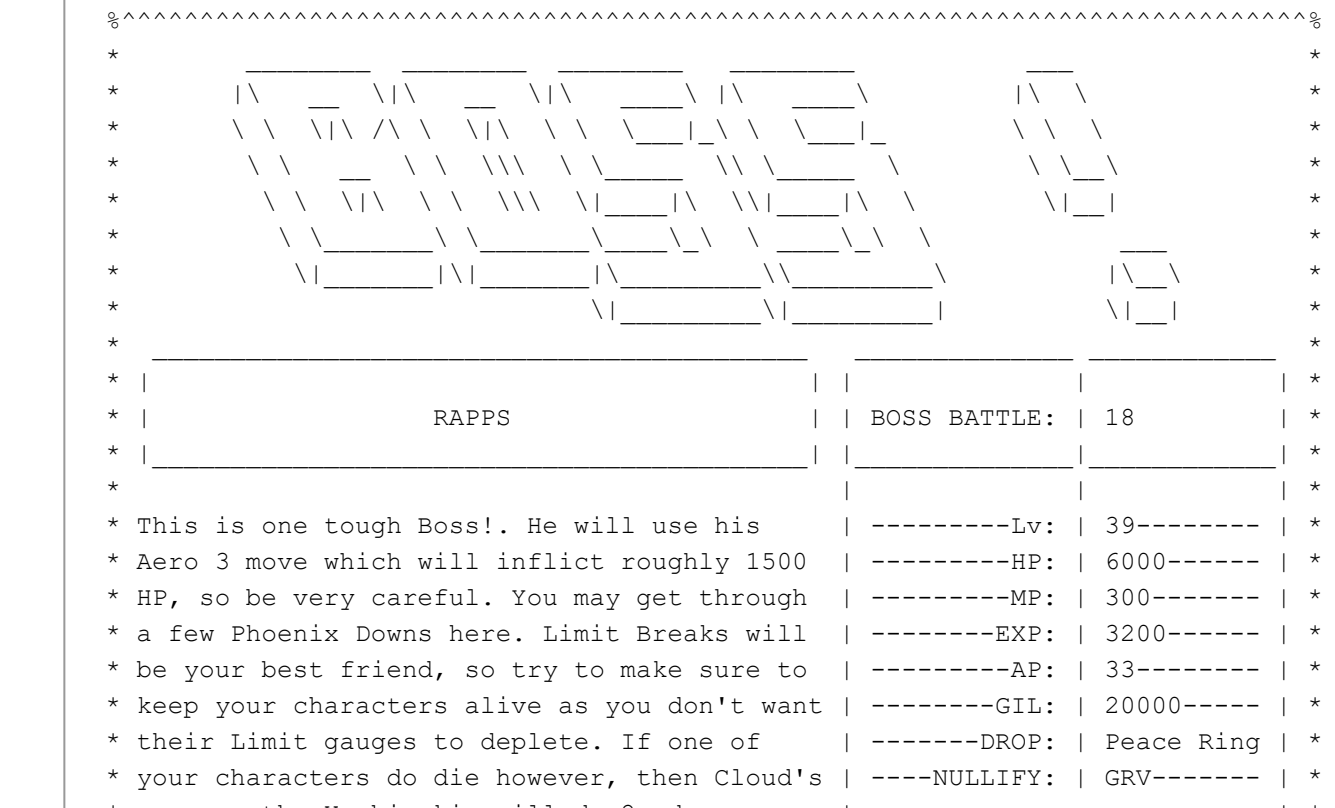
--Items - Dragoon Lance
--Boss - Rapps Lv 39 (Peace Ring)

Make your way north from the save point over a bridge to arrive at the foot of the statue. Heading left towards the Goku statue leads to nothing, so head along the right path. Heading right once more will lead to nothing so keep heading round to the left.

Heading north leads to nothing, so head into the cave. Here you'll find a green chest containing the [DRAGOON LANCE]. We'll be returning to this spot much later on in the game to put those flames out; there are some pretty decent items concealed behind them.

Now head out of the caves but, before heading south consider battling until all of your Limit Breaks are full, this is going to be one tricky Boss! If you've still got the Fury Ring equipped onto Cloud then I suggest replacing it with the Sprint Shoes. Also, put all of your characters in the back row and arrange your items by 'Type'. Don't forget to heal.

When you're ready head into the southern screen to see what Don Corneo's up to, he'll eventually release his new pet, Rapps (as opposed to 'Aps', Boss Battle 3)!



```
* and if two characters were to die then it                                  *
* would deliver 3x damage. A risky strategy, but effective. Don't forget to  *
* use your battle items such as Swift Bolts and Fire Veils. Once he is       *
* destroyed you'll receive another [PEACE RING], as well as a whopping       *
* 20,000 gil!                                                                *
*                                                                            *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

After the Boss you'll have the same dialogue options as that you had the last time you encountered Don Corneo, and like before it doesn't matter which one you choose although 2 is the correct answer. Eventually, Yuffie will have given you back your Materia and you'll have control of Cloud again on the World Map. We're not quite finished with Wutai just yet, so head back inside.

```
¬¬¬
```

your prize!

] SIDE NOTE - FINISHING THE TURTLE PARADISE SIDE QUEST [

] If you've been paying close attention to this guide then you will have read all 6 Turtle Paradise Newsletters that are scattered across Gaia, and also the promotional newsletter just outside of the Turtle Paradise. Talk to the guy behind the counter to claim your prize:

] 1 x Power Source, 1 x Guard Source, 1 x Magic Source, 1 x Mind Source, 1 x Speed Source, 1 x Luck Source & 1 x Megalixir. Not bad, eh'?

] If you have missed a newsletter then you will not be able to claim your prize. Here is a recap of where you can find all 7:

] 1.) Midgar - Sector 5 Slums in the Sleeping Boy's room. If you missed this the first time around then you can revisit this area much later on during Discs 2 + 3.

] 2.) Midgar - 1st Floor of the Shinra HQ. You only have 2 opportunities in the game in which you can read this. If you missed it the first time around then you'll have to wait until the end of Disc 2 when you re-visit Midgar.

] 3.) Gold Saucer - Ghost Square in the Hotel Lobby.

] 4.) Cosmo Canyon - Tiger Lily's Weapon Shop to the left of the counter.

] 5.) Cosmo Canyon - The Inn near the Cosmo Flame. Just left of the counter.

] 6.) Wutai - Yuffie's house in the basement.

] 7.) Wutai - Outside the Turtle Paradise on a billboard.

] NOTE - Just in case you'd forgotten, keep stock piling up all of your Sources. You can start using them when you are ready to Source farm on Disc 2/3 in the Sunken Gelnika. [

Now it's time to embark on the added mini-quest following Yuffie's sidequest, the 5 Levels of the Pagoda! Here we have to battle 5 Bosses one after the other whilst they become increasingly harder, and we can only use Yuffie! Set Yuffie up with the best equipment and Materia, save and then head to the Pagoda. Don't forget to rest in the building to the right of the Pagoda screen.

NOTE - If you failed to complete Yuffie's sidequest prior to Disc 3, then this added mini-quest will still be available to do.

Here is my set-up going in. Note that all of these Bosses are vulnerable to Slow and Poison.

Yuffie - Lv 32 (Back)

Razor Ring - Elemental=Choco/Mog, Added Effect=Time, Poison
Diamond Bangle - Elemental=Gravity, Enemy Skill, Counter Attack, HP Plus
Champion Belt

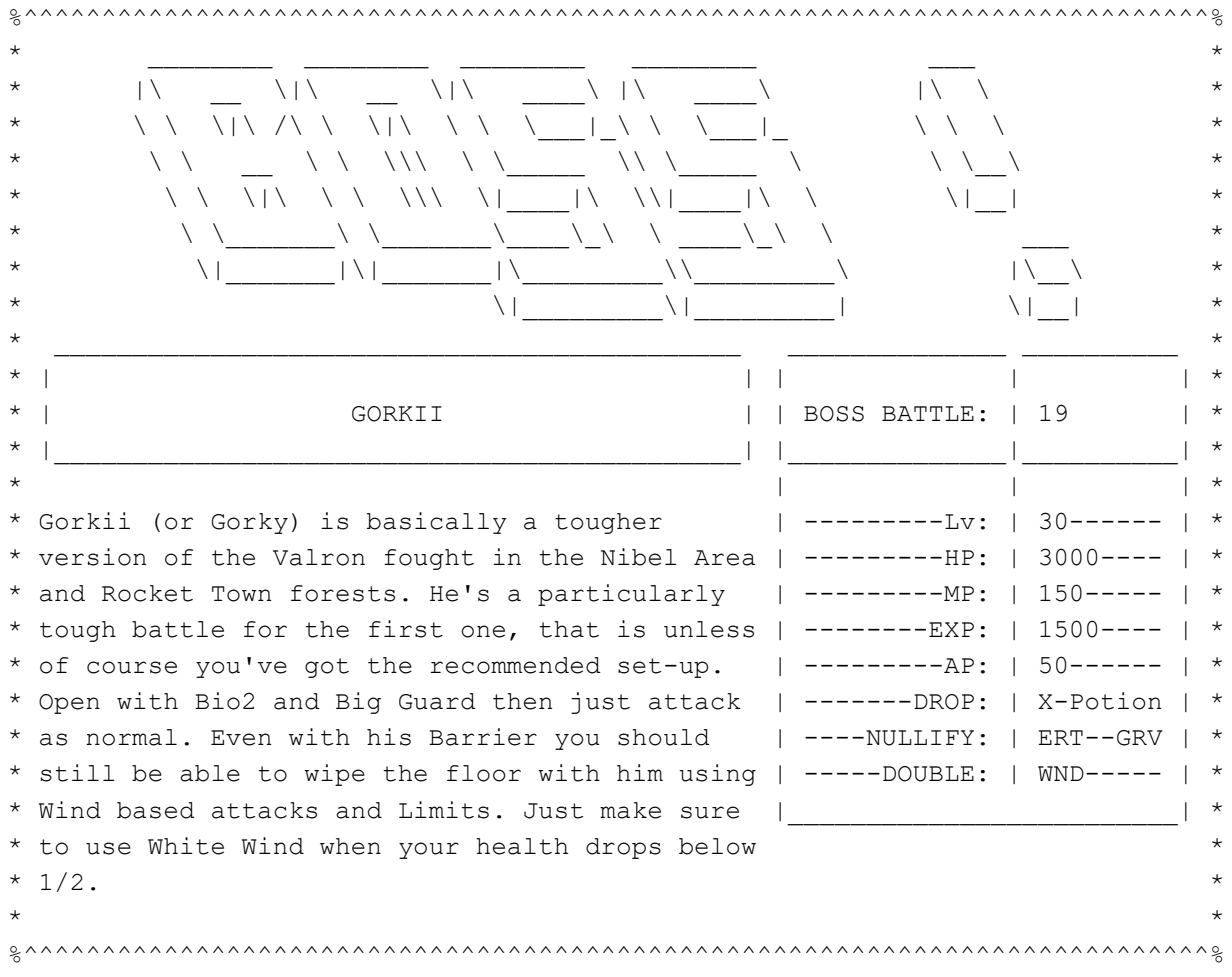
If you wanted to you could just go all out on the offensive with the

Superball (if you had obtained it from the 7th Fort Condor Battle), but I don't think it's necessary. *Note* that my Lv 2 Elemental is in my armour and my Lv 1 Elemental is in my weapon. this will nullify any Gravity based attacks, whereas a Lv 1 Elemental would just halve it. There is no varying effect when placing an Elemental of varying levels in your weapon.

NOTES - All of the following battles (excluding Shake) are considered as "Back Attack" battles, even though they are facing the player, and as such the enemy's ATB will be 0 from the start. Additionally, Yuffie will deal double damage as her first blow.

- Losing any of the following battles will *not* result in a Game Over.

Speak to Gorky, the first boss of the Pagoda (although when you battle him his name will appear as Gorkii).



After the Battle has finished, equip Cloud with Restore and use his Cure to heal Yuffie. Then remove all of her Elemental Combo's and replace them with some more HP Plus's, Restore and whatever else you want. I whacked on MP Absorb and linked it with Poison. Then head upstairs and speak to Shake, the second Boss of the Pagoda.

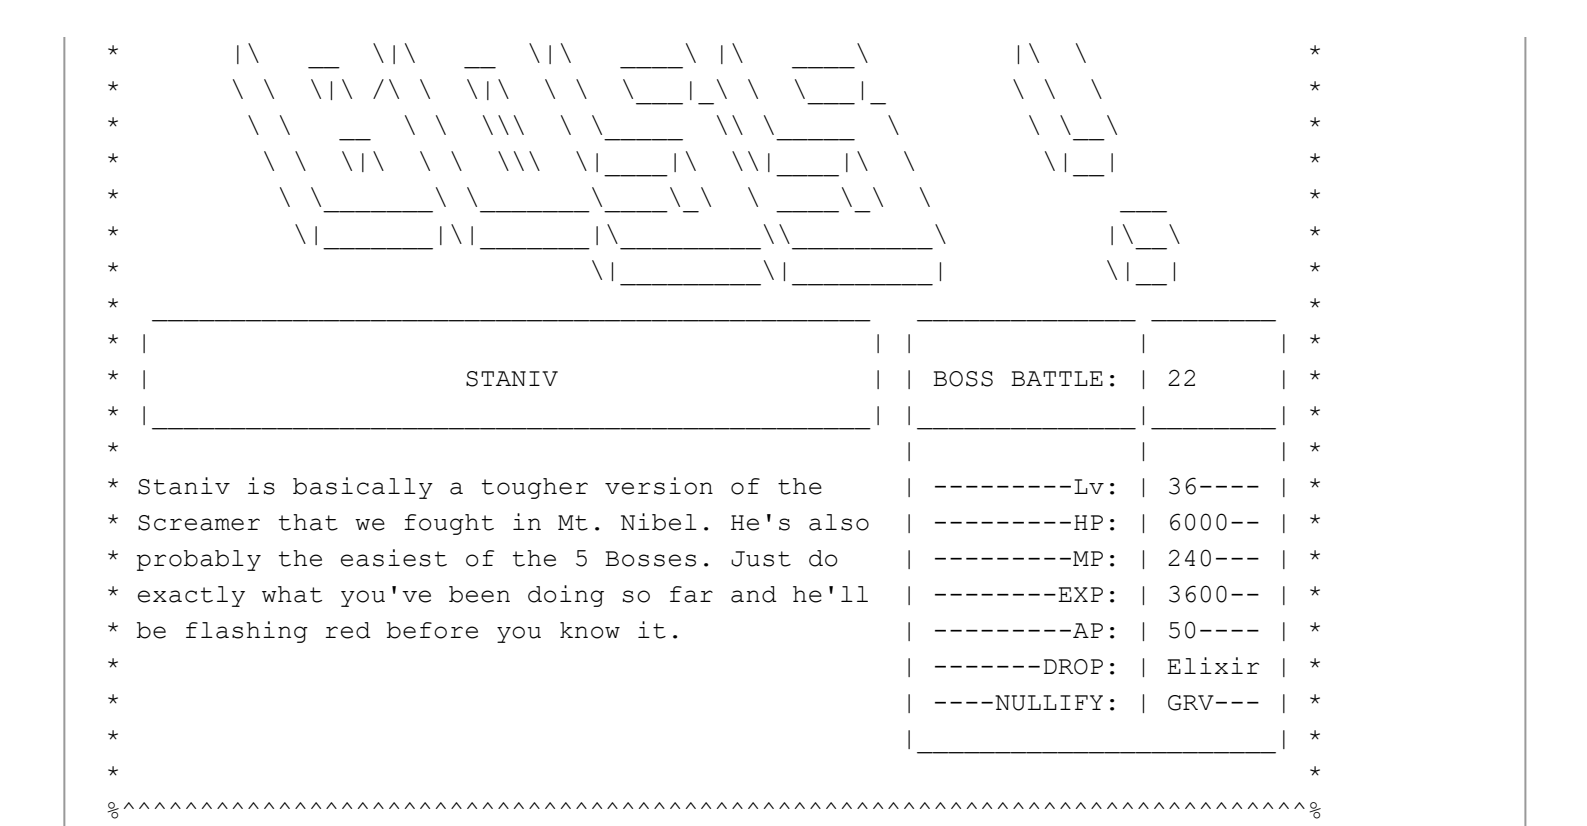
```
* |                                          | |               |              | *
* |                 SHAKE                    | | BOSS BATTLE:  | 20           | *
* |__________________________________________| |_______________|______________| *
*                                            |               |              | *
* Shake is basically a tougher version of the | ---------Lv:  | 32---------- | *
* Skeeskee found in the Cosmo Area. Much      | ---------HP:  | 4000-------  | *
* easier than Gorkii, Shake's only real       | ---------MP:  | 180--------  | *
* threat is the fact that she can inflict     | --------EXP:  | 2200-------  | *
* Yuffie with Fury, but let's face it, it's   | ---------AP:  | 50---------  | *
* not really the worst Status in the World.   | -------DROP:  | Turbo Ether  | *
* If you're that bothered by it then you can  | ----NULLIFY:  | GRV--------  | *
* equip a Peace Ring, but I think I'll stick  |_______________________________| *
* with my Champion Belt. In fact, with Bio2,                                   *
* Big Guard, Belts and Limit Breaks, you should see Shake's beak break so      *
* she can't call her team mates (uh)!                                          *
*                                                                              *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

After the battle, cure Yuffie of her Fury Status and then heal. You may need to use an Ether or two, or you could just head back to the mattresses to sleep. Equip a Jem Ring to protect you from being Paralyzed, then head to the next floor to speak to Chekhov, the third Boss of the Pagoda.

```
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
*                                                                              *
*        _________  _________  _________   _________          ___              *
*       |\   __  \|\   __  \|\   ____\ |\   ____\         |\  \             *
*       \ \  \|\ /\ \  \|\  \ \  \___|_\ \  \___|_        \ \  \            *
*        \ \   __  \ \  \\\  \ \_____  \\ \_____  \        \ \__\           *
*         \ \  \|\  \ \  \\\  \|____|\  \\|____|\  \        \|__|           *
*          \ \_______\ \_______\____\_\  \ ____\_\  \                        *
*           \|_______|\|_______|\_________\\_________\          |\__\        *
*                                \|_________\|_________|         \|__|        *
*  ____________________________________________  _______________ ___________  *
* |                                            | |               |           | *
* |                  CHEKHOV                   | | BOSS BATTLE:  | 21        | *
* |____________________________________________| |_______________|___________| *
*                                              |               |           | *
* Chekhov is basically a tougher version of the | ---------Lv:  | 34------  | *
* Twin Brain we encountered in Mt. Nibel. As   | ---------HP:  | 5000----  | *
* long as you've got the Jem Ring equipped then | ---------MP:  | 210-----  | *
* you shouldn't have any problems. Mix in a bit | --------EXP:  | 2900----  | *
* of Beta and Trine seeing as your physical    | ---------AP:  | 50------  | *
* attacks are now weaker due to lacking the    | -------DROP:  | Ice Ring  | *
* Champion Belt. If you've still got the Added | ----NULLIFY:  | GRV-----  | *
* Effect=Time combo on your weapon then you'll |_____________________________| *
* have a chance of slowing or even stopping him                                *
* every time you attack. You'll be rewarded with the [ICE RING] once he's      *
* been vanquished, which will complete your collection of having a Fire, Ice   *
* & Bolt Ring (assuming you got your last two digits of your battle count      *
* to be even whilst obtaining the Mythril).                                    *
*                                                                              *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

Restore your HP/MP and equip the Champion Belt. The next enemy will inflict you with Sadness, but I wouldn't bother equipping a Peace Ring as it's not the most detrimental Status to have. Head upstairs to face Staniv, the fourth Boss of the Pagoda.

```
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
*        _________  _________  _________   _________          ___              *
```



STANIV	BOSS BATTLE:	22
	---------Lv:	36----
	---------HP:	6000--
	---------MP:	240---
	--------EXP:	3600--
	---------AP:	50----
	-------DROP:	Elixir
	----NULLIFY:	GRV---

Staniv is basically a tougher version of the Screamer that we fought in Mt. Nibel. He's also probably the easiest of the 5 Bosses. Just do exactly what you've been doing so far and he'll be flashing red before you know it.

Now we only have one fight left, but I strongly suggest leaving this battle until later on in the game!

SIDE NOTE - TRINE

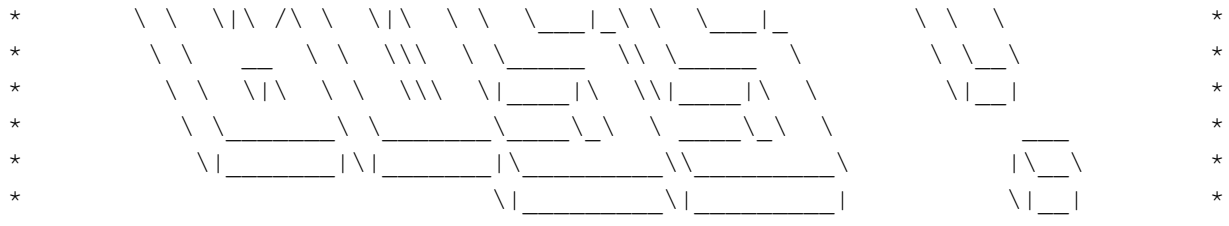
If you are a completionist like myself then you are going to want to leave this battle until you have obtained all 4 Enemy Skill Materias. Godo is the second of three enemies that will use Trine, and although the third enemy to use the move will do so *after* we've obtained the third Enemy Skill, we won't be able to revisit that particular area once the fourth and final E-Skill Materia has been obtained. And we've already killed the Materia Keeper, leaving Godo as the last remaining creature to learn Trine from.

Only one E-Skill is required to be filled for the Materia Overlord Achievement, but for reasons not worth going into at this stage in the game I suggest filling all of them up (it'll help for an end-game battle). If you were to decide to just finish the Pagoda sidequest now then not much harm would come of it, although I am leaving it until later.

If you do decide to battle the final Boss then take heed, this Boss is hard and requires preparation. You are going to want to save before the fight as well as restoring your HP/MP at the beds. Set your Materia up accordingly (only equip Time if you have it at Lv 2, otherwise consider putting Added Effect=Time on your weapon):

Yuffie - Lv 33 (Back)

Razor Ring - Time, Poison, Restore, Enemy Skill, Counter Attack
Diamond Bangle - Elemental=Gravity, Added Effect=Transform, HP Plus
Peace Ring



GODO	BOSS BATTLE:	23
	---------Lv:	41----------
	---------HP:	10000-------
	---------MP:	1000--------
	--------EXP:	5000--------
	---------AP:	60----------
	--------GIL:	40000-------
	-------DROP:	All Creation

Godo is by far the toughest Boss yet. In fact, all of the 4 previous Bosses could probably be referred to as Sub-Bosses compared to Godo. He has three faces and will only use certain moves according to what face is showing, and he can switch faces at any time. Make sure to have the Peace Ring equipped.

Red Face - Beast Sword, Trine
Gold Face - Sleepel/Confu, Mini
White Face - Drain, Bio2, Demi3

Open by casting Slow on him, then Bio2 and then Big Guard. Keep your HP topped up above 1000 as Trine will hit hard. If you've unlocked Regen then use it, otherwise use Cure2 and White Wind to heal and to cure you from Poison (respectively). This Boss does have one major weakness that you can exploit; unlike most other bosses in the game it won't nullify your Gravity based attacks which means you can use Laser and Demi to massively weaken him.

The most annoying thing about him is his ability to cure himself, which he will do so a lot. He'll also cure Yuffie if her health is minimal. Beta works really well here, and so does Yuffie's 2-2 Limit Bloodfest if you've managed to unlock it. Once he's been defeated you will receive the [ALL CREATION] which is Yuffie's Lv 4 Limit Break Manual, along with a whopping 40,000 gil!

Once Godo is finished he will also hand over the Leviathan (Summon) Materia which is our second (and last) Water based Materia. This will unlock the Making Waves Trophy.

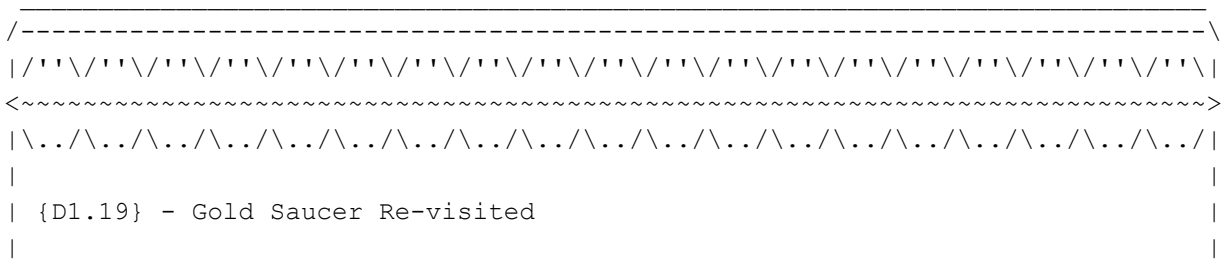
That just about wraps up everything there is to do in Wutai, well for now anyway. We'll return once we have acquired the Leviathan Scales to obtain the items within the cavern behind the flames, and also to defeat Godo if you haven't already. Rest up and then head out of Wutai.

NOTES - If you have been following this guide in the order intended then your next stop will be the Gold Saucer. Here we are going to have to compete in a mandatory Battle in the Battle Arena, so don't spend a great deal of time setting up your Materia.

- Do however whack your Enemy Skills and Manipulate on and battle around near Wutai in the grass area to learn the Magic Hammer Enemy Skill from the Razor Weed, and Death Force from the Adamantaimai if you haven't already.. Oh, and also..

] [
] SIDE NOTE - SUPPORT MATERIA COMBOS [
] [
] you can link multiple Support (blue) Materias to one magic. For example, [
] should you have 2 x Lv 2 Ice Materias to hand then you can Link one of [
] them with All, and the other one with HP Absorb. You will then enable a x2 [
] combo where you will absorb the HP from all of the enemies, as well as [
] hitting them all with Ice. [
] [
] There are restrictions when combining Materia this way. For example, if [
] one of the Ices was at Lv2 and one of them was at Lv 1 then the x2 combo [
] would only take effect when you cast Ice (as opposed to Ice2). Basically, [
] the combo would only be as strong as its weakest Ice Materia. Much later [
] on in the game we'll be able to utilise up to 8x combo's for devastating [
] effect!! [
]_____[

NOTE - You can also equip HP/MP Absorb to Deathblow or Steal! That would
probably be a better choice for now. I just wanted to make you aware
of some of the ways in which Support Materia can be used seeing as
the Materia system really is starting to get under-way quite nicely.



{D1.19} - Gold Saucer Re-visited

ITEMS:
|_|Elixir

--D1.19 A - The Battle ("Heh, heh, heh. Entertain me!")

--Extra - Keystone, Protect Vest, Choco Feather

Now make your way back to the Gold Saucer remembering to cut through the river that separates Nibelheim from Cosmo Canyon. As mentioned, you'll have a mandatory battle with just Cloud, so set up the following. Note that the Choco/Mog set-up here is optional. Remember to save and then rest up at North Corel, if you win all 8 battles you'll be rewarded with a little extra!

Cloud - Lv 38 (Back)

Murasame - Added Effect=Time, Elemental=Choco/Mog, Enemy Skill
Diamond Bangle - Heal, Restore, Counter Attack, Long Range, HP Plus
White Cape

Make your way into the showroom which can be found to the right as you enter the Battle Square. Inspect the blue Keystone you see here to barter with Dio

for it. Agree to entertain him and you'll wind up in the Battle Arena. Don't forget to use the newly acquired Death Force Enemy Skill, as well as Regen if you have it.

NOTE - You don't keep the BP you earn during this battle, so you don't need to try to get the 'harder' handicaps. Also, it doesn't matter if you finish or not, you'll get the Keystone either way, but you do need to finish all eight battles for Dio to throw in a Protect Vest and a Choco Feather on top.

After receiving the Keystone head back to the rope-way to find some bad news. Oh well, at least we get to spend the night for free!

¬¬¬

where he'll reveal to you his true motives and plans. Not cool Cait Sith, not cool. Back in the hotel you'll get one chance to grab the [ELIXIR] that's hiding in the cupboard in the top right corner.

When you leave your room you'll have to form a party consisting of Aeris. Make sure to stock up on Tranquilizers and other items before heading out. Now make your way to the Tiny Bronco and then head for that pyramid that you saw earlier on the way to Fort Condor (you probably figured out then that it was The Temple of The Ancients), and scoot right past it to Fort Condor once more!

```
 _____________________________________________________________________________
]                                                                             [
] SIDE NOTE - FORT CONDOR BATTLE No.9                                         [
]                                                                             [
] You must complete this before entering the Temple of The Ancients. Your     [
] prize will be 3 x Turbo Ethers (unless of course you've missed out a        [
] battle, in which case your prize will be the previous one).                 [

--Items - Trident, Mind Source, Silver Rifle, Turbo Ether, Rocket Punch,
          Luck Plus Materia, Morph Materia,

  This was my set-up going into the Temple of The Ancients:

 1) Cloud - Lv 38 (Front)

     Murasame       - All=Restore, All=Heal, Sense
     Diamond Bangle - All=Gravity, Steal, Speed Plus, HP Plus
     Jem Ring

 2) Aeris - Lv 34 (Back)

     Umbrella      -
     Edincoat      - Ice, E-Skill, Manipulate, Steal, Long Range, HP Plus,
     Champion Belt                                                MP Plus

 3) Red XIII - Lv 35 (Front)

     Gold Barrette  - Elemental=Choco/Mog, Added Effect=Time, Enemy Skill
     Diamond Bangle - HP Absorb=Deathblow, Steal, HP Plus, MP Plus
     White Cape

|                              NOTE ON ENEMIES:                                |
|                                                                              |
| The 8 eye and the Jemnezmy are one time encounters only but the Ancient      |
| Dragon can be fought randomly in the Mural room along with the Doorbull.     |
| For the first time in the game we have encountered enemies that are weak     |
| against Poison (the Element, not the Status), so make sure to have it        |
| equipped, Also, make good use of the Morph Materia and morph yourself a      |
| few Magic Sources from the 8 eye (remove counter attack).                    |
+------------------------------------------------------------------------------+
```

--Items - Nail Bat, Princess Guard, Ribbon, Trumpet Shell, Megalixir, Work Glove, Bahamut Materia,
--Boss - Red Dragon Lv 39 (Dragon Armlet), Demons Gate Lv 45 (Gigas Armlet)

Press:
/_\ to move the clock hands manually
O to spin them randomly
X to proceed

The first thing that you're going to want to do is to press X to proceed, then stand on the hour hand and wait for the second hand to sweep you off. When you land you'll have to fight 2 x Ancient Dragons, then you'll be able to open the chest containing the [NAIL BAT]. (We're starting to complete our collection of 0 slotted, high attack powered weapons)

Exit to find yourself back within the stairs and vines area (you just came through the 'sealed' door from earlier). Make your way back round to the boulder room and then save. Now head into the clock room and set the minute hand to I.

Room I - Battle encounter with 1 x Jemnezmy and 2 x Toxic Frogs. Use Bio2 to kill Jemnezmy instantly.

Now head back into the clock room and without changing the clock hands run straight back into the boulder room. Then you can run back into the clock room to just change the minute hand once, this is the quickest way of navigating the Time Guardian. Save using the Temple Keeper, also.

Room II   - Dead End.

Room III - Battle encounter with 2 x 8 eye. I suggest weakening them with
            moves like Matra Magic first, then just using morph so that you
            obtain a few Magic Sources. If you're not bothered by this then
            you can just use Bio2 to obliterate them. Their drain move is
            excellent for filling up Limit Breaks aswell.

Room IV   - Chest containing the [PRINCESS GUARD]. This is Aeris's ultimate
            weapon, equip it if you don't have the Umbrella for her. As with
            the Yoshiyuki, this weapon will double in power when one of
            Aeris's companions are KO'd, and will triple in power when 2 are
            KO'd.

Room V   - Leads back to the chest in the 'stairs and vines' area we saw
            earlier containing the [RIBBON]. Equip it now!

Room VI   - We'll return here shortly.

Room VII - Chest containing the [TRUMPET SHELL].

Room VIII - Chest containing the Squall Lionheart. Joke, it's a [MEGALIXIR].

Room IX   - Dead End.

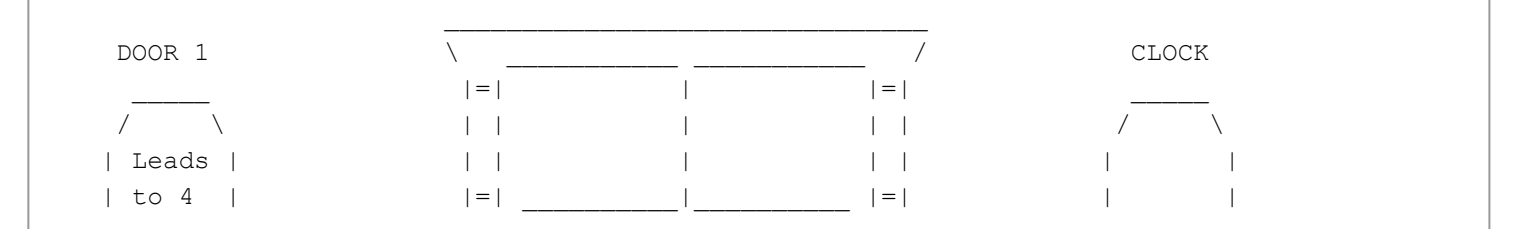
Room X   - Boulder Room.

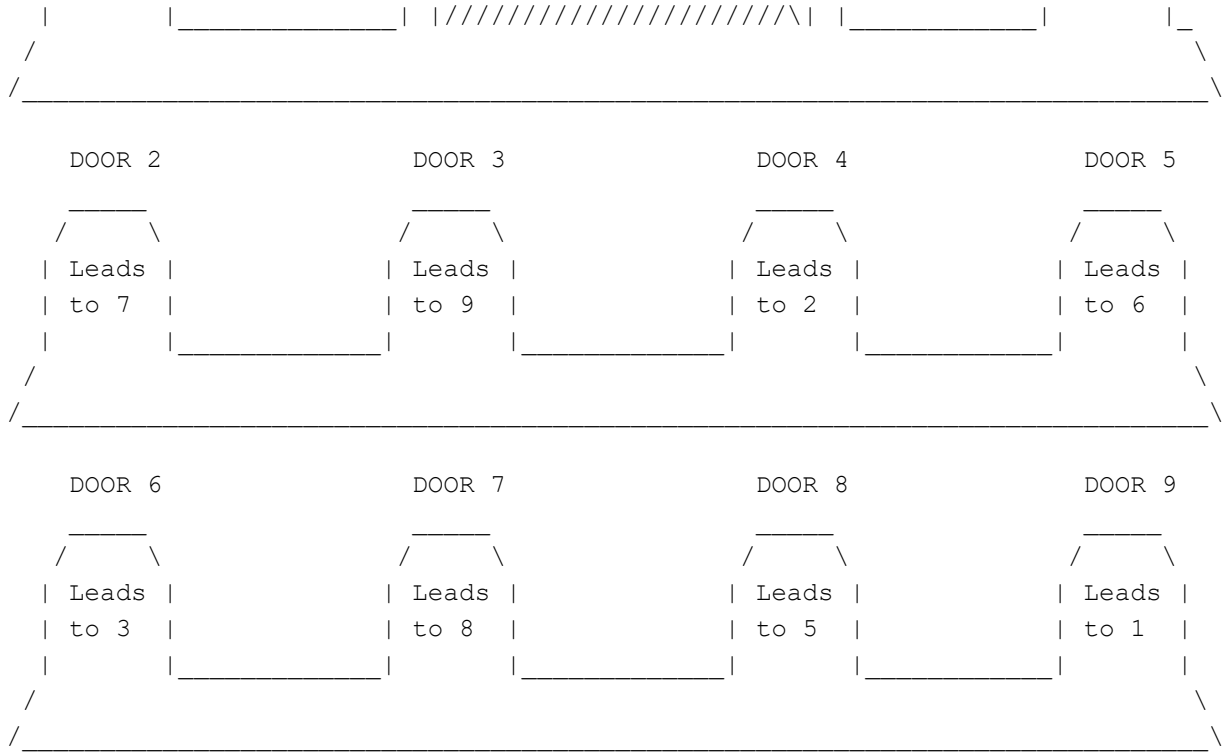
Room XI   - Dead End.

Room XII - We'll return here later.

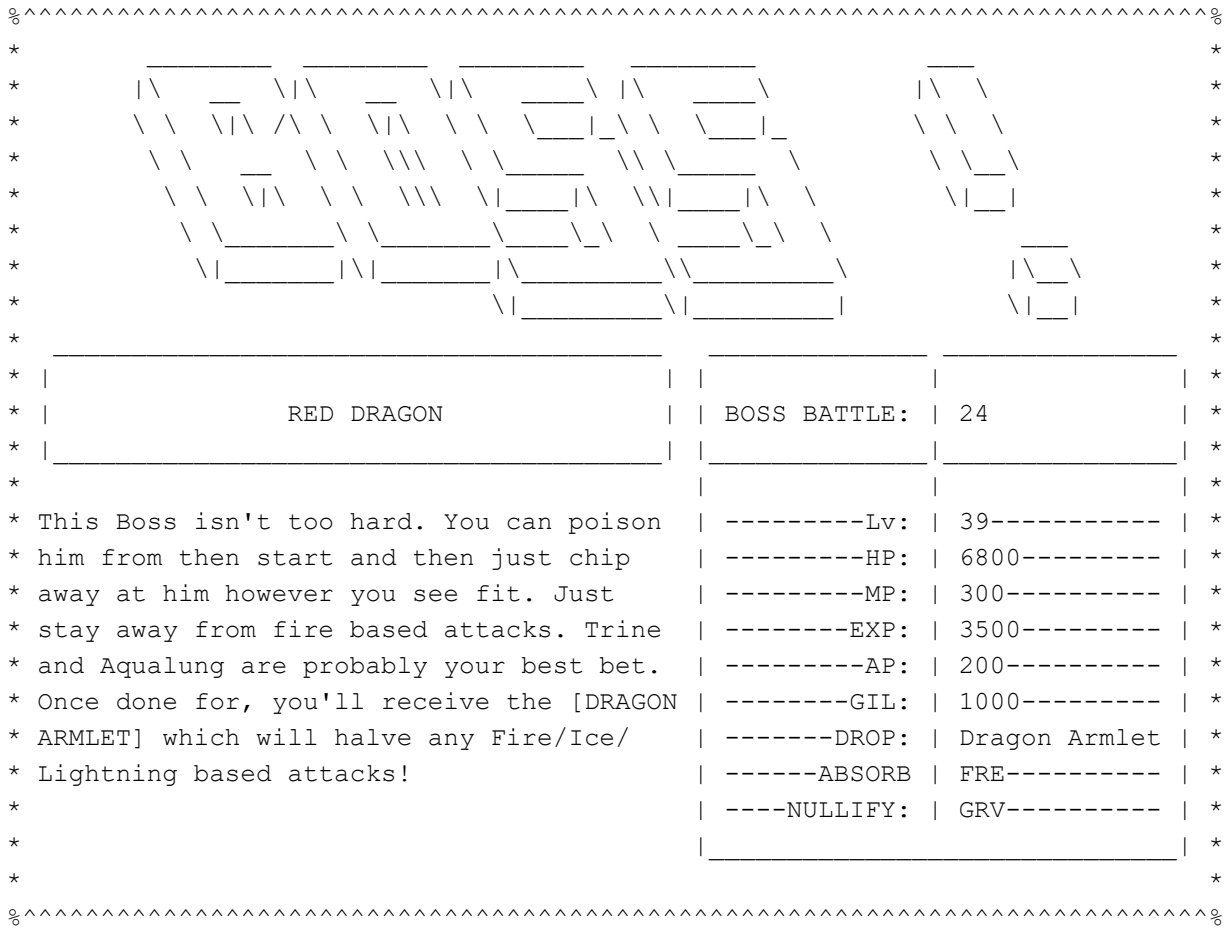
```
 ____________________________________________________________________________
]                                                                            [
] SIDE NOTE - RIBBON                                                         [
]                                                                            [
] This is probably the best accessory in the game as it will protect against [
] all abnormal Statuses. To be precise, it will defend against:              [
]                                                                            [
] Sleep, Poison, Sadness, Fury, Confusion, Silence, Frog, Small, Slow-Numb,  [
] Petrify, Death-Sentence, Berserk, Paralyzed & Darkness.                    [
]                                                                            [
]  NOTE - You can still inflict Fury and Sadness upon yourself as long as    [
]         you do so outside of battle. The Ribbon will only prevent an enemy [
]         from inflicting them upon you. Also, the Ribbon won't protect you  [
]         from Death, so using the Death Force E-Skill, or equipping Added   [
]         Effect=Destruct to one's armour would be advisable against enemies [
]         that can inflict instant death.                                    [
]____________________________________________________________________________[
```

Head into room VI to find that the Temple Keeper has locked the door. There are 9 exits here, and each exit will lead to another designated exit. You must intercept the Temple Keeper by anticipating which exit he is going to appear from. Use the pic below to know which exit to travel through:





Once you've caught him he'll unlock the door for you. Don't forget that you can jump down to the lower level on the left, do so to grab the chest at the bottom for the [WORK GLOVE]. Rest and save, then head into the Mural room to learn a great deal about Sephiroth's plan. After Cloud has had another little episode, you'll eventually be face to face with:



GRAB THAT MATERIA! Once the battle has finished make sure to grab the [BAHAMUT MATERIA] (unlocking the Waiting in the Wings Trophy). This bad-boy summon is permanently missable.

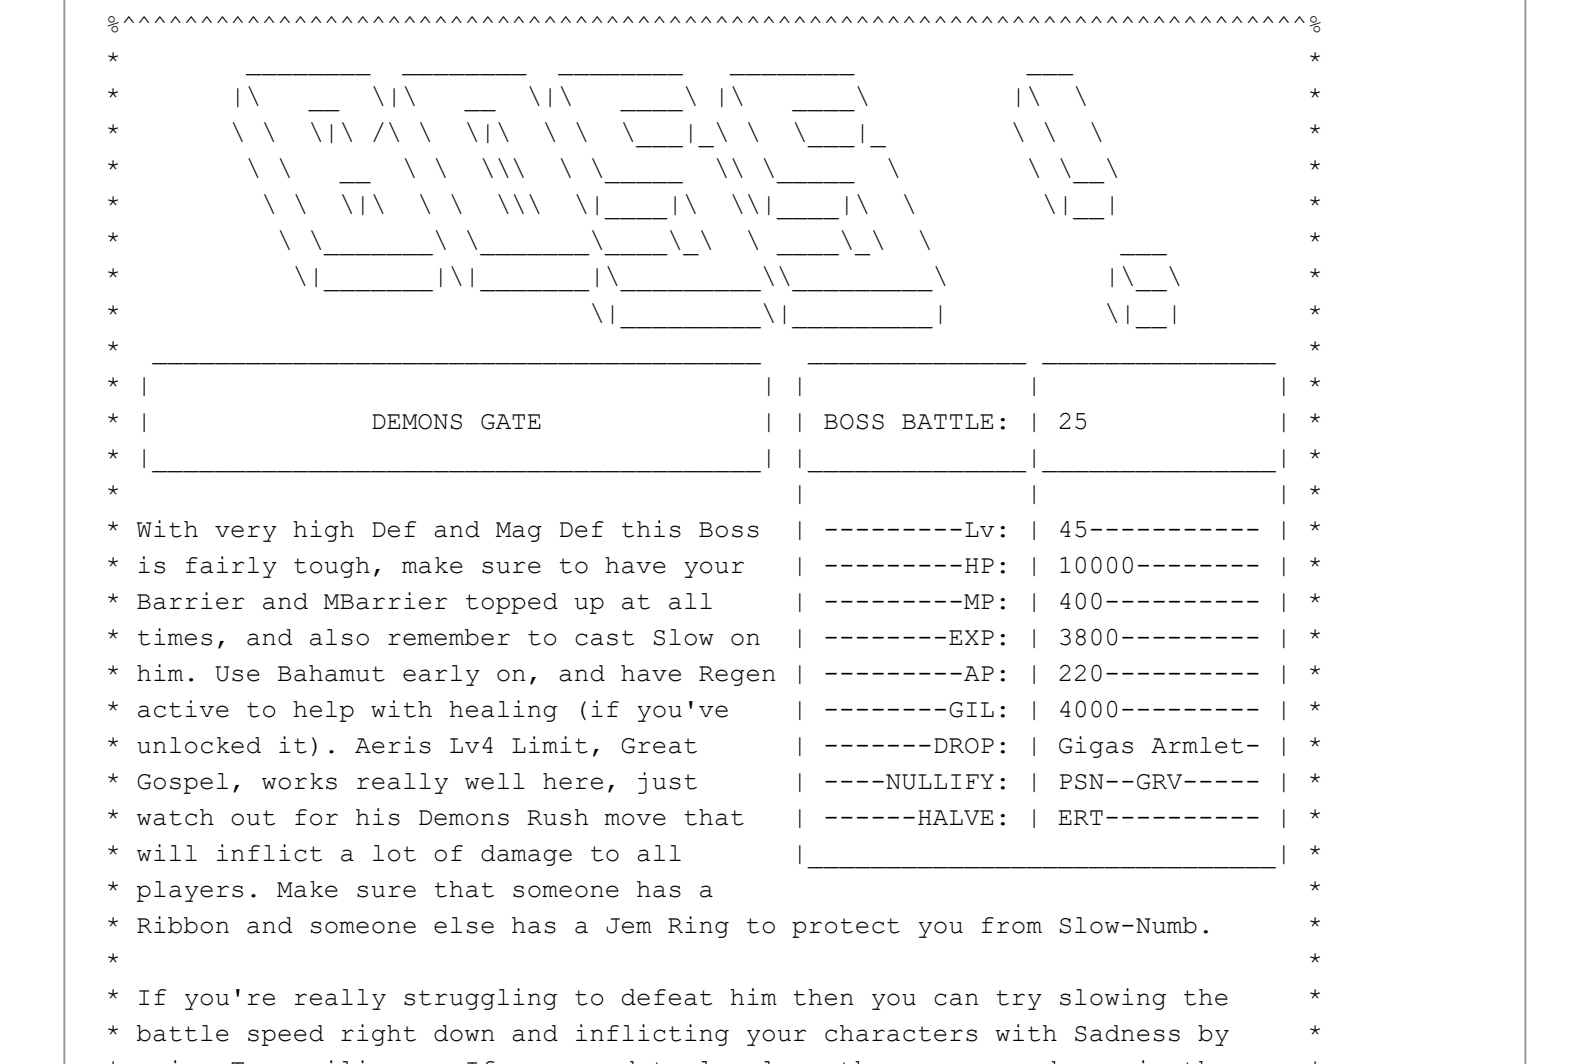
Now head over to the right to inspect the floating object on the small alter. You have to trust Cait Sith here, when you are ready, leave the Mural room. It wouldn't be the worst idea in the world to battle around for a bit to try and fill up your Limit Breaks before leaving. Heal and save aswell (hard boss battle incoming).

NOTES - Just as in Sector 7 right at the beginning of the game, Aeris will be leaving your party again. And just like before, you are going to lose whatever Armour she is wearing, although her Materia and Accessory will be returned to you, so make sure that she isn't wearing something unique like the Edincoat. I equipped her with the Silver Armlet. The annoying thing is that we won't get a chance to un-equip Aeris after the upcoming Boss battle, so you'll have to step into it without your optimal set-up.

Note that you can actually un-equip Aeris after the battle, but the window in which to do this is so tight that you'd be better off just playing it on the safe side by un-equipping her now. Give her a non-unique weapon, also. If you do wish to un-equip Aeris post-boss battle, then I'll indicate the exact timing of when to do so.

- Do you have a Lv 2 Elemental yet? If you do, you can protect yourself from the Demons Gate's "Petrif-eye" attack (which cause Slow-Numb) by setting up defences from the "Hidden" Element. Use QSI Link [HIDDEN] for more info!

Make your way back to the Clock Room to find that the hands are fixed at 12 o'clock. Equip the Bahamut Materia and head through to door 12, after an amount of dialogue you'll be up against:



```
* Mural Room. Once he has been defeated you'll receive the [GIGAS ARMLET],   *
* which will boost you Strength by +30, but has 0 growth (so your Materia    *
* won't level up).                                                           *
*                                                                            *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

After you have defeated the Demons Gate some crucially important events will unfold. You won't need to pick up this walkthrough again until you have regained control of Cloud in Gongaga Village.

!! SPOILER ALERT !!

If you want to un-equip Aeris after the boss battle, then read on.

The next paragraph will contain spoilers (you have been warned). Shout out to rsnbau for helping find the exact point at which you can gain access to the main menu.

After Sephiroth has appeared, the screen will flash white and you'll appear at the bottom of the fissure. You'll then gain control of Young Cloud, and Big Cloud will hand the Black Materia over to Sephiroth. You will then transition back to the overhead screen, and there will be some dialogue between Aeris and Cloud, after which Cloud will start beating on Aeris.

Just before Cloud starts going crazy, Young Cloud will suddenly appear. It's the very moment in which Young Cloud appears that menu accessibility will be enabled, and it will only do so for a single frame before it is disabled again, so your button press must be exact (button mashing is the best way to go about it).

Young Cloud will appear just after Aeris says the line "Cloud... you haven't done anything. It's not your fault." but before Cloud says "I...! I'm-----!".

!! END OF SPOILER !!

```

Work Glove -
Dragon Armlet - All=Gravity, E-Skill, Steal, Speed Plus, HP Plus
Ribbon

SIDE NOTE - FORT CONDOR BATTLE No. 10

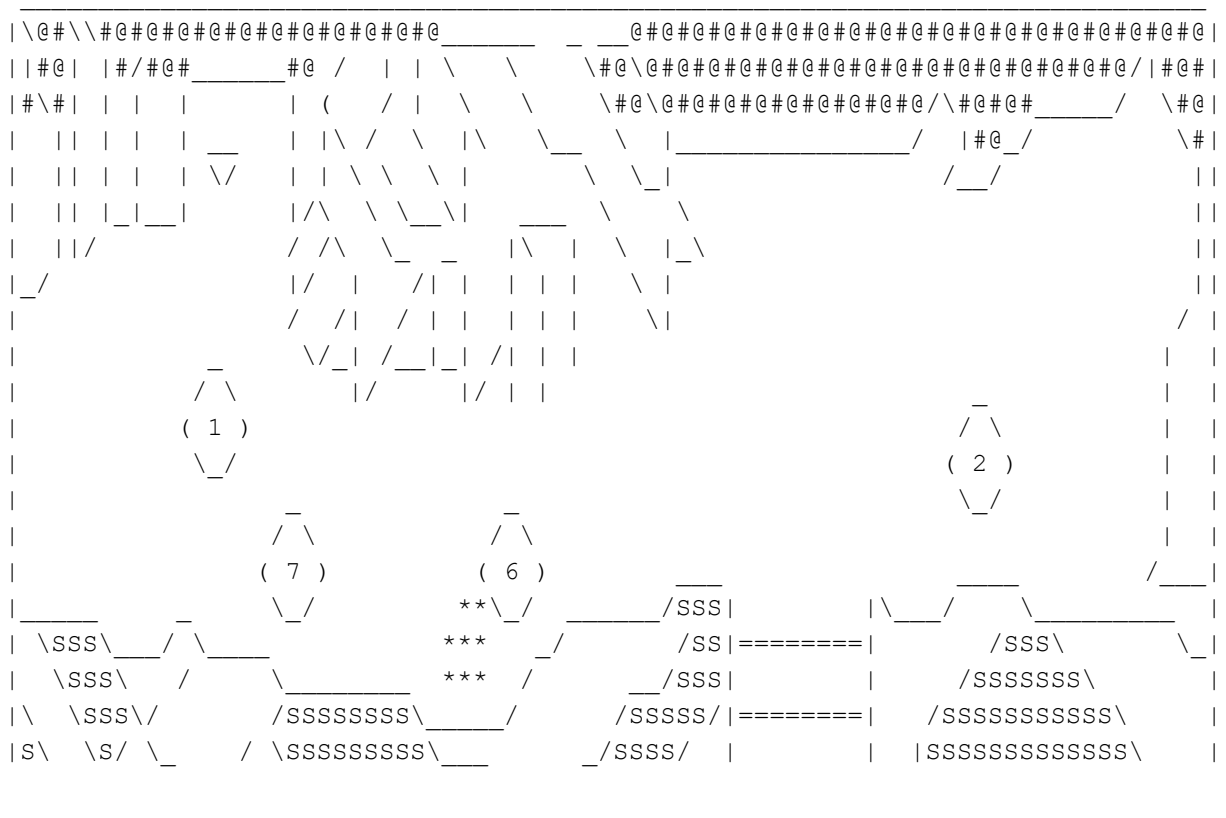
Your prize this time will be 5 x X-Potions even though the game will indicate otherwise. You must complete this before using the Lunar Harp in Bone Village.

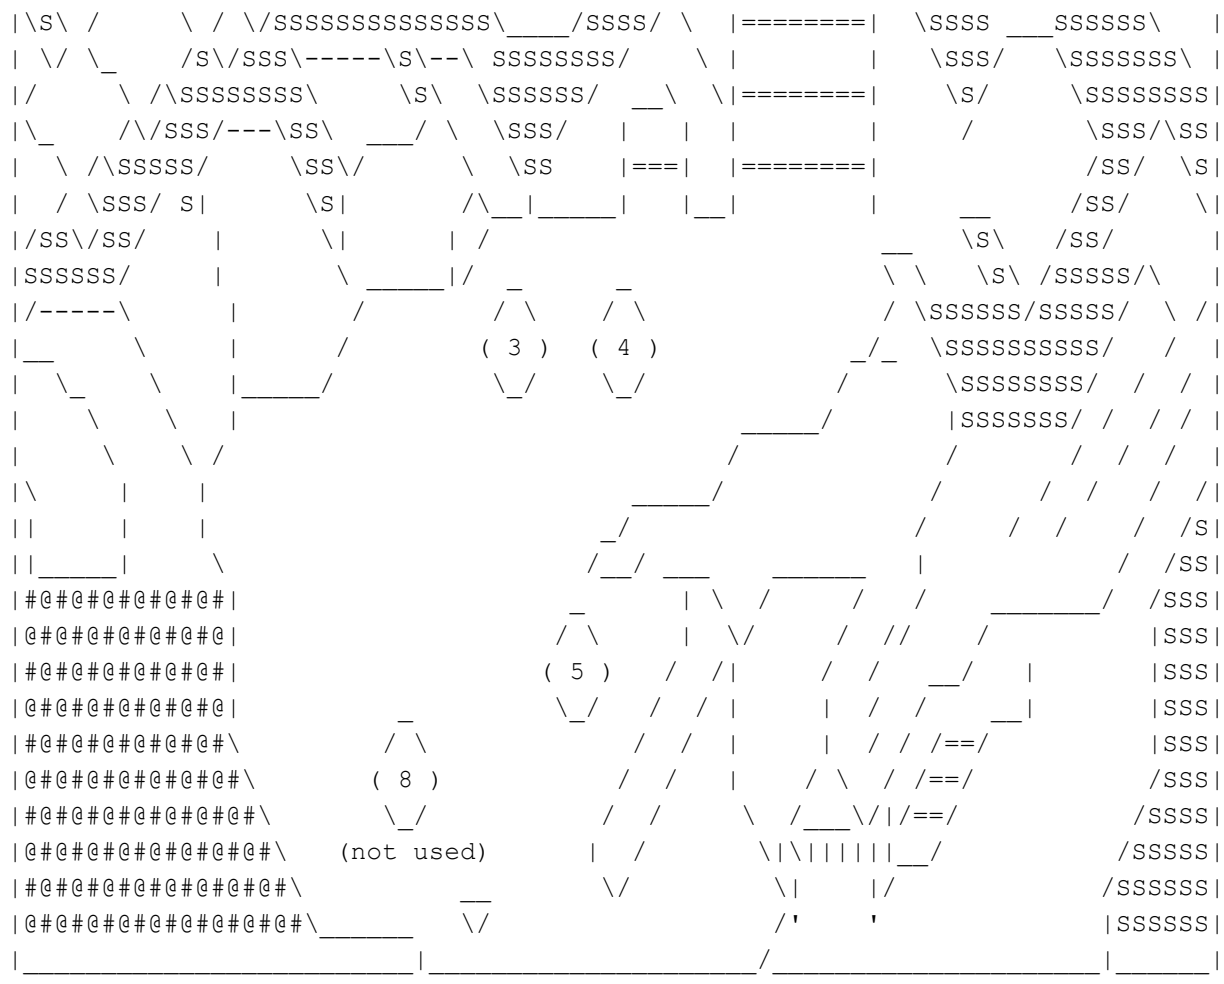
Now make your way up to the Northern Continent. If you've been following my guide exactly then you should remember how to get there from before. If not then just keep heading north along the east side of the Eastern Continent, past the Chocobo Ranch and Kalm to eventually come to some huge dinosaur bones surrounded by forest. Again, avoid battling here, just head straight into Bone Village.

You can talk to the guy on the right her more info if you like, otherwise talk to the foreman on the left. Here you'll be able to search for either the Lunar Harp (which is required to continue with the game), good treasure or normal treasure.

This is how this mini-game works - when you order a search in a particular spot a worker will then come and stand in that spot, costing you 100 gil. Once all 5 workers have been placed you'll be able detonate a bomb, all of the workers will then look at a particular spot. The treasure that they have located will have be dug up in that spot. You don't have to buy all the workers if you don't want to, in fact you can even dig for free but your chances of finding something will be remote, unless of course you happen to have a strategy guide knocking about. You do? Goody goody.

There are only certain items that we can obtain at this point in the game, I'll update you when it is necessary to. For a complete rundown see section E.12. For now, here's a map of what's up for grabs, and where you can find them: (The same map can be found in section F.08.)





NOTE - If you stand on a spot that isn't a dig spot, then you will have a 50% chance of receiving a Potion, and a 50% chance of receiving nothing. This includes the dummied out spot 8.

Spot 1 - LUNAR HARP. Just NW of spot 7.
Lunar Harp (100%, once only), Nothing (100% afterwards)

Spot 2 - GOOD TREASURE. Top of the ladders and to the right.
Buntline (100%, once only), Nothing (100% afterwards)

Spot 3 - GOOD TREASURE. Just to the right of where the foreman sits.
Megalixir (100%, once only), Nothing (100% afterwards)

Spot 4 - GOOD TREASURE. Base of the ladders and to the left of the 'X'.
Mop (100%, Once only), Nothing (100% afterwards)

Spot 5 - NORMAL TREASURE. Just to the right of the entrance.
Elixir (14%, unlimited supply), Nothing (85%)

Spot 6 - NORMAL TREASURE. Top of the ladders just right of the black mound.
Turbo Ether (8%, unlimited supply), Ether (92%, unlimited supply)

Spot 7 - NORMAL TREASURE. Just to the left of the black mound.
Ether (30%, unlimited supply), Nothing (70%)

Spot 8 - Dummied out. This dig spot is never used.

So, as you can see there are 3 good treasure spots and 4 normal treasure spots. you will respectively have around a 33% chance or 25% chance of a particular spot to get chosen, but only if you actually order worker to search (this only applies to normal treasure).

With the good treasure you'll have to place one staff next to each spot to ascertain as to which of the three spots holds the treasure, whereas with normal treasure you could just keep going to spot 6, selecting option 2 (done) then search there for an infinite number of free Ethers! This is a mediocre way to obtain gil without becoming overpowered through battling, as they sell for 750 each! Or you could just fight the Trickplay....

NOTE - When you use the excavation site, you also spend the night there, restoring your HP/MP!

After obtaining the Lunar Harp, I suggest searching for the three available good treasures to obtain the Buntline (Spot 2), the Megalixir (spot 3) and the Mop (spot 4). Once you are ready to continue, head into the sleeping forest.

After you have awoken the sleeping forest you can grab the Kjata/Kujata Materia that you will see floating around, if you haven't done so already. If you've been doing all of the Fort Condor Battles so far, then now is the time to do a U turn.

```

¬¬¬
```

Training/Random encounter FAQ, the best area in the whole of disc 1 to train. With between 4 and 5 enemies per battle you'll be raking in those kills, not to mention AP & EXP. Only consider training here if you're at a low level.

First run under the log bridge to open the chest containing the [WATER RING]. This will drain water based attacks. Now head up and through the log to the next screen. Follow the spiny path to exit on the World Map in a small ravine just north of Bone Village.

Head into the circular object to enter into Forgotten Capitol. Here the path will split 3 ways, take the left path first. You will come to a tall house, enter inside to find a save point, a crystal harbouring the words of the Ancients, and a chest containing a [MAGIC SOURCE].

Now head out of the house and make your way to the right to enter a large cavern. You can explore around here if you like, but other than the chest at the bottom containing the [AURORA ARMLET], there's not much to do here now. The Aurora Armlet will drain Ice based attacks, and it also has very high defence. Remember that the Magic Defence stat means nothing, it is always equal to your Spirit (unless you're playing the Steam/PS4 version).

Now make your way back to the 3 way split, this time heading right. In the first house (well, more like giant shell) you'll find more unrecognisable words from the Ancients, as well as a chest on the top floor containing a [GUARD SOURCE].

Head back outside. You could dash straight past the next shell, but there wouldn't be any need. Heading down the west path would bring you to the opposite entrance to the cavern you just explored, and heading north is impossible at this stage as one of your comrades will stop you from venturing further on. So, head into the middle shell and pick up the [ELIXIR] from the chest on the right.

Now head up the ladders to get some rest. During the night Cloud will wake up in distress. Before doing anything else, look behind the top bed for the third [ENEMY SKILL MATERIA]. GRAB (and equip) THAT MATERIA! Now head back to the 3 way split, but don't go north just yet, instead, head back to the World Map.

Regardless of whether or not you're planning to do Fort Condor Battle 12, I suggest making a quick round trip across the coastlines of Gaia picking up some of the better Enemy Skills along the way. Heading clockwise, stop off at Midgar first.

1.) - Matra Magic - Midgar Area, Custom Sweeper. O.K., not the best of E-Skills to have at this point in the game, but grab it none the less.

2.) - Beta - Marshes near the Chocobo Ranch, Midgar Zolom. An absolute must, you shouldn't find him a problem now. I wouldn't bother with L4 Suicide. Just remember that you may end up kill it too quickly, the easiest way to ensure that it uses Beta before dying is to use Laser or Demi2.

3.) - White Wind - Junon Area, Zemzelett.

```

]                                                                            [
] SIDE NOTE - FORT CONDOR BATTLE No. 12                                      [
]                                                                            [
] Your prize this time will be 5 x X-Potions even though the game will       [
] indicate otherwise. You must complete this before the end of Disc 1.       [
]____________________________________________________________________________[
```

4.) - Big Guard - Beaches of Gongaga/Gold Saucer Area, Beachplug. Don't bother learning Aqualung, we'll be able to learn it very shortly anyway.

5.) - Death Force - Shores of Wutai, Adamantaimai.

6.) - Magic Hammer - Grass area near Wutai Village, Razor Weed. It's a bit of a trek, but worth it. Then again, we do have Ethers..

You can now continue clockwise to the Northern Continent and into the sleeping forest once more. You can also learn Death Sentence from the Boundfat if you really like, but it isn't that great of an E-Skill to have. We'll obtain the remaining E-Skills once we've acquired the fourth and final Enemy Skill Materia.

Once you're back at the 3 way split, head north. Note that we are now in the final stages of disc 1, and if there's anything you wanted to do then now is the time to do it. If you didn't talk to the man in Rocket town to obtain Cloud's Yoshiyuki then it will be lost forever. If you're ready to continue then keep heading north until you arrive at the tranquil shell 'mansion'. Check the top floor to GRAB THAT MATERIA! the [COMET MATERIA].

NOTE - Lv 2 Comet (Comet2) is probably one of the best magic spells in the game. Just as with Revive, I suggest placing Comet in your arsenal and leaving it there until it has levelled up.

Now make your way down the blue stairway to emerge at a type of underworld (The under-lair of The Ancients?). Keep descending until you arrive at a save point. You'll have to fight one last boss before disc 1 has finished, and this boss uses mainly water based attacks. Set yourselves up accordingly, bearing in mind that I'm taking advantage of the boss's high AP drop by using Double Growth weapons:

1) Cloud - Lv 40 (Front)

Murasame - Elemental=Titan, HP Absorb=Deathblow, Enemy Skill
Aurora Armlet - Counter Attack, Luck Plus, HP Plus, MP Plus
Champion Belt

2) Barret - Lv 34 (Front)

Chainsaw - Elemental=Earth, Added Effect=Time, Enemy Skill
Rune Armlet - Barrier, Speed Plus, HP Plus, MP Plus
Champion Belt

3) Tifa - Lv 37 (Back)

Platinum Fist - Comet, Revive, HP Plus, MP Plus
Dragon Armlet - All=Restore, (new) Enemy Skill, Sense, Long Range,
Water Ring Bahamut

Don't forget to use a tent before saving. You won't be able to PHS here, either. Once you have defeated this final boss you won't need to pick this guide up again until you have gained control of Cloud on disc 2. Just sit back, relax and enjoy the amazing, ahead of its time fantasy that only Hironobu Sakaguchi, Kazushige Nojima & Yoshinori Kitase can bring (the games story writers). Not forgetting Nobuo Uematsu and Minoru Akao for the amazing music score! (This is basically SquareSoft/Enix in its prime.)

%^^^

JENOVA-LIFE	BOSS BATTLE:	26
	---------Lv:	50----------
	---------HP:	10000----------
	---------MP:	300----------
	--------EXP:	4000----------
	---------AP:	350----------
	--------GIL:	1500----------
	-------DROP:	Wizard Bracelet
	-----ABSORB:	WTR----------
	----NULLIFY:	GRV----------
	-----DOUBLE:	ERT----------
	ENEMY SKILL:	AQUALUNG-------

If you've equipped the Water Ring then this fight is impossible to lose as all of Jenova's attacks are water based. If you haven't learned Aqualung on your 3rd E-Skill then now is the time, just make sure to have equipped it on the same person who has the Water Ring. Open with the same move as always, Big Guard and then cast your Summons. You can then cast Slow on her, or just wait until Barret's Added Effect=Time is successful (if you'd equipped that combo), just make sure that Jenova hasn't set up her reflect, otherwise it'll bounce back to the caster. Have Barret and Cloud just attack, whilst Tifa just keeps using Comet and other magic spells (like Beta), and don't forget to use Regen. Once she's been downed your reward will be the [WIZARD BRACELET), an 8 Materia slotted piece of armour with very low Defence.

NOTE - Jenova has a higher chance of using Aqualung if her HP is below 25%.

Disc 1 Finished 02/May/2015

|                                NOTE ON ENEMIES:                                |
|                                                                                |
| Make sure to have protection from Small as the Hungry like to eat you once |
| they've made you small. The Grimguard uses Ice2 & Bolt2, so equipping the  |
| Dragon Armlet will help, also the Grimguard's shield will shift from       |
| having high physical defence to having high magic defence with every few   |
| hits. The water Armlet can be sold for 5000 gil each, so try to steal a    |
| few from the Acrophies.                                                        |
+--------------------------------------------------------------------------------+

--Items - Viper Halberd, Bolt Armlet, HypnoCrown, Megalixir, Magic Plus
          Materia, Power Source
--Extra - Fort Condor Battle #13 - 3x Elixirs
```

So, now you know why I told you to make a fresh save just before the Temple of The Ancients. Maybe you already saw it coming, maybe you didn't, either way, if you haven't taught Aeris her Lv 4 Limit Break - Great Gospel, then make sure to find the time to train her up in the forest area by Rocket Town from that save (if you're trying to obtain the See the Light Trophy). Then come back to your main save when you are ready to continue.

After you've finished shedding your tears, set up your Materia however you see fit. Here's how I set mine up:

1) Cloud - Lv 41 (Front)

```
Murasame        - All=Restore, Heal, Enemy Skill, Morph
Wizard Bracelet - All=Gravity, MP Absorb=Steal, Sense, Speed Plus,
Champion Belt                                          HP Plus, MP Plus
```

2) Barret - Lv 35 (Front)

```
Chainsaw       - Added Effect=Time, Enemy Skill, Manipulate, Luck Plus
Diamond Bangle - HP Absorb=Deathblow, Elemental=Ice, HP Plus
Champion Belt
```

3) Tifa - Lv 37 (Back)

```
Diamond Knuckle - All=Fire, Comet, Revive, Enemy Skill
Dragon Armlet   - Elemental=Shiva, Steal, Long Range, HP Plus, MP Plus
Ribbon
```

Now run into the middle shell-house and rest. You can now follow Sephiroth north if you like, or you can head completely back around in the opposite direction once more...

] SIDE NOTE - FORT CONDOR BATTLE No. 13 [
] [
] Your prize this time will be 3 x Elixirs. You must complete this before [
] obtaining talking to the guy at the top of the snowboarding cliff in the [
] Icicle Inn. There is only one more optional battle after this one. [
]_____[

NOTES - Before heading back to the Northern Continent, it might be worth heading to Mideel to fight the Sea Worms to raise some gil, the next shop will demand an enormous 93,000 gil from us. Do not fret though, there is an enemy that we will encounter which carry Water Rings which we can steal from which can be sold for 5000 gil each. We can also sell our weapons, I know I said that I wasn't going to do that again, but I've just worked out that you can make roughly 54,650 gil that way (depending on how many pieces of amour you have).

- If you don't want to level up, and you don't want to sell your weapons, then you can dig Ethers at the Bone VIllage dig site (dig spot 6) for free, selling them for 750 gil each. Or you could just battle the Trickplay near Bone Village (their Gold Mountain move increases their value by 800 gil each time they cast it).

- Very shortly, our modes of transport are going to be replaced with bigger and better things (respectively). The only bad news is that the Corel Desert (near to the Gold Saucer, not Corral as in where we are now) will be permanently un-accessible. So, if you did wish to steal a few Turbo Ethers from the Land Worms, then now would be your final chance.

Now make your way along the path you saw Sephiroth take to come to a screen with a giant shell in the middle. To get to the chest on the right side you have to run up the small slope on the left, then head around the inside of the shell (as opposed to the outside bit at the top of the slope). It can be quite tricky to navigate to, your reward will be the [VIPER HALBERD].

Retrace your steps, then ascend the ladder like structure of the shell to come to the next screen. This cave has many cracks that can be climbed, take the left crack first then jump to the left at the top. Now climb the crack to the left that you see all the way to the top to grab the [BOLT ARMLET] from the chest here.

NOTE - As mentioned, you're going to need a fair amount of gil if you wish to buy the next set of weapons for everyone, so make sure to steal a few Water Rings from the Acrophies if & when you encounter them.

Now head down and right. Run all the way over to the right and head down, then left to grab the chest containing the [HYPNOCROWN]. Then head all the way back up to grab the [MEGALIXIR] from the chest on the right.

Jump to the left and then take the final crack to the top. Run over to the ladders and descend all the way tom the bottom to GRAB THAT MATERIA! the [MAGIC PLUS MATERIA]. Yes, this area is re-visitable. T

Lastly, take the ladders all the way to the top, grab the chest in the next screen containing the [POWER SOURCE], and then exit out to the World Map!

¬¬¬

```
+---------------------#~~~
```

```
                                        |             Shortbarrel   - 3200 gil
 Aeris    - Fairy Tale       - 1250 gil |
            Prism Staff      - 1300 gil | Other  - Silver Armlet -  650 gil x3
            Wizer Staff      - 1600 gil |          Gold Armlet   - 1000 gil x4
            Aurora Rod       - 2900 gil |          Star Pendant  - 2000 gil x1
           *Princess Guard   - 3750 gil | (keep 1) Peace Ring    - 3750 gil x1
                                        |
 Cid      - Spear            -  600 gil |
            Slash Lance      - 3250 gil |                   Total = 54,650 gil
```

You can also sell any surplus Water Rings you are carrying. You should now maybe have the required 93,000 gil to purchase all of weapons on offer here (it's a bit of a remote place to stock such high value weapons, don't you think? He'd be better off selling his goods somewhere like Junon, or Midgar):

```
1 x Organics     O=O O=O O O  - Cloud      - 12,000 gil
1 x Dragon Claw  O=O O=O O O  - Tifa       - 10,000 gil
1 x Microlaser   O=O O=O O O  - Barret     - 12,000 gil
1 x Adaman Clip  O=O O=O O O  - Red XIII   - 11,000 gil
1 x Hawkeye      O=O O=O O O  - Yuffie     - 12,000 gil
1 x Red M-Phone  O=O O=O O O  - Cait Sith  - 11,000 gil
1 x Mast Axe     O=O O=O O O  - Cid        - 13,000 gil
1 x Lariat       O=O O=O O O  - Vincent    - 12,000 gil
                                  Total - 93,000 gil
```

Now that you've fully cleaned out your, wallet, it's time to head outside and set up your new party. This was the load out I had:

1) Cloud - Lv 42 (Front)

```
    Organics      - All=Restore, All=Time, Heal, Enemy Skill, Sense
    Aurora Armlet - Steal, Magic Plus, HP Plus, MP Plus
    Ribbon
```

2) Vincent - Lv 38 (Back)

```
    Sniper CR     - Elemental=Ifrit, Enemy Skill, Counter Attack
    Dragon Armlet - All=Gravity, HP Absorb=Deathblow, Luck Plus, HP Plus
    Champion Belt
```

3) Cid - Lv 38 (Back)

```
                                                      Long Range, Speed Plus
    Dragoon Lance   - Comet, Revive, Enemy Skill, Manipulate, Morph, Steal,
    Wizard Bracelet - Elemental=Shiva, All=Fire, Added Effect=Mystify,
    Champion Belt                                           HP Plus, MP Plus
```

Now that we're finally set up and ready to go, head into the house just past the weapon shop. On the bottom floor here is a [TURBO ETHER]. This house contains a treasure house of knowledge, I highly suggest that you play the four videos that are available on the upper floor. You will learn a great deal about the Cetra, Aeris, Jenova, WEAPON, Professor Gast and Ifalna by watching them.

NOTE - After watching the videos, you will have had a few things clarified for you. Back in the Shinra Mansion 5 years ago, Sephiroth stated that Jenova was an Ancient, and that he himself carried Jenova's DNA which subsequently made him an ancient aswell. This is not the case. Sephiroth was infused with Jenova's DNA at fetal stage, but the DNA was not that of an Ancient, rather, an alien (or, 'crisis from the sky'). A planet destroyer if you will, going from planet to planet

devouring the spirit energy of that planet and then moving on to the next. Sephiroth, however, has slightly different motives...

We'll come back to the middle house in just a sec, for now head to the eastern house with the snowman outside. You should be able to make out a map on one of the walls, grab the Glacier Map as it'll come in handy later on. Now look inside the room to grab a [HERO DRINK] on the right, and a [VACCINE] on the left. The Hero Drink is a great item, save it for much later.

Now head over to the north eastern most house. You can sleep here for 200 gil, I suggest doing so. You can head downstairs to the bar to hear some local gossip if you like, otherwise head to the top floor and look at the window sill for an [X-POTION].

Make sure that you're fully kitted out and healed up, then save your game. This is the last point in the game in which you'll be able to use your buggy and plane. If there's anything left that you want to do on the World Map (as it currently is) then do it now. When you're ready, talk to the guy at the very north end of the screen. Choose option 1 - 'I'm still going' to continue. When you do, some uninvited guests turn up..

You can dodge her punch by pressing up, left or right but you'll have to be quick! If you weren't fast enough then you'll wake up in Gast's old house, otherwise you'll continue on from where you left off. Either way, the town is now under the command of the Shinra and you cannot leave!

Run into the middle house that we skipped out earlier and head into the back room. Talk to the boy here to receive his snowboard, it's time to do some snowboarding!! We're now finished with Icicle Inn, so make sure that you're ready, then head north to run behind the guy to start the snowboarding challenge. Before scooting down the mountainside however, you must be aware of a few things:

NOTES - There are various routes you can take whilst snowboarding, and depending on the route you take will you'll land in one of four places within the Glacier. The Glacier can be, to put it mildly, a bit of a nightmare to navigate. Firstly, its labyrinth like structure can easily get you lost and disorientated. Secondly, you will pass out every 544 steps that you take, waking up in a cabin to the far north. It is possible to pick up all (but one) of the items in one swoop, but if you do pass out then you'll have find your way back to where you left off.

- I'd decided that I wasn't going to mention any exploits during this guide other than the W-Item trick, but what the hey, if you're into that sort of thing then you can perform a few infinite item glitches here. Check section E.18 for more info.

```
]                                                                              [
] SIDE NOTE - SNOWBOARDING MINI-GAME                                           [
]                                                                              [
] Yes, this game will reappear it the Wonder Square at the Gold Saucer.        [
] There's not much to this really, press Up to get yourself going, X to        [
] jump, Square or Down to break and R1 to turn sharply. And obviously Left     [
] and Right to turn right and left, un-respectively.                           [
]                                                                              [
] You'll receive no reward of any type for hitting all of the balloons or      [
] anything, that'll come later on at the Wonder Square. For now, all you       [
] need to worry about is the route that you want to take. LEFT + LEFT is the   [
] optimal route, if you mess up and take the wrong path by mistake then you    [
```

] can either pick the trail back up, or you can return to Icicle Inn to have [
] another go. More details on how to do that below. [

|                                NOTE ON ENEMIES:                              |
|                                                                              |
| The Bandersnatch and the Jumping are the same from as the ones we fought     |
| at the Icicle Area. Obviously equip the Elemental=Ifrit combo, remembering   |
| that Ifrit will not penalise your strength whereas the Fire Materia will.    |
| Jumping, Ice Golem, Snow & Shred can all be hit with L4 Suicide. The         |
| Magnade have very high physical evade, so cast Demi on them. Lastly, make    |
| sure to steal a few Circlets from the Snow Witches, these are the            |
| magicians equivalent of the Champion Belt, increasing Magic and Spirit by    |
| +30!                                                                         |
+------------------------------------------------------------------------------+
```

As mentioned, you only have 544 steps before you pass out, which equates to roughly 2 and a half minutes of movement. When you do pass out, you'll awaken in a shack at the base of Gaea's Cliff. You don't have to back track for the missing items if you don't want to, but obviously I would advise grabbing everything you possibly can.

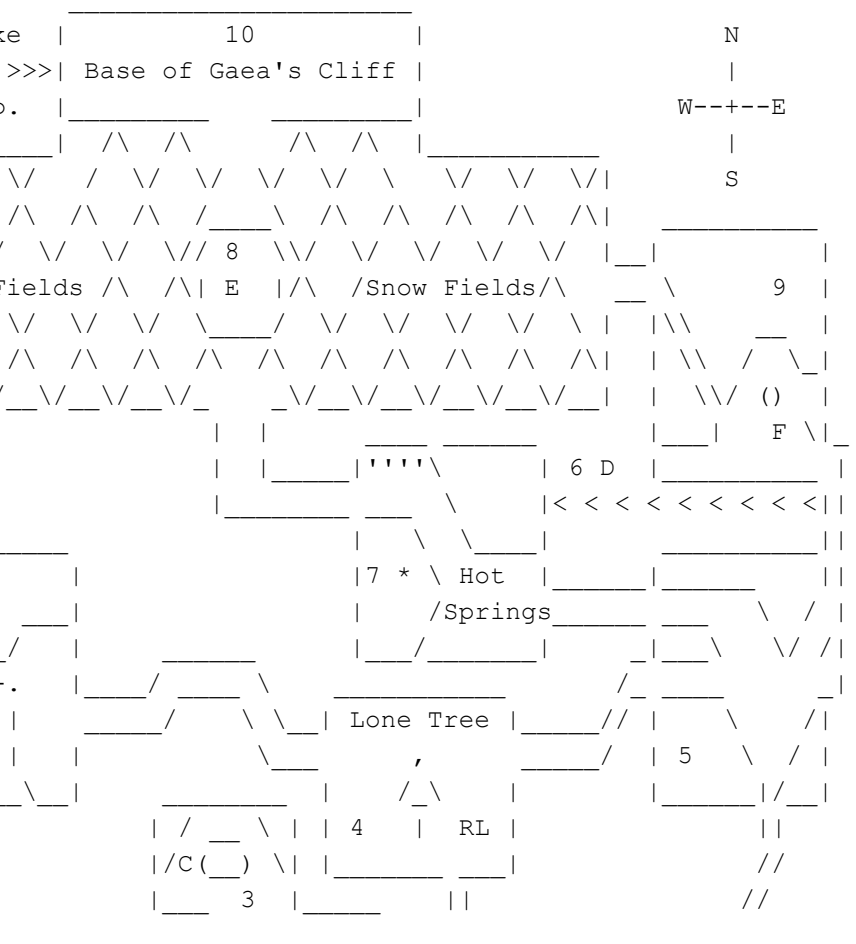
NOTE - If you mess up the snowboarding challenge and you'd rather try again to take the advised path (left, left), then you can exit to the World Map either from the entrance, or even more comically from the area east of the entrance. Head into the cavern on the right to find a shoot that will project Cloud out into the World Map. Here you can head back to Icicle Inn to try the snowboarding game again.

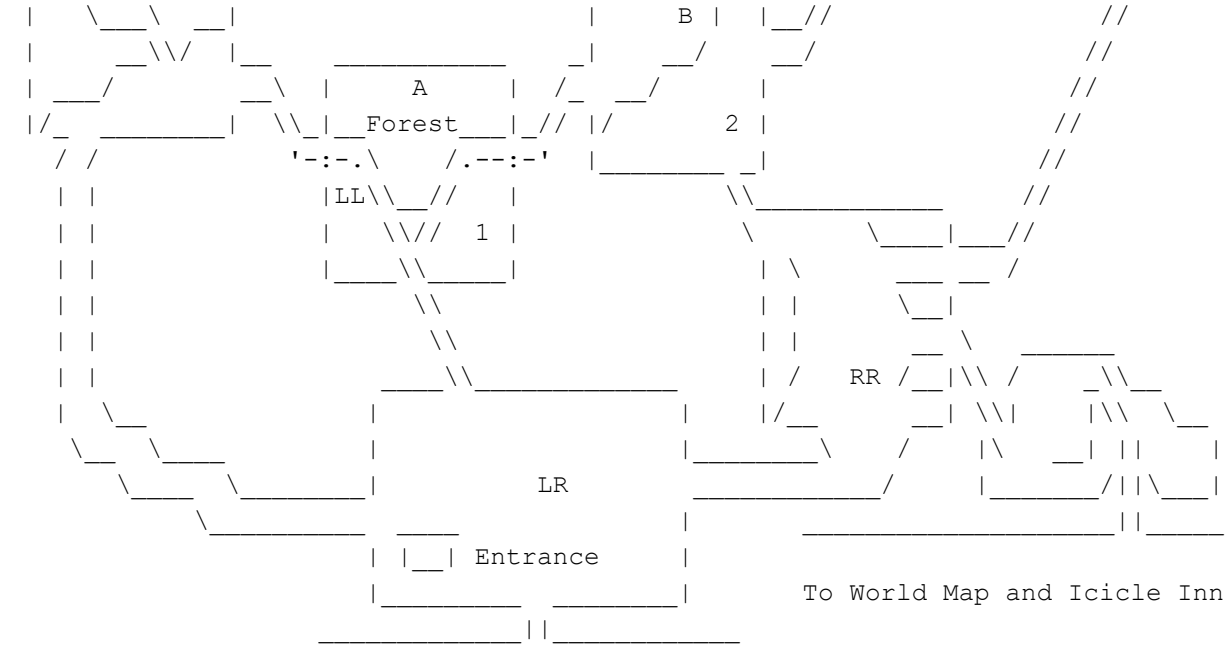
This map should explain where to go far better than I could using just paragraphs:

(This same map can be found in section F.07)

^^

(A) Mind Source, (B) Potion, (C) Safety Bit, (D) Added Cut Materia,
(E) All Materia, (F) Alexander Materia, (G) Elixir





^^

If you'd taken the :-

Left + Right path you would have landed at the entrance. Head north to continue on from the forest.

Right + Left path you would have landed at the Lone Tree. Head south, then west to continue on from the forests.

Left + Left path (as advised) you would have landed in the forest.

Right + Right path you would have landed east of the entrance. Make your way through the south screen to arrive at the entrance then continue north to come to the forest.

Take as much time as you need to study this map, you aren't on a time limit or anything. You can also bring up the Glacier Map that you stole by using Square. Your aim is to make it to area 9 without passing out as it's extremely difficult to pick up the final item at 11 (Elixir) in one trip.

NOTE - Some screens will have more exits than are marked on this map. Most of them will lead back to the same routes. For example, when you get to 11, there will be three northern exits all of which will lead back to the same route in the screen north of 11 with the Moai face on it. Don't be put off by the orientation of the through-screens, either.

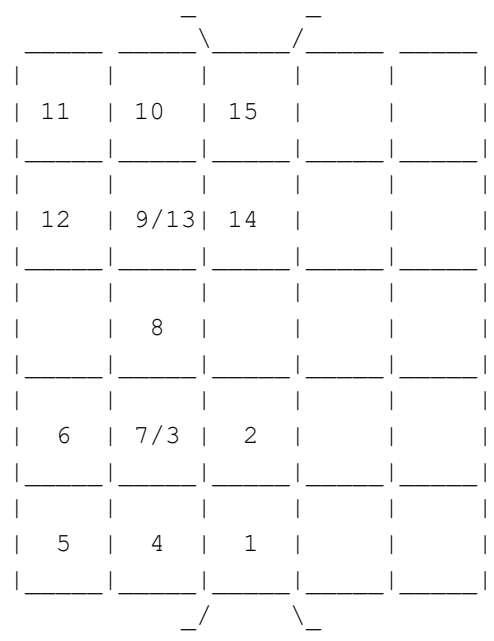
1.) At the very north of the screen in the forests, you'll be able to pick up (A), the [MIND SOURCE]. Now head east two screens to 2.

2.) To the north east of the screen you'll be able to pick up (B), the [POTION]. By not pressing confirm a second time, you can add one to your inventory whilst retaining the Potion's 'source'. Meaning, it'll still be there when you run back. Now head north west to 3.

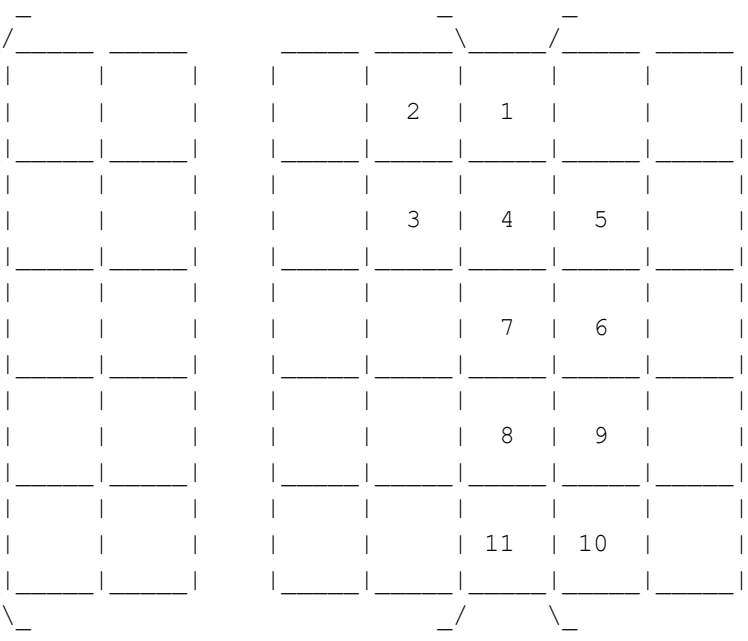
3.) You'll have to step on the ice blocks in a certain sequence here to be able to get to the other side. The same goes for on the way back. In the cave ahead you'll be able to find (C), the [SAFETY BIT] (be sure to get

this).

HEADING NORTH:



HEADING SOUTH:



4.) Picking a second 'infinite' potion as you return through section 3, make your way east two screens to the Lone Tree.

5.) Heading east, make your way 4 screens up to the far eastern mountainside 'split'.

6.) Now head through the far eastern exit, this is a one way path that can only be travelled on from screen 5. Along the path on the second screen to the right, you'll just about to be able to make out (D), the [ADDED CUT MATERIA] in the snow. GRAB THAT AWESOME MATERIA! This whole area is re-visit able.

NOTE - Added Cut can be paired with Deathblow for devastating effect. In fact, it's the only reason I've taken Vincent along with me, if you've followed the exact set-up that I've had (with the Sniper CR) then replace HP Absorb with Added Cut, Now! Also, you could pair it with Steal instead if you wished to turn it into 'Mug'.

7.) You should now emerge at the hot springs. MAKE SURE to examine the left side of it to 'touch it' as you won't be able to grab the Alexander Materia otherwise. Then make your way 3 screens to the north to come to the snow fields.

8.) Every second or so press confirm to lay down a marker. When the wind throws you off direction, stop moving. Use the markers that you have placed to pick up your orientation. Firstly, head north to find and igloo type cavern containing (E) the [ALL MATERIA] (it's not like we need anymore of these things).

9.) Now head out of the igloo and head east. After you've travelled through 4 screens you'll find yourself on more mountain side paths. Head into the eastern cavern and replace Counter Attack with Steal. As long as you touched the hot springs earlier, then you can fight the Snow here, and even though the music suggests a boss battle it's actually just the same Snow as listed above. Make sure to steal a Circlet from her. Once she has been defeated she'll leave behind (F), the [ALEXANDER MATERIA]. Although you can return to this area later on in the game, GRAB THAT

MATERIA! now anyway to save yourselves the hassle (naturally).

NOTE - We now have our first and only piece of Holy Materia! Use it wisely.

10.) As long as you've managed to grab the Alexander Materia without passing out then you'll have succeeded in grabbing as much as I intended for you to grab. Don't even attempt to make your way over to the remaining can make use of there, however. I suggest at this point either making your way back to the Snow Fields and then north to find Holzoff's cabin, or just running around until you pass out, you'll then awaken in his cabin.

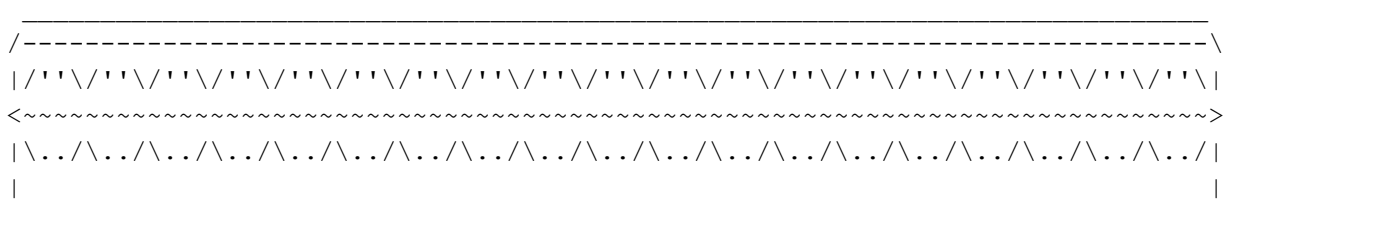
Once at the cabin, you'll have to listen to Holzoff's story to continue. After spending the night there, head outside to hear Barret embarrass himself, then your teammates will join you. If you're really not that bothered by the Elixir nor the exploit, then you can continue down to section D2.03, otherwise head south back to the Snow Fields. When you head back out you'll have a fresh 544 steps to play with.

11.) From the Snow Fields head all the way to the west 3 screens to arrive at more cliff sides. Note the face in the northern cliff is a Moai face that is actually a recurring easter egg found throughout the FF series. They serve no purpose, and can usually be found in remote locations. The only other Moai face found in VII is during the Chocobo Races (Ok, not so remote. Try looking on the bottom of the ocean or on the moon, as in previous FF's).

Now make your way west 3 screens to arrive at a cavern that can be entered from both sides. the final item here, the [ELIXIR] (G) can be duplicated as many times as you please, so long as you don't pick up the source (exactly like the Potion we saw earlier, but unfortunately not the Mind Source). Press confirm once to have the message 'Received Elixir' appear, but DON'T press confirm a second time. Instead, run out of the cavern and back in again. The Elixir will still be there, and you'll have added one to your count. As long as you don't accidentally pick up the source of the eternal Elixir, then you'll be able to keep coming to this spot as many times as you like. This also applies to the Steam/PS4 versions.

NOTE - If you're interested in item duplication, then just remember there's a far, far quicker way of doing so at the end of Disc 2 once you've obtained the W-Item Materia. Probably the oldest trick in the walkthrough-book, the W-Item trick will duplicate any item in less than a second so long as it can be used in battle. Also note that there are other ways of duplicating rare items such as the Alexander Materia, but they are so complicated and difficult to perform that I'm not going to even bother to go into it. For more info see section E.18.

That just about wraps up everything there is to do within the Great Glacier, so head over to the base of Gaea's Cliff and into Holzoff's Cabin once more. Alternatively, you can just run around until you pass out.



{D2.03} - The Promised Land
ITEMS:

-NULLIFY:	[------------]	[------------]	[-----------GRV]	[------------]
--DOUBLE:	[------------]	[------------]	[--------------]	[ERT--GRV--FRE]

NOTE ON ENEMIES:
Make sure that someone has a Ribbon on at all times, and to defend against Ice. This is the last place in the game where you can learn Trine, so if you have defeated the enemy Godo in Wutai then make sure to learn Trine now. Also, equip the Elemental=Leviathan combo to deal with the Malboro if

| you have it, otherwise just use Aqualung. Bad breath will inflict 8 |
| different Status changes, while Magic Breath will inflict Fire Ice & |
| Lightning damage. When fighting the Malboro you can use L4 Suicide |
| straight away as they more likely to use Bad Breath when their health is |
| low, you can also use Magic Hammer against them to use him as a source of |
| MP. Make sure to obtain a few Dragon Armlets from the Blue Dragon, also. |
| |
| Note that the Blue Dragon uses the Enemy Skill Dragon Force which raises |
| the Def and Mag Def of one character, but due its resistance to being |
| Manipulated you won't be able to learn it until you face a different enemy |
| in Disc 3. |
| |
| Grab yourself a Holy Torch while you're here; morphed from the Evilhead or |
| the Stilva. You will be able to grab one again from the Battle Square, but |
| it's easier to pick one up here. The Unknown 3 in the Sunken Gelnika also |
| drops them. |
+---+

--Items - Ribbon, Javelin, Elixir, Fire Armlet, Megalixir, Speed Source,
Enhance Sword
--Boss - Schizo (Left) Lv 43 & Schizo (Right) Lv 43 (Protect Ring)

When you are ready, form a party of your choice and then set up your Materia, rest (by talking to Holzoff) and then finally save. The following area is *not* re-visitable, so make sure to grab all the collectables along the way. This was my set-up heading out, bearing mind that I'm only using these two characters because I haven't used them in a while, and I'm also only equipping the All Materias purely for AP, remember that they're worth 1.4 million gil once mastered!

1) Cloud - Lv 43 (Front)

Organics - All=Restore, Comet, Heal, Enemy Skill, Sense
Aurora Armlet - Steal, Magic Plus, HP Plus, MP Plus
Ribbon

2) Cait Sith - Lv 36 (Front)

Speed Plus
Red M-Phone - Added Effect=Time, Counter Attack, Long Range, Luck Plus,
Dragon Armlet - Added Cut=Deathblow, Enemy Skill, Manipulate, HP Plus,
Champion Belt MP Plus

3) Yuffie - Lv 37 (Back)

Hawk Eye - All=Barrier, All=Gravity, Revive, Enemy Skill
Wizard Bracelet - Elemental=Shiva, All=Poison, Morph, Steal, HP Plus,
Champion Belt MP Plus

When you reach the base of the cliff you will notice that your body temp is on display. Every time you get to a ledge you're going to want to bash Square to raise you temp up to around 35 degrees. If it falls below 26 then you'll collapse and return to Holzoff's Cabin.
After the fourth ledge you'll find the entrance to a cavern.

Head through the archway directly north of the entrance. In the next screen, head up the stairs on the left, and then through the southern exit. Back at the first screen, head over the bridge on the right, and search for the very well hidden passage on the other side for a chest containing a [RIBBON]. I suggest equipping it now.

Now head back to the main screen. Follow the path north and you should be able to make out a chest slightly off route. Make your way round to it for the [JAVELIN]. This weapon for Cid is the best Double Growth weapon in the game, as it has five slots, four of which are linked.

Now head through the opening on the left to arrive back at the 2nd screen, but this time to the right of where you were initially. Head north through the archway that is indicated with a green arrow, then run round to the top ledge. You'll be able to push the boulder here to free up the previously blocked path. Now follow your way back round to head to the newly opened path.

NOTE - The Stilva basically looks like a small red version of the Materia Keeper. When you run into her, don't forget to manipulate her to learn Magic Breath, and more importantly Trine. This is the only time you'll be able to learn the E-skill Trine in a random battle encounter.

- Magic Breath is perhaps one of the strongest Enemy Skills in the game, and surpasses Beta! It does cost a whopping 75MP to cast, though.

The new path will lead you back round to the first screen, then back outside for some more climbing. Hitch yourself up then choose 'up' when prompted. On the next ledge, climb up on the left side and choose 'right' when prompted. Now climb to the next ledge, then climb up the left side of the ledge to climb to one final ledge followed by a large cave.

Head to the right first to grab an [ELIXIR] sitting inside a chest. You can then save if you want using the save point to the north, otherwise just head through the exit to east. Note that this next screen outside with the two snowy paths is the only screen in which the Malboro can be fought, so make sure to learn Bad Breath as it will cause Poison, Sleep, Small, Frog, Darkness, Silence, Berserk and Confusion! BE SURE to be wearing a Ribbon or two. You can fight the Malboro again on Disc 3 if you missed them here.

In the cave above you'll see four giant crystals hanging from the roof. You can equip Elemental=Titan if you like, but it probably isn't necessary. I did anyway on Cait Sith just for the sake of it. You'll have to fight these giant icicles on by one, but first open the chest on the right containing the [FIRE ARMLET].

Like with previous foes, if you kill the main enemy then the fight will end, but you won't reap all of the rewards had you killed them all, plus, the battle spoils here aren't too shabby either. One good blast of Beta should wipe the floor with 'em. Don't jump to the lower level when prompted, instead fight all four of them and then continue to the end for a chest containing a [MEGALIXIR], even though it'll display 'Last Elixir' (fixed in current versions)!

Now make your way to the right of the screen to jump down to the giant cavern below to out find that the icicles have created new paths for us! First head to the left of the save point to find a chest containing a [SPEED SOURCE].

Then head out of the newly accessible exit to come to a chest in the snowy paths area containing the [ENHANCE SWORD], then follow the path round to the next area.

Once outside, you'll have to do the old climbing thing again. This time head 'up', then head 'up' again, and don't forget to keep your body temperature

up. You'll soon come to a save point and a spring in which you can restore your HP/MP. I suggest doing so, as there is a boss battle ahead!

NOTE - These next two screens are the only two in which the Blue Dragons can be fought, and they will drop a Dragon Armlet 100% of the time. I suggest collecting a couple now as you won't be able to obtain these again until Disc 3 otherwise.

Some walkthroughs would advise getting them for the upcoming boss battle, I reckon you don't need 'em. In fact, I think the following set-up is slightly better (note the armour & accessories that I've chosen):

1) Cloud - Lv 45 (Front)

Organics - All=Restore, Comet, Enemy Skill, Sense, Steal
Aurora Armlet - Elemental=Earth, Magic Plus, HP Plus
Fire Ring

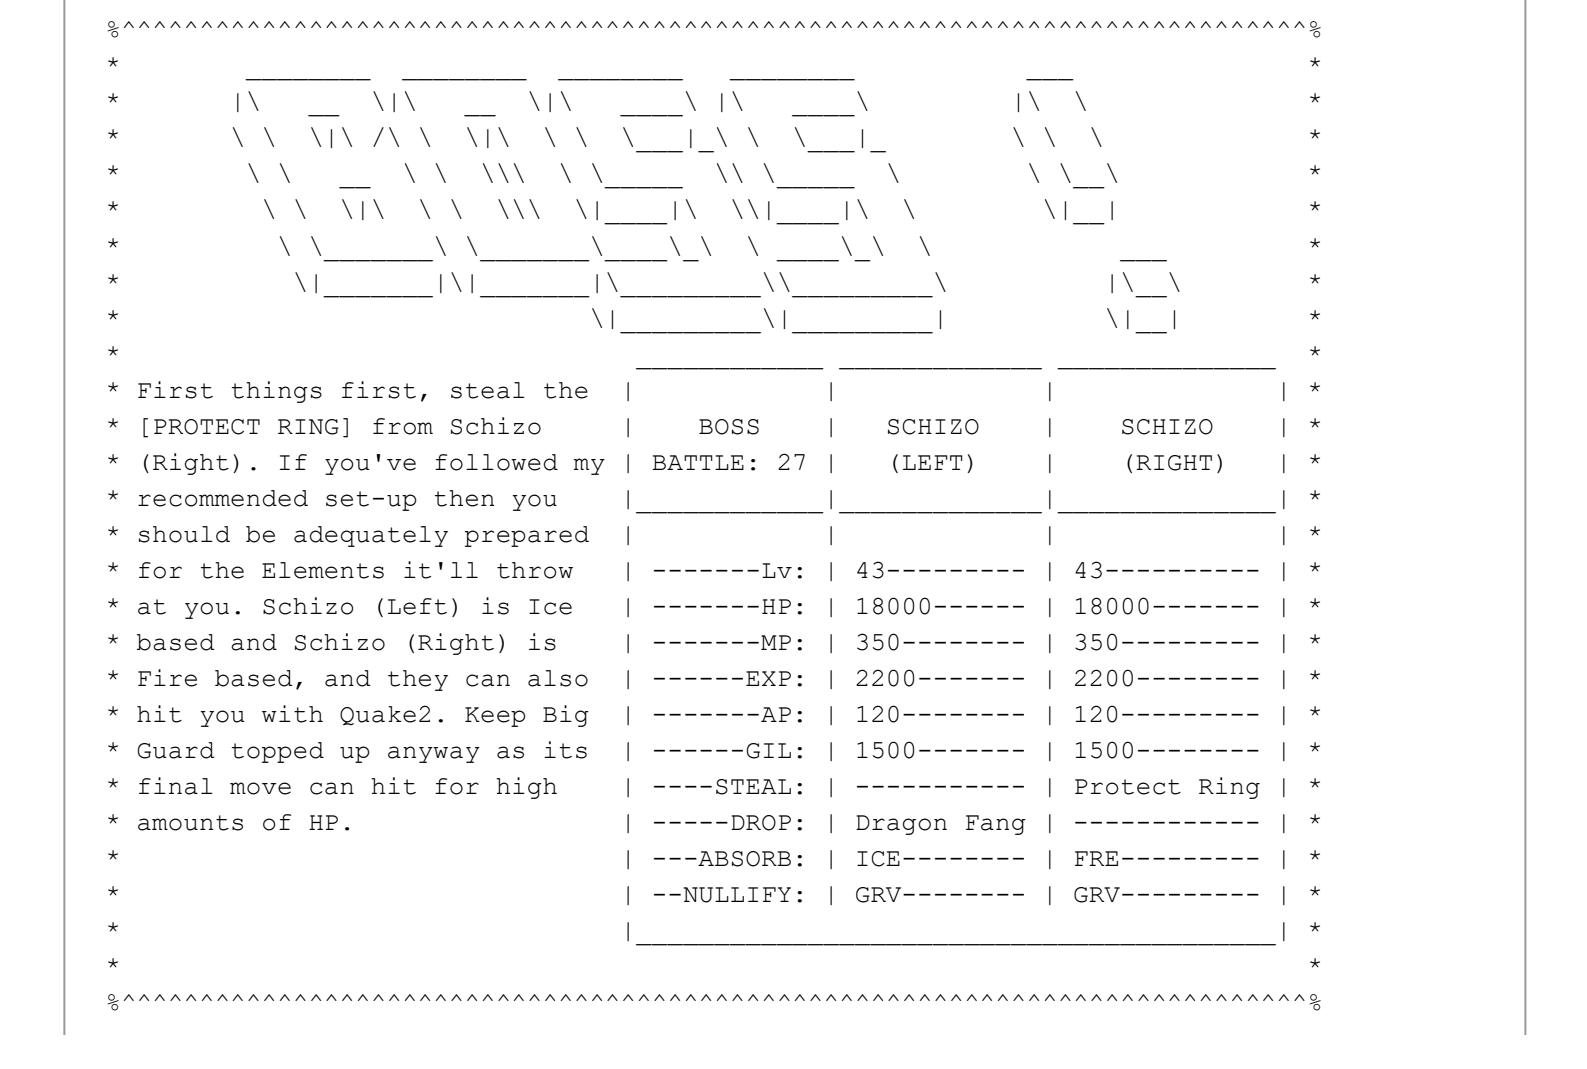
2) Cait Sith - Lv 39 (Front)

Red M-Phone - Added Effect=Time, Revive, Steal, Luck Plus, Speed Plus
Dragon Armlet - Added Cut=Deathblow, Enemy Skill, Manipulate, HP Plus, MP Plus
Champion Belt

3) Yuffie - Lv 40 (Back)

Hawk Eye - All=Barrier, All=Poison, Enemy Skill, Steal
Fire Armlet - Elemental=Titan, HP Plus, MP Plus
Ice Ring

Restore your HP/MP, save, then head to the next screen for the next boss!



First things first, steal the [PROTECT RING] from Schizo (Right). If you've followed my recommended set-up then you should be adequately prepared for the Elements it'll throw at you. Schizo (Left) is Ice based and Schizo (Right) is Fire based, and they can also hit you with Quake2. Keep Big Guard topped up anyway as its final move can hit for high amounts of HP.

Once you've defeated the twin headed-serpent, head back to the spring to change your party. In the next section along Tifa will force herself into your party, so you might aswell have her set up now! This was my set-up, again I'm equipping a lot of Materia here just for the sake of gaining AP:

1) Cloud - Lv 46 (Front)

Organics - All=Restore, Comet, Enemy Skill, Sense, Steal
Wizard Bracelet - All=Heal, All=Gravity, Manipulate, Magic Plus, HP Plus, MP Plus
Ribbon

2) Tifa - Lv 41 (Front)

Speed Plus
Dragon Claw - Added Effect=Time, Revive, Enemy Skill, Luck Plus,
Dragon Armlet - Added Cut=Deathblow, Elemental=Fire, Morph, HP Plus
Champion Belt

3) Red XIII - Lv 40 (Front)

Seraph Comb - Enemy Skill, Steal, HP Plus, MP Plus
Dragon Armlet - All=Barrier, All=Poison, Elemental=Ifrit
Champion Belt

Once you've healed and saved head past the place where you fought Schizo to come to the final climbing section, not before grabbing a Dragon Armlet from the Blue Dragon as this will be your last chance to do so. There is no body temp gauge here as we're virtually at the top. Once you're at the top you'll view a cool bit of CGI.

+-#~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~#-+
|                              NOTE ON ENEMIES:                            |
|                                                                          |
| There aren't many Elemental weaknesses to exploit here, so stick your    |
| Elemental Materias in your armour paired with Fire and Ifrit. The Grenade, |
| like the Bomb in North Corel will explode after being hit twice for large |
| amounts of damage. You can try to morph a few Mind Sources from the Dragon |
| Riders and Killbins too, but definitely steal a few Gigas Armlets from the |
| Gigas. Whilst increasing your strength by +30 you'll also gain 0 AP for  |
| Materia linked to that armour, so swings and roundabouts 'eh? Lastly, the |
| Wind Wing carries the enemy Skill White Wind, but the command isn't      |
| available when manipulated for some reason. Oh, and protect yourselves   |
| from Sleep, caffeine should do the trick.                                |
|                                                                          |
|  NOTE - This is the only place in the game to obtain the Earth Mallet;   |
|         dropped from the Gigas.                                          |
+--------------------------------------------------------------------------+

--Items - Neo Bahamut Materia, Hi-Potion, Ether, Kaiser Knuckles, MP Turbo
          Materia, Poison Ring
--Boss  - Jenova-Death Lv 55 (Reflect Ring)
```

Wow, surely this must be the Promised Land? As you descend the hill you'll come across another black caped thing similar to the ones we saw earlier in Nibelheim. The next screen along is where Tifa would've joined you had you decided to not put her in your party earlier.

NOTE - If you're after a Gigas Armlet or two then you must fight the Gigas in the first screen only. As the name suggests, they are huge!

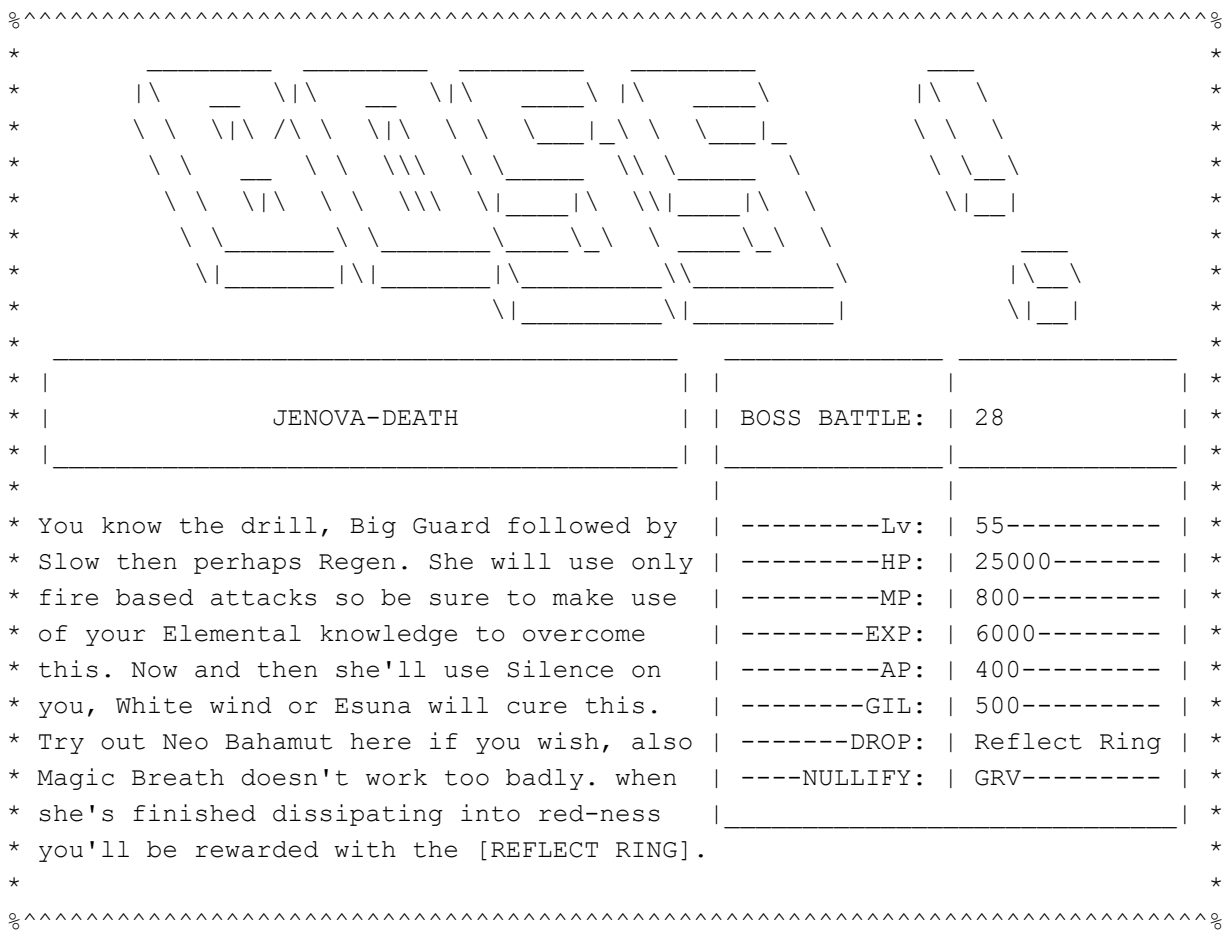
In the next screen along, drop down and follow the path to GRAB THAT MATERIA!, the [NEO BAHAMUT MATERIA]. Now jump over to the save point, as you make your way to the next screen you'll see a little scene involving one of Cloud's adversaries.

In the next screen you'll have to time your runs. When the wind dies down, you'll be able to dash through, it may seem easy now but it'll get slightly more tricky soon. Talk to the hooded creature on the right for a [HI-POTION] and the one on the left for an [ETHER].

I can't imagine you messing it up, but if you did somehow manage to run into the wind (probably because you're so not used to pre-rendered graphics anymore), then you would be forced to fight the Wind Wing. Once you're in the next screen you'll see a load more caped men, follow the winding path round to a chest containing the [KAISER KNUCKLE].

In the next screen along you'll come to another wind barrier, this one slightly more difficult than the last. Once you're through, you're going to want to prepare for a boss battle. Make sure to have some sort of Fire defence on each character, aswell as Silence defence. Try equipping your new Summon Neo Bahamut aswell. You'll have some fairly strange dialogue, then

you'll be up against:



NOTE - the music here I find to be incredible. I had the notion years ago to make a song based on the Jenova Theme. Unfortunately, I didn't follow it up, and a dubstep producer named Datsik beat me to it, although his tune was, well there's only one word to describe 'Jenova Project'. Aggy. The lesson is, if you have a creative itch, scratch it, it's why you're reading this walkthrough right now.

Once Jenova is defeated, Cloud will realise that the real Sephiroth is further within the whirlwind maze. You'll then be given the choice of who you wish to give the Black Materia to. Try as you might to give it away, only Red XIII or Barret will up to the task. Once you've made your choice, talk to Tifa in order to proceed.

GRAB THAT MATERIA! Pick up the yellow [MP TURBO MATERIA] that you see on the floor (even though MP Turbo is a support 'blue' Materia), then head up to the save point to save.

Open the chest to the left for a [POISON RING], then head into the next screen for one more wind barrier. Before progressing, remove Cloud's armour and accessory, and also everyone's Materia. Using the 'Exchange' tab, equip Barret and/or Cait Sith with a few basic bits of Materia.

When you progress to the next screen you will engage in a series of events that will massively shape your knowledge of the story as a whole, so pay close attention. You won't need to pick up this walkthrough again until you have gained control of Tifa in the next section of the game.

NOTE - Sometimes, sometimes Sephiroth is telling the truth and sometimes Sephiroth is lying. And sometime when Sephiroth is lying he is doing so because he believes it to be the truth, and other times he is lying because he likes to confuse Cloud. In other words, don't take

all of what Sephiroth says as gospel, but also at the same time
listen to every single god-dam word that he is saying!

```

\----------------------------------------------------------------------------/
```

```
¬¬¬
```

] you didn't know that you should, and other things you shouldn't [
] know that you did.”). She desperately wanted to address these [
] issues but was worried that something terrible would happen if she [
] did. Tifa thinks that it's been 7 years that her and Cloud have [
] been apart as opposed to 5 years because she doesn't remember Cloud [
] ever coming to Nibelheim 5 years ago... More on that later on. [
] [
] Reunion - When Jenova has finished sucking the Lifestream from a planet, [
] she will beckon for all beings that contain her DNA (remember [
] what you learnt in Professor Gast's Lab in the Icicle Inn) to [
] return to her, she will then move onto another planet. This is [
] called 'reunion'. Seeing as Professor Gast mistook the [
] lobotomised Jenova for an Ancient, he began experimenting on [
] infusing Jenova's DNA with condensed Mako energy, then spraying [
] a small amount of that onto a human being. The result was [
] SOLDIER. Believing he was creating synthesised Cetra (my [
] terminology), Gast was actually creating Jenova clones, and [
] seeing as Sephiroth is a perfect clone of Jenova, Seph' was able [
] to summon every being on the planet that contained Jenova's DNA [
] to return to him, with the Black Materia. And of course, Cloud [
] is just another Sephiroth/Jenova Clone. [
] [
] WEAPON - As you've been able to tell by now, the Planet (Gaia) is no [
] ordinary planet. In fact, two thousand years ago, she created a [
] defence mechanism dubbed 'WEAPON'. These were intended to defeat [
] Jenova, however the Cetra were able to finish the job and WEAPON [
] was not needed, so the beasts of ultimate destruction lay dormant [
] for 2 millennia. Sensing impending danger as Sephiroth summons [
] Meteor, Gaia reawakened its defence mechanism and the 5 WEAPONs [
] were called upon once more to protect the planet. (There are [
] actually more than five if you look into the FF VII universe, [
] however in this game you'll only encounter 5.) After watching [
] probably one of the coolest bits of CGI in the game, you'll have [
] seen Ruby, Emerald, Diamond, Sapphire and Ultimate WEAPON fly off [
] in various directions. [
] [
] Cloud - There is still more to learn about Cloud. Just know for now that [
] Cloud was being beckoned to Sephiroth right from the word go. [
] Aside from testing Cloud's memory, the sole purpose of Tifa asking [
] Cloud to recall his promise to her at the well was to persuade [
] Cloud to stay with them. There is a very strong chance that if [
] Tifa had been unsuccessful in her persuasions, and Cloud had left [
] Avalanche, he would have headed north. [
]_____[

O.K., now that you're (almost) fully aware of what's going on, you should now be at a stage in the game where you are playing as Tifa and you're held captive by the Shinra. Cloud is nowhere to be found, and there is a huge ball of doom lingering in the sky. Things really are starting to look bleak.

You'll eventually take control of Barret. Follow Tifa and the Shinra guard, saving along the way until you come to a press room. After an amount of dialogue, you'll have to fight a couple of Attack Squads using Barret and Cait Sith.

Once they're defeated, inspect the gas chamber door to try to make it budge. It won't. You'll then have some more super cool CGI to sit through. For a game that's approaching 2 decades old, you really can't help but appreciate how aesthetically pleasing the cut-scenes are. I suppose you have to pretend that it's 1997 again.

--D2.04 B - The Gas Chamber ("You'd better watch my back till the end... partner.")

NOTE ON ENEMIES:	ENEMIES:	[SOLDIER:2ND]	[ROULETTE CANNON]
If you encounter 2 x SOLDIER: 2nds, then try manipulating one of them, then have him hit the other, the result is rather comical, they will just keep attacking each other until one of them is dead. You won't be using Barret and Cait Sith for very long, so Elemental= Lightning/Ramuh in their weapons and a few other bits will suffice.	-------Lv:	[---------35]	[-------------38]
	-------HP:	[-------4000]	[-----------3000]
	-------MP:	[--------340]	[------------200]
	------EXP:	[-------1000]	[-----------1200]
	-------AP:	[---------85]	[------------100]
	------GIL:	[--------750]	[-----------1600]
	----STEAL:	[-----Remedy]	[---------------]
	-----DROP:	[---X-Potion]	[-------X-Potion]
	--NULLIFY:	[-----------]	[------------PSN]
	---DOUBLE:	[-----------]	[------------LHT]

Once you have control of Barret, set himself and Cait Sith up accordingly. When you make your way out of the press room, Scarlett will lock the door from the inside. Make your way to the right and outside to bump into a reporter that you happen to know, then watch some more CGI.

Make your way to the next screen which happens to be the airport. Make your way up the service lift to come to a dead-end. The POV will switch back to Tifa now. Note that you could return to this airport landing later on in the game, and while the enemies won't have changed, their formations will have, granting you much more EXP than is currently on offer.

Whilst controlling Tifa, you will have to try to pick the key up and then free yourself. It should be pretty easy to work out, plus you're not on a timer or anything. I don't know what type of gas Scarlett is using but it sure isn't lethal.. Once you're free , inspect the orange light to the left, and then check the door. You'll then watch even more CGI!

In case you can't work out how to free yourself, the sequence is X, X, Tr, X + Tr, Sq + Tr, Sq. Descend down the outside of Junon until you arrive at the Sister Ray (or Mako Cannon).

Keep following the cannon to the end to end up in a turn based slap fight with Scarlett, and after a few nail biting scenes you'll eventually be on-board the Highwind!

Make your way to the cockpit to talk to Cid. Once he's finished, talk to Red XIII, and then to Cid again. Now talk to the pilot next to Cid, then head out of the cockpit and into the room marked up 'operations'.

Here you can form a party, save and restore your HP/MP. Make sure to remove everybody's amour and accessory that you've been using, and then form a party to continue. If you haven't defeated Godo in Wutai yet then be sure to bring Yuffie along, as we're about to obtain the fourth and final Enemy Skill

Materia!

As you can imagine, there are a number of optional thing for us to do now, but we won't be able to do everything until we've obtained Cloud back in our party. For now, this would be a perfect time to let the rest of your team catch up with Cloud (in terms of Lv)! Don't forget also, that when navigating in the Highwind, you can hold down square to side strafe left, right and even reverse.

NOTES - Now that some major changes have happened in the game, you will find that people's disposition towards you will have changed. Everyone that you speak to will now be worried and perturbed by the impending extinction level event hanging above their heads. The Gold Saucer is also closed off at this point too btw.

- Although most of the following sidequests are optional, you are going to have to do some of them in order to complete your Materia collection. I will be giving you a full re-cap on Disc 3 of everything there is to do, so don't feel as though you have to do everything now.

- I suggest equipping a double growth weapon or armour, and whacking an All Materia on it now; the sooner you master one the better!

```

|\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../|
\----------------------------------------------------------------------------/
```

¬¬¬

Just north west of Bone Village you should find a lone house with a patch of green grass that you can land on. This is the Chocobo Sage's house.

Inside you will find a green Chocobo. Interact with it to receive the [ENEMY SKILL MATERIA]. You can now talk to the Sage if you like, enquire about the Chocobo and he will tell you that he doesn't remember anything.

What happens now, is every 5 or so battles his memory will refresh and he'll give you a new piece of information on breeding Chocobos. Obviously you don't need to do any of that seeing as you have this guide, but that's how you would've figured out how to breed Chocobos otherwise. You can also buy some expensive Greens from him, but again we won't need to do that until the time comes for us to Chocobo breed.

To see all of the Chocobo Sage's quotes, use QSI Link [Chocobo Sage]

¬¬¬

run into the room on the right. Open the chest here for a [GUARD SOURCE]. The item shop owner now sells a few pieces of Materia that he didn't sell before, such as Deathblow and Manipulate, I've bought an extra Deathblow. I plan to buy a few more later on aswell.

If you were thinking of working on Leveling your Limit Breaks up, then now would be the perfect time. Head over to the forest area near Mt. Nibel and make sure to equip Manipulate and to also give Hypers to those that need them. Don't forget to equip your Alls on double growth weapons.

--D2.05 D - Playing Tifa's Piano in Nibelheim

--Items - Elemental Materia

Make the short flight over to Nibelheim, then head into Tifa's house. It seems as though all of the caped figures (or Sephiroth clones) have made it to the reunion at the Northern Crater, seeing as there's none left here. Head into her bedroom and inspect the piano. As long as you 'jammed on the piano' during the flashback at Kalm earlier, you'll now complete your set of [ELEMENTAL MATERIA]s. Note that this can only be obtained whilst playing as Tifa; if you miss it now then you won't be able to grab it later on!

So it seems that just by playing music you can pass on the 'knowledge of the Ancients' into the instrument you are playing, and that knowledge will then Materialise into Materia over the course of 5 years. And there was me thinking that Materia had to be formed by a Lifestream fountain, or Mako energy. I've always known that music is powerful, but I had no idea it was that powerful!

--D2.05 E - New Weapons in Costa Del Sol

--Required gil - 72,000

Head into the bar and talk to the guy on the left to purchase the next set of weapons, 8 slotted with medium attack power:

1 x Solid Bazooka	O=O O=O O=O O=O	- Barret	- 16,000 gil
1 x Centclip	O O O O O O O O	- Red XIII	- 14,000 gil
1 x Spiral Shuriken	O=O O O O O O O	- Yuffie	- 14,000 gil
1 x Long Barrel R	O=O O=O O=O O=O	- Vincent	- 13,000 gil
1 x Gold M-Phone	O=O O=O O=O O=O	- Cait Sith	- 15,000 gil
		Total	- 72,000 gil

NOTES - After this set of weapons there will only be one more set to buy which will have stronger attack power but fewer Materia slots. This final hoard will set us back a staggering 190,400 gil, so be prepared to sell one of your mastered Alls if you have one. Speaking of which, don't forget to buy the Shinra Villa in Costa Del Sol for 300,000 gil when you do sell an All for 1.4 Mil gil. Although completely pointless and trivial, it is something to spend your dosh on.

- The Long Barrel R is the 2nd weapon in the game that has 255 Attack%.

--D2.05 F - Entering The Back of The Item Shop in Cosmo Canyon

--Item - Elixir, Magic Source, Full Cure Materia

Now head over to Cosmo Canyon. In case you hadn't noticed, the Highwind can only land in grassy areas, so you'll need to run a short distance. Once at Cosmo Canyon, head up to the far right ladder and into the Item Shop. You'll notice that the red barrier that previously blocked our path has now been removed.

Head through the door indicated with a green arrow to emerge in a room containing an [ELIXIR], a [MAGIC SOURCE] and the [FULL CURE MATERIA]. GRAB THAT MATERIA! I would advise against equipping it as it's extremely detrimental to on one's strength and HP, unless of course you have a dedicated magic caster and you don't mind the penalisation. Plus, you'll need to level the Materia up before you can even use it, so I suggest saving it for later on in the game.

--D2.05 G - Cactus Island

NOTE ON ENEMIES:	ENEMIES:	[CACTUER]	[UNDER LIZARD]	[DUAL HORN]
Like the Cactuar in Corel Desert, the Cactuer has extremely high defence%, which means it will dodge most of your attacks. L4 Suicide is the best thing here, then just keep using Morph until you hit it. The Under Lizard and the Dual Horn will only be fought on the grassy area, and are the same ones from the Woodlands area surrounding the Temple of The Ancients.	------Lv:	[----------40]	[-----29]	[-------30]
	------HP:	[----------6000]	[---1400]	[-----2500]
	------MP:	[----------120]	[----140]	[---------]
	-----EXP:	[----------1000]	[----440]	[------550]
	------AP:	[----------100]	[-----45]	[-------45]
	-----GIL:	[----------1000]	[----420]	[------500]
	---STEAL:	[---------------]	[-Remedy]	[Pepio Nut]
	---MORPH:	[Tetra Elemental]	[-Remedy]	[---------]
	----DROP:	[---------------]	[-Remedy]	[Pepio Nut]

From Cosmo Canyon, head directly south until you come to a small dirt island with a patch of grass to land on. Make sure to have Morph equipped, then go into battle with the Cactuer 3 times to Morph them into 3 Tetra Elementals (or just two - you'll obtain one right at the end of the game).

This is an accessory that will absorb Fire, Ice & Lightning based attacks, so basically they're awesome! Also, the 1000 Needle attack is a great way of getting your Limits up. Unfortunately, the Cactuer (unlike the Cactuar) doesn't drop 10,000 gil, they only drop 1000.

NOTE - I tried equipping Vincent with the Long Barrel R, seeing as it is the weapon with the highest Attack%. It seemed to make a bit of an

improvement on the hit ratio , but I'm not entirely sure. Also, Manipulating the Cactuer drops its Def%.

--D2.05 H - Fort Condor Battle No. 19

So this is the last optional Fort Condor Battle, the next one we do after this will be mandatory and will also be the final one of the game. Your prize this time will be 3 x Elixirs. This must be done before heading into Mideel.

When you arrive at the cabin the guy there will tell you that the Shinra have attacked 5 times since you were last there. These attacks took place whilst Tifa was unconscious for the last 7 days, and there's nothing you could've done about it.

Fort Condor will also have updated its Materia shop, although none of the pieces here will be new to us. On a side note, if you did fancy doing some experience farming, then the Heli-pad in Junon would be the best place to visit, you'll receive shed loads of EXP. Junon will also have updated all of its weapons and armour shops, although none of the weapons you see will be new.

--D2.05 I - Chocobo Breeding Step 1

--Items - Chocobo Lure Materia
--Required gil - 60,000

Make your way to the Chocobo Ranch and as you enter look to the right for the [CHOCOBO LURE MATERIA]. Now, there are a few things I'd like to point out before we start the Chocobo Breeding process.

NOTE - To the veteran players out there, it's worth pointing out at this stage that it is possible to breed a Gold Chocobo *WITHOUT HAVING TO COMPLETE A SINGLE CHOCOBO RACE*. Use QSI Link [RNG] for more info.

SIDE NOTE - CHOCOBO BREEDING

1) Chocobo breeding is said to be one of the more tedious mini-games, which is why it's much more preferable to complete it in sections as opposed to doing it all in one sitting. We are currently very limited in how far we can progress anyway due to the fact that the Gold Saucer is currently closed.

2) You're going to need to spend somewhere in the region of 500,000 gil+ to obtain a Gold Chocobo. You are required to increase your Chocobos stats before breeding them, and the only way to do that is to feed them Greens. The Sylkis Greens that are available from the Chocobo Sage are the best ones to buy, costing 5000 gil each!

3) Chocobo racing is a triple-edged sword. In order to condition our wild Chocobos to breed, we must first race them in the Chocobo races at the Gold Saucer. In doing so we will upgrade their class, once they're at

]   class A they are ready to breed. Using Greens is mandatory prior to   [
]   racing your Chocobos as Greens will increase you Chocobos racing stats, [
]   failure to do so will result in a lot of lost races!   [
]   [
]   There are certain unique Materias that are only available within the   [
]   Chocobo Square. Whilst Leveling up your Chocobos, you're also going to   [
]   want to be completing you Materia collection, and it's the pieces here   [
]   that could end up driving you insane. You might get lucky and obtain   [
]   every piece that's available by the time you've finished breeding, but   [
]   then again you might not.   [
]   [
]   Every time you win a Chocobo race you will be given the choice of   [
]   exchanging your winnings for an item or GP. Obviously if a rare item   [
]   pops up then you're going to want to consider choosing that, but most   [
]   of the time you're going to want to pick the GP option. So, whilst   [
]   Leveling up Chocobos and obtaining rare Materias, we're also   [
]   stockpiling a load of GP for the Battle Square. When you think about   [
]   it, Chocobo breeding is quite a well-structured, balanced system with a [
]   lot of incentive to want to partake in it.   [
]   [
] 4) There are 4 Materia Caves scattered about the map, and certain ones can [
]   only be accessed by certain Chocobos. A green Chocobo can cross   [
]   mountains and is used to access the Materia cave near Wutai. A blue   [
]   Chocobo can cross shallow water and is used to access the Materia cave   [
]   near Mideel, a black Chocobo can cross both mountains and shallow water [
]   and can access the cave near North Corel, and lastly a gold Chocobo can [
]   go absolutely anywhere and is used to access the Round Island in the   [
]   far north east corner of the map.   [
]   [
] 5) You can actually acquire a gold Chocobo for free by defeating one of   [
]   the hardest bosses in the game, Ruby WEAPON. The boss is completely   [
]   optional, and is not required to complete the game, although you are   [
]   required to beat it for the Ruby Render Trophy. Although you could skip [
]   out the whole Chocobo breeding process altogether this way, you would   [
]   still need to race at the Chocobo Square in order to obtain every piece [
]   of Materia, and the gold Chocobo that you receive from defeating Ruby   [
]   is an absolutely terrible racing Chocobo. I suggest just obtaining a   [
]   gold Chocobo the old fashioned way, by breeding.   [
]   [
] For a full rundown on how to Chocobo breed, see section E.14.   [
]____[

+---+
| During this walkthrough, I will explain how to breed a Gold Chocobo, step- |
| by-step. If you're familiar with the Chocobo breeding process, and you |
| wish to learn how to breed the 'Ultimate' racing Chocobo, then follow QSI |
| Link [Ultimate Racing Chocobo]. As a reminder, you use a QSI Link by |
| replacing the [] with {} in the search bar (CNTRL +F). |
+---+

So, the first thing that we are required to do is to buy some stables. First head into the house on the left to talk to Chocobo Bill. Select option 1 to rent a stable for 10,000 gil. Repeat this process 6 times if you can afford to, otherwise just buy two seeing as two is all we'll need for now. You will probably want to buy all 6 at some point.

NOTE - If you were to head into the stables and talk to the girl at the back (Chloe) then she would tell you that the white Chocobo likes to be scratched behind its ears, anywhere else and it'll get mad. Remember this for later on. Also, any information that you've learned from the

Chocobo Sage will be relayed back to you by Chloe. Oh, and don't forget to stock up on Gysahl Greens, and also buy around 3 Mimett Greens.

Now we need to go and catch a few Chocobos. Every Chocobo we catch will be rated from Weak - Wonderful. Right now we are after two Great Chocobos.

NOTES - equipping both Chocobo Lure Materias here is advised as the effects will stack against each other, as with the Enemy Lure Materias. Also, you shouldn't need to feed the Chocobos Greens here seeing as you should be strong enough to just wipe out the opposition before the Chocobo flees.

- Save yourself the hassle for later on, make sure to have all Enemy Skills equipped to one character (presuming that none of them have already learned Chocobuckle). When you encounter a Chocobo alongside 1 or 2 Spirals (which will be Lv 36), first throw a Mimett Green at it, then have the Enemy Skill bearer cast L4 suicide. The Chocobo will retaliate with Chocobuckle.

Great Chocobos can be found near Rocket Town alongside 2 x Valrons or 2 x Kyuvilduns. You can also encounter Great Chocobos near Mideel which is the on the south-eastern most continent alongside 1 or 2 x Spirals. You will earn more EXP and AP here, just don't visit the actual town of Mideel yet as you will progress with the story that way (it's our next stop). The sooner you master an All the better, so I'd suggest goto the Mideel Area, but it's up to you, just bear in mind that you'll probably need to start using Greens again here seeing as the Spirals can be quite tough to beat.

When you disembark from a Chocobo, you will now have the option to send it back to the Ranch or let it go.

Back at the ranch, SAVE YOUR GAME!!! When you talk to Chocobo Billy select option 3 to move a Chocobo into the stables. A gender will then be chosen at random, if the wrong genders are chosen then just reset your game and re-enter the Chocobo Ranch, no need to catch them again. You can also name your Chocobos whatever you want, I named mine GreatM and GreatF just to make things easier.

NOTES - Sometimes the 'RNG' (Random Number Generator) can get stuck, resulting in the same sex of Chocobo being chosen every time you move them. If this happens then try performing a 'soft reset' (L1+R1+L2+R2+Start+Select, or 'Quit Game' for Steam/PS4 users). If this fails then try a hard reset (resetting the PS1, or for PC/PS4 users you must close the application then reboot it).

- If you missed the Choco/Mog Materia the first time round then you could grab it now by talking to a Chocobo in your pen.

The last thing to do at this stage is to acquire some nuts. These are required for breeding, and in total we need 3 x Carob Nuts and 1 x Zeio Nut. You can buy the Carob Nuts from the Gold Saucer for 300GP, or, you could just steal them from the Vlakorados in the grassy area near Bone Village.

NOTES - Comet2, Magic Breath, Laser/Gravity and other powerful moves are the quickest way to defeat the Vlakorados, seeing as they have 33,333 HP. Don't hold back, if you run out of MP just use a Tent or run into Bone Village and play the excavation game to sleep for free! Also, here is where I mastered my first All, I flew straight over to the Chocobo sage to buy 99 x Sylkis Greens for 495,000, then I went

and bought the 'Villa Cloud' in Costa Del Sol for 300,000! Then I went and bought some Tents... some Hypers... some Fire Veils..... Yeeeah baby! Livin' the dream!

- PS4 players - don't forget you can earn gil whilst being away from the controller! When you encounter 2x Trickplay, cast Haste on them, active '3x speed' (L3) and 'battle boosters' (R3), and every time the Trickplay cast Gold Mountain their value increases by 800.

Finally, let's go and obtain a Zeio Nut. To do that we must visit Goblin Island!

--D2.05 J - Goblin Island

ENEMIES:	GOBLIN	UNDER LIZARD	DUAL HORN	MYSTERY NINJA Lv 37
Lv:	40	29	30	37
HP:	2000	1400	2500	1950
MP:	80	140		280
EXP:	20	440	550	640
AP:	20	45	45	100
GIL:	20	420	500	2000
STEAL:	Zeio Nut	Remedy	Pepio Nut	
MORPH:		Remedy		
DROP:	Zeio Nut	Remedy	Pepio Nut	
E-SKILL:	GOBLIN PUNCH			

NOTE ON ENEMIES:

As you've probably figured out by now, the Under Lizard and the Dual Horn are the same ones from before. Protect yourselves from Sleep. The Mystery Ninja could also be fought here with a 50% encounter rate chance.

From the Chocobo Ranch, head north to come to a few islands, one of which has a forest in the middle of it. Land on that island, then battle around in the forests to encounter the Goblin. You only need one Zeio Nut, so you should only need to battle here once.

The Enemy Skill Goblin Punch will cost 0 MP, and will do a large amount of damage if your Lv is the same as the enemy's Lv. Make sure to have all 4 Enemy Skills equipped, and also to have Manipulate. You could now head over to Mideel to crack on with the game if you wished, but I like to do one last thing before moving on:-

--D2.05 K - Obtaining Every Enemy Skill Available

Here is a list of every Enemy Skill that is currently available to get, in order that you can get them starting off from Midgar. Remember to have all 4 Enemy Skill Materias equipped, but also remember that if one person has two

Enemy Skills equipped, then an Enemy Skill won't be learnt if one of the Materias has already learnt it. Also, you won't be able to re-acquire Laser, Bad Breath nor Magic Breath until Disc 3.

NOTE - You'll earn quite a bit of AP during the following battles, I suggest equipping things like Fire, Ice, Lightning, Quake, Demi, Enemy Lure, (All!!) and any other Materias that are currently falling behind as you are going to want to get these to Lv 3 at some point.

1	MATRA MAGIC	CUSTOM SWEEPER	Midgar Area (Dirt Area only)
2	L4 SUICIDE	MU	Grasslands Area (near Chocobo Ranch)
3	CHOCOBUCKLE	CHOCOBO Lv 16	Grasslands Area (near Chocobo Ranch)
4	BETA	MIDGAR ZOLOM	Marsh (near Chocobo Ranch)
5	FLAME THROWER	ARK DRAGON	Mythril Mine (Northern caverns)
6	WHITE WIND	ZEMZELETT	Junon Area
7	BIG GUARD	BEACHPLUG	Gold Saucer Area (Beaches)
8	AQUALUNG	HARPY	Gold Saucer Area (Chocobo Tracks only)
9	FROG SONG	TOUCH ME	Gongaga Forests
10	????	JERSEY	Shinra Mansion (in Nibelheim, 2nd floor)
11	DEATH FORCE	ADAMANTAIMAI	Wutai Beaches
12	MAGIC HAMMER	RAZOR WEED	Wutai Area
13	DEATH SENTENCE	BOUND FAT	Corral Valley (past Bone Village)
14	GOBLIN PUNCH	GOBLIN	Goblin Island

NOTES:

3 - Chocobuckle - You need a Mimett Green to use on a Lv 16 Chocobo which will only appear alongside 2 x Levrikon or Elfadunk, then cast L4 Suicide. You can also learn this on the Chocobo tracks near Mideel from a Chocobo fighting alongside the Spirals. Remember that the Chocobo will cast Chocobuckle on the person who cast L4 Suicide only.

4 - Beta - Use Laser or Demi2 four times to trigger a casting of Beta.

6 - White Wind - Must be Manipulated

7 - Big Guard - Must be Manipulated

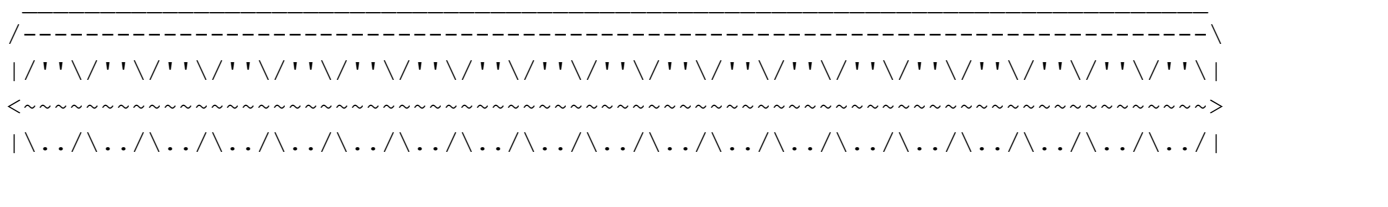
8 - Aqualung - The Harpy will only be found on the Chocobo tracks alongside a Chocobo.

10 - ???? - Remember, the Jersey will only use ???? if they haven't been hit. Also, they can only be found on the 2nd floor of the Shinra Mansion. Be sure to be wearing Ribbons.

11 - Death Force - Must be Manipulated

12 - Magic Hammer - Must be Manipulated

And so concludes yet another side-quest section of this walkthrough. Onwards! Hop into your aircraft and head to the South-Eastern Continent to find the remote village that is Mideel!



```
|                                                                                |
| {D2.06} - Mideel                                                               |

\--------------------------------------------------------------------------------/

¬¬¬
```

Remedys. In every shop you come to, *be sure* to talk to the frantic kid who is flapping about like a headless Chocobo. This will help for later.

You should be able to see a small white Chocobo running around also. Interact with it to feed it some a Mimett Green (even though it will display Samolen Green, fixed in later versions), you'll then have the option to tickle the Chocobo in a particular area. If you've been paying close attention then you'll already know to tickle it behind it's ears. GRAB THAT MATERIA! Once you've tickled it it'll give to you the [CONTAIN MATERIA].

```
 _____________________________________________________________________________
]                                                                             [
] SIDE NOTE - CONTAIN MATERIA                                                 [
]                                                                             [
] Whilst being highly detrimental to your physical stats, Contain is highly  [
] recommended to start Leveling up asap as it is one of the few Materias in  [
] the game that will hit with Wind damage. You *can't* pair it with          [
] Elemental, but you *can* pair it with Added Effect to attack with/defend   [
] against Confusion, Petrify and Stop.                                        [
]                                                                             [
]  Lv 1 - Freeze. Strong Ice damage, can cause Stop                          [
]                                                                             [
]  Lv 2 - Break. Strong Earth damage, can cause Petrify.                     [
]                                                                             [
]  Lv 3 - Tornado. Strong Wind damage, can cause Confusion.                  [
]                                                                             [
]  Lv 4 - Flare. Strong Fire damage.                                         [
]                                                                             [
] The main downside to Contain is that it cannot be paired with All, so the  [
] attacks will only ever hit one enemy. You could link it with MP Turbo to   [
] make the attacks even stronger, but me personally I'd just keep it paired  [
] with Added Effect. That is until I obtain Hades, of course.                [
]_____________________________________________________________________________[
```

Now head out of the Item shop and make your way over to the shop on the right. This is the Materia Shop, and although there is nothing new here to buy here, do make sure to talk to the frantic kid again.

Now head up the stairs and into the Weapon Shop. First, talk to the frantic kid, then inspect the door at the back to discover that it is locked. Then talk to Weapon Shop owner, but only if you have the required funds. As mentioned, this'll be the last time we'll need to buy any weapons from a shop:

```
1 x Crystal Sword    O=O O=O O=O      - Cloud      - 18,000 gil
1 x Crystal Glove    O=O O=O O=O      - Tifa       - 16,000 gil
1 x AM Cannon        O=O O=O O=O      - Barret     - 18,000 gil
1 x Crystal Comb     O=O O=O O=O      - Red XIII   - 17,000 gil
1 x Crystal Cross    O=O O=O O=O      - Yuffie     - 18,000 gil
1 x Crystal M-Phone  O=O O=O O=O      - Cait Sith  - 18,000 gil
1 x Partisan         O=O O=O O=O      - Cid        - 19,000 gil
1 x Winchester       O=O O=O O=O      - Vincent    - 18,000 gil
3 x Crystal Bangle   O=O O=O O=O      - Armour     -  4,800 gil Each
2 x Wizard Bracelet  O=O O=O O=O O=O  - Armour     - 12,000 gil Each
                                            Total - 180,400 gil
```

NOTE - It wouldn't be the worst idea in the world to buy 7 Wizard Bracelets instead of just 2, as so that any player not in your team can be wearing an 8 slotted piece of armour. This will help you to use the 'Exchange' tab more effectively. We will be able to steal a Wizard Bracelet from a random encounter, not too far into the game.

Now head over the bridge. Just to the left of where the guy is standing you should be able to hear a slight 'click' as you run over one of the wooden boards. Examine it to find the 'Beat-up Useless Old Key'. Now head into the house on the left.

Although this may look like an ordinary house, it's actually the Accessory Shop. Speak to the girl at the stove to buy a new piece, the Amulet for 10,000 gil which will increase your luck by +10 (good for whomever has Deathblow). You can also buy a Bolt Ring if here if you didn't manage to obtain one from the sleeping man that gives you Mythril.

Now head back into the Weapon Shop. Try to use the beat up old key on the door at the back to accidentally brake the key in the lock. Clumsy #!$#! When the store keeper confronts you, be sure to come clean with him. He'll give you the [CURSE RING] if you do, otherwise you'll get squat!

NOTES - The Curse Ring is better than the Champion Belt in terms of its stats boost, however it will give you a 60 second Death Sentence penalty each match. Which is an absolutely minor problem seeing as the Enemy Skill Death Force will clear it, plus, how often does a battle actually go on for more than a minute? The stat boost you receive is +35 Strength, +15 Dexterity, +15 Vitality, +35 Magic, +15 Spirit and +15 Luck.

- If you equip Tifa with the Powersoul then the damage she will deal will be doubled if her HP is critical, and quadrupled when she is inflicted with the Status Death Sentence.... These will stack for a total of 8x normal damage.

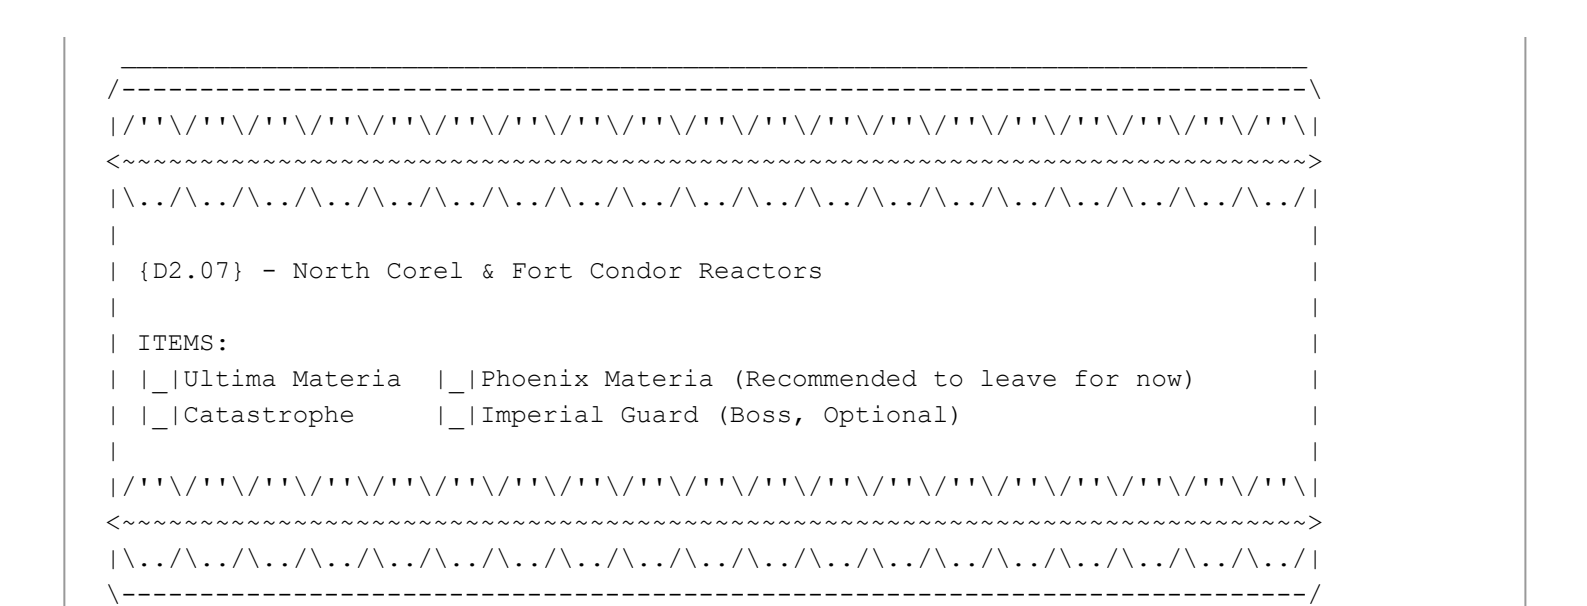
Now head over into the final house to automatically start petting a dog. After an amount of dialogue you'll wind up back on the Highwind. Cait Sith will inform you that Heidegger and Scarlett (Gya ha ha & Kya ha ha) are up to something fishy. Eventually you'll have control of Cid as the party leader.

NOTES - It isn't made fairly obvious during the game, but the Turk that you saw standing at the back was the same Turk that was against the destruction of the Sector 7 support plate at the beginning of the game. His name is Reeve, and he is the one who controls Cait Sith. How? Nobody knows. Also, take note of Red XIII's comment, 'when small Materia nears the larger Materia, something should happen.' Yes indeed, something should happen. More on that later on (Now we know what Scarlett and Tseng were looking for way back when we were in Gongaga).

- Notice Scarlet's right eye? It's bloodshot from the bitch-slap fight! Thanks rsnbau for noticing that!

So, it appears that Cloud has suffered from Mako poisoning as a result of being subjected high densities of Lifestream for a protracted period of time. Bummer. The Huge Materia from Nibelheim has already been retrieved by the ShinRa, so it looks like we're going to be heading to North Corel. Make your way to operations to form a party, then head back into the cockpit to fly the airship.

Before continuing, land the Highwind once more and run back into Mideel. Head back over to the house that you were about to explore earlier on to find an [ELIXIR] sitting on the bed. When you leave you'll be accused by the old man, choose either option to continue, both are fairly comical.



{D2.07} - North Corel & Fort Condor Reactors
ITEMS:
|_|Ultima Materia |_|Phoenix Materia (Recommended to leave for now)
|_|Catastrophe |_|Imperial Guard (Boss, Optional)

--D2.07 A - Huge Materia at North Corel ("Hey, do you know who I am? I'm Cid - that's who the hell I am!")

NOTE ON ENEMIES:	ENEMIES:	[GAS DUCTER]	[WOLFMEISTER]	[EAGLE GUN]
Aside from the new enemies listed above you will still fight all of the previous enemies that you encountered here the first time round. The new enemies are one time encounters only fought on top of the coal train. Be sure to steal the Warrior Bangle, a 4 slotted piece of armour that has incredibly high defence, but 0 growth.	------Lv:	[--------42]	[---------43]	[------------46]
	------HP:	[------3000]	[------10000]	[---------17000]
	------MP:	[-------200]	[--------200]	[------------50]
	-----EXP:	[-------900]	[------10000]	[----------2000]
	------AP:	[--------75]	[--------100]	[------------90]
	-----GIL:	[------1100]	[--------600]	[----------3800]
	---STEAL:	[----------]	[----------]	[Warrior Bangle]
	----DROP:	[----------]	[----------]	[------X-Potion]
	--ABSORB:	[-------PSN]	[----------]	[--------------]
	-NULLIFY:	[----------]	[----------]	[------WTR--ERT]
	--DOUBLE:	[----------]	[--------WTR]	[----------LHT]

--Items - Ultima Materia, Catastrophe
--Extra - Huge Materia

Make your way over to the Mt. Corel Reactor. I'd advise landing the Highwind by North Corel as opposed to the Costa Del Sol side, then taking the long route back to the reactor. Make sure to save beforehand, here was my set-up going in:

1) Cid - Lv 45 (Back)

Partisan - All=Time, Enemy Skill, Morph, Sense, Steal
Wizard Bracelet - Elemental=Lightning, All=Earth, Long Range, Speed Plus,
Champion Belt HP Plus, MP Plus

2) Barret - Lv 43 (Back)

AM Cannon - Added Effect=Contain, Elemental=Leviathan, All=Gravity
Wizard Bracelet - Added Cut=Deathblow, Enemy Skill, Manipulate, Steal
Curse Ring Luck Plus, HP Plus, MP Plus

3) Yuffie - Lv 49 (Back)

HP Plus, MP Plus
Spiral Shuriken - All=Heal, Revive, Enemy Skill, Steal, Magic Plus,
Wizard Bracelet - Elemental=Ramuh, All=Restore, All=Lightning,
Circlet MP Turbo=Comet

NOTE - It is possible to fail this upcoming section. You *MUST* make it to the second train cart (it would be almost impossible to fail this unless you were trying to). For what it's worth, if you do mess the whole thing up then I suggest just reloading your save and trying again.

As you make your way into the reactor you'll be likely to encounter the Bagnadrana, you can cast L4 Suicide on them then use Morph to gain yourselves a few Guard Sources. As you approach the entrance to the reactor you'll have to engage a couple of Attack Squads. These are the same ones the you've fought many times before.

After the a battle has finished a train will depart the reactor moving very, very slowly. Instead of jumping on it, Cid decides to hijack his own train cart instead (if Cloud can jump onto a speeding train in Midgar then surely Cid must be able to).

You are about to engage in a 10 minute race to catch up with the other train, board it and then bring it to a halt before it demolishes North Corel. Again, as long as you make it to cart 2 then it doesn't matter if you fail, but I'd strongly advise against that.

1.) Alternate between pressing Up and Triangle at a steady pace to increase the carts speed. Once you have gained enough momentum you will catch up to the train carrying the Huge Materia.

2.) In the 1st cart you'll have to fight 1 x Gas Ducter. Just don't use Bio.

3.) You'll have to fight 2 x Gas Ducter in the 2nd cart. Don't mess about, Magic Breath will work just fine here.

4.) In the 3rd cart you'll have a Wolfmeister to fight. You should've had Water set up in your weapons, if not just use Aqualung.

5.) Make sure to steal a Warrior Bangle from the Eagle Gun in the 4th cart. Don't use Water, do use Laser, Demi3, Trine and Bolt3.

6.) You will now have to fight one more Attack Squad.

7.) Lastly, when prompted press Up and Triangle simultaneously to speed up the train, then Down and X to speed it up even more.

Once the action has finished, you'll receive the [ULTIMA MATERIA] as a reward, as well as a free night's rest.

If you'd ran out of time, then you will have ruined a town that's already in shambles and Barret will feel like killing himself, not to mention losing out on the Huge Materia (seriously consider re-loading your save). Once you've left the Inn, you can talk to the kid sitting in the train cart. Instead of giving you the Ultima Materia he'll sell it to you for 50,000 gil (believe

me, it's worth it), unless of course you didn't even make it to the 2nd train, in which case you will get NOTHING!

Either way, once you're ready to continue head into the house on the second floor. Talk to the woman on the left and she'll give you Barret's Lv 4 Limit Break, the [CATASTROPHE].

NOTES - If you miss one of the four Huge Materias then it will not affect you trophy progress, however it will mean that you will have a much, much harder time obtaining the Bahamut ZERO Materia, so I suggest making sure that you obtain every one.

- The Huge Materia acquired here is the *Green* Huge Materia. If you did miss this Huge Materia, then you can still obtain the Green Huge Materia from the final Huge Materia mission; it's the Blue that you'd be missing out on.

SIDE NOTE - ULTIMA MATERIA

Probably one of the most powerful spells in the game, Ultima is well.... Ultimate! Unfortunately, just like with Full Cure Materia Ultima needs to be levelled up before it can be used, aswell as heavily penalising your physical stats. It will boost your magical stats though.

NOTE - If you plan to Source farm later on in the Sunken Gelnika then you can boost your Magic stat quite high, in which case Ultima will cease to be the strongest magic you own, and Comet2 will take its place.

--D2.07 B - Huge Materia at Fort Condor ("Gotta have that Materia!")

NOTE ON ENEMIES:

You'll only have to fight the CMD. Grand Horn if the Shinra troops reach your shack.

ENEMIES: [CMD. GRAND HORN]

Lv:	[37]
HP:	[8000]
MP:	[300]
EXP:	[800]
AP:	[80]
GIL:	[9600]
DROP:	[-Imperial Guard]

--Items - Phoenix Materia (leave)
--Extra - Huge Materia

Once You're ready to leave you can head outside and jump into the Highwind... if you'd taken my advice earlier on and parked up just outside North Corel. If not then you'll have to trek back through Mt. Corel until you reach your Highwind. Now head over to Fort Condor saving before you head in, and also make sure to have plenty of gil. This will be the final Fort Condor Battle.

NOTES - During the battle here, let the enemies over-run the shack so that you can defeat the CMD. Grand Horn for the Imperial Guard. This is probably the best piece of armour in the game, and it is possible to obtain a set of three but you'll have to obtain one of them right here and now! You'll still receive the Huge Materia this way.

- If you were to lose to the CMD. Grand Horn, then you would lose out on the Huge Materia, and you would also be banned from ever re-entering the Fort Condor.

- There is a way of illegitimately obtaining 2 Imperial Guards here. Use QSI Link [Repeat Boss Glitch] to find out how to dupe yourself an extra Imperial Guard (you'll have to make use of the Mythril Mines, saving just outside by the Zolom)

If you're not bothered about the Imperial Guard, and you want to defeat the Shinra normally then here's how:

If you've been taking part in all of the previous battles then you should have the strategy down to a fine art. Seeing as this is the final battle and all, expect a much tougher challenge. Try throwing in a few Fighters, Tristoners and Fire Catapults to spice things up a bit.

If you're completely new to the battles, then the main thing that you need to remember is that it is essentially a rock, paper, scissors type strategy:

Attacker - beats Beast - loses to Barbarian
Defender - beats Barbarian - loses to Wyvern
Shooter - beats Wyvern - loses to Beast

Start off by placing three Attackers across the field as far down as you possibly can. Begin the battle by pressing X, then slow the battle speed down by pressing L1. Command each attacker (by pointing and clicking) to march as far down as they can go. Once each Attacker has received his instructions, speed the game up all the way with R1.

When the enemies are about to collide, slow the game right down again and create some new soldiers that are suited to the enemies in play. Just make sure you have enough space to create new enemies and you should be fine. Just stay on the offensive, keep your troops travelling south and keep ganging up on the enemy, if you play it correctly then you'll have finished the battle before the Boss even shows, if not then you'll have to surround him with every troop you've got.

Once you have one the battle, either by taking out all of the Shinra's troops or by defeating the CMD. Grand Horn, you will see some cool CGI of the Condor.

NOTE - If you don't mind making use of exploits, then refrain from grabbing the Materia as instructed below; doing so will really help later on!

When you gave control of Cid again, head out through the door and up to the top of the reactor to EAT THAT BIRD! I mean GRAB THAT MATERIA! the [PHOENIX MATERIA] which will cause Fire damage to the enemy whilst reviving and fully restoring all fallen teammates in the process..... Before grabbing it however, you may wish to know:

NOTE - If you had missed out on the Phoenix Materia because you'd lost to the CMD. Grand Horn, then you can re-obtain the Phoenix Materia later on at Bone Village. You can also duplicate it by *not* picking it up here now, wait until Disc 3 when you'll be able to dig up a copy from

Bone Village, then return to Fort Condor to obtain a second non-mastered Phoenix. I Recommended this for beating Emerald WEAPON.

On your way out *Make Sure* to talk to the guy sitting at the table, he'll hand over the Huge Materia as a way of saying thanks. This is the *Yellow Huge Materia. Your team will hint that the next place to go is the Underwater Reactor, but first it's time to check up on Cloud and Tifa. Hop in the Highwind and head down south to Mideel once more.

SIDE NOTE - OBSCURE ELEMENTS

There are a number of Elemental properties that aren't listed in any part of the game. These are speculated to have been left in the game either as a mistake or as an unfinished project. Either way, it's interesting to know that these Elements can still be implemented into your battle plan.

On top of the main 9 Elements, you also have:

Restorative:
If an enemy is weak against holy then it will take double the damage from Holy based spells, the only one of which being Alexander. On top of that, some will also absorb the 'Restorative' Element. This double positive will act as a negative, meaning you can use items such as Phoenix Downs, Elixirs etc. to damage your opponent.

Cut/Hit/Punch/Shoot/Shout:
All of your characters will hit with at least one of the Elements above, although various weapons will hit with different properties. Certain enemies are weak vs Punch, this is suspected to be accidentally left in. An incredibly large amount of enemy attacks will hit with one of the above Elements, and the Ziedrich armour which we will obtain shortly will halve all of the basic 9 Elements, as well as 4 of the 5 listed above (Shout being the exception).

Hidden:
'Hidden', or the '10th Element' is activated when you attach the Elemental Materia to your armour paired with any Materia that doesn't have an Elemental property, such as Contain, Luck Plus, anything you want really. Basically anything other than another support Materia. There is only one move that is really known about in the game that uses the hidden Element, and that is Ultimate WEAPON's Ultima Beam. Seeing as we're about to face Ultimate Weapon, try equipping Elemental=HP Plus in your armour for all three characters. Equip Steal also.

{D2.08} - Into the Lifestream

ITEMS:
|_|Curse Ring (Boss)

|\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../|
\---/

¬¬¬

destroyed. All of the shops now have a minimal stock, aside from the hyper kid with the white Chocobo who'll stock every single item/weapon/Materia that was previously available, provided that you'd spoken to him in each shop previously. He can be found at the top of the hill on the far left, alongside the doctor and the nurse, and if you were to talk to the nurse you would be able to rest for free.

```
 ____________________________________________________________________________
]                                                                            [
] SIDE NOTE - STORYLINE CLARIFICATION                                        [
]                                                                            [
] If this is your first time playing the game then the events that have just [
] unfolded may leave you with some questions. I will try to clarify things   [
] for you, just make sure to not start reading this until you are on-board   [
] the Highwind.                                                              [
]                                                                            [
] All throughout the game Tifa has desperately wanted to confront Cloud with [
] the truth that he never came to Nibelheim 5 years ago (or so she thought), [
] but was “afraid that if I told you.... something terrible would happen.”   [
] This explains Tifa's dialogue during the dating sequence in the Gold       [
] Saucer. If you had dated Aeris, then she (Aeris) would have told Cloud     [
] that he reminds her of 'him', this is referring to her first boyfriend,    [
] Zack (remember in Gongaga). Aeris also remarks that she is looking for the [
] 'real' Cloud.                                                              [
]                                                                            [
] What isn't explained at all here is what took place after the Nibelheim    [
] incident of 5 years ago. Barely alive, Cloud and Zack (Cloud must have     [
] turned Super Saiyan or something to have done what he did to Sephiroth)    [
] were taken by Hojo as his lab guinea pigs. Whilst Zack had already had his [
] body infused with Jenova cells and was able to resist Hojo's 'Sephiroth    [
] Cloning' experiments, Cloud on the other hand had suffered serious side    [
] effects, and as a result he completely lost his mind. He was only able to  [
] stabilise his mentality by infusing the memories of Zack's as his own. So  [
] when Sephiroth stated that Cloud had made up his memories by listening to  [
] Tifa's stories, they were all LIES! There is still a little bit to         [
] discover about these events later on in the game, so I'll stop explaining  [
] this part of the story now.                                                [
]                                                                            [
]  NOTE - Thanks to DoomSD for pointing this out - Do you recall the piece   [
]         of Materia that Cloud (Zack) had equipped on his Buster Sword      [
]         during the flashback (the one he was excited about using)? It was  [
]         the Pre-Emptive Materia! That's how he (Cloud) was able to sneak   [
]         up on Sephiroth the way he did!!!                                  [
]                                                                            [
] The mysterious voice that Cloud has been hearing is the 'real Cloud'       [
] trying to get out. In fact, when Cloud was handing the Sephiroth clone the [
] Black Materia at the Temple of The Ancients, the child Cloud that you      [
] momentarily had control of was the same Cloud during the Lifestream        [
] events. Also, when you fell through the church roof at the beginning of    [
] the game, this voice tells you that 'you could have gotten by with scraped [
] knees back then', which is a reference to the events where Cloud and Tifa  [
] fell off the cliff-side. Also, I suspect that one of the three boys that   [
] Tifa hung around with was Johnny, who we've met several times during the   [
] beginning of the game.                                                     [
]                                                                            [
] Lastly, it is speculated that the contraption that was in Sephiroth's hand [
] just before Cloud was able to toss him over the side of the reactor was    [
] merely the device that the Cetra had used to lobotomise Jenova, and        [
] Sephiroth had removed it in order to free her from her mental prison.      [
] Others speculate that it was the head of Jenova itself, and due to         [
] graphical limitations the Dev's weren't able to pixelate a decent enough   [
```

] Jenova head, so they left it looking like the headpiece. This would [
] explain why Jenova is headless during your first visit to the Shinra HQ, [
] although the truth remains unclear to me. [

¬¬¬

Some of the names will vary when you go to feed them, for example Curiel Greens will appear as Kurie Greens. Even though the Chocobos won't accept anymore Curiel Greens to improve their Stamina once you've maxed it out, feeding them Sylkis or Reagan Greens will keep boosting their Stamina seemingly indefinitely. This won't be necessary (just yet).

Now that you've raised/maxed out your Chocobos stats, it's time to race them in the Chocobo Races. Also, due to the fact that you've obtained the Highwind, there are a few new things to do in the Gold Saucer. I will cover these during the upcoming sidequests section, for now just head straight for the Chocobo Square, not forgetting to save beforehand. Note that the man who will convert gil into GP will now sometimes appear standing behind the save point in the Gold Saucer. He has a 1 in 8 chance of appearing and will convert a maximum of 10,000 gil into 100 GP (Buy as much GP from him as often as you can - there are some expensive prizes in the Wonder Square).

When you get to the Chocobo Square, talk to Ester who is standing by the Jockey room. It is here where we can register our Chocobos for the races, they'll start off as C class and go up a class every 3 wins that you get. These don't have to be consecutive, and you don't have to get these Chocobos higher than class B if you don't want to but I suggest getting them both to class A for reasons:

1) The GP reward is greater in the higher classes, therefore better preparing us for the Battle Square later on.
2) The Enemy Away Materia can only be obtained in the Chocobo Races, and is only available as a prize from B class upwards. You are going to want to get this out of the way sooner rather than later, again it's completely pot luck! You may get 3 of these by the time you've finished breeding, you may get none (and yes the effects do stack btw).

NOTE - If the combined wins for the Chocobos totals 4 or more, then you will guarantee a 'special' Chocobo (Green/Blue only).

Whilst racing, you can get away with just keeping it set to Auto for C class, but you are going to want to set it to manual for B and above. As long as you've fed them the required Greens as above, you should be fine, just remember to keep R1+R2 held down to keep replenishing your Stamina. Press Square several times at the start of the race aswell to max out you running speed, and watch out for the black Chocobo Teioh, as he can be a real pain at times to beat (his stats are ALWAYS better than yours).

Once both your Chocobos are class A, you are ready to breed them! Head over to the Chocobo Ranch and SAVE before entering. Talk to Billy to select Mating Chocobos, then select GreatM and GreatF to breed. Finally, choose the Carob Nut, and viola! And brand new (and rather large) baby Chocobo. The breed of Chocobo will be chosen at random, you'll either get a green or blue Chocobo, and we'll need to wait until the parents are ready to breed again before we can obtain the chocobo of opposite gender (I got a male Green).

You could take your new Chocobo out for a spin, but I suggest just heading on to the next section of the game for now, which is Junon.

NOTES - A Chocobo that has just mated will not be ready to mate again until you have encountered (and won) between 3 to 10 battles. A baby Chocobo will not be ready to mate until you have fought (and won) between 3 to 19 battles.

- A newborns Acceleration, Stamina and Intelligence will always be the average of its' parents, Cooperation will always be 0, and the 'cap'

of its Max Sprint speed and Max Running speed will vary depending on the type of Nut you use. Refer to QSI Link [Nuts] for more info.

- If you talk to Chloe she will tell you which of your chocobos has the best stats, but only if you've talked to the Chocobo Sage first. When you breed you'll have approximately 20% chance of boosting Sprint, and a 15% chance of boosting Run. You *don't* have to have fed the newborn Greens beforehand, just talk to Chloe and she'll tell you if the newborn is the fastest. If the newborn hasn't received a boost, perform a soft-reset and try again.

- If you keep getting the same results, try running in and out the barn once before breeding. The try twice, then try three times (to keep the RNG advancing)

--D2.09 B - Descending to The Ocean Floor ("Doesn't it feel like we're missing something?")

NOTE ON ENEMIES:

None of the enemies here pose a threat, but whack lightning in your weapons anyway. You've fought the SOLDIER:2nd, Death Machine and Slalom

| before. Make sure to have Ribbons equipped, and MAKE SURE to Morph the |
| Ghost Ship into a Guide Book, we will need this for later. Watch out, as |
| the Ghost Ship uses a move called Goannai, which will remove one player |
| from battle. |
| |
| The Guard System is much like the Warning Board from the Shinra HQ in the |
| sense that it can spawn in 2 enemies - Quick Machine Gun or the Rocket |
| Launcher which are both weak against lightning. Neither pose a threat, and |
| I didn't have room to fit them in but their details can be found in |
| section G.09. Saying that, the Rocket Launcher can inflict you with |
| Confusion. |
| |
| Lastly, the Corvette is weak against Confusion, which means equipping |
| Added Effect with Mystify will result in double damage! |
+--+

Here was my set-up going into Junon:

1) Cloud - Lv 48 (Front)

Crystal Sword - Elemental=Lightning, Enemy Skill, Morph, Sense Steal
Wizard Bracelet - All=Restore, MP Turbo=Comet, Ultima, Magic Plus,
Circlet HP Plus, MP Plus

2) Cait Sith - Lv 45 (Back)

HP Plus
Crystal M-Phone - Elemental=Alexander. Added Effect=Contain, Luck Plus,
Gigas Armlet - Added Cut=Deathblow, Enemy Skill, Manipulate, Steal,
Curse Ring Long Range

3) Red XIII - Lv 47 (Front)

Crystal Comb - Elemental=Ramuh, Revive, Enemy Skill, Steal, Speed Plus
Wizard Bracelet - All=Time, All=Heal, All=Gravity, HP Plus, MP Plus
Ribbon

Talk to the Shinra guard at the far end to ride the elevator to upper Junon. As you make your way through you'll notice that something is missing. Head to the T-shaped tunnel, as you make your way south you'll be encounter a fleet of Shinra guards.

Although they might run in the opposite direction, the Slaloms won't. Be sure to steal some Smoke Bombs from them for the Battle Square later on. When you're ready head into the service lift at the far end to fight 2 x Submarine Crew.

At the base of the lift you'll have to fight another 2 Submarine Crew. Once they've been taken care of, follow the screens down until you reach a save point (don't worry about the dog blocking the passageway). In the next screen you'll be able to descend the cargo lift, then follow the path to reach an underwater pipeline, follow this to reach the reactor.

NOTES - Before heading into the reactor, you are going to want to morph the Ghost Ship into a Guide Book, and these two screens are the only two that you'll be able to encounter it at. This area is re-visitable, but it's a rather annoyingly long way to travel if you miss it now. L4 Suicide will do the trick nicely.

- Although the underwater tunnel is re-visitable, the reactor itself

isn't so make sure to pick everything up along the way.

--D2.09 C - The Reactor ("Maybe we shouldn't piss them off...")

ENEMIES:	[SENIOR GRUNT]	[GUN CARRIER]	[HARD ATTACKER]	[GUARDIAN]

NOTE ON ENEMIES:

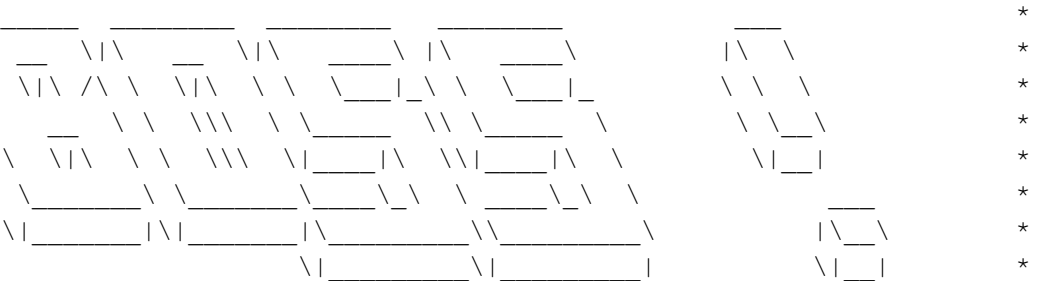
Not much to note other than to steal a few Shinra Alphas from the Underwater MPs.

--Items - Battle Trumpet, Scimitar, Leviathan Scales
--Boss - Carry Armor Lv 45 (God's Hand)

Once Inside the reactor push the purple switch on the far wall. Plunge even further down to emerge on a catwalk. Follow it all the way to the west to come to a save point. Make use of it.

Follow the path to the next screen which looks vaguely like the No 1 reactor that we blew up in Midgar. Here you will have to fight two lots of Submarine Crews and 1 lot of Underwater MPs. Make sure to steal a few Shinra Alphas from them.

Once you're at the _|‾ shaped bridge you'll see the Huge Materia. You'd better be prepared because there's a Boss up ahead. Following the bridge you'll come to none other than Reno, and he'll have brought a playmate for us!



* You must be on point whilst fighting Carry Armor, seeing as it can pick up two of your characters, effectively removing them from battle until you have killed the arm holding the character. Make sure to keep Big Guard on at all times, and also remember to cast Slow on Carry Armor. As with previous boss battles, you will receive greater EXP etc. if you defeat it's counter parts before defeating the main boss, but it isn't mandatory. Comet2, Magic Breath, Bolt3 etc. should finish it off fairly quickly, you'll receive Tifa's [GOD'S HAND] once he's finished, the 3rd and final weapon in the game to have 255 Attack% (along with Vincent's Sniper CR and Long Barrel R).

BOSS BATTLE: 30	CARRY ARMOR	RIGHT ARM	LEFT ARM

-------AP:	240-------	95------	90------
------GIL:	4000------	--------	--------
-----DROP:	God's Hand	--------	--------
--NULLIFY:	GRV--PSN--	GRV--PSN	GRV--PSN
---DOUBLE:	LHT-------	LHT-----	LHT-----

After the battle has ended you will realise that the Submarine with the Huge Materia has departed. Head to the left first off to open the chest containing the [BATTLE TRUMPET], a strong weapon for Cait Sith with 0 growth.

Then head through to the next screen to come to a chest containing Cid's [SCIMITAR], which is our first Triple Growth weapon of the game! This will REALLY help for later on, and as previously mentioned is the reason why Cid will be in my final team.

Before heading into the Sub, BE SURE to grab the final chest on the left which contains a Key Item, the [LEVIATHAN SCALES]. This is required to put the flames out at the Da-chao cavern in Wutai.

Now head up the staircase to fight two more sets of Submarine Crew, you'll then board the Sub. Inside you'll have another set of Submarine Crew to face, then make use of the save point.

Head into the Operations room to engage in an optional battle with the troops that you were entertaining Rufus with when you were sneaking onto the Cargo Ship on Disc 1. I suggest sparing them, but it'll make no difference either way, unless you wanted to steal another Shinra Alpha from the Captain (you'll get another chance to steal one later on).

Head up to the control seat, after Cloud has a minor panic attack he'll then be eager to control the Sub, so sit in the driver's seat and enjoy another mini-game!

] SIDE NOTE - SUBMARINE MINI GAME [

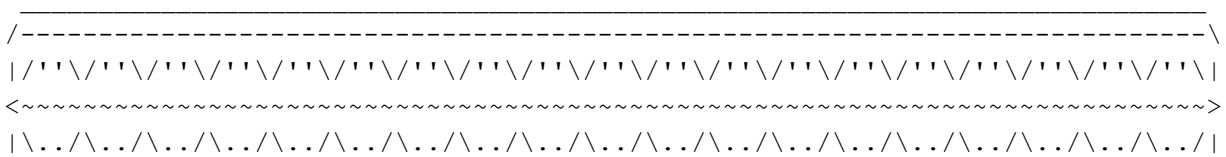
] This game is fairly straight forward, press triangle to speed up, X to slow down and Square to fire a torpedo. Watch out for mines, pressing up will make you descend and pressing down will make you ascend (the way it should be). You can locate the Red sub using R1, when you see it simply blast it to hell, you can ignore all of the other yellow submarines. If [

] you don't manage to destroy it within the 10 minute time limit then the [
] Huge Materia is lost forever and you should consider re-loading your save. [
] [
] NOTE - If you're not bothered about Huge Materia, then it is worth [
] pointing out that if you fail this mission, you can return to [
] Junon's pathways leading up to the reactor to find that the path [
] that was previously blocked by the barking dog will now be [
] unblocked, and when you go through you can steal the Red [
] Submarine, although the Huge Materia will not be inside. [
] [
] You will need to acquire a Submarine to progress past a certain [
] point in the game, so be sure to get the Red Sub if you do fail [
] the mission. [
]_____[

Once the Red Submarine has been destroyed Cloud will remark that we should forget about the Huge Materia at the bottom of the sea for now. We'll come back to grab it shortly. There is one last thing to do before finishing up with this section, and that is to head into Junon and ride the cargo lift to the top (note that this is optional btw).

Head outside to the airport to see a short sequence of one of Junon's Gelnikas departing with the Huge Materia on board. Looks like it's headed towards Rocket Town which is our next destination, but not before embarking on a world of excitement first!

NOTE - As previously mentioned, If you don't do everything now then I'll give you a full re-cap on Disc 3 of everything there is to get.



{D2.10} - Optional Sidequests No.4

QUESTS:

A - Chocobo Breeding 3	G - Da-chao Fire Cavern	L - Under The Ocean
B - Key to Sector 5	H - Chocobo Breeding 4	M - The Sunken Gelnika

\-------------------------------------------------------------------------------/
```

--D2.10 A - Chocobo Breeding Step 3

Head over to the Chocobo Ranch making sure to save before entering. Now you should be able to mate the same two Chocobos that you did previously, again using a Carob Nut. You must make sure to obtain a Chocobo that is of a different breed and gender to its sibling. For example, earlier on I obtained a green male, so this time they must produce a blue female (yes we are going to mate brothers and sisters). This may take some time, so be patient.

NOTE - If you find that you keep producing the same sex and/or breed of Chocobo, then remember that the RNG can get stuck. Talk to Chocobo Billy and feed a random Green to a random Chocobo, then save your game, then try a soft reset. This should fix the problem. If it doesn't, try a hard reset, followed by running in and out of the pen area a few times.

Now feed the Green + Blue Chocobos the following:

```
 9 x Sylkis  Greens to max out Speed + Intelligence
30 x Mimett  Greens to max out Acceleration
50 x Curiel  Greens to max out Stamina
```

NOTE - Remember, once you have maxed out both parents stats for Intelligence, Acceleration, and Stamina, the new-born will also be born with those stats maxed out.

Now make your way over to the Chocobo Square. Same drill here, race both of your Chocobos until they are class A (they'll need 9 wins minimum between them). Once you've done that you'll have quite a few battles to complete before you can breed these new Chocobos, but there is one more thing you can do for now:- head over to the small grassy area closest to the Icicle Inn.

You're going to want to try to capture a Wonderful Chocobo, so equip the Chocobo Lure Materias and head towards the Icicle Inn. Before heading east, you should see the tracks to your left, battle around until you encounter either 1 or 2 Jumping alongside the Chocobo, then capture it for a Wonderful Chocobo. Once you've caught one, don't move it from your pen into the stables just yet, instead head over to Bone Village.

--D2.10 B - Obtaining the Key to Sector 5

There is now a new item available to be dug up in the excavation site. Head over to the foreman and ask him to search for normal treasure. There are three places where the Key To Sector 5 can be dug up, the easiest of which is

just to the right of the entrance, above where the guy was digging (Spot 5). Once you've dug up the key you can return to Midgar, yaaay!

NOTES - It's very note-worthy to point out that if you had missed out on the Phoenix Materia earlier on because you'd lost to the CMD. Grand Horn at Fort Condor, then you could dig it up at the excavation site when you reach Disc 3. The same goes for two other pieces of Materia, W-Item and Bahamut ZERO. I also heard somewhere that you can dig up the Weapon and Armour that Aeris was wearing when you lost her, I also heard that you could dig up a Steal Materia here. All lies (confirmed).

- A lot of people aren't aware of this. If you obtained all 4 Huge Materias, the you WILL NOT be able to dig up Bahamut ZERO, even if you missed out on Bahamut or Neo Bahamut.

¬¬¬

]   indicated by the colour of the sword. Bright blue and white when   [
]   Cloud's HP is full, and dark blue and purple when his HP is critical. [
]   [
]   At full HP Cloud's damage will triple, at 2/3's HP his damage will   [
]   double, and 1/3 HP his attack power will be normal. Anything less than [
]   1/3 will result in lower than normal attack power.   [
]--[
] Barret - Missing Score   [
]   [
]   The damage dealt is proportionate to the amount of AP equipped to   [
]   Barret's weapon, so equipping mastered Materia would be a good idea   [
]   seeing as this weapon has 0 growth. Master Magic/Command/Summon,   [
]   Underwater and Enemy Skill will not contribute to the attack bonus.   [
]   [
]   With 640,000 AP Barret's attack damage will quadruple, with 320,000 AP [
]   his damage will double and with 160,000 AP his attack power will be   [
]   normal. Anything less 160,000 AP will result in less than normal   [
]   attack power.   [
]   [
]   Barret's Ultimate weapon is regarded as one of the strongest in the   [
]   game, and it is possible to cause damage overflow. You can kill   [
]   Emerald in one hit by equipping 3 mastered Knights of the Round   [
]   Materias and using 4 Hero Drinks, Berserk & Critical (Strength must be [
]   255 & Lv 99).   [
]--[
] Tifa - Premium Heart   [
]   [
]   The damage dealt is proportionate to Tifa's Limit gauge.   [
]   [
]   With Limit Level 4 selected, Tifa's damage will quadruple if her gauge [
]   is full, double if her gauge was at 1/2, and will be normal if her   [
]   gauge is at 1/4. Anything less than 1/4 will result in lower than   [
]   normal attack power.   [
]   [
]   With Limit Level 3 selected, Tifa's damage will triple if her gauge is [
]   full, double if her gauge was at 2/3's, and will be normal if her   [
]   gauge is at 1/3. Anything less than 1/3 will result in lower than   [
]   normal attack power.   [
]--[
] Aeris - Princess Guard   [
]   [
]   The damage dealt is increased when one or two party members are KO'd. [
]   [
]   With two if Aeris's companions her attack power will triple, and with [
]   one of Aeris's companions KO'd her attack power will double.   [
]--[
] Red XIII - Limited Moon   [
]   [
]   The damage dealt is proportionate to Red XIII's current MP.   [
]   [
]   At full MP Red XIII's damage will triple, at 2/3's MP his damage will [
]   double, and 1/3 MP his attack power will be normal. Anything less than [
]   1/3 will result in lower than normal attack power.   [
]--[
] Yuffie - Conformer   [
]   [
]   The damage dealt is proportionate to the target's average level. Also, [
]   the command Morph will hit for the same amount of damage as a normal   [
]   attack would.   [
]   [

]   Yuffie's attack power will quadruple with her targets level at 64,   [
]   double with her targets level at 32, and will be normal at level 16.   [
]   Anything less than Lv 16 will result in lower than normal attack   [
]   power.   [
]   [
]   If Yuffie targets a single enemy, then only that enemy's Lv is taken   [
]   into account. If she targets all enemies, then an average Lv is taken. [
]---[
] Cait Sith - HP Shout   [
]   [
]   The damage dealt is proportionate to Cait Sith's current HP.   [
]   [
]   At full HP Cait Sith's damage will triple, at 2/3's HP his damage will [
]   double, and 1/3 HP his attack power will be normal. Anything less than [
]   1/3 will result in lower than normal attack power.   [
]---[
] Vincent - Death Penalty   [
]   [
]   The damage dealt is proportionate to the amount of kills Vincent has. [
]   [
]   With 6912 kills Vincent's attack power will quadruple, with 2816 kills [
]   his attack power will double, and with 786 kills his attack power will [
]   be normal. Anything less 786 kills will result in less than normal   [
]   attack power, with a minimum of 62.5% of normal damage output.   [
]   [
]   Vincent's Death Penalty is the only weapon other than the Missing   [
]   Score that can cause damage overflow. By feeding him 4 Hero Drinks, he [
]   would need to have 18,048 kills to one-hit kill Emerald, along with   [
]   255 Strength, Berserk and land a critical hit (and have in the front   [
]   row, oddly enough).   [
]---[
] Cid - Venus Gospel   [
]   [
]   The damage dealt is proportionate to Cid's current MP.   [
]   [
]   At full MP Cid's damage will triple, at 2/3's MP his damage will   [
]   double, and 1/3 MP his attack power will be normal. Anything less than [
]   1/3 will result in lower than normal attack power.   [
]____[

NOTE - Due to the Premium Heart's unusual damage modifier, a lot of people
veer away from the weapon. Just after Tifa has used her Limit Break,
she could be hitting for as low as 200HP. The thing is though, only
Barret, Vincent, Yuffie and Tifa can reach quadruple power, so the
best thing to do would be to equip Tifa with Added Cut and Deathblow,
then let her (Lv4) Limit bar fill up and don't use it.

The last thing to do in Midgar is to head into the Weapon Shop. Talk to the guy on the left here (the same one who sold you the batteries earlier) and he will offer you something for 129,000 gil! Buy it, it's the [SNEAK GLOVE], an accessory which will greatly increase your chances of stealing. There is no 'Shiny Golden wire of hope' leading up to the Shinra HQ anymore, so we can do nothing more in Midgar (for now). Make your way back to the World Map and then over to Kalm.

--D2.10 D - The Kalm Traveller

--Items - Underwater Materia

Head into the eastern-most house in Kalm and make your way to the top floor. The man here remarks that he is looking for the Guidebook, the Desert Rose the Earth Harp. You should have morphed a Ghost Ship by now, so talk to him a second time and he'll trade you his [UNDERWATER MATERIA] for the Guidebook.

If you hadn't morphed the Ghost Ship earlier on then you'll have to make your way back down to the underwater reactor the long way, via Upper Junon. Or you could just wait to face one at the Battle Square to morph it then. The Underwater Materia will help us for one battle only, and doesn't require mastering for the Materia Overlord Achievement.

¬¬¬

(Zack). You can then read the reports in the library at the back pertaining to Zack's execution before moving on if you wish.

--D2.10 G - Da-chao Fire Cavern

--Items - Oritsuru, Steal as Well Materia

Now that we have the Leviathan Scales we can now put out the flames in Wutai's Fire Cavern (we will also be visiting the Materia Cave very shortly). If for some bizarre reason you haven't done Yuffie's Sidequest, then now is the time to do it (section D1.18), as it won't be available after you've re-enter Midgar later on.

Heap up the Da-chao Statue and into the Fire Cavern once more. Run into the roaring flame to make 'the scale of the sea God shine', then run into the second flame to reveal a chest containing the [ORITSURU], Yuffie's strongest weapon after her Ultimate Weapon, and also the strongest weapon in the game to have both Normal Growth and 8 Materia slots (although only 4 are linked).

Now run round to put out the 3rd and final flame to GRAB THAT MATERIA! the [STEAL AS WELL MATERIA]. You can pair this with steal if you wish to enable a double steal attempt every time you steal! Just bear in mind that a second steal animation will not take place, so even though it may look like just one steal attempt you're actually attempting to steal twice. Also, thanks to trueOgre_Killer for pointing out the fact that when you link Steal as Well with Comet2, you get a steal attempt per Comet hit.

--D2.10 H - Chocobo Breeding Step 4

You should now be ready to breed your Green and Blue Chocobos. Head over to the Chocobo Ranch making sure to save before entering, then mate them using a Carob Nut. This should produce a Black Chocobo which can cross mountains and rivers! Your chances of breeding a Black Chocobo should be 100%, so if for some reason you don't then you probably haven't won enough races (they'll need to win a total of 9 between them).

NOTES - If your Chocobos aren't ready to be mated yet then head outside and engage in four or five battles, or skip down to the Ancient Forest section (D2.10 J).

- Remember, if you want a Chocobo that has better Top Sprint than its' parents, then talk to Chloe. If she doesn't tell you that the newborn is the fastest, soft-reset and try again, running in and out of the stables more times than you did previously.

Once you have your Black Chocobo head outside and save. Now re-enter the Ranch and move your Wonderful Chocobo into the stables, making sure that it is the opposite sex to the Black Chocobo. You can also release your Good and Great Chocobos back into the wild now.

The last step to obtain a Gold Chocobo is to breed your Black Chocobo with your Wonderful Chocobo, but obviously you'll need to feed them Greens and

then race them at the races to class A first. Feed the Black Chocobo:

 9 x Sylkis Greens to max out Speed
99 x Curiel Greens to max out Stamina (or Kurie Greens)

Feed the Wonderful Chocobo:

 9 x Sylkis Greens to max out Speed
30 x Pahsana Greens to max out Intelligence
75 x Mimett Greens to max out Acceleration (it'll say 'no improvement')
99 x Curiel Greens to max out Stamina (or Kurie Greens)

Before leaving the Chocobo Ranch, speak to Billy and select 'Riding Chocobos'. Now take your Black Chocobo out for a spin, you can ride it straight onto the Highwind if you wish, when you disembark from the Highwind you'll be riding your Chocobo. Pressing Triangle whilst on the Highwind will bring you to the cockpit, you can then head to the right of Operations to pet your Chocobo.

The last thing to do now is to race them both to class A. Your Black Chocobo should be quick enough to hold its own in the class A races, so if you wanted to you could race it to class S. So long as both Chocobos 'wins' total 12 then you will guarantee a Gold Chocobo when you breed them.

 NOTES - The Sneak Attack Materia, along with the Enemy Away Materia, are only available in the Chocobo Square. The Enemy Away is available from class B upwards, but the Sneak Attack is only available from class A upwards. Once you have obtained these two pieces, you won't need to worry about grinding away at the Chocobo Races post-breeding, although you will need a fair amount of GP (over 3000) to obtain everything from the Wonder Square. Also, you can obtain Magic Counter at the races which won't be obtainable until much later on in the game, and also Counter Attack (which is spelt Counter). Grab as many of these as you can. Sprint Shoes are also worth grabbing.

       - If you have either Cid or Tifa in your party then they will occasionally request to try their luck on the back of a Chocobo. If you have both Cid and Tifa in then Tifa will always be the one to ask.

--D2.10 I - Lucrecia's Cave I

  After finishing up at the Chocobo Races (I got lucky and walked away with 1 x Sneak Attack Materia and 1 x Sprint Shoes), head out of North Corel and jump on your Black Chocobo. Now head south to come to a waterfall, jump off your Chocobo and stick Vincent in your party.

 NOTE - You could also have come to this waterfall in your submarine, but it can be a little bit long-winded to get to.

Here you will learn a great deal about Vincent's past, and how he, like Sephiroth came to be. We shall be returning to Lucrecia's Cave shortly...

 NOTE - We need to return to the cave after having fought between 1 ~ 11 battles. Thank you Simon Drake for helping me work that one out!

--D2.10 J - Ancient Forest

NOTE ON ENEMIES:	ENEMIES:	[RILFSAK]	[DIABLO]	[EPIOLNIS]
Some the enemies here have very high Defence%, so weapons with 255 Attack% work well here (such as Tifa's God's Hand or the Long Barrel R), also equip a few Ribbons as the enemies can inflict you with Darkness.	------Lv:	[------40]	[------41]	[----------36]

	----DROP:	[X-Potion]	[--------]	[----------]
	--ABSORB:	[--------]	[--------]	[----------PSN]
	-NULLIFY:	[-----ERT]	[FRE--ICE]	[----------]

--Items - Supershot ST, Spring Gun Clip, Slash-All Materia, Minerva Band, Typoon Materia, Apocalypse, Elixir

You are going to want to come to this forest as early on in the game as possible, namely for the Slash-All Materia, and the Apocalypse which is the second and last Triple Growth weapon in the game (for Cloud). If you haven't as of yet obtained a 'special' Chocobo, then bear in mind that you will be able visit here without the need for one shortly on in the game.

If you have managed to breed a Green, Black or Gold Chocobo, then you can climb the ridge just south of Cosmo Canyon to find the Ancient Forest. Here you will have a series of puzzles which you must try to work out. If you mess up then remember that you can reset the puzzle by pressing Square, this will then take you back to the entrance.

SCREEN 1:

There are various life forms in the forest, I'll explain what each is for along the way. First off, head over the bridge to come to a giant flytrap. *Walk* into the flytrap whilst pressing confirm to pick up the [SUPERSHOT ST] in the centre of it.

Giant Flytrap:
Running into a giant flytrap is a bad idea seeing as it will simply chew off a large chunk of your HP and then spit you right back out again.

Now head back over the bridge collecting an insect along the way (ignoring the frog), then head back round under the bridge.

Insect:
Insects are used for accessing new areas. If you've used all the insects in an area the you'll need to press Square to reset the screen if you've missed something.

Now run up the slight hill and place the insect *near* the hanging plant using confirm, but not too close otherwise it'll get swallowed by the plant.

Hanging Plant:
Used as pathways to get to new areas. If an insect is placed in near one then it'll get swallowed by the plant and its lid will close, which can then be jumped on to reach a new area. After roughly 10 seconds, the insect will get digested and the hanging plant will then open its lid closing off the pathway.

Now run back and do the same thing for the remaining two insects. Without hesitation, release the first insect into the first hanging plant, run back to pick up the second insect for the second hanging plant, and then finally the third insect will close the third plant to complete the bridge.

On the other side, head down to the spring plant (still ignoring the frogs) to jump to the other side. Before heading through to the next screen be sure to grab the [SPRING GUN CLIP] just north of the tree.

Spring Plant:
These can usually be used to access new nearby ledges but can even sometimes be used to access new areas.

SCREEN 2:

Pick up the first insect you see, then use the spring plant to reach the higher ledge. Then, release the insect to be able to jump across the two hanging plants past the giant flytrap (ignore the yellow orb for now). Then pick up a frog.

Frog:
A frog, like an insect can be used to close the lids on hanging plants. The only difference being, when lid opens if Cloud is standing on it then he will get launched to new areas. Also, the frog will still be alive as the hanging plants cannot swallow a frog.

Climb the small green ledge and place the frog in the left hanging plant first. Jump on the plant, and when the frog is spat out Cloud will land on the upper ledge containing the beehive. Pick it up then jump back down to the ground.

Beehive:
Beehives are used to permanently close the giant flytraps.

Place the beehive near the flytrap to close it off, then you can GRAB THAT MATERIA! the [SLASH-ALL MATERIA]. I suggest equipping it right away. Now pick up the frog once more and use it on the right hanging plant to jump over the flytrap. We'll return for the pouch a little later on.

SCREEN 3/TREETOPS:

As in the first screen, catch then release the insect near the hanging plant without feeding to the plant, then head right for a second insect. Now release both insects into each hanging plant to reach the spring plant.

In the treetops, head left then down to reach the previously unattainable pouch that you saw, the [MINERVA BAND]. This piece of armour will nullify Fire/Ice/Gravity/Holy and can only be worn by women.

Now make your way back to the third screen using the frog again, then use the spring plant as you did before to head back up to the treetops.

This time head left, up, then right, ignoring the fork leading back down to

the third screen. Head right to jump over 3 spring plants, here you be able to GRAB THAT MATERIA! the [TYPOON MATERIA] which is our second and last Wind based Materia that can be paired with Elemental (Contain doesn't count).

NOTE - The Steam/PS4 release has had the spelling corrected for the name 'Typhon'.

Now head back over to the fork and head down to a new area in the third screen. After descending the tight-rope, pick up the nearest insect and use it to jump on the two hanging plants to the right (one of which is already closed).

Grab the beehive at the top, then use it to close the giant flytrap to the left. Now use the second insect to jump back to the first half of this area, then run to the left and pick up the insect you see.

You can use the insect to lure the frog out of the hole in the tree. Now use the frog to jump over to the right side again, then use the frog on the furthest hanging plant on the right to projectile over to the next screen.

SCREEN 4:

It's safe to say that you don't need my help for this one. Simply open the two chests that you see, one containing the [APOCALYPSE] which is Cloud's Triple Growth weapon, and the other containing an [ELIXIR]. Now head through the northern exit to return to the World Map.

NOTE - Although you can return here as many times as you wish, you shouldn't have any need to unless you'd missed something.

¬¬¬

--D2.10 L - Under The Ocean

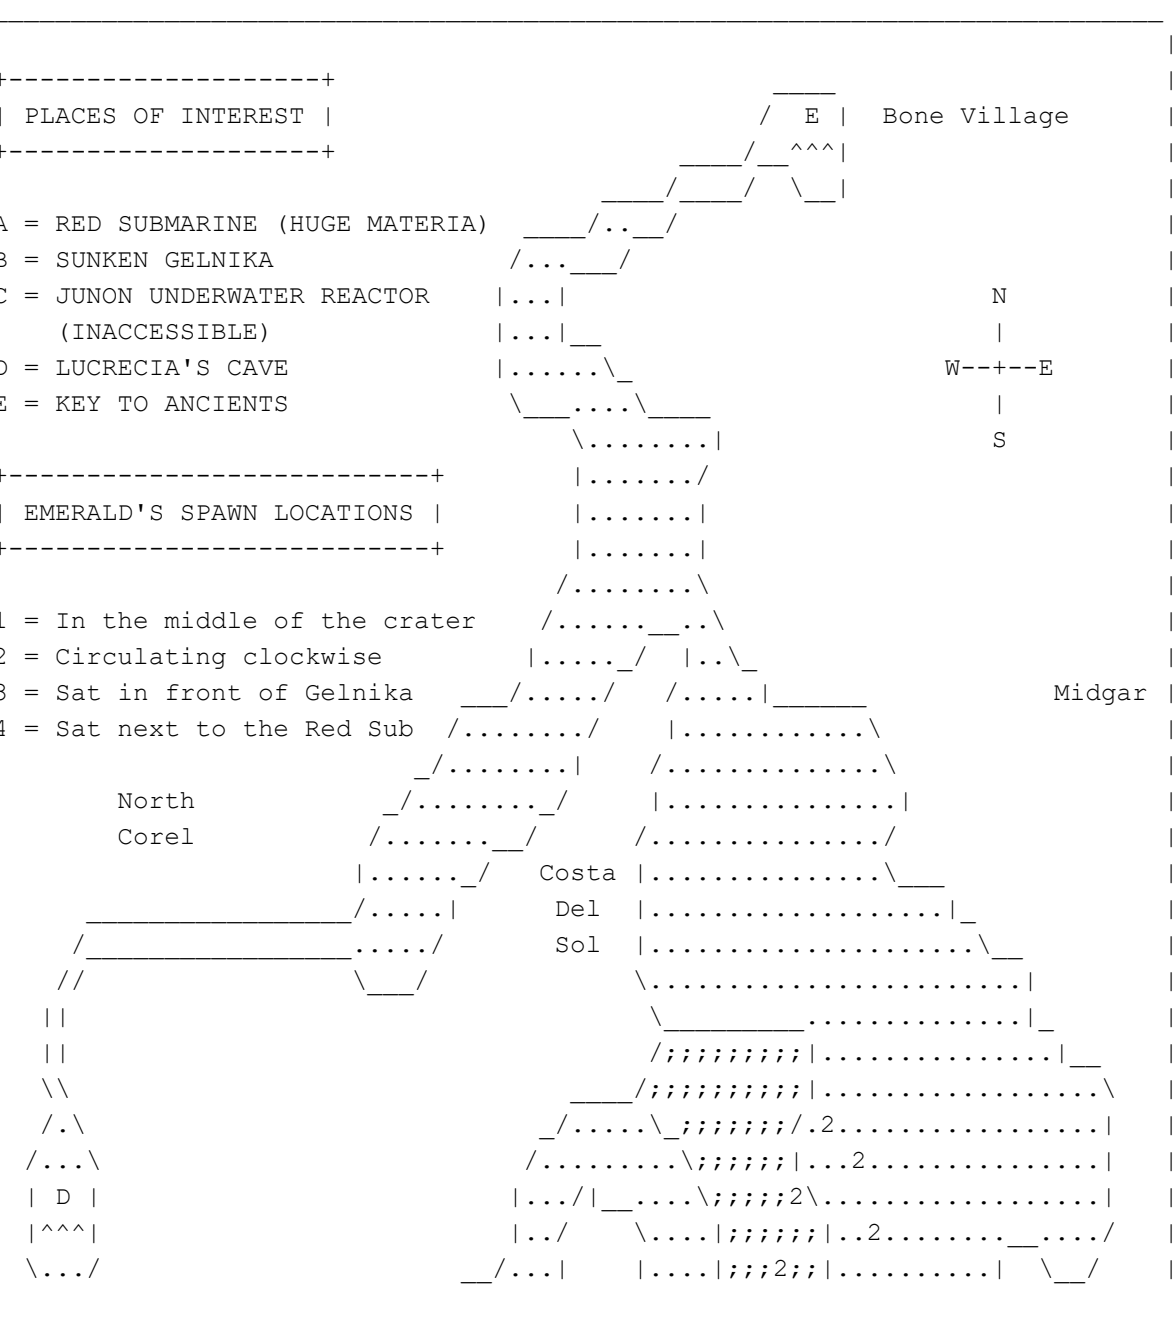
--Key Items - Huge Materia, Key to Ancients

Now is the time to grab the Huge Materia that Cloud mentioned earlier. Get into your sub, and when you submerge you'll be given a quick tutorial on how to operate the submarine, then SAVE YOUR GAME! You'll see a huge beast underwater, this is Emerald WEAPON, and is considered the hardest boss in the game.

NOTE - If you pilot your sub at maximum height, you'll avoid Emerald altogether. Also, Emerald is one of the few boss battles that you can actually flee from!

Avoiding this super-boss, head to the southern part of the map to find the Red Submarine along the ridges, approach it to obtain the [HUGE MATERIA]. Be mindful of Emerald WEAPON, who sometimes likes to lurk by the red sub.

Here is a Map of the ocean floor: (The same map can be found in section F.06)



Once you have obtained the Huge Materia (which is the *Red* Huge Materia) you can the head all the way to the north to find the small opening leading to the [KEY TO ANCIENTS]. This will be used later on.

-----EXP:	[---------900]	[---------1400]
------AP:	[----------70]	[----------70]
-----GIL:	[--------2500]	[---------2500]
---STEAL:	[-Turbo Ether]	[---Water Ring]

Earlier on I mentioned that the Shinra Mansion held the enemies nightmares were made from. Well you can forget about nightmares, these monsters are straight out of hell. BE SURE to have a ribbon

```
> ---MORPH: [Speed Source] [--Mind Source] <  equipped, and expect to die    |
> --DROP 1: [----X-Potion] [Dragon Scales] <  here a few times if you're a   |
> --DROP 2: [------------] [-----Stardust] <  low level, you've really got   |
> --ABSORB: [------------] [----------WTR] <  to be careful! Stick all of    |
> -NULLIFY: [------------] [-----GRV--ERT] <  your players in the back row   |
> --DOUBLE: [------------] [----------WND] <  and start every battle off     |
> -E-SKILL: [------------] [-----AQUALUNG] <  with Big guard then Regen, and |
#~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~#  don't forget to heal after     |
|                                           every battle.                   |
|                                                                           |
| As you are probably more than aware by now, this really is the place to   |
| boost your stats for later on in the game. Be sure to morph everything you |
| see, and also steal from Unknowns 1, 2 & 3 and the Serpent. Also, the     |
| Unknown 3 & the Serpent can be hit with L4 Suicide. Demi3 works well.     |
+---------------------------------------------------------------------------+

--Items - Heaven's Cloud, Escort Guard, Conformer, Double Cut Materia,
          Megalixir x 2, Spirit Lance, Hades Materia, Outsider, Highwind
--Boss  - Turks:Reno III Lv 42 (Touph Ring) + Turks:Rude II Lv 49 (Ziedrich)
```

So we finally get around to visiting the legendary Sunken Gelnika. Head over to the Gold Saucer area in your Sub un-submerged and Save Your Game! If you bump into Emerald WEAPON by mistake you WILL die if you try to defeat it. Remember you can flee from the battle. Also, make sure to have Yuffie and preferably Cid in your party. If you sub-merge near the submarine dock you should be able to see the Gelnika in plain sight (mind the pun).

NOTE - If you were to battle Emerald now then you would see a 20 minute countdown timer in the top right corner of the screen. This is what the Underwater Materia is used for; removing the time limit for defeating Emerald WEAPON, and nothing else.

This was my set-up heading into my sub:

1) Cloud - Lv 52 (Back)

```
    Apocalypse      - MP Turbo, Slash-All, Magic Plus
    Wizard Bracelet - All=Restore, Added Effect=Contain, HP Absorb=Steal,
    Circlet                                              Enemy Skill, HP Plus
```

2) Yuffie - Lv 49 (Back)

```
                                                              Sense, Manipulate
    Oritsuru        - Added Cut=Deathblow, Steal as well=Morph, Enemy Skill
    Wizard Bracelet - Elemental=Leviathan, All=Heal, Steal, Luck Plus,
    Ribbon                                                    HP Plus, MP Plus
```

3) Cid - Lv 50 (Back)

```
    Scimitar        - Mime, Quadra Magic
    Wizard Bracelet - Sneak Attack=Mug, Enemy Skill, Revive, Gravity,
    Ribbon                                        Speed Plus, HP Plus, MP Plus
```

If Emerald WEAPON happens to be sat in front of it then simply emerge then submerge to make him appear elsewhere.

Once on board make use of the save point, you'll definitely need it. Then open the nearby chest for the [HEAVEN'S CLOUD].

Go through the northern door next and head right opening the chest containing

the [ESCORT GUARD], which is the men's version of the Minerva Band.

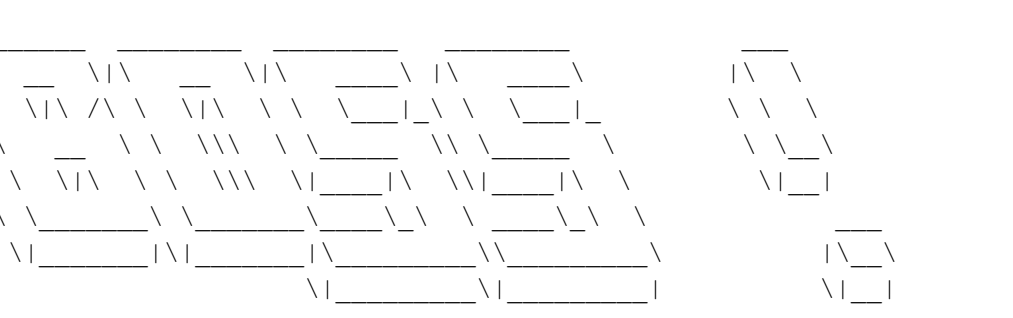
Then head down the stairs, and check the top left corner for a hidden chest containing Yuffie's ultimate weapon, the legendary [CONFORMER]!

```
 _____________________________________________________________________________
]                                                                             [
] SIDE NOTE - THE CONFORMER                                                   [
]                                                                             [
] At last, we finally have our hands on the Conformer! Although it has 0      [
] growth, the Conformer is the only weapon in the game that can Morph for     [
] the same amount of damage as normal, and I very strongly doubt that this    [
] weapon was placed here, the treasure house of morphing, accidentally.       [
] Equip it to her right away to start Source farming, not forgetting to       [
] steal from the 3 Unknowns and the Serpents.                                 [
]                                                                             [
]  NOTE - The Conformer will deal damage based on the enemies Lv; the higher  [
]         their Lv is the more powerful the Conformer will become. If Yuffie  [
]         attacks multiple foes then an average is taken. If the enemies Lv   [
]         is 64 then Yuffie's attack power quadruples, Lv 32 Yuffie's attack  [
]         doubles, and Lv 16 would be normal attack power. Anything below     [
]         Lv 16 and Yuffie's attack power would be less than normal.          [
]_____________________________________________________________________________[
```

When you're ready to move on head to the top right of the screen to GRAB THAT MATERIA! the [DOUBLE CUT MATERIA]. You can fill Yuffie with whatever Materia you like, just bear in mind that none of the Materia linked to her weapon will level up so long as you have the Conformer equipped.

Now head back to the top floor and follow the catwalk round to the chest containing the [MEGALIXIR]. Ignore the suspiciously interesting looking yellow light, it's nothing, instead head back to the entrance and save. When you head through to the next screen you'll have a familiar Boss battle on your hands.

 NOTE - You can revisit the Sunken Gelnika as many times as you like, but if
        you visit after the raid on Midgar later on then this boss battle
        won't be here.



TURKS 04	BOSS BATTLE: 31	RUDE III	RENO III
	-------Lv:	49------	42--------
	-------HP:	20000---	15000-----
	-------MP:	280-----	230-------
	------EXP:	5500----	5000------
	-------AP:	360-----	300-------
	------GIL:	5000----	4000------
	----STEAL:	Ziedrich	Touph Ring

Make sure to steal the amazing [ZIEDRICH], aswell as the [TOUPH RING] before doing anything else. The Ziedrich will 1/2 all Elemental attacks, including the obscure ones I mentioned earlier on. Once you've obtained these items you can then

```
* just unleash hell, I'm sure you     | -----DROP: | Elixir-- | Elixir---- | *
* know what you're doing by now.      | --NULLIFY: | GRV----- | GRV------- | *
*                                     |____________________________________| *
*                                                                            *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

NOTES - If you're wondering why you've only fought Rude twice yet the above states that this is your 3rd Rude encounter, it's because the game actually intends for you to fight Rude in Rocket Town first before coming to the Gelnika.

- This hallway is the only place in which you can encounter the Bad Rap and the Poodler to Morph for Speed and Luck Sources. Bear in mind that it's much easier to farm here once you've obtained the Mega-All Materia.

- I haven't misspelt it, it really is called the 'Touph Ring' (spelling fixed in later versions).

Head into the final Cargo Room and open the chest on the left for a [MEGALIXIR]. Then follow the top pathway round to a chest containing the [SPIRIT LANCE].

Now head into the pit that is the cargo room and GRAB THAT MATERIA! the just visible [HADES MATERIA] on the right.

```
 ____________________________________________________________________________
]                                                                            [
] SIDE NOTE - HADES MATERIA                                                  [
]                                                                            [
] Without a doubt this is the best Materia to combine with the Added Effect  [
] Materia. It will protect you from or allow you attack with:                [
]                                                                            [
] Sleep, Poison, Confusion, Silence, Frog & Small                            [
]____________________________________________________________________________[
```

Now head south and open the chest on the left for the [OUTSIDER] and the chest on the right for the [HIGHWIND], Cid's Lv 4 Limit Break. Use it if you're ready to unlock the Gale Warning Trophy.

We're now done with the Gelnika, for now. Unless you wish to Source farm some more, head out to the save point. Make sure to save as Emerald WEAPON may be waiting directly outside the Gelnika.

Now is the time to evaluate how many Sources you have. At this stage, I had:

7 x Power Sources - all to Yuffie
8 x Guard Sources - all to Yuffie
6 x Magic Sources - all to Cloud
7 x Mind Sources - 3 to Yuffie and 3 to Cid
4 x Speed Sources - all to Cid
4 x Luck Sources - all to Yuffie

HOW YOU DISTRIBUTE YOUR SOURCES IS ENTIRELY UP TO YOU! First choose an end-game party, then decide how you wish to use you characters:

I'm giving Yuffie the Power Sources because I want her to be my strongest physical character, the Magic Sources to Cloud because I want him to be my main sorcerer, the Luck Sources to Yuffie to help with her critical hits and the rest were distributed to even out the stats.

Lastly, here is a list of random battle encounters in which you can morph Sources:

```
Power Source -      Heavy Tank - Reactor in Gongaga
                      Screamer - Mt. Nibel, winding pathway to rector
                       Unknown - Sunken Gelnika Cargo Room

Guard Source -     Bagnadrana  - Mt. Corel Reactor
                        Spiral - Mideel Area
                     Unknown 2 - Sunken Gelnika Cargo Room
                Maximum Kimaira - Midgar Mako Cannon Area (& Battle Square)
                  Armored Golem - Northern Cave

Magic Source -           8 eye - Temple of The Ancients (& Battle Square)
                     Unknown 3 - Sunken Gelnika Cargo Room

Mind Source  -   Dragon Rider - Whirlwind Maze (& Battle Square)
                       Killbin - Whirlwind Maze (Can't re-visit)
                       Serpent - Sunken Gelnika Cargo Room

Speed Source -         Poodler - Sunken Gelnika Corridor

Luck Source  -         Bad Rap - Sunken Gelnika Corridor
```

So as you can see, the Magic, Mind, Speed and Luck Sources can only be farmed right here, in the Gelnika, unless you were to try Morphing at the Battle Square. If however you wanted an easier time obtaining Power Sources then I suggest fighting the Heavy Tank in Gongaga, and if you wanted easier Guard Sources then I suggest fighting the Spiral in the Dirt Area near Mideel.

NOTES - If you wanted to, you could head over to Gongaga now before doing anything else to obtain a few Power Sources from the Heavy Tanks. I got Yuffie's base level up to 85 before I moved on (equip Sneak Attack and Morph, if you have Sneak Attack that is).

- If you wanted to, you could utilise the Extended W-Item Trick once you've obtained the W-Item Materia later on to duplicate Power Sources and Magic Sources with ease. Use QSI Link [Extended W-Item Trick] for more info.

--D2.10 N - Lucrecia's Cave II

--Items - Death Penalty, Chaos

Jump back on your Chocobo and return to Lucrecia's cave with Vincent in your party once more. Provided you've engaged in 11 battles (or less), Lucrecia will have left you two items, the [DEATH PENALTY] which is Vincent's ultimate weapon, and [CHAOS], Vincent's Lv 4 Limit Break. The Death Penalty's attack power will increase with the total amount of kills Vincent has; with 6912 kills Vincent's attack quadruples, with 2816 kills his attack doubles, and with 786 kills his attack is normal. If Vincent has fewer then 786 kills then his attack power will be less than normal, with a minimum of 62.5% da,age output.

Due to the absurd amount of kills required before the Death Penalty becomes

useful to us, most people don't bother with it. It is useful to know that if you were prepared to get at least 18,048 kills with Vincent, then you could send his damage counter into overflow, causing a 1 hit kill to Emerald WEAPON (you'd also need Vincent to have 255 strength, use 4 Hero Drinks, be in Berserk and land a critical hit, as well as being level 99).

Teach Vincent Chaos to unlock the Inner Demons Trophy.

NOTES - It's around this time that I mastered Revive. As soon as you do, equip the new Revive and start mastering that one too. In fact, any Materia that you've mastered should be swapped out with the new one if it's a unique piece.

--D2.10 O - Chocobo Breeding Step 5

Head over to the Chocobo Ranch. If all is well, you should now be able to breed your Black Chocobo with your Wonderful Chocobo using a Zeio Nut to make a Gold Chocobo (obviously save before you try). You will have a 3.1% chance of getting a Gold Chocobo if both Chocobos 'wins' total *less* than 12 between them.

NOTE - You *MUST* select the Black Chocobo first, regardless of whether or not you've won 12 combined races .

If the Black Chocobo is still too young to breed, then battle around for a while or consider continuing on with the story. When you have your Gold Chocobo, feed it 25 Sylkis Greens to max out Speed, Stamina & Co-op, all other stats (Acceleration & Intelligence) should already be maxed if they were for the parents. You may need to feed a few Curiel Greens to max out Stamina if it isn't at 999.

Congratulations, not only do you have an awesome racing Chocobo, but you also have a Chocobo that can go almost anywhere on the World Map!

--D2.10 P - Round Island

--Items - Knights of The Round Materia

Take your brand new Chocobo out for a ride, then head directly north-east until you get to the corner of the map. Here you should see a huge round island, climb it to find the Materia Cave. Inside you'll discover the [KNIGHTS OF ROUND MATERIA], which is the most powerful and most painstakingly long-winded Summon in the game, not just in terms of how long it takes for the animation to play out, but also how long it takes to master; It requires an insatiable 500,000 AP!

Note that you can encounter the Goblin and the Mystery Ninja on this island. When you are ready, head over to the Gold Saucer for the final section of the sidequests.

--D2.10 Q - More Gold Saucer Stuff
¬¬¬

Snow Game -

This is basically the same as the snowboarding game that we played at the Icicle Inn, and is probably the most entertaining of all the games at the Wonder Square. There are 3 courses, and scoring 70+ on any course will unlock the next one.

Your overall score is based on 3 things - how many balloons you hit, your finishing time and how many obstacles you didn't hit. If you score 90+ then you will win a prize, the prizes are as follows:

Course A - 30GP & Safety Bit
Course B - 100GP & All Materia
Course C - 300GP & Crystal Bangle

I recommend obtaining the Safety Bit, as they will help out for the final dungeon. You can always buy them from Rocket Town, of course!

You can also unlock a time attack mode, although no new prizes can be won that way. If you have Tifa or Cid in your party then they will occasionally request to have a go. To learn more about Time Attack mode use QSI Link [Snowboarding].

Torpedo Attack -

If you found the Red Submarine chase to be fairly boring then you'll probably find this to be quite boring too seeing as it's basically the same game. Each difficulty that you beat it on you'll receive 20GP and a prize (once only), the prizes are as follows:

Stage 1 - 20GP & an Ink
Stage 2 - 20GP & a T/S Bomb
Stage 3 - 20GP & a Dragon Fang
Stage 4 - 20GP & a Dragon Scales
Stage 5 - 20GP & a Cauldron (spelt Caldron)

You don't need to beat the next difficulty along to win the next prize, you could just keep beating it on the lowest setting to get all 5 prizes if you wish!

GP Exchange -

Talk to the woman standing by the Arm Wrestling machine to find a few new prizes up for grabs:

Gil Plus Materia - 1000GP
EXP Plus Materia - 2000GP

I don't expect you to be able to afford to buy them right away, but you will need to buy these at some point as they aren't obtainable anywhere else in the game. This is where the Chocobo grinding comes into play, also, don't forget about the man who can convert gil into GP!

As you can probably ascertain for yourself, these two pieces of Materia will GREATLY help for some of the more 'grindy' trophies.

Battle Square -

There are a few new prizes available to us now, the most prestigious being the W-Summon Materia for 64,000BP! Note that Clouds Lv 4 Limit Break, Omnislash has now gone down in price to 32,000 BP, so make that your first target. You can also get Remedys for 100 BP, these are good

to spend your left over BP on.

The monsters here are much harder, if you were able to stock up on Smoke Bombs earlier on then they will really help. Remember, the bigger the handicap, the bigger the reward. There are two unique monsters found only at the Battle Square, and they are Ho-chu and Tonberry. Ho-chu looks a little bit like the Malboro's cousin, and the Tonberry shouldn't be confused with the Master Tonberry found in the North Crater:

```
#~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~#  Make sure to do the usual stuff
>  ENEMIES: [ HO-CHU] [   TONBERRY] <  such as Big Guard, Regen, etc. and
>                                   <  use Death Force if you see the
> ------Lv: [-----39] [---------25] <  Tonberry, he'll kill you in one
> ------HP: [---4300] [------15000] <  move otherwise. Don't hold back on
> ------MP: [----290] [--------250] <  using your strongest magic,
> -----EXP: [----750] [--------999] <  Aqualung and Magic Breath will work
> ------AP: [-----70] [---------99] <  well. Also, if you encounter the
> -----GIL: [---2500] [--------999] <  Ghost Ship don't forget to cast L4
> ---STEAL: [Circlet] [Turbo Ether] <  Suicide on it (and then morph it if
> ---MORPH: [-Ribbon] [-----Elixir] <  you haven't already). Don't forget
> --ABSORB: [----PSN] [-----------] <  that the Dragon Riders can be
> -NULLIFY: [----GRV] [--------GRV] <  morphed into Mind Sources, and the
> --DOUBLE: [----WTR] [-----------] <  8 eye can be morphed into Magic
#~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~#  Sources.
```

Remember - you can see which handicap yields the highest BP rewards by visiting section E.08 D.

After you have obtained the Omnislash and W-Summon, you must then return once you have obtained Cloud's ultimate weapon, which is called Ultima Weapon, and is obtained by defeating... Ultimate WEAPON (I'm not lying). You can then talk to the clerk to engage in a special match, winning this match will result in the Final Attack Materia which can't be obtained elsewhere. Note that Cloud needs to have learned Omnislash.

NOTE - If you were to win 10 of these special battles in a row you would earn the special prize of a Ribbon. Or, you could just simply Morph a Ho-chu when you see one. It's up to you. To be honest, the only reason I'm choosing Yuffie for these battles is so that I can obtain a third Ribbon now the easy way, by morphing a Ho-chu.

And that just about concludes perhaps the longest sidequest section of the game, and quite possibly the last (or not..)! Note that if you fancy saving some of the grinding for later on then that's absolutely fine, we'll have to return later on anyway once we've obtained Cloud's Ultima Weapon. I'm only grabbing Omnislash for now (which will also net me The Slash to End All Slashes Trophy).

Next stop, Rocket Town! Make sure to have Cid in your party and then set up for a fairly easy Boss Battle! Make sure to have Steal equipped, also.

```

*                                                                                    *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

After you've taken care of Rude, head inside the rocket to take out one more Senior Grunt. Then head through into the shuttle's control room and after some dialogue and an FMV you'll have control of Cloud again (how the hell did Palmer survive the truck incident on Disc 1???)

Note that it makes no difference to the *story* whether you take the Huge Materia here or not, the outcome is the same (however your still going to want to obtain the Huge Materia for 'other' purposes). Head to the right and then climb the ladder to find the chamber holding the Huge Materia. You'll now have three minutes to try to work out the correct sequence of buttons whilst Cid will shout out clues.

To be honest, this is probably one of the hardest mini-games in the game, seeing as it's pretty much based on pot luck, Cid's 'clues' aren't really that much help. If you give up then the sequence is O, Sq, X, X. Again, if you fail this mini-game then it will not affect you achievement progress, it'll just make it that much harder to obtain the Bahamut ZERO Materia, so do make sure to walk away the fourth and final Huge Materia.

NOTES - The Materia you obtain here is completely dependent on the Huge Materia you already have, and there is a priority to the order in which the checks are performed:

1) If you are missing the GREEN Huge Materia from North Corel, then you will receive the GREEN Huge Materia here. Otherwise:
2) If you are missing the YELLOW Huge Materia from Fort Condor, then you will receive the YELLOW Huge Materia here. Otherwise:
3) If you are missing the RED Huge Materia from Junon's Red Sub, then you will receive the RED Huge Materia here. Otherwise:

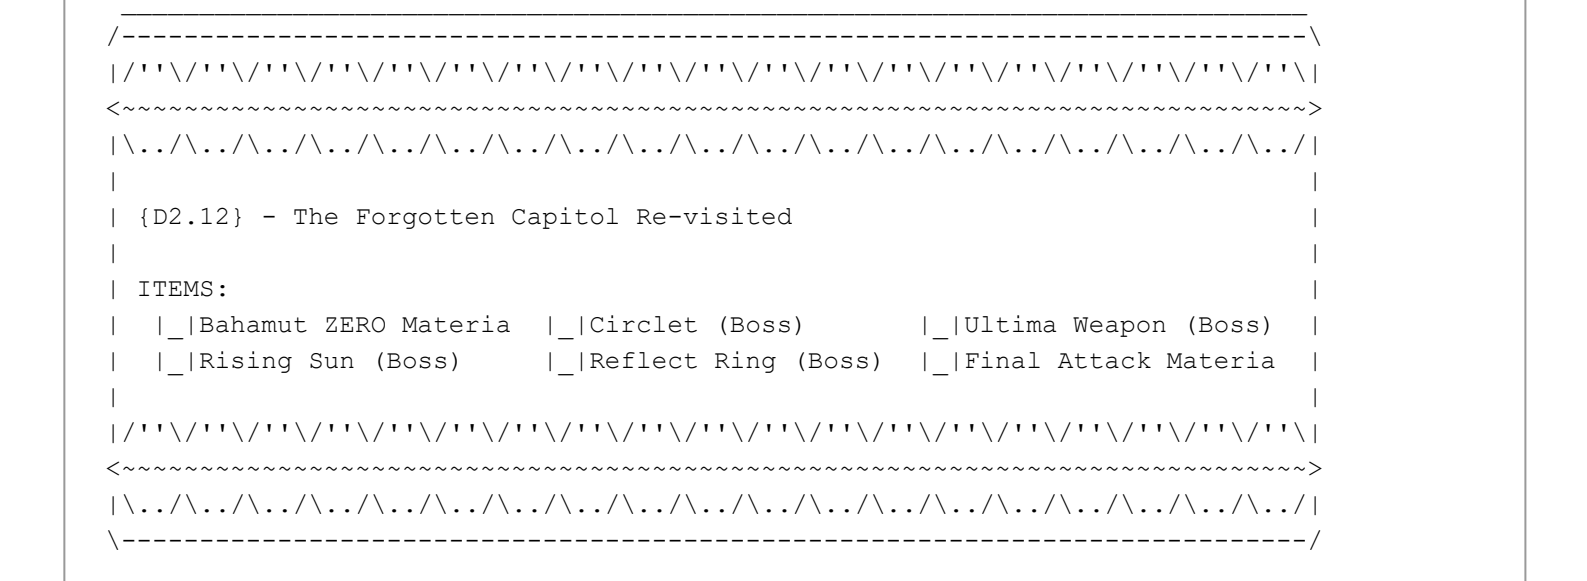
If you are in possession of all three Huge Materias, then you will receive the BLUE Huge Materia here.

- When you receive the Blue Huge Materia, a flag pops up which disables the Bahamut ZERO Materia from being dug up at Bone Village.

Once you've finished, head back down the ladder and into the Control Room, then head south and down another ladder. You shouldn't need this guide now for the following events, you can pick it up once you have regained control of Cloud on the Highwind.

Before continuing, head back into Rocket Town (your Chocobo will be still be there if you'd left one outside). Talk to the man that you spoke to before who gave you the Yoshiyuki. After speaking to him 3 times he'll give you

Cid's ultimate weapon, the [VENUS GOSPEL]. The more MP Cid has, the stronger this weapon will become; with full MP Cid's attack power triples, at 2/3's it doubles, and at 1/3 it is normal. Anything below 1/3 MP will result in lower than normal attack power.



--D2.12 A - Bugenhagen's Laboratory ("You haven't remembered. You haven't forgotten.")

--Items - Bahamut ZERO Materia

If you hadn't obtained the Key to Ancients as advised earlier during the sidequest section, then now is the time to do so. Head over to where your submarine is docked and save your game (just in case you bump into WEAPON). Keep heading north until you come to an underwater ravine. If you were to head left you would come to a long tunnel leading to Lucrecia's Cave. Instead, keep heading north to come to a much shorter tunnel leading to the 'Key to Ancients'. Look in section F.06 for a map.

Note - It is at this point in the game where you are intended to pick up the Huge Materia from the red submarine along the depths of the southern ridges, and also explore the Sunken Gelnika to the west, so do so now if you haven't already. (Technically speaking, the game intends for you to get to a point in the Forgotten Capitol where you cannot progress any further without the key, and then you would have been expected to explore underwater until you found it. I'm just making it so you can do the Forgotten Capitol section in one visit.)

Now head over to Cosmo Canyon. You don't have to bring Red XIII along if you don't want to, but I shall along with Tifa. By now you should have all 4 Huge Materias, you can check by looking under the Key Items tab in 'Items'. Make your way up to Bugenhagen's observatory then head into his 'machine' to talk to him.

After an amount of dialogue, Cloud will ask if he can store the Huge Materia within the machine. If you'd missed one (it doesn't matter which) then you would have missed out on the Huge Blue Materia, however if you had missed out on two Huge Materias then the Materia you get will very much depend on the missions that you failed.

] SIDE NOTE - HUGE MATERIA [
] [
] Huge Green Materia - When you have mastered all Magic Materias, you can [
] (North Corel) then exchange them for the Master Magic Materia. [
] This will equip every single Magic spell available [
] to one character. [
] [
] Huge Yellow Materia - When you have mastered most (but not all) Command [
] (Fort Condor) Materias, you can then exchange them for the Master [
] Command Materia. This will equip: Coin, Deathblow, [
] Manipulate, Mime, Morph, Sense, Steal and Throw to [
] one character (these are the ones that need [
] mastering). [
] [
] Huge Red Materia - When you have mastered all Summon Materias, you can [
] (Junon) then exchange them for the Master Summon Materia. [
] This will equip every single Summon spell available [
] to one character. [
] [
] Huge Blue Materia - If you have obtained the Bahamut and Neo Bahamut [
] (Rocket) Materias then you will be rewarded with the Bahamut [
] ZERO Materia (whilst still retaining Bahamut and Neo [
] Bahamut). [
] [
] Bone Village - If you failed to obtain the Huge Blue Materia then you [
] will be able to dig up Bahamut ZERO from the Excavation [
] Site on Disc 3, although there will only be a 4% chance [
] of finding it so you could be there for a while. [
] [
] Kalm Traveller - If you failed to receive one of the other 3 Huge [
] Materias then you will still be able to receive one set [
] of Master Materia from the Kalm Traveller by trading him [
] the Earth Harp. More info on how to obtain that later on. [
] [
] NOTE - You will need to have in your possession at least one set of [
] Master Materia for the Materia Overlord Achievement to pop. [
]_____[

As the side note suggests, EXAMINE THAT HUGE BLUE MATERIA! to obtain the [BAHAMUT ZERO MATERIA], provided of course that you have obtained all four Huge Materias and the Bahamut & Neo Bahamut Materias (you'll also unlock the Bahamutype-0 Trophy). Then examine one of the Huge Materias to descend back to the lower level, as you leave you'll be transported back to the Highwind.

NOTE - You can return to Bugenhagen's machine any time you like, you just need to operate the switch on the right.

Before continuing you can make use of Operations to restore your HP/MP if you wish, then you can head to the cockpit. Try talking to your comrades to hear their thoughts on Aeris before taking off, you can also talk to Yuffie if you wish to hear Cloud talk about SOLDIER as if he still thinks he was in it...

Make sure to pick up your Chocobo from Cosmo Canyon assuming you had one, then head over to Bone Village, but instead of heading through the Excavation Site and then Corral Valley you can simply land your Highwind in the small area between Corral Valley and the Forgotten Capitol.

NOTE - You could also return to the Great Glacier by using a Chocobo (or by snowboarding) if you wished, but you can only go as far as the base of Gaea's Cliff (Holzoff won't allow you to go any further).

¬¬¬

DIAMOND WEAPON	BOSS BATTLE:	33
	---------Lv:	49--------
	---------HP:	30000-----
	---------MP:	30000-----
	--------EXP:	35000-----
	---------AP:	3500------
	--------GIL:	25000-----
	------STEAL:	Rising Sun
	-----HALVES:	FRE-------
	----NULLIFY:	GRV-------
	-----DOUBLE:	LHT-------

The first thing you're going to want to do is cast Big Guard followed Death Force followed by Regen with Yuffie, while the other two attempt to steal the [RISING SUN]. This boss will be impervious to physical attacks to begin with, so just blast him with your strongest magic moves. When he uses Diamond Flash he will drain your characters HP to critical whilst also casting Silence, at this stage have Yuffie cast White Wind (if you gave her the Ribbon as advised). From this point onwards, Diamond WEAPON will now be impervious to magic attacks, so just keep attacking it physically until it is dead.

NOTE - Once you've stolen the Rising Sun, you could just cast Knights of The Round once to finish it off in one go, but it'll probably take just as long as the method shown above. Also, Diamond won't use Diamond Flash if no-one has used a Summon or Limit Break. Once defeated PS4 players will receive the Diamond Disintegrator Trophy.

Once you have defeated Diamond Weapon you will see some things happening with President Rufus, and After a few FMVs you'll be back on board the Highwind. The game intends for you to approach the North Crater, but instead we're going to take out Ultimate Weapon who has now appeared near Junon.

NOTE - Make a fresh save for this bit. *If* you were to fly up to the North Crater, and then fly over Midgar you would trigger the point of no return for Disc 2, and there's still a few things left to do first so make sure to not accidentally progress with the storyline. There's a fair amount of flying around to do, also.

What proceeds now is a series of fights in which you gain 0 AP, it's not until the final fight that you'll receive the huge rewards. This is my temporary load-out, bearing in mind that I'm protecting myself from the 'Hidden' Element:

1) Cloud - Lv 55 (Back)

MP Plus

Heaven's Cloud - Ultima, Contain, Enemy Skill, Long Range, Magic Plus,
Shinra Alpha   - Elemental=HP Plus, All=Restore, Sneak Attack=Mug
Sneak Gloves

2) Yuffie - Lv 52 (Back)

Double Cut, Typoon

```
     Conformer      - All=Barrier, MP Turbo=Comet, Revive, Enemy Skill,
     Crystal Bangle - Elemental=HP Plus, Steal, Counter Attack, MP Plus,
     Champion Belt                                              Bahamut Zero

 3) Vincent - Lv 50 (Back)
                                                    Counter Attack, Speed Plus
     Death Penalty  - All=Time, Steal as Well=Steal, Enemy Skill, Mime,
     Imperial Guard - Elemental=HP Plus, Added Cut=Deathblow, Luck Plus,
     Champion Belt                                                  MP Plus

When you're ready, save the game then head over to the small crater near
Junon to find Ultimate WEAPON waiting.

* Long Range Materia is advised.               |_______________|_____________| *
*                                                                             *
* Here is where he can be found:                                              *
*                                                                             *
* Near Gongaga      - Ground Battle                                           *
* Near Fort Condor  - Ground Battle                                           *
* Near Midgar       - Ground Battle                                           *
* North Crater      - Ground Battle                                           *
* Near Junon        - Aerial Battle                                           *
* Near Mideel       - Aerial Battle                                           *
* Near North Corel  - Aerial Battle                                           *
* Near Cosmo Canyon - Final, Aerial Battle.                                   *
*                                                                             *
* If you are fighting him on the ground then you can steal the [REFLECT       *
* RING], and if he's in the air then you can steal the [CIRCLET]. He'll have  *
* something on him every time you battle him, so try to steal 2 Reflect       *
* Rings from him. Save before every battle, then straight after the battle    *
* make sure not to lose sight of him, he can be a real pain to track down     *
* otherwise. Only save the game when he is stationary.                        *
*                                                                             *
*  NOTE - Be wary when searching for him to not accidentally progress with    *
*         the story. If you find yourself parachuting into Midgar then        *
```

```
*         re-load your save.                                                  *
*                                                                             *
* In terms of strategy there's nothing really to tell you other than to do    *
* what you know to do; Big Guard, Regen etc. Yuffie s Conformer works the     *
* best here seeing as its attack power grows if it's up against a high        *
* levelled enemy. Remember, you won't receive any battle rewards until the    *
* final fight, which will be after his HP has dropped to below 20,000. He     *
* will then fly over to the area near Cosmo Canyon.                           *
*                                                                             *
* You'll need to be more careful in this final fight seeing as before he      *
* dies he'll use one final attack which will be the Enemy Skill Shadow        *
* Flare. This is an extremely powerful attack, but it'll only hit the last    *
* player to have hit him. If the player dies from the attack then you won't   *
* learn the skill, so make sure to have the Reflect Ring equipped. You'll     *
* also get the rewards for this final fight, so make sure to have changed     *
* your load-out, mine was:                                                    *
*                                                                             *
*  NOTE - Ultimate will not have a stealable on him for this final battle.    *
*         Also, setting up the Reflect Ring will result in Shadow Flare       *
*         reflected back unto Ultimate, but you'll still learn the Enemy      *
*         Skill!                                                              *
*                                                                             *
*  1) Cloud - Lv 55 (Back)                                                    *
*                                                                             *
*      Apocalypse     - Quadra Magic, Mime, Double Cut,                       *
*      Imperial Guard - All=Restore, Enemy Skill, Enemy Skill, Enemy Skill,   *
*      Reflect Ring                                              Enemy Skill *
*                                                                             *
*  2) Yuffie - Lv 52 (Back)                                                   *
*                                                                             *
*      Rising Sun  - Sneak Attack=Morph, Added Cut, Speed Plus                *
*      Rune Armlet - Revive, Heal, Counter Attack, Magic Plus                 *
*      Champion Belt                                                          *
*                                                                             *
*  3) Cid - Lv 53 (Back)                                                      *
*                                                                             *
*      Scimitar    - Added Effect, Knights of Round                           *
*      Rune Armlet - Contain, Comet, Slash-All, Counter Attack                *
*      Champion Belt                                                          *
*                                                                             *
* Make sure that Cloud gets the final blow as so that all four Enemy Skills   *
* learn Shadow Flare, although you can learn it again on Disc 3. Once it is   *
* dealt with you'll receive Cloud's ultimate weapon, [ULTIMA WEAPON] which    *
* will gain higher attack power the higher Cloud's HP is: at full HP Cloud's  *
* attack power triples, and 2/3's it doubles and at 1/3 it is normal. Below   *
* 1/3 HP and Cloud's attack power will be less than normal.                   *
*                                                                             *
*  NOTE - Shadow Flare is regarded as one of the strongest Enemy Skills in    *
*         the game, although it'll only target one opponent.                  *
*                                                                             *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

After the battle has finished Ultimate WEAPON will crash into the canyon leaving a huge clearing in its path. If you hadn't been Chocobo breeding then now would be the time to visit the Ancient Forest seeing as you'll now have access to it, see section D2.10 J - Ancient Forest for the walkthrough.

NOTES - Now that you have defeated Ultimate WEAPON, Ruby WEAPON will now have appeared in Corel Desert near the Gold Saucer. Be warned, if you accidentally fly into this thing then you WILL get wiped out, just as

you would if you tried to fight Emerald WEAPON now (the underwater creature), although you can also flee from Ruby (until it's buried its Tentacles that is). If you do escape then you will see Ruby on the World Map standing proud!

- Ruby will not appear until you have engaged in one random encounter.

There are two things that I suggest doing before continuing on with the story. Now that you have the Ultima Weapon for Cloud, you can finish obtaining the W-Summon Materia and/or Omnislash at the Battle Arena, then you can talk to the clerk to engage in an extra battle that only Cloud can partake in. The battle sequence is fixed:

Round 1 - Sea Worm
Round 2 - Ho-chu
Round 3 - Unknown 3
Round 4 - Serpent
Round 5 - Wolfmeister
Round 6 - Behemoth
Round 7 - Maximum Kimaira
Round 8 - Proud Clod

NOTE - You don't need to have W-Summon or Ultima Weapon equipped, but you DO have to have learned Omnislash before you can partake in the special battle. If Cloud isn't ready to learn Omnislash then I suggest heading over to the forests near Rocket town to fight and Manipulate the Valron.

Upon winning the battle you'll be rewarded with the [FINAL ATTACK MATERIA], start Leveling it up immediately! If you win 10 of these battles then you would be rewarded with a Ribbon, but there are easier ways of getting them (like morphing a Ho-chu). I also suggest finishing up all of the other things to do in the Chocobo Square and the Wonder Square, but it's entirely up to you whether you do them now or later on (I'll give a full side-quest recap when we get to Disc 3).

If you're skilled enough, try scoring 5000 at the Speed Square for the Flayer, the strongest weapon in the game to have normal growth (for Cid - 6 un-paired slots). Also, try to obtain a Sneak Attack a and Magic Counter or two from the Chocobo Races, if you haven't already. When you're ready, head over to the North Crater to continue on with the story.

NOTE - There's an interesting but pointless glitch here. If you were to hold down the 'right' direction whilst the following scenes take place then you would skip out the entire Midgar sequence, and jump straight to the boss! Pointless, because you'd be missing out some great weapons that you won't be able to go back for, so this glitch isn't advised unless you're going for a speed-run. Confirmed to work on the PS4 version, too.

```

After watching a few scenes involving Heidegger, Scarlett and Reeve you'll have to make your way back to Midgar. When you fly over the round city you will have effectively reached the point of no return for Disc 2, so if there's anything you wish to do make sure to do it now. Otherwise, save your game then set up your party, I'm bringing Barret and Vincent along.

NOTES - There is a weapon for Barret coming up that is only available if you have Barret in your team. You have time between now and then to change your party around, but for what it's worth I'm sticking him in now so I don't have to change things around later on.

- If you've mastered you HP Plus Materias or you're about to master them, be sure to equip the new HP Plus's to start mastering those too.

- Should you talk to the pilot before dropping into Midgar, you'll notice he has his Limit Break up!

```

```

--Items - Elixir x 2, Megalixir, Aegis Armlet, Starlight Phone, Max Ray

Before parachuting your way into Midgar, you're going to want to set up a solid load-out. Here was mine:

1) Cloud - Lv 57 (Back)

Crystal Sword - Elemental=Lightning, All=Restore, Final Attack=Revive
Wizard Bracelet - Steal as well=Comet, Enemy Skill, Mime, Counter
Ribbon Attack, Long Range, Magic Plus, HP Plus

2) Vincent - Lv 51 (Back)

Sneak Attack=Deathblow
Long Barrel R - Elemental=Ramuh, Added Effect=Hades, Sneak Attack=Mug,
Wizard Bracelet - Added Cut=Deathblow, Enemy Skill, Slash-All, Counter
Sprint Shoes Attack, Luck Plus HP Plus, MP Plus

3) Barret - Lv 50 (Back)

AM Cannon - Elemental=Lightning, All=Time, Enemy Skill, Sense
Imperial Guard - Steal, Double Cut, Counter Attack, Speed Plus, HP Plus,
Ribbon MP Plus

Save your game, then fly over the top of Midgar. Note that this whole area ISN'T re-visitable, so make sure to grab everything along the way. After watching a cool FMV you'll regain control of Cloud in the slums of Midgar. Follow Cait Sith to a save point, then talk to him again to have him open the hatch.

As you descend you'll come to a huge area filled with long ladders and stairways. Before heading down the long stairway, head right along the catwalk.

When you come to a T-fork, head left to open the chest containing an [ELIXIR]. Then head all the way right behind the support column for another chest containing a [MEGALIXIR].

Now make your way make to the entrance, this time heading down the stairway. At the bottom, hitch up to the ladder to descend into the next screen.

Head left first to come to the very long ladder that you saw in the first screen. At the top you'll find a chest containing the [AEGIS ARMLET], which has great stats but low Materia slots. Now head back down the ladder.

Now run past the first ladder to the right, and as you jump on the platform it'll lower down, forcing you to head to the left. Climb the two sets of ladders here back to the first screen. Now follow the pathway round to the hug chute, when you emerge you'll be able to grab the [STARLIGHT PHONE] from the chest on the left and an [ELIXIR] from the chest on the right.

Head down the southern ladders and jump into 'Chute 42' on the right. Back at the first screen you can follow the path round to another long ladder, at the top you'll find a incredibly strong weapon for Barret, the [MAX RAY], I suggest equipping it. (this isn't the aforementioned obtainable that is only found when Barret is in your party btw, no that weapon would be the Missing Score and is Barret's ultimate weapon).

NOTE - The Max Ray is the third strongest weapon in the game to have normal growth (1st being Cid's Flayer, and the 2nd being Cloud's Ragnarok, which we'll be obtaining shortly).

There's nothing left to collect in this area now, so head back down to 'Chute 42' and ascend the ladder. Now climb the long stairway to come to the save point you saw earlier. Make use of it, then head through the exit. crawl through the crawlspace to emerge in some winding tunnels very similar to the ones at the beginning of the game.

--D2.13 B - Winding Tunnels ("...Elena, don't act so weak.")

NOTE ON ENEMIES:	ENEMIES:		
		[CRAZY SAW]	[SHADOW MAKER]
Shadow Makers will drop Turbo Ethers 100% of the time, so battling here isn't the worst thing in the world (unless of course you're planning on using the W-Item Materia trick, which we'll obtain very shortly). Wear Ribbons and/or Sprint Shoes.	------Lv:	[----------44]	[----------42]
	------HP:	[--------3900]	[--------2000]
	------MP:	[---------340]	[---------120]
	-----EXP:	[---------800]	[---------500]
	------AP:	[----------80]	[----------25]
	-----GIL:	[--------1300]	[---------500]
	---STEAL:	[---Mute Mask]	[---Graviball]
	---MORPH:	[-Turbo Ether]	[------------]
	--DROP 1:	[Phoenix Down]	[-Turbo Ether]
	--DROP 2:	[-------Ether]	[------------]
	--DOUBLE:	[---------LHT]	[---------LHT]

--Items - Power Source, Guard Source, Mind Source, Magic Source, W-Item Materia
--Boss - Turks:Rude IV Lv 51 (Ziedrich) + Turks:Reno IV Lv 50 (Touph Ring) + Turks:Elena Lv 53 (Minerva Band)

So, just like the first time we were in the winding tunnels, north is the

direction we want to be travelling in, but not before heading south first. This time however we won't have an infinite battle encounter waiting for us, instead we'll have some goodies to collect.

Make your way south one screen and you'll notice the number 7 sprawled across the northern wall (presumably it means Sector 7). Keep making your way south until you get to number 3, here you'll find a chest containing a [POWER SOURCE]. You'll also see various teammates along your travels.

Head south two more screens (to number 2) to find a chest containing a [GUARD SOURCE]. Now head to number 1 to find two more chests, one containing a [MIND SOURCE] and the other containing a [MAGIC SOURCE]. Lastly, head south one more screen to find a save point and the infamous [W-ITEM MATERIA]. GRAB THAT INFAMOUS MATERIA!

NOTE - As with the Phoenix Materia and Bahamut ZERO, if you missed W-Item here now then you can dig it up from the Excavation Site in Bone Village on Disc 3.

SIDE NOTE - THE W-ITEM TRICK

Those of you who are not in favour of using exploits to further you progress, look away now. This glitch has been known about for many years, and is probably the oldest glitch in the book.

So how exactly do you do the W-Item Trick? Well first off, make sure that you have your ATB settings to 'Wait' (in the Config options). Then, arrange your items by 'Type'. Equip the W-Item Materia and get into a battle. What we are now going to do is duplicate a usable item.

First, select the item that you wish to duplicate (such as a Megalixir or Turbo Ether), then select another item. Before confirming the target that you would like to use the second item on, press cancel to return to item selection. Your *Megalixir* will now have increased by one. Rinse and repeat until you have 99 Turbo Ethers, Sylkis Greens, whatever!

There are various ways of exploiting the W-Item glitch, and the above only shows how to duplicate items that are usable in-battle. To learn how to use the Extended W-Item glitch to duplicate Sources, Weapons, Armour, Accessories, and even fill two inventory slots with the same item, use QSI link [Extended W-Item Trick].

SIDE NOTE - Lucky 7's

While I'm on the topic, I feel now is a good time to educate you about Lucky 7's. This isn't really a glitch as such, more of a fun easter egg. If your characters current HP lands on 7777, then his/her Status will change for the better.

They will enter into '7777 fever' mode, and will continuously hit for 7777 damage until every enemy is dead (or nearly dead if it's a super boss - the player/s will attack 64 times to inflict 497,728 HP). It's like being in ultimate Berserk mode as you will also lose control of the afflicted player. Once the battle has finished the players HP will have reduced to 1.

One way that people will invoke Lucky 7's is to have run away from 2222

] battles, this will make the Enemy Skill Chocobuckle hit for 2222 HP. Once [
] you've managed to max out your HP (which is 9999), you could then use [
] Chocobuckle on yourself to leave you with bang on 7777 HP. [
] [
] For more ways of setting up All Luck 7's, see section E.18 A. [
] [
] NOTE - Thanks to James Baxter's 7777 FAQ on GameFaq.com, I now have a [
] method for setting up All Lucky 7's with minimal effort! See 'The [
] Super-Duper-Quick And Easy But Long To Explain' method contained [
] within section E.18 A to find out how to use HP Plus's and Magic/ [
] Summon Materia to manipulate your HP accordingly (content of [
] JBaxter's 7777 FAQ has been used with permission). [
]_____[

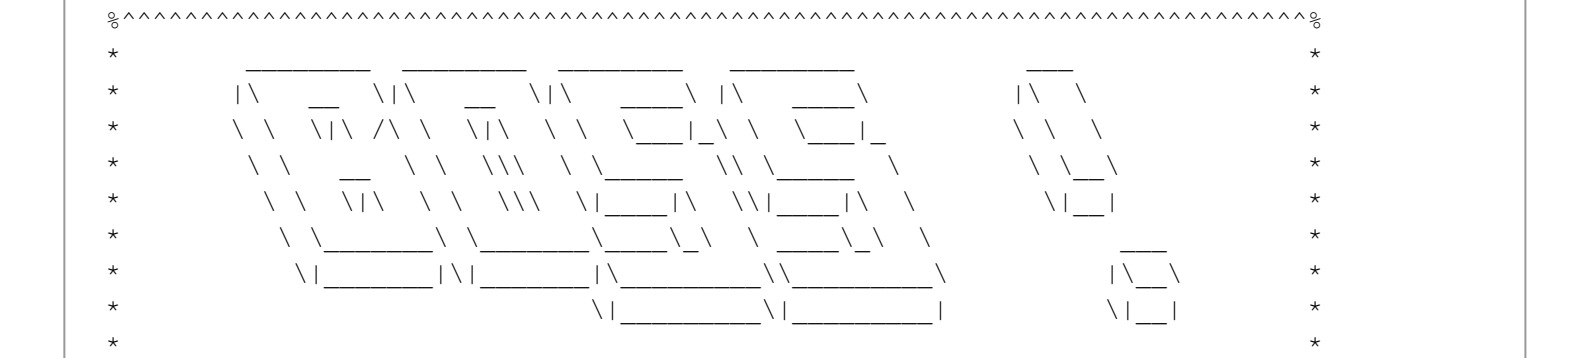
O.K., back to the game. Head all the way back to the crawlspace that you entered from then hold tight, as you progress you'll have to fight the Turks. This is your hardest Turk battle yet, although they still shouldn't pose too much of a challenge, just make sure to have Steal equipped and also take out your Elemental=Lightning combo. Make sure to have Ribbons equipped on everyone aswell, and a few powerful Summons wouldn't go amiss.

DON'T FORGET TO SAVE! Head back through the crawlspace to save your game, you are going to want to gain all of the items up for grabs here, not to mention the battle rewards. When you're ready head back to the Winding Tunnel and head north slightly to engage the Turks.

NOTES - If you've completed Yuffie's sidequest then you'll have the option to not fight them. I advise against this as there are some pretty nifty items that you can steal from them.

- The main reason I equipped Steal as well with Comet2 was for this battle.

- Another pointless glitch - if you were to run around the inside of the support beam (so basically touching it) then you could skip out this boss battle altogether!



TURKS 05	BOSS BATTLE: 34	RUDE IV	RENO IV	ELENA
This will be your final Turk battle, so hit them with everything you've got, not before stealing the [ZIEDRICH], [TOUPH RING] and [MINERVA	Lv:	51	50	53
	HP:	28000	25000	30000
	MP:	250	200	100
	EXP:	5500	4500	6400
	AP:	600	450	800
	GIL:	5000	3000	7000
	STEAL:	Ziedrich	Touph Ring	Minerva Band
	DROP:		Elixir	

```
* BAND] first. Stay    | ---ABSORB: | FRE----- | LHT------- | ICE--------- | *
* away from the basic  | --NULLIFY: | GRV----- | GRV------- | GRV--------- | *
* 3 Elements, other    |____________________________________________________| *
* than that go all                                                            *
* out, just remember to try to kill all three at once. If you deplete on of  *
* the Turks HP then the other two will flee, reducing the amount of EXP etc. *
* gained. Moves such as Bahamut ZERO, Ultima and Comet2 work well.           *
*                                                                            *
* Trying to finish them all off in one go can be a bit of a pain, I suggest  *
* saving Bahamut Zero till the end. Take 5000 from Elena first, then 3000    *
* from Rude to level out their HP. Try to use moves that take out a fixed    *
* amount of damage to each character, such as Aqualung. You may need to do a *
* practise run to see how much Bahamut Zero inflicts; I was hitting for      *
* 9999, so once I estimate their health is in the 4 figure range, boom! 1850 *
* AP!                                                                        *
*                                                                            *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

Once the battle has finished make sure to set up your lightning based attacks once more, the majority of the enemies we face will be weak vs lightning. Now make your way north to reach a the V section. Heading north west would continue on with the story, which we're not quite ready to do just yet. Instead, head north east, and then north west (NE twice would have taken you to a dead-end). Climb the ladder you see here to arrive back at the Shinra HQ.

--D2.13 C - Return to Shinra HQ ("The Sister Ray's not this way!")

--Items - Pile Bunker, Master Fist, Mind Source, Speed Source, HP Shout, Grow Lance, Behemoth Horn

Note that all of the enemies you fight here will be the same as the ones you fought the first time round. Also, you can now encounter enemies on the 63rd Floor, which you couldn't previously. Firstly, if you'd missed the **'Turtle Paradise News No.2'** on the northern billboard on the 1st Floor then now's the time to grab it, you won't get another chance after now.

Next head up to the shop on the 2nd Floor. Remember those two chests that were previously locked? Well now there not, so grab the one on the left for the relatively worthless [PILE BUNKER] for Barret (seeing as we have just picked up the Max Ray), and the oh-so spectacular [MASTER FIST].

```
 ____________________________________________________________________________
]                                                                            [
] SIDE NOTE - TIFA'S MASTER FIST                                             [
]                                                                            [
] Earlier on I told you that Tifa's Powersoul would quadruple in attack      [
] power if she was wearing the Curse Ring. Well the Master Fist will triple  [
] in attack power, and given its base damage this makes it potentially the   [
] strongest weapon in the game.                                              [
]                                                                            [
]       The Master Fist will double in power if Tifa is inflicted with:      [
]             Near-Death, Poison, Sadness, Silence, Slow and/or Darkness     [
]                                                                            [
]       The Master Fist will triple in power if Tifa is inflicted with:      [
]             Death Sentence and/or Slow-Numb                                [
]                                                                            [
] And yes, the effects do stack. So to start off with, equip Tifa with the   [
```

] Curse Ring and then give her a Tranquilizer to send her attack power [
] sky-rocketing. [
]_____[

So, it looks like most of the Shinra HQ is deserted following Diamond WEAPON's attacks, and now we have free reign to do as we please. Well, not quite, we can only go as far as the 65th Floor, above that and we'll get stuck in the stairwell.

NOTE - I find it quite amusing to revisit Hojo's laboratory on the 68th Floor. Even though we can't fully explore everywhere, it is rather comical to find out that no-one has cleaned up since the Sephiroth incident which must have happened months ago.

When you're ready, head to the 64th Floor. If you'd put some gil into the vending machine on your first visit to the Shinra HQ then you could check it now for it to dispense a [MIND SOURCE] and a [SPEED SOURCE].

Now head into the northern locker room. Check the very back wall roughly in the middle to find Cait Sith's ultimate weapon, [HP SHOUT]. As with Cloud's Ultima Weapon, the HP Shout will increase in attack power if Cait Sith's HP is full; at full HP Cait Sith's attack power triples, and 2/3's it doubles and at 1/3 it is normal. Below 1/3 HP and Cait Sith's attack power will be less than normal.

Now head to the 63rd Floor. You'll now find that all of the doors have been lowered, and in the eastern room you be able to grab the [GROW LANCE] for Cid.

Lastly, head down to the 59th Floor. Take the stairwell down once more, and after descending 4 screens you'll come to the [BEHEMOTH HORN]. It's quicker then to run back to the top to then take the elevator back down to the 1st floor seeing as we are now finished with the Shinra HQ, so wave goodbye as it's the last time you'll see it!

NOTE - There is a glitch in these stairs involving the Behemoth Horn not showing. This is due to the way in which the game recognises which screen your on - make sure that you're running from the 59th Floor down, and not from the 1st Floor up. Also, if you missed the Elixir the first time round, you can grab it now.

¬¬¬

```
>                                          #~~~
```

```
* Don't fret, simply cast DeBarrier to   | ------GIL: | 10000--- | 10000-- | *
* remove the effect. Make sure to finish | -----DROP: | Ragnarok | ------- | *
* off Jamar Armor so that you receive    | --NULLIFY: | GRV----- | GRV---- | *
* all of the battle rewards, when Proud  |____________________________________| *
* Clod is finished you'll receive                                               *
* Cloud's [RAGNAROK], which is the 2nd strongest normal growth weapon after  *
* the Flayer! Equip it straight away.                                           *
*                                                                               *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

After obtaining the Ragnarok you can then make your way to Ultimecia's Castle, not before obtaining some GFs first.... Oh wait, wrong Ragnarok, my bad. Simply *equip* the Ragnarok (that was from FF8 btw) then change back to your Elemental=Lightning combos. Note that this is the same screen from the beginning of the game where Cloud jumped onto a moving train to get away from the Shinra after blowing up Reactor No.1 (I believe, anyway).

Head north to find two chests, one containing an [ELIXIR] and another containing the [MYSTILE] which is rated as the best piece of armour in the game. Its defence isn't as high as the Imperial Guard, but remember that magic defence doesn't matter as your Magic Def and Spirit are always identical (unless playing the Steam/PS4 version). The Mystile does have the highest Defence% and Magic Def%, which means your enemies will have a very hard time hitting you.

Make use of the save point here, and *MAKE SURE* to put Barret into your party, that weapon I mentioned earlier is about to be obtained. Note that this is the only screen in which you can fight the Grosspanzer (rated as the best place in Disc 2 for training, but you must kill the Grosspanzer Mobile *last*).

Head up the stairs to have Cait Sith beckon you on, then make your way into the next screen. After one flight of stairs you'll come to the chest containing the [MISSING SCORE], but as mentioned, it'll only appear if Barret is in your party.

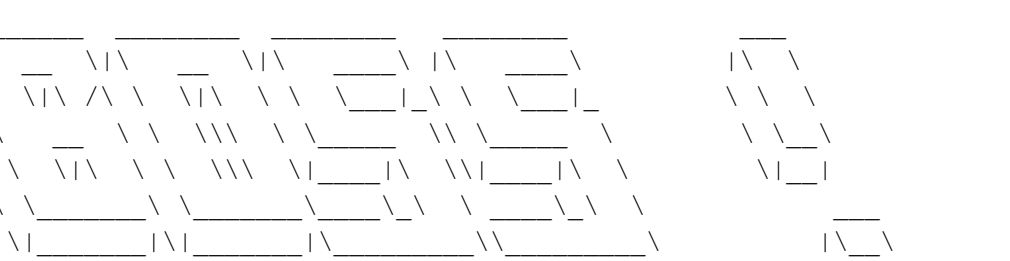
This weapon is only marginally stronger than the Max Ray, which btw has normal growth whereas the Missing Score has 0. But, the more AP you feed into the Missing Score, the stronger it becomes, so lots of mastered Materia would indeed make it stronger (I'm sticking with the Max Ray)! With 640,000 AP equipped to it the weapons damage output would quadruple, with 320,000 AP equipped to it the output would double. Anything less than 160,000 AP and his attack power would be less than normal.

NOTES - Before continuing make sure to steal a Shinra Alpha or two before continuing as this is the only screen in which you'll encounter the SOLDIER:1st in the whole game (other than in Cloud's warped mind).

- There is a glitch involving the Missing Score that enables you to send Barret's damage into overflow. To activate the glitch, you must place 3 mastered Knight of The Rounds on his weapon, then give him 4 Hero Drinks in-battle, and he'll be able to one-hit Emerald (also with Critical & Berserk, Lv 99 & 255 Attack).

Make sure to have Ribbons equipped to all three characters, other than that there's not much preparation needed for the upcoming boss, although feel free to remove your Lightning combo's for anything you like (Summons, etc.).

When you're ready, approach Hojo to talk to him. After an amount if fascinating dialogue you'll have to fight Him!



As long as you have Ribbons equipped you should be fine for this battle. Hojo is fought in three stages:

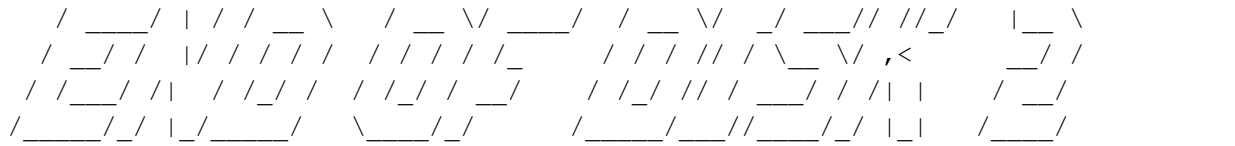
BOSS BATTLE: 36	HOJO	POODLER SAMPLE	BAD RAP SAMPLE	Hojo:
-----Lv:	50---	42-----	34-----	Probably the easiest of the three, Hojo should be defeated in no time. Use this time to cast Big Guard and Regen. When he creates his Bad Raps and Poodlers, cast Bad Breath on them to put them to sleep, then just concentrate on Hojo.
-----HP:	13000	10000--	11000--	
-----MP:	250--	200----	120----	
NULLIFY:	GRV--	-------	-------	

	HELLETIC HOJO	LEFT ARM	RIGHT ARM	Helletic Hojo + Left & Right Arm
-----Lv:	55------	55---	55---	The main thing to do here is to take out the Right Arm as quickly as possible; it has the lowest amount of HP and delivers the strongest blow. After that you can just take care of Helletic Hojo without having to worry about his Left Arm.
-----HP:	26000---	24000	5000-	
-----MP:	200-----	400--	300--	
NULLIFY:	GRV-----	GRV--	GRV--	

	LIFEFORM HOJO	Lifeform Hojo:
-----Lv:	58----------	Just blast him with things like Shadow Flare, Ultima etc. he shouldn't pose too much of a threat, just so long as you are wearing Ribbons. Counter Attack works well here as his 4-hit combo can be countered on every hit.
-----HP:	30000--------	
-----MP:	100---------	
----EXP:	25000--------	
-----AP:	2500---------	
----GIL:	6000---------	
---DROP:	Power Source-	
NULLIFY:	GRV----------	

After Hojo is defeated you will have effectively finished Disc 2! Sit back, relax and enjoy the upcoming events and I'll see you on the other side once you have gained control of Cloud on Disc 3!

NOTE - If Tifa's affection towards you is high enough (+50) then you will experience a very slightly different set of event.



Disc 2 Finished 25/May/2015

,,,

\---/

If you've been following this walkthrough to the letter then there will be three things for you to do now, however if you've been holding off on a few side quests until later on then now's the time to do them. I'll very briefly go over all that there is to do (welcome to Disc 3 btw), for now just resist the urge to descend down the ladder and instead make your way to the cockpit of the Highwind.

LIMITED MOON

Stick Red XIII in your party and make your way up to Bugenhagen's Observatory. You'll watch a few touching scenes, after which you'll receive the [LIMITED MOON], which is Red XIII's ultimate weapon. As with Cid's Venus Gospel, the more current MP Red XIII has, the stronger the Limited Moon will become; with full MP Red XIII's attack power triples, at 2/3's it doubles, and at 1/3 it is normal. Anything below 1/3 MP will result in lower than normal attack power.

NOTE - You should have now completed your collection of Level 4 Limit Break manuals and Ultimate Weapons for each character, if you think you are missing any then check sections E.02 and E.13 (respectively) for a full rundown.

NEW THINGS AT BONE VILLAGE

Now that you're on Disc 3, it's time to go digging at Bone Village. You'd only want to do this if you had missed the Phoenix Materia (as previously advised), the Bahamut ZERO Materia, and/or the W-Item Materia. If you have obtained all four Huge Materias, then you will *not* be able to dig up Bahamut ZERO, even if you had missed out on bahamut and/or Neo Bahamut.

Spot 2 - Good Treasure. Top of the ladders and to the right.
Phoenix Materia (100%, once only), Nothing (100% afterwards)

Spot 3 - Good Treasure. Just to the right of where the foreman sits.
Bahamut ZERO (4%, once only), Nothing (100% afterwards)

Spot 4 - Good Treasure. Base of the ladders and to the left of the 'X'.
W-Item (100%, Once only), Nothing (100% afterwards)

Once you've dug up your first copy of the Phoenix Materia, you can make your way over to Fort Condor. Head out of the open door of the shack, and make your way up to grab your second copy of the [PHOENIX MATERIA].

NOTES - If you are absolutely sure at this stage that you have done every single optional quest available then by all mean you can jump down to section D3.02 - Decent Into Madness.

KEY TO SECTOR 5

Back at Bone Village, ask to search for normal treasure and search just above where they guy at the entrance was digging. This should bag you the Key to Sector 5, allowing you entrance to a small part of Midgar.

4TH ENEMY SKILL

Just north west of Bone Village you'll find the Chocobo Sage's house. Head inside and pet the Green Chocobo to receive the 4th Enemy Skill Materia. Make

sure to buy at least 1 Sylkis Green before you leave.

PREMIUM HEART

Make your way over to Midgar. Using the key you found at the excavation site you should be able to run through the previously locked heavy duty door. Make your way through to the Wall Market and head into the 'ITEM' shop. Examine the previously broken terminal to receive Tifa's ultimate weapon, the Premium Heart.

NOTE - You can talk to the guy who sold you the batteries in the Weapon Shop to buy a Sneak Glove for 129,000 gil. It may seem like a lot, but believe me it's worth it.

KALM TRAVELLER

If you haven't obtained a Guidebook by now then head through Junon's passageways to reach the underwater tunnel leading up to the reactor. Here you can fight the Ghost Ship to morph one into the Guidebook.

Now head over to Kalm where you can trade the guidebook for the Underwater Materia. This will remove the time limit whilst fighting Emerald Weapon.

NOTE - The Earth Harp is obtained by defeating Emerald WEAPON and can be exchanged for a Master Magic, Master Command and Master Summon Materia. The Desert Rose is obtained by defeating Ruby WEAPON and can be exchanged for a Gold Chocobo.

LUCRECIA'S CAVE

Put Vincent in your party and head over to the Gold Saucer Area. If you have a Green, Black or Gold Chocobo then you can look for the enclosed waterfall near Gongaga, if not then you'll have to look for it in your submarine. Enter the cave and you'll learn about Vincent's past. Leave the cave and re-enter after you've fought roughly 10 battles to receive the Death Penalty and Chaos, Vincent's Ultimate Weapon and Lv 4 Limit Break.

BACK OF ITEM SHOP IN COSMO CANYON

If you haven't already grabbed the Full Cure Materia from the back of the Item Shop then do so now, it can be found at the top of the far ladders on the right past the Cosmo Flame. You can also find a pouch containing an Elixir and a Guard Source here.

FLASHBACKS AT THE SHINRA MANSION

Head over to Nibelheim and make your way into the Shinra Mansion. Run down the Hojo's laboratory to view some extra scenes involving Cloud and Zack.

FINAL HEAVEN

Head into Tifa's house in Nibelheim and play the following notes to obtain Tifa's Lv 4 Limit Break, Final Heaven:

X, Sq, Tr, L1+Tr, L1+Sq, x, Sq, Tr, L1+X, O, X, Sq, X

VENUS GOSPEL

Head into Rocket Town and talk to the man standing outside the Item Shop 3 times to receive Cid's ultimate weapon, the Venus Gospel. Don't forget to

grab the Fourth Bracelet and Guard Source from the chests inside the Weapon Shop and Item Shop.

TURTLE PARADISE NEWSLETTERS

If you had missed out on the Newsletter at the Shinra HQ the first time round, and you managed to grab it the second time then now would be the time to claim your reward - one of each of the Sources and a Megalixir. Head over to the Turtle Paradise in Wutai.

DA-CHAO FIRE CAVERN

If you'd obtained the Leviathan Scales whilst you were in the Underwater Reactor at Junon then you could put out the flames in the Fire Cavern in the Da-chao Statue. This would bag you the Oritsuru, a weapon for Yuffie, and the Steal As Well Materia. (I'm going to assume that you've done the Pagoda Side-quest so I'm not even going to bother listing it.)

COSTA DEL SOL

If you haven't done so already, head over to the bar and talk to the man on the left. Buy from him the Long Barrel R which is a weapon for Vincent that has 255 Attack%, meaning he'll rarely miss (this means Deathblow). Also, If you've sold one of your Alls you can buy the Villa for 300,000 gil.

ULTIMATE WEAPON

If you haven't already beaten him then head over to the large crater near Junon, Ultimate should be waiting for you there. Ram into him to fight him, after so many turns he'll flee from battle. You can then chase him all over the map until finally he will rest at Cosmo Canyon, defeat him there to receive Cloud's ultimate weapon, Ultima Weapon.

ANCIENT FOREST

You'll need to have either beaten Ultimate Weapon or obtained a Green, Black or Gold Chocobo to be able to access the forest just east of Cosmo Canyon. See section D2.10 J - Ancient Forest for the full walkthrough.

SUNKEN GELNIKA

If you haven't already visited the depths of despair then see section D2.10 M - The Sunken Gelnika for the full walkthrough.

CHOCOBO BREEDING

NOTE - If you haven't as yet bred a Gold Chocobo then take the time now to make use of the W-Item glitch (unless you find it morally displeasing). Duplicate yourself 99 Sylkis Greens, and while you're at it duplicate 99 Megalixirs aswell.

Here is the whole Chocobo Breeding process in 10 simple steps:

1) Catch 2 Great Chocobos from Mideel Area (alongside 1 or 2 Spirals) making sure they are opposite sex.

2) Feed both of them enough Greens to max out their stats, then race them both at the Chocobo Square until they are both A Class.

3) Head over to Bone Village and battle around until you fight the

Vlakorados, steal 3 x Carob Nuts from them.

4) Now mate the Great Chocobos using a Carob Nut. This should produce either a Blue or Green Chocobo.

5) When they are ready to mate again, save the game and keep trying until you get a Chocobo of opposite gender and breed.

6) Feed the Green and Blue Chocobos to max out their stats, then race them both to A Class. Then mate them using a Carob Nut for a Black Chocobo.

7) Catch a Wonderful Chocobo from the Icicle Inn Area (alongside 1 or 2 Jumpings) making sure it's the opposite gender to the Black Chocobo.

8) Head over to Goblin Island (north of the Chocobo Ranch). Here you can fight the Goblin, steal 1 x Zeio Nut from them.

9) Feed the Black and Wonderful Chocobos to max out their stats, then race them both to S Class (if you can).

10) Now breed the Black and Wonderful Chocobo using the Zeio Nut and Hey' Presto! A brand new chirping Gold Chocobo!

MATERIA CAVES

Once you have a Gold Chocobo you can head over to the Materia Cave near Wutai for the Mime Materia, the Materia Cave near North Corel holds the HP<->MP Materia, the Materia Cave near Mideel holds the Quadra Magic Materia and the Round Island in the far north east corner of the map holds the Knights of Round Materia.

ENEMY SKILL RE-CAP

Just in case you're missing a few here is a copy and paste from the earlier sidequest section D2.05 K - Obtaining Every Enemy Skill Available:

1	MATRA MAGIC	CUSTOM SWEEPER	Midgar Area (Dirt Area only)
2	L4 SUICIDE	MU	Grasslands Area (near Chocobo Ranch)
3	CHOCOBUCKLE	CHOCOBO Lv 16	Grasslands Area (near Chocobo Ranch)
4	BETA	MIDGAR ZOLOM	Marsh (near Chocobo Ranch)
5	FLAME THROWER	ARK DRAGON	Mythril Mine (Northern caverns)
6	WHITE WIND	ZEMZELETT	Junon Area
7	BIG GUARD	BEACHPLUG	Gold Saucer Area (Beaches)
8	AQUALUNG	HARPY	Gold Saucer Area (Chocobo Tracks only)
9	FROG SONG	TOUCH ME	Gongaga Forests
10	????	JERSEY	Shinra Mansion (in Nibelheim)
11	DEATH FORCE	ADAMANTAIMAI	Wutai Beaches
12	MAGIC HAMMER	RAZOR WEED	Wutai Area
13	DEATH SENTENCE	BOUND FAT	Corral Valley (past Bone Village)
14	GOBLIN PUNCH	GOBLIN	Goblin Island

NOTE - All of the remaining 9 Enemy Skills are available at the Northern Crater. If you're thinking 'But there's 24 Enemy Skills', then that's because Trine isn't on this list, nor can it be learnt at the North Crater.

GOLD SAUCER

Perhaps the longest of all things optional to complete, here is a re-cap on everything there is to obtain from the Gold Saucer (always save the best till

last):

NOTE - If you haven't yet obtained all there is to obtain from the Battle Square yet then I suggest waiting until you have obtained the final few bits of Materia from the North Crater (i.e. Mega-All).

Speed Square - Flayer (Optional) - Score 5000+ on the rollercoaster

Battle Square - Enemy Lure Materia - 250 BP
Pre-emptive Materia - 1000 BP
Speed Plus Materia - 4000 BP
Omnislash - 32,000 BP
W-Summon Materia - 64,000 BP
Final Attack Materia - Bonus Round:

After you have obtained Omnislash, W-Summon and Ultima Weapon (Omnislash must be learnt) you will be invited to fight in an optional battle. Defeating this will net you the Final Attack Materia.

Chocobo Square - Enemy Away Materia
Sneak Attack Materia

Winning 19 races with the same Chocobo will net you the Sprint Shoes, Precious Watch, Cat's Bell, Chocobracelet and Counter Attack Materia. Also, try to win as many Counter Attacks and Magic Counters as you can.

Wonder Square - Gil Plus Materia - 1000BP
EXP Plus Materia - 2000BP

You should now be ready to finish the game! Note that you can descend pretty far down into the crater before hitting the point of no return, and you can rest assured that I'll make you aware of that point before you get to it.

{D3.02} - The North Crater

ITEMS:

Save Crystal	Elixir	Shield Materia
Guard Source	Remedy	Imperial Guard
Guard Source	X-Potion	Hero Drink
Mind Source	Turbo Ether	W-Magic Materia
Magic Source	Vaccine	Counter Materia
Elixir	Magic Counter Materia	Mystile
Power Source	X-Potion	Elixir
HP Absorb Materia	Turbo Ether	Speed Source
Mind Source	Mega All Materia	Tetra Elemental
Megalixir	Speed Source	Megalixir
Hero Drink	Magic Source	Megalixir
Guard Source	Remedy	Luck Source
Power Source	Vaccine	

<~~~~~~>
|\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../|
\---/

¬¬¬

to offer is the Emerald and Ruby WEAPON quests. Technically speaking, as far as super-mega bosses go they aren't that hard to defeat, they just require A LOT of preparation. More on that to come.

Before descending you are going to want to set up a party, and this time you don't have a say in who you bring. You HAVE to bring along Cait Sith and Barret. The reason being is that we'll be able to (legitimately) duplicate some of the items that are obtainable down below, but to do this we must have certain players 'not' in our party. It'll make more sense later on, just trust me for now, my set-up is as follows:

1) Cloud - Lv 61 (Front)

Ragnarok - Elemental=Typoon, Enemy Skill, Double Cut, MP Turbo=KOTR
Dragon Armlet - All=Restore, Sneak Attack=Mug, EXP Plus, HP Plus
Safety Bit

2) Barret - Lv 55 (Back)

Max Ray - Elemental=Alexander, Steal as well=Deathblow, Enemy Skill, Manipulate
Wizard Bracelet - Added Effect=Destruct, Added Cut=Deathblow, Morph,
Ribbon Sense, Luck Plus, HP Plus

3) Cait Sith - Lv 54 (Front)

Starlight Phone - Elemental=Choco/Mog, Final Attack=Revive, Quadra Magic, Magic Counter, Enemy Skill, Enemy Skill
Mystile - Mime, Mug, W-Item, Slash-All, Speed Plus, HP Plus
Safety Bit

NOTES - Make sure to have two identical Enemy Skills equipped to one character. If one Enemy Skill has learned a move that the other hasn't, then the skill won't be learned.

- Quadra Magic can be a pain to master 2 copies of, so I suggest equipping it now for the AP. Same goes for KOTR (Knights of The Round), and Magic Counter (if you were able to obtain one from the Gold Saucer).

Before heading down the rope ladder, head into operations to restore your HP/MP and save. To access the North Crater you must hover the Highwind over it and press cancel to descend into the realms of insanity.

Once you've climbed down the rope ladder, head south. When prompted to, choose 'let's go' to descend into the crater. In the next screen, you could head through then opening to return to the Highwind if you wanted to, otherwise open the chest for the [SAVE CRYSTAL].

NOTES - The Save Crystal can be used anywhere within the North Crater to create a save point in a location of your desire. It can only be used once, and I strongly recommend using it near the screen where you encounter the Magic Pots and Movers. I'll explain why shortly.

- The Save Crystal can be duplicated using an exploit, see section E.18 for more info.

- THERE IS A GLITCH that sometimes occurs when you use your Save Crystal, involving you being unable to escape from the North Crater for good, so *be sure* to save into a new file when you do use it!!!

Now make your way anti-clockwise until you come to a chest containing a

[GUARD SOURCE]. Keep proceeding downwards until you come to the next screen (don't forget to manipulate the Dark Dragon to learn Dragon Force and Laser, and the Parasite to learn L5 Death and Magic Breath).

Head right first and keep dropping down until you reach a chest containing a [GUARD SOURCE]. Then drop down even further for a [MIND SOURCE].

Now make your way left and climb up the ridges to reach the visible chest containing a [MAGIC SOURCE]. Keep heading up for two more chests, one containing an [ELIXIR] and the other a [POWER SOURCE].

Notice the blue orb embedded into the rocks? Before jumping down from the Power Source chest run behind the rocks to grab the [HP ABSORB MATERIA]. Now you can descend to the next screen (it's quicker to climb back up and head to the right).

Drop down from the ledge then head to the right. Drop down to reach a chest containing a [MIND SOURCE]. Then inch to the right, but before dropping down jump up to the left. Follow the path to drop down to the other side, then enter into the cave to find a chest containing a [MEGALIXIR].

Back out of the cave and drop down on the left. Then head to the right to open the chest containing a [HERO DRINK].

Now head into the cave and open the visible chest for a [GUARD SOURCE]. Then head upwards and enter the hole you see to find a chest containing a [POWER SOURCE]. Now head out of the northern exit.

Head over to the right and drop down twice. Go through the opening to enter the cave once more, then head south through the opening. Keep dropping down until you come to the next screen, which will be a meeting point for you and your buddies.

We have now come to the infamous left & right fork option of the North Crater. It is here that you will have the choice to send your squad in different directions, and as your teammates go off in their respective directions they will pick up various items for you long the way.

NOTE - I have always used my Save Crystal here when playing as a kid. *DO NOT* I repeat *DO NOT* use it here.

SIDE NOTE - THE {LEFT AND RIGHT FORK}

You now have two paths to choose from, the right path, and the left path. If you choose to take the left path, then you will have another two paths to choose from (upper-left and lower-left). You also have to choose which path to send your teammates on, and depending on which route you sent them on will depend on the items that they obtain, which can then be duplicated. The results are as follows:

NOTES - If you travel the same route that you send a teammate on then that teammate will not collect any items on that route for you, meaning you cannot duplicate that item.

- If you send Yuffie on her own, then she will not hand over any Materia to you that she found. Always send her with someone else.

| * = Unique Item | Right Path | Upper-Left Path | Lower-Left Path | Optimal |

Tifa	*Mystile	Hero Drink	Turbo Ether	Right
Barret	Guard Source	Vaccine	Remedy	Right?
Red XIII	Mind Source	*Shield Materia	Speed Source	U-Left
Yuffie	Megalixir	*Counter Materia	Vaccine	U-Left
Cait Sith	Elixir	Remedy	X-Potion	Right?
Cid	Speed Source	*Imperial Guard	Elixir	U-Left
Vincent	Megalixir	Magic Source	*Mega All Materia	L-Left

If you receive a Megalixir from Vincent or Yuffie, the dialogue box will incorrectly display "Received Last Elixir".

The main problem here is Vincent. You're going to have to make a choice on whether you want to lose a duplicate of the Mega All Materia, the Imperial Guard or the Mystile.

Mega All - This will make nearly very attack you perform hit every enemy, including Deathblow, Morph even your basic attacks! But to be honest, as long as you have one other person with Slash-All and the other with Mime, you don't really need to duplicate this item, especially seeing as you can master it for a second and third copy.

Imperial Guard - This piece of armour has the highest defence in the game to have 6 Materia slots, and as such is definitely worth getting a second and third copy now (assuming you obtained your first copy by fighting the CMD. Grand Horn earlier on at the Fort Condor Huge Materia mission).

Mystile - Regarded as the best piece of armour in the game, this little beauty gives you amazing Defence% and Magic Def%, meaning the enemies will have a very difficult time attacking you. Make sure to send Tifa right and to not travel that way yourself.

To conclude, you're going to want to send your characters as follows:

Tifa - Right - Mystile
Red XIII - Upper-Left - Shield Materia
Yuffie - Upper-Left - Counter Materia
Cid - Upper-Left - Imperial Guard
Vincent - Upper-Left - Magic Source

So, you're going to want to send everyone along the left path with the exception of Tifa (who travels the right path alone), and then at the second fork you're going to want to send everyone along the upper-left path with the exception of Cloud, Barret and Cait Sith, who travel along

] the lower-left path.   [
]   [
] If you're feeling incredibly brave you could send Barret and Cait Sith [
] with Tifa along the right path and then travel alone for an extra Guard [
] Source and Elixir, but c'mon, it's really not that worth it. Also, make [
] sure not to progress past a certain point up ahead as you'll lose the   [
] ability to duplicate the items.   [
]   [
] NOTE - If you were to travel along the right path then anyone you sent [
]   left would have a 50% chance of taking the upper-left or lower- [
]   left path.   [
]____[

So, after sending Tifa right (by herself) and after everyone else left, head to the left path yourself. Then send everyone else on the upper path leaving Cloud, Barret and Cait Sith on the lower path.

NOTES - If you are playing on the Steam/PS4 version then a small easter egg will occur when you create your save point in this cavern (the room with the second fork). The area will be titled as 'Secret Cow Level' in the menus, which is a reference to the game Diablo. When you leave then reenter the area, the name will revert back to default. I advise on saving your Save Crystal for a little later.

- I had to mention this. A very funny post left by Silver_Dragon_ on GameFaq message boards reads:

Cloud: "Let's split up into 2 teams. Team 1 will consist of myself, Barret, Red XIII, Yuffie, Cait Sith, Vincent and Cid. Team 2 will consist of... Tifa." lol

¬¬¬

| on the upper and lower left-paths apart from the two 'swampy' areas on the |
| upper-left route. |
+---+

--Items - Elixir, Remedy, X-Potion x 2, Turbo Ether x 2, Vaccine, Magic
Counter Materia, Mega All Materia, Speed Source

After jumping down the rocks head over to the right to pick up a chest containing an [ELIXIR]. Then head over to the left for a chest containing a [REMEDY], and finally search the third chest at the bottom of the screen to find an [X-POTION] inside. Now head south to the next screen.

Run straight down to jump off at the end of the raised circular platform to land to the right of the chest containing a [TURBO ETHER]. If you jumped off early and landed above the chest then you can make your way round to the chest following the right path, otherwise head to the right for another chest holding a [VACCINE].

Now head over to the Lifestream waterfall, and on the very left you should just be able to make out the [MAGIC COUNTER MATERIA], although it is very difficult to spot. GRAB THAT MATERIA! and start Leveling it up straight sway!

Follow the path to the next screen, then jump down do grab an [X-POTION]. Keep following the path round until you grab the chest containing a [TURBO ETHER] (who puts all the chests down here anyway?).

For this next bit you have to time when you press confirm in order to GRAB THAT MATERIA! the [MEGA ALL MATERIA] that you see floating in front of the Lifestream waterfall. Just before you hear the first footstep sound effect, press confirm. Once you've obtained it, pick up the chest on the left for a [SPEED SOURCE].

```
 _____________________________________________________________________________
]                                                                             [
] SIDE NOTE - MEGA ALL MATERIA                                                [
]                                                                             [
] Attack becomes Slash-All whilst Mug/Steal, Sense, Manipulate, Morph and     [
] Deathblow will now hit all targets. Also, every magic spell will now hit    [
] all targets so long as the magic spell is compatible with All.              [
]_____________________________________________________________________________[
```

I swapped Barret's Sense for the Mega All, this really is one of the best Materias in the game. Now head through to the next screen and *STOP! TURN AROUND* and head back the way you came until you come to the second fork, then take the upper-left path saving along the way.

NOTES - If you were to have headed clockwise around the Bottom of the Northern Cave area you would have triggered your allies to join you. This would subsequently remove the items from the field, but only *after* you've received the items from them, and *only* the item that they give you is removed, as you receive it.

- BUT! If you were to trigger your comrades to join, then head back up to the top fork *before* receiving their items, they will *not* hand anything over.

- You must have entered into this final bottom screen (where the music stops) before making your way back up.

--D3.02 C - The Upper-Left Path ("We'll leave this to Cid.")

NOTE THE FIRST TWO SCREENS ARE BY FAR THE BEST PLACE IN THE WHOLE GAME TO TRAIN!

ENEMIES:	MOVER	MAGIC POT	CHRISTOPHER	MASTER TONBERRY
Lv:	59	41	34	45
HP:	3000	4096	6000	44444
MP:	120	128	200	100
EXP:		8000	1300	6000
AP:	800	1000	80	200
GIL:	30000	8500	800	6800
STEAL:	Turbo Ether		Earth Drum	Elixir
MORPH:	Protect Ring			Ribbon
DROP 1:	Turbo Ether	Turbo Ether	Phoenix Down	Megalixir
DROP 2:			Ether	
NULLIFY:				GRV
HALVE:	FRE ICE LHT ERT			
E-SKILL:			FROG SONG	

	ALLEMAGNE	GIGHEE
Lv:	48	34
HP:	8000	5500
MP:	200	100
EXP:	1300	700
AP:	100	60
GIL:	1360	600
STEAL:	Eye Drop	Elixir
DROP:	Eye Drop	Ether
NULLIFY:	ERT	
DOUBLE:	WND	

NOTE ON ENEMIES:

The enemies listed above can only be fought on the first two screens as you enter the upper-left path. The movers, although rare come in groups of 3, offering 2400 AP per battle! Combine that with a triple growth weapon and you're talking 7200 AP, which is absolutely ridiculous!!!

The Magic Pots also give out high amounts of AP too but cannot be touched until you have fed them an Elixir (which you can steal from the Gighee, Master Tonberry, or just use the W-Item trick), but not a Megalixir. Be very wary of their counter attacks in which they will steal one of your precious items (such as your ultimate weapons etc.) then disappear from battle completely, losing the stolen item forever.

Be wary of the Allemagne; they will sometimes us L3 Flare as a counter to magical attacks, and if you're not careful this move could wipe out your whole team.

--Items - Magic Source, Remedy, Vaccine, Shield Materia, Imperial Guard, Hero Drink, W-Magic Materia, Counter Materia

NOTE - If you hadn't visited the screen at the bottom of the crater then you will not be allowed to visit the upper-left area. Cloud will simply say "Cid will handle this" (or whichever party member you sent down that path).

It's in these first two screens that you'll be spending a fair amount of

time grinding in. Just remember to save every few battles or so, there's nothing worse than having a Magic pot steal one your most valuable weapons, forcing you to re-load your previous save, unless of course you've been saving regularly. Note that you cannot PHS whilst in the North Crater.

NOTES - I advise on using your Save Crystal in the first screen, near the entrance. *SAVE INTO NEW SLOT* to avoid the glitch as previously mentioned, and also just in case you sent somebody the wrong way by mistake.

- You'll be interested to know that the first screen actually has a higher encounter rate than the second, so if you do come back here to train later on then that's the screen to run around on!

First head right and jump over to the visible chest for a [MAGIC SOURCE], then head to the left and jump up to the slightly raised area. As you run north you'll dive into the water, emerging on the pathway to the right. follow the path round to the left for a chest containing a [REMEDY].

Now make your way east to the next screen. As you enter, head north west first to the far chest containing a [VACCINE]. Then head round to the rock face and GRAB THAT MATERIA!, the [SHIELD MATERIA] that you see sitting there.

From the rack face, head south west to dive into the water again, you will emerge at the nearest chest which contains the amazing [IMPERIAL GUARD]. Dive back into the water then climb the rock face to the top (or alternatively dive into the water from the other side to emerge near the exit).

Now head back to the middle fork this time heading right to a chest containing a [HERO DRINK]. Then make your way north and east to the next screen.

Just to the north beneath the undergrowth you should be able to make out the purple orb, this is the [W-MAGIC MATERIA]. Now head to the left but before going through the opening, head down to the centre of the glowing Lifestream to pick up the [COUNTER MATERIA]. This is the last piece of Materia in the game. GRAB THAT LAST MATERIA! You still have the 'Master Materia' to obtain, but they are not obtained through conventional means; more to follow.

NOTE - (Command) Counter is a support Materia that can be linked with moves such as Mug, Morph, Deathblow etc. I suggest equipping with Deathblow right away.

You don't need to head through the opening on the left as it will lead down to the bottom of the Northern Cave area, so instead turn around and start making your way back to the initial fork, this time taking the right path (saving along the way).

--D3.02 D - The Right Path ("We'll leave this to Tifa.")

```

NOTE - Ok, so I've read a few reports saying that the Dragon Zombie will very un-occasionally use Pandora's Box a second time, I've also read reports saying that it's never used it because he was defeated too quickly on the first encounter, and they were never able to complete their Enemy Skill Materia on that play-through. These are all false; it is scripted into the enemy AI for Pandora's Box to be used as a finishing move *every time you encounter it*, UNLESS the 'Pandora's Box' flag is highlighted. This flag is highlighted automatically after the move is cast the first time, thereby making it impossible to be used again. It IS possible for the Dragon Zombie's skill power to be used up; if this happens, reload.

--Items - Mystile, Elixir, Speed Source, Tetra Elemental, Megalixir x 2, Luck Source

First make your way down the spiralling path to the next screen. When prompted, jump down to the landing below. First open the chest on your left for the [MYSTILE], then grab the [ELIXIR] on the right. I suggest equipping the Mystile straight way.

Keep spiralling your way down to the next screen to grab the visible chest containing a [SPEED SOURCE] (it seems as though the North Crater is the 'source' for Sources, aside from the Gelnika that is). Now head over south east for a chest containing the [TETRA ELEMENTAL]. Tetra Elementals can also be morphed from the Cactuer on an island south of Cosmo Canyon.

Now head north until you come to a chest containing a [MEGALIXIR].

Then run south slightly, and head all the way west to reach another chest containing a another [MEGALIXIR], then make your way back east and then north to the next screen.

NOTE - There should only be four enemies left to obtain Enemy Skills from, see the enemy listings above. By the time you reach the 'meeting point' in the bottom screen you should have obtained all Enemy Skills!

Make your way down the huge bone structure until you come to the bottom of the northern cave area once more. As you make your way round, pick up the [LUCK SOURCE] from the chest. You've now finished collecting all the items from the North Crater, hoo-rah! Head clockwise around the opening to trigger your comrades to appear.

NOTE - Interesting fact, if you had decided to leave the crater and return to the Highwind prior to reaching the final screen, when you returned to the left and right fork, you would be able to re-select which paths you wanted to send everyone down. If however you'd decided to return to the Highwind *after* you'd reach the final screen (but before triggering everyone's appearance), then it would mess with the games mechanics slightly. When you did triggered everyone's appearance, the game would think that Cloud has travelled the right path, and sent everyone else left. You would then receive an item from each character (even the ones that travelled with you), and each item would have a 50/50 chance of being an item from the upper left path or the lower left path, regardless of which path you initially sent them down.

Now is the time to collect all of your duplicated items. If you've done everything correctly then you can talk to:
Cid for the Imperial Guard

Tifa   for the Mystile (although it'll read 'Mythril')
Red XIII for the Shield Materia
Vincent for the Magic Source &
Yuffie   for the Counter Materia (although she'll be very reluctant to hand
                                  it over)

DO NOT CONTINUE. YOU ARE NOW AT THE POINT OF NO RETURN

 NOTE - A glitch would have occurred if you had sent Cait Sith down the lower-
        left path; he would have handed over an X-Potion, although the Turbo
        Ether would have been removed from the field.

You are now going to want to make the long ascent out of the North Crater so
that you can PHS. The upcoming boss battle will be very unique in the sense
that you will be able to use more than one party whilst fighting it, so
you're going to want to set-up everyone beforehand (although you will get
another opportunity to later on, it's just easier to do it this way. Besides,
I'm itching to get Cait Sith out of my party now).

 NOTE - You actually have a choice to make. You can either finish the game
        now at a level where Sephiroth will still pose a challenge, THEN you
        can re-load your save to finish grinding for 99,999,999 gil, raising
        Cloud to level 99 and defeating Emerald and Ruby WEAPON. OR you can
        skip down to section D3.04 - The Final Grind now to do all the above
        and then come back to finish the game when you will be ridiculously
        over-powered, but for the sake of continuity I'd advise finishing the
        game now.

¬¬¬

Bizarro Sephiroth will either be fought with one, two or three parties, and the more parties you fight with, the tougher the challenge will be. The following conditions will determine how many parties are chosen:

If ANY one of the following occurs then it'll be a ONE party battle:

- Jenova-Synthesis managed 13 turns before she activated the Ultima countdown.
- The lowest levelled player is level 34 or lower.
- The average level is level 53 or lower (add up every characters level then divide by the amount of characters, rounded down).

NOTE - Aeris's level does not factor into any of these figures, nor will Yuffie's and/or Vincent's had you not obtained them.

If you DON'T meet the criteria for a one party battle but ANY one of the following occurs then it'll be a TWO party battle:

- You have failed to obtain either Yuffie or Vincent (or both).
- The lowest levelled player is level 44 or lower.
- The average level is level 67 or lower.

All of the following must occur for it to be a three party battle:

- Yuffie and Vincent must have been obtained
- Jenova-Synthesis managed 12 turns or less before she activated the Ultima countdown.
- The lowest levelled player is level 45 or higher.
- The average level is level 68 or higher.

I worked out that my average level was 61 at this stage, so I decided to place my lowest levelled characters in my party and train until my average level was 68 seeing as I enjoy the more difficult version of Bizarro-Sephiroth. Magic Pots, Master Tonberrys, Dark Dragons, Scissors and Dragon Zombies all give out high amounts of EXP, don't forget to equip the EXP Plus Materia also.

NOTE - It is completely optional whether or not you train to get your average level up to 68 or not, just bear in mind that if you are going to train then you're going to want to start to think about which Materias you want mastering. Concentrate on the following:

Revive	(Lv 2)	x 3	Mime		x 3*
Added Effect		x 3	Morph		x 3*
Quadra Magic	(Lv 5)	x 2*	Counter Attack	(Lv 5)	x 9
Final Attack	(Lv 5)	x 3	Hades		x 3
Magic Counter	(Lv 5)	x 3*	HP Plus	(Lv 5)	x 8
Sneak Attack	(Lv 5)	x 3	Mega All	(Lv 5)	x 3
Counter	(Lv 5)	x 3	Knights of Round	(Lv 5)	x 1*

* = Equip on a triple growth weapon.

I'll go into more detail as to the exact reasons for the above choices a little later on, for now don't be afraid to use Rune Armlets if you really want some decent AP!

Once I had met the criteria for a three party battle I set my three teams up as follows (you may need to head over to Fort Condor to buy a few pieces of Materia):

TEAM 1:

1) Cloud - Lv 77 (Front)

Enemy Skill, Double Cut
Ultima Weapon - All=Restore, Steal as Well=Deathblow, Sneak Attack=Mug,
Mystile - Counter=Deathblow, Counter Attack, Magic Plus,
Safety Bit HP Plus, MP Plus

2) Yuffie - Lv 65 (Back)

Speed Plus, HP Plus
Conformer - Added Cut=Deathblow, Enemy Skill, Mime, EXP Plus, Luck Plus,
Mystile - Added Effect=Odin, Counter=Deathblow, Counter Attack,
Champion Belt Mega All

3) Cid - Lv 68 (Front)

Venus Gospel - All=Time, All=Heal, Final Attack=Revive, MP Turbo=Comet,
Imperial Guard - Added Effect=Destruct, Slash-All, HP Plus, Bahamut ZERO,
Ribbon Knights of Round

TEAM 2:

1) Barret - Lv 68 (Back)

HP Plus, Neo Bahamut
Missing Score - All=Barrier, HP Absorb=Deathblow, W-Item, Counter Attack,
Ziedrich -
Champion Belt

2) Tifa - Lv 67 (Back)

W-Summon, Bahamut ZERO, Hades
Premium Heart - HP Absorb=Ultima, Full Cure, Revive, Enemy Skill,
Mystile - Magic Counter=Contain, Long Range, Magic Plus, HP Plus,
Ribbon MP Plus

3) Red XIII - Lv 63 (Front)

HP Plus
Limited Moon - All=Restore, All=Ice, Quadra Magic=Ice, Deathblow,
Ziedrich -
Sprint Shoes

TEAM 3:

1) Vincent - Lv 64 (Back)

HP Plus, Phoenix
Death Penalty - All=Restore, Enemy Skill, Deathblow, Mug, Counter Attack,
Ziedrich -
Ribbon

2) Cait Sith - Lv 67 (Front)

Typoon, Alexander
HP Shout - All=Restore, Revive, Deathblow, Counter Attack, MP Plus,
Imperial Guard - Elemental=Gravity, All=Lightning,
Sprint Shoes Magic Counter=Lightning

NOTE - Don't forget to use your Sources as appropriate.

This set-up should see you back through the North Crater and all 4 bosses without having to change anything. You may want to change to normal growth weapons for your descent, but any AP gained after the save point will be lost, so switch back to your ultimate weapons after saving.

--D3.03 B - Inside The Planet ("All right, everyone, let's mosey.")

NOTE ON ENEMIES:	ENEMIES:	IRON MAN	DRAGON ZOMBIE	ALLEMAGNE
Not that it matters now but you can still learn the Enemy Skills Pandora's Box and Shadow Flare if you haven't already (heavily assuming that you haven't already permanently lost Pandora's Box). Use Aqualung on the Iron Man, or alternatively use Leviathan.	Lv:	46	54	48
	HP:	20000	13000	8000
	MP:	100	400	200
	EXP:	10000	4000	1300
	AP:	150	300	100
	GIL:	600	2800	1360
	STEAL:	Elixir	Cauldron	Eye Drop
	MORPH:	Escort Guard	Vaccine	
	DROP 1:	Phoenix Down	Cauldron	Eye Drop
	DROP 2:		X-Potion	Eye Drop
	ABSORB:		RES	
	NULLIFY:			ERT
	HALVE:	ERT ICE FRE		
	DOUBLE:	WTR	HLY	WND
	E-SKILL1:		PANDORA'S BOX	
	E-SKILL2:		SHADOW FLARE	

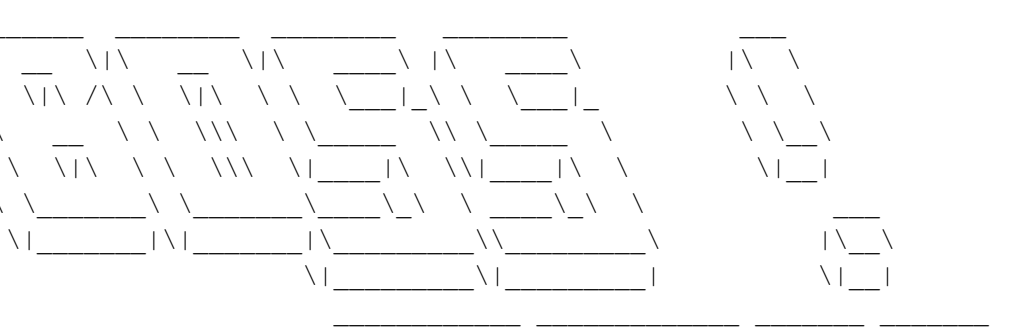
--Boss - Jenova-Synthesis Lv 61

Make your way back down to the bottom of the northern cave, when prompted choose 'Let's get going' to head past the point of no return. After an amount of dialogue you'll find yourself jumping down a series of floating platforms.

Every time you jump on a platform you will have a 28.91% chance of fighting an enemy, and there are 3 enemies to fight. The chance of fighting each enemy is as follows:

1 x Iron Man - 50%
1 x Dragon Zombie - 39.84%
1 x Allemagne - 10.16%

There are 13 platforms in total, once you have reached the bottom remember to use a Megalixir then jump to the final landing. Here you will be attacked by Jenova-Synthesis.



Start the boss battle as you would any boss battle, by

* casting Big Guard and also | BATTLE: 37 | SYNTHESIS A | ARM B | ARM C | *
* Dragon Force/Shield , then |_____________|_____________|_______|_______| *
* pummel her with everything | | | | | *
* you've got. Take out the two | -------Lv: | 61--------- | ----- | ----- | *
* tentacles first, eventually | -------HP: | 60000------ | 10000 | 8000- | *
* they will get revived by the | -------MP: | 600-------- | ----- | ----- | *
* main body and when that | ------EXP: | 60000------ | ----- | ----- | *
* happens just take them out | -------AP: | 500-------- | 500-- | 500-- | *
* again. Once you've depleted | ---ABSORB: | PSN-------- | ----- | ----- | *
* her health to 15,000 she'll | --NULLIFY: | ERT-------- | ----- | ----- | *
* begin a countdown timer which | ----HALVE: | GRV-------- | ----- | ----- | *
* will last 5 turns. If you |____| *
* haven't destroyed her in that *
* time then she will cast Ultima, then her health will drain to 0 ending the *
* battle. You will not receive any EXP this way (which may affect the amount *
* of parties you go into the next battle with). All in all, this really is *
* an easy battle. *
* *
* NOTES - If you cast Knights of the Round then you will grant Bizarro- *
* Sephiroth an additional 60,000HP and Safer-Sephiroth an *
* additional 80,000HP! If you fancy a challenge, then by all means *
* use KOTR to finish Jenova-Synthesis off in one hit, making the *
* next two boss battles that much harder. *
* *
* - If you fail to drain Jenova's HP to 15,000 within 13 turns *
* (meaning she won't have started the countdown) then you will be *
* forced to go into the next boss battle with one party only. *
* *
* - The Left and Right arm do not have their own ATB; all of the *
* attacks come from Jenova herself. *
* *
%^^%

After Jenova-Synthesis has been defeated you'll sink further into the planet.

¬¬¬

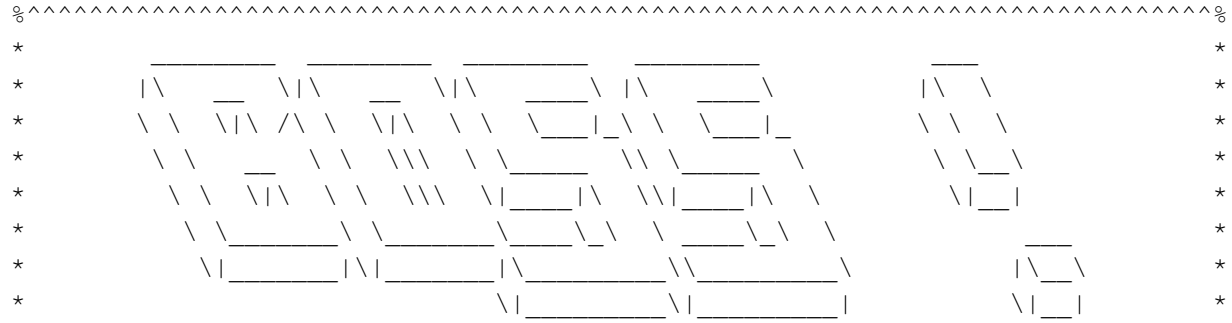
information should clarify everything:

Additional HP per character at level 99	1 PARTY	2 PARTIES		3 PARTIES		
		Team 1	Team 2	Team 1	Team 2	Team 3
Main Body	5000	5000	5000	5000	4000	3000
Head	250	250	250	250	250	250
Core	1250	1750	1500	2000	1500	1500
Right Magic	500	750	750	1000	1000	1000
Left Magic	500	500	500	1000	750	750

The Main Body will also receive an additional 60,000 HP (Team 1 only) if Knights if the Round was used on Jenova-Synthesis, giving Bizarro Sephiroth a minimum total HP of 60,000 and a maximum total HP of 208,000.

When using various teams, the Right Magic/Left Magic may change to Right Shoulder/Right Arm or Left Shoulder/Left Arm respectively, depending on the POV of the team.

/>~~~~~~~~~~~~~<\
|> 1 PARTY <|
\>~~~~~~~~~~~~~</



BOSS BATTLE:	38 A	BIZARRO-SEPHIROTH

	MAIN BODY A	HEAD B	CORE C	RIGHT D	LEFT E
---------Lv:	61---------	-------	---------	--------	--------
-----MIN HP:	40000------	2000---	10000----	4000----	4000----
-----MAX HP:	140000-----	4000---	20000----	8000----	8000----
---------MP:	400--------	-------	---------	--------	--------
-----ABSORB:	----------	-------	---------	LHT--ICE	FRE--ERT

Again, a more complicated strategy is required when using three parties as opposed to one or two party/ies. To begin with, start damaging the Left and Right Magic (D & E), then switch over to the other team when prompted. You must then defeat the Cores on the outer sides using your back up parties. To do that you must first defeat the Shoulder and Arm to remove the Core's invulnerability. Once the Core has been destroyed for the 2nd party switch to the 3rd party to destroy the Shoulder and Arm there, and then destroy the Core (don't switch to party 3 until the core for party 2 has been destroyed). Once the two 'outer' Cores have been destroyed you can then switch back to Cloud's party to destroy the third and final Core (not before taking out the Left and Right Magic), thus enabling you to damage the Main Body with team 1.

The Core is required to be defeated before you can start attacking the Main Body as the Core will heal the Main Body every turn for roughly 7000 HP, so trying to defeat the Main Body before the Core will be very difficult (but not impossible). Just focus on big attacks whilst keeping your Big Guard and HP topped up. You can destroy the Head if you want to, but it'll just rejuvenate itself eventually. Slash-All, Summons, Comet2, Pandora's Box and Ultima work very well here, the battle will end when the Main Body is destroyed.

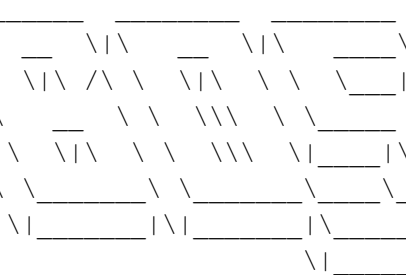
Wow, that was by far the hardest boss of the game to try to have to explain. the next boss should be far simpler, and will take place straight after this one has finished.

Every character that is at level 99 will boost Safer-Sephiroth's HP by 30,000, aswell as Attack by 2, Defence by 20, Magic by 5 and Magic Defence by 16. Also, if Knights of the Round was used on Jenova-Synthesis then Safer's HP will be boosted by an additional 80,000.

Lastly, every time that you were able to destroy the Head of Bizarro, Safer's current HP will be reduced by 100, up to a maximum of 24,900 HP. This gives Safer-Sephiroth a Max HP range between 80,000 and 400,000 HP, although his starting HP could be as little as 55,100.

NOTE - This third battle is technically considered the final battle of the game seeing as the fourth battle isn't really considered a battle as such, but more of an ending. In other words, go all out on Safer-

Sephiroth and don't hold anything back!



SAFER-SEPHIROTH	BOSS BATTLE:	39
Safer's MP will replenish after every turn, meaning it'll never deplete. Cast a Megalixir to begin with if your players are beaten up from the last battle, then cast Slow on Safer Sephiroth. Follow up with the usual dose of Big Guard, then use Reflect (or use a Mirror if you have one) followed by Dragon Force twice on every one.	---------Lv:	87------
	-----MIN HP:	80000---
	-----MAX HP:	400000--
	---------MP:	680-----
	----NULLIFY:	GRV--ERT

Whilst two people stay on the defensive for the first few turns, have one person go on the offensive. This boss has a very predictable pattern which it will repeat over and over again until the battle ends, making this penultimate battle not so difficult:

Turn 1: Alternates between Wall and DeSpell. He'll usually start by casting Wall on himself, then on the next cycle he'll cast DeSpell on your party. If he is under Slow then he will always cast DeSpell on himself.

Turn 2: If he used Wall on his previous turn then he'll use Shadow Flare. If he used DeSpell on his previous turn then he'll use Deen.

Turn 3: Physical Attack.

Turn 4: He will become airborne, meaning only long-ranged players can attack him.

Turn 5: He will use Pale Horse. This will cause Sadness Frog & Small, aswell as taking out roughly 2500HP.

Turn 6: He will use Super Nova. This will cause Confusion Silence and Slow, aswell as taking out 15/16th's of everyone's HP.

Turn 7: If Safer's HP is above 25% then he will cast Break.
If Safer's HP is below 25% then he will cast Heartless Angel.

Turn 8: He will land back on the ground, no longer being long-ranged.

So you can use DeBarrier to void his Wall and then cast Slow on him afterwards. I can't stress this enough, keep your HP topped up as Shadow Flare can wipe out one of you characters in one hit. Use your strongest moves such as Bahamut ZERO, Comet2, Shadow Flare or just even 4xCut (or 2xCut if you haven t unlocked it yet).

%^^%

Once you have defeated Safer-Sephiroth you will be back at the base of the North Crater. After watching some CGI you will find yourself in one final battle with Sephiroth, and this battle is impossible to lose.

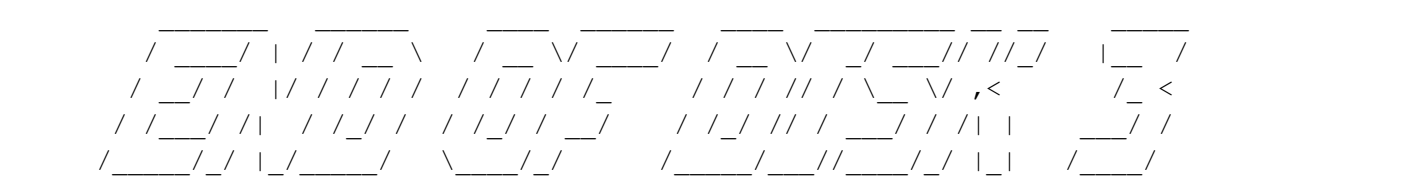
* | | | | | *
* | SEPHIROTH | | BOSS BATTLE: | 40 | *
* |____| |_______________|____________| *
* | | | *
* As previously mentioned, this battle is | ---------Lv: | 50------ | *
* impossible to lose. As soon as the battle | ---------HP: | 1------- | *
* begins Cloud's Limit gauge will gradually fill|_______________|____________| *
* up completely, and even if you hadn't obtained   *
* the Omnislash Limit Break for Cloud it will become available for this one   *
* fight only. Enjoy killing Sephiroth!   *
*   *
* NOTES - If you hadn't previously unlocked the Omnislash Achievement   *
*   (Steam version) then it would pop now. Why did I put you through   *
*   all that trouble in the Battle Arena then you ask? Because you   *
*   needed Omnislash to enter into he 'Special Battle', which was   *
*   needed for the Final Attack Materia, which is needed for the   *
*   Materia Overlord Achievement (so there)!   *
*   *
*   - If you'd decided to just stand there not using Omnislash, then   *
*   Sephiroth would use his Cut attack reducing Cloud's HP to   *
*   critical. After which, Cloud would counter killing Sephiroth in   *
*   one hit (regardless of whether you had Counter Attack equipped or   *
*   not).   *
*   *
%^^%

Congratulations, you have just completed Final Fantasy VII! It isn't over yet however, there's still an amount of optional things to do (such as defeating the WEAPONS). For now, just relax and enjoy the cinematics brought to you by Hironobu Sakaguchi and co. and I'll reconvene with you once you've reloaded your save in the North Crater.

NOTE - After the credits have finished rolling you will get an extra short bit of footage which is worth hanging on for. When you get to the shooting stars screen you can reset the game as this screen will never end (newer versions will not have the 'never ending' screen, and instead the game will reset).



,,,

Materia, however Sephiroth's will was suppressing its effects, meaning that Holy could not be summoned. That was just a re-cap of what you learned at the Forgotten Capitol with Bugenhagen.

After Cloud had defeated Sephiroth's will, the White Materia was no longer subdued and the power of Holy was released. This was the blue wave that you saw destroy the Meteor's red tornadoes. Unfortunately, Meteor was already too close to hitting the planet and Holy's power alone wasn't enough to defeat it (not without gravely harming the Planet anyway). The thing that isn't clearly explained to us is what takes place next. Aeris, although dead hasn't fully returned to the planet yet, and sensing the Planets need for help she summons the power of Lifestream to aid Holy. The Lifestream then pushed Meteor back far enough for Holy to work its magic, thus destroying Meteor for good. What remains of the White and Black Materia remains unknown, what is known is that the planet decided to spare the humans and life on the planet continued.

NOTES - As explained in the film Final Fantasy VII Advent Children, when Cloud defeated Sephiroth his remnants still remained within the Lifestream, and as a result of Lifestream flooding the planet many people got sick with a disease called Geostigma. Subsequently, the Jenova DNA that was contained within the Geostigma was enough for a second reunion to take place two years after the events of FF VII.

- Advent Children was crap, so don't waste your time on it. If you want something to watch then check out Final Fantasy VII Last Order which is a 25 minute manga-style film based on the events of the Nibelheim Incident 5 years ago. Or even watch Crisis Core: Final Fantasy VII Full Film [HD], if you have the time, it's a 2 and a half hour film taken from the game Crisis Core.

¬¬¬

not in your team (using the 'Exchange' tab) with some obsolete Materia.
#   #
Refrain from selling any pieces other than All, regardless of how full
your inventory becomes. If you do have to resort to selling your Materia
then only sell ones that can easily be re-bought from a shop. I stress
this point - DO NOT SELL AN UN-MASTERED 'UNIQUE' PIECE OF MATERIA!!!!!!
#   #
,,,

If you wanted to master 3 Morphs for a fourth copy so that you can pair one with Steal as well then that would be fine (the first two are being paired with 2 Sneak Attacks, and third is being paired with Counter). Also, aim to get three Added Effects with Hades as they are awesome. You cannot use Counter Attacks in the Gelnika as it will ruin your Morphing chances so try to Master a few now, you're eventually going to want 9 of them mastered in total (for Emerald). 3 Final Attacks with 3 Revives should be on your to-get list, and also 2 mastered Enemy Lures (as they will stack).

^^

WORD OF WARNING! Watch your Elixir count! There's nothing worse than being in a battle with the Magic Pots with no Elixirs; they'll steal from you then they'll run away, so your only option would be to flee yourself before they've stolen your most valuable weapon!!!

^^

SIDE NOTE - EXTENDED W-ITEM TRICK (works on PS4 version)

While the W-Item trick is widely known about, not a great deal of folk are aware of some of the more practical uses of how it can work; I wasn't when I first wrote this portion of the guide, so I've include it now as an addition. I'm now going to breakdown exactly how to use the Extended W-Item trick to explain how to duplicate yourself every type of Source MUCH quicker than the 'Sunken Gelnika' method:

First make sure that you have *one* expendable item at the top of the inventory list (such as a Potion), then make sure that you have 0 of the item you wish to duplicate (say, a Power Source). Depending on the enemy formation, you may have a few variations to set-up for. Set the ATB to wait.

MULTIPLE GROUPS OF ENEMIES (Power, Guard, Speed and Luck Source)

Set Yuffie up with Morph, Cloud with Manipulate and player 3 with W-Item. When you engage the enemy, make sure to kill off all but 2 of them, and Manipulate one of them. Now have Yuffie cast Morph. Before the move is executed, have player 3 use W-Item, and use the single Potion as your first item. Now wait for the enemy to be Morphed into the Source.

If done correctly, the Source will fill the same inventory slot that was occupied by the Potion. You can now select and cancel another item, thereby duplicating the Power Sources up to 99.

- Power Source - Screamer, Mt Nibel, Screen with the Reactor
- Guard Source - Spiral, Mideel Area, Dirt tracks
- Speed Source - Poodler, Sunken Gelnika, Corridor
- Luck Source - Poodler, Sunken Gelnika, Corridor

INDIVIDUAL ENEMY (Mind Source)

As before, make sure to have *one* expendable item at the top of the inventory list, and to have 0 of the item you wish to duplicate. Set Cloud up with Final Attack=Revive and Quadra Magic=Revive. Set Yuffie up with Final Attack=Morph, and lastly set player 3 up with W-Item. *MAKE SURE* that Yuffie is player 1 (at the top) so that she uses Morph before Cloud uses Life2. Remember to equip Enemy Skill, Cure and to have some Phoenix Downs.

] Enter into battle with the Serpent. Make sure that Cloud's and Yuffie's HP [
] are in critical, then start bringing the Serpent's HP down using L4 [
] Suicide; it is more likely to cast Aqualung that way. The idea is to have [
] Cloud and Yuffie KO'd at the same time. Yuffie will then retaliate by [
] Morphing the Serpent into a Mind Source, and Cloud will cast Life2 four [
] times. [
] [
] Prior to Yuffie using Morph, make sure that player 3 is sitting in the [
] W-Item screen with the Potion 'used', awaiting input of the second item. [
] If done correctly, the Potion's inventory slot will be filled with the [
] Mind Source, you will then have time to dupe yourself 50 of them while [
] Cloud casts Life2. [
] [
] The Serpent's attacks are dependent on your party's average current HP and [
] the Serpents Current HP. If the Serpent's current HP is: [
] [
] - 0% - 20% of party's current HP, Dragon Dance is used. [
] - 21% - 40% of party's current HP, Huge Tidal Wave is used. [
] - 41% - 80% of party's current HP, Aqualung is used. [
] - 81% - 100% of party's current HP, Viper Breath is used. [
] [
] Using L4 Suicide and Cure, you should be able to regulate the Serpent's HP [
] until it uses Aqualung. [
] [
] NOTES - If you happen to be playing on a Playstation console, then you [
] can simply open the lid, thereby not allowing the battle to [
] finish. This way you can dupe the Source without having to go [
] through the Final Attack method. [
] [
] - Each additional Quadra Magic that you pair with Revive gives [
] Cloud *one* additional casting, for a maximum of 8; so 5 Quadra [
] Magics paired with Revive would enable Cloud to cast Revive 8 [
] times, which would be enough to gain 99 Mind Sources in a single [
] battle. [
] [
] BATTLE ARENA (Magic Source) [
] [
] The only way to encounter a 'group' of enemies that can be morphed into a [
] Magic Source is at the Battle Square - The 8 eye. These can be encountered [
] in round 3, and you have a 1/4 chance of fighting them. For this battle [
] you must set Yuffie up with (mastered) Counter=Morph. It is imperative [
] that you cast Stop, Sleep or Paralyzed on one of the 8 Eyes. When the [
] other attacks, select the single Potion then wait for Yuffie to counter [
] with Morph. So long as the other 8 Eye cannot attack, you will be able to [
] dupe yourself 99 Magic Sources. Don't equip Mega All, do equip Seal and [
] (obviously) W-Item. [
] [
] To read up on a few more uses for the Extended W-Item Trick, such as [
] duplicating Weapons, Armour and Accessories, use QSI Link [Extended W-Item [
] Trick]. [
]_____[

If you're not keen on making use of exploits, and you'd rather obtain your Sources the old fashioned way, then continue reading. If you're not bothered about Source farming in the slightest then skip to section D3.04 C.

--D3.04 B - The Sunken Gelnika Re-visited

Before making you way to your sub I suggest making a stop at the reactor in Gongaga to fight the Heavy Tank. This is (in my opinion) the easiest way to obtain Power Sources (without using exploits) and will help you get Yuffie's base damage to 9999 on her attacks. I obtained 50 of them and gave every single one of them to her. Alternatively you can use the aforementioned Extended W-Item trick to duplicate them using the Screamers in Mt. Nibel.

Here's a tip: With your Gold Chocobo on board your Highwind, land the aircraft near the Desert surrounding the Gold Saucer. Then, ride your Gold Chocobo over to your sub, then navigate the sub to the dock near the Gold Saucer. Now go and retrieve your Gold Chocobo; you've now 'parked' your sub much closer to the Sunken Gelnika!

I advise a set-up similar to the following: (M) = Master

1) Cloud - Lv 82 (Front)

Apocalypse - Quadra Magic, Final Attack, Magic Counter
Rune Armlet - Added Effect, Mime, EXP Plus, Hades
Ribbon

2) Yuffie - Lv 69 (Back)

Conformer - Sneak Attack(M)=Morph(M), Counter(M)=Morph(M), Enemy Skill, Enemy Lure(M), Enemy Lure(M), HP PLus(M)
Mystile - Sneak Attack=Morph, MP Turbo=Ultima, Contain, Revive, Mega All
Ribbon

3) Cid - Lv 73 (Front)

Scimitar - Added Cut=Knights of Round
Rune Armlet - Comet, Magic Counter, Counter, Double Cut
Ribbon

NOTES - This set-up will allow you to occasionally Morph your enemy twice from the outset, which will make the Gelnika a walk in the park!

- Steam users - it's time to start mastering all of our Materia for the Materia Overlord Achievement, so you're going to want to start working your way down your Materia list soon.

- PS4 users you have a choice - you can obtain the Transcendant Convoker Trophy (obtain the Master Summon Materia) by defeating Emerald WEAPON, then trading the item it gives you for the Master Materia, so you don't *have* to master one of every Materia. I would however advise considering mastering your Materia to obtain multiple sets of Master Materia as to become a God.

- TAKE NOTE of the requirement list found the next section, D3.04 C.

Now make your way over to your sub and SAVE BEFORE SUBMERGING. You don't want to lose all of those Power Sources do you? Avoiding Emerald, make your way over to the Sunken Gelnika.

NOTE - The amount of time you spend in the Gelnika is entirely up to you and it isn't at all necessary to max out your stats in order to defeat the WEAPONs; if you really don't want to spend too long down there then that's fine. Remember that if you get bored then you can alternate between training at the North Crater and the Gelnika

(see the section below), and you can always make use of the Extended W-Item Trick.

How you distribute your Sources is up to you, but try to raise everyone's Strength so that they are hitting for 9999 each. I'm giving Cloud *most* of my Magic Sources, but again, I'm keen to raise Cid's and Yuffie's stats up too (Magic Sources are much harder to come by than Power Sources, unless you used the Extended W-Item trick on the 8 eye). Give Yuffie the first 20 or so Luck and Speed Sources to keep her hitting for critical damage, hastily, then spread the rest out evenly. Mind Sources and Guard Sources can also be evenly distributed.

Here is a re-cap of the enemies you can fight here:

CORRIDOR:

Poodler - 6000 HP - 70 AP - Morph: Speed Source - Steal: Turbo Ether
Bad Rap - 9000 HP - 70 AP - Morph: Luck Source - Steal: Ink

CARGO ROOM/RESEARCH ROOM: (The Serpent can only be fought in the Cargo Room.)

Unknown - 10,000 HP - 150 AP - Morph: Power Source - Steal: Fire Armlet
Unknown 2 - 13,000 HP - 300 AP - Morph: Guard Source - Steal: Aurora Armlet
Unknown 3 - 15,000 HP - 200 AP - Morph: Magic Source - Steal: Bolt Armlet
Serpent - 14,000 HP - 70 AP - Morph: Mind Source - Steal: Water Ring

When I was ready to continue my base stats looked like this:

NOTE - These are the stats I had *without* using the Extended W-Item trick, on my first playthrough:

	Cloud Lv 97	Yuffie Lv 82	Cid Lv 84
Strength-	116--------	166---------	106------
Dexterity	86---------	91----------	82-------
Vitality-	109--------	104---------	105------
Magic----	142--------	99----------	90-------
Spirit---	104--------	104---------	100------
Luck-----	61---------	65---------	63-------

NOTE - These are the stats I had *with* using the Extended W-Item trick, on my second playthrough:

	Cloud Lv 83	Yuffie Lv 72	Cid Lv 75
Strength-	148--------	170---------	129------
Dexterity	147--------	166---------	126------
Vitality-	121--------	119---------	117------
Magic----	161--------	119---------	119------
Spirit---	97---------	110---------	108------
Luck-----	54---------	87---------	53-------

Remember to equip your characters with weapons that won't increase their raw stats. Here are the best weapons to equip (for everybody):

```
Cloud     - Nail Bat
Barret    - Gatling Gun, Drill Arm, Rocket Punch or Pile Banger.
Tifa      - Leather Glove, Work Glove, or Master Fist.
Aeris     - Guard Stick or Mythril Rod.
Red XIII  - Magic Comb
Yuffie    - 4-Point Shuriken
Cait Sith - Battle Trumpet
Vincent   - Silver Rifle
Cid       - Mop

**Don't forget to save before you exit.**

Here is a quick re-cap of where each Source can be morphed:
(* = Extended W-Item Trick)

Power Source -  Heavy Tank - Reactor in Gongaga
               *Screamer   - Mt. Nibel, winding pathway to rector
                Unknown    - Sunken Gelnika Cargo Room

Guard Source - *Bagnadrana      - Mt. Corel Reactor
               *Spiral          - Mideel Area
                Unknown 2       - Sunken Gelnika Cargo Room
                Maximum Kimaira - Midgar Mako Cannon Area (& Battle Square)
                Armored Golem   - Northern Cave

Magic Source -  Unknown 3 - Sunken Gelnika Cargo Room
               *8 eye     - Temple of The Ancients (& Battle Square)

Mind Source  -  Dragon Rider - Whirlwind Maze (& Battle Square)
                Killbin      - Whirlwind Maze (Can't re-visit)
               *Serpent      - Sunken Gelnika Cargo Room

Speed Source - *Poodler - Sunken Gelnika Corridor

Luck Source  - *Bad Rap - Sunken Gelnika Corridor

 NOTES - The dirt area near Mideel is the optimal place to battle the Spirals,
         which is preferable to fighting the Bagnadrana as they won't appear
         as often as the Spirals.

       - Have you noticed how 3 different reactors all have enemies that can
         be morphed into Sources? Corel, Gongaga & Nibelheim!

¬¬¬
```

preparing yourself for Emerald and Ruby WEAPON.

It's worth noting that whilst Cloud's Apocalypse will give you 3 slots of triple growth (meaning the equivalent of 9 slots), Cid's Scimitar will only give you the equivalent of 6 slots (2 x triple growth).
Therefore, I highly recommend switching to Cid's Javelin as it offers 5 slots at double growth, meaning it'll have the equivalent of 10 slots, which is the most amount of AP that can be earned from one weapon. Just remember to keep KOTR on a triple growth weapon.

NOTES - Remember that Ruby and Emerald will each give out 50,000 AP, and in terms of preparation Ruby is by far the easiest. You could if you wanted to, hold out on Leveling up a few of the below Materias all the way (such as Magic Counter and Quadra Magic) for now, and use Ruby to finish Leveling them up seeing as you'll only really need 1x Knights of the Round and 3x Mime for her (and a few other bits).

- I am preparing for the ultimate battle plan for Emerald WEAPON, which is why the following lists may look a little tedious. If you're familiar with the game and you have your own strategy then feel free to amend the following lists as you see fit. If you are new to the WEAPONs however then I recommend obtaining every single piece as listed.

- Heard of All Lucky 7's? Visit section E.18 A and scroll down to method 5 to find an incredibly easy way to active 7777 fever, courtesy of James Baxter! Using Lucky 7's will make the WEAPONs that much easier...

- Keep the EXP Plus and Gil Plus equipped to help for the relevant trophies. Enemy Lure help, also. Bear in mind that mastering All Materias is the easiest way to gain 99,999,999 gil...

Don't leave the Swamp until you have ticked off all of the following:
(again I emphasise the fact that this list is only necessary for the 'ultimate' strategy)

2 x Contain (Lv 4)
2 x Gravity (Lv 3)
3 x Revive (Lv 2)*
3 x Lightning (Lv 3)
3 x Quadra Magic (Mastered) Keep it in a triple growth weapon
3 X Final Attack (Lv 4)*
1 x MP Turbo (Mastered)*
3 x Magic Counter (Mastered) Keep in a triple growth weapon
3 x Counter (Mastered)
3 x Mime*
9 x Counter Attack (Mastered)
1 x Knights of Round (Mastered)* Keep in a triple growth weapon
* = All that is required for defeating Ruby WEAPON

The following isn't mandatory for beating the WEAPONs but will help:

2 x Mega All
1 x Double Cut (Lv 2) Remember - Mega All will override Double Cut.
2 x Long Range
2 x Magic Plus (Mastered)
1 x Phoenix (Mastered) (For Emerald WEAPON only)

The following won't be used in either WEAPON battle, but you will want to try

to fulfil this list only if you want to be a FF VII God:

3 x Ultima
3 x Contain (Lv 4)
3 x Steal as Well
3 x Added Cut
3 x Sneak Attack (Mastered)
3 x Added Effect
3 x Elemental (Mastered)
3 x HP Absorb
3 x MP Absorb
3 x MP Turbo (Mastered)
6 x Counter (Mastered)
5 x Morph
3 x Double Cut (Lv 2)
3 x Mega All
2 x Pre-Emptive (Mastered)
3 x Long Range
3 x Hades

Optional:

3 x Seal - Works brilliantly with Added Effect on all three players, can be bought from Costa Del Sol and Junon
7 x Fire, Ice, Lightning, Earth, Gravity or Poison (Lv 3) - for an Ultimate Materia Combination
3 x Alexander - For Holy Element
3 x Leviathan - For Water Element
3 x Choco/Mog - For Wind Element (or Typoon)

If Yuffie gets to level 99 then feel free to swap her over with your lowest levelled player.

Before heading over to defeat the WEAPONs you may want to consider stopping off at the Gelnika one last time to give yourselves a quick stat boost. If you are planning on doing this then I suggest walking away from the North Crater at this stage with 4 Morphs, 2 to go with Mastered Sneak Attacks, 1 to go with Steal as Well and one to go with a Mastered Counter.

Naturally, you could just make use of the Extended W-Item trick to gain one more 'sweep' of Sources, just for the extra bit of unnecessary Over-Powered-ness. During the course of everything I expect you to reach Lv 99 with Cloud, unlocking the Liege of Leveling Trophy.

By the time I was ready to face the WEAPONs I'd managed to complete the first and second list, with the exception of Magic Counter and Quadra Magic which I'm using Ruby to help me finish off.

These were my finishing stats (at base level) on my first playthrough, *without* using the Extended W-Item Trick:

	Cloud Lv 99	Yuffie Lv 99	Cid Lv 99
Strength-	148--------	187---------	137------
Dexterity	91---------	94----------	90-------

Vitality-	134--------	134---------	135------
Magic----	142--------	105---------	105------
Spirit---	110--------	109---------	111------
Luck-----	71---------	72---------	75-------

These were my finishing stats on my second playthrough *with* the Extended W-Item trick:

	Cloud Lv 99	Yuffie Lv 85	Cid Lv 88
Strength-	196--------	214---------	197------
Dexterity	185--------	170---------	147------
Vitality-	167--------	158---------	152------
Magic----	210--------	142---------	143------
Spirit---	141--------	130---------	128------
Luck-----	95---------	105--------	95-------

The highest any stat can reach is 255.

--D3.04 D - The Ultimate Battles

--Items - Gold Chocobo, Master Magic, Master Command, Master Summon
--Boss - Ruby WEAPON Lv 59 (Desert Rose), Emerald WEAPON Lv 99 (Earth Harp)

RUBY WEAPON:

Make sure that you have at least on Dazers and one Spider Web in your inventory, then duplicate them both to around 25 (using the W-Item trick). If you haven't got any then head over to Corral Valley (past Bone Village) to fight the Boundfat for Dazers which you can steal, morph or simply wait for them to drop one. Then head over to Gongaga to fight the Kimara Bug to steal the Spider Web. Be sure to have roughly 15 Megalixirs also.

NOTES - Go into your Item menu and re-arrange your items to suit. Place the Spider Web at the top, the Dazers second and the Megalixirs third.

- Yuffie's Limit 3-2 Doom of The Living is actually better than her Lv 4 Limit Break, All Creation!

Now fill up Yuffie's Limit gauge by giving her a Hyper, putting her in the front row and then manipulating the Valrons near Nibelheim to make use of their Dive Kick move. Now head over to the desert surrounding the Gold Saucer to prepare yourself for the battle.

The first thing you are going to want to do is to kill off Cloud and Cid (it'll make sense momentarily), then turn the Battle Speed all the way down to 0 (trust me on this one). Afterwards you can set-up accordingly:

1) Cloud (Back, KO'd)

Apocalypse:	Wizard Bracelet:

Magic Counter Lv 4	MP Turbo Master = Knights of the Round Master	
W-Summon Lv 1	HP Absorb Lv 1 = Knights of the Round Lv 1	
W-Magic Lv 1	Enemy Skill	
	Mime Lv 1	
	Magic Plus Master	
	HP Plus Master	Acc: Ribbon

2) Yuffie (Back)

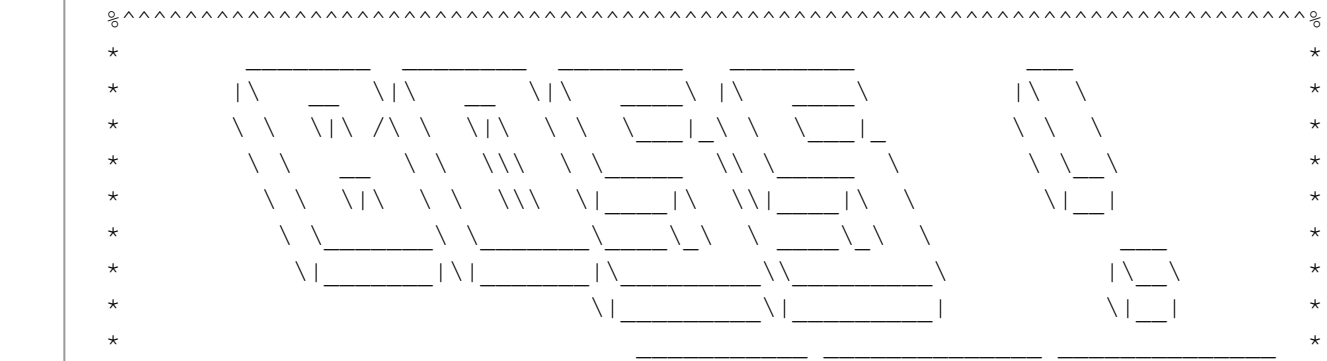
Conformer:	Rune Armlet:
Final Attack Master = Revive Master	Choose any 4 Summons that you
Sneak Attack Master = Time Lv 1 or 2	would like to give 100,000 AP
Enemy Skill	to
Mime Master	
Mega All Master	
HP Plus Master	Acc: Ribbon

3) Cid (Back, KO'd)

Venus Gospel:	Rune Armlet:
Final Attack Master = Revive Master	W-Item Lv 1
All Mastered = Restore Master	
Enemy Skill	Choose any 3 Summons that you
Mime Master	would like to give 100,000 AP
Speed Plus Master	to
HP Plus Master	Acc: Ribbon

NOTE - Make sure that the Time you have given to Yuffie is Lv 1 or 2.

When you are ready, save your game and fly into the red object you see squirming about in the middle of the desert (or alternatively bump into it with your Gold Chocobo).



The first thing you need to know about this mega-boss is that it will be completely impervious to attacks until it has buried both if its Tentacles into the ground, which it won't do unless two of the three players are either dead or removed from battle. If you were to go into the battle with all 3 players

BOSS BATTLE:41	RUBY WEAPON	RUBY'S TENTACLE x 2
Lv:	59	37
HP:	800,000	40000
MP:	2560	1000
EXP:	45000	
AP:	50000	
GIL:	30000	

```
* alive then it will likely use  | ----DROP: | Desert Rose- | ------------ | *
* its Whirlsand move, which will | ABSORB 1: | FRE--ICE---- | ------------ | *
* permanently remove a player    | ABSORB 2: | LHT--ERT---- | ------------ | *
* from the fight, so if you want | -NULLIFY: | GRV--WTR---- | GRV--WTR---- | *
* the maximum amount of battle   | -E-SKILL: | SHADOW FLARE | ------------ | *
* rewards the I suggest entering |_____________________________________________| *
* the fight with Cloud and Cid                                                   *
* KO'd. After 25, then 32 turns it will use Whirlsand again.                     *
*                                                                                *
* The attacks that the Tentacles use actually comes from Ruby itself, the        *
* tentacles are just there for appearance, although you can still attack         *
* them. All of the moves Ruby performs through her Tentacles are gravity         *
* based, and therefore cannot kill you. Once they have been defeated Ruby        *
* will remove them from the ground, thus making her use Whirlsand again (but     *
* not becoming invincible), so it's advised that you just concentrate on         *
* Ruby leaving the Tentacles alone. Its attacks can be extraordinarily           *
* powerful, and should you cast KOTR on it then it'll counter attack by          *
* using Ultima. So how then do you defeat Ruby WEAPON? Here's how:               *
*                                                                                *
* Ruby has three Status weaknesses, two of which we can exploit - Slow and       *
* Paralyze (Darkness cannot be exploited). As soon as the battle begins          *
* Yuffie should automatically put herself into Haste, then Ruby will bury        *
* its tentacles into the sand. Without hesitation, revive Cid and Cloud          *
* (using Life2 & Mega All), then use Yuffie's Limit Break. Have Cid cast         *
* W-Items Spider Web and then Dazers on it (in that order) to Slow then          *
* Paralyze it, followed by Big Guard from Cloud.                                 *
*                                                                                *
* Provided Ruby has been successfully Paralyzed, you can now go ahead and        *
* have Cloud W-Summon Knights of the Round. The MP Turbo accompanied with        *
* Magic Plus should be enough to have Cloud hit for 9999 every hit, not to       *
* mention restoring half of Cloud's HP in the process with the HP Absorb         *
* combo.                                                                         *
*                                                                                *
* Next it's just a simple case of using Mime until it is dead. If it manages     *
* to break free from its paralysis then don't hesitate to use more Dazers        *
* and Spider Webs (the Slow Status will prolong the Paralyzed Status),           *
* you'll then have to re-initiate the KOTR mime loop once more. After            *
* roughly 7 - 8 uses of KOTR, it'll finally start to flash red you'll be         *
* rewarded with the [DESERT ROSE] for your effort.                               *
*                                                                                *
*  NOTE - Using Dazers on Ruby will not 'reset' her paralysis; you must wait     *
*         until she has broken free before inflicting her with Paralyze          *
*         again.                                                                 *
*                                                                                *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%
```

NOTES - The above strategy is by far the easiest (and by contrast the most popular), and is also by far the longest. There are alternative ways in which you can defeat Ruby that prove to be more of a challenge, if you're interested then goto section E.16 C.

- You should now have unlocked the Ruby Render Trophy.

Now that you have defeated Ruby, head over to Kalm to talk to the Kalm Traveller (eastern-most house). You can now exchange the Desert Rose for a Gold Chocobo, after it's finished climbing the stairs you'll be able to run over to it to name it. If you hadn't any room in your stables then it'll be kept in your pen at the Chocobo Ranch for the time being. Note that this Chocobo is a completely useless racing Chocobo.

EMERALD WEAPON:

The first thing you are going to need to grab the Underwater Materia from the Kalm Traveller if you hadn't already done so. Head through Junon until you reach the sea bed, then Morph a Ghost Ship for the Guide Book. This can be then be exchanged for the Underwater Materia (which will remove the 20 minute countdown timer when battling Emerald).

NOTE - With the following strategy, you don't actually need the Underwater Materia, I was able to defeat him in 13 minutes. It's just handy to have equipped as a precautionary.

The preparation for Emerald is almost the same as Ruby, except you don't need to kill off 2 of your characters and you don't need to worry about having any Dazers or Spider Webs, although you would do well to bring around 20 Hero Drinks with you into battle (remember that it raises one players Attack, Defence, Magic and Magic Defence by 30%, and can be used up to four times in battle for a maximum of 100%). Don't forget to slow the ATB gauge down all the way.

You are going to want to make sure that each players Limit gauge is filled to the max, after that you're going to want to give everyone Tranquilizers to inflict them with Sadness. Now you're going to want to set yourself up with the following:

1) Cloud (Back)

Ultima Weapon:	Wizard Bracelet:
Final Attack Master = Phoenix Mstr	Quadra Magic Mstr = Lightning Master
Counter Master = Deathblow Master	MP Turbo Master = Lightning Master
Counter Attack Master	Magic Counter Mstr = Lightning Mstr
Counter Attack Master	Mega All Lv 3
Counter Attack Master	HP Plus Master
Magic Plus Master	Acc: Sprint Shoes

2) Yuffie (Back)

Conformer:	Wizard Bracelet:
Counter Master = Deathblow Master	Final Attack Master = Revive Master
Counter Master = Deathblow Lv 1	Quadra Magic Lv 2 = Contain Master
Enemy Skill	Magic Counter Master = Contain Mstr
Counter Attack Master	Mega All Master
Counter Attack Master	HP Plus Master
Counter Attack Master	Acc: Sprint Shoes

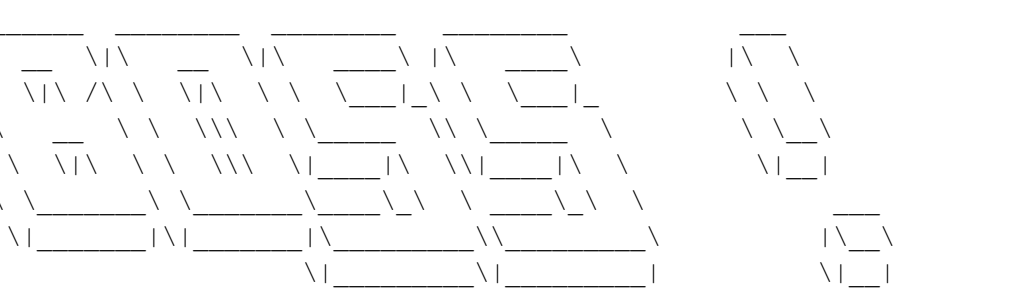
3) Cid (Back)

Venus Gospel:	Wizard Bracelet:
Final Attack Master = Revive Master	Quadra Magic Master = Gravity Master
Counter Master = Deathblow Master	Magic Counter Master = Gravity Mstr
Counter Attack Master	Underwater
Counter Attack Master	HP Plus Master
Counter Attack Master	Choose 2 Materia to gain 50,000 AP

Mega All Master	Acc: Sprint Shoes

NOTE - The Phoenix Materia will fully revive all players, and will hit Emerald with Fire damage (Ruby absorbs Fire damage, so Phoenix is only good against Emerald). The downside is that it can only be used as many times as it has levelled up, and mastering a Phoenix Materia takes a lot longer than the Revive Materia.

The above set-up should max Cloud's Magic to 255, if not either equip a Circlet or spend a little bit more time in the Gelnika. When you are ready, save your game and jump in your submarine. Emerald WEAPON, here we come!!! (It's about damn time.)



Note - All bosses will nullify Gravity, apart from Emerald (and Godo). Instead, Emerald will halve Gravity based attack as opposed to completely nullifying them, so technically speaking gravity would be classed as one of Emerald's strengths, although the fact that it can still be damaged by gravity means we can still use Demi for 9999 every turn, branding it as an exploitable weakness.

There's no need for Ribbons here as he cannot inflict Status changes (he can only clear them), nor is there any need for Big Guard as he can easily remove it using Emerald Shoot, although he won't use it when any of his eyes are open. Every turn you get make sure to use a Hero Drink until all 3 players have used 2-3 Hero Drinks each, making sure to use Megalixirs as necessary. Emerald can also be inflicted with Slow.

BOSS BATTLE: 42	EMERALD WEAPON	EYE X 4
-------Lv:	99--------	50------
-------HP:	1,000,000	25000---
-------MP:	100-------	100-----
------EXP:	50000-----	--------
-------AP:	50000-----	--------
------GIL:	50000-----	--------
-----DROP:	Earth Harp	--------
---ABSORB:	ICE--WTR--	ICE--WTR
--NULLIFY:	ERT-------	ERT-----
----HALVE:	**GRV**---	--------
---DOUBLE:	LHT-------	FRE-----

Emerald Weapon only has a few attacks:

Emerald Shoot - Used when its eyes are shut. Will cause around 7000 damage to one character whilst also removing Barrier, MBarrier, Shield, Death Force and Resist.

Emerald Beam - Used when at least one eye is open. Will hit all players for 63% of their current HP whilst also removing Regen.

Revenge Stamp - Used as a counter attack when its eyes are open and will hit all players for roughly 2500 HP whilst also removing Haste.

```
* Aire Tam Storm - (Materia spelt backwards) Uncommonly used as a counter    *
* attack, Aire Tam will hit all players for 1111 HP PER MATERIA EQUIPPED! So *
* make sure to have Final Attack=Revive/Phoenix equipped. It will also       *
* remove nearly all positive Statuses.                                       *
*                                                                            *
* Blue Eye (A & D) - Damages one player for roughly 4000 HP                  *
*                                                                            *
* Yellow Eye (B & C) - Damages one player for roughly 650 MP                 *
*                                                                            *
* He also uses an unnamed attack called Foot Stamp which takes out roughly   *
* 2500HP to all characters. He'll only use this move if all eyes are shut.   *
*                                                                            *
* So long as you have followed the exact set-up as above you really          *
* shouldn't struggle, in fact I find it to be tremendously funny watching my *
* party go into counter attack overdrive mode every time they are attacked,  *
* and it's far more entertaining to watch than the KOTR + Mime strategy.     *
* Just keep using defensive moves whilst occasionally using Deathblow or a   *
* Limit Break, once he is finished you will receive the [EARTH HARP].        *
*                                                                            *
*  NOTES - One strategy is to use Lucky 7's to greatly damage Emerald. This  *
*          is activated by equipping a player with no more than 2 lots of    *
*          Materia, one of which being HP Plus (to make that persons HP      *
*          9999). When Emerald uses Aire Tam it will inflict 2222 worth of   *
*          damage, reducing the targets HP down to 7777, activating 7777     *
*          Fever. The combined damage won't be enough to kill Emerald, but   *
*          it will be enough to greatly damage it (it's worth pointing this  *
*          out just in case you were curious to see what Lucky 7's looked    *
*          like, if nothing else).                                           *
*                                                                            *
*        - Aire Tam will only be used if he's used two consecutive Emerald   *
*          Beams with all of the eyes open, or if he's used Revenge Stamp 10 *
*          times, or if he's taken 500,000 HP of damage from Knights of the  *
*          Round (with his eyes open). The easiest way to get him to use     *
*          Aire Tam is to wait until he has opened his eyes, kill all but    *
*          one of them (leave a yellow one alive) then just wait.            *
*                                                                            *
%^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^%

 NOTES - As with Ruby, there are varying methods to dealing with Emerald. See
         section E.16 B for more info.

       - You should now have unlocked the Emerald Eviscerator Trophy.

       - Don't forget to turn the ATB back up!

CONGRATULATIONS! You've defeated the two supreme bosses of the game, you are
now an FF VII legend. Head over to Kalm to claim your prize from the Kalm
Traveller - the [MASTER MAGIC MATERIA], [MASTER COMMAND MATERIA], and the
[MASTER SUMMON MATERIA]. Hoo-rah (PS4 players will unlock the Transcendant
Convoker Trophy).

 _____________________________________________________________________________
]                                                                             [
] SIDE NOTE - MASTER MAGIC                                                    [
]                                                                             [
] Master Magic, Command and Summon give players the ability to possess every [
] single Magic and Summon, but not Command. Specifically, the Commands that  [
] are equipped are Mime, Manipulate, Morph, Sense, Steal, Deathblow, Throw.   [
] These are the same Command Materias (and only these Command Materias) that [
] can be paired with Support Materia.                                         [
]                                                                             [
```

] NOTE - If you pair HP Absorb, MP Absorb, Steal as Well and/or Added Cut   [
]   to Master Command, you will find that the Support Materia's effect [
]   would apply to every available command, including Attack, Magic,   [
]   Summon and Item.   [
]   [
] Should you wish to acquire a second and third set of these then you will   [
] have to trade in one of every single piece of Mastered Magic Materia to   [
] obtain the Master Magic Materia, the same goes for Summon Materia, however [
] you'll only need to trade in the Command Materia mentioned above for the   [
] Master Command. Where do you trade these in I hear you asking? Why, in   [
] Bugenhagen's Observatory of course. Interact with the Huge Materia to be   [
] prompted to 'Materia Blend'.   [
]   [
] NOTE - Losing all of your mastered Magic, Summon and (some) Command   [
]   Materia will free up your inventory loads, so you shouldn't need   [
]   to worry anymore about running out of room, just *MAKE SURE* to   [
]   have unlocked the Materia Overlord Achievement first.   [
]____[

Surprisingly enough, there is still a little bit more that we can squeeze from this game!

¬¬¬

again when she has critical health for 8x her normal strength!

NOTE - Materia Overlord Achievement. When you master a piece of Materia a check is performed to see if every other piece is mastered or not. This also checks to see if at least one Enemy Skill is completely filled and that the Master Magic, Master Command, Master Summon and Underwater are present, but doesn't check to see how much AP they have. You must also have the Materia either in your inventory or equipped onto a player, so if you'd sold, trashed or exchanged (at Bugenhagen's Observatory) any mastered piece then you would have to re-master that piece, unless you already have another copy mastered.

2.) Obtaining a second set of Master Materia.

I suggest now heading over to Cosmo Canyon to exchange all of your mastered Magic, Summon, and some of your Command Materia for the Master Magic, Summon and Command Materia respectively. This should help you free up a load of inventory slots.

3.) Training until your heart is content in the Sunken Gelnika.

Although a long-winded challenge, you could try and obtain enough Sources to max out your teams stats to 255. Should you wish to obtain a third and final of Master Materia set then I suggest working towards that now

Those of the exploitive nature could always use the Extended W-Item Trick to max out their characters stats to 255!

4.) Training everyone up to level 99.

You're still going to want to train in the swamp for this, those Magic Pots really do give out the most of EXP aswell as AP. Make sure to continuously level up all of your Materia again, excluding support and independent Materia.

5.) Obtaining you third set of Master Materia.

Once you are ready head over to Bugenhagen's Observatory once more to exchange your Materia for a third set of Master Materia. Congratulations, you are now an FF VII God.

6.) Obtaining 99,999,999 gil.

I saved this one till last so that you wouldn't have to spend as long grinding away, as you should be roughly 20 - 30% of the way towards your target. 98 Sylkis Greens will sell for 245,000 gil, so you'll net 1 million every four battles. You may be here for a little while... The other alternative is to master as many Alls as you can. The latter is probably the preferred strategy.

Have you just earned the Coming Up All Nines Trophy? Then congrats - You've just also unlocked the platinum, Gaia's Guardian Trophy! Well done!

7.) Defeating the final bosses one last time.

This is it, one final ultimate battle to end all battles. With every player at level 99, Bizarro and Safer Sephiroth will have the maximum amount of HP possible, and therefore posing the biggest challenge. Don't forget to cast Knights of The Round on Jenova-Synthesis to give Bizarro and Safer that extra boost in HP!

Before anything else, I would just like to demonstrate my perfect load-outs:

BATTLE SQUARE:

Cloud - Lv 99 (Front)
Added Effect=Hades, Added Cut=Deathblow
Ultima Weapon - Master Magic, Master Command, Master Summon, Enemy Skill,
Mystile - Counter=Deathblow, Counter Attack, Counter Attack,
Ribbon Mega All, HP Plus,

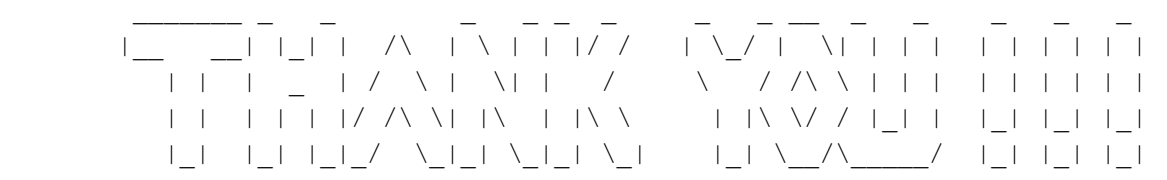
FIELD:

1) Cloud - Lv 99 (Back)
Added Effect=Hades, Added Cut=Deathblow
Ultima Weapon - Master Magic, Master Command, Master Summon, Enemy Skill,
Mystile - Final Attack=Revive, W-Magic, Long Range, Mega All,
Ribbon HP Plus

2) Yuffie - Lv 99 (Back)
Added Effect=Hades, Sneak Attack=Morph
Conformer - Master Magic, Master Command, Master Summon, Enemy Skill,
Mystile - Counter=Morph, Steal as well=Morph, Mega All, HP Plus
Ribbon

3) Cid - Lv 99 (Back)
Added Effect=Hades, W-Item, Double Cut
Venus Gospel - Master Magic, Master Command, Master Summon, Enemy Skill,
Mystile - Counter=Mug, Counter Attack, Long Range, Speed Plus,
Ribbon HP Plus

So now all that is left to do is to whoop Sephiroth's backside one last time and you are officially done with the game!
Once again,



for choosing Guides by

{Dating}

--E.01 A - The Basics

The first thing to point out is the fact that it's actually called the Gold Saucer Dating Game, but in the interest of protecting those who are new to the game I decided to change the title to something more obscure as to not reveal anything.

Throughout the first two thirds of Disc 1 you will have many opportunities to raise or lower certain character's affection towards you through the dialogue choices you make, including choices regarding who you have in your party for certain events. The character with the highest rating at the time in which you re-visit the Gold Saucer after obtaining the Tiny Bronco will be chosen

as your lucky partner for the evening. There are only four characters however that can be chosen as a date, and they are Aeris, Tifa, Yuffie & (even) Barret. Their starting values are as follows:

Aeris - 50
Tifa - 30
Yuffie - 10
Barret - 0

If you wish to date either Aeris or Tifa then you won't really need a guide, just be particularly pleasant to either character whilst being mean to everybody else. If you wish to date Yuffie or Barret however then you probably will need to use this guide. Note that if you date Tifa or Aeris then you will experience dialogue within the date that is quite deep in relation to the storyline, but if you date Yuffie or Barret then you will have a much more comical experience.

NOTE - If you have the PS4 version, then you will want Barret to win the Affection Game for the Best Bromance Trophy!

Red XIII, Cait Sith, Vincent and Cid do not have an affection rating whatsoever, so nothing you do or say will affect them in any way shape or form. If two of the applicable characters finish with matching values then the character with the highest priority is chosen, and the priority order goes Aeris, Tifa, Yuffie then Barret.

{Speed Dating}

--E.01 B - Speed Dating (The easy way to date a character)

Aeris: There is no secret to dating Aeris. She starts off 20 points in the lead so if you fail to date Aeris then you really need some lessons in courtesy.

Tifa: Whilst locked up in the Shinra HQ you can talk to Tifa an infinite amount of times to boost her score by +1 each time by selecting “Leave it to me”. Selecting “Kinda hard” will lower her score by -1 each time.

Yuffie: Don't recruit Yuffie until you have passed Mt. Nibel. Then fight in the smaller of the two forests near Rocket Town to encounter Yuffie 100% of the time. Respond correctly to the first four choices to gain +8 (2 per choice), then choose incorrectly for the final choice to have her steal some gil from you. Do this twice, then recruit her. She will then return all that she has stolen from you. Her affection rating cannot be raised higher than 30 this way, which is why there is no need to do this more than twice.

Barret: Make sure that Barret is in your party when you first enter Cosmo Canyon, then head over to the back of Tiger Lily's Weapon Shop to find Barret. Listen to him talk about Avalanche, then when prompted choose dialogue option 1 to hear more about his story, boosting his affection towards you by +3. When prompted a second time, choose option 2 “Yeah, whatever...”, then run outside and back in again to reset the dialogue sequence. Keep doing this to raise Barret's affinity +3 each time.

DO NOT attempt this if you are trying to achieve the Best Bromance Trophy, as reports suggest that doing so prevents the trophy from

unlocking if Barret's affection rating exceeds its limit. Only attempt this if you have messed up your choices along the way, and don't want to start a fresh game.

--E.01 C - Every Decision and its Outcome

Below is the outcome of every single choice you make, note that if something isn't listed then it won't have an effect on anyones rating.

--D1.02 A - The Aftermath

01 Whilst talking to Jessie on the train, choose:
- "Thanks anyway" NO EFFECT
- "Looking forward to it" TIFA -3

--D1.02 B - Tifa's Bar

02 If you'd bought a flower from Aeris, choose:
- "Give it to Tifa" TIFA +5
- "Give it to Marlene" BARRET +5

03 Talk to Tifa before descending in the pinball machine:
- "I don't feel like it" NO EFFECT
- "Give me something hard" TIFA +5

04 When Cloud is accused of abandoning his childhood friend:
- "How can you say that" TIFA +5
- "...Sorry" NO EFFECT

05 When Tifa asks Cloud how he slept last night, choose:
- "Barret's snoring kept me up..." BARRET +5
- "Next to you, who wouldn't?" TIFA +5

--D1.03 A - We've Been Made!

06 Making it to the final train carriage without being detected by the security ID check - TIFA +5, BARRET +5

--D1.03 B - An Even Bigger Explosion!

07 When hanging on for dear life after defeating Air Buster:
- "(Be strong)" BARRET +2
- "(I don't know if I can hold on)" BARRET -3, TIFA +1

--D1.04 A - Aeris's House

08 Whilst Aeris is fleeing from the Turks in the back of the church:
- Wrong barrel pushed AERIS -3
- Ask Aeris to fight AERIS -1
- Ask Aeris to run NO EFFECT
- Ask Aeris to run but she ends up fighting AERIS -1
- Correct barrel pushed AERIS +1

09 Aeris asks if Tifa is his girlfriend:
- "No way!" AERIS +1

- "Yeah, that's right" AERIS -5

10 Whilst chatting in the playground in Sector 6:
- "See her home" NO EFFECT
- "Go on to Sector 7" AERIS + 1

--D1.04 B - Wall Market

11a Tifa gets chosen as Corneo's bride. When rescuing Aeris choose:
- "You alright?" AERIS +3
- "We gotta help Tifa!" AERIS -2

11b Aeris gets chosen as Corneo's bride. When rescuing Tifa choose:
- "You alright?" TIFA -2
- "We gotta help Aeris!" TIFA +3

11c Cloud gets chosen by Corneo, when asked if he's got a boyfriend:
- "Yeah his name is Barret..." BARRET +5

--D1.05 A - The Sewers & Train Graveyard

12 After you land in the sewers, before fighting Aps talk to:
- Aeris first AERIS +3
- Tifa first TIFA +3

--D1.05 C - I Hope Marlene's Alright

13 When Marlene remarks that Aeris may like Cloud, choose:
- "I don't know" TIFA +3, AERIS -3
- "Let's hope so" TIFA -3, AERIS +3

--D1.06 B - Hojo's Laboratory

14 After meeting Red XIII, whilst deciding who to look after of Aeris:
- "Tifa, I'm countin' on you!" TIFA -2
- "Barret, take care of her!" BARRET +2

15 After defeating Sample:H0512, putting any of the following in your party will result in - TIFA +2, BARRET +2, and/or AERIS +2

--D1.06 C - Escaping From Shinra

16 Whilst held captive in the security cells, talk to Tifa:
- "Leave it to me" TIFA +1 (GLITCHED use as many times as you like)
- "Kinda Hard" TIFA -1 (GLITCHED use as many times as you like)

17 When Cloud has the choice of who to think of first:
- Aeris first AERIS +3
- Barret first BARRET +3

18 When Cloud has the choice of who to think of second:
- Aeris second AERIS +1
- Barret second BARRET +1

19 Whilst leaving Midgar after the G-Bike sequence putting any of the following in your party will result in - AERIS +1, TIFA +1, and/or BARRET +1

--D1.07 B - The Nibelheim Incident

20a After the flashback, Barret remarks that he is leaving:
- "Wait a sec" NO EFFECT (leads to further dialogue)
- "Right" BARRET +1

20b After choosing "Wait a sec" in the previous dialogue choice:
- "Beautiful, just beautiful" BARRET +3
- "Is that all?" BARRET -1

21 Whilst exploring the houses of Kalm, a woman will ask for your thoughts on the convenience of Mako energy:
- "Yeah, Maybe" BARRET -2, AERIS -1, TIFA -1, and/or YUFFIE +1
- "You're full of it" BARRET +2, AERIS +1, TIFA +1, and/or YUFFIE -1
NOTE - Only characters in your party will be affected.

22 In the same house, another woman will ask for your thoughts on 'the old ways':
- "Yeah, maybe" BARRET +2, AERIS +1, TIFA +1, and/or YUFFIE -1
- "No way" BARRET -2, AERIS -1, TIFA -1, and/or YUFFIE +1
NOTE - Only characters in your party will be affected.

--D1.08 C - Fort Condor

23 When you first talk to the old guy:
- "I guess so" BARRET +5, AERIS +3, TIFA +3 and/or YUFFIE +2
- "Not interested" BARRET -5, AERIS -3, TIFA -3 and/or YUFFIE -2
NOTE - Only characters in your party will be affected.

24 When the old guy discusses his problem:
- "All right" BARRET +5, AERIS +3, TIFA +3 and/or YUFFIE +2
- "Not interested" BARRET -5, AERIS -3, TIFA -3 and/or YUFFIE -2
NOTE - Only characters in your party will be affected.

This is basically the same responses for recruiting Yuffie:

25a After defeating the Mystery Ninja in the screen with the save point:
- "All right" NO EFFECT
- "Not interested" YUFFIE +2

25b After selecting "Not interested":
- "......petrified" YUFFIE +2
- "You're gonna lose again" NO EFFECT

25c After selecting "......petrified":
- "Go ahead" NO EFFECT
- "Wait a second!" YUFFIE +2

25d After selecting "Wait a second!":
- "......That's right" YUFFIE +2
- "You kiddin'?" NO EFFECT

25e After selecting "......That's right":
- "......What's your name?" NO EFFECT
- "......Let's hurry on" YUFFIE +2

NOTE - You could purposely select the incorrect response on the final choice if you wanted to. This will retain the +8 points for Yuffie that you have gained, you can then repeat to keep raising her affection towards you indefinitely.

--D1.09 C - Cargo Ship

26 When Yuffie asks for some Tranquilizers, choose:
- "Here, use this" YUFFIE +4
- "Nope" YUFFIE -2

27 When Aeris talks about the Highwind, choose:
- "I'll take you someday" AERIS +2
- "I dunno..." AERIS -2

28 When Tifa remarks how much she hates war, choose:
- "Yeah..." TIFA +2
- "I don't know" TIFA -2

--D1.11 A - Gold Saucer

29 The first character that you choose to talk to will get either +3 or -2, depending on whether or not you choose them to accompany you. No other rating value shall change after the first dialogue choice has been made.

NOTE - If you choose no-one then the person with the highest affinity towards you will be chosen as your accompaniment. If this person is Barret then Red XIII will be chosen.

--D1.11 B - Corel Prison

30 The character chosen to accompany you to fight Dyne will receive: AERIS +10, TIFA +3 or YUFFIE +2

--D1.13 B - Gongaga Village

Having Tifa and/or Aeris in your party when you first talk to Zack's parents will result in some optional dialogue with them:

31a Talk to Tifa:
- "I just got lucky" TIFA +1
- "I worked hard for it" TIFA +1

31b Talk to Aeris:
- "Poor Guy" AERIS +1
- "...jealous...envious..." AERIS +2

Should you choose to simply ignore either one of them then you will receive -3 for the character/s that you blanked (simply leave Gongaga without talking to them).

--D1.14 A - Welcome Home Nanaki

Make sure that Barret is in your party when first entering Cosmo Canyon, then speak to him in the back of Tiger Lily's Weapon Store:

32a After Barret has finished talking for the first time:
- "Go on" BARRET +3 (GLITCHED use as many times as you like)
- "Not Really" NO EFFECT

32b After Barret has finished talking for the second time:
- "And then" BARRET +3
- "Yeah, whatever..." NO EFFECT *Choose this option for the glitch

After selecting Option 1 followed by option 2 you can leave and re-

enter the room to repeat the dialogue sequence, gaining +3 each time. The glitch ends once you select option 1 twice consecutively.

--D1.18 A - Wutai

33 Finishing Yuffie's sidequest will result in +10 for Yuffie.

WEIRDLY ENOUGH you do not receive any affection boost/drops for the choices you make in the church in Sector 5 when you first meet Aeris, so you can go ahead and call her a drunk if you like and it'll make no difference whatsoever. Nor does the dialogue choices you make in Costa Del Sol have any impact on the outcome. Lastly, Mt. Corel. It doesn't matter at all whether you take the 10 Phoenix Downs or not, your characters will still love you just the same (bizarre, I know).

¬¬¬

{DATING BARRET}:	EFFECT:	CURRENT SCORE:
01) In the train whilst talking to Jessie choose “Looking forward to it”	TIFA -3	A=50 T=27 Y=10 B=00 *
02) Buy a flower from Aeris and give it to Marlene	BARRET +5	A=50 T=27 Y=10 B=05 *
03) Don't talk to Tifa before riding the pinball machine	NO EFFECT	A=50 T=27 Y=10 B=05 *
04) When Tifa remarks that Cloud is abandoning his childhood friend, select “...Sorry”	NO EFFECT	A=50 T=27 Y=10 B=05 *

--E.01 F - Gold Saucer Date Script

Ok, so there is a fair amount of script that takes place during the date sequence, I only intend to narrate the bit that really matters - the conversation on the Gondola. There is a fair amount of sub-context in regards to Tifa's and Aeris's date, whereas Yuffie and Barret's date is purely comical.

If I get a strong enough demand to, I will take the time to write up the whole script of each date sequence, including the whole EDK bit, but only if enough people want me to.

{DATING AERIS}:

Aeris: Wow, how nice.
Aeris: Oh! Look, Cloud.
Aeris: It's so pretty.
Aeris: ......it's beautiful, isn't it?
Aeris: ......first off, it bothered me how you looked exactly alike.
Aeris: Two completely different people, but look exactly the same.
Aeris: The way you walk, gesture...
Aeris: I think I must have seen him again, in you...
Aeris: But you're different.
Aeris: Things are different...
Aeris: Cloud...
Aeris: I'm searching for you.
Cloud: .....?

Aeris: I want to meet you.
Cloud: But I'm right here.
Aeris: (I know, I know...what I mean is...)
Aeris: I want to meet......you.

_____
|
{DATING TIFA}: |_____

Tifa: Oh, how pretty.
Tifa: Look, Cloud.
Tifa: Oh, Cloud.
Tifa: ...it's really pretty, isn't it?
Tifa: Ok, I'm going to just go ahead and say it...
Cloud: ...what?
Tifa: Aeris would be able to just come out and say it, probably.
Tifa: Cloud...?
Tifa: Sometimes being old friends is hard.
Tifa: I mean, timing is everything.
Cloud: Yeah...
Tifa: Cloud...?
Tifa: I......
Tifa: ....

_____
|
{DATING YUFFIE}: |_____

Yuffie: Wow!
Yuffie: Geez!!
Yuffie: Cloud!
Yuffie: Cloud......? (Yuffie kisses Cloud on the cheek)
Cloud: .....
Yuffie: I just felt like doing that.
Cloud: .....
Yuffie: That's all.
Cloud: .....
Yuffie: H, hey!! Say something, why don't you!
Cloud: .....
Yuffie: .....gawd, I could just die.
Cloud: .....
Yuffie: Say something, PLEASE!
Cloud: .....something.

_____
|
{DATING BARRET}: |_____

Barret: Hey foo. What you wanna see fireworks with me for?
Cloud: Not having fun?
Barret: You should've asked one or the other!
Cloud: Which would you have asked?
Barret: Oh man, there just ain't no choice!
Barret: Tifa, Aeris.
Barret: Ah, Yuffie? (If you've recruited Yuffie)
Cloud: (hoo boy)
Barret: What the hell's that supposed to mean?
Barret: Hey, you don't mean...Marlene?
Barret: NO WAY! Forget it!
Barret: There ain't no way I'm lettin' a wacko like you anywhere near my
little Marlene!
Barret: She's my baby. My prized possession.
Barret: .....Marlene.

Barret: Wish I could've brought Marlene here. She'd love the fireworks.
Barret: Why the hell do I gotta be here with a foo like you...!
Barret: Shit...the more I think 'bout it the madder I get!
Barret: Damn fireworks anyways.
Barret: Shut up!!

{E.02} - Limit Breaks

A - About Limit Breaks
B - Leveling Up Your Limits
C - Best Places to Limit Train
D - Level 4 Limit Breaks
E - The Limit Breaks Themselves

{Limit Breaks}

--E.02 A - About Limit Breaks

Limit Breaks are powerful techniques that your players can use once their Limit gauge has completely filled up. In order to fill up your Limit gauge you must first receive enough damage; every time they get hit their Limit gauge will fill up slightly. The rate at which the gauge fills is proportionate to how much HP has been drained as a % of you max HP, aswell as the current Limit level that you have set for that character. To use your Limit Break you must select it as it appears in place of your basic attack, should you wish to save your Limit for later on (for say, a boss) then you will have to find a different command to select.

Here is a chart depicting how much HP must be drained for each character for their Limit gauge to be filled up completely:

	Lv 1:	Lv 2:	Lv 3:	Lv 4:
Cloud	47%	108%	144%	168%
Barret	43%	80%	124%	149%
Tifa	40%	111%	169%	188%
Aeris	66%	94%	107%	145%
Red XIII	65%	100%	129%	161%
Yuffie	66%	100%	133%	159%

Cait Sith	53%	60%	N/A	N/A
Vincent	67%	81%	106%	141%
Cid	66%	93%	126%	159%

Note that all figures have been rounded. Also note that Tifa requires the least amount of damage at level 1 whilst requiring the most amount of damage at level 4.

When your gauge has been filled to the max and your Limit becomes available, your gauge will start flashing rainbow colours. When this happens, the ATB (Active Time Battle) gauge will fill up at twice its normal rate allowing you to hastily use your Limit Break. Should you choose to save your Limit for another turn, the ATB will not fill up as quickly again until you've used your Limit and you've filled up the gauge once more. Once you have opted to use your Limit Break the said character will take priority over every other command, meaning he/she will always attack next even if it wasn't his/her turn to do so.

There are two Statuses that can affect the rate in which your Limit gauge fills up, these are Fury and Sadness. Fury will double the rate at which your gauge will fill whilst at the same time reducing the player's accuracy by 30%, whereas Sadness will halve the time it takes for your Limit to fill whilst reducing the amount of damage you take by 30%. You can inflict Fury on a character by using a Hyper, which can also be used to cure you of Sadness. You can inflict Sadness on a character by using a Tranquilizer, which can also be used to cure you of Fury. Unlike every other Status in the game Fury and Sadness are the only ailments that will not be removed from a character once a battle has finished, and will carry over to each forthcoming battle until the character/s have been cured.

It is also worth noting that a fair whack of the trophies that can be obtained a related to the Limit Breaks. In fact, 18 of the 36 trophies (50%) are Limit related; simply use each of the 9 character's first and last Limit Break to gain half of the available trophies.

--E.02 B - Leveling Up Your Limits

There are four Limit levels available for each character (excluding Cait Sith & Vincent), levels 1, 2 & 3 contain two commands to select from in-battle, and level 4 (being the ultimate level) only has one command to choose from. To see what levels are currently available for a character, goto 'Limit' in the main menus. When a character's Limit Break levels up you must manually set the Limit to the new level within this menu. This also enables you to backtrack to previous levels; some Limit Breaks hold unique properties, such as Aeris's Fury Brand and Barret's Mindblow.

There are two ways of Leveling up your Limit Breaks: 1) by getting x amount of kills and 2) by using your Limits x amount of times. Here is a chart depicting the required amount of kills and uses required to level up your Limits:

Lv 1-1	Lv 1-2	Lv 2-1	Lv 2-2	Lv 3-1	Lv 3-2

Cloud	Default	8 Uses	120 Kills	7 Uses	320 Kills	6 Uses
Barret	Default	9 Uses	80 Kills	8 Uses	160 Kills	6 Uses
Tifa	Default	9 Uses	96 Kills	7 Uses	192 Kills	6 Uses
Aeris	Default	8 Uses	80 Kills	6 Uses	160 Kills	5 Uses
Red XIII	Default	8 Uses	72 Kills	7 Uses	144 Kills	6 Uses
Yuffie	Default	8 Uses	64 Kills	7 Uses	128 Kills	6 Uses
Cait Sith	Default	N/A	40 Kills	N/A	N/A	N/A
Vincent	Default	N/A	40 Kills	N/A	96 Kills	N/A
Cid	Default	7 Uses	60 Kills	6 Uses	136 Kills	5 Uses

NOTE - To unlock the 3-1 Limit Break you must acquire the above kill count as a total, not including the 2-1 kill count i.e. Cloud requires 320 kills to unlock his 3-1, NOT 440.

So in order to unlock Limit 1-2 for Cloud, you must first use his 1-1 Limit 8 times. It is possible to unlock a character's 2-1 Limit before their 1-2 Limit by reaching the kill threshold prior to using the required amount of Limits, however you manually 'Set' your Limit Breaks in the menus to level 2 otherwise you will be stuck with your level 1 Limit Break/s. You also *must* unlock all 6 Limit Breaks in order to learn the ultimate level 4 Limit Break, more on that to follow.

Whilst trying to level up your 1-2 / 2-2 / 3-2 Limit it is highly recommended that you have your characters inflicted with Fury, aswell as keeping them in the front row. Cover works really well too. Once they have achieved the next level it is recommended that you remove the Fury Status as it can sometimes make the battle system a little fragmented. Whilst working towards your 2-1 / 3-1 Limit just concentrate on magic spells that will attack every character like Matra Magic, Trine or All=Lightning (for example).

There are other ways to help to level up your Limits. Aeris's 2-2 Fury Brand for example will completely fill up the other two characters Limit gauge to the maximum, meaning you can fly through to your X-2 Limits in no time. The Manipulate Materia is another great way to help with filling you Limit gauges. Seeing as a character's gauge will not fill up at all if you select another player to hit that character, being able to manipulate a powerful enemy (like the Valron) to hit that character instead is the best way to quickly fill up you Limit gauge.

Thanks to GideonD's Limit Break Mechanic FAQ I now know that the following applies:

- Kills made using Odin's Steel Cutting Sword will *not* count towards your your kill total.
- Kills made by poisoning an enemy will *not* count towards your kill total provided that the enemy died due to the Status effects of the Poison.
- Kills made whilst initially casting Bio *will* count towards your kill total.
- Kills made using an enemy that is manipulated will *not* count towards your kill total.

- Kills made using Death Sentence will *not* count towards your kill total.
- Kills made using the spell Death *will* count towards your kill total.
- Kills made using Flash *will* count towards your kill total.
- Kills and Limit Break uses gained in the Battle Arena will *not* count towards your kill total or your Limit Break use total.
- Bizarrely enough, if you mimic a Limit Break then the character that used Mimic will be unable to perform the initial casters move, but it will still count towards the mimickers Limit Break 'uses'.

Lastly, it is possible to use Limit Breaks to overflow. See the overflow section for more details - QSI Link [Damage Overflow Glitch].

--E.02 C - Best Places to Limit Train

---

1) Sector 4 Winding Tunnels

After playing the game from the start for roughly an hour or so you will find yourself in the Winding Tunnels after having jumped off a moving train (unscathed). North will be your destination, however south will lead you to the only place in the game where you can encounter an infinite amount of enemies, continuously, uninterrupted. No need to run around in circles, you can simply select the option to fight the 3 x Special Combatants as many times as you wish, or you can run away to continue on with the mission.

The main drawback here is that you cannot readily heal yourself, nor can you save the game in this area (once you continue on you will not be able to revisit the area). So basically, once you have run out of MP, Ethers and Potions you're screwed. Note that in the following area you will eventually find your first Tent of the game (next to the save point), so if you are desperate then you will have the chance to completely restore yourself. You'll also find an Ether as soon as you drop from the Winding Tunnels.

2) Mythril Mine (North-Western Cave)

After crossing the Midgar Zolom marsh on the back of a Chocobo you will come to the Mythril Mine. Head left one screen, then head into the northern cave. There are some fairly powerful foes here, such as the Ark Dragon whose Flame Thrower attack will pack a punch. You can also encounter enemy formations in groups of 5, which is very useful indeed. Elemental=Choco/Mog in someone's weapon is the best way to deal with the Ark Dragon, All=Fire for the Castanets and All=Earth for the Crawlers. Don't forget to steal as many Grand Gloves as possible from the Madouge as they sell for 600 gil each.

3) Junon Area Forests

The 5 x Capparwire that you encounter here are awesome, as their Grand Spark move will deliver quite a lot of damage, making this area one of the best Limit training grounds on0 Disc 1 (in my opinion). The Formulas carry Boomerangs which can be sold for 700 gil each, and they can also hit all allies for medium damage with their Cross Impulse move.

4) Mt. Corel Drawbridge Area

This is the same area where you can steal the 10 x Phoenix Downs. Here you will encounter Search Crowns in formations of 5, you'll also find the Bagnadrana which can deliver a fair amount of damage with their Poison Breath. Both enemies are susceptible to L4 Suicide.

5) Under Junon ('T' Intersection)

After obtaining the buggy you can return to Junon by driving your buggy into Costa Del Sol, then bribing the man at the docks to let you stowaway in the cargo ship. Then head to the 'T' intersection in between upper and lower Junon and head south to come to a red panel near to where the troops are being drilled. Activate the panel to sound the alarm which will enable random encounters. Here you will engage with the strongest foes to date, the Death Machine and the Slalom.

Although you'll only encounter enemies in groups of as much as 3, the Death Machine can deliver a punch with its W Machine Gun attack. Make sure to steal a few Smoke Bombs from the Slaloms aswell as they massively help out at the Battle Arena. I wouldn't recommend training here for too long though as they EXP gained here is way too high, and if you power level here too much then you'll just end up making the game way too easy.

6) Mt. Nibel (Inner Caves)

With enemy formations of 5 this is a great place to train, although the EXP gained is a little high. The Dragon's Flame Thrower (Enemy Skill) is quite powerful, and the Kyuvilduns are weak against fire. Both enemies are susceptible to L4 Suicide.

7) Nibel/Rocket Town Forests

This is without a doubt the best Limit training ground in the whole game as the Battery Caps will come in groups of 6, which is the only place in the game where you can randomly encounter enemies with a 6 x formation. You can also manipulate the Valron to have it use its Dive Kick move which is Gravity based; it will always take out 25% of your max HP. It doesn't matter how far into the game you are, this should always be your first choice to train your Limits.

{Level 4 Limit Breaks}

--E.02 D - Level 4 Limit Breaks

Each character's level 4 Limit Break must be learned by first obtaining a special item called a Limit Break Manual, you must then unlock all 6 previous Limit Breaks for that character before they can learn their ultimate Limit Breaks. Vincent has only 3 Limit Breaks to unlock before he can learn his level 4 Limit as he does not have X-2 Limits to learn. Cait Sith does not have a level 4 Limit Break; in fact Cait Sith only has two Limits in total to choose from (Dice and Slots).

Once you have obtained the Limit Manual you will be able to find it within the 'Item' menu. If you try to use the manual on either a character that isn't ready to use it yet, or on the wrong character entirely then you will hear an error sound followed by a negative quote from that character, but if he/she is ready to learn it then you will get a positive quote and a

'success' sound. The level 4 Limit will then be available to select in the 'Limit' menu.

Here is how to obtain each characters Level 4 Limit Manual:

Cloud - {Omnislash} ("OK, I got it!")
("I'm not too sure but...")
("Don't really care.")

Obtained in the Battle Arena at the Gold Saucer. This prize is first available in Disc 1 after you have obtained the Tiny Bronco and will cost a whopping 51,200 BP, so you'd better refine your Super Dunk skills if you want it that early on. Alternatively, come back once you've obtained the Highwind to see the price reduced to 32,000 BP.

Barret - {Catastrophe} ("Heh! No sweat!")
("D-d-d-damn! My head hurts!")
("Got nuthin' to do with me!")

Obtained after the Huge Materia quest in Mt. Corel on Disc 2. After you have saved North Corel (or not) you can talk to the woman in the house on the second floor to receive Barret's Catastrophe.

Tifa - {Final Heaven} ("Hmm, so that's it.")
("I'm not too sure, but...")
("I've got the wrong person.")

Obtained on Disc 2 after you have Cloud back from Mideel. Head over to Nibelheim to play on Tifa's piano, then play the notes:

X, Sq, Tr, L1+Tr, L1+Sq, X, Sq, Tr, L1+X, O, X, Sq, X

You will then receive a note from Tifa's mentor, along with her Level 4 Limit Manual, Final Heaven.

Aeris - {Great Gospel} ("This should be okay.")
("Not quite ready yet.")
("It isn't me.")

Obtained on Disc 1 by firstly obtaining the Mythril which can then be traded for the Great Gospel. Once you have escaped from the Corel Prison on Disc 1 you will have the buggy, you can then return to Junon by driving the buggy directly into Costa Del Sol, then speaking to one of the sailors on the docks to travel back to Junon. When you leave Junon you will be in your buggy, head towards the larger forest and you'll find part of the river that can be crossed, head over it and then travel north to find a secret cave.

Inside the cave you will find a sleeping man who will disclose to you one of your battle stats. If he tells you a stat other than your battle count then leave the cave and re-enter until he tells you how many times you have fought. If the last two digits are identical (i.e. 111, 255, 477 etc.) then he will give you one of two prizes. If both digits are even then you will receive a Bolt Ring, if they are odd however then you shall receive the Mythril.

You won't be able to do anything with the Mythril until you have

obtained the Tiny Bronco, you can then visit the lone house south of Gongaga to talk to the weapon seller. He will happily exchange the contents of one of his boxes for the Mythril, the larger of the two boxes contains a measly Gold Armlet (which can be bought from Rocket Town for 2000 gil), however the smaller of the two chests on the 2nd floor holds Aeris's Level 4 Limit Manual, the Great Gospel.

Red XIII - {Cosmo Memory} ("Right, I've got it!")
("I don't get it.")
("It has nothing to do with me".)

Obtained on Disc 1 after defeating Lost Number in the Shinra Mansion in Nibelheim. Cosmo Memory is the first Level 4 Limit Manual available in the game, followed by Aeris's Great Gospel. In the western wing of the 2nd floor of the Shinra Mansion you will find a safe, enter the following combination:

Right 36, Left 10, Right 59, Right 97

You must not go past the correct digit or you will fail the sequence and have to start over. Once the correct code has been entered you will have to fight a boss, Lost Number who will drop Cosmo Memory.

Yuffie - {All Creation} ("Cool! This should do it!")
("Nope! I don't get it!")
("Oh wow, I'm totally clueless!")

Obtained after completing Yuffie's optional sidequest in Wutai on Disc 1. Once you have regained all of your Materia, equip Yuffie with your best load out and head over to the large pagoda. Here you can face 5 bosses. After defeating Godo, the final boss, you will receive Yuffie's All Creation.

Cait Sith - N/A ("It's got nothing to do with me.")

Cait Sith does not have a level 4 Limit.

Vincent - {Chaos} ("I'm becoming less human...")
("I'm still not ready.")
("It has nothing to do with me.")

Obtained on Disc 2 after gaining Cloud back from Mideel. You will need to then obtain a Chocobo that can climb mountains, or continue on with the story until you have obtained the submarine. Directly south of North Corel you fill find a closed off Lagoon, head to it on your Chocobo to find Lucrecia's Cave. Alternatively you can dive in you submarine and head north until you reach an underwater ravine, then take a sharp left to come to a long underwater tunnel which will lead to the aforementioned Lagoon.

Make sure that Vincent is in you party before entering the cave. When you enter you will learn a bit about Vincent and his past. Then head out of the cave and complete 10 random battles which cannot be done in the grassy area outside of the cave as no enemies lurk there. Once you're ready, head back into the cave to find that Lucrecia has left Vincent's ultimate weapon, Death Penalty along with his Level 4 Limit Manual, Chaos.

Cid - {Highwind} ("Hey I like this! Lemme use it!")
("Hmph, don't quite get it but...")

("Not me! Give it to someone else!")

Obtained on Disc 2 once you have obtained the submarine. Head over to the submarine dock near the Gold Saucer then submerge to find the Sunken Gelnika. Be wary as sometimes Emerald Weapon is sitting right in front of the crashed plane. You will find the Level 4 Limit Manual in a chest in the Cargo Room.

--E.02 E - The Limit Breaks Themselves

CLOUD STRIFE

Level 1: (47% of max HP to fill)

1-1 {BRAVER} default	1-2 {CROSS-SLASH} use Braver 8 times
Attacks one opponent	Attacks and Paralyzes one opponent
Single attack dealing 3x normal Power.	Single attack dealing 3.25x normal Power and inflicting Paralyze 100% of the time.

Level 2: (108% of max HP to fill)

2-1 {BLADE BEAM} 120 kills	2-2 {CLIMHAZZARD} use Blade Beam 7 times
Diffuses after hitting one opponent	Attacks one opponent
After hitting 1 target for 3.5x normal Power, every remaining enemy is hit for 1x Power.	Single attack dealing 4.375x normal Power.

Level 3: (144% of max HP to fill)

3-1 {METEORAIN} 320 kills	3-2 {FINISHING TOUCH} use Meteorain 6 times
Attacks all opponents	Blows away all opponents
6 attacks hitting random targets dealing 1.625x normal Power.	Any enemies that are vulnerable to death will be killed instantly, all others will be hit for 3.125x normal Power.

Level 4: (168% of max HP to fill)

4 {OMNISLASH} +---------- Slices up all opponents ----------+ 15 attacks hitting random targets for critical hits dealing 0.75x normal Power.	Use the item Omnislash: Won from the Battle Square from Disc 1 onwards

Every single one of Cloud's Limit Breaks are offensive making Cloud a very strong player, especially once he's unlocked Meteorain. Omnislash is by far his best Limit Break and can even be stronger than Knights of the Round, but seeing as it can be quite gruelling to obtain on Disc 1 I recommend unlocking Meteorain asap then sticking with that for the duration until you have obtained the Highwind on Disc 2.

BARRET WALLACE

Level 1: (43% of max HP to fill)

1-1 {BIG SHOT} default +---------- Attacks one opponent ----------+ Single attack dealing 3.25x normal Power.	1-2 {MINDBLOW} use Big Shot 9 times +---------- Reduces one opponent's MP ----------+ Single Gravity based attack dealing MP damage.

Level 2: (80% of max HP to fill)

2-1 {GRENADE BOMB} 80 kills +---------- Attacks all opponents ----------+ Single attack hitting all enemies dealing up to 3.375x normal Power (more targets equals less damage).	2-2 {HAMMERBLOW} use Grenade Bomb 8 times +---------- Blows away one opponent ----------+ If an enemy is vulnerable to death then it will be killed instantly.

Level 3: (124% of max HP to fill)

3-1 {SATELLITE BEAM} 160 kills +----------	3-2 {ANGERMAX} use Satellite Beam 6 times +----------

	Attacks all opponents			Attacks all opponents	
Single attack hitting all enemies for critical hits dealing 2.1875x normal Power.			18 attacks hitting random targets dealing 0.5x normal Power.		

Level 4: (149% of max HP to fill)

4 - {CATASTROPHE}	Use the item Catastrophe:
Damages all opponents	Found on Disc 2 in Corel after the Train Ride Event by talking to a girl in one of the houses
10 attacks hitting random targets dealing 1.25x normal Power.	

Barret's Limits are mainly offensive which is consistent with his heavy hitting persona. Hammerblow isn't that great whilst Angermax and Catastrophe are awesome. Don't underestimate Mindblow as it is one of the few moves that can deplete an enemy's MP whilst also being obtainable at a very early stage in the game.

TIFA LOCKHEART

Level 1: (40% of max HP to fill)

1-1 {BEAT RUSH} default	1-2 {SOMERSAULT} use Beat Rush 9 times
Attacks an opponent	Attacks an opponent
Single attack hitting a random target dealing 1.25x normal Power.	Single attack hitting a random target dealing 1.375x normal Power.

Level 2: (111% of max HP to fill)

2-1 {WATERKICK} 96 kills	2-2 {METEODRIVE} use Waterkick 7 times
Attacks an opponent	Attacks an opponent
Single attack hitting a random target dealing 1.5x normal Power.	Single attack hitting a random target dealing 1.625x normal Power.

Level 3: (169% of max HP to fill)

3-1 {DOLPHIN BLOW}	3-2 {METEOR STRIKE}
192 kills	use Dolphin Blow 6 times
Attacks an opponent	Attacks an opponent
Single attack hitting a random target dealing 1.75x normal Power.	Single attack hitting a random target dealing 1.875x normal Power.

Level 4: (188% of max HP to fill)

4 - {FINAL HEAVEN}	Use the item Final Heaven:
Attacks an opponent	Found on Disc 2 in Nibelheim after the Life Stream Events by playing Tifa's piano
Single attack hitting a random target dealing 2.625x normal Power.	

Tifa's Limit Breaks are fairly unique in the sense that they will 'stack'. When a new Limit is learned Tifa will still hit with all of her previous Limits she has learned to date, including the new one learnt. When using her Limit Break in-battle a fruit machine style slot game will initiate. Stopping one of the reels on 'hit' will mean she will use that Limit for normal damage, landing on 'miss' means that she will not use that Limit at all and landing on 'yeah' will result in double damage for that Limit. The later Limits will have 'yeah's' that are surrounded by 'miss's'.

It's worth noting that you'll need to have her Limit Break set to the level that you wish to learn for her Limit uses to count. Let's say you had acquired 96 kills before using Beat Rush 9 times and you had then set her Limit to level 2. The game would then stop counting the times that you used Beat Rush and you would not be able to unlock Somersault until you had set her Limit to level 1 again. Also, if you land on a 'miss' then the game would not regard that as a use of that Limit and would not add one to the Limit Break count.

AERIS GAINSBOROUGH

Level 1: (66% of max HP to fill)

1-1 {HEALING WIND}	1-2 {SEAL EVIL}
default	use Healing Wind 8 times
Restore HP of all allies	Constrains and stops magic of all opponents

Restores all party member HP by 50% of their max HP.	Inflicts all enemies with Paralyze and Silence.

Level 2: (94% of max HP to fill)

2-1 {BREATH OF EARTH} 80 kills	2-2 {FURY BRAND} use Breath of Earth 6 times
Cure all Status ailments of all allies	Raises party's Limit gauge to the max, except yours
Cures all party members of any Status ailments.	Fills up the other two allies Limit gauges to the maximum.

Level 3: (107% of max HP to fill)

3-1 {PLANET PROTECTOR} 160 kills	3-2 {PULSE OF LIFE} use Planet Protector 5 times
Makes all allies invincible one time	Fully restores all allies
Temporarily makes all allies invincible.	Revives and cures all party members whilst removing all Status ailments.

Level 4: (145 % of max HP to fill)

4 - {GREAT GOSPEL}	Use the item Great Gospel: Found on Disc 1 by Gongaga from the Blacksmith. After obtaining the buggy and then the Mythril, you can exchange the Mythril for the Great Gospel
Fully restores all allies, makes them invincible one time	
Temporarily makes all allies invincible whilst reviving and curing all party members and removing any Status ailments.	

] [
] Regarded as the White Mage of the game, Aeris's Limits are primarily [
] defensive with the exception of Seal Evil. Whilst her 1-1 Healing Wind has [
] its uses, it's only when we get to 2-2 and above however that Aeris really [
] starts to shine. Whether you're Limit Break training or battling a boss, [
] the ability to fill your other two players Limit's gauge up to the max is [
] incredibly useful. Also, Aeris's Lv 4 Limit is available very early on in [
] the game. In fact, there's only three other characters that can get their [
] Lv 4 Limit on the go as early as Disc 1! Planet Protector and Great Gospel [
] are the only moves in the game that can inflict the Peer-less Status [
] (invincibility). [
]_____[

RED XIII

Level 1: (65% of max HP to fill)

1-1 {SLED FANG} default +---------- Attacks one opponent ----------+ Single attack dealing 3x normal Power.	1-2 {LUNATIC HIGH} use Sled Fang 8 times +---------- Casts [Haste] and raises "Defence %" for all allies ----------+ Casts Haste on all party members and raises Red XIII's defence% by 50% for every player still alive.

Level 2: (100% of max HP to fill)

2-1 {BLOOD FANG} 72 kills +---------- Attacks and drains the HP/MP from one opponent ----------+ Single attack dealing 1.25x normal Power whilst draining HP and MP at the same time.	2-2 {STARDUST RAY} use Blood Fang 7 times +---------- Attacks all opponents ----------+ 10 attacks hitting random targets dealing 0.625x normal Power.

Level 3: (129% of max HP to fill)

3-1 {HOWLING MOON} 144 kills +---------- Begins fighting wildly ----------+ Casts Haste and Berserk on Red XIII whilst also boosting his attack by 60%	3-2 {EARTH RAVE} use Howling Moon 6 times +---------- Attacks all opponents ----------+ 5 attacks hitting random targets dealing 0.875x normal Power.

Level 4: (161% of max HP to fill)

4 - {COSMO MEMORY}

+---------- Attacks all opponents ----------+

Use the item Cosmo Memory:

Found on Disc 1 in Nibelheim in the Shinra mansion by opening the safe on the 2nd floor

Single attack hitting all enemies dealing 7.8125x normal Power.

] [
] Red XIII's Limit's are mainly offensive with the exception of Lunatic High [
] and Howling Moon. The fact that Red XIII's Level 4 Limit Manual is [
] obtainable before any other characters is the reason I like to have him on [
] my team early-on alongside Aries. Given the strength of Cosmo Memory you [
] should be able to hit with 9999 damage whilst still being a relatively low [
] level. Once Red XIII starts to level up however I would recommend using [
] Earth Rave or even Stardust Ray seeing as the damage inflicted will [
] surpass Cosmo Memory's, not to mention the fact that the Limit gauge is [
] easier to fill at lower levels. Lunatic High is also great as it gives you [
] the ability to cast Haste early on in the game. [
]_____[

YUFFIE KISARAGI

Level 1: (66% of max HP to fill)

1-1 {GREASED LIGHTNING} default	1-2 {CLEAR TRANQUIL} use Greased Lightning 8 times
Attacks opponent with weapon after cutting them	Restores HP of all allies
Single attack dealing 3.125x normal Power.	Restores all party member HP by 50% of their max HP.

Level 2: (100% of max HP to fill)

2-1 {LANDSCAPER} 64 kills	2-2 {BLOOD FEST} use Landscaper 7 times
Attacks all opponents	Continuously attacks all opponents
Single Earth based attack hitting all enemies dealing 3x normal Power.	10 attacks hitting random targets dealing 0.625x normal Power.

Level 3: (133% of max HP to fill)

3-1 {GAUNTLET} 128 kills	3-2 {DOOM OF THE LIVING} use Gauntlet 6 times
Attacks all opponents	Continuously attacks opponents
Single attack hitting all enemies dealing 1.75x normal Power with critical hits whilst ignoring enemies defence.	15 attacks hitting random targets dealing 0.625x normal Power.

Level 4: (159% of max HP to fill)

4 - {ALL CREATION}	Use the item All Creation
+---------- Attacks all opponents ----------+	Found on Disc 1 in Wutai after completing the Pagoda Challenge.
Single attack hitting all enemies dealing 8x normal Power.	

With the exception of Clear Tranquil all of Yuffie's Limit Breaks are offensive. As with Red XIII, Yuffie's level 4 Limit will hit for tremendous damage and can be obtained relatively early on in the game (after you have obtained the Tiny Bronco). As Yuffie levels up along with her Attack power, I suggest reverting back to her 3-2 Doom of the Living as it will deliver more overall damage whilst requiring less HP damage for the Limit gauge to fill.

Note that in order to obtain All Creation you must first beat the boss Godo, and if you were to do so before obtaining the Enemy Skill Trine then you may have jeopardised your chance to obtain the Materia Overlord Achievement as Godo is one of three enemies that will use Trine. For what it's worth, I suggest waiting until you have obtained the Highwind before defeating Godo for the All Creation Limit Break Manual as so that you can obtain Trine for all four Enemy Skill Materias. See section G.02 for more info.

VINCENT VALENTINE

Level 1: (67% of max HP to fill)

1 - {GALIAN BEAST} default	
+---------- Turns into Galian Beast! ----------+	20% increase to Defence 50% increase to Dexterity 130% increase to HP
Berserk Dance - Physical attack - 70% chance Single attack hitting one target for 1.5x normal Power.	
Beast Flare - Magic attack, Fire based - 30% chance Single attack hitting all targets for 3.75x normal Power.	

Level 2: (81% of max HP to fill)

2 - {DEATH GIGAS} 40 kills	
+---------- Turns into Death Gigas! ----------+	50% increase to Defence 70% decrease to MDefence 20% decrease to Dexterity 200% increase to HP
Gigadunk - Physical attack - 70% chance Single attack hitting one target for 2.625x normal Power.	

| Livewire - Magic attack, Lightning based - 30% chance
| Single attack hitting all targets for 4.375x normal Power.

Level 3: (106% of max HP to fill)

| 3 - {HELLMASKER}
| 96 kills
| +---------- Turns into Hellmask! ----------+ 50% increase to Defence
| +---------- Turns into Hellmask! ----------+ 50% increase to MDefence
| Splattercombo - Physical attack - 70% chance
| 5 attacks hitting random targets for 0.5x normal Power.
| Nightmare - Indirect attack - 30% chance
| Inflicts one target with Sleep, Poison, Silence, Confusion Frog and Small.

Level 4: (141% of max HP to fill)

| 4 - {CHAOS} Use the item Chaos: Found on Disc 2 in Lucrecia's Cave
| +---------- Transforms to Chaos! ----------+ 100% increase to Defence
| +---------- Transforms to Chaos! ----------+ 100% increase to MDefence
| Chaos Saber - Physical attack - 70% chance
| Single attack hitting all enemies dealing 2.5x normal Power.
| Satan Slam - Physical attack - 30% chance
| Any enemies that are vulnerable to death will be killed instantly, all others will be hit for 5.625x normal Power.

] [
] Vincent, like Cait Sith has an unusual Limit Break system in more ways than one. Firstly there is no X-2 to Vincent's Limit's, and secondly the Limit's he uses can be very unpredictable. Similar to the Status Berserk, you will lose control of Vincent for the remainder of the battle whilst he transforms himself into a beast that is capable of performing deadly attacks on your enemies. The biggest hindrance being that some of these moves have Elemental properties, and you could find yourself healing your foes instead of harming them. The two moves that have Elemental properties are 1-1 Beast Flare which uses Fire and 2-1 Live Wire which uses Lightning.
] [
] When Vincent transforms his HP will be restored, however if Vincent were to be killed during the battle then he would resort back to his former self. Whilst transformed, you will not be able to choose which attack Vincent uses; he will have a 70% chance of using is primary attack and a 30% chance of using his secondary attack. He will also be immune to Berserk, Confusion and Frog.
]

CID HIGHWIND

Level 1: (66% of max HP to fill)

1-1 {BOOST JUMP} default +---+ | Attacks an opponent | +---+ Single attack dealing 3.25x normal Power.	1-2 {DYNAMITE} use Boost Jump 7 times +---+ | Attacks all opponents | +---+ Single attack hitting all enemies dealing 2.25x normal Power.

Level 2: (93% of max HP to fill)

2-1 {HYPER JUMP} 60 kills +---+ | Attacks all opponents, | sometimes dealing [Death] | +---+ Single attack hitting all enemies dealing 3.5x normal Power and inflicting Death 20% of the time.	2-2 {DRAGON} use Hyper Jump 6 times +---+ | Attacks and drains the HP/MP | from one opponent | +---+ Single attack dealing 1.25x normal Power whilst draining HP and MP at the same time.

Level 3: (126% of max HP to fill)

3-1 {DRAGON DIVE} 136 kills +---+ | Continuously attacks, | sometimes dealing [Death] | +---+ 6 attacks hitting random targets dealing 1.4375x normal Power and inflicting Death 28% of the time.	3-2 {BIG BRAWL} use Dragon Dive 5 times +---+ | Attacks all opponents | +---+ 8 attacks hitting random targets dealing 1.125x normal Power.

Level 4: (159% of max HP to fill)

4 - {HIGHWIND} +---+ | Causes big damage to all | opponents | +---+	Use the item Highwind: Found on Disc 2 in the Sunken Gelnika
18 attacks hitting random enemies dealing 0.6875x normal Power.	

]

[

] Cid's earlier Limit Breaks aren't jaw-dropping, however his later Limits [
] prove to be extremely powerful. Being able to hit 18 times, Cid's Highwind [
] could potentially be the strongest Limit Break in the game, closely [
] followed by Barret's Angermax and Cloud's Omnislash. [
]_____[

CAIT SITH

Level 1: (53% of max HP to fill)

1-1 {DICE} default
Rolls the dice, damage

Cait Sith starts off with 2 dice and every 10 levels he gains he receives an extra die with a maximum of six. He will gain an extra dice at level 30, 40, 50 & 60.

The sum of the dice multiplied by the quantity of 'repeat' numbers multiplied by 100 will be the resulting damage total to a single enemy. So, if you were to roll 1,2,2,2,4,6 then the resulting damage would be 17 x 3 x 100 = 5100 HP. 17 is the sum of the die and 3 is the amount of times the number two landed, hence 17 x 3 x 100.

2 dice damage range	300 to 2400. Average - 817 HP
3 dice damage range	600 to 5400. Average - 1546 HP
4 dice damage range	1000 to 9600. Average - 2554 HP
5 dice damage range	1500 to 9999. Average - 3743 HP
6 dice damage range	2100 to 9999. Average - 5026 HP

Level 2: (60% of max HP to fill)

2-1 {SLOTS} 40 kills
What'll come out next...?

Similar to Tifa's Limit only this time it's even more like a fruit machine in the sense that you are aiming to match 3 slots together in a row. If all 3 slots are different then Cait Sith will use Toy Box which will cast one of 7 different basic attacks:

Boulder	Single attack hitting one target	for 2x normal damage
Icicles	Single attack hitting one target	for 2.5x normal damage
Weight	Single attack hitting all targets	for 3x normal damage
Hammer	Single attack hitting one target	for 3.5x normal damage
Fat Chocobo	Single attack hitting one target	for 4x normal damage
Hell House	Single attack hitting one target	for 4.5x normal damage

```
|                                                                              |
|   Comets      - Single attack hitting one target  for 5x   normal damage     |
|                                                                              |
| Should all three symbols match however then Cait Sith will use one of       |
| his special attacks:                                                         |
|                                                                              |
|   3 x STAR - Mog Dance:                                                      |
|              The party's HP/MP & Status is fully restored.                   |
|                                                                              |
|   3 x CROWN - Toy Soldier:                                                   |
|               Single attack hitting all targets for 5x normal damage.       |
|                                                                              |
|   3 x BAR - Summon:                                                          |
|             A random Summon will be used costing 0 MP. The higher the        |
|             level of Cait Sith, the higher the chance will be of getting     |
|             a better summon.                                                 |
|                                                                              |
|   3 x MOG - Transform:                                                       |
|             Cait Sith morphs with the other two characters to become one     |
|             big giant! His new stats are the combined stats of all three     |
|             players, without exceeding 9999HP, 999MP or 255 strength etc.    |
|                                                                              |
|   3 x HEART - Lucky Girl:                                                    |
|               Every player will have 100% critical hits until the battle     |
|               ends or the character dies.                                    |
|                                                                              |
|   3 x CAIT SITH - Game Over:                                                 |
|                   All enemies are instantly killed provided that they        |
|                   are attacking from the same side. Overrides Death          |
|                   immunity, making Game Over very useful indeed.             |
|                                                                              |
|   2 x CAIT SITH, 1 x BAR - Death Joker:                                      |
|                            All allies are instantly killed provided that     |
|                            they are attacking from the same side.            |
|                            Overrides Death immunity, making Death Joker      |
|                            very frustrating indeed.                          |
|______________________________________________________________________________|
```

```
]                                                                              [
] Cait Sith is the only Character in the game that doesn't have a Level 4      [
] Limit Break. In fact, seeing as he has a move that can end the game          [
] instantly, I'd say that Cait Sith is probably one of the more obsolete       [
] characters in the game, although if you know how to use him correctly Cait   [
] Sith could be regarded as an asset to your squad. Requiring only 60% to      [
] fill his level 2 Limit (which is the least of all characters Lv 2 Limits),   [
] Cait Sith's Slots offers a variety of 'random' goodies with the exception    [
] of the Death Joker (save often if your using Cait Sith). Here's how to       [
] manipulate the reels to land on the sequence your choice:                    [
]                                                                              [
]  The first trick to mention is the Square trick. By pressing square you      [
]  will stop the reels completely, and by repeatedly pressing square you can  [
]  slow the reels right down which will make it easier to memorise the        [
]  pattern. This trick can also be used whilst in the Battle Arena when       [
]  trying to land on a specific handicap, and can also be applied when using  [
]  Tifa's Limit Breaks.                                                       [
]                                                                              [
]  The main problem is the so called 'Evil Flag'. When the Evil Flag is       [
]  turned off then the second and third reel will automatically align         [
]  themselves to match the first symbol you landed on, provided that you      [
]  stopped the 2nd and 3rd reels within 5 symbols of the matching symbol.     [
```

When the Evil Flag is activated however, the 2nd and 3rd reel will stop in the exact place that you selected it to, making it very difficult to match up three symbols. To make it harder still, if you did manage to align the first two symbols then the third reel will jump one place after the one you selected.

The Evil Flag's status is determined firstly by which symbol you have landed on, and secondly by the internal game clock:

- Crown - Evil Flag is off
- Star - Evil Flag is off
- BAR - Evil Flag is off if Game Time is divisible by 2 (50%)
- Mog - Evil Flag is off if Game Time is divisible by 2 (50%)
- Heart - Evil Flag is off if Game Time is divisible by 4 (25%)
- Cait Sith - Evil Flag is off if Game Time is divisible by 64 (1.5625%)

Now to learn the reels themselves. Each reel has 16 symbols in the following order:

REEL 1:	REEL 2:	REEL 3:
==BAR==	==BAR==	==BAR==
Crown	Crown	Heart
Star	Star	Crown
Cait Sith	Cait Sith	Star
==BAR==	Crown	==BAR==
Heart	==BAR==	Crown
Mog	Heart	Mog
Crown	Mog	Crown
Star	Star	Star
Cait Sith	Cait Sith	Heart
Mog	Crown	Crown
==BAR==	==BAR==	==BAR==
Crown	Mog	Star
Mog	Star	Cait Sith
Star	Crown	Mog
Heart	Heart	Crown

How to land on the desired sequence:

3 x Star - Mog Dance - Fully recovers all party members

Reel 1: Look for Cait Sith
Reel 2: Look for Bar
Reel 3: Look for Mog (Evil Flag is always off :)

3 x Crown - Toy Soldier - Attacks all opponents for 5x damage

Reel 1: Look for Star after Cait Sith
Reel 2: Look for Mog
Reel 3: Press confirm at any time (Evil Flag is always off :)

3 x Bar - Summon - Casts a random Summon

Reel 1: Look for Crown after Mog OR Heart after Mog
Reel 2: Look for Star
Reel 3: Look for Mog (Evil Flag has a 50% chance of being off)

3 x Mog - Transform - Cait Sith absorbs the other two party members to become a giant!

Reel 1: Look for BAR after Crown OR Crown after Star OR Star after Heart
Reel 2: Look for BAR after Mog
Reel 3: Look for Heart (Evil Flag has a 50% chance of being off)

3 x Heart - Lucky Girl - All players attack with critical hits until the battle ends or a player is killed

Reel 1: Look for Mog after Crown
Reel 2: Look for Cait
Reel 3: Look for Cait (Evil Flag has a 25% chance of being off :(

3 x Cait Sith - Game Over - All enemies are instantly killed, regardless of Status immunities

Reel 1: Look for BAR after Heart OR Mog after BAR
Reel 2: Look for Mog
Reel 3: Look for BAR after Heart (Evil Flag has a 1.5625% chance of being off)

2 x Cait Sith, 1 x Bar - Death Joker - All allies are instantly killed, regardless of Status immunities

Reel 1: Look for BAR after Heart OR Mog after BAR
Reel 2: Look for Crown after BAR
Reel 3: Look for Crown after Mog OR Star after Cait Sith (Evil Flag has a 1.5625% chance of being off)

For a much better visual description please visit:
http://ff7.fr/limites.php

That almost concludes my Cait Sith Limit Break 'slots' tutorial. Although the above info should make it easier for you to get the desired sequence, it can still be fairly tricky and requires an amount of practise and patience before you have mastered Cait Sith's slots. Regard it as training for the slots in the Battle Arena in the Gold Sauce seeing as the mechanics work the same in regards to tapping square to slow the reels down, and landing on the correct handicap will result in large amounts of BP, although it's MUCH easier to manipulate the reels there as you'll only have 3 icons per slot.

One last thing to mention, here are the chances of Cait Sith summoning which Summon, depending on his level. Note that the text display at top of the screen will display the Summon's name, as opposed the actual attack name, with the exception of Fat Chocobo, and Grunge Lance.

This list has been arranged in sequence of likelihood:

SUMMON:	L 00-20	L 21-41	L 42-62	L 63-83	L 84-99
Kjata	12.25%	12.93%	13.30%	13.30%	12.93%
Bahamut	13.30%	13.30%	12.93%	12.25%	11.32%
Alexander	10.20%	11.32%	12.25%	12.93%	13.30%
Leviathan	12.93%	12.25%	11.32%	10.20%	8.95%
Phoenix	7.63%	8.95%	10.20%	11.32%	12.25%
Odin	11.32%	10.20%	8.95%	7.63%	6.30%
Neo Bahamut	5.02%	6.30%	7.63%	8.95%	10.20%
Titan	8.95%	7.63%	6.30%	5.02%	3.85%
Hades	2.85%	3.85%	5.02%	6.30%	7.63%
Ramuh	6.30%	5.02%	3.85%	2.85%	2.04%

```

The Turtle Paradise Mini-Game is basically a quest to find 6 posters dotted around the world (well, technically there are 7 posters). Once you have found all 7 you can enter the Turtle Paradise located on the western side of Wutai to talk to the bar tender to claim your prizes:

Power Source, Guard Source, Magic Source, Mind Source, Speed Source, Luck Source and a Megalixir

NOTE - You will not be able to enter Wutai until you have obtained the Tiny Bronco around 3/4 into Disc 1.

Here are the locations of all posters found around Gaia:

```
 1) | Turtles Paradise News             |
    | No.1                              |
    |                                   |
    | For delicious wine                |
    | with a nice zing to it…….         |
    |                                   |
    | Stop by the “Turtle's Paradise”!! |
    |___________________________________|
```

Found in Midgar in Sector 5 just after you meet Aeris properly. Search the top floor of the south-eastern house in the markets. At the top of the stairs of the boys room you will find {Turtle Paradise Poster #1}.

If you missed it the first time then you will get another chance when you revisit the area a little later on with Barret and Tifa. If you missed it that time round then you will have to return once you have obtained the Key to Sector 5 on Disc 2, see section E.20 for info on how to obtain it.

    |                                           |
    | The end of another hard day. Wouldn't you |
    | like to sit back with a tall cool one?    |
```

```
   |                                          |
   | You can at the Turtles Paradise!!        |
   | Stop in today!                           |
   |                                          |
   | There's nothing like                     |
   | a smooth one after work!                 |
   |__________________________________________|
```

THIS POSTER IS PERMANENTLY MISSABLE
The first opportunity you will
get to read this will be during your first raid on the Shinra HQ early on Disc 1. On the first floor on the north-east corner you will find a huge bulletin board. Search it thoroughly to find {Turtle Paradise Poster #2}.

If you missed it the first time round then you will have to wait until you are near to the end of Disc 2 when you raid the Shinra HQ for a second time. If you miss it here then you will have failed this side quest forever.

```

```

During section D1.04 B - Wall Market you will have to dress Cloud up as a woman in order to proceed with the game, and you can vary the selection of attire he wears. Depending on your selection, either Cloud, Tifa or Aeris will be chosen to be Don Corneo's 'date' for the evening.

The minimum requirement to enter Don Corneo's mansion is just a dress and a wig, however you could if you wished enter the mansion with a dress, wig, cologne, tiara, underwear and make-up. Each choice you make will have an effect on the scoring system, and your final score will affect the outcome:

```
 2 - 11: Tifa  will be chosen as Don's date
12 - 18: Aeris will be chosen as Don's date
19 - 25: Cloud will be chosen as Don's date
```

Having Cloud chosen will unlock PS4 users the Consummate Cross-dresser Trophy.

Here is how the scoring system works:

```
 {DRESS}

+5 - Silk Dress   (Soft, Shimmers)
+3 - Satin Dress  (Soft, Shiny)
+1 - Cotton Dress (Clean)

 {WIG}

+5 - Blonde Wig (Beat Big Bro)
+3 - Dyed Wig   (Draw with Big Bro)
+1 - Wig        (Lose to Big Bro)

 {COLOGNE}

+5 - Sexy Cologne   (Digestive)
+3 - Flower cologne (Deodorant)
+1 - Cologne        (Disinfectant)

 {TIARA}

+5 - Diamond Tiara (200 gil)
+3 - Ruby Tiara    (100 gil)
+1 - Glass Tiara   (50 gil)

 {UNDERWEAR}

+0 - Bikini briefs (Group Room)
+0 - Lingerie      (&$#% Room)

 Note - The Bikini briefs were supposed to grant you +5, the Mystery Panties
        was supposed to grant you +3 and the Lingerie was supposed to grant
        you +1 but for unknown reasons the scoring system along with the
        Mystery Panties was phased out of the final game.

 {MAKE-UP}
```

+5 - 25% chance (Wind sound, difficult to hear)
+3 - 38% chance (Healing sound)
+1 - 38% chance ('Tink' sound)

{E.05} - Elements

A - About Elements
B - Elemental Materia
C - Obscure Elements
D - The Elements Themselves
E - Battle Items, Accessories And Materia List

--E.05 A - About Elements

Elements are a recurring theme for the Final Fantasy series. The most notorious of these are Fire, Ice and Lightning, and many enemies will have Elemental attributes that will affect the way the battle system plays out.

The 8 variables are (in order of priority):

Auto-Hit - The target cannot evade the attack.
Death - The target is instantly killed.
Recovery - The target is completely recovered.
Nullify - The damage dealt will be 0.
Absorb - The damage dealt will be absorbed.
Halve - The damage dealt will be halved
Double - The damage dealt will be doubled.

There are nine basic Elements in Final Fantasy VII and a number of obscure Elements that will be detailed further on. In the order that they are obtainable these 9 Elements are:

Lightning	Ice	Fire	Poison	Earth	Wind	Water	Gravity	Holy
LHT	ICE	FRE	PSN	ERT	WND	WTR	GRV	HLY

All of the Elemental attributes of all enemies are listed area-by-area throughout the walkthrough using the abbreviations as shown above. You should always try to use Elements that an enemy is weak against whilst veering away from Elements that an enemy is strong against. Remember that by using the Elemental Materia you can protect yourself from Elemental attacks by equipping it to your armour, and you can also add an Element onto your basic physical attacks by equipping it to your weapon. More on the Elemental Materia below.

It's important to note that Poison is also a Status, however an enemy's Elemental strength/weakness to poison will not correlate to the enemies immunity/vulnerability to the poison Status, although a mastered Elemental Materia placed in your armour paired with Poison *will* protect you from both the Element and the Status Poison.

A few other things to point out - nearly all Bosses are immune to Gravity, with the exception of the Midgar Zolom, Godo and Emerald Weapon. Similarly, virtually all flying creatures are weak against Wind but will nullify Earth based attacks. Also, Vincent's Level 1 Limit Break, Galian Beast, has an attack called Beast Flare that will hit with Fire damage, and his Level 2 Limit Death Gigas has an attack called Live Wire that will hit with Lightning damage. Yuffie's 2-1 Limit Break is Earth based.

Lastly, there are more Elements in play than the basic 9 as listed above, the most notable being the Restorative Element (RES). See the Obscure Elements below for more details.

{Elemental}

¬¬¬

equipped the Materias onto you armour or weapon, respectively.

When you place the Elemental Materia in your weapon, the level of the Elemental will not vary the effect of the attack, however when placed in your armour the current level of the Elemental will vary the effect. At level 1 you will take halve the damage of the Element that it is paired with, at level 2 you will nullify the damage and at level 3 you will absorb the damage. If you were to pair a level 3 Elemental with Lightning in your armour, then you could use Lightning based attacks to heal yourself! Remember that your Spirit and Magic stat will affect the amount HP you are healed by.

Remember that you can view your current Elemental strengths in the 'Status' menu; press confirm to scroll through the three tabs.

NOTE - Pairing Fire with the Elemental on your armour is the only way to obtain the Enemy Skill Beta from the Midgar Zolom at a low level (along with the Status Sadness).

Remember that some Summons also have Elemental properties. Below is a list of every 'pairable' Materia:

ELEMENT:	MAGIC:	SUMMON:
Lightning	Lightning	Ramuh
Ice	Ice	Shiva
Fire	Fire	Ifrit, Phoenix
Poison	Poison	--------
Earth	Earth	Titan
Wind	---------	Choco/Mog, Typoon
Water	---------	Leviathan
Gravity	Gravity	---------
Holy	---------	Alexander

- It is recommended that you equip the Elemental Materia with Lightning as soon as you obtain it seeing as many enemies in the Shinra HQ are weak against lightning.
- Once you receive the Choco/Mog Materia in the Chocobo ranch you can switch to Wind based attacks seeing as a large amount of enemies from that point on are 'flying', meaning they will beak weak vs Wind but strong vs Earth.
- The Great Glacier on Disc 2 is home to many creatures that are weak against Fire.

Remember that it is always advisable to pair a Summon as opposed to Magic with your Elemental Materia seeing as you are not penalised as much.

Lightning will have the following effect on your stats:
Strength -1, Magic +1, Max HP -2%, Max MP +2%.
Ramuh will *not* affect your strength but will affect your Magic, Max HP and Max MP by the same values.

Below is a chart depicting the quantity of enemies that are weak and strong against each Element:

	Absorb	Nullify	Halve	Total	Double
Fire	12	4	12	28	15
Ice	11	5	5	21	8

Lightning	7	5	3	15		28
Earth	4	52	3	59		4
Poison	17	6	0	23		2
Gravity	0	70	12	82		5
Water	5	18	5	28		4
Wind	0	1	0	1		29
Holy	0	1	0	1		10

So you can see that Wind, Lightning and Holy are the favourable Elements to equip with the Elemental onto your weapon, whilst Earth, Gravity, Water and Fire should be avoided, with the exception of certain areas (like the Great Glacier).

¬¬¬

instant Death to your opponent, and casting a Phoenix Down will have a 25% chance to cause instant Death (because a Phoenix Down cures you of 25% HP and a Megalixir/Elixir/X-Potion cures 100% of your HP). Regen is *not* of the restorative Element and therefore it won't act to gradually deplete your opponents HP.

More on Restorative below.

{Cut}:

The Cut Element is primarily attributed to attacks that 'slice' such as swords, namely all of Cloud's weapons, one of Barret's and one of Cid's. There are 36 enemy attacks that use the Cut Element.

{Hit}:

Hit is one of the most used Physical attacks in the game, and is primarily attributed to attacks that use blunt force such as clubs or batons. Most of Tifa's weapons, some of Barret's, all of Aeris's, most of Red XIII, all of Cait Sith's and one of Cid's use the Hit Element. There are 103 enemy attacks that use the Hit Element.

{Punch}:

Surprisingly enough, Tifa's attacks do not conform to the Punch Element. Thrust would have been a more appropriate title seeing as attacks that penetrate fall under the Punch Element, such as daggers and spears. 3 of Barret's weapons, two of Tifa's and most of Cid's fall under the Punch category. 31 enemy attacks use the Punch Element.

Some enemies will be weak against Punch, such as the Desert Sahagin found near Cosmo Canyon. When you attack it with one of Cid's weapons, you will not do double damage, rather, you will have a 100% attack rate instead. The same applies to the Sahagin and the Ceasar found in Sector 6 Sewers. Thanks to NFITC1 for clarifying some of that up.

{Shoot}:

All attacks that are made from a distance are considered to be of the Element Shoot, such as guns or shurikens. Most of Barret's weapons, one of Red XIII's, all of Yuffie's and all of Vincent's are considered to be of the Element Shoot. 82 enemy attacks fall under the Shoot Element.

{Shout}:

Attacks that are made through sound are considered to be Shout, and weirdly enough that doesn't mean Cait Sith (probably because Cait's in-battle animation is to hit his target as opposed to shout at it). No allies use Shout and only 12 enemy attacks fall under the Shout Element.

{Hidden}:

Interestingly enough, Hidden isn't actually called Hidden, it just the title that has been dubbed for this Element seeing as it doesn't actually have a name. It is also sometimes referred to as 'The 10th Element'. An attack has to have an Element assigned to it, and by default if an attack has no Element then it will be assigned as Hidden by default.

To protect yourself from Hidden you would need to pair Elemental with any *non* Elemental Materia, with the exception of Restore and any Support

(blue) Materia. So, if you were to link Elemental=Luck Plus (for example) on your armour then you would then be protected from any attacks that use the Hidden Element. Seeing as there are no enemies that are weak against Hidden, linking Elemental=(Hidden) to your weapon would be pointless.

In the Japanese original version of the game there were 15 direct attacks that used the Hidden Element, but in the later SCEA/SCEE (or NTSC/PAL) versions all but one of these moves had the Hidden Element removed from their attacks. The attack that was left in the game was Ultimate WEAPON's 'Ultima Beam', and you can still absorb/nullify/halve the effects of this attack by protecting yourself from Hidden. There are also a number of passive attacks that use Hidden such as Status changes and Status protection, however you cannot defend yourself from a 'Hidden' attack if no damage is being directly dealt (although you can protect yourself from the Status).

¬¬¬

Associated Materia: (FRE)

Magic - Fire, Fire2, Fire3 (Fire), Flare (Contain Lv 4)
Enemy Skill - Beta, Flame Thrower, Magic Breath
Summon - Ifrit, Phoenix, Kjata, Typoon

Associated Items: (FRE)

Battle Items:-

Fire Fang - Uses Fire2 on all enemies
Fire Veil - Uses Fire3 on all enemies
Molotov - Fire damage on one opponent

Armour:-

Ziedrich - Halves all Elemental attacks (including obscure Elements)
Dragon Armlet - Halves Lightning, Ice & Fire based attacks
Fire Armlet - Absorbs Fire based attacks
Minerva Band - Nullifies Ice, Fire, Gravity & Holy based attacks
Can only be worn by females

Accessories:-

Fire Ring - Nullifies Fire based attacks
Tetra Elemental - Absorbs Lightning, Ice, Fire & Earth based attacks

Associated Enemies: (FRE)

Strong Against = 28 [A] Absorb = 12 [N] Nullify = 4 [H] Halve = 12

[H] Air Buster - Sector 5 Reactor (BOSS)

Fire2	- Med dmg	- Rude III	(Sunken Gelnika)
Fire	- Weak dmg	- Poodler	(Sunken Gelnika)
Diamond Fire	- Med dmg	- Diamond WEAPON	(Midgar Area)
Flare	- Huge dmg	- Behemoth	(Midgar Sector 8)
Fire2	- Med dmg	- Manhole	(Midgar Sector 8)
Throw	- Med dmg to all	- Elena	(Winding Tunnels)
Napalm Bomb	- Big dmg	- Grosspanzer-Mobile	(Mako Cannon)
Fire2	- Med dmg	- Poodler Sample	(Mako Cannon)
Fire2	- Med dmg	- Bad Rap Sample	(Mako Cannon)
Fire3	- Big dmg	- Pollensalta	(North Crater)
*Magic Breath	- Big dmg to all	- Parasite	(North Crater)
Lv 3 Flare	- Huge dmg	- Allemagne	(North Crater)
Fire3	- Big dmg	- Bizarro Sephiroth	(North Crater)
Ruby Flame	- Huge dmg	- Ruby WEAPON	(Gold Saucer Desert)

{ICE}: ICE

There are 8 enemies that are weak against Ice and 21 enemies that are strong against Ice. The majority of Fire based creatures are vulnerable to Ice, which unfortunately are few and far between. Shiva is the only Ice Summon in the game and can damage all foes with her Diamond Dust move.

Ice is initially equipped on Cloud at the beginning of the game, and is available from most Materia Shops in Midgar. Notable Ice based enemies include Boundfat, Snow, Ice Golem, Lessaloploth and Icicle.

Associated Materia: (ICE)

Magic	- Ice, Ice2, Ice3 (Ice), Freeze (Contain Lv 1)
Enemy Skill	- Magic Breath
Summon	- Shiva, Kjata, Typoon

Associated Items: (ICE)

Battle Items:-

Antarctic Wind	- Uses Ice2 on all enemies
Ice Crystal	- Uses Ice3 on all enemies

Armour:-

Ziedrich	- Halves all Elemental attacks (including obscure Elements)
Aurora Armlet	- Absorbs Ice based attacks
Dragon Armlet	- Halves Lightning, Ice & Fire based attacks
Minerva Band	- Nullifies Ice, Fire, Gravity & Holy based attacks Can only be worn by females

Accessories:-

Ice Ring	- Nullifies Ice based attacks
Tetra Elemental	- Absorbs Lightning, Ice, Fire & Earth based attacks

|__________________________________________________________________________|

+--------------------------+
|   {LIGHTNING}:    LHT    |
+--------------------------+
```

There are 28 enemies that are weak against Lightning and 15 enemies that are strong against Lightning. Most mechanical creatures are weak to Bolt, and the majority of these enemies can be found in Midgar at the beginning of the game, and then again in Midgar towards the end of Disc 2. Vincent's Level 2 Limit Break, Death Gigas uses a move called Live Wire which is Lightning based. Ramuh is the Lightning based Summon and he will strike down on his foes with his mighty Judgement Bolt.

Lightning is initially equipped on Cloud at the beginning of the game, and is available from most Materia Shops in Midgar. Notable Lightning based creatures include Needle Kiss, Crown Lance, Thunder Bird and Garuda.

{EARTH}: ERT

There are 4 enemies that are weak against Earth and 59 enemies that are strong against Earth, making Earth one of the worst Elements in the game. All flying creatures are immune to Earth, whilst at the same time being weak against Wind. Yuffie's 2-1 Limit Break, Landscaper hits with Earth damage. Titan is the only Earth based Summon using his Anger of The Land attack.

Earth can first be bought from the Materia Shop in Kalm. Notable Earth based creatures include Land Worm and Sea Worm.

Associated Materia: (ERT)
Magic - Quake, Quake2, Quake3 (Earth), Break (Contain Lv 2)
Summon - Titan, Typoon

Associated Items: (ERT)
Battle Items:-

| Earth Drum - Uses Quake2 on all enemies |
| Earth Mallet - Uses Quake3 on all enemies |
| |
| Armour:- |
| |
| Ziedrich - Halves all Elemental attacks (including obscure Elements) |
| Escort Guard - Nullifies Lightning, Poison, Earth & Water based attacks |
| Can only be worn by males |
| |
| Accessories:- |
| |
| Tetra Elemental - Absorbs Lightning, Ice, Fire & Earth based attacks |

Associated Enemies: (ERT)

| Tremor - Med dmg to all - Schizo Right (Gaea's Cliff) |

+----------------------+
| POISON : PSN | {Poison Element}
+----------------------+

There are 2 enemies that are weak against Poison and 23 enemies that are strong against Poison. Whilst the Poison Element and the Poison Status are completely separate, there are instances where the two are linked. For example, a Lv 2 Elemental paired with Poison in ones armour will also defend

against the Status Poison. Similarly, if you were to pair the Added Effect Materia with Poison you would also nullify the Elemental damage.

Poison is first available from a chest in Hojo's Laboratory in the Shinra HQ and can then be bought from Kalm. Notable Poison based creatures include Brain Pod, Zenene, Flower Prong, Slalom and Malboro.

Bio2	- Med dmg	+ Poison	- Godo	(Wutai Pagoda)
Bio2	- Med dmg	+ Poison	- Malboro	(Gaea's Cliff)
Acid Rain	- Med dmg	+ Poison	- Epiolnis	(Ancient Forest)
Evil Poison	- Med dmg	+ Darkness	- Bad Rap	(Sunken Gelnika)
Poison Fang	- Huge dmg	+ Poison	- Unknown 3	(Sunken Gelnika)
Bio2	- Med dmg	+ Poison	- Malboro	(North Crater)
Poison Fang	- Huge dmg	+ Poison	- Dragon Zombie	(North Crater)
Bio2	- Med dmg	+ Poison	- Jenova-SYNTHESIS	(North Crater)

NOTE - There are more attacks that are Poison based than is shown above, however I have only listed the moves that attack with the Poison Element (and therefore damages). A full list of Poison based Status changing attacks can be found in section E.09.

{GRAVITY}: GRV

There are 5 enemies that are weak against Gravity and a whopping 82 enemies that are strong against Gravity. Seeing as the majority of Bosses are immune to Gravity based attacks (46 to be precise) Demi should be avoided, unless of course you're in a regular battle; in which case Gravity can be quite useful. The nature of Gravity is that it doesn't deal direct damage, instead it deals damage that is proportionate to ones max HP, meaning a tough enemy can be made not so tough using the right Gravity based attack (such as Laser, which is identical to Demi2).

Demi will drain 1/4 of your opponents max HP, Demi2 & Laser will drain 1/2 of your opponents Max HP and Demi3 will drain 3/4 of your opponents max HP, without breaking the 9999 cap. Emerald WEAPON is one of the few Bosses to Halve Gravity as opposed to completely nullifying it, meaning you can still use Gravity to inflict 9999 each hit. Pairing Gravity with the Elemental Materia on your weapon will only make your physical attacks deal double damage against enemies weak to Gravity, your attacks won't become completely Gravity based if that makes sense; you won't start attacking for damage proportionate to your targets Max HP.

You can first obtain a Gravity based attack when you reach Corel Prison by learning Laser from Death Claw, you can then obtain the Gravity Materia when you reach the Cave of The Gi. Notable Gravity based creatures include Valron. That's it, just Valron.

Associated Materia: (GRV)

Magic - Demi, Demi2, Demi3 (Gravity)
Enemy Skill - Laser

Associated Items: (GRV)

Battle Items:-

Graviball - Uses Demi on all enemies
T/S Bomb - Uses Demi2 on all enemies

Armour:-

Ziedrich - Halves all Elemental attacks (including obscure Elements)
Minerva Band - Nullifies Ice, Fire, Gravity & Holy based attacks
Can only be worn by females

Associated Enemies: (GRV)

```

```
+----------------------+
|   {WATER}:    WTR    |
+----------------------+
```

There are 4 enemies that are weak against Water and 28 enemies that are strong against Water making Water a terrible Element to use. The only Water based Summon is Leviathan who uses a move called Tidal Wave.

You can first obtain a Water based attack when you reach the Gold Saucer Area by learning Aqualung from the Harpy. Notable Water based creatures include Sahagin, Desert Sahagin, Jenova-LIFE, Acrophies and Serpent.

+---------------------+
|   {WIND}:    WND    |
+---------------------+

There are 29 enemies that are weak against Wind and 1 enemy that is strong
against Wind, making Wind probably the best Element to have in the game. All
flying creatures are weak against Wind, whilst at the same time being strong
against Earth. Although Choco/Mog's in-battle attacks are non-elemental, you
```

will still be able to pair it with the Elemental Materia for Wind based attacks/defence. The same applies for Typoon.

You can first obtain a Wind based Materia (Choco/Mog) at the Chocobo Ranch. It is recommended that you equip it straight away as a lot of enemies from that point onwards will be weak against Wind. Notable Wind based creatures include Formula, Zuu & Tonadu (although all will be weak vs Wind).

```

Tornado Wave - Med dmg	- Diver Nest	(Path to Underwater Reactor)	

{HOLY}: HLY

There are 10 enemies that are weak against Holy and 1 enemy that is strong against Holy. Enemies that are weak against Holy are usually regarded as Undead, but not always. Annoyingly enough, by the time you obtain the only Holy based Materia in the game you'll have already encountered the majority of enemies that are weak to Holy. The Materia in question is Alexander, and can rain damage with his attack 'Judgement'.

The important thing to note is to not confuse Holy with the Restorative Element. *Most* enemies that are weak against Holy will also absorb the Restorative Element, meaning that Potions and other healing moves will harm your enemy. Most, but not all. The Parasite for example (North Crater) and the Soul Fire (Cave of The Gi) will take double damage should you pair Alexander with Elemental on your weapon, while Curative items and spells will just heal them normally.

It's also worth pointing out that not a single enemy contains an attack that is Holy based, so the Holy Nullifying effect of the Minerva Band is effectively pointless. You can first obtain the only Holy based Summon, Alexander whilst traversing through the Great Glacier on Disc 2. There are no Holy based creatures in the game.

Associated Materia: (HLY)

Summon - Alexander

|_________________________________________________________________________________|

+----------------------------+
|   {RESTORATIVE}:    RES    |
+----------------------------+

There are 8 enemies in the game that can absorb the Restorative Element, and
as such can be harmed by healing moves and items. These enemies are generally
considered to be 'Undead' creatures. Notable Undead creatures include Ghost,
Gi Nattak and Dragon Zombie.

Note that casting White Wind on Undead creatures will deal damage equal to
the casters current HP, whilst at the same time causing Petrify.

\---/

¬¬¬

the shops on the upper-right floor.

Here is what you can buy from Fort Condor:

DISC 1:

ITEM SHOP		MATERIA SHOP	
Potion	50 gil	Fire	600 gil
Phoenix Down	300 gil	Lightning	600 gil
Hyper	100 gil	Ice	600 gil
Tranquilizer	100 gil	Restore	750 gil
Tent	500 gil		

DISC 2 & 3:

ITEM SHOP		MATERIA SHOP	
Potion	50 gil	Throw	10,000 gil
Phoenix Down	300 gil	Manipulate	10,000 gil
Ether	1500 gil	Deathblow	10,000 gil
Hyper	100 gil	Destruct	9000 gil
Tranquilizer	100 gil	All	20,000 gil
Tent	500 gil		
S-Mine	1000 gil		

On the upper-left shack you'll be able to view the Condor and its egg by sitting at the viewpoint. You can also talk to the man there that will trigger a Shinra attack, allowing you to take part in the Fort Condor Mini-Game.

Before engaging in battle you must have 4000 gil as a reserve in your wallet. If you wanted to you could just let the FC faction 'handle it themselves', but to do this they must have 3000 gil in their wallet. Select 'Contribute gil' to see how much funding they currently have, and to donate amounts of 500, 1000, 2000, 3000 or 5000 gil. You will not receive any battle prizes this way, and therefore this is a pointless way to defeat the Shinra.

NOTE - There will be battles that will be impossible to win seeing as you won't actually be able to take part in them for various reasons. These battles will be considered as 'won' provided the faction had enough gil to fight the Shinra, so make sure to donate at some point! No prizes will be given for these battles however.

--E.06 B - The Prizes

There are some pretty decent prizes up for grabs, but you must win the mini-game in order to win the prize; the game is considered 'lost' if one of the enemies makes it to the shack, resulting in a mandatory battle with the CMD. Grand Horn. Also, the battles themselves are usually only available for a small window, and are very easy to miss completely.

If you were to lose/miss a battle then it is worth noting that you would not lose the prize that was available, rather you would lose the final prize (if that makes sense). So, let's say you took part in and won 10 battles, but you had missed 3 of them along the way then your prize for your 10th battle would be the same prize for the 10th battle, and *not* the 13th battle.

NOTE - The final 'mandatory' battle is the only battle that is *not* considered lost if the CMD. Grand Horn reaches the shack; you'll still be able to retrieve the prizes (Huge Materia and Phoenix Materia). This is actually the recommended strategy as he'll drop the Imperial Guard, which is an awesome piece of armour.

BATTLE 01 - This battle is fought when you first visit Fort Condor after the Mythril Mines but before resting at Junon.
Enemies - 11
Prize - Magic Comb (Double growth weapon for Red XIII)

BATTLE 02 - This battle is fought after resting at Junon but before entering into the water with Mr Dolphin.
Enemies - 20
Prize - Peace Ring (Protects from Berserk, Confusion, Fury and Sadness)

BATTLE 03 - This battle is fought after getting in the water with Mr Dolphin but before jumping to the upper platform.
Enemies - 20
Prize - 3 x Ethers (although the game will display 'Tincture')

BATTLE 04 - This battle is fought after obtaining the Buggy but before entering Cosmo Canyon.
Enemies - 25
Prize - 1 x Megalixir

BATTLE 05 - This battle is fought after Bugenhagen opens the door leading to the Cave of The Gi but before descending the rope. You must not drive past the Cosmo Canyon before entering otherwise the Buggy will break down and you won't be able to return to Junon.
Enemies - 25
Prize - 5 x Hi-Potions (although the game will display 5 Potions)

BATTLE 06 - This battle is fought after completing The Cave of The Gi but before talking to Shera in Rocket Town.
Enemies - 25
Prize - 5 x Hi-Potions (although the game will display 5 Potions)

BATTLE 07 - This battle is fought after talking to Shera but before talking to Cid. This is the longest (and last) hike back to Fort Condor.
Enemies - 30
Prize - Superball (Powerful weapon for Yuffie)

BATTLE 08 - This battle is fought after obtaining the Tiny Bronco but

before obtaining the Keystone from the Gold Saucer.
Enemies - 30
Prize - 3 x Turbo Ethers

BATTLE 09 - This battle is fought after the Date at the Gold Saucer but before entering the Temple of The Ancients.
Enemies - 30
Prize - 3 x Turbo Ethers

BATTLE 10 - This battle is fought after completing The Temple of The Ancients but before using the Lunar Harp in the Sleeping Forest.
Enemies - 35
Prize - 5 x X-Potions (although the game will display nothing)

BATTLE 11 - This battle is fought after using the Lunar Harp in the Sleeping Forest but before sleeping in the Forgotten Capitol.
Enemies - 35
Prize - 5 x X-Potions (although the game will display nothing)

BATTLE 12 - This battle is fought after sleeping in the Forgotten Capitol but before descending to fight Jenova-LIFE.
Enemies - 35
Prize - 5 x X-Potions (although the game will display nothing)

BATTLE 13 - This battle is fought at the beginning of Disc 2 before entering the Icicle Inn.
Enemies - 40
Prize - 3 x Elixirs

BATTLE 14 - This battle cannot be fought seeing as it takes place whilst Tifa and Barret are being held captive by the Shinra.

BATTLE 15 - This battle cannot be fought seeing as it takes place whilst Tifa and Barret are being held captive by the Shinra.

BATTLE 16 - This battle cannot be fought seeing as it takes place whilst Tifa and Barret are being held captive by the Shinra.

BATTLE 17 - This battle cannot be fought seeing as it takes place whilst Tifa and Barret are being held captive by the Shinra.

BATTLE 18 - This battle cannot be fought seeing as it takes place whilst Tifa and Barret are being held captive by the Shinra.

BATTLE 19 - This battle is fought after obtaining the Highwind but before visiting Mideel.
Enemies - 40
Prize - 3 x Elixirs

```
|_____________________________________________________________________________|
|                                                                             |
| BATTLE 20 - This battle cannot be fought seeing as it takes place whilst    |
|             Tifa and Cloud are in Mideel.                                   |
|_____________________________________________________________________________|
|                                                                             |
| !!FINAL BATTLE!!                                                            |
|                                                                             |
| BATTLE 21 - This is a mandatory battle that is fought during the Huge       |
|             Materia Quest. You must fight and defeat the CMD. Grand Horn    |
|             in order to obtain the Imperial Guard.                          |
|   Enemies - 45                                                              |
|     Prize - Huge Materia, Phoenix Materia, Imperial Guard                   |
|_____________________________________________________________________________|
```

For the final fight you will not need to have 4000 gil as a reserve. Also, if you were to lose to the CMD. Grand Horn then you would not be met with a 'Game Over' screen, instead you would just be kicked out of Fort Condor forever, also losing the Huge Materia. If this happens then you can still obtain the Phoenix Materia from Bone Village, see section E.12 for more info.

NOTE - Although many of the items look fairly basic it is definitely worth completing at least 7 battles to obtain Yuffie's Superball, Red XIII's Magic Comb and the Peace Ring (the Peace Ring will massively help out at the Shinra Mansion in Nibelheim).

--E.06 C - About The Battles

Including the final battle there are 15 battles to be fought. In order to succeed you must defend yourself against a horde of Shinra that will try to make their way up the side of the Reactor. If any single enemy makes it to the shack at the top then you have lost the battle and will have to fight the CMD. Grand Horn. To win you must defeat all enemies that appear, including the Commander that appears at the very end.

NOTE - It is possible to avoid fighting the Commander. If you were to defeat every single enemy that is in play before the Commander was to show up then you will win the battle automatically, regardless of how far into the battle you are; to do this you would have to go all out on the offensive. Similarly, if the Commander were to appear and you were able to defeat him then the battle would end instantly, regardless of how many other enemies were still left in play.

Before the battle begins you will be given the opportunity to place as many units as you please (with a limit of 20), provided you have enough gil as placing units down will cost you. This is why a 4000 gil reserve is necessary to take part. You will only be able to plant your units roughly half way down the field, a red line will indicate how far down you can go. You will also be able to plant down units mid-battle, so you don't have to spend a bucket-load before the battle has begun (I usually just plant 3).

**Any remaining units that are still alive at the end of the battle will be refunded to you at 200 gil per unit, regardless of how much they initially cost.

Once you have your starting line ready you can begin the game with X. Once

the battle has begun you can speed up the game by pressing R1 and slow it down using L1, a white indicator at the bottom right hand side of the screen will indicate the current game speed. The bar on the left hand side will indicate how many enemies and allies are on the field along with the how far up the Reactor the enemy is; once the enemy is roughly 7/8ths of the way up a 'warning' indicator will start flashing. Make sure to plant some units by the shack if this happens. Note that you can also pause the game using Start.

To give a unit a command simply click and point to send one of your units marching downhill towards the enemy. As your troops move downhill so will the 'red line', meaning you can plant fresh units right in the middle of the battle ground if you wish. When a unit encounters an enemy a turn-based battle will begin. You can take part manually by pressing confirm when prompted, or you can let it play out automatically by pressing cancel (recommended). By letting the battle play out automatically you will have the time to keep your eye on what's going on over the whole playing field, you can also try slowing down the speed whilst making decisions then speeding it back up again when you're ready to proceed.

When it comes to choosing which units to select there should only be 3 that you are interested in - The Attacker, The Defender and The Shooter. Think of it as Rock, Paper Scissors; the three enemy types that you will encounter (aside from the Commander) are Beast, Barbarian and Wyvern.

```
  Attacker - Defeats Beast     - Defeated by Barbarian - Cost 420 gil
  Defender - Defeats Barbarian - Defeated by Wyvern    - Cost 440 gil
  Shooter  - Defeats Wyvern    - Defeated by Beast     - Cost 520 gil
```

The Attacker moves the quickest, The Defender hits the strongest and The Shooter can hit from afar. Also, The Fighter costs 400 gil, and while it has no strengths/weaknesses it does hit for quite a lot and has decent HP. An enemy that is weak against one of your units will receive double damage from that unit whilst at the same time only delivering half damage, and vice-versa. All of the other units aren't really that great, but can be used to help you out if you wish. As you progress and complete more battles new types of deployable units will become available, but as long as you know what you're doing you should only ever have to rely on the 3 units as mention above.

Here is a list of each unit available:

UNIT	COST	POWER	HP	RANGE	STRONG VS	WEAK VS
{Fighter}	400 gil	30	200	1	N/A	N/A
{Attacker}	420 gil	25	180	1	Beast	Barbarian
{Defender}	440 gil	35	220	1	Barbarian	Wyvern
{Shooter}	520 gil	20	160	1 - 3	Wyvern	Beast
{Repairer}	480 gil	10	160	1	N/A	N/A
{Worker}	400 gil	10	160	1	N/A	N/A
{Stoner}	480 gil	20	100	1 - 4	N/A	N/A
{Tristoner}	1000 gil	35	150	1 - 5	N/A	N/A
{Catapult}	480 gil	18	100	1 - 5	N/A	N/A

{Fire Catapult}	600 gil	25	120	1 - 6	N/A	N/A

NOTE - The Tristoner is available after you have completed your 4th battle and the Fire Catapult is available after you have completed your 7th battle. They will both be available for the final battle regardless of whether or not you'd previously unlocked them.

A repairer will heal an ally for 10 HP per move. A worker will place a bomb to surprise the enemy (allies cannot be harmed by bombs). The bottom 4 units will all hit enemies from a distance, and are fairly useless although there are times that their range comes in handy.

Here is a list of enemy units:

UNIT	POWER	HP	RANGE	STRONG VS	WEAK VS
{Beast}	25	180	1	Shooter	Attacker
{Barbarian}	15	130	1 - 3	Attacker	Defender
{Wyvern}	20	140	1	Defender	Shooter
{Commander}	60	230	1	N/A	N/A

Here is how much HP each unit takes and receives against each enemy:

(The first entry is how much damage the *Beast* will *take* from the fighter)

	BEAST		BARBARIAN		WYVERN		COMMANDER	
UNIT	TAKE	DEAL	TAKE	DEAL	TAKE	DEAL	TAKE	DEAL
Fighter	30	25	30	15	27	20	15	50
Attacker	40	12	27	22	20	22	12	50
Defender	30	25	52	7	24	30	17	50
Shooter	10	37	16	15	30	10	6	50
Repairer	10	25	10	15	9	20	5	50
Worker	15	25	15	15	13	20	7	50
Stoner	20	25	16	15	6	20	10	50
Tristoner	30	25	24	15	9	20	15	50
Catapult	18	25	14	15	14	20	12	50
Fire Catapult	25	25	20	15	20	20	12	50
Worker's Bomb	15		15		13		17

```
|                                                                              |
|   If there are less than 3 members in the team then you will always face     |
|   the Lv 19 CMD. Grand Horn. This will take place during battles 2 & 3.      |
|                                                                              |
|   If the average party level is below 19 then you will always face the       |
|   level 19 CMD. Grand Horn. If the average party level is above 25 then      |
|   you will always face the CMD. Grand Horn level 25.                         |
|                                                                              |
|   If your average party level is between 19 - 25 then the battle ranking     |
|   system comes into play:                                                    |
|                                                                              |
|                                                                              |
| Battles 1-3 - Rank 1 - CMD. Grand Horn Lv 19 is always fought.               |
|                                                                              |
| Battles 4-6 - Rank 2 - CMD. Grand Horn Lv 19 is fought if 15+ enemies have   |
|                        been killed, otherwise a CMD. Grand Horn Lv 25 is     |
|                        fought.                                               |
|                                                                              |
| Battles 7-9 - Rank 3 - CMD. Grand Horn Lv 19 is fought if 20+ enemies have   |
|                        been killed, otherwise a CMD. Grand Horn Lv 25 is     |
|                        fought.                                               |

| For some reason Aeris's level is not counted when finding the parties        |
| average level, although the sum will still be divided by three meaning you   |
| will have a much greater chance of fighting a Lv 19 CMD. Grand Horn which    |
| is very handy to know if you're trying to obtain the Vagyrisk Claw.          |
|______________________________________________________________________________|
```

The last thing I'd like to mention before finishing with this section is regarding a small glitch involving the Phoenix Materia. If you wish to duplicate it (once only) then you mustn't run out of the shack to claim it after winning the final Fort Condor Battle. Instead, leave it where it is and wait until you get to Disc 3 (you'll still be able to grab the Huge Materia). Then, dig up the Phoenix Materia from Bone Village (see section E.12). Return to Fort Condor and run outside the shack to grab a 2nd copy of the Phoenix Materia! For more glitches and exploits visit section E.18

```

```

--E.07 A - How To Obtain Yuffie

Yuffie Kisaragi is one of two 'hidden' characters that can be recruited, along with Vincent Valentine. See section E.10 for details on how to recruit Vincent. Yuffie can first be obtained when Cloud reaches Junon Area just after the Mythril Mine. It is very possible that you could miss out on recruiting her at this stage, so take note of the fact that she can be recruited at any point during in the game where Forests can be located. Recruiting Yuffie will unlock the 'Yuffie' Trophy.

To obtain Yuffie you must first battle around in the forests until you encounter the Mystery Ninja. Once she has been defeated you will be brought to a non-World Map screen with a save point. *DO NOT* attempt to use the save point as Yuffie will steal 200 gil from you and then flee from the screen. In fact don't open the menu or do anything else that involves taking your eyes off her; she is an expert thief after all.

NOTE - If she does steal from you then you will have to battle around again until you re-encounter the Mystery Ninja. Also, when you have finished recruiting her she will return any gil to you that she had previously stolen.

When prompted, select the following dialogue choices to recruit Yuffie:

Yuffie: “You spikey-headed jerk! One more time, let's go one more time!”
Cloud: “Not Interested”

Yuffie: “You're pretty scared of me, huh!?”
Cloud: “......petrified”

Yuffie: “I'm really gonna leave! REALLY!”
Cloud: “Wait a second!”

Yuffie: “You want me to go with you?”
Cloud: “......That's right”

Yuffie: “All right! I'll go with you!”
Cloud: “......Let's hurry on”

- Choosing an incorrect answer on the first question will result in you being forced into the menus, she'll then steal 200 gil from you.
- An incorrect second response will lead to her running away stealing 500 gil.
- An incorrect third or fourth response will lead to her just running away, stealing nothing.
- An incorrect fifth response will lead to you entering Yuffie's name. When you come out of that screen Yuffie will have stolen 700 gil from you.
- If you attempt to make use of the save point then she'll steal 200 gil from you.

Also, each correct response given will raise Yuffie's affection towards you by +2.

--E.07 B - Where To Obtain Yuffie

Yuffie can be recruited in any of the 8 forests scattered around the World, and various forests have varying encounter rate:

```
       Junon Area Forests - 12.5% Encounter Rate
     Gongaga Area Forests -   25% Encounter Rate
       Nibel Area Forests -   25% Encounter Rate (Large Forest)
 Rocket Town Area Forests - 99.6% Encounter Rate (Small Forest)
   Woodlands Area Forests -   50% Encounter Rate (Near Temple of The Ancients)
      Mideel Area Forests -   50% Encounter Rate
    Goblin Island Forests -   50% Encounter Rate
     Round Island Forests -   50% Encounter Rate
```

--E.07 C - Yuffie's Stats

Yuffie's stats will vary depending on what Cloud's current level is when they battles each other:

```
 Cloud Lv  1-20 | Yuffie Lv 17
 Cloud Lv 21-25 | Yuffie Lv 22
 Cloud Lv 26-30 | Yuffie Lv 27
 Cloud Lv 31-35 | Yuffie Lv 32
 Cloud Lv 36-40 | Yuffie Lv 37
 Cloud Lv 40-99 | Yuffie Lv 42
```

```

|                               NOTE ON ENEMIES:                               |
|                                                                              |
| At any level the Mystery Ninja will use the attacks 'Fight', 'Throw', and    |
| 'Spider Web' which inflicts Slow. A level 17 or 22 MN will also use an       |
| 'Impaler' which inflicts Frog, and also a 'Fire Fang' which inflicts weak    |
| Fire damage. A level 27, 32, 37 or 42 MN will use a 'Fire Veil' which        |
| inflicts moderate Fire damage, 'Leviathan Scales' which inflict Water        |
| damage and a 'Swift Bolt' which inflicts Lightning damage.                   |
|                                                                              |
+------------------------------------------------------------------------------+
```

When you recruit Yuffie she will have equipped on her the Throw Materia, a Carbon Bangle and the 4-Point Shuriken. All of Yuffie's weapons are long ranged, and her Ultimate Weapon, The Conformer is the only weapon in the game that can deal regular damage whilst using the Command 'Morph' (as opposed to hitting for 1/8th of normal damage).

Yuffie also has a side quest that is regarded as the biggest side quest of the game, and is mandatory to take part in should you wish to obtain every

piece of Materia. You will also not be able to complete the Turtle Paradise Mini-Game (section E.03) if you do not partake in her sidequest. If you haven't completed it by the time you have parachuted in on Midgar towards the end of Disc 2 then you will have missed out on the quest completely.

{Gold Saucer}

--E.08 A - About The Gold Saucer

The Gold Saucer is situated in the middle of Corel Desert and can only be accessed via North Corel which is just north of the desert. Here you'll be able to ride the tram up to the Gold Saucer, which is Final Fantasy VII's epicentre of fun and games, not to mention great prizes. The Amusement Park is spread across 8 floors. When you first enter the Gold Saucer you'll be roughly 1/2 way into the first Disc, although you won't be able to explore it properly until you have obtained the buggy.

When you arrive at the Gold Saucer you must pay 3000 gil to enter, or if you can afford it you can choose to pay 30,000 gil for a lifetime pass (aka Golden Ticket). You'll also notice a save point in the background, this can only be used by spending 5GP.

GP (Gold Points) serve as the Gold Saucers form of currency, and until you get to Disc 2 they can be very difficult to obtain; you must either win at the Chocobo Races or win at the arcade games in the Wonder Square. When you do reach Disc 2 you can amass large amounts of GP much more easily by manually racing your own Chocobos at the Chocobo Square, until then the Super Dunk game in the Wonder Square is probably your best option for racking up GP early on in the game.

You can also exchange gil for GP by talking to the man that will appear behind the save point at the Ropeway Station. This man will only appear from Disc 2 onwards and has a 15% chance of appearing (roughly). He will exchange 100 gil for 1GP with a maximum of 100GP for 10,000 gil.

The main two reasons that you would want to amass a large amount of GP are for the prizes that are available at the Wonder Square (obtained by trading in your GP), and the prizes that are available at the Battle Square (costs 10GP to partake in a battle). There are also some great prizes that can be won at the Chocobo Square, but these are more easily obtained once you have started the whole Chocobo breeding process.

{Chocobo Square}

--E.08 B - Chocobo Square

--Items of Interest - Sneak Attack Materia, Enemy Away Materia, Sprint Shoes
Magic Counter Materia

BETTING:

Before you have obtained your own Chocobos on Disc 2, the only way in which you can partake in Chocobo Racing is to place a bet at the main central Bookmaker's Office. The ranks are divided up into C, B, A and S ranks, the higher the rank the better the rewards but the more the bet costs. On Disc 1 you will only have rank C & B to choose from.

To enter into the bets you'll need to pay 200 gil, then you have to pay an additional price to place a bet; the price of the bet depends on which Class you select:

Class C - 100 gil
Class B - 200 gil
Class A - 300 gil
Class S - 500 gil

Every time you bet on a race you will have a grid of 15 squares to choose from; each square represents one possible outcome of the race and you can select up to three of them. If you determine Chocobo 1, 4 & 5 to be the Chocobos with the highest chance of winning, then you should put your money on squares 1-4, 1-5 and 4-5.

7 of the 15 squares will yield a 'common' item, 5 will yield an 'uncommon' item and 3 will yield a 'rare' item. The available items for that particular race are chosen at random and are displayed in the bottom left hand corner of the lobby screen.

Chance of Winning...	Cumulative Chance:
A Prize - 20 % (3 out of 15)	20%
A Common Prize - 46.6 % (7 out of 15)	9.3%
An Uncommon Prize - 33.3 % (5 out of 15)	6.6%
A Rare Prize - 20 % (3 out of 15)	4%

TIP - Thanks to the help of Bellfell and Phiefer3, I have been able to work out a formula that yields a 40% average win ratio:

Find X using the table below, then multiply that figure by Stamina. Repeat the process for all 6 Chocobos, then bet on the three with the highest result.

CLASS C:	CLASS B:
Top Speed - X	Top Speed - X
73 KPH - 415	88 KPH - 500
74 KPH - 420	89 KPH - 506
75 KPH - 426	90 KPH - 511
76 KPH - 432	91 KPH - 517
77 KPH - 438	92 KPH - 523
78 KPH - 443	93 KPH - 528
79 KPH - 449	94 KPH - 534
80 KPH - 455	95 KPH - 540
81 KPH - 460	96 KPH - 545
82 KPH - 466	97 KPH - 551

83 KPH - 472	98 KPH - 557
84 KPH - 477	99 KPH - 563
85 KPH - 483	100 KPH - 568
86 KPH - 489	101 KPH - 574
87 KPH - 494	102 KPH - 580
88 KPH - 500	103 KPH - 585
	104 KPH - 591
Stamina Range: 250 - 279	105 KPH - 597
Result Range: 10.36% - 14.%	
	Stamina Range - 300 - 329
	Result Range: 15.% - 19.64%
CLASS A:	CLASS S:
Top Speed - X	Top Speed - X
102 KPH - 580	147 KPH - 835
103 KPH - 585	148 KPH - 841
104 KPH - 591	149 KPH - 847
105 KPH - 597	150 KPH - 852
106 KPH - 602	151 KPH - 858
107 KPH - 608	152 KPH - 864
108 KPH - 614	153 KPH - 869
109 KPH - 619	154 KPH - 875
110 KPH - 625	155 KPH - 881
111 KPH - 631	156 KPH - 886
112 KPH - 636	157 KPH - 892
113 KPH - 642	158 KPH - 898
114 KPH - 648	159 KPH - 903
115 KPH - 653	160 KPH - 909
116 KPH - 659	161 KPH - 915
117 KPH - 665	162 KPH - 920
118 KPH - 670	163 KPH - 926
119 KPH - 676	164 KPH - 932
120 KPH - 682	165 KPH - 938
121 KPH - 688	166 KPH - 943
122 KPH - 693	167 KPH - 949
123 KPH - 699	168 KPH - 955
	169 KPH - 960
Stamina Range: 350 - 379	170 KPH - 966
Result Range: 20.3% - 26.49%	
	Stamina Range: 500 - 529
	Result Range: 41.83% - 51.2%

To understand the maths behind the above tables, you must first understand the formula behind it:

Top Speed / Maximum Top Speed (176 KPH) = X
Stamina / Maximum Stamina (999) = Y
X * Y = % of maximum possible stat values
SO
If a Chocobo had a Top Speed of 113 KPH, then X would be 64.2%.
If a Chocobo had 362 Stamina, then Y would be 36.2%
0.642 * 0.362 = 23.24% of maximum possible Top Speed and Stamina

I tried this method over 100 races, and I was able to win 40 of them. The main problem is that you cannot determine a Chocobos Run, Acceleration, Intelligence or Cooperation, so there is no way of accurately determining the Chocobo with the greatest stats.

It is speculated that the rank of the jockey has an affect on the outcome of the race, and there are 4 ranks that can be determined by the colour of the Jockey - Platinum, Gold, Silver and Bronze. If in doubt, try betting on the highest ranking Jockey; again this is only speculation.

PRIZES:

Here are the prizes that are up for grabs:

CLASS C:	GP
Potion	5
Phoenix Down	10
Hyper	10
Tranquilizer	10
*Hi-Potion	15
Antarctic Wind	20
Bolt Plume	20
Fire Fang	20
Ether	30

****

CLASS S:	GP
Potion	5
Phoenix Down	10
Hero Drink	15
Bolt Plume	20
Antarctic Wind	20
Ether	30
Ice Crystal	50
Fire Veil	50
Swift Bolt	50
Turbo Ether	150
Elixir	200
Counter Attack	300
Enemy Away	300
Megalixir	300
Precious Watch	300
Sneak Attack	300
Chocobracelet	400
Cat's Bell	500
Magic Counter	500
Sprint Shoes	500

CLASS B:	GP
Phoenix Down	10
Hyper	10
Tranquilizer	10
*Hi-Potion	15
Hero Drink	15
Antarctic Wind	20
Bolt Plume	20
Fire Fang	20
Ether	30
Ice Crystal	50
Turbo Ether	150
Elixir	200
Enemy Away	300

CLASS A:	GP
Phoenix Down	10
*Hi-Potion	15
Hero Drink	15
Antarctic Wind	20
Bolt Plume	20
Fire Fang	20
Ether	30
Ice Crystal	50
Fire Veil	50
Swift Bolt	50
Elixir	200
Counter Attack	300
Enemy Away	300
Sneak Attack	300
Cat's Bell	500
Sprint Shoes	500

NOTES - Counter Attack will be spelt 'Counter' whilst in the lobby screen. Do not confuse this with the Support (blue) Counter Materia.

- Enemy Away will only become available from Disc 2 onwards

Prizes that are unique to the Chocobo Square:

- Enemy Away Materia
- Precious Watch
- Sneak Attack Materia
- Chocobracelet
- Cat's Bell
- Sprint Shoes (One of these can also be obtained from the Battle Square)

In Class S, you will have a 7.95% chance of one of the 10 rare items appearing (Elixir downwards).

* - The Hi-Potion is actually glitched, and even though the dialogue box will
    display "Received Hi-Potion", you'll actually receive a Tranquilizer.

The prizes you get for betting are the exact same prizes that you get for racing. You first get a taste of what the Chocobo Racing experience is like when you attempt to leave Corel Prison; you have to win in order to be allowed to leave (although you won't win a prize, other than that of freedom). If you lose then you will be able to re-try as many times as you like until you win, just be sure to pick up the Ramuh Materia whilst in the Jockey's Room as you'll never again be able to re-visit that area.

You won't be able to race in the Chocobo Races again until you have completed the Lifestream events in Mideel on Disc 2 (the Gold Saucer won't have re-opened until that point). You can then catch and breed your own Chocobos to race in the Chocobo Square. It is much safer to race your own Chocobo as opposed to betting at the Bookmaker's Office seeing as all you will need to do to guarantee a prize is to win the race. When you do win a race either through betting or racing you will be able to choose your reward; you can take either the Item or the GP. One of the main incentives to spend time racing your Chocobos in the Chocobo Square is to gain high amounts of GP, aswell as to help with the Chocobo breeding quest.

BREEDING:

Racing your Chocobos in the Chocobo Square is actually a requirement of the breeding process. Every time your Chocobo wins its third race it'll be ranked up to the next class, and a couple of highly ranked Chocobos will be more likely to breed a 'special' Chocobo. Also, the higher the ranking of the parents, the greater the racing stats will be of the new-born Chocobo.

For more details on Chocobo breeding see section E.14.

ESTER:

To enter into a race you must talk to Ester who will be standing outside of the Staffroom. She will only be present from Disc 2 onwards. Here you will be able to choose which Chocobo you wish to race followed by which track you would like to race on. For what it's worth, always pick the short track; there is nothing worth noting about the long track other than the fact that you'll be able to see a recurring Final Fantasy easter egg - The Moai Face.

If you have either Tifa or Cid in your party then there'll be a 50% chance that they'll want to be the one to ride on the back of a Chocobo. It's completely optional of course but it can be quite refreshing to see someone else riding a Chocobo for a change, however it makes absolutely no difference whatsoever to the Chocobos performance. If both Cid and Tifa are in your party then Tifa will always be the one to ask.

NOTE - I suspect that the developers chose Tifa and Cid to be the ones to
       partake in the races (and also the Snowboarding game) due to the fact
       that they are the two characters that you take control of whilst
       Cloud is 'unavailable' in Mideel. Perhaps originally the Gold Saucer
       was intended to be open for business during that time...

{CHOCOBO RACING}:

Controls:-

Left	Left
Right	Right
X	Slow Down
Sq	Speed Up
O	Sprint (drains stamina)
Start	Pause
Select	Toggle between Manual and Automatic
R1+R2	Holding together will slowly refill stamina

As soon as the race begins you're going to want to press Select to toggle from Automatic to Manual. Then, you're going to want to hold down R1+R2 for the remainder of the race so that you consistently replenish you stamina bar. Then tap Square a number of times to speed up your Chocobo all the way, you can even sprint if you like (with O) to get in the lead, just make sure to save enough stamina for the final hurdle.

If you have a Green or Blue Chocobo then you'll find that you won't struggle as much at particular points in the race. Due to hurried programming, the 'ability' of each Chocobo has been reversed - The Green Chocobo will find it easier to traverse through the water section of the long course as well as the space section at the end of the short course, while a Blue Chocobo will make short work of the spiralling climb at the beginning of the short course. Naturally the Black and Gold Chocobos won't struggle at all while a Yellow Chocobo will struggle will all parts.

**Once the first two Chocobos have crossed the finish line you can end the race by pressing Start; you don't have to wait for all 6 Chocobos to cross the finishing line.

For information on how the racing stats work whilst breeding Chocobos, see section E.10 E.

TEIOH:

Every so often you be up against the well-known jockey Joe and his Black Chocobo Teioh. Teioh's stats are always faster than yours and can be very tough to beat at times. His Speed is always 10% higher than yours and his Stamina is always 25% higher than yours, regardless of whether your Chocobos stats are maxed out or not. And obviously being a Black Chocobo he can make short work of the tracks environmental hazards.

It is extremely difficult to beat Teioh without the use of a Gold, Black or Green Chocobo, so don't waste too much time trying. You'll have to really exhaust your sprint to stay ahead of him, just make sure to save enough for the final sprint otherwise you're screwed. Using the R1+R2 trick here is paramount.

Teioh will never appear in Class C, however his encounter rate for the other Classes are as follows:

Class B - 12.5%
Class A - 25%
Class S - 50%

SPECIAL PRIZES:

If you manage to win 19 races with a single Chocobo then Ester will reward you with five prizes that are available in Class S (but unfortunately not the Magic Counter Materia):

Precious Watch, Chocobracelet, Cat's Bell, Sprint Shoes and Counter Attack

{Wonder Square}

--E.08 C - Wonder Square

--Items of Interest - Gil Plus Materia, EXP Plus Materia, Speed Source

The Wonder Square will be your main source of GP whilst on Disc 1, and although there are 9 games to choose from the only game that will really make an impact on your GP wallet will be the Super Dunk game. It's recommended that you play the Mog House game and the G-Bike game to win some one off prizes - 30 GP and a Speed Source, respectively. The Snowboarding game is also worth a blast as it's probably the most fun game to play, followed by G-Bike.

NOTE - When you first enter the Wonder Square you will automatically recruit Cait Sith onto your team, who will also come equipped with the mighty Manipulate Materia.

When you enter the 1st floor of the Arcade itself you will have three games to choose from. In the 2nd floor you will have 6 games to choose from. Also, there is a staff member on the 1st floor who will trade your GP for prizes:

PRIZE:	Cost:
Potion	1GP
Ether	20GP
X-Potion	80GP
Turbo Ether	100GP
Gold Ticket	300GP
Carob Nut	500GP
Gil Plus Materia	1000GP
EXP Plus Materia	2000GP

- The Gold Ticket is a waste of GP and is much more easily obtained by paying 30,000 gil at the Ropeway Station.
- The Carob Nut will be displayed as '????' and can be easily obtained by stealing from the Vlakorados near Bone Village. They are used for breeding Chocobos.
- The Gil Plus Materia and the EXP Plus Materia will both appear as '????'. There is only one available of each and neither will become available until you have reached Disc 2.

1ST FLOOR - {ARM WRESTLER} - COST 100 GIL

This game is situated to the left of the staff member. It is very easy to win and only requires you to tap O as quickly as you can. There are two difficulty settings:

Sumo Wrestler (Easy) - Prize = 1GP
Wrestler (Hard) - Prize = 2GP

1ST FLOOR - {SUPER DUNK} - COST 200 GIL

This game is situated on the lower right hand side and is considered by many to be the best source of GP for Disc 1. The game will require you to hold O

down for approximately 1/2 a second and timing it right will score you 1GP, the idea is to chain as many baskets as you can to maximise your GP count. Holding O down for too long or too short will result in a miss, the game will then pay-out the GP that you've earned.

NOTE - Thank xPsychoMantis a huge amount for this!
Go to https://www.metronomeonline.com/ and set it to 120 BPM. It will take a while to get used to but eventually you will start to find a rhythm where you'll be scoring every time. It also helps greatly if you mute the Gold Saucer backing music. Simply push O for one beat. Try not to over think it; in fact try to think about something else while you are playing. Look away from the screen, but don't close your eyes and nod your head slightly to the beep.

Every time you net a basket you will earn 1GP. Once you have scored 10 consecutive points you will be given the option to 'Double Down'. If you land that shot then you will double your current score, if you fail the shot then your score will be reduced to 1GP and the game will end. The highest chain possible is 44 baskets which will land you a whopping 300GP, so it really is worth investing a small amount of time into the game.

1ST FLOOR - {WONDER CATCHER} - COST 100 GIL

On the back wall you'll find two machines that are good for eating up your gil and that's about it. Each machine will spit out a random prize, the prizes are as follows:

LEFT MACHINE:		RIGHT MACHINE:		
PRIZE:	CHANCE	PRIZE:	CHANCE	- The right machine is slightly better than the left machine, but only marginally.
Potion	39.06%	Potion	39.06%	
Nothing	29.3%	Nothing	29.3%	- The Phoenix Down and the Ether are glitched. When you receive the Phoenix Down the game will tell you that you have received an Ether, and vice-versa.
1 GP	19.53%	1 GP	19.53%	
3 GP	8.99%	3 GP	8%	
Phoenix Down	1.95%	Ether	2.94%	
Megalixir	0.78%	Elixir	0.78%	
80 GP	0.39%	100 GP	0.39%	

2ND FLOOR - {G-BIKE} - COST 200 GIL

G-Bike is situated at the northern end of the room and is basically the same game as the one played whilst escaping Midgar on the Highway. Press O to swing the Buster Sword to the right and Square to swing it to the left. For every enemy biker that you knock down you'll score 500 points, and you'll lose 50 points every time the truck is hit.

The orange bikers shouldn't pose too much of a threat, it's the red bikers you need to be wary of as their main strategy is to lure you away from the truck, and while you are pre-occupied the orange bikers will then damage the truck as much as they can. Don't forget that you can knock down an enemy by colliding into him enough times, you can also create a domino effect if you line them up right.

You will receive 2 GP for scoring between 5000 - 9999 and you'll receive 10 GP for scoring over 10,000. You'll also be rewarded with a one-off Speed Source the first time you score over 10,000 points, which makes the G-Bike game worth playing at least until you have acquired the bonus prize.

On the PS4 version, you can unlock the Corel's Angel Trophy by scoring 10,050 points or more on the G-Bike game. You'll also notice blue bikes amongst the orange bikes; these appear to act in the same way as the orange bikes.

2ND FLOOR - {CRYSTAL FORTUNE} - COST 50 GIL

Just to the right of the G-Bike machine you'll find the Crystal Fortune machine. Each time you reach a milestone within the story the fortune will change to match your current circumstances. The fortunes that will be given are as follows:

	FORTUNE:	REFERENCE:
First Visit to Gold Saucer	"Use caution in relationships."	Cait Sith's betrayal
After you obtain the buggy	"Your lucky colour is red"	The colour of the buggy
After you complete Cosmo Canyon	"You may meet someone new."	The possible recruitment of Vincent Valentine
After you complete Nibelheim	"You have ties with those that fly."	The recruitment of Cid Highwind
After you obtain the Tiny Bronco	"What you are looking for is near."	The Keystone which is in the Battle Square
After you obtain the Keystone	"Use caution in relationships."	Cait Sith's betrayal
After you have been on the date	"What you search for is in the southeast."	The location of the Temple of The Ancients
After you complete Temple of The Ancients	"Beware of the north."	Sephiroth and the Reunion
After you complete the Forgotten Capitol	"A great turning point is near."	...(*spoilers*)...
After you obtain the Highwind	"Never give up."	The impending doom that is Meteor

Also take note of the fortune that Cait Sith read out to you when he forced his way into your party - "What you pursue will be yours. But you will lose something dear". I can only imagine that the 'pursue' part was relating to the Black Materia and the 'losing' part is an obvious reference to the events that take place at the end of Disc 1.

2ND FLOOR - {MOG HOUSE} - COST 100 GIL

This machine is positioned on the right hand side and is worth playing just once as you'll net a quick one-time-only 30GP. All you have to do is feed Mog 5 Kupo Nuts when prompted, and then 3 Kupo Nuts the second time. It's a little boring to watch, but definitely worth it for the GP. Be sure to talk to the person next to the machine to claim your reward.

2ND FLOOR - {3D BATTLER} - COST 200 GIL

This machine is positioned in the centre of the room and is pretty much a rock, paper, scissors type game that yields five opponents, each increasing in difficulty as you progress. So difficult in-fact that many people stay clear of this game altogether.

Press X for a Low Attack (Beats Mid, loses to High)
Press Sq for a Mid Attack (Beats High, loses to Low)
Press Tr for a High Attack (Beats Low, loses to Mid)

After you have successfully hit your opponent a number of times they will drop to their knees, progressing you to the next round. Here are the prizes up for grabs alongside the chances you have of winning:

Rnd:	Opponent:	Prize:	Chance of winning per hit	Chance of beating	Cumulative chance
# 1	Ninja Girl	0 GP	50% Win, 25% Loss, 25% Tie	93.5234%	93.5234%
# 2	Masked Man	3 GP	33.3% Win, 33.3% Loss, 33.3% Tie	50%	47%
# 3	Afro Pimp	30 GP	25% Win, 50% Loss, 25% Tie	6.4766%	3%
# 4	Red Spaceman	300 GP	25% Win, 75% Loss, 0% Tie	0.08903%	0.0003%
# 5	Invisible Man	N/A	0% Win 75% Loss, 25% Tie	0%	0%

The 5th and final battle is more of a joke enemy than a real one seeing as he is completely invisible, and it is completely impossible to defeat him. Due to the terrible chances that you have of even making it past the third round, the most you can hope to regularly win whilst playing 3D Battler is 3GP.

2ND FLOOR - {SNOWBOARDING} - COST 200 GIL

The snowboarding machine is situated on the left hand side and is only available once the Gold Saucer has re-opened on Disc 2. Snowboarding is definitely the most challenging of all of the Wonder Square games and is also regarded as the most enjoyable. You'll have experienced it before seeing as

it's basically the same mini-game as the one at the Icicle Inn, but with different courses.

As with Chocobo Racing, Tifa or Cid may occasionally ask to have a try on the snowboarding machine (37.5% of the time). It makes no difference whatsoever to the performance of the snowboard and is completely optional. If both Tifa and Cid are present then Tifa will always be the one to ask.

Controls:-

Left	Left
Right	Right
Down/Sq	Slow Down
X	Jump
L1/R1	Lean into corner (helps for a tighter angle)
Start	Pause/Skip intro

THE PRIZES:

There are 3 course to choose from - A (Beginner), B (Expert) & C (Crazy). Scoring 70 or more on course A will unlock course B, and scoring 70 or more on course B will unlock course C. Scoring 90 or more on any course will net you a one-time-only prize of GP and an item: (Maximum Score = 100)

90+ Points	GP:	PRIZE:
Course A	30GP	Safety Bit
Course B	100GP	All Materia
Course C	300GP	Crystal Bangle

- Score is calculated by 3 things: Technique (30 Points), Balloons (40 points) and Time (30 points).
- Technique points are deducted whenever you crash into something. You'll start off with 30 points.
- Red balloons earn 1 point, Blue earn 3 points and Green earn 5.
- 1 point of Time will be deducted for every 2 seconds you fall behind par time:

RANKINGS:

Rank	BAD	AWFUL	GOOD	COOL
Score	0-29	30-69	70-99	100

Awful and Bad are swapped in the PC version.

Course A:	Course B:	Course C:
01'30"000	01'45"000	02'00"000

As with Technique, you'll start off with 30 points.

TIME ATTACK:

In order to unlock the Time Attack mode you must first score 70 points or more (GOOD ranking) on a particular track, thereby unlocking Time Attack for that track (you also must have also set a score on every track). Time Attack is activated by grabbing the Yellow balloon at the beginning of the race, and there are some additional options available in the menus. You can change the floor to a chequered grid, change the ghost Mog's snowboard to a sleigh, you can even replace Mog with a running Cactuar, but to do that you must first unlock rank 'Super', which is no easy feat (Time Attack rankings differ from the normal rankings).

To assist with obtaining a 'Super' ranking you must first obtain a 'Good' ranking which will unlock the Silver balloon at the beginning of a track,

granting you a speed bonus and thereby making it possible for you to decimate your old records.

Here are the Time Attack Rankings for each version of the game:

NOTE - The correct display should be 01'29"999 as opposed to 1'29"99, I just didn't have room to fit everything in. Sorry!

Fail	1'30"00 or above	2'00"00 or above	2'10"00 or above

*Godly rank was removed from all other versions.

2ND FLOOR - {TORPEDO ATTACK} - COST 200 GIL

The Submarine machine can be found on the very left hand side next to the Snowboarding machine. I'll be honest, the game is pretty boring and the prizes are dull, although the Dragon Fang and the Dragon Scales will come in handy at the Battle Square. You won't be able to play the game until you have completed the submarine events mid-way through Disc 2. This is basically the same mini-game as the one you'll have played at the end of that mission.

Controls:-

Up	Descend	The aim of the game is to destroy all enemy
Down	Ascend	submarines, and there are 5 difficulty settings
Left	Left	to choose from. The higher the setting, the more
Right	Right	subs you will have to destroy and the more HP
X	Slow Down	each enemy sub will have. The easiest way to win
Tr	Speed Up	is to use your sonar to locate enemy Subs, then
Sq	Fire Torpedo	simply lock onto them and fire with Square. Your
R1	Sonar	score will be affected be the speed in which you
R2	Change View	destroy the enemy subs, the amount of damage you
Select	Quit	take along with the current difficulty setting
		you are on.

NOTE - It doesn't matter in the slightest how high of a score you get, all that you need to do to win the prize is to beat the game. You will lose the game if the timer runs out and there are still enemy subs left to destroy, or you are destroyed yourself.

	TARGETS:	PRIZE:	
Level 1:	7	20GP + Ink	The prize doesn't exactly
Level 2:	10	20GP + T/S Bomb	correlate to the difficulty
Level 3:	8	20GP + Dragon Fang	setting as shown; all you have
Level 4:	12	20GP + Dragon Scales	to do to win all 5 prizes is
Level 5:	10	20GP + Cauldron	to win 5 times on any setting.
			Prizes can only be won once.

The Cauldron will be misspelt as Caldron.

--E.08 D - Battle Square

--Items of Interest - Final Attack Materia, W-Summon Materia, Omnislash, Speed Plus Materia, Enemy Lure Materia, Champion Belt, Pre-Emptive Materia, Sprint Shoes, Ribbon

The first time you enter the Battle Square you will be accused of committing a massacre, you will then be thrown into Corel Prison (Provided you have first recruited Cait Sith, which will happen automatically the first time you enter the Wonder Square). You'll then have to wait until you have obtained the Buggy before you can then enter the Battle Square properly, and as you've probably figured by the name this is a place where you can put your battle skills to the test for the chance to win some great prizes!

The only attraction at the Battle Square is the Battle Arena which will cost 10GP to participate in, and although competing is completely optional, you will have to take part in one mandatory battle as per the story line (will not cost you 10GP). This takes place just after you receive the Tiny Bronco, and your reward for this battle will be the Keystone. If you manage to win all of these 8 battles within the Battle Arena then Dio (The owner of the Gold Saucer) will throw in a Protect Vest and a Choco Feather as a bonus. You can also enter into a 'special' battle', the reward being the Final Attack Materia. See below for more details.

PRIZES:

You reward for winning at the Battle Square will be dispensed in the form of BP (Battle Points), and the BP you obtain can then be exchanged for prizes at the two consoles to the left and right of the entrance. The further into the game you progress the better and cheaper the prizes will be.

NOTE - **When you leave the Battle Arena your BP count will be reset to 0.** You must make sure to have enough GP (and time) on your hands to be able obtain the prizes that you are after; if you run out of GP then you will be forced to spend all the current BP you have, as you will lose all of it the second you step outside. 200GP+ should be a sufficient amount, always remember to save your game just before coming to the Arena.

	BEFORE TINY BRONCO:	AFTER TINY BRONCO:	AFTER HIGHWIND:	
Potion	----80 BP	---------	---------	- Certain prizes
Phoenix Down	---160 BP	---100 BP	---------	have been mis-
Shrapnel	---320 BP	---------	---------	spelt on the
Ether	---640 BP	---------	---------	prize board.
Remedy	---------	---200 BP	100 BP	
Mimett Greens	--1280 BP	---400 BP	---------	- The Champion
Fury Ring	--2560 BP	---------	---------	Belt is an
Enemy Lure	--5120 BP	---800 BP	250 BP	amazing piece of
Bird Wing	---------	--1600 BP	---------	kit and is worth
S-Mine	---------	--3200 BP	---------	getting hold of

Right Arm	---------	---------	---500 BP	as soon as you
Pre-Emptive	10,240 BP	--6400 BP	--1000 BP	can.
Reagan Greens	---------	---------	--2000 BP	
Speed Plus	20,480 BP	12,800 BP	--4000 BP	- There is only
Stardust	---------	---------	--8000 BP	one Omnislash
Champion Belt	40,960 BP	25,600 BP	16,000 BP	and W-Summon
Omnislash	---------	51,200 BP	32,000 BP	available.
W-Summon	---------	---------	64,000 BP	

Reagan Greens have been misspelt as Regan Greens, and Mimett Greens have been misspelt as Memmet Greens.

You can also obtain a pair of Sprint Shoes for free which is a really cool accessory that will automatically put your character in Haste. To obtain the Sprint Shoes you must first talk to the NPC that you see standing at the very bottom of the stairs at the entrance to the Battle Square. After she has commented on how she doesn't like fighters that are all talk, you can then compete in the Battle Arena. Be sure to win all 8 battles, when you do you will be able to talk to her again to receive the Sprint Shoes. This can only be done once.

Spending your unneeded BP on Ethers the first time you battle there (assuming you jump into the Battle Square as soon as you can, once you get the Buggy) is a good idea, seeing as they can then be sold for 750 gil each, replenishing your gil supply.

{BATTLE ARENA}:

The Battle Arena mini-game consists of 8 fights, each becoming more difficult than the last. Most of the enemies that you engage here are ones that you will already have fought before, however there are 2 enemies that are unique to the Battle Square, and these are Ho-chu and Tonberry.

Only one player can fight at a time, and the HP, MP, Limit gauge status etc. of the player when he/she went into the battle will be exactly same when they come out of the battle, regardless of what happens inside the Arena. Because of this, it's always advisable to make use of the Inn in North Corel before ascending the Ropeway to the Gold Saucer. I would also recommend having your Limit bar roughly halfway filled.

Guide Update! Entering the Battle Square with 7777 HP will activate "All Lucky 7's" for every battle, and is the quickest and easiest way to fly through the Battle Square, See section E.18 A for more details.

There are some enemies that will teach you particular Enemy Skills whilst battling away, however once the battle has finished and you have returned to the Battle Arena lobby you'll find that the Enemy Skills that you had learnt will no longer be available on your skill list. You won't gain any EXP, AP or gil and nor will any of the kills that you make count towards you Limit Break levels, however the items that you consume *will* deplete as they normally would, and any items you obtain via stealing and morphing will be added to your inventory as normal.

NOTE - Morphing the Ho-chu is the best way to obtain a third Ribbon after acquiring the Highwind.

After each fight you will have the option to either continue on fighting or

to finish the battle, retaining your currently accumulated BP. Should you choose to continue on, and then die before making it to the next round, you will lose all of the BP that you accumulated for the battle and the mini-game would be considered lost. Should this happen then you would receive the consolation prize, a 'Tissue' (which does absolutely nothing). The game is considered won if you win all 8 battles, or you decide to end the battle after a fight.

One of the biggest incentives to grind it out at the Battle Arena is for the 'Omnislash' prize, which is Cloud's Ultimate Lv 4 Limit Break technique and is regarded as potentially one of the strongest attacks in the game. Obviously you'll need to rack up a large amount of BP for this, and the amount of BP you gain per battle is entirely based on which handicap you receive at the end of each individual fight.

{HANDICAPS}:

Very similar to Cait Sith's and Tifa's Limit Breaks, the handicap system works much like a fruit machine's 'slots'. After each battle (provided you have chosen to continue on) you will be presented with a spinning reel with 3 symbols on, and each symbol correlates to a handicap. You can slow the reels down if you wish by tapping Square.

NOTE - Timing is everything. Whilst slowing down the reels, try to press Square on the symbol *before* the one you are after, it's the same technique for rigging Cait Sith's 'Slots' (see section E.02 E).

The tougher the handicap, the bigger the BP reward. Below is a list of every handicap, note that receiving any of the 'Materia Broken' handicaps will also cancel any of the status effects of the equipped Materia i.e. Strength - 1 etc.

SYMBOL:	HANDICAP:
Poison	Inflicts you with Poison.
Frog	Inflicts you with Frog.
Small Cloud	Inflicts you with Small.
Boot	1/2 Speed (differs from Slow). Effects stack.
Item Pouch	Seals the Item Command.
Ring	Nullifies the effect of any Accessory you are wearing.
Sword	Attack power is decreased. Effects stack.
Bracelet	Defence is decreased.
Red Materia	Summon Materia is disabled.
Yellow Materia	Command Materia is disabled.
Green Materia	Magic Materia is disabled.
Purple Materia	Independent Materia is disabled.

Blue Materia	Support Materia is disabled.
All Materia	All Materia is disabled.
Clock - TIME	Deals damage equal to Game Time (hours) x 30.
HP	Cuts your Max HP by half. Effects stack.
MP	Cuts your Max MP by half. Effects stack.
HP + MP	Cuts your Max HP and MP by half. Effects stack.
0MP	Cuts your Current MP down to 0.
Lv (Small Arrow)	Decreases your level by 5. Effects stack.
Lv (Large Arrow)	Decreases your level by 10. Effects stack.
CURE	Your HP is restored.
Lucky 7	No handicap.

NOTE - Use Ribbons or White Capes to help protect you from the Status changing handicaps. Also, you can use Smoke Bombs or the Exit Materia to escape mid-battle whilst keeping your BP. If you try to escape using R1+L1 however then you would lose all of your BP.

You start each battle with 10 BP. Each handicap you obtain you will receive a small amount BP, however you'll only really start to see the big figures on the final two reels; aim to get the easy handicaps until then. Although aiming for the tougher handicaps for the final two fights can sometimes be challenging, the BP reward is definitely worth the risk. The highest possible amount that you can obtain in one battle is 12,576BP.

You do not need to try to 'preserve' the most rewarding handicaps for the final 2 reels either, such as 'All Materia Broken' or 'Green Materia Broken'. The contents of each reel will be scripted in from the beginning of each battle; nothing you ever land on will affect the line-up for the following reels.

NOTE - Whilst under 'Resist', you will still be able to undergo Status changes via the handicaps. Should this happen then you will not be able to remove the handicap unless you use White Wind or DeSpell.

Here are the BP rewards for each handicap, highest to lowest:

	ROUND & BP REWARDED:						
HANDICAP:	8	7	6	5	4	3	2
All Mat Broken	10,000	1866	463	--	59	--	--
Magic Mat Broken	9425	1775	445	145	--	28	15
Weapon Broken	8246	1602	---	140	57	27	15
Item Sealed	7201	1368	355	118	48	23	13
Indpndnt Mat Broken	6645	1196	301	99	--	20	11
Accessory Broken	----	953	248	84	35	8	10

1/2 HP + MP	3134	775	244	94	43	--	--
Armour Broken	----	654	---	---	33	17	--
1/2 HP	----	591	204	84	40	22	13
Frog	3069	520	130	44	19	10	6
Small	2940	453	108	36	16	8	5
Zero MP	1855	502	171	70	--	--	11
1/2 MP	----	485	173	73	36	20	12
Time x30 Damage	1401	379	130	54	26	15	--
Down 10 Levels	968	308	118	53	28	16	--
Poison	----	82	33	16	--	6	4
Support Mat Broken	----	----	281	91	37	--	--
Summon Mat Broken	----	----	---	90	37	18	10
Command Mat Broken	----	----	---	41	17	8	5
1/2 Speed	----	----	---	19	--	7	5
Down 5 Levels	----	----	---	---	13	8	5
Lucky 7	7	7	7	7	7	7	7
Cure	1	1	1	1	1	1	1

So the top 5 handicaps to watch out for on the final two rounds will be the All Materia Broken, Magic Materia Broken, Weapon Broken, Item sealed and Independent Materia Broken. Having said that, be mindful of the Weapon Broken handicap as its effects will stack, leaving your physical attacks potentially harmless. Use the Enemy Skill Goblin Punch if this happens.

ENEMIES:

As with the prizes, the enemies that you encounter will update firstly after you've received the Tiny bronco, and then again once you've received the Highwind on Disc 2. Seeing as the enemies on the first 'bout' are so weak, it is recommended that you utilise the opportunity to obtain the invaluable Champion Belt at an early point in the game.

All enemies will have 200% of their normal HP along with 125% of their
Attack and Magic Attack.

There are two groups of enemies that will be selected at random, Group A and Group B, the latter of which is usually slightly more difficult than the former. Each group consists of 4 potential enemy formations for you to fight, again selected at random. The enemy line-up for the final fight will be the same for both groups.

BEFORE OBTAINING THE TINY BRONCO

GROUP A	GROUP B
BATTLE 1: Sector 1 Rector	BATTLE 1: Sector 1 Rector
1x Guard Hound	1x Grashtrike*
2x Mono Drive	2x Guard Hound
2x Grunt	2x Chuse Tank
3x Grunt	3x Grashtrike*
BATTLE 2: Sector 6, Sewers	BATTLE 2: Sector 1, Sector 6, Sewers

2x Hedgehog Pie	1x Sweeper*
2x Whole Eater	3x Hedgehog Pie
3x Blugu*	3x Ceasar*
2x Sahagin, 1x Ceasar*	2x Hedgehog Pie, 1x Whole Eater
BATTLE 3: Train Graveyard	BATTLE 3: Train Graveyard, Sector 7
1x Eligor*	1x Eligor*
2x Cripshay*, 1x Deenglow	2x Aero Combatant
2x Ghost, 1x Deenglow	2x Deenglow
3x Ghost	3x Deenglow
BATTLE 4: Shinra HQ	BATTLE 4: Shinra HQ
1x Moth Slasher	1x Brain Pod
2x Sword Dance	1x Sword Dance
2x Brain Pod	2x Moth Slasher
1x Vargid Police, 1x Zenene	3x Sword Dance
BATTLE 5: Midgar/Grasslands Area	BATTLE 5: Midgar/Grasslands Area
1x Devil Ride	2x Levrikon
2x Elfadunk	2x Custom Sweeper
3x Levrikon	2x Mu, 1x Levrikon
3x Kalm Fang	2x Elfadunk, 1x Levrikon
BATTLE 6: Mythril Mine	BATTLE 6: Cargo Ship, Mythril Mine
2x Madouge*	4x Scrutin Eye
3x Castanets	4x Castanets
3x Crawler, 1x Ark Dragon	3x Crawler, 2x Madouge*
5x Crawler	2x Castanets, 1x Ark Dragon, 1x Crawler
BATTLE 7: Junon Area, Costa Del Sol	BATTLE 7: Junon Area
1x Zemzelett	1x Zemzelett
2x Nerosuferoth*	2x Formula*
4x Beachplug*	2x Nerosuferoth*, 1x Formula
5x Capparwire	2x Capparwire, 1x Nerosuferoth*
BATTLE 8: Junon, Costa, Gold Saucer, Mt.Corel	BATTLE 8: Junon, Costa, Gold Saucer, Mt. Corel
1x Hell Rider VR2	1x Hell Rider VR2
1x Grangalan*	1x Grangalan*
1x Harpy	1x Harpy
2x Bagnadrana*	2x Bagnadrana*

*Susceptible to L4 Suicide

- Wind can sometimes be useful.
- Be sure to make use of the White Cape.
- The Brain Pod and Zenene are 'Undead', so restorative items and spells will harm them.

- Use L4 Suicide on the Grangalan to finish it off quickly.
- You don't need to kill the middle or left-most Grangalan Jr.Jr.; just kill the right-most Jr.Jr. and that will free up the Grangalan Jr.; Once he is dead you can kill the Grangalan and end the battle.
- Be wary of the Harpy & the 5 x Capparwire.
- Make sure to have acquired the Enemy Skills Beta, White Wind and Big Guard.
- Items of Value: Turbo Ether - Stolen from the Land Worm - Corel Desert
  Right Arm - Stolen from the Bomb - Mt. Corel Bridge
  Smoke Bomb - Stolen from the Slalom - Junon underground

AFTER OBTAINING THE TINY BRONCO

GROUP A	GROUP B
BATTLE 1: Corel Prison, Gold Saucer Area	BATTLE 1: Gold Saucer Area
1x Bullmotor	1x Flapbeat
2x Bullmotor	2x Flapbeat
2x Spencer	2x Joker
4x Flapbeat	3x Spencer, 1x Flapbeat
BATTLE 2: Gongaga Area	BATTLE 2: Mt. Corel, Gongaga Area
1x Crown Lance*	2x Gagighandi
1x Grand Horn	3x Gagighandi
2x Grand Horn	3x Needle Kiss
2x Gagighandi	1x Needle Kiss, 1x Search Crown, 1x Bagnadrana
BATTLE 3: Gongaga, Gongaga Area	BATTLE 3: Gongaga
1x Flower Prong	1x Flower Prong
1x Heavy Tank	1x Heavy Tank
1x Kimara Bug	1x Touch Me
2x Touch Me, 1x Gagighandi	2x Kimara Bug
BATTLE 4: Cosmo Canyon Area	BATTLE 4: Cosmo Canyon Area
1x Griffin	1x Griffin
1x Golem*	2x Crown Lance
2x Desert Sahagin*	2x Desert Sahagin*
3x Bagrisk***	2x Skeeskee*, 1x Griffin
BATTLE 5: Cave of The Gi	BATTLE 5: Cave of The Gi
2x Gi Spector	3x Gi Spector
3x Skeeskee	2x Heg, 1x Sneaky Step
3x Sneaky Step	3x Heg, 1x Sneaky Step
4x Heg	5x Heg

BATTLE 6: Rocket Town/Nibelheim Area	BATTLE 6: Rocket Town/Nibelheim Area
2x Bahba Velamyu	2x Bahba Velamyu**
3x Nibel Wolf	2x Velcher Task
2x Nibel Wolf, 1x Velcher Task	3x Valron*
6x Battery Cap*	4x Battery Cap*, 1x Valron*
BATTLE 7: Shinra Mansion, Mt. Nibel	BATTLE 7: Shinra Mansion, Mt. Nibel
3x Twin Brain	3x Black Bat
2x Screamer, 1x Twin Brain	3x Sonic Speed
2x Kyuvilduns*, 1x Sonic Speed	3x Kyuvilduns*
4x Black Bat	5x Kyuvilduns*
BATTLE 8: Shinra Mansion, Mt. Nibel	BATTLE 8: Shinra Mansion, Mt. Nibel
1x Ghirofelgo	1x Ghirofelgo
1x Zuu	1x Zuu
1x Dragon*	1x Dragon*
1x Ying*, 1x Yang*	1x Ying*, 1x Yang*

*Susceptible to L4 Suicide.
**Should you encounter 2x Bahba Velamyu in Group B in Round 6, then round 7 & 8 will be fought in Group A.
***Always try to steal from the Bagrisk for the elusive Vagyrisk Claw.

- The Black Bats and the Gi Spectors are 'Undead', so restorative items and spells will harm them.
- Use L4 Suicide against Ying Yang and the Dragon.
- Be wary of the Valron's Demi3, and also the 6x Battery Caps.
- Added Effect=Time on your weapon is a good idea.
- Remember Ying is resilient to physical attacks while Yang is resilient to magical attacks.
- Items of Value - Swift Bolt (Bought from Wutai)
  Fire Veil (Bought from Wutai)
  Diamond Bangle (Bought from Bone Village)
  Ribbon (Found in the Temple of The Ancients)
  Remedy (Steal from Velcher Task - Rocket Town Area, OR bought for 200BP)

AFTER OBTAINING THE HIGHWIND

GROUP A	GROUP B
BATTLE 1: Wutai Area, Da-chao Statue	BATTLE 1: Woodlands Area, Da-chao Statue
2x Foulander	2x Dual Horn
3x Foulander	2x Garuda
3x Razor Weed	3x Garuda
2x Jayjujayme*, 1x Bizarre Bug*	2x Jayjujayme*, 1x Garuda
BATTLE 2:	BATTLE 2:

Wutai/Woodlands Area	Wutai/Woodlands Area
1x Adamantaimai	1x Under Lizard
1x Tonadu	1x Tonadu
2x Kelzmelzer	2x Bizarre Bug, 1x Tail Vault*
2x Under Lizard	5x Slaps
BATTLE 3: Temple of The Ancients	BATTLE 3: Temple of The Ancients
1x Doorbull	1x Doorbull
2x 8 eye**	2x 8 eye**
3x Ancient Dragon	2x Ancient Dragon
3x Toxic Frog, 1x Jemnezmy*	2x Toxic Frog, 1x Jemnezmy*
BATTLE 4: Bone Village Area, Corral Valley	BATTLE 4: Mideel, Great Glacier, Corral Valley
1x Vlakorados	1x Hippogriff
1x Acrophies	2x Ice Golem*
2x Trickplay*	2x Jumping*
3x Malldancer*, 1x Boundfat	2x Boundfat, 1x Trickplay*
BATTLE 5: Icicle Area, Great Glacier	BATTLE 5: Great Glacier
1x Magnade	1x Lessaloploth
2x Lessaloploth	2x Frozen Nail*
3x Jumping*	1x Snow*, 1x Lessaloploth
3x Shred*	2x Shred*, 1x Frozen Nail
BATTLE 6: Gaea's Cliff, Whirlwind Maze	BATTLE 6: Gaea's Cliff
1x Stilva*	2x Cuahl
2x Headbomber, 1x Cuahl	3x Headbomber
2x Gremlin*, 1x Sculpture*	3x Evilhead
2x Wind Wing*, 1x Ironite	2x Headbomber, 1x Zolokalter
BATTLE 7: Gaea's Cliff, Whirlwind Maze	BATTLE 7: Whirlwind Maze
1x Malboro*	1x Tonberry***
1x Blue Dragon	2x Ironite
1x Gigas*	2x Wind Wing*
1x Dragon Rider	3x Gremlin*
BATTLE 8: Mideel Area, Gelnika, Junon Reactor	BATTLE 8: Mideel Area, Gelnika, Junon Reactor
1x Sea Worm	1x Sea Worm
1x Serpent*	1x Serpent*
1x Ghost Ship*	1x Ghost Ship*
1x Ho-chu***	1x Ho-chu***

*Susceptible to L4 Suicide

**Always Morph the 8 eye for some Magic Sources

***The Tonberry and the Ho-chu are enemies that are unique to the Battle Arena. The Ho-chu was originally intended to be found within the Ancient Forest, and the Tonberry was intended to be encountered at the Whirlwind

maze (not to be confused with the Master Tonberry at the North Crater).

- L4 Suicide works well against a whopping 19 creatures.
- The Vlakorados has 66,666HP!
- The Tonberry can kill you in one hit, so be sure to cast Death Force.
- Use your characters Ultimate weapons if you have acquired them.
- You can Morph the Ho-chu into a Ribbon.
- Use armour such as the Mystile, Imperial Guard or Ziedrich.
- Be sure to stock up on plenty of Smoke Bombs, Remedys, and Elixirs.
- The Ghost Ship has a move that can eject you from battle, so disperse of it quickly using L4 Suicide.

Here is a list of every enemy that is susceptible to L4 Suicide:

Before Tiny Bronco:		After Tiny Bronco:		After Highwind:	
Blugu	Lv 4	Crown Lance	Lv 20	Jemnezmy	Lv 24
Grashtrike	Lv 8	Desert Sahagin	Lv 20	Trickplay	Lv 24
Ceasar	Lv 8	Skeeskee	Lv 20	Jumping	Lv 24
Sweeper	Lv 8	Golem	Lv 24	Jayjujayme	Lv 28
Cripshay	Lv 8	Battery Cap	Lv 24	Bizarre Bug	Lv 28
Eligor	Lv 12	Valron	Lv 24	Tail Vault	Lv 28
Madouge	Lv 16	Kyuvilduns	Lv 24	Frozen Nail	Lv 28
Nerosuferoth	Lv 16	Ying/Yang	Lv 24	Malldancer	Lv 32
Beachplug	Lv 16	Dragon	Lv 32	Shred	Lv 32
Formula	Lv 16			Snow	Lv 32
Grangalan	Lv 16			Sculpture	Lv 32
Bagnadrana	Lv 16			Gremlin	Lv 36
				Wind Wing	Lv 36
				Ice Golem	Lv 40
				Stilva	Lv 40
				Gigas	Lv 40
				Serpent	Lv 40
				Malboro	Lv 44
				Ghost Ship	Lv 44
				Unknown 3**	Lv 52

**Unknown 3 is only available in the special Battle (see below).

Below is a list of valuable items that you can steal and morph from the enemies within the Battle Arena. Note that if an item has a low steal rate then I may not have included it, such as an Ether.

VALUABLE ITEMS TO STEAL AND MORPH

Before Tiny Bronco: (Cannot Morph at this stage in the game)

GRASHTRIKE - Battle 1 Group B
Spider Web - Inflicts Slow on all enemies - Steal (50%)

CUSTOM SWEEPER - Battle 5 Group B
Atomic Scissors - Weapon for Barret (sell for 700 gil) - Steal (50%)

After Tiny Bronco:

BAGNADRANA - Battle 2 Group B, Battle 3 Group A
Guard Source - Permanently raises Vitality by 1 - Morph (900 HP)

| KIMARA BUG - Battle 3 Group A & B |
Hourglass - Inflicts Stop on all enemies - Morph (1400 HP)
HEAVY TANK - Battle 3 Group A & B
Power Source - Permanently raises Strength by 1 - Morph (3200 HP)
BAGRISK - Battle 4 Group A
Vagyrisk Claw - Inflicts Petrify on one enemy (extremely rare steal)
Remedy - Cures all abnormal Statuses - Morph (800 HP)
SCREAMER - Battle 7 Group A
Power Source - Permanently raises Strength by 1 - Morph (1600 HP)
___

| After Highwind: |
| '''''''''''''' |
| |
| 8 EYE - Battle 3 Group A & B |
Magic Source - Permanently raises Magic by 1 - Morph (1000 HP)
VLAKORADOS - Battle 4 Group A
Carob Nut - Used to breed 'special' Chocobos - Steal (50%)
ACROPHIES - Battle 4 Group A
Water Ring - Absorbs Water (sell for 5000 gil) - Steal (12.5%)
SNOW - Battle 5 Group B
Circlet - Raises Magic +30 and Spirit +30 - Steal (12.5)
MALBORO - Battle 7 Group A
M-Tentacles - Casts Bio 3 on all opponents - Steal (50%) (50% Soft)
GIGAS - Battle 7 Group A
Gigas Armlet - Raise Strength +30, 0 growth - Steal (50%)
DRAGON RIDER - Battle 7 Group A
Mind Source - Permanently raises Spirit by 1 - Morph (7000 HP)
SERPENT - Battle 8 Group A & B
Water Ring - Absorbs Water (sell for 5000 gil) - Steal (50%)
Mind Source - Permanently raises Spirit by 1 - Morph (28,000 HP)
HO-CHU - Battle 8 Group A & B
Circlet - Raises Magic +30 and Spirit +30 - Steal (12.5)
Ribbon - Protects against most Status ailments - Morph (10,700 HP)
GHOST SHIP - Battle 8 Group A & B
Guide Book - Traded for the Underwater Materia - Morph (12,000 HP)
___

| Special Battle: |
| '''''''''''''' |
| |
| HO-CHU - Battle 1 |
| Circlet - Raises Magic +30 and Spirit +30 - Steal (12.5%) |
Ribbon - Protects against most Status ailments - Morph (10,700 HP)
UNKNOWN 3 - Battle 3
Magic Source - Permanently raises Magic by 1 - Morph (30,000 HP)

| SERPENT - Battle 4 |
| Water Ring - Absorbs Water (sell for 5000 gil) - Steal (50%) |
Mind Source - Permanently raises Spirit by 1 - Morph (28,000 HP)
MAXIMUM KIMAIRA - Battle 7
Guard Source - Permanently raises Vitality by 1 - Morph (8000 HP)

NOTE - If you didn't obtain a Ghost Hand while in the Train Graveyard at the beginning on the game, then you can still obtain it by stealing from the Ghost (before Tint Bronco), or by morphing the Sneaky Step or Gi Spector (after Tiny Bronco), but once you obtain the Highwind the item will be lost forever if you failed to obtain one.

BATTLE STRATEGIES:

The first thing you should think about is preparation. Make sure to have healed yourself at North Corel before entering the Battle Square, and also make sure to have saved up a sufficient amount of GP. This is easily done at the Chocobo races once you can race your own Chocobos. Aim to have your Limit filled up halfway, and possibly even come equipped with Sadness to lessen the amount of damage you take. The idea is to have your Limit bar filled for the final fight, if it fills up sooner then you should rely on Deathblow (or Goblin Punch).

NOTE - If you wanted to you could fill up you Limit gauge all the way prior to entering the Battle Square, then equip the Mime Materia. Once the battle has begun, cast Haste, Regen etc. then cast your Limit Break and keep Miming it until you need to heal. Be sure not to equip any Counter Attacks if you plan to use this method.

You'll want to make use of Big Guard and Regen in every battle. You're also going to want to use Materia such as Heal (Esuna), Counter Attack, HP Plus, Luck Plus, (Command) Counter=Deathblow, Added Cut=Deathblow and even Steal as Well=Deathblow. Ribbons are an absolute must, or failing that Added Effect=Hades in your amour works really well although I would recommend using that combo on your weapon. Before you obtain a Ribbon you'll need to rely on the White Cape which will protect you from Frog/Small.

One of the most used commonly strategies is to make it to the beginning of Round 8 (whilst aiming for the 'All Materia Broken' handicap), then use a Smoke Bomb to escape from the battle retaining all of your accumulated BP. You could also do the same with the Exit Materia, although it wouldn't be much use to you if you've received a handicap that disables it. Do not run away normally (by holding R1+L1) as it will register as a 'loss' and you'll lose all of your accumulated BP (for that battle).

NOTE - When you do receive the 'All Materia Broken' handicap, remember you can hold down confirm to auto attack, unless of course you need to heal.

Enemy Skills are a crucial element to the Battle Square and will really tip the tide in your favour. Aim to learn Big Guard, White Wind/Angel Whisper, Beta, L4 Suicide, Magic Hammer, Death Force, Dragon Force, Magic Breath and Goblin Punch. For info on how to obtain each Enemy Skill visit section G.02. Here's a top tip: If you were to receive the 'Weapon Broken' handicap multiple times then the effects would stack and your physical attacks could become useless. When this happens you can fall back on Goblin Punch which

will hit for 75% of your normal physical attacks, for 0 MP.

Seeing as the enemies have twice their normal HP and 1.25x their normal attack and Magic, it's important to come prepared. Always have your player in the back row accompanied by a long ranged weapon, or the Long Range Materia (don't forget to move your player to the front row if you receive either the 'Independent' or 'All Materia Broken' handicap). Slash All or Double Cut are a must, and make sure to have some solid armour equipped such as the Mystile, which will grant your player incredible evasion stats. Failing that, the Imperial Guard or the Ziedrich will fit nicely.

NOTE - If you have been playing the game for a very long time then the 'Time x30' handicap could ruin your day. If the resulting damage is higher than your current HP then your HP will be reduced to 1, leaving you extremely vulnerable.

Provided that it doesn't morally displease you, you could utilise the W-Item trick to duplicate yourself enough Elixirs, Smoke Bombs and other resources to make your Battle experience that much easier. If you don't wish to use glitches then be sure to spend any leftover BP on Remedies, as you'll need them should you lose your ability to cure negative Statuses through Esuna or White Wind/Angel Whisper. Also remember that Haste, Regen and Slow-Numb *will* carry over through to the next fight, Death Sentence will not.

Here is a list of useful Items that will help you in the Battle Arena:

The W-Item trick is recommended

ITEM:	EFFECT:	WHERE TO OBTAIN:
X-Potion	Fully restores HP	Steal from the Spiral
Turbo Ether	Fully restores MP	Steal from Land Worm or morph from Beachplug
Elixir	Fully restores HP + MP	Morph from Vlakorados or Harpy
Right Arm	Explosive damage to all targets, medium damage	Steal from Bomb
Dragon Fang	Lightning damage to all targets, heavy damage	Dropped from Schizo or won on the Torpedo Attack game
Fire Veil	Uses Fire3 on all targets	Bought from Wutai - 800 gil
Swift Bolt	Uses Bolt3 on all targets	Bought From Wutai - 800 gil
Ice Crystal	Uses Ice3 on all targets	Morph from Bandersnatch
M-Tentacles	Uses Bio3 on all targets	Steal from Malboro
Dragon Scales	Uses Aqualung on all targets	Steal from Sea Worm or won on the Torpedo Attack game
Hourglass	Inflicts Stop on all targets	Morph from Kimara Bug
Remedy	Cures you of most Statuses	Steal from Velcher Task or morph from Needle Kiss

Hero Drink	Increases Attack, MAttack, Def and MDef by 30%, stacks	Found at North Crater or won at the Chocobo Square
Smoke Bomb	Escapes from battle	Steal from Slalom

Here are a few load-out suggestions:

First visit:

Cloud - Back Row

Force Stealer - Heal, Restore, Enemy Skill
Silver Armlet - All=Lightning, HP Plus, Long Range
White Cape

After Tiny Bronco:

Cloud - Back Row

Murasame - Added Effect=Time, Elemental=Choco/Mog, Enemy Skill
Diamond Bangle - Heal, Restore, Counter Attack, Long Range, HP Plus
Ribbon/White Cape

After Highwind: (You're going to want to use Yuffie to morph a Ho-chu into a Ribbon once you've obtained her Conformer from the Sunken Gelnika)

Yuffie - Back Row

Conformer - Added Effect=Hades, Added Cut=Deathblow, Heal, Restore, Slash-All, Morph
Shinra Alpha - Enemy Skill, Counter Attack, Counter Attack, Steal,
Ribbon HP Plus, MP Plus

Cloud - Back Row

Ultima Weapon - Master Magic, Master Command, Master Summon, Enemy Skill, Added Effect=Hades, Added Cut=Deathblow
Mystile - Counter=Deathblow, Counter Attack, Counter Attack, Mega All
Ribbon HP Plus,

SPECIAL BATTLE:

Towards the end of the game you are going to be given the opportunity to partake in a 'special' battle which is harder than normal battles. This battle won't become available until you have in your possession the W-Summon Materia, Omnislash and Cloud's Ultima Weapon (Cloud must have learned Omnislash). The earliest point in the game that you can obtain all three items is just after you have defeated Diamond WEAPON (just before you parachute into Midgar), after which you'll be able to take out Ultimate WEAPON to receive the Ultima Weapon (which is Cloud's ultimate weapon).

Once you have met the above conditions you will be able to talk to the clerk behind the desk who will offer you the opportunity to fight in the special battle. If you win all 8 rounds then you will be rewarded with the Final Attack Materia, which can only be won once. You can also win some completely

useless prizes such as the Combat Diary, Autograph and Gambler. These items serve absolutely no purpose whatsoever. Only Cloud will be able to participate in this 'special' battle.

NOTE - The Final Attack Materia is extremely useful, especially when paired with Revive. It's definitely considered 'essential' when going up against either Ruby or Emerald WEAPON.

The enemies for this battle are pre-scripted and never change:

BATTLE 1:	Sea Worm	* = Susceptible to L4 Suicide.
BATTLE 2:	Ho-chu	The Sea Worm is vulnerable to Ice
BATTLE 3:	Unknown 3*	The Ho-chu is vulnerable to Water
BATTLE 4:	Serpent	The Serpent is vulnerable to Wind
BATTLE 5:	Wolfmeister	The Wolfmeister is vulnerable to Water
BATTLE 6:	Behemoth	
BATTLE 7:	Maximum Kimaira	Winning 10 battles will net you a
BATTLE 8:	Proud Clod, Jamar Armor	Ribbon, however it's much easier to
		just morph a Ho-chu.

1st Win = Final Attack Materia
2nd Win = Autograph
3rd Win = Combat Diary
4th Win = Gambler
10th Win = Ribbon

If your win count is between 5~9, or more than 10, then the prize chances are as follows:

Autograph - 33.6% chance (86/256)
Combat Diary - 33.6% chance (86/256)
Gambler - 32.8% chance (84/256)

{Ghost Square}

--E.08 E - Ghost Square

--Items of Interest - Turtle Paradise Poster #3

The Ghost Square basically serves as an Inn where you can rest for 5GP. In the 1st floor lobby on the left hand side you'll find the poster for the Turtle Paradise Mini-Game (section E.03). Through the opening you'll find Mr Hangman's shop, here's what he has to sell: (no variation between Discs)

ITEM SHOP	
Potion	50 gil
Phoenix Down	300 gil
Ether	1500 gil
Antidote	80 gil
Maiden's Kiss	150 gil
Cornucopia	150 gil
Soft	150 gil
Echo Screen	100 gil
Hyper	100 gil

During Disc 1 the Ghost Square will act as a 'catch up' point, where Cloud will run through the story plot so-far with his comrades. Shortly after this the Dating sequence will begin (section E.01). You will never again step foot in the hotel bedroom once the dating sequence has finished, so be sure to pick up the Elixir that is hiding in the northern closet.

Tranquilizer	100 gil

{Round Square}

--E.08 F - Round Square

For 3GP you can ride the Gondola with a teammate of your choice. You'll see a few scenes that weren't shown on the date, other than that there isn't much point in spending too much time here. The date sequence itself is fairly interesting as you'll be spending some quality time with either Aeris, Tifa, Yuffie or Barret. Aeris's and Tifa's date will have a 'meaningful' feel to it, and Yuffie's and Barret's date will have a 'comical' feel to it.

If you want to view the dialogue that takes place here for each character, then you should visit section E.01 F.

{Speed Square}

--E.08 G - Speed Square

--Items of Interest - Umbrella, Flayer

The Speed Square is home to one attraction only, and that is the 'Shooting Coaster' which is basically a rollercoaster style shoot-em-up. The first time you visits the Gold Saucer you'll be able talk to the owner, Dio, about the Black Materia and a man in a hooded cape. Heading down the tunnel will lead to the attraction itself. The ride costs 10GP to play, and isn't that great in the way of rewards seeing as most of the prizes do absolutely nothing, while the ones that are good for something require an insanely high score to obtain:

SCORE:	PRIZE:	
3000+	1/35 Soldier 33.2% chance Super Sweeper 33.2% chance Masamune Blade 33.6% chance	- The Umbrella is a weapon for Aeris that has 0 Materia slots but incredibly strong attack power, and is best used for Yuffie's sidequest.
5000+	Umbrella (once only, Disc 1) Flayer (once only, Disc 2)	- The Flayer is a weapon for Cid and is the strongest weapon in the game to have normal growth. None of its 7 Materia slots are linked.

While scoring 3000+ can be a challenge, scoring 5000+ can be near to impossible without using an emulator. I suggest sitting down with youtube to really learn the track and the position of every target, because as they say, practise makes perfect! Use confirm to shoot the targets as they appear, but be mindful of the power-bar to the left, the more it depletes the less power your shots will have.

NOTE - Do not let your Power meter run below 4/5ths. Quick, short bursts is what's required, especially for the big spaceship at the end!

Below is a list detailing each available target, along with how many points each is worth and how many times they appear:

TARGET:	SCORE:	QNTY:
Ghost	40	10
Cactus	30	5
Cacti on Rocks	50	1
Blue Plane	50	9
Grey Plane	50	11
Yellow Boulder	200	1
Yellow Frog	60	3
Red Water Wheel	285	1
Yellow Star	40	10
Flashing Star	70	6
Icicle	40	10
Icicle Shard	50	7
Balloon	30	19
Large Balloon	70	1
UFO	60	9
Pink Rocket	50	8
Lava Boulder	70	7
Helicopter	40	8
Flashy UFO	80	8
Large Spaceship	1000	1
Secret Headlight	200	1

- The Cactus comes in two different forms.
- The Cacti on Rocks is the last cactus target that drops on top of a boulder.
- To find the Yellow Boulder you must look out for the single Blue Plane in the Canyon, just before it passes you'll notice the Yellow Boulder at the top.
- The Red Wheel appears just after Yellow Frogs, and the longer you shoot it the more points you accumulate with a max of 285.
- After the boss at the end you'll encounter one more Helicopter, Blue Plane and Grey Plane, each worth 10 points more than normal.
- As you're pulling into the station you can try to shoot the second from last headlight on the left for an additional 200 points.

There is also a 'Zeppelin Propeller' that can be shot for additional points, however this is only achievable in the Japanese original, the PC and the PS4 release. Due to the amount of points available (30,440 total), this is believed to be a glitch. The Propeller appears for two brief moments, and can be found in-between the Pink Rockets and the Lava Boulders.

Again, you're really going to need some patience on this one. I suggest saving before attempting to gain the Flayer (let's face it, there's no real need for the Umbrella, unless you're going for 100%), and really memorising the youtube vids; there's plenty out there!

{Event Square}

--E.08 H - Event Square

The Event Square is basically a theatre that has got absolutely nothing going on for the majority of the game, except for during the dating sequence. Whilst you are with your date you will be chosen as the 100th couple (unless you are with Barret, in which case this whole scene will be skipped entirely) and you will be asked to perform in the play. You will then have multiple dialogue options to choose from in which you can either aid the play to help it run smoothly (but also boringly), or you can purposely muck up the lines for a comical experience.

\--/

¬¬¬

cure you of most Statuses! The same goes for Angel Whisper, which is learnt from the Pollensalta in the North Crater. Another great way to defend yourself from Status ailments is to level the Heal Materia up to level 2 for 'Esuna', which will cure you of most bad afflictions.

There are three Statuses that will render you immune to all other Status changes, and these are Resist, Petrify and Peerless. Petrify is very similar to being K.O'd and Peerless is another term for Invincible (only Aeris's Limits can grant the Peerless Status). Note that whilst under Resist you can still undergo Status changes from the handicaps at the Battle Square, with the additional effect of 'locking' the status in place, which is bad.

{Added Effect}

--E.09 B - Added Effect Materia

Very much like the Elemental Materia, the Added Effect Materia will protect you from a Status change if you pair it with the associated Materia whilst placing it in your armour. Similarly, placing it on your weapon will make you attack with the associated Status.

There is only one piece of Added Effect Materia in the whole game, and you *must* obtain whilst traversing through the Cave of The Gi on Disc 1. If you miss picking it up then you'll have permanently missed out on it, see section D1.14 B for the walkthrough.

NOTE - A Lv1 Time on your weapon paired with Added Effect *will* make your attacks hit with Slow and Stop, whereas a Lv1 Time paired with, let's say, Sneak Attack will only make your player cast Haste.

To see a full list of every Status that you are attacking with and defending against, go into the 'Status' screen, then use confirm to navigate to the Status tab (third one in). Not all available Statuses are shown within this window - only 26 of the available 35 are shown.

You won't be able to fully utilise the awesomeness of the Added Effect Materia until you manage to obtain the Hades Materia from the Sunken Gelnika. Pairing them together will make you attack with/protect from: Sleep, Poison, Confusion, Silence, Frog and Small. (Just) before you are able to grab the Hades Materia you will be able to get the Contain Materia from Mideel, which will make you attack/protect with/from: Confusion, Petrify and Stop (regardless of what level Contain is at).

Here is a list of every piece of Materia that is pairable with Added Effect:

MATERIA:	INFLICTS/DEFENDS:	FOUND:
Poison	Poison	Hojo's Laboratory
Choco/Mog	Stop	Chocobo Ranch
Seal	Sleep, Silence	Junon
Transform	Frog, Small	Mt. Corel
Mystify	Confusion, Berserk	Gongaga Village
Time	Slow, Stop	Gongaga Village
Destruct	Death	Shinra Mansion
Odin	Death	Shinra Mansion
Contain	Confusion, Petrify, Stop	Mideel
Hades	Sleep, Poison, Confusion, Silence, Frog, Small	Sunken Gelnika

From what I can gather, each Status that is paired to you weapon will have a 31% chance of inflicting the enemy with that Status when attacking. That's 31% per each individual Status, not the Materia itself i.e. with Hades it *won't* hit with all or nothing if you catch my drift. Thanks to NFITC1 for clarifying that figure (31%).

This chart depicts the amount of enemies that are immune (IMM) and vulnerable (VUL) to each Status:

(There are 295 enemies in total. 4 of these will be fully cured by Death)

STATUS	IMM	VUL	STATUS	IMM	VUL
Death	102	189 (64%)	Frog	216	79 (27%)
Sleep	96	199 (67%)	Small	171	124 (42%)
Poison	77	218 (74%)	Petrify	121	174 (59%)
Confusion	153	142 (48%)	Death Sentence	127	168 (57%)
Silence	81	214 (73%)	Manipulate	157	138 (47%)
Slow	27	268 (91%)	Berserk	127	168 (57%)
Stop	111	184 (62%)	Paralyzed	126	169 (57%)

Slow is by far the best Status to equip on your weapon, followed by Silence, Sleep and then Stop. Dis-regard Poison as the Status isn't really effective enough to consider using it. Before you can acquire Hades and Contain, the two best pieces of Materia to link with Added Effect are Time and Seal, both of which you will have obtained by the time you acquire Added Effect.

Seeing as you cannot exactly inflict Near-death on an opponent, there is no need to include it on this list. The same applies for Sadness, Fury, Slow-Numb and Darkness. Saying that, Darkness *can* be inflicted on an opponent, but due to poor programming it will not have any effect on them whatsoever (rendering the item 'Ink' useless).

NOTE - The only way to inflict Fury on an enemy is to have a player use a Hyper in-battle, then inflict that player with Confusion before he's managed to cast it, then hope that the enemy is hit with the Hyper. If you are successful then the opponents accuracy will have dropped by 30%, which is the only way of inflicting the 'Darkness' effect.

--E.09 C - Additional Information

---

1) COLOUR PRIORITIES:

If your character is inflicted with a particular Status then he/she will sometimes turn a specific colour. If that character is inflicted with more than one Status then the game will choose which colour you character should be based on the colour priorities as follows:

H	Slow-numb	Poison	Berserk	Peerless	Darkness	Regen	Manip.	L
I								O
G								W
H	Grey	Green	Red	Yellow	Black	Orange	Cyan	

2) STATUSES THAT NEGATE EACH OTHER:

Some Status changes will cancel out certain other Statuses:

Death/K.O. - negates - All other Statuses (excluding Frog and Small)
Sleep - negates - Manipulate
Stop - negates - Manipulate
Paralyzed - negates - Manipulate
Petrify - negates - Manipulate and Slow-numb
Sadness - negates - Fury
Fury - negates - Sadness
Haste - negates - Slow
Slow - negates - Haste

3) {DESPELL}:

DeSpell is obtained via a level 2 Destruct, and will clear Haste, Slow, Stop, Regen, Barrier, MBarrier, Reflect, Shield, Death Force and Resist. You could also use a Holy Torch to cast Despell, however you would *not* clear Death Force or Resist that way. DeBarrier will only clear Barrier, MBarrier, Reflect and Shield.

Gi Nattak is the only enemy that will cast DeBarrier, and only the Valron and Safer-Sephiroth will cast DeSpell, however Emerald WEAPON has several moves that act as DeSpell would.

4) TIFA'S POWERSOUL AND MASTER FIST:

There are two weapons that Tifa uses that are greatly enhanced when Tifa is inflicted with various de-buffs:

{Powersoul} - Found in a chest at Mt. Nibel. Attack= 28. 4 x unlinked slots, double growth. When Tifa is inflicted with Death Sentence the attack power is quadrupled, and when she is in Near-death the attack power is doubled. Effects stack for a maximum of 8x normal power.

{Master Fist} - Found in a chest in the Shinra HQ on Disc 2. Attack= 38. 6 x unlinked slots, normal growth. When Tifa is inflicted with either Near-death, Poison, Sadness, Silence, Slow or Darkness, her attack power will be doubled, and when she is inflicted with Death Sentence or Slow-numb her attack power will be tripled. Effects stack for a maximum of 11x normal power.

5) {CURSE RING}:

Found on Disc 2 during the Mideel sequence (before it has been destroyed), and then again from Ultimate WEAPON by stealing from it (aerial fight only). It is possible to miss the Curse Ring completely.

The Curse Ring will grant the bearer +35 Strength, +35 Magic, +15 Vitality, +15 Spirit, +15 Dexterity and +10 Luck, but will also inflict Death Sentence at the beginning of each battle. This is easily overcome by casting Death Force, wearing Added Effect=Destruct or just by killing your foes quickly.

Tifa is the best candidate for the Curse Ring as her aforementioned weapons will gain a considerable boost in attack power when under Death Sentence.

6) CONTAIN:

At level 1, Contain (Freeze) will potentially inflict Stop. At level 2 (Break) it may inflict Petrify, at level 3 (Tornado) it may inflict Confusion and at level 4 (Flare) it will not cause a Status change. Pairing Contain with Added Effect will grant all 3 effects, regardless of the level of Contain.

7) OTHER RANDOM BITS OF INFO:

- Esuna will not heal Slow or Stop.
- Vincent in Limit Break mode and Sephiroth in the flashback gain immunity to Berserk, Frog and Confusion.
- If a target is immune to a Status then the word 'miss' will not appear above their head when a Status changing move is cast on them.
- Under the Peerless Status you will still be susceptible to Imprisoned.
- White Wind and Angel Whisper will not cure Fury or Sadness, however sleeping at an Inn will.
- If a target is immune to either Slow or Haste then they will have immunity to both Statuses. If a target is immune to Death then they are immune to Death Sentence (but not vice-versa).
- Some creatures are weak to Statuses and will take double damage when using certain Status changing attacks, Such as Palmer who is weak to Sleep.
- The Ribbon will protect against all negative Statuses excluding Death, Slow and Stop. You will still be able to inflict yourself with Fury and Sadness outside of battle using Hypers and Tranquilizers.
- {Dual} is a dummied out Status and it is unclear what it was intended for, although when using a gameshark, 'Dual' will be displayed as the name for the Status Seizure.

¬¬¬

```
+-------------+
|   {DEATH}   |  Visual: Character lies lifeless, HP is in red.
+-------------+
```

If you are hit with Death then your HP will drop to 0 and you'll be instantly K.O'd. This differs from the Status "K.O" slightly (which also inflicts the Death Status), and would be better known as Instant-Death (or Sudden Death). There are 102 enemies that are immune to the Death Status and 189 enemies that are vulnerable. Unfortunately, the Ribbon will not protect you from Death.

When you are K.O'd, you will become inactive from the battle *and* be inflicted with the Death Status. The Enemy uses a "Death Status Check" when performing and attack (not the K.O status) to make sure that a player is targetable. When you revive the K.O'd player, you lift the K.O status by bringing it back into battle *and* lift the Death Status as two separate functions.

The time to protect yourself from Death would be at the North Crater, where there are 8 different attacks that can inflict Death upon you. Also, some Undead creatures will be fully healed by casting Death upon them, namely the Ghost, Zenene, Ghost Ship and Dragon Zombie. Regen however will *not* gradually harm them as it is not of the Element Restorative. You first obtain a Death based Materia when you reach Nibelheim; Odin. Shortly after you'll receive the Destruct Materia.

The Resist Status will also protect you from (instant) Death, as will the Enemy Skill Death Force. Just remember that DeSpell or White Wind will remove the Death immunity. Also, when you are K.O'd you will be cured of every other Status, excluding Frog and Small.

Some enemies will absorb the Death Status (in the same way they would absorb an Element), which means that they will be vulnerable to Death, even if their Status attributes dictate it as being immune.

NOTE - If an enemy is immune to Death then some of the below attacks will use an alternative attack that damages the opponent/s normally, such as Vincent's Satan Slam, or Odin's Steel Blade Sword (Gunge Lance will be used instead). Other attacks will simply miss.

```

+===+

+------------------+
| {NEAR-DEATH} | Visual: Character kneels down, HP is in yellow.
+------------------+

When one of your characters HP falls below 25% they will be considered in the 'Near-death' (or 'Critical') Status. The only way you can be cured is by healing your character as normal, this wouldn't really be regarded as a 'traditional' negative Status. There are only a few ways in which this can affect the you other than aesthetically:

Tifa has two weapons that will double in attack power when her health is critical, these are the Master Fist and Powersoul. The attack power will also triple if she is inflicted with death Sentence (effects stack).

There are two weapons that have attack power that is proportionate to the wielders HP, and these are: Ultima Weapon (Cloud's ultimate weapon) and HP Shout (Cait Sith's ultimate weapon). The attack power of these weapons will drop considerably when in Near-death, and the Ultima Weapon will turn blue.

Strong Gravity based attacks such as Demi3 will place your characters into Near-death (unless you have Elemental counter-measures in place). Some of the final bosses in the game will use attacks that will drop your HP straight into critical. Should you wish to inflict Near-death upon an enemy then the only two moves you can consider are L4 suicide and Demi3.

+-------------+
| {SLEEP} | Visual: Character kneels down, Zzz appears above head
+-------------+

Whilst inflicted with Sleep you won't be able to select a command. The Status will wear off after 12 turns (approx), or until you are hit with a physical attack (a magic attack won't count). You obtain your first Sleep based magic (Seal Materia) on your first visit to Junon.

 NOTE - It's pretty difficult to explain how the time units work, explore
        TFergusson's Battle Mechanic FAQ for more info. You characters
        Dexterity , the ATB settings ('Wait' or 'Active') and the Battle
        Speed itself will vary the amount of turns your character is
        affected by a particular Status.

There are 96 enemies that are immune to Sleep, and 199 enemies that are vulnerable, making the Seal Materia one of the best Materias to equip on your weapon at an early point in the game (you'll also hit with a chance of inflicting Silence). The Enemy Skill Frog can be used to cure you of Sleep but only if you are inflicted with Frog also.

Later on in the game when you have managed to obtain 3 copies of the Added Effect Materia (by mastering two of them), you could try equipping all three characters with Seal on their weapons to potentially keep your enemies in a state of permanent sleep!

*Bad Breath	Malboro	(North Crater Right Path)

POISON	Visual: Character kneels down, flashes green {Poison Status}

If your character is afflicted with poison then they will periodically lose a small chunk of health, specifically 1/32 of their Max HP (3.125%) will be deducted every 1.5 turns (approx) until they are cured or the battle ends. Unlike other games in the Final Fantasy series, Poison will not remain with the character post battle. You first obtain the Poison Materia when you raid the Shinra HQ on Disc 1.

It's important to note that the Poison Element and the Poison Status differ from each other in the sense that while an attack may hit you with Poison Elemental damage, it may not inflict you with the Poison Status, and vice-versa. 77 enemies are immune to Poison and 218 are vulnerable.

If you 'Nullify' Poison (Lv2 Elemental) then you would also by default be considered 'Immune' to the Poison Status. If you were to 'Absorb' Poison (Lv3 Elemental) then being inflicted with the Poison Status would result in you being healed by the infliction instead of being injured by it. Similarly, being Immune to the Poison Status (Added Effect, Star Pendent) also means Nullifying any Poison based Elemental attacks.

The last few thing to mention are: Lucky 7's. If you are afflicted with the 7777 Fever buff then you will receive 7777 HP worth of damage from the Poison Status (which will mean Death). Also, the damage from Poison is considered to be a self-inflicted hit, meaning your Limit gauge will not fill up nor will you Counter Attack. If you receive Poison damage whilst in 'Defend' mode then not only will you be taken out of defend, but also the damage will not be reduced as the Poison (Status) ignores all defences.

NOTE - If an enemy's HP is over 30,000 HP then they cannot be sensed. Their

HP can then be worked out by Poisoning them, or by using Chocobuckle.

Associated Materia and Items that INFLICT: (POISON)		
MAGIC	Poison Lv1 (Bio)	- Inflicts Poison Damage and Poisons one target (48%)
	Poison Lv2 (Bio2)	- Inflicts Poison Damage and Poisons one target (48%)
	Poison Lv3 (Bio3)	- Inflicts Poison Damage and Poisons one target (72%)
ENEMY SKILL	Bad Breath	- Inflicts Poison, Sleep, Confusion, Silence, Frog and Small on all targets
SUMMON	*Hades	- Inflicts Poison, Sleep, Confusion, Silence, Frog, Small, Slow and Paralyze on all targets
BATTLE ITEMS	Deadly Waste	- Casts Bio2 on all targets (20%)
	M-Tentacles	- Casts Bio3 on all targets (48%)
	Cauldron	- Inflicts Poison, Sleep, Frog, Small, Confusion and Silence on one target

*Hades will not inflict Slow or Paralyze when paired with Added Effect

Associated Materia and Items that CURE: (POISON)		
MAGIC	Heal Lv1 (Poisona)	- Cures Poison
	Heal Lv2 (Esuna)	- Cures all negative Statuses
ENEMY SKILL	White Wind	- Cures all negative Statuses

+============================================================================+

+-----------------+
|   {CONFUSION}   |  Visual: Character spins around in circles (on axis)
+-----------------+

Whilst under Confusion (or Confuse, or Confu), a character will act of his
own accord and you'll lose complete control of him/her, very similar to
Berserk . The difference being that the afflicted player could also attack an
```

ally; whomever they happen to be facing at the time their ATB gauge fills up will be the confused players next target, including themselves. Similar to Sleep, the affliction can be cured by physically attacking the player.

Confusion is one of the worst Statuses in the game, and improper defences could very easily lead to a Game Over screen. The most notorious locations for having to deal with Confusion are the Shinra Mansion, where many inexperienced players meet their demise against the Dorky Face, and then at Gaea's Cliffs when you first meet the Malboro.

NOTE - You can obtain a Peace Ring very early on in the game; by completing (and winning) 2 Fort Condor Battles. The Peace Ring's info is misleading in the PSX NTSC version, as it will not tell you that it protects from Confusion, however when you check the Stats screen you'll see that you are indeed protected.

There are 153 enemies that are immune to Confusion and 142 that are vulnerable. The first time you can obtain a Confusion based Materia (Mystify) is on your first visit to Gongaga, you will also find that a Lv3 Contain (Tornado) will have a chance of inflicting Confusion, however you will be granted Confusion when pairing with Added Effect with Contain regardless of the level of the Contain.

If an enemy is inflicted with Confusion then the AI script will continue to run as normal, only the 'Enemy' and 'Ally' flags will be reversed. If an item is chosen by a player as their next move and that player then becomes inflicted with Confusion, they will still continue to cast the selected item only the target will now be chosen at random. This is the only way to inflict an enemy with Fury.

Three Enemies in the game take double damage from Confusion: Sword Dance, Soldier:3rd and Corvette. This means that if you paired the Added Effect Materia with Mystify/Contain then you would inflict double damage with your regular physical attacks.

Associated Materia and Items that INFLICT: (CONFUSION)		
MAGIC	Mystify Lv1 (Confu)	- Inflicts Confusion on one target
	Contain Lv3 (Tornado)	- Deals Wind damage and inflicts Confusion (32%)
ENEMY SKILL	Bad Breath	- Inflicts Confusion, Poison, Sleep, Silence, Frog and Small on all targets
SUMMON	*Hades	- Inflicts Confusion, Poison, Sleep, Silence, Frog, Small, Slow and Paralyze on all targets
BATTLE ITEMS	Loco Weed	- Inflicts Confusion on all targets (80%)
	Cauldron	- Inflicts Confusion, Poison, Sleep, Frog, Small and Silence on one target

*Hades will not inflict Slow or Paralyze when paired with Added Effect

Associated Materia and Items that CURE: (CONFUSION)
Any Physical attack made to the afflicted player will cure them instantly

Bewildered	- Elena	(Winding Tunnels Re-visited)
Confu	- Helletic Hojo	(Mako Cannon)
Confu	- Scissors	(North Crater)
Fascination	- Pollensalta	(North Crater)
*Bad Breath	- Malboro	(North Crater Right Path)
Super Nova	- Safer-Sephiroth	(Inside The Planet)
Ruby Ray	- Ruby Weapon	(Gold Saucer Desert)

| {SILENCE} | Visual: Speech Bubble ".....” appears overhead

Silence (also known as Mute) will have the effect of disabling all magical spells, Summons and Enemy Skill attacks and will last until the end of battle or until the affliction has been cured. 81 enemies are immune to Silence and 214 enemies are vulnerable. You can first obtain a Silence based Materia (Seal) when you first visit Gongaga.

Due to the large quantity of enemies are weak to Silence, I would definitely say this is one of the better Statuses to whack on your weapon, as there are a large number of enemy attacks that would be better off 'Silenced'. The Ribbon is the only accessory that will defend against Silence.

Associated Materia and Items that INFLICT: (SILENCE)

MAGIC	Seal Lv2 (Silence) - Inflicts Silence on one target
ENEMY SKILL	Bad Breath - Inflicts Silence, Confusion, Poison, Sleep, Frog and Small on all targets
SUMMON	*Hades - Inflicts Silence, Confusion, Poison, Sleep, Frog, Small, Slow and Paralyze on all targets
BATTLE ITEMS	Mute Mask - Inflicts Silence on all targets (80%)
	Cauldron - Inflicts Silence, Confusion, Poison, Sleep, Frog and Small on one target
LIMIT BREAKS	

Aeris 1-2 Seal Evil - Inflicts Silence and Paralyze on all targets

*Hades will not inflict Slow or Paralyze when paired with Added Effect

Associated Materia and Items that CURE: (SILENCE)

MAGIC	Heal Lv2 (Esuna) - Cures all negative Statuses
ENEMY SKILL	White Wind - Cures all negative Statuses
	Angel Whisper - Revives player from K.O and cures all negative Statuses
BATTLE ITEMS	Remedy - Cures all negative Statuses
	Echo Screen - Cures Silence

| LIMIT BREAKS :

| Aeris 2-1 Breath of The Earth - Cures all negative Statuses

Associated Materia and Items that PROTECT: (SILENCE)

MAGIC	Heal Lv3 (Resist) - Protects against all Statuses
	Seal - Protects against Silence (with Added Effect)
SUMMON	Hades - Protects against Silence, Confusion, Poison, Sleep, Frog and Small (with Added Effect)
BATTLE ITEMS	Vaccine - Inflicts one player with Resist
ACCESSORIES	Ribbon - Protects against most negative Statuses
LIMIT BREAKS	

| Aeris 3-1 Planet Protector - Inflicts Peerless on all allies
| Aeris 4 Great Gospel - Inflicts Peerless on all allies

*=Enemy Skill Associated Enemy Attacks: (SILENCE)

Attack:	Enemy:	
Silence	Eligor	(Train Graveyard)
Curses	Dorky Face	(Shinra Mansion)
Silence	Bahba Velamyu	(Forest Near Nibelheim)
Ultrasound	Evilhead	(Gaea's Cliff)
*Bad Breath	Malboro	(Gaea's Cliff)
Silence	Jenova-DEATH	(Whirlwind Maze)
Smog Alert	Gas Ducter	(Mt. Corel Train)
Diamond Flash	Diamond Weapon	(Midgar Area)
Silence	SOLDIER:1st	(Mako Cannon)
Silence	Helletic Hojo	(Mako Cannon)
Silence	Lifeform Hojo	(Mako Cannon)
Magic Extinguish	Parasite	(North Crater)
Voice of Ages	Gighee	(North Crater Swamp Area)
*Bad Breath	Malboro	(North Crater Right Path)
Sun	Death Dealer	(North Crater Right Path)
Super Nova	Safer-Sephiroth	(Inside The Planet)

| {SLOW} | Visual: Character animation speed is halved

The effect and the Status name are the same thing. You're characters ATB gauge will fill up at half its normal rate, and will last until you are cured or the battle ends. 27 enemies are immune to Slow and a staggering 268 are vulnerable, making the Time Materia one of the best choices to pair with Added Effect (which is first available in Gongaga).

Strangely enough, if you were to pair Time with Added Effect on your armour

then you would also gain immunity to Haste, even though this would not be displayed on the Status screen. Equipping the Sprint Shoes would bypass this immunity. Slow is one of 3 Statuses not covered by the Ribbon (along with Stop and Death). Although Hades will inflict Slow when you summon him in-battle, he will not grant Slow when using Added Effect. Esuna will not heal Slow.

If you are inflicted with Slow then the benefit would be that some certain effects such as Barrier, MBarrier, Slow-numb and Death-sentence will take twice as long to wear off/count down. Slow can be cured by casting Haste on the afflicted player, as can DeSpell. The most notorious area in the game for having to deal with Slow is right at the beginning of the game in the Winding Tunnels when fighting the Grashtrike. It is recommended that you turn the Battle Speed up all the way for these encounters.

Associated Materia and Items that INFLICT: (SLOW)		
MAGIC	: Time Lv2 (Slow)	- Inflicts Slow on one target
SUMMON	: *Hades	- Inflicts Silence, Confusion, Poison, Sleep, Frog, Small, Slow and Paralyze on all targets
BATTLE ITEMS	: Spider Web	- Inflicts Slow on all targets (100%)

*Hades will not inflict Slow or Paralyze when paired with Added Effect

Associated Materia and Items that CURE: (SLOW)		
MAGIC	: Time Lv1 (Haste)	- Inflicts Haste on one target
	: Destruct Lv2 (DeSpell)	- Removes 10 various 'buffs'
ENEMY SKILL	: White Wind	- Cures all negative Statuses
	: Angel Whisper	- Revives player from K.O and cures all negative Statuses
	: Big Guard	- Casts Haste, Barrier and MBarrier to all targets
BATTLE ITEMS	: Remedy	- Cures all negative Statuses
	: Speed Drink	- Casts Haste on one target
	: Holy Torch	- Casts DeSpell on one target
LIMIT BREAKS	:	

Aeris	2-1	Breath of The Earth - Cures all negative Statuses
Red XIII	1-2	Lunatic High - Casts Haste on all Allies and raises Defence

Associated Materia and Items that PROTECT: (SLOW)		
MAGIC	: Heal Lv3 (Resist)	- Protects against all Statuses
	: Time	- Protects against Slow (with Added Effect)

| BATTLE ITEMS : Vaccine - Inflicts one player with Resist |
| ACCESSORIES : Sprint Shoes - Automatically puts you in Haste |
| LIMIT BREAKS : |
| Aeris 3-1 Planet Protector - Inflicts Peerless on all allies |
| Aeris 4 Great Gospel - Inflicts Peerless on all allies |

Associated Enemy Attacks: (SLOW)

Attack:	Enemy:	
Silk	- Grashtrike	(Winding Tunnels)
Slow Dance	- Mandragora	(Chocobo Ranch Area)
Spider Web	- Mystery Ninja	(Forests)
Slow	- Bahba Velamyu	(Forest Near Nibelheim)
Silk	- Jayjujayme	(Da-chao Statue)
Eyesight	- 8 eye	(Temple of The Ancients)
Dance	- Malldancer	(Corral Valley)
Toxic Barf	- Zolokalter	(Gaea's Cliff)
Slow	- Killbin	(Whirlwind Maze)
Abnormal Shell	- Gun Carrier	(Junon Underwater Reactor)
Support Beam	- Shadow Maker	(Midgar Sector 8)
Slow	- Lifeform Hojo	(Mako Cannon)
Stigma	- Bizarro-Sephiroth	(Inside The Planet)
Super Nova	- Safer-Sephiroth	(Inside The Planet)

{STOP}	Visual: Character animation completely stops

There are 4 Statuses that render you incapacitated, and Stop is considered to be the 2nd worst of them. The afflicted players ATB gauge will stop filling up altogether and will last approximately 7 turns, or until the Status is cured. There are 111 enemies that are immune to Stop and 184 enemies that are vulnerable. The Time Materia can be bought from Gongaga.

A level 1 Time will still grant Slow and Stop when paired with Added Effect, and is a brilliant choice up until Hades and Contain become available. You cannot gain Stop from Hades, however you can gain it from Contain (along with Petrify and Confusion), and also Choco/Mog, however the C-Mog is best reserved for the Elemental Materia (I call it the 'C-Melemental', or even, 'the C-Mental combo').

Along with Slow and Death, Stop is one of the 3 Statuses not covered by the Ribbon's effect. One of the slight benefits to Stop is that Barrier, MBarrier, Regen etc. will also halt. The only difference between Stop and Paralyze is the fact the you Limit Break *will* continue to fill whilst 'Stopped', whereas under Paralyze your Limits won't continue to fill, although Paralyze does last roughly less than half the time of Stop. Esuna will not heal Stop.

Associated Materia and Items that INFLICT: (STOP)

+===+

+------------+
| {FROG} | Visual: Character turns into a small frog
+------------+

Also known as {Toad}, Frog can be a real nasty Status if you're not adequately prepared, as you will pretty much lose the ability to do everything! All you'll be able to do is attack with 25% of your normal attack power (but not Limit Breaks), and use the Item command (including W-Item). There are 216 enemies that are immune to Frog, and only 79 that are vulnerable making Frog one of the worst Statuses to use against the enemies.

NOTE - Unlike all other Statuses, Frog and Small will still be in effect after the afflicted character is K.O'd.

Whilst inflicted with Frog you will still be able to use the command 'Toad' to cure yourself, so long as you have the Transform Materia equipped (bought from North Corel) or the Master Magic. The effect will last for as long as the battle does, or until you are cured. You could also use the Enemy Skill Frog Song to cure yourself, but you would have to be afflicted with Sleep also for the cure to work.

Without a White Cape to protect yourself you'll soon realise why Frog is such a pain when you first make your way through the forests of Gongaga. The Touch Me have a 6x formation (so no escaping), and will keep you in a state of permanent Frog. The Enemy Skill Frog Song is learnt here. Frog will also ruin your day at the Battle Arena as it seems to appear quite frequently, particularly in the lower rounds (Frog and Small have a chance of appearing on every reel).

| Associated Materia and Items that INFLICT: (FROG) |

	:	
MAGIC	:	Transform Lv2 (Toad) - Inflicts Frog on one target
ENEMY SKILL	:	Frog Song - Inflicts Frog and Sleep on one target
	:	Bad Breath - Inflicts Frog, Poison, Confusion, Silence, Sleep and Small on all targets
SUMMON	:	*Hades - Inflicts Frog, Confusion, Poison, Sleep, Small, Silence, Slow and Paralyze on all targets
BATTLE ITEMS	:	Impaler - Inflicts Frog on one target
	:	Cauldron - Inflicts Frog, Confusion, Poison, Sleep, Silence and Small on one target

*Hades will not inflict Slow or Paralyze when paired with Added Effect

| Associated Materia and Items that CURE: (FROG) |

	:	
MAGIC	:	Heal Lv2 (Esuna) - Cures all negative Statuses
	:	Transform Lv2 (Toad) - Cures Frog

ENEMY SKILL	Frog Song	- Cures Frog and Sleep (together only)
	White Wind	- Cures all negative Statuses
	Angel Whisper	- Revives player from K.O and cures all negative Statuses
BATTLE ITEMS	Remedy	- Cures all negative Statuses
	Impaler	- Cures Frog
	Maiden's Kiss	- Cures Frog
LIMIT BREAKS		
Aeris 2-1	Breath of The Earth	- Cures all negative Statuses

The enemy attack 'Frog Jab' can also cure you of Frog (Touch Me)

Associated Materia and Items that PROTECT: (FROG)

MAGIC	Heal Lv3 (Resist)	- Protects against all Statuses
	Transform	- Protects against Frog (with Added Effect)
SUMMON	Hades	- Protects against Frog, Silence, Confusion, Poison, Sleep and Small (with Added Effect)
BATTLE ITEMS	Vaccine	- Inflicts one player with Resist
ACCESSORIES	Ribbon	- Protects against most negative Statuses
	White Cape	- Protects against Frog and Small
LIMIT BREAKS		
Aeris 3-1	Planet Protector	- Inflicts Peerless on all allies
Aeris 4	Great Gospel	- Inflicts Peerless on all allies

*=Enemy Skill — Associated Enemy Attacks: (FROG)

Attack:	Enemy:	
Impaler	Mystery Ninja	(Forests)
Frog Jab	Touch Me	(Forests Near Gongaga)
*Frog Song	Touch Me	(Forests Near Gongaga)
Petrified Frog	Under Lizard	(Area Near Temple of The Ancients)
Frog Jab	Toxic Frog	(Temple of The Ancients)
*Frog Song	Toxic Frog	(Temple of The Ancients)
*Bad Breath	Malboro	(Gaea's Cliff)
*Bad Breath	Malboro	(North Crater Right Path)
Pale Horse	Safer-Sephiroth	(Inside The Planet)
Right Revenge	Ruby Weapon	(Gold Saucer Desert)
Right Thrust	Ruby Weapon	(Gold Saucer Desert)

{SMALL}	Visual: Character shrinks to roughly 20% of their normal size

Small, also known as {Mini}, isn't too detrimental provided you've got some form of counter measure such as Esuna or White Wind equipped. You will still be able to use every command as normal, only now your physical attacks will inflict no more than 1 HP of damage! You will not perform criticals while inflicted with Small (technically speaking your damage will be reduced to 0, however, a final check in damage calculations will bring the damage output to 1).

The effects will last until the battle ends or the player is cured. 171 enemies are immune to Small and 124 enemies are vulnerable, the Transform Materia can first be obtained in North Corel.

If you are K.O'd whilst 'Small' then you will not revert back to normal, the same applies with Frog. There is only one point in the game that you need to be wary of Small and this is when you're fighting the Hungry in Corral Valley; they can remove a player from battle after that player has been reduced to Small. The most common way of inflicting Small on an enemy is with L4 Suicide, although Small usually isn't the desired effect.

Whilst traversing through the Cave of The Gi you will encounter a powerful spider-like creature called Stinger. Using Mini on him is the best way to deal with him, as his attacks are powerful enough to kill you in one blow. There are very few enemies that will inflict you with Small. If you happen to be inflicted with Petrify then you would be immune to every single Status change... except Small that is.

Casting Small on your characters is a strategy used to activate 7777 Fever. For more info use QSI Link [7777 Fever].

Associated Materia and Items that INFLICT: (SMALL)

MAGIC	Transform Lv1 (Mini) - Inflicts Small on one target
ENEMY SKILL	L4 Suicide - Inflicts Small and Critical on all targets with a level divisible be 4
	Bad Breath - Inflicts Small, Frog, Poison, Confusion, Silence and Sleep on all targets
SUMMON	*Hades - Inflicts Frog, Confusion, Poison, Sleep, Small, Silence, Slow and Paralyze on all targets
BATTLE ITEMS	Shrivel - Inflicts Small on one target
	Cauldron - Inflicts Frog, Confusion, Poison, Sleep, Silence and Small on one target

*Hades will not inflict Slow or Paralyze when paired with Added Effect

Associated Materia and Items that CURE: (SMALL)

MAGIC	Heal Lv2 (Esuna) - Cures all negative Statuses
	Transform Lv1 (Mini) - Cures Small
ENEMY SKILL	White Wind - Cures all negative Statuses
	Angel Whisper - Revives player from K.O and cures all negative Statuses

```
|- - - -
```

between Slow-numb and Petrify I have combined the two 'associated Materia and item/enemy attacks' sections below. The timing mechanisms of the game result in Slow-numb being very dangerous at slow speeds, so it is recommended to have your Battle Speed bar at a minimum of half way.

If you become inflicted with Slow-numb in the Battle Arena then the countdown timer will carry through to the next round (Death Sentence however will not). You must cure yourself otherwise the battle will be lost, use a Soft to cure you from both Slow-numb and Petrify.

The only way to actually inflict Slow-numb on an enemy is through Manipulating a Gagighandi or an Under Lizard.

{PETRIFY}	Visual: Character turns grey, animation completely stops

Petrify (or Stone) is one of the worst Statuses to fall victim to for noobies, as a Petrified player is flagged as dead, which means 3 Petrified players results in Game Over. No change can happen to the players HP, MP or Status whilst Petrified, although funnily enough there is one exception; the player can still be inflicted with Small. The affliction will last as long as the battle lasts, or until they are cured. Petrified players will not receive any EXP or AP. 121 enemies are immune to Petrify, 174 are vulnerable. Petrify is first available on Disc 2 when you obtain the Contain Materia.

Of all 8 enemy attacks that inflict Petrify on you, only four of them actually inflicts actual 'Petrify'; the rest inflict you with Slow-numb (which helps). The Bagrisk is an enemy that holds an extremely rare item called the Vagyrisk Claw, which can inflict Petrify on one target. The higher your current level the lower the chance you'll have of stealing the item; past level 78 and you'll have lost it forever. The only other place to obtain one is from a Lv 19 or Lv 25 CMD. Grand Horn.

NOTE - An opponent that is defeated through Petrification will yield no battle spoils. This helps for low-level challenges.

The most iconic place in the game that people remember for being wiped out by Petrify is the Gagighandi in the forests near Gongaga, you won't have any protection at that point so make use of Softs and White Wind (where would we be without White Wind). Speaking of which, when you cast White Wind on an Undead enemy it will also inflict them with Petrify.

Associated Materia and Items that INFLICT: (PETRIFY)		
MAGIC	:	Contain Lv2 (Break) - Deals Wind damage and inflicts Petrify (32%)
ENEMY SKILL	:	White Wind - Inflicts Undead creatures with Petrify
BATTLE ITEMS	:	Vagyrisk Claw - Inflicts Petrify on one target

Associated Materia and Items that CURE: (PETRIFY)		
MAGIC	:	Heal Lv2 (Esuna) - Cures all negative Statuses

ENEMY SKILL : White Wind - Cures all negative Statuses
: Angel Whisper - Revives player from K.O and cures all negative Statuses
BATTLE ITEMS : Remedy - Cures all negative Statuses
: Soft - Cures Petrify and Slow-numb
LIMIT BREAKS :
Aeris 2-1 Breath of The Earth - Cures all negative Statuses

Associated Materia and Items that PROTECT: (PETRIFY)

MAGIC : Heal Lv3 (Resist) - Protects against all Statuses
: Contain - Protects against Petrify (with Added Effect)
BATTLE ITEMS : Vaccine - Inflicts one player with Resist
ACCESSORIES : Ribbon - Protects against most negative Statuses
: Safety Bit - Protects against Petrify and Death
: Jem Ring - Protects against Petrify, Slow-numb and Paralyze
LIMIT BREAKS :
Aeris 3-1 Planet Protector - Inflicts Peerless on all allies
Aeris 4 Great Gospel - Inflicts Peerless on all allies

Associated Enemy Attacks: (PETRIFY)

Attack:	Enemy:	
Triclops	- Grangalan Jr.	(Corel Area)
Petrify Smog	- Cokatolis	(Mt. Corel)
Stone Stare	- Gagighandi	(Forests Near Gongaga)
*Stone strike	- Bagrisk	(Cosmo Canyon Area)
*Deadly Needles	- Crown Lance	(Beaches Near Cosmo Canyon)
Petrified Frog	- Under Lizard	(Area Near Temple of The Ancients)
Petrif-Eye	- Demons Gate	(Temple of the Ancients)
Rock Finger	- Gargoyle	(North Crater)
*Petrif-Eye	- Gighee	(North Crater Swamp Area)
*Break	- Safer-Sephiroth	(Inside The Planet)
Left Revenge	- Ruby Weapon	(Gold Saucer Desert)
Left Thrust	- Ruby Weapon	(Gold Saucer Desert)

*Inflicts Petrify. All other attacks inflict Slow-numb.

{DEATH SENTENCE}	Visual: Character kneels down, timer appears

Also known as Doom, Death Sentence will act in virtually the same way as Slow-numb, the main difference being that the countdown timer will be set to 60 (12 turns approx) as opposed to 30 (6 turns approx). If you are in Haste then the timer will be set at 30. When the timer hits 0 you will be inflicted with Death.

The only way in which you can inflict or be inflicted with Death Sentence is via the Enemy Skill of the same name, which can be learnt in the Cave of The Gi from the Gi Spector and Sneaky Step, and also in Corral Valley from the Boundfat. Using Death Sentence on a character that is inflicted with the Status Death Sentence will not cure your character of that Status, in fact there is no way to cure a character that has been placed in Death Sentence.

The Curse Ring will increase all of your stats considerably, but will also put your character in Death Sentence at the beginning of each battle. This can be easily overcome by using the Enemy Skill Death Force, or by using Added Effect=Destruct. If you have Tifa equipped with either the Master Fist or Powersoul then her attack power will be tripled or quadrupled, respectively.

As with Slow-numb, setting the Battle Speed to slow will make Death Sentence very dangerous, and as such it is recommended that you have the speed set to halfway (minimum). Whilst in the Battle Square Death Sentence will not carry over from one fight to the next (unlike Slow-numb). Although a Ribbon will not protect you from Death, it will protect you from Death Sentence. If an enemy is immune to Death then they are also immune to Death Sentence.

{PARALYZED}	Visual: Character animation completely stops

Paralyzed (also known as Paralyse, or Paralysis) acts like Stop in almost every way, the two differences being that you won't be able to act for roughly 2 rounds (as opposed to 7), and also your Limit gauge won't fill up. There are 126 enemies that are immune to Paralyze and 169 that are vulnerable.

NOTE - Using Dazers on Ruby WEAPON is one of the best ways of defeating her.

There are very few attacks that can inflict Paralyze on your enemies. Although Hades will inflict Paralyze when summoning him in battle, he will not grant the Paralyze ability when paired with Added Effect.

Associated Materia and Items that INFLICT: (PARALYZED)

SUMMON	*Hades - Inflicts Paralyze, Frog, Confusion, Poison, Small, Sleep, Silence and Slow on all targets
BATTLE ITEMS	Dazers - Inflicts Paralyzed on one target
LIMIT BREAKS	
Cloud 1-2	Cross-slash - Single attack also inflicting Paralyze (100%)
Aeris 1-2	Seal Evil - Inflicts Silence and Paralyze on all targets

*Hades will not inflict Slow or Paralyze when paired with Added Effect

+---------------+
|   {DARKNESS}  |  Visual: Character kneel down, starts flashing black
```

+----------------+

Darkness (aka Blind) will halve the accuracy of all physical attacks until the ailment is cured or the battle ends. The only commands that are affected are 'Attack', 'Morph', 'Deathblow', 'Mug', 'Slash-all', '2xCut' and '4xCut'. Due to the fact that absolutely no enemies use the aforementioned commands, inflicting Darkness upon an enemy is utterly pointless (rendering the Item 'Ink' obsolete).

The only way to inflict an enemy with a Status that acts as Darkness would is to have a character us a Hyper in-battle. Before the character has been able to cast the item, have the character inflicted with Confusion. If you are lucky then the confused character will use the Hyper on the enemy inflicting them with Fury, dropping their Hit% by 30%.

Associated Materia and Items that INFLICT: (DARKNESS)
BATTLE ITEMS : Ink - Inflicts Darkness on one target

Associated Materia and Items that CURE: (DARKNESS)
MAGIC : Heal Lv2 (Esuna) - Cures all negative Statuses
ENEMY SKILL : White Wind - Cures all negative Statuses
: Angel Whisper - Revives player from K.O and cures all negative Statuses
BATTLE ITEMS : Remedy - Cures all negative Statuses
: Eye drop - Cures Darkness
LIMIT BREAKS :
Aeris 2-1 Breath of The Earth - Cures all negative Statuses

Associated Materia and Items that PROTECT: (DARKNESS)
MAGIC : Heal Lv3 (Resist) - Protects against all Statuses
BATTLE ITEMS : Vaccine - Inflicts one player with Resist
ACCESSORIES : Ribbon - Protects against most negative Statuses
: Silver Glasses - Protects against Darkness
: Fairy Ring - Protects against Darkness and Poison
LIMIT BREAKS :
Aeris 3-1 Planet Protector - Inflicts Peerless on all allies
Aeris 4 Great Gospel - Inflicts Peerless on all allies

Associated Enemy Attacks: (DARKNESS)

Attack:	Enemy:
Smog	- Smogger (Sector 5 Reactor)
Erupt	- Hell House (Sector 6)
Swamp Shoot	- Madouge (Mythril Mine)
Smoke Bullet	- Marine (Cargo Ship)
Darkeye	- Grangalan (Corel Area)
Sandstorm	- Land Worm (Corel Desert)
Sandgun	- Desert Sahagin (Cosmo Canyon Area)
Great Gale	- Zuu (Mt. Nibel)
Seed Shot	- Battery Cap (Forests Near Nibelheim)
Smoke Bullet	- Attack Squad (Wutai Side-Quest)
Great Gale	- Tonadu (Beaches Near Temple of Ancients)
Eyesight	- 8 eye (Temple of The Ancients)
Dance	- Malldancer (Corral Valley)
Dark Needle	- Boundfat (Corral Valley)
Isogin Smog	- Acrophies (Corral Valley Cave)
Great Gale	- Blue Dragon (Gaea's Cliff)
Sandstorm	- Sea Worm (Mideel Area)
Smog	- Slalom (Path to Junon's Underwater Reactor)
Abnormal Shell	- Gun Carrier (Junon Underwater Reactor)
Autumn Leaves	- Rilfsak (Ancient Forest)
Evil Poison	- Bad Rap (Sunken Gelnika)
Combo	- Lifeform Hojo (Mako Cannon)
Dark Dragon Breath	- Dark Dragon (North Crater)
Sun	- Death Dealer (North Crater Right Path)
Havoc Wing	- Safer-Sephiroth (Inside The Planet)

--E.09 E - Positive Statuses

It's worth pointing out that if you're characters had the 'Resist' Status active then they would also be immune to positive Statuses, which isn't a good thing. To remove Resist you must cast DeSpell or White Wind.

DeBarrier will clear Barrier, MBarrier, Reflect and Shield whereas as DeSpell will clear all of the above barriers plus Haste, Slow, Stop, Regen, Death Force and Resist. Every one of Emerald WEAPON's attacks will have its own 'Status removing' property.

{HASTE}	Visual: Character's animation speed is doubled

Haste is probably the best positive Status in the game, and is the main reason that you'll want to obtain the Enemy Skill Big Guard as soon as you can. Making your ATB gauge fill at twice its normal rate, Haste really does turn the tide in your favour, however certain other Statuses will then run down more quickly, such as Regen, Death Sentence etc. Swings and roundabouts I guess...

The Sprint Shoes are considered to be one of the best accessories in the game (2nd to the Ribbon), and will set your characters up into auto-haste at the beginning of each battle, with the added bonus of granting immunity to Slow. They can be acquired in the Chocobo Square by winning 10 S Class matches in a

row, and at the Battle Square by talking to the woman at the bottom of the stairs. Win 8 matches in the Arena then talk to her again.

Big Guard will grant Haste, Barrier and MBarrier to your party, and while Barrier and MBarrier will drain over time, Haste will last for the entire battle. You can obtain Big Guard by manipulating a Beach Plug found on the beaches of the Gold Saucer Area after you've obtained the buggy. The earliest point in the game that you can use Haste is by using Red XIII's 1-2 Limit Break, Lunatic High. An immunity to Slow will also result in an immunity to Haste.

Associated Materia and Items that CAST: (HASTE)		
MAGIC	:	Time Lv1 (Haste) - Casts Haste
ENEMY SKILL	:	Big Guard - Casts Haste, Barrier and MBarrier on all targets
ACCESSORIES	:	Sprint Shoes - Automatically puts you in Haste
BATTLE ITEMS	:	Speed Drink - Casts Haste on one target
LIMIT BREAKS	:	
Red XIII 1-2		Lunatic High - Casts Haste on all Allies and raises Defence

Associated Materia and Items that REMOVE: (HASTE)		
MAGIC	:	Destruct Lv2 (DeSpell) - Removes all Positive Statuses
	:	Time Lv2 (Slow) - Inflicts Slow
BATTLE ITEMS	:	Holy Torch - Casts DeSpell on one target
	:	Spider Web - Inflicts Slow on all targets

{REGEN}	Visual: Character flashes orange

Regen is one of the best ways of healing yourself, as your HP will continuously refill whilst under its effect. The Status will last roughly 10 turns, and is far more effective than using Cure3 in terms of MP consumption. The rate is which your HP recovers works out to roughly 10% of your max HP every turn.

The only way to cast Regen is through a Lv3 Restore, and the only way to remove it is through DeSpell or Holy Torch (and also Emerald WEAPON's attack - Emerald Beam). Casting Regen on an Undead enemy will *not* make their health gradually deplete over time seeing as Regen is not of the restorative Element (whereas moves such as Cure will harm the Undead).

If you were playing on the PS1 console, then you could make use of an exploit. With Regen cast on all of your party members, open the lid of the console. The battle will continue without crashing, although no enemy will attack you, allowing you to regain full health uninterrupted.

{BARRIER}	Visual: Grey shield surrounds character, Barrier bar filled

Whilst under the influence of Barrier you will halve all physical attacks. Every time the player gets hit and the Status takes effect a grey shield will surround the character, as the effect wears off the shield will get smaller. Barrier will last approximately 10 turns, and won't last as long if you are under Haste, but will last twice as long if you are under Slow.

The Barrier 'gauge' is situated to the right of the character's name and is the upper of the two bars; it's colour is red. Big Guard is the most favourable way to set up Barrier, failing that you can use Wall.

Associated Materia and Items that CAST: (BARRIER)	
MAGIC	Barrier Lv1 (Barrier) - Casts Barrier
	Barrier Lv4 (Wall) - Casts Barrier and MBarrier
ENEMY SKILL	Big Guard - Casts Haste, Barrier and MBarrier on all targets
ACCESSORIES	Protect Ring - Automatically puts you in Barrier and MBarrier
BATTLE ITEMS	Light Curtain - Casts Barrier on all target

Associated Materia and Items that REMOVE: (BARRIER)	
MAGIC	Destruct Lv1 (DeBarrier) - Removes Barrier, MBarrier, Reflect and Shield
	Destruct Lv2 (DeSpell) - Removes all Positive Statuses
BATTLE ITEMS	Holy Torch - Casts DeSpell on one target

{MBARRIER}	Visual: Pink shield surrounds character, MBarrier bar filled

Almost identical to Barrier, the only difference being that MBarrier will halve all Magical attacks as opposed to physical attacks. MBarrier will last as long as Barrier; 10 turns (approx). The main drawback to MBarrier is that it will also halve the effects of healing spells such as Cure. As with Barrier, the effect will last longer if the player is inflicted with Slow, and won't last as long if the player is under Haste.

The Barrier 'gauge' is situated to the right of the character's name and is the lower of the two bars; it's colour is yellow. Big Guard is the most favourable way to set up MBarrier, failing that you can use Wall.

Associated Materia and Items that CAST: (MBARRIER)	

MAGIC	:	Barrier Lv2 (MBarrier) - Casts MBarrier
	:	Barrier Lv4 (Wall) - Casts Barrier and MBarrier
ENEMY SKILL	:	Big Guard - Casts Haste, Barrier and MBarrier on all targets
ACCESSORIES	:	Protect Ring - Automatically puts you in Barrier and MBarrier
BATTLE ITEMS	:	Lunar Curtain - Casts MBarrier on all targets

Associated Materia and Items that REMOVE: (MBARRIER)

MAGIC	:	Destruct Lv1 (DeBarrier) - Removes Barrier, MBarrier, Reflect and Shield
	:	Destruct Lv2 (DeSpell) - Removes all Positive Statuses
BATTLE ITEMS	:	Holy Torch - Casts DeSpell on one target

{REFLECT}	Visual: Green 'boomerang' appears in front of character

Reflect will make most magic spells bounce off of its target and reflected back at the caster for up to 4 times. This can make healing quite tricky, which is why most people avoid Reflect. If both parties have Reflect set-up then the spell will bounce backwards and forwards 4 times, unless auto-reflect is set-up in which case it will just bounce back once.

Reflect will last until the battle ends or until DeBarrier or DeSpell is cast. The Mirage in the Shinra Mansion will always have auto-Reflect on, and enemies that use Reflect are Jenova-LIFE, Gorkii and Proud Clod.

Moves that *can* be reflected:	Moves that *cannot* be reflected:
Cure, Cure2, Regen, Cure3	Demi, Demi2, Demi3
Barrier, MBarrier, Wall	Reflect
Death	DeBarrier, DeSpell
Fire, Fire2, Fire3	Escape, Remove
Ice, Ice2, Ice3	Comet, Comet2
Bolt, Bolt2, Bolt3	Full Cure
Quake, Quake2, Quake3	Shield
Bio, Bio2, Bio3	Ultima
Sleepel, Silence	
Confu, Berserk	Enemy Skills:
Mini, Toad	
Haste, Slow, Stop	White Wind, Big Guard, Angel Whisper,
Poisona, Esuna, Resist	Dragon Force, Death Force, Bad
Life, Life2	Breath, Beta, Trine, Magic Breath,
Freeze, Break, Tornado, Flare	????, Goblin Punch, Chocobuckle, L5
	Death, Death Sentence, Roulette
Enemy Skills:	
	All Summons and Items cannot be
Frog Song, L4 Suicide, Magic Hammer,	reflected.
Flame Thrower, Laser, Matra Magic,	

Aqualung, Shadow Flare, Pandora's Box |

Associated Materia and Items that CAST: (REFLECT)
MAGIC : Barrier Lv3 (Reflect) - Casts Reflect
ACCESSORIES : Reflect Ring - Automatically puts you in Reflect
BATTLE ITEMS : Mirror - Casts Reflect on all targets

Associated Materia and Items that REMOVE: (REFLECT)
MAGIC : Destruct Lv1 (DeBarrier) - Removes Barrier, MBarrier, Reflect and Shield
: Destruct Lv2 (DeSpell) - Removes all Positive Statuses
BATTLE ITEMS : Holy Torch - Casts DeSpell on one target

{SHIELD}	Visual: Brown shield envelops character

Costing a whopping 180MP, Shield isn't very often used. Lasting approximately 6 turns, Shield will nullify all 5 'physical' Elements (Cut, Punch, Shoot, Shout and Hit) as well as the Restorative Element, and it will absorb all 9 'main' Elements (Fire, Ice, Lightning, Earth, Poison, Gravity, Water, Wind and Holy).

Shield will not defend against (non-elemental) physical attacks, nor will it defend against Item damage (unless used through W-Item). This is a good thing seeing as you'll still be able to heal yourself through the use of Items. No enemies use Shield and the only way to remove Shield is through DeBarrier, DeSpell and a Holy Torch.

You can obtain the Shield Materia in the Northern Cave, and you won't be able to use it until it has reached Lv2 (which will require 10,000 AP). One of the main problems with Shield is that there is no visible way of telling when it has worn off, also you cannot pair it with All.

{PEERLESS}	Visual: Character flashes yellow

Peerless is basically the 'invincible' Status and can only be cast through 2 of Aeris's Limit Breaks:- 3-1 Planet Protector and Lv4 Great Gospel. Peerless will last appropriately 6 turns and whilst under the Status you will also be immune to all Status changes, whilst also locking any existing Statuses in (similar to Resist). Peerless cannot be removed using DeSpell.

The only Status the you will be vulnerable to whilst under Peerless is Imprisoned, however the only enemies that can inflict Imprisoned are Reno I, Bottomswell and Jamar Armor, and it is unlikely you will have unlocked Aeris's 3-1 Limit for the first two battles (although possible), and Jamar Armor is on Disc 2.

--E.09 F - Supportive Statuses

There are four Statuses that act slightly differently to the conventional 'Positive' and 'Negative' Statuses, these are Sadness, Fury, Manipulate and Berserk.

{SADNESS}	Visual: Limit bar turns blue

The virtual opposite to Fury, Sadness will act in both positive and negative ways. The bonus being that it will reduce all damage taken by 30%, the downside being that it will reduce the speed your Limit gauge fills by half. This is especially helpful for certain bosses such as the Midgar Zolom, or Emerald WEAPON.

Sadness and Fury are the only two Statuses in the game that will remain with your player after the battle has ended. You can self-inflict Sadness by using a Tranquilizer (which will also cure Fury, but not simultaneously). If you have a Ribbon equipped then you will be protected from Sadness during a battle but you will still be able to inflict it upon yourself outside of battle.

Self-inflicting Sadness is particularly useful once you have acquired Tifa's Master Fist towards the end of Disc 2, as it will double her attack power. Using White Wind or Angel Whisper will *not* cure you of Sadness/Fury, but sleeping in an Inn will.

It is possible to inflict Sadness on an enemy by casting Confusion on a player that is about to use a Tranquilizer, but seeing as an enemy has no Limit bar, there would be absolutely no point in doing this as you would just be aiding the enemy by giving them a defence boost.

Associated Materia and Items that INFLICT: (SADNESS)	
BATTLE ITEMS	Tranquilizer - Inflicts Sadness on one target

Associated Materia and Items that CURE: (SADNESS)	
MAGIC	Heal Lv2 (Esuna) - Cures all negative Statuses
BATTLE ITEMS	Remedy - Cures all negative Statuses
	Hyper - Cures Sadness
LIMIT BREAKS	
Aeris 2-1	Breath of The Earth - Cures all negative Statuses

Associated Materia and Items that PROTECT: (SADNESS)
''''''''
MAGIC : Heal Lv3 (Resist) - Protects against all Statuses
BATTLE ITEMS : Vaccine - Inflicts one player with Resist
ACCESSORIES : Ribbon - Protects against most negative Statuses
: Peace Ring - Protects against Sadness, Fury, Confusion
: and Berserk
LIMIT BREAKS :
Aeris 3-1 Planet Protector - Inflicts Peerless on all allies
Aeris 4 Great Gospel - Inflicts Peerless on all allies

Associated Enemy Attacks: (SADNESS)		
Attack:	Enemy:	
Lick	- Aps	(Sector 6 Sewers)
Shower	- Elfadunk	(Chocobo Ranch Area)
Triclops	- Grangalan Jr	(Corel Area)
War Cry	- Screamer	(Mt. Nibel)
War Cry	- Staniv	(Wutai Pagoda)
Bug Needle	- Slaps	(Forests Near Temple of The Ancients)
Bad Mouth	- Gremlin	(Whirlwind Maze)
Smog Alert	- Gas Ducter	(Mt. Corel Train)
Creepy Touch	- Unknown 3	(Sunken Gelnika)
Para Tail	- Parasite	(North Crater)
Teardrop	- Allemagne	(North Crater)
High/Low Suit	- Christopher	(North Crater Swamp Area)
Absorb	- Jenova-SYNTHESIS	(Inside The Planet)
Pale Horse	- Safer-Sephiroth	(Inside The Planet)

{FURY}	Visual: Limit bar turns red

The opposite to Sadness, Fury will double the speed in which your Limit bar fills, making Fury a very popular choice when it comes to Leveling up your Limit Breaks. The flip-side being that all of your attacks will drop in accuracy by 30%.

As with Sadness, you will not lose the Status once the battle has finished. White Wind and Angel Whisper will not cure you of Fury, although Esuna will, along with seeping in an Inn. A hyper will cure you of Sadness but will also inflict you with Fury (but not simultaneously).

The only way to inflict an enemy with Fury is to cast Confu on a player, then have that player select the command 'Hyper' before he/she is inflicted with Confusion. If successful, the confused player will through the Hyper at an enemy, dropping their accuracy by 30%. This is the only way to imitate the Status 'Darkness' seeing as Darkness will have no effect whatsoever on the enemy (due to poor programming).

You can still inflict yourself with Fury by using a Hyper whilst wearing a Ribbon, provided that you do so outside of battle. Doing so will make it so that you cannot remove the Fury Status mid-battle.

+============================================================================+
```

```
+------------------+
|   {MANIPULATE}   |  Visual: Enemy turns Cyan and faces the opposite way
+------------------+
```

Manipulate is easily one of the most useful Statuses in the game, and can only be inflicted upon the enemy. Whilst the target is under Manipulate, the caster will have (almost) total control of the enemies commands, and will continue to do so until the target has been hit with a physical blow. 157 enemies are immune to Manipulate and 138 are vulnerable. The easiest way to identify as to whether or not an enemy is immune or vulnerable is to take note of the 'miss' sign that may or may not appear above the enemies head; If it doesn't appear then the enemy is immune.

Regardless of how many commands the enemy has to use, you will only be able to utilise the top three commands; because of this you will not be able to learn White Wind from the Wind Wing in the Whirlwind Maze (unless you cast Confusion on it). Using manipulated enemies to attack your players is the best way to fill their Limits up; the Valron near Nibelheim (on the World Map) is the ideal enemy for this as his Dive kick will deal damage equal to 1/4 of your max HP (Fury helps also).

You can first lay your hands on the Manipulate Materia when you first enter the Gold Saucer on Disc 1 (Cait Sith will have it equipped on him). It is only then will you be able to access certain Enemy Skills such as Big Guard (learnt from the Beach Plug) and White Wind (learnt from the Zemzelett). The other Enemy Skills that cannot be learned without the use of Manipulate are Death Force, Angel Whisper and Dragon Force.

If the caster is wearing a HypnoCrown (found in the City of The Ancients) then the succession rate of manipulating an enemy would be 100%, provided the enemy wasn't immune. Otherwise, the higher the level difference between the caster and its target, the higher the chance the caster has of manipulating, which is why Cloud is always the best character to use Manipulate. An enemy cannot be Manipulated if it is already inflicted with Paralyzed, Sleep, Stop, Petrify or Resist (or is already Manipulated). Casting Paralyzed, Sleep, Stop, Petrify or White Wind on the target will clear the Manipulate Status.

The enemy Skill 'Dragon Force' can be found on the Blue Dragons attack list, however cannot be learned due to the fact that he cannot be inflicted with Manipulate nor Confusion. The SOLDIER:2nd has a slightly amusing glitch; have a Manipulated SOLDIER:2nd attack a fellow SOLDIER:2nd and the result will be a stand-off between the two SOLDIERs until one of them dies!

The colour priority of Manipulate is at the bottom of the scale, so if another Status was to be inflicted onto the manipulated enemy then the colour would likely change to suit the new Status.

```
+---------------+
|   {BERSERK}   |  Visual: Character flashes red
+---------------+
```

Berserk can be a very useful Status to have inflicted upon your players. Similar to Confusion, you will lose all control over the affected player, and when their ATB gauge fills up they will use the 'Attack' command automatically. The biggest difference being that the 'Berserked' player will only attack the enemy (as opposed to potentially harming your teammates), and their attack power will increase by 50%.

The Status will not be cured by a hit from a physical blow as Confusion is;

it will last until it is cured or until the battle ends. There are 127 enemies that are immune to Berserk, and 168 that are vulnerable. Although inflicting an enemy with Berserk may sound like a bad idea, Berserk will actually limit the amount of attacks that an enemy will use, and can render some powerful foes not-so-powerful. If an enemy doesn't have a specific attack to use whilst Berserked then they won't be able to attack you at all! Also, an enemy that hits for 150% of his normal attack power could help with Limit Break Leveling.

The Fury Ring can be bought from Gongaga Village and will place your character in Auto-Berserk. This strategy can be very advantageous when placed on your strongest attacker, such as Barret or Vincent; Vincent's Limit Breaks work very similar to Berserk, also. Whilst Vincent is in his transformed state he will be immune to the Berserk Status. The Fury Ring is best used when you are undergoing Yuffie's Sidequest in Wutai.

Lastly, whilst a character is inflicted with Berserk they can also hit with a Critical Strike (contrary to common mis-conception), which can cause incredible damage, and in the right circumstances can even cause Damage Overflow. If you have the Added Cut and Master Command Materia, then you could equip them together along with Berserk to have the inflicted player hit the enemy twice every turn!

Associated Materia and Items that INFLICT: (BERSERK)
MAGIC : Mystify Lv2 (Berserk) - Inflicts Berserk
ACCESSORIES : Fury Ring - Automatically puts you in Berserk
BATTLE ITEMS : *War Gong - Inflicts Berserk on all targets (80%)
*When used on allies Berserk will be inflicted 100% of the time

Associated Materia and Items that CURE: (BERSERK)
MAGIC : Heal Lv2 (Esuna) - Cures all negative Statuses
ENEMY SKILL : White Wind - Cures all negative Statuses
: Angel Whisper - Revives player from K.O and cures all negative Statuses
BATTLE ITEMS : Remedy - Cures all negative Statuses
LIMIT BREAKS :
Aeris 2-1 Breath of The Earth - Cures all negative Statuses

Associated Materia and Items that PROTECT: (BERSERK)
MAGIC : Heal Lv3 (Resist) - Protects against all Statuses
BATTLE ITEMS : Vaccine - Inflicts one player with Resist

```
|- - - -
```

a player that has used Death Force on themselves would lose their immunity to Death should they then cast Death Force on another player. Death Force costs 3MP to use.

There are only two moves in the game that override the Death immunity, and both can be found on Cait Sith's 'Slots' Limit Break - Death Joker and Game Over. The only times that you'll need to use Death Force is against the Joker in Gold Saucer Area, the Tonberry in the Battle Square, and up in the North Crater: Parasite, Master Tonberry, Gargoyle, Allemagne, Scissors, Christopher and Death Dealer. Death Force is also very useful if you are using the Curse Ring.

```
+--------------+
|   {RESIST}   |
+--------------+
```

Resist will protect you from all Statuses, good or bad, and can be used via a level 3 Heal Materia (costing 150MP), or from a 'Vaccine'. Resist will also lock in any current Status that you currently have applied on you, excluding Barrier, MBarrier, Reflect, Shield, Regen and Peerless. This can be a very bad thing seeing as Resist will last either until the end of battle, or until it is cured, which can be done using either by using White Wind or DeSpell. Using a Holy Torch will *not* remove Resist.

Resist can be disastrous in the Battle Arena, as it will *not* protect you from Status changes received from handicaps. Resist will instead lock those Statuses in place, making it potentially very difficult to remove the inflicted Statuses once they have been applied.

```
+------------------+
|   {7777 FEVER}   |
+------------------+
```

NOTE - This is basically a condensed down version of section E.18 A.

7777 Fever, or All Lucky 7's is an easter egg that occurs when a character's current HP falls on precisely 7777. When this happens, the character will enter into a Berserk-like Status where they will begin attacking the enemy non-stop for 7777 HP worth of damage each attack. After 64 attacks the buff will end, resulting in a total of 497,728 HP worth of damage. The 'attack' is considered to be one move, and the enemy will not be able to use their commands until you have finished attacking.

If more than one player enters into 7777 Fever in a battle, then the result would *not* be an additional 64 attacks; All Lucky 7's can only yield a maximum of 64 attacks per battle, regardless of whether the attacks come from just one or all three players. You will regain normal control of your characters once they have finished attacking, the only difference being they will now heal for 7777 HP every time a healing move/item is used (Potions, Phoenix Downs etc.). Also, every time they hit the enemy they will do so for 7777 HP worth of damage. These effects will last until the battle ends or the characters HP changes. Once the battle has finished, the affected player's HP will be reduced to 1, restricting 7777 Fever's re-usage.

Whilst inflicted with 7777 Fever, the character's name will flash the same rainbow colours as the 'Limit' command, and the message bar will turn the same shade of purple as if a Limit Break was being used. Similarly, as soon as the player enters into the 7777 state, they will begin attacking without delay. Critical hits will never be used and all Elemental and Status changing properties will be suspended. There are only a few enemies that will be left

standing once the bombardment of attacks have finished, namely some of the WEAPONs.

It is possible for an enemy to enter into 7777 Fever, if this happens then consider escaping from the battle as your whole team would be in danger of being wiped out. If a player enters into 7777 Fever whilst Poisoned, then the result would be 7777 HP worth of damage (killing them instantly), seeing as the damage taken from Poison would count as self-inflicted damage. Also, during the very final battle with Sephiroth, 7777 Fever is disabled. This is the only battle in the game where this will occur.

METHODS OF ENABLING 7777 FEVER:

1.) If the last two digits of your HP fall on 77 then you can use Hi-Potions and Potions to bring your HP to 7777. One method of doing this would be to equip the following:

A Manipulate, Transform (or 2x 'Shrivel') and Goblin Punch Enemy Skill x 2. Don't equip Mega-All or Slash-All, don't have your Limit Breaks filled up and don't have the player with Manipulate equipped with Transform or Enemy Skill. Speed up the Battle Speed all the way.

Enter into a battle and immediately Manipulate the enemy, killing off any of its companions. Cast Haste (or Big Guard) and then have all two of your players inflicted with Small (using Shrivels or the Transform Materia). Goblin Punch will always inflict 8 HP, so long as your players are the same level as each other, so you can keep using that until the last two digits are lower than 85 but above 77; if they fall on 85 exactly then you can use Goblin Punch one more time to bring it down to exactly 77. Otherwise, you can have your players attack one another for 1HP of damage until their HP lands on precisely 77.

B Another method of doing this would be to equip the Cat's Bell, which will recover 2HP per step. You would then need to run around until the last three digits fall on 154, 354, 554, 754 or 954. You would then need to cast Demi2 or Laser to reduce your HP by half, resulting in the final 2 digits being 77.

C If you find that the last two digits of your *Max* MP are sitting on 77, then you can quickly swap HP<->MP on and off again to bring the last two digits of your HP to 77.

2.) Whilst fighting Emerald WEAPON, it will occasionally use the move AIRE TAM (Materia spelt backwards). This move will inflict 1111 HP worth of damage for every piece of Materia you have equipped on one character. The damage does not stack; if Yuffie had 3 pieces and Cid had 5 pieces, the resulting damage would *not* be 8888 HP. Yuffie would receive 3333 HP and Cid would receive 5555 HP.

Go into battle with just 2 pieces of Materia equipped on one of your characters, making sure that one of the pieces is HP Plus, as to bring your Max HP to 9999. Making sure that the player's HP is always topped to the max, when Emerald uses Aire Tam Storm the resulting damage would be 2222, bringing the player's HP down to bang on 7777, activating 7777 Fever.

3.) Every time you escape from battle (using L1&R1), or by using the Exit Materia), Chocobuckle will gain 1HP worth of damage. If you were to escape from a total of 2222 battles then Chocobuckle will deal 2222 HP worth of damage with every hit, making it possible to bring your Max HP

of 9999 down to 7777.

5.) You can manipulate your Max HP stats by using Materia that increases and decreases your Max HP, such as Summons, Magic Materia, HP Plus Materia etc. You can try to figure out using trial and error a way to have your Max HP sitting xx77. This can be very difficult and long-winded to do....

UNLESS

You have a walkthrough!!!! See section E.18 A - Lucky 7's for a quick and easy reference on how to modify your HP accordingly to achieve 7777 Fever using Magic and Summon Materia. All credit for that section goes to James Baxter.

A Quick Guide update note - Try going into the Battle Square with 7777 HP, you'll be able to fly through all 8 battles super easy (even if you get hit with Mini). At the start of each battle, select a command and after that command has finished you'll begin the 7777 chain again. Credit GarlandG for the tip!

+------------------+
| {LUCKY GIRL} |
+------------------+

Lucky Girl is activated by using Cait Sith's level 2 Limit Break 'Slots'; lining up 3 Hearts will have Cait Sith inflict the party with Lucky Girl. Whilst under the Status, all characters will hit for Critical Hits until the battle ends, or until the character is K.O'd.

Use QSI Link [Slots] to find out how to manipulate the reels to land on 3 Hearts.

+----------------+
| {BACK ROW} |
+----------------+

To place your characters in the back row you must go into the Menus, select 'Order' and then double-press confirm to move your characters from the front row to the back and vice-versa. A character positioned to the right hand side is placed in the back row. You can also arrange your characters position mid-battle by pressing left on the D-pad, then confirm.

Whilst placed in the back row, characters will deliver and receive half damage from all physical attacks, whilst characters in the front row will deliver and receive normal damage. Magic remains completely unaffected by which row you are in. The enemy will also conform to row patterns, and an enemy that is in the back row will receive 1/4 damage from one of your characters that is placed in the back row. If the enemy has three rows, then all enemies in the back two rows will be considered in the back row. If a character has the Cover Materia equipped, then they will still receive half damage even if they are defending someone in the front row.

For the start of the game I recommend keeping all of your characters in the front row, seeing the extra damage incurred will help towards Leveling up your Limit Breaks early on. There are four characters who yield long ranged weapons - Yuffie, Vincent, Barret and Red XIII. Whilst equipped with a long ranged weapon, a character will do the same damage in the back row as they would in the front, but still receive half damage from physical attacks. The Long Range Materia also has the same effect of equipping a long ranged weapon.

There are certain creatures that are considered to be 'flying', such as Hundred Gunner, Zuu, or Bottomswell. These creatures will not be able to be hit by physical attacks, unless the attacker is long-ranged. The Hell Rider VR2 uses a move called Electromag which will swap your characters 'row' positions around. Also, When you fight the boss Motor Ball (at the end of the Midgar Highway) your rows will be reversed.

Uncommonly you will find that the 'column' formation of the enemy will result in you being unable to attack an enemy that is in the back row, although this occurs infrequently.

+--------------+
| {DEFEND} |
+--------------+

By pressing right on the D-pad during battle followed by confirm, you can opt to 'defend' for one turn, halving all physical damage taken during that time. If you were placed in the back row then you would receive 1/4 damage. Do not opt to Defend if you are Poisoned; the Poison damage would take you out of Defend. You will not receive 1/2 Poison damage.

+------------------+
| {IMPRISONED} |
+------------------+

Imprisoned is one of the worst Statuses in the game, and luckily there are only 3 attacks in the whole game that can Imprison a character; all being Bosses. Whilst inflicted with Imprisoned, the character will no longer be able to act, nor will they be flagged as a target, and instead a new enemy will take the characters place. The new enemy must then be killed, usually by a single physical blow, in order to free the inflicted character.

An Imprisoned player is flagged as dead, so if all three players become Imprisoned then it's Game Over. Like Petrify, your current HP is maintained.

The first of the three bosses that use Imprisoned is Reno I fought at the top of the Support Tower in Sector 7. He will use an attack called Pyramid, which will cast a Pyramid like structure around the inflicted player. A single physical blow to the pyramid will cure the player.

The second enemy to use Imprisoned is Bottomswell, although he will also inflict Seizure using an attack called Waterball. More details on Seizure below. The Waterball must attacked with a magical attack in order to destroy it.

The last Boss to use Imprisoned is Carry Armor in Junon's Underwater Reactor. Both the Left Arm and the Right Arm can imprison a character using their move Arm Grab, and then when Carry Armor uses either arm to attack, the Imprisoned character will also take damage. If two players are Imprisoned and the third is killed, then it'll be Game Over. The only way to free the character is to kill the arm holding it, or if the afflicted character is killed.

+---------------+
| {SEIZURE} | Also known as {Dual Drain}
+---------------+

Seizure basically acts as a 'reversed-Regen', slowly draining your HP over time at the exact same rate as Regen; casting Regen on a character under the effect of Seizure would completely negate both effects.

Thankfully only one enemy in the game uses Seizure, and that is Bottomswell which is fought on your first visit to Junon. Using an attack called Waterball, Bottomswell will also inflict Imprisoned on you, and unlike Reno's 'Pyramid', you must free the afflicted character with a magical attack as opposed to a physical attack.

'Dual' is a dummied out Status and serves no purpose whatsoever, although using hacking devices Dual will sometimes be the Status name displayed in place of Seizure.

```
+-----------+
|   {K.O}   |
+-----------+
```

If a player's HP runs down to 0, or if a player is inflicted with Death, then they will be met by the condition 'K.O'. Whilst K.O'd, the character will lie dead on the ground, their HP bar will be red and their ATB gauge will never fill up. Additionally, when a Player is K.O'd, they will also be inflicted with the Death Status; If all characters have Death then you will be met with a Game Over screen. When a character is K.O'd, their Limit gauge will be reset to 0.

The only ways to heal someone from K.O is to use a Phoenix Down, Life, Life2, Phoenix, Angel Whisper or sleeping in an Inn. K.O is one of three Statuses that will carry over from battle to battle, the other two being Fury and Sadness. If a character is not cured of K.O before a battle has finished then they will not gain any EXP or AP.

NOTE - Being K.O'd and being dead are two very different things. That's why you can't simply use a Phoenix Down on certain characters that die within the game...

--E.09 H - Battle Items, Accessories And Materia List

ALL STATUS CHANGING MAGIC, ITEMS & ACCESSORIES:

MAGIC :

Barrier Lv1	(Barrier)	- Casts Barrier
Barrier Lv2	(MBarrier)	- Casts MBarrier
Barrier Lv3	(Reflect)	- Casts Reflect
Barrier Lv4	(Wall)	- Casts Barrier and MBarrier
Contain Lv1	(Freeze)	- Deals Ice damage and inflicts Stop (68%)
Contain Lv2	(Break)	- Deals Wind damage and inflicts Petrify (32%)
Contain Lv3	(Tornado)	- Deals Wind damage and inflicts Confusion (32%)
Destruct Lv1	(DeBarrier)	- Removes 4 various barriers
Destruct Lv2	(DeSpell)	- Removes 10 various 'buffs'
Destruct Lv3	(Death)	- Inflicts Death on one target
Heal Lv1	(Poisona)	- Cures Poison
Heal Lv2	(Esuna)	- Cures all negative Statuses
Heal Lv3	(Resist)	- Protects against all Statuses
Mystify Lv1	(Confu)	- Inflicts Confusion on one target
Mystify Lv2	(Berserk)	- Inflicts Berserk

| Poison Lv1 (Bio) - Inflicts Poison Damage and Poisons a target 48% |
| Poison Lv2 (Bio2) - Inflicts Poison Damage and Poisons a target 48% |
| Poison Lv3 (Bio3) - Inflicts Poison Damage and Poisons a target 72% |
| Restore Lv3 (Regen) - Casts Regen |
| Revive Lv1 (Life) - Revives player from K.O |
| Revive Lv2 (Life2) - Revives player from K.O and restores all HP |
| Seal Lv1 (Sleepel) - Inflicts Sleep on one target |
| Seal Lv2 (Silence) - Inflicts Silence on one target |
| Shield Lv2 (Shield) - Casts Shield on one target |
| Time Lv1 (Haste) - Inflicts Haste on one target |
| Time Lv2 (Slow) - Inflicts Slow on one target |
| Transform Lv1 (Mini) - Inflicts Small on one target |
| Transform Lv2 (Toad) - Inflicts Frog on one target |
| |
|- - - -

| Hyper - Inflicts Fury on one target, cures Sadness |
| Impaler - Inflicts Frog on one target |
| Ink - Inflicts Darkness on one target |
| Kiss of Death - Inflicts Death on all targets (68%) |
| Light Curtain - Casts Barrier on all target |
| Lunar Curtain - Casts MBarrier on all targets |
| Loco Weed - Inflicts Confusion on all targets (80%) |
| M-Tentacles - Casts Bio3 on all targets (48%) |
| Maiden's Kiss - Cures Frog |
| Mirror - Casts Reflect on all targets |
| Mute Mask - Inflicts Silence on all targets (80%) |
| Phoenix Down - Revives a player from K.O |
| Remedy - Cures all negative Statuses |
| Shrivel - Inflicts Small on one target |
| Soft - Cures Petrify and Slow-numb |
| Speed Drink - Casts Haste on one target |
| Spider Web - Inflicts Slow on all targets (100%) |
| Tranquilizer - Inflicts Sadness on one target, cures Fury |
| Vaccine - Inflicts one player with Resist |
| Vagyrisk Claw - Inflicts Petrify on one target |
| War Gong - Inflicts Berserk on all targets (80%) |
|

ACCESSORIES :

| Curse Ring - Automatically puts you in Death Sentence, boosts stats |
| Fairy Ring - Protects against Poison and Darkness |
| Fury Ring - Automatically puts you in Berserk |
| Headband - Protects against Sleep |
| HypnoCrown - Grants 100% Manipulation rate |
| Jem Ring - Protects against Petrify, Slow-numb and Paralyze |
| Peace Ring - Protects against Confusion, Berserk, Fury and Sadness |
| Poison Ring - Protects against Poison, absorbs Poison Element |
| Protect Ring - Automatically puts you in Barrier and MBarrier |
| Reflect Ring - Automatically puts you in Reflect |
| Ribbon - Protects against most negative Statuses |
| Safety Bit - Protects against Death |
| Silver Glasses - Protects against Darkness |
| Sprint Shoes - Automatically puts you in Haste |
| Start Pendent - Protects against Poison |
| White Cape - Protects against Frog and Small |
|

LIMIT BREAKS :

| Cloud 1-2 Cross-slash - Single attack also inflicting Paralyze (100%) |
| Cloud 3-2 Finishing Touch - Inflicts Death on all enemies |
| Barret 2-2 Hammerblow - Inflicts Death on one enemy |
| Aeris 1-2 Seal Evil - Inflicts Silence and Paralyze on all targets |
| Aeris 2-1 Breath of The Earth - Cures all negative Statuses |
| Aeris 3-1 Planet Protector - Inflicts Peerless on all allies |
| Aeris Lv4 Great Gospel - Inflicts Peerless on all allies |
| Red XIII 1-2 Lunatic High - Casts Haste on all Allies and raises Defence |
| Cait Sith Lv2 Lucky Girl - Casts Lucky Girl on all allies |
| Cait Sith Lv2 Game Over - Inflicts Death on all enemies |
| Cait Sith Lv2 Death Joker - Inflicts Death on all allies |
| Vincent Lv4 Satan Slam - Inflicts Death on all enemies |

| Cid 2-2 Hyper Jump - Attacks all enemies, 20% chance of Death |
| Cid 3-1 Dragon Dive - 6 attack, each with 28% Chance of Death |

*Game Over and Death Joker are the only moves in the game that ignore Death Immunity

*Hades will not inflict Slow or Paralyze when paired with Added Effect

*The Peace Ring's in-game description is incorrect as it'll only display: 'Protects against [Berserk/Fury/Sadness]' (PSX NTSC Version only). It also protects against Confusion.

{E.10} - Obtaining Vincent Valentine

A - Shinra Mansion
B - Lost Number
C - Vincent

{Vincent}

--E.10 A - Shinra Mansion

Vincent Valentine is one of two 'hidden' characters that can be recruited, along with Yuffie Kisaragi. See section E.07 for details on how to recruit Yuffie. Vincent can be recruited from the point at which you visit Nibelheim in Disc 1, and can be obtained at any point during the game thereafter. You will unlock the 'Won't You Be My Valentine?' Trophy when you do recruit him.

Before anything else, make sure to have protection from Confusion when navigating the Shinra Mansion (Peace Ring). Section D1.15 B will give you the full walkthrough, whereas this section will only cover the recruiting process.

In order to recruit Vincent, you must open a safe located on the western wing of the second floor. To work out the combination, you must first find the note that can be found on the first floor in the south eastern room. The four clues are as follows:

Clue 1: 'The lid of the box with the most oxygen.'

On the second floor in the western-most room you will find a treasure chest. Examine it (after opening it) to receive the first combination. - Right 36

Clue 2: 'Behind the ivory's short of tea and ray.'

On the first floor in the western-most room you will find a grand piano. On the floor behind it you will find second combination.
- Left 10

Clue 3: 'The creek in the floor board near the chair on the second floor... Then to the left five steps, up nine steps, left two steps and up six steps.'

On the second floor eastern wing. Search the corridor, you'll find the clue in a spot that is almost in-line with the chest (overhead perspective). - Right 59

Clue 4: 'The fourth has been written in invisible ink....'

The fourth combination is hidden in plain sight. When selecting which clue to read, bring the finger cursor down to the fourth line to reveal the fourth combination. - Right 97

```
+-------------------------------------------------------------------------------+
|/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\|
|\/\/\/\/\/\/\|''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''|\/\/\/\/\/\/\|
|/\/\/\/\/\/\/| RIGHT 36     LEFT 10     RIGHT 59     RIGHT 97 |/\/\/\/\/\/\/|
|\/\/\/\/\/\/\|,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,|\/\/\/\/\/\/\|
|/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\/\|
+-------------------------------------------------------------------------------+
```

When you're ready, save the game and head up to the second floor western wing to try the safe combo. Be warned, when you have successfully opened the safe you will be met with a Boss!

NOTES - Left 10 means that you have to go left to the number 10, and *not* left 10 spaces from 36 (to 26).

- If you accidentally went past the number required then you will have failed and you'll have to try again.

--E.10 B - Lost Number

Before fighting this Boss, equip Added Effect with either Time or Choco/Mog, as he is vulnerable to Stop. Equip Elemental defence from Lightning, Earth and/or Poison also.

If you are fighting Lost Number on your first visit to Nibelheim, then you'll be in for a bit of a challenge, as he is quite a high level. Be sure to cast Big Guard first and foremost, then just keep spamming heavy hitting magic moves, such as Beta.	------Lv: 35 ------HP: 7000 ------MP: 300 -----EXP: 2000 ------AP: 80 -----GIL: 2000 ----DROP: Cosmo Memory -NULLIFY: GRV
Once his health has dropped below 50%, one half of him will die. If the last move that hit him was a magical attack, then his purple half will die, leaving just his red half. This red half will be weak against physical attacks but strong against magical attacks, and is the side that we wish to be left with. If	

| you had last hit him with a physical attack as his health dropped below |
| 50%, then you will be left his purple side which is weak against magical |
| attacks but strong against physical attacks. This half is more challenging |
| than the red half. |
|_____|

When he is finished, you'll be rewarded with the 'Key to the Basement', which you'll have to manually pick up from within the safe itself. You'll also be able to pick up the Odin Materia on the floor to the left of the safe, and you'll receive the Cosmo Memory after battle has finished, which is Red XIII's Lv 4 Limit Break Manual.

¬¬¬

The order of Materia that she will take are as follows:

01 Master Summon	22 Slash-All	43 Odin	64 Cover
02 Knights of Round	23 EXP Plus	44 MP Turbo	65 Destruct
03 Master Command	24 Alexander	45 Titan	66 Gravity
04 Master Magic	25 Kjata	46 Ramuh	67 Time
05 Bahamut ZERO	26 Bahamut	47 Deathblow	68 Barrier
06 W-Summon	27 W-Item	48 Ifrit	69 Exit
07 W-Magic	28 Contain	49 gil Plus	70 Transform
08 Mega-All	29 HP<->MP	50 Counter Attack	71 Mystify
09 Counter	30 Morph	51 Shiva	72 Seal
10 Typoon	31 Steal As Well	52 Long Range	73 Revive
11 Hades	32 Added Cut	53 Pre-emptive	74 Earth
12 Quadra Magic	33 Final Attack	54 Chocobo Lure	75 Poison
13 Mime	34 Manipulate	55 Choco/Mog	76 Sense
14 Magic Counter	35 Sneak Attack	56 Enemy Away	77 Steal
15 Ultima	36 Added Effect	57 Luck Plus	78 Heal
16 Shield	37 Comet	58 Magic Plus	79 Restore
17 Full Cure	38 Elemental	59 Speed Plus	80 Lightning
18 Neo Bahamut	39 Throw	60 Enemy Lure	81 Ice
19 Phoenix	40 Leviathan	61 All	82 Fire
20 Enemy Skill	41 HP Absorb	62 HP Plus	83 Underwater
21 Double Cut	42 MP Absorb	63 MP Plus	

{E.12} - Bone Village Digging Mini Game

{Bone Village Mini Game}

--E.12 A - About Bone Village

The foreman to the left of the entrance will sell the following: (ALL DISCS)

ITEM SHOP	
Diamond Bangle	3200 gil
Rune Armlet	3700 gil
Potion	50 gil
Hi-Potion	300 gil
Ether	1500 gil

You'll be able to find Bone Village on the south side of the Northern Continent, and you'll first be able to visit the place once you have obtained the Tiny Bronco. Even though the game will not demand that you

| Phoenix Down | 300 gil | visit Bone Village until after the Temple of
| Antidote | 80 gil | The Ancients sequence, you should still visit
| Eye Drop | 50 gil | the place as soon as possible in order to
| Hyper | 100 gil | obtain the Diamond Bangle and the Rune Armlet.
| Tranquilizer | 100 gil | The Rune Armlet is the only double growth
| Tent | 500 gil | armour in the game.

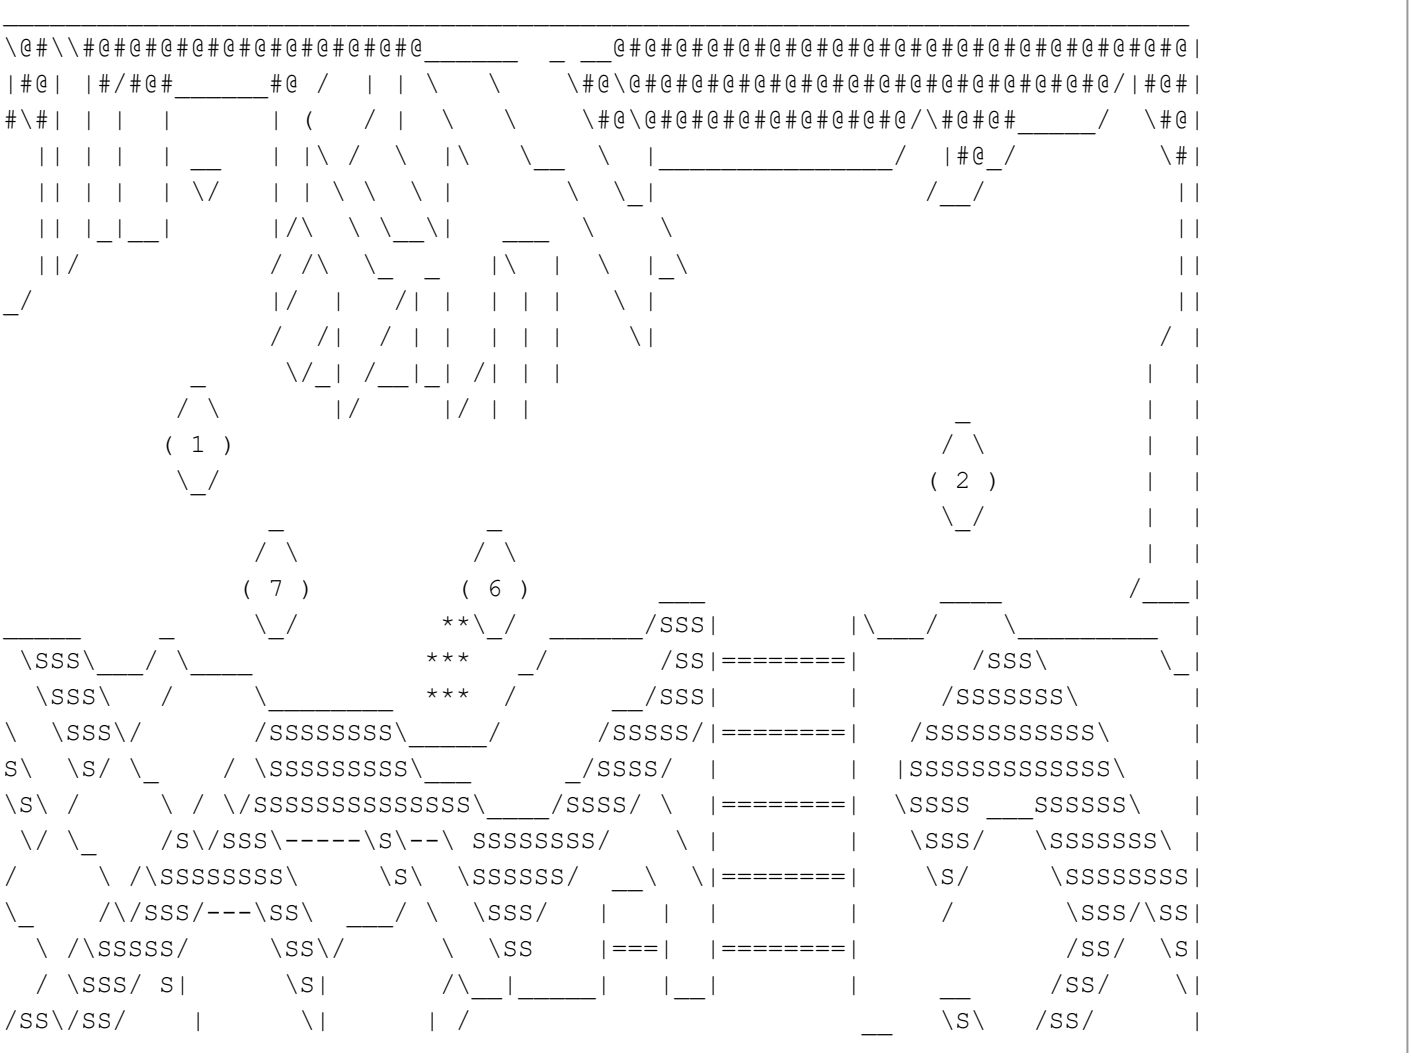
Just outside of Bone Village you'll be able to encounter the Vlakorados, which is a red dragon of sorts. He has 33,333 HP and can take a very long time to kill. The main incentive to fight them is the fact that they carry the Carob Nut, which is an essential item for Chocobo breeding. Note that you will not encounter enemies in the forest area surrounding Bone Village itself.

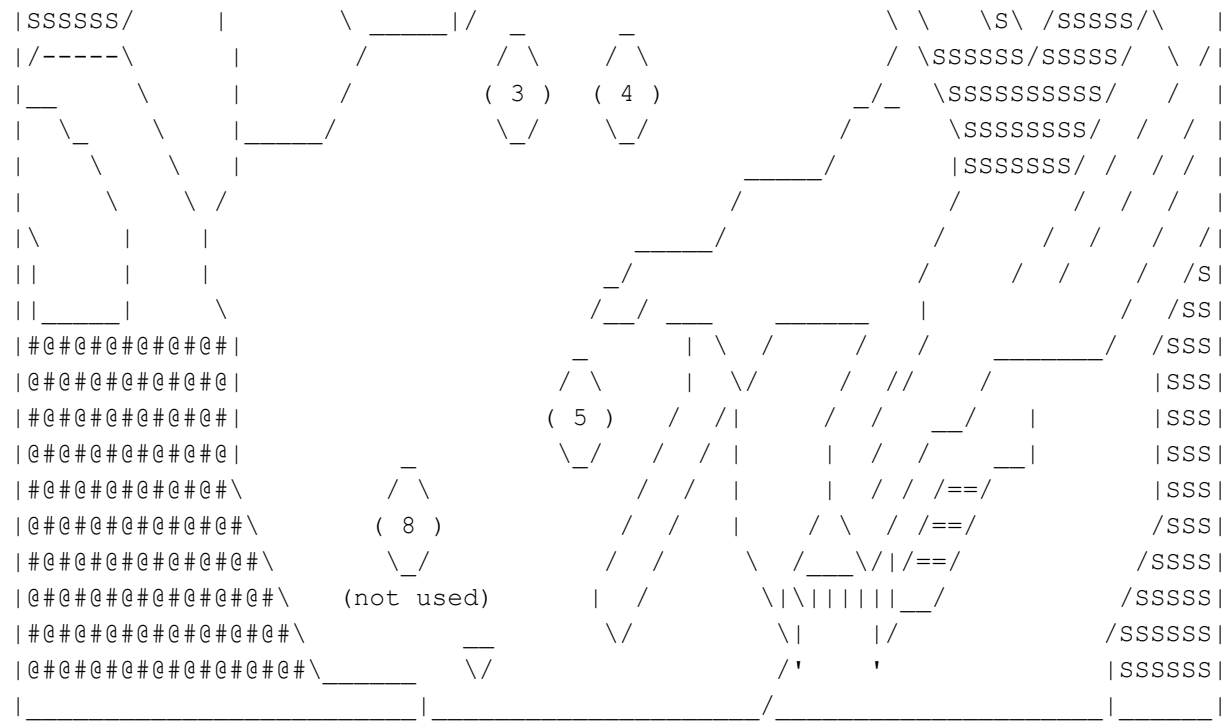
Past Bone Village you will find the Sleeping Forest. Every so often you will notice a red orb floating upwards. Stand at the base of a tree and continually press confirm to eventually obtain the red orb - the Kjata Materia.

If you were to head north you would encounter a never ending screen-loop. The only way to pass through is by using the Lunar Harp, and to do that you must partake in the digging mini game.

--E.12 B - Bone Village Map

O.K., PLEASE DON'T criticise my ASCII art skills (or lack of), this image does what it says on the tin - Displays each 'Dig Point':





*Available on Disc 2, after the Lifestream events (Key to Sector 5)
**Available on Disc 3 only (Phoenix, Bahamut ZERO and W-Item)

Standing on a spot that isn't one of the 7 used dig spots will result in a
50% chance of receiving a Potion, and 50% chance of receiving nothing.

Spot 1	LUNAR HARP
	Just NW of spot 7.
	1) Lunar Harp (100%, once only)
	2) Nothing (100% afterwards)
Spot 2	GOOD TREASURE
	Top of the ladders and to the right.
	1) Buntline (100%, once only)
	2) Nothing (100% afterwards)
	**3) Phoenix Materia (100%, once only)
	Must have already obtained the Buntline and have missed the Phoenix Materia in Fort Condor
Spot 3	GOOD TREASURE
	Just to the right of where the foreman sits.
	1) Megalixir (100%, once only)
	2) Nothing (100% afterwards)
	**3) Bahamut Zero (3.91%, once only)
	Must have already obtained the Megalixir and have failed at least on Huge Materia mission
Spot 4	GOOD TREASURE
	Base of the ladders and to the left of the 'X'.
	1) Mop (100%, Once only)
	2) Nothing (100% afterwards)
	**3) W-Item Materia (100%, once only)
	Must have already obtained the Mop and have missed the W-Item Materia in Midgar Re-visited

```
|-----------------------------------------------------------------------------|
| Spot 5     NORMAL TREASURE.                                                 |
|            Just to the right of the entrance.                               |
|                                                                             |
|        1) Elixir          (14%, unlimited supply)                           |
|        2) Nothing         (85%)                                             |
|       *3) Key to Sector 5 (100%, once only)                                 |
|-----------------------------------------------------------------------------|
| Spot 6     NORMAL TREASURE.                                                 |
|            Top of the ladders, right of the black mound.                    |
|                                                                             |
|        1) Turbo Ether (8%, unlimited supply)                                |
|        2) Ether       (92%, unlimited supply)                               |
|       *3) Key to Sector 5 (100%, once only)                                 |
|-----------------------------------------------------------------------------|

+-----------------------------------------------------------------------------+
```

If you reckon you can do a better job of the artwork than myself, then by all means do so! Send your ASCII Art to DynamixDJ@writeme.com, and if I decide to replace my map with yours I will be sure to give all credit where it is due.

--E.12 C - How The Game Works

Firstly, talk to the foreman. He will be sitting to the left of the entrance near dig spot 3 (you can also buy the aforementioned armour here). You will have the option of selecting Lunar Harp, Good Treasure or Normal Treasure. Once you have selected your choice, you will be allowed to place up to 5 workers in locations of your choice. Each worker will cost 100 gil.

Once you have placed your workers, select 'done' to detonate a bomb. Then, each worker will face the direction of the chosen treasure. Using the map above, you will then be able to triangulate the position of the treasure. Once you have confirmed which position you would like to dig, you will spend the night at Bone Village (also restoring you HP/MP). The treasure can then be collected from the chest to the left of the entrance.

The interesting thing about the digging game is that you don't actually have to place down any workers! So long as you know the locating of each treasure, you can simply select 'done' before placing down any workers. The bonus to doing this will be that you can select any search spot, regardless of which treasure type you had selected i.e. you could select 'Normal Treasure', then search spot 8 and you'll still receive the Lunar Harp, provided that you hadn't placed any workers (and you hadn't already obtained it).

Using this knowledge, you could use the digging game to infinitely farm Ethers on Spot 6 for free!

--E.12 D - Glitches

There are 3 known 'bugs' related to the Bone Village digging game:

1) Phoenix. If you failed to obtain the Phoenix Materia from the Fort Condor mission then you will be able to dig one up from Bone Village (Spot 5). It is possible to obtain two un-mastered Phoenix Materias by simply not collecting the Materia after the Fort Condor Huge Materia quest, until after you've dug one up. You'll still be able to grab the Huge Materia, and you'll still be able to return to the shack to grab the Materia at any point in the game. Provided the Phoenix is not in your Materia inventory, you'll be able to dig it up on Disc 3.

2) Kjata. Under normal circumstances, when you attempt to pick up a piece of Materia with a full inventory, the game will not allow you to pick up that piece until you have either discarded or sold some of your Materia. Kjata, however, is bugged. If you attempted to pick it up with a full Materia inventory, the game will still allow you to remove it from the field without adding it to your inventory, thereby losing it permanently.

3) Steal Materia/Catastrophe. Written into the games coding is the ability to dig up a Steal Materia and Barret's Lv 4 Limit Manual, Catastrophe. Seeing as neither item is missable, it is suspected that these items were placed as test dummies. There have been claims that the Steal Materia has been dug up on a PSX version, although these claims may be untrue.

{E.13} - Ultimate Weapons

A - About Ultimate Weapons
B - Cloud's Ultima Weapon
C - Barret's Missing Score
D - Tifa's Premium Heart
E - Aeris's Princess Guard
F - Red XIII's Limited Moon
G - Yuffie's Conformer
H - Cait Sith's HP Shout
I - Vincent's Death Penalty
J - Cid's Venus Gospel

{Ultimate Weapons}

--E.13 A - About Ultimate Weapons

All ultimate weapons have a few things in common:

1) They will all have 0 growth, excluding Aeris's.

2) The all have 8 paired Materia slots, excluding Aeris's.

3) They will all have a special quality, gaining additional power when a certain condition is met.

Due to the fact that your Materia will never level up whilst equipped to your ultimate weapons, it is fair to say that they are not the most favourable of weapons to use, although there aren't many weapons that surpass them in the way of strength. The only weapons that can match up to these Ultimate Weapons are:

- Barret's Max Ray - Attack = 97 (found in Midgar Sector 8)
- Cloud's Ragnarok - Attack = 97 (prize for defeating Proud Clod)
- Cid's Flayer - Attack = 100 (prize in Speed Square)

None of the above weapons come with a "damage modifier" however, and as such cannot compete with the damage output of the Ultimate Weapons.

The most used Ultimate Weapon has to be the Conformer for Yuffie. This is because it will deal regular damage whilst using Morph (as opposed to 12.5% normal damage). This is particularly useful when it comes to farming valuable items such as Sources and Elixirs.

The following characters power will be increased when certain conditions are met:

Cloud - Gains more power the higher his current HP is.
Barret - Gains more power the more AP is equipped to his weapon.
Tifa - Gains more power the higher her Limit bar is filled.
Aeris - Gains more power when her allies are K.O'd
Red XIII - Gains more power the higher his current MP is.
Yuffie - Gains more power the higher the enemies level is.
Cait Sith - Gains more power the higher his current HP is.
Vincent - Gains more power with every enemy he kills.
Cid - Gains more power the higher his current MP is.

Here is a chart depicting how powerful each weapon will become whilst influenced by its Power-Up condition:

	.5x DAMAGE	1x DAMAGE	2x DAMAGE	3x DAMAGE	4x DAMAGE
Cloud	HP at 1/6	HP at 1/3	HP at 2/3	HP at full	N/A
Barret	80,000 AP	160,000 AP	320,000 AP	480,000 AP	640,000 AP
Tifa*	Bar @ 1/8	Bar @ 1/4	Bar @ 1/2	Bar @ 3/4	Bar @ full
Aeris	N/A	0 Ally KO	1 Ally KO	2 Ally KO	N/A
Red XIII	MP at 1/6	MP at 1/3	MP at 2/3	MP at full	N/A
Yuffie	Enemy Lv8	Enemy Lv16	Enemy Lv32	Enemy Lv48	Enemy Lv64
Cait Sith	HP at 1/6	HP at 1/3	HP at 2/3	HP at full	N/A

Vincent	N/A	768 Kills	2816 Kills	4864 Kills	6912 Kills
Cid	MP at 1/6	MP at 1/3	MP at 2/3	MP at full	N/A

*If Tifa's Limit level was set to level 4.

NOTES - For every weapon listed below, I have modified the damage output formula for simplicity. When calculating the "actual" damage output, please refer to the original formula. By default, Power is 16 (16 = 1x normal damage, 32 = 2x normal damage, etc).

- All of the Ultimate Weapons excluding Aeris and Yuffie's can cause damage overflow. Use QSI Link [Damage Overflow Glitch] for more info.

--E.13 B - Cloud's Ultima Weapon

POWER-UP CONDITION - CURRENT HP

{ULTIMA WEAPON}	Materia Slots - Ø=Ø Ø=Ø Ø=Ø Ø=Ø	Growth - NONE
Attack : 100	Buy : N/A	Magic + 51
Attack % : 110	Sell : 1 gil	Spirit + 21
Range : Normal	Drop : Ultimate WEAPON	
Element : Cut	Steal : N/A	
OBTAIN	Ultimate WEAPON, final battle (Disc 2)	

Notes:

- Cloud will deliver 3x normal power when his health is full, 2x when his health is at 2/3's and 1x when his health is at 1/3.

Damage = [48 * CURRENT HP / MAX HP + 1 / 16] * DAMAGE

Original formula:

Power = [(3 * POWER * CURRENT HP) / MAX HP] + 1

The Ultima Weapon is considered to be one of the strongest weapons in the game. When Cloud's HP is in critical the Sword will glow dark blue, and when Cloud's HP is full it will glow a bright white.

The Ultima Weapon is required in order to partake in the optional battle at the Battle Square, and as such you cannot obtain the Final Attack Materia (prize for optional battle) before obtaining the Ultima Weapon.

Cait Sith's Ultimate Weapon, the HP Shout, shares the same Power-Up properties as the Ultima Weapon.

--E.13 C - Barret's Missing Score

POWER-UP CONDITION - AP ON WEAPON

{MISSING SCORE}	Materia Slots - Ø=Ø Ø=Ø Ø=Ø Ø=Ø	Growth - NONE
Attack : 98	Buy : N/A	Magic + 49
Attack % : 108	Sell : 1 gil	
Range : Long	Drop : N/A	
Element : Shoot	Steal : N/A	
OBTAIN	Midgar Mako Cannon (Disc 2, screen after save point)	

Notes:

- The chest will *ONLY* appear if Barret is in your party.
- Barret will deliver 3x damage for having 500,000 AP equipped on his weapon, 6x for having 1 million AP and 9x for having 1.5 million AP.

Damage = [TOTAL AP ON WEAPON / 10,000 + 1 / 16] * DAMAGE

Original formula:

Power = [POWER * [TOTAL AP ON WEAPON / 10000] / 16] + 1

The more AP the weapon has equipped on it, the higher its attack power will be. Master Magic, Master Command, Master Summon, Enemy Skill and Underwater do not contribute to the total. A piece of Materia will not store any more AP once it has been mastered.

If Barret's Strength was 255 along with being Lv 99, you could equip 3 x mastered Knights of The Round Materias to send Barret's damage counter high enough to overflow against Emerald, killing it in one-hit (also using 4 Hero Drinks, Berserk & Critical).

--E.13 D - Tifa's Premium Heart

POWER-UP CONDITION - LIMIT GAUGE

{PREMIUM HEART}	Materia Slots - Ø=Ø Ø=Ø Ø=Ø Ø=Ø	Growth - NONE
Attack : 99	Buy : N/A	Magic + 32
Attack % : 112	Sell : 1 gil	
Range : Normal	Drop : N/A	
Element : Hit	Steal : N/A	

OBTAIN	Broken machine in the ITEM hut in the Wall Market (Disc 2)

Notes:

- You'll first need to obtain the Key to Sector 5 from Bone Village.
- Item cannot be thrown.
- If Tifa's Limit is set to Level 4, then she would deliver 4x damage with a full Limit gauge, 2x damage with a half filled gauge, and 1x damage with a 1/4 filled gauge. At Limit Level 2 she would 1x damage with a 1/2 filled gauge.

Damage = [LIMIT LEVEL * LIMIT BAR UNITS / 16 + 1 / 16] * DAMAGE
(A Full Limit bar would be 255 units, a half filled bar would be 127)

Original formula:

Power = [POWER * [LIMIT LEVEL * LIMIT BAR UNITS / 16] / 16] + 1

Anything less than a 1/4 filled bar would deal less than normal damage, and an empty Limit bar could deal as little as 200 HP.

Due to this peculiar formula, most people stay well away from the weapon, favouring other weapons such as the God Hand (which has 255 Attack%) or Master Fist (which gains damage when under status afflictions).

Alternatively, you could equip Tifa with Added Cut and Deathblow, let her gauge fill up and never use her Limit.

If you enter the ITEM hut in the Wall Market with Cid in your party then a slightly amusing additional scene will play out.

--E.13 E - Aeris's Princess Guard

POWER-UP CONDITION - K.O'D ALLIES

{PRINCESS GUARD}	Materia Slots - O=O O=O O=O O	Growth - NORMAL
Attack : 52	Buy : N/A	Magic + 22
Attack % : 111	Sell : 3750 gil	Vitality + 12
Range : Normal	Drop : N/A	Spirit + 20
Element : Hit	Steal : N/A	

OBTAIN	Temple of The Ancients, room IV

Notes:

- Aeris will deliver 2x damage if one ally is K.O'd, and 3x damage of two allies are K.O'd.

Damage = [1 + NUMBER OF K.O'D ALLIES] * DAMAGE

|_____|

The Princess Guard is unique for 4 reasons - It is the only Ultimate Weapon available on Disc 1, it is the only Ultimate Weapon to have 7 slots as opposed to 8, it is the only Ultimate Weapon to have normal growth, and it is the only ultimate weapon other than the Conformer that cannot cause damage overflow.

It's Power-Up effect is identical to that of Cloud's Yoshiyuki - It will double in attack power if one ally is dead and it will triple in attack power if two allies are dead.

--E.13 F - Red XIII's Limited Moon

POWER-UP CONDITION - CURRENT MP

{LIMITED MOON}	Materia Slots - Ø=Ø Ø=Ø Ø=Ø Ø=Ø	Growth - NONE
Attack : 93	Buy : N/A	Magic + 31
Attack % : 114	Sell : 1 gil	
Range : Normal	Drop : N/A	
Element : Hit	Steal : N/A	
OBTAIN	Bugenhagen's Laboratory (After defeating Diamond WEAPON)	

Notes:

- Red XIII must be in your party when visiting the laboratory.
- Red XIII will deliver 3x normal power when his MP is full, 2x when his MP is at 2/3's and 1x when his MP is at 1/3.

Damage = [48 * CURRENT MP / MAX MP + 1 / 16] * DAMAGE

Original formula:

Power = [(3 * POWER * CURRENT MP) / MAX MP] + 1

The Limited Moon is only available towards the end of Disc 2 after having defeated Emerald WEAPON.

Cid's Ultimate Weapon, the Venus Gospel, shares the same Power-Up properties as the Limited Moon.

--E.13 G - Yuffie's Conformer

POWER-UP CONDITION - ENEMIES AVERAGE LEVEL

{CONFORMER}	Materia Slots - Ø=Ø Ø=Ø Ø=Ø Ø=Ø	Growth - NONE
Attack : 96	Buy : N/A	Magic + 42
Attack % : 112	Sell : 1 gil	
Range : Long	Drop : N/A	
Element : Shoot	Steal : N/A	
OBTAIN	Sunken Gelnika	

Notes:

- Yuffie will deliver 1x damage if the enemies average level is Lv16, 2x damage if it is Lv32 and 4x damage if it is Lv64.
- The Conformer will hit for normal damage when using Morph.

Damage = [AVERAGE TARGETED ENEMY'S LEVEL / 16] * DAMAGE

Original formula:

Power = [AVERAGE LEVEL OF ALL ENEMIES TARGETED BY ATTACK]

The average enemy level takes into account every enemy that is targeted by the attack. If Yuffie is only targeting one enemy, then only that enemy's level is taken into account.

The Conformer is one of the best weapons on the game seeing as it will completely ignore the reduced damage effects of Morph, hitting each opponent for 100% damage (as opposed to 12.5%). This is particularly useful for the Sunken Gelnika, as you can Morph every enemy in there into Sources.

If you were to attack an ally whilst wielding the Conformer, then you would hit your comrades for 1HP of damage, although no damage counter would be displayed. You will still be able to negate the effects of Sleep and Confusion.

--E.13 H - Cait Sith's HP Shout

POWER-UP CONDITION - CURRENT HP

{HP SHOUT}	Materia Slots - Ø=Ø Ø=Ø Ø=Ø Ø=Ø	Growth - NONE
Attack : 95	Buy : N/A	Magic + 44
Attack % : 110	Sell : 1650 gil	
Range : Normal	Drop : N/A	
Element : Hit	Steal : N/A	
OBTAIN	Shinra HQ, Floor 64 (Disc 2)	

Notes:
- Cait Sith will deliver 3x normal power when his health is full, 2x when his health is at 2/3's and 1x when his health is at 1/3.
Damage = [48 * CURRENT HP / MAX HP + 1 / 16] * DAMAGE

Original formula:

Power = [(3 * POWER * CURRENT HP) / MAX HP] + 1

Cloud's Ultima Weapon shares the same Power-Up properties as the HP Shout.

--E.13 I - Vincent's Death Penalty

POWER-UP CONDITION - VINCENT'S KILLS

{DEATH PENALTY}	Materia Slots - Ø=Ø Ø=Ø Ø=Ø Ø=Ø	Growth - NONE
Attack : 99 Attack % : 115 Range : Long Element : Shoot	Buy : N/A Sell : 1 gil Drop : N/A Steal : N/A	Magic + 34
OBTAIN	Lucrecia's Cave	

Notes:
- Either the Submarine or a Green/Black/Gold Chocobo is required to access Lucrecia's Cave.
- After your first visit, fight 10 battles then return.
- Vincent will deliver 1x damage once he has killed 768 enemies, 1.5x damage once he has killed 1792, 2x damage once he has killed 2816, 3x damage once he has killed 4864, and 4x damage once he has killed 6912.
Damage = [KILLS / 128 + 10 / 16] * DAMAGE

Original formula:

Power = [Power * [Vincent's Kills / 128] / 16] + 10

Due to the programming of Vincent's Death Penalty, it is possible to active the overflow glitch. You can one-hit Emerald by reaching an absurd amount of kills (16,896), raising Vincent's Strength up to 255 and then use four Hero Drinks, Berserk and land a critical hit (given the way in which "Random Variation" is worked out, you may still fail to overflow this way; 18,048 kills is needed to guarantee overflow every time with this set-up).

Every 128 kills Vincent gets his damage multiplier increases by 1. With 0

kills, Vincent's damage output will be 62.5% of it's normal attack power.

<~~~~~~>
|\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../\../|
\--/

Note to reader: Since writing this section, I have done an incredible amount of Chocobo related tests, namely involving RNG manipulation. Eventually, the entire Chocobo mechanics within my guide (including the as-you-play breeding guide) is going to be getting a complete overhaul.

¬¬¬

RIVER CHOCOBO (Blue):

A River Chocobo can cross shallow water and rivers (the Buggy and the Tiny Bronco combined), and can be used to access the Materia Cave near Mideel.

MOUNTAIN-AND-RIVER CHOCOBO (Black):

A Mountain and River Chocobo is the second best Chocobo available, and can be used to access the Materia Cave near Corel.

OCEAN CHOCOBO (Gold):

An Ocean Chocobo can go pretty much anywhere on the map except for underwater, and can be used to access the Materia Cave on Round Island (unmarked island located at the north-eastern corner of the map).

NOTE - Chocobo Breeding will cost in the region of 500,000 gil, and will take approximately 3 1/2 hours to complete.

--E.14 B - How To Catch A Chocobo

To catch a Chocobo you must first equip the Chocobo Lure Materia. You must then locate a set of Chocobo tracks that can be found in various places scattered across the World Map. Run around until you engage in a battle, you may not encounter a Chocobo on your first battle; the higher the level of the Chocobo Lure Materia the higher the chance of you encountering a Chocobo.

You'll know if you have encountered a Chocobo from the music that plays. Whilst in-battle, the Chocobo must not be hit, or it'll run away. After roughly 2 turns, the Chocobo will run away unless you have defeated all of the surrounding enemies. You can stall the Chocobos departure by feeding them Greens, the better the quality of the Green the longer they'll stay. Greens can be bought from the Chocobo Ranch or from the Chocobo Sage. Once the battle has finished and you have successfully caught the Chocobo, you will find that you will be riding on the back of one when you return to the Word Map.

Whilst traversing on a Chocobo, random battle encounters will be disabled. Also, equipping a level 1 Chocobo Lure Materia will give you a 75% chance of encountering a Chocobo near the Chocobo Ranch, 50% near Junon and 25% everywhere else. A level 3 or 4 Chocobo Lure will give you 100% chance at the Chocobo Ranch and Junon, 50% everywhere else. 2x level 3/mastered Chocobo Lures would tack to give you 100% encounter rate on any Chocobo track.

--E.14 C - The Chocobo Ranch

The Chocobo Ranch can be located south west of Midgar, and can first be visited early on in Disc 1. During your visit you will need to buy the Chocobo Lure Materia for 2000 gil, then you will need to catch a Chocobo in order to cross the Marsh that is home to the Midgar Zolom. Although you can catch Chocobos at this early stage in the game, you will not be able to store

them at the Chocobo Ranch until you reach Disc 2; You will find that when you disembark from a Chocobo you will be prompted to either 'send it back to the stables' or 'turn it loose'. On Disc 1 this option will not be available.

When you send a Chocobo back to the stables, it will be kept in the outside pen. The maximum you can store there is 4, when a fifth one is caught the first one will be let go. To move your Chocobos into the stables you must first rent the stables from Chocobo Bill who can be found in the Inn to the left of the ranch. Each stable will cost 10,000 gil to rent, and there are a total of 6 to rent.

Once you have rented at least one stable, you can talk to Chocobo Billy in the ranch to be prompted to select from the following:

'Buy' - Buy various Nuts and Greens
'Get some information' - Learn some more about Chocobos
'Moving Chocobos' - Move your Chocobos from the pen to the stable
'Feeding Chocobos' - Feed your Chocobos Greens to improve their racing stats
'Mating Chocobos' - Mate a female and a male Chocobo together
'Releasing Chocobos' - Release a Chocobo back into the wild
'Riding Chocobos' - Ride a Chocobo you've caught around the World Map

NOTE - A lot of the names for the Greens and the Nuts are mis-spelt whilst navigating through the available options at the Chocobo Ranch.

Select 'Moving Chocobos' to bring a Chocobo you've caught into the stables. At this point, a Chocobos gender will be determined at random (it's always advisable to save your game beforehand). You will then be given the option of naming your Chocobo; I suggest naming your Chocobos in accordance with their gender to make things a little easier i.e. Green F, Blue M etc.

You will also be able to view the Chocobos rating, and there are 8 ratings available:

RATING:	POSTURE:	CHOCOBO BILLY'S COMMENT:
1 Wonderful	Dashing, head down	“This... is a wonderful Chocobo!”
2 Great	Running	“This is a great Chocobo.”
3 Good	Walking	“Mmm, this seems like a good Chocobo.”
4 So-So	Standing still	“This Chocobo's so-so.”
5 Average	Standing still	“This is a pretty average Chocobo.”
6 Poor	Standing still	“Mmm, this one's not bad.”
7 Bad	Trotting, head down	“This one doesn't seem to be very good”
8 Terrible	Trotting, head down	“I really can't recommend this one”

Only the Good, Great and Wonderful Chocobos are used for breeding.

NOTE - If you were to take your chocobo on board the Highwind, you could talk to the NPC to find out which 'type' of chocobo it is.

When you first enter the Chocobo Ranch you will be able to obtain the Choco/Mog Materia. This is done by talking to the nearest Chocobo, and selecting option 1 ('Wark') when prompted. The Chocobos will then perform a little dance, which is nice, you'll then be presented with the Materia. If you didn't do this on Disc 1 then you'll still be able to obtain the Materia, you'll just need to catch a few Chocobos first to fill your pen. You'll also be able to find a Chocobo Lure Materia when you enter the area on Disc 2 at the south side of the pen lying on the ground.

--E.14 D - Where To Find The Chocobo Tracks

Each set of Chocobo tracks will have a pre-determined set of encounters, and there are 7 Chocobo tracks scattered throughout Gaia:

NOTE - For some weird reason, having 2 Chocobo Lure Materias equipped will make it impossible to encounter the 2x Elfadunk and 2x Levrikon formations. Equip just one Chocobo Lure and you'll be able to encounter them.

1) {GRASSLANDS AREA TRACKS} (Near Chocobo Ranch)

Encounters:-

				RATE
1x Mandragora, 1x Levrikon	Bad Chocobo	Lv 13	(25%)	7
2x Mandragora	Bad Chocobo	Lv 13	(25%)	7
2x Levrikon	Terrible Chocobo	Lv 16	(25%)	8
2x Elfadunk	Terrible Chocobo	Lv 16	(25%)	8

None of the Chocobos found here are used for Chocobo breeding, although the Terrible Chocobos can be used to acquire the Enemy Skill Chocobuckle.

2) {JUNON AREA TRACKS}

Encounters:-

					RATE
2x Nerosuferoth	Bad Chocobo	Lv 19	(25%)		7
Front Row 2x Capparwire	Bad Chocobo	Lv 19	(25%)	Back Row	7
Back Row 2x Capparwire	Poor Chocobo	Lv 19	(25%)	Front Row	6
3x Capparwire	Poor Chocobo	Lv 19	(25%)		6

None of the Chocobos found here are used for Chocobo breeding.

3) {GOLD SAUCER AREA TRACKS}

Encounters:-

					RATE
1x Harpy	Average Chocobo	Lv 22	(34.38%)		5
Front Row 2x Flapbeat	Average Chocobo	Lv 22	(34.38%)	Back Row	5
Back ROw 2x Flapbeat	Good Chocobo*	Lv 29	(15.62%)	Front Row	3
2x Spencer	Good Chocobo*	Lv 29	(15.62%)		3

*Used for Chocobo Breeding.

4) {ROCKET LAUNCH PAD AREA TRACKS}

Encounters:-

				RATE
1x Velcher Task, 1x Kyuvilduns	So-So Chocobo	Lv 22	(34.38%)	4
2x Velcher Task	So-So Chocobo	Lv 22	(34.38%)	4
2x Valron	Great Chocobo*	Lv 22	(15.62%)	2
2x Kyuvilduns	Great Chocobo*	Lv 22	(15.62%)	2

*Used for Chocobo Breeding.

5) {WUTAI AREA TRACKS}

Encounters:-

3x Tail Vault - Average Chocobo Lv 30 (25%)		5
(Front view) 2x Tail Vault - Average Chocobo Lv 30 (25%)		5
(side view) 2x Tail Vault - Poor Chocobo Lv 30 (25%)		6
3x Razor Weed - Poor Chocobo Lv 30 (25%)		6

None of the Chocobos found here are used for Chocobo breeding.

6) {ICICLE INN AREA TRACKS}

Encounters:-

1x Bandersnatch, 1x Jumping - Terrible Chocobo Lv 33 (40.63%)		8
2x Bandersnatch - Terrible Chocobo Lv 33 (40.63%)		8
1x Jumping - Wonderful Chocobo* Lv 33 (9.37%)		1
2x Jumping - Wonderful Chocobo* Lv 33 (9.37%)		1

*Used for Chocobo Breeding.

7) {MIDEEL AREA TRACKS}

Encounters:-

3x Head Hunter - Poor Chocobo Lv 36 (21.88%)		6
2x Head Hunter - Poor Chocobo Lv 36 (21.88%)		6
1x Spiral - Great Chocobo* Lv 36 (28.12%)		2
2x Spiral - Great Chocobo* Lv 36 (28.12%)		2

*Used for Chocobo Breeding. The Chocobo that appears here can be used to acquire the Enemy Skill Chocobuckle.

So then, just to re-cap:

1 {Wonderful Chocobo} Dashing Chocobo with it's head down

"This... is a wonderful Chocobo!"

Caught from:
Lv 33 - Icicle Inn Area alongside 1x or 2x Jumping.

Max Sprint - 121 KPH
Max Stamina - 463

2 {Great Chocobo} Running Chocobo

"This is a great Chocobo."

Caught from:
Lv 22 - Rocket Town Area alongside 2x Valron or 2x Kyuvilduns
Lv 36 - Mideel Area alongside 1x or 2x Spiral

Max Sprint - 110 KPH

Max Stamina - 383

3 {Good Chocobo}	Walking Chocobo
"Mmm, this seems like a good Chocobo."	
Caught from:	
Lv 29 - Gold Saucer Area alongside 2x Spencer or 3x Flapbeat (Back Row)	
Max Sprint - 101 KPH	
Max Stamina - 363	

4 {So-So Chocobo}	Still Chocobo
"This Chocobo's so-so."	
Caught from:	
Lv 22 - Rocket Town Area alongside 2x Velcher Task, or 1x Velcher Task & 1x Kyuvilduns	
Max Sprint - 92 KPH	
Max Stamina - 343	

5 {Average Chocobo}	Still Chocobo
"This is a pretty average Chocobo."	
Caught from:	
Lv 22 - Gold Saucer Area alongside 1x Harpy or 2x Flapbeat (front row)	
Lv 30 - Wutai Area alongside 3x or 2x Tail Vault (front view)	
Max Sprint - 86 KPH	
Max Stamina - 263	

6 {Poor Chocobo}	Still Chocobo
"Mmm, this one's not bad."	
Caught from:	
Lv 19 - Junon Area alongside 3x or 2x Capparwire (back row)	
Lv 30 - Wutai Area alongside 3x Razor Weed or 2x Tail Vault (side view)	
Lv 36 - Mideel Area alongside 3x or 2x Head Hunter	
Max Sprint - 71 KPH	
Max Stamina - 213	

7 {Bad Chocobo}	Trotting Chocobo with it's head down
"This one doesn't seem to be very good"	

| Caught from:
| Lv 13 - Grasslands Area alongside 1x Mandragora & 1x Levrikon or
| 2x Mandragora
| Lv 19 - Junon Area   alongside 2x Nerosuferoth or
| 2x Capparwire (front row)
|
| Max Sprint - 63 KPH
| Max Stamina - 143
|_____

 _____
|
| 8 {Terrible Chocobo}   Trotting Chocobo with it's head down
|
| "I really can't recommend this one"
|
| Caught from:
| Lv 16 - Grasslands Area alongside 2x Levrikon or 2x Elfadunk
| Lv 33 - Icicle Inn Area alongside 1x Bandersnatch & 1 x Jumping or
| 2x Bandersnatch
|
| Max Sprint - 57 KPH
| Max Stamina - 113
|_____

 NOTE - A Chocobo with the highest top speed will always have the lowest
        Stamina, and Vice-versa.

¬¬¬

menu but also in the Battle Square and in Mideel. Here are the Greens available, along with their stat values and battle effects:

GREEN:	MIS-SPELT:	COST:	BATTLE EFFECT:	STAT BOOST:
{Gysahl Greens}	Gizzard Green	100 gil	Occupies Chocobo for two turns	Dash + 0-3 Run + 0-2 Stam + 0-3 CoOp + 1
{Krakka Greens}	Karaka Green	250 gil	Reduces Chocobos chances to run by 66.6%	Intl + 1-2 CoOp + 1
{Tantal Greens}	----------	400 gil	Occupies Chocobo for three turns	Dash + 1-4 Run + 1-4 Stam + 1-2 Intl + 1 CoOp + 1
{Pahsana Greens}	Pasana Green	800 gil	Reduces Chocobos chances to run by 80%	Intl + 1-8 CoOp + 1-2
{Curiel Greens}	Kurie Green	1000 gil	Occupies Chocobo for five turns	Dash + 0-3 Run + 0-3 Stam + 3-10 CoOp + 2
{Mimett Greens}	Memmet Greens Samolen Green Memit Green	1500 gil	Occupies Chocobo for one turn, enables use of Chocobuckle	Dash + 1-16 Run + 0-3 Stam + 3-10 Accl + 0-1 CoOp + 2
{Reagan Greens}*	Regan Green	3000 gil	Occupies Chocobo for 8 turns and Reduces Chocobos chances to run by 87.5%	Dash + 5% Run + 5% Stam + 1% CoOp + 3
{Sylkis Greens}*	----------	5000 gil	Occupies Chocobo for one turn, enables use of Chocobuckle	Dash + 10% Run + 10% Stam + 2% Intl + 1-4 CoOp + 4

*Bought from the Chocobo Sage's House.

Mimett Greens can also be won form the Battle Square costing 1280BP before the Tiny Bronco, and 400BP after the Tiny Bronco. They will not be available after you obtain the Highwind. They are the only Greens that will increase your Acceleration.

Greens will have a healing effect if used on an ally in battle. Each Green will have the same effect, which is to restore 100 HP. For a more in-depth look at how we can manipulate the racing stats to breed the perfect Chocobo, see section E.14 G below.

/............\
| NUTS |
\````````````/

Nuts are only used for breeding Chocobos, and the only two nuts you are interested in are the Carob Nuts and the Zeio Nuts. When you talk to Chocobo Billy, you must select 'Mating Chocobos' to mate two Chocobos together (obviously), then once you have selected the two Chocobos that you wish to mate you will be given the choice of which Nut you wish to use. The better the nut, the better the racing stat of the new born!

When buying from the Chocobo Ranch, the names of the Nuts will be displayed correctly in the 'purchase' screen, however when you are selecting Nuts to mate with, some of the name will have been mis-spelt:

NUT:	MIS-SPELT:	COST:
Pepio Nut	Pipio Nut	100 gil
Luchile Nut	Ruchin Nut	200 gil
Saraha Nut	----------	400 gil
Lasan Nut	----------	600 gil
Pram Nut*	Param Nut	1500 gil
Porov Nut*	Porofu Nut	2000 gil
Carob Nut	----------	500 GP
Zeio Nut	----------	--------

*Bought from the Chocobo Sage's House

CAROB NUT

The Carob Nut can be obtained in two places, the first being the Wonder Square; talk to the receptionist to trade 500GP for the Carob Nut (prize ????). The much easier way of obtaining a Carob Nut would be to fight the Vlakorados near Bone Village on the World Map. Be sure to have the Steal Materia equipped as Carob Nuts can be stolen from them. They do have a whopping 33,333 HP, so come prepared. The Carob Nut is used to breed a Green, Blue or Black Chocobo, so steal 3 of them.

ZEIO NUT

The Zeio Nut can be obtained by stealing from the Goblin found on Goblin island, just to the north east of the Chocobo Ranch. The Goblin can only be found in the Forests, and they also contain the Enemy Skill Goblin Punch. The Zeio Nut is only used to breed a Gold Chocobo, so you'll just need to steal one of them.

NOTES - After you have mated two Chocobos you won't be able to mate them again until you have battled 3-10 times. The new born won't be ready to mate until you have battled 3-18 times. Escaping doesn't count.

- There is an incredible amount of variation in the effects of each Nut. For a full run-down on each Nuts effect, scroll down to the bottom of the Chocobo breeding Section, or use QSI Link [Nuts]. It's fascinating to know that Nuts other than the Carob can yield a Black Chocobo!

/..................\
| {CHOCOBO SAGE} |
\````````````````````/

Just to the north west of Bone Village (east of Icicle Inn) you will find a lone house that is only accessible (initially) via the Highwind. This is the

Chocobo Sage's house. When you first arrive be sure to interact with the Green Chocobo that you see to obtain the fourth and final Enemy Skill Materia.

When you talk to the Chocobo Sage he will either sell you some Greens or tell you some information about Chocobo Breeding. The Nuts here are useless, and the Sylkis Greens are twice as good as Reagan Greens in terms of their stat boosting effects, and also cost less than twice the price, so just stay away from Reagan Greens altogether.

If you ask the Sage if he remembers anything, he will begin to divulge information on how to breed Chocobos, and this was the only way in which you would've been able to learn how to breed a Gold Chocobo without the use of a guide. After revealing a short amount of info, he will lose track of what he was saying and you'll have to fight 4 - 7 battles before he will remember anything else.

For a complete run-down on everything you have learnt from the Chocobo Sage so-far, you must talk to Chloe who can be found in the Chocobo Ranch. She will then give you a step-by-step guide on how to breed a Gold Chocobo. She'll also tell you which Chocobo has the best racing stats.

There are 9 pieces of information in total:

	CHOCOBO SAGE'S ADVICE:	CHLOE'S ADVICE:
1.)	I remember now! That's the one they call... It's a Mountain Chocobo. And just like the name says, he can cross any mountain. There was another one that could cross rivers, too. They called him 'River Chocobo'.	Other than regular Chocobo, there are “Mountain Chocobo” and “River-Chocobo”.
2.)	Oh, oh yeah! That Chocobo was... .....was bred from a 'Great Chocobo' and a 'Good Chocobo'. When they're given “Carob Nuts” while breeding, there's a chance you'll get one of these Chocobos.	In order for the “Mountain Chocobo” and “River Chocobo” to be born, you feed the “Carob Nut” to a “Great Chocobo” or a “Good Chocobo” and have it produce an egg. But we don't sell any “Carob Nuts”.
3.)	Oh, OK. I remember! That Chocobo.. .....It's on an island southeast of here, In a place called Corel surrounded by greenery. You should be able to catch one just west of Corel. And some 'Carob Nuts', too..... There used to be some monsters just south of here that had them.	A “Great Chocobo” and a “Good Chocobo” are found... On an island Southeast of the Chocobo Sage's dwelling at Corel. And in the area west of Corel. The “Carob Nut” can be found south of the Chocobo Sage's dwelling. Monsters carry them. Let's see, is Bone Village just south of there?
4.)	Oh right! It was about the Mountain Chocobo and the River	One surprise If you get the “Mountain Chocobo” and the

	Chocobo I told you about. When you mate these two together... ...you get one that can cross rivers AND mountains.	"River Chocobo" to produce an egg, you'll get a Chocobo that can cross mountains and rivers. I bet that the right nut for that is the "Carob Nut".
5.)	Oh, yeah! And also... There's one that can cross oceans, too!	Bigger surprise: There seems to be a Chocobo that can cross the ocean. If you could cross the ocean, mountains, and rivers, there'd be no place you couldn't go.
6.)	Oh, I remember! The Ocean-crossing Chocobo is... The Mountain-and-River-crossing Chocobo is .....is... Oh, what was I saying?	In order to get an Ocean Chocobo you need to get a Mountain-and-river Chocobo to mate with something else.
7.)	Right, right! I remember! You take the Mountain-and-River-crossing Chocobo... Mate it with a 'Wonderful Chocobo' you can catch right around here... And you'll get...	If you mate the Mountain-and-River Chocobo with a "Wonderful Chocobo", you'll get an Ocean Chocobo. But to do that you can't use an ordinary Nut.
8.)	Oh, right! You'll need a... 'Zeio Nut'. Now let me see, as I remember, the Zeio nut... Where was it you could find those things?	The "Nut" that produces Ocean Chocobos is the "Zeio Nut". This is the first I've ever heard of it. I wonder where you get them?
9.)	Oh yeah! Zeio nuts were... The favourite of goblins. There's a small island east of here where the goblins have a bunch of them.	Zeio Nuts are found on a little island east of the Chocobo Sage. "Goblins" have them. With this, you can produce an "Ocean Chocobo". According to my research, Mountain, river, and ocean Chocobos are hard to produce. But, if you take the right care of the Chocobo, and increase their Class ranking by winning at the races, it'll increase your chances of getting one.

--E.14 F - How To Breed A Gold Chocobo

PREREQUISITE:

- 6 x Stables costing 10,000 gil each
- 3 x Carob Nuts
- 1 x Zeio Nut
- 500,000 gil+ for Sylkis, Mimett, Pahsana and Curiel Greens
- Chocobo Lure Materia
- Golden Ticket (at the Gold Saucer)
- Highwind
- Cloud (After the events at Mideel)

```
 _____________________________________________________________________________
|                                                                             |
|  TIPS BEFORE YOU START:                                                     |
|                                                                             |
| - It is recommended to complete the breeding sidequest in stages. Due to    |
|   the fact that you are required to complete between 3 to 9 battles before |
|   you can mate two adults again, and between 3 to 19 battles before you     |
|   can mate a new-born, you should consider continuing on with the story     |
|   in-between breeding.                                                      |
|                                                                             |
| - The story-line quests / side quests for you to complete that will rack    |
|   up some battles on Disc 2 are as follows:                                 |
|                                                                             |
|    - Junon's Underwater Reactor Quest                                       |
|    - Return to Sector 5 (for Tifa's Premium Heart)                          |
|    - Da-chao Fire Cavern                                                    |
|    - Sunken Gelnika                                                         |
|    - Ancient Forest (Mountain Chocobo required)                             |
|                                                                             |
|   If done correctly then you should have managed to breed a Gold Chocobo    |
|   before the Midgar events towards the end of Disc 2.                       |
|                                                                             |
| - Sell your Mastered All Materias. Requiring 35,000 AP to master (which is  |
|   low), you will bank a nifty 1.4 million gil, which should see you         |
|   through to the end of the game, let alone the Breeding process. If        |
|   you're on Disc 3 then the Swamp Area in the North Crater is the best      |
|   place for AP, failing that the Sea Worm or the Spiral near Mideel.        |
|                                                                             |
| - To ride a Chocobo that you've caught/bred, you must first talk to         |
|   Chocobo Billy and select 'Riding Chocobos'. Your Chocobos posture will    |
|   be relevant to which Class he/she is ranked as at the Chocobo Square:     |
|                                                                             |
|    - Dashing        - Class S                                               |
|    - Running        - Class A                                               |
|    - Walking        - Class B                                               |
|    - Standing still - Class C                                               |
|                                                                             |
| - When you are navigating on the World Map on your Chocobo, you can run up  |
|   to the Highwind and press confirm to bring the Chocobo on board the       |
|   Highwind with you. This way you can bring a 'Special' Chocobo to a        |
|   different continent. Whilst on-board the Highwind you can pet your        |
|   Chocobo if you wish in the stables to the right of Operations.            |
|_____________________________________________________________________________|
```

So then, let's begin breeding!

```
/.....................................................\
|   OBTAINING A {MOUNTAIN CHOCOBO} or {GREEN CHOCOBO}   |
\'''''''''''''''''''''''''''''''''''''''''''''''''''''''''/
```

In order to breed a Mountain Chocobo you must first catch two chocobos. The 'Good' Chocobos can be found on the Chocobo tracks near the Gold Saucer

alongside 2x Spencer (15.75% encounter rate). The 'Great' Chocobos can either be found near Rocket Town alongside 2x Valron or 2x Kyuvilduns (31.5% total), or near Mideel alongside either 1 or 2x Spirals (56% total).

UPDATE - You could use 2 Good Chocobos, 2 Great Chocobos, or 1 Good + 1 Great Chocobo to mate, they would all have the same 'mating potential'.

Before you enter the Chocobo Ranch SAVE YOUR GAME! A gender will be chosen at random when you move your Chocobos in from your pen, and you'll need them to of opposite sex to breed them. Although it doesn't matter which gender the Chocobos are for breeding, some (incorrect) sources have stated that a Great female and a Good male is required. This is untrue; it doesn't matter what the gender is as long as they are opposite.

Now that you have your 2 Great Chocobos of opposite sex, you must feed them an un-predetermined amount of Greens to max out their stats. Feed them both somewhere in the region of:

11 x Sylkis Greens to max out Speed
15 x Pahsana Greens to raise Intelligence
60 x Curiel Greens to raise Stamina
25 x Mimett Greens to raise Acceleration

The last thing that you have to do before you can breed them is to race them at the Chocobo Races in order to improve their class. Head over to the Chocobo Square and talk to Ester to partake in the races. Once a Chocobo has won three races he/she will move up one rank. All Chocobos start off as Class C, and you only need to rank your Good and Great Chocobo up to Class B, although a higher ranked Chocobo will have a better chance of breeding a 'special' Chocobo, so I recommend getting both Chocobos up to Class A (technically, you just need 4 wins in total).

You are now ready to breed! Head over to the Chocobo Ranch and save your game! Talk to Chocobo Billy to 'mate' Chocobos, selecting the Carob Nut as your choice of Nut. There will be a 50/50 chance you will get a Mountain Chocobo or a River Chocobo. The parents will not be able to mate again until you have fought between 3 - 10 times, and the new-born will not be able to mate until you have fought between 3 - 18 times (escaping from battle doesn't count).

NOTE - Due to poor programming, the Chocobos environmental 'abilities' have been reversed in the Chocobo Races; a Blue Chocobo will make short work of the steep slope on the short track; and a Green Chocobo won't be hindered by the water on the long track, and the space section at the end of the short track. A Black or Gold Chocobo will breeze through both tracks.

Now that you have a Mountain Chocobo, you can obtain the Materia hidden within the Materia Cave south of Wutai, which is the Mime Materia. You can also access the Ancient Forest just east of Cosmo Canyon, which you would not normally be able to access until Ultimate WEAPON had been defeated. You can also access Lucrecia's Cave near Gongaga, and accessing it via Chocobo is far less of a pain than accessing it via Submarine.

```
/................................................\
|   OBTAINING A {RIVER CHOCOBO} or {BLUE CHOCOBO}   |
\''''''''''''''''''''''''''''''''''''''''''''''''''/
```

Breeding a River Chocobo requires following the exact same steps as the Mountain Chocobo; however if you have already obtained a Mountain Chocobo

then all you need to do is to mate the same parents again; you do not need to catch another wild 'Good' and/or 'Great' Chocobo. You must make sure that the sex of the River Chocobo is opposite to that of the Mountain Chocobo.

If you have not yet obtained a Mountain Chocobo then refer to the steps above to learn how to breed a River Chocobo, as the steps are exactly the same. Once you have a River Chocobo then you can access the Materia Cave north east of Mideel, which contains the Quadra Magic Materia.

NOTE - If you find that you keep breeding the same breed and/or sex of Chocobo, then you'll need to reset the RNG (Random Number Generator). To do this you must either perform a soft reset, and/or enter the Chocobo Ranch to feed a random Green to a random Chocobo, then save again. This should 'jog' the RNG.

```
/.............................................................\
|   OBTAINING A {MOUNTAIN-AND-RIVER CHOCOBO} or {BLACK CHOCOBO}   |
\'''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''/
```

In order to obtain a Black Chocobo you must first breed a Green and Blue Chocobo of opposite sex (see above). Feed each Chocobo somewhere in the region of:

```
11 x Sylkis  Greens  to max out Speed
20 x Pahsana Greens  to max out Intelligence
60 x Mimett  Greens  to max out Acceleration
60 x Curiel  Greens  to max out Stamina
```

As with your 'Good' and 'Great' Chocobos, you are going to have to race your Green and Blue Chocobos at the Chocobo races in order to rank them up to Class A. It is highly unlikely that you'll be able to get them to Class S, especially if Teioh if on the track! They'll 9 wins between them to have a 100% chance of breeding a Black Chocobo

Using the last of your 3 Carob Nuts, mate your Green and Blue Chocobos together (remembering to save beforehand) to breed a Black Chocobo! Hoo-rah! A Mountain-and-River Chocobo can access the cave near Corel, which contains the HP<->MP Materia.

```
/...................................................\
|   OBTAINING AN {OCEAN CHOCOBO} or {GOLD CHOCOBO}   |
\'''''''''''''''''''''''''''''''''''''''''''''''''''''/
```

Breeding an Ocean Chocobo is the ultimate Chocobo available, and it can access every part of Gaia including Round Island in the North eastern corner of the map, but excluding the ocean floor (it's not really an Ocean Chocobo then, is it? It should be called a 'Jesus Chocobo' [because it can walk on water]).

NOTE - You can now release your 'Good' and 'Great' Chocobos back into the wild.

Before doing anything else, you must first catch a 'Wonderful' Chocobo. These can be found on the Chocobo tracks to the west of Icicle Inn, and will only be present alongside 1 or 2x Jumping (19.5% total encounter rate). Once you have caught one you can move him into your stables, making sure that it is of the opposite gender to the Black Chocobo (save first).

Now that you have your two Chocobos, feed each of them roughly:

21 x Sylkis Greens to max out Speed
30 x Pahsana Greens to max out Intelligence
75 x Mimett Greens to max out Acceleration
75 x Curiel Greens to max out Stamina (or Kurie Greens)

Although you won't be able to rank your Wonderful Chocobo up higher than Class A, you should be able to get your Mountain-and-River Chocobo up to Class S. You'll need 12 wins in total. When they are ready to breed, save your game and then mate them using a Zeio Nut. Viola! A Gold Chocobo! You can now obtain the Knights of The Round Materia from the Materia Cave on Round Island (NE on map).

I suggest feeding you Gold Chocobo 25 Sylkis Greens and 99 Mimett Greens just to be sure that you've maxed out its stats. You should never again lose in the Chocobo Races, unless of course you're up against Teioh, whose stats are always better than yours (ignoring the 'cap'). You can speak to Chloe at in the Chocobo Stables to find out which Chocobo has the best stats.

{Ultimate Racing Chocobo}

--E.14 G - Breeding The 'Ultimate' Racing Chocobo

Big thank you to gmo7897 for clarifying up a lot of questions with his Chocobo Breeding guide!

The following information should clarify exactly how to breed the ultimate racing Chocobo! You must firstly aim to get the 'perfect' parents, as the stats of the parents will directly reflect the stats of their offspring, and understanding how the stats work is paramount to perfecting your breeding skills.

Here are the various stats that are in use:

STAT:	DESCRIPTION:	MAX:
Max Dash	The maximum speed a Chocobos Dash can reach	6000
*Dash	The speed at which a Chocobo will sprint	Max Dash
Max Run	The maximum speed a Chocobos Run can reach	5900
Run	The speed at which a Chocobo will run	Max Run
*Stamina	The amount of stamina the Chocobo has	9999
Acceleration	The speed at which a Chocobo accelerates	80
Intelligence	The Chocobos ability to perform in Automatic mode	100
Co-Operation	The Chocobos ability to perform in Manual mode	100

THE ONLY FIGURES THAT WE NEED TO MANIPULATE ARE MAX DASH AND MAX RUN

These are the two visible stats that you can see when you are in the lobby screen just before a race:

Speed   = Dash/34. This gives a maximum of 176 KPH (6000/34 = 176)
Stamina = Stamina/10. This gives a maximum of 999 (9999/10 = 999)

When you catch a wild Chocobo, a random figure will be generated for each stat. These figures will generate themselves at the point in which you move the Chocobo from the pen into the stables. Each figure will have a 'range' as follows:

	(Max Dash)	(Max Run)	(Dash)	(Run)			
CHOCOBO:	MAX SPRNT	MAX SPD	SPRNT	SPD	STAMINA	ACCEL	INTL
Wonderful	99 - 121	91 - 112	50-97	38-91	337-463	60-70	50-60
Great	85 - 110	76 - 100	42-88	30-82	287-393	60-70	50-60
Good	79 - 101	67 - 95	39-81	28-75	247-363	50-60	30-40
So-So	67 - 92	55 - 86	33-74	22-68	247-343	50-60	30-40
Average	55 - 86	40 - 80	17-70	17-64	167-263	30-50	0-20
Poor	49 - 71	35 - 66	15-58	0-52	87-213	30-50	0-20
Bad	40 - 63	26 - 57	12-51	0-45	67-143	20-50	0-20
Terrible	34 - 56	20 - 51	10-46	0-40	37-113	20-50	0-20

NOTES - Co-Op will always be set to 0 when first caught.
- Acceleration and Intelligence will always land on a figure divisible by 10.
- Usually, the higher the Max Sprint is when the stats are first generated, the lower the Stamina will be, and vice-versa.

Max Dash and Dash are worked out accordingly:
Max Sprint*34 = Max Dash
Sprint*34 = Dash

Max Run and Run are worked out accordingly:
Max Speed*34 = Max Run
Speed*34 = Run

ALSO:

- Max Sprint and Max Speed are the only values we care about when catching wild Chocobos, although there's no real way to determine the Max Speed (Sprint can be viewed in the Chocobo Races).

- Always bring Speed up to Max Speed and Sprint up to Max Sprint straight away using Sylkis Greens.

Unfortunately, there is now way of determining your exact stats, other than Speed and Stamina. If you are looking for the ultimate Chocobo, then I suggest catching a Great Chocobo, feeding it Sylkis Greens to max out its Speed, and then checking to see what his/her Speed is within the Chocobo Races.

If it is 85 then you have the worst possible 'Great' Chocobo, if it's 110 then you have the best possible 'Great' Chocobo. Stamina won't matter as there is no 'cap' on Stamina (or any other stat for that matter, excluding Max Dash and Max Run).

All stats apart from Max Sprint (Max Dash) and Max Speed (Max Run) can be increased using Greens:

GREEN:	STAT BOOST:
Gysahl Greens	Dash + 0 - 3
	Run + 0 - 2
	Stamina + 0 - 3
	Co-Operation + 1
Krakka Greens	Intelligence + 1 - 2
	Co-Operation + 1
Tantal Greens	Dash + 1 - 4
	Run + 1 - 4
	Stamina + 1 - 2
	Intelligence + 1
	Co-Operation + 1
Pahsana Greens	Intelligence + 1 - 8
	Co-Operation + 1 (25%) OR + 2 (75%)
Curiel Greens	Dash + 0 - 3
	Run + 0 - 3
	Stamina + 3 - 10
	Co-Operation + 2
Mimett Greens	Dash + 1 - 16
	Run + 0 - 3
	Stamina + 3 - 10
	Acceleration + 0 (75%) OR + 1 (25%)
	Co-Operation + 2
Reagan Greens	
	Co-Operation + 3
x = [Dash/20], y = [between 0-10]	Dash + x+y (50%) OR x-y (50%)
x = [Run/20], y = [between 0-10]	Run + x+y (50%) OR x-y (50%)
x = [Stam/100], y = [between 0-10]	Stam + x+y (50%) OR x-y (50%)
Sylkis Greens	Intelligence + 1 - 4
	Co-Operation + 4
x = [Dash/10], y = [between 0-10]	Dash + x+y (50%) OR x-y (50%)
x = [Run/10], y = [between 0-10]	Run + x+y (50%) OR x-y (50%)
x = [Stam/50], y = [between 0-10]	Stam + x+y (50%) OR x-y (50%)

If Dash = 4000, then (X) would be 400 (4000/10 = 400) (Sylkis Greens)
Let's say the random number (Y) was 8.
You would have a 50/50 chance of you Dash being increased by 408, or 392

A 'simpler' way at looking at those formula's would be:

Reagan Greens:	Sylkis Greens:
Dash + 5% (approx)	Dash + 10% (approx)
Run + 5% (approx)	Run + 10% (approx)
Stam + 1% (approx)	Stam + 2% (approx)
CoOp + 3	Intl + 1 - 4
	CoOp + 4

So, the main thing that we can see is that the Sylkis Greens are precisely

twice as good as the Reagan Greens. The Pahsana Greens are great for Intelligence, and the Mimett Greens are the only Green to increase Acceleration, which it will only do 25% of the time. Curiel Greens are good for Stamina, also.

The next thing you need to know about 'Ultimate' Chocobo breeding are the Nuts; each nut will have a varying effect on the new-born:

(Only the Zeio and Carob Nut are shown here, scroll down to the 'More Nuts' section below for each Nuts' effect)

ZEIO NUT	
*Max Dash	21.5% - Max Dash will be 10% *HIGHER* than the parent with the highest Max Dash, capped at 6000
	78.5% - Max Dash will be the *AVERAGE* of its parents
Max Run	31.3% - Max Run will be 12.5% *HIGHER* than the parent with the highest Max Run, capped at 5900 or Max Dash
	62.9% - Max Run will be the *AVERAGE* of its parents
	5.9% - Max Run will be 5% *LOWER* than the parent with the highest Max Run
Stamina	68.4% - Stamina will be 5% *HIGHER* than the parent with the highest Stamina, capped at 9999
	31.6% - Stamina will be the *AVERAGE* of its parents
Dash	Dash will be the *AVERAGE* of its parents
Run	Run will be the *AVERAGE* of its parents
Acclertn	Accl will be the *AVERAGE* of its parents
Intllgnc	Intl will be the *AVERAGE* of its parents
Co-Oprtn	CoOp will always be *0* when born
Breeding	Black and Wonderful Chocobo:
	100% - Gold Chocobo if parents have *WON* a total of 12 races
	3.1% - Gold Chocobo if parents have won *LESS* than 12 races
	If you AREN'T breeding a Black and Wonderful Chocobo, or you are but you FAILED to obtain a Gold Chocobo, then its breed will have a 50/50 chance of being its fathers or mothers.
Obtain	Buy : N/A — Drop : Goblin
	Steal: Goblin — Morph: N/A
*Bonus :	*IF* the Chocobo that was born was a Gold Chocobo, and its Max Dash was less than 5000, then the following bonus will apply:
	43.8% - Max Dash will be set to 5000
	12.5% - Max Dash will be set to 5100
	12.5% - Max Dash will be set to 5200
	6.2% - Max Dash will be set to 5300
	6.2% - Max Dash will be set to 5400
	12.5% - Max Dash will be set to 5500
	6.2% - Max Dash will be set to 5950

	THEN (Random Number between 0 & 26). There is a 50% chance Max Dash will be increased by that figure, and a 50% Max Dash will be reduced by that figure.
	IF the Chocobo that was born was a Gold Chocobo and its Max Run was below 4000, then it will receive a 1000 bonus to Max Run.

CAROB NUT

*Max Dash	23.4% - Max Dash will be 10% *HIGHER* than the parent with the highest Max Dash, capped at 6000
	76.6% - Max Dash will be the *AVERAGE* of its parents
Max Run	15.6% - Max Run will be 10% *HIGHER* than the parent with the highest Max Run, capped at 5900 or Max Dash
	62.9% - Max Run will be the *AVERAGE* of its parents
	21.5% - Max Run will be 10% *LOWER* than the parent with the highest Max Run
Stamina	19.5% - Stamina will be 5% *HIGHER* than the parent with the highest Stamina, capped at 9999
	80.5% - Stamina will be the *AVERAGE* of its parents
Dash	Dash will be the *AVERAGE* of its parents
Run	Run will be the *AVERAGE* of its parents
Acclertn	Accl will be the *AVERAGE* of its parents
Intllgnc	Intl will be the *AVERAGE* of its parents
Co-Oprtn	CoOp will always be *0* when born
Breeding	Blue and Green Chocobo:
	100% - Black Chocobo if parents have *WON* a total of 9 races
	3.9% - Black Chocobo if parents have won *LESS* than 9 races
	50% - Blue Chocobo if parents have won *LESS* than 9 races
	46.1% - Green Chocobo if parents have won *LESS* than 9 races
	Good and Great Chocobo: (or 2x Good or 2x Great)
	50% - Green Chocobo if parents have *WON* a total of 4 races
	50% - Blue Chocobo if parents have *WON* a total of 4 races
	17.2% - Green Chocobo if parents have won *LESS* than 4 races
	18% - Blue Chocobo if parents have won *LESS* than 4 races
	64.8% - Yellow Chocobo if parents have won *LESS* than 4 races
	IF you are mating a Great or Good Chocobo with a Chocobo that *ISN'T* Great/Good (i.e. Wonderful), then there is a 25% chance that the above formula for mating Good/Great Chocobos will apply, so long as you select the Great/Good Chocobo first.

           | will be reduced by that figure.                                |
           \,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,/
```

I will detail all other Nuts further down in section E.14 H.

You should now have all the tools necessary to start breeding your prize-winning Chocobo. Here's how:

```
/.............................................\
|   HOW TO BREED THE ULTIMATE RACING CHOCOBO   |
\'''''''''''''''''''''''''''''''''''''''''''''/
```

Before Starting:

- It's worth noting that you can very easily reach the maximum stat value for Stamina, Acceleration, Intelligence and Co-Operation. The only two figures that we need to try to manipulate are Max Dash and Max Run.

- Co-Operation always starts at 0 for a new-born, and caps at 100, so 25 Sylkis Greens will do the trick. Intelligence will max out at 100 and can be maxed using Pahsana Greens, and Stamina can be maxed out using Curiel Greens which will max out at 9999 (or 999 in the races).

- Acceleration is the biggest pain in the backside to max as a Mimett Green will have a 25% chance of increasing Acceleration by +1, so just keep feeding it Mimett Greens (around 100+) until you are happy that it value has reached 80.

- Run and Dash can very easily be maxed (to Max Run and Max Dash) by using 9 Sylkis Greens. Remember that if you have two Chocobos with maxed out Stamina (9999), Intelligence (100) and Acceleration (80), the offspring will be born with all three of these stats maxed.

STEP 1:

Catch two Great Chocobos. Before moving them into the stables, SAVE YOUR GAME! Remember that the stats are generated for the Chocobo at the point in which you move them across from the pen, so don't move both in at the same time. Remember that Chloe will tell the 'best' Chocobos stats for Max Dash, Max Run, Acceleration and Intelligence.

You won't be able to determine the Acceleration or Intelligence (which shouldn't matter too much at this stage), however you will be able to measure the Stamina, Dash and Max Dash. Co-Operation is always set to 0 to begin with.

After feeding the Chocobo as many Sylkis Greens as is necessary to max out its Speed (bringing its Dash value to the same as its Max Dash - 11 or so),

head over to the Gold Saucer (don't worry about maxing its other stats). If its Speed isn't above 105 (ish), reset your game and try moving the Chocobo into the stables again. The max speed you can have from a great Chocobo is 110 KPH.

NOTES - The Max Run is always proportionate to the Max Dash, so a Chocobo with a high 'Top Speed' should also have a fairly high running speed.

- Every time you reset, make sure to do a soft reset as to keep the RNG from being reset, unless it gets stuck and keeps giving you the same stats, in which case perform one hard reset, followed by soft resets from there on out.

Once you are happy with your Great Chocobos Max Dash stats, save the game and repeat the process with your other Great Chocobo. The down side here is that you'll also have a 50/50 chance of it being the wrong gender, but the plus side is that it won't matter if the second Chocobo isn't all that great, you only have to have one great 'Great' Chocobo (although it will help down the line if you have two). You'll be ready to continue when you have two Great Chocobos, one of which with great Max Dash (Top Speed) stats!

STEP 2:

Using Sylkis, Mimett, Curiel and Pahsana Greens, max out both Chocobo stats completely. Then race them and then save your game. *Make note of which Chocobo has the best stats by talking to Chloe*. Breed the two Chocobos together using a Carob Nut. You will have a 23.4% chance that the new-born will have higher Max Dash and 15.6% that it will have higher Max Run than the parents with the highest Max Dash/Run (Stamina won't matter), giving you a cumulative 3.65% chance of getting a Chocobo with better Max Run and Max Dash.

Don't worry too much about getting a better Max Run (Speed) at this stage, just concentrate on getting a Chocobo with better Max Dash (Sprint) than its parents. A Chocobos Speed can never exceed its Sprint, so focus first on maxing out Max Dash, which is 6000 (or 176 KPH).

Now talk to Chloe in the Chocobo Ranch (you don't have to feed the newborn any Greens), and she will tell you which Chocobo has the fastest Sprint (MDash) and which is the fastest runner (MRun), if the new-born doesn't have Dash that surpasses its parents, reload your save and try again, we'll focus on Run later on when we breed a Gold Chocobo (the Zeio Nut has a much better chance than the Carob Nut of breeding a Chocobo with higher Run than its parents).

Don't forget about that pesky RNG - if it gets stuck and keeps spitting the same stats, then try feeding Greens to your Chocobos.

STEP 3:

Let's say you'd just obtained a Green Chocobo with better Max Dash and better Max Run than its parents. You'll obviously want to breed a Blue Chocobo next using the same parents, however it doesn't matter whether this new Chocobo has better stats than its parents or not. You won't be able to tell anyway, seeing as Chloe can only tell you who has the 'best' stats, and the new Chocobos stats can only be equal to or less than its sibling.

NOTE - If a Chocobo succeeds in gaining a boost in stats (say, Max Dash), then it will be boosted using the parent *with the highest (Max Dash) stats.* This means that your 'secondary' Chocobo doesn't have to be as 'optimal' as you first Chocobo. Most other stats will take an

average of both parents, so be sure to try to max Stamina, Acceleration and Intelligence on both choc's, just remember that Co-Op is always set to 0 when a new-born is hatched.

Go ahead and mate the two parents again. Make sure to max out all of the stats that you can for both Chocobos, then race them both to Class A. Save the game, then mate the Green and Blue together using a Carob Nut. Then check with Chloe to see if his/her 'Sprint' (and hopefully 'Speed') has surpassed his/her parents. If they haven't, reload your save; if they have, max out its stats.

Once you have a Black Chocobo, you can release the 'weakest' Great Chocobo back into the wild.

STEP 4:

Now catch a Wonderful Chocobo. It doesn't matter in the slightest what the Chocobos Max Dash is, just be sure to max out its stats before breeding. Also be sure to check with Chloe to see which Chocobo has the highest Max Dash and Max Run before doing anything else.

One you are content that you have the best Black Chocobo 'for the job', go ahead and save the game. Then mate the two together using a Zeio Nut (after racing, obviously), you'll now have a 22% chance of the new-born having a higher Max Dash, 32% chance of it having higher Max Run and 68% chance of it having higher Stamina (see Zeio Nut details above). The cumulative chance of getting better Max Dash and Max Run is 7.04%.

MAKE SURE THAT THE GOLD CHOCOBO HAS HIGHER MAX DASH AND MAX RUN THAN ITS PARENTS

If the Chocobo receives the 'average' of its parents Max Run/Dash, then the drop could be quite considerable. Remember to 'jog' the RNG from time to time. If done correctly, the Chocobo should have the number one spot for all of Chloe's inspections. Now max out all of your Gold Chocobos stats, then check to see if its Max Dash has been maxed to 176KPH by competing in the races.

STEP 5:

Breed another Gold Chocobo using the same parents. Again, this Chocobos stats won't matter, all that'll matter is that it is of the opposite sex to the first Gold Chocobo, and that its current stats have been maxed out using Greens before breeding it. Once you've done this, check with Chloe to confirm which Chocobo has the greatest at this stage (it should be the first Gold Chocobo).

Breed the two Gold Chocobos together, ensuring that the new Chocobos stats are the greatest for *both* Dash and Run by talking to Chloe (before feeding it Greens to max out its stats). Then release the 'parent' gold Chocobo of the same sex as the new-born into the wild, so you can mate mother and son/father and daughter together (ugh!).

Keep repeating this final process until you are content you have the 'best' racing Chocobo possible.

Max Speed - 176KPH
Max Stamina - 999
(Max Run - 173KPH)

Although you cannot see how fast your Run is, the fastest it can goto is 173KPH, so you'll know when you have the optimal Max Run stat because there'll be little difference in speed when you push down O to sprint.

+---+
| CONGRATULATIONS - YOU NOW HAVE THE 'PERFECT' CHOCOBO! |
| So what can you do now? |
+---+

  Teioh:

You still need to watch out for Teioh, as Teioh's Max Dash will always be 10% greater than yours, and his Stamina will always be 25% greater than yours. These figures will ignore all 'caps'. As long as you have a very high Run you should be fine.

  Special Prizes:

Winning 10 Class S races in a row will reward you with a special bundle of prizes: Counter Attack Materia, Sprint Shoes, Cat's Bell, Precious Watch and Chocobracelet. These prizes can only be won once.

  Stamina Refill:

Just to make it that bit easier, you can hold down R1+R2 to slowly refill your Stamina bar. This shouldn't be necessary seeing as your Run and your Dash should be near enough the same, meaning you won need to sprint.

  Make a cup of tea:

With Automatic mode enabled!?!

+---+
| O.K., so not a phat lot!! |
+---+

¬¬¬

Stamina - 1000 (Stamina = 100)
Acclertn - 60
Intllgnc - 30
Co-Oprtn - 0

/..............................\
| CHOCOBOS THAT GIVE US STUFF |
\''''''''''''''''''''''''''''''''/

At any point during the game you can talk to the Chocobos that are sitting in the pen at the Chocobo Ranch. When prompted, select option 1 “Wark” to see a little dance. You will then be presented with the almighty Choco/Mog Materia! This little bad-boy is best paired with the Elemental Materia on your weapon, as it is Wind based and a large amount of enemies in the game are weak against Wind.

When you visit the Chocobo Sage on Disc 2 (or Disc 3), you will notice a Green Chocobo sitting in its stable. Interact with it and it'll give to you an Enemy Skill Materia! Cheers Chocobo!

If you talk to Chloe before she has obtained any information about the Chocobo Sage then she will tell you that 'the white Chocobo likes to be scratched behind its ears, anywhere else and it'll get mad'. This is a reference to the White Chocobo in Mideel; be sure to feed it a Mimett Green (although it'll read Samolen Green), then tickle it behind its ears to receive the incredible Contain Materia!

/........................\
| ESTERS CHOCOBO STATS |
\''''''''''''''''''''''''''/

When you attempt to race for freedom just after the Corel Prison events on Disc 1, you will be given a Chocobo in which to race with from Ester. If you lose on this Chocobo then the Chocobo you will be given for the next race will be slightly better. You will keep getting a better Chocobo until the fourth Chocobo, you'll then be stuck with that one until you win (which in all fairness should be pretty easy seeing the 4th Chocobo is fairly slick).

The four Chocobos are as follows:

Chocobo 1:
''''''''
Dash - 3000 (Top Sprint = 88 KPH)
Run - 2200 (Top Speed = 65 KPH)
Stamina - 3200 (Stamina = 320)

/.................\
| {CHOCOBUCKLE} |
\'''''''''''''''''/

Chocobuckle is a fairly useless Enemy Skill that can be first obtained when you visit the Chocobo Ranch on Disc 1. The enemy Skill will basically increase by 1HP worth of damage (ignoring defences) for every time you have escaped from battle. So, potentially you could do 9999 worth of damage for as little as 3MP, although escaping that many times would take an unrealistic amount of time to accomplish. A better use of Chocobuckle would be to escape 2222 times in order to active 'All Lucky Seven's' (9999HP - 2222 = 7777).

To learn the Enemy Skill, you must first encounter a wild Chocobo. You must then feed the Chocobo either a Mimett Green or a Sylkis Green; this will activate the Chocobos use of Chocobuckle. You must then knock the Chocobos health down to 3.125% (1/32) in one hit, the Chocobo will then retaliate by casting Chocobuckle as a counter attack on its attacker. There is only one move that can perform this - L4 Suicide.

Due to the fact that only a Chocobo with a level divisible by 4 can be hit with Chocobuckle, you can only learn Chocobuckle in two places - the Grasslands Area (near Chocobo Ranch) alongside either 2x Elfadunk or 2x Levrikon (Lv 16), or Mideel Area alongside 1x or 2x Spiral (Lv 36). You can learn L4 Suicide from Mu in the Grasslands Area, and he will have a 7% chance of casting it.

/...................\
| PERSONALITIES |
\'''''''''''''''''''/

There are also three 'obscure' ratings which can be attributed to a Chocobos 'Personality' (or 'Run Type'):

   Personality 0 = Running Chocobo at the lobby screen in the races
   Personality 1 = Running Chocobo at the lobby screen in the races
   Personality 2 = Dashing Chocobo at the lobby screen in the races

Other than aesthetically, the personality of a Chocobo will not modify the Chocobos performance in any way; the Chocobo will behave exactly the same in a race as it normally would, regardless of its personality. The information regarding Personalities is hazy, and from what I can gather personality 0 would be considered the 'normal' or 'primary' personality, while 1 & 2 would be considered the 'lower-ranking' or 'secondary' personalities.

```
  Wonderful or Great Chocobo - 87.5% chance of Personality 0
                               6.25% chance of Personality 1
                               6.25% chance of Personality 2

       Good or So-So Chocobo - 75%   chance of Personality 0
                               12.5% chance of Personality 1
                               12.5% chance of Personality 2

     Average or Poor Chocobo - 50%   chance of Personality 0
                               25%   chance of Personality 1
                               25%   chance of Personality 2

    Weak or Terrible Chocobo - 50%   chance of Personality 0
                               25%   chance of Personality 1
                               25%   chance of Personality 2
```

It is possible to remove the current personality of your Chocobo to set it to 0, this is done by feeding a Chocobo enough Pahsana Greens. Chocobo Billy will comment “their personality's improved!” if done correctly. There is no ascertain way of being able to tell the difference between personality 0 and 1.

/.............................\
| {RANDOM NUMBER GENERATION} | {RNG}
\'''''''''''''''''''''''''''''/

Shout out to BrutalAl for his extensive knowledge on how the RNG works!

REMEMBER TO SAVE OFTEN WHEN MANIPULATING THE RNG!

The Random Number Generator (or RNG) is the computers way of generating an outcome; nothing is actually random, and by knowing how to manipulate the RNG you will be able to breed the exact breed and sex of Chocobo you are after, without even having to race!

There are multiple RNG's in the game, for example the Battle RNG. This will have 256 possible outcomes (0-255), and performing various things can advance the marker to the next outcome. For example, when you use Choco/Mog, you will have a 241/256 chance of getting DeathBlow (94.1%) and a 15/256 chance of getting Fat Chocobo (5.95%). If the marker has landed on one of the 15 squares that has Fat Chocobo against it, then Fat Chocobo will be used. The marker will advance 1 or more places every time certain actions are performed.

Seeing as we are only looking at Chocobo Breeding, I am only going to focus on the actions that advance the Chocobo RNG:

Feeding Chocobo Krakka Greens - 1 marker per Krakka Green
Mating Chocobos - 1 marker
Moving Chocobos - 1 marker
Entering the area outside the stables (screen with pen) - 2 markers
Standing outside the stables (screen with pen) - 1 marker per second
Hard Reset - resets marker back to 0.

As far as I can tell, the Chocobo RNG has 256 numbers (0-255).

| When you perform a Hard Reset, the marker will move back to position 0. |
| When you perform a Soft Reset (L1 R1 L2 R2 Start + Select) the marker will stay where it is. This knowledge is crucial for manipulating the RNG. |

When you enter the 'pen' area, the marker will advance two places. With the RNG at 002, you'll need to feed a Chocobo 23 Krakka Greens to bring it to 025, resulting in a Blue Female.

After lengthy testing, I can safely say that the Greens used to capture the Chocobo, and the location in which you caught the Chocobos makes no difference whatsoever; the RNG sequence is always constant. It does however make a difference which Chocobo you select first when mating, unless they are both the same rank (Great, Good etc.).

UPDATE - THE PERSONALITY OF THE CHOCOBO MAKES A HUGE DIFFERENCE!!!! You will get different results when breeding Chocobos that have different Personalities from previous tests. A lot more testing is required.

Lastly, if you spend too long getting into the stables from the screen

outside of it, then the RNG will be at 003 instead of 002. The marker will automatically increase two places when you enter the screen with the pen, and then the marker will start to increase by 1 every second thereafter. There is a delay before the 'second' marker will begin however, and if you run into the barn quick enough then you should be able to safely keep the RNG at 002. Just don't hang about.

Using the above info, you should be able to obtain the desired breed of Chocobo, so long as you know the outcome of the RNG' positions:

2x Great Chocobos with 0 wins (Personality 0 & 1):

@RNG-004 = Green Male
@RNG-006 = Green Female
@RNG-032 = Blue Male
@RNG-025 = Blue Female

```
/.....................................................\
|   OBTAINING A GOLD CHOCOBO *WITHOUT* HAVING TO RACE   |
\'''''''''''''''''''''''''''''''''''''''''''''''''''''''''/
```

- Works on both PS1 and PS4 versions. I cannot confirm for PC versions.

If you've read the previous section pertaining to RNG then you should be equipped with the knowledge of how to manipulate the RNG as to obtain a Chocobo of your choice. Here is the method to gaining a Gold Chocobo, without having to race:

(Credit - BrutalAl & gmo7897)

Prerequisite:

Capture 1x Great Chocobo (Mideel - alongside Spiral)
Capture 1x Wonderful Chocobo (Icicle Inn - alongside Jumping)
Steal 2x Carob Nuts
Steal 1x Zeio Nut
Buy 1x Saraha Nut
Buy 62x Krakka Greens

Using the RNG sequence below, you should be able to breed a Gold Chocobo in less than an hour (without having to race once):

@RNG-002 Move Great = Great Female.
@RNG-003 Move Wonderful = Wonderful Male.
@RNG-003 Mate Great + Wonderful = Blue Female. Then fight 6 battles
@RNG-052 Mate Great + Wonderful = Green Male. Then fight 8 battles
@RNG-007 Mate Blue + Green (Saraha Nut) = Black Female. Then fight 3 battles
@RNG-008 Mate Black + Wonderful = Gold Female

Remember to save and Hard Reset just before you're about to breed. This method will require you to participate in 0 races at the Chocobo Square, and 17 battles outside the Chocobo Ranch.

!!WHEN TRYING FOR A BLUE/GREEN, YOU *MUST* SELECT THE GREAT CHOCOBO FIRST!!

Here is a step-by-step guide on how to do this:

1.) With a Great and Wonderful Chocobo in your pen, save your game and perform a hard reset. The RNG should now be at 000.

2.) Run into the stables without hanging about outside, the RNG should now be at 002.

3.) Move your Great Chocobo. This should be a Female. The RNG should now be at 003.

4.) Move your Wonderful Chocobo. This should be a Male. Now save your game and perform a hard reset. The RNG should now be at 000.

5.) Run into the stables without hanging about outside, the RNG should now be at 002. Feed one Krakka Green to a Chocobo. The RNG should now be at 003.

6.) Mate the Great and Wonderful Chocobos (selecting Great first). You should get a Blue Female.

7.) Now fight in 6 random battles, then save and perform a hard reset.

8.) Run into the stables without hanging about outside, the RNG should now be at 002. Feed 50 Krakka Greens to a Chocobo to bring the RNG to 052.

9.) Mate the Great and Wonderful Chocobos. You should get a Green Male.

10.) Now fight in 8 random battles, then save and perform a hard reset.

11.) Run into the stables without hanging about outside, the RNG should now be at 002. Feed 5 Krakka Greens to a Chocobo to bring the RNG to 007.

12.) Mate the Green and Blue Chocobos using a Saraha Nut (it doesn't matter which one you pick first). You should get a Black Female.

13.) Now fight 3 random battles, then save and perform a hard reset.

14.) Run into the stables without hanging about outside, the RNG should now be at 002. Feed 6 Karaka Greens to a Chocobo to bring the RNG to 008.

15.) Mate the Black and Wonderful Chocobo using a Zeio Nut (you need to select the Black Chocobo first). You should get a Gold Female. Congratulations!

After trying it myself, I can safely say that this method works perfectly on both the PS1 version and the PS4 version. You must remember to select the Great Chocobo first when breeding a Blue/Green Chocobo, and you must remember to enter the barn rather quickly.

Using the battle glitch as mentioned in the section just below, combined with this technique of RNG manipulation, BrutalAl was able to breed a Gold Chocobo in under four minutes (having first caught the Great & Wonderful Chocobo)!

```
/.......................\
|   MISCELLANEOUS INFO   |
\'''''''''''''''''''''''''/
```

- There is a glitch that will occur after you reach a ridiculously high amount of battles - 32,767. The game cannot use a number higher than 32,767, and if you were to battle your 32,768th battle, then the game would revert you to minus figures, and would consider your battle count to be -32,768. You would then need to fight a whopping 32,768 battles for the count to reset back to 0, in which time you would not be able to breed Chocobos at all!

  If you were to attempt to breed on you 37,767th battle, the game would permanently regard the battle count required for breeding as 0 (because it

cannot calculate a figure higher than 32,767), meaning you could breed Chocobos endlessly without having to battle in-between breeding!

- Although many guides will claim that you can only mate a Great and a Good Chocobo together to breed a Green/Blue Chocobo, this is false. You could also us 2x Good Chocobos or 2x Great Chocobos. I have conformed this myself.

- Lucrecia's Cave is situated near Gongaga and North Corel. It can be accessed via the Submarine, but it can also be accessed via a Green, Black or Gold Chocobo before you can obtain the Submarine. It can take quite a long time to find Lucrecia's Cave using the Sub, so the Chocobo route is by far the best route. Vincent's Ultimate Weapon and L4 Limit Break Manual can be found in there.

- The Ancient Forest is situated just east of Cosmo Canyon on a ledge that's just out of reach... unless you have a special Chocobo of course! Through the course of natural game-play, the Ancient Forest will become available to you when you kill Ultimate WEAPON, however through Chocobo breeding you can gain early access to this little treasure cove. Note-worthy items include the Slash-All Materia and the Apocalypse (triple growth weapon).

- When you visit Sector 6 playground at the beginning of the game, you will notice Tifa being escorted on a Chocobo-and-carriage. This is the same design as the carriage that will escort you out of Corel Desert after 12 screen of being lost!

- The only way to determine what your Chocobos stats Top Speed and Stamina is to enter it into a race at the Chocobo Square - the stats will be displayed in the top right corner of screen.

- A Green and Blue Chocobo will have their abilities reversed when racing at the Chocobo Square. There are two environment hazards on the short track - The hill section will be overcome by the Blue Chocobo, and the space section at the end will be overcome by the Green Chocobo. The long track has one environment hazard, the water section, which is overcome by the Green Chocobo. The Black and Gold Chocobo will plough through all hazards.

- Teioh is the only AI Chocobo that has environmental abilities.

Earlier on in the 'Ultimate Racing Chocobo' section I began listing in-depth descriptions of how each Nut worked, however I'd decided to only show the Zeio and Carob Nut seeing as those were the only two nuts that we were using. I've now decided (for what it's worth) to list every single Nut here:

```
/.................\
|   MORE {NUTS}   |
\'''''''''''''''''/
```

IN ALL CASES: (Credit: GMO7897 & TFergusson))

- Acceleration and Intelligence will always be the average of the parents.

- Cooperation will always be set to 0.

- The Gender chosen will always be a 50/50 chance, or thereabouts.

- Every Chocobos will be born as a Class C Chocobos.

- If a Chocobo is born with Max Run that is equal to or higher than Max Dash, Max Run will reduce by 100 repeatedly until it is lower than Max Dash.

- If a Chocobo is born with Run that is equal to or higher than Max Run, Run will reduce by 100 repeatedly until it is lower than Max Run.

- The 'Rating' of the Chocobo (Great, Good etc.) will always have 50% of being its fathers, and 50% chance of being its mothers.

- You will be able to breed a Black Chocobo using any Nut except for the Zeio Nut, and only the Carob Nut will breed a Blue or Green Chocobo.

(Best Nut first to Worst Nut last)

{ZEIO NUT}	
*Max Dash	21.5% - Max Dash will be 10% *HIGHER* than the parent with the highest Max Dash, capped at 6000
	78.5% - Max Dash will be the *AVERAGE* of its parents
Max Run	31.3% - Max Run will be 12.5% *HIGHER* than the parent with the highest Max Run, capped at 5900 or Max Dash
	62.9% - Max Run will be the *AVERAGE* of its parents
	5.9% - Max Run will be 5% *LOWER* than the parent with the highest Max Run
Stamina	68.4% - Stamina will be 5% *HIGHER* than the parent with the highest Stamina, capped at 9999
	31.6% - Stamina will be the *AVERAGE* of its parents
Dash	Dash will be the *AVERAGE* of its parents
Run	Run will be the *AVERAGE* of its parents
Breeding	Black and Wonderful Chocobo: (MUST select Black first)
	100% - Gold Chocobo if parents have *WON* a total of 12 races
	3.1% - Gold Chocobo if parents have won *LESS* than 12 races
	If you AREN'T breeding a Black and Wonderful Chocobo, or you are but you FAILED to obtain a Gold Chocobo, then its breed will have a 50/50 chance of being its fathers or mothers.
Obtain	Buy : N/A — Drop : Goblin
	Steal: Goblin — Morph: N/A
*Bonus :	*IF* the Chocobo that was born was a Gold Chocobo, and its Max Dash was less than 5000, then the following bonus will apply:
	43.8% - Max Dash will be set to 5000
	12.5% - Max Dash will be set to 5100
	12.5% - Max Dash will be set to 5200
	6.2% - Max Dash will be set to 5300
	6.2% - Max Dash will be set to 5400
	12.5% - Max Dash will be set to 5500
	6.2% - Max Dash will be set to 5950
	THEN (Random Number between 0 & 26). There is a 50% chance Max Dash will be increased by that figure, and a 50% Max Dash will be reduced by that figure.

	IF the Chocobo that was born was a Gold Chocobo and its Max Run was below 4000, then it will receive a 1000 bonus to Max Run, possibly causing it to go above Max Dash!

{CAROB NUT}

*Max Dash	23.4% - Max Dash will be 10% *HIGHER* than the parent with the highest Max Dash, capped at 6000 76.6% - Max Dash will be the *AVERAGE* of its parents
Max Run	15.6% - Max Run will be 10% *HIGHER* than the parent with the highest Max Run, capped at 5900 or Max Dash 62.9% - Max Run will be the *AVERAGE* of its parents 21.5% - Max Run will be 10% *LOWER* than the parent with the highest Max Run
Stamina	19.5% - Stamina will be 5% *HIGHER* than the parent with the highest Stamina, capped at 9999 80.5% - Stamina will be the *AVERAGE* of its parents
Dash	Dash will be the *AVERAGE* of its parents
Run	Run will be the *AVERAGE* of its parents
Breeding	Blue and Green Chocobo: 100% - Black Chocobo if parents have *WON* a total of 9 races 3.9% - Black Chocobo if parents have won *LESS* than 9 races 50% - Blue Chocobo if parents have won *LESS* than 9 races 46.1% - Green Chocobo if parents have won *LESS* than 9 races Good and Great Chocobo: (or 2x Good or 2x Great) 50% - Green Chocobo if parents have *WON* a total of 4 races 50% - Blue Chocobo if parents have *WON* a total of 4 races 17.2% - Green Chocobo if parents have won *LESS* than 4 races 18% - Blue Chocobo if parents have won *LESS* than 4 races 64.8% - Yellow Chocobo if parents have won *LESS* than 4 races If you are mating a Great or Good Chocobo with a Chocobo that *ISN'T* Great/Good (i.e. Wonderful), then there is a 25% chance that the above formula for mating Good/Great Chocobos will apply, so long as you select the Great/Good Chocobo first.

```

Whilst inside one of the four Materia Caves that are scattered across Gaia, random battle encounters will be disabled.

{Wutai Materia Cave}

¬¬¬

All magic spells will have their power reduced by 50% when paired with Quadra Magic, and this includes % based attacks such as Demi and Full Cure. This is why MP Turbo comes in handy. Even though you are hitting 4 times, your MP consumption will be as if you had cast the spell but once. If you were to equip two Quadra Magics to a spell then you would increase the amount of casts by 1 to give you 5 casts. This can be repeated up four times for a total of 8 casts. Knights of The Round cannot be paired with Quadra Magic.

There is a glitch which involves you landing you Highwind in a particular spot to enable you to enter the Materia Cave without the use of a Chocobo. From the Materia Cave, follow the peninsula down until you see a green bit of grass leading from a cliff. Hover over the green land facing south, so the dirt area is to your left. Now you must side-strafe left (by holding Square) and press X just before you leave the grass area, whilst still holding left..

You probably won't do it on your first attempt; jump back in your Highwind, position yourself so your facing South, and try again. Try strafing further over to the right, then back again pressing X just before you leave the grassy area. Once performed correctly you'll have landed the Highwind on the very edge of the cliff, with Cloud on the dirt track. I was able to achieve it after 2 dozen or so tries.

{Corel Materia Cave}

--E.15 C - Corel Cave

Near the entrance to Mt. Corel you will notice the Materia Cave surrounded by desert. This cave is only accessible via a Black or Gold Chocobo. The HP<->MP Materia can be found within the cove, and it is probably the worst of the four rewards.

{HP<->MP}

HP<->MP will basically swap your HP figure for your MP figure, so your HP will max at 999 and your MP will max at 9999. Useless.

One of the most practical ways of using HP<->MP is to manipulate you MP as so that it lands on 7777. When you remove HP<->MP your HP will be 7777, meaning that the next battle you go into you'll activate All Lucky 7's.

To do this, you must first ensure that your characters MP is maxed out to 9999. Then equip the Shield Materia (or Phoenix Materia), Transform Materia and a Lv 3 Fire Materia onto that character. Use Shield (or Phoenix) 12 times, to leave you with 7839 MP. Then use Mini to bring it down to 7829, then finally use Fire3 to bring it down to 7777.

Good Fire based creatures to battle would be the Ark Dragon in the Mythril Mines, the Bagnadrana in Mt. Corel or the Dragon in Mt. Nibel.

Another use of HP<->MP would be to use it to bring your HP down as to fill your Limit gauge more quickly, although enemies that use gravity based attacks such as the Valron's Dive Kick, or the Death Claw's Laser are more effective ways of filling your Limit bar.

{Round Island Materia Cave}

--E.15 D - Round Island Cave

Round Island is an unmarked location situated on the far north-east corner of the map. The only Chocobo that can get you to this island is the Gold Chocobo, and the prize here is the greatest summon of them all - Knights of The Round. The enemies fought on this island are the Goblins.

{Knights of The Round}

The Knights of The Round (or KOTR) summon is a total of 13 separate attacks, and pairing Steal as Well with KOTR would yield 13 steal attempts. Pairing Quadra Magic with KOTR will not work, unless you were to pair Quadra Magic with Master Summon, and then Magic Counter with a second Master Summon. This would give you a small chance of countering with 4x KOTR attacks.

The highest combined damage you can do with KOTR is 129,987 HP (9999 * 13). Costing 250MP, KOTR is the most expensive spell on the game, and as such a lot of people tend to pair it with MP Absorb. A character that mimes this attack will also receive the MP, although using Mime will cost 0MP in the first place.

The only creatures that will be left standing after using KOTR would be Emerald WEAPON, Ruby WEAPON and Safer-Sephiroth. KOTR requires the most amount of AP to master - 500,000. Lasting 1:20, it's safe to say that KOTR is by far the longest (and strongest) spell on the game.

--E.15 E - Extras

There are a few extra areas that you can visit once you have bred a 'special' Chocobo:

LUCRECIA'S CAVE:

Once you have a Green, Black or Gold Chocobo you will be able to visit Lucrecia's cave which is situated in-between North Corel and Gongaga (or Corel Prison and Nibelheim). This small lagoon is also accessible via a submarine, but can take a rather long time to reach given the slow pace of the sub.

Make sure that Vincent is in your party when you enter the cave. You'll meet a woman called Lucrecia, and a small scene will play out which teaches you a little about Vincent's past. You must then fight in 10 battles, after which you'll be able to return to the cave to receive Vincent's Ultimate Weapon, the Death Penalty, and his Lv4 Limit Break Manual, Chaos.

ANCIENT FOREST:

The Ancient Forest is situated slightly east of Cosmo Canyon, and can initially only be accessed via a Green, Black or Gold Chocobo. Once you have defeated Ultimate WEAPON (which can be done just after defeating Diamond WEAPON), the forest will become available to you, but that will be sometime after you are able to breed Chocobos.

See section D2.10 J for the walkthrough. Notable items of interest here are the Slash-All Materia, and Cloud's Apocalypse, which is one of two triple growth weapons.

OTHER PLACES:

Not that you would need to visit this place on disc 2, but you can also visit the Sleeping Man's cave near Junon. You can also visit the Great Glacier again; without a Chocobo you would need to go through the Icicle Inn and then partake in the snowboarding once more, however with a Green, Black or Gold Chocobo you'll be able to enter the Great Glacier straight from the entrance.

And that just about wraps up everything that you can do with a Chocobo (other than racing them, of course)!

{E.16} - Defeating Emerald, Ruby and Ultimate WEAPON

A - About The WEAPONs
B - Emerald WEAPON
C - Ruby WEAPON
D - Ultimate WEAPON

{WEAPON}

--E.16 A - About The WEAPONs

!!SPOILER ALERT!!

The WEAPONs are creatures that have been created by the planet to protect itself from dangers that will threaten its very existence, such as Jenova, or Meteor. They were first created nearly 2000 years ago to destroy Jenova, although they were never called upon to protect the planet, as the Cetra were able to subdue and lobotomise Jenova, thereby ending the crisis. Sensing no impending danger, the WEAPONs lay dormant for two millennia.

When Sephiroth used the Black Materia to summon Meteor, the WEAPONs sensed imminent danger, and awoke to try to protect the planet from chaos. However, instead of targeting Sephiroth, they instead headed out to destroy Junon and Midgar, the main location of the Shinra.

There are five WEAPONs in total, plus an additional two that exist within the FF VII Universe:

Emerald - Landed in the ocean, leaving a large crater upon impact. This WEAPON was presumably targeting the underwater reactor near Junon, although this isn't definite. Emerald is said to be the 2nd hardest boss in the game, and can only be fought once you have obtained the Submarine. Fighting Emerald isn't mandatory, although it will unlock the Emerald WEAPON Trophy.

Ruby - Landed in the desert near the Gold Saucer, and it is unclear what

Ruby's intentions are. It appears as a small fin poking out of the sand. When you approach it either by Chocobo or in the Highwind, it will jump out at you, provoking a battle. Ruby is the hardest boss in the game, and isn't compulsory to fight, although doing so will unlock the Ruby Trophy.

Ultimate - Landed near Junon, then sets its sights on the small village of Mideel. Why? The reason is unknown. You will have one mandatory battle with Ultimate before it flies off, not to be seen again until later on. When you do see him again, he will be in an attacking stance hovering over specific landmarks, namely places where reactors are. Defeating him is optional.

Diamond - Landed in the ocean near the North Crater. Diamond only shows his face when the Mako Cannon begins to fire up, and sensing the immense amount of Lifestream consumed to power the cannon, he emerges from the ocean to destroy Midgar. Diamond is the only WEAPON that has to be defeated as per the story line.

Sapphire - Landed in the ocean near Junon. Sapphire is the first WEAPON to go on a rampage, setting its sights on the Shinra town of Junon. It is the only WEAPON that you do not have to battle, seeing as the Mako Cannon will finish the job for you.

Jade - Is only seen in 'Before Crisis FF VII'. It is an insect-like creature, and is the first of the seven WEAPONs to be awakened by the planet. When a powerful Summon, Zirconiade, is used, the planet senses danger and awakens Jade to deal with it. In the end, the Turks were able to defeat Zirconiade, but Jade then decided to target the Turks as they were deemed 'too powerful' in the eyes of the planet, and needed to be destroyed .

Omega - Is only seen in 'Dirge of Cerberus FF VII'. It is the supreme WEAPON, and will only rear itself if the planet senses imminent destruction (which doesn't happen during the course of the game we're playing). Its purpose is to gather and seal up all of the planets Lifestream, and to then leave the baron planet in search of a new home within the galaxy.

It is recommended that you utilise the W-Item glitch whenever going up against one of the WEAPONs. Using this glitch you will be able duplicate yourself enough of the necessary items to suit, such as Megalixirs, Hero Drinks, Dazers etc. See section E.18 B for more info on the W-Item glitch and how it works.

{Emerald Weapon}

¬¬¬

Guidebook for it, which can be obtained by morphing a Ghost Ship in the underwater tunnel leading to the rector underneath Junon.

Whenever you submerge into the ocean, Emerald will have one of 4 locations it could spawn in. Simply collide into it to battle it. One needs to be extremely careful when entering/exiting the Sunken Gelnika as Emerald could be sitting directly outside it! If this happens, submerge then dive and he'll have spawned somewhere else (1/4 chance).

2 useful tips: Navigating whilst at maximum height will enable you to avoid Emerald altogether!
Emerald and Ruby are both "escapable", so if you do bump into Emerald by mistake then you van simply flee (R1 + L1).

Defeating Emerald WEAPON will net you a whopping 50,000 AP, which will triple to 150,000 if using Cloud's Apocalypse or Cid's Scimitar. This will help tremendously if you are trying to master all of your Materia. The other thing that you will obtain upon its defeat is the Earth Harp. You can trade the Earth harp with the Kalm Traveller for a set of Master Materia!

NOTE - Emerald is not present in the Japanese original of the game.

/>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\
|> EMERALD'S STATS AND BATTLE PLAN <|
\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~</

Alongside Emerald WEAPON there will be four Eyes resting on Emerald's shoulder pads. These Eyes can be revived by Emerald, and it will use different attacks if its eyes are alive or dead.

The most feared move that Emerald will use is Aire Tam Storm, which is actually maTeriA backwards! This move will cause 1111 HP to each character per Materia that each character has equipped on them. So 9 or more pieces of Materia would result in 9999 damage! The only way to survive this attack is to equip Final Attack with Revive, or to equip less than 9 pieces of Materia. That's 9 pieces per character, not 9 in total!

It is also worth noting the Emerald is Vulnerable to Slow, as well as being one of the few bosses on the game that doesn't nullify Gravity, so even though Emerald will halve Demi, it'll still deal 9999 HP of damage.

	EMERALD WEAPON	EYE X 4
-------Lv:	99--------	50------
-------HP:	1,000,000	25000---
-------MP:	100-------	100-----
------EXP:	50000-----	--------
-------AP:	50000-----	--------
------GIL:	50000-----	--------
-----DROP:	Earth Harp	--------
---ABSORB:	ICE--WTR--	ICE--WTR
--NULLIFY:	ERT-------	ERT-----
----HALVE:	GRV-------	--------
---DOUBLE:	LHT-------	FRE-----
------ATK:	180-------	50------
--MAG ATK:	180-------	50------
------DEF:	180-------	2-------
--MAG DEF:	180-------	2-------
----DEF %:	1---------	1-------
DEXTERITY:	230-------	150/250-
-----LUCK:	1---------	1-------

Avoid casting things such as Haste, Big Guard, Regen etc. as Emerald will just end up cancelling them out. The reason Emerald is much easier than Ruby is due the fact that Emerald has a strict pattern in which it'll always conform to, so you'll always know what's coming.

Emerald WEAPON only has five attacks:

FOOT STAMP - (Unnamed attack) Used when all eyes are shut. Will cause

around 2500 damage to all characters.
EMERALD SHOOT - Used when all eyes are shut. Will cause around 7000 damage to one character whilst also removing Barrier, MBarrier, Shield, Death Force and Resist.
EMERALD BEAM - Used when at least one eye is open. Will hit all players for 63% of their current HP whilst also removing Regen.
REVENGE STAMP - Used as a counter attack and will hit all players for roughly 2500 HP whilst also removing Haste. Will be used every time it is hit, unless hit with a Limit Break or a Bahamut Summon, or if all of its eyes are shut.
AIRE TAM STORM - (Materia spelt backwards) Uncommonly used as a counter attack, Aire Tam will hit all players for 1111 HP PER MATERIA EQUIPPED! It will also remove nearly all positive Statuses. Any damage dealt via Aire Tam Storm is absorbed by Emerald.
Emerald's Eyes have only two attacks:
BLUE EYE (A & D) - EMERALD LASER - Damages one player for 4000 HP approx.
YELLOW EYE (B & C) - EMERALD LASER - Damages one player for 650 MP approx.

****

Emerald's Battle Schematics:-
1.) Emerald WEAPON will use Emerald Shoot between 2 - 5 times, possibly using Foot Stamp in between attacks.
2.) Emerald will then open its four eyes, as well as using Emerald Beam.
3.) Emerald will now use its eyes to attack you. After 8 attacks, Emerald will use Emerald Beam once more.
4.) Emerald will now use its eyes for 4 attacks, after which it will use Aire Tam Storm.
5.) Then it will use its eyes another 4 times, after which it will use Emerald Beam.
6.) Sequence 4 & 5 will repeat themselves until all eyes are destroyed, then the pattern will repeat itself from sequence 1.

Revenge Stamp will only be used while its eyes are open, and will be used every time it takes a hit, unless it has been hit with one of the three Bahamut Summons or a Limit Break.

Aire Tam Storm will also be used as a counter attack if Revenge Stamp has been used 10 times, or if his HP is less than 50% after using Knights of The Round (at least one eye must be open).

```
/>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\
|>   STRATEGIES FOR DEFEATING EMERALD                                     <|
\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~</
```

PREREQUISITE:

There are many strategies for defeating Emerald, and they don't all share the

same level of preparation. The following list is a set of must-haves, regardless of which strategy you use:

- Underwater Materia
- Limit Breaks at full
- Slow down the Battle Speed to 1/4 or less
- Time Materia or Spider Web (at the top of the item list) to inflict Slow
- A healthy stock of Megalixirs
- All players in the back row
- Final Attack Materia linked to Revive or Phoenix Materia
- (Optional) Roughly 12 Hero Drinks, arranged at the top of the Item list
- (Optional) Sadness inflicted on all 3 characters as to reduce damage taken
- (Optional) 3 x Sprint Shoes

A Hero Drink will raise ones Atk, Mag Atk, Def and Mag Def by 30%, and can stack for a total of 100%. These aren't necessary to defeat the WEAPON, but will help massively. They can be obtained from the Icicle Inn, the North Crater or as a prize from the Chocobo Square. Spider Webs can be stolen from the Kimara Bug in Gongaga Jungle.

Also, spending some time in the Sunken Gelnika to farm as many sources as you can will help out loads. Remember that the Heavy Tank by the reactor in Gongaga can also drop Power Sources, and it is the only enemy that is encountered there.

You should probably use your characters Ultimate Weapons, unless you wish to level up your Materia using the 50,000 AP reward. In terms of armour, I personally recommend using Wizard Bracelets, but feel free to use the Mystile, Ziedrich or Imperial Guard if you wish. There is no need to use a Ribbon against Emerald, so I recommend using Sprint Shoes, failing that Champion Belts and/or Circlets work a treat.

NOTE - If you are Lv 99 when fighting Emerald, then Goblin Punch will deal 9999 damage for 0MP.

```
````````````````````````````````````````````````````````````````````````````````
```

STRATEGY 1 - THE 'COUNTER FRENZY' METHOD (Recommended):

With this strategy, you shouldn't actually need the Underwater Materia, I was able to defeat Emerald in 13 minutes using this method.

```
+-------------------------------------------------------------------------+
|  This is by far the easiest way to defeat Emerald, but also takes the   |
|  longest to prepare for, and isn't entirely 'necessary'; there are      |
|  easier and quicker ways to this super boss, keep reading below. This   |
|  is just my favourite way of taking care of Emerald.                    |
+-------------------------------------------------------------------------+
```

Here is the check list:

- Mastered Final Attack x 3
- Mastered Revive x 3 (or Phoenix)
- Mastered Counter x 4
- Mastered Deathblow x 4
- Mastered Counter Attack x 9
- Mastered Quadra Magic x 2
- Mastered MP Turbo x 1
- Mastered Magic Counter x 3
- Mastered Lightning x 3
- Mastered Gravity x 2
```

- Mastered Contain x 1
- Mastered Mega All x 3
- Mastered HP Plus x 3
- Mastered Magic Plus x 1
- (Optional) Sprint Shoes x 3

This is the 'Ultimate' list, so don't worry if you don't master all of the pieces. For example, 2 Mastered Mega Alls will yield a third piece, so you could get away with mastering one less than the amount stated above (Lightning and Gravity being the exceptions).

Here is the set-up for this strategy:

```
,''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''',
! Player 1: (Back Row)                                                         !

'''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''
```

Bear in mind that when you defeat Emerald you will be rewarded with 50,000 AP, so you may wish to juggle your load out to suit. If you wish to make use of the triple growth weapons then you'll probably want to explore the other strategies below.

If Player 1's Magic is below 200, then equip him/her with a Circlet to boost the power of Bolt3. You will not need Ribbons as he cannot inflict any Status

changes upon you (he can just clear them).

Using the Phoenix Materia over the Revive Materia is sometimes advised, as not only will it completely Revive all fallen teammates, it will also hit Emerald with Fire damage. The downside is that a level 1 Phoenix can only be used once per battle, even if the Final Attack is at level 5!

There's no point in casting Big Guard, as Emeralds attacks will negate Big Guards effect, do however cast Slow on him. All you really need to worry about is keeping your HP topped up. Try to use three Hero Drinks on each character. Other than that, this strategy speaks for itself; all you need to do is sit back and watch as your characters go into a frenzy of counter attacks every time they are hit. There's nothing else to it! Just keep using Megalixirs and you'll be fine.

```
```

STRATEGY 2 - THE 'LEAST AMOUNT OF WORK' METHOD:

This strategy requires the least amount of preparation, but is also quite a hard method to accomplish. There is 0 chance of Emerald using Aire Tam Storm if his eyes are closed. So, the idea is to take out the eyes as quickly as possible. To do this you are going to want to use your strongest Limit Breaks.

Make sure to have all characters Limit Gauges filled before the battle begins, you don't need to worry about Final Attack, just be sure to have the Sprint Shoes equipped to all three characters, and equip yourself with the strongest load-out you have. Also have all players in Fury, and choose characters that have Limit Breaks that attack all enemies, such as Barret or Cid.

Equip yourselves with things such as Lightning, Trine, Laser/Demi, and be sure to have a suitable replacement for the 'Attack' command as you won't be using it too often. Magic Counter with Restore is also a good idea. Also, Mega All and Deathblow go together nicely, perhaps even Added Cut and Deathblow.

As soon as the battle begins cast Slow on Emerald. The main thing is to save your Limit Breaks until the eyes have opened. In the meantime, try to consume as many Hero Drinks as possible (up to 4 per character). A soon as the eyes open, unleash your Limit Breaks upon them. You will have 3 full turns before he uses Aire Tam Storm, which should be ample time to destroy the eyes. When he reverts back to his original state, kick his butt, although this may take a long time to do so. The best moves to use would be Bolt3, Trine, Demi/Laser or just simply Deathblow.

When your limits fill back up simply save them for the next time the eyes open. Just stay away from Knights of The Round and you'll be fine.

```
```

STRATEGY 3 - THE 'MIME CHAIN' METHODS:

There are three mime chains that we can perform that will effectively deal with Emerald. Just remember to have no Counter Attacks, Counters or Magic Counters equipped when using these strategies (unless intended):

CHAIN 1 - Mime and Knights of the round

Perhaps the oldest strategy in the book. Master two Mime Materias so that you have three copies. Simply cast Knights of The Round (after having used a few Hero Drinks each), then have each character mime the move thereafter. Having

the W-Summon Materia equipped helps also. Pairing KOTR with HP Absorb and/or MP Absorb is a good idea, or if you wanted to you could use MT Turbo to deal extra damage. If you do equip HP Absorb, then anyone miming the attack will also receive HP.

You will need to be mindful of Aire Tam Storm when using this strategy, and remember that healing/reviving will break the chain, so make sure the KOTR is higher than Level 1 so that you can re-cast it. Either equip less than 9 pieces of Materia, or set up Final Attack with Revive/Phoenix.

Using this strategy, you can defeat Emerald in 11.5 minutes, if each KOTR hit was dealing 9999 damage.

CHAIN 2 - Mime and Quadra Magic with Gravity

Set yourselves one character up with Quadra Magic = Gravity, HP Absorb = Gravity, MP Absorb = Gravity, W-Magic & Mime. Set the other two characters up with Mime, and make sure that all of the Gravitys are at least level 3. This strategy speaks for itself.

Cast Slow, then use 3-4 Hero Drinks each, then just keep miming this combo on Emerald. Make sure not to equip more than 8 pieces of Materia (unless you have Final Attack=Revive), and be sure to keep your HP topped up prior to it using Aire Tam. Remember that healing will break the miming chain.

CHAIN 3 - Mime and Omnislash

This strategy requires a bit of preparation. First master 7 Mimes and 7 Counters (so you have 8 of each). Then fill up Cloud's Limit bar (making sure that you have obtained Omnislash), then kill off the other two characters. Equip the 8 Counters with the Mimes, then save your game.

When you enter into battle, be sure to use Omnislash before Emerald hits you. Then just sit back and watch as Cloud unleashes 8 uses of Omnislash against Emerald every time he is hit. It's unlikely, but you may need to break the chain to heal, although by that time your Limit should have filled back up. Inflict yourself with Fury just to be safe.

```
```

STRATEGY 4 - THE '7777' METHOD:

This is probably the most fun method of all. Equip each character with HP Plus and one other Materia of your choice. I suggest KOTR and Mime x 2. The idea is to keep your HP topped up at 9999, then when Emerald uses Aire Tam Storm, your HP will be dropped by 2222 bringing it to 7777, activating All Lucky Seven's. This will deal 64 hits * 7777 = 487,728 HP.

OK, so it isn't enough to take out even half of Emeralds HP, but it is enough to give you a fighting chance, whilst also looking super-cool in the process. The easiest way to get Emerald to use Aire Tam is to wait until it has opened its eyes, then kill off three of them, leaving a yellow one alive. Then just wait, after using Emerald Beam twice it'll use Aire Tam; just be sure to keep your HP topped up at all times. Don't attack it whilst waiting for Aire Tam as he'll likely counter with Revenge Stomp, and this could mess things up for you.

You'll still have to do a fair bit yourself, that's what KOTR and Mime is for. And no, you cannot activate 7777 Fever twice in one round, although if you do land on 7777 HP for a second time then all of your attacks and healing spells will deliver 7777 HP! I was able to defeat Emerald this way in roughly

15 minutes, meaning there is no need to equip the Underwater Materia.

If you wanted to learn how to activate All Lucky 7's in the shortest possible time, visit section E.18

Strategy 5 & 6 for Emerald are the exact same as strategy 5 & 6 for Ruby.

```
```

STRATEGY 5 - THE 'ONE HIT' METHODS:

There are two ways in which you can defeat Emerald in one hit. One of them is legit. The other isn't so legit.

METHOD 1 - Cait Sith's 'Game Over'

Use QSI Link [Slots] to learn how to manipulate Cait Sith's Slots to achieve the desired outcome. If you have mastered the art of manipulating the reels then you'll be able to land on three Cait Siths, which will result in the 'Game Over' attack. Although this strategy could take a while to get the hang of, it could save you a lengthy amount of time in the long run, as this method requires no mastered Materia.

Game Over will kill all enemy instantly, ignoring all Death immunities. The only other spell in the game that ignores Death immunity is Cait Sith's 'Death Joker' (Cait Sith - Cait Sith - BAR), which will kill all allies instantly, unless they are attacking from different sides.

METHOD 2 - Barret or Vincent's' 'Overflow Glitch':

To activate 'Overflow' for Barret, you must first max out his Strength to 255 by farming for Power Sources from the Heavy Tank in Gongaga. Then make sure he is Lv 99. You can either equip 3,340,000 AP on his weapon (Mastered KOTR = 500,000 AP) for the least effort in-battle, or 1,410,000 for the most amount of effort in-battle.

If you go for the 1,410,000 AP route, then bear-in-mind you will only have a chance of causing damage overflow; equip 1,500,000 to guarantee overflow.

Enter into battle. If you equipped Barret with 3,340,000 AP then all you'll need to do is use 2 Hero Drinks, then attack and Emerald will be killed in 1 hit. If you went for the lower AP value, then you'll need to cast 4 Hero Drinks, Be in Berserk and also land a Critical. If you don't mind using 4 Hero Drinks but you don't want to have to use Berserk and Critical, then you'll need to equip him with 2,120,000 AP.

For Vincent, you must first need to kill 59,520 enemies for the easiest possible in-battle method (just 1 Hero Drink), or 16,896 for the longest in-battle method (as well as being Lv 99 and having 255 Attack). 16,896 will only give you a small chance of overflowing; kill 18,048 to guarantee it! 4 hero Drink, Critical & Berserk are needed; if you just wanted to use 4 Hero Drinks without Crit and Bers then you'll need 25,984 kills!

When causing overflow be sure that there are no negative damage modifiers in=play, such as Back Row or Slash-All.

The glitch occurs because during the damage calculation process, a value has exceeded 2,147,483,647. When this happens, the number is then flipped into a negative number which means you are causing negative damage to the enemy, and the games natural presumption is that you have dealt enough damage to kill

the enemy, and by default it will then kill it for you.

For a closer look at exactly why Overflow occurs, refer to section E.18 or use QSI Link [Damage Overflow Glitch].

```
``````````````````````````````````````````````````````````````````````````````
```

STRATEGY 6 - THE 'NO BUTTON NECESSARY' METHOD:

(Thanks to Death_Unites_Us for this)

Equip the following:
Final Attack=Revive, Final Attack=KOTR, Final Attack=KOTR, HP Plus, HP<->MP.

Now use an Elixir. Make sure that all three Final Attacks and both KOTR are mastered, this won't work otherwise.

Get into battle. Make a cup of tea. Watch the TV for a bit. Come back. Victory.

{Ruby Weapon}

```
¬¬¬

tentacle in the ground, which it will not do unless but one character is either alive or in-play. If more than one character is alive, then Ruby will use an attack called Whirlsand which will permanently remove a character from the battle. It will continue to use this move until one character is left alive or in-play, then it will bury its tentacles in the ground thereby becoming susceptible to damage. Because of this, it is recommended that you enter into battle with two characters K.O'd.	-------MP:	2560--------	1000-------
	------EXP:	45000-------	----------
	-------AP:	50000-------	----------
	------GIL:	30000-------	----------
	-----DROP:	Desert Rose-	----------
	-ABSORB 1:	FRE--ICE----	----------
	-ABSORB 2:	LHT--ERT----	----------
	--NULLIFY:	GRV--WTR----	GRV--WTR---
	--E-SKILL:	SHADOW FLARE	----------
	------ATK:	100---------	100--------
	--MAG ATK:	200---------	150--------
	------DEF:	480---------	100--------
	--MAG DEF:	500---------	100--------
	----DEF %:	100---------	100--------
	DEXTERITY:	253---------	253--------
	-----LUCK:	10----------	10---------

When Ruby has its tentacles buried, you should revive your other two players. *Do not* then destroy the two tentacles, as doing so would provoke Ruby to take them out of the ground, and although she would not become invincible again, she would be programmed to use Whirlsand until one character is either left alive/in-play, and it would not bury its tentacles again until this had happened.

Ribbons are mandatory when fighting Ruby, as its tentacles can inflict some nasty Status changes upon you on every attack. It's also handy to know that the tentacles themselves cannot kill you as all of their attacks are % based. Unlike the eyes of Emerald, the Tentacles of Ruby are *not* independent; the moves that they cast on you come from Ruby itself (meaning that there is just one ATB gauge for all three targets).

When the battle begins, the game will register that a 'back attack' is in play, and the first time your players are hit they will be hit for x2 damage. Tapping L1 & R1 will not negate this effect.

The best way to defeat Ruby is to exploit its weaknesses - Slow and Paralyze. Remember that Ruby has the highest Dexterity of any creature in the game, so casting Slow is essential. It also has ridiculously high Defence and Magic.

Ruby WEAPON has 12 attacks:

* = Only used when tentacles *aren't* buried.
** = Only used when tentacles *are* buried.

*BIG CLAW - (Unnamed attack) Attacks one target for 63% of their current HP.

*BIG SWING - Attacks all targets for roughly 5000 HP and inflicts Paralyzed (63%).

*COMET 2 - Attacks 4 random targets for roughly 2500 HP per attack.

WHIRLSAND - Only used when more than one character is alive. Removes one random target from battle. Also used as a counter attack if more than one player is alive, see below for details on when this attack is used.

**RUBY FLAME - Attacks one target for roughly 5000 HP.

**RUBY RAY - Attacks one target for roughly 4000 HP and inflicts Confusion (100%).

**SHADOW FLARE - Attacks one target for roughly 8000 HP.

**ULTIMA - Attacks all targets for roughly 7500 HP.

**RIGHT THRUST - (Right Tentacle 'A' - Unnamed attack) Drains 94% of current HP from one target and inflicts Frog and Small (100%). Used as a counter attack (100%).

**RIGHT REVENGE - (Right Tentacle 'A' - Unnamed attack) Drains 47% of current HP from one target and inflicts Frog and Small (100%).

**LEFT THRUST - (Left Tentacle 'B' - Unnamed attack) Drains 78% of current MP from one target and inflicts Poison and Slow-Numb (100%). Used as a counter attack (100%).

**LEFT REVENGE - (Left Tentacle 'B' - Unnamed attack) Drains 47% of current MP from one target and inflicts Poison and Slow-Numb (100%).

NOTE - The right and left Tentacles are named according to our perspective, and not Ruby's actual right and left tentacle. The right tentacle (Ruby's Tentacle A) will always drain HP, and the left tentacle (Ruby's Tentacle B) will always drain MP.

****

Ruby's Battle Schematics:-

BEFORE BURYING TENTACLES:

1.) If one character is alive when the battle begins, Ruby will bury it's tentacles immediately.
2.) If 2 or more characters are alive when the battle begins then Ruby will use Big Claw, Big Swing, Whirlsand, Big Claw, Big Swing, Whirlsand.
3.) If you fall down to one party member within those 6 turns, Ruby will bury its tentacles immediately.
4.) If you fall down to one character after those 6 turns, Ruby will not bury its tentacles until after its 15th turn. During that time it will use:
  1/3 - Big Claw
  1/3 - Big Swing
  1/3 - Comet 2
5.) After the 15th turn, Ruby will use:
  1/5 - Bury Tentacles
  1/5 - Big Claw
  1/5 - Big Swing
  2/5 - Comet 2

So basically, if Ruby completes its cycle of using 2 Whirlsands, you could

end up waiting a fairly long time for it to eventually bury its tentacles. If at any point you do destroy the tentacles, Ruby will resort back to sequence two until one character remains. It will then resort to sequence three, four or five, respectively (depending on what turn you're on).

If you were to attack Ruby with its tentacles un-buried, then it will counter with Whirlsand provided that there is more than one player left alive/in-play.

```
 _____________________________________________________________________________
|                                                                             |
| AFTER BURYING TENTACLES:                                                    |
|                                                                             |
|  NOTE - The act of digging its tentacles counts as 1 turn.                  |
|                                                                             |
| 1.) Between turns 1 - 10, Ruby will use:                                    |
|       1/4 Ruby Flame                                                        |
|       1/4 Ruby Ray                                                          |
|       1/4 Left Revenge                                                      |
|       1/4 Right Revenge                                                     |
| 2.) Between turns 11 - 24, Ruby will use:                                   |
|       1/6 - Ruby Flame                                                      |
|       1/6 - Ruby Ray                                                        |
|       1/6 - Shadow Flare                                                    |
|       1/6 - Ultima                                                          |
|       1/6 - Left Revenge                                                    |
|       1/6 - Right Revenge                                                   |
| 3.) On the 25th turn Ruby will use Whirlsand if there are 3 players         |
|     alive/in-play.                                                          |
| 4.) After turn 25, Ruby will use:                                           |
|       2/12 - Ruby Flame                                                     |
|       2/12 - Ruby Ray                                                       |
|       2/12 - Shadow Flare                                                   |
|       2/12 - Ultima                                                         |
|       1/12 - Right Thrust                                                   |
|       1/12 - Right Revenge                                                  |
|       1/12 - Left Thrust                                                    |
|       1/12 - Left Revenge                                                   |
| 5.) On the 32nd turn Ruby will use Whirlsand if there are 2 or 3 players    |
|     alive/in play. Ruby will then continue using the moves in sequence 4.   |
|_____________________________________________________________________________|
```

With the tentacles are buried, Ruby will always counter using either Right Thrust or Left Thrust (50% chance) against any attack. If KOTR was cast (while its tentacles were buried), then it will retaliate by using Ultima.

```
/>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\
|>   STRATEGIES FOR DEFEATING RUBY   <|
\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~</
```

  PREREQUISITE:

The following is a list of must-haves prior to engaging Ruby:

 - 3 x Ribbons
 - 2 x K.O'd characters
 - At least 12 x Dazers, Megalixirs and Hero Drinks
 - 1 x Spider Web (or Time Lv 2)
 - Limit Break at full
 - Final Attack Materia linked to Revive or Phoenix Materia
 - Battle Speed set to 0 and ATB set to Wait

Dazers are used to inflict Paralyze and can be stolen from the Battery Caps in the forest near Nibelheim, or from the Boundfat in Corral Valley. The Spider Web is used to inflict Slow and can be stolen from the Kimara Bug in Gongaga Jungle. Remember that the Slow status will prolong the Paralyze Status, so be sure to use the Spider Web first. Also make sure to slow the Battle Speed down all the way, and also be sure to arrange your battle items to the top of the inventory list.

I would personally recommend using your characters Ultimate Weapons, however if you are looking to gain the huge AP reward then feel free to use alternative 'normal growth' weapons. In terms of armour, I suggest the Fire Armlet to help with the Ruby Flame attack, although anything such as the Mystile, Ziedrich or Imperial Guard will suffice (you could even use the Wizard Bracelet, just remember that it has low Defence stats).

If your character's defences aren't high enough then you may find yourselves getting eradicated by Shadow Flare or Ultima. To avoid this, use Hero Drinks, Barriers, MBarriers, Dragon Force and Wall. You can even use Reflect to counter Shadow Flare if you wish. Also, 26 uses of Magic Hammer will deplete its MP entirely, rendering Ultima and Shadow Flare unusable.

NOTE - Ruby is also vulnerable to Darkness, although Darkness will have no effect whatsoever on any enemy, as Darkness will only affect commands that are used by ourselves. It is possible to inflict Ruby with Fury, although doing so seems to have no effect. Use QSI Link [Fury] to find out how to inflict Fury on an enemy.

``````````````````````````````````````````````````````````````````````````````

STRATEGY 1 - THE 'KOTR' METHOD (Recommended):

This method probably takes the longest to prepare for, but is also the easiest (and oldest) strategy for taking care of Ruby. Here is the Materia check-list:

- MP Turbo x 1 (Mastered)
- Knights of The Round x 1 (Mastered)
- Mime x 2 (Mastered)
- W-Summon x 1
- W-Item x 1
- HP Plus x 3 (Mastered)
- Final Attack x 1 (minimum)
- Revive x 1 (minimum)
- Mega All x 1
- (Optional) Mastered Magic Plus
- (Optional) Sneak Attack (with Time Lv2)

All figures are exact; if I state 2 x mastered Mimes it's because I intend for you to have 3. Also, seeing as not much Materia is required for this strategy I suggest filling your slots up with Materia that you wish to gain 50,000AP. Here is the Load-Out I recommend:

'''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''''
```

Before going into battle be sure to have filled up player 2's Limit all the way, slow down the Battle Speed to 0, and place your Dazers, Spider Web, and Megalixirs at the top of the inventory list. Then kill off players 1 & 3.

The level of the Time Materia is up to you; at level 1 the player will cast Haste on themselves as soon the battle begins enabling you to revive the other two players faster, whereas a level 2 Time will cast Slow on Ruby, eliminating the need for the Spider Web. Both strategies have their advantages. When you are ready to battle Ruby, head over the Gold Saucer Area then save your game.

As soon as the battle begins (and after Ruby has buried its tentacles), revive the two KO'd players. The Mega All should see them both revived in one fell swoop. Also, if you had a Lv 2 Time with Sneak Attack then Ruby would already be slowed. If not, use player 3 to W-Item Spider Web and Dazers to Slow and Paralyze Ruby. Then cast Big Guard from Player 1, followed by player 2's Limit Break.

You can now use a few Hero Drink on each character if you wish, just remember that you're going to want to kill Ruby within 25 turns, otherwise it will use Whirlsand thereby removing one of your players from battle, and a removed player will not receive any battle rewards.

Now have player one cast W-Summon KOTR. Combined with the Magic Plus and MP Turbo, the players attacks should be hitting for 9999 damage (or there abouts) with every attack. The HP Absorb will save you from having to break the Mime chain to restore your HP, and the only time that you will need break the chain is if Ruby breaks free of its paralysis. After 7 uses of KOTR, Ruby should start flashing red. Congratulations!

```
```

STRATEGY 2 - THE 'I DON'T LIKE USING KOTR' METHOD:

This is a much, much tougher strategy than the KOTR method, but also takes much less time to prepare for. You're going to want to equip your strongest magic, such as Quadra Magic = Comet 2/Ultima, Sneak Attack = Time Lv 2 works well, W-Magic, Mime etc. Also be sure to have obtained the Enemy Skill Magic Hammer, and make sure that you have the W-Item Materia equipped. Lastly, equip a level 2 Throw.

As a precautionary, you could equip Elemental with Fire/Ifrit to protect you from Ruby Flame (or a Fire Armlet), but it won't be too necessary. Ribbons are mandatory, but everything else is optional; for real protection try using the Ziedrich. Although it has no Materia slots, it will halve all incoming damage!

As before, fill player 2's Limit, kill off players 1 & 3, slow the Battle Speed down to 0, set the ATB to wait and arrange your inventory as so that the Dazers and Megalixirs are at the top.

When the battle begins, do exactly as you would've done in the first strategy; Revive the other two players, then cast Spider Web and Dazers followed by Big Guard. Now it's just a case of simply throwing down everything you've got! Every other turn have the W-Item holder use Dazers and a Megalixir, and you should be completely safe. If Ruby does break free of Paralysis, then you should be Ok so long as your HP was topped up to begin with.

NOTE - If you use Dazers on a Paralyzed Ruby, the Status will *not* reset; you must wait for her to break free first. With Ruby in Slow and your characters in Haste, you should get 3-4 turns in before she breaks free.

One way to deal with Ruby's Shadow Flare and Ultima attacks would be to use Magic Hammer 9 times per character; this would see its MP drained to 0. This would leave Ruby only being able to use its tentacles, Ruby Flame and Ruby Ray! Just remember that you do have to kill it within 25 turns, or it'll cast Whirlsand on you, so if you do plan on doing this then forget about using Hero Drinks.

Another way to deal with Ruby's Ultima, Comet 2 and Shadow Flare attacks would be to inflict Ruby with Fury, thereby dropping her accuracy by 30%. This is a very risky strategy, as you would need to have one player enter the battle *without* a Ribbon equipped; the only way to cast Fury on an enemy is to cast 'Confu' on an ally, then have that ally use a Hyper before the Confusion takes effect. If done correctly, Ruby will be the one to be inflicted with Fury, and you'll then need to cure the ally of Confusion. Then either cast Resist (Lv 3 Heal) or use a Vaccine to grant that ally invulnerability to Status changes, just bear in mind that if the player already has a negative Status in place, then the Resist Status would 'lock' that negative Status in place.

Finally, you can use the 'Coin' command to throw 99,000 gil at Ruby for 9999 damage. This will ignore all defences (but not invulnerability). Seeing as you'll start at 600,000 gil, you'll have to bring the gil down manually to 99,000 as to not waste gil, and the main problem with that is that the ATB will not be set to wait, meaning Ruby will hit you during this time. So, to speed things up a little you may have to consider just throwing 600,000 gil a pop! The best way to farm gil is to sell mastered Alls or by selling Sylkis Greens using the W-Item Glitch.

```
```

STRATEGY 3 - THE 'ALL LUCKY SEVEN'S' METHOD

Ok so this strategy is a combination of the previous two strategies, plus this time you'll be activating 7777 Fever, which will take out over half of Ruby's health before Ruby has done anything other than dig its tentacles in the ground! Here's how:-

Before killing off any of your characters, you're going to want to get your chosen characters HP to 7767. There are various methods in which you can do this, use QSI Link [Lucky 7's] to view the % chart that will bring you to 7767 the quickest (credit to James Baxter).

If you don't wish to jump from this section then here is an alternative (and slightly longer) method:

NOTE - Have the chosen players Limit bar filled before setting this up! Also make sure that the players Limit Break is one that attacks multiple times.

Equip the chosen character with Manipulate, one with Enemy Skill that has Goblin Punch, and one with Goblin Punch and Transform (or 2x Shrivel). Make sure not to have Mega-All or Slash-All, and don't have any Limit Breaks filled (other than the chosen character). You must then bring the chosen player's HP down to below 7777; you can do that quite easily by equipping then un-equipping HP<->MP.

You're then ready to enter into battle; kill off all but one enemy which (you guessed it) you can then manipulate. Have the two characters that aren't manipulating inflicted with Mini. You'll then find that Goblin Punch will deal precisely 8 HP of damage, provided that your characters are the same level as each other; if not then it'll just deal 1HP of damage per hit. It may take a while, but you can then keep attacking the chosen player until their HP lands on xx77. When this happens simply flee from battle.

Now using Hi-Potions and Potions bring that characters HP to 7677. Save the game and swap the chosen character out of your party. Now it's time to kill off your other two characters, then slow the Battle Speed right down and arrange your inventory so that Dazers and Megalixirs (and Spider Webs if you're not using Time) are at the top, along with a Potion this time. Swap your chosen character back into your party and equip you Materia and armoury according to which of the first two strategies you prefer.

When the battle begins, Ruby will dig its tentacles into the ground. As soon as this happens, unleash your Limit Break on the tentacles, thereby un-burying them. Then feed the character a Potion (and throw Dazers if W-Item is equipped) to bring his/her HP to 7777. Sit back, relax, and enjoy as you hit Ruby for a total of 497,728 HP. If you had activated 7777 Fever whilst the tentacles were still buried, then you wouldn't have hit Ruby with all 64 attacks, as the tentacles themselves would likely have be targeted.

Provided that both characters are still KO'd, and it is before turn 6, Ruby will automatically dig her tentacles back in the ground. After reviving the fallen two players, you can then use Dazers, Big Guard and Hero Drinks, followed by whichever ass-whooping tactics you desire. Bye-bye Ruby.

NOTE - The 64 attacks from All Lucky 7's classes as one turn.

```
```

STRATEGY 4 - THE '1 MAN, 5 MATERIA' METHOD:

This is one of the quickest and most simplistic ways of defeating Ruby, and there are slight variations on how this can be performed. What makes this strategy so effective is that all of your Materia can be at level 1. Equip the following:

W-Summon, Hades, HP Absorb = Knights Of The Round & Mime. A cheeky Magic Plus and HP Plus wouldn't go amiss, either.

Open with Hades which will Paralyze Ruby, then follow with KOTR. Ruby will not counter with Ultima because it will be Paralyzed, and you will not need KOTR to be higher than level 1 because Mime can be used countless times, costing 0 MP. The only thing you would need to worry about is the one attack that Ruby will be able to throw in every so often; as long as you can survive this attack you should be fine, as KOTR will heal your HP if paired with HP Absorb.

An adaptation of this strategy would be to revive your players at the last hurdle, as so that they receive all of the battle spoils. To do this, you would have to have KOTR at level 2, and also to have the Phoenix Materia equipped. On the last use of KOTR, instead of using Mime you can W-Summon Phoenix to revive your fallen comrades, then KOTR to finish it off. Make sure to have at least 830MP when going into battle.

You need to know how many uses of KOTR are required to finish it off:

Between 8792 - 9999 HP per attack - 7 uses of KOTR
Between 7693 - 8791 HP per attack - 8 uses of KOTR
Between 6838 - 7692 HP per attack - 9 uses of KOTR
Between 6154 - 6837 HP per attack - 10 uses of KOTR
Between 5595 - 6153 HP per attack - 11 uses of KOTR

Variable - Hades will damage Ruby for no more than 500HP, even with 255 Magic, and Phoenix will heal Ruby by no more than 500; so the above figures won't be exact, although but they won't be too far off at all.

Strategy 5 & 6 for Ruby are the exact same as strategy 5 & 6 for Emerald (excluding damage overflow).

```
```

STRATEGY 5 - THE 'ONE HIT' METHODS:

There are two ways in which you can defeat Ruby in one hit. One of them is legit. The other isn't so legit.

METHOD 1 - Cait Sith's 'Game Over'

Use QSI Link [Slots] to learn how to manipulate Cait Sith's Slots to achieve the desired outcome. If you have mastered the art of manipulating the reels then you'll be able to land on three Cait Siths, which will result in the 'Game Over' attack. Although this strategy could take a while to get the hang of, it could save you a lengthy amount of time in the long run, as this method requires no mastered Materia.

Game Over will kill all enemy instantly, ignoring all Death immunities (but not invincibility). The only other spell in the game that ignores Death immunity is Cait Sith's 'Death Joker' (Cait Sith - Cait Sith - BAR), which

will kill all allies instantly, unless they are attacking from different sides.

METHOD 2 - Barret or Vincent's' 'Overflow Glitch':

NEITHER BARRET NOR VINCENT CAN OVERFLOW AGAINST RUBY! It is the one enemy in the game that Vincent cannot overflow against.

For a closer look at exactly why, refer to section E.18 or use QSI Link [Damage Overflow Glitch].

```
````````````````````````````````````````````````````````````````````````````````
```

STRATEGY 6 - THE 'NO BUTTON NECESSARY' METHOD:

(Thanks to Death_Unites_Us for this)

Equip the following:
Final Attack=Revive, Final Attack=KOTR, Final Attack=KOTR, HP Plus, HP<->MP.

Now use an Elixir. Make sure that all three Final Attacks and both KOTR are mastered, this won't work otherwise.

Get into battle. Make a cup of tea. Watch the TV for a bit. Come back. Victory.

{Ultimate Weapon}

```
¬¬¬

After each battle, be sure to quickly view which direction Ultimate flew off in. If you lose track of it then it can be a real pain in the backside to find again.

Once Ultimate's HP is low enough he will head over to Cosmo Canyon, there you will have your final battle with Ultimate WEAPON. Once he has been defeated he will drop Cloud's Ultimate Weapon, the Ultima Weapon, he'll then crash into the cliff face near Cosmo Canyon which will allow you to gain access to the Ancient Forest. This forest was previously accessible via a Green, Black or Gold Chocobo. Defeating Ultimate will also trigger Ruby's appearance, however you must fight in one random battle first.

If you do intend on defeating Ultimate prior to the Midgar events, then be very careful when searching for Ultimate as flying over the North Crater, then Midgar (respectively) will trigger the point-of-no-return for Disc 2. Also, if you finish a battle with Ultimate, and he is no-where to be seen, then there stands a good chance that he has spawned back at the crater near Junon.

NOTE - Ultimate is vulnerable to Slow.

/>~~~~~~<\
|> ULTIMATE'S STATS AND BATTLE PLAN <|
\>~~~~~~</

Ultimate won't drop any battle rewards until the final fight (at Cosmo Canyon), and that fight will not occur until Ultimate's HP has been lowered to 20,000 or less:- Ultimate's current HP will not replenish from battle to battle. If you were to deplete its HP to 0 prior to the final fight, then Ultimate would enter into that battle with 20,000 HP, otherwise its HP would be carried over from the previous battle.

It is possible to fully deplete its HP in the first encounter at Mideel by casting Knights of The Round on it. If you were to do this then you would find Ultimate waiting at Cosmo Canyon as the first battle after defeating Diamond. This way you would be missing out on the chance to steal Circlets and Reflect Rings, so this may not be the wisest thing to do. And, if you're wondering how KOTR is obtainable prior to the Gold Saucer re-opening, refer to the 'Obtaining A Gold Chocobo *Without* Having To Race' segment in section E.14.

ULTIMATE WEAPON	
-------Lv:	61----------
-------HP:	100,000------
-------MP:	400----------
------EXP:	35000--------
-------AP:	3500---------
------GIL:	25000--------
--STEAL 1:	Curse Ring---
--STEAL 2:	Circlet------
--STEAL 3:	Reflect Ring-
-----DROP:	Ultima Weapon
--NULLIFY:	GRV----------
--E-SKILL:	SHADOW FLARE-
------ATK:	100----------
--MAG ATK:	170----------
------DEF:	120----------
--MAG DEF:	100----------
----DEF %:	3----------
DEXTERITY:	120----------
-----LUCK:	50----------

UPDATE - If you deplete all of Ultimate's HP in the first fight, then you'll still have to fight it in the crater near Junon first before it'll flee off to Cosmo Canyon. Thanks to Aerinhikari for the correction.

While most of Ultimate's stats are fixed, it will have varying things that can be stolen from it. Curse Ring aside, these items can be stolen more than once (1 per battle):

Mideel Battle - Curse Ring

Aerial Battle - Circlet
Ground Battle - Reflect Ring

Lastly, Ultimate will use an attack called Ultima Beam, which is the only attack in the game that uses the 'Hidden' element (that causes physical damage). To protect yourself from Hidden, simply pair the Elemental Materia to any 'non-elemental' Materia, excluding Restore and every Support Materia. If done correctly, you will halve/nullify/absorb the Ultima Beam attack. An example of this set-up would be Elemental=HP Plus.

NOTE - Ultimate will not use Shadow Flare until the final battle above Cosmo Canyon.

Here was my load-out going into the following fights, bearing in mind that it's worth swapping your weapons from 0 growth weapons to double or even triple growth weapons for the final fight. This load-out does not apply to the first battle:

1) Cloud (Back Row)

MP Plus
Heaven's Sword - Ultima, Contain, Enemy Skill, Long Range, Magic Plus,
Shinra Alpha - Elemental=HP Plus, All=Restore, Sneak Attack=Mug
Sneak Glove

2) Yuffie (Back Row)

Revive, Typoon
Conformer - Enemy Skill, Double Cut, MP Turbo=Comet, All=Barrier,
Crystal Bangle - Elemental=HP Plus, Steal, Counter Attack, MP Plus,
Champion Belt Bahamut Zero

3) Vincent (Back Row)

Speed Plus, Counter Attack
Death Penalty - Steal as Well=Steal, All=Time, Enemy Skill, Mime,
Shinra Alpha - Elemental=HP Plus, Added Cut=Deathblow, Luck Plus, MP Plus
Champion Belt

```
```

FIRST FORM - MIDEEL (Steal - Curse Ring)

There is no need for extensive preparation for this battle as it will only last three turns. Ultimate will use Quake2, Claw (unnamed attack) and then Ultima Beam before finally fleeing from battle. Be sure to steal the Curse Ring before this happens, as there are only two places in the game that you can acquire these bad-boys, and this is one of them. If you take out more than 20,000 HP, Ultimate will flee.

Just make sure to have Steal equipped, and also to have protection from the Hidden element. There's really not much else to this battle, other than the fact that the more HP you drain from it now, the less HP he'll have in the forthcoming battles. Again, if you were to use KOTR in this battle then the next two battles would be the final battles.

```
```

SECOND FORM - AERIAL (Steal - Circlet)

When fighting the aerial form of Ultimate, it will also gain immunity to Earth and Water. The following locations will provoke an aerial fight:

Near Junon - Aerial Battle
Near Mideel - Aerial Battle

```
 Near North Corel  - Aerial Battle
 Near Mt. Nibel    - Aerial Battle
```

Whenever you encounter Ultimate in this form you'll be able to steal a Circlet from it, so try to obtain 3 in total. Remember that these are also steal-able from the Snow in the Great Glacier, which *is* re-visitable.

As with the previous battle, Ultimate will have a fixed set of commands that it will use before escaping - Ultima Beam, Thunderball (unnamed attack), Ultima Beam and finally Thunderball again. It will always flee on its fifth turn, unless you have knocked off 20,000 HP, whichever comes first.

Having long ranged players here is mandatory, or failing that the Long Rang Materia. Remember that your steal attempts will be voided otherwise.

```
  THIRD FORM - GROUND                                    (Steal - Reflect Ring)
```

The following locations will provoke a ground battle with Ultimate:

```
 Near Gongaga      - Ground Battle
 Near Fort Condor  - Ground Battle
 Near Midgar       - Ground Battle
 North Crater      - Ground Battle
```

Always make sure to steal a Reflect Ring as there is only one Reflect Ring available besides Ultimate, so try to steal two before the final fight. I recommend saving before each battle, if you don't successfully steal then just re-load your save.

There is absolutely no need to swap your load out from the previous set-up, as these fights are short and sweet. Ultimate's attacks will be Claw (unnamed attack), Ultima Beam, Claw, Quake2 then flee, unless you deal 20,000 HP, in which case it'll flee straight away. Note the Midgar Battle background is the same as the one when you fought Motor Ball on the Midgar Highway.

```
  FOURTH FORM - FINAL BATTLE
```

Once Ultimate's HP has dropped to below 20,000, it will makes its way immediately over to Cosmo Canyon after the previous battle. If you managed to deplete its HP to 0 in that battle, then the final fight will be fought with 20,000 HP, otherwise its HP will be whatever it was from the previous fight. Remember that this is also an aerial battle, so it'll be immune to Earth and Water again.

You should think about equipping all Enemy Skill Materias onto one character, along with the Reflect ring. The reason being is the fact that Ultimate will retaliate upon death with the Enemy Skill Shadow Flare, and you won't be able to obtain it again until Disc 3 (which won't be too far away). Also, Shadow Flare can be reflected whilst still learning the Enemy Skill, so equip the Reflect ring onto that character.

You will receive the battle rewards for defeating Ultimate in this battle, so it's worth swapping your load out to suit. Also, there are no steal-able items, so you don't need to worry about equipping the Steal Materia. Here is my recommended load-out:

```
 1) Cloud  (Back Row)
```

```
    Apocalypse     - Double Cut, Your choice...
    Crystal Bangle - Enemy Skill, Enemy Skill, Enemy Skill, Enemy Skill,
    Reflect Ring                                              All=Restore

 2) Yuffie  (Back Row)

    Rising Sun  - Sneak Attack=Deathblow, Luck Plus, Speed Plus
    Rune Armlet - Your choice...
    Champion Belt

 3) Cid  (Back Row)

    Scimitar    - Your choice...
    Rune Armlet - Comet, Contain, Slash-All, Counter Attack
    Champion Belt

 NOTE - To obtain the Apocalypse prior to defeating Ultimate you must first
        have obtain a 'special' Chocobo to gain early access to the Ancient
        Forest.
```

Ultimate's attack pattern is constant - it will have a 50% chance of using Ultima Beam and a 50% chance of using Thunderball. Make sure that the Enemy Skill carrier is the person to deliver the final blow as Shadow Flare will be used on the last person to attack it.

Once it has been defeated you will be rewarded with Cloud's Ultima Weapon, which is a necessary item to have obtained if you to take part in the optional battle at the Battle Arena, along with the W-Summon Materia and Omnislash (both of which are obtained from the Battle Square). The prize for winning the special battle will be the Final Attack Materia.

```

 ////////////////////////////////////////////////////////////////////////////
```

~ ~ ~

^^^^^^^^^

Combine with:- Every Magic, every Summon, plus Master Command, Mime, Manipulate, Deathblow, Morph, Throw, Sense and Steal.
Effect:- Absorbs MP when paired Materia is used.
Suggested:- MP Absorb = Ultima / Comet / Deathblow / Morph / Mug / Steal / KOTR

If the enemy has no MP then you cannot absorb MP from it. nearly a quarter of all enemies have 0 MP, however all but 5 of them are encountered on Disc 1.

~ ~

MP TRUBO = MAGIC / SUMMON
^^^^^^^^

Combine with:- Every Magic and every Summon.
Effect:- Uses additional MP to deliver more damage. Lv1 = 10% higher MP cost, 10% higher damage output. Lv5 = 50% higher MP cost, 50% higher damage output.
Suggested:- MP Turbo = Ultima / Contain / Comet / KOTR

~ ~

MAGIC COUNTER = MAGIC / SUMMON
^^^^^^^^^^^^^

Combine with:- Every Magic and every Summon.
Effect:- Chance of counter attacking with paired Materia. Lv1 = 30%, Lv2 = 40%, Lv3 = 60%, Lv4 = 80%, Lv5 = 100%.
Suggested:- Magic Counter = Ultima / Comet / Restore

~ ~

COUNTER = COMMAND
^^^^^^^

Combine with:- Master Command, Mime, Manipulate, Deathblow, Morph, Throw, Sense and Steal.
Effect:- Chance of countering with paired Materia. Lv1 = 30%, Lv2 = 40%, Lv3 = 60%, Lv4 = 80%, Lv5 = 100%.
Suggested:- Counter = Deathblow / Morph / Mug / Steal

~ ~

ALL = MAGIC
^^^

Combine with:- Master Magic, Destruct, Time, Barrier, Gravity, Poison, Transform, Mystify, Seal, Revive, Heal, Restore, Lightning, Earth, Ice and Fire.
Effect:- Paired Materia will target all opponents for 2/3 damage. Lv1 = 1 use per battle, Lv5 = 5 uses per battle.
Suggested:- All = Time / Barrier / Heal / Restore

Whilst in the "Magic" menu outside of battle you can use Restore on all players when Restore is paired with All. Press R1 to toggle the effects of All when selecting a party member to heal.

~ ~

ADDED EFFECT = MAGIC / SUMMON
^^^^^^^^^^^^

* = recommended

*ADDED EFFECT = CONTAIN   - Adds Status:- Confusion, Stop and Petrify
 ADDED EFFECT = DESTRUCT - Adds Status:- Death
*ADDED EFFECT = TIME   - Adds Status:- Slow and Stop
 ADDED EFFECT = TRANSFORM - Adds Status:- Frog and Small
 ADDED EFFECT = MYSTIFY   - Adds Status:- Confusion and Berserk
*ADDED EFFECT = SEAL   - Adds Status:- Sleep and Silence
 ADDED EFFECT = POISON   - Adds Status:- Poison
 ADDED EFFECT = ODIN   - Adds Status:- Death
 ADDED EFFECT = CHOCO/MOG - Adds Status:- Stop
*ADDED EFFECT = HADES   - Adds Status:- Sleep, Poison, Confusion, Silence,
                                          Frog and Small

If paired on one's Weapon, then the following Statuses will have a 19% chance
of being inflicted upon the enemy when attacking.
If paired on one's Armour, then the following Statuses will be defended
against.

A large number of enemies are vulnerable to Slow and Stop, which is why the
Added Effect=Time combo is recommended until you obtain the Contain and Hades
Materia. The next best thing after Time is Seal.

~ ~

 ELEMENTAL = MAGIC / SUMMON
 ^^^^^^^^^
* = recommended

 ELEMENTAL = GRAVITY   - Adds Element:- Gravity
 ELEMENTAL = POISON   - Adds Element:- Poison
 ELEMENTAL = LIGHTNING - Adds Element:- Lightning
 ELEMENTAL = EARTH   - Adds Element:- Earth
 ELEMENTAL = ICE   - Adds Element:- Ice
 ELEMENTAL = FIRE   - Adds Element:- Fire
 ELEMENTAL = TYPOON   - Adds Element:- Wind
 ELEMENTAL = PHOENIX   - Adds Element:- Fire
 ELEMENTAL = ALEXANDER - Adds Element:- Holy
 ELEMENTAL = LEVIATHAN - Adds Element:- Water
 ELEMENTAL = TITAN   - Adds Element:- Earth
*ELEMENTAL = RAMUH   - Adds Element:- Lightning
 ELEMENTAL = IFRIT   - Adds Element:- Fire
 ELEMENTAL = SHIVA   - Adds Element:- Ice
*ELEMENTAL = CHOCO/MOG - Adds Element:- Wind

If paired on one's Weapon, then the following Elements will do double damage
when attacking against an enemy that is weak to paired Element.
If paired on one's Armour, then the following Elements will be defended
against.

A level 1 Elemental paired in you Armour will halve the Elemental damage
taken, a level 2 Elemental will nullify the damage and a level 3 Elemental
will absorb the damage. You could equip a level 3 Elemental with Ice to then
use ice to heal yourself!

Many enemies are weak against Lightning, particularly in Midgar. Also, many
enemies are weak against Wind, top. Most enemies in the Great Glacier are Ice-
based, so equipping Fire onto your weapon, or Ice onto your armour is advised.

Pairing Elemental with a Summon is preferable to pairing it with Magic, as

Magic *usually* penalises your physical stats more than a Summon would.

¬¬¬

```
  QUADRA MAGIC = COMET2
  ^^^^^^^^^^^^
```
Every time a character is hit, he/she will retaliate by casting Comet2 4 times, unless one of the Comet Materias was only at level 1.

~ ~

```
  ADDED CUT = MASTER COMMAND, DOUBLE CUT
 ^^^^^^^^^^
```
Every time you use your basic attack, you will follow up with an additional attack, basically turning it into Double Cut. With Double Cut equipped, you turn into triple cut, and with 4x Cut equipped you attack for 5 hits.

~ ~

```
 STEAL AS WELL = DEATHBLOW
 ^^^ ADDED CUT = DEATHBLOW
     ^^^^^^^^^
```
Every time you cast Deathblow, you will also attempt to steal from the enemy, whilst at the same time following up with a basic attack.

~ ~

```
 COVER MATERIA + COVER MATERIA + HYPER
 ^^^^^^^^^^^^^
```
Less of a combo and more of a strategy, this is a great strategy for Limit Break levelling.

~ ~

```
 COUNTER ATTACK X 8, HP PLUS, COVER, LONG RANGE
 ^^^^^^^^^^^^^^^
```
Every time the character is hit, he/she will retaliate with 8 potential counter attacks! You could also try pairing Counter with Deathblow.

~ ~

```
 MAGIC COUNTER = COMET2, QUADRA MAGIC = COMET2, HP ABSORB = COMET2,
 SNEAK ATTACK  = COMET2,     MP TURBO = COMET2, MP ABSORB = COMET2, W-MAGIC
 ^^^^^^^^^^^^
```
You could, if you wished replace Comet with Ultima, Contain or Gravity for equally devastating effects. With this combo, you will retaliate to being hit with 4 castings of Comet2. Note that if you were to replace Sneak Attack with Added Cut, you would not follow up Magic Counter/Final Attack/Sneak Attack with Cut; Added Cut only applies to the paired magic when it is selected as a command. The same applies to HP/MP Absorb, and Steal as Well.

~ ~

```
 MP TURBO = KOTR, MP ABSORB = KOTR, W-SUMMON, MIME
 ^^^^^^^^
```
You can cast KOTR dealing extra damage, and in-turn replenishing more MP with each casting. Use Mime to continue casting KOTR for 0 MP.

~ ~

```
 SNEAK ATTACK = DEATHBLOW, SNEAK ATTACK = DEATHBLOW, MEGA ALL
 ^^^^^^^^^^^^
```
At the start of every battle the character will have a chance of hitting all characters with Deathblow. If you are using Yuffie then you can equip her

with the Conformer, and swap out Deathblow for Morph to morph all enemies into an item each battle.

~ ~

QUADRA MAGIC = MASTER MAGIC, MEGA ALL, W-MAGIC
^^^^^^^^^^^^

You will be able to use any magic spell 8 times, attacking all targets. Bliss!

~ ~

ADDED CUT = MASTER COMMAND, DOUBLE CUT (4X CUT)
^^^^^^^^^

You will be able to use 4x Cut with an added cut on the end, making it 5x Cut!

~ ~

HP ABSORB = MATER COMMAND, SLASH ALL
^^^^^^^^^

You will be able to restore HP off of each enemy every time you select Slash All.

~ ~

ELEMENTAL = ANY MATERIA that ISN'T Support Materia, Restore, or have any
^^^^^^^^^ Elemental properties

There is a 'Hidden' Element in the game that has been dubbed the '10th Element', and every single piece of Materia that doesn't have an Elemental attribute linked to it will conform to the Hidden Element, unless it is a Support Materia. Restore has it's own properties.

There are several Status changing attacks in the game that have the Hidden element, but because no direct damage is taken, it cannot be defended against. There is only one move in the game that uses Hidden that we can actually defend against by pairing Elemental with any Materia, and that is Ultimate WEAPON's 'Ultima Beam'. In the Japanese original, more of the enemies attacks used Hidden. See section E.05 C for more info.

~ ~

=-=-=-

the above are equipped to one character, then the surplus combo's would be disregarded, in chronological order that they were equipped.

- You can link duplicates of the same Magic Materia to different Support Materia for a 'combined' effect, however not all Support Materia will combine with each other:

SNEAK ATTACK:

HP Absorb ------ NO
MP Absorb ------ NO
MP Turbo ------- NO
Steal as Well -- NO
Added Cut ------ NO
All/Mega All --- YES (unless Quadra Magic is also paired)
Quadra Magic --- YES (disables All/Mega All)
(If the enemy dies before the four hits, the Quadra Magic will end)

FINAL ATTACK:

HP Absorb ------ NO
MP Absorb ------ NO
MP Turbo ------- NO
Steal as Well -- NO
Added Cut ------ NO
All/Mega All --- YES (unless Quadra Magic is also paired)
Quadra Magic --- YES (disables All/Mega All)
(If the enemy dies before the four hits, the Quadra Magic will end)

MAGIC COUNTER:

HP Absorb ------ NO
MP Absorb ------ NO
MP Turbo ------- NO
Steal as Well -- NO
Added Cut ------ NO
All/Mega All --- NO
Quadra Magic --- YES (If the enemy dies before the four hits, the Quadra Magic will end)

ALL:

HP Absorb ------ YES
MP Absorb ------ YES
MP Turbo ------- NO
Steal as Well -- YES
Added Cut ------ YES
Quadra Magic --- N/A (disables All/Mega All)

QUADRA MAGIC:

HP Absorb ------ YES (with every hit)
MP Absorb ------ YES (with every hit)
MP Turbo ------- NO
Steal as Well -- YES (with every hit)
Added Cut ------ YES (once only)
All/Mega All --- NO

So, you could pair:
All=Ice - HP Absorb=Ice - MP Absorb=Ice - Steal as Well=Ice - Added Cut=Ice

So long as all of the Ice Materia is at the same level, each Supporting effect will come into play. If all of the Ice were at Level 3, apart from the Ice paired with Added Cut which was level 2, then the Added Cut would not take effect when Ice3 is cast; only when Ice2 is cast.

\-------------------------------------------------------------------------------/

                                                        {All Lucky 7's} {Lucky 7's}
/\/\/\
```

Once the flurry of attacks has finished, the character will not leave 7777 Fever mode until his/her HP has been changed, and any subsequent attacks or healing spells made will deal 7777 HP. The initial 64-attack rampage cannot be activated twice during one battle, however a character can go into 7777 Fever more than once, attacking and healing for 7777. If two or more characters activate All Lucky 7's at the same time, then the result would still be 64 attacks, only they would be split between the characters as they take it in turns to mutilate the enemy.

If a battle finishes with a characters HP still at 7777, then the game will restrict All Lucky 7's re-usage by bringing your HP down to 1. Be very mindful of this. Also, if an enemy were to enter into 7777 Fever then it may be wise to flee from battle as you would be in grave danger of being wiped out; the enemy cannot initiate the 64-attack bombardment, but they will hit for 7777 each hit. Lastly, should you enter into 7777 Fever whilst Poisoned then you would instantly kill yourself, as the Poison damage would inflict 7777 HP.

NOTE - The only battle in the game that disables All Lucky 7's is the final battle against Sephiroth.

- Thanks to GarladTheGreat for this tip:
If you enter the Battle Square with 7777 HP, then you will open up the first battle with All Lucky 7's activated, although it will disengage for the second battle. However, as soon as you select any command that command will play out, then 7777 Fever will re-activate!

The bonus to this is the fact that the "7777 Fever" check occurs *after* the check for Mini, which means that if you get hit with the Small handicap, you'll still deal 7777 worth of HP with each hit.

HOW TO ACTIVATE ALL LUCKY 7'S

There are 6 methods that I know of to enable 7777 Fever (all credit for the final 2 methods goes to James Baxter):

```
 /  , , ,
```

Aire Tam Storm in three different circumstances:

- After opening its eyes, it will use Emerald Beam, Eyes x8, Emerald Beam, Eyes x4, Aire Tam Storm. Try to keep one yellow eye alive.
- After using Revenge Stamp 10 times.
- As a counter attack to Knights of The Round if its HP is less than 50% after the summon has finished. Eyes must be open.

```

|                                                                             |
| xx77                                                                        |
|                                                                             |
| All of the following methods for activating All Lucky 7's require you to    |
| understand something that's relatively simple to grasp: If the final 2     |
| digits of your current HP were to land on 77 (xx77), and your HP was lower |
| than 7777, then you would be able to bring your current HP to 7777 by       |
| using Potions and Hi-Potions.                                               |
|                                                                             |
| All references to xx77 will be displayed as '77.                            |
|_____________________________________________________________________________|
```

3.) Mini

Equip one player with Manipulate, and the other two with Enemy Skills with Goblin Punch on them (unless your characters are not the same level as each other). Make sure to equip Transform onto one of the two characters with Enemy Skill. Make sure not to have Mega-All or Slash-All equipped on these two characters, and make sure their Limits are not full. Speed the Battle Speed up to the max, and make sure that each players current HP is lower than 7777 (equip HP<->MP then un-equip it).

Enter into a random encounter and then use Manipulate on one enemy whilst killing the rest. Then, cast Haste if you wish, otherwise inflict Mini on the two characters that aren't manipulating (you can also use Shrivels). If your characters are the same level as each other then you can use Goblin Punch for 8 HP worth of damage every hit, otherwise just attack normally for 1 HP until they reach '77.

4.) Cat's Bell

The Cat's Bell will recover 2 HP per step that you take. You could use this to make the final 3 digits land on 154, 354, 554, 754 or 954. Then, enter into battle making sure to either have Demi2 equipped, or the Laser Enemy Skill. Cast either move, and your HP will be reduced by 50%, landing on '77.

```

ALL CREDIT FOR THESE FINAL TWO METHODS GOES TO JAMES BAXTER. Please refer to his 7777 FAQ on GameFaq should you wish to view the source of the following data. Used with permission.

5.) Modifying the 'Base' Max HP

Using the HP Data Table below, you will be able to modify your Max HP to

reach '77. Firstly, you must find your 'Base' Max HP (or Base HP). To do that you must first remove any Materia from a character that would modify their HP. If your character's Base HP is below 3889 (around Level 50) or above 9970, then you will not be able to modify your HP to reach '77.

Next, equip the relevant Materia modifiers required to reach '77. For example, if your Base HP was 5254, then your entry would appear as:

 5254 : +29% -11% -70% |

To reduce your Base HP by 11%, you would need to equip Magic or Summon Materia that reduce your HP. The 3 variations of the - modifiers are -2%, -5% and -10%. So, 3 Materias would be required: 1x -5% and 2x -2% to reach -11%.

To increase your HP by 29%, you would need to use HP Plus Materia, which will raise your Max HP by 10%, and then 10% thereafter with each level that the HP Plus gains, for a maximum of 50%. These can stack for a total of 100%. So, either using a combination of 4 Lv 1 HP Plus's, or one Lv4 HP Plus, you can bring your Max HP up to 40%, then you can bring your HP down by -5% followed by 3x -2% to reach +29%.

 Recommended Materia quantity for each modifier:
   2x HP Plus Mastered OR 10x HP Plus Lv 1
   6x -10% modifiers
   7x -5% modifiers
   8x -2% modifiers

Once you have obtained an xx77 figure for your Max HP, you must then bring your current HP to Max HP if it isn't already (X-Potion, etc.) Then, making sure that no adjustments are made to any Materia that could reduce your Max HP, remove the -% modifiers until your Max HP is above 7777. As mentioned, you can then use Hi-Potions and Potions to bring your HP up to 7777 (or 7767 if you wished to activate Lucky 7's mid-battle).

Of all 6111 possible Base HP values above (and including) 3889, 75% (4548) can be modified to reach '77. If you find that your Base HP value isn't listed, then refer to method 6:

6.) Modifying the 'Base' Max MP, then using HP<->MP

Quite simply, refer to the MP Data Table to find the required modifier to manipulate your Base MP as so that you can reach x77. Then equip and un-equip the HP<->MP Materia to bring your HP down to your MP, provided that your current HP was higher than your Max MP to begin with.

You cannot do this if your Base MP is higher than 977, as there are no modifiers that decrease MP. The only + modifiers are +2%, +5%, and +10%. MP Plus will increase your Max MP by multiples of 10%, up to 50% as per the level of the Materia. Effects can stack up to 100%.

You also cannot do this if your Base HP is lower than 3889, as the most you can increase your HP by is 100% (7777 / 2 = 3888.5). Because of this, there will be no listings for Base MP lower than 300, as you cannot have more than 300 Base MP with less than 3889 Base HP. Of all 678 possible Base MP values between 300 and 977, 310 (46%) can be modified to reach '77.

Again, all credit for the data contained within the following charts goes to James Baxter; I have simply consolidated the information to make it more aesthetically pleasing, and to take up less space. None of the calculations

are my own.

HP '77 DATA TABLE

<+25%> = If you see a figure presented this way then it means that you can jump directly to 7777! There are 104 varying Base HP values that can do his.

{W-Item Trick}

```
/\/\/\
```

2 - Extended W-Item Trick

This is slightly more tricky method than the normal W-Item trick, and it allows you to duplicate items that aren't usable in battle, such as Sources and Weapons. There are a few variation to the way the trick works.

--- STEALING/MORPHING ITEMS FROM MULTIPLE ENEMIES ---

First make sure that you have *one* expendable item at the top of the inventory list (such as a Potion), then make sure that you have 0 of the item you wish to duplicate. For my example, I'm going to be duplicating Power Sources from the Screamers in Mt. Nibel. Note that using Yuffie's Conformer is the best way to Morph an enemy.

NOTE - This trick works best when faced with multiple enemies. You can still dupe items from single enemies, however it's a lot trickier and takes much longer to set-up.

Set Yuffie up with Morph, Cloud with Manipulate and player 3 with W-Item. You can only battle the Screamer on the winding path leading towards the reactor, or at the reactor itself (you'll have a higher chance of encountering them at the reactor). When you encounter them, kill off all but the two Screamers, then Manipulate one of them.

Now have Yuffie cast Morph. Before the move is executed, have player 3 use W-Item, and use the single Potion as your first item. Now wait for the Screamer to be Morphed into a Power Source. If done correctly, the Power Source will fill the same inventory slot that was occupied by the Potion. You can now select and cancel another item, thereby duplicating the Power Sources up to 99.

For Magic Sources you can encounter 2x 8 Eye in the Battle Arena in round 3. For this battle you must set Yuffie up with Counter=Morph. It is imperative that you cast Stop, Sleep or Paralyzed on one of the 8 Eyes. When the other attacks, select the single Potion then wait for Yuffie to counter with Morph. So long as the other 8 Eye cannot attack, you will be able to dupe yourself 99 Magic Sources.

Luck Sources and Speed Sources can be duped from Bad Raps and Poodlers, respectively (Sunken Gelnika), and Guard Sources can be duped from the Spiral near Mideel. Mind Sources are the hardest to farm seeing as they can only be obtained from the Serpent (once you've obtained the W-Item Materia), and they only ever come in single formations.

--- STEALING/MORPHING ITEMS FROM SINGLE ENEMIES ---

First make sure that you have *one* expendable item at the top of the inventory list (such as a Potion), then make sure that you have 0 of the item you wish to duplicate. For this example I am going to be morphing Mind Sources from the Serpent on the Sunken Gelnika. Set Cloud up with Final Attack=Revive and Quadra Magic=Revive. Set Yuffie up with Final Attack=Morph, and lastly set player 3 up with W-Item. *MAKE SURE* that Yuffie is player 1 (at the top) so that she uses Morph before Cloud uses Life2.

Enter into battle with the Serpent. Make sure that Cloud's and Yuffie's HP

are in critical, then start bringing the Serpent's HP down using L4 Suicide; It is more likely to cast Aqualung that way. The idea is to have Cloud and Yuffie KO'd at the same time. Yuffie will then retaliate by Morphing the Serpent into a Mind Source, and Cloud will cast Life2 four times.

Prior to Yuffie using Morph, make sure that player 3 is sitting in the W-Item screen with the Potion 'used', awaiting input of the second item. If done correctly, the Potion's inventory slot will be filled with the Mind Source, you will then have time to dupe yourself 99 of them while Cloud casts Life2.

The Serpent's attacks are dependent on your party's average current HP and the Serpents Current HP. If the Serpent's HP is:
- 0% - 20% of party's current HP, Dragon Dance is used.
- 21% - 40% of party's current HP, Huge Tidal Wave is used.
- 41% - 80% of party's current HP, Aqualung is used.
- 81% - 100% of party's current HP, Viper Breath is used.

Using L4 Suicide and Cure, you should be able to regulate the Serpent's HP until it uses Aqualung.

NOTE - If you happen to be playing on a Playstation console, then you can simply open the lid, thereby not allowing the battle to finish. This way you can dupe the Source without having to go through the Final Attack method.

--- HAVING ITEMS STOLEN FROM YOU ---

This works similarly to the previous two methods, only this way could take much, much longer seeing as an element of luck is involved. The plus side is that you will be able to duplicate *almost* any piece of armour, accessory or weapon using this method.

Similar to the previous methods, you must have *one* expendable item at the top of your inventory list (such as a Potion), and only one of the item that you wish to duplicate in your inventory. For this example I am going to be duplicating myself 99 Mystiles. First I'll make sure to have equipped all but one Mystile, then I'll get into battle with an enemy that can steal from me. These locations include:

- Vice, Sector 5
- Prowler, Midgar Area (World Map)
- Magic Pot, Swamp Area North Crater.

The Bandit can also steal from you, however you cannot reenter Corel Prison.

I shall be battling the Vice in Sector 5. Be sure to encounter them in their 2x formation, they'll only be found in the first 2 screens from the church. Manipulate one and wait for the other to steal from you, if you are lucky then it will steal the item that you wish to dupe. Now kill it to have your item returned to you, but not before having the player with W-Item select the Potion. When the item is returned to you you'll be able to duplicate yourself 99 of the item. You'll be able to stock up on Potions easily in Sector 5, aswell as save your game.

If you had more than one of the desired item in your inventory, then you would not be able to duplicate it seeing as it would return to the inventory slot it came from, as opposed to filling up the inventory slot that was occupied by the Potion. The following items *cannot* be duplicated this way:

- ALL Limit Break Manuals

- Battery
- Save Crystal
- Combat Diary
- Autograph
- Gambler
- Desert Rose
- Earth Harp
- Buster Sword
- Gatling Gun
- Seraph Comb
- Silver Barrette

Basically, if a weapon/item can be sold at a shop, then it can be stolen from you. Technically speaking Sephiroth's Masamune should also be on the above list, as it cannot be sold a any shop, although there is no way to obtain the Masamune on your inventory without the use of hacks.

--- THROWING WEAPONS ---

Using the same methods as above, you can have one character kill another mid-battle. Before the character is killed, have him/her use the Throw command to throw one of your valuable weapons, then quickly have the W-Item holder use up the single Potion. When the character is K.O'd, the weapon will be returned to the first empty available slot, unless you had more than one to begin with. The best way to kill off a character is to have another character use W-Magic and Contain.

--- STEALING 198 ITEMS ---

It is possible to fill two inventory slot with the same item, thereby being able to hold up to 198 of that particular item. The main condition is that the item is steal-able or morph-able. For this example I'm going to be stealing an Elixir from the Gighee in the Swamp Area in the North Crater.

Equip one player with Steal and another with W-Item. Make sure to have the top item slot filled with a single Potion, and the second from the top being the Elixir. It is important that the Potion is above the Elixir, and that you also only have one Elixir in stock.

During battle, use up the Potion, then have your character Steal the Elixir from the Gighee. Before the item is added to your stock, have the W-Item holder use up the single Elixir that is in your inventory. When the Elixir is stolen, the top inventory slot will be filled with the new Elixir. You can the dupe yourself 99 Elixirs in the second slot, then use the normal W-Item trick to dupe another 99 Elixirs in the top slot.

{Easter Eggs}

/\/\/\

game *that does not affect gameplay whatsoever*. Remember playing Legend of Zelda Ocarina of Time? When you sneak into Zelda's castle you can see pictures of Mario and friends in the windows. A classic Easter Egg.

Now it appears as though an Easter Egg can have an impact on your gameplay (usually for the better) and still be regarded as an Easter Egg. Cod Zombies is a perfect example. Most of the following Easter Eggs do not affect gameplay, although one or two of them do. Technically speaking, an Easter Egg is always an intentional addition, unlike a glitch which is not intentional!

Lucky 7's falls into the category of an Easter Egg.

{Secret Cow Level}

```
 /  , , ,
```

There are still attacks that can hit you from behind causing
double damage, namely when you have been attacked form both sides.

{Stamina Refill Easter Egg}

```
 /  , , ,
```

Hades).

I suspect that the morphing abilities of the Conformer were unintentional, but given the fact that the developers were unable to fix it, they decided to work it into the mechanics of the games 'reward system', which is why the Conformer is found in the same place where Sources can be morphed. Just a speculation.

Other places that Sources can be morphed:

```
  Power Source: Heavy Tank    - 1600 HP   - Gongaga Reactor
                Screamer      - 800 HP    - Mt. Nibel Reactor Exterior

  Guard Source: Bagnadrana    - 450 HP    - North Corel Reactor
                Spiral        - 2800 HP   - Mideel Area Grass & Dirt
                Armored Golem - 10,000 HP - North Crater Left Lower Fork

  Magic Source: 8 eye         - 500 HP    - Battle Square (1000 HP)

   Mind Source: Dragon Rider  - 3500 HP   - Battle Square (7000 HP)
```

When Source farming, it is important to know what weapons to equip, as a lot of weapons will boost your character's raw stats making it difficult to determine what your actual stats are.

Here are the optimal weapons to equip:

```
Cloud     - Nail Bat
Barret    - Gatling Gun, Drill Arm, Rocket Punch or Pile Banger.
Tifa      - Leather Glove, Work Glove, or Master Fist.
Aeris     - Guard Stick or Mythril Rod.
Red XIII  - Magic Comb
Yuffie    - 4-Point Shuriken
Cait Sith - Battle Trumpet
Vincent   - Silver Rifle
Cid       - Mop
```

It is also worth noting that the easiest way in which to amass large quantities of Sources in a short amount of time is to utilise the Extended W-Item Glitch as listed above.

Just for reference:

```
Power Source: Raises Strength
Guard Source: Raises Vitality
Magic Source: Raises Magic
 Mind Source: Raises Spirit
Speed Source: Raises Dexterity
 Luck Source: Raises Luck
```

```
                                                                {Red Submarine}
 /  , , ,
```

through Junon's underground pathways on your way to the Reactor? Have you also ever wondered what would've happened if you had failed the underwater mini game in which you had to sink the Red Sub? Well, aside from losing the Huge Materia, you would also lose the Grey Submarine, which means you wouldn't be able to access the Sunken Gelnika, fight Emerald WEAPON, or obtain the key to the Ancients.

Wait a minute, wouldn't that prevent you from finishing the game? Well, technically no, seeing as you would be able to obtain the Red Submarine by re-visiting Junon's underground pathways. This time you'll have to defeat two weak Shinra Guards that are standing by the dog, once they're out of the way you can interact with the dog to open up the passageway. As with the grey sub, you'll have the option to take the crew on board as hostage.

The red Submarine looks cool, and in my opinion it should've been the main sub, and the Grey Sub should've been the secondary sub. Oh well. In the Red Sub you'll be able to do everything that you could've with the Grey Sub, aside from getting the Huge Materia.

'    Aeris: "Let's go, Cloud."                                             '
'_ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _|
```

It is impossible to reveal Aeris's bonus dialogue without using some sort of cheat device, however you can raise Tifa's affection to above 120 by making use of the exploit as listed below.

Additionally, if Tifa's affection rating is above 50 after the Midgar Events on Disc 2, then a very slightly different scene will play out during the time Cloud and Tifa spend together.

What isn't very well known about is the dummied out content that was supposed to have taken place just outside of Gongaga village, on the same screen as the Deathblow Materia. This would have occurred after Cloud had remarked "A ruined reactor", had Barret in your party, and you had spoken to at least one

NPC within Gongaga.

```
 _  _  _  _  _  _  _  _  _  _  _  _  _  _  _  _  _  _  _  _  _  _  _  _  _  _  _
'                                                                               '
' Barret:                                                                       '
'                                                                               '
'   BARRET: "The Shinra build reactors to make money. And this is what         '
'             happens.                                                          '
'            You saw that village. It's always the powerless that get           '
'             victimised by tyrants like Shinra.                                '
'            The one's with the power control those without it. That's just     '
'             the way of the world now.                                         '

```

the game *un-intentionally*. Some of these glitches can be used to our advantage, and some of these glitches hinder us. The following are glitches that we can exploit to our benefit.

The W-Item glitch falls into the category of an exploit.

{Underflowing HP}

```
 /  , , ,
```

the screen, and repeat the process to continually boost his rating by 3. When you do choose option 1 on the second choice, you'll increase Barret's affection by another three, and the glitch will no longer be exploitable.

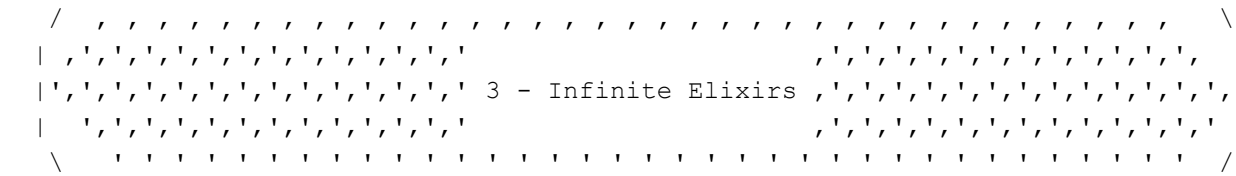
Do not spam this too heavily if you are trying to obtain the Best Bromance Trophy, as doing so will prevent the trophy from popping.

YUFFIE:

When you recruit Yuffie, you will have 5 dialogue choices, each correct answer boosting her affection towards you by two. When you correctly answer the fifth choice, she will have joined your party and you won't be able to make use of the exploit. Instead, purposely fail the fifth choice, then battle her again to repeat the process. You cannot raise her affection more than 30 by doing this, which means that you can only repeat this twice before recruiting her as normal.

See section E.07 for more info on the recruiting process.

{Infinite Elixirs}

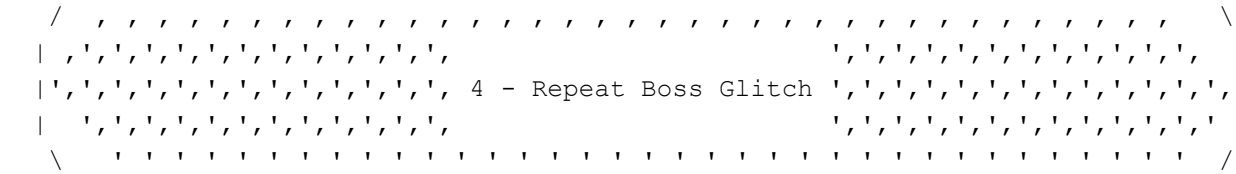


Normally, when you pick up an item the main playable character is frozen, and the menu is disabled. Then you'll hear the sound effect, followed by the item being added into your inventory. Then a flag is enabled which signifies the item has been picked up, and then the text box appears. When you close the text box, the item disappears and you regain full control.

In the case of the Elixir and the Potion in the Great Glacier, this is not the case. The first thing that takes place is the item is added to your inventory, as opposed to disabling control of the character and menu. Then you hear the sound, then you receive the text box, but because you can still move your character, you can simply leave and re-enter the screen to repeat this process as many times as you like. So long as you don't press confirm to close the dialogue box, the Elixir/Potion will not be removed from the field.

The Mind Source has a similar bug, where movement will not be disabled when you pick it up, although the item isn't programmed to add itself to your inventory until after you close the dialogue box, so if you were to exit and re-enter the screen again the item would still be there, but your Mind Source count will still be the same.

{Repeat Boss Glitch}



Confirmed to work on all version of Final Fantasy VII (including the PS4 version), you can if you wished to fight any boss in the game twice consecutively, with the exception of Emerald, Ruby, Diamond and Ultimate WEAPON (basically, only Bosses that can be fought on a *field* map can be fought twice). This is particularly useful for grabbing battle spoils more

than once, especially for obtaining duplicates of valuable items.

How is this trick performed?

Firstly, you must save your game then reset. Then enter into a field screen that contains enemies and you will eventually will engage in a 'random' encounter. Exit the battle and take not of your position on the field screen. Now reset the game. If you now follow the precise route that you took previously, you will notice that you will engage in the encounter in the *exact* location you did previously (technically speaking, you've travelled the exact amount of steps as you did previously).

You must press triangle to open the menu at the *exact* moment the battle is supposed to begin. If performed correctly, you will skip out the battle completely. If you engage in another random encounter before fighting a boss, then you'll have to start over, but if you manage to make it so that the next encounter is a 'forced' encounter, it will happen twice! Occasionally the music will play incorrectly, and occasionally the game will freeze up!

There are only two items that you can obtain this way that *cannot* be duped using the (Extended) W-Item Trick, and these are:

Cosmo Memory - Obtained from Lost number, fought in the Shinra Mansion. Only one extra copy can be obtained this way.

All Creation - Obtained from Godo, fought in the top floor of the Pagoda in Wutai. Due to the fact that you will not be met with a Game-Over screen should you lose the second battle, you can repeat this glitch as many times as you please. If you are trying to obtain 99 of All Creations, then remember to teach Yuffie the Limit Break in the process, otherwise you will be stuck with 98 copies if you teach it to her afterwards!

Once you have performed the repeat-boss glitch on Godo, you'll need to head back over to the Da-chao to 'skip' another random encounter, should you wish to rinse-and-repeat this glitch.

The following is a revised list of Bosses *and* enemies of interest:

* = recommended

ENEMY:	EXP:	AP:	GIL:	ITEM:
Guard Scorpion	100	10	100	Assault Gun
Air Buster	180	16	150	Titan Bangle
Sample: H0512	300	30	250	Talisman
Hundred/Heli Gunner	250	25	200	Mythril Armlet
*Bottomswell	550	52	1000	Power Wrist
*Jenova-BIRTH	680	64	800	White Cape
Dyne	600	55	750	Silver Armlet
Reno	660	60	1500	Fairy Tale
Rude	720	70	2000	X-Potion
*Lost Number	2000	80	2000	Cosmo Memory
*Materia Keeper	3000	200	2400	Jem Ring
*Palmer	1800	98	5000	Edincoat
Rapps	3200	33	20,000	Peace Ring
Gorki	1500	50	0	X-Potion
Shake	2200	50	0	Turbo Ether
Chekhov	1500	50	0	Ice Ring

Staniv	3600	50	0	Elixir	
*Godo	5000	60	40,000	All Creation	
*8 Eye (x2)	4000	400	2880	Magic Source (morph)	
*Red Dragon	3500	200	1000	Dragon Armlet	
Demons Gate	3800	400	4000	Gigas Armlet	
*Jenova-LIFE	4000	350	1500	Wizard Bracelet	
Schizo Left	2200	120	1500	Dragon Fang	
Schizo Right	2200	120	1500	Protect Ring	
Jenova-DEATH	5000	400	5000	Reflect Ring	
*CMD. Grand Horn	800	80	9600	Imperial Guard	
*Ultimate Weapon	0	0	0	Curse Ring (steal)	
Carry Armor	2800	240	4000	God's Hand	
Reno (Gelnika)	5000	300	4000	Tough Ring (steal)	
Rude (Gelnika)	5500	360	5000	Ziedrich (steal)	
*Diamond Weapon	35000	3500	25000	Rising Sun (steal)	
Rude (Solo)	3400	80	3000	Ziedrich (steal)	
Reno (Midgar)	4500	450	3000	Tough Ring (steal)	
Rude (Midgar)	5500	600	5000	Ziedrich (steal)	
Elena (Midgar)	6400	800	7000	Minerva Band (steal)	
Proud Clod	7000	1000	10,000	Ragnarok	
Hojo (all forms)	25,000	2500	6000	Power Source	

{Scene Skipping Glitch}

5 - Scene Skipping

There are a few times in the game that you will be able to skip a portion of the game out by simply holding down a specific direction on the D-Pad.

MIDGAR SKIP:

Towards the end of Disc 2, you will be required to fly over Midgar to trigger the point-of-no return for that Disc. Just prior to this however (after defeating Diamond WEAPON), you are required to fly over the North Crater to trigger a scene within the Shinra HQ involving Reeve, Scarlet and Heidegger. If you were to keep the "Down" and "Right" buttons compressed while this scene plays out, then you would find yourself at the top of the Mako Cannon, just before the Hojo battle. This works on all versions.

This glitch is only recommended for speed runners, as you would permanently be missing out on the weapons Missing Score, Max Ray, Ragnarok, HP Shout, Master Fist and Behemoth Horn amongst other great items.

https://www.youtube.com/watch?v=gU0LNohLg3w (uploaded by antdgar3)

JUNON FMV SKIP:

This glitch will only shave off about 70 seconds of gameplay, but for speed runners that's probably enough to want to know about it. On Disc 2, when Sapphire WEAPON attacks, the Mako Cannon will fire it's first shot into the distance. Just afterwards, whilst everyone is waiting anxiously to see the results, you'll have a short opportunity to hold "Down & Left" whilst running. If done correctly, you'll skip out the whole part where we see Sapphire for the first time, and instead you'll take control of Barret. Head down to the conference room to continue on with the story.

https://www.youtube.com/watch?v=22hR4HOL5us (uploaded by Xero)

{Yuffie Warping}

```
 /  , , ,
```

this glitch, as technically speaking you're *not* actually warping to that part of the game; all of the "progression" flags would still be set to where they were in the initial save file (the one you warped from). For example, let's suppose you were going to warp from a save file where you are just about to defeat Diamond WEAPON, right back to the Materia Keeper fight. After you had defeated the Materia Keeper you would find that you were still at exactly the same point in the game where you warped from; at the Diamond WEAPON fight. This is because no flags are set or unset after the Materia Keeper fight, other then that of the Materia Keeper itself.

If however you were to warp to the Guard Scorpion, then the game would (at some point) change the "Game Moment" value. Every major event that occurs will advance the "Game Moment" value by a set amount, and at various points in the game a check is performed to see what scene should be playing out based on the Game Moment value. The problem is, there are also a number of "progression flags" that are ticked and un-ticked independently of the Game Moment value, and there are times where the game calls for Game Moment, and there are times when it calls for Progression flags.

After the Guard Scorpion Fight, the Game Moment is still set at the value it was prior to warping, and all of the progression flags are still up. So, when you reach the elevator, the game thinks that you are further than you actually are, and sends you to the second reactor (the same elevator is used in both reactors). You will then be able to progress to fight Air Buster, as that fight is always scripted to happen when you reach that screen. After the fight has finished, the Game Moment value is then assigned to that part of the game, so the game plays out as it would normally, until you get to Wall Market. The game then calls for the progression flags at this stage, and all of them will already be "set", so you will not be able to trigger the events at Don's Mansion to occur, nor will you be able to make the shiny rope appear.

There are a few other bugs that occur. For example, very often when warping the music will not play properly; it'll play the soundtrack after the one you're supposed to be hearing. Also, if you've warped from one disc to another, then the FMV will play a different vid to the one it's supposed to. If a character is forced into or out of your party at certain stages then the game could get confused as to who you had as your 3rd member. Lastly, the vehicle flags will not revert back; if you warped from Disc 2 to Disc 1, then you would not be able to drive the buggy or the Tiny Bronco.

If you had missed out on Pandora's Box due the Dragon Zombie's skill power being used up, then there is a way to reset the "Pandora's Box" flag. For some reason, after Jenova Synthesis has been killed the Pandora's Box flag is then reset, meaning the Dragon Zombie will use PB once more. After you have warped to the Jenova battle, you will kill Bizarro and Safer as normal (but with some weird FMVs playing), then the game will take you to the bottom of the North Crater screen. Because Game Moment will be lower than it normally should be, the game thinks that you have entered that screen for the first time, and you will be allowed to roam as you please, effectively prior to the point of no return (so you can go off and learn Pandora's box).

This doesn't come without a price however, as you would have to refrained from recruiting Yuffie until Disc 3, which means that you won't be able to obtain the MP Absorb materia.

Benefits of using this exploit:

- Being able to obtain 99 Cosmo Memories (perfect save file).
- Being able to obtain 99 Seraph Combs (perfect save file).
- Permanently missable items can be re-obtained.

- Being able to un-check the Pandora's Box flag.
- Can enter the debug room legitimately (read below).
- Can repeat the Diamond Boss battle as many times as you please for great battle spoils.

HOW TO WARP TO THE DEBUG ROOM *WITHOUT* HACKS

What is the debug room? Read the following section to learn all about it; it's basically a 'testing' ground for the developers, and is home to a lot of cool features. Until recently, it was believed that the only way to access the debug rooms (there are more than one) was through hacks. Through elaborate use of the Yuffie Warping glitch however, it is possible to access the debug rooms legitimately. Here's how:

1) SET UP A 'GLITCHED' FILE

Before doing anything, you'll need to have 2 save file. One in which you have obtained the Highwind, and another in the Shinra HQ, before fighting Motor Ball.

1 - Load up the save file with the Highwind. Fly over to Midgar, and *remember where you park it*. Now travel by foot over to Junon Forests. Save your game here into a new slot.

2 - Now load up your other save file, and get into the Motor Ball fight. Purposely loose this battle, so that you get a game over screen.

3 - Load up the first save file, and keep battling until you encounter the Mystery Ninja. Defeat her to Yuffie warp to the Motor Ball fight. Defeat Motor Ball and escape Midgar.

4 - Now head over to the *invisible* Highwind (remember where you parked it) and then fly over to the back entrance to Mt Nibel. Before entering, be sure to have Barret and Red XIII in your party (and NOT Cait Sith, Vincent, Tifa or Cid).

5 - When you enter the back entrance of Mt. Nibel, the game will appear to have frozen. Wait roughly 10 seconds to find out that it hasn't. Once you have regained control of Cloud, leave Mt. Nibel back to the World Map and save your game into a new slot.

You now have a 'glitched' save file, in which the game will not be taken to the reward screen at the end of a battle. Some really peculiar things occur when these parameters have been set up. For example, we can now trick the game into confusing the *battle ID* for the *field ID*....

2) ENTER INTO THE DEBUG ROOM

To make things quicker, you could kill off all three party members of this 'glitched' file. Do that by first killing Red and Barret in a battle, escape from said battle, then swap out Red or Barret for someone (alive). Enter into another battle, kill Cloud, escape, then swap the alive character for the dead one. Save over this file.

1 - Enter into Mt. Nibel through the back entrance. Enter into a battle on the first screen and die.

2 - Now load up the save file that you wish to warp to the debug room from. This has to be at any point during the game *after* having obtained the Tiny Bronco.

3 - Fly over to the World Map area just outside of Mt. Nibel (Rocket Town side), and enter into a battle just outside the entrance. Defeat the enemy to warp to the field map that you had died on. Note that you could have won any battle on the world map and you would've warped to this location, however you'll need a means of transport parked outside of Mt. Nibel.

DO NOT enter into a field map from this point on.

4 - Now fly over to Junon. What you want to do now is enter into a battle with 2x Nerosuferoth (front row), and 1x Formula (back row). Keep fleeing from battles until you encounter this battle (DON'T defeat any enemies). This is battle formation # 65.

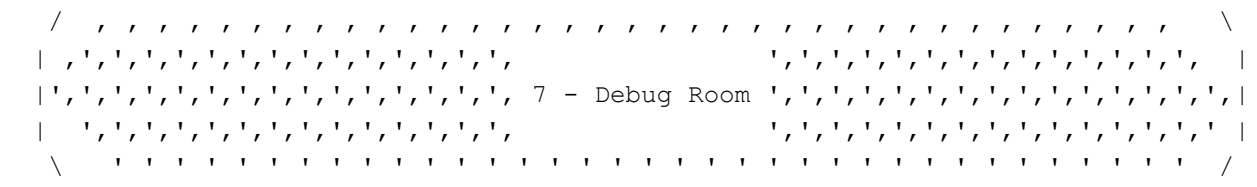
5 - Once you have fled from battle formation # 65 (2x Nerosuferoth and 1x Formula), the game weirdly assigns the battle formation ID as the field map ID to jump to on the next battle you win. So, defeat the next encounter and you will jump you to field map # 65, which is the entrance to the debug room.

Enjoy!

Battle formation 65 isn't the only ID we can utilise. In fact, as long as the battle formation is on the World Map, you can warp to any field map that shares the same ID as the battle formation that you last escaped from, and there are 264 World Map battles that can be exploited this way, which is the equivalent of Hojo's lab in terms of progression (Hojo's lab is the 264th map).

Another World Map battle ID you could use to send you into the debug room is battle # 96 - 3x Spencers and 1x Flapbeat (Gold Saucer Area). Field Map # 96 is Debug Room 5.

{Debug Room}



For information on how to enter the debug room without using hacks, refer to the above section regarding Yuffie Warping. Otherwise, you'll need to use a program such as Black Chocobo or Makou Reactor to enter the debug room.

Alternatively, the following game shark codes will warp you to the debug room:

80099F2C 0041 - EU version
8009ABF6 0041 - US version
800987F4 0041 - JAP version
8009A174 0041 - French version

Enter these codes in first, then either load a save game or start a fresh game. Make sure that you are not loading onto a world map, in fact, just stay away from the world map altogether. Now, enter into another field map and you should warp to the debug room, just remember to turn off the cheat device afterwards other wise you'll keep warping to the debug room every time you enter into a new field screen.

If the problem persists after turning off the gameshark, then try talking to Yuffie in the default room, and selecting option 2 - "MENU ON". You can now save your game. Do so, then reset to be able to explore the debug rooms without warping to the default room every time.

There is an awful lot of content contained within the debug rooms, and I don't intend to go into detail here, as it would make this section far too long. When the time comes for me to write the "Helpful Stuff" section (G.10), I will then cite every use thing there is to do within the debug rooms. For now, you should visit:

https://tcrf.net/Final_Fantasy_VII/Debug_Room

{Regen Glitch}

8 - Regen Glitch

This is perhaps the easiest exploit to perform, the downside being that it can only work on a PS1 console. During a battle, cast Regen on all party members. Then, simply open the lid of the console. The game will continue playing, however no command will be executed until the lid is closed again. Meaning, you can just sit and watch as your HP completely replenishes, whilst the enemy just sits there, doing nothing.

This glitch can also be exploited to prolong the end of a battle when using the Extended W-Item trick, specifically against the Serpent. Use QSI Link [Extended W-Item Trick] for more details (or just scroll up).

{Highwind Materia Cave Glitch}

9 - Highwind Materia Cave Glitch

This exploit is very well known about. Once you obtain the Highwind, it is possible for you to grab the Quadra Magic Materia from the Materia Cave near Mideel, prior to breeding a coloured Chocobo. It may take a few tries, but here's what you have to do:

First off, fly over to the Materia Cave near Mideel. You'll find it at the very end of the peninsula. Now make your way south-west until you get to the nearest bit of green land. Have the Highwind face directly south, and line it up with the very edge of the overhang. You must now elevate the Highwind as high as possible, then press X. As you are descending, press left and Square at the same time. If you've executed it correctly, then the Highwind will have landed on the Green verge with Cloud on the dirt area below.

As mentioned, it could take a bit of practise. Don't get excited either the very moment you land on the rocky area - very often you will get stuck, and will have to get back on board the Highwind to become unstuck.

{Master Command Glitches}

```
| ,',',',',',',',',',',',                                  ,',',',',',',',',',',',  |
|',',',',',',',',',',',' 10 - Master Command Glitches ,',',',',',',',',',',',',|
|  ',',',',',',',',',','                                  ,',',',',',',',',',',' |
 \   ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' '  /
```

This is a really cool glitch, that is definitely worth considering trying out, although it does come with a few drawbacks.

Have you ever tried to pair Added Cut with Double Cut (4x cut) to try to attack 5 times? Well, it wouldn't work. Unless, you were to pair Added Cut with Master Command, and equipped Double Cut separately. In fact, you would now also hit with an additional attack every time you used "Attack", "Slash-All", "Flash", "2x / 4x Cut", "Item" and "W-Item".

The obvious downside to this is the fact that when you use an item on a teammate, such as an Elixir, you'll also then proceed to attack that character. All Support Materia that can be paired with Master Command this way are "Added Cut", Steal as Well" and "HP Absorb"

Interestingly enough, if you were to pair HP Absorb with Master Command whilst causing damage overflow, then that character would die. Read the next section to learn all about damage overflow

{Damage Overflow Glitch}

```
 /  , , ,
```

THE BASICS:

A lot of people know about damage overflow, as it is possible to one-hit kill Emerald WEAPON this way. You *cannot* one-hit kill Ruby, as its defence is too high. When you cause damage overflow, you are actually reaching a value so high midway through the calculations, that the damage output rolls into the minus figures, which in turn increases the enemy's HP. This isn't the same as healing an enemy, as a "healing flag" is activated when using curative items.

If the enemy's HP is higher than it was prior to the attack, without the healing flag being activated, then the game assumes you to have cause enough damage to roll the enemy's HP into the minus figures, then back into the positive range (so HP overflow), and in turn kills the enemy for you, as it sees no other option.

When you cause overflow in this way you will either see one of two things: a random damage value appear over the enemies head (anywhere between 1 and 9999), OR you will see a weird arrangement of numbers and symbols. Here is the glitch in action against Emerald WEAPON:

https://www.youtube.com/watch?v=rJV4KB7F_xc

I will explain a lot more in detail exactly how this glitch works during the mechanics section, however I am going to have to spend a little bit more time now explaining more of the basics. Don't worry, I'm not going to get overly technical with formulas (yet...)

POWER:

By default, Power is always 16, which is the equivalent of 1x normal Damage. Only the Ultimate Weapons and Limit Breaks can modify the Power output, and if Power becomes 32, then the character will deal 2x normal power, if Power was 40 then they'll deal 2.5x normal Power and so on and so fourth.

ULTIMATE WEAPONS:

- Cloud, Red XIII, Cait Sith and Cid can all reach a maximum Power of 49 (3.0625x normal Power - Max HP or MP).
- Tifa can reach 64 Power (4x normal Power - full Limit Bar @ Lv 4).
- Yuffie can reach 99 Power (6.25x normal Power - her Power is always equal the enemy's level).
- Barret can reach 401 Power (25.0625x normal Power - 4,000,000 AP on weapon)
- Vincent who is the strongest can reach 521 power (32.5625x normal Power - 65,535 kills).

LIMIT BREAKS:

- Cloud's	2-2	Climhazzard can reach	70 Power	(CAN overflow)
- Barret's	2-1	Grenade Bomb can reach	54 Power	(CAN'T overflow)
- Tifa's	Lv 4	Final Heaven can reach	42 Power	(CAN'T Overflow)
- Red XIII's	Lv 4	Cosmo Memory can reach	125 Power	(CAN overflow)

```
 - Yuffie's    Lv 4 All Creation can reach          128 Power (CAN   overflow)
 - Cait Sith's Lv 2 Toy Box (Comets) can reach       80 Power (CAN   overflow)
 - Vincent's   Lv 2 Gigadunk (Death Gigas) can reach 42 Power (CAN'T overflow)
 - Cid's       2-1  Hyper Jump can reach             56 Power (CAN'T overflow)
```

Aeris's Princess Guard is the only Ultimate Weapon that doesn't modify Power, it only modifies Damage output (3x normal *damage* if 2 allies are dead), however the modification will occur after the formulas have had a chance to overflow, which is why she cannot (overflow). The same applies to the Yoshiyuki, Master Fist and Powersoul. None of her Limit Breaks deal damage.

THERE ARE *2* OCCASIONS WHERE DAMAGE OVERFLOW CAN OCCUR:

```
+-------------------------------------------------------------------------+
|                            BASE DAMAGE OVERFLOW:                        |
+-------------------------------------------------------------------------+
```

Basically, when you attack the damage figure is modified to be capped at 9999, however the cap is (almost) the final thing to occur. The *actual* damage output itself can be much higher than 9999, and if the initial *projected* damage output exceeds 262,144 HP AT BASE LEVEL (prior to modifiers such as Critical etc.), then the enemy will be killed in one-hit, ALTHOUGH overflow would have already occurred prior to 262,144 being calculated, and as such that figure cannot be reached.

This occurs after the character's Attack, Level, Power, the enemy's Defence, and the Hero Drink count have been taken into consideration, but prior to any further modification. This projected figure is referred to in this guide as *Base Damage*.

It is possible for Power to be too high (accompanied by enough Hero Drinks), thereby rolling the negative damage back into the positive, and cancelling out the BASE DAMAGE overflow altogether.

This is the earliest stage in which overflow can occur. Again, I will go into more depths how the maths behind how it works further down, but just know for now that BASE DAMAGE overflow requires *higher* Power to trigger negative damage than RANDOM VARIATION overflow (and only Barret and Vincent can cause BASE DAMAGE overflow).

The min Power required to cause BASE DAMAGE overflow is *138*

```
+-------------------------------------------------------------------------+
|                         RANDOM VARIATION OVERFLOW:                      |
+-------------------------------------------------------------------------+
```

If overflow fails to occur at BASE DAMAGE, then there is a second opportunity for overflow to occur at the RANDOM VARIATION stage, after modifiers such as Critical, Berserk and Back-Damage have been taken into consideration. The Power required for RANDOM VARIATION overflow to occur is much lower than it is needed for BASE DAMAGE overflow, and one can overflow at just *46* Power.

Due to the fact that random variance has entered the equation (the part that certifies that you don't hit with the same damage output twice), with 46 Power you will only have a chance of causing damage overflow; 49 Power will

guarantee overflow. When calculating RANDOM VARIATION overflow, you will always have a range of Power figures to play with; the lower figure is the Power req to stand a small chance of causing overflow, and the higher figure is the Power req to guarantee overflow every time.

AFTER Critical, Berserk and/or Back Damage has been considered, your damage output will need to be 524,888 to have a chance of causing overflow, or 559,025 to certify overflow.
BEFORE Critical, Berserk and/or Back Damage have been considered, the required damage to overflow could be as little as 87,381.

Most people are under the impression that only Vincent and Barret can cause damage overflow, as they are the only two that can one-hit Emerald, but due to the low Base Damage value required to trigger RANDOM VARIATION, all characters bar Aeris can overflow under the right conditions. Remember that the enemies defence plays a big part in the equation, as does the amount of Hero Drinks and damage modifiers used.

Ultimate Weapons:

Cloud, Cid, Red XIII, Cait Sith and Tifa can ONLY cause overflow by using all three positive modifiers - Critical, Berserk & Back Damage

Limit Breaks:

Only Cloud, Red XIII, Yuffie and Cait Sith cause overflow, and they must use Critical & Back Damage (you cannot use a Limit Break whilst in Berserk).

Also, it is possible for BASE DAMAGE overflow and RANDOM VARIATION overflow to happen simultaneously, thereby negating damage overflow altogether. More below.

+---+
| DAMAGE MODIFIERS: |
+---+

It is important to understand the way in which the damage is affected. The following is listed in the sequence in which it affects the damage formula.

BASE DAMAGE:

- HERO DRINKS:
  These will raise a players Attack, Defence, Magic and Magic Defence by 30%, and can stack for a maximum of 100% (4 Hero Drinks). These values will exceed their natural caps, so a player with 255 Attack going into battle will have 510 Attack after 4 Hero Drinks.

- ULTIMATE WEAPONS:
  The Ultimate Weapons will directly affect the Power output.

- LIMIT BREAKS
  Limit Breaks will also directly affect the Power output, but WILL NOT I repeat WILL NOT stack with the Ultimate Weapons. If you use a Limit Break, then the power boost from the weapons are ignored.

- ENEMY'S DEF:
    Naturally the enemy's Defence plays a huge part in the formula, and the absolute maximum an enemy's Defence can be before overflow becomes unreachable is 421. There is only one enemy who's Def is greater than 421, and that's Ruby (480). It is impossible for overflow damage to occur against an enemy who's Def is 422 or greater, UNLESS you could fit back-damage into the equation, which is only theoretical, but even then the maximum Def would be 466.

    The 2nd highest Defence in the game is Ying, with 420 Def. It is only just possible to overflow against Ying with Vincent who has had 65,408 kills or more (cannot exceed 65,535), Lv 99, 255 Attack, 4 Hero Drinks, Critical and Berserk, and even then you would have a random chance of overflowing.

The above modifiers, along with the player's level, are the only things that affect the initial Base Damage calculation, and if overflow occurs during BASE DAMAGE, then none of the subsequent modifiers will matter (unless Critical, Berserk and/or Back-Damage cause a second overflow to occur, thereby negating the first overflow).

If Power is too low to incur an overflow during BASE DAMAGE calculations, then the following modifiers will come into play, potentially causing overflow at the RANDOM VARIATION stage:

- CRITICAL HITS:
    These will deal 2x normal damage. Having a very high Luck will help (but not guarantee) a critical hit.

- BERSERK:
    In this Status you will deal 1.5x normal damage. You can either equip a Fury Ring, cast a War Gong mid-battle, or cast Berserk from the Mystify/ Master Magic Materia.

- BACK DAMAGE:
    If you land an attack on an enemy with its back to you, then you will perform 2x normal damage. This can occur during a "preemptive strike", or a "side attack".

```
              BERSERK & BACK DAMAGE = 3x Damage Modifier
                 BERSERK & CRITICAL = 3x Damage Modifier
             BACK DAMAGE & CRITICAL = 4x Damage Modifier
    BERSERK, BACK DAMAGE & CRITICAL = 6X Damage Modifier
```

    Random Variation overflow *CANNOT* occur with just 2x Damage; 3x damage or more is required.

There are also a number of negative modifiers that will reduce the damage output. Note that the Row Check is performed after Berserk but before Back Damage; all others occur after Back Damage (in sequence). These are:

```
 (player and/or enemy) BACK ROW     = 0.5x  Damage (does not stack)
              (enemy) DEFEND       = 0.5x  Damage
             (player) FROG         = 0.25x Damage
             (player) SADNESS      = 0.7x  Damage
         (Slash-All) SPLIT DAMAGE = 0.66x Damage
              (enemy) BARRIER      = 0.5x  Damage
             (player) MINI         = 0     Damage (+1)
```

After all these modifications take place, random variation will occur, which

will modify the damage output to anywhere between 93.77% (3841/4096) and 100% (4096/4096) of normal power. It's during this calculation that we have potential for overflow, and this is the reason why we end up with a range of Power figures in which RANDOM VARIATION overflow can occur on.

NOTES - *After* Random Variation, the Elemental checks begin. Attacking an enemy that is weak to a particular Element with that Element equipped to your weapon would *not* help to cause damage overflow.

- If you had HP Absorb equipped with Master Command, then you would also kill yourself when causing damage overflow (unless you were using Limit Breaks).

- By default, you have a 16/256 (6.25%) chance of landing a "Pre-emptive Strike". This is increased by the Pre-emptive Materia,and they can stack for a total of 85/256 (33.2%) chance:

  Lv 1 Pre-emptive: +16/256
  Lv 2 Pre-emptive: +22/256
  Lv 3 Pre-emptive: +28/256
  Lv 4 Pre-emptive: +34/256
  Lv 5 Pre-emptive: +48/256

  A Lv 5 Pre-emptive Materia will also grant you an Ambush Alert bonus, which halves the chance of receiving all Back Attacks and Pincer Attacks.

  Not all battles have a "Pre-emptive Strike" chance. A list of every enemy that can be back attacked can be found below.

OK, THAT'S ENOUGH ABOUT THE BASICS, HERE'S HOW TO DO THE GLITCH FOR YOURSELF:

EMERALD WEAPON:

For reference:

Vincent:	Barret:
Power = Kills / 128 + 10	Power = AP on Weapon / 10,000 + 1
Kills = Power - 10 * 128	AP = Power - 1 * 10,000
Max = 65,535 kills (521 Power)	Max = 4,000,000 AP (401 Power)

HD = Hero Drinks

TO CAUSE *BASE DAMAGE* OVERFLOW: (No Critical or Berserk)

	MIN ~ MAX	VINCENT:	BARRET:
4 HD	213 ~ 424 PWR	25,984 ~ 53,119 Kills	2,120,000 ~ 4,000,000 AP
3 HD	236 ~ 470 PWR	28,928 ~ 59,007 Kills	2,350,000 ~ 4,000,000 AP
2 HD	335 ~ 521 PWR	49,280 ~ 65,535 Kills	3,340,000 ~ 4,000,000 AP

| 1 HD = 475 ~ 521 PWR | 59,520 ~ 65,535 Kills | 4,740,000 AP (Impossible)|
| 0 HD = 725 PWR | 91,520 Kills (Impossible) |

NOTES - If Vincent was to exceed *424* Power with *4 HERO DRINKS* (53,120 kills), then the overflowed figure would roll back into the positive range, and overflow would then be negated.

- If Vincent was to exceed *470* Power with *3 HERO DRINKS* (59,008 kills), then the overflowed figure would roll back into the positive range, and overflow would then be negated.

After the value has rolled back into the positive, with maximum Power on Vincent it would be impossible for Random Variation to then send the figure back into negative overflow, as you would need to cause back damage to Emerald as well as Critical and Berserk, which cannot happen as Emerald is always facing you.

If a lv 99 Vincent had exactly 425 Power (between 53,120 and 53,247 kills) whilst using four Hero Drinks (510 Attack), then his final damage output would be between 545 and 582 HP worth of damage against Emerald, without Critical etc.

| TO CAUSE *RANDOM VARIATION* OVERFLOW: (With Critical and Berserk) |
| VINCENT: |
4 HD = 142 ~ 151 Power	16,896 Kills (15/256) ~ 18,048 Kills (256/256)
3 HD = 157 ~ 168 Power	18,816 Kills (4/256) ~ 20,224 Kills (256/256)
2 HD = 222 ~ 238 Power	27,264 Kills (1/256) ~ 29,184 Kills (256/256)
1 HD = 317 ~ 338 Power	39,296 Kills (12/256) ~ 41,984 Kills (256/256)
0 HD = 484 ~ 516 Power	60,672 Kills (7/256) ~ 64,768 Kills (256/256)
BARRET:
4 HD = 142 ~ 151 Power	1,410,000 AP (15/256) ~ 1,500,000 AP (256/256)
3 HD = 157 ~ 168 Power	1,560,000 AP (4/256) ~ 1,670,000 AP (256/256)
2 HD = 222 ~ 238 Power	2,210,000 AP (1/256) ~ 2,370,000 AP (256/256)
1 HD = 317 ~ 338 Power	3,160,000 AP (12/256) ~ 3,370,000 AP (256/256)

NOIES - Bear in mind that Random Variance will randomly deplete your damage output by as little as 0% and as much as 6.23% (so you're hitting for between 93.77% and 100% of normal power), which is why there is a range of Power values in which you'll have a chance of causing overflow (but not definitely).

- It is *impossible* to cause overflow at the RANDOM VARIATION stage with just a critical against Emerald, as your Power would need to be higher that 213 to do so, which means that the damage would have already overflowed at base level.

Here is where it starts to get really interesting:

There is an overlapping set of Power values, where if you were to cause overflow at BASE DAMAGE level against Emerald, *as well* as hitting for a critical hit and being in Berserk, you would also trigger an overflow at the RANDOM VARIATION stage, which would then in turn out cancel out the overflow altogether!

```

| 2 HD = Between 335 - 431 Power, or 3,340,000 - 4,000,000 AP  (100% Chance) |
|____________________________________________________________________________|
```

NOTE - You would keep hitting Emerald for 9999 HP, until one of your Critical hits failed, in which case BASE DAMAGE overflow would then kill Emerald un-interrupted.

There is actually another point in the calculations in which overflow could occur at the random variation stage, possibly even two, however they are not necessary to cite, and can be quite difficult to work out, especially when base damage overflow and random variation overflow occur simultaneously.

I have to start using formulas now. Sorry!

```
+----------------------------------------------------------------------------+
|                                  VINCENT:                                  |
+----------------------------------------------------------------------------+
```

```
 ____________________________________________________________________________
|                                                                            |
| DEATH PENALTY: Power = [Power * [Vincent's Kills / 128] / 16] + 10         |
|                                                                            |
|    simplified: Power = [Kills / 128] + 10                                  |
|                Kills = [Power - 10] * 128                                  |
|                Max   = 521 Power (65,535 kills)                            |
|____________________________________________________________________________|
```

Well, technically speaking, Vincent's power level will max out at 65,408 Kills (511 * 128 = 65,408). Every 128 kills that Vincent gets increases his Power by 1.

```
  With       0  kills Vincent's Power =  10  (62.5%    of regular damage)
  With     768  kills Vincent's Power =  16  (100%     of regular damage)
  With   2,816  kills Vincent's Power =  32  (200%     of regular damage)
  With   4,992  kills Vincent's Power =  49* (306.25%  of regular damage)
  With   6,912  kills Vincent's Power =  64  (400%     of regular damage)
  With  11,392  kills Vincent's Power =  99  (601.88%  of regular damage)
```

  * The reason I've chosen 49 Power instead of 48 is because Cloud, Cid, Cait Sith and Red XIII can all reach 49 max Power. Tifa can reach 64. Yuffie can reach 99.

The creature with the lowest Defence is the Bizarre Bug, which has 0 Def whilst in its flying mode. It is also possible to land a Back Attack against them, meaning that they are the creature that require the lowest Power (46) to cause Random Variation overflow against. For Vincent, that's 4,608 kills.

The lowest Power required to cause Base Damage overflow is 138. Against the flying Bizarre Bug (0 Def) requires 16,384 kills.

Vincent cannot cause overflow using a Limit Break.

Vincent can overflow on every single enemy in the game except for Ruby. It is possible to check how many kills Vincent has. *Remember*, unless otherwise stated, all calculations assumes Lv 99 and 255 Attack:

 - Against the Master Tonberry.

    The Master Tonberry will counter attack every other time it is hit with Everyone's Grudge. The formula for this attack is quite simply:

    [Number of Enemy's Killed by Target] * 10

    So this is only good for measuring the first 1000 kills, after that you'll have to use Ruby Weapon.

 - Against Ruby Weapon.

    Given the fact that Ruby has incredibly high Def (480), we can calculate how many kills Vincent has by dealing a regular, normal attack with absolutely no modifiers such as Hero Drinks, Berserk etc (other than Critical):

     NOTE - Given the way in which Random Variation works, your kill count could be as little as 128 and as much as 2304 LESS than the figures shown below; the higher the Power, the higher the value could be out by.

Ruby Weapon Damage / Kill Ratio (No modifiers)			
No Critical:	Critical:		
424 ~ 453 HP	849 ~ 906 HP	384 ~ 511 Kills	13 Power
555 ~ 592 HP	1110 ~ 1184 HP	896 ~ 1,023 Kills	17 Power
947 ~ 1010 HP	1894 ~ 2020 HP	2,432 ~ 2,559 Kills	29 Power
1600 ~ 1707 HP	3201 ~ 3414 HP	4,992 ~ 5,119 Kills	49 Power

2222 ~ 2370 HP	4444 ~ 4740 HP	7,424 ~ 7,551 Kills	68 Power
2876 ~ 3067 HP	5752 ~ 6134 HP	9,984 ~ 10,111 Kills	88 Power
4150 ~ 4426 HP	8300 ~ 8852 HP	14,976 ~ 15,103 Kills	127 Power
5425 ~ 5786 HP	9999 HP	19,968 ~ 20,095 Kills	166 Power
6700 ~ 7145 HP	9999 HP	24,960 ~ 25,087 Kills	205 Power
7974 ~ 8504 HP	9999 HP	29,952 ~ 30,079 Kills	244 Power
9249 ~ 9864 HP	9999 HP	34,944 ~ 35,071 Kills	283 Power
37,888+ Kills = 9999 HP Always (306 Power)			

You cannot measure your kill counted once it exceeds 37,888 without using negative modifiers, so if you wanted to continue to measure your kill count past this point then you would have to start using:

Sadness = 0.7x normal damage
Frog = 0.25x normal damage

Remember that there is a greater range of variation in which you kill could be out by (LESS than the values shown).

Ruby Weapon Damage / Kill Ratio (With Modifiers)

Sadness:	Frog:		
7366 ~ 7856 HP	2630 ~ 2805 HP	39,936 ~ 40,063 Kills	322 Power
8258 ~ 8807 HP	2949 ~ 3145 HP	44,928 ~ 45,055 Kills	361 Power
9151 ~ 9759 HP	3268 ~ 3485 HP	49,920 ~ 50,047 Kills	400 Power
9999 HP	3586 ~ 3825 HP	54,912 ~ 55,039 Kills	439 Power
9999 HP	3905 ~ 4165 HP	59,904 ~ 60,031 Kills	478 Power
9999 HP	4224 ~ 4505 HP	64,896 ~ 65,023 Kills	517 Power
65,535 kills is the maximum = 4256 ~ 4539 HP (521 Power)			

Again, Random Variation may throw you off here by as much as 4351 kills! You could deal 4256 HP with as little as 61,184 (488 Power). It's very difficult to know when you've maxed out Vincent; you'll know definitively if you've reached 65535 kills when you manage to hit Ruby whilst in Frog for 4539 HP, but you'll only have a 1/256 chance of that happening. It is also possible to measure your kills against Ying.

Of course, we are talking about absurd amount of kills with Vincent to reach his maximum damage potential, and only the hardcore or the hackers will be able to see Damage Overflow with Vincent in action. With Barret however, far less grinding is required...

BARRET:

MISSING SCORE: Power = [Power * [Total AP on Weapon / 10000] / 16] + 1

simplified: Power = [AP on Weapon / 10,000] + 1
Kills = [Power - 1] * 10,000
Max = 401 Power (4,000,000 AP)

While the Underwater Materia will gain AP even though the AP count isn't displayed, the AP that it amasses will *not* contribute to the Power modification.

Here is a list of the Materia that requires the most AP to master:

```
Knights of Round - 500,000 AP
Magic Counter    - 300,000 AP
Bahamut Zero     - 250,000 AP
Typoon           - 250,000 AP
Hades            - 250,000 AP
W-Item           - 250,000 AP
W-Summon         - 250,000 AP
W-Magic          - 250,000 AP
```

Naturally 8 KOTR Materias is the max you can boost Barret's Power by, however you'll only need a minimum of 1,410,000 ~ 1,500,000 AP to cause overflow against Emerald with 4 Hero Drinks, Berserk & Critical, or 2,120,000 AP to cause overflow with just 4 Hero Drinks.

Against the Bizarre Bug (0 Def, flying form), Barret only needs 450,000 AP on his weapon with maximum damage modification (6x). Barret can overflow against all creatures apart from Ying and Ruby Weapon.

Barret cannot overflow using any Limit Breaks

TIFA:

PREMIUM HEART: [Power * [Limit Level * Limit Bar Units / 16] / 16] + 1

simplified: Power = [Limit Level * Bar Units / 16] + 1
Max = 64 Power (Full Bar, Lv 4)

With a level 4 Limit Break and a full Limit bar, Tifa will deliver 4x regular Power. Note that a full bar constitutes as 255 units, a half filled bar is 127 units, and an empty bar is 0 units. Because of this weird formula, Tifa's Premium Heart isn't used very often as an empty Limit gauge will result in HP damage in their hundreds. If you are using the Premium Heart, then commands such as Deathblow paired with Added Cut are recommended.

The Highest Def that Tifa can cause overflow on is 144 (11/256) or 120 (100%). Tifa cannot overflow without maximum modification - Lv 99, 255 Attack, 4 Hero Drinks, Critical, Berserk and Back Damage.

Tifa cannot cause overflow using a Limit Break.

CLOUD, CAIT SITH, RED XIII & CID:

```
 _____________________________________________________________________________
|                                                                             |
| ULTIMA WEAPON: Power = [(3 * Power * Current HP) / Max HP] + 1              |
|      HP SHOUT: Power = [(3 * Power * Current HP) / Max HP] + 1              |
|  LIMITED MOON: Power = [(3 * Power * Current MP) / Max MP] + 1              |
|  VENUS GOSPEL: Power = [(3 * Power * Current MP) / Max MP] + 1              |
|                                                                             |
|    simplified: Power = [48 * Current (HP or MP) / Max (HP or MP)] + 1       |
|                Max   = 49 Power (Full HP or MP)                             |
|_____________________________________________________________________________|
```

As with Tifa, the only way in which these four characters can overflow is with maximum modification (Berserk, Critical, Back Damage, 4 Hero Drinks, Lv 99 & 255 Attack).

The highest an enemies Def can be is 32 (6/256) or 2 (100%).

Cloud, Red XII and Cait Sith can cause overflow using Limit Breaks, but not Cid (more below).

```
+-----------------------------------------------------------------------------+
|                                    YUFFIE:                                  |
+-----------------------------------------------------------------------------+
```

```
 _____________________________________________________________________________
|                                                                             |
|     CONFORMER: Power = Average of targeted enemy's Level                    |
|                                                                             |
|                Max   = 99 Power (Against Emerald Weapon)                    |
|_____________________________________________________________________________|
```

Yuffie is by far the most complicated to try to work out, as her Power is equal to the enemy's Level. If multiple hits are targeted, then an average level is taken. This gives Yuffie a maximum Power level of 99, however the greater the enemies level, the greater their Defence usually is.

After a thoroughly investigating, I can say that there are no enemies that Yuffie can overflow against using her Ultimate Weapon, although she can overflow against a number of enemies using her Lv 4 limit Break, All Creation (which has the highest Power mod of all Limit Breaks).

```
+-----------------------------------------------------------------------------+
|                                LIMIT BREAKS:                                |
+-----------------------------------------------------------------------------+
```

Remember, you cannot cause Random Variation overflow with just 2x damage, which means you need to combine Critical, Berserk and/or Back Damage. Seeing as Limits cannot be used in Berserk, you can only cause Limit Break overflow via a Critical and Back-Damage (and 4 Hero Drinks).

Cloud: 2-2 Climhazzard (70 Power)

Cloud can only just about cause overflow against an enemy that has 8 Def or lower (random chance).

Cait Sith: Slots, Toy Soldier or Toy Box (Comets) (80 Power)

Cait can overflow against any enemy that has 71 Def or lower although 42 Def or lower is req to guarantee overflow every time. Trying to get the desired slots can be a real pain though...

Red XIII: Lv 4 Cosmo Memory (125 Power)

Red can overflow against any enemies that has 230 Def (random) or 211 Def (guaranteed).

Yuffie: Lv 4 All Creation (125 Power)

Yuffie has the strongest Limit Break, and can overflow against any enemies that has 236 Def (random) or 218 Def (guaranteed).

THE MECHANICS:

I've purposely withheld on getting too technical with formulas, until now that is. If strings of binary and mathematical formulas make you squirmish, then look away; I'm going to try to explain exactly how, why and when this glitch occurs. Well, to be quite honest, you won't find it to be too overly technical if you've got a good head for numbers; I myself am not a mathematician!

During this section I am going to have to re-cap on some of the points I've already made, but I will be doing so in much greater detail than previously.

ALSO:

BDO = Base Damage Overflow
RVO = Random Variation Overflow

BINARY

If you don't know a great deal about binary architecture, then the most important thing to note for now is that 32 bits of binary hold a value range of 0 ~ 4,294,967,295 (2^32). Overflow occurs at the mid-way point; when we exceed the 31 bit integer limit (2^31), and the left-most integer rolls over from 0 to 1:

(Unsigned)
0111 1111 1111 1111 1111 1111 1111 1110 = 2,147,483,646
0111 1111 1111 1111 1111 1111 1111 1111 = 2,147,483,647
1000 0000 0000 0000 0000 0000 0000 0000 = 2,147,483,648
1000 0000 0000 0000 0000 0000 0000 0001 = 2,147,483,649

|_____|

What you're looking at is *unsigned* binary. FFVII DOES NOT use *unsigned* binary when calculating the damage formula, as the overflow glitch would not occur if it did. The reason being, when the 32 bit limit of 4,294,967,295 (2^32) was reached, the figure would simply roll back over to 0, which means you will still be dealing normal positive damage, capped at 9999.

The Damage Overflow glitch ONLY occurs when negative damage is dealt.

The ONLY way to deal negative damage is to treat the string of binary as *signed*, which is exactly how FFVII treats it. This gives us a different value range from unsigned binary: -2,147,483,648 ~ 2,147,483,647. This is how the damage value is treated when signed binary exceeds 2^31:

(Signed)	
0111 1111 1111 1111 1111 1111 1111 1110	= 2,147,483,646
0111 1111 1111 1111 1111 1111 1111 1111	= 2,147,483,647
1000 0000 0000 0000 0000 0000 0000 0000	= -2,147,483,648
1000 0000 0000 0000 0000 0000 0000 0001	= -2,147,483,647
1000 0000 0000 0000 0000 0000 0000 0010	= -2,147,483,646

With *signed* binary, the very left most bit isn't treated in the same way as unsigned binary. When the left most bit rolls over to 1, the number is then flipped as a negative, and starts counting forwards to 0 again:

Unsigned:	
0000 0000 0000 0000 0000 0000 0000 0001	= 1
0111 1111 1111 1111 1111 1111 1111 1111	= 2,147,483,647
1000 0000 0000 0000 0000 0000 0000 0000	= 2,147,483,648
1111 1111 1111 1111 1111 1111 1111 1111	= 4,294,967,295
Signed:	
0000 0000 0000 0000 0000 0000 0000 0001	= 1
0111 1111 1111 1111 1111 1111 1111 1111	= 2,147,483,647
1000 0000 0000 0000 0000 0000 0000 0000	= -2,147,483,648
1111 1111 1111 1111 1111 1111 1111 1111	= -1

So basically, the way in which all this ties in with the battle formulas in FFVII is as follows: if at any point during the calculations we exceed 2^31 (2,147,483,648), we will cause overflow to occur, and in doing so we will deal negative damage to the opponent, which will kill it instantly. What happens when you try to subtract using a minus value? You turn the subtraction into addition, and the enemy's HP is then increased. This is the reason the glitch occurs.

There are two separate occasions in which overflow can occur; once as the base damage calculations are being applied, and then again a 2nd time as random variation is being worked out (the formula that basically prevents your attacks dealing the same amount of HP every hit). It is possible for the two to overlap, thereby cancelling each other out (things start to get really complicated at that point).

With high enough values thrown into the calculations, it is possible to overflow again into the positive range (2^32), and then again into the

negative (2^32 + 2^31) and then again into the positive (2^33)

EVERY CALCULATION WILL TREAT A VALUE AS BINARY INTEGER, AND AS SUCH THE VALUE WILL *ALWAYS* GET ROUNDED DOWN WHEN USING DIVISION!!!

```
  _______________
 //               \\
 || HEALING FLAG ||
 \\_______________//
```

There are many games out there that will treat negative damage as healing. If FFVII were one of those games, then the glitch would still occur, however instead of killing the enemy in one shot, you'd be curing it instead. FFVII however *DOES NOT* use negative damage to heal an enemy. Instead, when you cast a curative spell/item, such as Cure, the game still treats this as normal damage, however a "Healing Flag" is then activated that the game recognises further into the calculation, and then flips the damage into healing damage, as well as changing the colour of the digits from white to green. This check is performed during the Elemental checks (after Random Variation), and uses the same flag as the "Absorb" Elemental resistance.

When you use a Curative spell or item, the value flips from normal damage to healing damage because every single bit (including the 31st-bit 'minus flag') is flipped; all 1's become 0's, and all 0's become 1's:

```
 ____________________________________________________________________________
|                                                                            |
|   Hi- Potion:                                                              |
|                                                                            |
|   500 = 0000 0000 0000 0000 0000 0001 1111 0100                            |
|  -501 = 1111 1111 1111 1111 1111 1110 0000 1011                            |
|____________________________________________________________________________|
```

Then 1 is added, so you end up subtracting -500 HP from the Target, thereby healing that Target by 500 HP. The game considers this to be normal, as the healing flag check has been activated.

So, when we deal negative damage to the enemy thereby increasing its HP *without* the healing flag being activated, the game then THINKS that you have done so much damage that you have basically overflowed the enemy's HP all the way past the negative 2^31 integer, and back into the positive again. At this point, the game sees no other logical option than to just kill the enemy for you.

As listed in the previous section regarding the Master Command glitches, it is possible to pair HP Absorb with Master Command to heal your HP, even when you use your basic commands, such as attack. If your damage output had overflowed into the minus figures however, then the HP that was absorbed would also be flipped. In this instance, the healing flag is up, however the player's HP is less than it was previously. Again, the game by default kills the player automatically, as it sees it as the only logical thing to do.

```
  ________
 //        \\
 || POWER ||
 \\________//
```

By default, Power is always 16, which equals 1x normal Power. The only weapons that can modify Power are the Ultimate Weapons, excluding Aeris's

Princess Guard, which Modifies Damage AFTER the calculations have had their chance to overflow. The Yoshiyuki, Powersoul and Master Fist also affect Damage and not Power, and as such cannot overflow.

Cloud and Cait Sith:	Power = (48 * Current HP / Max HP) + 1	(Max 49)
Red XIII and Cid:	Power = (48 * Current MP / Max MP) + 1	(Max 49)
Tifa:	Power = (Limit Level * Bar Units / 16) + 1	(Max 64)
Yuffie:	Power = Average of targeted enemy's Level	(Max 99)
Barret:	Power = AP on Weapon / 10,000 + 1	(Max 401)
	AP = Power - 1 * 10,000	(Max 4,000,000)
Vincent:	Power = Kills / 128 + 10	(Max 521)
	Kills = Power - 10 * 128	(Max 65,535)

NOTE - Tifa's Limit Bar units are 255 when full, 128 when half, 64 when a quarter full etc.

Limit breaks can also modify Power, however the modification will not stack with the Ultimate Weapons; if you use a Limit Break then you only gain an increase in Power from the Limit break, and the weapon's Power modifier will not be considered.

Here are the best (physical) Limit Breaks for each character:

Cloud:	Lv 2-2	Climhazzard	70 Power
Barret:	Lv 2-1	Grenade Bomb	54 Power
Tifa:	Lv 4	Final Heaven	42 Power
Red XIII:	Lv 4	Cosmo Memory	125 Power
Yuffie:	Lv 4	All Creation	128 Power
Cait Sith:	Lv 2	Toy Box (Comets)	80 Power
Vincent:	Lv 2	Gigadunk (Death Gigas)	42 Power
Cid:	Lv 2-1	Hyper Jump	56 Power

Seeing as you cannot use a Limit Break whilst in Berserk, you can only use Critical and Back Damage (combined) to cause overflow via a Limit Break. The lowest Power requirement to overflow under these conditions is *69*, and as such Barret, Tifa Vincent and Cid cannot cause Limit Break damage overflow.

BASE DAMAGE

So then, it is during this calculation that we have our first opportunity to overflow. If the damage output here is too low, then you'll have a second chance to overflow at the random variation stage.

The formula looks like this:

```
|                                                                                |
|           X = Level + Attack / 32                                              |
|           Y = Level * Attack / 32                                              |
|           Z = (X * Y) + Attack                                                 |
|           D = (512 - Target's Defence) * Z * Power  (Overflow opportunity)     |
| Base Damage = D / 8192                                                         |
|________________________________________________________________________________|
```

```
|                                                                                |
| The formula could also be displayed as:                                        |
|                                                                                |
|                                                                                |
|     Att Mod = [(Level + Attack) / 32] * [(Level * Attack) / 32] + Attack       |
|     Def Mod = 512 - Target's Def                                               |
|                                                                                |
| Base Damage = (Att Mod * Def Mod * Power) / 8192                               |
|                                                                                |
|                                                                                |
| If (Att Mod * Def Mod * Power) exceeds 2^31, overflow will occur.              |
|                                                                                |
| NOTE - "Damage / 8192" is not actually a division as such, instead it is a     |
|        "right bit-shift" by 13 (2^13 = 8192), which isn't quite the same       |
|        as division. This is the root cause of the Damage Overflow glitch.      |
|________________________________________________________________________________|
```

So then, we need to break this formula down into two parts. Let's look at "Att Mod", or "Z" calculation. As mentioned, all calculations are based on the assumption that a player is level 99, and has 255 Attack. Also as mentioned, all values are integers, and will *always* get rounded down when dividing.

```
|                                                                                |
| X = (99 + 255) / 32  = 11                                                      |
| Y = (99 * 255) / 32  = 788                                                     |
| Z = (11 * 788) + 255 = 8923                                                    |
|                                                                                |
| OR                                                                             |
|                                                                                |
| Att Mod = [(99 + 255) / 32] * [(99 * 255) / 32] + 255 = 8923                   |
|________________________________________________________________________________|
```

Remember, a Hero Drink will increase your Attack by 30% with each use (non-compounding). So, 1 Hero Drink = 1.3x Attack; 2 Hero Drinks = 1.6x Attack; 3x Hero Drinks = 1.9x Attack; and finally 4 Hero Drinks caps your Attack at 200%.

```
|                                                                                |
| HERO DRINK MODIFICATION:                                                       |
|                                                                                |
| 4 Hero Drinks  =  510 Attack  =  30,473 ATT MOD                                |
| 3 Hero Drinks  =  484 Attack  =  27,430 ATT MOD                                |
| 2 Hero Drinks  =  408 Attack  =  19,338 ATT MOD                                |
| 1 Hero Drinks  =  331 Attack  =  13,643 ATT MOD                                |
| 0 Hero Drinks  =  255 Attack  =   8,923 ATT MOD                                |
|________________________________________________________________________________|
```

So, we can now move onto the next stage of Base Damage calculation, which is where overflow will occur. This happens when (Att Mod * Def Mod * Power) is equal to or greater than 2^31 (2,147,483,648).

IF overflow hadn't occurred after exceeding 2^31 (because *unsigned* integers were being used), then you would have been looking at a *projected* base damage output of 262,144. (2,147,483,648 / 8192 = 262,144)

Let's work backwards, assuming that Vincent has used 4 Hero Drinks (30,473 Att Mod), and has had 65,535 kills (521 power) to work out what the highest enemy's Def Vincent can cause BDO on:

```
 ____________________________________________________________________________
|                                                                            |
| Highest Defence Vincent can cause BDO against:                             |
|                                                                            |
| 2,147,483,648 / 30,473 / 521 = 135 + 1 = 136                               |
| 512 - 136 = 376                                                            |
|____________________________________________________________________________|
```

376 is the highest Def in which Vincent can cause BDO on. Remember that RVO requires less Power to activate than BDO. Also remember that you'll *always* need to add 1 to the figure as shown above when calculating the *minimum* value (but not the max value). This is due to the fact that integers always get rounded down.

The last thing to talk about is the range in which BDO occurs. Naturally we will overflow if (Att Mod * Def Mod * Power) is equal to or greater than 2^31 (2,147,483,648), but what happens when it exceeds 2^32 (4,294,967,296)?

Let's look at Emerald Weapon:

```
 ____________________________________________________________________________
|                                                                            |
| Overflowing against Emerald into the negative:                             |
|                                                                            |
| Emerald Weapon's Def = 180.                                                |
|            512 - 180 = 332 Def Mod                                         |
|         4 Hero Drink = 30,473 Att Mod                                      |
|                                                                            |
| 2^31 (2,147,483,648) / 332 / 30,473 = 212 + 1 = *213* (Remember to add 1)  |
|____________________________________________________________________________|
```

213 is the Power required to cause Base Damage Overflow against Emerald. BUT:

```
 ____________________________________________________________________________
|                                                                            |
| Overflowing against Emerald back into the positive:                        |
|                                                                            |
| 2^32 (4,294,967,296) / 332 / 30,473 = *424* (DO NOT add 1 here)            |
|____________________________________________________________________________|
```

The range of Power values in which overflow will occur on against Emerald (using 4 Hero Drinks) is 213 - 424. If your Power is 425 or more, you will roll over back into the positive range. Vincent with 425 Power (53,120 kills) and 4 Hero Drinks (30,463 Att Mod), will deal between 545 and 582 HP worth of normal damage to Emerald, without other modifiers such as Critical or Berserk affecting the formula.

Against very low levelled enemies such as the Bizarre Bug (0 Def in its flying form), it is possible to overflow into the negative again, past 2^32 + 2^31 (6,442,450,944). In fact, the figure (8,128,733,696) falls just short of 2^33 (8,589,934,592); IF it had exceeded 2^33, then it would overflow AGAIN into the positive.

```
 ____________________________________________________________________________
|                                                                            |
| Let's figure out when overflow would occur a third time against the        |
```

| Bizarre Bug in its flying form (0 Def = 512 Def Mod) to send the figure |
| back into the negative, shall we: |
| |
| 2^32 + 2^31 (6,442,450,944) / 30,473 / 512 = 412 + 1 = 413 |
| 2^33 (8,589,934,592) / 30,473 / 512 = 550 (don't add 1) |

Seeing as Barret maxes out at 401, only Vincent can overflow a third time at BDO level back into the negative value range (413 Power or more). Vincents Power cannot exceed 521, therefore he cannot exceed 2^33, and cannot then overflow back into the positive once more.

Remember, as mentioned, when you throw RVO into the mix, you reach values as high as 24,290,918,400 (11 cycles of 2^31). Things start to get *really* complicated when BDO and RVO overlap each other.

So, to summarise Base Damage overflow:

| MAX Defence stat Base Damage can overflow on: |
| |
| Vincent = 376 (2^31 / 30,473 / 521 = 135 + 1 = 136) (512 - 136 = 376) |
| Barret = 336 (2^31 / 30,473 / 401 = 175 + 1 = 176) (512 - 176 = 336) |

| MAX value reached during Base Damage calculations (against 0 Def): |
| |
| Vincent = 8,128,733,696 Overflow x 3 (negative; 2^31 flag is ON) |
| Barret = 6,256,472,576 Overflow x 2 (positive; 2^31 flag is OFF) |

| MIN Power level required to overflow at Base Damage level (against 0 Def): |
| |
| 138 ~ 275 Power (Only Barret & Vincent can cause BDO) |
| 413 ~ 550 Power (Only Vincent can overflow twice) |

| POWER required to cause overflow against Emerald (332 Def Mod): |
| |
| 4 Hero Drinks = 213 - 424 |
| 3 Hero Drinks = 236 - 470 |
| 2 Hero Drinks = 335 - 521 (Max) |
| 1 Hero Drinks = 475 - 521 (Max) |
| 0 Hero Drinks = 724 (Impossible) |

NOTE - The enemy with the lowest Defence in the game is the Bizarre Bug whilst in its flying form (0 Def). Sephiroth also has 0 Def, but that is a scripted battle. The second highest Def is the Hell House (2 Def).

DAMAGE MODIFIERS

Once the Base Damage value has been calculated, (Def Mod * Att Mod * Power / 8192), the game will perform a series of checks before it gets to the Random Variation formula, which is where overflow has its second opportunity to occur. All checks that occur after Random Variation (such as Elemental) will not affect the formula in a way that could cause overflow to happen again.

Here are the checks that are performed, in the order that they are checked, after Base Damage but before Random Variation:

```
 ____________________________________________________________________________
|                                                                            |
|  Physical Attack Checks (Only):                                            |
|                                                                            |
|  1) CRITICAL hit from Attacker:                                            |
|       Damage = [Damage * 2]                                                |
|                                                                            |
|  2) BERSERK Status of Attacker:                                            |
|       Damage = [Damage * 3 / 2] (so 1.5x normal Damage)                    |
|                                                                            |
|  3) ROW Check:                                                             |
|     Target is in Back Row:                                                 |
|       Long Range Flag = ON                                                 |
|                                                                            |
|     Attacker is in Back Row:                                               |
|       Long Range Flag = ON                                                 |
|                                                                            |
|     If Long Range Flag is ON:                                              |
|       Damage = [Damage / 2]                                                |
|                                                                            |
|       (So, if both attacker and target are in the Back Row, damage is      |
|        still only divided by 2 [non-stackable])                            |
|                                                                            |
|  4) DEFENDING Target:                                                      |
|       Damage = [Damage / 2]                                                |
|                                                                            |
|* 5) BACK EXPOSED Target:                                                   |
|       Damage = [Damage * (Target's Back Damage Modifier / 8)]              |
|                                                                            |
|       (Very few enemies have a back damage multiplier that differs from    |
|        16, so 99% of the time you're looking at Damage * 2)                |
|                                                                            |
|  6) FROG Status of Attacker:                                               |
|       Damage = [Damage / 4]                                                |
|                                                                            |
|  7) SADNESS Status of Target:                                              |
|       Damage = [Damage - (Damage * 3 / 10)] (so 0.7x normal Damage)        |
|                                                                            |
|  8) SPLIT Damage:                                                          |
|       Damage = [Damage * 2 / 3] (so 0.66x normal Damage)                   |
|                                                                            |
|  9) BARRIER on Target                                                      |
|       Damage = [Damage / 2]                                                |
|                                                                            |
| 10) MINI Status on Attacker:                                               |
|      Damage = 0                                                            |
|                                                                            |
| * There are three enemies that has a Back Damage modifier that differs     |
|   from 16 (2x damage):                                                     |
|                                                                            |
|  - Air Buster = 40 (5x Damage)                                             |
|  - Aps        = 32 (4x Damage)                                             |
```

| - Acrophies = 64 (8x Damage) |
|_____|

It is impossible to hit encounter the Acrophies with a Preemptive strike, so unfortunately we can't utilise its high Damage Modifier.

Remember that most random encounters have a 16/256 (6.25%) chance of being "Pre=emptive Strike", and the Pre-Emptive Materia can stack with each other to increase that value to as much 85/256 (33.2%).

- Lv 1 Pre-emptive: +16/256
- Lv 2 Pre-emptive: +22/256
- Lv 3 Pre-emptive: +28/256
- Lv 4 Pre-emptive: +34/256
- Lv 5 Pre-emptive: +48/256

A Lv 5 Pre-emptive Materia will grant an Ambush alert bonus, which halves the chance of Back Attacks and Ambushes.

There are 5 Bosses that can be encountered via a Pre-emptive Strike, and these are: Aps, Jenova Birth, Turks (Gongaga), Snow (Great Glacier), and Turks (Midgar re-visited).

```
  ____________________
 //                    \\
 || RANDOM VARIATION ||
 \\____________________//
```

And then after all this, we finally get to **RANDOM VARIATION**

Random Variation:
Damage = [(Random number between 3841 ~ 4096) * Damage] / 4096
This formula means that you will deal anywhere between 93.77% (3841/4096) and 100% (4096/4096) of your Damage to that point.

NOTES - As with the Base Damage formula, the " / 4096 " is not actually regular division, but rather a bit shift right by 12, which is why overflow occurs here (2^12 = 4096).

- Naturally, the only modifiers that we are going to be looking at are the positive ones; Critical (2x), Berserk (1.5x) and Back Damage (2x)

So we find ourselves at another point in which overflow is possible. If [(Random number between 3841 ~ 4096) * Damage] is equal to or greater than 2^31, overflow will occur. This means, that your damage output prior to Random Variation would need to be in the range of 524,288 (Rnd) ~ 559,095 (100%).

This means, that your damage output prior to Random Variation would need to be in the range of 524,288 (Rnd) ~ 559,095 (100%).

| 2^31 (2,147,483,648) / 4096 = 524,288 |
| 2^31 (2,147,483,648) / 3841 = 559,094 (+1) |

ALWAYS bear in mind that when you cause Damage overflow via Random variation, you will have a range of values: 2^31 / 4096 = 1/256 chance (Rnd)
2^31 / 3841 = 256/256 chance

Also, notice how the damage output requirement here (after damage modifiers) (524,288) is twice that of BDO (262,144)? That's because the bit shift operation is one less that than it was previously; Base damage is a bit shift right by 13 (8192), whereas Random Variation is a bit shift right by 12 (4096).

Prior to any damage modifiers taking effect, you're looking at a minimum base damage output value range of 87,381 (Rnd) to 93,182 (100%) damage to cause RVO, with Berserk, Critical and Back Damage.

IT IS *IMPOSSIBLE* TO CAUSE RANDOM VARIATION OVERFLOW WITH JUST A CRITICAL!

This is down to the fact that if you failed to overflow at Base Damage calculation, then your Base Damage figure will be lower than 262,144. Seeing as you need a minimum of 524,288 after damage modifiers to overflow at Random Variation calculation, which is precisely twice 262,144, you will need MORE than 2x Damage modifies to then exceed 524,288.
This means there are only three variations to look at:

| Berserk and Critical or Back Attack - 3x Damage Modifier |
| Critical and Back Attack - 4x Damage Modifier |
| Berserk and Critical and Back Attack - 6x Damage Modifier |

So, let's do some maths, shall we?

4 x Hero Drinks (30,473 Att Mod), 0 Def (512 Def Mod):

REMEMBER - BASE DAMAGE OVERFLOW WILL KICK IN AT *138* POWER, AND WHEN IT DOES, RVO WILL THEN NEGATE BDO!

| Let's work out the LOWEST "range" of Power required to cause RVO for each modifier: |
| 3X DAMAGE MODIFIER: (Critical / Back Attack & Berserk) |
| 2^31 (2,147,483,648) / 4096 / 3 * 8192 / 30,473 / 512 + 1 = 92 PWR (Rnd) |
| 2^31 (2,147,483,648) / 3841 / 3 * 8192 / 30,473 / 512 + 1 = 98 PWR (100%) |
| 4X DAMAGE MODIFIER: (Critical & Back Attack) |
| 2^31 (2,147,483,648) / 4096 / 4 * 8192 / 30,473 / 512 + 1 = 69 PWR (Rnd) |
| 2^31 (2,147,483,648) / 3841 / 4 * 8192 / 30,473 / 512 + 1 = 74 PWR (100%) |
| 6X DAMAGE MODIFIER: (Critical, Back Attack & Berserk) |
| 2^31 (2,147,483,648) / 4096 / 6 * 8192 / 30,473 / 512 + 1 = 46 PWR (Rnd) |
| 2^31 (2,147,483,648) / 3841 / 6 * 8192 / 30,473 / 512 + 1 = 49 PWR (100%) |
| So, if you had 46 Power, you would have a 11/256 chance of causing Random |

Variation Overflow (with Berserk, Back Damage, Critical, 4 Hero Drinks, and 0 Def on enemy), which is the minimum requirement to cause overflow (so all characters bar Aeris). If you had 49 Power, then you would overflow 100% of the time (with said conditions).

As with BDO, there is a point in which we will overflow back into the positive range (when we exceed 2^32), however when BDO then kicks in and overlaps with RVO, things start to get rather complicated. More below.

So, we can see that the lowest Power has to be *overall* to cause overflow is 46. It is absolutely impossible to cause overflow to an enemy with a Power of 45 or lower, EXCEPT for the 3 enemies that have special back damage modifiers - Air Buster, Aps & Acrophies, the latter being the only random encounter that you can face at any point in the game (but unfortunately you cannot encounter it with its back to you).

Given that all characters except Aeris can reach a minimum Power of 49, all characters can cause damage overflow at the Random Variation stage. Aeris's Power cannot not exceed 16 when using the Princess Guard; instead, her damage is multiplied by 2 or 3 depending according to allies are dead (respectively), and this takes place *after* the random variation calculation.

Max Def before overflow stops occurring for each character: (Ultimate Weapons) 49 PWR Cloud - 32 DEF (6/256) ~ 2 DEF (4086/4096) 49 PWR Red XIII - 32 DEF (6/256) ~ 2 DEF (4086/4096) 49 PWR Cait Sith - 32 DEF (6/256) ~ 2 DEF (4086/4096) 49 PWR Cid - 32 DEF (6/256) ~ 2 DEF (4086/4096) 64 PWR Tifa - 144 DEF (11/256) ~ 120 DEF (100%)

Note that the above considers the Ultimate Weapons only (with 6x damage mod). When talking about Limit Breaks, you can only overflow using 4x damage, and as such *69* Power is the min required to overflow.

Max Def before overflow stops occurring for each character: (Limit Breaks) 70 PWR Cloud - 8 DEF (6/256) ~ 0 DEF (70/256) 80 PWR Cait Sith - 71 DEF (6/256) ~ 42 DEF (100%) 125 PWR Red XIII - 230 DEF (2/256) ~ 211 DEF (100%) 128 PWR Yuffie - 236 DEF (11/256) ~ 218 DEF (100%)

Let's work out the MAXIMUM an enemy's Def can be before we can no longer cause RVO: - 3X DAMAGE MODIFIER: (Critical / Back Attack & Berserk) BARRET: 2^31 / 4096 / 3 * 8192 / 30,473 / 401 + 1 = 118 512 - 118 = 394 DEF (Rnd) 2^31 / 3841 / 3 * 8192 / 30,473 / 401 + 1 = 125 512 - 125 = 387 DEF (100%)

VINCENT:
2^31 / 4096 / 3 * 8192 / 30,473 / 521 + 1 = 91 512 - 91 = 421 DEF (Rnd)
2^31 / 3841 / 3 * 8192 / 30,473 / 521 + 1 = 97 512 - 97 = 415 DEF (100%)
- 4X DAMAGE MODIFIER: (Critical & Back Attack)
BARRET:
2^31 / 4096 / 4 * 8192 / 30,473 / 401 + 1 = 88 512 - 88 = 424 DEF (Rnd)
2^31 / 3841 / 4 * 8192 / 30,473 / 401 + 1 = 94 512 - 94 = 418 DEF (100%)
VINCENT:
2^31 / 4096 / 4 * 8192 / 30,473 / 521 + 1 = 68 512 - 68 = 444 DEF (Rnd)
2^31 / 3841 / 4 * 8192 / 30,473 / 521 + 1 = 73 512 - 73 = 439 DEF (100%)
- 6X DAMAGE MODIFIER: (Critical, Back Attack & Berserk)
BARRET:
2^31 / 4096 / 6 * 8192 / 30,473 / 401 + 1 = 59 512 - 59 = 453 DEF (Rnd)
2^31 / 3841 / 6 * 8192 / 30,473 / 401 + 1 = 63 512 - 63 = 449 DEF (100%)
VINCENT:
2^31 / 4096 / 6 * 8192 / 30,473 / 521 + 1 = 46 512 - 46 = 466 DEF (Rnd)
2^31 / 3841 / 6 * 8192 / 30,473 / 521 + 1 = 49 512 - 49 = 463 DEF (100%)
466 is the absolute maximum an enemies Def can be using Random Variation
overflow (82/256 chance), or 463 to guarantee overflow. Back Attacks are
not always achievable, which means that 421 Def is the highest with just
Critical & Berserk (38/256 chance) or 415 to guarantee overflow.

The only enemies that have Defence over 400 is the Lost Number (Purple - 400 Def), Ying (420 Def) and Ruby Weapon (480 Def), meaning Ruby is the only enemy that cannot be subjected to the Overflow glitch.

```

 //                    \\
 || MULTIPLE OVERFLOWS ||
 \\____________________//
```

This last section tries to explain how complicated the maths can get when Base Damage overflow and Random Variation overflow overlap.

Once you have literally just overflowed the 31st integer the negative value, that value will be furthest away from 0. The higher the initial value, the lower the negative number then becomes *from 0*, and even though you are increasing the negative number, the resulting subsequent calculations made to that number will be smaller, in terms of its distance from 0.

What this means, is that at the very point in which both overflows occur,

they will negate each other out, until of course the initial value has risen enough to the point where the negative value after base damage is then small enough to then prevent RVO from negating BDO. ...Yeah.

To be honest, I was going to spend some time trying to find a way of working out when negative overflow will re-occur after both overflows have engaged, however it became far too difficult to work out (for someone who isn't a mathematician), so I stood down. What I did notice, is that when negative overflow occurs again, the LOWER value becomes the 100% chance value, and the HIGHER value becomes the rnd chance value..... just as an example how inverted and complicated it all becomes!

PREEMPTIVE STRIKES / SIDE ATTACKS:

This list was compiled using my "Enemy Formations Charts":
http://pastebin.com/raw/MUcyFwwi

Here is a list of ALL enemies that can fought via a Side-Attack (SA) or Pre-emptive Strike (PS) in order of appearance:

	PS	MP	(Def 4)	Sector 1 Reactor
	PS	Mono Drive	(Def 6)	Sector 1 Reactor & Train Graveyard
	PS	1st Ray	(Def 2)	Sector 1 Reactor
	PS	Grunt	(Def 10)	Sector 1 Reactor
	PS	Grashtrike	(Def 18)	Sector 4 Winding Tunnels
	PS	Chuse Tank	(Def 6)	Sector 4 Winding Tunnels
	PS	Rocket Launcher	(Def 2)	Sector 4 Platforms
	PS	Blugu	(Def 180)	Sector 4 Platforms
	PS	Special Combatant	(Def 24)	Sector 5
	PS	Proto Machinegun	(Def 2)	Sector 5
	PS	Blood Taste	(Def 22)	Sector 5
	PS	Smogger	(Def 24)	Sector 5
SA		Air Buster	(Def 80)	Sector 5 Reactor
	PS	Hedgehog Pie	(Def 18)	Sector 6 Church & Slums
	PS	Guard Hound	(Def 4)	Sector 6 Church & Train Graveyard
	PS	Whole Eater	(Def 14)	Sector 6
SA		*Hell House	(Def 2)	Sector 6
	PS	Aps	(Def 36)	Sewers
	PS	Ceasar	(Def 108)	Sewers
	PS	Sahagin	(Def 32)	Sewers
	PS	Cripshay	(Def 18)	Train Graveyard
	PS	Deenglow	(Def 32)	Train Graveyard
	PS	Grenade Combatant	(Def 24)	Shinra HQ
	PS	*Mighty Grunt	(Def 100)	Shinra HQ
	PS	Moth Slasher	(Def 28)	Shinra HQ Hojo's Lab
	PS	SOLDIER:3rd	(Def 38)	Shinra HQ Hojo's Lab
	PS	Brain Pod	(Def 26)	Shinra HQ Hojo's Lab
	PS	Vargid Police	(Def 16)	Shinra HQ Hojo's Lab
	PS	Zenene	(Def 20)	Shinra HQ Hojo's Lab
	PS	Prowler	(Def 28)	Midgar Area
SA		Custom Sweeper	(Def 30)	Midgar Area
	PS	Kalm Fang	(Def 30)	Midgar Area
	PS	Mandragora	(Def 12)	Chocobo Ranch Area
	PS	Elfadunk	(Def 40)	Chocobo Ranch Area
	PS	Levrikon	(Def 40)	Chocobo Ranch Area

	PS	Castanets	(Def	76)	Mythril Mines
	PS	Crawler	(Def	10)	Mythril Mines
	PS	Nerosuferoth	(Def	34)	Junon Area
	PS	Capparwire	(Def	38)	Junon Area
	PS	*Zemzelett	(Def	50)	Junon Area
	PS	Scrutin Eye	(Def	20)	Cargo Ship
	PS	Marine	(Def	30)	Cargo Ship
	PS	Jenova Birth	(Def	56)	Cargo Ship
SA	PS	Beachplug	(Def	36)	Corel, Gold Sauc and Gongaga Beaches
	PS	Cokatolis	(Def	36)	Corel Area & Mt. Corel
SA	PS	Needle Kiss	(Def	38)	Corel Area & Mt. Corel
SA	PS	Search Crown	(Def	26)	Mt. Corel
	PS	Bloatfloat	(Def	36)	Mt. Corel
	PS	Bomb	(Def	60)	Mt. Corel
	PS	Spencer	(Def	22)	Gold Saucer Area
	PS	Flapbeat	(Def	36)	Gold Saucer Area
	PS	Joker	(Def	32)	Gold Saucer Area
	PS	Death Claw	(Def	44)	Corel Prison
	PS	Bullmotor	(Def	40)	Corel Prison
	PS	Cactuar	(Def	40)	Corel Desert
	PS	Grand Horn	(Def	42)	Gongaga Area
	PS	Gagighandi	(Def	38)	Gongaga Area
	PS	Touch Me	(Def	20)	Gongaga Jungle (only)
	PS	Turks:Reno (Gong)	(Def	66)	Gongaga Jungle
	PS	Turks:Rude (Gong)	(Def	100)	Gongaga Jungle
SA		*Flower Prong	(Def	58)	Gongaga Jungle (Turks screen)
SA	PS	Skeeskee	(Def	40)	Cosmo Area
	PS	Bagrisk	(Def	44)	Cosmo Area
	PS	Desert Sahagin	(Def	32)	Cosmo Area
	PS	Griffin	(Def	42)	Cosmo Area
	PS	Crown Lance	(Def	30)	Cosmo, Nibelheim and Rocket Beaches
	PS	Heg	(Def	30)	Cave of The Gi
SA	PS	Sneaky Step	(Def	30)	Cave of The Gi
	PS	Bahba Velamyu	(Def	38)	Nibel Area
	PS	Battery Cap	(Def	38)	Nibel Area
	PS	Nibel Wolf	(Def	36)	Nibel Area & Rocket Pad Area
	PS	Valron	(Def	50)	Nibel Area & Rocket Pad Area
	PS	Dorky Face	(Def	36)	Shinra Mansion
	PS	Black Bat	(Def	36)	Shinra Mansion
	PS	Twin Brain	(Def	44)	Mt. Nibel
	PS	Kyuvilduns	(Def	42)	Mt. Nibel & Rocket Pad Area
	PS	Velcher Task	(Def	50)	Rocket Pad Area
	PS	Tail Vault	(Def	46)	Wutai Area
	PS	Edgehead	(Def	48)	Wutai Area
	PS	Thunderbird	(Def	40)	Wutai Area
SA	PS	*Bizarre Bug	(Def	50)	Wutai Area & Da-chao Statue
	PS	Razor Weed	(Def	50)	Wutai Area & Da-chao Statue
	PS	Jayjujayme	(Def	46)	Da-chao Statue
	PS	Foulander	(Def	46)	Da-chao Statue
	PS	Garuda	(Def	52)	Da-chao Statue
SA	PS	Kelzmelzer	(Def	56)	Temple of The Ancients
	PS	Under Lizard	(Def	50)	ToTA Area, Cactus & Goblin Island
	PS	Dual Horn	(Def	70)	ToTA Area, Cactus & Goblin Island
	PS	Slaps	(Def	42)	ToTA Area
	PS	Boundfat	(Def	60)	Corral Valley
	PS	Malldancer	(Def	58)	Corral Valley
SA	PS	Bandersnatch	(Def	46)	Icicle Area & Great Glacier
SA	PS	Jumping	(Def	40)	Icicle Area & Great Glacier
	PS	Lessaloploth	(Def	74)	Great Glacier
	PS	Ice Golem	(Def	80)	Great Glacier

SA	PS	Snow	(Def 66)	Great Glacier
	PS	Frozen Nail	(Def 52)	Great Glacier
	PS	Headbomber	(Def 60)	Gaea's Cliff
	PS	Zolokalter	(Def 58)	Gaea's Cliff
	PS	Evilhead	(Def 50)	Gaea's Cliff
	PS	Cuahl	(Def 42)	Gaea's Cliff
SA	PS	Grenade	(Def 60)	Whirlwind Maze
	PS	Gremlin	(Def 60)	Whirlwind Maze
	PS	Wind Wing	(Def 60)	Whirlwind Maze
	PS	Cactuer	(Def 90)	Cactus Island & Corel Desert
	PS	Head Hunter	(Def 60)	Mideel Area
	PS	Crysales	(Def 46)	Mideel Area
SA		Death Machine	(Def 58)	Junon (Paths to Reactor)
	PS	SOLDIER:2nd	(Def 58)	Junon (Paths to Reactor)
	PS	Slalom	(Def 74)	Junon (Paths to Reactor)
	PS	Hard Attacker	(Def 90)	Junon Reactor
	PS	Senior Grunt	(Def 70)	Junon Reactor
SA	PS	Goblin	(Def 74)	Goblin / Round Island Forests
SA	PS	Rilfsak	(Def 90)	Ancient Forest
	PS	Epiolnis	(Def 58)	Ancient Forest
	PS	Diablo	(Def 80)	Ancient Forest (Cave only)
	PS	Poodler	(Def 110)	Sunken Gelnika
	PS	Bad Rap	(Def 90)	Sunken Gelnika
	PS	Crazy Saw	(Def 100)	Sector 8
	PS	Cromwell	(Def 110)	Sector 8
	PS	Shadow Maker	(Def 90)	Sector 8
	PS	Turks:Elena (Midg)	(Def 90)	Sector 8 Winding Tunnels
	PS	Turks:Reno 4(Midg)	(Def 120)	Sector 8 Winding Tunnels
	PS	Turks:Rude 4(Midg)	(Def 130)	Sector 8 Winding Tunnels
	PS	SOLDIER:1st	(Def 94)	Mako Cannon
	PS	Parasite	(Def 150)	North Crater Right Fork
	PS	Pollensalta	(Def 60)	North Crater Right Fork
	PS	Death Dealer	(Def 140)	North Crater Right Fork
SA	PS	Magic Pot	(Def 64)	North Crater Swamp Area

* Hell House's Def remains the same in both forms
* Mighty Grunt has 4 Def in its second form
* Flower Prong's Def remains the same in all three forms
* Zemzelett has 20 Def in its second form
* Bizarre Bug has 0 Defence when flying

A quick note about the Turks battle in Midgar. Both Reno and Rude will be in the back row (1/2 damage), and Elena is scripted to turn around as soon as the fight begins, so you cannot overflow against them I'm afraid....

NOTES:

- There are 5 bosses that can receive a Pre-Emptive Strike that shouldn't have been able to. This is due to an error in coding; if an area has random encounters disabled, then the fight can *never* be a Pre-Emptive Strike. The developers knew this, and as such they have intently given many boss battles the "normal fight" flag, knowing that a Pre-Emptive Strike is impossible (normally, if an enemy is NON-preempt-able, then a special flag must be set which disables Pre-Emptive Strikes).

If random encounters ARE enabled for a screen in which a boss is fought, then the dev's must remember to set the "Pre-Emptive Strike Disabled" flag. There are 5 examples where they have forgotten to do this:

Aps
Jenova Birth
Turks (Gongaga)
Snow (Alexander Cave)
Turks (Midgar)

- 3 enemies can receive higher then normal Back Damage (nut none will receive lower-than normal Back Damage):

Air Buster (5x Damage)
Aps (4x Damage)
Acrophies

Using this info for the purpose of overflow is only hypothetical of course, seeing as two of the enemies cannot be fought late game, and one of the enemies (Acrophies) cannot be Back-Attacked, which is a shame, because if it could then overflow could occur with Power as little as 14, which means Aeris *could* overflow against it..... except Aeris will not be with us when we encounter the Acrophies!!!!!

- This is really handy to know. There HAS to be an enemy in the front row; the game cannot have an empty front row, the coding dis-allows it. Which means, if you wish to cause overflow but the enemy you are targeting is in the back row, you can quickly remove the enemies in the front row which will bring the back row to the front row.

It's like this: There is no "Front Row" and "Back Row", it is only "Normal" and "Back Row (Status)". By default, an enemy's Row value is always set to 1, which dictates the enemy is "Normal". Any value greater than *THE LOWEST VALUE* is then given the Back Row Status. Let's say you have:

Enemy W - 1 Row Value
Enemy X - 2 Row Value
Enemy Y - 2 Row Value
Enemy Z - 3 Row Value

Enemy W is in the front row and X, Y & Z are in the back row. If you kill enemy W, then X & Y become the front row enemies, while Z would remain in the back row until X & Y were destroyed.

If an enemy is given a row value of 16, then they are given the "Cannot Reach" Status.

- Enemies can cause overflow to you. Seriously! I haven't tried it, but here is a vid of it in action, although to set it up would be difficult as you would need to cast a Hero Drink on the enemy in the same manor you would a Hyper; by having a character select it that is about to become confused. Not to mention the fact that your Def/MDef stat would have to be low enough. I'm not doing the math (I've already done enough!!).

https://www.youtube.com/watch?v=J9k5OukD_HE

In all honesty, I am unsure of the legitimacy of this vid, as I know hacks have been used. If someone manages to do it for themselves, be sure to let me know!!

- In case you didn't already know by now, the best way to raise your character's Strength to 255 is to make use of the Extended W-Item glitch to gain Power Sources from the Screamer in Mt. Nibel. See the W-Item Glitch section above for more details. If you aren't a fan of using exploits (then why are you reading this section lol) you can Morph Power Sources legitimately from either the Heavy Tank (Gongaga Reactor) or the Unknown (Sunken Gelnika).

- Ruby is the only enemy that you cannot overflow against. If you happen to be using a savegame editor such as Black Chocobo (link found in Section J - Special Thanks) then here's how to hex-edit to cause overflow to Ruby.

  In the Hex Editor, scroll down to line 03F0. the second value in (0x03F1) is Vincent's Level. If Vincent is Lv 99, then the value in hex will be 63. Change this value to FF to increase Vincent's Lv to 255. Tried and tested, it works! I haven't done any maths behind it, but I have a sneaky suspicion that base damage will be so great, that random variance could exceed 2^31 a number of times; so basically you will have a completely random chance with every hit!

- First comes Base Damage, then the damage modifiers are considered. Then Random Variance plays its part, after which the Elemental checks are performed. Then the Reflect, then the "Miss" and "Death" chance, then the sanity cap (9999), then a check for immunities, followed by Peerless, then Petrify, and finally the 7777 Fever check.

- It's probably handy to know exactly how the Critical chance formulas work, seeing as Criticals play a big part in causing overflow. First, Crit % is worked out:

  Crit% = [(Attacker's Luck + Attacker's Level - Target's Lv) / 4]

  Then, any weapon that increases Crit% is considered. After this, a random value will be pulled between 1 and 100. If Crit% is GREATER than this random value, a Critical hit is landed.

- As is mentioned, equipping HP Absorb with Master Command whilst causing damage overflow will also kill the attacker. There is a way to change this set-up to our advantage! If you were to pair Elemental in your weapon with an Element that the enemy absorbs, you would instead cause healing overflow, which would completely replenish the enemy's HP. Pretty pointless, unless you have HP Absorb paired with Master Command, in which case your character's HP would also be replenished!

  You could also measure your damage output with a similar set-up. Equip HP<->MP and also equip MP Absorb=Master Command. When you use MP Absorb, your MP will fill by 1% of the damage inflicted, however because the damage has overflowed the MP will be depleted instead of filled. The value that you see is 1% of the total damage dealt, so if your MP was drained by 3360, then your damage would be 336,000 (which is greater than 262,144).

Here is a video that explains it in more depth:

https://www.youtube.com/watch?v=npU18Kc9SZ0

- Just to re-cap on something I've already highlighted, here is the rate in which the Pre-Emptive Materia will stack:

Lv 1 Pre-emptive: +16/256
Lv 2 Pre-emptive: +22/256
Lv 3 Pre-emptive: +28/256
Lv 4 Pre-emptive: +34/256
Lv 5 Pre-emptive: +48/256

The highest your Pre-emptive chance can reach is 85/256. Also, A Lv 5 Pre-emptive Materia will grant you an Ambush Alert bonus, which halves the chance of receiving all Back Attacks and Pincer Attacks.

{Battle Overflow Glitch}

There are a few other examples of overflow in FFVII, aside from Damage Overflow (above). One of which is the battle count; if this value exceeds 32,767 then the figure will wrap round to the negative, and then start counting forward to 0. During this time you will not be able to breed, nor will the Chocobo Sage give you any information.

This is because a signed 16Bit integer is being used. The above section on Damage Overflow explains more on how signed and unsigned values are treated, but to quickly explain; Vincent's kill count is an example of an un-signed 16 bit value. The max it can be 65,535. A signed 16 bit value has a maximum of 32,767 (65,535 / 2). When it rolls past the mid-way point, the figure becomes negative to -32,768. You then need 32,768 battles before this value can become positive again!

The way in which this can be exploited is to get precisely 32,767 kills. If you attempt to breed Chocobos, Get information from the Chocobo Sage or try to get Vincent's stash from Lucrecia's Cave, then the kill count will not be set properly. Normally, the game records your current kill count, then adds a random value of kills onto that value as the "kill count required". When you next enter the area, if your kill count matches or is greater than the kill count required, then you can proceed with breeding etc.

When your kill count is 32,767, the game adds a random value onto that value, which will overflow into the negative, so your kill count required could be something like -32,757. Seeing as 32,767 is much greater than -32,767, you will not need to get any kills. You can get Vincent's stash simply by leaving and entering the cave, you could get all of the Chocobo Sage's info in one go, and you could breed a Gold Chocobo without having to leave the Stables. Knowledge of RNG manipulation would be required; here is a vid of BrutalAl gaining a Gold Chocobo in 4 minutes:

https://www.youtube.com/watch?v=ZaVmzfmhaBw

OTHER EXAMPLES OF OVERFLOW:

Another way in which overflow can be exploited is to overflow the step counter in the Great Glacier. Running around outside Holzoff's Cabin will increase your step counter, however you will not pass out. If it exceeds 32,767 it will overflow, and you will gain an immunity to passing out seeing as the figure will now be minus (and therefore less than 544).

Doing so is a pointless task, as the counter will reset to 0 the next time you enter the Great Glacier, so the immunity will not last forever, although it wouldn't have lasted forever anyway; it would have lasted 33,111 steps, and that includes steps taken everywhere outside the Great Glacier (excluding World Maps). If for some reason you did want to perform this glitch, then you would need to run for up to 180 minutes outside the cabin!

If you played the game for 136 years (4,294,967,295 seconds) then the in-game timer would overflow back to 0.

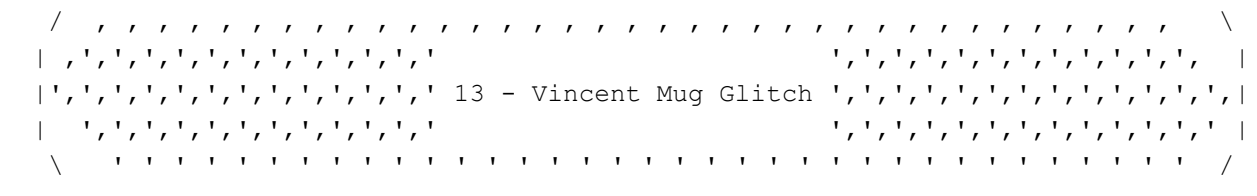
If you had more than 65,535 escapes, the counter would overflow back to 0.

A Mastered Cover Materia will grant 100% cover chance, so there is no need to equip more than 1. If the cover chance exceed 255, it would overflow to 0, so 3 mastered Cover Materias would mean 45% cover chance.

Using hacks, you can also overflow EXP, and and gil. Seeing as they are not possible to do in-game, I shan't write up on them, however I will direct you to a vid of Garland the Great messing around with what can be done:

https://www.youtube.com/watch?v=fyYIOROyGmM

{Vincent Mug Glitch}



A really, really awesome glitch which allows for animations to be skipped (but still cause damage). Equip Vincent with Mug, then have him Mug the enemy. Choose which attack you wish to have its animation skipped, but do not select the command; Wait until Vincent is performing the Mug animation, then input the command. The next animation, be it an enemy's counter-attack or the player's command, will be skipped, although the effects of the attack will still occur.

This only occurs when Vincent is equipped with either the Shortbarrel, Winchester, Long Barrel R, Sniper CR or Death Penalty.

Speed-runners can now skip out long animations, such as Ultimate End. The funny thing is, even the death animations are skipped, so the battle will end with the enemy still alive!

That really is all there is to this glitch! The reason it occurs is due to the way the animations are called upon. Vincent has three different sets of animations, one for Shotguns, one for Pistols and one for Rifles. It's the Rifle animation that is bugged, which is why only certain select weapons are affected by the glitch. When Mug is used, the animation for the next command to play will cue on the exact same frame as the Mug command ends. Normally, the animation for the next command will cue *after* the previous command has

finished, but in this case they cue and finish on the same frame. Credit to NFITC1 for explaining how the glitch works.

{Hidden}

14 - Hidden Element Against Ultimate

Hidden is also known as the 10th Element. That's 10 in hexadecimal, so in decimal that would be the 16th Element. Every single Materia must have an Element checked against it, and by default if there isn't another Element selected then it will be given Hidden. Because of this fact we can link the Elemental Materia to gain the Hidden Element to *any* piece of Materia that:

- Does not have an Element already assigned to it
- Is not a Support Materia
- Is not a Curative Materia (Restore, Life or Full Cure)

The only attack in that we can defend make defend against that uses Hidden is Ultima Weapon's "Ultima Beam". Equipping Elemental on your armor with any Materia that meets the above requirement will add Hidden to your defences, and you will half / nullify / absorb Ultima Beam respectfully.

What a lot of people don't realise is the fact that you can also protect yourselves from Statuses that carry the Hidden element. Traditionally, if you are immune to a Status then the words "miss" will not appear above your head. When you link Elemental with Hidden (MUST be Lv 2 min) you will gain immunity to all Status changing attacks that use Hidden, although the words "miss" WILL appear above your head. Here is a list of moves that use Hidden:

```
Hell Rider VR2  - Electromag
Cokatolis       - Petrify Smog
Gagighandi      - Stone Stare
Bagrisk         - Stone Strike
Dorky Face      - Curses
Dorky Face      - Funny Breath
Demons Gate's   - Petrif-Eye
Attack Squad    - Smoke Bullet
Marine          - Smoke Bullet
Ultimate Weapon - Ultima Beam
```

It's unlikely, but if you did manage to get the Elemental to Lv 2 prior to the Shinra mansion then you could have gained protection from the Dorky Face's Curses and Funny Breath, which would massively help for that part of the game!

It's interesting to know that there were 15 attacks in the J-ORG version that had the Hidden Element that could be defended against, but were given one of the 5 physical Elements (Punch/Cut/Hit/Shoot/Shout)in the subsequent releases of the game. Here are the attacks:

J-ORG ONLY: (Shout out to JBedford for the list)

```
Hell Rider VR2  - Electromag
Bloatfloat      - Vacuum
Cokatolis       - Petrify Smog
Bagnadrana      - Poison Breath
```

```
Bomb            - Bomb Blast
Bandit          - Hold-up
Bandit          - Mug
Land Worm       - Sandstorm
Joker           - Joker
Joker           - Spade
Joker           - Diamond
Gagighandi      - Stone Stare
Flower Prong    - Energy Siphon
Flower Prong    - Pollen
Griffin         - Peacock
Desert Sahagin  - Sandgun
Bagrisk         - Stone Strike
Dorky Face      - Curses
Dorky Face      - Funny Breath
Yang            - Suicide Yang
Twin Brain      - Stare Down
Twin Brain      - Absorb
Kyuvilduns      - Lay Flat
Garuda          - Dance (both of them)
Chekhov         - Stare Down
Chekhov         - Absorb
Godo            - Beast Sword
8 eye           - Eyesight (all four of them)
Demons Gate's   - Petrif-Eye
Grenade         - Bomb Blast
Dragon Rider    - Rider Breath
Killbin         - x
Sea Worm        - Sandstorm
Attack Squad    - Smoke Bullet
CMD. Grand Horn - Poison Breath
Unknown         - Blaster
Serpent         - Dragon Dance
Carry Armor     - Lapis Laser
Ultimate Weapon - Ultima Beam
```

{Turks Exploits}

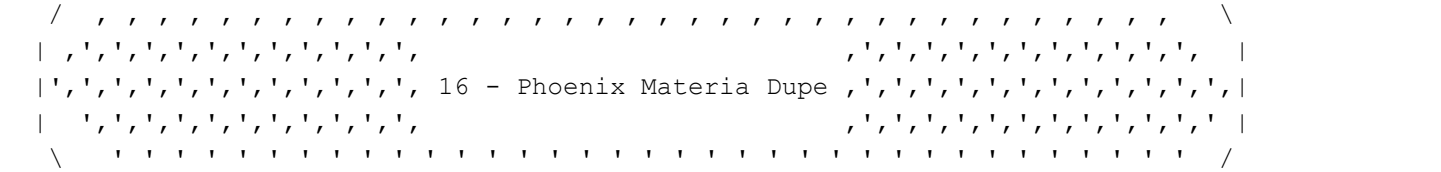
```
 /  , , ,
```

2.) It is possible to skip the Turks battle in Midgar entirely, and no, I'm not talking about simply selecting not to fight them (having completed Yuffie's Sidequest). When you drop down from the crawlspace, you would normally head north over a trigger lint to cue the appearance of the Turks. If you were to hug the middle pillar, then you would avoid this line altogether, and the Turks would never appear.

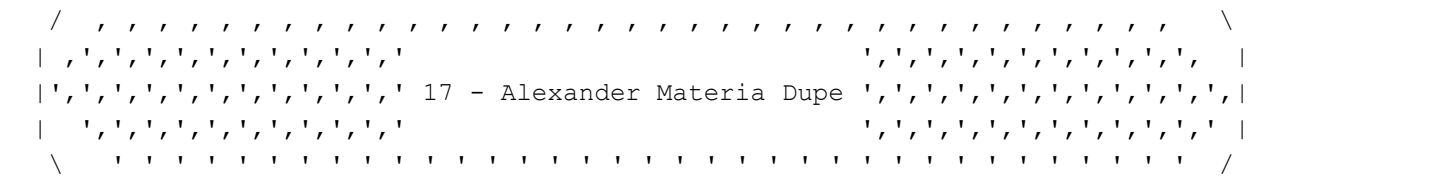
3.)

Turks battle skip, Rude AI glitch, and Reno & Tifa

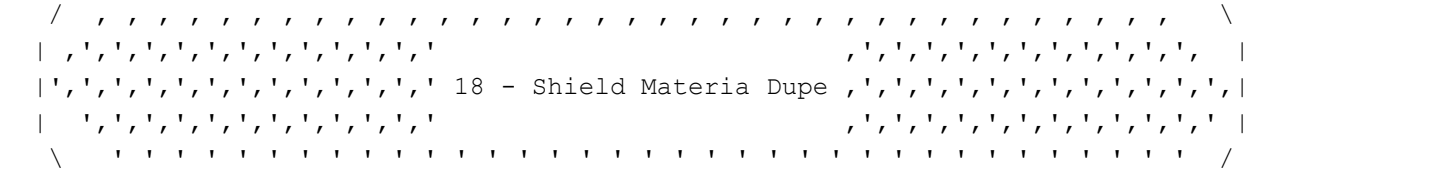
{Phoenix Materia Dupe}



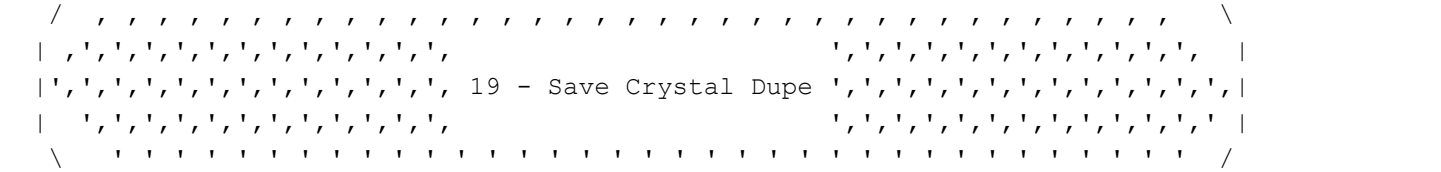
{Alexander Materia Dupe}



{Shield Materia Dupe}

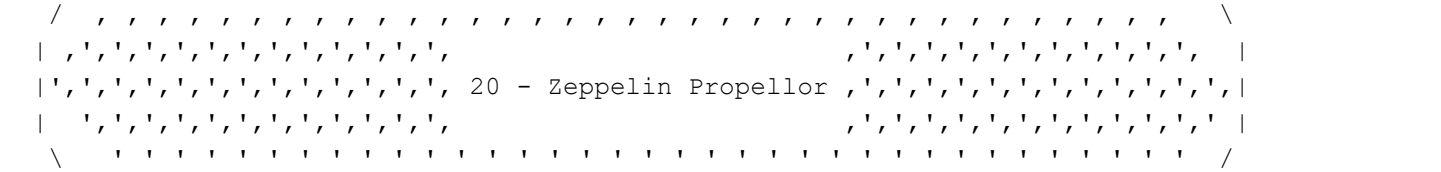


{Save Crystal Dupe}



save point trick + Save crystal duplication / never leave glitch

{Zeppelin Propellor}



98 PC, Steam and PS4.

{Glitches}

--E.18 E - Glitches

A glitch could be good OR bad, however in this guide I have split the good glitches (exploits) up from the bad glitches; the following is a list of glitches you want to try to avoid. Note that there are some glitches that can only be triggered by undergoing a lengthily process and are quite difficult to set-up. I will not be citing such examples; the following glitches are ones that you could possibly trigger by accident, and as such you want to try to avoid!

Some glitches (such as the Spirit Stat Glitch) are hard-coded into the game and are unavoidable!

{Spirit Stat Glitch}

1 - Spirit Stat Glitch

{Kjata Glitch}

2 - Kjata Glitch

+ Final Attack

{Button Configuration Glitch}

3 - Button Configuration Glitch

DEAR READERS - As you can see, Section E is still under construction.

  Forest - Goblin, Mystery Ninja (50%)

 +---------+
 | *NOTES* |
 +---------+

ES-3 - CHOCOBUCKLE - Encounter the chocobo alongside 2x Levrikon or 2x
         Elfadunk (Lv 16), then throw a Mimett or Sylkis Green at it. Use L4

Suicide and the chocobo will counter with Chocobuckle.
1 - MIDGAR ZOLOM - Catch a chocobo to evade having to battle it.
ES-4 - BETA - There is a strong chance that you won't be powerful enough to defeat the Zolom on your first encounter, so it is recommenced that you return once you have acquired the buggy.
ES-5 - WHITE WIND - Must have the Manipulate Materia which you won't have acquired until you have obtained the buggy.
2 - SLEEPING MAN - Make the last two digits of your battle count match to receive either the Bolt Ring or the Mythril. Cannot be visited until you have obtained the buggy.
G - THE TEMPLE OF THE ANCIENTS - Cannot be accessed until you have obtained the Tiny Bronco.
3 - GOBLIN ISLAND - Battle the Goblin in the forests to Steal the valuable Zeio Nut. Cannot be visited until you have obtained the Highwind.
4 - ULTIMATE WEAPON - Cannot be fought until Diamond WEAPON has been defeated. Will spawn in near the crater near Junon. Can learn the Enemy Skill Shadow Flare.

  Small Forest - Velcher Task, Valron, Kyuvilduns, Mystery Ninja (99.6%)
  Beach        - Crown Lance

CACTUS ISLAND:

  Grass  - Dual Horn, Under Lizard
  Desert - Cactuer

NORTH COREL AREA:

  Desert - Sea Worm, Tonadu, Cactuer

 +---------+
 | *NOTES* |
 +---------+

ES-1 - BIG GUARD - Can be learnt from the shores of Corel Area, Gold Saucer
         Area or Gongaga Area. Must acquire the Manipulate Materia first.
ES-2 - AQUALUNG - To encounter the Harpy you must drive around the desert in
         your buggy (World Map), or equip Chocobo Lure and battle around the
         chocobo tracks.
   1 - BLACKSMITH - The first time you visit the weapon sellers house there
         will be no-one home. You must return after having acquired the Tiny
         Bronco, you can then exchange the Mythril for either a Gold Armlet
         or the Great Gospel.
ES-3 - FROG SONG - Be sure to have protection from Frog, such as a White Cape.
 S-1 - VAGYRISK CLAW - The Bagrisk can only be fought in the area just west
         of Cosmo Canyon, as the 'sunset effect' begins to fade. Also, the
         higher the level of the person stealing, the lower the chance you
         have of stealing the Vagyrisk Claw.
```

2 - SHORTCUT - Once yo have obtained the Tiny Bronco you will be able to cut through the river near Nibelheim to emerge near Gongaga, and vice-versa.

3 - CACTUS USLAND - Once you have obtained the Highwind you will be able to visit this small island to encounter the Cactuer. You can steal the Tetra Elemental from them.

4 - LUCRECIA'S CAVE - Once you have obtained either a Green chocobo or the submarine, you can access Lucrecia's cave for some hidden story-line secrets and some goodies.

5 - ANCIENT FOREST - You will be able to access the Ancient Forest once you have a Green chocobo, alternatively you can wait until Ultimate WEAPON has been defeated.

6 - MATERIA CAVE - Once you have a Black or Gold chocobo you can access the Materia Cave near North Corel.

7 - SUNKEN GELNIKA - If you are having trouble finding it then bring your submarine to the point shown on the map and submerge to find the Gelnika. Be careful as Emerald could be sitting directly in front of it!

8 - RUBY WEAPON - Will appear as a small red fin sticking out of the desert. It'll only appear once Ultimate WEAPON has been defeated, and you have engaged in one random battle.

MIDEEL AREA:

Grass - Spiral, Head Hunter, Hippogriff
Dirt - Spiral, Hippogriff
Forest - Crysales, Head Hunter
Beach - Sea Worm

+---------+
| *NOTES* |
+---------+

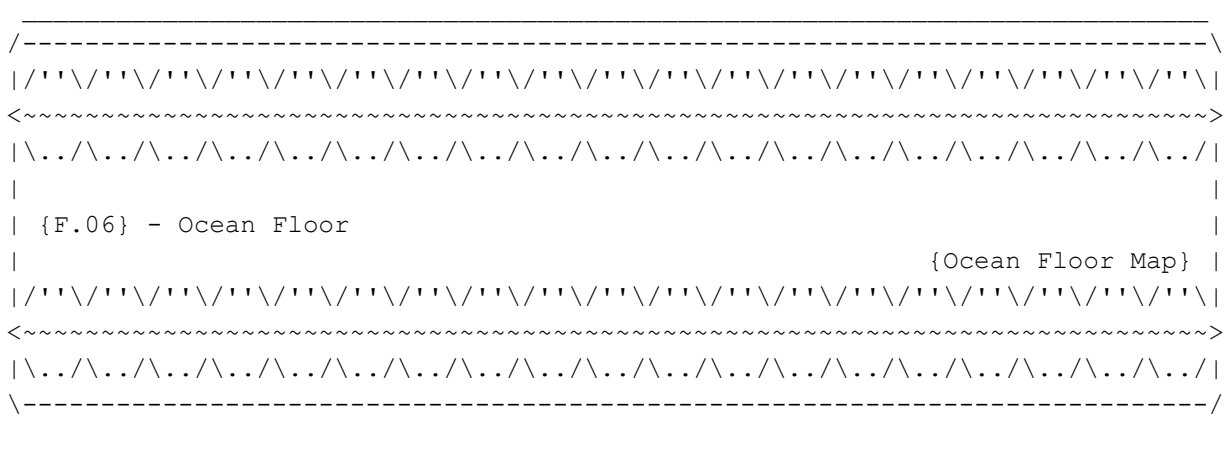
1 - SMALL ISLAND - This small island can be accessed once you have obtained the Tiny Bronco. Large amounts of Gil and EXP can be earned here.

ES-1 - CHOCOBUCKLE - Encounter the chocobo then throw a Mimett or Sylkis Green at it. Use L4 Suicide and the chocobo will counter with Chocobuckle.

2 - HIGHWIND LANDING - This is where you should land the Highwind if you are trying to access the Materia Cave with a Blue chocobo.

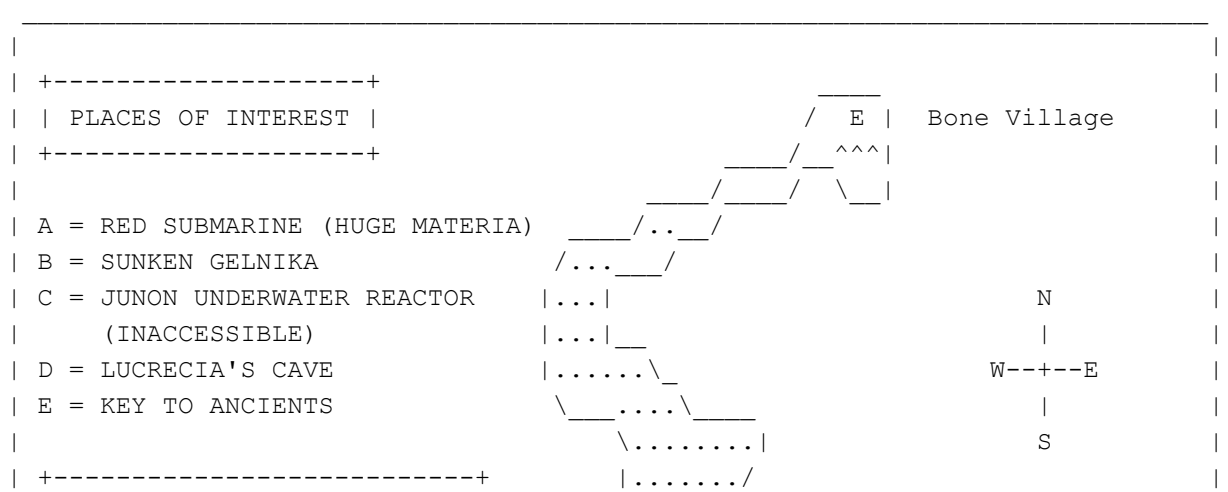
3 - MATERIA CAVE - Can only be accessed once you have a Blue or Gold chocobo.

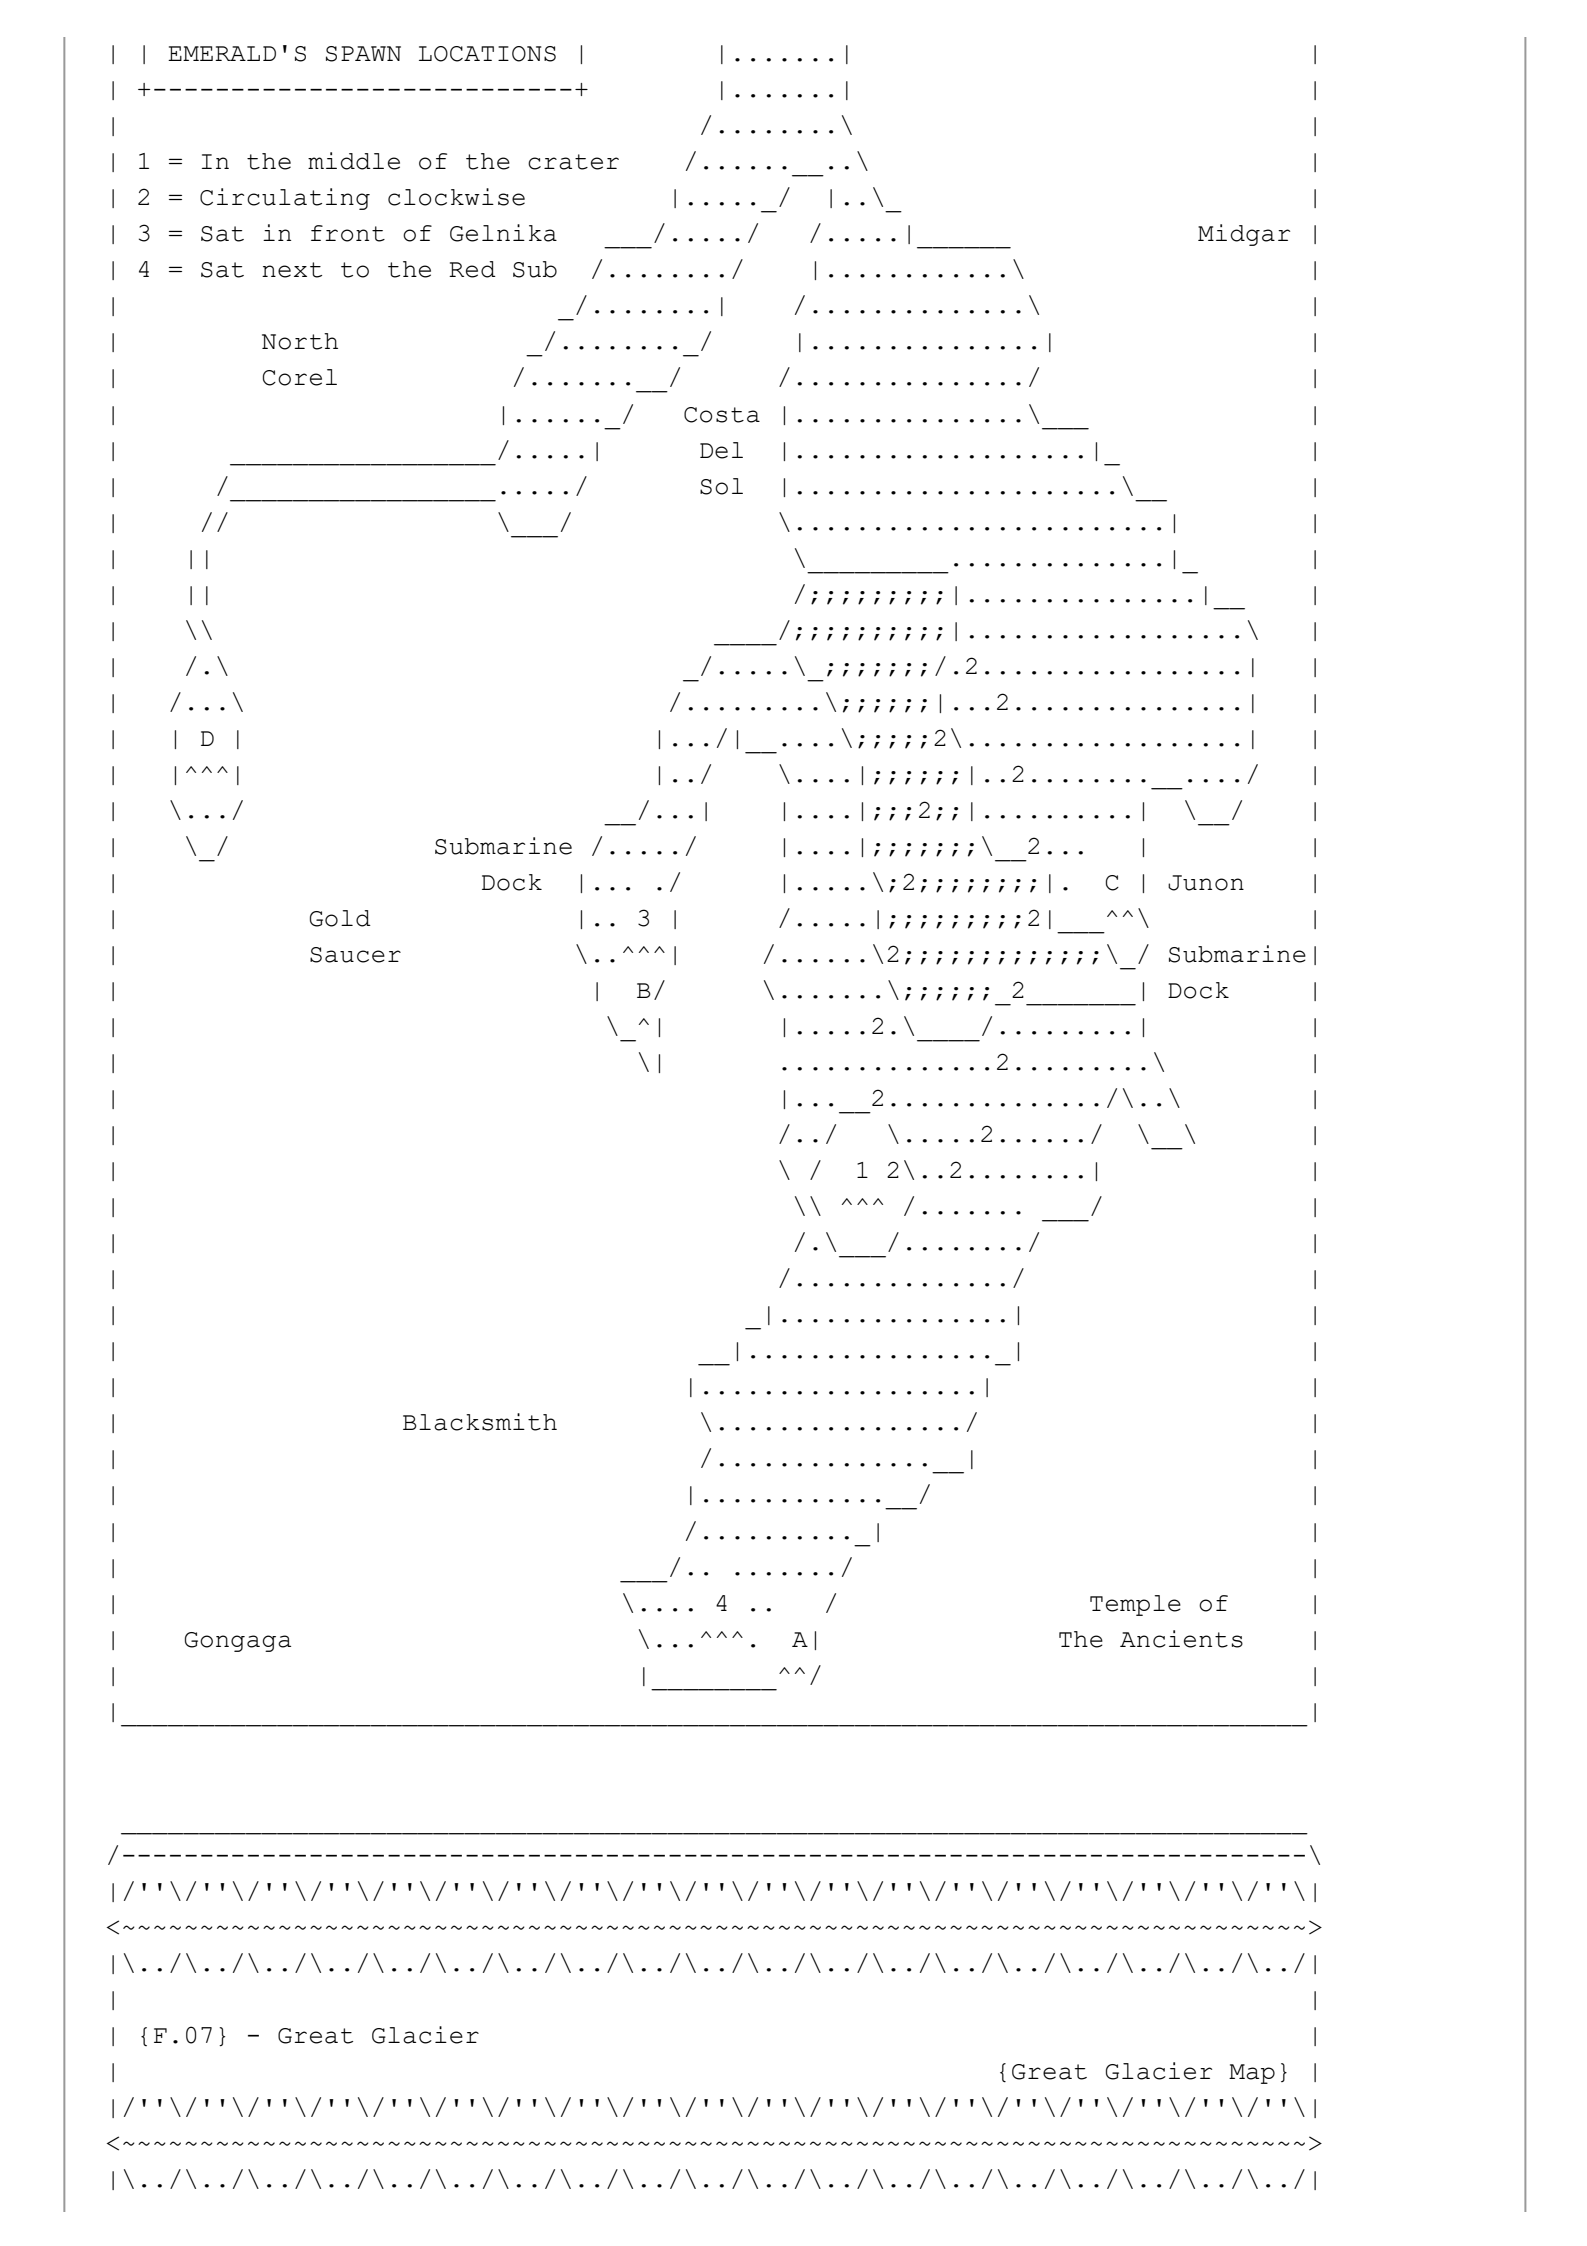
4 - HIGHWIND GLITCH - Face South in you Highwind, so the Materia Cave is to your left. Now strafe to the left pressing X at the last minute. If you time it right you'll land the Highwind on the grass whilst Cloud is on the dirt track below.



{F.06} - Ocean Floor

{Ocean Floor Map}





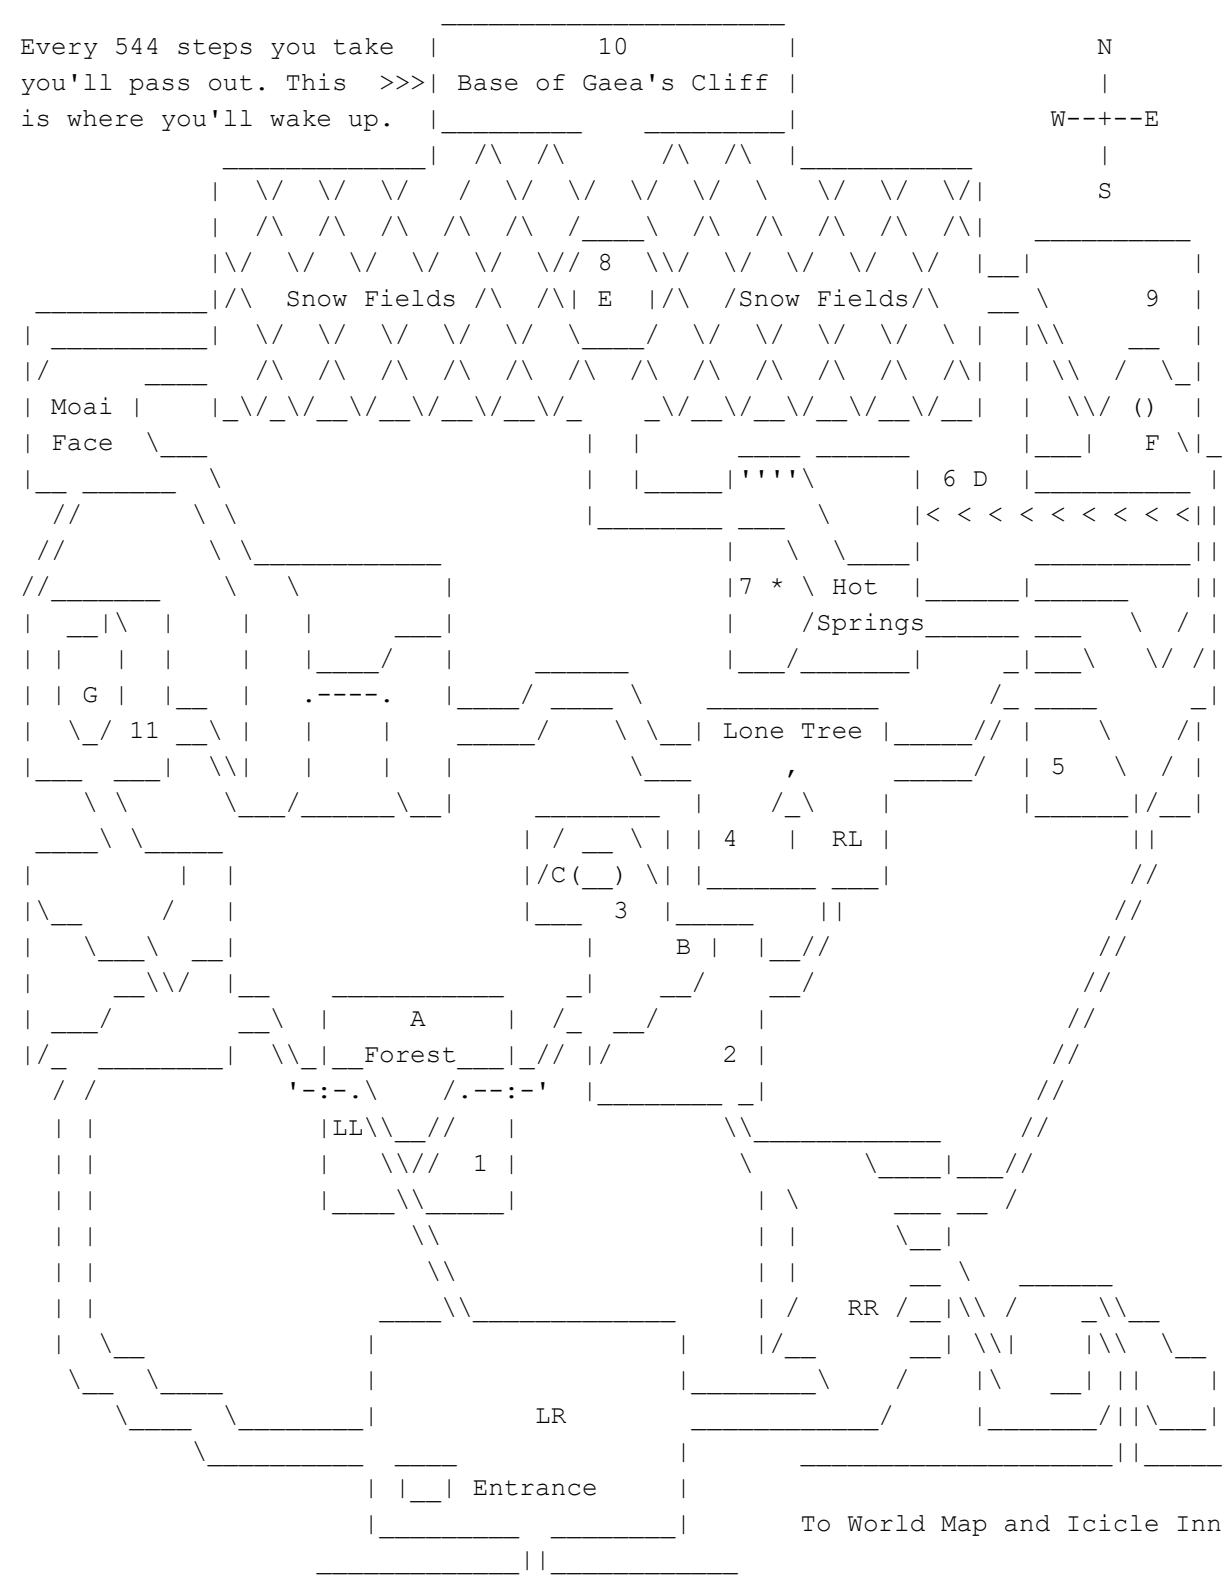
{F.07} - Great Glacier

{Great Glacier Map}

\----------/

^^

(A) Mind Source, (B) Potion, (C) Safety Bit, (D) Added Cut Materia,
(E) All Materia, (F) Alexander Materia, (G) Elixir



^^

If you'd taken the :-

Left + Right path you would have landed at the entrance. Head north to

continue on from the forest.

Right + Left path you would have landed at the Lone Tree. Head south, then west to continue on from the forests.

Left + Left path (as advised) you would have landed in the forest.

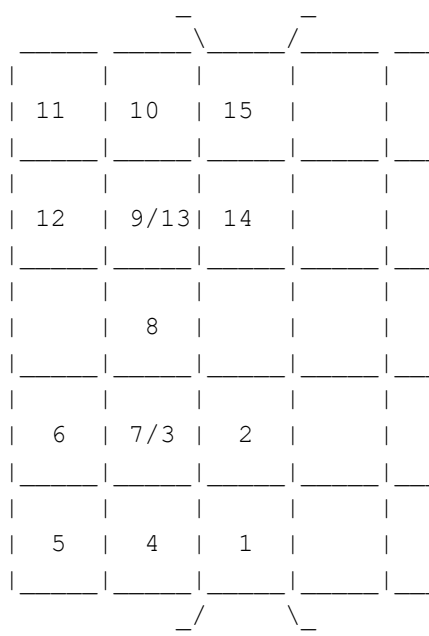
Right + Right path you would have landed east of the entrance. Make your way through the south screen to arrive at the entrance then continue north to come to the forest

1.) At the very north of the screen in the forests, you'll be able to pick up (A), the [MIND SOURCE]. Now head east two screens to 2.

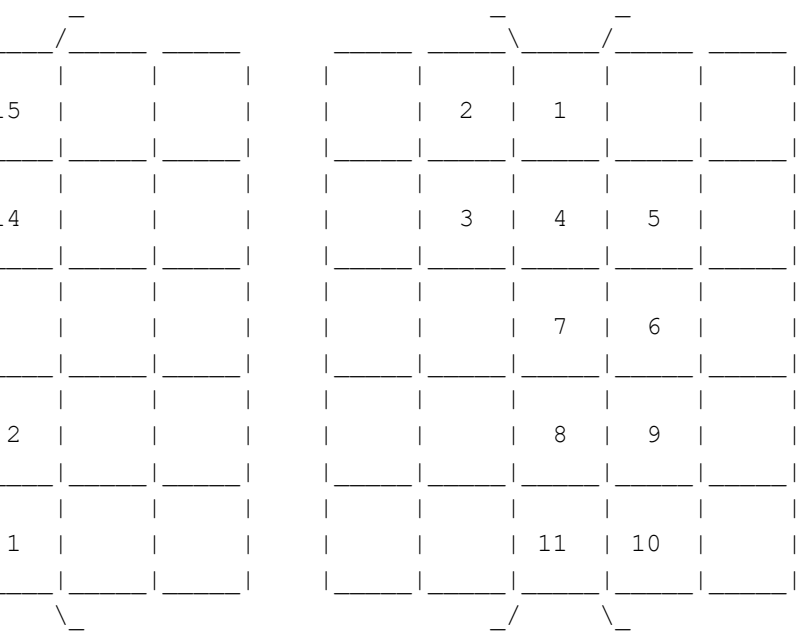
2.) To the north east of the screen you'll be able to pick up (B), the [POTION]. By not pressing O a second time, you can add one to your inventory whilst retaining the Potion's 'source'. Meaning, it'll still be there when you run back. Now head north west to 3.

3.) You'll have to step on the ice blocks in a certain sequence here to be able to get to the other side. The same goes for on the way back. In the cave ahead you'll be able to find (C), the [SAFETY BIT] (be sure to get this).

HEADING NORTH:



HEADING SOUTH:



4.) Picking a second 'infinite' potion as you return through section 3, make your way east two screens to the Lone Tree.

5.) Heading east, make your way 4 screens up to the far eastern mountainside 'split'.

6.) Now head through the far eastern exit, this is a one way path that can only be travelled on from screen 5. Along the path on the second screen to the right you'll just about to be able to make out (D), the [ADDED CUT MATERIA] in the snow.

7.) You should now emerge at the hot springs. MAKE SURE to examine the left side of it to 'touch it' as you won't be able to grab the Alexander Materia otherwise. Then make your way 3 screens to the north to come to the snow fields.

8.) Every second or so press O to lay down a marker. When the wind throws you off direction, stop moving. Use the markers that you have placed to pick up your orientation. Firstly, head north to find and igloo type cavern containing (E) the [ALL MATERIA].

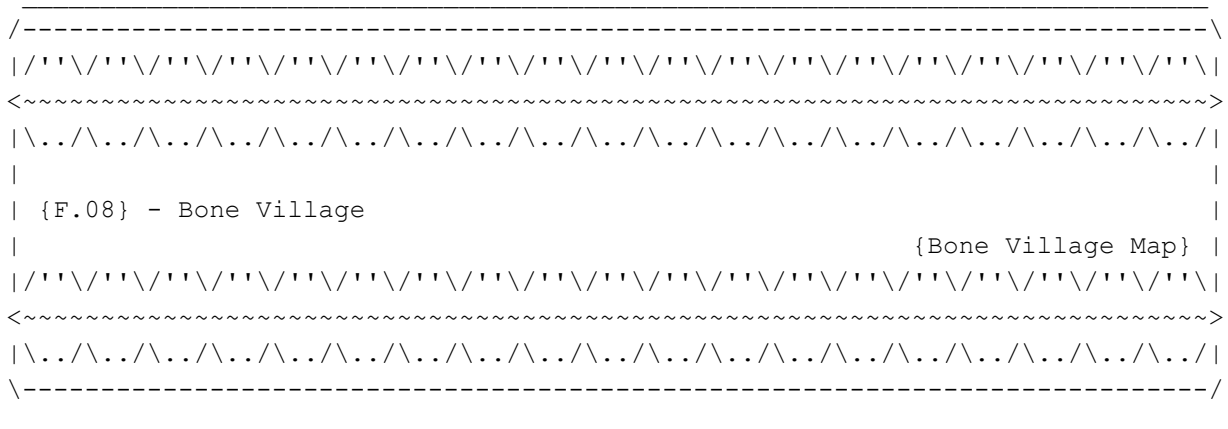
9.) Now head out of the igloo and head east. After you've travelled through 4 screens you'll find yourself on more mountain side paths. Head into the eastern cavern and remove Counter Attack. As long as you touched the hot springs earlier then you can fight the Snow here, and even though the music suggests a boss battle it's actually just the same Snow as listed above. Make sure to steal a Circlet from her. Once she has been defeated she'll leave behind (F), the [ALEXANDER MATERIA].

10.) As long as you've managed to grab the Alexander Materia without passing out then you'll have succeeded in grabbing as much as I intended for you to grab. You can attempt to make your way over to the remaining Elixir on the far west side, but it's highly doubtful that you'll make it in time (although it is possible). There is an exploit you can make use of here, however. I suggest at this point either making your way back to the Snow Fields and then north to find Holzoff's cabin, or just running around until you pass out, you'll then awaken in his cabin.

Once at the cabin, you'll have to listen to Holzoff's story to continue. After spending the night there head outside to hear Barret embarrass himself, then your teammates will join you. Head south back to the Snow Fields. When you head back out you'll have a fresh 544 steps to play with.

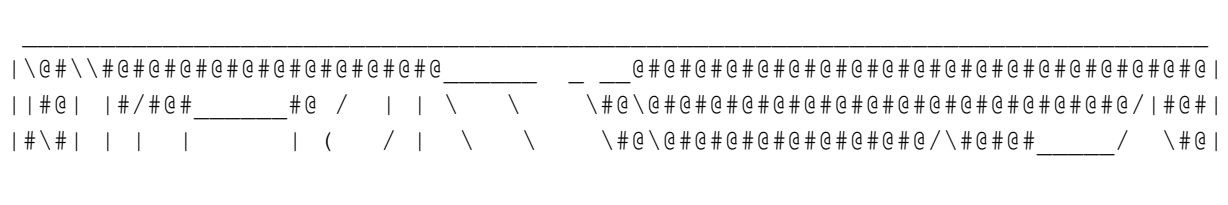
11.) From the Snow Fields head all the way to the west 3 screens to arrive at more cliff sides. Now make your way west 3 screens to arrive at a cavern that can be entered from both sides. the final item here, the [ELIXIR] (G) can be duplicated as many times as you please, as long as you don't pick up the source (exactly like the Potion we saw earlier, but unfortunately not the Mind Source).

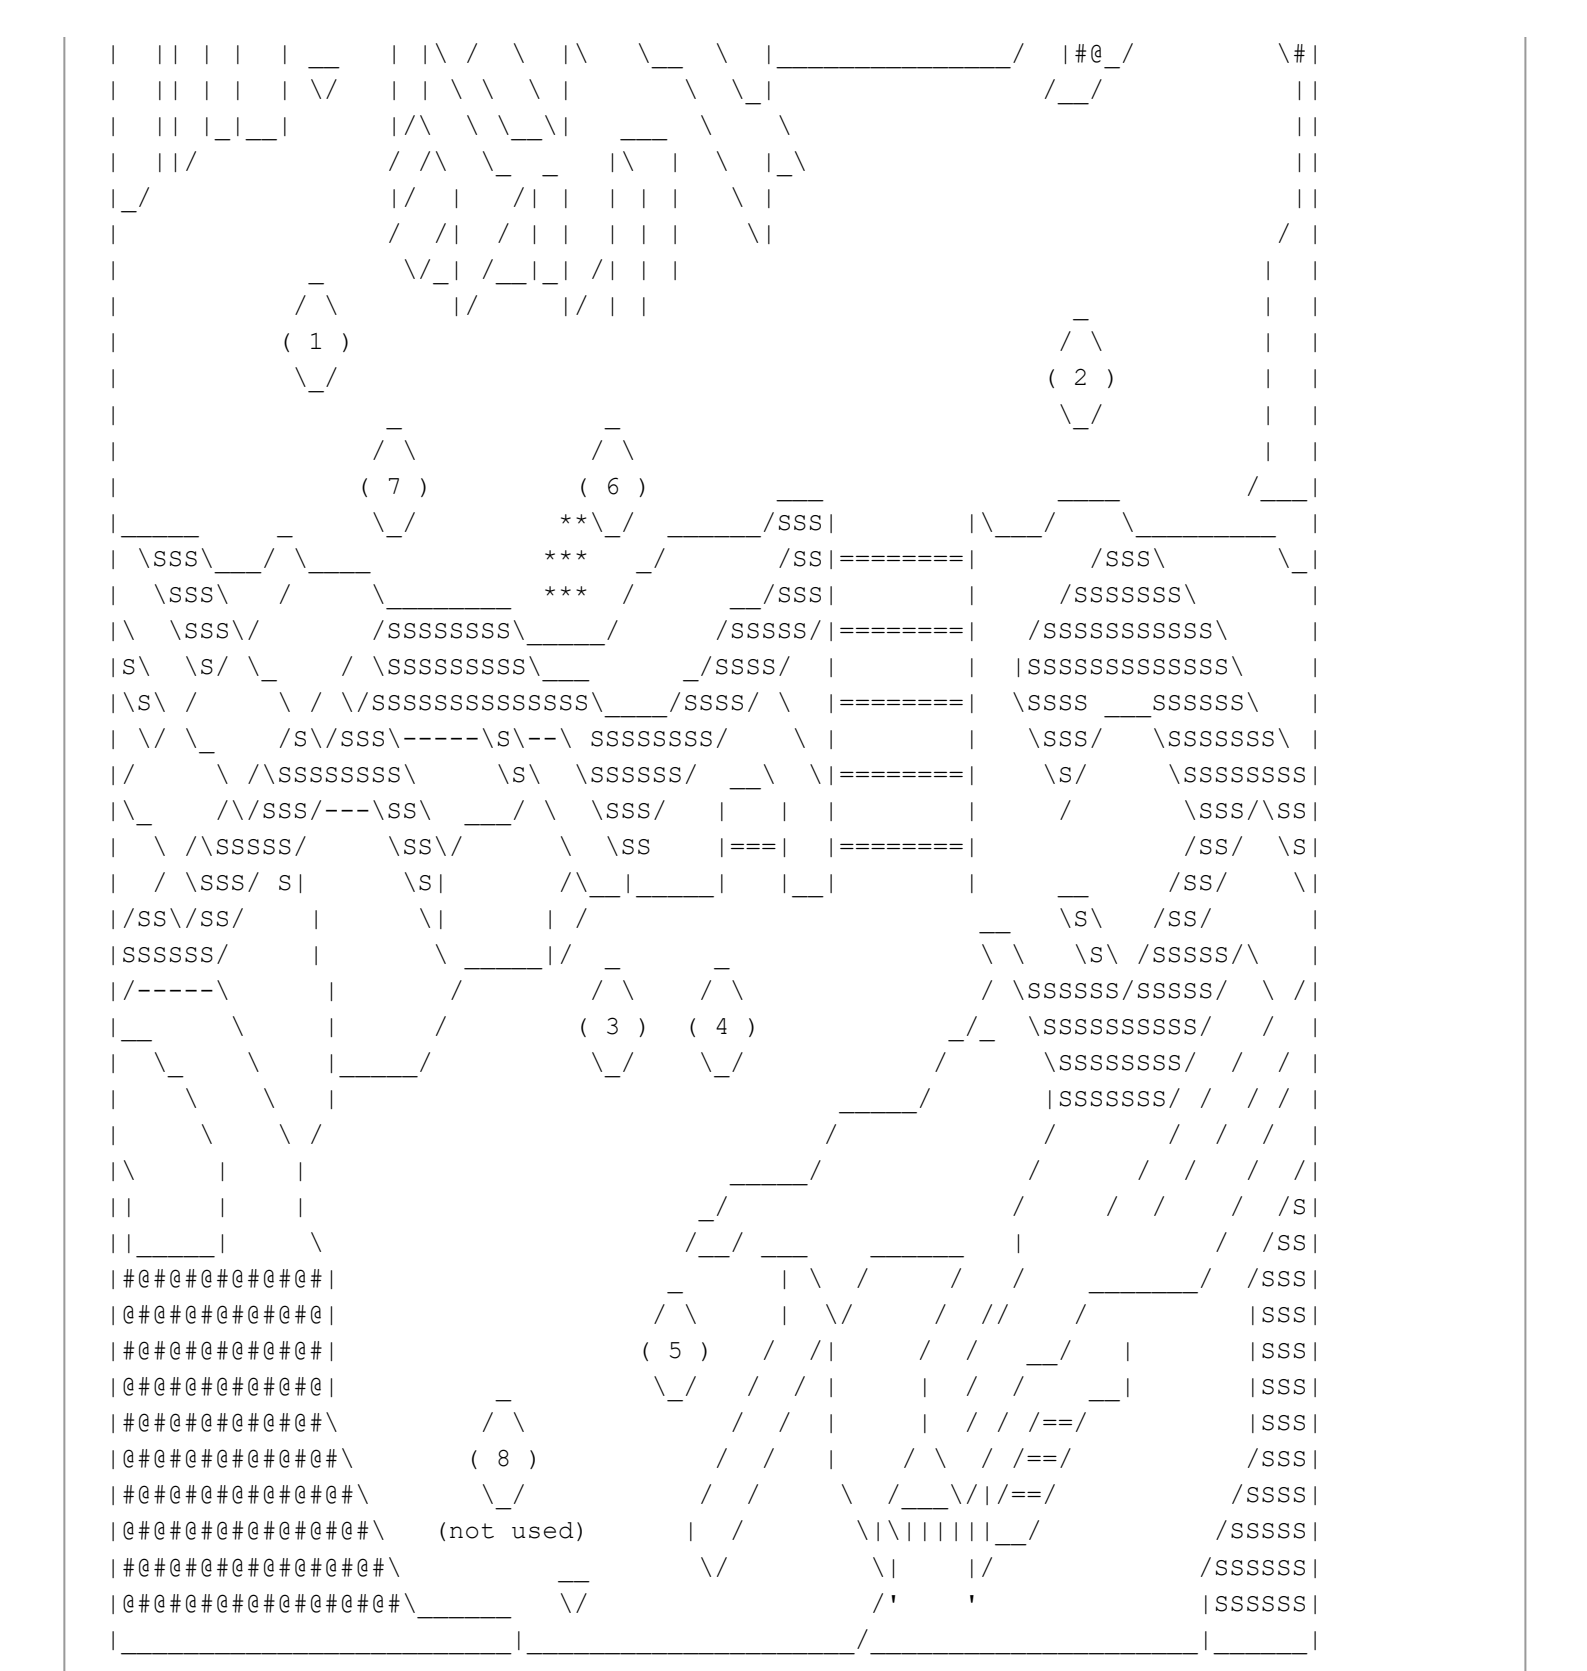
Press O once to have the message 'Received Elixir' appear, but DON'T press O a second time. Instead, run out of the cavern and back in again. The Elixir will still be there, and you'll have added one to your count. As long as you don't accidentally pick up the source of the eternal Elixir, then you'll be able to keep coming to this spot as many times as you like.



{F.08} - Bone Village

{Bone Village Map}





*Available on Disc 2, after the Lifestream events (Key to Sector 5)
**Available on Disc 3 only (Phoenix, Bahamut ZERO and W-Item)

Standing on a spot that isn't one of the 7 used dig spots will result in a
50% chance of receiving a Potion, and 50% chance of receiving nothing.

```

Detailed below are all 105 Items, listed in order of their in-game ID value. Items 0~69 are battle-related items, and Items 70~104 are menu-only items. After which are all 51 Key Items.

DON'T FORGET TO USE THE QSI (Quick Search Index) LINKS! To skip directly to the item you are after, use CNTR+F then search for the item you're after, surrounding the criteria with braces {}, keys above [].

UPDATE - I have now added links to pics for all Items, which have been taken from the bonus disc on the Japanese International version. The Desert Rose, Earth Harp and Guide Book have been taken from the Ultimania Omega. The Mystery Panties, Letter to a Daughter & Letter to a Wife are dummied out, and no picture exists for them.

You can view the FFVII Items picture album here:

Drop Rate:

The drop rate of an item is always ([x] + 1) / 64, so if you see [63] then you will have a 100% chance of getting that item. If an item has [8] drop rate then the chance of that item being dropped will be 9/64 (14.06%). Bear in mind that an enemy may have more than one drop-able item, and the previous Item drop chances must first fail before the current item can be obtained.

Steal Rate:

The steal rate mechanics work slightly more complex. You have to take into account the Player's Lv and the Target's Lv. If you are 10 levels higher than your opponent, then the steal chance works the same as the drop chance. If you are 60 levels higher than your opponent, then the steal chances are double that of the drop chances. Wearing a Sneak Glove will always set your Lv difference to 60 as a minimum. This means that wearing a Sneak Glove gives you a 100% success rate with items that have [32] steal rate.

A = 40 + Player's Lv - Target's Lv
B = (A * 512) / 100
C = (B * Item Steal Rate) / 256

Steal Chance = (C + 1) / 64

Damage Calculations:

If an Item deals non Gravity-based or healing damage, then the damage output will be calculated as follows:
(Item Strength * 16) * ((512 - Target's Def) / 512).
After this, Random Variation kicks in which will reduce the output by 0% - 6.22% for the final figure.
"Base Damage" is calculated assuming 0 Def on target.
A target's Def (or MDef) stat will not be considered if the item is Healing.

Note that items such as the Fire Veil and Ice Crystal which state they use Fire3 and Ice3 etc. do not actually use said magic, as the Character's Lv and Magic Attack are *not* considered when using such items. The only thing looked at when using an Item is the Item's Strength and the Target's Def/MDef. So, if you were playing a low level playthrough, then a Fire Veil would be much stronger than using Fire3, and conversely, if your party was end-game OP then Fire3 would do MUCH more damage than a Fire Veil.

Random Variation:

Some Items will use Random Variation (such as a Molotov), which will randomly reduce the damage up to 6.22% (3841/4096 lowest, 4096/4096 highest), and some items (such as a Potion) will be exempt from Rnd Var, and will always deal 100% damage. I have denoted whether an Item has Rnd Var set to ON or OFF.

If an Item attack all targets, then the damage dealt will *not* be split damage for 2/3 output (unlike your magic attacks when paired with All).

All items that use the Restorative Element can be used to damage "Undead" creatures (Enemies that absorb Restorative).

All damaging items are exempt from the Barrier/MBarrier checks, as well as Long Range checks (so using a Grenade on an enemy in the back row/character in the back row will not matter). Criticals will never apply, also.

DYNAMIX DJ'S FFVII ENEMY DATABASE & CALCULATOR:
https://gamefaqs.gamespot.com/boards/197341-final-fantasy-vii/77502737

This section of the guide is one of the largest sections. Here you will find a listing of every possible enemy encounter, along with their chances of appearing, as well as EXP, AP and gil value for every battle on each screen "grouping". I have also given each screen a personal "Training Rating" based on the average EXP AP and Gil, enemy quantity, and overall Encounter Rate for that screen grouping.

Note that the average EXP, AP and Gil for each screen is considered a mathematically "true" average, seeing as the calculations have considered not only the individual encounter chances, but also the way in which the game considers the "Special Battle" chances against the "Normal Battle" chances; explore the link to my database posted above for the calculator.

You will also find detailed information on each enemy, including a "Battle Plan" which is a simplified version of the enemy's raw AI Script as dissected directly from the scene.bin itself (and not copied from the other sources out there). You can view my work on the Enemy AI here:

https://pastebin.com/raw/mjfRFNsZ

//>~~~~~~~~~~~~~~~~~~~~~~~~~<\\
||> {ENCOUNTER RATES} <||
\\>~~~~~~~~~~~~~~~~~~~~~~~~~<//

When a battle occurs, the game *firstly* considers the chance of a "Special Battle" as an x/64 chance, and if that check fails it then moves onto the 64/64 "Normal Battle" chances (works slightly differently on World Maps).

Take the Sector 6 Destroyed Road as an example:

	Area Enc Rate:	
Sector 6 Destroyed Road	72	Medium

Average: EXP: 60.9 AP: 6.5 GIL: 252.7 Enemy QTY: 2.02

<C> The Whole Eater [A] covers the Whole Eater [C]
The Whole Eater [B] covers the Whole Eater [D]

[42/64]	Nrml Bat #1	EXP - 44	1st Row: 1x Hell House	
	Pre-Emp OFF	AP - 6		
		GIL - 250		#380
[22/64]	Nrml Bat #2	EXP - 96	1st Row: 2x Whole Eater <C>	
		AP - 8	2nd Row: 2x Whole Eater	
		GIL - 280		#381
[8/64]	Side Attack	EXP - 44	1st Row: 1x Hell House	
		AP - 6		

```
|                        GIL - 250                                      #382 |
|                                                                             |
|   [8/64]  Pinc Attack  EXP - 72      1st Grp: 2x Whole Eater                |
|                        AP  - 6       2nd Grp: 1x Whole Eater                |
|                        GIL - 210                                      #383 |
'-----------------------------------------------------------------------------'
```

NOTES - The values you see on the right (#380 etc.) are the Formation IDs for the encounters. They exist primarily to enable me to error check my work in the future and you can ignore them unless you plan to work with FFVII on a coding level. The values are in decimal.

The Hell House battle is a good example of a battle in which the Battle Spoils vary; if you kill the Hell House in its 1st Form, you will get 50 more gil than if you had killed it in its 2nd Form. The spoils displayed always show the *max possible* spoils for the encounter (and as such the "Averages" also reflect the max potential spoils).

Firstly the game will consider the check for the "Special Battles", which in this case is the Side Attack and the Pincer Attack. Together they produce a 16/64 chance of occurring; if that 16/64 chance fails, then the game moves onto the final 64/64 chance of one of two Normal Battles occurring.

Because of this, the normal battles have an overall 48/64 (75%) chance of occurring, seeing as there is a 16/64 (25%) chance they will *not* occur. This gives each encounter the following *actual* chances of occurring:

```
  Normal Battle 1 - [63/128]
  Normal Battle 2 - [33/128]
      Side Attack - [16/128]
    Pincer Attack - [16/128]
```

The mechanics on the World Map works slightly differently. Instead of having two x/64 checks as it does on the Field Maps (one for the Special Battles and another for the Normal Battles), the World Map has FOUR x/64 chances:

- The first x/64 check considers the Back Attack chance (both of them together if there are two Back Attack encounters).
- The second x/64 considers the Side Attack chance.
- The third considers the Pincer Attack chance.
- Finally, if those three checks have failed, then it moves onto the remaining 64/64 chance of the Normal Battle.

For the sake of simplicity I have worked out the exact encounter chances as a per cent, also factoring the default Pre-Emp Lv of 16 on the World Maps reducing the likelihood of receiving all Special Battles by 16/256; read below.

So, Sector 6 Destroyed Road will be displayed as:

```
.-----------------------------------------------------------------------------.
|  [49.2%]  Nrml Bat #1                                                       |
|  [25.8%]  Nrml Bat #2                                                       |
|  [12.5%]  Side Attack                                                       |
|  [12.5%]  Pinc Attack                                                       |
'-----------------------------------------------------------------------------'
```

These per cent chances will *not* factor in the possibilities of encountering the Mystery Ninja or Chocobo, nor will the calculated average EXP/AP/Gil values earned factor in the impact of meeting the Mystery Ninja/Chocobo.

!! NOTE !!

!! The chances worked out for the Chocobos will assume you to have a LEVEL 1 CHOCOBO LURE Materia. For more info on the Chocobo Encounter chances, visit the Chocobos section further below in the "Extra Enemies" section. !!

You will find an "Average EXP/AP/Gil" calculated for each screen 'grouping'. These averages should be considered as mathematically correct figures, as they have taken into consideration the overall encounter chance each formation has.

Take, for example, the Corel Prison Desert screen:

```
 60/64  Land Worm     gil = 256
  4/64  Cactuar       gil = 10,000
```

To calculate the average gil earned, we go:

```
  Average gil earned = ((60 * 256) + (4 * 10,000)) / 64
  Average gil earned = ((15,360) + (40,000)) / 64
  Average gil earned = 55,360 / 64 = 865
```

The 'average' figures have then been used to formulate a "Training Rating" for each screen grouping within the game. Credit to NFITC1 for help with the mathematics behind the 'average spoils per screen'.

{PRE-EMPTIVE LEVEL}

Your base chance of performing a Pre-Emptive Strike is always 16/256. This increases to (and can stack up to a maximum of 85/256):

- 32/256 With a Lv 1 Pre-Emptive Materia
- 38/256 With a Lv 2 Pre-Emptive Materia
- 44/256 With a Lv 3 Pre-Emptive Materia
- 50/256 With a Lv 4 Pre-Emptive Materia
- 64/256 With a Mastered Pre-Emptive Materia

The chances are the same for both Field and World Maps. Note that the Pre-Emptive chance occurs *after* a Normal Battle has been selected as a fresh (default) 16/256 chance (provided the Encounter itself allows for Pre-Emptive Strikes).

!! NOTE !!

!! A Pre-Emptive Strike will *only* be considered if the Battle Type

```
  !!  is a Normal Battle, and will never occur for a Back-Attack,        !!
  !!  Side-Attack or Pincer-Attack. Random Encounters *must* be enabled  !!
  !!  on that screen, and  the "Pre-Emp OFF" Flag must not be used for   !!
  !!  the encounter.                                                     !!
  ''-                                                                  -''
```

Please note that I will not be denoting the use of the 'Pre-Emp OFF' Flag during instances whereby the flag will be off by default, such as a Boss Battle on a screen with no random encounters, or if random encounters have been disabled.

Let's say you pass the 25.8% chance of receiving Normal Battle #2 in the example given above; you will have a follow-up 6.25% chance of back-attacking the 4x Whole Eaters (with no Pre-Emp Materia). This will provide you with an *overall* 24.2% chance of fighting them normally, and a 1.6% chance of back-attacking them while traversing on that screen.

On the World Maps, you have a default "Pre-Emptive Level" of 16, which reduces your chances of receiving a Special Battle (including Side-Attacks) by 16/256. This decreases to:

- 64/256 With a Lv 1 Pre-Emptive Materia
- 76/256 With a Lv 2 Pre-Emptive Materia
- 88/256 With a Lv 3 Pre-Emptive Materia
- 100/256 With a Lv 4 Pre-Emptive Materia
- 128/256 With a Mastered Pre-Emptive Materia

The maximum the Pre-Emptive Materia can stack to reduce the chance of receiving a special battle on the World Maps by is 170/256.

On the Field Maps, a Lv 1 Pre-Emptive Materia does nothing to the Special Battle chance (it only affects your chance of gaining a Pre-Emptive Strike). It will just affect the Special Battle chance once you have mastered it, at which point it will straight halve your chances of receiving Back Attacks and Pincer Attacks (but not Side Attacks).

```
 //>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
 ||>    {AREA ENCOUNTER RATES}    <||
 \\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<///
```

The Encounter rate will produce a HIGHER chance of an encounter the LOWER the value, and vice-versa. Also, while on the World Map the encounter chances have been halved, so a World Map Enc rate of 64 is the equivalent of 128 on a Field Map.

Field FIELD MAPS:

- Enc Rate 24 - Insanely High!!!
- Enc Rate 32 - Extremely High
- Enc Rate 40 - Very High
- Enc Rate 48 - High
- Enc Rate 72 - Medium
- Enc Rate 128 - Low
- Enc Rate 192 - Very Low
- Enc Rate 240 - Extremely Low

WORLD MAPS:

  Enc Rate 12 - Very High
  Enc Rate 20 - High
  Enc Rate 32 - Medium
  Enc Rate 64 - Low
  Enc Rate 96 - Very Low

Equipping a Mastered Enemy Lure Materia with a Lv 1 Enemy Lure Materia would give you the maximum boost in "Enemy Lure Rating", and would effectively double your chances of receiving a battle on both World and Field Maps.

Equipping a Mastered Enemy Away Materia with a Lv 1 Enemy Away Materia would give you the maximum decline in "Enemy Lure Rating", and would make it so you were eight times less likely to receive a battle.

```
 //>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
 ||>    {ENCOUNTER TYPES & FLAGS}    <||
 \\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<///
```

  Pre-Emp Strike - When the Player attacks the Enemy from behind
     Back Attack - When the Enemy attacks the Player from behind
     Side Attack - When the Player attacks the Enemy from both sides
     Pinc Attack - When the Enemy attacks the Player from both sides

The most amount of varying Encounter types you can find on a single map is ten: 6x Normal Battles, 2x Back Attacks, 1x Side Attack, and 1x Pincer Attack. Note that you cannot escape a Pincer Attack until you have destroyed one group. The only area to make use of all ten slots is the Cosmo 'Canyon' Terrain on the World Map.

The World Map also uses four additional slots reserved for the Chocobo encounters. The Mystery Ninja encounters are hard-coded in a separate file to the standard World Map Formation data.

When you are attacked via a Back Attack, your rows will be reversed, and you will have to manually change them back to normal via the "Change" Command if you want your standard rows back. During a Back Attack, the damage taken from the enemy is *not* considered as Back-Damage; a flaw in the game's coding means that the Player will take normal instead of double damage when back attacked. The Player does, however, take double damage when taking back damage during a Pincer Attack encounter.

During a Pincer Attack, the "Grp 1" enemies will be on the left side, and the "Grp 2" enemies will be on the right.

Your outside characters will be facing the left (Grp 1) enemies, and your central character will be facing the right (Grp 2) enemies. Every time the enemy attacks from behind, you will take double damage and then turn to face your last attacker. You will then be vulnerable to taking double damage from the enemies you have your back exposed to.

Various Encounters will have enabled/disabled the use of specific flags, such as the "Can't Escape" Flag, or the "Pre-Emptive Strike" Flag, and I have

noted the particular occasions where a Battle does not use the default settings.

This also includes the times where an Encounter deactivates the end-of-battle Victory Pose or the Victory "Fanfare" Theme. Normally, a randomly encountered Battle should play the "Fighting" Theme, and a Boss Battle should play the "Still More Fighting" Theme; wherever a non-regular Battle Themes is scripted to play out, I will have made a note of it.

!! NOTE !!

!! If random encounters are OFF by default on a particular screen (or if the field scripts have manually disabled Random Encounters), then by default then the "Pre-Emp" Flag will also be OFF, meaning that you cannot perform a Pre-Emptive Strike against the Forced Encounters on that screen. !!

Because of this, the developers overlooked five occasions whereby they had needed to disable the Pre-Emp Flag for boss battles on field maps where Random Encounters are *enabled*, those five being:

- Aps
- Jenova-BIRTH
- Turks Gongaga Battle
- Snow (Boss Battle)
- Turks Raid on Midgar Battle

Note that the Snow enemy can be back-attacked when you encounter her normally, so this may not have been an oversight.

It is uncommonly known that a 6th encounter also falls victim to this same bug; the forced battles on the first screen in the Cave of The Gi with the Gi Spector should also have made use of the 'Pre-Emp OFF' Flag, seeing as the other randomly encountered Gi Spector cannot be back-attacked.

The Attack Squad in Mt. Corel Reactor on Disc 2 can also be Pre-Empted.

For a normal regular Battle, the "Run Count" will be set to 1, which means that your chances of escaping while holding L1+R1 will be normal. For Back-Attacks, this value will commonly be set to 2, which means that you will have a harder time escaping. If it set to 3, then you may find yourself waiting a while before you can escape.

If the Run Count is set to 9, then that means that it will automatically trigger the "Can't Escape" Flag (and in such cases, I won't bother to note that a Run Count of 9 has been used; I'll just note it as "can't Escape").

If an enemy is in a row that ISN'T the Font Row, then it will automatically have the Back Row flag set for damaging purposes. Once all of the enemies in the front row have been killed, all of the enemies in the row behind it jump forwards by one row.

Take for example the 6x Battery Caps, which have enemies in rows 1, 2 and 3. If you take out the Battery Cap in Row 1 then and all of the Battery Caps in Row 2 become the Row 1 Battery Caps, and the ones in Row 3 jump to Row 2.

The Battery Caps also make use of the "Cover" Flag, whereby the enemies in

the front row must first be killed before the ones behind it can be targeted. There are several examples of this flag being misused, see the Bugs And Glitches section below.

```
 //>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
 ||>    {STEAL AND DROP RATES}    <||
 \\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<///
```

You will find a list of Enemy Loot for each area. Here is an example of how it will look:

```
       .-------------------------------------------------------------------------.
       |          DROP          |         STEAL          |       MORPH       |
       '------------------------+------------------------+-------------------|
  POTION  |                     |                        |                   |
----------'                     |                        |                   |
       | MP               [8]  | Guard Hound       [32] | MP                |
       | Guard Hound      [8]  |                        | Guard Hound       |
       | Mono Drive       [8]  |                        | Grunt             |
       | Grunt x2         [8]  |                        | 1st Ray           |
       |                       |                        | Sweeper           |
       '-------------------------------------------------------------------------'
```

Drop chances are easy enough to work out. It is simply: (rate + 1)/64. So, a drop rate of [8] has a 9/64 (14.06%) chance of being dropped; [32] has a 33/64 (51.56%) chance, and [63] has a 100% chance. Sometimes you will see an Item drop rate of [2], which will only be a 4.69% chance.

The Steal mechanics work slightly more complex. In short, if you were ten levels above your target, you would have the same chances as the Drop mechanics. If you were 60 levels above your target, then the Steal rates effectively become doubled.

Equipping a Sneak Glove sets your level (for stealing purposes only) automatically to 60 levels above your target, so a Steal rate of [32] would be an automatic steal with the Sneak Glove equipped.

Note that you cannot obtain the Steal AND the Drop; it's one or the other. You can, however, receive the Morphed Item if you have already stolen from the enemy.

Here is formula for the Steal chances:

```
  [ Item Steal Chance * (((40 + Player Lv - Target Lv) * 512) / 100) ] / 256
```

This gives you your new Item Steal rate, which again can be considered as a (rate + 1)/64 chance.

So, let's say you were Lv 13 trying to steal the Striking Staff which has an [8] Steal chance from the Eligor, who is Lv 12:

```
  [8 * (((40 + 13 - 12) * 512) / 100)] / 256
              [8 * ((41 * 512) / 100)] / 256
                  [8 * (20,992 / 100)] / 256
```

[8 * 209] / 256
1672 / 256 = [6] Steal Rate

Remember that this is Integer division, which means you always have to round down at the end of every division.

The final Steal chance is [6], so (6 + 1)/64 gives us a 10.94% chance of getting the steal. Had the Steal rate been 32, then we would have a 42.19% chance, or (26 + 1)/64.

If you were greater than 40 levels lower than your target, then you will have a 0% chance of stealing. If you were between 40 - 34 levels lower, then you would have a 1/64 chance; 33 level difference or less and your chance starts to improve.

Some Enemies will have more than one Drop or Steal. In these instances, you will have a check occur *for each Item*, which plays out sequentially. Take, for example, the Mighty Grunt:

```
  '--------------'
 /  Mighty Grunt  \
/~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~\
|  Level:     12  ||   Strength:  20  ||    Drop: Tranquilizer  [8]          |
|  HP:       230  ||    Defence: 100  || Steal 1: Tranquilizer  [32]         |
|  MP:         0  ||      Magic:   6  || Steal 2: Grenade       [8]          |
|                 ||   MDefence:  64  ||   Morph: /                          |
|  EXP:       50  ||  Dexterity:  40  ||                                      |
|   AP:        4  ||       Luck:   0  || Back Damage: Normal (2x Damage)     |
|  GIL:       98  ||      Evade:   0  ||                                      |
|>~~~~~~~~~~~~~~~~oo~~~~~~~~~~~~~~~~~oo~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
```

Let's pretend that the nominated "thief" (which should always be your highest levelled character; Cloud) is ten levels greater than the Mighty Grunt; this would give you a 33/64 (51.5625%) chance to steal the Tranquilizer from it.

If that check fails, you then move onto the 9/64 (14.0625%) chance of stealing the Grenade. This means that you have only a 31/64 (48.4375%) chance of getting the 9/64 chance of getting the Grenade, which means that your *exact* chances of receiving the Grenade is 279/4096 (6.8115%).

The greater the level of the Player, the greater the chance of stealing the Tranquilizer, and in turn lowers the chance of stealing the Grenade.

There is a cut-off point in which the Grenade can no longer be stolen, and that is once the thief has a 100% chance of getting the Tranquilizer; in this instance that is once the thief has reached Lv 71.

The most classic example of an enemy carrying an Item that becomes locked off once your Lv is too high is the Bagrisk's infamous Vagyrisk Claw, which cannot be obtained if you are level 78 or higher (see notes on the Bagrisk for more info). The Vagyrisk Claw is permanently missable as a result.

!! NOTE !!

```
..-                                                              -..
!!  The per cent chances that you see for the Steal rates are based on !!
!!  the 'Thief' being the *SAME LEVEL* as the enemy.                  !!
''-                                                              -''
```

I will typically work our the Steal chance as a per cent in the "Notes" section for each enemy, assuming Cloud's average level at the time of encountering the enemy.

When an enemy has more than one Drop, the checks play out in the same way, the only difference being that the chances are fixed and not dependant on the Player/Target's Lv.

The Mono Drive's Potion Drop chance is [8], or 9/64 (14.0625%), and the Ether drop chance is [2], or 3/64 (4.6875%). Seeing as there is 9/64 chance of the Potion chance succeeding, and a 55/64 chance of it failing, this gives the Ether a "true" Drop chance of 165/4096 (4.0283%).

For the enemy listings, I have worked out the Item Drop chances as a per cent, accounting for the impact that the first Drop chance has on the second, so that the Mono Drive will be displayed as:

```
  '------------'
 /  Mono Drive  \
/~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~o~~~~~~~~~\
|  Level:      2  ||   Strength:   3  ||  Drop 1: Potion  [8] 14.06%         |
|  HP:        28  ||    Defence:   6  ||  Drop 2: Ether   [2]  4.03%         |
|  MP:        28  ||      Magic:   3  ||   Steal: /                          |
|>~~~~~~~~~~~~~~~~oo~~~~~~~~~~~~~~~~~~oo~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<|
```

When an enemy steals from the Player, the steal chance will always be 100%, *providing* there is at least one Item in the Player's inventory list that is flagged as stealable. This list is limited to all Items that can be sold in shops; if it cannot be sold, then it cannot be stolen.

Here is a list of all Items that cannot be sold/stolen:

- ALL Limit Break Manuals
- Battery
- Save Crystal
- Combat Diary
- Autograph
- Gambler
- Desert Rose
- Earth Harp
- Buster Sword
- Gatling Gun
- Seraph Comb
- Silver Barrette

Only four enemies in the game can steal from the Player: the Vice (Midgar Sector 5); the Prowler (Midgar Area World Map); the Bandit (Corel Prison; and the Magic Pot (North Crater Swamp Area).

```
 //>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
 ||>    {HIT CHANCES AND OTHER CHANCE RATES}    <||
 \\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<///
```

```
 >  HIT CHANCE  <
```

''''''''''

  Firstly, I would like to briefly explain how the player's 'base' stats (Strength, Magic etc.) affect the way the in-battle stats are considered (Attack, Magic atk etc).

Note that a bug exists in the earlier versions of FFVII involving the MDef not being set correctly. Instead of the 'Magic def' value being set to your Armour's MDef + Spirit, it will instead be set to just your Spirit stat. This means that the weapons you equip have no positive or negative effect on the damage you take from Magical attacks. This bug was fixed in the Steam and subsequent releases.

Stat:	In-Menu:	Player:		Enemy:
Att	Attack	Weapon Attack	+ Strength	Strength
Att%	Attack%	Weapon Attack%		Attack's Att%
Def	Defense	Armour Defense	+ Vitality	Defence
Def%	Defense%	Armour Defense%	+ (Dexterity / 4)	Evade
MAtt	Magic atk	Magic		Magic
MDef	Magic def	Armour Magic def	+ Spirit	MDefence
MDef%	Magic def%	Armour Magic def%		Evade

 - Actor's Level is used for Magical Hit chance
 - Actor's Level is used for Critical chance
 - Actor's Level is used for Manipulate chance
 - Actor's Dexterity is used for Physical Hit chance
 - Actor's Att% is used for Physical Hit chance
 - Actor's Att% is used for Magical Hit chance
 - Actor's Def% is used for Physical Hit chance
 - Actor's Luck is used for 'Lucky Evade' Physical chance
 - Actor's Luck is used for 'Lucky Hit' Physical chance
 - Actor's Luck is used for Critical chance

 - Target's Level is used for Magical Hit chance
 - Target's Level is used for Critical chance
 - Target's Level is used for Manipulate chance
 - Target's Def% is used for Physical Hit chance
 - Target's MDef% is used for Magical 'Lucky Evade' chance
 - Target's Luck is used for Physical 'Lucky Evade' chance

  Att, Def, MAtt and MDef are all used for damage calculations only (and also Level).

A Player's Magic stat is often increased by the weapon they have equipped; however, the amount it is raised by is hidden from the player (without comparing before-and-after stats).

The Dexterity stat not only contributes to your chances of avoiding attacks, but also how fast it takes for the actor's ATB gauge to fill. I will *not* be explaining how the turn-timer work in this guide; they are long-winded and unnecessary to go into (one for another FAQ).

When the player uses a *Physical* attack, the Attack% value of the Weapon equipped is considered for 'Att%'. For the enemy, the individual Att% of the ability used is considered.
For *Magical* attacks, the Att% of the *ability* used is always considered

for both the Player and enemy.

Any attack that has Att% of 255 will gain an automatic hit.

Fury will decrease Att% to 70% of its normal value for Physical and Magical attacks. Darkness will reduce Att% by 50% *for the Player's physical attack 'Command' only*. This does not mean that the ability used gains an *overall* 30%/50% drop (respectively) in hit chance, as the below formulas will demonstrate:

PHYSICAL ATTACKS:

For Physical Attack, the 'Lucky Hit' chance is firstly considered. This applies to both the enemy and the Player.

Lucky Hit Chance = (Actor's Luck / 4) + 1

This is considered as a per cent (x/100). The *base* Luck value (without Sources and/or Materia modification) only range from around 14 at the start of the game to a max of 30 at Lv 99; this means your Lucky Hit chance will range from 4% to 7% throughout the game, unless of course you manually boost your Luck stat.

If the initial Lucky Hit chance has failed, the normal Hit Chance formula is then applied:

Hit Chance = [Att% + Actor's Def% + (Actor's Dexterity / 4)] - Target's Def%

The Hit Chance can also be considered as a per cent (x/100). As you can see, the actor's own Def% value contributes to the chance they have of connecting.
An Att% of 100 will usually have a 100% chance of connecting unless the target has a high Def% (Evade) stat.
If your Dexterity and/or Defence% is high enough, you can still gain a 100% hit chance even with nerfs in place that reduce your Att%, such as Fury or Darkness. This is why the Mystile can be extremely useful (raises Defence% by 50) for your chances of hitting, not just avoiding attacks.

If at this point the chance to hit has succeeded, the 'Lucky Evade' chance comes into effect *which applies to the Player only* (when attacked by an enemy only). The enemy does *not* get a Lucky Evade chance.

Lucky Evade Chance = [(Player's Luck / 4) - (Enemy's Luck / 4)]

The Lucky Evade chance will *only* occur if the Player's Luck is higher than the attacker's Luck; you will gain a +1% Lucky Evade chance for every four levels difference (again, consider the value as x/100).

Almost two-thirds of all enemies have a Luck of 0, which means you'll have a 3% - 7% chance of gaining the 'Lucky Evade' throughout the game against most enemies, *without* modifying your base Luck value via Sources.

If any of the following apply, then the physical attack will be an automatic hit:
- Hitting a target that is covering another target (via Cover Materia)
- Hitting a target for a Back-Attack

- Hitting a target with an Element that it has a Death weakness to
- Hitting a target with an Element that it has an Auto Hit weakness to
- Hitting a target with an Element that it has an immunity to
- Hitting a target with an Element that it absorbs
- Hitting a target that has Death, Sleep, Confusion, Stop, Petrify, Manipulate and/or Paralyzed

MAGICAL ATTACKS:

Magical attacks do not have a preliminary 'Lucky Hit' chance; instead they just have a 'Lucky Evade' chance which is first considered, and *only the Player* gets a Lucky Evade chance:

Lucky Evade Chance = Target's MDef%

Once again, this can be considered as a per cent (x/100).
The Mystile will has a MDefence value of 60, which means that all Magical abilities will have a 60% chance of missing with the Mystile equipped, excluding abilities that have Auto-Hit in place.

If the initial 'Lucky Evade' chance for the Player has failed (or the target is an enemy), the normal formula for Magical attacks are then applied:

Hit Chance = [(Att% + Actor's Lv) - (Target's Lv / 2)] - 1

As always, this can be considered as a per cent (x/100). Assuming the Att% of the ability used is 100%, you will always connect with your Magical attacks if you are greater than half the level of your target.

If any of the following apply, then the magical attack will be an automatic hit:

- Hitting a target with an Element that it has a Death weakness to
- Hitting a target with an Element that it has an Auto Hit weakness to
- Hitting a target with an Element that it has an immunity to
- Hitting a target with an Element that it absorbs
- Hitting a target with a Reflectable attack while the target has Reflect
- Hitting a target with a damaging attack while the target has Death, Sleep, Confusion, Stop, Petrify and/or Paralyzed

Also, a few non-common conditions also allow for an Auto-Hit:

- Inflicting/Curing/Toggling a target of Frog that already has Frog
- Inflicting/Curing/Toggling a target of Small that already has Small
- Inflicting/Curing/Toggling a *Party Member* of Haste, Berserk or Shield
- The chance of inflicting the Status is 100%.

If an attack attempts to inflict a Status where the Status chance is *less* than 100% (or other Auto-Hit conditions have failed) , then the attack must first pass the Physical/Magical chance of connecting before the chance of the Status is considered, which lowers the chances of some Statuses being inflicted where the overall hit chance is less than 100%.

> DEATHBLOW CHANCE <
''''''''''''''''

The Deathblow chance is straightforward to calculate. It uses the same formula as the normal Physical Hit Chance, except for the fact that the ATT% value is divided by three (higher Dexterity = higher Deathblow chance.

The Auto-Critical Flag is enabled for Deathblow, naturally. It's worth noting that you can attack a target in the back row for full damage using Deathblow, provided the attack connects.

You may think that an attack that drops your Att% by two thirds to gain 200% damage is a bad thing. It isn't. For most of the time, your Att% will exceed the value needed to achieve a 100% chance if hitting.

By the time you get Deathblow, your Dexterity should be in the early-mid '20s. This would mean a 45% (approx) chance of connecting with Deathblow against enemies with an evade stat of 0 or 1 (which two-thirds of all enemies do).

By the time your Dexterity reaches 30, you'll have a 50% chance of hitting with Deathblow. The Armour you have equipped will modify that value slightly, but not much, seeing as most Armour's Def% ranges between 0-5, with a few exceptions.

Equipping the Mystile will massively boost your chance of landing with Deathblow, as it increases your Def% by 50 (+ Dexterity / 4)! Also, Tifa's God's Hand, and Vincent's Long Barrel R & Sniper CR both have 255 Att%, which means they will always have a 100% chance of connecting with Deathblow against *most* enemies.

> CRITICAL CHANCE <

The base chance of inflicting a Critical strike (before the Weapon's Crit% value is considered) is as follows:

```
Critical Chance = ((Actor's Luck + Actor's Lv) - Target's Lv) / 4
```

Again, this can be considered as a per cent (x/100). For the player *only*, the Critical chance can be furthered modified based on the Weapon's Crit% value:

```
Critical Chance = Critical Chance + Weapon Crit%
```

Of the 128 weapons in the game, 102 have a Crit% value of 0. This stat is hidden in-game, and only the following 26 weapons have a Crit% higher than 0:

- 1 Weapon with Crit% of 1: Kaiser Knuckle
- 13 Weapons with Crit% of 2: Leather Glove, Metal Knuckle, Grand Glove, Tiger Fang, Diamond Knuckle, Dragon Claw, Crystal Glove, God's Hand, Striking Staff, Spiral Shuriken, Magic Shuriken, Battle Trumpet
- 2 Weapons with Crit% of 3: Drill Arm, Pile Banger
- 6 Weapons with Crit% of 4: Nail Bat, Work Glove, Rocket Punch, Superball, Trumpet Shell, Silver Rifle
- 3 Weapons with Crit% of 5: Hairpin, Umbrella, Mop
- 1 Weapon with Crit% of 255: Masamune (Sephiroth)

So, let's give some examples of your chances of causing a Critical strike using real examples at various points in the game from the save file I'm working on (remember to add the Crit% value if using one of the above weapons):

```
Cloud Lv 6    Luck 14   Target Lv 2   -  Critical Chance = 4.50%
Cloud Lv 14   Luck 20   Target Lv 12  -  Critical Chance = 5.50%
Cloud Lv 22   Luck 22   Target Lv 19  -  Critical Chance = 6.25%
Cloud Lv 30   Luck 23   Target Lv 25  -  Critical Chance = 7.00%
Cloud Lv 38   Luck 24   Target Lv 32  -  Critical Chance = 7.50%
Cloud Lv 46   Luck 25   Target Lv 37  -  Critical Chance = 8.50%
Cloud Lv 54   Luck 26   Target Lv 42  -  Critical Chance = 9.50%
Cloud Lv 62   Luck 27   Target Lv 48  -  Critical Chance = 10.25%
```

Cait Sith's 'Lucky Girl' Limit Break grants automatic Critical hits and acts as an inflicted status on the player.

> MANIPULATE CHANCE <

The chance of manipulating an enemy is reasonably straightforward. The only two factors considered are the Player's and Target's Lv.

Manipulate Chance = ((50 + Player's Lv) - Target's Lv) + 1

The manipulate chance can then be considered once again as a per cent (x/100). This means that if you were the same level as your target, your manipulate chance would be 51%. Ten levels greater and your chance becomes 61%; 20 levels greater and your chance to manipulate becomes 71% etc.

To gain a 100% chance of manipulating your target, the character used would need to be Lv 49 levels higher. The HypnoCrown gives you an automatic 100% success rate of manipulating (providing the enemy can be manipulated).

When you try to manipulate all targets using Mega All, a new chance to manipulate each target will occur. As soon as one succeeds, the subsequent checks remaining (if any) will be discarded, meaning, you can only manipulate one enemy at a time per character.

Also bear in mind that if you are selecting all targets when manipulating, the chance rate will be subject to split damage, and as a result, your Manipulate Chance will be reduced to 66% of its standard value.

Only a physical attack will remove the Manipulate Status from an enemy.

{DAMAGE CALCULATIONS}

There are two types of "common" formulas; one for Physical Attacks and one for Magical Attacks. These formulas have been used to calculate the "Base Damage" values that you will see for each Attack found upon each enemy.

Physical Damage Formula:

```
  ([ Att + (((Lv + Att) / 32) * ((Lv * Att) / 32)) ] * Power) / 16
```

Magical Damage Formula:

```
  [ ((Lv + Att) * 6) * Power ] / 16
```

Remember that this is Integer division, which means you always have to round down at the end of every division.

If an Attack is Physical, then the "Att" value is considered the enemy's Strength, and if the Attack is Magical, then the "Att" value is considered its Magic. For the Player, it's simply "Attack" or "MAttack", respectively.

Hero Drinks can raise ones Att/MAtt value by 30% mid-battle, and stack up to a maximum of +100%.

Unless otherwise stated, the above formulas will always be used for each Attack. Bear in mind that the Base Damage value you find for each Attack is not the final damage value; it needs first to consider the target's Defence (if Physical or MDefence if Magical), and secondly, Random Variation needs to be factored in.

Let's use a live example. Pretend we were Lv 60 with 200 Attack using a normal Physical Attack:

```
 ([ 200 + (((60 + 200) / 32) * ((60 * 200) / 32)) ] * Power) / 16
```

```
                                !! NOTE !!
  ..-                                                                  -..
  !!  Power, by default, is *16* This indicates 1x damage. An Attack     !!
  !!  Power of 32 would mean 2x damage, Power of 8 would mean 0.5x       !!
  !!  damage, and so on.                                                 !!
  ''-                                                                  -''
```

When the Player uses a regular Physical Attack, the Power will *usually* be 16; the only way to increase the Player's Power while attacking is through the use of Limit Breaks or Ultimate Weapons (see the Overflow section below).

Using Morph will (usually) divide the Power by eight which, sets the value to 2, except in the case of Yuffie's Conformer whereby the damage formula of the Weapon overrides the morph penalty and sets Power to the targets Lv (or average Lv if multiple targets are selected).

So, now we know the Power value of the Player's Attack:

```
 ([ 200 + (((60 + 200) / 32) * ((60 * 200) / 32)) ] * 16) / 16
             ([ 200 + ((260 / 32) * (12000 / 32)) ] * 16) / 16
                              ([ 200 + (8 * 375) ] * 16) / 16
                                   ([ 200 + 3000 ] * 16) / 16
                                             (3200 * 16) / 16
                                                   48000 / 16 = 3200 HP
```

Now that we have our Base Damage calculated at 3200, we can now factor in the target's Def. The impact that the target's Def has on the Base Damage is always proportionate to 512.

For example: if the target's Def were 256, then the damage Base Damage value would be halved; if the target's Def were 128, the Base Damage value would be

3/4.

Here is the calculation to factor in Target's Def:

```
  Damage = (Base Damage * (512 - Def)) / 512
```

So, let's say that we are dealing with an enemy that has 48 Def:

```
  Damage = (3200 * (512 - 48)) / 512
  Damage = (3200 * 464) / 512
  Damage = 1,484,000 / 512
  Damage = 2900 HP
```

The last thing to consider is Random Variation, that is assuming that no "modifiers" such as Critical, Barrier etc. have come into play.

Random Variation will deal as much as 4096/4096 (100%) of the Base Damage value, and as little as 3841/4096 (93.77%).

Here is the Random Variation formula:

```
  Damage = (Damage * (4096 - Random Number between 0-255)) / 4096
```

To calculate the lowest possible damage output value, we have to assume that the random number generated produced has a value of 255, which would mean that our final Damage value could have the following *potential* (minimum) output:

```
  Damage = (2900 * (4096 - 255)) / 4096
  Damage = (2900 * 3841) / 4096
  Damage = 11,138,900 / 4096
  Damage = 2719 HP
```

So to summarise, it doesn't matter if the Player is attacking the enemy or the enemy is attacking the Player in the example given; if the Actor is Lv 60 with 200 Att using a Physical Attack with a Power of 16 and striking a target with a Def of 48 then the value range will be between !! 2719 ~ 2900 !!

With this in mind, when you cast Magical spells such as Bolt/Ice/Fire that have the same Power value, the resulting Base Damage value range will always be the same. This also applies to Physical Attacks perform by the enemy that has equal Power value.

The only thing left for consideration are the various modifiers that could take effect *AFTER* the initial Base Damage calculation, *AFTER* Target's Def check, but *BEFORE* Random Variation kicks in, and these are as follows:

PHYSICAL:

```
  - Critical Hit       - Damage = [Damage * 2]       (200%)
  - Berserk on Actor   - Damage = [Damage * 3] / 2   (150%)
  - Back Row           - Damage = [Damage / 2]        (50%)
  - Target Defending   - Damage = [Damage / 2]        (50%)
  - Back Damage        - Damage = [Damage * MOD] / 8 (200%)
  - Frog On Actor      - Damage = [Damage / 4]        (25%)
  - Split Damage       - Damage = [Damage * 2] / 3    (66%)
  - Barrier on Target  - Damage = [Damage / 2]        (50%)
  - Mini on Actor      - Damage = 1
```

- Sadness on Target - Damage = [Damage - ((Damage * 3) / 10)] (70%)

Most of the time, the Back Damage modifier (MOD) will be set to 16, which means 2x damage. Only Air Buster, Aps and the Acrophies have a Back Damage modifier greater than 16, meaning they take increased damage from Back Attacks:

Air Buster - 40 Back Damage MOD (5x normal damage)
Aps   - 32 Back Damage MOD (4x normal damage)
Acrophies - 64 Back Damage MOD (8x normal damage)

It doesn't matter if the Player is in the Back Row; the enemy is in the Back Row; both enemy and Player in the Back Row - The damage dealt will always be halved when the Back Row modifier comes into play (and will *not* stack).

MAGICAL:

- Quadra Magic   - Damage = [Damage / 2]   (50%)
- Split Damage   - Damage = [Damage * 2] / 3   (66%)
- MBarrier on Target - Damage = [Damage / 2]   (50%)
- Sadness on Target - Damage = [Damage - ((Damage * 3) / 10)] (70%)
- MP Turbo   - Damage = [Damage * (10 + MP Turbo Lv)] / 10

MP Turbo will increase the damage by 10% with each level, and can only stack to the equivalent of a Mastered MP Turbo, which is +50%. The additional cost in MP is also increased by the same amount as the damage increase, although the max MP cost is capped at 255. The damage increase is *not* capped with the MP cost.

If an enemy's Attack targets all Players, then it will *usually* deal "Spilt Damage"; the same thing applies when the Player attacks all enemies. This effect will reduce the attack's damage output to 66% of its original value, *unless* the Players is using Quadra Magic, in which case the damage is reduced by 50%, and the Split Damage penalty will be ignored.

Most of the time when the enemy performs a Magical Attack which targets all opponents, the Split Damage Flag will be ON. There are exceptions to this, however, seeing as this flag can be manually disabled for individual attacks, such as Enemy Skills and a few other actions.

If an attack targets all opponents and is subject to Split Damage, the damage output will *not* be reduced by 33% if there is only one target available.

If a status-inflicting attack uses Split Damage, then the chances of inflicting the status are also reduced to 66% of their normal chance. There are seven instances whereby a damaging attack that also inflicts a Status is subject to Split Damage for the damage itself, but the Status chances will *not* be subject to Split Damage:

- Firing Line   - Heli Gunner
- Great Gale   - Zuu
- Toxic Powder - Bizarre Bug
- Great Gale   - Tonadu
- Dance   - Malldancer
- Great Gale   - Blue Dragon
- Revenge Stamp - Emerald Weapon

The other types of uncommon special damage formulas can be used are:

PHYSICAL:

```
Damage = Caster's Current HP                    (White Wind)
Damage = Caster's Max HP - Current HP           (???? Enemy Skill)
Damage = Caster's Current HP / 2                (unused)
Damage = Dice Sum * 100 * Repeated Dice         (Dice)
Damage = Quantity of Escapes                    (Chocobuckle)
Damage = Target's Current HP - 1                (Heartless Angel)
Damage = (Hours Played * 100) + Minutes Played (Time Damage)
Damage = Target's Kill Count * 10               (Everyone's Grudge)
Damage = Target's Materia Count * 1111          (Aire Tam Storm)
```

All of these Attacks have fixed damage, and will not consider the Target's Def, Random Variation or anything else that could modify the damage output past the initial calculation stage (including Status modifiers).

MAGICAL:		Rnd Var	Split Dam	Def Check	Status Check
Damage = HP * (Power / 32)	- % Based	No	No	No	No
Damage = Max HP * (Power / 32)	- % Based	No	No	No	No
Damage = Power * 20	- Fixed Dam	No	No	No	No
Damage = HP & MP * (Power / 32)	- Recovery	No	No	No	No

Finally, there is one last "special" Magical formula used for a few Restorative spells such as Cure, and is slightly stronger than the regular Magical formula used:

```
Damage = [ (Power * 22) + ((Lv + Att) * 6) * Power ] / 16
```

Unlike the other alternative Magical spells listed, this last formula *will* consider Rnd Var, Split Damage and Status modifiers (such as Split Damage), however, the Target's MDef *will not* be considered. The following Attacks use this enhanced healing Magical Formula:

- Cure
- Cure2
- Cure3
- Heart
- Hot Springs
- Emperor
- Aurora Fence
- Bizzarro Enegy

ITEMS:

```
Item Strength * 16
```

The Damaging Item formula does not consider the Actor's Lv or Att; however, it *will* consider the Target's Def along with Random Variation.

When using a damaging Item, the only Status modifiers that are considered are the Barrier/MBarrier and Sadness checks.

This formula means that Items such as Fire Veil/Bolt Plume etc. do not cast the magic spell as described in their description. For example, throwing a

Fire Veil (which should cast "Fire3" on all opponents) will always deal between 904 - 965 HP against the Touch Me (100 MDef), whereas casting the actual spell "Fire3" would greatly vary depending on how far into the game and how strong your characters are.

When you use the Throw Command, the basic Physical formula is used with two main differences; the first being that Split Damage is OFF, which doesn't matter anyway seeing as you cannot target all opponents with Throw (even with Mega All), and the second being that the Att value is replaced as follows:

```
Att = (Strength + Weapon Att) * 2
```

The damage output is still prone to Random Variation, Status checks and Target Defence checks when using Throw, just as they would when using a regular Physical Attack.

```
//>~~~~~~~~~~~~~~~~~~~~~~~~~<\\
||>    {DAMAGE OVERFLOW}    <||
\\>~~~~~~~~~~~~~~~~~~~~~~~~~<//
```

OK, so before anything I want to note that I will *not* be explaining how or why overflow occurs here. I've already written an essay on that subject; use QSI Link [Damage Overflow Glitch] for more info. I do, however, wish to explain a little bit about the "Power Required to Overflow" notes that you will see for each enemy.

Take, for example, the Crawler (10 Def):

So, these values have factored in the enemy's Def & assume the following conditions are met:

- Player is Lv 99
- Player has 255 Att
- Player is using 4 Hero Drinks
- No negative Status modifiers are in effect

Crawler:

POWER req for Overflow:	
Base Damage Overflow:	141
Rnd Var Overflow 3x:	94
Rnd Var Overflow 4x:	71
Rnd Var Overflow 6x:	47

In some of the earlier areas of the game, these values are only hypothetical seeing as you cannot reach an Att value of 255 without the use of Power Sources (and you cannot inflict your Players with Berserk), but for the sake of completion I have worked out the Power values regardless. These values can be used to gauge the general (Physical) defence of an enemy.

As mentioned above, a Power value of 16 is equal to 1x damage, and your regular attacks will always have 16 Power *unless* using Limit Breaks or Ultimate Weapons.

It is important to note that there are two occasions in which Damage Overflow can occur, the first being at the Base Damage calculation stage (Barret and Vincent only), and the second at the Random Variance stage (everyone bar Aeris).

> BASE DAMAGE OVERFLOW <

''''''''''''''''''''

The reason only Barret and Vincent can overflow at the Base Damage stage is that the minimum Power value required to overflow (against an enemy with 0 Def) is *138*.

Yuffie falls slightly short of being able to reach this value with her Lv 4 Limit Break All Creation, which can reach 128 in Power.

Barret and Vincent's Power values increase accordingly with their Ultimate Weapons equipped:

Vincent's Death Penalty:
Has a base Power value of 10, and increases by 1 with every 128 kills he gets, up to a maximum of 521 Power (65,408 kills).

Barret's Missing Score:
Has a base Power value of 1, and increases by 1 with every 10,000 AP equipped on his weapon, up to a maximum of 401 Power (4,000,000 AP).

To cause Base Damage Overflow on the Crawler, you need a Power value of 141, which means that Vincent would need 16,768 kills, or Barret would need 1,400,000 AP on his weapon to reach the required Power value.

Note that it is possible for the Power value to be *too* high, in which case overflow will be negated, and the damage would become positive once more.

In the case of the Crawler, the Power value in which overflow would wrap back round to the positive again is 280, and, conversely, overflow would become negative once more once Power reached 422.

Four enemies have a Def value too high to cause Base Damage Overflow against; Ying, Lost Number (3rd Form), Armored Golem ('Special Stage') and Ruby Weapon; Ruby being the only enemy in the game that you cannot overflow on at all (not even Random Variation Overflow).

> RANDOM VARIATION OVERFLOW <

''''''''''''''''''''''''

The easiest way to explain how Random Variation overflow works is to show you the damage process from start to finish:

Base Damage > Status Modifiers > Random Variation > Elements > Final Checks

We already know how Base Damage works (Physical Formula weighed against Target's Def; see Damage Calculations section above). If overflow has not occurred by this point, then the next opportunity presents itself at the Random Variation stage, once the damage calculation has been subject to modifiers.

As you can see, the Elemental checks occur *after* Random Variation, and will not make any difference when trying to initiate overflow.

The only three modifiers that we are interested in are:

- Critical - 2x Damage

- Back Attack - 2x Damage
- Berserk - 1.5x Damage

These will stack to produce either 3x, 4x or 6x damage, and as such you will find the "Power required to Overflow" value calculated for each variation of damage potential. **2x damage will NOT be enough to cause Rnd Var overflow**.

- 3x Damage - Berserk & Critical
- 3x Damage - Berserk & Back Attack
- 4x Damage - Critical & Back Attack
- 6x Damage - Berserk, Critical & Back Attack

Since the damage value can be multiplied to a much higher value than it was during Base Damage calculations, a much lower Power value is required to cause Random Variation Overflow. As such, all characters excluding Aeris can cause Rnd Var overflow (her weapon affects the damage process during the Final Checks as opposed to the Power value).

If an enemy cannot be Back-Attacked or Side-Attacked, then they can only be hit for 3x Damage (Berserk and Critical).

The Character's Power values increase accordingly with their Ultimate Weapons equipped:

Cloud's Ultimate Weapon / Cait Sith's HP Shout:
Has a base Power value of 1, and increases by 1 with every 2.08% of HP they have; 33% HP = 17 Power, 66% HP = 33 Power, and 100% HP = 49 Power.

Red XIII's Limited Moon / Cid's Venus Gospel
Has a base Power value of 1, and increases by 1 with every 2.08% of MP they have; 33% MP = 17 Power, 66% MP = 33 Power, and 100% MP = 49 Power.

Tifa's Premium Heart:
Has a base Power value of 1, and increases according to her Limit Lv against how full her Limit Bar is; A full Lv 4 Limit = 64 Power.

Yuffie's Conformer:
Power is equal to Target's Lv (or average Lv if selecting multiple targets). Overrides the Morph penalty.

Note that due to the way Random Variation works, the Power Value required to cause Rnd Var Overflow will only give you a CHANCE of overflowing, and will not give you a 100% chance until the Power is slightly higher.

Take the Crawler for example. A Power of 47 has been calculated for 6x Damage, which would give you a 19/256 chance (7.42%) of causing Rnd Var Overflow; you would have a 100% chance once your Power value reaches 50.

There will be some occasions whereby an enemy cannot be Back-Attacked. During these instances, you will not be able to cause Rnd Var overflow with 4x or 6x damage, so I have not included the Power requirement to overflow for those multipliers.

!! NOTE !!

..- -..
!! If you have triggered Rnd Var Overflow by using either 3x, 4x or !!

```
  !!  6x damage, then it is possible to negate the effects of overflow   !!
  !!  by triggering overflow at the Base Damage stage, which happens     !!
  !!  when you Power reaches the required value to cause Base Damage     !!
  !!  Overflow (Barret and Vincent only).                                !!
  ''_                                                                  _''
```

> LIMIT BREAKS <

Seeing as you cannot use a Limit Break while in Berserk, only 4x Damage (Critical and Back Attack) is achievable when trying to cause Rnd Var overflow with Limit Breaks.

Because of this, a *minimum* Power of 69 is required (against an enemy with 0 Def), and as such only four characters can overflow with Limit Breaks: Cloud, Cait Sith, Red XIII and Yuffie.

Refer to this chart for the maximum Power value each character can reach:

CHARACTER	LIMIT BREAK	PWR	WEAPON	PWR	CONDITION
Cloud	2-2 Climhazzard	70	Ultima Weapon	49	HP = Max
Barret	2-1 Grenade Bomb	54	Missing Score	401	4,000,00 AP
Tifa	4 Final Heaven	42	Premium Heart	64	Full Lv 4 Limit
Red XIII	4 Cosmo Memory	125	Limited Moon	49	MP = Max
Yuffie	4 All Creation	128	Conformer	99	Target's Lv
Cait Sith	2 Toy Box Comets	80	HP Shout	49	HP = Max
Vincent	2 Gigadunk	42	Death Penalty	521	65,408+ kills
Cid	2-1 Hyper Jump	56	Venus Gospel	49	MP = Max

The most straightforward enemy to practise overflow against is the Bizarre Bug in Wutai Dirt Area, which has a Def value 0 while in its flying form, and can be Side-Attacked to cause back damage.

//>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
||> {ELEMENTS AND STATUSES} <||
\\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~</\/

You will find a listing of all Elements and Statuses used by each enemy for each section of the game, along with Elements + Statuses to defend from, and which Elements + Statuses to use yourself.

A quick note about the "Statuses To Use" section; this list will cite every Status that *ALL* Enemies in the area are vulnerable to, *EXCEPT* bosses.

If an enemy has an immunity to the Death Status, then they also gain immunity to the Death Sentence Status by default. The same thing applies to Haste and Slow; if an Enemy/Player is immune to one, then they will also gain immunity to the other.

You will gain immunity to the 'Status' Poison if you nullify the 'Element'

Poison (Lv 2 Elemental). However, if you absorb the Poison Element (Lv 3 Elemental), then you can still be inflicted with the Status; instead of taking 1/32 HP of damage periodically, you will instead be healed by 1/32 HP.

Similarly, you will nullify the 'Element' Poison if you equip Added Effect with Poison on your armour.

There are many enemies in the game that are considered as 'elevated', meaning that they are hovering slightly off the ground. This is not the same as a "Flying" enemy; a Flying enemy will have a Row value of 16, meaning that they cannot be hit with regular short-range attacks, such as Bottomswell or the Zemzelett (in its flying form).

An 'elevated' *can* be attacked with short-ranged attacks; the notable factor is that they all have a weakness to the Wind Element, and will Nullify the Earth Element.

Seeing as most elevated enemies can be found on Disc 1, you should utilise the Choco/Mog Materia for its Wind Element as soon as you obtain it (by equipping it on your Weapon with Elemental).

Note that all "Flying" enemies are considered elevated, but not all elevated enemies are considered flying. Visit the "Elevated Enemies" section further below for a listing of all elevated and flying enemies.

There are several areas in the game that contain Enemies considered to be "Undead". This means that they take Double Damage from Holy, and also absorb the Restorative Element. The following 9 Enemies fall into that category:

- Ghost - Sector 7 Train Graveyard
- Brain Pod - Shinra HQ Escape
- Zenene - Shinra HQ Escape
- Gi Spector - Cave of The Gi
- Gi Nattak - Cave of The Gi
- Soul Fire - Cave of The Gi*
- Black Bat - Nibelheim Shinra Mansion
- Ghost Ship - Junon Underwater Reactor Approach
- Parasite - North Crater Descent*
- Dragon Zombie - North Crater Right Path

*Note that the Soul Fire and Parasite are the only enemies that take Double Damage from Holy, but does not absorb Restorative.

Seeing as you do not obtain the only Holy Materia in the game (Alexander) until Disc 2, you can *only* exploit the Holy weakness for the Black Bat, Ghost Ship and Dragon Zombie. The Sculpture also takes instant-death from Holy based attacks.

You can, however, exploit the fact that Undead enemies absorb the Restorative Element. Spells that would typically cure an enemy will now inflict damage on them, and seeing as Cure is more Powerful than Fire/Ice/Bolt, using Cure+All on things like the Zenene will deal more damage than Fire+All.

Using a recovery item that would typically fully restore a Player's HP such as an X-Potion/Elixir/Megalixir will now have a 100% chance of instantly killing an Undead Enemy. This is because the item will heal 100% of their HP.

A Phoenix Down will restore a Player's HP by 25%, and therefore a Phoenix

Down would have a 25% chance of instantly killing an Undead Enemy (Potions/Greens etc. have a fixed healing amount, and will only damage the Undead enemies for that set amount).

When you have equipped the Added Effect Materia with a Status on your Weapon, you will have a 19% chance of inflicting your target with that Status, provided the target is vulnerable to said Status. If you have more than one Status on your Weapon (Hades), and/or you are attacking multiple targets, then a new 19% chance will occur for *each* Status, for *each* enemy.

If you are trying to inflict an enemy that is already inflicted with a timer-based Status via the use of Added Effect (such as Stop or Paralyzed), then you will *not* reset the timer of the Status should you pass the chance to inflict it with the Status.

When an enemy uses an attack which inflicts more that one Status on the player, a *single* check is performed; if this check passes, all of the Statuses will be inflicted at once (barring Status immunities).

The majority of bosses will void the Gravity Element, except for a small few:

- Hundred Gunner (Halves)
- Heli Gunner
- Midgar Zolom
- Bottomswell (Halves)
- Rapps
- Godo
- Emerald Weapon (Halves)

> STATUS ABNORMALITIES <

- The Ghost, Zenene, Ghost Ship and Dragon Zombie are the only four "Undead" enemies that absorb the Death Status. This means that any Player with Added Effect + Death on their Weapon would now cure the enemy with their Physical Attacks. In addition to this, if you were to pass the 19% chance to inflict Death upon that enemy it would instead use "Recovery" and fully cure them.

- The Ghost and Sculpture are the only two enemies in the game that are instantly killed via the use of the Holy Element.

- The Jemnezmy and 8 eye are the only two enemies that are instantly killed via the use of the Poison Element.

- The Sahagin, Ceasar and Desert Sahagin are the only three enemies that have the "Can't Miss" flag set for the Punch Element. This means that all of Cid's Weapons, some of Tifa's and some of Barret's Weapons will have a 100% hit rate for these enemies.

- The Sword Dance, SOLDIER:3rd and Corvette are the only three enemies that take Double Damage from Confusion. This means that a Player with Added Effect + Confusion on their weapon would hit for Double Damage, but would still only have a 19% chance of inflicting Confusion.

- Palmer is the only enemy in the game that takes Double Damage from Sleep,

in the same way the above enemies take Double Damage from Confusion. Note that Palmer is immune to the Status Sleep.

- A large number of enemies will be immune to the Seizure Status. This is pointless, seeing as there is no way for the Player to inflict an enemy with Seizure (also known as Dual Drain).

- As with Seizure, a large number of enemies are immune to Peerless. Again, there is no way to inflict the enemy with Peerless.

- Fifteen enemies are immune to Regen, those being Diamond Weapon, Emerald Weapon + Leg + Eye, Pyramid, Waterpolo, Gi Nattak, Manhole, Safer-Sephiroth, Ultimate Weapon (4 variants) and the Cactuar.

- You can defend from the Hidden Element by equipping the Elemental Materia with a non-element Materia (excluding Support Materia and Restore/Full Cure) on your Armour. The only attack in the game that causes Physical damage which uses the Hidden Element is Ultimate Weapon's Attack "Ultima Beam" which you can halve/negate/absorb according to the level of your Elemental Materia.

- There are eight Status inflicting Attacks which use the Hidden Element. The Player can defend from these Status inflictions by defending from Hidden using the Elemental on your Armour as described above.

  - Petrify Smog - Slow-numb - Cokatolis
  - Stone Stare - Slow-numb - Gagighandi
  - Stone Strike - Petrify - Bagrisk
  - Curses - Silence - Dorky Face
  - Funny Breath - Confusion - Dorky Face
  - Smoke Bullet - Sleep/Darkness - Marine/Attack Squad
  - Petrif-Eye - Slow-numb - Demons Gate

  With a Lv 1 Elemental equipped the chances of the Status being inflicted will be halved. With a Lv 2 or greater Elemental the chances will be dropped to 0%. When the enemy tries to perform it's "Hidden" based Attack, the word "Miss" will appear above the Player's head, which suggests that they are vulnerable to the Status being used. Technically they still are; instead, the Att% of the ability is dropped to 0%.

  Aeris's Lv 2-2 Limit Break Fury Brand also uses the Hidden Element. The Hell Rider VR2's Attack Electromag uses the Hidden Element, and this Attack will change the rows of the Players. This cannot be defended from by putting Hidden on your Armour.

- You can also defend against other Status-inflicting abilities in the game that use an Element by defending against it via the Elemental Materia, or, by equipping Armour/Accessories. Equipping Earth resistance via the Tetra Elemental, for example, will nullify the chances of the Desert Sahagin inflicting you with Darkness via the use of its Sandgun attack, which uses the Earth Element.

  The Ziedrich will not only halve the Physical damage taken from all Elements, but it will also halve the chances of being inflicted with Statuses that make use of an Element (such as the Kimara Bug's Stop Web). Note that the Ziedrich will *not* be affected by abilities that use Restorative, Shout, or Hidden Elements.

- If a party becomes non-controllable at any point (Vincent during his Limit Breaks or Sephiroth in Mt. Nibel), then they automatically gain immunity

to Confusion, Frog and Berserk.

- When an enemy becomes inflicted with Confusion, their AI Script will play out as standard, the main difference being that the 'Opponent' and Ally' flags will have been reversed.

As mentioned above in the Damage Calculations section, the Power value can be used to determine the strength of an Attack. Bolt, Ice and Fire all have a Power value of 8, which means they all produce the same damage output. Using the Power value for each Attack, we can categorise the strengths of the stronger Magical Attacks available to the Player:

FIRE:

- Flame Thrower - 14 PWR
- Fire2 - 20 PWR
- Hellfire - 27 PWR (Ifrit)
- Beta - 54 PWR
- Phoenix Flame - 60 PWR (Phoenix)
- Fire3 - 64 PWR
- Flare - 115 PWR
- Fire Fang - 60 PWR (Item)
- Fire Veil - 75 PWR (Item)

LIGHTNING:

- Bolt2 - 20 PWR
- Judgement Bolt - 30 PWR (Ramuh)
- Trine - 34 PWR
- Bolt3 - 64 PWR
- Bolt Plume - 26 PWR (Item)
- Swift Bolt - 75 PWR (Item)
- Dragon Fang - 150 PWR (Item)

WATER:

- Aqualung - 52 PWR
- Tidal Wave - 75 PWR (Leviathan)
- Dragon Scales - 230 PWR (Item)

HOLY:

- Judgement - 120 PWR (Alexander)

ICE:

- Ice2 - 20 PWR
- Diamond Dust - 24 PWR (Shiva)
- Ice3 - 64 PWR
- Freeze - 95 PWR
- Antarctic Wind - 75 PWR (Item)
- Ice Crystal - 130 PWR (Item)

EARTH:

- Quake2 - 24 PWR
- Anger Of The Land - 33 PWR (Titan)
- Quake3 - 70 PWR
- Break - 100 PWR
- Earth Drum - 40 PWR (Item)
- Earth Mallet - 160 PWR (Item)

POISON:

- Bio2 - 21 PWR
- Bio3 - 68 PWR
- Deadly Waste - 6 PWR (Item)
- M-Tentacles - 150 PWR (Item)

WIND:

- Tornado - 105 PWR
- Bird Wing - 65 PWR (Item)

NON-ELEMENT:

- Comet2 - 30 PWR (x4 Hits)
- Comet - 80 PWR
- Pandora's Box - 60 PWR (Ignores Target's Def)
- Magic Breath - 77 PWR
- Giga Flare - 80 PWR (Bahamut) (Ignores Target's Def)
- Mega Flare - 100 PWR (Neo Bahamut) (Ignores Target's Def)
- Ultima - 105 PWR
- Disintegration - 110 PWR (Typhon) (Ignores Target's Def)
- Tera Flare - 120 PWR (Bahamut ZERO) (Ignores Target's Def)

- Shadow Flare - 125 PWR
- Ultimate End - 80 PWR (x13 Hits) (Knights of The Round)

Remember that a different formula is used when casting a Magical spell from using an Item. Also, any Attack that ignores the target's Def can boost the damage output dramatically if the enemy has a high Def value.

A few final notes on Statuses; Slow and Stop (Time Materia) are the best to use on your Weapon until you get Contain and/or Hades, seeing as a large number of enemies including bosses are vulnerable to those two Statuses. Sleep and Silence (Seal Materia) are the 2nd best two to use.

Cait Sith's Death Joker and Game Over are the only two attacks in the game that ignore the Death immunity of the target, and as such Game Over can be used to one-hit Emerald Weapon (and every other enemy in the game).

Wherever possible, equip a Summon to your Elemental Materia as opposed to Magic Materia; this way, you will not gain a penalisation in Strength.

Only Physical attacks can cure Sleep, Confusion and Manipulate.

```
//>~~~~~~~~~~~~~~~~~~~~~~<\\
||>    {ENEMY NOTES}    <||
\\>~~~~~~~~~~~~~~~~~~~~~~</
```

I have listed each enemy in order of appearance, and as such there will be occasions whereby you can find an enemy listed in multiple areas, such as the Malboro which can be found in Gaea's Cliffs and the North Crater (Right Path). During these instances, I will *not* be duplicating the entry for that enemy.

The two optional 'Super' Bosses - Emerald and Ruby WEAPON, can be found at the very bottom of the Enemy And Encounter Listings. Note that Ultimate Weapon is also considered an optional Super Boss; however, it is not nearly as tough as Emerald or Ruby, and the Player should be able to defeat Ultimate when it becomes available to battle following the Diamond Weapon battle. Because of this, the various encounters with Ultimate shall be listed in the correct sequence (the first encounter with Ultimate is a mandatory battle in Mideel).

If an enemy appears in the Battle Square, then note that their HP values will have been doubled, and their Strength and Magic values will be multiplied by 125%.

The Chocobo and Mystery Ninja encounters are unique enemies, and as such, I have not listed them in appearance with the other enemies in the regular 'Enemy' listings (they still appear in the regular 'Encounters' listings). You can find all of the Chocobo and Mystery Ninja enemies in the "Extra Enemies" section below the normal enemy listings (remember to make use of the QSI feature).

Usually, an attack will *either* be set to attack All Opponents, *or* One Opponent. Uncommonly, the AI script will command an Attack to do both in separate situations. In these instances, the Attack's Target will state "1/A

Opponents" (One/All Opponents).

An Attack that is surrounded by hard brackets <> indicates that the Attack's name is hidden, and will not be displayed when the enemy uses that Attack.

An enemy will sometimes use an Attack entitled <[No Name]>; note that the Attack's name itself is actually blank; the term "No Name" is meant as a description for the Attack name, and not the actual name itself (the same thing applies for the [No Name] Enemies).

NOTES - The value you see underneath the Attack Name is the ID for the Attack. They exist primarily to enable me to error check my work in the future; you can ignore unless you plan to work with FFVII on a coding level. The values are in hexadecimal.

The maximum quantity of Attacks that can be assigned to an enemy is sixteen. Also, a single encounter can only contain a maximum of three *unique* enemies, and a maximum of six enemies per battle. The 2x Warning Board encounter is an excellent example of a Battle that makes use of every available slot (6 enemies, 3 of them unique).

You will find a simplified version of the Enemy's AI Script for each enemy, which I have labelled as the enemy's "Battle Plan". From time to time, you will find that certain enemies have been given "Stages", and others will use "Phases":

Stage - When an enemy goes through a process of a transformation, and then is able to transform back

Phase - When an enemy meets a condition to move onto the second part of its Battle Plan, and can usually not revert back

When an enemy uses "Phases", it occasionally means that it will move onto the second part of its Battle Plan once its HP is below a certain amount. When this happens, *sometimes* curing the enemy will revert it to its previous Phase; however, most of the time it will not.

A quick note regarding the layout of the 'Battle Plan' for each enemy. Be mindful of the way the Attacks run sequentially; take Lost Number (3rd Form) as an example:

```
1/4 Chance: Use Lost Blow on Rnd Target

3/4 Chance: Use <Punch> on Rnd Target
 Follow-Up: 1/2 Chance use <Punch> on Rnd Target
            1/2 Chance do nothing
```

This means that he has a 1/4 chance of using Lost Blow, and a 3/4 chance to use <Punch>. The follow-up chance will *only* be executed if Lost Number passed the 3/4 chance to use <Punch>.

Let us pretend that Lost Number's Battle Plan had instead looked like this:

```
1/4 Chance: Use Lost Blow on Rnd Target
3/4 Chance: Use <Punch> on Rnd Target
```

```
        Follow-Up: 1/2 Chance use <Punch> on Rnd Target
                   1/2 Chance do nothing
```

In this pretend scenario, the chance to use the follow-up Attack will be executed regardless of the initial Attack used.

You will often see the use of the 'grater than' and 'less than' symbols. Here is what each symbol means, for those not versed in mathematical jargon:

```
  <   means 'Less Than'
  <=  means "Less Than or Equal To'
  >   means 'Greater Than'
  >=  means 'Greater Than or Equal To'
```

So, the phrase "If the enemy's HP <= 75%" is the equivalent of saying "If the enemy's current HP is less than or equal to 75% of its max HP".

Towards the end of the game you will notice the use of Global Variables, or 'GlobalVars'. When a GlobalVar is used, the game will save the value of the variable to the save file, to then be called upon at a later date. For example, when you embark on the Ultimate Weapon mini-quest the game will record Ultimate's HP following each battle, to then call upon for the subsequent battle.

If you were to use Knights of The Round against Jenova-SYNTHESIS, then the GlobalVar [Jenova KOTR used] would be set, which would then be called upon by Bizarro-Sephiroth and Safer-Sephiroth's to modify their HP values.

Often, you will find that an enemy will target a Player that has the highest/lowest HP/MP etc. During these instances, if there are multiple targets with the same HP value (or MP, Def, MDef etc.), then one of those targets will be selected at random.

You will occasionally find examples where the "Group Enemy" Flag has been used, which indicate all enemies that share the same 'Letter Value'.
Take the 3x Chuse Tank + 2x Grashtrike encounter in Sector 4 as an example. The Chuse Tank "A" and Grashtrike "A" would share the same flag, both "B" Chuse Tank and Grashtrike would share the same flag, and the Chuse Tank "C" would not share its "Group Enemy" Flag with any other enemy.

Only three enemies act differently according to the Death Status of the other enemies within the same 'Group'; The Vargid Police, Flapbeat and Kelzmelzer. The 2 Faced should also have behaved differently when it is the only enemy alive left in its group; however, a flaw in the script means that the "Group Enemy" Flag is overlooked.

Whenever you see an enemy with a Physical/Magical Counter script, then that script will only be triggered with a Physical or Magical attack, respectively, *UNLESS* the counter is set to counter "All Actions made by All Players and Enemies" (such as the Sahagin's Shell Defense Counter Attack).

In these instances, it doesn't matter which Command is selected, anything and everything (including sneezing) will trigger this script. This includes things such as Steal, Change, Defend, and all other possible actions made by all players and enemies.

It is also worth pointing out that a Steal attempt counts as Physical damage,

and will trigger the Physical Counter script if there is one. A Steal attempt will also allocate the enemy's "Last Attacker" Target if the enemy is set to target the last Player to have attacked it.

An enemy will typically use a designated Attack when it has become inflicted with Berserk, and this Attack will be the first available "Manipulate Attack" if one is available.

A few enemies are vulnerable to Berserk, but do not have an Attack selected for their "Manipulate Attacks", and as such will try to use an Attack which costs 65,535 MP.

It is a good job that the Attack used costs more MP than the enemy will have, otherwise the game would likely crash when it tried to use that Attack. Instead, the "skill power is used" up message will appear. The following six enemies fall victim to this Berserk glitch:

- 2-Faced
- Doorbull
- Guardian
- Manhole
- XCannon
- Right Arm (Helletic Hojo)

An enemy will ONLY drop EXP AP and/or gil if the Battle is set to end upon that enemy's death when that enemy is the last enemy remaining. The Hundred Gunner Battle does not end when you kill Hundred Gunner, which is why you do not receive rewards for Hundred. The same goes for enemies that transform into another version of itself, such as the Hell House, Aero Combatant or Mighty Grunt as a few examples.

Some randomly encountered enemies have been marked as being 'powerful', and as such the "Pre-Emp" Flag will always be off for these enemies (with a few exceptions; see the "Bugs" section below). For a full list of every 'powerful' enemy that cannot be Pre-Empted, visit the "Helpful Lists" section further below.

```
//>~~~~~~~~~~~~~~~~~~~~~~~~~~~~<\\
||>    {BUGS AND GLITCHES}    <||
\\>~~~~~~~~~~~~~~~~~~~~~~~~~~~~<//
```

I will *not* be listing every single error and inconsistency that I find with each enemy; this section would be massive otherwise. I will, however, cite the dozen or so main bugs that I've found related to enemy encounters:

- As mentioned above, five Boss Battles allow for a Pre-Emptive Strike:
    - Aps
    - Jenova-BIRTH
    - Turks Gongaga Battle
    - Snow Boss Battle (Snow can be Back-Attacked usually)
    - Turks Raid On Midgar Battle

The forced Gi Spector Battles inside the Caverns on the first screen of the Cave Of The Gi *should* have also made use of the "Pre-Emp OFF" Flag. The same applies to the forced encounter with the Attack Squad at Mt. Corel's Reactor on Disc 2.

- While battling in the Battle Square, after the Tiny Bronco but before the Highwind (Set 2), if you encounter the 2x Bahba Velamyu on your 6th battle while in "Pool B", then for the 7th battle you will be incorrectly moved over to "Pool A".

- In the Grasslands Grass Area, there have been several Encounters placed in the wrong "Battle Type" slots. This means that the game will consider the chance of receiving a Normal Battle as if it were a Special Battle, and vice-versa:

Normal Battle #2: 2x Levrikon (actually a Back Attack)
Normal Battle #4: 3x Levrikon (actually a Back Attack)
Back Attack #1: 2x Elfadunk (actually a Normal Battle)
Back Attack #2: 2x Elfadunk, 1x Levrikon (actually a Normal Battle)
Pincer attack: 1x Levrikon, 1x Elfadunk, 2x Mandragora (Normal Battle)

- Another glitch occurs in the Grasslands Grass Area involving the Chocobo Lure rate. Take the Vagyrisk Claw as an example; if you're Lv is too high, you cannot obtain that item since you will have a 100% chance of getting the first item. The same thing happens here with the Chocobo Lure rate; if your Chocobo Lure Materia Lv is too high, then you will have a 100% chance of receiving the first two Lv 13 Chocobos, and will never encounter the Lv 16 Chocobos.

This occurs once you Chocobo Lure Rating reaches 24:

Lv 1 Chocobo Lure Materia - 8 Chocobo Lure Rating
Lv 2 Chocobo Lure Materia - 12 Chocobo Lure Rating
Lv 3/4 Chocobo Lure Materia - 16 Chocobo Lure Rating

You can equip two Mastered Chocobo Lures for a maximum of Chocobo Lure Rating of 32. A Mastered Chocobo Lure with a Lv 1 Chocobo Lure would be enough to trigger the 100% chance of getting the Lv 13 Chocobos (voiding your chances of getting the Lv 16 Chocobos). The same thing occurs on the Junon tracks if your Chocobo lure Rating is 32.

- There are five screens which fall victim to an Encounter Rate overflow glitch. This occurs when the Encounter rate for a *Normal Battle* is set to 32 (50%) or higher. If this happens, then it will automatically trigger that battle, and the other five Normal Battle slots will not be considered.

This glitch only occurs while on a Field Map, and will only affect the "Normal Battles"; the Special Battle check occurs *before* the Normal Battle check, so the chances of receiving a Back/Side/Pincer Attack remain unaffected.

The following five screens fall victim:

Mt. Corel Long Roller-Coaster Screen: 3x Needle Kiss, 1x Cokatolis
Overrides: 2x Cokatolis

Mt. Corel Bridge: 1x Bomb
Overrides: 1x Bagnadrana

Mt. Nibel Wooden Bridge (Flashback): 3x Sonic Speed
Overrides: 2x Sonic Speed

Junon Conference Room Exterior (during escape): 1x SOLDIER:2nd
Overrides: 2x SOLDIER:2nd

Junon Red Submarine Dock (Past Barking Dog): 3x SOLDIER:2nd
Overrides: 2x SOLDIER:2nd

- There are two occasions whereby a Pincer Attack has been placed in the Pinc Att slot; however, the encounter rate has been mistakenly set to 0, so the encounter will not be considered:

Hojo's Lab 68th Floor (Upper Laboratories - 2nd Visit): 2x Zenene
Junon Conference Room Exterior (during escape) : 2x SOLDIER:2nd

- There are two screens whereby the field scripts have permanently disabled random encounters, where they should have turned them back on afterwards. The first is the screen in Hojo's Lab where you encounter Sample:H0512; This close-up screen of the test chamber disables rnd encs before the Boss Battle but does not activate them following the fight. The encounters on that map are identical to the adjacent screen and even changes the encounter table over to the second set of enemies following the escape from the prison cells.

The second screen is the final meeting point screen in the Whirlwind Maze (with the blinking eye). This is the only screen in the game where you could have encountered the Tonberry, yet you cannot traverse on that screen even if random encounters had not disabled.

While on the subject of the Tonberry, the Ho-chu is another enemy that cannot be typically encountered (Battle Square only). It was initially intended for you to face the Ho-chu in the Ancient Forest, however, for reasons unknown it was not included in any of the encounters found there. Perhaps it was supposed to be a forced encounter for getting caught in one of the Venus Fly Traps??

- The use of the "Cover" Flag has been misused in places, whereby a Back Row Enemy that should be covered by a Front Row Enemy is not.

Blood Taste (Reactor 5):
Back Attack Encounter: 2x Blood Taste in Front Row
1x Blood Taste in Back Row

Jayjujayme (Da-chao Statue):
