

And some are only available in Emma version but not in Alisa version.

There are also web sites that get shutdown later in the game.

I was only able to transcribe almost everything because I have a save collection for both storylines. Yep, almost. I may have missed some articles. If you know something missing in this transcript, please send it to me at my e-mail address or at least inform me what I'm missing.

[jg1] Japan Defense Force (JDFORCE/GOVERNMENT/JAPAN)

TOPICS

1: New National Defense Plan: Sasaki

While many people think the stability of the Pacific rim region improved with the establishment of OCU, in reality, we are still surrounded by unrest. I propose the JDF adopt a policy of active defense. With active defense, during times of emergency, we will protect Japanese citizens living abroad until they are safely brought back to Japan. We will also strengthen the army to deter other countries from invading our territory. By combining these two aspects, we can preserve a peaceful and prosperous future for Japan and the OCU.

2: Explosion at Yokosuka Base

The following has been confirmed regarding the explosion. The explosion took place in warehouse 21 where emergency fuel was stored. While there is a possibility it was a terrorist attack, the fire seems to have started from the switchboard near the entrance. If the incident turns out to be terrorism, it is a heinous crime to destroy the fuel stored for citizens. The JDF is resolute in its effort to protect the citizens, never giving in to acts of terrorism.

3: Yokosuka Base Terrorist Group Found

An international terrorist group was found responsible for the explosion in Yokosuka base. JDF intelligence, in joint effort with the police, found the terrorist escaped by using illegal military wanzers to counterattack. The escaped terrorists, including some foreigners, took a trailer truck and are still at large. We request the citizens of Kanto and Tokai areas to report any suspicious trailer trucks to the police, the JDF, or this web site.

4: OCU Troops Dispatched to the Philippines

Due to growing rebel activity led by the former vice president, public order is quickly deteriorating in the Philippines. The OCU Congress is debating full-fledged intervention by dispatching ground troops to the area. The JDF may consider a similar plan. This will protect Japanese citizens in the Philippines and also ensure safety in Japan by defeating anti-government rebels who spawn international terrorism. We are obliged to take this measure to ensure your safety. We hope that the disputes are resolved soon. The proposed plan includes a landing ship and some escort vessels. as well as one ground squadron of armored vehicles.

5: Explosion in Batangas

It has been confirmed that the explosion in Batangas, Philippines was not nuclear. Although a huge fireball and tremendous shock waves were observed, the OCU troops confirmed no trace of radioactivity. Please do not be concerned by this development. The casualties caused by the explosion are severe. No word yet on whether the explosion was caused by the DHZ invasion force. The DHZ claims that the explosion was caused by the OCU forces, but we assure you that this claim is false.

6: Emergency Notice

We regret to announce a coup led by an extremist faction of the JDF. The coup is being led by Colonel Isao Takemura. Several JDF units are now engaged in battle to control the coup forces. We express our deepest regret that such misconduct has occurred in the JDF. We promise to have the situation under control promptly. While we will not declare martial law, we ask that you stay home and avoid unnecessary travel. We expect to have the coup forces under control soon.

7: Emergency Notice

DHZ troops have invaded Ocean City. JDF troops stationed in Ocean City is hard pressed to hold off the large numbers of DHZ troops. We are also concerned about the possibility of DHZ sabotage operations nationwide. We are forced to declare martial law, which includes a nationwide nighttime curfew. We must warn you that no compensation will be made for civilian injuries that occur at night.

ORGANIZATION

The JDF is controlled by the Defense Minister, who is selected by parliament. The picture shows the organizational structure of the JDF.

Download? [PW:JDFSMAP]

DEPLOYMENT

Capability of each JDF base.

1: Hokkaido (JDFHOKKAIDO/GOVERNMENT/JAPAN)

1.1: Makomanai

Makomanai Base : Army 15th Division

Assault vehicles: 84

Wanzers: 142

Attack helicopters: 40

Manpower: 17,000

1.2: Obihiro

Obihiro Base: Army 7th Division

Northern District Army HQ

Assault vehicles: 126

Wanzers: 220

Attack helicopters: 73

Manpower: 25,000

2: Eastern Japan (JDFEHONSHU/GOVERNMENT/JAPAN)

2.1: Sendai

Sendai Base : Army 6th Division

Tohoku District Army HQ

Assault vehicles: 88

Wanzers: 76

Attack helicopters: 64

Manpower: 12,000

2.2: Yokosuka

Yokosuka Naval Base :

Yokosuka District General HQ

Naval General HQ

Cruisers: 3

Destroyers: 8

Submarines: 15

Wanzers: 40

Manpower: 24,000

2.3: Nerima

Nerima Base : Army 1st Division

National Defense General HQ

Eastern District Army HQ

(Equipment stationed in Soumagahara)

Assault vehicles: 144

Wanzers: 184

Manpower: 33,000

Greetings from the commander - There are many facilities with military importance in the district we cover. We are making efforts day and night to prevent attacks to these important facilities.

-National Defense Chief of Staff

Masao Sasaki

3: Western Japan (JDFWHONSHU/GOVERNMENT/JAPAN)

3.1: Itami

Itami base : Western District Air Force HQ

Tactical aircraft: 68

Support aircraft: 28

3.2: Nagoya

Moriyama Base : Army 10th Division

Western District Army HQ

Assault vehicles: 210

Wanzers: 165

Manpower: 35,000

Greetings from the commander - Through this page, I hope to promote the understanding of our soldiers, who are making a daily effort to maintain the peace and security of our country.

-Moriyama Base Commander

Kunimitsu Isogai

3.3: Kure/Kaita

Kure Base : Kure District General HQ

Cruisers: 2

Destroyers: 6

Submarines: 4

Kaita Base : Army 13th Division
Assault vehicles: 176
Wanzers: 94
Manpower: 21,000

4: Kyushu (JDFKYUSHU/GOVERNMENT/JAPAN)

4.1: Sasebo

Sasebo Naval Base: Kyushu District Naval HQ
Cruisers: 2
Destroyers: 4
Submarines: 5
Wanzers: 60
Manpower: 32,000

4.2: Fukuoka

Fukuoka Base : Army 4th Division
Kyushu District Army HQ
Assault vehicles: 160
Wanzers: 224
Manpower: 38,000

4.3: Kumamoto

Kumamoto Base : Army 8th Division
Assault vehicles: 84
Wanzers: 134
Attack helicopters: 20
Manpower: 24,000

Greetings from the commander - At next year's base open house, Kyushu area divisions will get together to send local souvenirs such as Nagasaki-Chapnon noodles, beef jerky, and scones to welcome you.

-Kumamoto Base Commander
Makito Taniyama

5: Okinawa

5.1: Kadena

Kadena Base
Okinawa District Air Force HQ
Tactical aircraft: 89
Support aircraft: 42

5.2: Okinawa Ocean City

Okinawa Ocean City Naval Base
Cruisers: 1
Destroyers: 6
Wanzers: 120
Manpower: 8,000

[jg2] JDF Intelligence (JDFINT/GOVERNMENT/JAPAN) [PW:D07]

1: PROJECT (MIDAS) [PW:MM]

1.1: MIDAS FILE 002

[MIDAS Retrieval Operation]
Aim 1: MIDAS mechanism
Aim 2: MIDAS research information
Target: USN Central Institute-Lab 21

Operation Summary: Unmanned wanzler programmed to seize MIDAS before transportation. Establish temporary air superiority, transport will acquire target.

Equipment 1 : PVA Type 5 Attack-8 (ground attack-2, anti-air-3, ECCM-1, reserve-2) and PVA Type 9B Assault Transport-3 (reserve-1)

Summary of Support Operation : Submarine standing by to pick up dropped target. Commence operation at 0008 hours. Priority to retrieval of MIDAS.

Equipment 2: SU-I19 sub and SUM-I201 sub

To: SUM-I201 Captain

Use of strategic weapons permitted if retrieval is failed. Destroy all evidence.

1.2: MIDAS FILE 008

[MIDAS Research Report/Ver2.10]

MIDAS analysis progress-43%

MIDAS prototype progress-12%

MIDAS mass production progress-2%

Summary B1: Analysis-Accessed black box, analyzing content. Control method uses Valter theory.

Summary C1: Prototype-Resources collected for production. Begin production as soon as control system is analyzed. MIDAS experiment site (re: 37) selected.

Summary of D1: Mass Production-Mass production site selected. Waiting for budget increase and site completion.

1.3: MIDAS FILE 013

[MIDAS Prototype Plan/Ver.12.12]

Black box analysis completed. MIDAS prototype production can now begin. MIDAS prototype (hereinafter referred to as "Target A") scheduled to be completed in 1 week. Reconfirm transport and mass-production schedule. Transport of Target A to be completed by intelligence team 3. Director must report to local agents regarding equipment and security status.

1.4: MIDAS FILE 017

[MIDAS Transfer Plan]

Regarding OCU Congress request for MIDAS transfer. This information is restricted to security level 1 and above. The original MIDAS to be transferred to Yokosuka Base. Provide the OCU military with the MIDAS prototype, Target A. Change the control data prior to transfer. Also provide technical information, after confirming the integrity of the revised control data.

1.5: MIDAS FILE 021

[MIDAS Explosion Data]

MIDAS prototype explosion analysis completed. (Re: observation data 12-105)

The MIDAS prototype performance, equipped with reduced explosion control, far exceeded our expectations. Simulation data indicates that the original is 180% more powerful than the prototype. Advise proceeding with the detonation test of the original MIDAS.

2: GROUND FORCE STAFF [PW:SA2KI]

2.1: GFSO FILE 105

[Practicality of MIDAS]

MIDAS, more powerful than nuclear bombs while remaining environmentally safe, is outstanding. MIDAS is expected to shift the military balance of the world. The situation cannot be left alone. We propose seizing MIDAS and its research information.

2.2: GFSO FILE 123

[Cooperation with the USN CIA]

We are observing signs of possible compromise in the cooperative structure proposed by the USN. Meanwhile, the CIA has agreed to prosecute Isao Takemura. The assigned agents will arrive in Japan in a week to join their former supervisor, Lukav Minaev. The necessary equipment will be provided by the CIA's Tokyo branch

2.3: GFSO FILE 125

[Coup D'etat Countermeasures]

Each local division will use older model weapons to fight the coup forces to hold next year's equipment in reserve. The coup group has not acquired any information on the location of MIDAS. The possibility of an information leak seems to be limited. Continue to leak false information while we discuss countermeasures. The conference will be held online at 1400 hours.

2.4: GFSO FILE 021

Masao Sasaki

JDF Chief of Staff/Commander-East Dist.

Born Tokyo, 2060

Graduated from military academy in 2080, then assigned to eastern district army. Transferred to the OCU military as exchange officer in 2087.

Participated in the Huffman war of 2090 as OCU officer. Returned to Japan in 2091, promoted commander of the 6th Division 3rd Company. Promoted to army colonel in 2094. Following divisional commander and brigadier general promotions, promoted to Chief of Staff in 2109.

3: MOBILE ASSAULT FORCE [PW:BLACKI]

3.1: MAF FILE038

[To Mobile Assault Force members]

Welcome to the Mobile Assault Force. We are a special operations force. The nature of our mission requires us to remain behind the scenes, but remember that we are supported by numerous personnel. It would not be an exaggeration to say that the entire JDF is behind us. Keep that in mind and concentrate on your duty.

3.2: MAF FILE075

[Equipment Acquisition Report]

Report on new equipment acquired this fiscal year. The planned deployment of spacecraft is postponed until next year.

Wanzer: Shunyo Mk111

Output increased by 80% from previous model. First general-use wanzer to have amphibious and space ability.

Submarine: SUM-I401

It is a submarine capable of carrying up to 4 Shunyo wanzers for assault landings. Submarine will be introduced into service gradually according to plan 44. Infantry weapon : anti-wanzer missile Mk111 Auto-aims at the wanzer's weakest point, the upper rear portion.

Infantry weapon : anti-wanzer gun Mk110

Fires a 37mm high velocity AP round. Can penetrate joint and rear armor.

3.3: MAF FILE103

[Priority 1 Order from HQ]

Assassinate Isao Takemura and his followers. Ignore previous order to apprehend. Terminate all Takemura collaborators, even if they surrender, and report to HQ. Takemura's group is expected to be armed, including wanzers. Report to the Information Division, ext.033-022, upon locating them.

3.4: MAF FILE008

Yuji Kuroi

Commander, JDF Mobile Assault Force

Born Kamagawa, 2083.

Graduated from military academy in 2103, then assigned to the 1st Independent Light Armor Brigade. Dispatched to Alordesh after coup.

Returned to Japan in 2105. Promoted to captain in 2110, transferred to the Embassy in Thailand. Returned to Japan in 2112, promoted to current rank of major.

[jg3] Ministry of Foreign Affairs (MFA/GOVERNMENT/JAPAN)

Welcome to the Ministry of Foreign Affairs. We are devoted to peaceful cooperation with other OCU nations. The cultural diversity and historical backgrounds of each individual nation must be respected. The future is uncertain. It is difficult to foresee how the diplomatic environment surrounding us will change. We will do our best to build a society in which diversity is accepted. Proceed to "Topics" for updates, "Danger Overseas" for traveling abroad, or "Current Diplomatic Conditions" for an overview of diplomatic negotiations.

TOPICS

- 1: Our government is working to advance cooperation with OCU forces, including dispatching the JDF in case of emergency. Current conflicts within the OCU make security difficult to maintain. We must give highest priority to diplomatic negotiations. Violence in anti-government is rising. Calls for aid from the hardest hit areas are growing more desperate. The stability of OCU is the basis for peace and development in our country. We hope that our effort contributes to a stronger OCU. We are preparing a proposal for greater cooperation. your opinions and comments are greatly appreciated.
- 2: The news is reporting a possible link between DHZ forces and the terrorist bombing of the Yokosuka JDF base. The suspects have not been identified, and such conjecture will only alarm the citizens. We expressed regret to the government of Da Han Zhong concerning those reports. We are also increasing security at the DHZ consulate. We urge all citizens not to be misled by any unsubstantial reports. Anyone with information should contact the nearest police station.
- 3: The recent dispute between Da Han Zhong and the Philippines over offshore oil fields was settled after the withdrawal of Da Han Zhong forces. Although some news sources attributed the withdrawal of Da Han Zhong to a massive explosion that decimated their army, this is not confirmed. Da Han Zhong and the Philippines are remaining silent regarding this incident. The dispute caused major damage to the city of Batangas. An official request for aid was made to Japan by the Philippine government through the OCU Congress. In response, our government will send an emergency relief team. The OCU Congress will denounce the DHZ's role in the incident.
- 4: The JDF confirmed recent reports that a USN fleet has entered Japanese waters and requested a formal complaint. The Ministry of Foreign Affairs filed the complaint through OCU Congress, requesting a swift withdrawal and apology from the fleet. USN spokesperson Stephanie denied the request, claiming that the USN fleet is here to relax military tensions in Asia. The USN also intends to strengthen their fleet preparation for any large-scale conflicts in Asia. Our government will file further protests and request a possible dispatch of a comparable fleet by the JDF.

5: As the dispute between the DHZ and the Philippines settles down, a terrorist organization, the Hua Lian Rebels is showing signs of activity. Skirmishes between the Hua Lian Rebels and DHZ forces have spread across the nation. We have confirmation that the DHZ is in a state of civil war. All Japanese citizens remaining in the DHZ are advised to report to their nearest embassy or consulate and leave the region immediately. Our government will dispatch forces for rescue operations, and has requested that the DHZ government and the rebels not attack them. We are also consulting countries in the region to discuss the best way to provide humanitarian aid.

6: The invasion of Okinawa Ocean City by DHZ forces is being registered by the defensive efforts of the JDF. The DHZ government responded by saying that they were merely trying to capture the Hua Lian Rebel leaders hiding in Ocean City. However, there is no evidence of rebel leaders in Ocean City. We conclude that their objective is to annex the underwater resources of the region. Our government is ready to deploy elite divisions to support the Ocean City troops. However, we will also continue to negotiate with DHZ for a peaceful resolution of this matter.

OVERSEAS DANGER (MFADANGER/GOVERNMENT/JAPAN)

1: OCU Philippines (1)

Political unrest in the Philippines has led to decline in public safety. The rebels, led by Vice President Bamarm, are becoming more active. We advise against traveling to areas south of Panay, due to rebel activity. There has also been a rise in terrorist attacks in Manila and other major cities.

1: OCU Philippines (2)

The DHZ's invasion of Luzon is causing further deterioration of safety in the Philippines. Travel to the Philippines is now prohibited to Japanese citizens. A recall order for all Japanese residents is currently under debate. Please await future announcements.

2: People's Republic of Da Han Zhong (1)

It appears that public order in the DHZ is relatively stable. The crime rate remains low. However, there are unconfirmed reports of rebel activity by the Hua Lian Rebels in Guangzhou and Fujian prefectures. While there have been no reports of rebel attacks on foreigners, please be aware of the danger.

2: People's Republic of Da Han Zhong (2)

The activities of the anti-government organization the Hua Lian Rebels are escalating. The latest report indicate a number of cities in southern DHZ being occupied by the rebels. We ask that you refrain from traveling to the region, for a full-scale attack on the rebels by the DHZ forces is expected soon.

2: People's Republic of Da Han Zhong (3)

Our government is breaking off diplomatic ties with DHZ, in response to their invasion of our territory. Consequently, travel to the DHZ will be prohibited. We ask all Japanese citizens residing in the DHZ to evacuate to a neutral country or report to the local embassy.

3: Southwest Africa

The public safety in Southwest Africa is extremely poor. Robberies and murders are frequently reported. Many of the crimes target foreigners. Please use extreme caution if you must travel the area for business. In addition, there are reports of malaria outbreaks in some regions.

Please take all possible precautionary measures before traveling.

4: Republic of Zaftra (1)

The government of Zaftra reports that terrorist activities within the country are now under complete control. We are lifting the travel restriction to Zaftra in response to this announcement. However, please avoid traveling to this country unless it is absolutely necessary.

4: Republic of Zaftra (2)

There was a terrorist attack in Moscow, despite the announcement that the government had the terrorist under control. The organization responsible for the bombing announced their intention to continue terrorist activities. Another travel restriction to Zaftra is under discussion. Anyone planning to visit the area should use extreme caution.

5: People's Republic of Alordesh

A news source reported that a group of rebels dissatisfied with Alordesh's new regime has commenced anti-government activities. We conducted an investigation into the matter but were unable to confirm the report. Therefore, we deem the country safe for travel. However, please keep your belongings safe from pickpockets in the area.

STATE OF DIPLOMACY (MFADIPLOMACY/GOVERNMENT/JAPAN)

1: OCU Financial Aid (1)

Our government is preparing an economic aid package to OCU countries suffering from poor economic growth. While the international aid budget for the 2115 fiscal year was reduced by 13 percent, we are trying our best to provide as much aid as possible under the current situation. The details of this economic support will be determined at the upcoming OCU Economic Cooperative Talks in Alordesh.

1: OCU Financial Aid (2)

A resolution was passed to assist OCU member countries that are suffering economically at the recent OCU Economic Cooperative Talks. The major members of OCU--Japan, Australia, Korea, and Thailand--will deliver a total of 18 billion yen in economic aid to the Philippines, Malaysia, New Zealand, and Alordesh. Japan and Australia will donate the highest amount, 6 billion yen each. The economic aid to the Philippines and Alordesh is made on the condition that they take stronger measures against rebel activities. The aid package determined during the talks will be carried out by the end of next month.

1: OCU Financial Aid (3)

DHZ troops have attempted a military invasion of OCU Philippines. While the Philippines asked for additional defense forces, increased defense costs under current financial conditions may lead to the bankruptcy of the Philippines, or a total collapse of Southeast Asian economies. However, reinforcing their defenses would contribute to peace and stability in the Southeast Asian region, as well as our country. As a result, part of the aid package to the Philippines is to be allocated to the Philippine military. The military aid will be carried out under OCU supervision in order to control weapon import/export and weapons of mass destruction.

2: Situation in the Philippines (1)

Anti-government activities continue in OCU Philippines. Capital and manpower wasted in such disputes would be better spent improving the region's economy. Our government supports Philippine President Lacan's statement, "We will not ask for help from the OCU, as the problem is a domestic one." However, it is clear that continued rebel activities

in the Philippines will further deteriorate their economic situation to our country and economic loss. Our government declares that we are ready to aid in the peace negotiations.

2: Situation in the Philippines (2)

Our government is sending humanitarian aid to the Philippine citizens injured in the failed DHZ invasion attempt. The use of a new weapon by the DHZ military cause massive casualties in Batangas and adjacent areas. The death toll is expected to rise due to deteriorating sanitary conditions. Currently, only minor medical assistance is available. Many refugees are flowing into surrounding areas. Our government has organized an international relief team. An advance team is already on its way, and the main team is scheduled to depart soon.

3: Dealing with Da Han Zhong (1)

Japan and the DHZ have built an amicable relationship over the years through respect of one another's cultures. Maintaining a relationship between the two countries is fundamental for peace and prosperity. It is very important for Japan and the DHZ to continue cooperation in international matters. History shows that cooperative efforts helped to bring prosperity to both countries. We are resolved to strengthen our current relationship with the DHZ.

3: Dealing with Da Han Zhong (2)

We express deep regret that the DHZ attempted to invade OCU Philippines, and we ask for the immediate withdrawal of the DHZ troops. Early reports indicate that a weapon of mass destruction was used in the invasion attempt. This is an inhumane display of aggression. We are demanding an unconditional withdrawal of DHZ troops in the Philippines. To this end, Japan will continue negotiations with the DHZ government. Meanwhile, our economic aid to the DHZ will be reviewed. A delay in withdrawal will result in a discontinuation of aid.

3: Dealing with Da Han Zhong (3)

In response to the invasion of our territories, we are breaking all diplomatic ties with the DHZ. We demand the immediate withdrawal of the DHZ military. Our government recalled its ambassador to the DHZ and advised all Japanese citizens residing in the DHZ to leave at once. All economic assistance to the DHZ will be severed, and exports and remittances will be prohibited. This invasion is an insult to the long-standing relationship between the two countries and an affront to international peace. While we will continue negotiations with the DHZ, we will be forced to respond militarily if the DHZ does not withdraw from our territory.

4: Relationship with USN (1)

While the relationship between our country and the USN remains unfavorable, good relations are necessary for stability in the Pacific Rim. Therefore, we are working with the OCU to ease the tensions that exist with the USN. Measures include travel by USN goodwill missions, research groups, and civilian cultural exchanges. It is also important for Japan and the USN to cooperate in spreading prosperity worldwide. Our diplomatic policy is to continue working towards a better relationship with the USN for the peace and prosperity of the world.

4: Relationship with USN (2)

Our government is examining the recent report of a USN operation over Taiwan. We are concerned about the deteriorating state of affairs in the region and the injuries to Japanese citizens that were caused by the operation. Another source reports that ships are gathering in the

surrounding waters. While we regret this turn of events, we want to emphasize that all diplomatic efforts are being made to resolve the situation.

5: Schedule of Diplomatic Activities (1)

Foreign Minister Kida is in the Philippines, meeting with President Lacan to discuss cooperative measures to deal with anti-government rebels. A goodwill visit to the USN is expected within the year. Ambassador Anzai is to meet with DHZ Foreign Minister Wang for economic cooperation talks.

5: Schedule of Diplomatic Activities (2)

Goodwill visit to the USN planned within the year. An international conference on Spender countermeasures to be held in Tokyo next year. DHZ Ambassador Jiang and other DHZ diplomats departed in response to the DHZ invasion of our country. The DHZ Embassy and Consulates are to be closed.

DIPLOMAT COLUMN

1: This month's spot/Germany

Reported by Secretary Yamashita

Here in Germany, there is a rumor of a strange monster named "Polvadinger." According to legend, it is a hare with horns and sharp fangs that understands human language. The beast was spotted recently around the Schwarzwald. Is it a hoax, or could it be a genetically engineered monster? We are certainly interested in the follow-up of this story, but it might be best left untouched!

2: This month's spot/USN

Reported by Secretary Ebii

A virtual beauty contest was held during the E5 convention in LA. The computer-generated beauties were judged on their appearance, behavior, and AI. The grand prize was awarded to Miss Lara Crawford. She was praised for her exquisitely human gesture of sneaking a smoke behind a bar center. Her creator, Mr. Nekotomu, is a Japanese citizen we can be proud of.

3: This month's spot/Thailand:

Reported by Secretary Miura

The floating market reappeared on the Chao Phraya River in Bangkok, after a 10-year absence. This event was to celebrate the anniversary of the Bangkok Economic Block, which later formed the OCU. As many as 300 small ships fully loaded with farm produce and flowers opened to a massive crowd. Some people even fell into the river.

4: This month's spot/Mongolia:

Reported by Doctor Haruyama

The capitol, Ulan Bator, is a spectacular metropolis with skyscrapers. However, once you leave the capital, you can see nomads living in traditional fashion. While there is political unrest in the neighboring DHZ, it is quite peaceful here.

5: This month's spot/The DHZ

Reported by Secretary Okita

I enjoyed last month's article from Mongolia. While the unrest created by the rebels is true of rural areas, major cities such as Shanghai and Beijing have not been affected. There is no change in the safety of Japanese citizens residing and traveling here. I hope this clears up any misunderstanding.

6: Mrs. Reiko Kohno, Egypt embassy

Although there is a doctor at the embassy, hygiene in the city is atrocious, and I'm concerned about my children's health.

7: Mrs. Kyoko Tazawa, Kenya embassy.

I'm concerned about my children's health and education here. What can I do to improve it?

BULLETIN (MFABULLETIN/GOVERNMENT/JAPAN)

1: MFA BBS 1

I am traveling from Singapore to Thailand then to Vietnam. Will I need a visa for each country, or just the first? (Kenichi Koide, Kyoto)

For stays less than 6 months, you don't need a visa for travel within OCU. However this may vary by country. (Overseas travel information, MFA)

Thanks to your reply. So I don't need a visa within the OCU region. Maybe I'll include Alordesh in my trip, too. (Kenichi Koide, Kyoto)

2: MFA BBS 2

I am going to Alordesh for business. Since I'll be staying for more than 6 months, where can I get a visa? (Haruo Yabe, Iwate)

Please inquire at the Alordesh Embassy. If you are employed locally, you will need a working visa, but a temporary business trip will only require a general visa. (Overseas travel information, MFA)

3: MFA BBS 3

I'm scheduled to travel to Ghana, Africa in 3 months. What type of immunization shot do I need? (Wataru Nagata, Hokkaido)

You are required to get shots for malaria and ebola-zaire. We advise you to get the first shot soon, since the certificate of immunization becomes valid only 10 days after the vaccination.

(Overseas travel information, MFA)

4: MFA BBS 4

I plan to visit my relative abroad. Is it okay to take a Japanese web terminal as a souvenir? (Yoshimichi Noda, Shimane)

You are required to declare the export of web terminals to countries outside of the OCU. Some high performance terminals require special permission, as their internal parts may be converted for use in wanzers. (Overseas travel information, MFA)

Regarding the export of web terminals, there is no ban on any model currently in production. However, please be aware that some countries may charge a customs duty. (Trade control office, MIT)

5: MFA BBS 5

I am planning a driving tour of the DHZ from Taiwan, through the Futai tunnel across to Asia. Is there anything special I have to prepare? (Hisashi Onoda, Ishikawa)

Please apply for an international driver_痴 license. Also be aware that there is currently rebel activity in the DHZ.

(Overseas travel information, MFA)

6: MFA BBS 6

I've been living in Alaska for along time. I was wondering if I can bring Coco, a Kodiak bear, with me upon my return to Japan.
(Naoko Hitotsubashi, Alaska)

Under the Washington Treaty the Kodiak bear can be brought into Japan with export permission from the local government in Alaska.
(Overseas travel information, MFA)

The Kodiak bear must remain under quarantine for 14 days while we conduct a health inspection.
(Quarantine division, MIT)

7: MFA BBS 7

I will be studying at the University of Zaftra. I will be there for 1 year. Is it okay to go on a tourist visa? (Kazumi Kato, Tokyo)

Please apply for a student visa at the Zaftra embassy. You will need certification from your host university. Be careful of terrorist activities. (Overseas journey information, MFA)

Thank you. I believe there are some of the world's most advanced research institutes over there. (Kazumi Kato, Tokyo)

[jg4] National Land & Traffic Agency of JAPAN (NTJ/GOVERNMENT/JAPAN)

TOPICS

1: NTJ/This month's topic:

Future of Public Works

Public Relations Center

We asked Head of Development Takeda about the future public works plans, criticized recently for poor management.

Q: Why the insufficient support of urban facilities?

A: We are now in the process of improving efficiency of all services.

Q: Any plans for rural public works?

A: We should change the paradigm of the urban and the rural, since the distance between cities has dramatically shortened.

Q: Future plans for public works?

A: We plan to follow Nagoya's example with the adoption of zoning to redesign the city.

2: NTJ/This month's topic:

3: NTJ/This month's topic:

Underground Utilization in Urban Areas Legal Dept. - Special Land Laws
NTJ's research into the use of subterranean land use was recently concluded. Previously used only for emergency shelter, the underground will soon be opened for development by new legislation. We hope that the passing of this legislation will solve the problem of scarce land resources in the city.

PROJECTS

1: Koriyama

NishiKoriyama City Construction Project

Until now, the super-skyscrapers were designed for a single function, either commercial or residential. The Nishikoriyama City is an experimental building designed to function as a complete city. It will house business, residence and public facilities together. New construction methods solved the problem of supporting a floor space that measures 500m on each side. The construction is slated to finish in 2210. Our government regards this project as a model planned city showcasing improved efficiency and the beginning of decentralization.

A rendered model of the city can be downloaded. [PW:SINTJ]

2: Tokyo Bay

Tokyo Bay Development Plan

The plan focuses on improving the transportation and expanding the commercial area surrounding Tokyo Bay. Projects include: the "Shin-Ohgishima Bridge" (completion in 2113) linking Yokohama and Haneda; the "Triple Bayline" automobile tunnel (completion in 2113); the "Trustliner" (service begins in December), a new train line. These will help ease congestion in the city. New cities are also being developed along the new transportation corridors. The "Sunfai Omori" in Ota ward, and "Ichikawa Finetown" in Urayasu are just two. These new cities will work toward improving the growth of the Japanese economy.

3: Nagoya

Nagoya Sewage Treatment Expansion

The construction of an underground sewage treatment plant in Nagoya was to be completed this year. However, the unexpected rise in the population has delayed the completion of the plant while it is expanded. The expansion will include: 3 processing facilities; a purifying facility; and connection to the current facilities. An increase in high-grade recycling will be achieved by the expansion of the underground facility below Chigusa Ward.

Information on underground facilities can be downloaded. [PW:WNTJ]

4: Okinawa

Ocean City Construction

An elevated highway passing over sub-blocks 32 to 45 of Primary Block 4 under construction. Completion in 2113.

No.10 Wharf Expansion

The No.10 Wharf housing Ishizawa Trading, Badacca Marine Transport, and Andas Enterprises is under expansion.

PB 13 Maintenance

Maintenance construction in the power generator of Primary Block 13.
Please refer to the Ocean City Developers Corp's web site, (OCC/CORPORATION JAPAN), for further details.

[jg5] Ocean City Development (OKINAWAOCD/GOVERNMENT/JAPAN)

TOPICS

1: [Ocean City 20th Anniversary Festival]

We are celebrating the 20th anniversary of Ocean City this year. Created as a world trade center, the city has expanded to several times its original size. The festival, sponsored by the government, was celebrated with the prime minister and OCU congressman. The 20th anniversary events started with the Ocean City International Marathon at the bridge that links Okinawa and Ocean City. In the Harley Memorial Event, a JDF team and the police team had an exciting match. The police team won with a new record. Other events include a classical concert performance by the Okinawa JDF military band.

2: Ocean City Mayoral Election

The election of the Ocean City mayor will be held on the 11th of next month. The candidates are: Akira Takamura (41), NGO executive, ind. Saburo Ooki (55), company president, Lib. Mitsuo Sada (61), incumbent Mayor, Dem. Listed in order of application. Age listed is age on the date of election. You may vote from your network terminal at home or from the satellite terminals in the city between 0600 to 1800 on the 11th of next month. The following people are prohibited or limited.

[Those who are not allowed to campaign]

Election workers, members of the board of elections, judicial police officers (no commitment in any campaign).

[Those with limitations]

Public servants, public school employees, etc.

3: The results of the Ocean City municipal election:

Mitsuo Sada (61). Dem., incumbent-42,531

Saburo Ooki (55). Lib. - 34,663

Akira Takamura (41). Ind. - 12, 398

The voter turnout was as follows:

Men: 40,53% Women: 35.53%

The inauguration will take place at the City Hall on the 25th of this month. The mayor's term will be 2 years, from the 1st of next month.

4: Ocean City is presently under unlawful occupation by the DHZ military.

The Ocean City bridge and harbors are blocked, making it difficult to evacuate Okinawa. The DHZ military is progressing into the residential areas, and the Ocean City government cannot assure the safety of citizens remaining in these areas. Please evacuate to the nearest shelter.

Connections to some blocks are currently unavailable, especially to the lower levels. We ask that you evacuate to upper levels. Evacuation does not ensure your safety. Please remain calm and follow the instructions of the police or JDF.

VOICE OF CITIZENS (OCDBULLETIN/GOVERNMENT/JAPAN)

1: OKINAWA DB BBS 1

Masaki Takaoka (22)

I'm a driver from Itoman. The water quality around Ocean City is deteriorating. Are you sure the city's water purifications system is functioning correctly? I'm very concerned.

Okinawa Dev. Agency, PR Division

We deny the allegation made by the media on marine contamination around Ocean City. The City's water purification system is functioning perfectly. Please refer to the engineering center of Ocean City Developers Corp. for any other questions.

2: OKINAWA DB BBS 2

Sadako Arima (31)

I'm working at the Ocean City aquarium. A dugong gave birth to a baby recently at our aquarium. May I advertise a contest for the baby's name here?

Okinawa Dev. Agency, PR Division

Of course you may! Please think up a charming name for the baby. The winner will be awarded a commemorative gift.

3: OKINAWA DB BBS 3

Okinawa Dev. Agency, PR Division

Our baby dugong has been named "Opi." It was named by Yasuharu Kishi(5), of Tokyo. Thank you very much for your numerous suggestions, a total of 30,000 were received. Opi thanks you all.

Teruyaki Tadatora (54)

I'm glad he got a cute name. I'll go see him next holiday with my family. I am already excited to see Opi.

4: OKINAWA DB BBS 4

Shigeo Takahashi (30)

I heard that the explosion in the Philippines was nuclear. If that's true, it would affect the sea around Okinawa.

Okinawa Dev. Agency, PR Division

While no details are available, we confirmed that it was not a nuclear explosion. Therefore, the blue waters of Okinawa will continue to be a symbol of peace.

5: OKINAWA DB BBS 5

Miss Satake (20)

I'm a student. Can you suggest something fun to do for a vacation?

Okinawa Dev. Agency, PR Division

Take a ride on the "Jet-sub," very popular now in Ocean City! It is a small jet-ski with an underwater cruise feature. Rentals are available.

6: OKINAWA DB BBS 6

Okinawa Dev. Agency, PR Division

We are withdrawing from the Jet-sub business, as a result of manufacturer defects coming to light. Those involved have been penalized, and we express our sincerest apologies.

-Marine Dev. Manager, Takadai

Wataru Kaihara (19)

Oh man! Maybe I'll change my vacation plans from Okinawa to Sulawesi.

7: OKINAWA DB BBS 7

Yasuo Minami (25)

I can't contact my sister in Ocean City. Is it true that the DHZ troops invaded Ocean City? I can't get any information from the government or the news. Can someone please tell me what's going on out there?

Okinawa Dev. Agency, PR Division

The DHZ troops are in Ocean City, but they are not harming the residents. The citizens were evacuated into shelters while the JDF and our government settle the situation. Thank you for your cooperation.

INFORMATION

1: Ocean City Municipal Laws

1.1: Special Residential Zoning Laws

Ocean City is under different laws than Japan. The special residential zoning laws are an example. The laws work to provide you with the necessary living space and confirm your addresses. The outline of the laws is as follows:

- 1) Floor space limited by the number of household members.
- 2) Restrictions on living in dangerous areas such as power generator block.
- 3) Registration required for visits longer than 30 days. Contact the Ocean City government for details.

1.2: Special Corporate Laws

Exemption from customs and the reduction of income tax and other taxes are applied more favorably in Ocean City than mainland, making Ocean City a desirable place for corporations to relocate. Since there is a limit to how many corporations can move here, these special zoning laws examine candidate corporations and protect local corporations. The details of these laws are as follows:

- 1) Examination of finances.
- 2) Examination of profit distribution. 1/3 to half of the savings from reduced income tax should be re-invested.
- 3) Newly established offices must give priority to local employment. Contact the Ocean City government for details.

1.3: Special National Defense Laws

The JDF is stationed in Ocean City to defend Ocean City and the entire nation of Japan. Residents and corporations are asked to cooperate with the JDF according to these special laws, as follows:

- 1) The JDF may appropriate equipment belonging to an individual or a corporation in an emergency.
- 2) In an emergency, the JDF will assume law enforcement duties.
- 3) Cooperation is requested if the JDF is dispatched to the OCU.

The requests will be announced through the news, the internet, and the emergency broadcast channel. Contact the Ocean City government for details.

OCEAN CITY GALLERY (OCCPHOTOS/GOVERNMENT/JAPAN)

1: A view of Ocean City

Located in southern Okinawa, Ocean City is 5,900m long and 5,500m wide, the largest man-made island. Underneath the city lies a power plant that provides energy and also can move the city. The island is connected to the main island via the Ocean City bridge.

2: A residential place

Ocean City residential areas consist of low-rise and mid-rise apartments. Streets are lined with many trees for people to enjoy. Essential services, such as medical facilities, are well maintained. Rent control ensures reasonable living costs.

3: The municipal assembly

The city hall conference room, located in the center of Ocean City, is painted in blue to match the seas surrounding the city. Each city council member seat is equipped with an information terminal for quick research. Auxiliary equipment includes a TV relay for live telecasts.

4: The City government office building

The government buildings are placed in the center of the island. Among them, the City Hall is the tallest building in Ocean City. It is equipped with the latest anti-earthquake measures. A monthly concert by the JDF band is held at the adjacent community center.

5: An industrial area

The industrial district is the heart of Ocean City, providing industrial output and energy. As well as production facilities, many research laboratories developing the latest technology are located in the district.

6: A business area

The stock market in the business district is called the Wall Street of Ocean City. All transactions are computerized and open around the clock. Partially because of the tax exemptions, there are more than 2,000 companies listed in the market.

7: A marketplace

The shopping mall in Ocean City distributes goods. The entire building is covered with a transparent ceiling. International sea travel to Taiwan and the DHZ departs from the port area. There are also many souvenir shops for visitors which sell glassware and other local items.

8: An entertainment district

This district has an active nightlife. There are rows of tropical bars and exotic restaurants. It is a safe neighborhood for women, as well. Recently, a movie theater opened where you can view optical films that have been out of print for 100 years.

[jg6] Japanese Police (JPO/GOVERNMENT/JAPAN)

OUR MISSION

Greetings. We at the Japan Police Organization are devoted to keeping the peace night and day. We introduced the Wanzer Police Special this year to combat the rising wave of violent wanzer crimes. This new model is customized for police use, with bulletproof plating and special knee plates designed to protect officers around the wanzer. Equipped with a 50mm gun, the Wanzer Police Special can also enter close combat with ease. Performance is 40% up from the old model, and a 20% reduction in turn-radius means the new Wanzer Police Special is geared for urban combat. The new wanzers will be stationed in urban centers first, but look for them in every part of the country by mid-next year. Preview the new model at the Iguchi company website: IGUCHI/CORPORATION/JAPAN.

TOPICS

1: The JDF has reported that a fuel depot fire caused an explosion at Yokosuka Base. An investigation into the cause of the blaze is currently underway. The police are interviewing eyewitnesses and making inquiries into the matter. Anyone with information should contact the police. Victims have been sent to the JDF Yokosuka Base Hospital, Yokosuka Central Hospital, Yokosuka Nagoshi Clinic, and Misaki General Hospital. Currently, all access to

Yokosuka Base area has been suspended. Gas and electrical service to the area has been stopped. Contact local utilities to see when service will resume. Thank you for your cooperation.

2: We have received reports of an unauthorized vehicle carrying two wanzers in the Yokosuka Base area. A mobile police unit is investigating. There have been unconfirmed reports that the wanzers are armed. Please use caution when traveling in the following areas: Yokohama/Yokosuka Highway: Asahina Interchange, Kamariya Junction; Yokosuka Route 16: Funakoshi Intersection; Hayama-Zuyo Road: Nagara Intersection. It is unknown if there is a connection between the unidentified vehicle and the Yokosuka Base explosion. If you see suspicious people or vehicles in your area, contact your local police immediately.

3: Armed wanzers in the Yokosuka area disappeared after a few brief skirmishes with JDF troops. The vehicle used to transport the wanzers was found unmanned. It is believed that the suspects have already left the country. Inform police if you see anything suspicious. An explosion at the Shin-Ohgishima bridge has been confirmed. Wanzers were reportedly involved, and a connection to the Yokosuka explosion is under investigation. A team of 150 prefectural police is currently narrowing down the search for the escaped wanzers. While no civilian lives have been lost in this incident, those who have sustained property damage should contact their local government of housing office.

4: Recently, the "National Emergency Control Law" proposed by the Ministry of Justice was passed by the Parliament. This law upgrades police powers during a state of emergency following terrorist attack, armed invasion, or a large-scale disaster. There is no need for concern that this law will allow unchecked police activity, such as unwarranted surveillance or penalization of civilians. The implementation of this law requires full cabinet approval. This law is designed to insure the safety of our citizens, not to control their private lives. Please be assured, the police exist to serve and protect you, the citizen.

5: Currently, there are reports of a revolt within the JDF. Those individuals' actions are clearly illegal, and they will be severely punished. A special JDF division has been sent to suppress this internal uprising. The Japan Police Organization is not directly involved in this operation. However, please be assured that the JPO will deal harshly with any action that threatens the security of our nation's people. Local authorities will send evacuation instructions and aid to those civilians in the concerned areas. The current situation may change. Please do not misled by unsubstantial rumors, and remain calm.

6: Martial law is in force across Japan. Citizens are asked to observe local curfews, and not to gather in large numbers. Contact your local authorities for details. Be aware that public transportation is heavily restricted. Thank you for your cooperation under these difficult conditions. Always carry ID when traveling during daylight hours. Those without ID may be detained while their identity is verified. Anyone seeing suspicious vehicles or persons should contact the local police. Any change in curfew times or a lifting of martial law will be announced over standard video, audio, and net channels.

SCHEDULED ACTIVITIES

1: Traffic Safety Week will be held again this year. Over-reliance on navigation systems has increased the number of accidents recently.

This weeks events:

- Primary school marching band parade.
- Traffic Chief for a Day, with popular singer Megumi Suzuki.
- Traffic safety course.

The winner of this year's Traffic Safety Week Slogan Contest is Mr. Yukimoto Aojima from Yamagata Prefecture, with his slogan: "Waiting for your safe return." His slogan will be used on our official poster model, Officer Miho Shinjo of the Kanagawa Prefecture Yokosuka Police Office.

2: Starting next year, highway traffic laws will be revised in an attempt to reverse the growing trend of youth accidents. The following points will be amended:

- Raise the minimum age for a license.
- Psych evaluations for wanzer licensees
- Prohibition of gas-powered vehicles made prior to 2085.

3: During USN Secretary of State Kerwin's visit to Japan, the roads listed below will be closed. Schedules changes may occur without prior notification. Schedule - Day 1: New Tokyo Haneda International Airport--Miyakezaka Jct. Day 2: USN Embassy--Parliament. Day 3:Reverse of Day 1.

4: Future scheduling is on hold, pending resolution of the JDF uprising and Da Han Zhong invasion. Martial law has been declared for all regions of Japan. For a detailed explanation see "Topics." Citizens are asked to cooperate with local officials.

CITIZENS' VOICES

1: JPO BBS 1

I understand that they have to find out about that explosion, but things are getting out of hand. Any why shut down the highway? People can't get to work. Please do something. (Yokohama - Yamato Sagawa)z

To conduct a through search for the vehicles in this incident, every vehicle in the Yokosuka area must be inspected. We apologize for the inconvenience. (JPO Ombudsman)

Help! Shipments are dropping daily! We're not getting enough supplies, and the prices are skyrocketing! How about letting a few supply trucks through? Please? (Yokosuka - Wakako Ishida)

We are curtailing vehicle inspections related to the explosion incident in the Yokosuka area. This should lead to a smoother flow of traffic. (JPO Ombudsman)

2: JPO BBS 2

You guys think you can fire those guns anywhere you please, but what about us civilians? All those explosions nearly gave gramps a heart attack! It's just not safe. (Yokohama - Mitsuru Utsonomiya)

Those patrol cars and helicopters are making such a racket I can't think, much less get to sleep. Is it legal for them to fly so low? Those far-off explosions are a little unsettling, too. (Yokohama - Akira Adachi)

The JPO holds the safety of citizens as its top priority. While we are forced to use firearms in the apprehension of dangerous criminals, safety always comes first. The minimum cruising altitude for aircraft

over a populated area is 1000 feet. However, these restrictions do not apply to some JDF operations. Please be assured that our pilots have your safety in mind at all times. We apologize for the concern caused by our joint military action with the JDF. We are currently looking into safety issues with regards to these activities. (JPO Ombudsman)

3: JPO BBS 3

I just got this ticket for a speeding violation two months ago! What's up with that? (Kazo Takada)

Tickets are now automatically issued and processed by the new Detection System 7. This system records the license number, color, speed, and time of any vehicle in violation of regulations. While two months is an unusually long delay, the system is overloaded due to the number of traffic violations. If the fine is not paid, appear in court at the time and place indicated on your ticket. Failure to appear may result in further fines. (JPO Ombudsman)

4: JPO BBS 4

I gave my E-mail address to a person I met in a chat room, and he keeps sending me mail! As soon as I log-on, he starts sending messages. It's creepy! Like I'm being watched. Can you do something about this? (Anonymous)

The JPO does many things to help citizens lead safe lives. Prevention of network harassment is a matter we take seriously. Please report any incidents to your local police. We have experts on staff who can answer your questions and help you defend yourself. All we need to investigate a case of network harassment is the offender's address. All consultations are kept confidential. (JPO Ombudsman)

5: JPO BBS 5

The recently approved "National Emergency Control Law" is interfering with the lives of private citizens. I think there needs to be more discretion shown in its implementation. What is the official stand of the JPO? (Aichi Prefecture - Kazuki Kita)

As a law enforcement agency, the JPO strives to follow the spirit of the law, and to implement it fairly. In all of our actions we follow the Parliament's recent declaration that the implementation of this law shall not significantly disturb civilian affairs. (JPO Ombudsman)

This message deleted due to inappropriate content. (JPO Ombudsman)

6: JPO BBS 6

Since martial law was declared, all the city festivals my children used to enjoy have been cancelled. How much more of this do we have to endure? (Anonymous)

We are deeply concerned that many citizens are imposing too many restrictions since the declaration of martial law. Martial law was declared to protect the people, not needlessly regulate their lives. As long as attendees carry identification, preserve the peace, and observe curfew, festivals are both legal and welcome. Please make proper arrangements beforehand with your local authorities. (JPO Ombudsman)

7: JPO BBS 7

With the war going on in Kyushu and Okinawa, I wonder if foreigners living here won't cause any disturbances? (Anonymous)

This message deleted due to inappropriate content. (JPO Ombudsman)

Units within the JPO responsible for stopping social unrest before it occurs are currently monitoring certain organizations 24 hours a day. Please do not be alarmed by rumors. (JPO Ombudsman)

MISSING/WANTED

1: Wanted

1.1: Kazumi Kato

Kazumi Kato: Ht. 179cm. Suspected of subversive activities. Doctorate in environmental engineering. 600CR reward for information leading to arrest.

1.2 Ryuji Oshima

Ryuji Ohshima: Ht. 180cm. Suspected hijacker. Disappeared after leaving Okinawa for Shanghai. Thought to be hiding in the South China Sea oil fields.

1.3: Kazushi Takahashi

Kazushi Takahashi: Ht. 177cm. Suspected of inciting riots. China Reform Party member. 400CR reward for information leading to an arrest.

1.4: Akiko Matsumoto

Akiko Matsumoto: Ht. 156 cm. Suspected of arson leading to fatalities and of killing her husband for infidelity. Witnessed last month training as a monk in Ayutaya.

1.5: Dai Sato

Dai Sato: Ht. 178cm. Suspected of electronic mail forgery, illegal entry. Possibly hiding in Singapore. 300CR reward for information leading to an arrest.

1.6: Koji Yamada

Koji Yamada: Ht. 169cm. Suspected of poisoning a reservoir. Thought to be hiding in a Guangzhou restaurant. 400CR reward for information leading to an arrest.

1.7: Tatsuya Ozaki

Tatsuya Ozaki: Ht. 173cm. Suspected of electronic forgery and related activities. Disappeared from Manila. Hiding in Alordesh? Employee of Kirishima Industries.

2. Missing

2.1: Masami Yokohama

Masami Yokohama: Ht. 153cm. Violent when drunk. Still believed to be in the country. 500CR reward for information leading to arrest.

2.2: Yoshihisa Ushihisa

Yoshihisa Ushihisa Ht. 173cm. Disappeared on motorbike. Spotted at international exhibitions. 600CR reward for information leading to arrest.

2.3: Shoichi Furusawa

Shoichi Furusawa: Ht. 180cm. Freelance writer. Last seen at a metro publishing house. 600CR for information leading to an arrest.

2.4: Takashi Kishi

Takashi Kishi: 175cm. Physician. Likely to be hiding in Ocean City.
600CR reward for information leading to an arrest.

2.5: Akio Higuchi

Akio Higuchi: Ht. 170cm. Writer. Self-styled fly-fisherman. Last
seen at a lodge in Shizuoka.

2.6: Kei Ikihara

Kei Ikihara: Ht. 170 cm. Editor. Currently overseas in Port Moresby.
Last seen in Laeh.

2.7: Bou Tanegashima

Bou Tanegashima: Ht. 173cm. Former Ocean City Development PR Chief.
Disappeared after corruption scandal. Location unknown; possibly in
Ocean City area.

[jg7] Department of Public Safety [PW:992]

DOMESTIC INFORMATION

1. Japan Information [PW: JA9AN]

1.1: LEVEL 1 DATA

Japan Internal Report: No.046790

Japan has been a leader for the 90 years since the founding of the
OCU, yet is now falling behind other OCU member nations in education
and the economic terms. Our disaster prevention agencies are behind
those of other nations. The Department of Public Safety is understaffed
and our equipment is outdated to the point where the JDF has better
intelligence than the CIU.

1.2: LEVEL 2 DATA

Japan Internal Report: No.046831

The JDF has reported the JDF Yokosuka Base explosion as an incident.
However, the following evidence shows otherwise.

- 1) The area of the explosion was far removed from any fuel or ammo
depots.
- 2) A video of the explosion distributed by the JDF shows signs of
digital retouching.
- 3) No government authorities have been allowed to examine the site.
It is still not clear exactly what transpired there, nor do we have the
equipment to break through their defenses and find out.

1.3: LEVEL 3 DATA

Japan Internal Report: No.046896

JDF General Chief of Staff Masao Sasaki is well-known within the JDF
for his ambition. His "Theory of Active Defense" is basically
the same as USN and Da Han Zhong's policy of "Military Force as
Diplomacy." Sasaki is backed by many Parliament members and could
become a minister. His movements are being closely monitored.
If he takes suspicious actions, rectification may become necessary.

1.4: LEVEL 4 DATA

Japan Internal Report: No.046857

We have received information that JDF has infiltrated the police.
Our research has found three suspects. One female officer has
been dropped from suspicion following a closer examination. The

other two suspects are under constant surveillance. We believe that spies were sent into our organization to gauge the extent to which the police and the public safety boards know about the Yokosuka base explosion.

1.5: LEVEL 5 DATA

Japan Internal Report: No.046896

We are continuing our investigation into the JDF emergency response team "MAF" (Mobile Assault Force). Yesterday, one of our investigators was involved in a hit-and-run accident. He escaped with minimal injuries and reports the accident was staged. We must view this as a hostile attempt by JDF forces to deter our investigation. We have increased precautions since learning the MAF is directed by Sasaki.

2. OCU Information [PW:OCU]

2.1: LEVEL 1 DATA

OCU Report: No.1022250

Large-scale activity within OCU forces since the explosion. The OCU sent inspectors with a scientific team to Yokosuka Base. Following that, several transports were moved to the OCU Atsugi Base. We believe there is a secret behind the explosion.

2.2: LEVEL 2 DATA

Investigations revealed that the OCU established secret weapons research labs in all its member nations. Our information shows a new wanzers model was developed. It is considerably larger than standard wanzers and is clearly in violation of MULS specifications. Its armament appears to be double that of a standard wanzers. A research team leaked this, and we are awaiting photographs and schematics.

2.3: LEVEL 3 DATA

OCU Report: No.1024339

The CIU has also been investigating OCU activities. It seems that the size of their intelligence team has decreased. However, they are still operating on a larger scale than our Department of Public Safety and are equipped with newer weaponry. The CIU is currently most active in OCU nations, especially in Southeast Asia and the Philippines, possibly due to unstable conditions there.

2.4: LEVEL 4 DATA

OCU Report: No.1025112

The OCU central government has been straightening its friendship treaties with foreign nations recently. 20 years after the 2nd Huffman War, its relations with the USN are normalizing, possibly due to the increasing internal conflict within the OCU. However, the OCU military still considers the USN to be its biggest threat, and USN naval craft near OCU territorial waters are closely monitored.

2.5: LEVEL 5 DATA

OCU Report: No.1025343

Particle cannons, commonly called beam weapons, are hard to miniaturize and require high-output generator. Velda Co. of Australia offered to make an experimental beam weapon for the OCU. It was granted top-secret privileges 2 years ago. Jade Metal Lyman Co. was also given permission to build a heavy combat vehicle. It seems that Velda has yet to complete their prototype, and we have been unable to obtain more information on Jademetal. We have unconfirmed reports that Velda is continuing development in a joint venture with Kirishima Industries.

INTERNATIONAL INFORMATION

1: USN Information [PW:U2N]

1.1: LEVEL 1 DATA

USN Report: No.310078

USN naval units are patrolling strategic points in the Pacific. Recently, these patrols have come very close to OCU territory. It is likely they are gathering information. This data was obtained from JDF and CIU intelligence reports.

1.2: LEVEL 2 DATA

USN Report: No.310125

Mergers in the USN weapons industry have become increasingly frequent in recent months. Fireball Co., Hoprise Co. and Fleiman Co. all joined the Diable Avionics Group. Vince Co. has remained independent, but USN orders have dropped. Vince Japan, a division of Vince Co., declared bankruptcy in 2107, and it is only a matter of time before the rest of the company is bought out by Diable.

1.3: LEVEL 3 DATA

USN Report: No.310324

We have reports from our USN informant that the USN is currently developing an entirely new weapon. Unfortunately, all contact with our informant was lost, and we have no more information. We have reason to believe that the weapon is an energy beam device. However, this is not a new type of weapon, suggesting that the weapon must possess other capabilities. We will send another agent to replace our missing informant.

1.4: LEVEL 4 DATA

USN Report: No.310454

We have reports from the JDF that USN naval submarines have been penetrating OCU territorial waters. We have confirmation they come as close as 40km to Okinawa. However, the JDF has not reported these incidents to the OCU military, nor to the Japan Ministry of Defense. We are currently investigating this matter. A fault in JDF communications is suspected.

1.5: LEVEL 5 DATA

USN Report: No.310557

As an OCU member nation, Japan stands opposed to the USN. However, due to strong trade relations with the USN in the past, economic cooperation between our two nations continued after Japan joined the OCU. Now forces are at work to renew ties with the USN. According to our intelligence, certain political and military elements are covertly working to establish military and economic ties with the USN. Similar activity has been reported in the USN as well.

2. DHZ Information [PW:D8Z]

2.1: Japan - Da Han Zhong Relations

Da Han Zhong Report: No.993591

The USN was joined by Da Han Zhong in strong opposition to the formation of the OCU. DHZ officials saw the OCU as an obstacle to trade with the USN, which threatened to join smaller nations of Southeast Asia together in a wall around their own nation. Even today, relations are strained, and nearly all political overtures on the part of the OCU have been roundly dismissed by the DHZ. This has also made penetration of the DHZ by our agents extremely difficult, forcing us to greatly restrict our intelligence operations in this area.

2.2: LEVEL 2 DATA

Da Han Zhong Report: No.993968

In the past, the USN often offered Da Han Zhong economic assistance. Faced with OCU opposition, the USN felt it necessary to join with the DHZ, the latter becoming increasingly dependent on USN economic support. However, DHZ chairman Jie Bo Liao, who assumed control after the death of Bai Tai Luong, took a hardline stance against the growing free DHZ economy and served all economic ties with the USN. Our intelligence shows that the USN made no formal protest, but they began supplying wanzers and other military aid to the Hua Lian anti-government rebels.

2.3: LEVEL 3 DATA

Da Han Zhong Report: No.994935

Da Han Zhong agents have been discovered in Japan. We have confirmation of a vessel leaving the DHZ Shanghai Base. A similar craft was sighted close to Japan in the Ito Straits several days later. We believe this craft was sent to inspect the JDF Yokosuka Base explosion site. This evidence of the USN and DHZ interest in the explosion has further reinforced our belief that this incident was of great, possibly military, significance.

2.4: LEVEL 4 DATA

Da Han Zhong Report: No.995021

One of our agents stationed in Da Han Zhong obtained access to government data. It appears that the DHZ is preparing for a large-scale military effort to eradicate the Hua Lian rebels. The DHZ is mobilizing its elite Rapid Reaction Force in what is surely the most determined assault on the Hua Lian rebels to date.

2.5: LEVEL 5 DATA

Da Han Zhong Report: No.995503

Our agent in Hong Kong has succeeded in making contact with the Hua Lian rebels. They hinted to our agent that they are currently receiving aid from the USN, and are planning to invade Shanghai. We do not intend to interfere with their plan. As their movements will surely have a great effect on relations between Japan and the DHZ, we plan to continue our surveillance of their organization.

#[1.2] Corporation#

[jcl] Kirishima Industries (KIRISHIMAID/CORPORATION/JAPAN)

INFO

1: Corporate

COMPANY: Kirishima Industries Co. Ltd.
Main Office: Taito, Tokyo
Est. 8/15/1999

Kirishima Industries has always been a pioneer in Japanese manufacturing. We began by developing and manufacturing internal combustion engines. We now produce semi-conductors, all forms of transportation vehicle, and software. Environmental awareness is our primary concern. Kirishima was the first to implement recycling plants half a century ago. Our products are used all over the world. Our mission is to provide our clients with products that fit their needs.

2: Company History

Kirishima Industries was founded over 100 years ago by Makoto Kirishima. We were a small fuel injection manufacturer back then. Our fuel injector which drastically lowered toxic emissions, quickly became an industry standard. We then began to produce automobiles. We also began to produce generators, ships, and heavy machinery. Kirishima Industries became this country's top manufacturer. Our environment-friendly products are made with recycled resources and clean energy from our geothermal plants. Kirishima is now a leader in space technology, manufacturing the engines of next-generation shuttles and satellites.

3: Facilities in Japan

Branch offices: 12 (Japan), 4 (overseas)

Factories: 20 (Japan), 8 (overseas)

Research facilities: 3 (Japan)

4: Financial Condition 1

This Year's Revenue

We predict a downturn in production orders for the coming year. Downsizing will cut the increasing costs of research. Assuming that relations with the USN have normalized, exports of hybrid autos to the USN should increase. In addition, an increase in contracts will boost profits.

5: Financial Condition 2

Marine: Fewer new ships, but increased repairs.

Motor: Slight increase expected.

Aerospace: Satellite division growth.

Special-Purpose Vehicles: Increase to JDF.

Auto: Steady growth expected.

General: Trend toward reduction expected.

Electronics: Continues growth for COM model.

5: Financial Condition 3

We will halt overseas procurement of steel and chemical products due to local supply excess (-38% from last year). Imports from Zaftra down due to regional instability. OCU imports now 70% of total. 30% reduction in USN imports. Electronic part imports from the EC up 40% from this year.

6: Financial Condition 4

Special-purpose vehicle demand is tapering off, reducing general profits. Also a drastic reduction in abandoned nuclear plant cleanup with projects nearing completion. Due to ban on pre-2085 gasoline vehicles being implemented next year, growth in hybrid, natural gas, and electric automobile sales is expected.

WORK (KIRIBUSINESS/CORPORATION/JAPAN)

1: Topic

1.1: To strengthen Kirishima Industries' global sales network, we have merged and reorganized our retail network members. We now operate in the OCU, EC, and the USN. Starting next year, all products will be sold through our regional distributors to better respond to local needs. We will further strengthen management at all outlets. The following companies will be formed:

Kirishima OCU Retail Co., Ltd. (Singapore)

Kirishima EC Retail Co., Ltd.

Kirishima USN Retail Co., Ltd.

OCU Retail will cover the former-CIS and Da Han Zhong regional sales, and EC Retail will cover African sales. We appreciate your continued patronage.

1.2: Kirishima Museum of Technology

Next month, a new exhibition will be on display at the KMT: "Rediscovering Living: Technology in Our Daily Lives" as well as "The Age of Tadashi Kirishima." Our current exhibition features simple explanations of the technology that makes everyday life possible, as well as a display on miniature garbage recycling plants for regional use. Try the technology by watching garbage turn into resources while you wait! Our exhibition also features a special wanzer simulator. Experience the capabilities of our latest Wanzer model yourself (students only). "The Age of Tadashi Kirishima" features a reconstruction of his own research laboratory, including his first game console with its primitive 128-bit CPU!

1.3: The World's Largest Tunnel Excavator.

Kirishima Industries has developed an excavation machine capable of digging tunnels 50 meters in diameter. This excavator was designed over a span of 5 years to aid in the construction of the undersea Oceania Tunnel between Australia and New Zealand. Automation allows a single person to operate this excavator. The 128 onboard CPUs automatically determine the ideal excavation method for each stratum. Depending on conditions, excavation speed can be as high as 5km per day. We expect swift results on the Oceania Tunnel Project.

1.4: Defense Minister Tabata in Bribery Scandal

Internal investigations find evidence to support media allegations of bribery in JDF procurement. our company prides itself on its lawful business practices, in accordance with public standards. The JDF chose the new wanzer based on an accurate appraisal of its quality and value. While we know that there are no problems with the recent shipment, we are prepared to cooperate fully with authorities should an investigation be requested.

1.5: Collusion with JDF Coup Forces

Kirishima Industries would like to clarify that rumors of our company's collusion with the JDF coup d'etat forces have absolutely no basis in fact. The recent coup d'etat is a dangerous movement with no regard for our nation's laws or citizens. The use of violence as a means to gain power is anti-societal and should not be tolerated. We hope that those responsible will be brought to justice. Our hearts are with the people of the Kyushu region. We sincerely pray that no more innocent lives are claimed. Kirishima Industries Co. Ltd.

2: Info

2.1: Marine Shipping & Generators

Kirishima motors power the heavy tankers and cargo ships of today's marine shipping industry, revolutionizing marine transport. Using our latest actuator, the luxury cruise liner "The Milky Way" cruises through 60-foot waves so smoothly that a cigarette standing on end won't topple. From oil rigs and artificial breakwaters to the large-scale float construction used to build Ocean City, our marine construction produces superior results. We also produce deep-sea submarine scouts built to withstand incredible pressures, along with numerous research vessels, where the most advanced research occurs. See the Okinawa Ocean City Development Dept. web site for details on Ocean City. The web site can be found at (OKINAWA OCD/GOVERNMENT/JAPAN)

2.2: Aerospace and Special-use Vehicles

Kirishima Industries' technological acumen continues to lead our nation's aerospace industry. In addition to building cutting-edge aircraft, we also made economical shuttle missions as a reality. The capabilities of a

AAH45a Attack Helicopter using our TB230W engine have made it a standard in OCU forces. Our aerospace branch's development of the JH-11 rocket with its unequalled propulsion capabilities has made us a leader in the field. We lead our country's defense industry with our production of high-power armored vehicles in close cooperation with JDF research teams.

2.3: Industrial & Construction Equipment

We support the manufacturing industry through the application of our technological expertise to the production of the general-use machinery that runs our nation's manufacturing robot. Actuators are this division's primary product. Our revolutionary super-miniature nanomachine injection molder is able to produce a steady supply of 0.27nm components. Kirishima Industries produces a wide variety of functional and economical equipment. Truly, we support manufacturing the world over.

3: Products

- Jinyo Mk100
- Enyo Mk109
- Shunyo Mk111
- Mk12 AFV
- MMG3 Ship

SPECIAL VEHICLES SECTION (KIRISPV/CORPORATION/JAPAN)

1: Information9

Please follow these guidelines for any calls regarding recent bribery allegations:

1. Transfer all calls to PR division.
2. Receptionists should not comment on any inquiries.

All complaints are handled by computer reception system "GNK-Mk2." We are allocating enough lines to prevent busy signals.

2: Confidential Data Base (KIRISPVS/CORPORATION/JAPAN) [PW:SHUNYO]

2.1: MEETING MINUTES

[Mtg. with Chief of Staff Sasaki]

Attendees: JDF Chief of Staff Sasaki, company president, and Special Vehicles Division Chief Mita.

Domestic production of all weapons used by the JDF agreed. Early and exclusive delivery of the new WZR "Shunyo" requested.

2.2: PROJECT (SHUNYO)

Policy on Shunyo Shipment

All information regarding the new Shunyo WZR is classified. Performance tests to take place in Ocean City. Test pilots are registered to ensure secrecy. Upon test completion in Okinawa, the 2 Shunyos are to be transported to Yokosuka Base.

2.3: UNDER DEVELOPMENT

Prototype Tank Project

Location: Kyushu Testing Facility.

Experimental tank with beam weapon and "Comparative Wave Defense Shield (CWDS)." Comparative waves disrupt electronics, weapons, and sensors. By disabling these systems, wanzers can be rendered largely ineffective. However, research shows that CWDS power requirements are very high, making simultaneous use of beam weapons difficult. Furthermore, the area of effect is limited.

[jc2] Iguchi (IGUCHI/CORPORATION/JAPAN)

HEAVY INDUSTRIES DIVISION

The Heavy Industry Division of Iguchi is responsible for development and production of vehicles, aircraft, and wanzers, including military contracts. This division is famous for several technological advancements, especially in the field of armaments. The latter half of the 21st century has seen the development and production of wanzers, and models such as the Kyoikei and Kyojun are popular in the OCU.

PHARMACEUTICAL DIVISION

This new division of Iguchi was born by merging with Sakata Industries' Pharmaceutical Division in 2092. It now boasts a worldwide sales network. Research includes neural and immune system related medicines, as well as genetic recombination and molecular design. The Chemical Technology Institute of the Pharmaceutical Division develops propellants and explosives jointly with the Heavy Industry Division.

CORPORATE

1: Topics

Future of Iguchi

As explained to our stock holders, profit for this fiscal year is far below our target. One reason is the world-wide downturn in armament industries. Also the JDF adopted Kirishima's Shunyo wanzers instead of our Kyoshun model as their standard WZR. For next year, we are working hard on a new prototype wanzers to regain our market share in the industry. I foresee a bright future for the Iguchi Corporation.

Suguru Iguchi, Chairman of the Board.

PRODUCTS (IGUCHIPROD/CORPORATION/JAPAN)

[jc3] Ocean City Corp. (OCC/CORPORATION/JAPAN)

TECHNICAL MANAGEMENT

The engineering center is managed by the main corporations of Ocean City: Kirishima Industries, Taoka Construction, and Hatada Co. They are in charge of maintaining facilities in Ocean City and running PR activities.

UNDER CONSTRUCTION (OCCCONST/CORPORATION/JAPAN)

1: Primary Block 10 Harbor C Expansion

Wharf C10, adjacent to Primary Block (PB) 11, housing Ishizawa Trading, Badacca Marine Transport, and Andas Enterprises, is under expansion. The expansion will add 30 acres to the current area. Please move all cargo to Wharf B while Wharf C is shut down for construction.

2: Primary Block 4 Road Construction

An elevated highway ("Ocean Route 43"), which passes over sub-blocks 32 through to 45 of Primary Block (PB) 4, will be completed in 2113. The opening of Ocean Route 43 will make your commuting easier. We ask the residents to be patient during construction.

3: Primary Block 13 Power Unit Maintenance

Maintenance work is being done on the power generator units of Primary Block (PB)13. There will be no disruption of power, as additional power will be supplied from an adjacent PB. Please watch out for large vehicles near the underground entrance. Large replacement parts will be transported by submarines. Some harbors may close after midnight for this construction.

INFORMATION

1: The Secret of Ocean City 1

Ocean City is a complex of 13 honeycomb structures (800m in length) called Primary Blocks (PB). Each PB was constructed in 9 different areas of Japan and moved its way to Okinawa using the built-in power unit. The harbor and upper structures were constructed to make Ocean City complete.

2: The Secret of Ocean City 2

The Primary Blocks (PB) of Ocean City were constructed in 9 areas of Kyushu, Chugoku and Tokai, since it was more effective to build them simultaneously in separate areas. Each PB, measuring over 800m in length, is larger than a tanker. Construction took 5 years, the self-transportation half a year, and the facility construction, 3 years. The 4 cruise motor units are now used as power generators.

3: Ocean City Blueprint (download) [PW:EHOBA]

4: Residential Zone

Ocean City Civilian Facilities

2/3 of Ocean City is used by civilians. Each block houses an administrative, corporate, commercial and residential area. Each residential area is provided with schools, hospitals, and public services to ensure the same standard of living as the mainland. The commercial area offers a shopping mall, a stadium, and an amusement park, and numerous office buildings.

5: JDF Zone

Ocean City JDF Facilities

The JDF naval base occupies 1/3 of Ocean City. The JDF fleet is stationed here, with 8,000 members of the navy. The base itself is small compared to mainland bases, but is efficiently managed having a barracks, training facility, administrative facility and a heliport.

[jc4] JBNN / Japan Broadcasting Network News (JBNN/CORPORATION/JAPAN)

TOPICS (JBNNTOPICS/CORPORATION/JAPAN)

1: In Japan

1.1: [USN and Japan Cooperative]

Tension between the OCU and the USN stems from a suspected USN arms supply to the rebels in the Philippines. According to Vice-Minister Yamazaki, Japan will set up talks with the USN to relax some of this tension. Yamazaki plans to visit the USN early next week to prepare for the talks. Yamazaki hopes Japan can be a channel for OCU nations to express concerns.

[Buried Treasure?]

The "Rich Bum's Treasure" legend is well known in Tokyo. A source inside a major construction company revealed that the company actually found the

treasure and hid it. The company denies the allegation. Authorities are investigating the matter.

1.2: [Yokosuka Base Explosion]

The investigation into the cause of the recent explosion on JDF's Yokosuka base has begun. JDF investigator Asakura announced that the explosion occurred in a warehouse. The fire started by the entrance then spread to emergency fuel stores, thereby causing an explosion. The cause could have been electrical related, but most likely it was arson. The colonel mentioned it could have been the work of terrorists. Reports of international terrorism in OCU countries are on the rise, and the authorities cannot monitor these activities in spite of great effort. The JPO is concerned these events will spread to Japan and is considering legislation as one avenue of dealing with this.

1.3: [Defense Minister Bribery Scandal]

The publication "Truth of Rumor" reported Kirishima Industries bribing Defense Minister Tabata. It was reported that Kirishima Industries gave Tabata a large cash bribe to influence his decision in the JDF wanzer trials next quarter. The article features photos of Tabata's private secretary leaving a restaurant with a Kirishima Industries division manager and testimony from witnesses. Tabata and Kirishima held a joint press conference and denied the allegation. They also spoke of a legal action against the publication. However, the Public Prosecutor is showing strong interest in the article and seems to be preparing for further investigation.

1.4: [Slow Economic Growth Forecasted]

The Economic Planning Agency presented this year's economic forecast, and this year's growth is expected to be below last year's. This report cast a shadow over next year's national budget, currently under discussion. The defense budget is expected to suffer major reductions. Defense reductions normally face resistance from defense lobbyists, but this time the reaction was calm in light of Tabata's upcoming trial. Domestic heavy industries stock prices plunged in reaction to this news.

1.5: [Coup d'etat]

A splinter faction within the JDF began a coup d'etat several days ago, and fighting continues between the factionists and the JDF. The faction began as a battalion-sized group, but by morning many units have defected to the cause. The size of the faction has grown to about 1/3 the size of the JDF, with even whole fleets and air bases joining the coup faction. The JDF is planning to release the name of the coup leader in the next few days. Although the JDF is using all of its resources to suppress the coup, it will take some time for things to return to normal.

1.6: [Coup d'etat Follow-up]

The battles between the JDF and coup faction haven't had much effect on urban areas, but heavy fighting continues in the countryside. Air force and naval coup supporters are isolated in bases, and therefore are locked in a stalemate. However, battles between ground troops are becoming fierce with heavy losses on both sides, especially in the Kyushu area. The JDF announced they will soon have the coup suppressed. Residents are requested to follow JDF and the police instructions, however this request may indicate the coup faction is gaining the upper hand. The OCU Congress has requested for reinforcements, but also sent out a special envoy to begin arbitration.

1.7: [Da Han Zhong Invasion]

As DHZ troops invaded Ocean City, the JDF and the coup faction announced

a temporary cease fire. Ocean City is currently under DHZ control, despite the JDF's continued resistance. A joint JDF/coup fleet is heading for Ocean City at this time. DHZ announced the invasion is to capture terrorists, and not any territorial ambition. Even so this act is flagrant violation of sovereignty. Once can't help but conclude their intent is territorial, as there have been no requests for terrorists through diplomatic channels. The government has decided to take back Ocean City and sweep the DHZ from Okinawa. Hopefully, this will set an example to discourage further aggression.

2: In OCU

2.1: [OCU Economic Cooperation Pre-session]

While in Australia, Parliamentary Vice-Minister Kaga met with OCU congressman Razami. Although details of the meeting were not released, the meeting was a pre-session before the OCU economic cooperation talks begin. The main agenda for the talks will be financial aid for OCU Southeast Asian countries currently suffering from serious inflation. It is likely that Japan and Australia will be asked to provide financial aid. It is believed the pre-session was to decide the amount of financial aid that will be made available. Judging from Congressman Razami's good spirits after the meeting, the negotiations with Japan have been quite successful.

2.2: [Philippine Rebels]

Australian diplomat Foster visits the Philippines to help end the growing anti-government rebel activity. However, shortly after Foster's arrival, numerous facilities on Leyte were attacked simultaneously by the rebels. There were many casualties. The attacks began after President Lacan stated, "I will use all force necessary to remove these rebels." Lacan also order all troops on standby and declared a civilian curfew. The Philippines rebel group is led by former Vice President Bamarm.

2.3: [Singapore's Changi Airport Shutdown?]

It was revealed that one of OCU's major airports, Changi Airport, had its flight control temporarily shut down. The shutdown lasted only 30 minutes, but the total shutdown of control radar and communications equipment caused much panic. Takeoffs and landings were suspended during the shutdown. No accidents occurred. The cause is still unknown, but according to the airport authorities, it's very unusual for everything to malfunction at once. It is suspected the failure was caused by spenders. Airport authorities are currently tightening security.

2.4: [Da Han Zhong Invasion Failed]

The DHZ units that invaded the OCU Philippines began a sudden withdrawal several days ago. There has been no confirmation by the DHZ. Military sources say that the DHZ fleet suffered a devastating blow. Skeptics believe such a powerful anti-ship weapon was used and suggest a computer system flaw or hacking by spenders as possible causes. The Philippines has not released details of the attack against the DHZ fleet, so the actual cause remains unclear. Nonetheless, the OCU welcomes the end of conflict.

2.5: [OCU Economic Cooperative Talks]

The OCU economic cooperative talks held in Alordesh have ended. The main topic was economic aid for Southeast Asian countries. The framework to satisfy the OCU nations' financial needs has been decided upon. The DHZ invasion was also discussed. OCU Congressman Charles stated, "A flaw in the OCU's structure encouraged the DHZ to attack. To prevent a repeat of this incident, we requested all OCU nations send more troops to OCU military. However, the other member nations remained indifferent to the

request. Since it is a fact that the OCU military is becoming ineffective, similar proposals will doubtlessly be made again. Japan will have to cope with sending more troops to OCU forces.

2.6: [OCU Force Reinforcement]

The OCU Congress overwhelmingly passed a proposal to require all OCU nations to contribute additional troops to the OCU forces. However, many OCU nations are opposed to the proposal. Those nations are asking for reconsideration of the proposal.

[Philippines Marine Farms]

The OCU Marine Economy Agency announced they will construct a large scale marine farm in the Philippines. The facility will be a stock farm with conventional deep water pumping, fish-breeding reefs, and large marine buoys. If this multi-facility proves successful, other OCU countries may follow in constructing similar farms.

2.7: [OCU Reaction DHZ's Japan Invasion]

The OCU fleet was attacked and severely damaged by DHZ forces while offshore of Negros Island in the Philippines. The attacked fleet was the OCU emergency relief force, en route to Ocean City in wake of the DHZ invasion. Following the attack, the OCU Congress dispatched a fleet with marines, but the fleet's arrival will be delayed by this attack. A navy spokesman announced the damage from the attack was not serious and no ships were sunk. The spokesman continued to say the attack will not in any way prevent the OCU from defending itself from all foreign incursions.

3: Foreign

3.1: [Moscow: Kazuki Kano]

The Zaftra Republic and the Ravnui Republic, both former CIS nations with a history of conflict, have closed an economic cooperation treaty. The treaty was signed at the Zaftra prime minister's residence. The president of Zaftra and the ambassador general from Ravnui attending the signing. After years of conflict, these two nations have suffered economic collapse. Their immediate goal is restructuring of their economic systems. Economists from both countries are welcoming the treaty. The treaty includes the exchange of technology and should bolster industrial manufacturing. The former CIS nations are wedged between the EC and the OCU. If this treaty stabilizes the 2 nations' economies, other former CIS members may consider joining.

3.2: [Beijing: Shiro Komichi]

The DHZ announced a campaign to eradicate the Hua Lian Rebels. The elite Rapid Reaction Force will likely be used. In recent years, the DHZ has taken stronger but futile measures against the rebels, who have influence in the Huanan Economic Block. Many Huanan residents object to the central government policies, resulting in large numbers of rebel sympathizers. The elite Rapid Reaction Force seems to be in charge of the operation, though this has not been confirmed. It is not known when the operation will commence, but military resistance is expected.

3.3: [Washington: Rikuo Akasaka]

The USN announced that they are ready to provide industrial technology to the DHZ. Military technology is not included in the deal. The deal is part of the continuing effort for economic alliance with the DHZ and includes general industrial products, automobiles, and aircraft. This will give the DHZ industrial capability comparable to the USN or the OCU. Some critics say a part of the deal can be interpreted as providing the DHZ with wanzet technology. The starting date of the assistance has not

been made public. It may begin this year, according to USN sources.

3.4: [Singapore: Hachio Daiba]

The Pacific Headquarters of the OCU army announced that a USN aircraft violated Taiwan's airspace. The OCU army confirmed the USN aircraft entered DHZ airspace over the South China Sea, then dropped to low altitude over Taiwan, where the radar contact was lost. There were also unconfirmed sightings of a parachute-like object falling from a large aircraft in the eastern mountains of Xinzhu. Some believe it is an USN invasion. Others believe this proves a secret military coalition between the USN and the DHZ. The USN and the DHZ have not commented on this incident. According to the anti-war group Broadbeans, who have close ties to the rebels, there is no unusual activity.

3.5: [Hong Kong: Mitsuo Itsuki]

The Hua Lian Rebels have subdued DHZ government as far as Nanjing. The DHZ is throwing in everything to try and stop the advance. The battle started in Wuzhou, spread to Guilin and Foshan, and is approaching Shanghai. The DHZ is deploying the Rapid Reaction Force, as well as standard troops, without much success. The DHZ forces appear to have suffered heavy casualties. There is a rumor that the son of the late Vice-Chairman Ming Huang Jiu is still alive and among the rebels, and reports show foreigners are among the rebels. It is also rumored that USN is involved. If the rebels reach Shanghai, it is possible Chairman Jie could be ousted.

3.6: [Beijing: Ken Shiwasu]

The Hua Lian Rebels, who fought their way to Shanghai, were finally defeated by the government troops. According to the DHZ military, troops from Guangzhou as well as marines were used to defeat and cut off the rebels forces. There have been no reports on casualties, or the extent of property damage, though civilian casualties are expected to be high. Heavy fighting was reported in central Shanghai, New Shanghai International Airport, and the Ravnui Embassy. The military will continue mopping up the rebels and try to seize the leader, Huang. More troops will be sent to the rebel HQ in Guangzhou.

3.7: [USN: Hajime Atami]

The USN advised DHZ to cease their invasion of Japan. Secretary of State Kerwin conveyed the message directly to the DHZ ambassador. Anti-war groups gathered in front of the DHZ embassy in Washington to protest. Violence was reported against DHZ residents in SF.

[Europe: Shihiko Sato]

The EC expressed disapproval of DHZ's invasion of Japan. The EC will try to persuade the DHZ to withdraw immediately.

[Canberra: Sho Netsurai]

The OCU insisted DHZ should withdraw immediately from Japan. The OCU suggested dispatching troops, if the DHZ does not comply.

[Moscow: Akira Ishigami]

Zaftra expressed regret at the DHZ invasion of Japan. Zaftra offered to arbitrate the dispute with EC, USN, and OCU officials.

JBNN GRAPHICS (JBNNGRAPH/CORPORATION/JAPAN)

1: 2005 - EC Formal Unification

The year 2005 will be long remembered for the founding of the EC, the first unification of all Europe. Unified currency and a globalized economy give the EC much influence in world affairs.

2: 2020 - USN Establishment

The continents of North and South America were unified into the USN this year. Many nations facing economic collapse had no choice but to join the union. It is also true those nations' economic state was attributed to the withholding of aid by two of the North American nations.

3: 2021 - Zaftra Republic and the PMO

While many of the world's nations formed unions, the former Russian states did the same. The former Russian Republic changed its name to the Zaftra Republic. Zaftra contributed to the establishment of the Peace Maintenance Organization (PMO), which was revealed to be a front to maintain Zaftra's power.

4: 2026 - Organizing the OCU

The OCU was established by adding Japan and Australia to the former Bangkok Economic Block of Southeast Asian countries. The EC and the USN wanted to maintain economic control in the region, and tried to block OCU establishment.

5: 2029 - Wanzers

The first wanzers built to standardized specifications called MULS was completed this year. MULS are designed to allow fully interchangeable body parts. MULS will contribute to reducing wanzers costs. Wanzers became the main military weapon following an independence war in Africa.

6: 2070 - 1st Huffman War

Huffman Island suddenly appeared as a result of volcanic activity on the OCU and the USN border in 1995. The island was initially under UN control. Dispute over the island's natural resources led to a war between the USN and the OCU. After PMO negotiations, the island was declared neutral territory.

7: 2078 - Futai Tunnel

Work on the tunnel started in 2061 and took 18 years to complete. The tunnel connects Taiwan to the mainland at Fuzhou. This tunnel is the world's longest, at 224km. There is rail and road access, and windows allow a view of the sea.

8: 2090 - 2nd Huffman War

An incident between OCU and USN troops on Huffman Island at a USN munitions factory caused the 2nd Huffman War. The use of the human brain as a computer caused the dispute. The project was jointly controlled by the ICU and USN militaries and Sakata Industries. Sakata Industries later merged with the Iguchi Co. The Republic of Zaftra was also reported to have been involved.

9: 2095 - Ocean City Completed

Ocean City was completed in 2095 at the south end of Okinawa's main island. It was originally planned to solve the military base problem. After the OCU was established, the plan was changed to include port facilities, and construction began.

10: 2102 - Alordesh Coup d'etat

A coup occurred in the People's Republic of Alordesh in 2102. Alordesh joined the OCU in 2094. but their stagnant economy did not improve. The military started the coup for independence, claiming the OCU was exploiting the country's resources.

11: 2112: People's Republic of Da Han Zhong

Jie Bo Liao became the head of state after the death of Chairman Bai. Chairman Jie promoted the country's policies and changed its name as well. In a change from previous free market policies, all industries were nationalized to create a "national corporation."

THE EDITORIAL OFFICE

1: Bulletin Board

1.1: From: Robinson Title: Info worth a half million.

I've got important info on the runaway wanzer in Tokyo; their motives and destination. Want?

From: Sys Admin Title: Offer accepted

Thank you for your cooperation. Compensation depends on the content.

1.2: From: Patriot Knight Title: The military is not totally corrupt!

The scandal with Kirishima is intolerable. You must investigate.

From: Sys Admin Title: To Patriot Knight

We are presently gathering information on that matter. If you have any details, please contact us.

1.3: From: Phishman Title: Tell me!

The Dark Nightmares broke up! I can't stalk them anymore. When will they reunite?

From: Sys Admin Title: Stalking

Refrain from stalking--it's a crime. We are also awaiting their reunion, but there's no word from their management.

1.4: From: Robinson Title: 5 million!

I got the scoop on the DHZ invasion of the Philippines. Reply quickly. 5 million's a bargain.

From: Sys Admin Title: Contact

I can't contact you by regular means. What's the trouble? We're waiting to hear from you.

1.5: From: Army PR Title: Announcement

As you may know, a group in the JDF attempted a coup, but things are under control and will be resolved shortly. Do not be concerned. You can carry on with your normal lives and ignore rumors regarding the coup.

1.6: From: OC correspondent

Title: On the spot news.

Ocean City is in chaos, following the DHZ invasion. The soldiers are looting, and the residents are in hiding. Stores are empty of goods, and the streets are filled with corpses and rampaging soldiers.

SPECIAL INVESTIGATION OFFICE [PW:YAMS]

1: FILE 8341G 1

[JDF Yokosuka Incidents]

Employee No.8341G Shinji Hamasaka

Collecting data on the JDF Yokosuka Base incident.

The JDF seems to be taking extreme measures to maintain secrecy.

The information acquired from the OCU intelligence backs up this report.

The accident itself might have been a cover-up operation. Alternate

sources of info might be the Department of Public Safety of OCU army intelligence. You'll need the password (J1D2F3) to access JDF related information from the OCU army intelligence.

2: FILE 8341G 2

[Follow up on JDF Yokosuka]

Employee No.8341G Shinji Hamasaka

I checked the records of personnel and cargo movements to find anything unusual. I found several instances of some unspecified cargo being transferred at odd times, with extra security. During my research, I ran across the trails of many foreign agents, especially USN's FAI. They all seem very interested in the transferred item. I confirmed the Department of Public Safety was active as well, but could not access their webpage. The website: (DPS/GOVERNMENT/JAPAN)

3: FILE 9389G

[USN and DHZ]

Employee No.9389G Hiroaki Kusano

It is rumored that the USN is assisting the Hua Lian Rebels. I have information that supplies, including weapons, will be delivered to the DHZ's plan to finish off the rebels. I also have information the USN is preparing to send aid to the DHZ. One could be a bluff. I am continuing my research.

4: FILE 0833P

[JDF Activity]

Employee No.0833P Mamoru Oyamada

Rebel activity increases as the DHZ continues its sweep of the rebels. As mentioned earlier, the OCU requested the JDF be on alert, but there is some peculiar activity taking place. WZR's and other special vehicles are not stopping at collection points. It could be a reserve force restructuring, but the units disappearing are battle ready.

5: FILE 7846B

[JDF Coup]

Employee No.7846B Toshiro Tsuchida

Colonel Isao Takemura is the supposed leader of the JDF coup. The colonel is an engineer, and it is questionable that he could seize control of operational units. There is no evidence confirming the information. I also have an unconfirmed report that Colonel Takemura welcomed Hua Lian members to Sasebo.

6: FILE 1380K

[DHZ Ocean City Invasion]

Employee No.1380K Hideo Iwasaki

This is direct report from the Ocean City, so things are disorganized. The DHZ committed an unusually small number of troops subduing the city. Instead, a seemingly unimportant part of the city is under strict security. There are many types of WZR's I have never seen before in the city. There are also soldiers who are clearly not Asian.

[jc5] Network Computing Software Corp. (NETCOMSYS/CORPORATION/JAPAN)

PRODUCTS

- 1: Image Decoding Program Kaleidoscope
Graphics Program "Kaleidoscope"

Introducing an astounding new graphics application! "Kaleidoscope" features basic image-creating functions, as well as enlargement and simple photo analysis. This is the only graphics software you'll ever need! Graphics program "Keleidoscope." Download it now for only 200!

2: Word Processing Program

Spell check software "Perfection"

Mistakes on an important document or a contract... We all make them, but you no longer have an excuse! Introducing your latest business ally, "Perfection." It catches every single mistake! Before printing, let "Perfection" correct you documents! "Perfection" is due out on spring.

3: Calculation Program

Spreadsheet Program "Trade Pro"

Network Computing's "Trade Pro" is no ordinary spreadsheet program. Even your computer illiterate dad will be an accounting whiz with our voice recognition filemaker system. It's perfect for large corporations with high trade volume, too. "Trade Pro" is due out June, 2113.

[joi] Teihoku University (TEIHOKU/OTHER/JAPAN)

MISSION STATEMENT

In these troubled times, we must educate to send the finest quality citizens into the world. We hope our graduates will go to make global contributions. Our educational philosophy is to instill a sense of responsibility, individuality, and global awareness in each student. We provide the students with a diverse environment, where they can each form a unique sense of identity. Our teachers and students are devoted to keeping this campus a high-quality learning environment.

SCHOOL STATISTICS

Full-time students: ~30,000.

Full-time teaching staff: ~3,000.

12 departments in 10 fields, and 10 graduate research departments.

We also feature a medical school, complete with comprehensive medical facilities. Please refer to the appropriate section for information on our departments, research facilities, tuition, campus events, and current syllabi.

Important Notice

The mechanical engineering department lab has been refurbished. It now features state-of-the-art equipment. Currently, the engineering lab is linked to the medical research facilities.

1.1] Database [NAME:ALISA]

Student #114SC202, Alisa Takemura

Class of 1094. Female, Age: 19

Radiation Engineering Dept.

Relatives: Father, Isao Takemura (Employed at Yokosuka JDF Base)

Brother, Kazuki Takemura (Attending Yokosuka Technical Institute)

Addendum: Kirishima Industries, Special researcher.

Archery Club member.

WHAT'S NEW!!

1: LIST

1.1: Student council Info

Message from the Student Council

Naoya Hiyoshi, a junior in Economics, has been selected as this year's council president. Congratulations!

1.2: Teachers Union Info

Message from the Teachers Union

A raise of 2% has been approved, removing the need for a strike.

We hope for a productive school year.

1.3: Festival Staff Info 1

Message from the School Festival Staff-1

The Darkness concert was cancelled, due to their recent breakup.

Little Glay will be performing instead.

1.4: Festival Info 2

Message from the School Festival Staff-2

Refreshment stands will be managed as in the past. Please note that the sale of corn dogs is not allowed.

1.5: Festival Info 3 (1)

Message from the School Festival Staff-3

Miss Teihoku University pageant is happening now! Cast your votes here on our web site!

1.5: Festival Staff Info 3 (2)

Message from the School Festival Staff-3

Congratulations to this year's Miss Teihoku University!

Check out her photo gallery on our web site.

We guarantee that the pageant was conducted in a fair manner.

2: Miss Teihoku

2.1: Miss Teihoku Candidates (1)

Megumi Nogami

Sophomore, Education Dept.

Mami Shindo

Freshman, Architecture Dept.

Kajine Mizusaki

Freshman, Architecture Dept.

Hodaka Mikifune
Sophomore, International Law Dept.

Alisa Takemura
Freshman, Radiation Engineering Dept.

2.2.a: This Year's Miss Teihoku!! - Hodaka Mikifune

PIC1: This year's festival queen is Hodaka Mikifune, a sophomore in International Law. Her boyish and great looks are self-evident. Check out this picture! Was she ready to win or what?

PIC2: Here's a picture Alisa gave us. It's a shot from last year's infamous summer costume party. I think she's dressed as a character from some old game... Can you guess who is it?

PIC3: Here's a photo from her high school modeling days. Looks a bit sexy, don't you think? They shot on location at Haneda Airport, in the high heat of summer. Check out her smile. Very professional!

PIC4: Finally, a snap from her school life. Taken with the lacrosse team. This is from last fall's regional competition. We hear she's a fierce opponent. Give her a lacrosse stick at your own risk!

2.2.b: This Year's Miss Teihoku!! - Alisa Takemura

PIC1: This year's festival queen, Alisa Takemura, is a freshman in Radiation Engineering. Here's a picture of her on campus! She's on leave right now, so we took the liberty of using her friend's snapshot. I hope she won't mind.

PIC 2: She's a real wunderkind, whose research is raising eyebrows in her department. She comes to school 2 to 3 times a week! Here's a photo of our queen during an experiment. She looks quite sophisticated in those glasses, don't you think?

PIC3: Lunch at the school cafeteria. Milk, hamburger, pizza roll... Boy, can she eat!

PIC4: This photo was used in the club guide. Here's Alisa at archery practice. H-Hey! That skirt's... um, never mind! She's a novice archer. The arrow hit the ground short of the target.

CAMPUS

Our university carries a long history of academic excellence. Our central library contains an extensive collection. All our holdings can be accessed through the net for convenient reading at home. Students enjoy our creative social and interest clubs, as well as the student government and intramural sports. We support students with our unique scholarship program, including student leadership aid and work study. We also support low-rent dormitories, apartments, and boarding houses. Those interested should stop by Student Affairs.

BBS

1: BBS 1

It seems that there's new network computing software for sale.
Web address: NETCOMSYS/CORPORATION/JAPAN <kaz-k>

re:re:re: I had a look. Looks great, but needs some work. <Wanna>

2: BBS 2

Got the password for the DCN advanced search! It's DCN09. <Taste>

re:re:re: Uh, you sure this is OK? <Wanna>

re:re:re:re: Had problems installing... <bie>

3: BBS 3

I can't contact Moneymaker, anyone know where she's at? I've been
sending mail like a lovesick puppy here... <Poli>

re: You mean that Singapore lady? Sure she hasn't skipped town?
Or maybe "they" got her!

re:re: Don't know if this means anything, but FYI the Da Han Zhong "Hua
Lian Rebels" site is down. Pretty fishy... <iemon>

re:re:re: The HL site keeps moving. Try routing through USN servers,
maybe you'll find it. <keeper>

re:re:re:re: Where's Money? I wanted her to hack a Singapore company
for me, but everything's FUBAR, AFAIK. <Sym>

4: BBS 4

Has anyone hacked JBNN? They're hiding something, I can feel it! <RAU>

re: The JBNN site's got a lot of info they're not releasing. How
about breaking the search password for starters? <Zam>

re:re: Developed a new tool, y'all. Leave that password to me. <Lipper>

I can mail this tool that'll hit a shadow password with 20,000 entries
a minute. Should save you some time. 150CR and it's yours. <Lipper>

re:re:re: You think they really got that much stuff? Well, should be
easier than a military site, maybe I'll have a go at it... <ballone>

re:re:re:re: I hear the sysop there is still freaked from the last time
he got hacked. Get caught and you'll have one bug lawsuit on your
hands. <Mazter>

5: BBS 5

I'm trying to find out about the Hua Lian Rebels, but their site keeps
moving. Anybody got any leads? <zap>

re: How about checking JBNN? Public Safety might work, too. Shouldn't
need more than a password crack if you're just looking. <Mozer>

re:re: Public Safety's doing backtrack searches on access IDs, so I'd
be careful if I were you. This isn't a job, is it? <Cool>

re:re:re: Nope, just for fun. Things are heating up on the continent,
and I thought I'd have a look-see. <zap>

re:re:re:re: Surprise! The Hua Lian Rebels site's down again. What
lame-ass system are they using, anyway? <Nao>

6: BBS 6

Network surveillance has been stepped up with the declaration of martial
law, folks. Careful hacking any sites, let alone gov't related ones!
<Mazter>

re: Access to arms factory sites is being monitored 24 hours. Kirishima
Industries has a full-time surveillance operator at NOC, too <silver>

Overseas transmissions are restricted, too, especially with Asia. I'd
suggest using HCD and going through USN sites. <Mazter>

Anything west of Japan is restricted. It's even hard to connect with
regular lines. Use a different route to avoid restrictions. <Mazter>

re: How about satellite links? You can avoid land lines that way... <Gon>

re:re: Satellite connections seem to be fine, just watch out you don't
get charged for the link time! <Mazter>

7: BBS 7

Has anyone hacked the JDF, police, or Public Safety sites? <New>

re: Well, access to JDF and national sites is always under surveillance,
so if you mess up, you could get caught, or worse! <Bellez>

re:re: There is no can or can not. just go for it! If you don't get that,
what are you doing here in the first place!?" <Optic>

re:re:re: I don't think you can access the JDF or the police externally.
Intelligence sites are usually aren't connected to the web... <LIZA>

re:re:re:re: How about we crack the new System 7 protocol? Or am I
the only one with major problems with that bad boy? <ZZ>

re:re:re:re:re: If anyone could crack that, it's Money... Money?
Where aaare yooooou? <Sym>

#[2] AUSTRALIA #

#####

[ag1] OCU Military / OCU Defence Force (OCUM/GOVERNMENT/AUSTRALIA)
Looking to gain some useful skills? See your nearest OCU Military
recruiter.

TROOP DEPLOYMENT (OCUTRP/GOVERNMENT/AUSTRALIA)

1: Korea

While there is minimal OCU presence in Korea, known for its strong defense force, the 35th Mobile Co. stationed in Kwanju is a world renowned OCU wanzer squad. There are also interceptors stationed in Pusan.

MAIN BASE:

- PUSAN
- KWANGJU

DISPOSITION:

- WANZER x4
- COMBAT VEHICLES X2
- AIRCRAFT x2
- INFANTRY x4

2: Japan

The number of OCU troops stationed in Japan is second only to Australia.

MAIN BASE:

- SENDAI
- FUKUOKA

DISPOSITION

- WANZER x6
- COMBAT VEHICLES x4
- AIRCRAFT X8
- WARSHIP x2
- INFANTRY x12

3: Alordesh

The OCU dispatched more troops to Alordesh after the coup in 2102. In 2108, the OCU Congress reduced the number of troops after deciding the country was politically stable.

MAIN BASE:

- RAMANSTION
- CHITTAGONG
- DEEAN

DISPOSITION:

- WANZER x2
- COMBAT VEHICLES x3
- AIRCRAFT x1
- INFANTRY x8

4: Vietnam

There are 4 bases in Vietnam: Vung Tau, Da Nang, Hai Phong, and Nha Trang. The forces combined are equal to 4 divisions. The OCU placed many marines and support aircraft along the long coastline.

MAIN BASE:

- VUNG TAU
- DA NANG
- HAIPHONG
- NHE TRANG

DISPOSITION

- WANZER x10
- COMBAT VEHICLES x6

- AIRCRAFT x8
- INFANTRY x20

5: Malaysia

The OCU presence here is minimal, since Malaysia is surrounded by OCU Indonesia and OCU Vietnam. Most OCU troops carry out joint operations with the Malaysian army. The region's only OCU aircraft carrier, Norsam, operates jointly with the Malaysian navy.

MAIN BASE:

- KUANTAN
- HAT YAI
- TAIPING

DISPOSITION

- WANZER x2
- AIRCRAFT x3
- WARSHIP x1
- INFANTRY x4

6: Philippines

The OCU presence here is minimal due to President Lacan's policy of self-defense. However, as the rebel forces in the Philippines become more active, OCU troops may be called to support President Lacan.

MAIN BASE:

- BAGUIO
- TAAL

DISPOSITION

- WANZER x3
- COMBAT VEHICLES x2
- INFANTRY x3

5: Indonesia

Because of its strategic importance, Indonesia hosts the 3rd largest OCU force. The Indonesian military is mainly naval. OCU ground troops fill the gap in ground power.

MAIN BASE:

- MEDAN
- PALEMBANG
- SAMPIT
- TALOK
- MALILI

DISPOSITION:

- WANZER x4
- COMBAT VEHICLES x10
- AIRCRAFT x6
- WARSHIP x4
- INFANTRY x14

6: Australia

The OCU military headquarters is in Australia, hosting the largest OCU force. These troops defend Australia but are also ready to be sent to defend the OCU.

MAIN BASE:

- DARWIN

- ROY HILL
- NORTHEMPTON
- COOK
- ADELAIDE
- AILERON
- TAROOM
- TAMWORTH

DISPOSITION

- WANZER x20
- COMBAT VEHICLES x17
- AIRCRAFT x18
- WARSHIP x10
- INFANTRY x30

[ag2] OCU Intelligence (OCUI/GOVERNMENT/AUSTRALIA) [PW:G3F8A]

1: MIDAS [PW:M8D0S]

1.1: USN DEVELOPING A NEW WEAPON

New Weapon Under Development in USN

Access level: beyond [Fly]

An unexpected event occurred during our investigation of MIDAS. According to our agent, "Dallas," a JDF task force stole MIDAS and is currently producing another copy. The explosion reported in Yokosuka was most likely an accident that occurred during a MIDAS experiment. The central government contacted Japan and the JDF. The original MIDAS will be transferred to the OCU military. It will be taken to an appropriate facility for further research. The destination of the original MIDAS cannot be accessed at this level.

1.2: LOCATION OF ORIGINAL MIDAS

Location of Original MIDAS

Access level: beyond [Mass]

MIDAS is now stored at Taal base in the Philippines. Headquarters agreed with our suggestion to store MIDAS at Taal base, which has a research facility and high-level security. The JDF's MIDAS researchers were also transferred to Taal base to help analyze the original MIDAS. The location of MIDAS and its staff is highly classified. All agents are authorized to take any measures to prevent information leaks.

2.3: EXPLOSION OF THE ORIGINAL MIDAS

Explosion of the Original MIDAS

Access level: beyond [Ankh]

Our investigation of the explosion in Batangas, Philippines is complete. Our investigation confirms the use of MIDAS as the cause of explosion. The events leading to the use of MIDAS are still under investigation. We suspect the commander of Taal base. The base commander probably used it against the DHZ invasion fleet in Batangas at the time.

2: JDF [PW:J1D2F3]

2.1: JDF AFFAIRS

JDF Activities

Access level: beyond [Callus]

We are receiving warnings from our agents in Japan. They observed personnel and supplies moving between JDF bases, suggesting a large scale rearrangement to JDF forces. They also observed a great deal

of change at the top level of the JDF without the consent of the Japanese government. We are currently analyzing the situation, but we lack information to make an accurate judgement of the JDF's objective. Some agents hinted at the existence of MIDAS, but we are still investigating.

2.2: RECENT JDF ACTIVITIES

JDF Activities

Access level: beyond [Fly]

According to agent [MP], the JDF carried out a secret transportation mission. The agent witnessed a transport taking off from Yokosuka Base, heading for Atsugi JDF Base.

(Follow-up) According to another agent at Atsugi, the cargo transported from Yokosuka was reloaded onto a transport plane at Atsugi Base. We suspect that the transport landed at Kadena Base, Okinawa, but attempts to collect more information have been unsuccessful. Advise all local agents to continue the investigation.

2.3: COUP IN JAPAN

Coup in Japan

Access level: beyond [Mass]

Due to the increase in military activity in Japan after the coup, our moves are restricted. It is difficult to get clear data on Japan and the JDF. We expect repercussions from the coup in OCU. The timing and events leading up to the coup are suspicious. Intensify the investigation in Japan.

(Follow-up) A large portion of the coup forces are headed southwest. Relation to Kadena Base under investigation..

3: DA HAN ZHONG [PW:DTHTZT]

3.1: POLITICAL SITUATION IN DA HAN ZHONG

Political Situation in DHZ

Access level: beyond [Task]

Our agent in Huanan reports that Hua Lian Rebel activity is escalating. The Hua Lian activists are gathering in Hong Kong. Moreover, some major Hua Lian members turned to be covert USN agents. It is probable that the rebels have received USN weapons and supplies. Considering the above data, the conflict between the DHZ military and the rebels may escalate to civil war.

3.2: HUA LIAN UPRISING

Report on Hua Lian Attack

Access level: beyond [Callus]

Our agent reports that the Hua Lian Rebels successfully occupied Nanjing. Hua Lian Rebels are continuing to move on Shanghai as the DHZ continues to suffer military defeats. The victory over the Tianlei fortress and the Rapid Reaction Force have heightened the Hua Lian Rebels' morale. A foreigner was witnessed among the Hua Lian Rebels. This person may be the USN observer who supplied weapons and supplies to Hua Lian.

3.3: HUA LIAN DEFEATED

Latest News from DHZ

Access level: beyond [Fly]

Our agents reports a DHZ counterattack against the rebels in Shanghai. The Hua Lian Rebels were defeated as a result of the full-scale counterattack. It is unusual the victorious DHZ forces did not pursue the Hua Lian. Also, the DHZ forces have all received new movement orders. Now a large number of ships are gathering in DHZ harbors,

but the details of this operation are unknown.

3.4: DA HAN ZHONG INVADES JAPAN

DHZ Invasion of Japan

Access level: beyond [Mass]

We confirmed that DHZ did not warn Japan about the invasion. This act of war by the DHZ clearly violates the international law. The reason for the invasion remains unknown. All reports we received from DHZ are fragmented, but some information hints at the existence of MIDAS. The fact that DHZ acquired information on MIDAS probably influenced their decision to invade Japan.

4: CIU [PW:C4I5U6]

4.1: CIU AGENT IN JAPAN

CIU Activities

Access level: beyond [Ankh]

Our agent has spotted a CIU related person in Tokyo. Our investigation confirmed that she is a CIU agent. Her mission is now under investigation. We assigned the investigation to the appropriate members. All other staff should not interfere. Our relationship with the CIU is sensitive. Do not contact the CIU agent. The CIU's web address is (CIU/GOVERNMENT/AUSTRALIA). The password to enter the database is unknown.

4.2: CIU INTEREST IN MIDAS

CIU Activities-2

Access level: beyond [Swan]

Our surveillance team has a report on the CIU agent. The CIU's target is "MIDAS." The CIU acquired information regarding the JDF's seizure of MIDAS before us. They failed in locating MIDAS, however, and their activities have been tracked by our agent. The CIU has not located MIDAS thus far. We must maintain secrecy on its whereabouts.

4.3: AGENT IN JAPAN AGAIN

CIU Activities-3

Access level: beyond [Silk]

The CIU is once again on the move. More CIU agents were spotted in Tokyo, Kyushu, and Okinawa. Their activities are under surveillance. We are making a personnel change in the investigation of CIU activities. The intelligence headquarters will be in charge of the investigation from now on.

PERSONNEL [NAME:SERROV]

Serov Warren

Born 2084. Male

Asst. Director, Army Technical Institute, Special Weapon Development.

Doctorates in practical mechanics, electronics, electrical engineering and hydrodynamics. Has class 1 and 2 special vehicle licenses.

[Remarks]Excellent engineer, but lacks cooperative spirit. Shows symptoms of paranoia.

-----\
[ag3] Central Intelligence Unit (CIU/GOVERNMENT/AUSTRALIA)

OCU REGIONAL GATE [PW:DJV]

1: SE ASIA [PW:FTBTJB]

1.1: Search: Area[Asia]/Keyword[Activity]

Report from agents in Southeast Asia. The civil war between the Philippine government and the rebels continues. Several unidentified ships are coming in and out of the rebel HQ in Mindanao. This is undoubtedly related to the surge of activity by the rebels. In Singapore, site, site of the recently suppressed riot, Vice President Muraki announced his decision to run for the presidency. Abduction by guerillas are frequently reported in Indonesia. The Indonesian government requested additional agents. We assigned our local agents and cards (local supporters) to collect information regarding guerilla forces.

1.2: Search: Area[Philippines]/Keyword[Bombing]

Report on the bombing of Batangas

The following report came from our local agents.

1. MIDAS was taken to Taal base, which is surrounded by lakes and mountains.
 2. The blueprint of Taal Base revealed a large lab facility underground.
 3. The base is isolated, so an accident won't affect urban areas.
- However, the use of MIDAS was not planned.

We also received word from our local agent in Japan that another copy of MIDAS exists. Refer to his report for further details. Enter the following password to access the file: (KBQBO)

2: JAPAN [PW:KBQBO]

2.1: JAPAN FILE CURRENTLY LOCKED

2.2: We confirmed that Japan made 2 copies of MIDAS; there is now a total of 3 devices, including the original. One of the copies was lost in the explosion at Yokosuka Base. The one brought into Taal Base was the 2nd copy. We concluded that the MIDAS dropped in Batangas was a copy because it was used without exact knowledge of its destructive power. The location of the original remains a mystery. We are now investigating the JDF with regards to this matter.

3: CONGRESS [PW:PDV]

3.1: Search: Area[Canberra]/Keyword[Congress]

OCU CONGRESS

OCU Military Inspection Committee members and weapon industries.

The committee was established to monitor the military, but in reality the committee members receive donations from weapons manufacturers.

Their information manipulation is very skillful, and our investigations have often been hindered by this. The topic was initiated by a concerned CIU Director Peeps, but Congress was adjourned without working out any concrete countermeasures.

3.2: Search:Topic[Congress]/Keyword[MIDAS]

OCU Congress Reaction to Batangas

The OCU Congress is concerned over the explosion that destroyed Batangas.

90% of Congress members expressed interest in learning the truth about MIDAS. We are considering the submission of MIDAS documents to Congress, as the military remains silent. We will time the submission carefully to avoid interference from the OCU military.

SECRET GATE [PW:UFSDFDFT]

1: MIDAS [PW:TBEJN]

1.1: USN NEW WEAPON

Search:Topic[USN]/Keyword[Weapon]

USN New Weapon

A team of scientists in the USN is developing a new type of radiation device. The device is called Matter Irradiating Dissociative Acceleration System, or "MIDAS." It extracts energy from auric radiation. Auric radiation consists of protons and neutrons proportionate to that of gold which disintegrate the molecular bond of all existing matter. Confining the radiation remained almost impossible, and most research ended fruitlessly. Provided that the USN team succeeded in confining the radiation, MIDAS could function as a weapon. We must investigate into this matter further.

1.2: USING MIDAS

Search:Topic[USN]/Keyword[New Weapon]

MIDAS Practical Application

MIDAS is on its way to practical applications. The USN research team succeeded in containing auric radiation, allowing MIDAS to be used as a bomb. Auric radiation absorbs hydrogen until it reaches a stable gold isotope status where it has lost all radioactivity. In other words, MIDAS is a bomb free of nuclear contamination, while possessing the capability to destroy above and below ground targets. We are intensifying the investigation effort on MIDAS.

2: USN [PW:OTV]

2.1: USN AND DA HAN ZHONG

Report on USN Policy on DHZ

The relationship between the USN and DHZ is becoming unstable. Jie Bo Liao's new regime is against a free economy and recently asked all USN corporations located in the DHZ to leave. Enter the following password to access reports from our agents in DHZ: (AIE)

2.2: USN AND HUA LIAN

USN and Hua Lian Rebels

The USN is assisting the Hua Lian Rebels, in protest of Jie's anti-free economy policies. The USN is providing the rebels with weapons through their military. Since little is known about the Hua Lian Rebels, we will conduct further investigations through our local agents. Here is the Hua Lian Rebels' web address: (HLR/OTHER/DAHANZHONG)

3: DA HAN ZHONG [PW:AIE]

3.1: NEW POLITICAL POWER IN DA HAN ZHONG

Search: Area[DHZ]/Keyword[Jie Regime]

Start of the Jie Regime

Jie Bo Liao came into power after the death of Chairman Bai Tai Luong. He set up a socialist policy and began to oppress Huanan-Taiwan Economic Block, which was opposed to his anti-free economy policy. While the uprising was controlled, Jie is on the lookout for the rebel leaders that escaped. The relationship between the new regime in the DHZ and nations around the world is sure to deteriorate. Jie is pursuing an isolation path, and we must watch Jie's regime carefully. Enter the following password to the OCU Intelligence web site for DHZ-related information: (DTHTZT)

3.2: THE REISTANCE

Report on DHZ Rebels

People of the influence in the Huanan-Taiwan Economic Block have formed a rebel force called the Hua Lian Rebels. The leader of the Hua Lian Rebels is the former vice chairman, Huang Mo Shun. General Li Wang

Gui is the rebels' tactical commander. However, most of the members are students and civilians with no experience on field battle. The Hua Lian Rebels are financed by ethnic Chinese in adjacent countries. The ethnic Chinese are supporting the rebels for economic gain. Weapons and supplies are provided by the USN military and gangs who rob from the OCU military.

[ac1] DCN / Daily Canberra Network News (DCN/CORPORATION/AUSTRALIA)
News from one ocean to the other, DCN connects the world with information.

TOPICS

1: In OCU

1.1: Alordesh and OCU Congress Reach Agreement

[Lee Kwai, Dacca]

The government of Alordesh announced an end to its opposition to the OCU government. The two parties will sign a peace treaty at the conclusion of the OCU Economic Cooperative Talks. The tension between Alordesh and the OCU Congress goes back 10 years to the coup d'etat in Alordesh. All OCU member nations welcome this historic agreement.

1.2: Explosion in the Philippines

[Manuel Laurenzo, Manila]

DHZ military force invading the Philippines wiped out by mysterious explosion. The DHZ troops destroyed in the blast were on their way to Taal Base after landing at Batangas. The explosion caused severe casualties in Batangas. It is still unknown who set off the explosion. The blast was initially thought to be a nuclear explosion, but local reports confirmed otherwise. The Philippines government and the OCU congress made a stern protest against the DHZ and declared a state of emergency in Batangas.

1.3: OCU Economic Talks

[Elizabeth Somlit, Dacca]

Financial aid to OCU member nations suffering economic hardship was decided at the OCU Economic Cooperative Talks held in Alordesh. However, the discussion on the dispatch of additional OCU troops become heated. The dispatch is meant to reinforce the countries with limited military strength. The proposal was strongly opposed by Alordesh, and the Cooperative Talks ended without resolution. OCU Congressman Charles expressed his regret at the failure to reach an agreement.

1.4: Objection to Dispatch of OCU Troops

[Adrian Lines, Hanoi]

Many countries objected to the OCU Congress's decision to require additional OCU troops. Students in Vietnam conducted a demonstration which resulted in a confrontation with the police. One student died, and more than 100 were arrested. Similar demonstration were held in Alordesh and Thailand. Protests through diplomatic channels are also becoming more active. Since the OCU Congress considers the matter closed, the rise of tension in the area seems unavoidable.

1.5: Casualties in Anti-War Demonstration

[Margaret Kimura, Wellington]

There was a violent conflict between anti-war demonstrators and police in Wellington. The demonstrators were protesting the dispatch of OCU troops to Japan, following a DHZ invasion of that country. The police in Wellington opened fire at the crowd of demonstrators, resulting in 1 fatality and 12 injuries. At least 90 people were hospitalized in the stampede. The OCU Congress responded to the situation by announcing that the decision will not be overturned. According to the police, more than 105 demonstrators were arrested in New Zealand that day.

2: International

2.1: USN 3rd Fleet Arrives in Guam

[Pax Audrey, Guam]

The USN 3rd fleet lead by the flagship "Thomas Jefferson" arrived in Talofo, Guam. The port is often used by the USN for OCU related missions. The OCU Congress objected over the fleet's presence. The OCU also ordered its Pacific Fleet, along with the flagship "Crafton," to Guam to carry out surveillance. The North Mariana government suggested that both fleets make their course open to the public. It is not known whether the parties involved will accept the suggestion, meant to circumvent a confrontation.

2.2: President Gorchakov Visits Ravnui

[Johnny Kidman, Belarus]

President Gorchakov of the Zaftra Republic paid a courtesy visit to Ravnui. The President arrived on the 16th, and is scheduled to visit Ravnui Natipnal Laboratory and other industrial facilities. The National Research Laboratory is one of the largest research organizations in the world, with 35 sites in 11 cities. The "Statue of Peace," contributed by Zaftra, will be presented on the final day of his visit.

2.3: USN Ambassador's House Burns Down in Taipei

[Linda Brad, Taipei]

The house of USN Ambassador Clay Herman exploded into flames last night. the bodies recovered are presumed to be those of Herman and his family. They are now undergoing DNA testing to verify their identities. The cause of the fire remains unknown, though some attack helicopters were witnessed at the site. The DHZ government is investigating the incident and its relation to the USN squad that dropped into Taiwan near Ba Kui Dam.

2.4: Hua Lian Rebel Uprising

[Martin Sandler, Shanghai]

The Hua Lian Rebels have taken over Nanjing and continue toward Shanghai. Hua Lian Rebels fought minor skirmishes against the DHZ military in Xiamen and Foshan. It turns out that a large scale battle with the DHZ's elite Rapid Reaction Force also took place in Hengshan. The Rapid Reaction Force lost their mobile ground fortress as a result of this battle. The main rebel forces moved into Nanjing via Wuhan. Local collaborators cooperated in seizing the Nanjing area. The Hua Lian Rebels are now marching toward Shanghai. Many civilians in Shanghai are preparing for evacuation.

2.5: USN Fleet Approaches OCU Territory

[Pax Audrey, Guam]

The USN fleet, after leaving Guam, changed its predicted course. The USN fleet made repeated attempts to throw off the OCU surveillance team before heading toward OCU territorial waters. There has been no response from the USN to warnings made by the OCU military. The USN 3rd Fleet is one of the major naval forces of the USN. The EC member nations, as well as the OCU, are awaiting an explanation from the USN regarding their

actions.

2.6: OCU Reaction to DHZ Invasion of Japan

[Ken Odagiri, Canberra]

In response to the DHZ invasion, the OCU Congress is sending troops to Japan. The OCU Defense Ministry is organizing a support force to help fight the DHZ. The Pacific Fleet was attacked by a DHZ submarine enroute to Japan, causing a major delay in the arrival schedule. The Defense Ministry organized an air raid in response to the attack. However, the raid is on hold until the Japanese government gives permission.

DCN TIMELINE / DCN GRAPHICS (DCNGRAPH/CORPORATION/AUSTRALIA)

1: A.D. 2005

Bangkok Economic Block Established

The establishment of the information network in the beginning of the 21st century promoted economic globalization, which in turn led to a formation of major economic blocks that hold a larger share of the global market. Among them was the Bangkok Economic Block, established by former ASEAN member in 2005. It became a backbone of the current OCU.

2: A.D. 2011

The Ship Trinidad Captured

A tanker, Trinidad, cruising through the Panama Canal, was captured in 2011 by a US battleship. Americans stop the Trinidad for an inspection, but Australia, who owns the tanker, saw this incident as a warning against the US against joining the Bangkok Economic Block. Their relationship rapidly deteriorated after this incident.

3: A.D. 2015

Australia and Japan Join Economic Block

The Bangkok Economic Block grew to become one of the greatest economic powers by 2015. Japan could no longer ignore their presence and moved to join the Bangkok Economic Block. Together with Australia, Japan set up a committee to prepare their entrance into the Bangkok Economic Block.

4: A.D. 2019

Union Renamed

With the addition of Australia and Japan, the Bangkok Economic Block moved to expand beyond a simple economic coalition. They renamed the coalition the "Oceana Community Union," or OCU. A national flag design was chosen by contest. 2019 marked the beginning of the OCU.

5: A.D. 2020

Change in Economic Structure

2020 saw drastic change in the economy of countries joining the OCU. The change was caused by the establishment of a unified currency system within the OCU. The unification of currency, while causing minor confusion in the financial sector, was a significant step towards the birth of OCU.

6: A.D. 2021

Rise of Anti-OCU Movement

While the OCU was on steady course towards establishment, certain countries were in opposition. The opposing parties saw the OCU as a backward step from independence. The opposition in Southeast Asia was especially strong with regard to Japan joining.

7: A.D. 2023

OCU Cooperative Military

The OCU recognized the need for a defensive military to protect the union

of countries. The first cooperative units were stationed in Australia, Japan, and Indonesia in 2023. These units developed into the present OCU military.

6: A.D. 2026

OCU Established

The OCU was finally established in 2026, after careful preparations, overcoming various obstacles. The process took 21 years from the founding of the Bangkok Economic Block ending 7 years after the name Oceana Community Union was decided upon. The first meeting of the OCU congress was held in Canberra, Australia. Representatives from each country proclaimed their commitment to the union.

7: A.D. 2028

Korea Joins OCU

Korea decided to join the OCU in 2028. Situated next to the economic power of the DHZ, and seeing its own market growth slowed by the OCU, Korea determined to join. Many other Central Asian countries joined soon after, forming the current OCU.

EDITORIAL OFFICE (DCNEDITOR/CORPORATION/AUSTRALIA)

1: Bulletin Board (DCNBULLETIN/CORPORATION/AUSTRALIA)

1.1: The DCN season is here! When will the participating pilots and wanzers be announced? I'm a big fan of Rox the Tiger. I'd reserve Gold Tickets if he were competing!

-ROX MANIAC-

>The list of DCN players is in the papers today. Rox the Tiger is listed with his new wanzers from Leonora. Don't forget, we're publishing "Rox the Tiger's Battle Legend 2" before the tournament!

Wow, thanks! I'm gonna hit the ticket guide now.

-ROX MANIAC-

1.2: Is it true that Jim Makino, the Yokohama Hawks pitcher, will retire due to a knee injury? Does that mean he won't be at next month's game against the Sydney Shotguns?

-Heath McKenzie

>Makino is having an operation on the artificial ligament in his left knee at the St. Vladimir Hospital in Ravnui. His retirement will probably depend on the operation's outcome. Either way, he won't be in next month's game.

That's too bad. I'm getting too old to wait around. I hope that he'll recover soon.

-Heath McKenzie

1.3: This is ROX MANIAC! I went to the DCN Cup, only to see Rox beaten by Vampire Kid. Vampire Kid's COM was a converted Guanaco. Isn't it against the DCN regulations? -ROX MANIAC

>The use of Guanaco is officially permitted, starting this year. While the conversion of COM is prohibited, our judge did not find any proof of conversion on Kid's COM. DCN tournament is a sporting event. I hope the audience will practice good sportsmanship as well.

Hmm, I see. I still sucks that Rox lost the match. My only hope is

a revenge match. Any chance? Get 'em, golden tiger! -ROX MANIAC-

1.4: I heard on the news that the asteroid Toutalis is approaching the earth. Is it going to hit us? I saw a report that it's going to hit destroy the earth if it hits. My family is worried. -Ayumi Kawasaki

>Toutalis crosses earth's orbit once every 4 years, but there is no possibility of a collision in the near future. There will be a meteor shower, visible to the naked eye, as Toutalis leaves our orbit. How's that for good news?

1.5: ROX MANIAC again. I read the article about Vampire Kid getting arrested for using something called Switch Cocktail. Maybe he was using it at the DCN cup, too. They should check the pilot, as well as the wanzer.
-ROX MANIAC-

>We all regret the winner of the DCN cup was involved in that incident. However, the DCN doctor confirmed that he tested negative on the day of the tournament.

2: S.I.Team (DCNSIT/CORPORATION/AUSTRALIA) [PW:DCN09]

2.1: [Black Diamond, Jilong]

Unusual activities led by the Japanese, the USN, and the DHZ militaries in the Far East. The intelligence agencies of the 3 countries are also involved, but the details of their operations are unknown. The time lag in each military's response indicates this is not a cooperative operation. My investigation will continue.

2.2: [Heart King, Manila]

The tension between the USN and OCU recently escalated in the Philippines. I received word that the OCU and the USN are sending units to the area. Activities by a DHZ special task force were also reported. Judging from the lack of activity in diplomatic channels, I will investigate a possible fourth party involved in this story.

2.3: [Spade Red, Washington DC]

The USN may be facing a crisis in its relationship with the DHZ. We have two pieces of information: an unconfirmed story that a USN wanzer force landed in Taipei, and that the USN is ready to provide the DHZ "Hua Lian Rebels" with military supplies. Refer to CIU's database on USN-related information. The password is (OTV)

2.4: I'm confused about the "Australian National Lottery" TV commercial. What do they mean by "play without procedure"? -Betsy Smith

>It means that the lottery uses your National ID #. You're automatically enrolled in the lottery! You just need to tune into the lottery and await for your number to get called.

2.5: [Silver Queen, Fukuoka]

Report in the JDF coup, led by Colonel Takemura. The coup ended without any sign of a clear objective by the coup forces. There are unconfirmed reports of USN soldiers and Hua Lian members in the coup forces. DHZ's invasion of Ocean City seems to lack any rational reason, as well. I will continue the investigation.

CORPORATE

Leonora Enterprises covers all forms of electronics: from designing and manufacturing wanzers to manufacturing home PCs. Our wanzers, which use the high density processor, "LEORA," hold 40% of the market share in the OCU. We hope to continue our contribution to world peace and technological development.

MUNITIONS DIVISION

1: PRODUCTS (LEPROJECTS/CORPORATION/AUSTRALIA)

- Kasel M2
- Meledyne M1
- Foura M12A

2: TOPICS (LETOPICS/CORPORATION/AUSTRALIA)

2.1: Leonora Products Available Worldwide

Leonora Enterprises' products are used around the world. Our new service to exchange used normal leg parts with hover and caterpillar types is particularly popular among desert regions of Africa. Our new model, the Kasel, is now much stronger with reinforced body armor. It is also equipped with the latest processor, the PPX-2. The surface is coated with a special poly-ceramic planting to prevent deterioration from severe weather.

2.2: We Practice Product Control

Our products were not involved in the recent explosion in Batangas, Philippines. Communication with our clients is our policy, and we keep track of all shipped products to prevent illegal use. We also keep track of second-hand machine and parts through out buyback and exchange program. Thus, we can assure you that our organization and clients were not involved in the Batangas incident.

2.3: Leonora Serves Everyone Reconstruction has begun in Batangas, Philippines. We are happy to report that our wanzers are participating in the city's restoration. We are also donating 100 of our construction wanzers to the OCU military for reconstruction. We hope for a speedy restoration of normal life in Batangas.

[ac3] Jade Metal Lyman (JML/CORPORATION/AUSTRALIA)

CORPORATE

Welcome to Jade Metal Lyman!

We hold a 10-year record as the No. 1 wanzers manufacturer. We lead the munitions industry in the OCU. We also manufacture civilian vehicles in addition to wanzers and assault weapons. I hope you enjoy our display of state-of-the-art technology, backed by experience and thorough research data.

PRODUCTS

- Zenislev
- Genie
- Zeros

TOPICS

1: Top Sales Results in Industry

Our profit increased again in the 4th quarter of this year. We expect

to end the year with a large surplus. Sales for this quarter reached 8,759 million Australian dollars. The boost in sales was a result of resupply in Asia. Our civilian aircraft division also marked a 40% increase, making us a leader in the industry. These figures show our strength as the leader of the OCU munitions industry. We would like to take this opportunity to thank our clients.

2: New Continuous Operation Generator

Our new generator, the "XL-2000," does not suffer output deterioration even with continuous use. This generator is used in all wanzers starting with the Zeros, and has proven to be much more durable than generators made by other companies. The 100 hour continuous operation test showed only an 8% output deterioration in the XL-2000. Some simulation tests indicated an even more favorable result in battle. In tests our wanzers with the XL-2000 are markedly superior to similar model Leonora wanzers.

- MBT2 Kuarve
- 40mm Gun
- Monster
- Cadenza

2: TOPIC

2.1: Velda's Military Vehicles Got Your Back

We suggest using traditional armored vehicles over wanzers for backup operations. Data shows a higher rate of pilot survival and firing accuracy in armored vehicles. Deploying a combination of wanzers and armored vehicles is also cost-effective. To best optimize your military, Velda recommends a composite force of armored vehicles and wanzers.

2.2: Mounting Beam Weapons on Armored Vehicles

Mounting beam weapons on mobile armored vehicles is considered impossible because of problems in power output. Velda is developing a new generator that converts exhaust heat into power, which may allow practical mounting of beam weapons. The new generator divides the exhaust heat of the beam weapon into pulses, using a special molecular material machine to store it. The stored energy can later be extracted into power. The stored energy can later be extracted into power. This process solves the problem of insufficient output. We may also connect this generator to the wheels of vehicles, for use as auxiliary power.

PROJECTS

Welcome to Velda!

Feel the Wind. Velda's technology storms the worldwide motor industry!

[ic1] Barilar Farm (BARILARFARM/CORPORATION/INDONESIA)

TOPICS

1: This page is dedicated to methane wanzers all over the world. No current updates.

2: Front-line Methane Wanzers

Many know the DHZ's Tianlei fortress was destroyed by the Hua Lian Rebels, but did you know Methane Wanzers had a hand in this? Our head researcher, Linny Barilar, led the Hua Lian to victor with his Methane Wanzer. This web site is dedicated to Methane Wanzers, and their place in the annals of history.

3: Methane Wanzer, Fight!

The Methane Wanzer is fighting in the current coup d'etat in Japan. This site is dedicated to the Methane Wanzer, whose combat ability will never let you down.

FARM

The Barilar Farm has 360 acres of land and over 1000 head of cattle. Our award winning beef is of the highest quality, and we bring you the best in the OCU.

FACTORY

The Barilar Farms also manufacture fertilizers. The "Methane Wanzer" runs on methane gas generated from manure! It's extremely cost effective and economical! Equipped with two 7.7mm machine guns, the Methane Wanzer is no slouch on the battlefield, either! Order yours today!

PRODUCTS (BARILARWZR/CORPORATION/INDONESIA)

Products Information on Methane Wanzer
NOW ON SALE! NEXT GENERATION WANZER!!

FAMILY

1: Barden

Barilar Corp. President
Graduated Jakarta School of Engineering. This cattle breeder has long dreamed of developing an earth friendly wanzer. Working on barns gave him the idea to use methane gas as a fuel. Ten years after conception, the world's first Methane Wanzer was created. The low operating cost will revolutionize the wanzer world.

2: Beatrice

Barilar Corp. VP of Cattle
In charge of the cattle genetic enhancement program. Distinguished member of the OCU Cattle Association. Currently investigating cloning as a means of producing high-quality inexpensive beef. Married the young and zealous Barilar. Beatrice raises all the calves and is without a doubt the mother of the farm.

3: Orlik

Barilar Corp. Honorary Chairman

Cleaned the land by himself and founded Barilar Farms with just 6 cattle. The farm expanded with a contract to forming the basis for the current Barilar Corp. Putting off his planned retirement, Orlik remains active as the head cattleman, raising calves with his extensive experience.

4: Erme

Barilar Corp. Cattle CEO

The wise matron always at Orlik's side. She helped raise the cattle as well as her fine children. Her long years of experience allow Erme to give input on the various attachments such as manure mixers and general disinfectors being developed for Methane Wanzers.

5: Tanya

Barilar Corp. VP

Graduated Bataan School of Management. She got her MBA in the USN, then worked for the USN Indonesia Embassy. She returned home to run Barilar with her years of business experience. The Methane Wanzer being developed by the company promises to be a great success, and Tanya is working on a sales plan to ensure its success.

6: Linny

Barilar Corp. Head Researcher

Graduated Toraj University.

He then worked at a manure processing plant, designing facilities and control systems. To increase sales of the Methane Wanzers, Linny takes the direct marketing approach, bringing the product directly to the consumer. He also instructs the free piloting course offered to customers.

7: Skylar

Barilar Corp. VP of Fertilizer

Currently on leave from University to perform her current job. She is working to improve the quality of chemical and organic fertilizers.

Skylar is also in charge of developing "Barilite," a fertilizer without harmful ammonia and sulfur gases, enriched with new microbes to improve soil quality.

8: Kate

Barilar Corp. VP of Finance

Kate has planned to study in Japan but was recruited by Barden.

A skilled buyer of supplies, she managed to stop wasteful spending by the industrial division. She is now working to cut Methane Wanzer production costs.

[pg1] Philippine Forces (PHFORCE/GOVERNMENT/PHILIPPINES)

REPORTS

1: Say NO to the Bamarm Rebels!

Say NO! to the Bamarm Rebels:

The rebels, based on Mindanao, are using kidnapping and coercion to increase their forces. If any family members are kidnapped or threatened, contact the authorities. The military will carry out rescue operations.

2: Struggle in the Jungle [Alisa story only]

The small-scale wanzer fighting in Panay's central jungles was part of a Bamarm rebel raid. The army sent two wanzer platoons that wiped out the guerillas. Army casualties were light, with no fatalities.

3: Negros Fortress [Alisa story only]

It has been confirmed that Negros has been captured by the Bamarm rebels. Plans to recapture it are under way and are expected to take a day or two. There is no confirmation the DHZ is aiding the rebels.

4: Mysterious Explosion in Batangas

The army has discovered the following regarding the explosion that occurred in Batangas harbor.

1. Debris found after the explosion has confirmed that the ships in Batangas harbor were part of a DHZ invasion fleet.
2. Before the explosion, Manila radar detected a small OCU aircraft taking off from Taal OCU naval base.

The OCU military has been questioned regarding the aircraft, but they have not yet responded. The cause of the explosion remains unclear, and investigations will continue until the cause is discovered.

5: DHZ reaction to Batangas

The Philippines and OCU are protesting the attempted DHZ invasion of Batangas. However, the DHZ claims the ships were commercial vessels and has demanded an apology from the Philippine government. The government rejects the DHZ claim and will continue with the protest.

6: Increase in OCU Armed Forces

Ours and many other OCU nations have rejected the OCU Congress's motion to draft additional troops for military service. Many nations rejected the motion out of fear that the central OCU government would become too powerful. We ask all citizens to support the Philippine government in this very important decision.

DATA

1: Troop Deployment

1.1: Luzon

The island of Luzon houses the military high command in the capital, Manila, as well as significant land and air forces. Our forces, combined with the OCU naval base at Lake Taal and the OCU air base at Baguio, are protecting the Philippines.

1.2: Leyte

Leyte contains the largest naval base with over half the fleet vessels there. The 4th fleet's "Dagat Ahas" carries 20 fighters, marines, and turbo fan hover engines allowing 35 knots. It is truly a mobile sea fortress.

1.3: Mindoro

Mindoro is well defended by 3 divisions. The 7th Wanzer and the 5th Infantry divisions at Calapan are both elite units. These units are well versed in landing operations, allowing them to take back any island that might be captured by an enemy.

1.4: Panay

Panay has heavy air support. Their radar station is the most powerful in the OCU, monitoring all of the Philippines. The radar site is well defended, as well as neighboring Negros, Cebu, and Masbate islands.

1.5: Negros

Negros has 2 divisions stationed at the island's jungle fortress, which uses the terrain to deter attackers. It is equipped to take command should anything happen to the high military command in Manila.

MAIN ARMAMENT

- Kasel M2 in Philippine service
- Jinyo Mk110 in Philippine service
- Genie in Philippine service
- Hanniger P
- MBT2 Kuarve
- Brenos

#[5.2] Corporation#

[pc1] Luis Corporation (LUISCC/CORPORATION/PHILIPPINES)

This web site is presented by the Philippines' largest conglomerate. the Luis Corporation. I am the butler, Pierre Wells, and I will be your guide.

CORPORATE

1: Luis Industries

Luis is best known for its industrial division. This is not automobiles or electronics, but steel. In other words, we provide raw materials for all other industries in the world. We have steel plants in the cities of Laoag, Naga, and Calbayog and export products to Australia, Africa, and Southeast Asia.

2: Luis Construction

Another division of Luis is construction. We have built countless high rise buildings, as well as airports, bridges, and harbors. Recent construction projects have included schools and museums, as well as other civic and educational buildings.

3: Luis Department Store

Still, Luis is not just large industries. Luis department stores are in all major Philippine cities. Next year, we plan to open stores in Australia as well. We also operate supermarkets and 24 hour convenience stores all over the country.

THE LUIS FAMILY

1: Fred Luis

Head of the Luis family and president of the Luis Corporation, Master Fred Luis graduated top of his class from Oxford University. Two years later, following in his father Orville's footsteps, Master Luis became president of Luis Construction. When Orville passed away in 2092, Master Luis became president of Luis Corporation, and for 30 years he has guided the Luis family. Master Luis has collected many cars over the years--almost 250--and every morning still frets over which one to drive.

2: Jenny Luis

Master Luis met his wife, Lady Jenny, at Oxford, and, at the age of 22, she joined the Luis family. After Pham's birth in 2096, Lady Jenny concentrated on being a mother. She began helping Fred soon after Lady Pham started school. Lady Jenny, also being a distinguished graduate of Oxford, is currently the president of several Luis Corp. companies.

3: Pham Luis

Master Luis' daughter, Lady Pham is 17 years of age. She is a bright young lady, just like her parents. She has been influenced by her many male friends and has decided to take up wanzers and airplane piloting. She even asked Master Luis for a large transport (pictured) for her birthday! Against the will of her parents, she joined the Bamarm rebel forces after graduating from high school. I am very concerned about her, but, as the family butler, I am determined to protect her.

4: Pierre Wells

Myself? I am merely a butler... all right. If Lady Pham requests it... I, Pierre Wells, am from Cardiff Wales. At 22, I graduated from the Kingdom School of Butlery. After 3 years of apprenticeship, my master went broke. At that time, I was hired by Master Luis's father Master Orville Luis. I have worked for the Luis family ever since. By the way, the photo is of the tea set I received from Master Luis on my 30th anniversary.

[pol] Philippines Liberal Party (PLPARTY/OTHER/PHILIPPINES)

TOPICS

1: The Philippines Liberal Party is dedicated to protecting this nation from OCU plundering and attaining independence from the OCU. Those who support us, take up arms and join the revolution! Only we can cleanse our nation of this filth!

- Vice President Magarda Bamarm

2: The Philippines Liberal Party has destroyed the army's precious missile site on Panay. Success to revolution!

3: We have captured Negros fortress! On to Luzon and Manila! Down with the government! The time is ripe for the Philippines Liberal Party! It is now the era of the people!

INTERNAL [PW:BEFREE]

1: AREAS IN CONTROL

1.1: Currently, only Mindanao is under our control. We are undermanned, with only 20,000 troops, and unable to continue operations. We are receiving aid from overseas, but without additional manpower, our hands are tied.

1.2: The Panay missile site has been destroyed. A flight path to Negros is now open. We still lack manpower, but we make up for it in

spirit.

1.3: We have finally taken Negros Fortress. This will convince more to join our cause. We must now land on Luzon and take the capital, Manila. Luckily, our supporters in the DHZ have provided us landing ships. We will use them to land on Luzon and Batangas.

2: MAIL SERVER

2.1: MAGARDA BAMARM 1

From: (deleted) To: Margarda Bamarm

Allies will arrive soon to help out with the job. Follow their advice closely.

(Re) From: Magarda Bamarm (Re)To: (deleted)

I offer full cooperation in exchange for your assistance. However, being at their beck and call is unacceptable. If you are sending as supplies as well, that's a different story, though.

2.2: MAGARDA BAMARM 2

From: Magarda Bamarm To: (deleted)

Thanks for the new batch of supplies. The allies you sent are very effective. We will begin operations against the Negros fortress. Once we succeed, the revolution is guaranteed. Then I can repay your kindness.

2.3: MAGARDA BAMARM 3

From: (deleted) To: Magarda Bamarm

Congratulations on success at Negros. I am very pleased as well. As I believe you know already, our landing ships are heading for San Jose. Use the troops aboard as you see fit. I wish you success.

(Re)From: Magarda Bamarm To: (deleted)

Thank you for all your support. Now I can achieve my life-long goal. Of course, once I become president, the rights to Nansei Islands will go to your nation. Your name will forever be associated with our glorious revolution.

#[6] DA HAN ZHONG #
#####

#[6.1] Government#

[dg1] DHZ Government / The People's Republic of Da Han Zhong Official Website
(DHZG/GOVERNMENT/DAHANZHONG)

TOPICS

1: Policy Against Hua Lian Rebels

Chairman Jie has announced his firm opposition to the rebel group. The Changli Army was assigned to deal with the rebels. The Chairman also announced that the USN is providing financial aid to the rebels. He warned the USN to stop immediately, in order to avoid further damage to diplomatic relations.

2: Explosion in the Philippines

A mysterious explosion occurred in Batangas, Philippines that destroyed our trade vessels. The OCU falsely claims that the fleet played a part in the

invasion of Batangas. The DHZ government will file a formal complaint against OCU's statement.

3: Hua Lian Rebel Attack

The rebels conducted a surprise attack on our forces in Nanjing and Wuhan. They now occupy the 2 cities. The rebels are moving to take Shanghai. Chairman Jie is deploying the largest force to date against the rebels. We ask the citizens of Shanghai to cooperate with the Changli Army commanders.

4: Retaliation Against Japan

Our intelligence revealed that Japan was responsible for the explosion in Batangas that destroyed our trade vessels. Our government approved a reprisal attack against Japan. 3 divisions are headed for Okinawa Ocean City. The chairman will negotiate with the Japanese government after capturing Ocean City.

CITIZEN'S PAGE-BULLETIN

1: I'm a 17 year old student hoping to become a wanzer engineer someday. I'll be attending Shanghai University, but I also want to study in the USN. My family is not rich, so I want to take advantage of the scholarships. How do I qualify? -Li

>There are currently 3 scholarships offered to students interested in studying wanzer engineering. Shanghai Steel and Tie Wudi Industries also offer corporate scholarships. They both require a high GPA and a personal interview. However, you don't need to study in the USN. Our own wanzers are some of the best.

2: How are Chairman Jie's policies different from the socialist policies of the 20th century? I think his policies stand by opposite to former Chairman Bai's free economy policy. - SHAN

>Free economy encourages growth, but government control of the financial sector is necessary to avoid mistakes made by capitalist countries. For example, look at Japan's major recession during the 20th century.

3: I'm a mother of 2 in Hong Kong. We applied for the new public apartment lottery, but we weren't chosen. Is it true that government and military workers get first pick?

>Our country guarantees equal right to all citizens. Therefore, lotteries are always conducted in a fair manner. Winning is only a matter of probability. Please wait patiently until the next lottery.

4: I'm a rancher in Jingnan. There's been a string of small earthquakes in this area. Will there be a big earthquake in the near future? The animals seem frightened. I'm very worried. Should I prepare to evacuate?

>According to the world renowned DHZ Earthquake Center, there is no threat of large earthquakes in your area. We have a highly trained rescue team in case of emergencies. You have nothing to worry about.

[dg2] Ravnui Embassy (REMBBASY/GOVERNMENT/DAHANZHONG)

EMBASSY

The Ravnui Embassy is located east of Shanghai. This district is full of

exotic buildings, and embassies for other countries. Our embassy features art native to our country and a visitor's guide to Ravnui. Feel free to stop by.

Ravnui Ambassador, Bal Gorbovsky

EMPLOYEES ONLY [PW:REBSY]

1: ACQUIRING MIDAS TECHNOLOGY [PW:PLANM]

1.1: PLAN 1

Acquiring MIDAS: FILE 1

The plan to steal MIDAS and its creator, Emir Klamsky, failed. To get MIDAS past USN inspection, we planned to divide the parts, but safety concerns over the auric radiation control system cancelled this plan. The OCU military seized MIDAS while we were planning transport options. We are investigating its current location. Emir Klamsky is currently heading to Japan with a FAI agent.

1.2: PLAN 2

Acquiring MIDAS: FILE 2

We failed to acquire MIDAS once again. We ordered Lukav to split from the FAI and proceed with retrieval of MIDAS, which was moved from Japan to the Philippines. The plan failed because the OCU used MIDAS in Batangas. However, Lukav reported that copies of MIDAS do exist. He will follow up on this information.

1.3: PLAN 3

Acquiring MIDAS: FILE 3

The JDF Chief of Staff Sasaki had the original MIDAS all along. Lukav, who is on his way to join Sasaki, will provide us with the exact location of MIDAS. Rosavia and Jared were assigned to prevent the USN and Isao Takemura from interfering with our plan. According to Chairman Jie, the DHZ military will join their LST fleet to assist with our Okinawa invasion plan. The DHZ military will fight the JDF, while Jared and Rosavia assassinate the Imaginary Numbers and retrieve MIDAS.

2: MISSING IMAGINARY NUMBERS [PW:ALONE]

Missing Imaginary Numbers

Information on members who are dead or scheduled for execution.

[BOTH EMMA & ALISA'S STORY]

- Serov Warren [Code:TCX021]

Works at OCU lab as a wanzler engineer. Involved in the transport crash investigation.

- Ivan Larzalev [Code:TRX05]

Escaped from the Shanghai Lab. Stole classified information upon escape.

- Anthony Barkins [Code:TVX032]

Worked in the financial analysis division of the National Labs.

Escaped during operation in the USN.

- TZV [Code:TAX002]

Missing until recently. Currently working for USN military lab.

- VZV [Code:TAX003]

Missing until recently. Currently a graduate student in Japan.

Also, works at a JDF lab.

[EMMA'S STORY]

- Serov Warren [Dead]

Joined DHZ after leaving the OCU. Killed by Jared while fighting rebels in Guilin.

- Ivan Larzalev [Dead]

Taken under care of rebels in Xiamen after escape. Died while fighting Jared's squad.

- Emir Klamsky [To be executed]
Working with FAI agent Dennis Vicarth and JDF colonel Isao Takemura's son.
- Aliciana Klamsky [To be executed]
Escaped from the missile base. Working with Dennis Vicarth and JDF colonel Isao Takemura's son.

[ALISA'S STORY]

- Serov Warren [Dead]
Joined the rebel hunt in Batangas. Died after losing control of his wanzers.
- Ivan Larzalev [Dead]
Joined the Hua Lian rebels after escape. Dies while fighting CIU mercenaries and a Real Number.
- Emir Klamsky [To be executed]
Working with USN engineer. Currently operating with FAI spy Dennis Vicarth.
- Aliciana Klamsky [To be executed]
Working with DHZ agent Liu Hei Fong and JDF colonel Isao Takemura's son.

3: PERSONNEL DATABASE

3.1: [NAME:LIU]

Liu Hei Fong [Code:AAX001]

Real Number

The first Real Number, created in 2080.

Real numbers were inferior to the Imaginary Numbers in many ways. However, since Real Numbers were easier to control than Imaginary Numbers, an equal number of both models were created. After the downsize in research, all Real Numbers, including this model were executed.

3.2: [NAME:LUKAV]

Pielvy Z. Viocy [CODE:TAX001]

Imaginary Number

The first Imaginary Number, created in 2084. Executed at 25, despite abilities superior to previous models. According to Bal, he was executed upon confirmation of psychological imbalance. He worked for FAI for 4 years before the execution and provided vital information to our country.

3.3: [NAME:BAL]

Bal Gorbovsky

Ravnui Ambassador to the DHZ. Former director of Orsha branch of Ravnui National Laboratory.

2047: Born in Yamalk.

2068: Graduated Yamulka University, began working for the State Department.

2078: Transferred to Ministry of Science.

2088: Appointed director of Orsha Lab. Headed the Real Number and Imaginary Number projects.

2100: Resigned post due to failure of both projects.

2111: Assigned to DHZ as Ravnui ambassador.

WEAPONS (DHZMW/GOVERNMENT/DAHANZHONG)

1: Fortress

Mobile Fortress "Tianlei" Class

L 100m, W 70, H 45m/Crew:70

Role: transport Rapid Reaction Force, built as a mobile supply base.

Moves on treads, but due to size and weight, cannot use normal roads.

Not deployed to the front line, but firepower equal to a cruiser.

Main armament: 6 turrets with quadruple 105mm guns/2 cruise missile launchers/
8 short range SAM launchers/(VTOL pad/heliport)

2: Assault Vehicle

Haolong 4, L 8.2m, W8m, H 15.5(w/legs)

Combat weight 102tons/Crew 2,

Role:self-propelled mobile fire support wanzer.

Has 4 legs with a new hybrid suspension. Hugh cockpit position gives a good field of view. The flexible position system allows movement unaffected by terrain.

Main armament: 2 70mm MG(upper)

2 single missile launchers(legs)

3: AWACS

L 34.5m, 42m, 7.7m/Crew 6/

Role: airborne early warning aircraft.

A unique appearance due to the radar mounted on the fuselage. Also performs control of ground forces and ground support and electronic warfare. The look-down radar can search out most ground targets and also find hidden bases and wanzers

Armament: none

[dg4] DHZ Intelligence (DHZMI/GOVERNMENT/DAHANZHONG) [PW:DFHISZ]

Warning!

DHZ Changli Army personnel only.

1: [PW:ADIMS]

Location of the original MIDAS

<Access level: beyond level D>

We received word that the original MIDAS, believed to be lost in the explosion in Batangas, Philippines was transported to Japan. Lukav Minaev, an Imaginary Number, provided this information. Chairman Jie ordered the retrieval of MIDAS upon receiving the information. Lukav was assigned as the operation commander and sent to Japan. Our headquarters also plans a full-scale invasion of Japan.

2: [PW:FIINNO]

Truth Behind Imaginary Numbers

<Access level: level B and higher>

Our investigation revealed the shocking truth behind the Imaginary Numbers. They are all artificial humans developed in Ravnui National Lab under Bal. The purpose of this research was the creation of the perfect human being. Real Numbers refer to subjects developed from artificial insemination, while "Imaginary Numbers" refers to subjects who were genetically manufactured. Our agent, Lukav, is also an Imaginary Number. We plan to take Imaginary Numbers into custody after the acquisition of MIDAS and use them as research subjects.

#[6.2] Corporation#
#####

[dcl] Da Han Daily (DHD/CORPORATION/DAHANZHONG)

TOPICS

1: Battle in Taipei

A small battle occurred in Taipei between the Hua Lian Rebels and the military. Taipei was quickly liberated by the military, but further increase of rebel activity is expected. There was also a fire at the USN Ambassador Clay Herman's residence. The fire killed the ambassador and several staff members. The government is investigating any connection to the rebels, in addition to looking for suspicious foreigners sighted near the embassy.

2: Rebel Attack Warning

The Hua Lian Rebels succeeded in occupying Nanjing, after conducting a surprise attack. The rebels also destroyed the Changli Army's mobile fortress "Tianlei." Behind the Hua Lian's success lies USN support through weapons contributions, which may strain the USN's relationship with the DHZ. The rebels are now moving to take Shanghai. Chairman Jie plans to order a full-scale counterattack against the rebels. The government is urging all Shanghai residents to evacuate in accordance with Changli Army instructions.

3: DHZ Forces Occupy Okinawa Ocean City

Our government authorized the invasion of Okinawa upon learning of the JDF involvement in the Batangas explosion. 3 divisions of Changli Navy attacked

Ocean City and took over all military, government, and civilian facilities in the city. The Japanese government and other OCU members denounced the invasion. However, the JDF has not made any attempt to reclaim Ocean City so far. The recent coup, led by Colonel Takemura, distracted the JDF, which is working to our favor.

TIMELINE (DHDT/CORPORATION/DAHANZHONG)

1: Year 2026: OCU Established

Japan, Australia, and former ASEAN nations joined together to establish the OCU. There was a territory dispute between the OCU and the DHZ at the time, but DHZ Chairman Bai successfully negotiated a treaty to avoid military confrontation. Pictured: OCU Prime Minister Adam and Chairman Bai in OCU Congress Hall during negotiations.

2: Year 2045: Economic Cooperation with USN

Chairman Bai's free economy policy has led to remarkable economic growth. Cooperative economic efforts with the USN proved especially successful. "Shengxing," pictured, was a product of this effort. The USN opposes the policies of our current government. All USN business moved out of the DHZ after Chairman Bai's death.

3: Year 2071: Nuclear Reductions

Chairman Bai began the elimination of nuclear warheads beyond the minimum required for defense. The Huffman Treaty, signed that same year, and the huge cost of maintaining nuclear weapons contributed to the decision. Forty nuclear missile silos and twenty nuclear submarines deactivated as a result.

4: Year 2078: Futai Tunnel Opens

The Futai Tunnel, the longest underwater tunnel, connecting Taipei and Fuzhou, opened after 18 years of construction. The Futai Tunnel spread the free economy policies of Taiwan to the DHZ and became the basis of the Huanan-Taiwan Economic Block's establishment. This tunnel not only revitalized the economy, but also became a popular tourist site. Pictured: inside the Futai Tunnel.

5: Year 2097: Introduction of Wanzers

The Huffman Treaty began a worldwide trend in the use of wanzers. Our military introduced wanzers into their forces this year. We procured 30 Karm 1A wanzers from Diable Avionics in the USN through economic cooperation program. Domestic production of wanzers also began this year. All wanzers used in the military are now domestically produced. Pictured: Tiandong 3.

6: Year 2104: Government Plane Crashes

The plane carrying Vice-Chairman Ming and his family crashed in the mountains of Sichuan while en route to India. All members of the Ming family died in the accident. Ming Huang Jiu was a popular politician who pushed the DHZ towards a capitalist economy. Guests from around the world attended his state funeral. Pictured: the same model of plane that crashed.

7: Year 2112 Jan.: Chairman Bai's Death

Chairman Bai Remembered

Chairman Bai, the man who led us through major economic and political changes for 50 years, died at the age of 89. Leaders from around the world gathered to mourn his death. Chairman Bai designated Vice-Chairman Ming as his successor, but he didn't designate anyone in case of Ming's death, so Jie Bo Liao, assistant vice-chairman, has become chairman. Pictured: Chairman Bai's funeral.

8: Year 2112 Feb.: People's Republic of DHZ

Chairman Jie announced his "free economy management" policy, and changed the country's name to "People's Republic of Da Han Zhong." The free economy management shifts control of the economy from the private sector to the government. This policy faced opposition in and out of the DHZ, and put a stop to the DHZ's democratization. Pictured: Chairman Jie at inauguration

9: Year 2112 Aug.: Hua Lian Rebels Formed

Huanan-Taiwan Economic Block businessmen and Bai's generals strongly opposed Chairman Jie's new regime. Advocates of democracy gathered to take military action. The military managed to quell the situation, but the core members of the uprising escaped to a city in southern DHZ and officially announced the establishment of "Hua Lian Rebels."

EDITORIAL DEPARTMENT (DHDEO/CORPORATION/DAHANZHONG)

1: Messages

1.1: Message 1

I own some Shanghai Steel stock, but I'm worried that Chairman Jie's policies might lower the value of the stock. I'm also worried about the exchange rate of our currency to the euro and the former dollar. Should I sell the stock now? -Kuan

>The stock market is hard to predict. The exchange rate will be influenced by next week's meeting of the International Bank. The Federal Reserve Bank chairman plans to make an important announcement. I'd wait on selling the stock until then.

Thanks for the information. I'll wait and see what happens -Kuan.

1.2: Message 2

I'm a 27 year-old repairman. I'm planning a trip to Hong Kong in the fall. Any suggestions on places to visit? I'm also going to Macau to gamble.
-Spark

>Hong Kong offers many sightseeing opportunities. Victoria Peak is very famous. Nanhai Bar is a great dining spot. I recommend the casinos in RBC Hotel and Queen Park. If you're going in the fall, why not go during the Macau Grand Prix?

1.3: Message 3

I'm a novice calligraphy collector. I saw a piece by the great calligrapher Wang Yu at an antique store in Beijing. It's expensive, but not so expensive that I can't afford to buy it. Should I make the purchase? -Chao

>The works of Wang Yi are coveted around the world. However, the one you saw in the antique store is probably a fake. All of Wang Yi's works are stored in the museums of Beijing and Taiwan. If an unregistered piece were discovered, the price would be astronomical.

Thank you for your advice. It was foolish of me to think that Wang Yi's work would be displayed at a simple antique shop! I'm embarrassed by my question. -Chao

1.4: Message 4

Your paper reported on students who started a volunteer group to help the victims of the rebel attacks. I'd like to participate, but I lost the information. How can I contact them? -Baishun

>The Shanghai-Beijing student group is organizing the relief effort. You can visit their web site for detailed information. They are accepting

volunteers to help in the relief effort, as well as supplies and monetary donations.

1.5: Message 5

I heard that the Int'l Wanzers Sports Commission will eliminate DHZ from the roster, in protest of DHZ's attack on Japan. Does this mean we won't get to see Liu Xiao Ping compete for the world cup? Tell me this isn't true.

-Huang

>I can assure you that it's a false rumor started by the fans of the OCU Philippines team, who lost in the preliminary round. Aside from the fact that our military's attack on Japan is justified, the IWSC has not made any move to validate the rumor.

Okay, I feel better now. Why can't people separate politics from sports? It's so unfair to the athletes. -Obert

2: Special Investigation [PW:08DHMD]

2.1: Data 1

The DHZ has become unstable since the inauguration of Chairman Jie. This article may never get published, but I will write it anyway. News media around the country received word that USN's special forces are in the DHZ. The DHZ government denies the report, claiming they are Hua Lian guerillas. However, there is no mistaking that they are from the USN. It might be linked to the FAI's recent activities. Why is the government covering up the USN infiltration. What is USN doing in the DHZ?

My investigation has just begun.

-DHD reporter, Yang Xiangpo

2.2: Data 2

USN forces have entered Taipei. This is a fact. Many people in Taipei witnessed the USN wanzers. The government claims the wanzers belong to the rebels, but there are eyewitnesses reports of a caucasian pilot ejecting from a wanzers. The USN forces went through the Futai Tunnel, presumably to infiltrate mainland DHZ. They might contact the Hua Lian, so I'm contacting a reporter with the rebel contacts.

-DHD reporter, Yang Xiangpo

2.3: Data 3

Spoke with Reporter X, who has connections inside the Hua Lian, in Hanzhou. The USN squad is now working with the rebels. He also told me that the late Vice-Chairman Ming Huang Jiu's son is alive, and he is now a rallying figure for the rebels. My guess is that the USN (or the FAI special forces) plan to defeat Chairman Jie's regime by working with the rebels. It's very possible, since Jie is trying to cut economic ties with the USN.

-DHD reporter, Yang Xiangpo

2.4: Data 4

Rebel activity has suddenly stopped. The location of the USN squad is also unknown. The government claims to have defeated the rebels, but it's hard to believe. Even the Rapid Reaction Force couldn't defeat the rebels. I'm guessing the USN squad already left the DHZ. The USN squad's mission remains unknown, but one thing I know for sure, is that they were not here to defeat Jie's regime. It was just wishful thinking.

-DHD reporter, Yang Xiangpo

2.5: Data 5

Met with Reporter X in Shanghai. He'll publish a book in Japan on the Hua Lian's activities. I asked him why the USN forces came to the DHZ, but

there was no answer. My investigation was a waste of time. Reporter X gave me a paper napkin with the letters "MIDAS" written on it. I asked him what it meant. He said that the USN soldiers said that word numerous times while working with the rebels. Even the rebels didn't know what it meant. I'm preparing to leave the DHZ. I might be able to enter USN through the EC. I don't know what I'll find, but this word might lead to something. Then I may write another article that won't get published.
-DHD reporter, Yang Xiangpo

[dc2] Shanghai Steel (SSCO/CORPORATION/DAHANZHONG)

CORPORATE

Shanghai Steel Co. works to create weapons with the latest technology for the prosperity and everlasting peace of the DHZ. 90% of weapons and vehicles used by the army and the navy are products of our own design. Our company's mission is to create a secure future for the DHZ, with advancement of technology no other country can match.

2: Topics (SSCTOPIC/CORPORATION/DAHANZHONG)

2.1: Use of simulators

The kindergarten division of the army's special ability development center will teach wanzers piloting, starting this year. Wanzers training traditionally begins in the elementary division, but the military is starting training early to raise pilots with superior piloting skills. Our simulators will be used to train the kindergarteners. Training on real wanzers will begin in the elementary division. We are now taking orders for wanzers training software (with controller) for home use. Known for developing higher athletic and intellectual skills, we are offering this low price now is a bargain. This product will be on sale for a limited time only. Please reserve your copy now.

2.2: Submarines and New Wanzers

Development of underwater wanzers and wanzers carrier submarines is under consideration. We proposed the wanzers carrier submarine as a means of transporting wanzers to avoid radar detection. This will give the navy a mobility that rivals that of the army. We are also planning to develop wanzers that can be used underwater. Currently, there are no wanzers designed for use underwater. We are taking on this challenging project to give a superior technological advantage to our DHZ military.

[dc3] Tiewudi Heavy Industries (TWHI/CORPORATION/DAHANZHONG)

CORPORATE

This is the Tiewudi web site. We develop and produce military and civilian vehicles. We recently began developing missile launchers, which received rave reviews from the military. We are now designing wanzers. We hope that our web site will demonstrate the value of our company.

2: Topics (TWHITOPICS/CORPORATION/DAHANZHONG)

2.1: New Military Vehicle "Zhoulong"

"Zhoulong" is our new military vehicle specially designed for reconnaissance. Zhoulong, based on the previous "Huoniao" model with reduced engine noise, is equipped with improved stealth armor. The vehicle can be equipped with a small turret and machine gun. Optics include low-light and cameras, along with a complete navigational system. The new engine is rated at 792 HP and can be easily removed for maintenance. This engine will also be used in commercial applications in the future.

2.2: Mineral Vein Found in Qinghai

Our power shovel working on the Shanghai-Qinghai transcontinental road struck a new mineral vein. The government is now investigating the size of this high-quality iron ore vein. Depending on the size of the vein, an industrial complex may be built in Qinghai to cut transportation costs of the mined iron ore. We are happy to have taken part in the birth of a new industrial city.

2.3: Special Vehicle for the Handicapped

With the help of a government grant, we are developing a special vehicle for the handicapped. The car will be provided for handicapped veterans with excellent service records. All acceleration, breaking, and steering of the car can be controlled with one upper or lower limb. Speed is monitored by a computer. It automatically responds to traffic lights and uses voice recognition system for headlights, windshield wipers, and climate control. Safety is its primary feature. The seat slides to the side for easy wheel chair access.

[dol] Hua Lian Rebels (HLR/OTHER/DAHANZHONG)

HUA LIAN REBELS/MISSION STATEMENT

The Hua Lian Rebels work to carry on the late Vice-Chairman Ming Huang Jiu's legacy of democracy. We are not advocates of anarchy. We are working for the prosperous future of our glorious country. Our web site may shut down periodically to evade illegal probes by the DHZ government.

INTERNAL [PW:INKAREN]

1: Recent Activities

1.1: Commander Huang will temporarily accept the offer of help from the FAI agent for the Sanya Base operation. While Commander Huang trusts Dennis Vicarth, no details are known about the others. We will make a decision on their reliability after the operation.

1.2: Victory Report

A collection of victory reports from our branches across the country. Guilin Commander Yue defeated enemies in Longsheng. Commander Chong of Xiamen also defeated enemies who were in pursuit of an escapee. Commander Huang and Kwang succeeded in the taking of the enemy mobile fortress with the help of Vicarth's mercenaries.

INFORMATION

1: Hua Lian Members

1.1: [NAME:HUANG]

Huang Mo Shun

Our commander was the former Chairman Bai's right hand man. He served in the Changli Army before joining Mr. Bai to become a politician. He carries on the legacy of the late Chairman Bai's democracy and leads our

young soldiers to freedom.

1.2: [NAME:LUO]

Luo Chen

Commander Huang's right hand woman. Joined the Hua Lian Rebels while studying at Beijing University. She handles all intelligence work for the Hua Lian.

1.3: [NAME:CHANG]

Chang Yong Nia

Branch supervisor Chang manages the Hua Lian branches spread across the country. He is also commander of the Fuzhou branch.

1.4: [NAME:YUE]

Yue Yu Jiang

The commander of the Guilin branch. He is a legendary martial arts expert. Even wanzers are no match for his martial arts skills. He is also an expert at combining modern combat strategy with the ancient art of war.

1.6: [NAME:ZHUWEN]

So Young Zhuwen

Commander of the Hua Lian 1st Army. He worked to save civilian lives as a former Changli Army division commander. Joined Hua Lian after being forced to participate in numerous operations that suppress civilians.

2: Hua Lian Forces [PW:SMAP]

We now have supplies and are ready to head up north. We'll first take Wuhan, then move on to Shanghai, and finally, Beijing! It's going to be a long journey, but it will end in our victory!

3: Sponsors [PW:PATRON]

I salute the courageous soldiers of Hua Lian from Hong Kong. My name is Zhui Ma. We in the Huanan-Taiwan Economic Block pledge our undying support to you all. We pray for you successful invasion of Shanghai and bring light to the future of the DHZ.

Request approved. Preparing 2 companies to assist. Apprehend/eliminate scientist.

3: USN SPECIAL FORCES

From: Department of Defense

To: USN Navy Special Forces Commander

Orders: Weapon retrieval team in DHZ plans to sell that weapon technology to DHZ government. Eliminate retrieval team. Team is currently

advancing on Shanghai with Hua Lian. Land at Shanghai by submarine.
Situation is vital to national security. Good luck.

[ug2] Federal Agency of Intelligence (FAI/GOVERNMENT/USN)

MISSION

FAI (Federal Agency of Intelligence) is the USN domestic agency responsible for investigating crimes and solving problems. The FAI also sends to protect overseas interests and prosecute international criminals. We at FAI work day and night to protect the citizens of this nation.

INTERNAL

1: [PW:IAF001]

1.1: MIDAS

Matter Irradiating Dissociative Acceleration System. A device using auric radiation to create energy. Able to separate the positrons, neutrons, and electrons in auric radiation to extract energy. Auric radiation has vast kinetic energy and breaks the molecular bonds of anything in its path. On contact with water molecules in the air, auric radiation turns into a stable element, loses all energy, and poses no threat to organisms or the environment.

1.2: MIDAS AS A WEAPON

MIDAS has potential as a new energy source. The military potential is outlined below.

1. Energy Capacity: Current models are less effective than nuclear weapons, but more effective models can be made.
2. Reduced Costs: The weapons output is adjustable. Separate tactical and strategic weapons are not needed, resulting in lower costs.
3. Deterrence Factor: The auric radiation used in MIDAS is stable once it fuses with water; therefore it does not cause contamination.

Nuclear weapons only have deterrent value, but MIDAS can be used as a conventional weapon with the power of a nuclear weapon. Currently, auric radiation is not stable, but Emir Klamsky's research team is researching this.

1.3: THE ORIGIN OF MIDAS

Head of MIDAS research is Emir Klamsky, with labs in Alaska, Vermont, and California. So far, her team is the only one to successfully contain auric radiation. USN Radiation Lab web site: SRLUSN/GOVERNMENT/USN

1.4: IMAGINARY NUMBERS

While investigating Imaginary Number (IN) reports from other intelligence sources, it was discovered that IN is the Ravnui National Research Lab codename for a special human. However, due to the number of references to IN, it is assumed to be an organization or team of agents. The web address for the Ravnui National Research Labs is available, but has not been accessed: RNL/GOVERNMENT/RAVNUI

1: INTERNAL E-MAIL DATABASE

1.1: WILLIAM BERGHOLZ - EMIR KLAMSKY

Date: Oct. 28, 2111 20:45

From: Wil Bergholz

To: Emir Klamsky

Good evening, Emma. I am experimenting with the auric radiation data you sent, but am having trouble reproducing your results. Any suggestions?

(Re)From: Emir Klamsky

(Re)To: Wil Bergholz

Hello, Wil. The auric accelerator needs a machine calibrated to 1/30,000,000. We succeeded only after 322 tries. Japan has something that achieves such precision, but it'd be tough to import... We must work with what we have. Try Psynamic at: PSYNAMIC/CORPORATION/USN

1.2: KEN MCCARTNEY - EMIR KLAMSKY

Date: Dec. 24, 2111 03:31

From: Ken McCartney

To: Emir Klamsky

Merry Christmas, Emma! You have a name for it!? "MIDAS"--it sounds good. We're working here not to fall behind and finish MIDAS!

(Re)From: Emir Klamsky

(Re)To: Ken McCartney

Thanks, Ken. The Sec. of Defense picked the name. I don't like it that much. And MIDAS is now under military management. I don't think they plan to build a power station with it, either. Well, it's their money... We have to stabilize MIDAS control within a year. I guess power stations will have to wait.

P.S. Merry Christmas, Ken.

1.3: WILL & KEN - EMIR KLAMSKY

Date: ...unreadable...

From: Emir Klamsky

To: Wil Bergholz, Ken McCartney

Wil, Ken, as you know, MIDAS has been stolen by Japan. I'm going with the FAI retrieval team, so I'll be gone for a while. Before the military orders further research be stopped, hide the key data. Thanks.

(Re)From: Wil Bergholz

(Re)To: Emir Klamsky

Understood, Emma. A spender friend of mine has the data. He can be trusted. When you need it, use the usual code. When you download it, all the data on his server will be erased. His web address is:

INTSTU/OTHER/USN

Good luck.

(Re)From: Ken McCartney

(Re)To: Emir Klamsky

Don't worry, Emma. We're not getting anywhere with MIDAS. You're the only one who truly understands; it'd take us 100 years to figure it out. So you need to come back safe, Emma.

2: RESEARCHER BACKGROUND DATABASE

2.1: [NAME:KEN]

Ken McCartney

2075: born Phoenix, AZ

Graduated O'Neil University.

2090: changed family name from Beecham to McCartney. Retired from Diable Avionics to found company.

2108: company bankrupt.

2109: recruited as head of California Radiation Lab.

2.2: [NAME:WIL]

Wil Bergholz

2056: born EC England

Graduated Wallenstein University.

2082: moved to USN to teach.

2091: awarded special prize for work on anti-viral infection.

2109: promoted to head of Vermont Radiation Lab.

2.3: [NAME:EMIR]

Emir Klamsky

2090: born Ravnui

At 12, defected to the USN. Physics PhD at 15, employed by South Dakota lab.

2109: promoted to director of Alaska lab.

[rg1] Ravnui National Lab (RNL/GOVERNMENT/RAVNUI)

OUTLINE

Ravnui National Science Laboratories was established in 2030 to further the study of all sciences. There are currently 35 specialized branch laboratories in 11 cities, all working to improve the quality of life for Ravnuians.

LOCATIONS

Major Laboratories
General Medical: Minsk, Yamalka, Dabrov
Engineering: Gomery, Sabrav, Bykinoska, Brest Triev.
Political Science: Bobruisk
Energy/Radiation: Orsha
Financial: Gomery

RESTRICTED ACCESS [PW:RAT2C]

1: INFORMATION ON MIDAS

The explosion that occurred in the Philippines several days ago was probably caused by a radiation weapon developed by the USN. The theory behind MIDAS was developed in our Orsha lab by the Roland/Hanna Klamsky research team. Bal insists that Klamsky's daughters have no connection with MIDAS, but we shall conduct an independent investigation.

2: WHEREABOUTS OF IMAGINARY NUMBERS

Bal, the organizer of the Imaginary Numbers, has also reported that all the adult IN members are either dead or missing. We are currently trailing some IN escapees. However, the number of escapees is far lower than reported by Bal. He may have altered information. While the background of Bal's associates is clean, it is possible that they have fake identities.

3: BAL GORBOVSKY DECEASED

Bal, the Ravnui ambassador to the DHZ, is dead. The cause of death is unclear, but it's most likely related to MIDAS. The Imaginary Numbers and Real Numbers close to Bal are missing. We are trying to located them.

4: IMAGINARY NUMBERS [PW:OVERRN]

4.1: CREATION

Imaginary Number Creation:

Created by inserting artificial DNA into human cells, then gestated in a surrogate mother. Before the IN program, subjects called Real Numbers were created through artificial insemination, but their abilities were not focused. In the IN program, complete control of abilities was achieved, making IN superior to RN subjects

4.2: EDUCATION

Imaginary Numbers Education:

Specimens require proper education to take full advantage of their abilities. The surrogate mother raises IN subjects for 10 years after their birth. Subjects are educated in the lab after 3 years of age. Once abilities develop fully, subjects are moved to the lab. This prevents ability deterioration from home education. Mature subjects are moved to learning institutions in their field of expertise. Once education is complete, they are assigned to government positions.

4.3: DEFECTES

Imaginary Numbers Defects:

IN program research has continued for 40 years. While theoretically perfect, there are flaws. About 40% of subjects have died from cancer or other genetic causes. Psychological problems were also common. Therefore, as of 21091, only 1 to 2 IN were produced per year, and all flawed subjects were eliminated.

4.4: THE KLAMSKY FAMILY [PW:KLAMSKY]

4.4.1: HANNA KLAMSKY

Hanna Klamsky: Physicist.

Born: Minsk, 2061. Maiden name: Kruschev.

Specialty: atomic physics, assigned to Yamalka lab.

2085: transferred to Orsha lab to study radiation.

2087: married Roland Klamsky

2090: daughter Emir born.

2093: daughter Aliciana born.

2102: died in auto accident in suburbs of Brest. Husband and two daughters died in the same accident.

4.4.2: ROLAND KLAMSKY

Roland Klamsky: physicist

Born: Baranovich, 2058.

Specialty: atomic physics, assigned to Orsha lab.

2087: married Hanna Kruschev. Appointed head of Orsha lab.

2093: won Ravnui Award for energy theory.

2102: died in auto accident in suburbs of Brest. Wife and two daughters died in same accident.

#[9] European Community #

[ec1] Schnecker (SCHNECKER/CORPORATION/EC)

HISTORY OF THE WANZER (SCHNECKERWZR/CORPORATION/EC)

1: History of the Wanzer--Birth

In 2020, Dr. Randolf of Wallenstein University, with help from Schnecker researchers, presented a new theory in artificial joints. The USN was the first to show interest in this new mechanism. The prototype WAW (wanderung wagen) was built jointly by Schnecker and Diable. WAW began service in the USN military. To reduce initial development costs, MULS (multi-unit link

system) specifications were created. The MULS-P specification resulted in a machine known as WZR (wanzer, and abbreviation of "wanderung panzer").

2: History of the Wanzer--Growth

After the USN's large WZR orders, the EC and OCU also adopted the WZR in 2040. WZR development became widespread, and, with over 15,000 in service, the WZR became the main weapon of the world's armies. The WZR proved its worth in the 2 Huffman Wars. The USN and OCU were the first to use WZRs against each other in combat, changing ground warfare dramatically. With the end of the Huffman Wars, the use of wanzers increased dramatically.

3: Maturity

In the 90 years since the first WZR, continual improvement has brought the machine to near-perfection. But development will not stop here. Schnecker will continue research to develop WZRs to meet the defense needs of the world.

PRODUCTS (SCHNECKERPRO/CORPORATION/EC)

- Vinedrai
- Grezex
- Lanze
- Streich (JDF: Mk5 AFV)

[ec2] Sender (SENDER/CORPORATION/EC)

TOPICS

1: Established with the German Schnecker Co.:

Sender has worked alongside Schnecker as a munitions manufacturer.

Main concerns:

1. Export outside of the EC
2. Cooperative development of large mobile vehicles.
3. Next generation wanzer development.

Sender is now working to improve the troubled EC market.

Schnecker's web address:

SCHNECKER/CORPORATION/EC

2: Satellite shot of Philippines explosion:

The instant of the explosion at Batangas Harbor, taken by an OCU weather satellite. This satellite was developed jointly with OCU Australia's Fran Corp. and has a high resolution capability.

OUR BUSINESS

In 2012, Sender began making aircraft parts. This was followed by engines, missiles, and, in 2035, complete aircraft. In 2050, we began wanzer development. We also specialize in large wanzers used primarily by the USN. In recent years, we have expanded to ambitious satellites and rockets, as well as precision instruments. We're doing our best to bring you the best.

PRODUCT INFORMATION (SENDERPRODUCT/CORPORATION/EC)

Guard Duty: Bodyguard/Escort
From 10K US\$
(Price depends on requestee)

Escort Goods

From 10 million US\$
(Price depends on cargo)

1.3: Other

Goods Disposal- From 10K US\$
Training (1 week)- From 30K US\$
Test Pilot- From 20K US\$
Inquire for information regarding jobs not listed above.

2: Staff

2.1: Rudolf Kaiser

The Wulong mercenaries' commanding officer.
Since founding the Wulong 11 years ago, from blazing deserts, to frigid polar areas, and steaming jungles...on battlefields all over the world, he has led the Wulong to victory. His elite platoon rivals a company of normal soldiers. He is also skilled at all forms of combat.
Retired EC major.

2.2: Rebecca Sydney

The Wulong's S1 (executive officer) and S2 (strategist).
She has no formal military training but her natural talent for combat lets her know the enemy's every move. A skilled sniper and wanzler pilot, Rebecca is also behind lines operative.

2.3: Hatari Khartoum

Started the Wulong with Rudolf in Africa. He has worked to make Wulong an elite force. Currently S3 (intelligence), his careful planning is responsible for the Wulong's success. His calm exterior hides many years of battle experience and weapon knowledge. Retired EC intelligence officer.

2.4: Greg Herigle

Frontline NCOs from the backbone of any army, and Greg is no exception. Strong as an ox, Greg has the ability to cut through fear and confusion, allowing him to support the Wulong's abilities to the fullest. His body size gives him immense power in close combat he was named Black Wind in Africa. Retired USN sergeant.

2.5: Emilio Gusly

Rumored to be a consummate wanzler pilot, above all others in the OCU. his combat skill is an art, at times as beautiful as a rose, sharp as a

knife, thoroughly decimating the enemy. His very name strikes fear in all enemies. Retired EC corporal.

RESULTS

2101-Operation Sledgehammer
(Guinea) Advance landing
2101-Radwick
(Central Africa) Anti-guerilla
2102-Operation Hazenyakt
(Alordesh) Clean up operation
2102-Operation Jerico
(Alordesh) Support duty
2102
(Alordesh) Combat training
2106-El Algeria invasion
(Libya) Paradrop
2108-Operation Bangrations
(Georgia) Combat duty
2109
(Schnecker Co.) Testing
2110
(DHZ) Combat training.

EQUIPMENT (CPARMS/CORPORATION/EC)

FAQ

1: FAQ 1

<Greetings: Rudolf Kaiser>

This is a test, but I welcome you all to our web site. Use the bulletin board for any questions or requests, and I, Rudolf will try to answer them. Our web site, including the bulletin, is protected by a military-grade firewall and IP tracking device. Any attempt to hack into our site will face severe punishment.

2: FAQ 2

<Apology: Hatari Khartoum>

I apologize for Rudolf Kaiser's threatening remarks in the earlier message. The firewall is for our protection only, and we will not track the IP of our bulletin visitors. This bulletin is free of charge. Please feel free to ask away.

<Apology: Rudolf Kaiser>

My earlier remark lacked sensitivity. Please accept my apology.

3: FAQ 3

<Question: Emilio>

Does Hatari take his turban off when he sleeps or showers?

<Reply: Rebecca Sydney>

Response deleted due to improper content.

4: FAQ 4

<Question: Anonymous>

Once taking an infiltration job, will you accept counter-offers from the side being infiltrated? I need to know for sure, or I can't hire you.

<Reply: Greg>

Our reputation is built on trust. We only take one side, so don't worry.

<Addendum: Rebecca>

That depends on the mission.

5: FAQ 5

<Question: Barden Barilar>

Our corporation lacks test pilots. Is your rate only for the pilot?

<Reply: Rebecca Sydney>

The rate on our web site includes the pilot, and a part of the transport cost. The price for the pilot only is 20% less. However, transport to Indonesia and living expenses are separate.

#ALISA TEXT DATA #
#####

1: Report: SEROV

Name: Serov Warren

[Code:TCX021]

Escaped Orsha Lab April, 2111. Now under care of the OCU. Currently working as an OCU weapons development engineer. Beginning to show erratic and unstable psychological behavior. Receiving medical treatment. The OCU sees Serov as just another engineer. He poses no threat to us, eliminating the need to assassinate him.

Addendum:

Information on the wanzers Serov is testing.
A prototype with the booster power of 2 wanzers and the fire power of 4, Equipped with cannons on both arms and a grenade launcher. At this point, too many problems to mass-produce.

2: Report: IVAN

Name: Ivan Larzalev

[Code:TAX05]

Escaped Shanghai lab Sept. 2112. Under care of the DHZ's Hua Lian Rebels. This information is being confirmed. An Imaginary Number of very high quality. Escaped with classified information. Assassination recommended.

Addendum:

The Hua Lian Rebels web site's internal password: "INKAREN"

Troop deployment: "SMAP"

3: Report: ANTHONY

Name: Anthony Barkins

Nickname: Norman Bates

[Code:TVX032]

Missing since March, 2111 investigation in the USN. Later arrested in Virginia as serial killer "Norman Bates." In the custody of the FBI. The FBI announced that Anthony Barkins is involved in 17 cases (23 victims total) and 25 other suspected cases. According to inside information, he is in a state of complete dementia, making it impossible to collect any statements. All information regarding the mission was collected prior to

his arrest. There is no need to eliminate him.

Addendum:

The new password to the DHZ intelligence web site: "FIINO"

4: TRIAL Report

Does anyone remember the legendary web tracing program "Scanner" from 2099? A program that tracks the target user and records all activities of the target on the net. I succeeded in acquiring this program. It's hidden in Twin Tiger's new OS. It's not a complete Scanner program. It only uses a part of Scanner technology. I took the fragment of Scanner from the new OS and rebuilt a complete Scanner program out of it. It was not an easy task. I used my new Scanner on the OCU Intelligence web site. It returned within 5 minutes with passwords for the search menu and JDF Intelligence.

Search Menu: "G3F9A"

JDF Intelligence: "J1D2F3"

They were both correct. Scanner will open up the entire world for spenders.

5: CIU Command File

Here is the password to the JDF Intelligence web site.

Password: "D07"

Once inside, punch in "MM" to see the MIDAS retrieval operation.

2: P.S.I.A Report

Armored Kinkakuji

Special Edition

Here are some hints on unlocking passwords to may web sites.

Certain web sites require password to access information you want to see.

A key to figuring out the password is to find a rule the web site uses.

The Department of Public Safety replaces letters with numbers in their

file password. "P=9 H=8 O=0 S=2" The 4 letters are replaced by numbers.

Internal information password replaces JAPAN's P with 9, making it

JA9AN." Other pages follow the same rule. The encryption used is different

with each web site, and not all sites use this method. Personnel data might

use that person's name as its password. It's like a game. Enjoy the

challenge.

1: Spender Diary

Being a spender is a lonely job. I roam the net, I collect data, and I sell it. I talk to people with no names, and they don't know me. Spenders are famous for placing their trust in money. Maybe it's because we're trying to find some certainty in an uncertain world. My client this time is the military. The cash is good, but it's doubtful that they'll pay up. My job is to hack into the Ravnui Embassy web site to find certain information. The web site looks like a travel guide, but I find a restricted access page. I use my own password deciphering tool to find the password "REBSY." I enter, but I can't find the file I'm looking for. Was it deleted? I get nervous. If I take too long, someone will notice. I take a guess and enter a file name: "PLANM." It's correct. It must be my lucky day. I download it and exit the site. The job is done. I look at the data I fliched. It's quite interesting. It connects all the events around the world. I can use this knowledge to make more money. According to the file, "it" was developed in the USN Radiation Research Lab. I jump to the USN web site and punch in "SURSLN." I found an interesting bit of info in the lab personnel page. There is a woman named Emir Klamsky who is originally from Ravnui. A beautiful woman.
