About the Author

~~~~~

Hi, everyone. I'm Hafiz Rahman and this is my first FAQ for public. I know, I haven't any experience at all, but I'll try my best to make a good guide. Harvest Moon: Back to Nature is an interesting game, and that's the reason why I write this FAQ.

Warning, you might find that this FAQ contain lots of ^\_^ icons. I think this is my life-time habit to joke around, so I'm sorry if you think that they're annoying you. However, if you really enjoy it, well, I don't know.

It is a little bit tiring when I work on this FAQ, but (believe me) it is very fun to do. Anyway, if you have any question, correction, comments and addition, or if you need any info about this guide, you can email me at <kuadrantiga@yahoo.com>. Give it a clear subject too, so I'll give it a higher priority to reply it first.

I think it is very important for you to know that the only mail I'll accept is positive mails. I will clearly delete any bad messages, and surely you know what I mean.

And if some question bothering you and you need instant help, I suggest you to go to HM:BTN Message Board in www.GameFAQs.com. Well, you have to register first if you want to join the board, but it's not that hard anyway. Lots of people will help you there, and sometimes I went there too.

I'm not that good in English, sorry, hence you will get lots of mistakes here and there. Please give me any correction if you find any of it.

Phew, that's all. Oh, almost forgot, Indonesian can use Indonesian language to mail me (as I will understand it better) but please use any good words too. I will check my mailbox at weekend, then please be patient if you send me before that days, OK?

Thank you so much for reading this stupid section ^\_^

Coming soon! Mail me if something about crops bothering you! I'll answer it by email and also add it here.  
But..., if you didn't receive my email for a long time, I suggest you to ask people in HM: BTN message board in www.GameFAQs.com. I'm sure that they'll help you instantly, and I'm probably there too at the time.

[] -Tips- []  
[][][][][][][][][][][][][][]

Here are some important things that may be useful before you start planting the crops in your farm.

=====

| When I said "square", it refers to one block of field with seed

NOTE | on it, and the plant isn't appeared yet. It'll look like this in  
| your field -> [::].

1. Each bag of seeds will be plant as 3 x 3 square on your field. You must plow your field first before you scatter your seeds. If you scatter it on unplowed land or outside the field, you'll lose it forever. Be careful when you equip the seeds.

2. If you plow your field like this :

A. Full Square Type

[][][] then you can make bigger profits. But the problem is that you  
[][][] can't water the center crop when the plant appears. You must  
[][][] upgrade your water can to silver or better to be able to water  
the center crop.

Solution =====

1. Pray for lots of rain, since the rain will water your entire field.
2. Ask the Harvest Sprites to help you water your field. But sometimes they didn't water it for some unknown reason too. So it's based on how much are their heart, things they like to do and also, your luck ^\_^
3. If the crops can't re-grow, wait until you harvest the outer crops and then you can reach and water the center crop. The downside is that it takes more time and space.
4. If the crops can re-grow, wait until day 30 of each season and after you harvest all of the outer crops, use your sickle to remove them and you can take the center crops if it has grown fully. If it's not, just use your sickle again ^\_^

B. Fat-C Type

[][][] [][][] [][][] [] [] then you can water every crops.  
[][] or [][][] or [][] or [][][] The problem is that you will  
[][][] [] [] [][][] [][][] get lower profits since you  
only plant 8 crops. Weeds can grow on the empty space, but you can get  
rid of it with your sickle or just pull it out bare-handed.

Solution =====

1. If you want more profits, you can go foraging or mining.
2. Use your sickle to get rid of the weeds or just pull it out and throw it anywhere else.

C. Square Donut Type ^\_^

[][][] You can jump to the center and water the entire crops. The  
[] [] problem is that you will get lower profits since you only  
[][][] plant 8 crops. 2nd problem, weeds can grow in the center field  
that makes you unable to enter the center anymore.

Solution =====

1. If you want more profits, you can go foraging or mining.
2. There's nothing you can do about the weeds.

So, every type has its own advantage and disadvantage. But I recommend  
the Full Square or Fat-C Type. Choose the type wisely, or maybe you  
can try to make your own pattern. Have fun ^\_^!

3. Water your crop everyday to make it grow and re-grow on time. If it's  
festival time and it starts at 10 AM, don't worry about it and water  
everything first. You can even came to the festival at 5.50 PM and  
you'll came back after the festival at 6.00 PM. Weird, isn't it?  
The exception is for the Music Festival (3rd of Fall) because you must  
came right on time. It doesn't really matter anyway, since the

festival starts at 6.00 PM.

4. Watch the Weather Forecast everyday. If tomorrow will be a rainy day, then you'll free from tomorrow's watering duty. If it's gonna be a typhoon, quickly go to the harvest sprites house and ask them to water your farm tomorrow. It's better if you ask them to work for 3 days, since typhoon can last longer than a day.
5. Doing anything with tools (like watering or plowing) will decrease your stamina, and you must know when is the time to get some rest. If your character is fall down sitting on the ground, stop your work and take a rest in the hot spring for about one hour. You may get collapsed if you keep on working and you'll lose a day for having a rest in the clinic.
6. Harvesting wouldn't make you tired at all, because you're using no tools when you do it. So it is better for you to work with tools in the morning, take an hour rest in hot spring and then go harvest your crops. If you do so, you wouldn't get overslept at all even if you sleep at 5.50 AM.
7. It's better if you save your game everyday. But if you don't want to save one day, nothing can stop you. You can work until 5.00 AM and then jump into the hot spring and stay there. After the time reaches 6.00 AM you'll see that the screen went black and you're awoken at the same time in your house! Something has transferred you into your house ^\_^! And please notice that you didn't lose a day when you're doing this.

That's all for the tips. If any of you would like to send another tips, I will be honored to add it. Thank you ^\_^

[]      -Regular Crops-      []
[][][][][][][][][][][][][][][]
```

Because this is a farming game, crops are something that should be here. I haven't played the other version of Harvest Moon, but I know that this version has more crops than the SNES, Game Boy or N64 version. BTW, I don't know about the crops in Harvest Moon for Girls, because it isn't sold here yet.

The crops are different for each season, except if you have a hothouse. You can plant anything you want at any time there, but you'll see that the hothouse isn't that good for your wealth.

```
-----
```

Extension Name	Hothouse
Needs	580 lumbers
Cost	30000 G
Requirements	Must build chicken coop, 1st, 2nd house and barn   extension first. And they're all expensive...
Advantage	1. Can grow any crops in any season including winter.   2. Building it will add more percentage in your farm   rate   3. No weeds will grow here.   4. Orangecups can only be plant here.
Disadvantage	1. It is very expensive.

- | 2. Typhoon or snowstorm can destroy it, but there are  
| some chances for the hothouse to stand it.
- | - Typhoon happened randomly in summer and fall.
- | - Snowstorm happened randomly in winter.
- | 3. It is very narrow, only 7 x 7 fields.
- | 4. The orangecups isn't worth that much. It gives you  
| orange fruits, but the price is too low and gives  
| you a mere profit. It only worth for gifts.
- | 5. The plants here cannot be watered by rain...

See? It has more disadvantages than the advantages. Now it depends on you to think. It doesn't really matter anyway if you really want to build it. There's nothing can stop you ^\_^

Now, back to the crops. There are also flower seeds here too, so you might consider planting it. You can't sell it, but it will be a good gift for the girls or the other villagers. The flower seeds are different for each season too, and orangecup flower seeds can only grow in the hothouse (as if I didn't mentioned it before ^\_^).

The crops sold in two places, they are:

1. Supermarket.

Opens from 9 AM to 5 PM. Closed on Tuesday, Sunday and any festival days. Didn't sell flower seeds.

2. Won the Chinese merchant.

After his first appearing in your farm, you can meet him in the inn everyday except for any festival days. He'll be there from 1 PM to 3 PM. You can buy flower seeds from him.

=====

TIPS | You must water the crop everyday, to grow and re-grow it on time.

1. [Event]

1. Bring 3 cucumbers to Mother's Hill Lake at about 12 AM to 2 PM during spring, summer or fall. Throw them into the lake right in front of two trees in the left side. Kappa will appear if you throw it in the right spot. If it appears, throw another 2 cucumbers and it will give you a special berry that doubles your stamina. If it isn't appear, try another spot and you'll find it eventually.

[Note] 1. It is better if you save your game before you do this, so you wouldn't waste lots of cucumbers just to find the right spot.

2. The amount of cucumbers to throw aren't accumulate for the next time. If Kappa appears, and then you leave the lake, you must repeat it all over again and throw another 3 cucumbers to get the berry.

2. Mayor Thomas asked for 3 cucumbers to be delivered to his house in spring 21 in 3rd year. Bring it there after 4 PM.

CORNS \=====

Season (excluding Hothouse)		Summer
Price [where to buy]		300 G [Supermarket]
Growth time		15 days
Re-growth / time		YES / 3 days
Sold per Piece		100 G
Profit per Pack of 8 crops		4500 G (if planted in 1st day of summer)
Profit per Pack of 9 crops		5400 G (if planted in 1st day of summer)
Other Use		

1. [Event]

1. In your first corn harvesting time of every year, Kai will come and ask you for a corn. Pick it up and bring it to him, he will ask you the price. It can be 50, 100 or 200 G and you should decide it. The lower price you give, you'll build a better relationship with him (I think).

2. Mayor Thomas asked for 3 corns to be delivered to his house in spring 21 in 2nd year. Bring it there after 4 PM.

[Note] 1. you didn't get paid for doing this...

2. Mayor's house is still closed before 4 PM.

3. Keep all of the corns inside your rucksack (you'll need medium rucksack at least to do this) and then talk to Thomas. If you talk with him and you're holding the crop, it'll be considered as a gift.

4. I'm not sure whether you can bring 2 corns and then go back for the other corn (in case you only have a small rucksack). Someone please help me confirming this...

5. I think Mayor just asking too much here. Look, corn can only be planted in summer, but he asked for it in spring! If you really want to build a better relationship with him, there are 2 ways to do that :

A) Have your 1st house extension in your 1st year summer, so you can save three corns for the next year.

B) Buy a medium or large rucksack and save your corns there (for about three months ^\_^). Make sure you didn't dump them into the shipping bin one day.

That's often happened to me. I want to save something in My rucksack, but suddenly I'm facing the shipping bin, take out the thing and accidentally dump it. Just be a little more careful than I am... ^\_^

Okay, the A) choice sounds realistic, but it takes lots of G. The B) choice sounds funny but this is somewhat cheaper. You can choose one of them wisely, but don't choose both.

2. [Recipe]

For Main Ingredient | Popcorn

For Variation Ingredient | N/A

3. [Present]

4. [Special]

You can throw your corn into the mill near the chicken coop. 1 corn will turns into 10 chicken feed.

1. After it color turns dark, you can start "harvest" them. No, you don't pick them just like any other crops. Use your sickle, and no, you're not destroying them. That's just the way it is. However, a square of grass turns automatically into a fodder.

2. The other use is to let your cow or sheep eat them. Just let your livestock out and make sure they're standing on the dark-colored grass. They'll start eating on their own and you don't have to put fodder in the barn. Make a double fence with lumber to keep them in their place and protect them from stray dogs. Well, if the weather is bad, you must keep them safe in their barn or they'll

lose some hearts.

=====
NOTE1 | You don't have to water them, grass grows on their own.

A. What is a Secret Crop?
=====

Now this is interesting. Look at your status screen and press right or left button until you find a screen with lots of crops pictures and some number beside it. I think most of you are already know that the number shows the amount of the crops you've ship. But you see, three of them have zero number beside it and you can't find it anywhere.

Yeah, you're right. That's the secret crops we're talking about. By looking at the picture, you can see that they're strawberries, pumpkins and spinach.

There is also a secret flower seed, called Moon Drop flower. Haha, I know, you can find this flower at certain places during spring, but can you plant this flower at your very first time? Nope.

Now, how do you get it? Read on!

=====
B. How Can I Get It?
=====

~~~~~
Strawberry | You must have ship 100 turnips, 100 cucumbers, 100 potatoes

and 100 cabbages.

Pumpkin | You must have ship 100 corns, 100 onion, 100 tomatoes and 100 pineapples.

Spinach | You must have ship 100 sweet potatoes, 100 carrots, 100 eggplants and 100 green peppers.

Moon Drop Flower | You must have a good relationship with Karen. I think she must have at least purple heart on you. One day (it is random), she will appear in front of your door and give you a pack of flower seed. Yes, you're right. It's the Moon Drop Flower seed. Plant it and Won will come and says that he sells the Moon Drop too now. You can buy it from him from now on.

=====  
 | Moon Drops blooms after 6 days. If Karen gives you the seed after  
 NOTE | 24th of the spring, don't plant it. Save it for your next year or  
 | use your hothouse if you have it. It's also applies if she gives  
 | you in the other season. Don't plant it or it'll be a waste.

=====  
D. How Fast Can I Get It?  
=====

1. Strawberry, pumpkin and spinach

Your 2nd year. That's the most realistic time.  
I'll try to help you to get it in your 2nd year. Actually, it's easy to ship 100+ crops that are sells at the Supermarket but the crops sold by Won takes pretty long time to grow and they're expensive too. So, it is hardly impossible to get it in your first year.

If any of you are able to get the secret crops in your 1st year, please mail me at [kuadrantiga@yahoo.com] and tell me everything you do to get it. It'll be a great help for me and that will make this guide better.  
You'll get credits for that, surely. Thank you.

2. Moon Drop flower

It depends, but if you manage to give Karen lots of wine, she may give You the seeds in your 1st year spring. But wines are quite expensive In your very first time, so 2nd year spring will be more realistic.

E. Getting Secret Crops Walkthrough+  
=====

OK, now is the time to get the secret crops. Yes, I know, you can do it by your own, with your very own plan. But all I want is to help you manage your farm. To save your money when you're trying to get it, to show you what to do step-by-step, day by day. To show you how many profit you'll get, and many other things. So you might consider it as a walkthrough to ease you getting those crops. I hope this can help you a lot.

BTW, this plan doesn't give you maximum profits and you might not be able to buy things you want. Refer to How-to-be-Rich section if you want maximum profits.

But, why did the title shows Walktrough+? It is because I add something more in it, which is a birthday and festival guide, so it can help you more to develop your relationship with others or to win the festival.

=====  
| This plan, however, is made for getting the secret crops only.  
WARNING | You must do everything mentioned here, and that might makes you  
| feel ruled. However, I've made the plan as good as possible ^\_^  
=====

=====  
| The plan works perfectly if you water the crops everyday,  
NOTE1 | harvest them right in the day when they are fully grows, and  
| ship them on time too.  
=====

=====  
NOTE2 | Use Fat-C pattern (8 crops per harvest).  
=====

=====  
NOTE3 | All of the money mentioned is only from your harvest. I mean,  
| I didn't add the money you can have from mining, foraging etc.  
| Why? Because all I want is to make things easier.  
=====

=====  
=====  
| Of course, you can go mining or foraging. That'll makes your  
NOTE4 | money higher than the money here. But please, don't buy  
| anything that I didn't told you to. It'll ruin the plan ^\_^  
=====

=====  
NOTE5 | Giving b-day present is just addition. Do if you'd like to do.

| 6 bags of Potatoes -> 6 x 150 G = [ 900 G]  
| Brush (from Saibara) -> = [ 500 G]  
| Total = [1880 G]  
Plant | All  
Harvest | 4 x 8 = 32 Turnips [T = 64, P = 0, C = 0]  
Money gained | 1920 G  
Final Money | 1920 - 1880 = [40 G]  
Last Words | At least it is more than before, right? Anyway, one more  
| daily job, brush your pony!

=====

Day 13 - Friday \=====
| Day 13 | Normal workdays. Give your girl some flower or any other free
| | stuff. Look at any other FAQ here to know lots of things about
| | the girls.

Day 14 - Saturday \=====

Festival | Thanksgiving Day

=====  
Day 22 - Sunday \=====

-----|-----  
Festival | Cooking Festival [Rose Square, 10 AM]  
Birthday | N/A  
Last words | Join it, take an egg and make a spa-boiled egg (throw it  
| to the unfenced corner of the hot spring and you'll get  
| the spa-boiled one). You won't win, though, just to make  
| the villagers to like you better.

-----|-----  
Money | 6400 G  
Buy | N/A  
Plant | N/A  
Harvest | 5 x 8 = 40 Cucumbers [T = 104, P = 72, C = 80]  
Money gained | 4000 G  
Final Money | 6400 + 4000 = [10400 G]  
Last Words | Feels better now?

=====  
Day 23 - Monday \=====

| Day 23 | Water your potatoes and cucumbers, feed your chicken, play  
| | with your dog and brush your horse. Then try to get some  
| | experience for your ax, make it until you can upgrade it to  
| | copper (100% experience). You need some lumber nowadays.

=====  
Day 24 - Tuesday \=====

-----|-----  
Festival | N/A  
Birthday | N/A  
Last words | No more festival this season.  
-----|-----  
Money | 10400 G

Day 8 - Tuesday until day 9 - Wednesday \=====
| Day 8 | Keep workin' workin' workin'! What?
|       | Take the honey (you can do it once a day) and give it to Louis.
|       | Why? Tomorrow you'll know.
| Day 9 | Okay, Louis will came today, saying that the bees are rare.
|       | He'll tell the buyer to increase its price. Now you can sell
|       | it higher than before. It was 50 G previously, and now... it's
|       | 60. Yeah, in Harvest Moon world, rare honey from rare bees is
|       | worth 10 G more than the ordinary one. Oh my...-_-

=====

| Last Words | Of course, your money isn't enough to buy them all. It's  
| better if you decide to buy:

-----

| 1 | Another sheep or cow

| | ~ It's easier than using a Miracle Potion, but the  
| | cow / sheep you buy will start with giving you  
| | small milks / wool first.

| | ~ The cow / sheep is already grown up.

-----

| 2 | C.M or S.M. Potion

| | ~ Depends on which livestock you've bought

| | ~ If you use it, you can't have their milk or wool  
| | until their offspring's birth. It's quite long too.

| | ~ But after the offspring grow, it will start giving  
| | you medium milk or wool.

-----

| Think About | 4 | Kitchen Utensils

| | ~ If you like cooking, then buy.

| | ~ If you'd like to buy, watch the TV Shopping on  
| | Saturday (the entire show) and go to Inn. Use the  
| | telephone there to order the utensil.

| | ~ Zack will deliver it 3 days later, or maybe more  
| | if the weather is bad.

| | ~ Some recipes doesn't need any utensils, though

-----

| 5 | Mystrile Sickle

| | ~ Honestly, sickle is not that important. It only  
| | helps you harvesting your grasses and get rid some  
| | weeds.

| | ~ However, mystrile tools gives you more percentage  
| | in your farm rate.

-----

| 6 | Mystrile Hoe

| | ~ This doesn't help much too. You can't use the  
| | mystrile level ability in the mine. But maybe now  
| | you're thinking on planting more seeds, so...

| | ~ And for adding the percentage too.

-----

| 7 | Barn Upgrade

| | ~ You can keep 20 animals there. That's pretty good.

| | ~ But 20 animals takes lots of time to brush, talk,  
| | milk and/or clip.

| | ~ You need this before your 2nd house upgrade.

-----

| 8 | 2nd House Upgrade

| | ~ Better looks and larger rooms too. With two beds  
| | and fireplace.

| | ~ You need this to be able to marry someone

| | ~ But DON'T get marry before 14th of winter, or you  
| | will lose some free chocolates/cakes from girls.

| Walkthrough |

```

=====
First Words \=====
Basically, wintertime is the season for fishing, mining, chopping stumps
and making a better relationships with everybody. Your field is totally
covered by snow, preventing you from planting anything.
=====

```

```

Middle Words \=====
Well, your money sources are:

```

- 1) Honey | Yes, the bees are still giving you honey everyday
- 2) Livestock | What can I say? They're the primary source!
- 3) All-Season Mine | You can make money here, but not much.
- 4) Winter Mine | Mining here is more profitable.
- 5) Fishing | Fishes are valuable too, especially the large one!

That's it. If any of you knows more, tell me.  
 Don't forget to do this everyday:

- 1) Chopping stumps.
- 2) Take care of your animals  
 If a snowstorm is going to happen, quickly go to the Sprites house  
 and ask them to take care of your animal for at least three days.
- 3) Train your dog with your dogball!
- 4) Brush and talk with your horse!  
 Barley may take it if it has only 6 or 7 hearts in the end of this  
 season. Beware!

Here are the special days of winter:

- Day 2 : Kano's birthday. Honey, eggs or maybe wine if you like him.
- Day 6 : Gray's birthday. Adamantine, orichalcum, mystrile, gold ores.
- Day 10 : Dog Race Festival. Rose Square, 10 AM.
- Day 11 : Doug's birthday. Oil, flour, riceball, bread, curry powder.
- Day 13 : Ellen's birthday. Honey, mushroom, egg.
- Day 14 : Winter Thanksgiving. Don't go anywhere, stay at your farm!
- Day 15 : Duke's birthday. Honey, wine if you have some money.
- Day 19 : Won's birthday. Small, medium or large fish.
- Day 20 : Mary's birthday. Red, blue or green grasses, poisonous and  
 ordinary mushroom.
- Day 22 : Nappy's birthday. FLOUR, BUDUM!
- Day 23 : Go to your girl's house and hopefully she'll invite you for  
 Star Night Festival tomorrow.
- Day 24 : Star Night Festival. Your girl's house, 6 PM.
- Day 26 : May's birthday. Shoes and cans. Or honey, bread.
- Day 29 : Jeff's birthday. DON'T give him wine. Perhaps honey or bread.
- Day 30 : New Year Eve Festival.  
 Peak of Mother's Hill, 0 PM.  
 Peak of Mother's Hill, before 0 PM for another event.

=====

Last Words \=====

- 1) Save some adamantine and orichalcum ores in your cabinet. You'll need at least 5 each kind of them.
- 2) Wintertime is best for upgrading tools... if you have your money with you, of course.

Say, you found lot of seeds to buy and don't know what to do or choose? Or maybe you know what to do but you still want to go getter and getter (just like the game says)? Hehehe, it's a normal feeling and you don't have to be ashamed or something ^\_^  
 Anyway, read on!

```

=====
| If you really want to be rich ^_^, just plant the best crop and
NOTE1| and forget the others. And then, after you're rich enough, you can
| start planting the other crops and try getting the secret crops.
=====

```

```

=====
| Actually, the advantage and disadvantage down there are all the
NOTE2| same ^_^ except for winter. I just want to be clear, in case you
| didn't read from the start (here). Just pass it once you read it.
=====

```

How to be rich in:

```

|===== [ SPRING ]=====|
|1 | Best Crops   | CUCUMBER | |
|---|---|---|---|
|2 | Reason      | They're re-grow plants and can be sold higher. |
|---|-----|-----|
|3 | How much    | 10+ bags of seeds. 20+ wouldn't hurt either ^_^ |
| | | | More plants, more profit. |

```

```

|---|-----|-----|
|4 | Advantage | You just have to buy lots of them once, and you
| |           | wouldn't have to buy again for the whole season.
|---|-----|-----|
|5 | Disadvantage | You will (really) get tired when you have to water
| |           | 10+ fields of them and you'll waste lots of time to
| |           | do it. This means that you will have less time to
| |           | meet and befriend with the girls and villagers.
|---|-----|-----|
|6 | Solution   |1 | Ask Harvest Sprites to help you, talk to them 5
| |           | | times (because it is spring) and tell them to
| |           | | water the plants.
| |           |2 | Upgrade your watering can to gold (3000 G) or
| |           | | mystrile (5000 G). Gold is preferable because
| |           | | it can water 3x3 square, but if only mystrile
| |           | | can satisfy you, pass the gold.
| |           |3 | Harvest the crops by yourself, it won't make you
| |           | | tired at all.
| |           |4 | Buy basket (5000 G) at the supermarket to help
| |           | | you harvesting.
| |           |5 | Shipping the crops may takes some times, so it's
| |           | | better if you ship them in chicken coop or barn.
| |           |6 | Find out the best time to met the girls (or any
| |           | | other person) and leave your farm once to talk
| |           | | and give some gifts. After that, continue your
| |           | | unfinished work.
|---|-----|-----|
|7 | Last Words | | Don't worry if your income isn't as high as you
| |           | | expected. You may still get low in the middle of
| |           | | spring, but you'll get lots of bucks in the last
| |           | | week of spring.
|-----|-----|-----|

|-----[ SUMMER ]-----|
|1 | Best Crops | PINEAPPLE
|---|-----|-----|

|---|-----|-----|
|6 | Solution   |1 | Ask Harvest Sprites to help you, talk to them
| |           | | twice and tell them to water your plants.
| |           |2 | Upgrade your watering can to gold (3000 G) or

| | | | unfinished work.
|

```

```

|---|-----|---|-----|
|7 |Last words | | Buy them at 30th of spring, because 1st day of |
| | | | summer is swimming festival day and you can't |
| | | | meet Won at the time. Save your energy for the |
| | | | festival (because you'll need the power berry |
| | | | prize) and plant them after you came back home. |

Phew. Now it's almost the end of this FAQ. But it doesn't mean that my grateful thanks are the least in my mind. However, I would like to say thanks to:

- |1| God, for everything.
- |2| My computer and the whole things inside it, where do you think I type this all? ^\_^
- |3| My calculator and (also) the whole thing inside it, too lazy to count by myself...
- |4| Victor, Natsume - Serious Fun, for making and translating this game. Oh yeah, this game was serious and fun!
- |5| CjayC and his GameFAQs <www.gamefaqs.com>, for hosting this FAQ.

|6| Muhammad Aji Priandaka (Ulung), for creating a great FAQ, answering my questions and giving many inspirations to write this faq.

|7| Arukaado and Harvest teen5, for answering my questions in GameFAQs BTN message board, like how to get the Moon Drop flower seeds and many more. Thanks a lot!

|8| People in GameFAQs HM: BTN message board

|9| You [your email address]

Thanks for reading! I hope this FAQ can be a good help for you!

Phew, that's all. Please tell me if you've helped me but not listed up there. I'll add it as soon as possible.

Thanks!
