1. Introduction:

-A first word: Hi everyone, this is my character guide for Klonoa beach volleyball. I made this FAQ because some people asked me to do it, they wanted a translation of the endings in the game because they have the japanese version and don't really understand it. The game is never released in the States so they had to buy the japanese version, I have the PAL version of the game so I could easily get the endings in English, so this FAQ goes to them!

-I had lots of work with this FAQ because I had to write down all the endings, and I wasn't fast enough to write the whole thing down so I had to replay the tournament four or five times per character! So I had lots of work with it but I think it's worth it because I like the game and I can help everyone out with the game who asked me to help them.

-And don't steal my FAQ! You may not use it on other sites than GameFaqs or everywhere else, you may only use it for yourself. And please don't plagiarism! This FAQ is copyright of me (see copyright below) and the game is copyright of Namco.

-Also please rate my FAQ (good or bad it doesn't matter) so I can see if I did a good job or that I have to keep updating this FAQ until it's good.

-There is also a favour I want to ask you all, help me with a few things I can't find myself. So e-mail me with everything I need to know for this FAQ. PS: See the e-mail section below for the details!

3.What's this FAQ for?

-Like I said before for everyone on the message board who asked me to do this FAQ.

-Things you can find in this FAQ:

- *All the information on characters.

- *Some information on side-characters.

- *How to unlock secret characters.

- *And of course the ending movies in English.

-Things you can't find in this FAQ:

- *Information on the game itself.

- *Things about gamemodes or courts.

*Unlockable stuff in the game.

*Any other things that are not listed above.

----> You can check out Luugiea's FAQ for this stuff :)

4.The characters:

-Alright this is a character FAQ so you can find all the information on the main characters here.

-This is how I do it (just to explain my lay-out)

NAHATOMB: "Don't worry about money. This is going to be our attraction."
GARLEN: "Thank you very much mister Nahatomb!"
<You see Nahatomb next to a green statue of him>
NAHATOMB: "But I have one problem."
GARLEN: "Yes sir?"
NAHATOMB: "The 'me' that appears at the end is not nearly at me."
GARLEN: "What?...I mean, of course sir!"
NAHATOMB: "Remake it as soon as possible!"
GARLEN: "Alright mister Nahatomb!"
<You see a shining purple Nahatomb statue>
GARLEN: "What about this?"
NAHATOMB: "This is it! I love it! Let's use him as our group's mascotte!"
GARLEN: "Whaaaat?!"
NAHATOMB: "Haha! We're going to make loads of money!"
<You see Nahatomb's theme park for sale>
COMMENTATOR: "The Garlen resorts wich opened yesterday has crashed due to problems like aggressive bussiness and a creepy mascotte."

When you see him: *In every match because he's the referee.
*In the endings of Chipple, Garlen

THE MOOS

Bio: Little cute beasts that live in Klonoa's world. Their leader is Heart Moo. Moo's serve for several things, like attacking and here as a ball.

When you see them: *In the ending movie of Heart Moo.
*In every match (the balls are made of Moos)

EVIL MINISTER

Bio: I don't think this guy appeared in other Klonoa games, it's just a minister of Klonoa's town who does bad things I guess.

When you see him: *In the ending movie of Tat.

S.H.U.M. Garlen DX

Bio: Appears in the ending of Super Garlen.

When you see him: *In the ending movie of Super Garlen.

6.Character strategies:

-Alright, time now for the hard work; The strategies! Very important to win a match and to play against a friend of course! So, first I am going to start with the strategies for every character, so practice these first:

OVERALL STRATEGIES:

-Service: The most important thing in a match: a good serve is the beginning of a point. Practice this in training mode! Here's the strategy: First press square to throw the ball in the air and then press square again to hit the ball to the opponents. The best strategy is to time your hit, just press square when the ball reaches his highest point! Also use the directional buttons to aim the ball.

-Receiving the ball: When your opponent serves or attacks, you have to receive the ball. Just run to the spot where the ball is going to fall and press X. The exact spot is where you see the ball's shadow. Also use directional buttons to aim the ball into your court. This is hard in the beginning, so practice it a lot, alright!

-Set up an attack: To score a point, you have to attack the opponent and when the opponent can't reach the ball, you score! To perform an attack first receive the ball and then press X when your your other character is under the ball and aim that ball towards the net on your court and then run towards the ball with your first character and press square(+ directional buttons to aim!). The best way to attack is to press square when the ball is on its highest point, then the ball will be knocked over the net very hard! You can also do an attack just by receiving the ball and then after that attack with the other character. You can also do a direct attack, when your opponent hits the ball high over the net, the ball will be high enough on your side to attack, so quickly press square to perform a very hard attack.

-Special attack: Very good to score two up to nine points. In the upper left corner of the screen you see your special move 'screen' with nine squares on it these squares represent your opponents court. When you score a point in the back-right corner of your opponents field, the upper-right square of this 'screen' will turn blue. When you have made a line on this 'screen', you can do a special attack of 2 points, when you have 3 lines you can perform a special attack of 3 points etc. So always aim for the places on your opponent's court you need to make a line. When you have enough points to win the game or when you have the maximum of nine points it's the best time to do your special attack! It's just the same as setting up a normal attack, but press circle instead of square. The screen will change and there is your special attack!

-Blocking: To block an attack just stand close to the net and press square. Your character will jump and hopefully it will block your opponent's attack. This move is hard to do and your opponent will mostly do a feint if your block is too

- early. So time your block well and the ball will go back to your opponents.
- Feint: When you get blocked by an opponent you must perform a feint, this means you hit the ball close over the net. So when you attack press square and aim towards the net (So use left, up+left or down+left)
 - Teams: Try to find the perfect team to defeat the enemy! Choose a great balance between characters (offensive + defensive) and go for it, here are some tips:

KLONOA

-
- Type: Power
 - Strategy: Offensive.
 - Specific strategy: Klonoa is a great character to perform attacks with. You shouldn't really bother about defending, just knock the ball to your opponents using Klonoa. Time your attack real good and the attack will be hard enough to score a point. So timing is the key to success with Klonoa!
 - Good team mate: Lolo because she is good at receiving and then you should receive the ball with Lolo, pass it to Klonoa and then knock the ball over the net!

LOLO

-
- Type: Balance
 - Strategy: Defensive.
 - Specific strategy: Lolo isn't good at attacking or feinting. Just use Lolo defensively and let her set up an attack (receiving or tossing the ball). Also when Lolo is at the net, don't attack with her but use her block to surprise your opponent!
 - Good team mate: Klonoa because he is good at attacking so use Lolo to set up the attack and leave the offensive work to Klonoa. And also don't hesitate to use Lolo's block.

TAT

-
- Type: Speed
 - Strategy: Defensive.
 - A very fast and good at receiving character. Use Tat as a defender and you'll have no problem. Use your speed to receive all the hard to take balls and then pass it to your mate and he will attack. At the net maybe you should try to do a defensive feint, it always works good!
 - Good team mate: Chipple is a rather slow but very hard character, so it is a good fit for Tat. Let Tat run and receive the ball and pass it to Chipple and he will take care of the rest!

LEORINA

-
- Type: Technique
 - Strategy: neutral/defensive
 - Specific strategy: Always use Leorina at the net, because there she will make some great points! Block your opponent's attacks and when they block you just use your feint to surprise them! Don't use her to attack because she mostly doesn't make much points this way.
 - Good team mate: Every power character (Klonoa, Chipple, Guntz, Nahatomb or Super Garlen) Will make a good fit. Well, same tactic as always, let Leorina set up the attack and the other character should attack. Also don't forget to use blocks and feints.

CHIPPLE

-
- Type: Power
 - Strategy: offensive
 - Specific strategy: This is a very heavy character, Chipple can attack very well

and always very hard. So time your attack weel and Chipple will do the rest.
He is not exactly fast or a good receiver, so you'll need on to team up with!
-Good team mate: Tat or Heart Moo will make good team mates. Use Tat to get the ball very quick and let him pass the ball to you and then Chipple's only purpose should be attacking.

HEART MOO

-Type: Balance
-Strategy: Neutral
-Specific strategy: A very well-balanced character. This is a good character to begin with, but also for advanced players Haeart Moo is a good character. He is good at attacking but also in defending! So he fits in every team. He is a great feinter at the net to, so he is really worth it.
-Good team mate: Anyone, his stats are so well balanced that it depends on your tactic wich character you choose. If you are an offensive player I should say you choose Chipple, when you are a defensive player you should take Lolo when you are a tricky player, select Leorina!

POPKA

-Type: Speed
-Strategy: defensive
-Specific strategy: Popka is not really good at the net, but he can well receive the ball and give a toss to your mate. At the net you should use his attack, if the ball is high enough the attack should be good. Weel, his special move is also good so I should say try out Popka and see for yourself...
-Good team mate: If you play offensive, I should recommend Klonoa or Guntz who are good at attacking or when you're a defensive one I should recommend Joka because he is good at the net and his attacks are also welcome.

JOKA

-Type: Technique
-Strategy: neutral/offensive
-Specific strategies: Joka is very good at the net! He blockes lots of attacks and he feints like the best. So your best purpose for Joka is feinting. Set up an attack and toss the ball over the net and your opponents will be surprised. When the ball is high enough a normal attack is also good or when a ball is too high to block a direct attack should do it!
-Good team mate: Popka, he is a good player to set up an attack and then Joka should feint and block all balls, it's as simple as that!

GUNTZ

-Type: Power
-Strategy: offensive
-Specific strategy: He is the strongest character of them all, so use him to attack. He always performs very strong attacks and the opponent will be weak against those! So toss the ball high enough for Guntz and attack!
-Good team mate: All defensive characters will do the trick. Guntz is so strong that he doesn't need a good mate, so select a defensive one, toss the ball to Guntz and go for it!

GARLEN

-Type: Balance
-Strategy: neutral
-Specific strategy: He is a well balanced character. You can use him for defense and/or offense. So you can easily switch in a match. But beware because his only

weak point is his speed, he isn't really fast, so I should recommend using him as an offensive character. Your strategy depends on your opponent, defensive opponents ask for feints and blocks, defensive ones for strong attacks and tricky opponents ask for both.

-Good team mate: Again it depends on your strategy, I should recommend Heart Moo or Popka but it's up to you for this character!

NAHATOMB

-Type: Power

-Strategy: offensive

-Specific strategy: He is strong but way to slow and hard to serve with him (his timing is different). He is only good at attacking and with his height he can block good, but only if you have a good block timing because he is so big. So use him as an attacker only! And if you know how to block, use him as a blocker too.

-Good team mate: Every fast character is good, I should recommend Tat because he is fast and good to set up an attack. So receive the ball with Tat and toss it to Nahatomb to attack!

-Super Garlen

-Type: Super balance

-Strategy: neutral

-Specific strategy: He is good at everything! He can attack very hard, he is good in setting up an attack and he is good at the net. So in every match you can easily change tactics using him. He is good in every team and for checking out some things.

-Good team mate: Everyone is good, it depends on your playing tactics, so I should say try out some different characters and see wich one fits the best.

PLAYER STRATEGIES

=====

-These strategies were added by KBV players:

strategy added by super lowie (myself :p)

-Team: Chipple and Heart Moo.

-strategy: attack

-specific strategy: I like Chipple very much, because he is very strong and he can handle the ball well. Heart Moo is good at everything so I can use him for defending and attacking. I always use Chipple's special move because it's stronger than Moo's. I always have a offensive strategy so I use Moo often for an attacker. And Moo comes always in handy for slippy feinters!

Strategy added by my younger brother:

-Team: Super Garlen and Guntz

-Strategy: attack

-specific strategy: My brother likes attacking with strong characters and he always adds Super Garlen to his team because he thinks the boss character is the best. Well, maybe Super Garlen is strong but when it comes to defending his team isn't so good. But I think attacking is the best defense, so this combination of players isn't so bad at all...
