1. Author's Note

Yo! Welcome to my One Piece FAQ! This is an RPG game which you take control of 3 young pirates in search of the treasure called "Inishie no Kakeru" with the help of the other pirates who will aid you on your journey. This is great game, though so sit back, relax and read!

2. Why should I make this Guide?

I bought this game last Wednesday and I played it for 4 days. Well, for those who don't understand Japanese, this is your opportunity! I'll try my best to cover up some Japanese in this Guide!

5. Starting your Journey

Here are the steps accomplishing to create your own party:

1. Once you start the game, Luffy will introduce himself and welcomes you to the world of One Piece. In this story, you (the Hero) will get to take part in the game! Then choose any color by pressing the Left or Right Directional Pad or Analog Stick you want to the Hero and if that satisfies you, press O to finish.

2. Next, the character type. The character type is the statistics of each character and affects your status as well. For the Hero, here are the 5 character types that you can choose:

Luffy Type	Buggy Type	Kuro Type	Krieg Type	Arlong Type
Attack - 50	Attack - 40	Attack - 30	Attack - 50	Attack - 50
Defense- 40	Defense- 40	Defense- 30	Defense- 50	Defense- 40
Speed - 30	Speed - 30	Speed - 50	Speed - 10	Speed - 20

Choose whichever you like, as long as you are satisfied in the character type you chose.

3. Then, the Hero's name. Now this is the hardest part (for those who don't understand Japanese) since the maximum characters is 4. I've provided some Japanese, both Hirigana and Katakana and here are the links:

Hirigana

<http://i2.photobucket.com/albums/y40/lucsasa/hirigana1.jpg>

Katakana

<http://i2.photobucket.com/albums/y40/lucsasa/katakana1.jpg>

Feel free to print them, I give you permission for that and also keep it for your future Japanese lessons (in case you want to learn). Once you are done...

4. It's time to edit your Male partner! Zoro will come in and you will

be able to choose any partner you want! Basically, I like the guy with the bandanna with his Japanese like clothes but it's up to you who do you want to choose. After that, choose your partner's color.

5. Now, the character type. You get again to choose 5 different character types and they are:

Zoro Type	Sanji Type	Usopp Type	Gin Type	Chopper Type
Attack - 50	Attack - 40	Attack - 20	Attack - 40	Attack - 30
Defense- 20	Defense- 30	Defense- 30	Defense- 20	Defense- 50
Sppeed - 30	Speed - 30	Speed - 50	Speed - 40	Speed - 20

Then next, name your partner.

6. It's the Female Partner's turn! Sanji will come in and gets you to pick the lovely ladies. Hmm...my suggestion is don't pick kids. After choosing, pick your partner's color costume.

7. The character type. You have a choice of 5 types for the female partner and they're:

Nami Type	Alvida Type	Tashigi Type	Vivi Type	Kureha Type
Attack - 30	Attack - 40	Attack - 50	Attack - 20	Attack - 40
Defense- 30	Defense- 50	Defense- 10	Defense- 30	Defense- 10
Speed - 40	Speed - 10	Speed - 40	Speed - 50	Speed - 50

Damn! Some of their defense are HORRIBLE!! I recommend using Alvida or Nami.

8. Then, the girl's name. Make sure it's a cute name!

9. You're done creating your party, but what about your Kaizoku Dan (Pirate Group) name? Usopp will come in and will ask to name your group consisting of 4 characters.

10. Last, your motto or catchphrase? Luffy comes in and explains on how to make a catchphrase consisting of 12 characters with the use of punctuation marks and don't leave a space. Here is my example (ignore the quotation mark):

"Minnatachi!Tatakauze!"

It's up to you on how will you make a catchphrase that will encourage you or your party. If you don't like it, you can change it anytime on the Grand Map Menu and selecting Option.

11. Nami will ask you if this is your desired party? If you like it, then let's get the show on road! Ready to go!!

6. Carddass List
