PREFACE

Hi!

Thank you for reading my second guide for the game Persona 2: Eternal Punishment, and part II of what I hope will be eventually the most comprehensive and definite guides for both the Japanese and US versions

of the Persona 2 games. This particular document is a list of all the items and equipment available in the game, as well as their uses and locations. The contents for this guide were compiled entirely by me (I have a so-called 'perfect game' for P2EP, with full analyze data for all demons and Personas, both Nanjou and Ellie routes completed, etc. The only thing I've yet to do is complete the EX Dungeon, which I hope to do before the US release). To my knowledge, the lists are complete and accurate.

Please note that this item list pertains to the Japanese version of Persona 2: Eternal Punishment. They may or may not work with the US version. (I'll make a separate guide for the US version when it's released.) Also, the lists here do NOT pertain to the first chapter of the Persona 2 series (Persona 2: Innocent Sin); the two chapters are entirely different.

As with all my Japanese guides, I've written the names of these items in S-JIS encoded Japanese text. In order to view the characters, just choose View -> Encoding -> Japanese (Shift-JIS) if you have Japanese fonts installed on Windows. Also, you could use Shodouka Launchpad to read this document; just go to www.shodouka.com and read the directions from there.

CLOSING STATEMENTS

There are 2 weapons that I know I'm missing from the list; they're the 'Soul Stabber' and 'Soul Blade', both of which are rapiers that Ellie can use. I know for a fact that these swords exist (a friend confirmed it for me with his Gameshark), but I haven't the slightest clue where to find them in the game! My original thought was that both of them are magazine prizes, but I've never won either of them. They're definitely not sold at Cleir de Lune or East Asian Defense, and I don't think they could be order made at Padparacha. It's possible they're in the EX Dungeon, but I did an arbitrary search for the names of these weapons on various Japanese search engines, and **none** of the sites I looked at knew where these weapons could be found. So, I need to know: WHERE CAN I FIND THEM? Are these the 'Dark Scimitars' are Persona 2: Eternal Punishment (I shudder to even think...). If anyone knows the location of these weapons (or anything else missing from the list), please tell me.

Also, if you have **any** questions about either chapter of Persona 2 (I've finished both), don't hesitate to e-mail me. I could always incorporate these questions into my future Persona 2 guides. ^_^

I would like to extend my thanks to the following:

-CJayC at GameFAQs, for posting this guide.

-Atlus of Japan's R&D1 Team, for making the truly excellent Megami Tensei series, which is probably my favorite RPG series ever.

-The Gaming Intelligence Agency (www.thegia.com) and RPGFan (www.rpgfan.com), for their frequent and up-to-date coverage of the Persona 2 games. Both of these sites have competent staff members and frequent updates, which is much more than could be said about RPGam...well, that OTHER site. =P

-Everyone at the Summoner's Network BBS! **waves** You all know me as 'PDT'. ^_^

More Persona 2 guides are coming soon. Until then...
